* Emilia Clarke than Kyle, yet the camera position doesn't change so she's glaring from the bottom of the screen.
* Emilia Clarke that she put this voice on to avoid being recognised in public once - pretending to be "Callie from the valley".
* Emilia Clarke - where she had previously just worn wigs to play Daenerys.
* Emilia Clarke wore a wig for the first seven seasons to play Daenerys, she dyed her hair platinum blonde for the final season.
* Emilia Galotti by Gotthold Ephraim Lessing, the main character demands her father kill her in the end, and he stabs her. While she lies dying, she argues her father is not to blame because she wanted to be killed, so that he will not be regarded as a murderer afterwards, but he replies by taking the blame on himself and denying that her death was suicide, because if it was suicide, she could not get a proper Christian burial. Technically it might not be deemed suicide, though it's probably suicide by proxy. She is wrong that this wouldn't be considered murder, at least legally, as well.
* Emiliana Torrini's biggest hit "Jungle Drum" is a textbook example of this.

Being very upbeat and rather poppy it was a big hit in Europe. And also completely different from her usual rather quiet, dark and bittersweet songs. Torrini herself was rather surprised at the success of the song since it
* Emilie Autumn, about a faerie falling in love with a human and the resulting mess.
* Emilie Autumn album (Bad situations in the past). Just her crumpets and her plague rats/muffins now....also falls into "Love is A distraction" excuse. She makes all her music on her own and sets up her own tours. Does not have the time, does not want the time.
* Emilie Autumn, American singer-songwriter and violinist, is asexual.
* Emilie Autumn chic is heavily based on her belief that psychiatric institutions have not progressed that much with patient care: specifically, she alleges that abuse is rampant but never gets brought up because "[she's] the crazy girl and he's the doctor with a million dollar education."
* Emilie Autumn has some sort of creepy porcelain doll/french aristocrat look going on.
* Emilie Autumn. Hell, their catch phrase is "Fight like a girl!" As a phrase of empowerment, that is.
* Emilie Autumn inmate, uses an English accent in much of her music and poetry readings. She does a good job with it, although there are times when it's clear that a rhyme was written with an American accent in mind.
* Emilie Autumn insists her legal name is "Emilie Autumn Liddel", despite fans buying merchandise and receiving them from "Emily Fritzges". On her website, the words "Emily" and "Fritzges" are filtered out and discussion of this name is grounds for a banning.
* Emilie Autumn is known for having pinkish-red hair, although the exact shade tends to change with each dye; her hair is naturally blonde.
* Emilie Autumn is part Emilie's autobiography, part the fictional story of Emily with an y, told through letters.
* Emilie Autumn, like the Jane Brooks Project or Ravensong, are probably never going to see the light of day.
* Emilie Autumn: Muffins or Plague Rats. The Asylum Army gets used occasionally, as well.
* Emilie Autumn says that the song "Liar" could also be called "What The Fucking Dog Did." See the quotes page for her explanation of this trope.
* Emilie Autumn's Bloody Crumpets likes to see herself as this. Then again, seeing as how the Crumpets are supposed to be a group of asylum inmates, "sane" is relative.
* Emilie Autumn's "Ghost" is about a woman who is in a courtly romance with a ghost, and ponders the full effects and consequences of their relationship.
* Emilie Autumn's "How Strange" says, "I'm not living in an ordinary world."
* Emilie Autumn's "I Know Where You Sleep" evoke this. In the context set up by previous songs on the album, it conjures up a chorus of dead little girls taunting the man who killed them.
* Emilie Autumn's "Marry Me": The girl/singer, sold by her father, is stuck in a horrifically unhappy marriage to an old man she doesn't love and whom she finds repulsive (he has rotten teeth and bad breath). She tries to fight in a passive-aggressive way against her lot in life: she spends money on dresses and accessories and hair, she drinks wine, she parties and has affairs. She feels victorious that she'll never bear her husband's children — they'll be her lover's instead. She is still a deeply unhappy woman because she is not free. It's implied her husband is king because she thinks she'll be beheaded for her infidelity.
* Emilie Autumn's "Miss Lucy Had Some Leeches" is a morbid parody of the children's rhyme "Miss Susie Had a Steamboat" about an asylum in the 1840s, complete with clapping.
* Emilie Autumn's real name is not nor has it ever been Emily Fritzges, despite fans receiving packages from her with that exact name on them.
* Emilie Autumn's story included in the re-release of her first album, Enchant, is about one of the fair folk falling in love with a human. And the resulting mess.

Autumn labeled it as "fantasy rock", which dealt with "dreams and stories and ghosts and faeries who'll bite your head off if you dare to touch them".
* Emilie Autumn", the title track of her most popular album. The song ends right before she can finish the chorus, probably to symbolize the unpredictable nature of the narrator (the eponymous Opheliac):
* Emilie de Ravin initially just wore a wig to play Belle in Season 1. When she was bumped up to series regular in Season 2, she dyed her hair brown. Notably, in the season premiere, which picks up directly from the finale, her hair is a couple of shades darker. When she became pregnant in Season 5, she reverted to her natural blonde and just wore wigs again.
* Emilie de Ravin's pregnancy becomes a plot point in Season 5 when Belle and Rumple fear for the safety of their child. Belle gets put under a Sleeping Curse to allow them to make the passage of time vague so she could start appearing with the bump.
* Emilie Simon's "Ice Girl" uses a music box-like sound to both invoke the sound of ice and a creepy fairytale sound.
* Emil I Lonneberga, Emil has to take his best friend, who has gotten blood poisoning, to the doctor through a blizzard.
* Emilio Estevez and his daughter also have a brief appearance in an episode of
* Emilio Estevez. When asked about this, he said "I've never been a guy that went out there to get publicity on myself. I never saw the value in it."
* Emilio Salgari wrote the nineteenth century version into one of his
* Emil Karpo (a Russian cop) in Stuart A. Kaminsky's Russian mysteries did that once—as well as the usual thread, he put a single hair of his across a doorway or something, which let him know the KGB had searched his room.
* Emil Krebs (1867–1930), German diplomat, is considered the greatest polyglot of all time. He was fluent in more than 60 languages not counting the regional dialects and dead languages and used 33 of them on a daily basis. He was so proficient in most of them that native speakers were often asking for help in linguistic matters, which is no small feat, given he spent a large part of his adult life in China. According to his contemporaries, he needed roughly 2-3 months to achieve relative fluency in a new language.
* Emil of Lonneberga frequently gets sent to the tool shed as punishment for pranks. His little sister Ida eventually gets jealous, and decides that she wants to go to the tool shed, too. However, most of her attempted pranks backfire into nice actions, and when she eventually manages to commit one, it (of course) gets blamed on her older brother.
* Emi looks like a younger and shorter version of her mother, Meiko. Hisao ends up lampshading it in Emi's route.
* Emil Sitka was a valued member of Columbia's short subject department stock players (who supported
* Emil Strago is definitely not an Australian, but his actor, Jonny Pasvolsky, is.
* Emily and Aiden, too, at the beginning of season two. It happens after Emily finds out that
* Emily and Nolan have one in the season two finale after Emily finds
* Emily, another bump in the Ross/Rachel road. They have a season-long courtship. Everyone, except the jealous Rachel, really likes her and they plan their wedding in England. After being humiliated when Ross says Rachel's name during their wedding vows and making the somewhat reasonable demand to not see Rachel anymore if he wants the marriage to work, suddenly everyone acts as if they never liked her and she was being unfair.
* Emily Axford and Brian K. Murphy developed an office romance and eventually married.
* Emily Bauer is mostly known for being the voice of Dawn and not much else.
* Emily become closer after singing a duet version of Pink's "So What".
* Emily begins to date and then agree to marry the son her own age of the family who killed her father in order to get close to them and enact her revenge.
* Emily Blunt had the idea that Emily would frequently be seen running around in the background of certain scenes, giving the impression that she was always on the

go.
* Emily Blunt. He (as the director) had approached another actress to play her but she liked the script so much that she asked him to cast her instead.
* Emily Blunt, so there were many scenes where her lower section is hidden. Amazingly, Blunt's face doesn't look as full as most pregnant women's faces are, so it was hard to tell if she was at all.
* Emily Blunt was actually submitted in the supporting categories during awards season because the film had more of an ensemble than any clear lead.
* Emily borrows Thomas' "Cinders and ashes!" in "Tickled Pink" when she sees James' pink undercoat.
* Emily Brent, a strictly Christian woman, kicked her young maid Beatrice out of the house when she discovered that the girl had become pregnant; the desperate Beatrice drowned herself.
* Emily Brent was once again replaced by an actress named Ilona Morgan.
* Emily Brent was replaced with an entirely new character, an actress named Ilona Bergen.
* Emily Browning. The pigtails help convey her innocence. In the brothel world at least, she is a virgin.
* Emily Browning. The process ended up frying her hair and she had to cut it short the moment filming wrapped.
* Emily Browning - though mostly justifiable in that she's clearly scared or baffled through the major part of the film.
* Emily can show some remorse for treating Matt badly in their relationship after Matt calls her out on her behavior and can then potentially
* Emily can't stop herself from pulling the thread in her S4 episode of
* Emily Carroll, gay comics artist and writer best known for her horror comics.
* Emily Carroll, has a particular fondness for this trope. Some specific example include:
* Emily Climbs, but she has reason to suspect her best friend of the deed.
* Emily Crachit (Miss Piggy) does this to Scrooge (Michael Caine) when he's talking to Bob (Kermit the Frog) in
* Emily Dickinson, but she still had an active social life and close friends. It was even said she sent down baskets of treats for young children with a rope.
* Emily Dickinson poem goes over SB's head, Gary recites one more his speed:
* Emily Dickinson wasn't even published before her death. If she had been well enough to destroy her own work before she died (instead of trusting a friend to do so) we never would have seen a word of it.
* Emily doesn't even know what that funny third pedal on Ash's car is in an early
* Emily Eyefinger is a series of children's books about a girl who is born with an eye on the end of her finger.
* Emily H The Viking Princess features a sword that can cut another sword.
* Emily H The Viking Princess: Implied in regards to the titular character's genetic magical powers, which is referred to as "ethnobotany".
* Emily H The Viking Princess is up for discussion. He is allowed to go unscathed on the dangerous treasure island for being a "good sole" and eventually joins the heroes, but he commits some morally questionable actions which include molesting an unconscious Emily in his very first scene.
* Emily H The Viking Princess Viking-era Scandinavia adventure to rescue her missing father.
* Emily in Paris. Emily, who is a young American woman, goes to Paris and finds her attitude/views clash with that of French people's on many things. For instance, she finds an ad which consists solely of a nude woman walking over a bridge problematic at best-the French simply don't get what the issue is. She's pretty surprised by how casual Antoine and Silvie are about having an affair, of which his wife also knows (Silvie's even her close friend). When her colleagues are told about her firm's "corporate commandments", which include avoiding workplace romances, Luc heatedly accuses her of seeking to "kill their French soul". In addition, they also find a lot of her ideas for marketing overly crass and unconventional for their tastes. Nonetheless, some like Camille and Gabriel are still charmed by her.

* Emily in Paris is bubbly, kind, and beautiful with pale blonde hair.
* Emily in Paris: While having lunch with Mindy, Emily accidentally orders a condom with her croissant thanks to her awful French.
* Emily is a dead-bride that plays the piano in Bone-jangle's tavern.
* Emily is another. When another character asks her to not tell anyone about a gift Emily had made for her, Emily says "I'm really good at keeping secrets.For instance, the government said I couldn't make any more because the algorithms I used were too similar to the ones they use when they make ..." At which point she slaps her hand across her own mouth.
* Emily is a schoolgirl but her age is not revealed in the books, though the cartoon has her turning seven in one episode (while
* Emily Janes. The most information the public can get is through her official website, but there's not a whole not of information on there either.
* Emily Kaldwin. Depending on how violent Corvo himself is throughout the game, they get even more disturbing.
* Emily, Lauren's friend, is being abused by her boyfriend Daniel. This sparks the plot, as Lauren tries to stand up for her. Emily still doesn't leave him though, and blames herself for making him mad.
* Emily Litella will always do an editorial complaining about something she misheard, and Chevy Chase or Jane Curtain will end up correcting her, with the usual response: "That's very different. Nevermind." In one sketch, in an attempt to do something a little different, the scene ends with Curtain complaining about how Emily always gets things wrong, to which Emily remarks "bitch".
* Emily managed to keep hidden from her mother for years the fact she had dropped out of college. She even went so far as to claim a storm kept her mom from attending graduation and sent a photo of herself in a rented cap and gown.
* Emily mentions her imaginary plans for her daughter Lorelai's wedding — imaginary because she knows Lorelai won't ever let her plan her wedding. It was going to be a Russian royal winter theme, with snow-white roses, trees decorated with white lights and candles, with snow everywhere. Lorelai would arrive in a silver sleigh pulled by white horses. Given how much Lorelai loves winter and first snow, Emily absolutely
* Emily Monroe Is Not The Chosen One. She is therefore constantly attacked by supervillains who want to test themselves against the most powerful hero in the city. Since Emily's own power is less than a joke (she can change her hair and eye color, and that's it), she is forced to use the environment to fight back and neutralize dangerous superhumans.
* Emily of New Moon, by Lucy Maud Montgomery, the titular Emily is punished this way on occasion by her Aunt Elizabeth.
* Emily of New Moon has yellow hair and yellow (actually technically very, very light brown — "almost amber") eyes.
* Emily of New Moon, Terry's mother loves her son to the point of hating anything that she feels he might love more, even going so far as to poison his dog.
* Emily of New Moon, there is a Murray cousin who died young. This trope is invoked, almost by name, and the young boy is described as being more handsome and more virtuous than anyone. Ever. So naturally, he had to die.
* Emily Rodda, Mary-Anne Dickinson (Jennifer Rowe) — Later reprints of her books that had been published under the Dickinson name used the Rodda name instead.
* Emily Saves the World", after the giant globe Emily tries to deliver to the Sodor Animal Park falls off her flatbed and starts rolling around Sodor, it chases Thomas, Annie, and Clarabel. They manage to escape it by switching lines.
* Emily Sevensheep of the quickest possible instance of the trope: from crash to proposal in less than 5 seconds!
* Emily singles out a player who doesn't wear a cup. In reality, rugby laws are very strict on protective clothing - wearing cups are not permitted. The same goes for Ross's knee pads.
* Emily's New Coaches", Emily saves Oliver from a similar fate when he stalls on a diamond crossing.
* Emily's Reasons Why Not's post-football-season Monday night lineup in 2006, and

failed miserably, getting cancelled after its only airing in January despite heavy promotion during the fall of 2005. It was said ABC bought the series without seeing a script. It was cancelled so quickly that magazines that came out the next week were stuck running feature stories promoting a show that was no longer on the air because their press deadlines came before the airing of the one episode.
* Emily's Runaway Imagination. This leads to "Plince" becoming Prince's nickname.
* Emily's the most athletic of the four, swimming being her main sport, and while she may not be as smart as Spencer, it's mentioned that she gets good grades.
* Emily, the Beating Heart Bride, is described as a "living shadow", though in truth, she is made of inky darkness but always three-dimensional.
* Emily the Strange is a 13 year old goth girl who can build bizarre contraptions, such as a "time-out machine" or a computer thing called the "Oddisee".
* Emily the Strange: Stranger and Stranger, Emily does this with the Black Jackal spider. Even so, the bite still partially paralyzes her.
* Emily the Strange: Stranger and Stranger: Emily was very capable. She even explains it to another character.
* Emily the Strange: Stranger and Stranger. To determine which Emily is the right one, a game of Emily Jeopardy was created to determine who was the real Emily. The two Emilys came up with questions for the other.
* Emily The Strange The Lost Days, after Raven successfully completes a physical feat, thus winning a complex card game, Raven calls upon birds to poop on Attikol, Umlaut, and many others of the traveling show employees.
* Emily The Strange The Lost Days Emily/Earwig loves her nightmares. It gives her an adrenaline high.
* Emily The Strange The Lost Days: Lists in the main character's journals always go to 13—except when Molly writes one list.
* Emily the Strange when she outsmarts Venus Fang Fang's backyard alarm system.
* Emily Thorne (formerly Amanda Clarke) is this to her father, David Clarke, on
* Emily to Emily in season 4 also suggests that she's had a lot of beards, when she says she "screwed guys to make [her feelings for Emily] go away."
* "Emily" trilogy than Anne of Green Gables. Its description makes writing feel on par with a religious experience. It gets Emily into trouble when she refuses to change traits that give her characters superficial resemblances to her real life family and neighbours.
* Emily VanCamp for that as the digital files of the two are shown briefly.
* Emily Wants To Play disappears into a puff of smoke after you stare at her long enough. Likewise, Emily and the dolls vanish in the same way after you have successfully found and tagged them when playing Hide-and-seek with them at 12 AM.
* Emily Wants To Play has Chester, one of Emily's "friends", a dummy that appears in random rooms in the house. If you spot him, you have to leave the room as soon as possible or he'll kill you.
* Emily Wants To Play, the first thing you have to do is to run to the next room before he catches you.
* Emily was almost played by Ciara Hanna, they even had the contract ready, but she backed out before signing. She would return to play Gia in
* Emily was the reverse - an American in the book but played by the British
* Eminem actually has several of these, most of which were directed at his ex-wife, Kim.
* Eminem also reiterated the UL about Lauryn Hill that she once said she'd rather have her children starve than for white people to buy her album (and/or she can't stand white people). This comes up twice on The Slim Shady LP.
* Eminem alter ego Slim Shady "could be working at Burger King, spitting on your onion rings."
* Eminem") and the misinterpretation of the song's lyrics about drowning and not lending a hand.
* Eminem appeared while wearing denim salopettes and a hockey mask, and wielding a chainsaw.
* Eminem as he was growing up was because he was the only white kid in an all-black neighborhood.

* Eminem, as well, as the culture expects one to fight back when shot at.
* Eminem. As you would expect from Slim Shady, it has some pretty dark lyrics about drug use, satanism, cannibalism and the like.
* Eminem does this in the song "My Darling", where his separate identity (Slim Shady) is heard in a deep, demonic voice.
* Eminem during "White America", with him noting (and maybe mocking) his influence on society.
* Eminem frequently does a falsetto for female characters in his songs.
* Eminem generally raps as his alter ego Slim Shady, although he frequently blurs the line between the two personalities. In effect, there are three people in his music: Marshall Mathers, the quiet, slightly disturbed kid; Eminem, the self-assured, cocky rapper; and Slim Shady, the brutal, murderous gangster. Which one's in charge usually depends on his voice (the angrier he sounds, the further down the list he goes).
* Eminem has named his daughter as a particular hair trigger - during their feud, Benzino threatened Hailie's life in a song.
* Eminem has never been very comfortable with the spotlight and nowadays prefers to stay home in Detroit unless he feels the need to appear in public. When his song "Lose Yourself" was nominated and won an Academy Award, he was at home dead asleep.
* Eminem has several songs about this trope. Most infamously, his controversial murder ballad "Kim", but also "Crazy In Love", "Love You More" and "Love the Way You Lie"
* Eminem has the lyric "You wanna take advice from somebody who slapped Dee Barnes?" Em was worried that Dre would take offence to this. Dre laughed upon hearing it.
* Eminem have the word "fuck" in them are "Just Lose It" and "We Made You".
* Eminem, his mother who didn't care enough for him, people who bullied him for being white in a black neighborhood.
* Eminem in daily parlance, even being included in the Merriam-Webster dictionary. Some people claim the title for themselves with a less toxic connotation.
* Eminem is and what he looks like, as well as being able to name one of his hit songs, few people who aren't into rap music have actually taken the time to listen to a full album from him. Whenever you encounter people discussing his lyrics or rapping ability in-depth, it's almost always amongst people in the hip-hop fandom; if someone knows him for any reason other than his music, it's likely for being everywhere in the late 1990s and early 2000s due to the controversy his lyrical content stirred up.
* Eminem is seen taking one such bath in the video for his single "3 A.M."
* Eminem is widely considered one of the best rap - if not overall - albums ever.
* Eminem. It's only at the last minute that he realises he has no way to send the tape.
* Eminem. It's since given rise to the term "stan" to mean an overly-committed and toxic fan. Over time, the term "stan" as a means of pointing out obsessive and over-the-top fan behavior has become diluted due to "stan" being used as synonymous with fandom culture regardless of toxicity.
* Eminem loves this, as one would expect, and puts it to especially great use in "Berzerk":
* Eminem — responded to this claim by saying "I don't remember sending anybody."
* Eminem" mother Kim to the beach and dumping the body into the ocean.
* Eminem: "My English teacher wanted to have sex in junior high / the only problem was, my English teacher was a guy / I smacked him in his face with an eraser / chased him with a stapler / and stapled his nuts to a stack of papers".
* Eminem. One part of the song "Cleaning Out My Closet" is dedicated to blasting her for this.
* Eminem presented himself as having a split personality between Marshall Mathers, the serious, insightful rapper, and Slim Shady, the thuggish rapper with a dark sense of humor. He has occasionally revisited this concept later on, notably in the video for "Monster".

* Eminem rapper Proof, after he was shot. Their efforts were in vain; one of the last scenes of video shows Eminem attending Proof's funeral. On April 11, 2006, Proof was shot and killed in real life due to a barroom dispute.
* Eminem. Santa's doctor tells him he's risking heart failure. He doesn't give up milk and cookies but chooses low-fat versions and goes to a gym, advising everyone to do so for their health and to be more attractive.
* Eminem's "Cleaning Out My Closet" where he refers to his altercation with a guy who was having an affair with his wife:
* Eminem's Fox Theatre and saying "This is the Motor City. And this is what we do." Of course, it must be noted that the spot was more about Detroit's (both the city and the US auto industry) comeback from economic catastrophe than it was about the car itself... which may well have appealed to Eminem.
* Eminem's hit "Love the Way You Lie". The relationship is "mutually destructive".
* Eminem's "Just Lose It", he tells a male chorus to grab their left nuts to make their right ones jealous. This is their response.
* Eminem's lines are usually stocked with these, and one of his most famous ones is how he managed to make a 4-bar rhyme scheme out of "orange juice" in "Brain Damage".
* Eminem song "Just Lose It" includes the lines: "And it's cool if you let one go/ Nobody's gonna know, who'd hear it?/ Give a little "poot poot", it's OK! [Music Stops - Fart Sound plays]/ Oops my CD just skipped/ And everyone just heard you let one rip"
* Eminem song "The Real Slim Shady" serves as the current page quote, he himself comes from a long line of white rappers with that particular look (tank top, shorts, backward baseball cap, etc.), a family tree that includes Vanilla Ice.
* Eminem's partial cover/sampling of the same title uses the chorus to surprisingly effective melancholy effect.
* Eminem's political rant disguised as an acceptance speech for Best Documentary Feature.)
* Eminem's "Stan" features an obsessive fan who takes Eminem's songs way, way, too seriously.
* Eminem's "Stan" might also count although it's not a love letter but just letters of an obsessive fan to his idol.
* Eminem's "Stan". On the Slim Shady LP's song "My Name Is" one of the most famous lines is "I just drank a fifth of Vodka you dare me to drive" so in Stan, Stan quotes this when he drives on a rainy night with his pregnant girlfriend in the trunk on a tape to Eminem "Hey Slim I just drank a fifth of Vodka you dare me to drive"
* Eminem's "Stan", the title character, furious that his idol Eminem still hasn't responded to any of his letters, is about to drive off a bridge with his pregnant girlfriend locked in the trunk of his car and drown them all, and is narrating these events into a tape recorder as a final letter to Eminem. The obvious flaw in his plan — namely, that he can't mail the tape to Eminem if he's dead — doesn't occur to him until just as he's going over the edge.
* Eminem's "Stan", the title character's suicide is portrayed rather seriously, except for his last words (spoken into a tape recorder before he drives off a bridge):
* Eminem's "Superman" certainly sounds like a love song until you listen to those words. "Crazy In Love" fits too.
* Eminem. The Academy would have done anything to avoid the controversy of having to actually give him the award in the midst of the protests. To Em's credit, he toned down the misogyny and homophobia later in his career, even coming out as supporting gay rights.
* Eminem. The first single off the album was the uplifting "Not Afraid".
* Eminem. The titular character kills himself and his pregnant girlfriend over not getting a timely response to his letters by Eminem. Only when Eminem is finally writing a letter in response does he realize that he saw a news report about someone killing themselves over not getting letters, and realizing it was Stan.
* Eminem. To illustrate, the song opens with Slim announcing that he’s going

to try drowning himself. He then adds, “You can try this at home. You can be just like me.”
* Eminem tones of these tracks, they often serve as the lead singles to his albums and, as a result, are some of his more popular and well-known songs:
* Eminem to some degree has this as well, as his style is actually very eloquent and verbose at times, despite whatever the topic may be.
* Eminem, to the point he was beaten into a coma and had to re-learn all his basic functions when he woke up.
* Eminem was put on probation for assaulting the man he claimed he saw kissing his wife Kim.
* Eminem. Whereas his brother and even Sally are portrayed normally, his mother is played by a garish drag queen and Eminem himself is in the audience and shouts, "Fuck you, Debbie!"
* Eminem. While he would be looked up to as an idol by pretty much everyone on this list and even wore an Africa pendant during high school, it should be noted that he came from an impoverished background and was engrossed in Detroit's hip-hop scene instead of simply imitating it. It helps that he stopped wearing baggy sweats and the like after he got sober.
* Eminem who leaves a trail of violence and wanton destruction wherever he goes.
* Eminem, whose real name is "Marshall Mathers" and the origin of the "Eminem" moniker.
* Eminem with a song about killing and raping his own mother that's played completely for laughs.
* Eminem would regularly trash the notion of himself as a positive role model. Later in life, he would go on to adopt three children, kick a drug habit that had its grip on him for longer than he'd been signed, and found a charity for disadvantaged youth.
* Eminent Domain fraud. Eminent Domain is the power by which governments can take land (while, theoretically, providing just compensation). Usually, this is to remove houses and buildings to make way for things like roads and utilities. The fraud kicks in when some companies claim to have eminent domain power when they don't, threatening to throw people out of their houses when they have no legal right to do so.
* Eminent Domain: Space opera themed (despite the title). Players seek to explore the stars and build their civilization through expansion, trade, research or force.
* Emi Nitta. While the allegations were proven to be un-true, it was said that this scandal took a hit on her career.
* Emira Blight acts this way towards both her younger twin brother Edric and their little sister Amity (when she and Edric aren't busy acting like
* Emirates Air Line (spelled that way to distinguish it from the Emirates Airline) has a red Tron Line on the rear of each car.
* Emirichu has a video where she explains her constant clumsiness and some examples of it. At one point in the video, she shows a drawing of herself slipping on a banana peel.
* Emir Sadettin Kopek is an even nastier example than the previously listed characters, first shown
* Emi Shinohara Cyrene and Jumeau before she took on the role of Makoto Kino/Sailor Jupiter.
* Emi's prosthetic legs are of the realistic type: inert, not entirely functional, obviously artificial, and require constant maintenance (she also has another pair of carbon-fiber running blades of the type used by paralympic athletes, which she uses for sports). Emi shows us exactly how a person with enough conviction can be more than awesome enough with just those, without needing any fancy bionics.
* Emissary from the Divine: Either a prophet from God or an angel or mortal picked for a certain role.
* Emissary from the Divine might have seen their pharaohs as a divine emissary, with a mission to rule.
* Emissary from, who embodies this trope by being a Level 7 Tuner Monster. Tuners, to say it simply, combine with one or more other monsters to form a Synchro Monster

whose level EQUALS that of the combined monsters EXACTLY. Meaning that to summon a Level 8 Synchro Monster... yeah. However, by summoning him with ONE Tribute instead of two and halving his ATK and DEF, you drop him down to Level 5, which is a lot more usable.
* Emissary of the Afterlife, which, despite being a Grim Reaper, has an effect which really has nothing to do with death.
* Emission Impossible", Peter stops at a window while driving Lois and her pregnant sister Carol, who is in labor.
* EMIYA Alter meets Ruby Rose when she bumps into him. While he just sees her as an ally, she gets a slight crush on him.
* EMIYA Alter's Noble Phantasm, Unlimited Lost Works, causes the swords of Unlimited Blade Works to erupt from inside the victim's body after they're shot by it. As a result, they're quickly ripped to shreds from the inside before exploding into a shower of blood and gore.
* Emiya, his older, more cynical, Servant-ified self from an alternate timeline, as well. There’s a reason why many a Fate/Grand Order.
* Emiya Shirou is that there was originally a sex scene planned at that point but it was dropped, not that what Ilya actually does to Shirou if he says “yes” is much better where it turns out she was tricking him into handing over his soul.
* EMLL decided to make Mil Máscaras, a character created specifically for movies, into a gimmick used by an actual luchador. This was also the origin of Huracán Ramirez.
* EMLL during a movie starring the latter. Black Man's greatest success in Lucha came off the heels of the Santo-Los Misioneros de la Muerte feud, where the resulting spike in tercias matches lead to Los Tres Fantasticos (Black Man, Kung Fu, Kato Kung Lee) to become the top draws in Mexico following Santo's retirement.
* EMLL founder Salvador Lutteroth did not participate in matches, he had fought in the Mexican revolution prior to becoming a promoter.
* EMLL in 1987. Two years later, Águilar would go on to shave the legendary Martha Villalobos while Rossy Moreno would continue to cement her legacy by shaving Vicky Carranza.
* EMLL is also the trope maker in regards to mini estrellas. "Midget wrestling" had been around for decades and teenagers(and preteens) getting in the ring before growths spurts was as old as pro wrestling itself but it wasn't until the 1990s when Antonio Peña came up with the idea to make divisions for people below certain heights
* EMLL is where the masked luchador culture, and to a lesser extent, the high risk moves associated with it, come from.
* EMLL legend Fishman and his sons, El Hijo De Fishman and Black Fish.
* EMLL luchador Bruno Victoria was sometimes known as "ninja". The promotion later saw "El Ninja" in 1991 and later still, his sons, El Hijo del Ninja and El Ninja Jr. 1991 was also when IWRG was graced by El Ídolo Oriental Takeda, another Mexican ninja.
* EMLL's 57th Anniversary on "Super Friday", Cien Caras at one point gained an obvious advantage over Rayo de Jalisco Jr. and continued to press his attack as pieces of trash from the audience bounced off of him.
* EMLL show. Despite this humiliating setback, Segura would continue to go after the masks of luchadors, though he would never get Rojo's and would go on to be shaved again by Golden Terror in the main event of La Arena 'Canada Dry' show in 1947.
* EMLL (The Lakeside Professor) Blue Panther, a doctor outside of the ring, opened his own acupuncture clinic.
* EMLL veteran Blue Panther runs an acupuncture clinic when not wrestling.
* Emma.: After they get engaged, Mr Martin waits for Harriet in the park at Hartfield. Harriet runs to him happily, he smiles a sweet smile and they share a gentle kiss. Then they hold hands and run together in the green grass. Set to a romantic song. Only slow-mo is missing.
* Emma and Josh share a love of puns; Emma is more compulsive about it, but Josh

clearly finds her puns funny and sometimes puns right back at her; Josh also gives his animals punny names. Emma and Josh are also both very fond of animals; Emma keeps multiple cats in her house, and other pets in her room; Josh makes pets out of many of his farm's livestock.
* Emma and Lily have this in spades. Lily first appears in a flashback as a special friend that Emma once had. Their scenes are shot, lit and scored in a way that made fans wonder if Lily was really
* Emma and Lyn learn their mother Vidalia married another woman, Eddie, which is quite a revelation to them. Although Vidalia's dead from the beginning, this relationship has repercussions throughout the series.
* Emma and Neal meet when Emma steals a car, not realizing that Neal is sleeping in the back seat. Ironically, Neal had stolen the car himself.
* Emma and Regina have been noted to have this, particularly from Season 4. One episode is devoted entirely to Emma attempting to rebuild her friendship with her. And Emma's devotion to Regina is startlingly like that of a lover,
* Emma Approved set in an office, a number of the novel's relationships become this:
* Emma Approved with Emma as a professional matchmaker and lifestyle guru.
* Emma as I shall be to see your Jemima." She was very fond of Emma, because when commencing that work, she said, "I am going to take a heroine whom no one but myself will much like."
* Emma attempts a forbidden Spell to enter his subconscious in a vain attempt to relieve him of the Curse, leaving out how she's likely to end up an Empty Shell if it failed. Rean immediatey cuts off the spell and snaps at her for being so reckless.
* Emma, a young French girl, is among the plane passengers turned into a vampire. According to Nora, she can't be more than eight.
* Emma becoming the Dark One, as well as the heroes' missing time from the six weeks they spent in Camelot (explored through flashbacks).
* Emma Bull, psychically gifted Orient discovers that laying hands on a murder victim's body enables him to dream their deaths.
* Emma Bull, where the rock band has Elvish lead guitar and bass players, and a faerie roadie.
* Emma, but then you realize that the game is set in (effectively) France, and that she could just as likely be of Southern European descent or something similar, and it just becomes a mystery. She does seem to be darker than Shauna, who has an Arabic name and brown skin.
* Emma by Jane Austen, Mrs. Elton tries to help and "elevate" Miss Fairfax, an orphaned young lady from a local impoverished family who is nevertheless very talented, accomplished and educated because she was adopted by kind friends of her late father. Mrs Elton feels very superior to everybody in the neighbourhood and fancies herself "Lady Patroness". Because Jane is socially of less consequence than her insufferable mentor, she has to be civil and accept the unwanted attention, especially when she forces on her a position as a governess.
* Emma calls Lori to tell her the riding school is closed due to burst pipes in the stable yard. While Emma makes a jocular reference to the yard resembling an ice skating rink, her husband Derek's repair efforts are successful (since he rehabs buildings for a living), even uneventfully so.
* Emma Caulfield) as Sharona's creative writing teacher. She hadn't "done it" yet, but she was about to.
* Emma Coolidge in Volume Five, a deaf woman who develops the power to
* Emma decides that they will publish Cathy's journal and the evidence collected as a fantasy novel.
* Emma do this behind her back when they break the news of their engagement to her father.
* Emma: Emma and Mr Knightley declare their feelings to each other in the Hartfield shrubbery. The following day, they "steal" half an hour to go over the same ground, literally and figuratively, to enjoy some time alone as a new couple. They tell others about their love and intention to get married after some time.

* Emma: Emma loves matchmaking, spending a good deal of the novel trying to set up the people around her with each other. Yet, the only time she's successful is when she sets up Miss Taylor and Mr. Weston. Every other one is a failure.
* Emma: Emma really resents Mrs. Elton. Her close friends know about her opinion and they quite agree because Mrs. Elton is really obnoxious. However, Emma doesn't want other people to know about it, so she might mention that Mrs. Elton is "very pleasant and very elegantly dressed."
* Emma, Emma thinks she's in love with Frank Churchill, but when she discovers her true feelings for another she realises she never really loved Frank. Meanwhile, she persuades Harriet that her first love wasn't good enough for her, so Harriet sets her sights on various unobtainable men before gratefully accepting her first love's proposal again.
* Emma, Emma Woodhouse actively meddles in Harriet and Robert Martin's relationship. He asks her to marry him, but Emma thinks Harriet should marry someone more genteel and persuades Harriet to refuse him (and in such a way that Harriet doesn't realize that she's being manipulated). Mr Knightley tells Emma off for this.
* Emma: Emma Woodhouse feels Attraction Before First Sight towards Mr Frank Churchill. He's the son of her close family friend, though they have never met each other. They are socially equal and close in age, and both are intelligent, charming, and handsome.
* Emma Emmerich admits that she simply wears glasses for show, and because her step-brother Hal wears glasses. And Hal, thanks to those
* Emma eventually ends up with Mr. Knightley, a longtime friend and neighbor of her family's.
* Emma explains Hearthbrook High School's club and clique structure to Gabe. She does this by making a rapid pencil-sketch. This is in-Universe, as Gabe compliments her for her art skills, and the JoJoJo's comment on the presentation.
* Emma, Frank puts his head on Emma's lap during their Boxhill picnic. It's a great sign of intimacy (and actually very inaccurate to the period; people wouldn't have behaved like that, not even as a joke, especially a lady and a gentleman who are not engaged, nor married — Frank wouldn't have done that and Emma wouldn't have let him). Probably done to emphasise how embarrassing Emma and Frank are at the picnic and how improper their flirting is.
* Emma Frost, a group of quintuplets (later brought down to triplets) with powers similar to her. Turns out that they're genetically her daughters as well.
* Emma Frost also walks around wearing lingerie and sexy dresses a lot. Granted she's a seductress who uses her telepathy to attack - and she can turn into diamond if she wants to defend herself.
* Emma Frost does not have telepathy, only the power to turn into diamond.
* Emma Frost Emma seems to have buried the hatchet with Jean and is seemly no longer attracted to Scott.
* Emma Frost has five cloned daughters, the Stepford Cuckoos. She can be protective to them, and she is quite saddened when two of them are dead (even if one of them, Esme, once betrayed and tried to kill her).
* Emma Frost in the building of Krakoa or the fight against Mother Mold.
* Emma Frost in the Ultimate Universe is a pacifist whose willingly to teach human students, in the 616 universe Emma is often a
* Emma Frost is an ally of the X-Men but occasionally sides with the villains depending on what she can get out of it.
* , Emma Frost learns that two of the teens that suddenly appeared at the X-Mansion are genetically her children with Scott. Emma calmly leaves the room for a moment then everyone hears her yelling.
* Emma Frost — but canonically, in the comics, Emma herself is a case of this, as she's a Boston native who puts on an English accent.
* Emma Frost of a father gets the teacher fired (and forbids him from ever seeing Emma again). They later meet again when Emma ends up attending a college where he is teaching. There the teacher, Emma, her telepathic roommate, and Emma's new best friend get involved in a love rectangle where the roommate telepathically

manipulates the best friend into accusing the teacher of sexual advances in order to remove the two people standing between her and Emma. In response to this revelation, Emma mind wipes her roommate, then uses her own psychic power to hijack her best friend's mind and make everyone think she's a lying, crazy stalker. Afterward, Emma confesses to the teacher what she did in order to protect him, in the name of being honest with the man she loves in hopes that he would not hold it against her in the event he wanted to begin a relationship with her at last. Unfortunately, finding out that Emma was a mutant AND had used her psychic powers to get her best friend labelled insane causes him to reject Emma, turning her into the cold-blooded villain she would become.
* Emma Frost on a villain who threatened her students by removing the only positive figure from their memory, effectively causing them nothing but emotional pain for the rest of their cold existence.
* Emma Frost seduces a Russian general by projecting a mental image of herself so he thinks she's having sex with him, when in fact she's sitting a distance away looking bored.
* Emma Frost's taste in men, for reference Emma has relationships with Sebastian Shaw and Namor both of whom are highly amoral and cruel.
* Emma Frost. That's not even going into her constantly reading people's minds to see how secretly anti-mutant they are.
* Emma Frost, the guy who's the usual tank for the team. Unfortunately by superhuman standards, she's a flyweight who can lift at most 2 tons in diamond mode and she loses her top tier mental powers when she's transformed. So in fights where she turns into diamond she'll go up against enemy heavy weights mostly to tank their hits and then turn her attentions to the enemies she can actually hurt.
* Emma Frost, the other resident psychic. Frost also uses her powers to neutralize a hostile group of reporters, male and female, by making them orgasm themselves into a faint.
* Emma Frost - though she hadn't been quite as evil for a while when it happened.
* Emma Frost. Until it turns out that others, most notably Magneto and Polaris, have survived as well.
* Emma Frost, when writers finally saw fit to bring back Cordelia and elevate Christian because there's no better time for an LGBT character with a tragic backstory to be featured. With this, Adrienne is now the only one of the Frost siblings who truly qualifies for this trope.
* Emma Frost who had been aged up from birth to their teens in order to infiltrate the X-Men. They're only a few years old chronologically.
* Emma Frost who only begrudgingly cares for her teammates. In the movie she uses her diamond powers to stop bullets hitting her fellow prisoners, showing a great deal of self sacrifice.
* Emma: Harriet Smith fondly remembers how Robert Martin went three miles round one day in order to bring her some walnuts, because she had said how fond she was of them.
* Emma: Harriet Smith throws her rather pathetic mementos of Mr Elton into a fire after having shown them to Emma, her friend she looks up to. They were not exactly a couple, but Harriet had been in love with him.
* Emma has Emma and Knightley as the Bickering (constantly criticizing each other, snarky, in denial about their feelings for each other) vs. Harriet and Martin as the Peaceful (both sweet people and are kept apart only by Emma's interference).
* Emma, her betrothed agrees to live in her house until Mr. Woodhouse passes away since they both know he couldn't bear living without her.)
* Emma in Regency times, it's more of a surprise that he actually waited until she was twenty-one to act on his feelings.
* Emma is called silly, unassuming, or a simpleton over the course of the novel. She's not a smart girl, but very kind, mild, and meek. Emma believes her good heart makes up for the lack of intelligence and that she would make an ideal wife for a gentleman. Mr Knightly is of the opinion that men of sense do not want silly wives.
* Emma is displeased when she finds out that her protegée Harriet considers marrying Mr Martin, a young farmer. She talks Harriet out of accepting his offer.

* Emma. is Emma's confusion when Mr. Knightley and Jane Fairfax perform a duet (Jane on piano and vocal melody, Knightley on violin and vocal harmony) immediately after Mrs. Weston tells Emma that Mr. Knightley may have feelings for Jane.
* Emma is extremely pretty and becomes popular in Highbury once Emma takes her under her wing, but she's silly, not at all clever, and unable to decide for herself about anything. Emma puts ideas in her head that she has a right to get married well because of her looks, and she falls in love quite easily.
* Emma is in love with Will Schuster. Later, Will finds out that he loves her too. But Emma's already dating this dentist who drives a sweet ride. Then Will tries to woo her by being cool like the dentist.
* Emma is revealed to be bisexual, hooking up with a woman quite early on. Her romances with Cruz and then Nico also form a large part of the plot.
* Emmalee Thompson plays Prue as a young child in three episodes. The resemblance between her and
* Emma—encourages Emma's fanciful speculation that there must be a secret love between Jane and the unseen Mr. Dixon (the new husband of Jane's best friend, who is like a sister to her). It doesn't help that Frank is choosing to allay suspicion of their engagement by flirting with Emma.
* Emma, Miss Bates' speeches always become this to both the readers and the characters.
* Emma: Mr Elton, a local vicar, to Emma Woodhouse. Emma is the most prominent lady in the community and a wealthy heiress of thirty thousand pounds. She seemed encouraging because she wanted him to marry her friend Harriet, but Emma never imagined he could be so bold and she's deeply insulted by his advances.
* Emma, Mr. Elton writes a love riddle for Harriet's collection and claims it was written by a friend, but he means it as a way of courting Emma, who thought it was meant for Harriet.
* Emma, Mr Weston shares his umbrella with Miss Taylor (future Mrs Weston) when it starts raining after the Sunday mass. In the novel, he met Emma and Miss Taylor when they were walking and he gallantly borrowed two umbrellas for them from Farmer Mitchell's because it was drizzling.
* Emma: Near the end of the book, Mrs Weston gives birth to a baby girl Anna.
* Emman of all people...however, gave a Loud House/Sailor Moon crossover concept a second chance twice....with the second one being his version of
* Emmanuelle: Bee actually dumps Emmanuelle while they're in bed together after sex.
* Emmanuelle — Most popular erotic film franchise of all time. 37 official films and various ripoffs by other studios since 1973.
* Emmanuelle portrays the titular character's mentor, Mario, as ostensibly straight. In the original novel, upon which the movie was based, Mario was bisexual, with a strong inclination towards other men.
* Emmanuel's mother wants to control every aspect of his life, most importantly his problems with his
* Emmanuel's power is super speed, which has been directly compared to
* Emmanuel's song "Bella Señora" (Beautiful Lady) is a subtler example, as the lyrics don't openly state that the man is one of these but has some verses about the "lady"'s skin not being "porcelain-like" like in the past.
* Emma Peel. (Although the small and "bird-like" Mrs Bradley of the books is a better example.)
* Emma Peel was the third of four people to costar with John Steed on
* Emma pressure except attend senate meetings, to argue with politicians who are clearly shown to be deaf to reason (even Serizawa seems to know these hearings are largely an exercise in futility).
* Emma previously switched to a black costume during her brief stint as a member of
* Emma, Robert Martin writes a letter with a marriage proposal to Harriet Smith. The actual letter is not a part of the novel, but it's a short but lovely letter, and even Emma admits it is very well-written, especially for a young farmer (of whom Emma snobbishly assumes that he cannot be educated).

* Emma Roberts and Jennifer Aniston have a 22 year age gap between them.
* Emma Roberts Madison Montgomery, and never looked back. These days, she's best known for horror movies and dark dramas, often in villainous roles.
* Emma's been stabbed and needs to be rescued? He runs across the walkway, sniping things from a hundred yards with his handgun without flinching.
* Emma's boyfriends become pushy over the secret and Emma pushes them away over it (or it causes a huge fight). She only reveals her secret to her second love interest in the last episode.
* Emma Sheen and being shown the colony gassing the Titans carried out before the series began, she realizes the Titans are massive assholes who only want to keep an iron grip on their power who only claim to be just defenders of peace.
* Emma. She is a sweet and innocent girl to be sure, but she's also incredibly dim, especially compared with the exceedingly clever Emma.
* Emma's relationship with Hook is this for pretty much all fans who don't ship
* Emmas's older sister Isabella (Mrs. John Knightley) is a sweet, beautiful and elegant woman, an affectionate mother, wife, sister and daughter, and a perfect hostess. She quite fulfills the role of "angel of the house" as she never disagrees with her husband. Her brother-in-law Mr. Knightley admits that compared to Emma, Isabella's not that interesting and knows that Emma is far more intelligent.
* Emma starts as a poor peasant girl, becomes a flower girl, a maid, and ends up becoming a gentleman's sweetheart. While her background technically prevents her from becoming a true lady in the society's eyes, her angel-like disposition, good education, eventual marriage (although with
* Emma Stone is one of the few prominent millennial celebrities who doesn't have any verified social media. She doesn't talk about her personal life much and usually brings her parents or brother to events with her. Her husband, television writer Dave McCrary, has a verified Instagram account and used it to announce they'd gotten engaged but he rarely posts himself. They allegedly got married in 2019 or 2020 but no official announcement has ever been made. She was clearly very pregnant later on in the year (and dropped out of a project at the last minute) and had a baby girl in March 2021 but she's never confirmed it.
* Emma Stone, she'd become firmly established as one of Hollywood's brightest young stars for serious films.
* Emma Swan has an easy explanation: she is officially found as a baby by the side of the road, so she enters the system as any abandoned baby would. The same can be inferred of Lily.
* Emma (the 2020 adaptation), she's turned into a shrew who constantly fusses at the slightest hint about her children's discomfort, makes a huge deal out of minor things and repeatedly makes her baby cry. She never once talks kindly to her husband and always snaps at him.
* Emma the fact that her ability is inconsistent, particularly when she's emotionally compromised, implying that Emma's claims of her "superpower" are somewhat exaggerated and/or really worked best during her bailbondperson job, when she was was confident and in control of the situation. She is significantly less in control of things once the magic is revealed, and she's the new kid on the block trying to figure everything out.
* Emma, the title character's reaction to Harriet's confession of love for Mr. Knightley makes her realize feelings she (though not the reader) was completely unconscious of until then:
* Emma, the titular character tries to match up various members of her circle of friends. It doesn't always go so well, and the trope is rather deconstructed.
* Emma Thompson and also starred as Elinor Dashwood. She won an Academy Award for Best Adapted Screenplay.
* Emma Thompson seems rather fond of doing this. At one point, she even said "You can't imagine what satisfaction can be gotten from throwing a pie into someone's face."
* Emma Thompson. She has Scottish ancestry on her mother's side and grew up there for a time, so she's quite good at it.
* Emma Thompson was 35, and looked like exactly what she was — a grown-up

woman in her thirties. Despite aging Elinor up to 27, Thompson still looked a bit too old for the part — but she nailed Elinor's character so perfectly and so thoroughly that absolutely nobody cared one whit. Every Elinor before or since has been compared to her, and even the well-received performance of Hattie Morahan in the 2008 miniseries has more or less been considered 'great, but not quite as great as Emma'.
* Emma tries this but finds herself unable to do so since Eddy and another group of women are praying or singing for Vida.
* Emma uses an Altergeist deck, which are spell-casters that are based on various female ghosts in mythologies, though rather monstrous looking.
* Emma Verde from Nijigasaki is a Italian speaking Swiss foreign exchange student.
* Emma was being prepared to get repackaged as Emmalina, a prissy model type character. The debut kept being delayed for weeks at a time because they felt she wasn't playing it right. Reportedly she didn't want the character, and eventually appeared in a segment where she announced she would be going back to her original Emma persona.
* , Emma was conceived by Adrien and Chloe after one drunken night while they were actually in the process of a divorce. Nathanael and Marinette, on the other hand, were trying for several years to have a child, but without success. Averted when Adrien and Marinette get married; they are both expecting to require fertility treatments in order to give Emma siblings, but a few months later, they get definite proof the problem wasn't about Mari.
* Emma Watson even does this when she's not acting, making it more of an actor tic, though she has managed to tone it down somewhat in the later films.
* Emma Watson in person first, she would have vetoed her casting as Hermione for being too pretty. But she first spoke to Emma on the phone, where the eleven-year-old girl spoke for a full sixty seconds without taking a breath, and knew she was perfect. Upon seeing how cute Emma was in person, she said "It's film so get over it".
* Emma Watson University and is rumored to have grades rivaling Hermione Granger's - the icing to the cake is that she considers her education more important than her acting career.
* Emma Watson. Watson practiced for such a scenario by threatening to report her schoolmates to the principal if they ever asked for her autograph.
* Emma Watson while she had short hair, but had to wear extensions for them.
* Emma, when John Knightley and his wife visit Hartfield, he and his brother John greet with a handshake and a simple "how d'ye do" which Austen notes as "the classic English mode" of almost entirely concealing brotherly affection that would have them drop everything the instant the other needed help.
* Emma: When they decide to marry, Emma is 22 and Mr. Knightley about 38, and the text suggests it's slightly unusual. Previously, when Mrs Weston observes that Mr. Knightley might marry Jane Fairfax (who is the same age as Emma), she says there is "a little disparity of age" between them.
* Emma Woodhouse is a lifestyle coach and head of the Emma Approved company, while Knightley is her business partner and friend who does all the "boring stuff". As in the novel, they get a
* Emmeline": In which the eponymous 19th century New England woman has an illegitimate son who is taken away from her just after birth. The son is given up for adoption and raised by a family in Ohio; Emmeline, meanwhile, saw the baby for such a short period of time, she is easily convinced by relatives that she had a daughter, not a son. Twenty years go by, and Matthew, a handsome young laborer, appears in Emmeline's hometown. They unwittingly fall in love and marry. Later, a member of Emmeline's extended family shows up to attend a funeral, and, while there, recognizes Matthew as the child Emmeline gave up long ago. After this earth-shattering reveal, Emmeline is abandoned by her son and made to be a pariah in her community, where she lives the rest of her life in miserable isolation and shame.
* Emmerdale, as Jackson mocks Aaron for thinking he's the only gay man in the world with a manly job or personal angst about his straight gayness.
* Emmerdale has gotten violent on several occasions when he thinks someone is

trying to take advantage of his little girl.
* Emmerdale. He was much less forgiving however when he discovered she was cheating on him again with a man he despised (who happened to be her cousin) and got his revenge by committing suicide, having just discovered he was terminally ill, and framing her for murder.
* Emmerdale: Liv Flaherty came out as asexual, spoke openly about it with both her family and friends, and one storyline focuses on her entering a romantic relationship and having to explain to the boy she's dating that she's asexual.
* Emmerdale Maisie Wylde and Ryan Lamb are caught in bed together, and are promptly informed (after many months of hiding this from them) that they are half siblings. Which disgusts both of them and wind up sending Maisie into rehab and getting their father shot.
* Emmerdale, Robert Sugden clings to his love interests for comfort in two particularly emotional moments.
* Emmerdale, Robert Sugden slept with both men and women but insisted he was straight up until he met and fell madly in love with Aaron Dingle. After fighting his feelings for about one and a half years, he eventually started a relationship with Aaron and eventually admitted his bisexuality, saying "I just want to be myself now, with you."
* Emmerdale: Robert Sugden thought he had everything he'd ever wanted in life: a gorgeous and spirited wife, life in a big house, and a fancy job with a high income and major perks. And then he fell madly in love with Aaron Dingle. In Robert's words, "falling in love with you was the worst mistake I ever made."
* Emmerdale's Robert Sugden and Aaron Dingle have a Headbutt of Love on the morning after their wedding before Aaron goes off to his sentencing for his GBH charge. They also take the opportunity to tell each other mutual "I love you's" while pressing their heads for extra emotional impact.
* Emmerdale we have an glaring example centering around Chas and Carl.
* Emmerdale wife Charity and drank poisoned wine in order to frame her for his murder.
* Emmeryn's executioner. In actual game play, ranged weapons can only hit up to two squares away from the unit at most.
* Emmet Bregman, the documentary-maker who visits the base in the two-part episode
* Emmet Otter's Jug-Band Christmas for the first test, while they weren't actually filming, and they kept trying over a hundred times to get it right, and it never fell the "right" way again. The puppeteers remained in character the whole time, resulting in some absolutely hilarious, laugh-until-you-pass-out outtakes. There's also:
* Emmett Clark in "Shootout of the Mountain Man" becomes a bounty hunter by accident when he kills a fleeing robber in self-defense. He initially strives towards standards of integrity trying to take prisoners alive or only going after
* Emmett Cullen) has quite a few gay fans. He has lampshaded this in interviews, but has said that he really loves his gay fanbase.
* Emmett Dalton, of the Dalton Gang. In 1892, he and four other gang members, including two of his brothers, attempted to rob two banks in Coffeyville, Kansas. All four of his comrades were killed in the ensuing shootout. Emmett sustained 23 gunshot wounds and continued to live until 1937.
* Emmett Till in 1955, and the disgrace of a murder trial that followed and ended in the acquittal of his murderers, was largely seen as the event that kickstarted the Civil Rights Movement, more than even Rosa Parks not giving up her seat just over a year later (which is generally used as the starting point of the movement at the grade school level as a kid-friendly substitute event due to the flat-out violent nature of the Till lynching).
* Emmett Till (posthumous example). He was beaten up, tortured (including
* Emmet, upon being told to act like a stool, barges into a saloon and loudly declares that the patrons should come sit on him.
* Emmitt Otterton and Manchas. Doug darted them, making them unable to communicate intelligibly before either of them could say much about the Night Howlers.
* eMMMbot punches SinisteRRR across the freaking town in the climax of

* Emmylou Harris' "Together Again" is so associated with her that many people forget that its writer, Buck Owens, had a #1 hit with it first.
* Emmymade channel features a cute and delightful female host who cooks and tastes bizarre things. Sometimes she tries out bizarre recipes that she finds online, and sometimes she just tastes already prepared strange foods, such as military rations, foreign candies, and strange tropical fruits. She gives everything a fair chance, even things that look like they'd be thoroughly disgusting.
* Emmy-winning writer Richard Curtis admitted that he wrote the episode "
* Emo) and Sweaty-Man (a portly man who sweats a lot when nervous, and yes that's his superpower).
* Emo]-core punk. Twenty years later, emerged under that name as an actual hardcore-punk-derived musical subculture.
* Emogame, at which the player character remarks that at least they know they suck. Then Scott elaborates, saying that they have held onto that shit and used it to build an attack helicopter, and now they must kill you because you know their secret. Your response is "God, this plot is getting worse and worse."
* Emogene) revel in their eternal life, provided by a mysterious serum Lorenzo Cabot obtained.
* Emohawk: Polymorph II", Lister's gorilla-like bride attempts to forcibly consummate the marriage (he married her to get a part for Starbug), prompting Lister to flee.
* Emo Jones, was so poorly received that everyone (especially Doug and Rob) forgot that it even existed. So yeah: Don't expect a second episode anytime soon.
* Emokid and Chemokid webcomic, don't have psychic powers or Mad Science at their disposal. They got their names because one of them cries all the time and the other has cancer.
* emo member of the group, almost never smiles, except for a few occasions (Usually when he gets his revenge on Strong Bad... or when he's had too much caffeine).
* Emo Music Breaking the Habit, with the recording part being lost between tellings, and Linkin Park was considered an emo band back then.
* Emo Music, with enough moments of self-awareness and humor to make it clear that they knew the sentiments contained within the album weren’t remotely healthy — something that many of the bands that followed in their footsteps seemed to lack.
* Emo Philips seems to really like coleslaw if his stand-up routines are anything to go by, sometimes with stories loosely relating to one another via the food. He also has a
* Emo Philips: When I was a kid my parents used to tell me, "Emo, don't go near the cellar door!" One day when they were away, I went up to the cellar door. And I pushed it and walked through and saw strange, wonderful things, things I had never seen before, like... trees. Grass. Flowers. The sun...
* Emo Phillips he'd live!'") or outright claiming he'd do a better job of parenting than his parents did and recounting an incident where he almost died from drinking bleach. Turns out his mother had "foolishly decanted it into the floor wax bottle".
* Emo Phillips, known for his high-pitched voice, oddly dark humor and bizarre sense of fashion and physicality.
* Emo Phillips's comedy is based heavily around this trope/paraprosdokians.
* Emo Phillips stand-up routine: "She sends me to the principal, and I get to his office and I sit down and he looks at me and says, 'Emo, Emo, Emo.' I said, 'I'm the one in the middle, you drunken slob.'"
* Emo Phillips tells a story of offering to rescue a drowning woman if she will have sex with him. So she thinks it over...
* Emo Phillips twisting straightforward observations into the contorted perspective of his character.
* Emo Phillips with a severed head - and just before your flashlight dies, its eyes open. But no, apparently, it's the public speaking thing."
* Emo Teen, and encourages him to embrace them. He politely but bluntly points out to her that these same powers are the reason he was homeless and alone when they met.

* Emo Teen bemoans this fate, and discusses it with Harynx in one scene.
* Emo Teen, nearly getting denied an audition for not being pretty enough. She went to a local Macy's department store and was given a makeover to audition, and eventually won the part of Veronica.
* Emo. This sparked a huge scandal, causing the number of teenage emos... to double, since now, everybody and their mother knew what emo was.
* emoticon(ﾉ⊙Д⊙)ﾉ 彡 ┻━┻ , (屮=益=)屮 彡 ┻━┻ , ‎ (╯°□°)╯︵ ┻━┻ , ┬──┬ ¯_(ツ)
* Emotional and psychological abuse has this as a staple. The abuser will resort to things like insults, dares, and taunts that prey on the victim's fears, insecurities, etc. As one might expect, this can cause the victim to have difficulties (or a complete inability altogether) to form healthy relationships because of the trauma. They might even latch on tighter to the abuser, especially with abusers who play the "I'm a saint for putting up with you" card.
* Emotional Bruiser: mighty warrior, devoted husband and father, and named by Helen as the only one who's nice to her but Priam.
* Emotional Bruiser: Tough, maybe brutish character who's surprisingly emotional.
* Emotional Entities and Rogal Zaar enter the picture after he appears.
* Emotional Entities in there as well, as while the entities have pretty much complete control, they also appear to take on at least some of the personality traits and goals of the people they are possessing.
* Emotional Intelligence: Why It Can Matter More Than IQ, there was a story about a mother and her son who were abducted by the mother's ex-boyfriend. The kidnapper made the child hide under a blanket while he beat the mother to death. Later, a psychologist asked the son to draw a picture. The result was a race car driver with a pair of humongous eyes, which were interpreted by the psychologist as symbolic of the boy's own wide eyes as he peeked at the killer.
* emotionally distant. Where Hammond is a loving grandfather, Dearing is introduced as the child protagonists' aunt, and she's too devoted to her job to consider having children. Notably, Claire shares Hammond's all-white wardrobe, and she's also asked to watch two children while their parents are going through a divorce. Lampshaded by Simon Masrani in one scene, when he gets sick of Claire spewing financial figures at him.
* Emotionally lobotomized a former member of their own collective, Ganthet, who had previously been expelled from the Guardian Council, went on to found the Blue Lantern Corps and ultimately returned as a serving Green Lantern.
* Emotionally Tongue-Tied: Has trouble uttering specific words or phrases, like "I love you" or "I'm sorry."
* Emotional Maturity Is Physical Maturity: Emotional maturity automatically equates to physical maturity.
* Emotional Maturity Is Physical Maturity: The more competent you are, the more physically adult you are.
* emotional meltdown. She's locked the door, and refuses to open it, so Kalten invokes "Elene magic" (breaking it).
* Emotional Regression: Reverting back to an immature emotional state.
* emotional stress. Using these powers, however, eats at her stamina like nothing else, and when she uses them too much, she falls into a sleep that cannot be externally disrupted no matter how inopportune the following situation.
* emotional turmoil. in the sky had something to do with it, or she has no internal conflict at all about being a psychotic sociopath...probably the third thing.
* Emotion Bomb: A magic spell or psychological weapon that can force people to feel certain emotions.
* Emotion Bomb goggles. They not only enhance his emotion-sensing sight, but also increase the power of his emotion blasts.
* Emotion Control that is focused on manipulating someone's emotional state.
* Emotion Eater: A being or creature which derives power from the emotional state of other people, usually by exploiting their negative emotions or draining their

positive emotions.
* Emotion Eaters, and are even more terrifying opponents than this description would make anyone think. Yet, even they are scared by a few things:
* Emotion Eaters than the other types of vampires (and at least can see the value in occasionally helping him to be the good guy).
* Emotion Eaters, when Dan discovers that he is a cubi, his half sister reveals that she knew all along that he probably was a cubi because he didn't suffer any health problems from living on a diet consisting mostly of ale.
* Emotion Eater who feeds on love. This freaks out the teller because she had been using an ordinary deck and The Lust came from a different version, and she was sure not to mix them up.
* "Emotion" is by Samantha Sang, but the Bee Gees wrote it, produced it, sang back-up, and eventually recorded their own version.
* emotionless cyborgs obsessed with the survival of their race, and the best way to do that is to forcibly convert humanity into them. That they are a direct threat to mankind means that they have also sought to destroy them, or sizable chunks, in the distant future when we manage to successfully fight back.
* Emotionless Girl although it's subtle enough that only Equius has noticed so far. Only time will tell how that will pan out.
* Emotionless Girl always speaks like this. The times when she doesn't is normally a time that you're REALLY screwed.
* Emotionless Girl at first, but it turns out that she's just sad and lonely, having to guard the time gate while watching her life go by. It makes sense that she is guarded because she is a Sailor Soldier first (installed at the gate as a very young child) and has to come up with a civilian identity later.
* Emotionless Girl (at least, certainly not when compared to Diaz), but it's frequently made pretty clear that most of Peralta's immaturity around the very strait-laced Santiago is intended to provoke this kind of reaction from her.
* Emotionless Girl: A woman expresses no enthusiasm vs. a woman expresses a lot of enthusiasm
* Emotionless Girl in Wildfire, to the point where Kelsey points this out.
* Emotionless Girl, she doesn't react in any way except to ask him to get off.
* Emotionless Girl, she gives a ridiculously adorable smile Donovan even claims he's graced by tender warmth of her smile.
* Emotionless Girl: That girl who rarely if ever emotes, which hampers her ability to form attachments with others.
* Emotionless Girl. The game's CG Gallery names this CG "Mezurashii Egao" ("An unusual smiling face").
* Emotionless Girl (though it did take a few years for it to kick in).
* Emotionless Girl), until her warmer personality gradually takes over.
* Emotionless Girl, until Pinkie is in danger of being crushed by a boulder. This causes Maud to run faster than any of the other ponies with a determined expression, punch the boulder to dust with her bare hooves, and after bringing Pinkie down from the rock slide, hug her out of relief and raise her voice when scolding her. She also smiles at the end of the episode, saying she loves Pinkie Pie.
* Emotionless says a lot about how much she cares for and understands her friends.
* Emotion patches that killed the entire government of New New York and 99% of New Earth's population.
* Emotions are what also feed the chaos gods. As a mater of fact, it was the excess indigence and pleasures of the Eldar that gave birth to a chaos god and led to their fall.
* "Emotion Sickness" deals with Kim and Shego, under the influence of the
* Emotion Suppression: If being emotional would make it hard to deal with the problems at hand, then suppressing it would be helpful.
* Emotions vs. Stoicism — Emotions are harmony, and Stoicism is discipline.
* Emotions vs. Stoicism: The Enlightenement saw themselves continuing the Greek, specifically the Socratic tradition of using logic and critical thinking to discover truth and question the foundations of the society they were in, rejecting

emotion as an impediment to seeking truth. The Romanticists saw themselves either questioning the value of the truth found by Enlightenment, or looking for alternative sources in emotion or intuition. Schopenhauer, despite following on from the very Enlightenment Kant, argued how humans were motivated by a desire to live and procreate, rejecting the Enlightenment notion that humans actually desired the truth, while Nietzsche, despite criticizing Romanticism, noted how many seemingly rational philosophers like Plato, Socrates and Spinoza were influenced by their own psychology in determining what they considered to be "true", and emphasised that human beings were really constituted by many motives that are rarely interested in what is objectively true, arguing that what we considered reason was ultimately illusory.
* Empath and Grouchy, with Empath being emotionless in his early years and Grouchy just being a grouch.
* Empath assumes that this is what happened to Smurfette at his wedding day in the
* Empath himself gets interrupted by Polaris Psyche as he is making out with Smurfette in private while under the influence of the probes in "Monkey On Your Smurf".
* Empathic Environment like Metropolis (the Home of Superman, and so bright, cheerful and optimistic) and Gotham (the Home of Batman, so dark, dingy and pessimistic).
* Empathic Healer: Someone who can heal others but in the process, they become afflicted with what's bothering the people getting healed.
* Empathic Healer: The ability to heal other people's wounds by taking it onto themselves.
* Empathic Healing makes a high pain threshold necessary (there are also pain spells which work by touch). As for making out... a Mord-Sith "marriage" ceremony is basically a french kiss with an Agiel between the two mouths.
* Empathic Healing take the pain from another and inflict it on yourself.
* empathic powers go out of control. Any joy Ariel had over her new position is immediately quashed and she falls into a deep depression.
* Empathic Shapeshifter: If other people dictate what you transform into.
* Empathic Shapeshifter with regards to this — it's almost always quite shiny, but when we're shown the TARDIS belonging to the War Doctor, it's absolutely battered and covered in stains and flaking paint, both outside and in. This reflects the War Doctor's been-through-it-all, weary personality.
* Empathic Weapon nature, most Intelligent Devices fall into this category for their masters.
* Empathic Weapon that slowly corrupts and drives mad the person who wields it. The player can use it for the entire game after earning it and suffer no ill effects.
* Empath's lead-in speech to a marriage proposal to Smurfette in the
* Empath: The Luckiest Smurf adaptation of Smurfette's origin, Papa Smurf causes Smurfette's physical form to melt back into a lump of clay before he casts the spell that reshapes her into her current real Smurf form. In the story "Days Of Future Smurfed", Empath in one of his jumps into the future sees Smurfette melting back into a lump of clay after Papa Smurf's spell that turns her into a real Smurf eventually fails.
* Empath: The Luckiest Smurf adaptation "The Smurf Impersonators", during the part of the story where Gargamel disguises himself as a Smurf, he tries to tell Sassette that he has been working on doing a perfect Gargamel impersonation to explain why he sounds like Gargamel. Sassette simply tells him that he doesn't sound quite as menacing as the real Gargamel.
* Empath: The Luckiest Smurf. Admittedly, Empath finds Mirror Universe Smurfette attractive but prefers to save himself for marrying the normal universe Smurfette. Prior to this, there was Wonderette Smurfette, who when compared to Smurfette lived up to being the Whore as she made moves on almost every adult Smurf, even going so far as to rape Empath and have him be framed as her rapist. In the end, it turned out that Wonderette was really Hogatha the evil witch in disguise.
* Empath: The Luckiest Smurf... all except for Laconia, who is somehow unable to hear the music, and with Smurfette's help puts an end to the evil wizard's plans.

* Empath: The Luckiest Smurf alternate timeline story "Hefty, The Luckiest Smurf", Duncan McSmurf plants a sword in the ground as a memorial for Empath, who not only was returned to Psychelia, but had his entire memory of being a Smurf stripped from him (or so it seems), meaning that Empath Smurf has truly died.
* Empath: The Luckiest Smurf among the Smurfs who were taken by the hurricane and dumped inside a volcano from which they escape) claims the blood of Jesus Christ over himself and his fellow Smurfs to protect them from the sharks that come swimming around them, ready to devour them. Whether it is because of this or what Tapper says, the sharks eventually swim away, leaving the Smurfs unharmed.
* Empath: The Luckiest Smurf and later Polaris Psyche were both considered this when the Psyche Master exiled them from Psychelia at least one year apart from each other. However, the Psyche Master has allowed Empath to have visits in his private chamber to discuss things that were necessary to the plot of the current story.
* Empath: The Luckiest Smurf and must wash herself off. During her shower in the waterfall, Empath tries to use his telekinetic abilities to cop a "psychic feel" of Smurfette while she is undressed and showering. Smurfette is offended by this and tells Empath "hands off" until she comes out.
* Empath: The Luckiest Smurf, and that he wears green plaid instead of blue. Also the shoulder strap of his kilt goes over his right shoulder instead of his left.
* Empath: The Luckiest Smurf, and the Smurflings using it to challenge the Game Master to a magical online multiplayer game.
* Empath: The Luckiest Smurf: Ares. For some reason he wants Empath to be his "god of conquest".
* Empath: The Luckiest Smurf, as Papa Smurf does nothing to get him out of living a life away from his fellow Smurfs in Psychelia.
* Empath: The Luckiest Smurf as payback for her refusal. Eventually, the Mirror Universe Empath loses his telepathic abilities for good when confronted with his world's version of the Psyche Master, sparing Smurfette of any further torment from him.
* Empath: The Luckiest Smurf as well as all Psyches have telekinetic abilities.
* Empath: The Luckiest Smurf a year after they have been released from the collective consciousness of the Psyches, and the only cure for them is to return to the collective. Which means in Polaris Psyche's case is that either he has to return to Psychelia to live or remain in the Smurf Village and die. That is, until Empath presents Polaris with the alternative, the Long Life Elixir, which has the possibility of extending Polaris' life, though at the risk of turning him into a Smurf.
* Empath: The Luckiest Smurf being called Gutsy, a nickname that he got from Hefty for always having the guts to stand up to him. In "A Wild Winter Solstice", though, Papa Smurf accidentally refers to Duncan as Gutsy before realizing his mistake.
* Empath: The Luckiest Smurf breaks the spell, restoring Smurfette and Hogatha to their normal appearances.
* Empath: The Luckiest Smurf. By the end of the story, Vanity wears them because he likes looking at himself while wearing them.
* Empath: The Luckiest Smurf cartoon show. This leaves him coming home to an empty village save for his friend Polaris Psyche.
* Empath: The Luckiest Smurf, Clockwork Smurf and Clockwork Smurfette's relationship results in the creation of their offspring Baby Clockwork Smurf — plus a hundred other Clockwork Smurfs.
* Empath: The Luckiest Smurf comes from. Smurfette figures this out for herself when she performs the hat-removing ritual on Empath during their marriage consummation in "Empath's Honeymoon".
* Empath: The Luckiest Smurf comic gag, a drunken Grouchy thinks that Empath is actually Jokey wearing an Empath disguise in order to fool him. When Empath tells him that he's actually Empath, Grouchy replies, "And I'm Smurfette."
* Empath: The Luckiest Smurf could be heard from outside his Smurf house.
* Empath: The Luckiest Smurf dabbles in the creation of this with the use of his smurfesizer.
* Empath: The Luckiest Smurf Duncan McSmurf and his bride Brenda McSmurfette got a

Scottish clan themed wedding, with the male Smurfs all dressed in kilts and bearing swords, with the marriage vows being more of treaty being confessed between two parties seeking an alliance with each other in war.
* Empath: The Luckiest Smurf, Duncan McSmurf carries around a silver dart that he could fling really fast at a were-Smurf if necessary. This is revealed in the story "The Night Of The Weresmurf" where Brainy is being transformed into a were-Smurf.
* Empath: The Luckiest Smurf, Empath and Polaris both have their wrist and ankle cuffs removed upon their release from Psychelia, but are never shown to rub their wrists or ankles afterward. Apparently being in cuffs for a long time causes very little discomfort.
* Empath: The Luckiest Smurf, Empath can pretty much mindlink with anyone, although it seems to work better with telepaths than with non-telepaths, as non-telepaths can mainly receive messages, but sending them requires more effort on their part than with telepaths. Empath can also invoke a group mindlink in which all his fellow Smurfs are connected to each other and to Empath as one collective mind communicating with each other, though this is mostly used to give Empath increased mental energy to perform certain tasks.
* Empath: The Luckiest Smurf, Empath Smurf and Polaris Psyche are considered this after they have separately left Psychelia. However, in Empath's case, he can return only on the grounds that he would willingly become the Psyche Master's successor, which isn't what Empath wants at all. In "Papa Smurf & Mama Smurfette," Papa Smurf, Smurfette, their child, and Polaris Psyche are exiled from the Smurf Village by Empath, who takes over as the new village leader. The Smurflings and Baby Smurf, realizing how cruel the adult Smurfs have become, chose to leave the village to join the exiles.
* Empath: The Luckiest Smurf ends with Empath and Smurfette's wedding in the final chapter.
* Empath: The Luckiest Smurf entry in Western Animation below) becomes the basis for Handy developing the portable telesmurf for his fellow Smurfs, allowing them to communicate with each other via a magical video phone.
* Empath: The Luckiest Smurf episode "Squeaky", when Smurfette has a peaceful talk with Tapper after the death of her pet mouse, Smurfette asks Tapper if it gets easier to deal with losing even her best friends to death, and Tapper responds with this, although as a Christian he does tell her that there's a better world waiting for them where there is no more death.
* Empath: The Luckiest Smurf episode "The Magic Egg", Tapper and Duncan McSmurf are both turned into Smurfettes by Jokey striking the magic egg and teasing them about being Smurfettes for not wishing to use the magic egg. The two gender-bent Smurfs find each other's new forms rather attractive.
* Empath: The Luckiest Smurf film series turns into a were-Smurf at every full moon.
* Empath: The Luckiest Smurf, Grouchy, being jealous of Empath having the privilege of marrying Smurfette and enjoying intimacy with her, creates for himself a love doll named Angel that he can enjoy himself with. Nobody else except Papa Smurf knows about it, though, until the doll is somehow given life.
* Empath: The Luckiest Smurf has an alternate timeline tale where Smurfette confesses her love for Papa Smurf, leading to this kind of situation that eventually has most of the entire village revolting against it.
* Empath: The Luckiest Smurf has Empath secretly forming one in the alternate timeline where Papa Smurf marries Smurfette.
* Empath: The Luckiest Smurf, has lookalikes of Puppy, Hefty, Duncan McSmurf, Vanity, Brainy, Smurfette, Empath, and a gender-flipped version of Gargamel playing various roles in the story, while the Smurflings themselves are thrust into the characters of Dorothy (Sassette), the Scarecrow (Nat), the Tin Woodsmurf (Slouchy), and the Cowardly Lion (Snappy).
* Empath: The Luckiest Smurf, Hefty's notable slur for telepaths (particularly Empath and the Psyches) is "star face", referring to the star-shaped birthmarks of both characters.
* Empath: The Luckiest Smurf, he looks no different from an ordinary male Smurf.

* Empath: The Luckiest Smurf, Hermes tells Empath that what Ares wants is eternal war and slavery.
* Empath: The Luckiest Smurf holodecks, the Imaginarium is also being used to satisfy a Smurf's desire to be alone with a Smurfette, as seen on more than a few occasions.
* Empath: The Luckiest Smurf, including Smurfs. In "Flowerbell's Love Triangle", he is seen praying for Papa Smurf's soul in regards to the corrupting influence of magic, as Papa Smurf is the village's resident sorcerer. Although in "Smurphony Of The Night", Empath's use of a Smurf head symbol for a religious symbol helps him fend off a Smurf vampire who wants to make Smurfette his vampiress bride.
* Empath: The Luckiest Smurf: In "Smurfed Behind: Smurfing In Heaven", Empath thinks he has died and gone to Elysium, the "smurfy hereafter" afterlife of the Smurfs... except, of course, he finds out that the Elysium he entered was just a magical illusion created by Ares the god of war (and so also is the Tartarus that Empath fell down from Elysium into), and that he didn't actually die.
* Empath: The Luckiest Smurf in the alternate timeline where Smurfette marries Papa Smurf. Hefty in the main timeline story "Empath's Wedding" sits alone in Tapper's Tavern with a single glass of sarsaparilla ale on the night before the wedding, wondering why Smurfette won't marry him and realizing that he just couldn't compete against Empath. By morning, it is clear that Hefty is hung over just from that single glass.
* Empath: The Luckiest Smurf in the Smurf Village removes Papa Smurf's red hat and replaces it with a white hat while he replaces his own black star-spangled hat with Papa Smurf's red hat, symbolically showing that Papa Smurf no longer deserves to be recognized as the village leader and that Empath will now take over the position.
* Empath: The Luckiest Smurf in which he sees as his elder self the Smurf Village being destroyed by an earthquake, he tries to rescue Brainy, who is seen in his house trying to rescue as many of his works as possible, telling him to forget about his books. Brainy refuses, saying that his works are his life, considering them of great treasure and that he cannot live without them. Then suddenly the ground underneath him swallows him up, and Brainy is gone forever.
* Empath: The Luckiest Smurf is because his words end up sounding like this trope to other Smurfs.
* Empath: The Luckiest Smurf is considered a telepath, as are the Psyches.
* Empath: The Luckiest Smurf is played like a combination of volleyball and soccer.
* Empath: The Luckiest Smurf is seen as this in the eyes of other Psyches, since they are forbidden to see him as the "savage" Species 0002 (Smurfs) that he belongs to, but rather as a "prototype Psyche". The only "flaw" that he has are emotions.
* Empath: The Luckiest Smurf is that he could do this with both people and objects, with the exception that he cannot use it on magic-based objects.
* Empath: The Luckiest Smurf is this trope in action that came from a certain artifact that Empath and Handy have created in the past in "Days of Future Smurfed."
* Empath: The Luckiest Smurf. Its taste is described as porridge made with a bag of cement.
* Empath: The Luckiest Smurf. Lampshaded by Tapper in "Smurfed Behind: The Passion Of The Smurfs".
* Empath: The Luckiest Smurf-like world where basically that is a given among its people.
* Empath: The Luckiest Smurf — Empath mentions in "Smurfnip Madness" that all Psyches in Psychelia are required to take a drug called psychelium, which inhibits their ability to express emotions. The drug is mentioned again in "The Rise And Fall Of Smurfy Tower" as Polaris Psyche wishes he could have the drug to numb the pain he was feeling while Empath was in a coma.
* Empath: The Luckiest Smurf mini-story, Polaris Psyche and his female Smurf bride have a private ceremony where they follow a modified form of a Psychelian bonding ritual of two Psyches touching hands before a Psychelian cleric, which Empath operates as during the ceremony. This is then followed by a public recital of vows before their fellow Smurfs at the wedding reception as they get their pictures

taken.
* Empath: The Luckiest Smurf mini-story "Tapper's Final Christmas", Empath sees an angel appear at Tapper's bedside, ready to take him into heaven, and Tapper's spirit separates from his body before the two of them vanish. Empath later dreams that Tapper is reunited with his friend Duncan McSmurf, who died years before and was already in heaven.
* Empath: The Luckiest Smurf moment because he can smell her pheromones.
* Empath: The Luckiest Smurf novel (and also in the alternate timeline wedding of Hefty and Smurfette in the story "Hefty, The Luckiest Smurf"), teasing them about how they're supposed to marry each other now that they both caught the bouquet and garter.
* Empath: The Luckiest Smurf novel, Empath visits the grave of his mother Lillithina to pay his respects and to forgive her of anything she has done to him.
* Empath: The Luckiest Smurf: Nutrient paste, which is what the Psyches eat due to their distaste of anything that has flavor, appears in the series. One story likens it to being porridge made with a bag of cement.
* Empath: The Luckiest Smurf occasionally begins the story with an entry in his personal journal, and in some stories updates his journal with things that took place in the story from his perspective.
* Empath: The Luckiest Smurf. One takes place where Empath and Smurfette, who were at point still just friends, cuddle with each other on a cold winter night. The other takes place in an Imaginarium setting where Papa Smurf lies with a fantasy version of his deceased wife ready to embrace... when he is interrupted by his son Empath reminding him that he needs to take care of settling Baby Smurf in for the night. Empath's marriage consummation with Smurfette on their honeymoon takes place near a lighted fire on the beach.
* Empath: The Luckiest Smurf, Papa Smurf couches The Talk by speaking about Smurfs having "boy parts" and "girl parts" as well as "sex cells".
* Empath: The Luckiest Smurf". Papa Smurf frowns upon this and makes his displeasure known to Jokey about it.
* Empath: The Luckiest Smurf, Papa Smurf is believed to be this by Empath, or at least that's what is implied by what happens during his early visits to the Smurf Village.
* Empath: The Luckiest Smurf; Philia, who represents brotherly love; and Xenia, who represents love for strangers. And there's also the rogue cherub Eros, who represents lust.
* Empath: The Luckiest Smurf, Psyches are bonded to members of the same sex with the Psyche Master choosing the partners. Empath, as it turns out, has been bonded to Polaris Psyche.
* Empath: The Luckiest Smurf rivalry, as they both simply want to be recognized as being more important than the other. Tapper likens their relationship to be "like Esau and Jacob", with Hefty being Esau and Handy being Jacob.
* Empath: The Luckiest Smurf series, as Empath and his fellow Smurfs are depicted as being in their early adult stage around 150 years of age, with Homnibus commenting on how young Empath looks for his age.
* Empath: The Luckiest Smurf series, Psyches are grown in gestation chambers for a year until they become the equivalent of 50-year-old Smurflings. No specific reason is given for this.
* Empath: The Luckiest Smurf series, Smurfette finds a girl genie named Ghinelle who lives inside a perfume bottle.
* Empath: The Luckiest Smurf stories have Empath and Smurfette talking to each other in bed after they are married.
* Empath: The Luckiest Smurf story "Days Of Auld Lang Smurf" interrupts Papa Smurf's private moment inside the Imaginarium with a recreated fantasy version of his wife just as they were about to kiss. Of course, Empath doesn't know that this is what Papa Smurf was doing with his time away from the other Smurfs until he saw Papa Smurf in a bathrobe emerging from a Smurf house.
* Empath: The Luckiest Smurf story "Days Of Auld Lang Smurf", Papa Smurf makes a toast to the future on New Year's Eve and to his fellow Smurfs who were briefly

"resurrected" for a time (though they were actually hallucinations brought upon them by a spell cast on them by Chlorhydris) until they vanished at the stroke of midnight.
* Empath: The Luckiest Smurf story "Days Of Future Smurfed", Empath sees in his future that his marriage to Smurfette lasts for about four centuries, after which she dies of old age, reverting back to lifeless blue clay.
* Empath: The Luckiest Smurf story "Days Of Future Smurfed" takes place in a Bad Present circa 2005 — a thousand years after Empath had left Psychelia for good. The Smurf Forest is nearly devastated due to development and pollution; the only home that Empath and his great-grandson have left is a tree stump which Empath makes into his personal telepathically-powered Imaginarium so he could relive his glory years and teach his great-grandson about everything he and his fellow Smurfs once held dear in their lives.
* Empath: The Luckiest Smurf story "Days Of Future Smurfed", the Smurf Village is eventually destroyed by an earthquake, resulting in a dispersion of its remaining Smurfs and Empath living alone in the forest with his great-grandson, who becomes Traveler Smurf.
* Empath: The Luckiest Smurf story "Empath And The Golden Magic Bird", Nat, Snappy, and Slouchy tease Sassette with "Sassette's in love with Empath" repeated over and over when Sassette calls Empath a "big lover Smurf", presumably after Sassette has been kissed by Empath when she was temporarily an adult Smurf and Empath had the hots for Sassette.
* Empath: The Luckiest Smurf story "Empath And The Red-Nosed Reindeer", the Santa analog Mr. Nicholas gets the idea of wearing a red suit from Papa Smurf's appearance when he first met him years ago as a child.
* Empath: The Luckiest Smurf story "Empath's Honeymoon", Papi Utopi challenges Empath to fight the Utopi Champion so that he could win his right to "marry" Smurfette (despite the fact that Empath and Smurfette were already married before meeting the Utopii), and if he loses, Smurfette will remain with the Utopii forever. Empath is easily defeated by the Champion in the first match, but on the rematch, Empath resorts to ground-pounding the Champion's head repeatedly in order to wear him down so that he could defeat him and win Smurfette.
* Empath: The Luckiest Smurf story "Empath's Honeymoon", while Tapper is in a private discussion with his friend Duncan McSmurf as Empath and Smurfette are on their honeymoon together, Tapper tells Duncan in polite terms that he gets so stimulated being near Smurfette at times that he fears she's going to see this appearing in his "nether regions" whenever he's near her. Duncan humorously refers to this as having "a banana in his pants".
* Empath: The Luckiest Smurf story "Empath's Honeymoon", Willow the Weeping Ghost recalled waiting for his beloved Mulberry to return so that he could marry her. She never did, and he ended up dying of a broken heart, only imagining what sharing any intimacy with her would have been like.
* Empath: The Luckiest Smurf story "Empath's Wedding", Chlorhydris abducts Smurfette on the day of the wedding and removes her heart so that she wouldn't feel anything for any Smurf, including Empath. Empath decides that he's going to give Smurfette his heart to make her feel love again when Hefty, who originally wanted to marry Smurfette himself, decides to do the honors and give his heart to her. This in turn makes Hefty feel no love for anybody, so Empath gives his heart to Hefty and thus he ends up feeling no love for anybody. Hefty and Smurfette end up bickering with each other over who's going to give their heart to Empath when Johan and Peewit crash the proceedings and force Chlorhydris to restore things to normal, which she does.
* Empath: The Luckiest Smurf story "Empath's Wedding" ends up turning somewhat wacky as Empath receives a telepathic distress signal of the Smurflings needing to be rescued, so he quickly cuts to the chase, asks Smurfette if she will marry him, and leaves her with a kiss and some time alone to think about how to respond while he takes care of the distress signal.
* Empath: The Luckiest Smurf story "Empath's Wedding", Nudie Smurf jumps out of the cake presented to Empath at his bachelor party, asking the party guests if they

need a stripper. Everybody at the party laughs.
* Empath: The Luckiest Smurf story "Empath's Wedding", when Empath's bride-to-be Smurfette has been spirited away by Chlorhydris right before the wedding starts, and Empath meets up with her again at Chlorhydris' observatory, Smurfette greets him with this kind of response, which makes Empath think that something isn't right with her.
* Empath: The Luckiest Smurf story "Empath's Wedding" when he enters her house and sees that his hat (which is what she's supposed to wear to signify who she's marrying) is lying on the floor, until Smurfette's companion and wedding guest Blue Eyes points out that she's been magically transported by someone...and Empath correctly assumes that it's Chlorhydris, who's getting even for her ruined wedding night (which in the cartoon series was thought to be the case of a Runaway Groom) by ruining Empath's wedding.
* Empath: The Luckiest Smurf story "Empath's Wedding" when he first hears that Empath and Smurfette are going to be married.
* Empath: The Luckiest Smurf story "Flowerbell's Love Triangle", Empath uses his telekinetic powers to generate an energy pulse to use as a defibrillator to jumpstart Papa Smurf's heart after he goes into cardiac arrest.
* Empath: The Luckiest Smurf story "Flowerbell's Love Triangle", Flowerbell the woodnymph seeks to marry Papa Smurf in order to avoid marrying the greedy treasure hunting imp Avarice from "Smurfette's Dancing Shoes". The two end up marrying to surprise Avarice, although, by the time the wedding is finished, Flowerbell flies away from Papa Smurf, finding herself now free from Avarice.
* Empath: The Luckiest Smurf story "Grouchy And The Love Doll", during the scene where Angel wants to make love to Grouchy in public. Grouchy says that there are some things that can only be enjoyed in private like taking a bath or a shower, and Angel says that she would like to have a bath or shower with Grouchy.
* Empath: The Luckiest Smurf story "Grouchy And The Love Doll", Grouchy creates for himself a love doll to be his companion, which somehow comes to life and loves him back — only to be revealed that it is a Cubus spirit inhabiting the doll to suck the life out of Grouchy through sex.
* Empath: The Luckiest Smurf story "Monkey On Your Smurf", Empath and Smurfette are both induced into making out with each other while under the influence of microprobes that are in their bodies. When the microprobes are removed and Empath and Smurfette are back to normal, they both decide that they would rather wait until marriage before they have sex.
* Empath: The Luckiest Smurf story "My Unsmurfy Valentine", Empath's friend Polaris Psyche mentions that there is an Imaginarium fantasy setting called "Psychelian Love Slave" among the more adult-oriented fantasy settings that the male Smurfs engage in.
* Empath: The Luckiest Smurf story "My Unsmurfy Valentine" ends with the Valentine's Day dance party that the Smurfs attend after dealing with being affected by Eros' lust arrows and most of the male Smurfs kissing each other.
* Empath: The Luckiest Smurf story "Papa Smurf & Mama Smurfette", in that Papa Smurf forces his little Smurfs to marry him to Smurfette under the threat of being exiled from the Smurf Village.
* Empath: The Luckiest Smurf story "Polaris' Fantasy", both Empath and Smurfette plan on having a night alone together doing this in the Imaginarium beach setting. However, neither of the two commit to actually taking their clothes off and decide to hold off on that until they're married, so they just enjoy a night of moonlight swimming together.
* Empath: The Luckiest Smurf story "Polaris' Smurfy New Life", Hefty forms a Klan-like band of Smurfs called the Order of the True Smurfs, whose single target of hatred is Polaris Psyche, who is white compared to the Smurfs, although in this story his skin temporarily turns blue because it was a side effect of taking the Long Life Elixir.
* Empath: The Luckiest Smurf story "Relatively Speaking" is one where Empath hears mini-stories about the Smurfs' run-ins with three of Gargamel's relatives, all of which are adapted from the comic book stories.

* Empath: The Luckiest Smurf story series add breasts to her physical form. This gets mentioned by her in a few of the mini-stories she appears in.
* Empath: The Luckiest Smurf story "Smurfed Behind: Smurfing In Heaven", Polaris Psyche tries to talk Empath out of killing himself when he fears that his fellow Smurfs may have all been killed while traveling through time, with Polaris telling him that suicide will cause him to go to Tartarus instead of Elysium, which is the Smurfs' version of heaven.
* Empath: The Luckiest Smurf story "Smurfed Behind: The Departure", when Wild Smurf arrives in the Smurf Village to warn Papa Smurf about Snappy coming into the village riding a dinosaur, Papa Smurf tells Wild to stay in the village and try to keep the other Smurfs calm since "the last thing we need when it comes to smurfing this is a village-wide panic". A few panels later when Snappy arrives on Crinkles the baby dinosaur, the village automatically goes into panic mode!
* Empath: The Luckiest Smurf story "Smurfed Behind: The Passion Of The Smurfs" is a little too obvious if he happens to be related somehow to the Smurfs' main enemy Gargamel.
* Empath: The Luckiest Smurf story "Smurfed Behind: The Passion Of The Smurfs", where Smurfette through time travel meets with the real Mary Magdalene and assumes that she was a prostitute, only to learn that Mary was mistaken for one.
* Empath: The Luckiest Smurf story "Smurfette's Genie", when Brainy pays Smurfette a visit to know about the genie that he hears she has in her house, Smurfette says she wishes that Brainy's mouth would be "smurfed shut" and that he wouldn't be able to say anything. Ghinelle, her genie, overhears this and grants this wish by sealing Brainy's mouth shut and removing his voice altogether.
* Empath: The Luckiest Smurf story "Smurfette's Inner Beauty", Hogatha the witch uses the Spell of Syphonia on Smurfette to transfer her youth and beauty onto herself, causing the witch to transform into a young ginger-haired beauty while Smurfette became old and wrinkled and aging toward death.
* Empath: The Luckiest Smurf story "Smurfette's Inner Beauty", Tapper expresses his belief that evil and sin causes people to age much quicker than normal, which to him is why people like Gargamel and Hogatha look older than their actual ages.
* Empath: The Luckiest Smurf story "Smurfette's Inner Beauty," was able to break Hogatha's youth-and-beauty siphoning spell on Smurfette by giving her a heartfelt kiss, thus restoring Smurfette to her normal appearance.
* Empath: The Luckiest Smurf story "Smurfing In Heaven", Empath is taken to an artificial version of Elysium, the Smurf afterlife also known as "the smurfy hereafter", where all his fellow Smurfs were waiting for him after their supposed deaths while traveling through time. The Smurfette in this artificial Elysium glitches in her conversation with Empath, though he doesn't realize where he actually is until later when the Smurfs reveal their true selves in this simulated afterlife.
* Empath: The Luckiest Smurf story "Smurfing In Heaven", Empath thinks that he's in heaven with all his fellow Smurfs who have died. It turns out to be a magical illusion created by Ares the god of war, who wanted to lure Empath into receiving his gift of godhood.
* Empath: The Luckiest Smurf story "Smurfing In Heaven" is made to believe this is what happened to him when he was left alone by the other Smurfs when they were lost in time-travel...that he died and has now ascended to Elysium to be with the other Smurfs who have also presumably perished, where he will be given the mantle of godhood. As it turns out, Empath really didn't die and the Elysium he was taken to was a magical illusion created by Ares the god of war in order to lure his object of admiration into becoming his god of conquest.
* Empath: The Luckiest Smurf story "Smurphony Of The Night" has Empath and Smurfette dealing with an army of Smurf skeletons brought to life in order to stop them from escaping Castle Smurfenstein.
* Empath: The Luckiest Smurf story "The Birth Of Psycheliana", Smurfette had a craving for bugs, flowers, and dirt when she was pregnant with Empath's child.
* Empath: The Luckiest Smurf story "The Castle At The Crossroads", the multi-colored sky that appears over the entire Smurf Forest (caused by Castle Captor's

appearance) is thought to be a sign of the end of the world by Tapper, a Christian Smurf who is looking forward for the Lord's coming.
* Empath: The Luckiest Smurf story "The Innocence Of A Smurf," goes through having to deal with exposing the truth to his fellow Smurfs that he has killed a Psyche during a mandatory one-on-one death battle in Psychelia.
* Empath: The Luckiest Smurf story "The New Shop In The Village" has Empath as the Smurf Village's leader having a dream that, because he has legalized smurfnip to be used as a recreational drug, the entire village is full of Smurfs who have succumbed to the lure of doing all sorts of drugs, with most of them looking like "the walking dead".
* Empath: The Luckiest Smurf story "The No Hug Zone" tried to slip through Tapper and Empath's defenses in order to give Grouchy a hug by shipping himself through the mail to Tapper's Tavern.
* Empath: The Luckiest Smurf story "The Other Smurfette", Hogatha as a female Smurf first meets with Clumsy, whom she fell upon in the woods, and Clumsy innocently asks, "I wonder what I should call you. Do you have a name?" And Hogatha replies, "Wonder? Ah, yes, that's what you shall call me. Wonderette Smurfette."
* Empath: The Luckiest Smurf story "The Other Smurfette", Papa Smurf stood in a daze that required Smurfette to snap him out of after Wonderette (who is Hogatha in disguise as a female Smurf) kissed him on the mouth.
* Empath: The Luckiest Smurf story "Virtual Smurfality", Smurfette pulls on Brainy's ear to get him to leave his Imaginarium fantasy setting before the Imaginarium crystals are destroyed.
* Empath: The Luckiest Smurf story "Virtual Smurfality", the Imaginarium upon its trial run overloads when the Smurfs go off into their own fantasy worlds, trapping them inside the worlds until Empath and several other Smurfs use the mindlink ability to get them all out before the crystals shatter.
* Empath: The Luckiest Smurf story "Who's That Smurfette?", when the Smurfs just stop and stare as they meet Smurfette for the first time, Hefty says this:
* Empath: The Luckiest Smurf takes place. The other stories in the series are written to fill in the gap of that 10-year time period, to see how Empath and Smurfette progressed.
* Empath: The Luckiest Smurf, Tapper's God, which turns out to be the Christian God, is the supreme god, and all other gods such as Ares and Hermes from classical Greek mythology are lesser gods who don't stand a chance against Him.
* Empath: The Luckiest Smurf that would have left him hitting the high notes for the rest of his life".
* Empath: The Luckiest Smurf, the first use of the Imaginarium was to... well, satisfy a Smurf's desire to be alone with a Smurfette. The real Smurfette was not pleased to see Brainy replaying the role of King Smurf having an imagined version of herself being his personal servant.
* Empath: The Luckiest Smurf. The only things they have in common with each other is that they're both telepaths and they have both lived in Psychelia. Otherwise, Empath comes from a race that the Psyches see as "savage".
* Empath: The Luckiest Smurf, the Psyche Master enforces asexuality on all Psyches, since he is in charge of their reproduction, so sex is not allowed in their culture. Instead, Psyches that are bonded in same-sex pairs engage in the telepathic technique of "sharing dreams" with each other.
* Empath: The Luckiest Smurf, the Psyche Master's most common appearance is a large head floating in a rainbow beam of light.
* Empath: The Luckiest Smurf, there's Charity, Phileo, Xenia, and a rogue cherub named Eros, who spreads fiery arrows of lust.
* Empath: The Luckiest Smurf. The three others that are based on existing Smurfs stories are "Wild's First Christmas" (which is "'Tis The Season To Be Smurfy"), "A Haunted Christmas" (which is "Haunted Smurfs"), and "The Enchanted Evergreen" (which is "The Smurfs And The Little Tree" from the comic books).
* Empath: The Luckiest Smurf" This scene is used in the story "Empath's Honeymoon" where Smurfette is covered in chocolate mud, and then soon after Empath when he just dawdles and stares at Smurfette being covered in mud, and Smurfette ends up

pulling him in.
* Empath: The Luckiest Smurf, though here he isn't the only chef in the village.
* Empath: The Luckiest Smurf to influence animal beings such as Azrael and a pack of sharks.
* Empath: The Luckiest Smurf to keep his mouth shut about Smurfette having a genie.
* Empath: The Luckiest Smurf to make sure that history unfolded just as his great-grandfather had told him about. The story ends with Empath's great-grandson becoming Traveler Smurf, watching Empath's younger self in the time period that he now calls his home.
* Empath: The Luckiest Smurf to the Smurfs at the court trial between her and Empath Smurf.
* Empath: The Luckiest Smurf version of Papa Smurf, presumed to be a widower, is married to the Mirror Universe version of Smurfette. However, Mirror Universe Smurfette proves herself to be not entirely faithful to her husband.
* Empath: The Luckiest Smurf version of their world, where they find an identical mirror which requires a magic spell to open so they could return to their own world.
* Empath: The Luckiest Smurf version of the Smurf Village is pretty much this, with gambling, smoking, fighting, lots of obscene language, and immoral affections going on between the Smurfs. Not that the village itself is any better by comparison.
* Empath: The Luckiest Smurf was created to take Gargamel's place in the story while Jeanty from the comic books stood in for Scruple and Rascal Fuzzbucket for Azrael.
* Empath: The Luckiest Smurf, where Empath plays King Solomon living in the king's palace and Smurfette plays the Shulamite who lives in a village with a father and a few siblings working as farmers.
* Empath: The Luckiest Smurf, where Hefty is the first Smurf that Smurfette meets (back before she was a real Smurf). However, in the normal timeline, she never ends up falling in love with or marrying Hefty, which makes him upset at first, but he ultimately decides to resolve matters with his rival Empath before the marriage. It's only in the alternate timeline, where Empath ends up going back to Psychelia and becoming the next Psyche Master, that Smurfette falls in love with and marries Hefty.
* Empath: The Luckiest Smurf where Smurfette is married to someone, her husband picks her up and carries her out of the kitchen, supposedly into the bedroom. In "Wedding Bells For Bigmouth", Bigmouth tries to do this with his bride Bignose after the wedding to carry her over the threshold, only to keep banging her head against the door a few times. He decides to slip her in vertically in order to complete the tradition.
* Empath: The Luckiest Smurf, whether that's with his enemies (like normal universe Empath) or his allies (like the Mirror Universe Smurfette).
* Empath: The Luckiest Smurf, while Empath marries Smurfette, has a child through her as well as a grandchild and great-grandchild, the last of whom will become Traveler Smurf, who will travel back into the past to give Empath visions of the future that will lead to the creation of the memory artifact.
* Empath: The Luckiest Smurf, with Vanity doing the more dramatic non-action scenes and Century doing the action scenes with swordfighting, since Vanity is afraid of swords. Before that, though, Vanity secretly switches places with Century at the auditions to make it appear that Vanity is a better actor than Century (the only difference being that Century's flower is on the left side of his hat while Vanity's is on the right side).
* Empathy) after they meet, with Go-Go in turn appearing touched that Riley thinks of her as "the coolest person [she's] ever met".
* Empathy Doll Shot: A child's death will be symbolized by a nearby, usually damaged, toy they used to play with.
* Empathy Doll Shot - A kid died. We don't see the death or the body, but we see one of the kid's toys.
* Empathy Doll Shot: A shot of a child's toy on the ground is shown to indicate that children have died in the area.

* Empathy Doll Shot happens in first Soviet mission victory cinematic, which primarily consists of sending Yak fighters to take out vehicles and buildings so paratroopers can mop up the rest.
* Empathy Doll Shot: Seeing a plushie or doll on the floor means that either a kid died or a kid's innocence was lost evacuating from a war.
* Empathy, Oh is this to the rest of the Big Hero 9, as the only alien member of the team where the rest all come from Earth (although Baymax is a robot while Riley has empathic abilities).
* "emperor"). After the war, he was imprisoned by the Soviets, then handed over to Communist China, and finally released, later dying of natural causes.
* Emperor Akbar, of the Mughal dynasty and the 16th Century India, is known as one of the greatest and most respected rulers that India ever had for several reasons: developing a comprehensive, cohesive and standardized taxation system across India, developing a comprehensive military and bureaucratic organization for his empire, patronage of wit and art and music, love for philosophy and developing his own school of thought, for coopting Hindu elites into his regime (thereby ensuring their loyalty to his dynasty) and for fostering a culture of tolerance and co-existence between Hindus and Muslims (thereby ensuring a degree of social stability). All these things portray a clever, wise and hard-working bookish intellectual, isn't that so? Well, he was known to be illiterate.
* Emperor. As Mark says (using asking someone for the time of day as a metaphor):
* Emperor Augustus died in 14 A.D, long before Jesus was supposed to have started his work.
* Emperor Awesome has a thing for Sylvia (who he insists on calling "Rebecca" or "Becks") and even suggests forcibly adding her to his entourage after capturing her in "The Party Animal." She's always quick to shoot him down.
* Emperor Awesome likes throwing parties. Only problem is he always ends up
* Emperor: Battle for Dune Besides the original Saboteur units, a new aerial unit called the Eye In The Sky also had an attack where it self-destructed with a Saboteur ejecting out of it.
* Emperor: Battle for Dune, both the evil Harkonnen and the decidedly amoral Ordos use weapons based on toxins and poison, as do the tleilaxu. The noble Atreides and the fremen, meanwhile, do not.
* Emperor: Battle for Dune has Tleilaxu Leeches, which would spit a parasite onto enemy tanks that would eventually destroy them, creating another Leech. They also had a zombie-like enemy called a Contaminator that would spawn another Contaminator every time they killed an infantry unit.
* Emperor: Battle for Dune have a distinctive fritzing effect where the red, blue and green channels of the hologram briefly fail to line up, just as happened with some earlier colour films and TV.
* Emperor: Battle for Dune, one of House Atreides' mechs bears a suspicious resemblance to REX.
* Emperor: Battle for Dune some House Ordos vehicles are equipped with shields. Like the books they explode when hit by lasers but the detonation just destroys the target and the shooter instead of producing a nuclear reaction, not that there are many laser-equipped units outside that House. And they attract worms which would explain why no one else uses them.
* Emperor: Battle for Dune. The Contaminators, mutants spawned from Tleilaxu Flesh Vats. They carry a lethal virus capable of turning humans into additional Contaminators. There's also the non-human variant called the Tleilaxu Leeches, biogenetic tanks that create replicas of themselves by implanting larva in enemy vehicles, which damages the host vehicle until it's destroyed before hatching into another Leech.
* Emperor: Battle for Dune, where the Atreides Duke is black and the Ordos mentat is Asian. The Fremen (desert dwellers of Arabic descent) are still played by white actors though.
* Emperor: Battle for Dune with a rocket turret for anti-vehicle defense and anti-aircraft defense.
* Emperor Belos: Great Dictator, Average Father can become the next ruler of the

Boiling Isles. Amity, of course, is annoyed that her parents are using her own feelings for their political agenda.
* Emperor Belos. Their magical auras are red, and the primary use seems to be advanced telekinesis, teleportation and conjuration. This system also doesn't require them to draw circles, and Belos can even cast spells of the usual system without the circles.
* Emperor books, Cato is portrayed as the fattest of all the senators. Though he isn't a king, he is one of the most powerful and richest men in Rome.
* Emperor Cartagia of the Centauri tortured G'Kar to the brink of death several times, mostly as an amusing diversion.
* Emperor Charles and Empress Marianne. May be justified since the characters in question had been cheating death, and rather than outright dying, they were forcibly absorbed by the afterlife. Not to mention the whole thing actually takes place in a mystical realm.
* Emperor Charles. His entire kingdom is run by his children, who he raises to be loyal... or dead. Kinda doesn't work when his three most competent children try to kill him, including one whom succeeds in doing so. Even
* Emperor-class Battle Titans are generally seen as some of the most powerful things the Imperium has, short of the God-Emperor in his prime. It's
* Emperor Doom, he actually let the small band of heroes who Wonder Man freed from his control win. The heroes aren't even sure they did the right thing.
* Emperor Edelgard of Adestria. The One-Winged Angel, because there's no time to be wasted between taking the city and the castle itself. Afterward, the nation on the losing end ceases to be a politically significant entity.
* Emperor Faustin of Haiti got his imperial chamberlain to say "His Majesty is now laughing; my lords, you are invited to laugh as well" every time he cracked a joke.
* Emperor for Brutus, Domitius, and Servilia, brings Cabera to a turning point, and gives some insight into the ways Crassus and Pompey do business.
* Emperor Franz Josef I of Austria-Hungary and his consort Elisabeth/Sissi had four children. Out of them, their second daughter Gisela
* Emperor Franz Josef I's second daughter (and eldest surviving child), Archduchess Gisela. Franz Josef had some keepsakes from all of his kids and his most treasured one was a poem written for him by a young Gisela one Christmas.
* Emperor Franz Joseph, as he was inspecting his troops in full view of enemy fire and lost his wife to a field hospital bombing a month before.
* Emperor Ganishka, a rogue Apostle who is the Emperor of Kushan, conceals much of his girth under heavy clothing and armor, but is clearly on the heavy side.
* Emperor Ganishka, who is literally a demon and has an ego so big that he attempts to defy God. He has a nasty temper and is
* Emperor Gestahl, an old man with long white hair and a white mustache-and-beard combo, looks like a dog-headed bipedal creature. This is referenced in
* Emperor Golden Scepter is one, being an "Antecedent"-ranked Alicorn god. While he's capable of assuming the "default" form of a normal-looking white Alicorn with black hair, his true form is described in his entry as an incredibly ancient and extremely powerful Alicorn god with
* Emperor Golden Scepter is the Alicorn god of Psionics, so naturally he's a master at this. Some of his powers include
* Emperor Hadrian and Antinous; Hadrian had Antinous deified after he drowned in the Nile. Hadrian was also deified after his death, as customary for Roman Emperors. The Cult of Antinous was quite popular for several centuries afterwards.
* Emperor Hadrian in particular was a noted Philhellene (lover of Greek culture) and he enthusiastically adopted a range of Greek practices such as growing a beard and taking a male lover. Commodus took all that further and dressed as Heracles.
* Emperor has a scene in which Cavallo, a Spanish blacksmith, shows the Roman smiths how to use charcoal to make a gladius of steel rather than iron. Renius watches, since he has become curious about how the swords he uses every day are actually made.
* Emperor Hirohito and decades beyond that until his death in 1989. He was also an accomplished amateur marine biologist and had a laboratory within his palace for

this purpose. While he lacked an official degree, he had several scientific papers published and was the first to provide a scientific description and classification of several species of hydrozoa (microscopic predatory water animals) found in the seas around Japan.
* Emperor Huang was a ruthless Chinese warlord who forged his empire over the corpses of countless victims and was cursed with mummification in his attempt to become immortal. Its explicitly said that he will crush freedom everywhere and slaughter without mercy to impose order upon the world.
* Emperor Iedolas Aldercapt was originally going to be voiced by Shinji Ogawa. After Ogawa's death during the game's development, his dialogue was rerecorded by
* Emperor Joker, allowing Bat-Mite to get his powers back and restore the universe in seconds.
* Emperor Joker, and reshapes the Earth into a cube with the continents shaped in his visage.
* Emperor Joker, he uses said abilities to continually kill and resurrect Batman, driving him utterly insane. After Superman makes a deal with Mxyzptlk after defeating The Joker, he takes Bruce's memories of the events. After Batman finds out and is furious at Clark for essentially robbing him of what makes him effective (psychosis, essentially), this exchange occurs, with Batman standing on the wing of his Batplane.
* Emperor Joker into receiving Mxyzptlk's reality-warping powers and remade the world in his image. Some people, primarily Superman, feel that there is something fundamentally wrong with their new reality. As they meet more powerful beings resisting the Joker's influence, it is revealed that as he pulls more and more strings, Joker will begin unraveling the very fabric of existence.
* Emperor Joker is turned into "Superburgerboy," a mascot for a cheesy burger chain. It's worse than it sounds.
* Emperor Joker, it's revealed that he literally cannot imagine a world without Batman... no matter how hard he tries, despite having gained cosmic power and become the ruler of reality.
* Emperor Joker powers to turn Aquaman into an actual fish man supervillain who ironically enough hates the ocean and tries to keep everyone out of it.
* Emperor Joker recreates reality in his own image, tiny reality bleeds from what used to be the real world provide hope for the heroes.
* Emperor Joker's heart. Superman survives for minutes, apparently either because of his super-durability or thanks to Joker using his omnipotence for keeping him alive. Supes actually hugged the sun to his chest (he and the Joker were enlarged at the time) to counteract this.
* Emperor Joker: The Joker is seen playing a game of poker with the corpses of the various Robins that he murdered.
* Emperor, Julius Caesar has to promise his daughter's hand in marriage to Pompey in order to secure the latter's support in his bid for consul.
* Emperor Justinian I and Theodora ruled the Byzantine Empire together. He's regarded as one of the empire's best rulers.
* Emperor Mateus is proof that the series embraced this trope long before it became memetic. He sports what can best be described as an
* Emperor Maximilian takes the place of Adolf Hitler, a charismatic leader with ambitions of world domination who takes advantage of the climate of ethnic nationalism and racism that was allowed to fester during the interwar period.
* Emperor—from her reign onward, the Chinese civil system was based much more on merit than on your lineage or connections.
* Emperor Mollusk Versus The Sinister Brain also turned down the offer, claiming the process had turned them into delusional megalomaniacs. The Council think this idea is so ridiculous they spend a good deal of time laughing maniacally over it.
* Emperor Mollusk versus The Sinister Brain manoeuvers or blows up an enemy ship.
* Emperor Mollusk vs. The Sinister Brain in the (mistaken) belief that no-one can get access to it.
* Emperor Mutsuhito/Meiji was "restored" to his position as true political leader of the country, any distinction between the military and the government had

completely broken down.
* Emperor Nightmare, the leader of Nightmare Enterprises (Holy Nightmare Co. in the Japanese version) in
* Emperor of Mankind and things go all to shit. Most of them also had adopted parents that greatly shaped their later worldviews for good or ill.
* Emperor of Megalos, who occasionally suffers minor lapses of concentration leading to brief displays of inhuman features. His horrific personal behavior may be a bigger clue to the truth.
* Emperor of the Fading Suns features the planets of Byzantium Secundus and Leaguehiem. In terms of game rules new cities can't be built on these worlds (not that the Imperial Guard on Byzantium II would allow any units outside the embassies) as every hex is already covered with cities.
* Emperor of the North climaxes with one very brutal train-fight between a determined hobo and a sadistic conductor.
* Emperor of the North the hobos spend some time riding in the train's undercarriage. Evil train conductor Shack's response is to extend a heavy pin on a cord to beneath where they're hiding and let it repeatedly bounce off the track and smack into their bodies.
* Emperor Palpatine (as opposed to his alter ego Senator/Chancellor Palpatine, a
* Emperor Palpatine/Darth Sidious on the other hand is the villainous incarnate of this trope, with
* Emperor Palpatine has a powerless, illegitimate son. While Palpatine was disappointed, he decided to let him live because his son has night terrors in which he screams out horrifying things. The descriptions are used as inspirations for
* Emperor Palpatine himself wears black and sometimes red robes. Also, the decor of his office is almost all red.
* Emperor Palpatine, most other Sith Lords (at least for the known galaxy from humanity's point of view).
* Emperor Palpatine nod approvingly precisely because it does not have to spend so much of its resources to build and maintain huge starfleets.
* Emperor Palpatine replaced the elected senate with regional governors known as "Moffs" but they were appointed rather than hereditary. The Empire itself wasn't hereditary, because he seriously intended to live forever.
* Emperor Palpatine speculates that Darth Vader, after flying around in his TIE fighter for a week, "must smell like feet wrapped in leathery, burnt bacon!"
* Emperor Palpatine tells Starkiller to prove his loyalty by killing Kota, a Jedi. After a moment's hesitation, he turns and attacks Palpatine. It doesn't end well.
* Emperor Palpatine was reborn in a clone body sometime after dying in
* Emperor Pelagius the Mad insanity. Once his madness became too publicly apparent, he was institutionalized and died only a few years later.
* Emperor Pelagius the Mad wrong with him, and that he needed to be removed from the throne. He was institutionalized and died only a few years later, but his legacy as the Mad Emperor lives on.
* Emperor Pilaf was the first real villain that Goku and gang faced (after pterodactyls, bear thieves, bandits, boss rabbits and cowardly shape-shifting pigs). In the manga he isn't even an
* Emperor Reman Cyrodiil III has his mistress beheaded for treason (she was innocent). Here it actually takes two strokes, with the first hitting the back of her head.
* Emperor: Rise of the Middle Kingdom: City guards serve the extremely important purpose of catching spies and saboteurs. Unfortunately, your citizens limit how many watchhouses you can have in the city without causing unrest.
* Emperor: Rise of the Middle Kingdom: Enemy spies will disguise themselves as workers in your city but can sometimes be spotted doing something that that worker type wouldn't do, like walking through a roadblock that should keep them out. Clicking on a spy makes them panic about blowing their cover and vanish, but they'll only reappear later in a new disguise unless apprehended by an in-game constable.
* Emperor: Rise of the Middle Kingdom. Not only do you often have to produce your

own weapons and armies to defend your town from invaders, you can also buy and sell weapons (even weapons you produce yourself) to other cities. Yet, weapons are simply treated like any other goods - wheat, silk, porcelain, etc. - in that you can trade in them. In some scenarios, the only use you can get out of them even is buying them cheap and selling them at a more expensive price.
* Emperor: Rise of the Middle Kingdom: Of the four types of soldiers available (Archers, Infantry, Cavalry and Catapults), Catapults are best used against cities with fortifications alongside infantry (to scale the walls). Otherwise, hordes of cavalry work best (including against the Mongols).
* Emperor: Rise of the Middle Kingdom: Shifted back a couple of millennia, but over the course of the campaign iron will replace bronze, and in turn be replaced by steel, bronzeware utensils will fall out of fashion and be replaced by lacquerware, charioteers will be replaced by mounted cavalrymen and paper will take over from wood as the writing material of choice. Also, things like irrigation, currency (first copper coins, later printed paper money), and new crops like tea and rice will appear over the course of the campaign.
* Emperor: Rise of the Middle Kingdom that city, since they rightfully fear for their lives.
* Emperor: Rise of the Middle Kingdom will appear as a random worker walking around the city. But the location and occupation are random, so they could easily be a completely inappropriate worker, such as a food salesman in the industrial district or a miner walking around the residential area.
* Emperor Scientist: A ruler who participates in scientific activities.
* Emperor Scientist. They often view the religious as incapable of scientific thought despite any evidence to the contrary.
* Emperor Scientist with even Captain Janeway joining in, so naturally the villain has to out-ham everyone or get left behind.
* Emperors Edge has been groomed from birth to work as an assassin for the (now former) emperor, and managed to survive to his early 30s and extreme competence at killing people, but an utter lack of social skills.
* Emperor series, Caesar has a love affair with Servilia, his best friend's mother. Problematic since he needs a son and she is too old to get pregnant.
* Emperor's Hammer, for those who never read the book, was employed against the Yuzhaan Vong, an alien race that only briefly skirmished with the Empire. Therefore they were not aware that one of the primary uses of a Star Destroyer was orbital bombardment...and with something like sixty times the guns, a Super Star Destroyer is even better at it. Wedge Antilles made the Vong think he was desperately retreating, thus luring a very large ground force into the killzone, and then opened fire.
* Emperor Shaohao. By the time you actually meet him, he seems to have recognized his errors after millennia of meditation on the subject and goes on to give you a very philosophical analysis on the nature of pride before asking for your help to clean up his mess. Check quote pages if you want to know the full speech.
* Emperor's hellhole where he's worshiped as a god on pain of being burned at the stake.
* Emperors of Rome, and his next two successors bribing them upon claiming the throne, they came to the conclusion that they had the right to remove Emperors they didn't like, and not being paid off by the guy when he took the throne was grounds to do so.
* Emperor Steer's magic is a light purple. His eyes glow mauve, and his robes are a dark violet hue.
* Emperors Whitebeard and later Kaido are considered the strongest man/beast in the series and they're muscle-bound titans. Played with Big Mom she's just as strong as former two but is an
* Emperor. The bond between Brutus and Renius is somewhat shakier at first, with the former vowing to kill the latter for what he did to Caesar. Though after traveling with Renius to Greece, Brutus comes to view him as the father he never knew. It is however unclear if Renius ever really feels any stronger bonds towards Brutus.

* Emperor: The Gates of Rome. In the second book, Spartacus' slave army also qualifies.
* Emperor Tigerstar, known for making time lapses of historical maps, came out as bisexual in 2019.
* Emperor Uriel Septim VII, he's a clean-shaven Altmer with a full head of hair.
* Emperor Varis (or rather, a highly embellished version of him). Thankfully, the rewards for winning the fight are well worth it, consisting of high-end armor with five materia slots per piece.
* Emperor, while Queen Elicia is one of the nation's foremost scientists.
* Emperor who plays 6 hours of drums a day whether his band is around or not.
* Emperor, who works to keep Chaos at bay from realspace, and humanity in particular. The Imperium has stayed stable, although not making any meaningful progress in any sense, for ten millennia. It's not a balance of Good and Evil by nature, but more by awful circumstances that hasn't changed in much meaningful ways for as long as the Imperium as we know it stood.
* emperor (with due exceptions for two genetically engineered slave subraces of the Centauri). In an interesting twist, Centauri law allows anyone free to own a Centauri slave, with the Golians (a former Centauri subject race) often buying Centauri slaves as a status symbol and a form of payback.
* Emperor would probably be someone who runs a emporium, i.e. a vendor/merchant/shopkeeper.
* Emperor Xuanzong (reigned 712-756) spent a whole lot of his later reign with his beautiful consort Yang Guifei and passing out all sorts of high offices to her friends and family. Little details like national defense were neglected right up until the inevitable rebellion by a cocky general. The poor consort didn't survive the evacuation, as what troops Xuanzong had left demanded her scapegoat's head.
* Emperor Zing also counts as he is also the same species as Roger but has done a lot of bad things as well. It's strongly implied that Zing punished Roger for being unfaithful to him by attempting to kill him through a fake mission in which Zing sent Roger out to Earth as a crash test dummy and even when Roger survived, he was technically banished from his homeworld. While this does make a big
* emperor Zizzy Balooba orders an attack on Earth for his own amusement. He confesses this the moment the heroes get to his boudoir.
* emphasised facade for the benefit of others, something which she's called out for in volume five and slowly starts breaking away from later.
* Emphasis is placed on an old photo of six characters from the earlier generation of students, only one of whom we have never met. Her identity is later revealed rather offhand and unspectacularly, and though she may turn out to be important, being a Valkyrie, she doesn't seem to be that relevant to the mysteries about the characters' parents.
* Emphasis on "temporary". The problem is that CASE NIGHTMARE GREEN (
* emphasis on the "may", especially towards this tasteful, fashionable, and attractive young species called 'Humanity'.
* emphasized his Berliner-ness). Nobody really cared and he ended up winning the election and was reelected for a second term. Since then, many public figures outside of the show business have come out with it rarely causing any controversy.
* Emphasizing Joseph's kindly character, before Gabriel told him how Mary got pregnant, he was planning to hush everything up, and
* emphatically gestures to Sonata Dusk to be quiet as she almost blows their whole plan to Sunset Shimmer when they're being shown around the school.
* Emp herself was nearly taken as one, but the Robot sent to capture her decided her butt was too big.
* E.M. Pino would start crying with terror whenever she thought about what would happen if she didn't follow his commands.
* Empire 88 are an offshoot of a more established German organisation called Gesellschaft, who sometimes send cape assistance over but are never confronted directly by Taylor.
* Empire), a classic fantasy setting, with orcs, wizards, etc. More specifically it is about a series of nations bound together in an Empire that has been in steady

decline for decades surrounded by Barbarians on all sides struggling to re-invigorate its self or die. Noted for it's interesting take on religion (Focused on reincarnation and the embodiment of certain virtues but utterly rejecting the concepts of Gods) high grade costume, large scale battles and politics as major elements.
* Empire and the medication he prescribed caused Andre to hallucinate Pamela into existence.
* Empire at its HeightWhichever iteration it is, authors rarely focus much on the Empire itself. Presumably there's simply not enough action. Tales set during this period typically focus on exploration of unknown space, or small scale dramas - the kind of events that might shake a solar system, but go completely unnoticed by the larger galaxy. If this period doesn't turn out to be the Final Empire, eventually the edifice begins to crack, leading to:
* Empire at War-class Cruiser, who's special ability is to saturate an area with missiles for a (short but sweet) period of time.
* Empire at War deploy Stormtroopers. While it is only possible to have two squads of stormtroopers deployed from an AT-AT at any given time, they can deploy an unlimited number of them to replace fallen squads.
* Empire at War, even when you have an entire fleet of Star Destroyers up there, possibly for balance issues.
* Empire at War expansion: First and foremost: Both Death Stars. Then, there's the plasma cannons of the Zann Consortium space stations, Aggressor-Class battleships, and MZ-8 tanks. Captain Piett's Star Destroyer (the Accusor) also gets a Proton Beam weapon in both games.
* Empire at War for the Zann Consortium, and the TIE Phantom for the Empire. As well, the original Empire at War mentions cloaking in the profile for one of the planets.
* Empire at War gives the Rebels 3 tanks, a hovering light tank, a tracked heavy tank, and a tracked mobile artillery piece. The Empire also gets tanks, the tracked TIE Crawler and the hovering 2-M. The expansions adds in teh Juggernaut A6 for the Empire, and the new Zann Consortium gets w tanks of its own: The tracked Canderous assault tank and MZ-8 Mobile Pulse Cannon.
* Empire at War has, as his land special abilities, an ability that irradiates an enemy unit, and one that release poison gas over an area. The gas is toxic to enemy and allied units.
* Empire at War, Imperial story. The missions leading up to the ending are canon, but the ending itself (the destruction of the Rebellion with the Death Star) isn't, obviously.
* Empire at War restricts space combat to the 2D plane. Ships of different classes are higher "up" or lower "down" on the plane, for example Corvettes are higher "up" than battleships, and fighters, when engaged in dogfights, go all over the place, but there is no gameplay effect of this.
* Empire at War the expansion includes units wielding disintegrator rifles.
* Empire at War: The Rebels have rocket troopers that do extra damage against vehicles.
* Empire at War uses them as well; large ships will usually fly around them to avoid losing shields.
* Empire Beneath series introduces several Krampus that act as guards to prisoners. At first the protagonist mistakes them for Yetis, other characters speculate the possibility of other species, but throughout the book, they are called Krampus.
* Empire Builder: The original member of the Crayon Rail family, the main family of railroad games that are not 18XX games.
* Empire but actively suppresses post-medieval technology because technological power is much more difficult to concentrate in the hands of a ruling elite than magical power.
* Empire, but they persuaded him to let them leave it in by taking him out to dinner and claiming to be big supporters of the Republican Party.
* Empire City = New York City (mostly taken from Brooklyn and Manhattan)
* Empire Earth and planes, but can freely enter and exit the atmosphere on space

maps.
* Empire Earth, and the ability to manufacture entirely automated battle robots despite never looking into this "scientific method" business. Averted in scenarios that don't start at the very first epoch, which start with all previous upgrades automatically researched.
* Empire Earth attempt being foiled. Two missions later, renegades from Novaya Russia ally with the US to go back in time in order to prevent Novaya Russia from becoming the totalitarian nightmare, essentially reliving the first Russian level from the other side. The ending cuts just before we see the effects this has had on the future, (even though the sequel features the same faction, it has no impact on the plot).
* Empire Earth can repair buildings as well as construct bunkers and (pathetically weak) barbed wire fences.
* Empire Earth example, the archers and knights on horseback aren't as effective against robots shooting lasers at them.
* Empire Earth has a keyboard-like console as part of its design, while the Hades has a keyboard on its arm and uses its other hand to input commands.
* Empire Earth has cargoes spawn regularly and head for German ports, your task is to have enough planes and submarines to ensure they get past the Royal Navy (and sending a sub to the English coast so a spy can insert conflicting orders into their supply system).
* Empire Earth has formations, but they're more useful to line up units before the battle begins, and are a nightmare when dealing with large numbers of units, as they stack up into several smaller formations, meaning one formation will end up fighting outnumbered while the others are too far to react to the enemy's presence.
* Empire Earth has this, with Wellington reflecting that the nobs are all drinking and partying while he's trying to push back a horde of Frenchmen.
* Empire Earth has two types of heroes: Warrior and Strategist. While both are melee units (until the later ages when all units become ranged), the Warrior's role is to be in the thick of battle, as his damage values are the kind associated with siege weapons and he provides a 50% damage reduction aura to nearby units. The Strategist, on the other hand, has a much weaker attack (and won't even attack unless specifically ordered), but instead provides very quick healing to nearby units and has an ability that makes enemies take extra damage.
* Empire Earth, he's unable to attack anything but buildings. Later eras have wheeled battering rams that can still only attack buildings and are best used in large groups (the AI certainly will).
* Empire Earth II, building them remains a viable tactic even once aircraft are available.
* Empire Earth II ended when the U.S. stole the stealth bomber the Soviets had developed and used it against them.
* Empire Earth II: The war elephant is Egypt's early unique unit, and also unique in that its counted as Heavy Cavalry, it has a ranged attack (the only one until cavalry is replaced with tanks).
* Empire Earth: In the penultimate mission of the Russian campaign, the colossal dictator-robot Grigor II is definitely revealed to be no more than a totalitarianist who won't care for anything but the submission of the entire world to the regime of Novaya Russia, even if that means resorting to genocide. This prompts Molotov to defect to the Americans. He agrees to travel in time with Molly Ryan to meet Grigor Stoyanovich before he rose to power, in order to convince him to avoid taking the path that would lead to the dictatorship and the construction of Grigor II. Unfortunately, the latter anticipated them and traveled too to the past, helping the original Grigor to succsesfully stage his coup with future technology. Grigor is impressed by the tales of his successes and those of his robotic heir, and sees no problem in the means, forcing Molotov to kill him to prevenet anything and close the time loop.
* Empire Earth involves Grigor II going back in time to modern-day Russia (the first level of the Russia campaign, in fact) to give Grigor nano-age tech, allowing Novaya Russia to rise to power far earlier, before Grigor's health deteriorated,

and the players stopping him.
* Empire Earth mission where Operation Sealion is implemented and England is successfully invaded. At no point is it mentioned that you are, in fact, working for the Nazis, the Chancellor is never named, and of course there's that whole Holocaust business that goes unmentioned.
* Empire Earth Molotov shoots him dead and returns to the future, but the ending doesn't show whether this was for good or bad.
* Empire Earth, no matter what age the player advances to, workers will still chop trees with axes, mine minerals with picks and carry everything in a wheelbarrow. Even when soldiers are using giant mechas to move around.
* Empire Earth: One Greek campaign mission starts you on a small island. The island's resources are only there to get you a few boats so you can leave, as an unstoppable army makes landfall soon after.
* Empire Earth opening movie. You see four warriors in four dramatically different epochs (stone age, British imperial age, second world war and the future). The stone age warrior has a white (blind) left eye, the imperial sea-captain has a cloth in front of his, the WWII commander has a standard black eyepatch and the futuristic warrior has a cyborg left eye.
* Empire Earth rides around on a hoverboard. In the campaign, he gives you the Grigor II robot.
* Empire Earth: Russian dissident Grigor Illyanich Stoyanovich and General Sergei Molotov.
* Empire Earth's American campaign, the Soviet Union truly collapsed after the US stole the stealth bomber the Soviets had developed, both sides managing to hush up the whole naval war in Alaska.
* Empire Earth's forces come across small villages, which can either be spared and assimilated for civilization points, or razed for plunder.
* Empire Earth, sold on the promise of containing "over 500 000 years of history". Five hundred thousand of those years are devoted to the Neolithic age, which a player can and probably will want to pass through faster than banging two rocks together, in order to spend more time in the more interesting ages adding up to nearly five thousand years beyond the advertised half a million.
* Empire Earth: Some missions give you a Radio Man, who can summon squads of airdropped infantry up to three times.
* Empire Earth: Strategist heroes heal allied units and yell enemies into taking extra damage, but while they can attack, they do pitiful damage (less than the basic infantry of their age) and won't even attack unless specifically ordered to. They're the only source of mobile healing until (non-combat) medics become available... some 20 centuries later.
* Empire Earth, the Cold War ended when the Soviet-invented stealth bomber (which looks a hell of a lot like a B-2) was stolen by American agents after an extended bombing campaign over Alaska. This embarrassing defeat caused the USSR to collapse soon after.
* Empire Earth: The expansion's Pacific theater campaign has several maps taking place in dense jungle, one of which features disease outbursts, mines, and snipers.
* Empire Earth: The first campaign is set in Egypt around the end of the 6th dynasty. While there are no animated mummies, one level features starving peasants so desperate for food they break into the tombs and haul out the preserved corpses to feed on them.
* Empire Earth, the hero characters of WW1, WW2 and Modern eras wield revolvers, while the basic units of the time use rifles.
* Empire Earth, where you can choose not to upgrade some units (i.e. arquebus-using soldiers in the modern age) but some (archers and cavalry) are no longer available after a certain era.
* Empire Earth zigzags this for its Greek campaign. The first level has a village chieftain named Hierakles leading his people to a new land where they build a temple and a city on top of a hill (the Acropolis), the Trojan War is fought without divine intervention, while Theseus was a leader of Athens who united the outlying city-states against Sparta and Thebes. The last (of very few) supernatural

events is when Theseus ascends to become a god; this marks the campaign moving from being based on Greek myth to being based on history.
* empire even being a stand-in for the real-life Spanish Empire during their expansionist heyday.
* Empire faction may purchase and ride warg mounts. If you want your badass leader to ride into battle on top of a white wolf, then why the hell not? Warg Knights are not horses and oxen as we know them, but are instead descendants of each respective species.
* Empire from the Ashes activating their Enchanach drives is enough to make Zeta Trianguli Australis go supernova and wipe out an Achuultani fleet.
* Empire from the Ashes, and a lot of other things. The main character gets improved versions of the implants.
* Empire from the Ashes, and capable of deploying more conventional tracks for increased stability and decreased power budget.
* Empire from the Ashes and prominent ears. His eventual wife Jiltanith is gorgeous. However, both of them are roughly the same height, just under 190 cm tall.
* Empire from the Ashes, and throw it at Earth, using their own ships to further shield it. The moon is stated to be much larger than the kind of projectiles they typically use.
* Empire from the Ashes are also fighting against Anu and the restraints are just there to keep him contained until they can explain exactly what is going on and why they want to help him.
* Empire from the Ashes because, as a product of the Fourth Imperium, he has "no taste for tyranny".
* Empire from the Ashes during 52,000 years of unsupervised operation. Fortunately, given its ability to wipe out star systems simply by FTLing/deFTLing in the wrong place, it's a good guy.
* Empire from the Ashes have been legit, or it might have been Colin pranking Horus.
* Empire from the Ashes: In the third book, a corrupt customs officer who was hired to help the villain's plot to interfere with an interplanetary teleport to replace a statue with a fake with a bomb inside is disposed of after the job has been done in this fashion.
* Empire from the Ashes) is how he survived the attempted bomb assassination.
* Empire from the Ashes, is noticeably embarrassed when explaining this to the protagonist, who actually drops the trope name.
* Empire from the Ashes: Main protagonist Colin McIntyre is stated to have graduated from the US Naval Academy in the first book. They create an all new Imperial Academy in the third book. It seems to be heavily based on the academies that the protagonists remember.
* Empire from the Ashes Sandy MacMahan, who tops out at a mere 140 cm (4'7), and Sean MacIntyre, who is 60 cm (2 feet) taller.
* Empire from the Ashes series has a similar premise to Mass Effect below. Every 50-100,000 odd years, a huge fleet sweeps th galaxy, exterminating every sapient species it finds. The last interstellar human empire, of which the population of Earth is an offshoot, was aware of this fact, and built an enormous fleet to stop them. Unfortunately for Earth, we're on the closest edge of human space to the fleet, they're coming again, and the Imperium is nowhere to be seen.
* Empire from the Ashes series. The huge influx of advanced technology after the first book renders the date moot, though.
* Empire from the Ashes series, with a set of dogs that have been genetically enhanced to near-human intelligence and then fitted with vocoders to translate their thoughts into speech. It goes into some depth about how they have simple sentence structure and don't have temporal verbs (speaking only in the present) but otherwise treats them as being pretty wise, if not always smart.
* Empire from the Ashes, starts a decade after the end of the previous one, and contains multiple other skips, covering over a decade itself.
* Empire from the Ashes: The Achuultani refer to the human chunk of the galaxy as

the "Demon Sector" because their periodic genocidal waves always suffer huge losses there.
* Empire from the Ashes, the mutineer's inner council managed their constant manipulation of the human race without going into stasis by transplanting their brains as necessary into the bodies of lesser mutineers who had obediently gone into stasis. Less important mutineers have to make do with regular human bodies.
* Empire from the Ashes tours of duty and it's considered necessary for the health of the community to have children born and growing up as they would be on a planet. Of course, being what they are, these ships have crews in the hundreds of thousands and provision for a natural increase up to doubling.
* Empire from the Ashes toward Stomald, who has been terrified, laughing and ranting about Stomald's sinful nature.
* Empire from the Ashes trilogy. The Emperor is absolute in military matters but a kind of limited monarch in civil. The ships of Battle Fleet are hard-wired to obey not the Emperor, however, but rather a massive supercomputer orbiting the capital, leaving him largely impotent if he is voted out of office until a new Emperor can be put into power. This was arranged by the first emperor (elected by the Senate to stop the civil wars) as a check against absolute power, and nothing short of complete reassembly of the supercomputer's core can change its mind.
* Empire from the Ashes turns out to be a giant ancient human starship, and all humans on Earth are the descendants of its crew.
* Empire from the Ashes, which has been acting as the Moon ever since.
* Empire from the Ashes who was responsible for the assassination attempt ultimately never finds out.
* Empire from the Ashes with enough firepower to make the Death Stars seem weak in comparison, that threw the original Moon into the Sun and secretly replaced it 50,000 years ago. Oddly enough, this is the least outrageous plot point.
* Empire, Hakeem, who is in his early twenties (judging by the fact that he was a baby when his mother went to jail in the '90s) is in a relationship with Camilla, a middle-aged fashion designer. His parents are not pleased.
* Empire, Harry is implied to be the descendant of King Arthur himself.
* Empire has a deck-building mechanic integrated into the 4X gameplay. As the game continues, more cards become available to add.
* Empire human worlds except one (which remains independent and neutral for unclear reasons), while 'earlier' installments has news and mission-related texts indicating the Empire is considering implementing a policy mandating that all humanity be part of the Empire, so obviously it did happen.
* Empire in Canada may have played a role). There have been a number of claims to why, but most comments say that subject matter (about the cutthroat hip-hop industry) doesn't really appeal to international audiences.
* Empire is rated "14+" when shown on Canadian television nationwide, but received an "R" rating for its complete DVD set in Ontario despite no difference in content or explicit bonus features.
* Empire. Lucious didn't stop Andre from marrying Rhonda, but he isn't shy about his opinion of her. However, he did force Jamal at 18 to marry a woman, and when that didn't last, threatened to cut him off if he came out, and he attempted to bribe Hakeem's girlfriend Camilla to leave him, since he (incorrectly) thinks she's a con artist. The boys' estranged mother, Cookie, takes a more moderate stance once she re-enters their lives. She has her own opinions about her sons' lovers that she makes known, but she respects them enough not to interfere with their lives.
* Empire, Luke uses the Force to help pilot the Millenium Falcon around a black hole to escape a pursuing star destroyer, which is unable to replicate the maneuver and is pulled in.
* Empire: Made in 2015, flashbacks to the creation of the titular company and the elder Lyon children's early adulthood/late teens (as well as the youngest's childhood) happened in this decade.
* Empire: Made in 2015, several important flashbacks happened in this decade, such as the imprisonment of Cookie in 1998, the peak of Lucious' music career, and the Lyon children's childhood.

* (Empire Novels?), there's a star named Fomalhaut in the constellation of Piscis Austrinus.
* Empire of Dreams: The Making of the Star Wars, Kenny Baker recounted that, while filming, the cast and crew would on rare occasions forget he was inside the R2-D2 outfit (which could not be taken apart from the inside) and leave to take their lunch breaks. But, he said, someone would usually remember he was in there and come back to let him out.
* Empire of Erebonia is one to Prussia, including a Germanic naming scheme and a character who's based after Otto von Bismark, nicknamed "The Blood and Iron Chancellor"
* Empire of Estellion has no shortage of volunteer troops, all seeking to attain nobility (after 22 years of exemplary service), the Kaysani invasion has left the Imperial Mark struggling. This has resulted in Rooks mustering militia from common folks to plug the gaps. Unfortunately, they are untrained rabble, who drop like flies. They do, however, slow down the enemy even as they die.
* Empire of Ivory Laurence himself is flogged while being held prisoner. We don't know how severe it is since it's from his perspective and he loses count at around ten, but he does end up being delirious for a week.
* Empire of Ivory this trope comes up when, as he is about to hand himself over to the British after foiling the Admiralty's plot to unleash a lethal epidemic upon the dragons of the continent, Laurence makes a last ditch plea for Temeraire not to join him. Temeraire in turn asks if Laurence would claim he was carried off against his will and forced into his "crimes" by the big scary dragon if he did so, correctly predicting his response to the idea of trying to save his skin with such lies and slander.
* Empire of Japan, whose Army and Navy had rather plain looking uniforms yet still lost the war.
* Empire of Satanis provides an entire race of them in the form of the Schmekbluts.
* Empire of Satanis tries to explain it with a "master morality", the bottom line is that you are a demon who performs evil acts and torments humans so you can become a god and be even more evil.
* Empire of the Ants novels (only the first was translated to English), and this is at times a crucial plot point.
* Empire of the Ants reveal Ants were responsible for the extinction of the Dinosaurs.
* Empire of the Ants), though, the ants are described as not knowing what humor is and the humans have to describe it and teach them.
* Empire of the Eagle, a fantasy involving enslaved men of Crassus' army who're displaced into another universe after being given to a Chinese emissary.
* Empire of the East in the aforementioned cabinets. The inversion comes when Ardneh explains that within his cavern, he is weak and blind, (much as it is very difficult for a man to observe and manipulate what is going on inside his own body) and needs Rolf to conduct certain repairs. Played at least partially straight, however, in that Ardneh can turn lights on and off throughout the complex to guide Rolf to where he needs to go.
* Empire of the East; is it really neccesary to call horses "riding-beasts" and mules "load-beasts"? Not to mention "milk-beasts" and "wool-beasts". Yet birds are birds, dragons are dragons, and "potatoes" are still a named vegetable. Also confusingly subverted when we are introduced to the "war-beast", apparently some new type of lion or puma hybrid which can also be ridden.
* Empire of the East: Multiple layers. Exaggerated because this story world was transformed from magicless(scientific) to magic by "The Great Change", a world-changing blast. Zig Zagged in that this story world's demons are actual nuclear explosions transformed into malevolent beings during "The Great Change" (tech-to-magic). Inverted when Ardneh reverses "The Great Change" transforming magic items back into scientific technology.
* Empire of the East series both use this trope to the fullest. The former was written in the 1970s, when the whole USA was going to convert over to metric any day now, and since the books are set 50,000 years in the future, it made sense at

the time. Now it just seems a little quaint.
* Empire of the East universe suffer from this. That is, their "lives" are bound to an inanimate object. While there are other ways of killing them, destroying their lives requires no special skill and is by far the easiest.
* Empire of the East would certainly qualify. Interestingly, Ardneh brought about the proverbial "end" by making nuclear war impossible.
* Empire of the more mainstream-leaning '80s sort, in stark contrast to the darker material that surrounds it.
* Empire of the Petal Throne act. 50,000 years later, they still bear a grudge.
* Empire of the Petal Throne. A superweapon splits the Tekumel system into a parallel universe where nothing else exists.
* Empire of the Petal Throne. Humans, meanwhile, have a super-advanced starfaring civilisation, so in their minds, the Tekumelani were inferior. Humans have allied with other advanced races in the past, but instead they terraformed the everliving hell out of Tekumel, rearranged its orbit and gravity, and tried their level best to exterminate the "primitive" natives. It's noted that most other starfaring races wouldn't have even invaded the planet at all.
* Empire of the Petal Throne: Set on a planet with few metals and tropical climate, these effects limit the armour available to characters.
* Empire of the Petal Throne setting, used in both game and novels, is distinctly non-standard, with no elves, dwarves, trolls, or anything similar to European fantasy, by design.
* Empire of the Petal Throne Tékumel was previously known as Nu Ophiuchi d or Sinistra d.
* Empire of the Petal Throne that the people of Tékumel see as gods.
* Empire of the Petal Throne. Then, stuff happened. 50,000 years later, the original inhabitants still bear a grudge.
* Empire Of The Sun and 'The Kindness of Women'' has the protagonist "Jim Graham".
* Empire of the Sun claimed they filmed larger parts of the film, but most of their scenes were cut.
* Empire of the Sun contains an interlude during which the abandoned schoolboy Jamie fends for himself amid the chaos of the Japanese invasion, foraging from ladders and riding his bike around the dining room. Averted, in that it abruptly transitions into his meeting with Basie, followed by internment by the Japanese.
* Empire of the Sun featured a Soviet GAZ-69 jee... uh, light troop carrier as an Imperial-era Japanese military SUV.
* Empire of the Sun goes from being sung by Christian Bale's character to playing with choral backup after the character has stopped singing.
* Empire of the Sun. Jim attempts CPR twice in the film. Not only does it not work in either case, but the second time (where Jim tries bringing a pilot back) is also far from pretty.
* Empire of the Sun's video for "Alive", Nick "Lord" Littlemore, gets to wear a very nice brown one with tons of zippers.
* Empire of the Sun's "Walking on a Dream" hit the charts after its use in a Honda commercial in 2016,
* Empire, one of the ways of defeating enemy ships is coming alongside and boarding them. While you can't use captured ships in the same battle, they're yours as soon as the battle is over.
* Empire only monologued to distract Bond as a remote control gun was aiming to shoot him.
* Empire players who conquer Pigbarter can get a special follower named Sir Man Delour, in tribute to the review of the game by
* Empire play his sons Jamal and Hakeem, who are popular musicians themselves.
* Empire Porky Building claims to be, and one of the floors hasn't even been fully constructed yet!
* Empire Records: After a fair amount of provocation from his foster son Lucas, Joe drags him into the office and beats him up, then brings him an icepack and says, "You know you deserved that, right?"
* Empire Records. He's basically a father figure to all his young employees, and a

legal foster father to one of them.
* Empire Records is set across one very eventful day: April 8th, a.k.a. Rex Manning Day. Though the opening scene takes place the previous night, this may arguably be the same day since it is after closing and Empire Records is "Open 'Till Midnight".
* Empire Records wore an apron in the nude) puts on a MusicTown apron with nothing but stockings on underneath and dances around, saying "I think MusicTown is torn on the revealing garments issue".
* Empire, right after Lucious comes to accept Jamal's homosexuality and names him as heir to Empire Records, homophobic rapper Black Rambo makes a scene at the press conference and refuses to work for a "batty boy." It seemed his only purpose was to show how much Lucious had developed, though at the very least, it's Jamal who socially destroys him in a rap battle.
* Empires combines RTS and FPS like Iron Grip, but in a different manner; players play on one of two different armies fighting each other, each with their own commander to whom the game functions like a standard RTS.
* Empires: Dawn of the Modern World : The Russian civilization has a late game classified project called Tunguska Meteor that allows them to call down a meteor to devastate enemy units.
* Empires expansions are spinoffs of the main games. They contain the same hack'n'slash core gameplay for battles, but with a more strategic approach, allowing for battle formations, politics, kingdom-building, and simulation.
* Empire's heir with his bare hands after getting shot. He's not quite up to the Baron's level in the scheming department, but is under pressure to learn fast.
* Empires. If, on the other hand, the player is defending their own kingdom from invasion, they have a secondary victory condition in allowing time to expire; so long as they do not die or allow their own main base to be taken, they can win without having to take the enemy's main base.
* Empire, Sock's owner is looking in his house's wreckages for Sock's receipt, all while sporting a mildly annoyed expression, despite the fact that the city he lives him just got completely destroyed by a demonic hamster, an army of monsters from Hell, and three gods. He's even happy to finally find the receipt, as if bringing back his evil hamster to the pet shop would change anything.
* Empires of Trust describes and compares and likens early to late Republican and Imperial Roman to American psychology of Empire building through historic examples.
* Empires side games in order to allow more focus on the kingdom management aspects, but this is the first time a core battlefield mechanic was completely excised between a numbered release and the expansion.
* Empires spin-offs expands on the relationship system, allowing players to forge bonds with other characters. At high enough levels, players can take on other characters as sworn siblings, or even marry another character of opposite gender.
* Empire Star, Comet Jo's homeworld exists only to produce a plant called plyasil. Everyone living on the planet is either involved in plyasil production or in supporting the people who produce the plyasil.
* Empire State (2012) by Adam Christopher is this taking place across several dimensions and times and combines Noir with Weird War as the eponymous Empire State is in a never ending war with a mysterious Enemy.
* Empire State, Jason warns Sara that if she moves to New York City, she's going to be surrounded by annoying hipsters. She moves anyway, and upon speaking to Jimmy again:
* Empire Strikes Back is a civilian airspeeder converted to fulfill combat purposes by the Rebels. Another example is the V-wing, an atmospheric fighter-bomber used by the New Republic.
* Empire Strikes Back it the first time was, it worked so unexpectedly well as to become standard thereafter.
* Empire Strikes Back). They also displayed incredible accuracy in the EU, where a Super Star Destroyer fires on a worldship from outside the solar system.
* Empires who hold you in poor esteem will call you specific insults based on whichever in-game category your species belongs to. Humanoids get called "monkeys", mammalians "beasts", reptilians "lizards" or "newts", avians "birds", "chickens",

"dodos" or "buzzards", arthropoids "bugs", molluscoids "parasites", fungoids "shrooms", plantoids "weeds", lithoids "rocks", necroids "husks", and machines "tin cans" or "toasters".
* Empire, the actors that play Andre and Anika, Trai Byers and Grace Gealey, got married in real life during the second season. On the show they have very little on-screen interaction (Anika starts out as Andre's father's much younger fiancee).
* Empire; they're the numerically smallest cavalry unit at full strength, and due to the fundamental shift in field warfare they're more of a (valuable) support unit.
* Empire to fund the titular record label, which eventually leads to Cookie spending 17 years in prison. Meanwhile, Lucious manages to make Empire into a multi-million dollar business, and the Lyons are obscenely rich by the time the show starts.
* Empire: Total War acknowledge the primacy of artillery during their settings by giving artillery (and ships) unlimited ammunition, and have an array of cannons, howitzers, mortars and rockets to use in sieges and in field battles.
* Empire: Total War also has steamships and ironclads, but those appear so late in the game they don't really matter).
* Empire: Total War, certain buildings cause unhappiness due to industrialization. If this industrialization causes too much unhappiness, then the people will launch a rebellion. Whether or not they win, between hundreds and thousands will die. For whatever reason, Luddites don't rise under Constitutional Monarchy, representing British parliamentary monarchy - the very place the Luddites were ever active.
* Empire: Total War changed this a little by introducing lots of "minor" nations that could be engaged diplomatically and would generally behave like the larger factions (with some caveats to prevent them from expanding). Of course, the number of Major factions (empires) vying for power was considerably smaller than in previous games as a result.
* Empire: Total War has this at times with the Rocket Troop artillery unit (the "rockets' red glare" type of rocket).
* Empire: Total War is also used for this purpose, and some skirmisher units can also put down sharpened sticks.
* Empire: Total War. Slavery is also glossed over on the flavor texts for the plantations; the most mention that the practice gets is the late-game "Abolition of Slavery" technology... Though Revolutionary France abolished the practice in 1789, it was reinstated by Napoleon. The long game's ending year of 1799 was long before any American/European nation permanently abolished slavery.
* Empire: Total War, western commanding officers would give you a Roman salute when you select them on the campaign map.
* Empire: Total War which allow you to play as the tiny emergent factions, such as Scotland, Punjab, or Mexico. Surpassing the major world powers is very difficult, but certainly doable.
* Empire, when Cookie finds Lucious sleeping heavily from a new medication, and before she leaves, he sits up and reveals not only the season-long secret that he was the one who murdered her cousin Bunky, but that he doesn't have ALS as originally feared, but a less severe and more manageable condition instead. She's so pissed that she contemplates murdering him with a pillow, which got captured on video tape...
* Empire, where Luke has to face some of the same enemies on both Hoth and Dagobah, just as palette swaps.
* Empire where the villain Golgoth begins his world conquest in Australia and continues until only the U.S. remains as a beacon of hope. Then America falls too and everyone is screwed. Justified in that if you're doing world conquest and starting from nothing, it makes sense to build up a powerbase somewhere else first and save the toughest target for last, after you've assimilated everyone else into your forces.
* Empire with a Dark Secret: A seemingly utopian government turns out to be up to ugly things behind the scenes.
* Empire with a Dark Secret: A whole civilization is built on a horrible secret.

* Empire with the right use of artillery. However, killing a general while the enemy is too far away can result in the moral rebuilding by the time they enter the musket range.
* Empirical Crescent, a row of terraced houses where every door and window leads somewhere other than where you'd expect it to lead. At least it makes it easier to get rid of rubbish—just toss it into the garden. After all, it might not be your garden. The reason for this corruption of dimensions occurs because the row of houses is crescent-shaped on the outside only. Inside, it's supposedly laid out like a straight row. Presumably the two configurations conflict. Occupants had a tendency to leave in the middle of the night, often without stopping to pack...
* EMP is intended to stun vehicles, but also affects your character's advanced helmet optics. (Computer-controlled bots aren't bothered at all, except to the degree that they were aware of your presence.)
* Emplaced here is a somewhat superfluous version of the especially popular lyrical work "Twinkle, Twinkle Little Star". The original rendering of this work was specifically composed for an infantile audience. The following version is for those amongst us who find the urge to utilize the aforementioned trope irresistible, even while making an attempt to lull a young insomniac into a recuperative state.
* Emplate says he detected affection from Monet when it came to Creed before guessing that she's bored with handsome, cultured men. Much later, he threatens to gut her with a warning that Creed will do it eventually which causes Monet to snark at him looking down on the guys she hangs around.
* Employed frequently by Tim Drake back in his high school days when he needed to give out an excuse for being missing or wiped out from his activities as Robin. The most blatant probably being when he lied to his dad about how and why he snuck back into
* Employee of the Month computer game, the number to call Sublime Seafoods is 555-4444. SpongeBob lampshades this.
* Employee of the Month has the (ironically poor-sighted) vision center employee Lon (Andy Dick) being woken up early in the film, going "Jimmy Buffett. Who?" (The DVD shows alternate takes with different phrases.)
* Employee of the Month When Iqbal loses his job because of Zack's hijinks, his wife happens to get a big promotion at her own job, allowing him to become a stay-at-home daddy for their young children. From what we see, he seems to adore it despite being a lot of work.
* Employees' Entrance: The elevator man at the department store calls it out. "Second floor, lingerie, pajamas, millinery, women and children's shoes, corsets, brassieres, girdles, abdominal bands, air mattresses, bicycle tires, army cots, canoe paint, shoe stretchers, and Boy Scout outfits."
* Employees of the Krusty Krab normally just have a little sailor hat for a uniform, but the time Pearl took over and turned it into a hip teenage hangout, the Kuddly Krab, she had everyone wear pink leotards with K-shaped deely-bobbers. Squidward found them thoroughly humiliating; SpongeBob, of course, loved them. SpongeBob
* employees: SpongeBob wants the old grease trap back, and Mr. Krabs is unhappy at all the money being spent. Krabs still can't bring himself to fire her, though, and it's only when Pearl breaks down and confesses she's been trying to get fired that SpongeBob finally sacks her on Krabs' behalf.
* employers would steal money meant for benefit plans. It's a breach of fiduciary duty, as ERISA requires employers to make prudent decisions on behalf of their workers and notify them of any upcoming changes in advance. Enron was a notorious case, where its executives raided its retirement plan before the company went belly-up. This is a form of "reverse embezzlement," where the employer robs its workers of their benefits, but sadly, many don't even notice the breach as they usually toss their 401(k) statements. To detect ERISA fraud, employees should be extra vigilant on things such as erroneous contributions, unusual transactions, or abrupt changes to the plan. As an additional requirement, benefit plans must be covered by a fidelity bond, as it insures against theft by persons who handle the

plan.
* employing the wizards and sorceresses, mind you. Jagang does seem to genuinely believe that he and the wizards and sorceresses are necessary evils.
* EMP — A weapon which uses ionizing radiation to disable electronics.
* Empok Nor is identical to the titular space station, except abandoned and therefore sideways (even though
* emponymous she's this, and everyone else sees an Albino Deathclaw squeezed into a Vault 19 uniform.
* Emporio Alnino as part of the stage hazard of the Kennedy Space Station stage.
* Emporio Ivankov occurs on the same prison, when Blackbeard betrays the Marines and breaks into it to recruit some prisoners for his crew.
* Emporio Ivankov's Tension Hormones, which energize and relieve pain for a period of time at the cost of suffering all of it later. Consecutive usages of it are also very dangerous,
* Emporio Ivankov, which appeared to have bruised him up a bit but otherwise fine. He also took multiple cannon-fire like a cake-walk.
* Emporio Ivankov, who somehow manages to outcamp even Mr. 2, but is also insanely powerful and is a major player in the Revolutionary Army, whose goal is to overthrow the world.
* Empowered, a fat, ugly geek steals Emp's suit and puts it on, thinking it will grant him superpowers. He ends up grievously injured, wetting himself in the process. Also, Major Havok soiled himself when fighting The Caged Demonwolf.
* Empowered, although it gets destroyed during a fight. And the B.F.Gunnaz who are named after this trope.
* Empowered and from various enemies. And neither of them has any problem returning the favor to any opponents who happen to be female.
* Empowered and is occasionally seen exercising dispassionate lethal violence - when Ninjette is ambushed by another clan in the park, he methodically goes around shooting them all in the head afterwards, just to be sure. He also takes over Single Action’s plasma pistols in the “Capeys” fight, which are presumably lethal.
* Empowered and is plagued with self-confidence and body-image issues.
* Empowered and spanks her during an interview, with the intention of putting it up on her website as a paid download. This isn't the first time Ocelotina has done something like this. Before deciding to take on a superhero identity herself, the girl who'd become Ocelotina decided to kidnap Emp and hold her for ransom. Of course, since Emp's powers come from her suit, she had to be naked save for her mask... and it was fairly strongly implied that Ocelotina engaged in some very intimate touching.
* Empowered and the literal blockhead who actually are nice to her must say something about how much being a low-tier superhero sucks.
* Empowered, Anglerfish and his son both have the power to hypnotize the people who look into their head lures into seeing their greatest desires.
* Empowered as she desperately tries to deny the truth, only to end up consumed in flames when she finally accepts that Spooky is right.
* Empowered as soon as it start getting shredded... that is, most of the time.
* Empowered at the end of Volume 5 is such a huge deal, and causes the entire caped community to stamp down very hard lest criminals and villains think the unwritten rules can be broken with impunity.
* Empowered Badass Normal gains super powers, making them even more dangerous to their enemies than when they didn't have powers.
* Empowered Badass Normal." His fascination with it is what blows (if you’ll pardon the pun) his cover when he tries to infiltrate Air Temple Island. Kya quickly realizes that he’s a bit too knowledgeable (after he breaks into her brother’s study) to be some random guy.
* Empowered Badass Normal: When an already formidable (yet physically ordinary) fighter gains superpowers.
* Empowered Badass Normal: When said ordinary, already badass person gains superpowers.

* Empowered before acting helps Emp to take down a seemingly unstoppable bad guy.
* Empowered before ThugBoy, and then fleeing through a window. (Note that, since she leaves the tattered remains of Emp's suit behind, she's quite logically buck naked afterward.)
* Empowered began as a series of superhero-themed softcore BDSM pin-ups that Adam Warren did as a commission to make money. However, he then found the people in them developing personalities, which gave him some plot ideas...
* Empowered both the heroine's boyfriend and best friend are people who defeated then befriended her. And if you include the Caged Demonwolf on her coffee table is one of the enemies who SHE defeated, and befriended (however begrudgingly.)
* Empowered, but one supervillain ThugBoy worked for really took the cake when he made his Witless Minions wear shirts with an emblem looking like a bullseye. Wow. Now that is...
* Empowered, but the fact it supercharges her orgasms? Gee, what a burden.
* Empowered by some villains who want to get the Superhomeys' attention on a crime, and think they've only captured some cosplaying stand-ins. When Emp asks why they bothered, the leader gasps: "Everybody knows that all the Superhomeys care about is bad publicity," and Emp can't honestly argue with him on that point.
* Empowered cusses every third word, no matter what she's talking about and even when she's completely calm. Not for nothing is she referred to as "████ing Oyuki-Chan."
* Empowered develops. In the "Nine Beers With Ninjette" short it's finally confirmed that she's an alcoholic and knows it.
* Empowered does this all the time (which is why she's quite commonly referred to as "████ing Oyuki-chan"). The reason for this habit is not clear yet.
* Empowered does this twice with Ninjette. Complete with sound effect.
* Empowered does this with numerous stores, foods, TV shows and websites.
* Empowered, Emp has a rivalry with Sistah Spookah. She later finds out her boyfriend, Thug Boy, once slept with her. She asks Thug Boy who is better in bed. Thug Boy thinks if he says Sistah Spookah, he's in big trouble, and he better not say they're interchangeable in bed either. He said Emp was better. Emp refuses to talk to him for about a third of the volume.
* Empowered, Emp not only reads yaoi slash fan fiction about her male teammates in the Superhomeys, but writes it as well.
* Empowered, Emp talks about how she thought about doing this but decided against it, because it might dissuade crooks from allowing captured heroines to use the bathroom in the future.
* Empowered ends up bound, gagged, and nude in a room full of villains, they rarely attempt to assault her, because this would violate the "Unwritten rules" between heroes and villains. Those few villains willing to break the rules are, well, you know...
* Empowered, except the others playing refuse to accept her as a bet due to the 'unwritten rules'- they don't want a superhero team after them just 'cause one idiot tried to use a heroine in a poker game, thanks.
* Empowered features Sistah Spooky coming upon the aftermath of the title character's disastrous encounter with Glue Gun Gil, considered to be the all-time lamest villain in the city next to Ladder Master.
* Empowered, for reasons too complicated and silly to explain but which involved someone trying to use alien nanobots with an untranslated interface for perverse purposes.
* Empowered for various supervillains, stealing their expensive gadgets and ebaying them after the villains got caught. 'Til they steal from the wrong guy...
* Empowered goes through a workout session at the hands of her friend Ninjette that involves tree-hopping, swimming across a shark-infested bay, and shooting toys out of the air.
* Empowered had his arms and legs replaced with 'em. He also has a magical one stuck in his head.
* Empowered: Happens sometimes, often with a character saying something they don't

actually say or thinking more perverted thoughts. The violent variant does show up but is rarer. These segments are always ended with the phrase "END COUNTERFACTUAL SCENARIO."
* Empowered hard when he first laid eyes on her — it even broke him out of his terminal "Whatever." mood.
* Empowered: Has a character with fourth-wall-breaking expository bits between stories. She is also very aware of what happened to other characters written by Adam Warren.
* Empowered has an inversion of this. It does fit much like a second skin. She even has to shave her pubic region or she gets what's often referred to as steel wool. However, the costume tears really easily. The more insecure the more easily it tears. Given her powers come from how intact the costume is, she's made more insecure the weaker she gets, leading to her being practically naked quite often.
* Empowered has (at least) one race of them. They're huge (their liver weighs 700 kilograms alone!), have three eyes, and their veins seem to be on the outside of their bodies.
* Empowered has Ninjette, who deals out some pretty graphic violence on occasion.
* Empowered her thoughts - her subconscious associations etc. had a tendency to "bleed through", as in this telepathic conversation with Sistah Spooky:
* Empowered heterosexual sodomy, leaving The Lash to do all three parts). He's about to whip her but realises they're standing in front of a fabric store, which brings up traumatic childhood memories of being bored out of his skull while his mom shopped for fabric, so he calls it a draw and leaves.
* Empowered, including a "Kick Me" sign—which they changed to "Kidnap Me"—taped to her rear.
* Empowered. In-story, there are official Superhomey ringtones and themed T-shirts (and panties), plus action figures of their Rogues' Gallery.
* Empowered in-universe) that the costume gives fantastic cosmic powers limited only by the user self-confidence. As Empowered has the self-confidence of a used kleenex in a dirty cesspool, you can see how it works. So yes, she unconsciously granted herself the power of being easily aroused and multi-orgasming. Kudos!
* Empowered is one of these. Much of her collection of doujinshi is based off the other superheroes, much to their horror. The term "fujoshi" is also mentioned.
* Empowered is seen as this by the public at large, despite having several major victories to her credit. Ocelotina actually is one, being a costumed normal with no powers who uses the look to sell merchandise.
* Empowered is to get your humiliation fetish in your ironically-titled supers fantasy. It's also Justified in that the suit fragility is because of her body-image issues. If she could take pride in her body the suit would be tougher and thicker.
* Empowered loves speaking with alliterations, and even occasionally comments on how many he managed to queue. Ninjette occasionally does it when talking to him.
* Empowered Manny is conspicuous by his absence after a role in volume 4 that seemed to set him up as a recurring character.
* Empowered — her left half, Charity, is an angel, but her right half, Vanity, is a devil. The mind boggles...
* Empowered — her left half, Charity, is an angel, but her right half, Vanity, is a devil. They share a pair of wings (traditional style, that is feathery / bat-like, respectively).
* Empowered means his descriptions are anything but clinical and detached.
* Empowered meet her boyfriend Thugboy? She was a captured superheroine, he was the minion tying her up. Sparks flew. They don't like to talk about how they met.
* Empowered, Mind is interrupted when she declares her love to Sistah Spooky, who arrives precisely "three seconds too late" to save her from burning up in a descending space station.
* Empowered, most career villains (including mooks) avoid killing heroes unless absolutely necessary, particularly the weak, useless ones like Empowered — doing so will result in your victim's hero friend tracking you down to exact bloody vengeance instead of just arresting you.

* Empowered, Ninjette redirects Captain Havoc's super-strength punch with martial arts and throws him to the floor. Offscreen sound effects and dialog indicate she does it several more times, to the amusement of the other heroes. Ninjette later wonders why all super-strong heroes fight like "developmentally-disabled eight-year-olds."
* Empowered: Not one, not two, but three of the Superhomeys obtained their powers from sex with non-humans (one a robot!). In fact, they met in a support group for it. One of them gained his powers through an alien STD.
* Empowered not only lives most of the time on a space station to avoid getting headaches from reading other people's minds, but admits being tired of reading the filthy minds of lunatics.
* Empowered often finds that her moments of saving her Super Homeys' butts are often ignored for their chance of taking yet another potshot at her fragile suit.
* Empowered. One time, he knocked out the male superhero Major Havoc. Havok woke up with the following note:
* Empowered, particularly Sister Spooky (although she becomes more sympathetic and less hostile towards Emp in the later volumes).
* Empowered Portal Network granted to the Superhomeys. It has a Mass/distance limitation that would be higher if the team didn't chintz out on their network plan.
* Empowered, reanimated supers really hate the "z-word." Understandable, as aside from briefly post-reanimation, most are as smart as ever.
* Empowered recalls a moment where Major Havoc tried to do this when instructing her in the use of her powers. "Spread those legs! Give me the power stance!" This does not go over well.
* Empowered-related reasons. She then becomes a recurring character as a deliberate model for the fetish crowd that Emp keeps unintentionally feeding.
* Empowered, Sistah Spooky and Mindf██k were these once. It's really the only way that Mindf██k can have good sex.
* Empowered's super suit is canonically thinner than a soap bubble and so revealing it took her six months to work up enough nerve to wear it in public.
* Empowered's Syndablokk averts this entirely. He's a C-List super, but that's because he holds back.His power is elemental control of ARCHITECTURE. Villains have a 0% chance of touching him in a city, near a freeway, or basically anywhere. He never uses it except when really, really pressed, because of the massive collateral damage buildings-wise.
* Empowered superhero Divangelic) is definitely sexier (dressed) than her sister Charity, an angel.
* Empowered's verse. She has the shape of an attractive human woman and is anatomically correct. One of the Superhomeys sleeps with her, and her nanites turn him into a mecha.
* Empowered's weakness. Her costume is the source of her powers, but it loses all of its mojo when it gets damaged, and it has the resilience of tissue paper. Most of Emp's battles end up with her mostly stripped down and powerless, and she's the laughing stock of the hero community because of it.
* Empowered's world can learn all kinds of cool magic, like kyonyujutsu (fake boobery magic), sosuijutsu (fast/quick/early to be drunk magic), sekushi nyanko "Monroe walk" jutsu (sexy cat "Monroe walk" magic), and more.
* Empowered, Syndablokk can control concrete, brick, and asphalt. Thus, he can attack with streets and buildings themselves. He tends to only use his powers as a last resort because his powers are very destructive and effects linger for a while after he leaves, meaning there will be streets and buildings moving on their own.
* Empowered teammates who use the "youtoob" screenshot as their new monitor wallpaper.
* Empowered that Emp later uses to subdue and seal a similarly sesquipedalian supervillain whose stay proves significantly more substantial — Demonwolf.
* Empowered that she may have actually died on her first mission without actually realizing it. It makes sense (sort of) in context.
* Empowered, the bad guys do this as a survival mechanism. Smack around the hero

and leave him (her) tied up and escape with the diamonds? Good show, whatever. We'll get you next time! Shoot the hero? Every other hero will be after you. Unfortunately, there are villains who simply don't care and are powerful enough that the prospect of being hunted by every other hero doesn't worry them.
* Empowered, the death of Mindf**k. "I love you, Theresa. I'll always love y—"
* Empowered: The title character does this a lot, as does her best friend Ninjette. In Emp's case, it's because her super-suit massively enhances sensation and increases libido; she mentions that she never even bothers with "Mr. Shower Head" since she got it.
* Empowered the title character finds that the only job she can get is with a group of superhero impersonators impersonating herself. Nobody realizes that it's really her until she ends up having to save the group from several supervillains who had kidnapped them in order to blackmail the REAL superhero team. In this case, she really is wearing a poor replica of her real costume.
* Empowered, the titular heroine's original day job is wearing an elephant suit with a backwards baseball cap to advertise a department store, Value Mammoth. People make fun of her all day long, but she still finds it mildly preferable to wearing her too-revealing super-suit.
* Empowered: The titular heroine visits the grave of her daddy, whom she lost early in her life.
* Empowered, the villain King Tyrant Lizard (a human turned intelligent dinosaur) and the hero Homunculoid talk like this; the former has a tyrannosaur's jaws and teeth, the latter has oversized lips and tongue.
* Empowered they are along the lines of "Useless Lass" and "Captain Kidnapped".
* Empowered, Thugboy says he once worked for a supervillain called Super Caucasian. When Thugboy was eventually fired, he got his revenge by stealing the villain's collection of porn before he left the building.
* Empowered tips. She explains that most forms of sedation aren't instant, so you can try to fight it, but that will just piss off your captors and make them inclined to tie you up tighter when you do go down. Chloroform, especially, can kill you if your captors don't know what they're doing, so it's best to just go limp at the first sign of it and try to escape later.
* Empowered to be a team of three dudes, but long story short the one who was previously just "the Lash" had to take over the whole name after a while. One wonders how the other two fought.
* Empowered was a strictly humourous series that parodied (among other things) various tropes of superhero comics. Later on, it began to add serious elements to the story, becoming more like a straight superhero comic (with added humour) than a parody.
* Empowered wears what at first appears to be a full-body catsuit. In reality, she's actually nude — her creators gave her an aversion to clothing, while at the same time giving her body the ability to hide this fact via built-in full-body tattoo/bodypaint that she can control at will — she typically looks like she's wearing a full-body purple spandex catsuit with logos and patterns on it. They didn't explain this until several chapters in.
* Empowered when ThugBoy (accidentally) feels up Ninjette. The chapter's titled, "Elephants, Cups and Canoes".
* Empowered when ThugBoy is given three choices how to respond to Emp's question.
* Empowered, when Thugboy mentions this as a key difference between the way men and women love their partners; women, even when they do genuinely love their boyfriend as he is, often have an eye to the man he could be, while men tend to fall in love with a woman exactly as she is.
* Empowered, who is one of the few characters in the story to be as utterly repugnant, despicable, and horrifying as he is.
* Empowered, whose death leaves Sistah Spooky barely this side of catatonic and Emp herself with a heaping dose of survivor's guilt.
* Empowered who was enraged that nobody but a "lame-ass superhero" (her) came to stop him and inquired what the other heroes were doing. Emp: "They're doing...

superhero-ey stuff?" Cut to the other Superhomies watching "Dancing with the Superheroes".
* Empowered: Willy Pete, as a fire elemental, has a beard made of flame. "Evil" is rather understating it.
* Empowered with his teammates "Rum" and "Sodomy". Unfortunately, the team fell apart: Rum was always too drunk, and Sodomy, well... he was too busy.
* empowering incident, but it's still very jarring and weirds out the other characters.
* empowering incident will cause the government to do something to him. It's dismissed by Irene as him being paranoid. Four days later, he's missing from school and replaced by the above Sarah Travers.
* Empress). And then she breaks Morax's jaw in Issue #7. Surprise! She was actually an undefeated cage fighter.
* Empress Boa Hancock when she is trying to smuggle Luffy on board a Navy ship, hiding him under her coat. Had it been anyone else, she probably would've minded.
* Empress Celene of Orlais appears on the surface to be a peaceful high queen, but players who
* Empress Elisabeth of Austria-Hungary was stabbed through the heart with a sharpened nail file in 1898 while walking down a pier to board a ship—but the nail file was very thin and made a very narrow wound, and no one saw any external bleeding because of the tight corset the Empress was wearing. She actually got up after her assailant ran away, continued walking down the pier, and boarded the ship. After boarding the ship she whispered "What has happened to me?" and collapsed into unconsciousness, dying of internal bleeding shortly thereafter.
* Empress Elisabeth of Austria was extremely proud of her famously long and beautiful
* Empress Elisabeth of Austria was stabbed in the heart by an assassin. She fell over but was able to get back up and stated that she felt no pain, believing that he had simply missed (in reality, the 4-inch blade had gone all the way in). Later when she removed her clothes she promptly died from her wound, her corset being the only thing keeping her from bleeding out.
* Empress Elisabeth was this in later life, owing to her depression acquired after the death of Archduchess Sophie and exacerbated by the death of Crown Prince Rudolf. Accounts of her ladies-in-waiting who traveled with her talked of Sisi standing on the deck (only in rare cases will she dismiss her attendants) of ships in terrible storms, despite entreaties for her to go inside. She traveled in secrecy, not for her own safety but more because she was ashamed of having grown old and lost her famed beauty.
* Empress Elisabeth. When the empress had a headache (rather common, according to her), her hair was suspended by ribbons from the ceiling to take the weight off.
* Empresses Messalina and Agrippinilla both count as well, with the former being an out of control hedonist who manipulates her husband into having people she dislikes executed, while the latter falls much more in line with Livia, doing everything in her power to get her son on the throne even though he's not fit for it at all. An interesting subversion, however, is Caesonia,
* Empress Jingū. After her husband died in battle, she destroyed the rebels that had killed him, and then led an invasion of Korea.
* Empress Laseen, formerly known as Surly, is the founder of the Claw, which serves as both the Malazan Empire's
* Empress Michiko, consort of Emperor Emeritus Akihito of Japan and mother of the current Reiwa Emperor, was born to a
* Empress Nagako/Kojun of Japan allegedly opposed the marriage of her son, the then-Crown Prince Akihito to Michiko Shoda, due to the fact that Michiko was a commoner and her family was Roman Catholic. While they did marry, relations between Nagako and Michiko remained strained for the entirety of the empress' life, as she disapproved of Michiko's hands-on mothering in contrast to the traditional separation of imperial children from their parents and Michiko herself is said to have wondered why her mother-in-law disliked her. Some sources even say the intrigues took a life long toll on Michiko and that she never fully regained the

confidence she'd had in her youth.
* Empress of Mars a hole, causing targets' bodies to collapse into suitcase-sized bundles of flesh and clothing. Presumably, some sort of compressive force field is involved.
* Empress seriously, The Young Griffons get their first taste of war, complete with the loss of friends and family that goes with it, and Iroha goes from an unsure 14 year old girl to fighting down the greatest threat Vana'diel has ever seen.
* Empress Theodora). She eventually attracted the attention of then-Prince Justinian and married him in 525 A.D., becoming a co-ruler of the empire with her husband and pushing through many reforms in women's rights, including an outright ban on forced prostitution.
* Empress Theresa, has a habit of responding to every single piece of negative criticism he can find. He tends to call his critics losers, liars, and trolls.
* Emprise. Ultimately, it turns out that these new levels are the product of his overactive imagination.
* Emptiness and are the words "emptiness and". And even then, you can't tell if she's saying that or "happiness and".
* Empty Chair Memorial: Honoring someone's memory by leaving the chair they used to sit in empty.
* Empty City: Zhuge Liang sits alone in an empty city playing his harp while a rival army comes up. They know that Zhuge is a genius and is obviously up to something. Knowing they would know this, the city
* Empty Cop Threat: They may try it. But they do so knowing it's an empty threat. And really bad examples can be grounds for evidence to be suppressed or an entire case tossed.
* Empty Cop Threat: Withholding information from a police officer? That's not acceptable! Tell me what you know or you're under arrest!
* Empty Days & Sleepless Nights and even showing how his life was during the time his brother left.
* Empty Elevator: Will the hero/villain/monster be in the elevator when it opens? Of course not! He/she/it is hiding somewhere nearby, ready to kick ass.
* Empty Fridge, Empty Life: A poor character has hardly any food in their pantry/fridge.
* Empty Fridge, Empty Life: Poverty is a fridge with empty or near-empty shelves.
* Empty Levels: When the power actually makes your character weaker or increases the difficulty disproportionately.
* Empty Movement have a forum that was popular with fans before the rise of microblogging platforms.
* Empty Nest: After Harry overrules another doctor's treatment plan, she angrily declares, "I'm sick of you older doctors doing things like this!" As she storms off, the equally angry Harry rants:
* Empty Nest: A home where a couple's children have grown up and left the house.
* Empty Nest, Carol attends a support group for neurotic people with good parents. Having good parents can be a burden for people like Carol because they can't blame them for their problems.
* Empty Nest: Carol shouts at the blind man she's just met, annoy him and embarrassing her sister Barbara.
* Empty Nest episode has Carol and Charlie entering a chili-cooking contest. Charlie wins with Carol taking second. During his victory speech, Charlie thanks the folks at Hormell. After revealing that he was using store bought chili instead of making it himself, Charlie's disqualified and Carol wins.
* Empty Nest, fed up with her sister Barbara's bullying, Carol Weston publicly humiliates her by forcing her to admit that she threw up on the coroner the first time she saw a dead body.
* Empty Nest have to go to the bathroom!", leading his embarrassed producer to tell him to turn off his microphone.
* Empty Nest, Kristy McNichol and Dinah Manoff actually look like they could be sisters.
* Empty Nest. Womanizer Charlie Dietz becomes a meteorologist on the local news and

compares the size of some hailstones to the anchorwoman's breasts. Cue the trope.
* Empty Nest would frequently drop into Harry's kitchen just to raid his fridge and hit on his daughters.
* Empty Nights. The All-Death isn't there to gloat as the man expected, but rather to quietly usher him on to the next world.
* Empty Piles of Clothing: A person is killed in a way that their clothes are all that's left.
* Empty Places" and Anya's hair is suddenly curly instead of straight - where she wouldn't have had time to curl it, nor any reason to.
* Empty Places", Spike and Andrew have an exchange on their mutual love of onion blossoms while en route to a mission, ending with:
* Empty Promise: Someone makes a promise they cannot keep/don't believe.
* Empty Quiver: A nuke or other weapon of mass destruction has gone missing, and now the race is on to retrieve it before it falls into the wrong hands.
* Empty Quiver: When a nuclear bomb shows up in a story, it'll inevitably end up in the hands of the bad guys.
* Empty Quiver: When a nuclear weapon falls into the wrong hands (such as a ruthless terrorist organization).
* Empty Room Psych: The unintentional version is far more common. Knowing which author wrote the game you're playing helps a lot (good authors are probably really pulling a psych, new or bad authors probably just didn't bother to code the furniture).
* Empty Room Psych when the players go crazy trying to figure out what the useless inventory item is meant for.
* Empty Room Until the Trap: A dungeon room looks empty until you stumble upon the boss/trap.
* Empty Room Until the Trap: A dungeon room looks empty until you stumble upon to boss/trap.
* Empty Shell - A host that's without resistance from being taken over.
* Empty Shell is up and his soul is yours. Once you become the "landlord", so to speak, the house is yours and you can kick out any tenants.
* Empty Shell: This person's only alive from a base metabolic standpoint. Everything else of him is dead.
* Empty Shell: When the whole personality's gone, essentially leaving a philosophical-zombie.
* empyreal lords are far stronger than a mortal humanoid of their size and build. But then, they are demigods and not limited by normal rules of biology.
* Empyrean, Terra, and Titan himself, though only Terra lives for more than a few minutes afterwards.
* Empyre is to monitor alien threats to Earth, out of the loop on the Cotai is a key reason things got this bad in the first place.
* Empyre reveals that the Skrulls have such a device called "The Pyre". It detonates stars, intending to wipe out their system of planets in a desperate attempt to stave off the spread of genocidal Cotati.
* Empyromancy: Prophecy from viewing laurel leaves burning in a fire. Also Pyromancy.
* Emray's songs "V1rtual paradise" and "Bed H3ad" (the latter of which being the third version of "Bed Head")
* EMT & doctor tell Hunter to let them help, but he insists he's ok. Like in the previous example, he collapses after a few steps & is told again to let them help him.
* EMTs and Paramedics generally keep an emesis bag or two on hand in the back of the ambulance, not necessarily for the patient (though that can certainly happen) but for themselves or any family or other passengers who go with them. When you combine the motion of the ambulance, which often gets compared to the motion of a boat and is the reason "sea legs" are commonly talked about, along with the sorts of things they have to treat it's just something that happens.
* EMTs come to help him get up, but he shoves them away & leaves the arena on his own.

* Emu Hojo. He is also the teamwork guy. His efforts are usually have only mixed success, though.
* Emu Hojo is subtler than Gentaro, but has soon figured out that sometimes you have to deal some hard knocks if you want to be an All-Loving Hero in a crappy world like that of
* emulator games to demonstrate whatever enhancements the emulator has to offer over real hardware. When the bleem! team was sued by Sony for copyright infringement over their use of game screenshots, they resorted to using stock images of real-world objects or mockup renders and cheekily admitted to it in the fine print, pixelating the "before" "screenshot" to make it seem as though it came off an actual PlayStation.
* Emulators and virtual machines) inside VisualBoyAdvance (a GBA emulator for PC) inside VirtualBox.
* emulators are used, but only for the purpose of actually playing a game as opposed to using any of the available tools, aside from possibly any recording functions they may have. For segmented runs, some players may only use save states between segments as a method of saving time.
* Emulators exist for old consoles like the Game Boy and Game Boy Color, which allow users to play old favorite games (such as
* Emu, right there. The ship is mostly fueled by Parado's habit to invade people's personal space and stalk Emu through most of the main story.
* Emus have been used as mounts in much the same manner, though their much smaller size makes them unsuited for carrying an average adult human.
* Emus take this fallacy one step further: when approached by a car, they have a nasty habit of dashing in front of it for a few meters before crossing to the other side of the road. The roads in the Outback are littered with emu corpses,
* EMV chips for payment cards, despite becoming common in Europe and Australia in the 1990s, still have yet to achieve widespread use in the United States, with many major banks taking as late as the 2010s to start offering chip-embedded cards to customers, in spite of magnetic stripe readers being notorious for vulnerabilities that allow card thieves to easily obtain and abuse unsuspecting users' card info. The cost to upgrade and activate chip readers (many businesses will have terminals with chip readers disabled and taped over) are a couple reasons for this; it's become something of a meme for customers and retail workers to get headaches trying to figure out how they should use their card and instruct customers on which part of the terminal to use, respectively. Retailers only started moving toward EMV when the card companies put them on the hook for fraudulent charges unless they upgraded. Needless to say, Europeans are nonplussed whenever they have to make payments in the United States due to having to go back to swiping their cards, especially with all the vulnerabilities of magnetic stripe readers (compared to EMV) that make card fraud so common in the first place.
* Emyulamp: In "Pia Lamp", Piari, a young witch-in-training, hears that in order to pass an upcoming test, all familiars have to speak human-language. So she takes her cat to drink from a spring that will grant him human speech, only to find it guarded by a kappa, who looks mostly like a bishounen with spotted skin who attacks people using the plate on his head.
* enablement is this, as, if the enabler isn't outright encouraging a self-destructive/negative behavior in the other person, they're definitely not stopping or speaking out against it either.
* Enablers reinforce other enemies, making them invincible, faster and stronger - they're prime targets for
* enable your cat to open portals to alternate dimensions. Or maybe it's just made with some kind of kitty LSD.
* enabling him to use Miracle Draw effectively.) It's pointed out that Taizan's extensive "drawing training" has caused the rest of his Dueling skills to atrophy. We see characters in other YGO series later practice drawing in much the same way, though.
* Enabran Tain, possibly the most brilliant director in the history of the Obsidian Order (he was the only one to live to retirement), a genius tactician and

stunning power player, organizes a joint Order/Romulan Tal Shiar to destroy the Founders' homeworld. But for all his smarts, Tain missed the head of the Tal Shiar was a Changeling himself, leading to a trap that massacred the Cardassian/Romulan forces. In short, arguably the best leader the Order ever had is also responsible for its ultimate defeat.
* ENA: Happy ENA and Sad ENA are often split up into two entities and paired up.
* ENA: In "Temptation Stairway", ENA gets trapped in the Great Runas during a festival, and is told by Ulysses that she won't be able to escape until the next celebration. When asked how long of a wait, Ulysses responds 10,000 years in binary.
* ENA interchangeably, but leans more towards horror as the series goes on.
* ENA interchangeably, leaning more towards the latter as the series goes on.
* ENA is animated in the style of an experimental Japanese-only PS1 game, with dialogue performed in cutscenes with characters glitching and performing strange animation loops, while the segments inbetween animate similar to a first person adventure game. The final result is charmingly unsettling.
* ENA, starting to crack up after chanting "Turrón!" for as long as he does.
* en banc hearing the results were a very narrow rejection that took 17 months to decide and which resulted in one of the judges writing a 100 page dissent accusing the judge of deliberately sabotaging Cooper's hearing, as well as the police of forging evidence.)
* Encantadia: The childhood of two main characters happened in this decade. In the 2016 remake, the decade is moved to be when they were born.
* Encanto: Mirabel Madrigal will be Disney's first female protagonist with glasses.
* Encapsulated in Return of the Shirt. Ted decides that he wants to get back together with an old flame, Natalie, conveniently forgetting how he hurt her in their breakup. He finds her address and shows up uninvited, refusing to leave even when she slams the door in his face and eventually browbeats her into giving him another chance. Within a week, he's decided he doesn't like her anymore and breaks up with her...on her birthday...again. While he gets (comically) beaten up for dumping her, the show displays no concern about how he harassed her into accepting.
* "Enceladus vs. Europa", another Carrot and Celery duet, sung in "Which Moon is Best?". This time it's about them arguing about which moon is better - Enceladus or Europa.
* encephalogram), and could potentially cause the wrong testing procedure to be administered.
* Enchancia was widely theorized to be the equivalent of Britain, although
* Enchanted: A cartoon princess has some difficulty adjusting when she is sent to modern-day, live-action New York.
* Enchanted after her rape (even worse, he doesn't believe she was raped and that it's she who seduced her assailant). Either way, her original intended wants nothing more to do with her and so he forces her into another marriage so that he can look like a father sending his daughter off with her husband rather than exiling her.
* Enchanted after their respective significant others hook up with each other.
* Enchanted against the idea of romance, but he becomes extremely cautious about moving forward in his relationship with Nancy because his first wife left him; he also worries that fairy tale romances will set up his daughter for disappointment later in life. Him being a divorce attorney probably doesn't help either.
* Enchanted, allowing the characters who cross over into our world to be like this.
* Enchanted, and even helps him with his relationship, only to end up falling for him. For his part, Robert helps her find some firmer ground. It also helps that Giselle is the protagonist, and her livening up Robert's life is incidental while she's actively trying to make sense of the world around her.
* Enchanted, and how someone as naive as Giselle would react when she learns about sex.
* Enchanted and it wasn't until Giselle came along that he truly begun to love again.
* Enchanted. And naturally it happens just as Robert's girlfriend Nancy walks in.

* Enchanted Arms equivalent is omnipresent. The great majority of the Golems you encounter (and can recruit) were designed for non-combat purposes, ranging from maids and farmhands, to entertainers and guides. And yet, they all have some combat-capabilities, and few of them are even restrained to a support-role. Indeed, some of the bodyguard/soldier Golems you aquire early in the game, are soon outmatched in terms of offensive power by farm-tools and dancers...
* Enchanted Arms: Lord Tokimune uses Kunoichi golems as his personal bodyguards.
* Enchanted Arms. Suffice to say, if you are willing to get and train said Golem, ALL boss fights will be a breeze.
* Enchanted Arms, the main character Atsuma has the ability to negate various magics because of his right arm (Best seen in the hopeless fight against the Ice Queen Devil Golem). However early in the game has no control of this power.
* Enchanted Arms to popular student Toya in the game's introductory sequence.
* Enchanted Arms: Yuki. One of the youngest people depicted in the game, and easily on par with an experienced knight in combat prowess.
* Enchanted, a troll chases after Giselle in a tree to eat her. As she progresses along a thinning branch, he follows and the branch starts bending. Then Giselle falls, and the troll is sent flying.
* Enchanted begins with Prince Edward saving Giselle from a troll, resulting in their planning to get married the next day.
* Enchanted Castle Mademoiselle, the French teacher looking after the child protagonists takes down her knee length, raven black hair for the little girls who are immensely impressed. From that moment on they are convinced she is a princess in disguise.
* Enchanted Dominion has been reduced to a few of large floating landmasses containing the forest, the castle town, and the castle itself respectively. The first two are connected by a floating stream of water that collapses when Aqua crosses it. She then has to restore the landscape between the half-destroyed town and the castle by rewinding the castle's clock to before it collapsed.
* Enchanted end up in New York... because, naturally, New York is the opposite of a fairy-tale kingdom.
* Enchanted, even though both of them were glaring at their respective partners the whole time.
* Enchanted. Even when he writes a book, the author's name is listed only as "Nathaniel".
* Enchanted forced into New York. While she does work a lot of magic with her sunny attitude, she also has to learn that life is not idealized like a fairy tale and ends the story having found firmer ground.
* Enchanted Forest Chronicles, and wears black robes, but is also very practical, sensible, friendly, and attractive in a motherly way.
* Enchanted Forest Chronicles: As a rule, the more powerful the mage, the stealthier their teleportation.
* Enchanted Forest Chronicles by Patricia Wrede, with a mild twist. The dragon who was King before Kazul took the throne loved him some Turkish coffee brewed strong enough to take the roof off a dragon's mouth. No one's particularly surprised that his assassin just decided to poison his coffee; Kazul comments that you could have boiled a whole field of dragonsbane in a cup of the King's coffee and it wouldn't have changed the taste or texture enough that he'd have noticed.
* Enchanted Forest Chronicles can be used for scrying, but tend to work more like videophones, allowing one party to call another (provided they have a compatible unit) at convenience.
* Enchanted Forest Chronicles Cimorene, sensibly points out that it's getting dark and thus impractical to leave at that moment, plus he doesn't know Shiara from Adam and thus is uncertain as to whether or not he wants to rescue her. Shiara replies that she had been hoping he was a hero, as one can "talk them into anything".
* Enchanted Forest Chronicles. Cimorene's princess training included lessons in how to scream while being carried off by a giant (because being abducted by horrific monsters and rescued by a prince or knight is a major form of matchmaking in the setting). Fortunately for the plot, she's not that kind of princess.

* Enchanted Forest Chronicles. In "Dealing With Dragons", this trope would be played straight if she and Therandil had actually been a couple or even a team; Therandil is dull and doesn't seem to have any real strengths to speak of. In "Searching For Dragons" and beyond, it's averted, since Mendanbar is talented in his own right.
* Enchanted Forest Chronicles is a near-total immunity to others' magic, though they tend to be powerful spellcasters themselves.
* Enchanted Forest Chronicles it is, and thus the weaker their spells are. The deadliest wizards don't whirl away in a twinkling of light; they simply disappear.
* Enchanted Forest Chronicles. It's not that he doesn't like the children, it's just that they're expensive to feed, forcing him to run the same dodge all over again to get more money.
* Enchanted Forest Chronicles kind of breaks this mold, though-when she expresses a wish that she had better control over her fire magic and Daystar wishes she had better control over her temper, Daystar's magic sword compromises by granting both wishes; Shiara has perfect control of her fire magic, but can only use it when she's being polite. The books also feature regular witches, who are just regular human women who learned to do magic.
* Enchanted Forest Chronicles. Many princes attempt to rescue Cimorene, who doesn't want to be rescued. Cimorene says that if a princess wanted to make a good match, a good way would be to get kidnapped by a dragon. The other princesses kidnapped by dragons compete for who has the most princes attempting to rescue them. Princesses sometimes arrange to get kidnapped by giants and other creatures in order to get rescued by eligible princes (although the process more often happens spontaneously), suggesting that rescue romance is a codified form of arranged marriage in the fairy tale universe.
* Enchanted Forest Chronicles, Morwen has a large number of cats, all her familiars. This is frowned upon by more traditional witches because not only is one cat more traditional, but none of her cats are black. The cats can communicate with her and she can channel their energy for spells.
* Enchanted Forest Chronicles receive a christening curse from a wicked fairy as is tradition, starting a whole series of failed attempts to invoke various fairy tale tropes on Princess Alianora's behalf.
* Enchanted Forest Chronicles: The main character ends up offering her services to a dragon.
* Enchanted Forest Chronicles. The solution: wait for the son to grow up, give him the sword, and point him in the direction of the prison in the hope that he will figure out what he has to do himself. Consequently, most everyone he encounters knows more about his quest than he does, but can't tell him anything for fear of the Wizards finding him.
* Enchanted Forest Chronicles. They're only in a relationship because their parents decided to betroth them, and she can't stand him because he's utterly shallow. Most of their interactions consist of her trying to get out of the marriage or trying to convince him to go away after she moves in with a dragon to get out of the marriage and he tries to rescue her. Once she finally gets rid of him (by convincing him to rescue an equally shallow princess being held by a different dragon instead) he only ever gets mentioned when she's explaining to other people how she got him to leave.
* Enchanted Forest Chronicles trope... many of the people Mendanbar and Cimorene encounter assume they are in love, for extremely silly and superficial reasons that are obviously wrong, when they are both extremely practical, goal-oriented people, not sentimental lovebirds. But having those traits in common is exactly why they are indeed perfect for each other after all.
* Enchanted Forest feels uncomfortably hot to anyone not in the King's family line.
* Enchanted get together after an uncertain amount of time passes. Since the two travel to Andalasia to get married (rather than in the "real" world), where the fairytale nature of the realm can make spontaneous love work it's quite probable that they literally live happily ever after.
* Enchanted, Giselle and Prince Edward sing "True Love's Kiss" together when they

meet and fall in love in their fairy-tale world:
* Enchanted, Giselle and Robert seem to get very close after their "Can you say anything but 'no'?" argument, which was actually the first time Giselle felt angry about anything (she's quite thrilled).
* Enchanted Giselle, but at the end of the movie, she marries Giselle's ex-boyfriend Prince Edward.
* Enchanted: Giselle decides to stay in "real world" New York instead of returning to the fantasy world Andalasia, because that is where her real true love lives. She even starts up a boutique. She effectively switches places with her romantic rival, who runs off to Andalasia with the prince.
* Enchanted, Giselle gets out of her coach in her wedding dress, and Nathaniel is run over by all the animals that were apparently in the coach with her (even though her dress is so big, it's hard to tell how she fit herself).
* Enchanted, Giselle gets stuck in the doorway, although she's not fat, she's just wearing a lot of clothes.
* Enchanted, Giselle, just coming out of the shower, trips and falls on top of Robert, who had tried to catch her. Naturally, this is when Robert's girlfriend Nancy walks in and gets the wrong impresion.
* Enchanted: Giselle the cheery optimist, and Robert the sarcastic pessimist.
* Enchanted has one, which also happened to be a convenient "dance with somebody other than your date" song.
* Enchanted. He's good-natured, handsome, and heroic, but he's kind of thick. And it turns out he's not the right man for Giselle—but when he realizes this, he gallantly steps aside for her true prince.
* Enchanted, including Robert singing softly in Giselle's ear (when he earlier claimed that he didn't sing), leaning quite close to each other, when Nancy and Edward interrupted them.
* Enchanted in the Moonlight is a yukibito (a kind of snow spirit), and correspondingly has the ability to create and control snow.
* Enchanted in the Moonlight: Miyabi wants to make sure all the other guys know that the protagonist is with him. Much eye-rolling ensues among the rest of the cast, save for a very mortified Samon.
* Enchanted it in the live-action part - by having her singing charmed vermin in New York City into cleaning Robert's apartment.
* Enchanted: Justified as Edward and Giselle came from a fairy tale realm where the custom was to meet one day, fall in love and wed the next. Now both are in the human world.
* Enchanted, many of the characters are from a fairy tale world that resembles the Middle Ages who end up in modern day New York. They adjust fairly quickly. Giselle figures out how a vacuum cleaner and the shower works and Prince Edward figures out how a TV and remote control works. They just think of these devices as magical in nature. Edward sees the TV as a magic mirror that shows different scenes.
* Enchanted: Narissa on Nathaniel. Nathaniel begins to realize he's a dupe when he sees a soap opera variant.
* Enchanted, Nathaniel goes to open Giselle's coach, and gets slammed by the door as she bursts through.
* Enchanted, Nathaniel has written a self-help book, and Pip has written a memoir.
* Enchanted objects often have glowing lines and runes on them, usually in red or purple. Lemurian
* Enchanted Pony Academy to get anything magical done, and even then the animals have only a fraction of the power they did before.
* Enchanted: Prince Edward and Giselle believe they are each other's, but it's Robert's kiss that awakens Giselle, thus proving that he is her true love.
* Enchanted Prince Edward and Pip, a chipmunk friend of Giselle's, also become a live-action human and animalistic chipmunk, respectively, later in the film.
* Enchanted, Prince Edward ends up with Nancy, the last woman he meets in the real world.
* Enchanted, Prince Edward has no problem navigating either the forest or Manhattan this way.

* Enchanted probably counts: The musical accompaniment starts as being just a couple of street musicians, but quickly expands to a full orchestra without one actually being present.
* Enchanted: Queen Narissa ploted to destroy Giselle because she thinks Giselle is going to remove her from her throne once she married her son Prince Edward. Until Narissa reveals herself at the climax, Giselle has no idea about any of this and sincerely wants to become friends with her.
* Enchanted. Really, anything that Giselle does that makes little sense outside of an animated feature.
* Enchanted: Robert says this when Edward bursts into his apartment and threatens him with a sword.
* Enchanted: Rumbold hears whispers in the castle, calling on him to "Free me"/"Kill me"
* Enchanted Sceptres, there's a dead end with a mirror, which seems "as strong as steel" at first. A Black Knight sometimes appears out of the mirror, and if you smash it then, the knight "shatters into a thousand pieces".
* Enchanted sequence, as Giselle summons critters to help clean the flat, a flock of pigeons fly through the half-open window, save for one who smacks against the glass and slide down on the ledge. It's fine, though, to Giselle's relief.
* Enchanted, she uses it in a way that ends up with her dead. By the time she has Robert in her clutches, scaling the building, it's blatantly obvious Edward and Giselle aren't joined at the hip any longer, and Giselle is not your average fairy tale princess. Now, had Narissa taken, say, Edward up the building, she might have survived. Assuming Pip didn't go after her anyway, or Nathaniel didn't go after him, being his lackey and all...
* Enchanted still part of a greater Disney fairy tale, though, so it manages to work out.
* Enchanted: Stuffy, cynical divorce lawyer Robert meets literal fairytale princess Giselle.
* Enchanted. Sure, all the animals in fairy-tale land Andalasia can talk (and sing), but once Pip the Chipmunk is transported to the real world, he loses his ability to speak, and instead communicates using equally-improbable gesticulating, miming and (more probable) chipmunk sounds.
* Enchanted, the example is recursive. Giselle shows up at the ball (with Edward in tow) in this fashion. Funnily enough, the ball is an "old fashioned fancy dress" kind, involving clothing of the sort Giselle's been wearing for the whole movie — except now she shows up in a fairly simple modern dress. Robert still gets distracted away from his date Nancy, who is also dressed up fancily. The reason for Giselle's very striking effect is that she suddenly looks like a grown woman instead of a little girl playing dress-up with the Disney Princess dresses she'd worn until then.
* Enchanted", the heroine tells her husband that a "friend" of hers was raped to explain her fears of consummating their marriage. Only after they finally do make love does she admit that there was no friend and that it's she who was assaulted.
* Enchanted," then throws it to the floor with enough force to shatter it to bits.
* Enchanted (the page image, above), complete with the parasol and a mariachi band on a couple of other boats.
* Enchanted to a strange land, fight a "metal monster" (bus) with a sword, and search New York, just to save Giselle.
* Enchanted Towards the end of the film, when Robert and Giselle narrowly avoid falling off the roof of the building, they embrace one another in the rain and share a passionate kiss, properly establishing the nature of their relationship, at last.
* Enchanted, when Robert is about to call a cab and get Giselle out of his apartment, but changes his mind when he sees her sleeping serenely on his couch. After he hangs up, he watches her a moment longer, and can't help smiling warmly.
* Enchanted, which examines how common Disney Princess tropes would work in the real world. Oddly enough, it wasn't supposed to be a Disney film at first, but became one.

* Enchantment, especially in front of Katerina. However, while Katerina's culture has no taboo against nudity, there is a strong taboo against cross-dressing, so she is extremely resistant to giving him anything of hers to use to cover up. When they cross to the present and Katerina is the one who winds up naked, Ivan begs her to wear his shirt, and has to convince her that in his culture, it's perfectly all right for her to be wearing his shirt, and far, far worse for him to walk out of the woods with a completely naked girl.
* Enchantment: Ivan Smetski, college decathlete but otherwise normal grad student, saves a sleeping princess from a giant bear, and next thing he knows, he's in ninth-century Ukraine. Naked. It's never revealed who exactly summoned him.
* Enchantress delivers seven consecutive Little No's when ending up in Muspelheim.
* Enchantress from the Stars and it is never ever ever ever ever lots and lots of ever ever ever hinted on the truth of if Earth is involved in any way. The Enchantress in the title is a girl from the future in which people have psychic powers and gets a trip on her dad's starship to a more early world in the equivalent of Middle Ages ("dragon" is a mining thing from rebel imperialistic people from the future group.) and the other protagonists are from Mid Ages.
* Enchantress from the Stars, an extremely advanced society, fall in love with Georyn, a young man from a planet stuck in Middle Ages. Neither of them could be happy in another world, so they part once the Federation's expedition departs.
* Enchantress from the Stars, Evrek is clearly Elana's designated fiancé. The chemistry between them is... less than stellar.
* Enchantress from the Stars have an invisible alien as the protagonist. The mature sentient species have found that immature sentient species will suffer severe psychological scarring and never live up to their potential should they find out there are more advanced species out there, and so take great pains to stay invisible.
* Enchantress from the Stars prohibiting them of overtly taking a position. So they plan to get the Empire to withdraw by convincing them that local people have supernatural powers like telekinesis.
* Enchantress from the Stars, saving her. This scares the Imperials so much that they leave the planet and liberate all prisoners, conveniently removing the reason for Elana to die.
* Enchantress from the Stars's relationship with the Younglings (a primitive planet with medieval technology) was an allegory for how 19th century European scientists viewed other races as primitive animals.
* Enchantress from the Stars: The Andrecians view Imperial technology as magic wands that turn people to stone (stunners), dragons (rock-chewer), monsters with no faces (Imperials in suits) and the examples in the summary. Also, telepathy and psychokinesis among the Federal field agents are stand-ins for advanced technologies humankind can't think of yet.
* Enchantress Of The Stars believes that humans pass through 3 stages: childhood (which would probably be step 1), adolescence (which is probably steps 2-4) and adulthood (which is step 5 on).
* EnChroma glasses can apparently allow some red-green colour blind people to see those colours normally.
* Encino Man, except that no explanation is given as to how he didn't freeze to death (or how his icy coffin never thawed in the Mojave Desert before the two boys stumbled across it).
* Encino Man: Link can't say much, but he retains a few phrases from Spanish class when he accidentally crosses a Spanish-speaking bargoer.
* Encino Man, Link experiences one of these after Stoney's lesson on "wheezing the juice". His mouth is still full of Icee as he silently clutches at his head.
* Encino Man uncovers the truth. Seems very unlikely none of the school officials bothered to look at the paperwork (it was medical records for a dog).
* Enclosed Extraterrestrials: Aliens that are completely covered up vs. naked aliens.
* encode a personality matrix and create a clone of a human mind, though, and the Soul Hunters themselves do not believe in an afterlife, hence their obsession with

gathering up souls that would otherwise be lost.
* encoded into the very DNA structure of the planet's massive eliim trees.
* Encoding things in Binary does create certain limitations that wouldn't otherwise exist. The common standard binary floating point format, for instance, cannot exactly encode "1/10" as 0.1 is actually a
* Encore! Encore! as an opera singer who retires to the family winery after a throat injury ruins his singing voice.
* Encore Kids and Family went through a phase in 2016 where they would run
* Encore originally included a track titled "Christopher Reeve" — who died before the album's release. Eminem not only removed the track, but destroyed all copies of the song so that there was no chance of a leak.
* Encores at concerts. Although audiences usually expect them (especially if a band hasn't played its biggest hit yet), bands will typically pretend the show is over at the end of the main set, maybe even thanking the audience and saying good night.
* encounter a ghost just as you're about to use the toilet, leading your character to claim "I just remembered my grandmother's on fire and my cat has leprosy."
* Encounter at Farpoint", luminous and pliant, yet able to survive nicely in the vacuum of space.
* Encounter at Farpoint" subjects Groppler Zorn to, though the sounds he was making made it sound more like he was in a tickle ray.
* Encounter Critical. Small creatures can pass through The Vanishing Pyramid's ventilation system, but they must roll well or either get lost and exit in the wrong room or have to fight off packs of Raider Rats. If they survive they can scout out the contents of 2-8 rooms before having to roll again.
* Encounter Critical. The ancient vampire Kahglarth can be encountered inside the Vanishing Pyramid. If opposed by an obviously superior foe he will vanish in a puff of smoke and attempt vengeance on the foes later.
* Encounter Critical. The Shattered Dome is full of monsters of all sorts. The Wretched Hive Cantina always has a number of orcs, goblins and criminals present, and they regularly have fights among themselves.
* Encounter Critical, track them down relentlessly and ferociously attack them, doing double damage.
* encountered sequentially—and, ideally, quite by "coincidence"—during the course of the Quest, and will join in the Quest separately.
* Encountering it in the Abyss in Oolacile will change the cutscene to have Sif recognize the player and howl mournfully since it has sworn to protect Artorias's grave, and the only way to get the Covenant ring needed to face the Four Kings is by defeating Sif.
* encountering somebody who looks and acts exactly like the long-dead Basil Hallward in 2015 and viewing it as a second chance.
* Encounters at the End of the World among penguins as well as a prostitution arrangement in which the females copulate with males in return for rocks for their nest. Then Herzog asks if penguins ever go insane. Then we see a penguin toddling off into the depths of Antarctica to die.
* Encounters at the End of the World features a global nomad in Antarctica. Growing up in Communist Eastern Europe caused him to cherish the freedom of travel. He kept a backpack packed at all times so he could up and leave at a moment's notice.
* Encounters at the End of the World talks about how it's sad that after man made it to the South Pole, there were no more unknown spaces to explore.
* Encounters with the Prophets tended to involve visions of them appearing as other characters, in an area that is just like a recurring set, only red-lit.
* Encounters with the Thals, the Daleks' enemies, sometimes involved legends of the Doctor from when he had helped them on previous occasions. With the Daleks themselves the Doctor generated enough of a legend to incite irrational fear when encountered, which bled over into the books and the new series. The Ninth Doctor used this to face down the Daleks in
* encounter with Lung, is reduced to this, as most of her physical strength has been burned away, forcing her to rely on her (increasingly impressive) magic

skills.
* encounter with the Boneless, two-dimensional beings from another reality, who "flatten" people and objects (by siphoning their third dimension) and then attempt to come out into the third dimension by taking on shifting appearances of the people they've flattened and killed. Some of the scariest monsters of the season. Then they encounter "the man that stops the monsters".
* Encounter With Tiber Tiberians are actually two subspecies, but they both have a lot of similarities with each other and with humans. Instead of a single 4-chambered heart, they have lots of smaller hearts and lungs that connect to a blood mixer. They do, however, have something like kidneys and a brain.
* Encourage a "Silly Hat Day", to make the heroes think twice about wearing a stupid hat for this trope.
* encouraged. China moved to a two-child policy in 2016, but 35 years of the one-child policy has left its mark on China's demographics - according to the CIA, China is tied for the most male under-15 population in the world at 1.17 boys for every girl.
* Encouraged for Space Wolves players, where they not only have tons of named units, but also encourage the player to make their own characters with distinct personalities, plus the special rule that allows them to pick
* Encouraged Regifting: A character helps someone else find the right gift by giving them a present for someone else.
* Encouraged Regifting: Giving someone a gift you know will be given away.
* encouraged. The main purpose of the military is to keep people like this occupied and out of town; the city's real power is in its merchant class, and we're told that more than one invading nomadic horde has been let into the city without a fight only for them to find that they've somehow become just another ethnicity in the melting pot by the time they sober up. The aforementioned Tacticus is seen as an example of how dangerous a truly intelligent general can be, as he eventually became the duke of a rival city and ended up declaring war on Ankh-Morpork itself and caused the downfall of its empire.
* encouraged to do this against Native Americans during the Gold Rush. Many communities in California offered rewards of something around $25 for a male body part — or the whole body — and $5 for a child or a woman.
* encouraged, which is three-times the maximum of what your natural skill can be.
* Encouragement of Climb to her midle-school days about her and her friend Yuuka. Likewise, episode 20 is centered on Kokona's day.
* encourage Odie to use up all his remaining oxygen, while the quickie instead had Garfield berate Odie for being stupid enough to get himself locked in the car.
* encourage, some people have actually given in to her demands and it has resulted in a lot of various characters being nearly "rip-offs" of the artist's style.
* Encourage the minions to customize their uniforms in small ways, to make it harder for the heroes to impersonate them.
* encouraging Hergé to be racist, it was another abbot who urged him to be more sensitive and introduced him and Zhang to each other. The character of Chang Chong-Chen is based on Zhang.
* encouraging them to hook up in the creepiest way possible, Rarity and Applejack eventually respond by mocking him. In later episodes, other ponies can still hear Phil, but they all agree to ignore him.
* Enco was the name planned for a consolidation of the Enco and Esso brands of Standard Oil of New Jersey, until it was learned that "enco" means "stalled car" in Japanese. They decided to rebrand their stations as Exxon, instead.
* "Encroachment over 90%! Encroachment over 90%! Encroachment over 90%!"
* encrusted in order to resemble Bolas's horns, and bows have the horn shapes built into them.
* Encyclopaedia Galactica" printed in large friendly letters on the cover (as well as not taking up a parking lot).
* Encyclopaedic Knowledge: Sophisticated people who know all kinds of knowledge.
* Encyclopedae Vulcanis, the collected lore of everyone who had ever borne the mantle of Vulcan.

* Encyclopedia actually overwrote much of the first novel and some other story sources as well in an effort to tie the story presented in the fragmented multimedia together, and also to implement the personal ideas of its writer over those of some previous writers.
* Encyclopedia Brown, also by Sobol, often bases the solution of mysteries on assertions that a certain event could not have happened as described for a particular reason. In some cases, the reason would make the event unlikely, but not impossible. Other times, the reason is simply false.
* Encyclopedia Brown a measure of time over distance, i.e. one nautical mile per hour.
* Encyclopedia Brown arrested and thrown into a juvenile detention facility by the end of the third book. And even if he was released, the police would likely ignore any later accusations from Bugs on that grounds that he was a known perjurer.
* Encyclopedia Brown, a schoolboy who runs his own agency solving schoolyard mysteries, and sometimes assists his father who is the local police chief.
* Encyclopedia Brown book is notorious for this. The narration mentions that he once hired the title character to find his wristwatch when it was on his other wrist the whole time.
* Encyclopedia Brown, but he always gets an NST at some point. She beats him up multiple times, and he usually has one each time.
* Encyclopedia Brown, despite uneven ancestry: it depends on the sire. A mule will produce a horse with a horse and another mule with donkey; a hinny will produce a donkey with a donkey and another hinny with a horse. That said, there have been typical uneven hybrid results from backcrossing... a mere 3 out of 60 cases.
* Encyclopedia Brown: In book 2's "The Case of the Stomach Puncher", sixteen-year-old bully Biff Logan hits Encyclopedia in the stomach. Fortunately, Encyclopedia was warned of Biff's habits and so wore a piece of sheet metal under his clothes. As a result, he's knocked backward seven feet by the blow but emerges unharmed.
* Encyclopedia Brown liked solutions where the answer hinged on an American city having the same name as a foreign place that was generally more famous, for example Paris, Texas. This isn't usually conviction by contradiction, but became a case of it in the answer to one puzzle involving an American city called Palestine, where Encyclopedia declared that it
* Encyclopedia Brown mini-mystery uses this trope as its solution. The neighborhood Romeo, Tyrone Taylor, leaves a romantic message for his latest sweetheart, only for her to furiously tell him off and beat the stuffing out of him. Encyclopedia investigates and realizes that her little sister, who took the message, inadvertently punctuated it wrong, making the compliments seem like insults: "I want to say you're amazing. I can't stop thinking that you're the most beautiful girl in town" becomes "I want to say you're amazing—I can't. Stop thinking that you're the most beautiful girl in town," for example.
* Encyclopedia Brown mystery called "The Case of the Gold Rush". The first time can be excused as a common mistake, but the second time less so.
* Encyclopedia Brown mystery depended on the victim's strict adherence to this trope, and the fact that the non-express checkout lanes at the local supermarket took forever.
* Encyclopedia Brownper) because she accidentally broke the prize for first place, so she decided to deliberately try for second or third in order to get a working prize rather than the one she broke. When she's confronted with this, she admits the truth and cedes her own prize to the winner in place of the broken one.
* Encyclopedia Brown pinned a crime on a magician because he was wearing short sleeves. He claimed that all magicians wore long sleeves so that they could pull objects out of them... except good magicians don't need anything of the sort. Many, in fact, wear short sleeves solely to impress people with the undeniable fact they have nothing up them, and at least one group
* Encyclopedia Brown Sally to be his bodyguard. To what extent her affections eventually become engaged is less clear, and there is at least one mystery in which she defends another guy against Encyclopedia's (correct) accusations, although not physically.

* Encyclopedia Brown series has several cases that Encyclopedia solves involve friends of his or other kids around the same age as him and their love interests.
* Encyclopedia Brown, she added it in herself, turning the romantic line "I can't stop thinking you're the prettiest girl in the world" into "I can't. Stop thinking you're the prettiest girl in the world." He gets a fist to the gut due to this.
* Encyclopedia Brown. Someone asked Encyclopedia, "What do you know about Browning?" and Encyclopedia responded, "Not much, I've never browned."
* Encyclopedia Brown sometimes, especially when solving cases for his father over dinner.
* Encyclopedia Brown, starring Detective (no first name given) Haledjian:
* Encyclopedia Brown story. A witness claimed he saw a man known for handing out balloons abducting a child when one of his trademark balloons flew into a tree and got stuck. The witness said he climbed the tree to retrieve it when he saw the balloon man put the kid in his car and drive off. Encyclopedia deduced the witness was lying because the aforementioned balloon man always inflated his balloons by mouth, and therefore none would have flown.
* Encyclopedia Brown story did the same thing, but with the variation that the victim survived but had amnesia.
* Encyclopedia Brown story. EB deduces that the perp had not just just pulled up after a hours-long drive (as he claims) because a baby sits on the car hood and doesn't get burned; therefore the car must have been sitting there long enough to cool down. Played straight in some other cases, as when a perp offers him apple cider that has supposedly been sitting in an unused shed for months — the cider is still unfermented, which tells him the shed has been used recently.
* Encyclopedia Brown story featured a Gender Bender Name as the key to solving the case (a male doctor named Vivian) — while it's technically a unisex name, it's more commonly associated with women. Jody Turner, one of Encyclopedia’s friends, also has one.
* Encyclopedia Brown story "The Case of the Missing Statue", a statue is stolen just before of the premiere of Linda Wentworth's film about a statue that is stolen. Turns out the whole thing is a setup to promote said film.
* Encyclopedia Brown story was Brown solving the case of who stole a boy's clothes, leaving him naked in the woods.
* Encyclopedia Brown story, where a clown who drove an ice cream truck disappeared along with a young boy and was accused of kidnapping him. Turned out they'd both been kidnapped.
* Encyclopedia Brown: The canonical reason why none of the bullies and petty criminals whom Encyclopedia defeats retaliate against him is because his friend Sally beats up anyone who tries.
* Encyclopedia Brown: This happens quite a bit. Not generally for murders, but it happens.
* Encyclopedia Dramatica also has an article bashing Golden-Road.net.
* Encyclopedia Dramatica has an entire portal dedicated to suicide humour, labeled "An Heroes" after Mitchell Henderson.
* Encyclopedia Dramatica's page on Aboriginals is apparently blocked on Australian search engines.
* Encyclopedia Dramatica tends to do this with 4chan. To be honest they are almost the same except for the fact that one is a wiki and the other is an imageboard.
* Encyclopedia Dramatica, you'll find it there. Essentially a wiki maintained by the residents of 4chan, particularly /b/. It's generally seen as satirical rather than completely genuine hate though.
* Encyclopedia Exposita of Adventure I even includes a couple vocabulary sheets showing those similarities.
* Encyclopedia Galactica) and would only take up several large buildings if put on paper.
* Encyclopedia Galactica excerpt for Sociometrics, the general problem of social stability.
* Encyclopedia Galactica excerpt for the Early History of Foundation, which describes the early stage of psychohistory.

* Encyclopedia Galactica excerpt for the Galactic Prehistory, which explains that the lack of records for pre-galactic civilization is due to the multiple eras of warfare, the evidence for which is still extant.
* Encyclopedia Galactica excerpt for the General Theory of Psychohistory, describing some of the fundamental mathematics taken from thermodynamic expressions.
* Encyclopedia Galactica excerpt for the History of Biogenesis, the creation of worlds set aside for primate experiments, especially for the "pans", short for "pan troglodytes".
* Encyclopedia Obscura (active between 2001 and 2004). It contains reviews of basically any kind of media - from obscure NES games to crappy tie-in toys - most of them negative and full of snark, though sometimes he comes across genuinely good or interesting things.
* Encyclopedia of Stateless Nations, the author defines a stateless nation as a group that self identifies as a distinctive group, displaying outward trappings of a national identity (especially, but not always, a flag) and the formation of political pressure groups for great autonomy. It has within the United States: New Englanders, Texans, Southerners, Californians, Mormons, at least five American Indian nations, Alaskans, and Cajuns.
* Encyclopedia's dad described a case to him after the fact that involved a professional tennis instructor who reported that a set of ivory screens had been stolen that morning. He saw the thief's face; it could be either of two identical twins—one who worked as a cashier and one who played tennis. Encyclopedia figures out that the victim was just lying so he could get insurance money for the screens, because the crook was wearing a T-shirt, and if the tennis player had been the culprit, one arm would be more developed, while equal arms would incriminate the cashier. This assumes that the cashier had the presence of mind to make such an astute observation, and also assumes the
* end a civilization. However, what follows shows why the experience is labeled as 'horrible regret':
* end all fathers and his obsession for being hard can be interpretated as an intern conflict between injunctions to become a real man and other injunctions to give up this spirit.
* end and beginning are this. They're even credited as "Pumpkin" and "Honey Bunny."
* End and Save manages to be completely hilarious and unpredictable, all while murdering his way through obstacles.
* Endangered Soufflé = "soufflé" ("blown") is a French word originally
* Endangered Soufflé: Soufflés are so sensitive that even the slightest shock can cause one to collapse.
* Endangered Species (2015): Gull isn't very smart, but he's a good fellow at heart.
* Endangered Species: An (animal) species that is almost extinct due to natural or artificial causes.
* Endangered Species: A species that only has so many specimens that are still living.
* Endangered Species expansion pack does give you a worthwhile reward though. The final scenario is tougher than that of the original game, but completing it unlocks the Conservation Breeding Center, which helps endangered and critically endangered species breed easier.
* Endangered Species: "Merry Garbage Day" involves Pickle stuffing the stump full of garbage to celebrate the titular holiday, much to Merl's horror.
* endangering his opponents (almost all of Burfict's incidents involved potentially dangerous hits to a player's head), but he had more than his share of dirty acts, mostly in the form of kicking or stepping on opposing players (often well after a play was already blown dead). Suh did ultimately start keeping it clean in the later years of his career, but by then he was so known for dirty plays that he may never be able to fully shake off that reputation even if he never commits another ugly penalty again.

* end, a year after the movie had inspired the assassination attempt on Ronald Reagan: "TO OUR TELEVISION AUDIENCE - In the aftermath of violence, the distinction between hero and villain is sometimes a matter of interpretation or misinterpretation of facts. TAXI DRIVER suggests that tragic errors can be made. - The Filmmakers"
* End cities shaped like branching structures holding upside-down ziggurats appear in the End. They don't have many monsters besides endermen and camouflaged shulkers, but their chests hold valuable iron, diamonds and enchanted equipment, and rare elytrae which allow you to glide are found only here.
* end credits repeat that scene with other characters doing the same thing.
* Endearingly Dorky: A character finds someone else's awkwardness cute.
* Endearingly Dorky: A character's dorkiness makes them highly desirable.
* Endeavor is rocky, as few civilians look to him for inspiration and more villains start coming out of the woodwork to prey on this unease, something Endeavor is painfully aware of but has no idea how to counter.
* Endeavor, the #2 ranked hero, goes through some deplorable lengths to try to surpass All Might, which includes using his own family as a stepping stone.
* Endeavor, the main character's family sword marks the death of Malor, an ancient and malicious deity.
* Endeavour: A laxative prank turns fatal in "Canticle". The Rev. Golightly eats a box of chocolates laced with laxatives, but his liver is shot and the laxatives trigger a fatal heart attack.
* Endeavour and stole his commanding officer's identity. The girl had taken her stepfather's surname, so he had no idea who she was. This causes him to vomit.
* Endeavour displays a propensity to addiction, a history of suicide, depressive moods, savant qualities with regards to literature and opera, and particularly in early seasons a lack of social skills and seemingly unconscious recklessness. He is interpreted by many in the fanbase to be neurodivergent in some capacity.
* Endeavour episode "Harvest", Morse is given a Tarot reading that turns up the Fool, the Lovers (inverted; he's unlucky in love), Judgement, the Tower and Death.
* Endeavour: In "Cartouche", a house occupied by Kenyan Asians is torched by racists pouring petrol through the letterbox and igniting it.
* Endeavour: In "Fugue", Morse sniffs a teapot he suspects has been poisoned and comments "If that's the stuff chimps drink, then I'm a Chinaman."
* Endeavour: In "Harvest", Thursday and Morse are both (secretly) awarded the George Cross for preventing an act of terrorism at a nuclear power station.
* Endeavour: In "Rocket", Morse tells a protestor wielding a placard that he does not doubt his sincerity, but that he might get more respect if he spelled 'Levellers' correctly.
* Endeavour: In "Trove", a successful local businessman turns out to be a case of this. As a private during WWII, he was on long range patrol with his commanding officer when the officer was killed. Seeing a chance to escape his unhappy life at home, he stole the captain's rank and identity.
* Endeavour. Naturally, several aspects of the 'suicide' don't add up to Morse.
* Endeavour: Not exactly an appliance, but in "Harvest", Morse dumps a grenade inside a lead-lined drum intended to hold nuclear waste. The heavy drum acts as a sump and funnels the blast upwards.
* Endeavour to the above, about a young DC Morse being taken under the wing of DI Fred Thursday.
* Endeavour written on it. He initially goes looking for the girl and learns that she is a cigarette girl at a nightclub and brought the matchbooks home with her. When she goes missing, Morse uses the book to identify the club she works at and goes looking for her.
* ended up a villain only because the Reptites and Ayla's tribe were fighting each other for survival in the primeval world.
* ended up forbidding his son from watching. of attention from his schoolmates because his dad was the Master.
* Ended up getting a variation in Orton's case; he's recently become cheered as a face-by-default, thanks to feuding with

* ended up with an AO rating in New Zealand episodes aired in New Zealand are usually rated G (General Audiences) or PGR (Parental Guidance Recommended).
* Enderal is a friendly and likeable mercenary with few scruples about what he'll do for money. He later becomes more guilty about this, however.
* Enderal. The Forgotten Stories update adds another more minor female love interest (also bisexual) in the new Golden Sickle side questline.
* Ender believes this is the case with his final test at Command School. Fed up with everything and hoping to show that he's too savage to actually be given a command, he sacrifices his ships in a kamikaze attack and destroys the enemy homeworld. Then it turns out that
* Ender himself is said to be brutal when dealing with groups (thus fitting the trope) but not when working with individuals.
* Ender In Exile actually plays this one fairly straight as far as power goes. The starship engines work with a directional forcefield, dissolving space debris in front of the ship and propelling it out the back. Of course, it was the same dissolving technology that created the Little Doctor Device, a weapon that rips molecules apart, increasing by proximity of mass. Meaning that if someone drove the ship's engine into a sizable mass (say, a planet) the entire structure would unweave.
* Ender in Exile Graff goes on a long ramble in a letter to Ender telling him to have children, that children are amazing, breed, breed, breed.
* Ender in Exile, however. If it is, it is one inspired by the fact that the reason (according to the Hegemony) that Peter, Val, and Ender are so smart to begin with is that their family has such an excellent genetic history of intelligence.
* Ender in Exile. To really drive the trope home, after Bean and the three children with his genetic condition go into space to await a cure, Petra remarries to Peter Wiggin and has six more kids with him.
* Ender is constantly challenged by the teachers, who keep putting him in situations that prevent the use of old tactics, necessitating him to come up with new ones on the fly. Not only that, but the other armies keep adopting his tactics, so he can't use the same ones anyway.
* Ender is tired of playing games for the military, and does what he thinks is the most despicable and cruel thing he can possibly do in order to get out of it — slams the device into the alien planet and destroys the whole thing, including all of the ships in orbit from both sides. It's also his only choice for victory when faced with overwhelming odds. "The enemy's gate is down" indeed.
* Endermen are the most powerful naturally-spawning enemies in the Overworld. Their eyes glow purple, as do their particle effects.
* Endermen simply hate water. If they are outside when it is raining, they will teleport all over the place trying to seek shelter. Rainstorms are good if you want the Endermen to stay away.
* Ender series has a word for such a species: varelse. More than one of the species placed in this category were later reclassified as the understanding between them and humans improved.
* Ender's Game. After being hastily put together from, pretty much, every military force on the planet, the IF brass tries its damned best to make servicemen and women from wildly different cultures and traditions fit into the new structure. Corruption and careerism are the norm rather than the exception. Competent officers and soldiers are sidelined by their more politically-minded colleagues, who try to get the best deal they can for themselves... knowing that a vast Formic fleet is on the way and is expected to arrive in a few short years. Anyone with actual brains can only shake their head at this incredible short-sightedness. In an afterword, Card's co-author Aaron Johnston cites several retired servicemen, who have seen this sort of mess on a smaller scale in NATO and when working closely with other nations' militaries.
* Ender's Game Alive audioplay, Common is already an existing English-based language, and all Battle School children are required to speak it. Ender initially refuses to use Battle School slang (with words borrowed from a variety of languages, reflecting Battle School's multinational background) but is advised by

an older kid to try to fit in.
* Ender's Game, and Ender even has a psychological reason for it: mercy and good consequences should come from his troops' immediate commanders, discipline and bad consequences from he, Ender, as the overall commander, mainly so it bonds his squads into tighter units willing to protect each other.
* Ender's Game and is used to train future colony leaders and scout ship commanders, a wholly different skill set than for fleet commanders. It's also exclusive to children of IF officers and enlisted.
* Ender's Game, Andrew "Ender" Wiggin gains quite a bit of money by moving from star system to star system at relativistic speeds. After some careful managing and over a thousand years of travel his account is sufficient to buy a planet. It should be noted that the only reason it works for Ender (and his sister Valentine) is that he has a sentient AI operating in real time keeping track of his investments. His money isn't just sitting in an account gathering interest, it's actively and intelligently being invested even while he's in relativistic travel. Probably doesn't hurt that he started with an ungodly amount of seed money, being the acknowledged savior of the human race and having been paid accordingly by a grateful world populace.
* Ender's Game, and so puts him under strict orders to hang back and do absolutely nothing in battles, with the goal of gaming Ender's efficiency rating (no points will be deducted for missed shots if he never draws his gun) so he will be easier to trade to another army. When Ender sees Salamander losing one battle to Leopard Army—due to poor morale, no less—he springs into action at the last minute and inflicts just enough casualties to prevent Leopard from claiming victory. Bonzo rewards Ender for having turned a loss into a draw by beating him up because "no good soldier ever disobeys."
* Ender's Game, and the gravity-related tech turns out to be purely human, including the Little Doctor (whose prototype "gravity lasers" are used back during the First Invasion).
* Ender's Game are doing. In fact, when Peter finally learns that his parents have known all along that he is Locke, his father chides him, asking him where he thought his brilliant mind came from if not from his parents?
* Ender's Game, as Bean is really Ender's only confidant. He is a poor, lonely boy with the weight of the world on him.
* Ender's Game). A Speaker is something of a professional eulogizer, they speak at funerals and tell the story of the person who has died: the good, the bad, how they were seen by others, and how they saw themselves. The idea being to tell the story without applying judgment or justification, laying bare all the cold hard truths of the departed's life. In-universe, the concept became popular after it was done for the man who united humanity under a single government (the story including his sociopathic behavior as a young man, which included violent emotional and physical abuse and manipulation of his siblings).
* Ender's Game (a technology supposedly reverse-engineered from Bugger technology following the First Invasion).
* Ender's Game: Battle School is held aboard such a station. The central axis, which is in perpetual freefall, contains the training area for the cadets, allowing them to practice maneuvering and fighting in zero gravity.
* Ender's Game), battles frequently take place at close ranges, even though IF also has a number of dreadnoughts.
* Ender's Game, Bean delivers an awesome zinger of this type at Bernard when asked how he got such good test scores:
* Ender's Game, Bean has to step up to be in charge of Ender's toon, causing some resentment.
* Ender's Game books establish a scale of "alienness" between individuals and species, where on the farthest end of alienness it becomes possible to acknowledge that avoidance or xenocide are the only options for interaction between species because they simply cannot comprehend one another. The moral burden is upon the would-be exterminator to make certain there's no way to communicate with (or just avoid) the other species before committing to the extermination war, however.

* Ender's Game, Bozo and his friends confront Ender in the shower. Ender realizes that the most humiliating thing that he could do is beg for them to return his clothes, so he steps out and challenges them when he's still naked. Bozo actually strips himself so that the fight will be even.
* Ender's Game calls its Internet "the nets" and depicts it as several interconnecting but discrete networks, like in the old days of CompuServe and Prodigy (when the book was written). It also depicts participation in important political debates as by-invitation-only and closely moderated, rather than the free-for-all that politics on the modern Internet has become.
* Ender's Game, certain individual jurisdictions, particularly predominantly-Catholic ones, seem to have lax enforcement policies. Ender is a state-sponsored exception as his parents were supposed to breed a fleet-commanding prodigy and his older siblings turned out to be a sociopath and a pacifist.
* Ender's Game, Colonel Graff suggests that the Formics wanted to invade Earth for water, which their desert-like homeworld doesn't appear to have much of. Though they do attack a fleet of Formic ships harvesting ice from a gas cloud at one point. Note that this was not even discussed in the book, the theory there was that they were trying to colonize.
* Ender's Game: Ender challenges an older student to a game, but immediately states that he is going to win two out of three. The student wins the first match and tries to claim victory, but Ender convinces him that there's no pride in winning once against someone who've never played that game before and proceeds to win next two matches.
* Ender's Game: Ender's brother Peter is the aggressive, masculine Yang to their sister Valentine's passive, feminine Yin. Peter was rejected from Battle School because he was too prone to violence, while Valentine was rejected because she was too compassionate. Graff tells Ender he has to find the balance between these two emotions in order to be an effective commander.
* Ender's Game. Even people completely uninterested in sex (i.e. a man with no interest whatsoever) will settle down and get married, satisfied with adopted children but still hoping for a turkey baster miracle.
* Ender's Game explicitly take place 3000 years after the first one, so it's averted there.
* Ender's Game First Contact by being the first of his species to successfully communicate with a Hive Queen.
* Ender's Game flayed squirrels alive and subjected his brother to cruel games. His genius qualified him for Battle School, but he was rejected as too dangerous. As he grew up, his moral compass largely overcame his sadistic tendencies, and he used his intelligence for good.
* Ender's Game for an attempt at sabotage by the School administration and forbids him from taking part in the battles. By the fourth such match, he disobeys the order and singlehandedly turns a loss into a draw, making Bonzo hate him all the more.
* Ender's Game gets effectively banished from Earth for being one of these, since everyone is rightly terrified that if he decides to take over the world, no one would be able to do a damn thing to stop him. This only means that his sociopathic brother Peter takes over instead (creating a golden age of peace and unity). To be fair, it's less because he's invincible and more because he's got such a good reputation as Earth's savior that any cause he fights for will automatically gain the support it needs.
* Ender's Game gives us the Buggers, insectoid and telepathic aliens organized into hive minds each ruled by a queen. The story clarifies, however, that from the Buggers' point of view, this isn't a system of government because the hive is viewed as a single being, not a group of people whose society needs to be organized: the queen is effectively the "brain" of this being, while the other individuals are analogized to fingers or toes. Note that once the queen dies, so does everybody in the hive - they have no minds of their own telling them to eat or drink or save themselves.
* Ender's Game has a strategy winning a training battle that is discussed to Only

Work Once (it is technically an exploit of the battleroom rules). It works. A similar strategy comes into play in the end battle, recalling that moment.
* Ender's Game, he was also key in stopping the First Invasion, while still a member of the New Zealand SAS. Interestingly, the novels slightly deconstruct his greatness, showing that he failed his admittance test into the Mobile Operations Police (a multinational task force).
* Ender's Game him to break... because he would be less conflicted about giving the order (versus regular soldiers) until after giving it.[[/now]]
* Ender's Game: If you're paying attention to how many pages are left at the end of the book, you might guess the Command School "simulation" has to be the real thing, because there isn't enough time left in the book to do it all over again.
* Ender's Game In a pinch, they can be used as an impromptu shield, constantly moving in a cocoon-like shape around the ship, filling in "holes" in the "shield". The commanders even have a "shield integrity" gauge on the screen.
* Ender's Game in the conversation between Colonel Graff and Admiral Chamrajnagar, with the admiral loftily explaining that Graff's former students are "entering into the mysteries of the fleet [...] to which you, as a soldier, have never been introduced."
* Ender's Game in the Free Play game, but turns out to have a much more personal meaning for Ender.
* Ender's Game is even smarter than he is, but as amoral as you'd expect from a street kid.
* Ender's Game is revealed to be a wholly human invention, the Formics having to do without. That, of course, brings into question how their ships manage to maneuver so well without squishing the bugs.
* Ender's Game, it's implied that Ender's ability to think in three dimensions (which he sees as common sense) sets him apart from 99.9% of the human race, complete with rival schoolmates who don't get how he does it.
* Ender's Game). It's noted, however, that the soldier who turned the tide of the war was in fact not Jewish.
* Ender's Game. It's so prominent that the movie's attempts to hint at a romance between Ender and classmate Petra barely even register.
* Ender's Game, it's unknown whether it's standard-operating procedure to prevent letters from home to go through, but it's certainly one of the ways they isolate Ender. Eventually, a letter gets through from his loving sister Valentine, but Ender realizes that since she obviously had to write it under duress, it just means they have begun to use her to manipulate him as well.
* Ender's Game like a good soldier. Ender, who thinks like a warrior, disagrees.
* Ender's Game make commander, Dap salutes him and treats him with respect.
* Ender's Game, many of the Battle Room battles and fleet simulations given more detail in the book are shown as brief montages. In the first case, the montage makes it a point to show Ender's army's standing rising from the lowest to number one. Why bother showing how brilliant Ender is when you can say it?
* Ender's Game. Mazer Rackham, Earth's most successful commander against the Buggers, is forced to travel for fifty years at relativistic speeds so that he'll be able to transmit his knowledge to Ender, who was literally born and bred for the role.
* Ender's Game, most (if not all) of the Battle School commanders use the same formations that have been in place for years, due to fear of launching a failing strategy and tanking their army's standings. Ender's success is mostly due to him realizing this and coming up with new ways to innovate in every battle.
* Ender's Game: Peter and Valentine Wiggin use the pen names "Locke" and "Demosthenes" (respectively) to write blogs for political discourse. Ender later takes one of his own, "The Speaker for the Dead," to write biographies of his brother, the Hive Queen, and later for one of the pequeninos.
* Ender's Game, Petra, the best shot in Salamander, takes a hands-on approach to showing Ender how to aim his gun for greater accuracy.
* Ender's Game references at least one additional World War that ended with Mecca getting nuked.

* Ender's Game, Rose De Nose, the commander of Rat Army, tells his new recruit Ender that he can't use his holodesk until he freezes two soldiers in the same battle. Ender ignores him and uses it anyway, so Rose tries to humiliate him in battle by ordering him to be the first to enter the Battle Room, meaning he'll be completely alone against the enemy army. However, Ender turns it into a feat of glory by attacking Centipede Army while they're still entering the Battle Room, causing him to rack up an incredible kill count in a matter of seconds before he's frozen. After that, Rose leaves him alone.
* Ender's Game saga) focused on other characters from the original story.
* Ender's Game series are the Formics, more generally known as the Buggers due to their resemblance to giant ants.
* Ender's Game series. Half the IF is commanded by a bunch of prepubescent kids. Judging from Alai, puberty wreaks havoc with your political and military judgment.
* Ender's Game series take place thousands of years in the future, and there are subtle hints that none of the characters are speaking modern languages. Those who sound like they're speaking English are mentioned to be speaking "Stark" (likely a descendent of Starways Kommon, which itself was a phonetic, simplified variant of English). The appendices also mention that the languages identified as "Portuguese" and "Chinese" are descendent tongues, which sound nothing like their modern equivalents.
* Ender's Game. Since his parents and siblings were so intelligent, they figured any future kids would have to be around the same intelligence, and they still needed their military genius: someone who was not as sadistic as Peter while not nearly as compassionate as Valentine.
* Ender's Game. Somewhat subverted in that the Buggers actually know that this is their weakness and actively hide the Queen among the rest of the ships. It takes a genius tactician like Ender to figure out which one is the Queen ship, and even he can't do it in the middle of combat. On top of that, the Queen usually isn't even with her troops, being capable of instantaneous communication from halfway across the galaxy. As a result, Ender ends up having to wipe out whole fleets at a time.
* Ender's Game, so the ansibles are really the binding force for the entire interstellar civilization (to the point where one colony declares itself to be in rebellion and does the unthinkable by destroying their own ansible, or so it would seem...)
* Ender's Game spin-off series is focused on what happens to Battle School after the end of the war. It's renamed "Fleet School" and only children of IF parents are allowed to attend. Instead of war, children are taught to be future colony and expedition leaders, although it's noted a few times that the skillset isn't that much different.
* Ender's Game the academies most students move to after graduating Battle School.
* Ender's Game, the author of this adapted book, appears in a voice cameo as a pilot making an announcement to his passengers.
* Ender's Game the battle school students are basically forced to use this to its furthest extent in order to beat the game on their electronic desks.
* Ender's Game: The broader series has Lusitania, Trondheim, Pacifica, Ganges, Moskva, Albion and Zanzibar.
* Ender's Game, the ethical discussions appealed to fans of more philosophical sci-fi, the Earth-based political scenario appealed to fans of political thrillers, Battle School's inter-army competition appealed to fans of military fiction, and the realistic treatment of child development and psychological trauma appealed to lovers of literary fiction.
* Ender's Game. The film keeps this but undermines itself by making the mothership into a carrier ship many times larger than its drone swarms, thus making it the obvious target.
* Ender's Game. The Formics, for their part, appear to only use carriers that launch swarms of fighters, typical of their bug-like mentality.
* Ender's Game the punishment, as the teacher set him up to be resented by deliberately overpraising him to his classmates.
* Ender's Game: The series includes the planets Path, Hijra and Divine Wind.

* Ender's Game: The students at the battle school developed their own slang, though most of it doesn't apparently extend beyond its walls. Battle groups are called "toons" (short for "platoon"), rookie students are called "launchies" (as they've just recently arrived at the station via rocket launch), etc.
* Ender's Game they use, letting the commander quickly and easily control everything his team does. Ender, on the other hand, tends to give his team much more general instructions, and the resulting flexibility lets them make mincemeat of their opponents.
* Ender's Game This a rage quit from Ender because he's given up on strategy and is just trying to end the tests and go home as fast as possible.
* Ender's Game This has not been developed, but may be a plot thread for later books.
* Ender's Game under an assumed name, he gets people to sympathize with the Buggers; he found and communicated with a cocooned infant queen who reveals that they simply didn't understand that humans were sentient and intended to leave them alone once they realized it, but by then humanity was determined to wipe out the Buggers to protect themselves. A side effect is that thousands of years later, Ender is reviled as the monster who killed the Buggers. Never mind that the entire human race was onboard with doing so, it wasn't unreasonable based on what they knew, and Ender himself was partially tricked into doing it.
* Ender's Game universe. The books justify this by insisting that these kids are the first generation to be put through Battle School, where they are raised to think tactically all the time. Also this doesn't make older people incompetent - they're just using the children's special abilities in an all-out war. There are many types of leadership and competence.
* Ender's Game was (1) our radically different conceptions of individual personhood and (2) our inability to communicate that prevented the Buggers from apologizing and trying to make peace once they realized the mistake they had made — a rather dark take on this trope.
* Ender's Game when Ender asks why the buggers attacked Earth, Graff hazards a guess that they may have caught a transmission of our movies and thought we were too violent but the theory turns out not to be true.
* Ender's Game when Ender decides that if the people who run the games won't be fair, then he won't play the game.
* Ender's Game, when Ender is first assigned to Salamander Army, he doesn't know anyone there other than its commander is a boy named Bonzo Madrid. When Petra is the first person to approach him to talk, Ender thinks she might be Bonzo. Initially this could be an understandable mistake, since everyone involved is a prepubescent and there isn't much physical difference between boys and girls at that age—except one obvious one. Later on in that scene it's revealed she was standing there stark naked.
* Ender's Game, when Ender muses that the aliens (nicknamed "Buggers" by humans, presumably because they resemble giant bugs) probably refer to humans as "Slimies" owing to their soft oily exteriors rather than hard exoskeletons.
* Ender's Game when Ender realizes that this must mean that the queens aren't always in direct control over all the drones, and those that are left "on automatic" go back to their pre-sentience roots and try to "burrow" through space.
* Ender's Game when Ender switches armies in Battle School: The new army is a lot less disciplined than his previous one, to the point that Ender wonders if the leader even cares. Arguably, this trope is true for Battle School as a whole, who seem to be under a lot less rigid orders than the rest of the IF.
* Ender's Game where both child and adult characters are quite racially and ethnically diverse, including Black, Arab, Indian, Hispanic, Maori, etc., due to being cadets for the International Fleet, who recruit child prodigies from every nation on Earth. This is also the case in the book.
* Ender's Game While most of it is in self-defence, there's also instances where he beats people who were only nuisances to death, including the first bully he kills in the book.
* Ender's Game: While the books are usually mostly from human perspectives, many of

them have segments written from the perspectives of various aliens, as well as a sapient computer program named Jane. Each of those sections wouldn't really make sense if it was a human, even a super-powered one.
* Ender's Game, who are about to be defeated. They adopt false identities as the demagogues "Locke" and "Demosthenes" to warn citizens over the nets about the broiling situation in Russia.
* Ender's Game, who cracks into the desk system in the Battle School and figures out how to send messages under other student's names while preventing other students from using his name. This is only used for pranks, of course, as Ender is only six years old at the time. And the computer system is deliberately set up to allow and encourage this sort of competition/play/hacking.
* Ender's Game with a double marriage that seems to serve little point but to pair up all the remaining single characters of young adult age, among them an embodied fragment of another character's psyche and the recently created biological avatar of the future-internet's artificial intelligence.
* Ender's Shadow: Achilles doesn't want your pity, and in fact will kill you if he detects even a hint of it in any of your interactions. Of course, he may just kill you anyway. He's like that.
* Ender's Shadow, and he does his best to keep his children from inheriting it.
* Ender's Shadow, Bean mentions that the children used these during the increasingly long battles (and comments that he was never sure what the one girl used).
* Ender's Shadow books, Peter tells Petra that she's arguing like a nine-year-old, and that she might as well put her fingers in her ears and say "La la la, I can't hear you." Of course, she promptly does.
* Ender's Shadow but from the perspective of Bean, the youngest of Ender's generals.
* Ender's Shadow By the end of the first book he's taught himself at least five languages and by the end of the fourth speaks at least a dozen.
* Ender's Shadow Ender's father, after hearing a reference to a "dry dock", asks if there is also a "wet dock". Dimak's response is: "Nautical terminology dies hard."
* Ender's Shadow is his inverse. He doesn't take pleasure in the method of death, favors efficiency over pain, doesn't even need to witness it, and only goes out of his way to kill someone if they have shamed him in some way. Yet he is more evil than Peter.
* Ender's Shadow series, Anton the geneticist settles down, marries, and has a child in addition to his new step-children. He's also unashamedly gay, but can overcome his sexual urges in order to fulfill his social need for progeny. So, he's fine with being gay, and all, but...
* Ender's Shadow series, Bean commands a special unit of 200 Thai soldiers, who execute a number of critical missions, then commands the small army of the newly-created Free People of Earth under the Hegemon.
* Ender's Shadow, that it changes scenes to directly contradict the same scene in the original book and that it weakens Ender's victory from the original.
* Ender's Shadow This remains a major plot point over the rest of the "Shadow" novels.
* Ender's Shadow trilogy did not anticipate South Sudan becoming independent.
* Ender's Shadow Volescu had one set up for after his capture, possibly triggering a virus to fundamentally change the human race. In a more heart-warming example, Sister Carlotta has a note prepared to be sent to Bean that will automatically be sent to him if she doesn't check in for a period of time. Considering that he only receives it after her death, he realizes that Carlotta cared enough for him to do something every day of her life.
* Ender still took a lot of crap in school because of his Third status and, of course, no child would explain why being a Third is bad. Then again, when did kids (especially bullies) need a reason to be
* Ender suffers an even worse freak-out at the end of the story when he realizes
* Enderverse in the first place? The only explanation is that they didn't know how long the crisis would last and didn't trust their successors to dissolve the world

government peacefully, but that explanation raises further questions as well.
* Enderverse. The only girl of the group of kid space admirals that won the war, she went on to survive the global wars that followed the defeat of the buggers. In one scene, she is kidnapped by a special forces commando and calmly asks for the time to get dressed. When one member of the commando wants to hurry her, she calmly reminds them that her goodwill is worth more to his generals than his balls. In a bag. Now let me go to the bathroom before I go, please.
* Enderverse trilogy take place around Riberao Preto, Brazil? Card lives in Greensboro, and did his Mormon mission in Brazil.
* Ender Wiggin is a mix. On the one hand, he is the smartest kid in the entire Battle School, and while not the strongest is clever enough to crush much bigger and stronger foes with ease. He's constantly hailed as the only hope the human race has of defeating the buggers, and manages to win every battle of the war, as well as in the Battle School. That is really cool to read as a kid, especially when you get to imagine yourself playing through all the fun sounding battle simulation games Ender trains in. On the other hand, Ender is constantly targeted by bullies, the people who hail him as a savior of the human race have no respect for his mental health and well being beyond being able to defeat the buggers, and the stress eventually starts driving Ender a little crazy.
* "End Game": A disgraced former Marine captain wants information from one of his subordinates, so he kidnaps the man's father and sister to force him to give it up.
* Endgame and Ian Flynn's first issue and when they were together, they barely did much.
* End Game had these news interview segments interspersed with the real-time events of catching and interrogating the suspected shooter of the three detectives. Meldrick's interview is notable in that the, not-usually profane, Meldrick takes the opportunity to swear at the reporters, each of these instances covered with a 'bleep', which adds humour to an otherwise fairly bleak episode.
* "Endgame" of alien and renegade Earth ships led by Sheridan destroy the entire defense grid to stop this.
* Endgame opponents in the pet battle system fall into this. They use Epic- and even Legendary-quality pets, while the player (currently, at least) only has access to Superior-quality pets at best, meaning these NPC have pets with stat totals much higher than anything players can get ahold of. However, these opponents also attack in set patterns, meaning savvy players with the right pets and timing can walk all over them with minimal fuss. For example, Courageous Yon can be real trouble for unprepared players, but a player who knows the fight can send in an Anubisath Idol, solo the entire fight with it, and have it walk away with
* End Game Results Screen: A special screen at game's end that judges your overall performance.
* Endgame+ returns you to your most recent save point, but with new bonus content added to the gameworld somewhere.
* Endgame: Singularity has achieving this - and thus escaping mortality - as its final objective.
* Endgame S-rank weapons, meaning a weapon with their history should have been exhausted a long time ago. Some games do make the Lord's weapon indestructible, if only because these weapons tend to be effective against the final bosses and not doing so might make the endgame unwinnable, but "lesser" ones like the Regalia, the Sacred Twins, and the Legendary Weapons can break in as few as twenty to thirty hits. It's especially odd in cases where characters have tried to seal them away in some capacity, either for the ridiculous power of the weapons being too destructive, or to keep the weapons from being used against them, when simply smacking the weapon against a tree for a few minutes would probably do the trick.
* Endgame suffers from agoraphobia, and refuses to leave his hotel. So he has Sam, and various hotel staff members, do his legwork for him.
* Endgame Trilogy in order to show that the players don't play games, but are dead serious.
* Endgame Trilogy: Jago being ugly is constantly mentioned. His girlfriend Sarah, however, is described as inhumanly pretty.

* Endgame Trilogy: Markus dies right at The Calling. We only got two chapters to get to know him.
* "Endgame"; When Sheridan's forces arrive at Earth and easily overwhelm most of the remnants of EarthForce fleet,
* Endhiran starts out as your standard Terminator robot with Matrix effects, then he makes magnetized copies and becomes a macro-nanobot snake made of guys, taking the forms of a sphere, a cobra, and a giant, among others.
* end. How this game managed to avoid the M rating it so richly deserved is a mystery for the ages.
* Ending Aversion: Audiences are discouraged from checking out a work after hearing how bad the ending is.
* Ending Aversion: Audiences decide not to consume a work after hearing how bad the ending is.
* Ending by Ascending: A character going up a staircase or ladder means their journey is coming to an end.
* Ending by Ascending: A character going up a staircase or ladder symbolizes rebirth, rest, or new adventures.
* Ending by Ascending: A story ends with a character going up a staircase, ladder, etc.
* Ending C is a slightly modified version of the original ending where
* Ending Fatigue: Audiences feel that the work drags on after it should have just ended already.
* Ending Fatigue: Something of an effect more than a cause of Pacing Problems, this is when the reader loses interest before the end out of boredom, plot incoherence, or just plain disinterest, and outright stops reading. The story should end when it's over.
* Ending Fatigue: When a work drags on after it should have just ended.
* ending formula goes: "If they haven't died, they're still alive today."
* ending has the main character become this, much to the consternation of many fans.
* ending instead, but his brother, on whom Franco was based, objected and suggested the actual ending line.
* ending involving a nuclear reactor exploding and killing everyone. Also, Tom Thumb himself looks like a fetus.
* ending screen, but special mention has to go to "And prooved the justice of our culture". Even among one of the worst video game endings of all time, this sentence stands out as making absolutely no sense whatsoever. How does completing a video game prove the justice of our culture? And to whose culture is it even referring? Japan's culture? America's culture? The Ghostbusters' culture? Who knows!
* Ending Sentences With Prepositions: Long story short, it's perfectly acceptable to end sentences or clauses with prepositions. Even the Oxford English Dictionary says it's okay.
* Endings: "'There's always an ending,' said [someone or something]."
* endings. To make it worse, his girlfriend Amaya is standing on top of where he's buried but because she's deaf she can't hear his screams for help and to twist the knife further, the antagonists interfere with Matias' other communication attempts: blurring his mouth so Amaya can't read his lips during a video call and changing his texts to say "I wish I could sign better" to further taunt him.
* Ending Theme: A certain tune that plays at the end of all or most episodes.
* ending theme in the second season, XY&Z, where he and a group of Pikachus dance with and atop giant bottles of Ketchup.
* Ending Theme, with Louise mentioning taking Saito for a walk with the "chains of love" (or "leash of love", same thing). Given how she treats him normally, this is entirely unsurprising.
* , ending the movie right in the opening. The cops arrive, and the confused detective laments that his entire character is now pointless.
* ending with O'Connor, this time played by one of Walker's brothers, driving off into the sunset.
* ending. With the piano single as the background music, the lone pilot sorties

off...
* end it. In reality, detailed medical knowledge in no way translates into knowing how to fight, and in actual combat, there is no time to do precise things that require detailed knowledge. Modern shooters shoot center of mass and the head, neither of which it takes a medical degree to recognize. Likewise, modern fencing, HEMA, and martial arts practitioners don't sit for detailed classes in anatomy in the hopes of becoming better fighters. Being a doctor does not turn you into a fighter any more than being a fighter lets you practice medicine.
* Endless Blue: All sorts of islands float. When someone tells Mikhail that his warp drive won't work, this is what convinces him: a place with floating islands is not obeying normal physics.
* Endless Crab promotion, offering all-you-can eat snow crab legs and side dishes for $20. They vastly underestimated how much crab their customers could eat, and lost a total of $3.3 million on the promotion.
* Endless Daytime, and thus the minor gravitational pull from the other bodies in the system (or, barring that, other nearby stars) would nudge the planet enough to eventually pull it out of "orbit".
* endless debates and disagreements in general often claim Rau was one of its saving graces.
* Endless Eight, each episode is animated from scratch, despite the plot and dialogue of each being nearly identical. The voice actors even claim that they did eight recordings.
* Endless Eight episodes of the second season were released across four DVDs in Japan. Given that said arc consisted of the same episode eight times in a row, it's surprising that the first DVDs sold (relatively) well. Though the later ones to a lesser extent; the second and third sold only half the amount the first one did.
* Endless Forms Most Beautiful. This is a description that also applies fairly well to Nightwish itself.
* Endless Frontier also keeps track of how many times you cleared the game, with a gold star and a number next to your completed save file.
* Endless Frontier companion Aschen Brodel reminds him that she has in her memory banks video footage of him growing up from infancy. He demands that the data be deleted.
* Endless Frontier, crystals are quite helpful for new units, exchanging between the time shop, doubling medals, and other perks. You could wait for free crystals in the mail, but why not spend money for them and get some crystals right now?
* Endless Frontier had originally envisioned their W-Series forces to be this. They got as far as the prototype before realizing they had no way to accelerate his growth, so decided to go with androids instead.
* Endless Frontier is one happy man. In the sequel, the party is joined with a badass martial artist and an elven princess who's just as busty as the aforementioned Princess Knockers.
* Endless Frontier Kyon does this. A lot. Usually followed by "Oops. Now I have to kill you."
* Endless Frontier, to the point that it's rare for characters to call each other by their proper names at all.
* Endless Frontier, we have Haken Browning, with his black and red longcoat.
* Endless Game: A game that never ends; you just keep going to more and more levels.
* Endless game to cure the Game Disease and work towards a future where Bugsters and humans coexist.
* Endless: Ghosts are souls still trapped between Earth and the afterlife, "limbo" over some unfinished business. They're capable of teleporting from one place to another. With time they can also affect matter. Normally they can't communicate with the living. Jordan is astonished after Chris is able to speak with Riley, saying he had always heard it was impossible.
* Endless Legend and engineers dedicated to protecting the weak, this has caused significant angst and a schism within their leadership.
* Endless Legend and science, but cannot build anything. The beetles are

surprisingly agile for their sheer size, having the same four movement points as most infantry units.
* Endless Legend, and the ability to sacrifice citizens to appease their gods. Like the Cravers, they cannot engage in any diplomacy bar temporary ceasefire treaties.
* Endless Legend, are roughly tied with the Ardent Mages, another human faction focusing on research.
* Endless Legend heroes are implied to be these, generally as a result of coming into contact with Dust, which is capable of inducing sentience in non-sentient creatures.
* Endless Legend, it was the Vaulters who canonically conquer the dying planet Auriga and escape it (leaving almost everyone else to die out).
* Endless Legend robots, which have human-like ceramic faces with no eyes. Their marionette-like motion and odd anatomy - too many heads in weird places, generally - makes them unnerving to watch.
* Endless Legend salvaged from their vaults and augmented or repaired with magic. Prior to the start of the game, they lived almost completely underground.
* Endless Legend's to survive the long winters of Auriga. However they now become dependent on Dust to sustain themselves, the other alternatives is for them to drain the life force of other living beings.
* Endless Legend: The Broken Lords storyline has Marquis Suluzzo who encourages his people to continue draining Dust from other living beings, and part of the storyline quest involves taking him out.
* Endless Legend; the description then notes that the magic generated is well worth it despite the cost of screams and stench of cooked flesh and shit.
* Endless Legend. They have a unique leader in the diplomacy screen and alternate texture layouts for their units, but are otherwise identical to the Vaulters.
* Endless Legend to allow them to quickly relocate to exploit rare resources.
* Endless Legend, which gained true sentience from contact with Dust in a derelict Endless freighter.
* Endless Legend, while an empire of malfunctioning robots converts bands of orcs and trolls to join their cause in destroying the ruins of the Endless.
* Endless Legend will make the mercenary's allegiance hidden to other players. Other factions can also hire mercenaries and hide their allegiance, but the Roving Clans are by far the best at it due to their mercenaries having twice the health, faster movement, immediate access to the market, and earlier access to false-flag research. Players can infiltrate territory of two neutral powers and attack one to entice it to declare war on the other.
* Endless Legend, you can discover prototype weapon and armor designs during early quests. These prototypes are early ancient weapon designs from before that planet's cataclysm. When you find them, you only need the appropriate materials to manufacture them rather than having to research an entire research branch. The problem is that these prototypes are extremely weak compared to the weapons you can manufacture through researching. Many times the prototypes lack the extra bonuses and have far weaker stats than their researched counterparts and often use more material. For example one titanium bow prototype is a Tier 2 weapon that uses 6 titanium to manufacture and only does +4 damage. The lesser Tier 1 titanium weapon that you researched only takes 4 titanium, does +6 damage and has a +5 chance of doing a critical hit.
* Endless Love, and the extremes he goes to in order to be with the object of his obsession. Both films went for a straightforward romance:
* Endlessly complaining during a family walk around the neighborhood through the snow, ranting about how he's going to freeze to death, not even noticing when they actually arrive home -
* Endless Nights finally come in and try to close down the site, the archaeologist reveals that a bot will email a detailed account of the dig to multiple online news sources unless she checks it every 24 hours. They let her go.
* Endless Nights shows all the Endless around and established when the Earth was still cooling and lifeless, and the green energy of the Guardians of Oa was just a budding research project. So, at least four billion years old.

* Endless Ocean and its sequel contain specimens of goblin sharks in deep-sea regions. Realistic enough. However, their jaws are depicted as permanently protruding, an out-of-date assumption as we have learned more about goblin shark physiology.
* Endless Ocean features Adelies, Emperors, Gentoos, Rockhoppers, African penguins and Little penguins to be discovered. A few penguins even show up on the deck of the boat and hang out with the protagonist when the hidden credits sequence is triggered.
* Endless Ocean games have levels themed around diving into deep ocean trenches and meeting animals such as goblin sharks and sperm whales.
* Endless Ocean has Titles, special nicknames you can assign to your character that unlock by accomplishing various tasks. Some of the Titles come with physical rewards as well, like new diving equipment.
* Endless Ocean introduced underwater salvaging to earn extra money, and you won't know what any given object is until you get Nancy Young to appraise it. A small bottle could either be a priceless perfume or a discarded orange juice bottle, for instance.
* Endless Ocean, nobody's age is pinned down, but of note are Professor Sakurai, who is said by Oceana to be "too young" to have done all she's done; Oceana herself, who, at least in the NA version, has to be at least 15 since her father's accident is stated to have been 15 years ago, and is more likely to be 17 or so, as she was "very young" at the time rather than "not born" or "just a baby"; and the player character, who joins the diving service while taking a break from courses.
* Endless Ocean opens with whales absolutely everywhere, the player in a boat with a bunch of strangers, an entrance to a mysterious ruin... and then the flashback kicks in and you're asked what you look like and given your job interview.
* Endless Ocean several new Twitter followers, as her song "Prayer" was prominently featured in the first game.
* Endless Ocean songs, with "Prayer" being mostly closely identified as the title screen music and "The Water is Wide" for the credits.
* Endless Ocean, you can find 3 extinct creatures, including one distinctively called "Living Fossil", but most notably, a plesiosaur.
* Endless One Story Staircase that allows you to, and so you could climb those stairs for ten minutes or for three days, but turn around and all you traveled from where you started was maybe a couple meters.
* endless only make her more likeable — to the audience, at least. Most other characters rather fear her. Contrast to the Other who showers cutesy and "darlings" all the time, but tries too hard.
* Endless Pantheon, justifies the apparent excess of Goa'uld ships. Millennia ago the Goa'uld fought and lost a war against the faerie Courts and many Goa'uld still live in fear of sidhe assassins popping out of the Nevernever. The ornamented walls are in fact massive warding arrays meant to keep faerie attackers from infiltrating the ships.
* Endless Pantheon: The Goa'uld and Faerie Courts went to war several millennia ago due to Thoth's Folly, a series of events which saw the Goa'uld fall from grace. The exact details of the war are not clear as the Terms which ended the hostilities also rewrote much of the Goa'uld racial memory of what happened. To the modern day, the Goa'uld still consider this to have been the only war worth mentioning as such.
* Endless Pantheon, the Goa'uld have lived in fear of the Nevernever for millennia. The full body iron armor and melee weapons of jaffa are designed to counter faeries while the fancy ship decorations are in fact wards to prevent intrusions from the Nevernever.
* Endless plays Riley, who's biracial like her, with Black and White parents.
* Endless Quest Decide for yourself whether the title's talking about the circus being run by bad guys or all the usual circus animals and attractions being replaced by creatures from the D&D bestiary.
* Endless: Riley and Chris's romance doesn't die with him. It continues somewhat after he's dead and becomes a ghost.
* Endless: Riley blames herself for Chris's death, thinking she distracted him.

* Endless: Riley is the child of wealthy lawyers. Chris comes from a humble background with a single mom. There's friction as she gets accepted into a top college, while he clearly isn't going anywhere. Aside from this however it isn't an issue, and Riley's determined for them to be together.
* Endless: Riley starts to share parts of Chris's mind after they connect when he's a ghost, for instance taking up his food and music tastes.
* Endless Saturdays certainly fits. It's constructed from a red wagon, has cardboard wings, and uses an exploding propane tank as a source of propulsion.
* Endless Sky, and if you do gain the upper hand, they may self-destruct their ships to prevent being looted, unlike regular pirates.
* Endless Sky are souped-up versions of regular ships modified to increase their effectiveness, with some Marauders having a focus on either weaponry or speed.
* Endless Sky compared to "blaster" and particle weapons, which are traditional sublight projectiles.
* Endless Sky: Every planet that can be landed on has an accompanying landscape image, with some of the images having features ranging from a different-colored sky to a binary planet being visible from its twin, and visa versa.
* Endless Sky originate from a moon of a gas giant, with much lower gravity and pressure than Earth. While humanoid in appearance, their bodies are thin, fragile, and three metres tall, with digitigrade legs, and their lungs are so delicate they can only breathe very thin atmospheres.
* Endless Sky, pressing the Jump key with no hyperspace destination will have the game pick an exit route for you at random. The developers describe it as this trope; a panic button used when anywhere else is better than the system you're in.
* Endless Space 2; early in the beta their populations gave a bonus to Dust generation if they got to live on planets with the (now absent) 'Water' attribute.
* Endless Space 2 gives each empire's starting planet a unique name, averting this trope. It goes further by giving players the option to rename any planet they colonize, meaning you could have an entire empire of unique planets if you so choose.
* Endless Space 2. The Lumeris evolved on a tropical ocean planet and have long organised their society into families, clans and dynasties; they have long since grown past aristocracies, but still the real power brokers behind their civilisation are the so-called Four Families who control the agricultural, construction, shipbuilding and politics sectors. Though unfortunate infighting and backstabbing still happen from time to time, the Lumeris recognise the galaxy as both a grave threat and a great prize, so they have all sworn off stealing the fish from each other's plates, if only for the time being.
* Endless Space 2 the more hostile planet types and can terraform planets into more hostile variants.
* Endless Space 2 - The United Empire faction's intro video features a cheery propaganda montage hailing the glory of the Empire, which ends in a still that pans out to reveal it's actually a billboard on the real, highly polluted, slum-covered, United Empire homeworld.
* Endless Space adds fighters and bombers, which spend phase 2 getting into range and then attack for the next two phases (fighters go after enemy fighters first, then bombers, then ships; bombers go after ships).
* Endless Space, all owners of the base game were upgraded to the Emperor Edition, and the Sheredyn received a unique Affinity and bonuses separate (but similar) to the United Empire, though their ships remain as palette swap.
* Endless Space allows a fleet to attempt to disengage by immediately jumping to hyperspace. It is most effective at the beginning of battle, before the fleets close the distance and start engaging each other. Once you're in medium or close range, escape becomes much harder.
* Endless Space also possess spindly and blocky ships, while the Horatio which compose entirely of human clones have sleek and almost alien like designs.
* Endless Space and decided to clone an entire society of himself to serve his needs. He loved it so much he thought that the entire universe could do with being cleansed of life, replaced with billions and billions of clones of the most

beautiful creature to have ever existed: wonderful, gorgeous Horatio. The other factions have had to deal with his... their shit ever since.
* Endless Space and dub themselves the Automatons before moving into interstellar space in search of more of the substance.
* Endless Space and gold-plated prows on their starships; even the decadent United Empire can't match the bling of of the Sheredyn.
* Endless Space, and their capital ships have gyroscope-like assemblies made from gears.
* Endless Space are mystics and, through the magical mysteries of Dust nano-tech, implied to have extraordinary powers. On the individual level, all species — including robotic species — appear susceptible to becoming this when exposed to Dust, and come in a few general flavors that conveniently help you run various aspects of your economy or military more effectively.
* Endless Space as its main and probably only inhabitant. Plus it's unclear if he's even human by then; he doesn't seem to think so anymore.
* Endless Space as one of the most potent negative anomalies that can affect a planet. Many planets are host to the remains of long dead civilizations, and Kessler Syndrome is the result of a space-faring civilization dying back without taking their satellites with them, causing derelict satellites to smash into each other, generating debris which smashes into more satellite ad infinitum, turning the low and high orbits into rings of lethal debris, making space travel dangerous and expensive.
* Endless Space, as the game's main focus is economy. They consist of four stages: arrival (no shots exchanged), long-range (missiles most effective), mid-range (lasers most effective), and short-range (kinetic weapons most effective). If no side is obliterated by the last stage, the battle is a draw. Visually, ships simply travel towards a planet in standard naval battle lines and exchange shots. Combat is affected by tactics (which act as cards in card-based games) pre-selected at the start of the battle and locked in for that stage at the start of the stage. To this end, if you're not planning on changing your tactics/cards during battle, you may as well let it play out automatically. The result will be the same.
* Endless Space. Besides those, you can upgrade any version of a ship to the most modern if it's docked at one of your planets, meaning you can upgrade a several-hundred-year-old ship for just a little extra money than a year-old ship.
* Endless Space, bodyguards to the Emperor of the UE in the Praetorian tradition, have ships with the same structure but massive bling for massive win. The Pilgrims, who've had lots of interactions with the Sophon, have ships that are a mishmash of blocky and shiny curves aesthetics. The other races have every kind of design imaginable, from mechanical monstrosities to armored bacteria to sculpture to birdlike vessels to robot octopi. It's a pretty exciting galaxy you live in.
* Endless Space can load up the majority of their population and system infrastructure onto a massive ark, the Fleet Errant, which can then set up a new colony in a separate system. The Fleet leaves behind one population on each planet in the system it departs from, allowing it to rebuild. When the Fleet Errant settles down, it starts off a golden age in the system which massively boosts the production of food, industry, Dust, and science. However, it's generally used more for extremely rapid expansion rather than fleeing danger.
* Endless Space can seriously hamper your expansion. Their ship spawn in systems out of sensor range and are damn difficult to destroy in early stages. Luckily, you can disable them.
* Endless Space constantly expand and conquer other worlds and races, otherwise they will eat themselves into oblivion.
* Endless Space, exchanging some of the Empire's economic abilities for combat-based abilities, such as preventing enemies from retreating.
* Endless Space has the Horatio faction, an array of clones of ultra-rich Horatio the First. Some of them are female, because Horatio got bored with just his male clones.
* Endless Space has the Sheredyn, who were originally just the bodyguards for the emperors of the United Empire. By the time of the game, however, the Sheredyn have

begun to take over corporations along with building independent colonies and creating their own interstellar logistics networks in addition to their military forces operating outside the Imperial military's regular chain of command. This has transformed them from an elite bodyguard force into a powerful subfaction within the empire; to the point they are almost a state within a state.
* Endless Space has two species known as the Sowers and the Automatons. You can go to war with both of them. In this case however the two races are not malevolent machines out to destroy every non-organic beings. The Automatons prefer to isolate themselves, and the Sowers are only interested in terraforming worlds. If you get in their wrong side they will turn their efforts to military matters.
* Endless Space he found on a planet. (Out of boredom, no less!) He then decided to fill the galaxy with the most beautiful thing he knew of — himself.
* Endless Space in that there is no sex and gender discrimination present: women are viewed as equally capable of being warriors and leaders as men.
* Endless Space is populated by an unending tide of the perfect man, Horatio.
* Endless Space; like the Pilgrims, they receive no innate science bonus, but their vast industrial capacity allows them to pump out science from their extremely well developed solar systems.
* Endless Space of the Emperor, have since become an effectively independent entity after they assisted a coup and installed a new Emperor. Compared with the military/economic powerhouse of the Empire, the Sheredyn lean more towards military, with incredibly durable ships, some minor economic bonuses, and their special ability means that enemies cannot retreat. However, their sense of honor and asceticism means that happiness drops when they break a treaty and they receive reduced bonuses from luxury goods.
* Endless Space; planetary core taps, orbital shipyards, et cetera. The Pilgrims, a human nation of scientists and mystics, seek out the Endless's lost homeworld, Tor.
* Endless Space production for 45 turns. A Hissho player that is able to build momentum through conquest can quickly become unstoppable.
* Endless Space, the Cultists of the Eternal End were added at the game's release.
* Endless Space the Endless have found a way to transfer their minds into machines. This caused a great schism in the Endless society, between those who want to remain organic, and those who embrace virtulization. This sparked a massive war which lead to the extinction of the Endless.
* Endless Space The other two human factions in the game avert this trope.
* Endless Space. The Pilgrims receive indirect science and cash bonuses via their ability to easily establish trade routes, and the United Empire and Sheredyn's industrial might allows them to churn out scientific data.
* Endless Space, there are also a lot more planets that are inhospitable, although colonization is possible after extensive research. Even terraforming may be possible closer to the end of that research branch, although gas giants and asteroid belts (which can also be colonized) can never be turned into hospitable planets.
* Endless Space, uplifting creatures, and so on. Then they had to go and have a civil war and ended wiping themselves out, leaving the galaxy ripe for the taking for a dozen new upstarts - including humanity - a few millenia later.
* Endless Space, you're limited to this mode of travel. Later, you can discover technology to utilize wormholes that are generated randomly throughout the galaxy and another technology allowing your ships to go "off-road", even though this path is way longer. Either way, ships at FTL are unable to change direction.
* Endless Stairway, which you can climb/descend forever without getting anywhere as the whole thing is a magical illusion.
* Endless Summer fits this role to a T. From the first chapter, he is giving everyone nicknames; some characters even get multiple.
* Endless Summer revolves around a group of college students, along with their tour guide and pilot, finding themselves trapped on a Caribbean island.
* Endless Summer, the Vaanti concept of marriage, handfasting, has it told that if a couple married together for a year and a day still love each other after that time, they will be together forever.

* Endless: This is the reason are stuck in limbo, having something stopping them going on to the afterlife. For Chris, it was Riley. Jordan still hasn't at the end, though he seems happy with helping new ghosts adjust to their state (particularly young, attractive female ones). For him it seems to be atonement over his niece dying because he neglected to watch her enough.
* Endless Universe, is an example of "Generation Ship Planting FTL Gates".
* Endless Waltz, as did Mariemaia Khushrenada earlier, when she declared war on the Earth Sphere Unified Nation.
* Endless Waltz, Heero pulls this with Duo as enemy soldiers close in - and then KOs Duo immediately afterwards. Heero's rationale? "One for one - now we're even." This little trick allows both of them to escape individually when they would likely not have been able to do so otherwise.
* Endless Waltz, Quatre uses the gravity exerted by Venus to fling his ship back to Earth, because they are low on both time and fuel.
* Endless Waltz, there is the Tallgeese III's Mega Cannon, which Zechs uses to destroy the Mariemaia Army's base at asteroid MO-III. Like the Buster Rifles above its output is also variable, with its maximum output being comparable to the combined Twin Buster Rifles, but it cannot be split into two.
* Endless Waltz. This version of Heavyarms lacks any melee weapon unlike its appearance in the TV series.
* Endless Winter. Despite this, the fandom frequently has Anna calling her sister every time she gets mildly frustrated at her, although not when she is really angry at her sister.
* Endless Winter, putting its titular guardian in perpetual hibernation.
* Endless Wire, and the death of John Entwistle. Two "preview" tracks were released on a compilation album in 2003 - neither made it onto the final album.
* Endless Worlds part of your empire, since the spaceports and other orbital infrastructure are state-owned, but if they let you settle in the first place they're generally happy to start pitching in with this whole space-faring thing.
* Endling: Renzo is a skilled thief, and tends to loot as the group travels, to Khara's displeasure.
* Endlords plain that they are in fact cosmic forces of destruction which have been compressed into this shape, and are utterly inimical to life as we know it.
* Endo and Kobayashi's Live Commentary on the Villainess: Endo used to be in the baseball team, but an injury to his shoulder put an end to any dreams of going pro (which were unlikely seeing that he was "barely average" in his own words). Shortly after, he met Kobayashi who encouraged him to join the broadcasting club, suggesting that maybe he could become a sports commentator instead.
* End of an Age PC-98 games, Yuuka kept her original looks from that period, including a full head of long hair. Towards the end of the story, she takes note of the increasing number of powerful figures who've been making their presence known in Gensokyo and decides to get with the times, starting with her hair. With that decision, the PC-98 era is over at long last.
* End of an Age: The story is set during the end of a particular era in the story's setting, such as the end of the medieval era or the end of the American West.
* End of an Age: When an irrevocable loss happens, which removes the innocence of the hero or the world forever.
* End of Days and his methods of obtaining victory have not stopped their brutality.
* End of Days: Arnold Schwarzenegger tries to stop Armaggedon in New York City, 1999.
* End of Days: Bodybuilder Sven-Ole Thorsen appears as a thug breaking into Jericho's apartment.
* End of Days follows the attempts to prevent Satan from conceiving the Antichrist before the year 2000.
* End of Days. In interviews, Schwarzenegger said that he took this role because he thought it was the perfect script to make his return to action movies, which makes this part even more weird.
* End of Days, Jericho and Christine outrun an inferno chasing them down a hallway

after rescuing Christine from Satan near the end.
* End of Days: Jericho Caine throws himself on a sword to banish Satan back to Hell.
* End of Days, Jericho throws Satan out of a window and he lands on a parked car. Of course, seeing as how he's Satan, he copes with it.
* End of Days kills a guy by grabbing his head and twisting it 180 degrees.
* End of Days makes a smoothie that includes old takeaway food and beer.
* End of Days offers to save him in exchange for his soul. Jericho appears to agree, but when Satan reaches over to pull him up, Jericho screams, "Fuck you!" and yanks Satan out the window, where he falls into the street.
* End of Days, Satan offers Jericho a recreation of his deceased wife and child to win him over, but Jericho rejects it because he realizes it's ultimately not real. Satan turns the illusion nightmarish in response by forcing Jericho to relive his family's murder and unable to stop it.
* End of Days, Satan offers Jericho to forget his mission to protect the chosen girl from Satan and to bring back his dead wife and child in exchange and come work for him in his new hellworld. Jericho is genuinely tempted by the offer because of his grief, but he ultimately rejects.
* End of Days. Satan resurrects several of his minions after Jericho kills them because they still might prove useful to him.
* End of Days's wounds after Jericho shoots him. However, near the end he suffers so much damage that he doesn't even bother repairing it anymore and starts looking for a new body because he's running out of time to complete his plan.
* End of Days the appearance of a comet above the full moon known as "The Eye of God" by Vatican astronomers, and it's the sign of the prophesied birth of the woman that will give birth to the anti-Christ.
* End of Days", the chloroform version is used by Xander on Dawn when Buffy wants him to get her out of town before the final battle with the First. She's not happy with him when she wakes up, TASERs him, and drives them back to town.
* End of Days was played by the genuinely albinistic actor Victor Varnado.
* End-of-Episode Silliness, and Lillie falls asleep on top of Ash, while Lana rests her chin on Kiawe's back.
* End-of-Episode Silliness: An episode ends with a humorous scene or random bit of dialogue.
* End of Evangelion, after realizing the true meaning of AT-Field, Asuka dodges a MMM from the UN army with an apparently several miles high jump.
* End of Evangelion. Although their take-no-prisoners attitude does cause one to call their morality into question.
* End of Evangelion and become an everlasting monument. That she was used to fight Angels in the meantime is just a perk.
* End of Evangelion are two other such pieces (though the latter is played in violin). Several other tunes like that are tucked away in the S2 Works music collection. There are at least two piano versions of "Honeymoon with Anxiety" - the lonely one, and the really, really, REALLY lonely one.
* End of Evangelion does this masterfully with Third Impact. Poor Shinji completely loses his sanity.
* End Of Evangelion edition of the DVD has a racy clip of a Japanese model play on occasion when one leaves the Extras screen on the main menu open too long.
* End of Evangelion Gendo admits he avoided his son because he felt unworthy of being a parent and feared he would only do a bad job and mess up Shinji by raising him, and therefore reasoned that his son would ultimately be better off without him in his life.
* End of Evangelion gets crushed under the foot of a descending Mass Produced EVA, and the shot is framed in this way.
* End of Evangelion has begun and they are disintegrating into their base components.
* End of Evangelion has everyone getting hugged by a hallucination of their most loved person and then promptly collapsing into primordial soup. Anti-AT field: quick, painless and 100% effective.

* End of Evangelion. It isn't a human face though. Take a snake. Paint it white. Give it massive red lips, and a big block of square teeth. Now take its eyes away. And make it constantly smile, even when having its head blown off, back snapped, stabbed through the head.
* End of Evangelion. Misato's H&K USP makes some pretty satisfying metallic clicks.
* End of Evangelion occurs at the end. The part that made the franchise famous.
* End of Evangelion, this trope is mentioned as the true reason why the Evas were created: a monument that will outlast the universe itself.
* End of Evangelion when several characters are seen after apparently being shot.
* End of Evangelion where a JSSDF commando sneaks up on a NERV gate guard, grabs him by the face and pushes a knife into his back, quite horrifying as you see the guard arch his spine, groan and then go limp, and in another scene we see one gun down NERV staff whilst they're running away from the JSSDF with their backs turned.
* End of Evangelion, where nearly every sound out of her mouth is a wordless battle cry. Especially her last attempt at a kill where she starts squeezing the target's core with a demented growling; camera cuts away for a while then back where the growl amplified into a full-volume top-of-the-lung scream she continues until she sees the fake Lance flying towards her.
* End of Evangelion (which are actually in the middle of the movie) wind up the screen while spinning.
* End of Evangelion, with the comment "Humanity is the only creature capable of hating its own kind."
* End Of Infinity, Phantasmagoria is the world that dreamers go to when they're asleep. By taking off their Placidus mask, they can become Lucid Dreamers and interact directly with the Phantasmagorians, permanent residents of the dream world. Otherwise, they are Placid Dreamers, who experience Phantasmagoria as an ordinary dream.
* End Of Infinity, this seems to be Silver's default mode of speech. Per others' request, he attempts to tone it down and speak normally, with questionable success.
* End of Nations and became the strictly totalitarian government that is is by time the events of the game takes place.
* End of Nations has the Shadow Revolution use drones for both defense and assaults.
* End of Nations: Liberation Front (Powerhouse) and Shadow Revolution (Subversive).
* End of Nations that raise completely impenetrable shields on the units within an area for a very short time frame.
* End of Nations the player chooses to side with either the Liberation Front, and the Shadow Revolution, as they fight the Order of Nations and each other.
* "End of Overtime": The building where the Dwarf Council of Elders is held is surrounded by a deep chasm. When the Order of the Stick and their dwarf allies fight for its access, the ramp created by Durkon with a Wall of Stone spell is broken by the giant Death Worm. This leaves Sigdi Thundershield clinging one-armed to the ledge while Kandro struggles with the monster and Hoskin reaches for her. We get one panel showing the apparently bottomless pit, with some rocks and Sigdi's axe falling down.
* End of Part One begins one episode with the ribbon starting at the top left of the screen as usual, but instead of turning horizontal to form the "L" it continues straight down and falls offscreen with a loud crash.
* End-of-Series Awareness: A character is aware they're fictional and that their work is ending.
* End-of-Series Awareness: It can be depressing to see the characters of a television show actually acknowledge that their series has ended.
* End-of-Series Awareness: The ending of a series has the characters acknowledge that their show has come to an end.
* End-of-Series Awareness: The ending of the series has the characters acknowledge in-universe that their show is over.
* End-of-Series Awareness: The final episode or installment of the series actually has the characters acknowledge in-universe that the series has ended.

* "End of the Beginning" has Garrett and Coulson track down Thomas Nash, who they believe to be
* End of the Beginning", the first words out of Yang's mouth are to tell Ruby that she loves her.
* End of the Fishman Island arc and beginning of New World adventures proper includes a direct lecture from Pekoms about how just being a Logia is no longer enough to be invincible, punctuated by one-shotting Caribou with a punch to the gut despite the latter's attempt to transform into his living swamp form.
* End of the Line, upon receiving news about the train about to crash into their base, soldier looks around and is horrified to see an orphanage, kitten store, and kitten orphanage will be in the blast zone.
* end of the Painted Black arc, Ellen and unnamed operative are in full agreement about Human!Guineas's shirtless appearance.
* "End of the Road" is also a notable example for having the actors who play the main characters actually
* "End of the Road", the third part of the Season 3 finale, ends in a similar way to "Odds and Ends". Orla asks if Odd Squad should still exist now that the powers of every villain in the world are safely captured in Olizabeth's box (given to the Big O by her following her
* end of the universe, the Doctor mentions that humans went through periods of uploading, or being gas.
* end of the universe the transhumans have still regressed back to humanity, and keep going back to the same form.
* End of the World as We Know It and the coming of the Kingdom of God.
* End of the World As We Know It of the townsfolk of Patience coming after him with torches and pitchforks. Asta, staring at his increasingly alien body, comments that she can see how it could be a problem.
* "End of the World" Special: A character is given the power to recreate the whole world.
* End of Watch: After trading insults with a suspect, Zavala agrees to fight him. Zavala's victory, as well as his decision to only arrest the gangbanger on the original charge of disorderly conduct (when he could have added assault on a police officer), wins the gangbanger's respect.
* End of Watch: At the start of the story, two ambulance drivers named Rob Martin and Jason Rapsis are send to check on a man named Harvey Galen, who is suffering from severe chest pains. However, after a few belches and "a trombone blast from the nether regions that had his social X-ray of a wife booking for the kitchen", he already feels much better.
* End of Watch: The "Curbside" gang are a foursome of Latino gangbangers who do hits ordered by the Sinaloa Cartel in South Central LA.
* End of Watch: When asked why a gangbanger is named "Big Evil," he replies, "Because my evil is big!"
* End of Year Eight (June 3rd, 2016): Keene Milton is revealed to still be alive, but regains consciousness inside his limo, which has apparently been driven off a pier, is rapidly sinking, and his chauffeur has gone AWOL.
* End of Zoe is capable of literally ripping the Molded apart with his bare hands. Unlike Chris, he's just an aging outdoorsman with a lot of experience hunting gators (though he is implied to be a veteran).
* Endorsed in Deuteronomy 21:18-21: parents are allowed to bring their incorrigibly disobedient children to the elders of the city to be stoned to death. Also, in Exodus 21:15 and 17, children who simply strike or curse their parents were to be stoned to death.
* Endorsement deals are an expected part of the job for any popular superhero in
* endorses Jefferson over Burr, which helps Jefferson win the election. He hates Jefferson's ideals, but he would rather have a man who has
* Endorsi twice during fights, which always causes her a big disadvantage, and at one point, it was intended by her attacker. After that, she stopped wearing high-heels.
* End result, NASCAR penalized Michael Waltrip Racing by fining the team

$300,000—the highest fine imposed on a team in NASCAR's 67-year history. It also indefinitely suspended Ty Norris, placed all three of MWR crew chiefs on probation until December 31, and docked Bowyer and Truex 50 driver points. The penalty was retroactively applied to their point totals before the reset for the Chase, which effectively dropped Truex's point finish to 17th, causing him to be knocked out of the Chase and replaced with Newman.
* end results of Alain's victory over Ash. It’s okay if you say you like Alain, as he does have his fans. It’s also okay to bring up the other League losses, as they didn’t get nearly as much backlash as Kalos did.
* Endride and has no knowledge of Endora. It's a running gag for him to severely over- or underestimate Endoran wildlife, with others correcting him, and occasionally deceiving him.
* Endride and is on the run with a prince. He remains very ordinary regardless.
* Endride called Adamas lights up the sky in a very green hue during the day (with permanent rainbow streaks), and purple at night.
* Endride, dangerous people and quick with the knives, both magical and mundane.
* Endride Delzaine to avenge his real father but talk to him instead, especially since he's given zero thought to what happens to the kingdom after he kills the king. He hesitates at the last minute, only for someone else to kill Delzaine first. Emilio is, of course, seized with regret as Delzaine was his father figure and now he'll never get to talk it out.
* Endride, Eljuia gets called the "unluckiest guy you'll ever meet," although in-universe there is some glass half full debate as to whether he isn't really Born Lucky considering that despite his danger magnetism, nothing's yet killed him.
* Endride! Emilio criticizes him over his unflappable enthusiasm, but as Shun points out, if the alternative is to be total sourpuss like Emilio, he'd like to stay enthusiastic.
* Endride for hard labour and ship all the ones who were too weak to work to an island in the middle of the sea so they'd be out of sight.
* Endride. He even manages to gather the series' protagonists, one of whom is a prince, into his team rather than the other way around.
* Endride is such that he ends up causing the two protagonists to join up with his cause, rather than the other way around.
* Endride on his betrayer, who has a grudge towards members of the Ignauts and will come to them sooner or later.
* Endride, she barely displays more emotion than quiet jealousy and mistrust.
* Endride, the Ignauts form as a revolutionary army seeking an ideally non-violent overthrow of the kingship, in hopes of more equality and support for the disadvantaged. When King Delzaine is suddenly killed by a third party, a major wrench is thrown in their plans and they end up becoming something of a temporary peacekeeping militia instead as the country falls apart.
* Endride, the Ignauts. If they build enough allies, they think they might be able to sit down and negotiate with King Delzaine to step down and prevent things from coming to bloodshed.
* Endride, this is Shun and Emilio's favourite pastime be it insulting each other's temperaments, fighting skills, or lack of other life skills.
* Endride use it to prevent someone landing a blow, but almost always when there's a fight he's standing in the background carefully watching things unfold. Shun's first words to him lampshade his peaceful appearance.
* Endride who is noble-born, and some of the lords that the Ignauts reportedly managed to recruit to their cause.
* Endride who was always sneaking into the palace to play while they were growing up. She's the nice, wholesome sort, always ready to listen, and has some romantic interest in Emilio, but holds off on pursuing it since she's not sure it's reciprocated.
* End Run wasn't destroyed by it, but given the make-shift nature of escort carriers, the destruction of the bridge did put a serious cramp in operations, in that unlike a purpose-built warship, the CVEs didn't have a Combat Information Center deep inside the ship where it would be safe from most damage that didn't

outright kill the ship.
* ends an episode screaming at the hatching of a friendly alien's egg. Later, the growing child's screams are used as a weapon against the real villains.
* ends chapter one with Adrien remarking that Marinette doesn't seem like "the sneaking-around type". Chapter two opens with this:
* ends happily for everyone is possibly the most pointless concealment of a spoiler in the history of TV Tropes.
* ends just this way, with the reveal that the treasure chest is full of edible treats, (possibly chocolate coins, although the old black and white makes it hard to tell) but the Addams family, being the odd family they are, are quite content with their find anyway.
* ends Kenshin career as a swordsman at the end of the series. As Kenshin's fragile build can't fully withstand the pressures of his sword style which Megumi notes over time he won't be able to do anything major like he did in the past. Though Kenshin's fine with this as he wishes to settle down with Karou anyway.
* end slavery in Illastein. It quickly becomes messy, but he's smart enough — and has learned enough from Earth's history — to win the PR angle and minimise the alarm caused in all the neighbouring countries. His knowledge of guerrilla tactics doesn't hurt, either.
* ends this way, with Paul and Michelle separated, but holding out some hope that he will keep his promise to return to her again in three years when he's finished with college.
* Endstone — lots. Starting with the way Kyri's estranged husband tried to destroy the world.
* Endstone numerous: to when Jon tried to destroy the world, how he and Kyri met, facing down Drakyl — etc.
* Endstone, the Banestone. The most powerful overstone, and it drives its rockers mad.
* Endstone, the power of the Endstone. Also, characters who are not stoners can nullify the over-stones by taking them.
* Endstone who is actually a maiden temporary transformed in a dragon form.
* Endstone with a punch because he used her against her own mother and caused her to be alone in the world.
* ends up dead by the same machine-gun fire as one of them hits him while he shields Jesse. Jesse ends up surviving the series.
* ends up having one for breaking Chihiro's heart. Though such fact is still up to debate as his final words from that FLAG has been subject to various interpretations.
* ends up in Hell, Black Mage initially thinks he's dreamed the entire (mis)adventure to date:
* ends up making incoherent rants, slaughtering all of his servants and getting locked inside an asylum for the rest of his days
* ends with a resounding victory for him where he could have easily killed her had he wanted to.
* ends with Naruto squaring off against Kurama to determine who will be in control of Kurama's power and Naruto's body.
* ends with Numbuh One on the other side of this, trying to guide Lizzie into successfully landing a plane that's coming in hot.
* ends with Obi-Wan, Anakin, Ahsoka, and the 501st Legion and the 212th Attack Battalion disobeying the Jedi Council's orders and heading off to Mandalore to capture Darth Maul.
* ends with the both of them falling into a care package that Ty Lee was planning to send to her family. When some Fire Nation soldiers come across the crate, they assume that Ty Lee had already finished packing and promptly shipped the crate off.
* ends with the Mansion's library in ruins and Patchouli stuck in Jersey City until it can be rebuilt.
* ends with the restored townsfolk chasing down Starlight Glimmer and retrieving the Mane 6's cutie marks as the group has still been drained by her spell and can't even keep up the chase.

* ends with Xander finally being able to maintain a physical body 24/7 after months of existing only as an entity in Faith's mind. But the Mayor's Ascension is still coming up and life on the Hellmouth is always interesting.
* E.N.D., the master of the dark guild Tartaros, is sealed inside the book Zeref created him from, so his guild aims to break him out.
* end them. In one, she incinerates an alien fish disguised as a vampire. In another (which was all a dream), when Rory is hurt by a bunch of aliens disguised as old people, it creates the surreal image of Amy (at the end of a very large pregnancy) mowing down a group of elderly citizens in a van.
* End Times, Constantly. Trace, Harry, and Charlie are all seeped in pop-culture knowledge and talk in references, sometimes for humor and other times very much not so.
* End Times is all about this. The player characters find they can project their minds ten years into future and learn of an upcoming apocalypse. They switch back and forth between the present and future to prevent it (whatever it may be). Problem is that these apocalypses actively work to thwart them, even sending back powerful, in-human Hunters. Player characters may also have to deal with the remnants of other apocalypses defeated by past generations of time travelers.
* End Times is one of these. Lampshaded by Harry when Trace first starts recording the videos, and a few times afterward.
* End Times, this is offered twice to Settra the Imperishable. The first time was shortly after he's defeated at the hands of Nagash when the First Necromancer offered Settra a place at his side and command over his old kingdom, and the second time was when the Chaos Gods restored him in exchange for his service in destroying the world. Both times Settra ends up spitting in their faces, and he only allies with Nagash so he can have the pleasure of killing the necromancer himself.
* Endtown: Appears to have managed the remarkable feat of jumping straight from Stage 3 to some variation on Stage 6.
* Endtown. As in, they're literally nothing but a north arrow and "here be dragons".
* Endtown Beans go in it, and come out looking like roast turkeys that taste like "creosote flavored cow flop" according to Albert.
* Endtown, but a person who starts reading now would be most likely confused.
* Endtown handheld disintegration rays are commonplace, and D-bombs were one of the most common weapons of the apocalypse resulting in the surface being a vast wasteland. D-rays can also be dialed back to stun instead of kill.
* Endtown reappear, they don't mention him. He is also one of the examples in which he had no minions or a dragon — he operated completely by himself.
* Endtown, releases monthly messages to those of his fans who support him on Patreon. His December 2016 Patreon letter reeks of this trope, being largely a loud and strenuous defence of his recent storytelling decisions after apparently getting some amount of negative feedback.
* Endtown, the mental stress can cause the mutant's mind to snap and become a danger to himself and others.
* Endtown. Then the characters spend several months just getting back home and getting clearance. This isn't going onto the "Milk and Eggs" arc or the flashback arc...
* Endtown, the serial-killing Butcher, pretends to be one of their own victims so they can blame their accomplice. Bonus points for claiming that Portia was the heroine who stopped the killer, because they knew that they dealt fatal wounds. Unfortunately for her, Portia managed to survive long enough to point out the real traitor.
* Endtown: The titular city is the Apocalypse Bunker version crossed over with Inhuman Borough because most of the inhabitants are mutated humans.
* Endtown). This is after spending the previous several years drawing large amounts of shipping art of Holly and her partner Wally before suddenly stopping around the time he had to go on a hiatus from the comic due to a bout of serious illness that threatened him with the loss of his legs. Notably, Holly had never previously lashed out at anyone close to her during her periods of infirmity (instead tending

to flee and once attempting suicide), only doing so once plot circumstances meant it would handily push Wally away from her and into the arms of Kirbee, who had been made part of the main cast during the same rewrite that added the event that shattered Holly's remaining sanity.
* Endtown, two waitresses do various stunts with insincere apologies in order to torment their new co-worker.
* end up in each other's bodies they have a lot of difficulty with each other's powers. Both of their powers are controled by emotions but in different ways. Raven has to suppress her emotions to keep them from going out of control, which causes a problem when the very emotional Starfire is in her body, and Starfire needs to feel strong emotions in order to activate her powers, and so Raven has to let out the emotions she normally suppresses to use them.
* Endurance adheres to this asthetic particularly on the outside, though her interiors are also well-lit and decorated in mostly lighter colours.
* Endurance Duel: A showdown to see who can last the longest doing dangerous activities.
* Endurance Duel: Face it! You're too fatigue to compete against me in who can withstand the most pain!
* Endurance includes a spinning ring of modules where the astronauts spend most of their time.
* Endurance of the Death Guard: Flagship of Mortarion, Primarch of the XIV Legion. Took part in the major battles of the Heresy, corrupted by the Plague God during its warp-transit to Terra, becoming a living ship.
* Endurance races such as 24 Heures du Mans, the 24 Hours of Le Mans, which is
* endure heat for Belkar, causing him to turn bright red for a few strips (whether this was due to sunburn or heat exhaustion is unclear).
* endure several hits from Saitama himself. Of course, he is still no match for Saitama...
* enduringly insane", they get stuck in the London Underground, making them even more ridiculous.
* EndWar against each other in a three-way conventional war; they simply don't nuke each other into oblivion due to a nuclear missile defence shield covering the territories of all combatants.
* EndWar, and the JSF are middle of the road with a focus on precision.
* EndWar by Israel, who manage to remain neutral throughout the war with no lasting repercussions.
* EndWar has Russian forces disguising themselves as "The Forgotten Army", who "are" a band of soldiers from various nations misused by the US and Europe.
* EndWar, part of the win conditions for defeating a superpower is taking their capital city in a three part battle. These capitals are Washington, DC for the United States, Paris for the European Federation, and Moscow for Russia.
* EndWar Schwarzkopf is like a suped-up M1 Abrams featuring things like like depleted uranium armour and a RAVEN 20mm autocannon; the Panther 1A3 is a sleek, high-tech tank described as a "who's who" of Europe's premier auto and tech companies, it runs off a clean hydrogen fuel powerblock and can be upgraded with an experimental high-power microwave emitter; and the T-100 Ogre which is frankly a steel monster, armed with a massive 152mm smoothbore cannon, a co-axial flamethrower and even a pair of autocannons for anti-air work.
* EndWar's" franchise is a scenario of what might happen if humanity created a system of lasers that made nuclear weapons obsolete, the E.U. and Russia emerged as superpowers equal to the United States, and we all had a great big war. Oh, and there's peak oil too as a reason, which is how Russia managed to regain power in the world.
* EndWar, since it's the American capital, Washington DC can be invaded.
* EndWar the JSF (America)'s WMD is a Kinetic Strike from the Freedom Star space station. Basically a large metal rod fired from space. The trailer shows 3 rods being fired at Paris to defeat the Russian forces overwhelming an American battle group.
* EndWar. Units under fire while at half health are described as being suppressed

by your XO and their info tab, but it really means nothing more than being at half health (on the other hand, any unit at half health probably has little chance against what they're fighting anyway)
* EndWar, which are used to defend control points and mobile command vehicles, bonus points in that the Russian 'drones' are actually just infantry soldiers, who still get to be called drones.. In addition, all three playable factions can deploy air drones, which are used to scout out areas from above, as well as harass enemies with light weaponry.
* EndWar who was leery of being the world's largest supplier of oil once several other nations have hit Hubbert's Peak, and wanted the US to declare war on Europe so they could "aid their allies" in making Europe go away before the United States and Europe would turn Russia into Iraq II for their oil. As false flag operations go, this one is subverted; the plan goes off without a hitch... until the United States wigs right out when Russia starts making gains in the conflict and declares war on them, too.
* Endworld series carries a pair of Bowie knives that he loves obsessively on his person at all times.
* Endworld series has the SEAL, an amphibious armoured van (made of nearly indestructible plastic) that carries twin .50 caliber machine guns, a rocket launcher, a FLAMETHROWER, and stinger missiles.
* Endymion a trap made of monomolecular wire gets noticed when one of the heroes realizes he doesn't have an arm any more.
* Endymion when Raul considers stealing a thopter from a fishing platform. He quickly dismisses the idea because he has no idea how to fly it. Raul notes that in the holodramas he has seen, the hero was capable of flying anything they could steal. Raul, on the other hand, had evidently "missed Hero Basic Training."
* end your own existence, but why not try to see how long you last just in case that doesn't happen? Lots of interesting hypotheses have been made for escaping the universal heat-death, as well, although how well those would work in practice is anybody's guess. There're countless of billions of years to test them, so there's hardly any hurry. Also, given that some people can eat certain foods or consume certain media over and over again without getting bored or fed up, our future knowledge and technology might even curb boredom/ennui so that truly nothing interferes with your immortal enjoyment.
* "End your potato famine here!". It's been stated to be a major rival to Big Belly Burgers.
* Ene also acts as one to Shintaro, constantly urging him to go outside. She just so happens to also be a complete
* Enel can move as quickly as lightning, but doesn't use it too often in his battle with Luffy (though he is too overconfident despite Luffy being immune to electricity).
* Enel Luffy is completely immune to electricity so Enel's blasts are redundant.
* Enema of the State, has a hidden message in the fold. It says, in somewhat hard to spot white text, "Viking Wizard Eyes, Wizard Full of Lies."
* Enemies and Allies, Lex Luthor's Russian allies have a large kryptonite-bearing meteorite implied to be the Tunguska rock. The radiation has horribly deformed the trees and wildlife around the area, and does the same to humans.
* Enemies: Anklyosaur, Cryotron, Death Commando, The Green Knight, The Juggernaut, Lady Blue, Ladybug, Mechassassin, and Professor Muerte.
* Enemies are usually monsters like werewolves, wyverns, dragons, ghosts, living snowmen, golems, zombies, skeletons, ghouls, killer birds, killer insects, killer crabs, killer robots, murder dolls, demon boars, demons, homunculi, giants, possessed samurai armor, sphinxes,
* Enemies", Buffy and Angel emerge from a theatre with rumpled clothing after watching an erotic French film.
* Enemies can also occasionally drop lives and the game seems to show mercy by MASSIVELY increasing the chance of this happening if you're low on them and have been dying a lot. Notably it might throw you a bone and let 2-3 enemies in a row drop them if you're on your last.

* Enemies? Dante gets impaled with his own sword in every installment. This somehow fazed him only the first time it happened. Must have been the novelty.
* Enemies deliberately miss their first few shots at the player, alerting you to their presence so you aren't instantly killed. Their first shot is
* Enemies do it too, of course. A non-battle example: after Younger Toguro finishes his
* Enemies Equals Greatness: Opposition or mistreatment from others is what gets a character highly motivated to do great things.
* Enemies Equals Greatness: People hating your guts proves you're better than them.
* Enemies Equals Greatness seems to hold that the only reason why people have enemies is because of their choice to follow God. Joseph was hated by his brothers for being favored by Israel, David was resented by King Saul for being the only one to defeat Goliath, and there's Jesus who had set an example to humanity, much to the disgust of the Pharisees.
* Enemies Equals Greatness: What defines us as the only righteous people is the antagonism from the many lowly pathetic people who know we're better than them and can't stand it.
* Enemies Equals Greatness: When being hated means you are better than them.
* "Enemies Foreign" starts with the team busting an identity thief. One of the identities she stole leads them to a pair of
* Enemies in Reason (he's even called a "Wandering Jew" by one character).
* enemies is an open question, since on the one hand giving your enemies an honorable burial is a, well, really honorable thing to do. On the other hand.. they obviously just didn't want to have to talk about named characters dying that early in the season. Also, you can briefly see the characters through the windows in their coffins so I don't see how they were planning to fool anybody.
* Enemies of the Guardians, such as Larfleeze, Atrocitus, and the older Manhunters, also have ages in the billions.
* Enemies such as the Duma Faithful have zero points of Luck, representing their lack of Mila's blessings in favor of Duma's power.
* enemies. The scene is then revealed to be a dream he experienced while testing a psychic-power enhancement device.
* Enemies who only roll a few dice are vulnerable to all sorts of status effects: Shock can shut down their offence, Freeze can limit the amount of damage they can do, and so on. Fireman is particularly weak to Freeze, for example, over and above his taking double damage from ice; all his attacks require even numbers, so every die turned into a 1 by Freeze is a die he doesn't have much use for. Enough freeze can even wreck the day of high-level enemies like the Rat King, whose endlessly recycling dice become a lot less deadly when it takes all his dice to even start the chain, leaving him one bad roll away from failing, or the Kraken, who has only one attack that doesn't require an even result.
* Enemies will also sometimes leave behind droppings when they are defeated, and the heroes can actually search through it to find treasure.
* Enemies will never deal more than 90% of your maximum health + whatever your shield is if you have one. This means you can't die in one shot by a single powerful attack you didn't see coming, and you're invincible for a tenth of a second after you get hit. However, this benefit is lost if your maximum health is reduced, usually
* Enemies you defeat bare handed are always treated injured but alive. Even if the finishing move used against them clearly snapped their spine.
* Enemil has Shit-Five (Mierdahinco), a living poop that represents a Spanish television channel infamous for plagiarizing other movies and series in his creations.
* Enemy 585 in a platformer than finished before the real game started (which was to rescue Enemy 585 after he was trapped in the boss' castle after the "game").
* Enemy Ace #1, Von Hammer is confronted by a shell-shocked pilot wielding a pistol who blames him for the deaths of the other men in his squad. Unarmed, Von Hammer just stands there staring at him, unmoving. His gaze is so intense that the pilot's aim wavers and then he breaks: the pistol going going off and missing Von Hammer

and shattering the goggles he is holding in his hand.
* Enemy Ace: A group of unidentified pilots trying to down a zeppelin. Hans manages to shoot down two of them, but one does a kamikaze run into the blimp.
* Enemy Ace flying. Von-Hammer tells him to take the night off, and gives him a wine bottle he salvaged from a downed B-17 bomber and says: "Now go and get drunk Ubben. That's an order."
* Enemy Ace Hans von Hammer is often portrayed as a Worthy Opponent. He is obviously inspired by the real-life Red Baron, mentioned below.
* Enemy Ace of an Me-262 fighter jet, while "testing" the firing mechanism that he thought wasn't loaded.
* Enemy Ace. When he discovers the truth about the death camps, he immediately leads his men in surrendering to the Allies, although he does destroy the prototype jets first.
* Enemy Ace (WWII) version. However, when he discovered the Nazi death camps of the Final Solution in the final days of the war, that was the last straw for him and he led a mutiny with his unit.
* Enemy at the Door, and less a sign of the Germans' superiority than a reflection of the fact that the islands were entirely defenseless; the British High Command had decided that trying to fight the Germans off would cause a lot of collateral damage to no worthwhile effect, and had withdrawn their entire military presence from the islands a few weeks before the Germans showed up.
* Enemy at the Door episode "After the Ball", John Weston is an overprotective dad to his only daughter. He doesn't threaten Marie's dates, because he hasn't even got to the stage where he lets her have any; he supervises her social life very closely and has never let her had any kind of unchaperoned contact with the opposite sex. (She's not a legal adult yet, but she is old enough to reasonably find his attitude unfairly restrictive.) When she takes an opportunity to slip away and have a good time on her own initiative, it goes badly, at least partly because her sheltered upbringing has left her unprepared for what might go wrong.
* Enemy at the Door episode "Escape", a farmer is arrested by the German authorities after being caught trying to hide the body of a German soldier (who had repeatedly stolen things from the farm, leading to a violent confrontation). Another character, who is about to make a break for England, offers to leave behind a letter confessing to the murder since he's determined to make it or die trying so either way the Germans won't be able to do anything to him. At the end of the episode, the German commander receives the letter and immediately recognizes it for what it is, but seems to be considering accepting it at face value so the situation may be smoothed over; the episode ends without revealing his decision.
* Enemy at the Door episode "Judgement of Solomon", two sixteen-year-old boys are caught with a camera in a restricted zone, and developing the film shows that they've been taking photos of German military installations. Not wishing to apply the mandatory death sentence for espionage to a pair of children, Major Richter orders the officer investigating the matter to destroy the prints and negatives and proceed as if the boys had been found trespassing with no evidence of their intentions.
* Enemy at the Door episode "No Quarter Given", two inhabitants of German-occupied Guernsey (a businessman who has had his house and business confiscated by the Germans and a fisherman who's struggling to man his boat after his offsider was jailed for publicly questioning Hitler's sanity) are drowning their sorrows with a sympathetic German NCO (who is in the sights of the SS, who regard him as being too sympathetic to the locals). The businessman asks the fisherman if he's ever considered making a break for England, and the fisherman replies that he has done so, frequently, but he's not allowed to take the boat out without a German soldier on board. Their gazes turn to the German, who looks from one to the other, then remarks that he wouldn't say no to a day's fishing.
* Enemy at the Door episode "V for Victory," Kluge attempts to gain the confidence of a young suspect this way, recruiting SS officer Reinicke to be the Bad Cop. It doesn't go according to plan.
* Enemy at the Door episode "War Game", the format for the chess championship final

match is for two games (with players alternating colours), with provision for a third tie-breaking game if one is required. Naturally, it is.
* Enemy at the Door is set during the German occupation of the Channel Islands in World War II, but the series is more about exploring the dramatic possibilities of the situation than re-enacting history. All the characters who appear on-screen are fictional, including those prominent enough to have appeared in the historical record; for instance, the major in charge of the occupying forces, though he shares some similarities with his real-life counterpart, is basically an invented character with an invented name. The plots are likewise invented. Some of the scenes in the first episode depicting the arrival of the Germans are based on actual events, but even those take full advantage of dramatic license.
* Enemy at the Door, set during World War II, most of the recurring German characters are in the Wehrmacht (regular military), but Reinicke is an officer of the Waffen-SS (which had a separate command structure and its own ranks). Early episodes aren't consistent about recognising that the SS had different ranks from the regular army, with Reinicke frequently addressed or referred to with the army rank of "Hauptmann" instead of the SS rank of "Hauptsturmführer".
* Enemy at the Door, set in German-occupied Guernsey during World War II, the episode "The Prussian Officer" revolves around an establishment of French prostitutes imported to the island for the use of the German soldiers.
* Enemy at the Door, set in German-occupied territory during World War II. The locals tend to assume so, leading to German characters sometimes having to explain (with varying degrees of annoyance) that it's not the case. The SS officer Reinicke is, as would be expected, but the episode "Call of the Dead" establishes explicitly that the other major recurring German characters (Oberst Richter, the garrison commander; Major Freidel, the governor; and Oberleutnant Kluge, the head of the Feldpolizei) aren't.
* Enemy at the Door, set in German-occupied territory during World War II, this is a recurring hazard not only for the German characters (as in the episode "After the Ball", which features the court-martial of a German soldier accused of sexually assaulting a local) but also for any civilian who transgresses against the German military rule (as in the episode "The Librarian", in which the title character is brought before the German military court after clashing with German soldiers tasked with searching the library and confiscating any books banned by the German authorities).
* Enemy at the Door, with the Germans fresh from rolling over France. In "Steel Hand From the Sea", Reinicke expresses confidence that they will be in London before the summer's end.
* Enemy at the Gates also focuses on the Soviet side of the battle of Stalingrad (it's even titled "Stalingrad" in some countries).
* Enemy at the Gates) and several neutral countries (Switzerland, Spain, Turkey) as well. Although one possibility is that they're simply showing the german spread of influence, whether by military conquest or by converting nations into sympathetic allies.
* Enemy at the Gates enough) Nikita Khrushchev. All of them are Brits. None of them used fake-Russian accents in that movie, however. Some of the American actors affected British accents as well. Led to some oddity when the Germans were primarily American actors, using American accents.
* Enemy at the Gates Germans dress a captured Soviet soldier as a German signaller and send him to the battlefield to sink a cable. Unfortunately enemy signallers are priority targets for snipers and the poor sob gets shot by his comrades. The German sniper uses the kill to pinpoint the location of the Soviets.
* Enemy at the Gates has a political officer hiding in a fountain with Vasily Zaitsev and about to shoot at a Nazi command team in an area the Nazis believe to be clear. As his spectacles are broken, he then turns to ask Zaitsev if he is able to shoot. Zaitsev modestly admits that he can, takes the rifle... and takes aim directly at the Nazi commander as he is about to have a shower.
* Enemy at the Gates of Visily, an ace sniper that became a propaganda hero, and his duel against his German counterpart (who was not real).

* Enemy at the Gates party because they're happy they're alive for another day and may be dead tomorrow. Veterans of the actual battle criticized this scene, saying that they instead spent their downtime sleeping or eating.
* Enemy at the Gates tells one of the characters, "He isn't dead. Do you know how I know that? Because I haven't killed him yet." It should be mentioned that the line is rendered extra-creepy by the fact that it's Ed frickin' Harris.
* Enemy at the Gates, the Germans capture a Russian soldier and force him to wear a German uniform and run telephone wire right in front of where they know a Russian sniper is taking people out.
* Enemy at the Gates uses a mirror shard to reflect sunlight right into the German's scope, making him flinch just long enough for Vasili to take a snap-shot at him and get away.
* Enemy at the Gates where he dispatches five Germans with five shots purposefully timed to coincide with artillery explosions.
* Enemy at the Gates who learned shooting hunting with his grandfather as a child.
* Enemy Boss Leader comes back in the middle of the story, also with no explanation.
* Enemy Chatter: "...and he says 'Aren't you a little old to be believing in leprechauns?' Then I threw him out the window! Hah! I love that one."
* Enemy Chatter has a soldier comment how hot the zombie girls are if you put a bag on their head. Another soldier openly questions how he got past the psych eval.
* Enemy Chatter. The captains do go and enact battles against other captains, but orcs do it all the time anyway. They won't reveal their true allegiance unless Talion is openly engaged in the fight.
* Enemy Civil War' influence, the Korath decide to wipe out any non-Drengin from the galaxy (they actually succeed in wiping out two races). However, since the Drengin economy hinges on slaves, they can't have the Korath be doing that.
* Enemy Civil War. Secondly, good and bad reputations give you stat bonuses on missions. For example: If you're unsubtle and threatening while Albatross is your handler, you get a health bonus. But if you're stealthy and manipulative instead, you'll get a stealth bonus.
* Enemy Coast Ahead is a memoir by WW2 bomber pilot Guy Gibson. The last day of peace finds him in a boat with his girlfriend Ann. "Windy, my all-swimming and all-flying cat, who had put in more flying hours than most cats, lay purring in her lap." Since most cats have zero flying hours, having more than most cannot have taken Windy very long.
* Enemy Eats Your Lunch: Eating an enemy's lunch in front of them to assert dominance.
* Enemy forces commonly possessed of magic, including the mercenaries of the
* Enemy gang members will do this too. Unfortunately, they tend to grab random civilians rather than members of your gang, meaning there's little emotion and more "Man, having to waste random bullets". One boss fight does use
* Enemy generals always say something just before Destiny of an Emperor's nonrandom battles, and about half of them are trash talk.
* Enemy Lines, and on the verge of execution. In order to prove her worth to them (and spare her life long enough to escape), she pretends to have found a conspiracy against the Warmaster: the "shapers" (their equivalent of scientists and doctors) are deliberately causing one of his artificial limbs to be rejected. As it turns out, the conspiracy not only exists, but is found and rooted out relatively quickly—more quickly, it also turns out, than Shesh would have liked.
* Enemy Lines duology, the New Republic forces make use of a Mock Guffin to lure the Yuuzhan Vong into a trap, by creating a quartet of flyable, but otherwise nonfunctional ships, and faking a test firing so that they appear to be a new superweapon.
* Enemy Mime: A villain or threat who happens to be a mime or exhibit mime-like qualities.
* Enemy Mime: The fact that they don't talk at all just makes them all the scarier.
* Enemy Mind where the player controls a mysterious entity that has to proceed through the level by possessing the pilots of enemy ships and turning them against

their allies. In-between waves, the player can hear radio chatter of the other pilots freaking out over this weird...thing that keeps turning their allies against them.
* Enemy Mine against Attuma, but Doom being Doom steals the machine Attuma had been using in preparation for one of his plots. The Avengers pursue and fight him, but the Vision chooses to sneak in and destroy the machine rather than risk it being used by anyone. Doom immediately realises what has happened and curses the Vision, but then simply flies away rather than continue a pointless battle. The Avengers briefly debate continuing the pursuit, but also decide that continued conflict is pointless.
* Enemy Mine, a human and a Drac pilot who are on opposites sides of a space war learn to set aside their racial and political differences to survive on a hostile planet. They start out trying to kill each other but become good friends.
* Enemy Mine, all Drac are both male and female, and reproduce by self-fertilization. (As the novelette put it, "Don't tell a Drac to boff himself, 'cause it just might!")
* Enemy Mine and spanning a continent between them, which are actually working together to maintain the power of their respective puppetmasters.
* Enemy Mine arrangements. As a powerful Demon with teleportation magic, he even makes these unannounced visits in their car — while they're driving on the freeway.
* Enemy Mine begins with a closeup of a dead pilot amidst the wreckage of his fighter during the battle.
* Enemy Mine, but Sam is enraged and horrified and kills her as she relishes the moment of succeeding in her deep-cover mission and boasts of her unmatched loyalty to Lucifer.
* Enemy Mine collaboration, warns the Babylon 5 staff about this so they can thwart it.
* Enemy Mine ensued, but it's heavily implied that Asgard was winning and the Avalonians are still carrying a grudge.
* Enemy Mine, fueled in large part by her growing affection for Castiel. She, not the Winchesters, cares for and protects Castiel after his nervous breakdown, and she saves the Winchesters more than once.
* Enemy Mine he got there with don't win. He says it the best when the Maximals have the chance to return to Cybertron and he opts not to go with them:
* Enemy Mine: He shares a common enemy with the heroes, in some cases a rival faction of his own race.
* Enemy Mine is a Messianic Archetype and dies halfway through the movie. Fortunately, he gets better.
* Enemy Mine" It helped that the line was functionally identical to a famous quote from a great Drac teacher Shigan follows.
* Enemy Mine, Jeriba has Davidge tied up; Davidge is ravenous and yells at the alien to give him some food. Jeriba comes over with a large grub impaled on a stick. After hesitating for a moment in disgust, Davidge leans forward and bites the thing in half, still showing disgust while he's chewing. Later in the film, after the two of them have become friends, Davidge offers Jeriba a bite of roasted grub; Jeriba shivers in disgust and Davidge counters, "Don't forget, you helped me acquire the taste."
* Enemy Mine over-the-top evil, and shouts almost every line through a huge mouthful of scenery.
* Enemy Mine situation against both Garlic Jr. and later against Raditz.
* Enemy Mine situation and Xavier's vision of the future shows they get a fairly happy ending. It's moments like "no good deed" that cement Lance's status as an Anti Villain.
* Enemy Mine: Sometimes you have to work with your usual enemies to stop an even greater threat. Can be an idealism trope depending on the handling.
* Enemy Mine, so while Davidge pretends to storm off, he's having to bite back a laugh - and Jerry later apologizes for the blasphemy.
* Enemy Mine, stopping just long enough for the bored technicians on duty to check

the deceased's religion and play the appropriate prerecorded last rites.
* Enemy Mine: The hero and the villain reluctantly join forces to defeat a mutual enemy.
* Enemy Mine: The villain realizes they need to cooperate with their enemy to achieve a common goal. That doesn't mean they have to be nice about it.
* Enemy Mine: Two enemies team up to achieve a common goal, which can lead to a genuine friendship (whether it sticks is another matter).
* Enemy Mine: Two forces normally at odds join forces against a greater enemy. (Note: Can be an Cynicism trope depending on the context.)
* Enemy Mine, where the alien race, despite being Reptilian Space Muslims, aren't fighting for religion. They're just defending themselves against Human incursion into their space.
* Enemy Mine, where those that object to it based on religious grounds are paired with those that object to it on economic grounds. The former see it as an affront to God by interfering with His design, while the latter see it as causing the gap between wealthy and poor to become even wider, as those that have augments will get preferential treatment because they're physically more capable.
* Enemy Mine with al-Qaeda and later ISIS. As of 2020, some Ba’athist militant groups continue to hold out, although they are heavily diminished and no longer a threat to the Iraqi federal government.
* Enemy Mine with Nazi Germany and Imperial Japan that never really did get broad support).
* Enemy Mine with the supervillains they locked away in Prison 42 against Annihilus, several supervillains perish in the fight, these being Iron Man villain Blizzard, Thor villain Radioactive Man, and Ant-Man villain Whirlwind.
* Enemy Mine with Valmont in one episode. Jade sneaks along as usual, and Valmont comments that he now understands why Jade is always there when he and Jackie fight, saying that previously he had always assumed Jackie was just an incredibly irresponsible caregiver.
* Enemy of My Enemy fanfic, has Shipmaster Vtan, alone with a jammed weapon, hearing the enemy charging at his position and absently remarking, "Disconcerting."
* Enemy of My Enemy has Sarah Jennings - a young, human girl - form a strong bond of friendship with two Seperatist Hunters whom she dubs 'Jib' and 'Jubb'.
* Enemy of My Enemy. One scene describes an unfortunate messenger's skull fragments spread across the area around Torikus after a particularly bad development for the Brutes.
* Enemy Of The Daleks - and having to relive the horror of her childhood enslavement all over again - causes her to completely break down. Ace finds her collapsed in the kitchen, borderline catatonic and whimpering a lullaby.
* Enemy of the State and Gene Hackman still have time to duke it out mano-a-mano while the pursuers are stuck behind the train.
* Enemy of the State: At the end of the film, Robert and Carla are watching a TV news interview with Congressman Albert and this trope is discussed both on the TV and then by them.
* Enemy of the State: Daniel runs through a the kitchen of a club to escape the pursuing federal agents.
* Enemy of the State earlier) in one scene, on one that follows shortly afterwards it takes many men to maintain constant line of sight of a conversation that the villains want to overhear, and later on a satellite just happens to apparently always be orbiting over Philadelphia and is able to perfectly play back the travel of a single vehicle from someplace in the suburbs to an industrial park a great many miles away, information that is as easy to recall as giving the computer the coordinates and time from which the vehicle started to move.
* Enemy of the State. Eventually he does... to the enjoyment of an Asian lady.
* Enemy of the State, Reynolds' goons thrash Dean's house, both because they're looking for the hidden file (which isn't in the house at the time) and so they can place bugs in both the house and Dean's clothes without anyone questioning any inconsistencies. They also steal his blender, just because.
* Enemy of the State: Robert Dean's struggle against the NSA begins when he

encounters a friend while purchasing a Christmas gift for his wife.
* Enemy of the State, the tape gets passed surreptitiously to attorney Robert Dean. Dean becomes target of a massive manhunt by the NSA.
* Enemy on Board: Lucius, a crew member, only wears a shoulder plate and a bandolier. No shirt.
* Enemy on Board: Monkus, one of the crewmembers you can play as is a monkey in a spacesuit.
* Enemy: One popular interpretation of the film is that it takes place mostly in Adam's head, with Anthony being a symptom of his delusions.
* Enemy prosecutor/detective; aggressive, has a defining characteristic (e.g. famous guitarist Klavier, coffee addict with visor Godot, German sadist with a whip Von Karma, etc. etc.)
* Enemy Quest, a fast-food chain called "Tesla's" is mentioned. They carry an item called "Bugzapper burgers", but apparently only sell them on the anniversary of the day when the truce with the Visitors was signed.
* Enemy Quest bruisers with a cultural focus on competitiveness. During the Visitor's war with humanity, Warriors were noted for putting on brass armor, charging through hails of bullets, and killing with their bare hands.
* Enemy Quest. However, a Visitor would never be mistaken for a human.
* Enemy Quest: Most of the alien Visitors share a basic humanoid shape with some differences. The Skut don't count because they look like short dog/rodent/lizard hybrid creatures with six eyes.
* Enemy Rising Behind: Some one (or some thing) hostile is coming into view from behind and below.
* Enemy's Enemy, where the main character's mission involves killing the spy Stig Sandström who had escaped from prison and fled to Moscow, which is what the real-life spy Stig Bergling had done two years earlier. The big difference is that the character also had killed his wife, while Bergling's wife had fled the country with him. After Bergling turned himself in to the authorities in 1994, he called Guillou from prison and said that he probably deserved a signed copy of the book, which Guillou agreed to, and sent him a book where he wrote that "this is the strangest dedication I've ever written."
* enemy's moat and discovering something fascinating to move the plot along when the heroes could have avoided the place entirely.
* enemy spies who express remorse over their actions and don't seem to have any choice but to carry out their mission.
* Enemy Territory: Quake Wars: Engineers can create anti-vehicular defensive turrets (missile launchers that other classes can designate targets for). They will *only* attack vehicles, allowing enemy soldiers to destroy it if undefended.
* Enemy Territory: Quake Wars: Engineers can place an anti-personnel defensive turret (a machine gun). It will only attack soldiers, though-which means that it's possible to attack it freely with a vehicle if it's undefended.
* Enemy Territory: Quake Wars It revives you with half health, recharges almost instantaneously, and requires no timing. Some people will shock you to down you and immediately revive you if you're noticeably below half health.
* Enemy Territory: Quake Wars, Strogg players will hear the countdown announcer use the phrase "Ten Earth seconds remaining!"
* Enemy: The fiend imposes a penalty to its victim. Usually, they do this if the victim resists control attempts.
* Enemy to All Living Things: A villain whose powers/aura hurt everything that breathes.
* Enemy to All Living Things: I have the power to kill every living thing in my presence, and don't think I won't take advantage of it!
* Enemy to All Living Things: Someone who animals are scared of, or who causes living things to die.
* Enemy Unknown more mobile, easily infect civilians where you can't reach them, and zombies are often even tougher than Chryssalids.
* Enemy Within even states "Security Status RED" before fighting off an attacker.
* Enemy Within expansion adds giant MEC armor, which turns its users into walking

tanks with built in flamethrowers, power fists and grenade launchers; on the downside, it can only be used by special cyborg troopers who must have all four limbs amputated before they can use the armor.
* Enemy Within, failing "XCOM Base Defense" will result in an instant Game Over.
* Enemy Within. On a lesser note, it also has good utility value even if you don't use the KSM: simply having it on the MEC increases mobility by 3 tiles in regular movement, or 6 tiles when dashing, just like the Support's Sprinter skill.
* Enemy Within: Tal sent two of his people to get Erika's daughter at the park. Video of her and knowing she was there in their custody gets Erika to give up the information he wants.
* Enemy Within: This was how Tal got Erika working for him. His minions picked up her daughter and he then threatened her life. She's returned unharmed after she gives him the names of her operatives, but he clearly shows it could happen.
* Enemy Within to, much like the Astartes mentioned above, extensively modify your soldiers' bodies. You can give them chameleon skin, two hearts, regenerative bone marrow, leg muscles to allow them to jump like fleas, aim-correcting eyeballs; the list goes on and on...
* Enemy Within tournaments don't allow people to die, though they still feel pain during the fight, so Sheik uses this to her advantage. She can inflict as much damage as she likes wih no fatalities, and it's all allowed in the tournament.
* Enemy Within who uses his powers a lot more efficiently and can even fly.
* Enemy Without, tenuously called "Evil Korra", moves like this exclusively. It's something no other bender in the entire series has been able to do.
* energetic are knitted by her. She even has one with a light-bulb on it that lights up when pressed, so it can light the way (as seen in "Into The Bunker").
* Energized Protodermis was capable of stabilizing it, making it safe to use.
* Energize had remained unfinished for years but was finally completed in 2013.
* Energizer batteries, a goofy-looking clumsy rabbit that trips over his own ears, and the Energizer Bunny himself. The animator doesn't like any of the three rabbits, and while the first two get erased by a mechanical eraser, the Energizer Bunny doesn't, as the Supervolt battery in the mechanical eraser runs out of power at that point.
* Energizer batteries attempting to destroy the Energizer Bunny by setting him on fire with her broom. She ends up setting off a sprinkler system that melts her.
* Energizer batteries by marching across the skyscraper. As the Bunny does this, he falls off the skyscraper, but lands on a steel girder being lifted by a crane, much to the bewilderment of the two workers.
* Energizer batteries. If the scientist told the truth about whether or not Energizer outlasted Duracell in digital cameras, the Bunny would be safe, and if not, the Bunny would take a dive.
* Energizer batteries, the Bunny escapes from the Bermuda Triangle after having spent three days in it.
* Energizer batteries to destroy the Energizer Bunny. At the end of the first part, Blofeld has a miniature one hidden in his cane, which he uses to zap a picture of the Bunny with. In the second part, Blofeld has a giant one in his mountain lair, set to zap the Bunny when he passes by. Unfortunately for Blofeld, the short life of the Supervolt batteries powering the ray put a stop to that plan.
* Energizer Bunny commercials. A battery powered toy rabbit, initially created for a straight commercial, wanders off the set, due to the unstoppable powers of the Energizer battery. The rabbit wanders through other advertisements, interrupting them as the Energizer voice-over guy announces "It keeps going, and going, and going..."
* Energizer Bunny commercials used a similar trick, with the bunny interrupting a commercial for another (fictional) product.
* Energizer Bunny for the Energizer brand of batteries for over 20 years, was originally a parody of an ad campaign by rival Duracell, in which a small and cute bunny with a small drum powered by their battery would last longer than one powered by their chief rival — which in the commercial was Everlast to not name Energizer (owned by Eveready at the time) by name. (Energizer's ad was that its

bunny, like its battery, was too large and impressive for Duracell's ad.) In part due to its effectiveness as a campaign and in part due to Duracell not keeping up with the trademarks, the original bunny is all but forgotten in North America (although still active in other continents). Duracell claimed that 40% of the audience thought they were still Duracell ads, but never really tried to back that up.
* Energizer Bunny. In this commercial, after having outlasted the other tortoises, the Duracell-powered tortoise passes by a pink rabbit sleeping under a tree, implying that by this point, Duracell did compare its batteries to those of its alkaline rivals.
* Energizer Bunny: it causes hair to sprout not just on his head, but also on his back when the excess spills and even on the concrete pool surface when the Bunny knocks the bottle over.
* Energizer Bunny of sorts, eliminating the need for proper eyes to be seen.
* Energizer Bunny. The Bunny's drumming caused The Clapper to turn the lights on and off in a flickering way.
* Energizer commercial only aired a few times before being pulled after the Oklahoma City bombing.
* Energon, and goes kaboom quite nicely when manhandled. In its natural state, though, it is unstable and gives off radiation that's hurtful to Transformers in large concentrations (though confusingly organic material is generally immune to it).
* Energon) was intended to be a third series in the same continuity, but (in Japan, at least) it was made its own series relatively late in development, leading to mass inconsistencies with the existing story and characters in its US adaptation, where it was kept as the third series in the so-called "Unicron Trilogy".
* Energon with highways, while Speed Planet, as far as depicted onscreen, is all desert.)
* Energy Absorption if the user can absorb and fire back any amount of energy they wish.
* Energy attacks are pretty common for anyone skilled in shinsu control in
* Energy Ball which must be physically thrown at enemies, or cut an object in two by making a slashing motion in its direction.
* Energy Being episode "Kremzeek", a duplicate that hid out in Blaster jumps out and hops away, leaving the Autobots to chase it all over again.
* Energy Being, even though the creation of biological life was a side-effect, and it doesn't care about us.
* Energy Being, he is able to project himself into robotic bodies, and create cloned bodies based on Superman's DNA, into which he then integrates any technology he captures.
* Energy Being of the other speedsters (in fact, when he became Zoom, he was in constant pain in large part because the air friction was burning his skin from moving so fast), he's still capable of other strange abilities.
* Energy Beings: Angels, gods, and goddesses are sometimes depicted this way to avoid religious connotations.
* Energy Beings from orbit for fear that their antenna may allow Starfleet to penetrate their cloak.
* Energy Beings, given that they had no physical form and little power to influence the world until their followers gave them bodies.
* Energy Beings manner), etc.; probably even the Q, since they seem to think humans are on the path to becoming like them.
* Energy Beings: The afterlife is occasionally presented as this to avoid any religious connotations.
* Energy Beings) want to communicate with a character, they usually present themselves as various characters from the series walking around in various familiar environments.
* Energy Beings who require host bodies to survive. They forge a deal with humanity allowing them to reanimate and take possession of the bodies of the recently deceased. Although Dr. Michael Alders, the Director of the Department of Alien

Studies, becomes concerned that they may have an ulterior motive, it turns out that the N'Tal have been completely honest and straightforward in their dealings with Earth.
* Energy Bow that allows the user to shoot light arrows into portals. One use of it is to shoot an arrow to multiple close targets at once, even those behind walls. Another is to shoot a "delayed portal arrow" so that you can summon a portal that shoots the arrow at a later time, either to surprise your opponent or to extend your combos. Its strongest attack is to trap a target inside a big portal sphere, then the user shoots multiple arrows that come from multiple angles.
* Energy Breaker finally received a translation patch in September 2012.
* Energy Breaker, pumpkin-headed monsters known as bogeymen show up as enemies. They're pink humanoids with grass clothes. The pumpkin head itself is brown, yet when they attack these enemies let out a cry that summons a kabocha to fall on their target.
* Energy Breaker, scarecrows show up as enemies. They're made of white cloth and well-stuffed. Their method of attack is to jump and bodyslam into their target.
* Energy Breaker, the party gives one of these to the final boss just before fighting him. These do tend to occur just before final boss battles.
* energy drained from alien prisoners just to fight him at all. After all that, the suit is relatively fragile, and Supergirl is able to strip it off him without trouble when she can actually fight him.
* Energy drinks. Like are Venom: Death Adder, which claims to be "the cold-blooded venom of the Death Adder, delivered in a fruit punch strike," and the Monster coffee energy drinks, which are "coffee done the Monster way, straight up, with a take no prisoners attitude and the experience and know-how to back it up."
* "energy for the whole morning"... when combined with fruit, dairy and a drink.
* Energy is released from matter as it falls into a black hole from the accretion disc. This can be captured and turned into useful forms.
* Energy/Magic or a dumping ground for a setting's magical effects which can't be tied into any standard element.
* energy or strategic resources from celestial bodies, while Research Stations make use of science-boosting features. These stations are presumably manned, but don't require any management beyond constructing them.
* energy rifle more powerful than a Peacekeeper Pulse Rifle. It actually is ancient- it's been passed down through generations of D'argo's ancestors.
* energy shielded prow and a pair of heavy infantry scale weapons mounted on top, while their Falcon grav-tank fits into the IFV role, being able to carry smaller squads than the Wave Serpent but having superior weaponry for suppressing enemy armor and infantry.
* Energy shots are derived from Japanese "tonics", which were small amounts of extremely potent liquid that would do different things. When Energy Drinks became popular, it was a no-brainer to combine "This drink that does something to you" and "This extremely potent drink that does something to you in small doses". Whose bright idea was it to cram all the crap of an energy drink into a 2 oz. package?
* Energy shots, that concentrate in a small package (around 3-4 oz, 100-120ml) the caffeine of
* Energy Transfer allows the caster to pay life points to give their own special attack energy to an ally (who is, presumably, better at fighting than the Lunar Mage, and could put that energy to better use). Heal
* energy type associated with it. Fire had fire damage (duh), water had cold, air had lightning, and earth had acid. Then, there was poor, lonely sonic damage...
* energy (vector product). Thus while the unit of both are newtonmetre in SI system, the unit of energy has its own name, joule (J): 1 J = 1 Nm. The unit of torque is newtonmetre, but cross-product (N x m). When you lift a weight of one newton up one metre, it is energy of one joule; when you pivot a lever, length of one metre, by force of one newton, it is torque of one newtonmetre).
* Energy weapon beams actually did travel instantaneously once, but once the special effects budget increased,
* Energy Weapon — Laser weapons always add a bit more punch to a shootout.

* Energy Weapon Mk. III is the only one that resembles the name. Also, the Mk. II is more powerful than the Mk. III. The game is close to the ultimate example of this trope given you play a loser who becomes an assassin simply because he won a beam katana on the Internet. The game especially reinforces how great katanas are given the diversity and craziness of your opponents' weapons.
* energy weaponry by attacking the competition (i.e. the Gun Runners), who only sells traditional guns in the Mojave Wasteland because of that.
* Energy weapons trope. It doesn't matter how powerful your laser is (and how many gazillions of kilometers it can go) if you have a 99.99% chance of missing anyway.
* energy when the morph ball is activated. The Space Pirates that attempted to replicate the technology didn't catch the "to energy" part, and so attempted to get their test subjects to crunch into little balls. Which, as mentioned above, didn't work. Samus's supposed other superhuman abilities have not been seen in canon.
* Energy-X game; presumably more would have been revealed had a third game been made.
* Enerjak. Demigod powers at his minimum, he constantly underestimates his opponents, becomes extremely frustrated with those on his level that he can't simply steamroll over, (causing him to make careless mistakes), and doesn't know how to strategize. Not helping is the fact that prior to gaining his power, Dimitri was a scientist echidna, not a warrior, so he has no experience in actual fighting. Knuckles, who is a trained fighter, lands several good hits on him, and even points out to him. "All that power and I'm still surprised at what a glass jaw you have!" and; "You may be stronger, but do you even know how to fight?"
* Eneru/Enel from the Skypiea Arc could fit this as well. No regard for others, carelessly strikes down anyone with a dissenting opinion, an
* Eneru gets this twice in his fight. First when Luffy manages to actually hurt him since near virtually no one could thanks to his electrical powers (rubber doesn't conduct it though) and again in the final strikes when he finds he can't counter Luffy's attack despite having the power to predict it.
* E!! Network (formerly CH, after flagship station CHCH Hamilton) Secondary network to Global, formed from the leftovers of Canwest's acquisition of Western International Communications (WIC) in 2000; the group owned affiliates of several networks, but the majority of its Western stations switched to Global, and the rest became part of CH.
* En Familia con Chabelo) is a Mexican game/variety show starring Xavier Lopez "Chabelo" that ran almost every Sunday since 1968. After 47 years, the show ended its run on December 20, 2015.
* Enfante Terrible Darla Dimple's two voice actors (speaking and singing) were both in their early teens at the time of the movie's release.
* Enfante Terrible episode "Provenance". Twice — her birth family and her adoptive one.
* Enfante Terrible: Out-of-control children who consistently resist all attempts at parental direction, habitually run away and/or are truant, and are involved in wantonly self-destructive, violent, or criminal behavior can be subject to a child in need of supervision (CHINS) petition (nomenclature may differ depending on the locale), which gets family services involved and typically starts with family counseling and community-based care. Incorrigibility petitions exist in some jurisdictions, and those are for more severe cases — if a child is successfully declared incorrigible, they pose a clear, present, and immediate danger to themselves or others, or are so disruptive that they create an unsafe environment for others.
* Enfante Terrible than Louise is her rival/stalker Millie Frock, who wore a pink bunny costume for Halloween while trapping several other kids in a fort in "Fort Night".
* Enfant Terrible: Adults are so easy to manipulate! I can do whatever I want to whoever I want, nobody will ever suspect a cute little kid like me!!!
* Enfant Terrible has sequences set on a number of different holidays; in order, they're a birthday, Halloween, an anniversary, Thanksgiving, Christmas, New Year's Eve, Valentine's Day and Easter, which the climax occurs on.

* Enfant Terrible villains seen in the show avert this trope, as it's eventually revealed how they came to be villains in the first place.
* Enfant Terrible who often pulls Butters into dangerous or humiliating situations. It helps that Butters seems to have some affection for Cartman and is often far too trusting towards him.
* En-fêtes, producing mild effects on the speech bubbles spoken by the characters (one will have reversed text, another will have hairy speech bubbles...).
* Enforced Also, the Book weapons in the game only have magical attacks.
* Enforced, and the Great Curse ensures they will be passionate enough to destroy in pursuit of their goals.
* Enforced, as the promoter was already a successful businessman who decided to fly in talent from beyond the state of Nuevo Leon and beyond the Mexican boarder not long after deciding that wasn't enough.
* Enforced by technology, so he explains that his return is only temporary and true resurrection is the domain of the "Almighty Spirit".
* enforced by the game, as subjobbing will often lead you to leveling classes that you hadn't quite anticipated to in order to play the main class at its full power. Having multiple jobs at max level only compounds this.
* Enforced did not threaten to pull out if they didn't change it back, but he did strongly suggest they do so.
* enforced for Taiwan: officially, the Republic of China not only claims the whole territory of the People's Republic of China, but also Mongolia, parts of Burma and Tajikstan, and anywhere else even nominally part of the Empire when it fell apart (not much different from PRC today). This is because although even the hardliners have no intention of reconquering all of this territory, actually changing their definition of the Republic in any way would be an official acknowledgement of "two Chinas", and thus would be perceived as a provocative move by the People's Republic.
* Enforced give adequate warning before they launch any attack against the Freehold. Some Keepers try to twist the warnings and make them too cryptic to decipher, but most make a virtue of necessity and go for the grand spectacle in hopes of intimidating the Changelings.
* Enforced, has a background check done, sees through the alias in seconds, but goes with it anyway in order to see what Thor does.
* Enforced in a 70's-era TV movie about a minister who was assigned to a new church. When he got there he discovered that due to budget shortfalls, the building was only partly done. He decided to give his first sermon in the unfinished framework of the church, hoping to encourage the congregation to donate. Unfortunately, it rained that Sunday. Some game souls sat in the pews in raincoats and umbrellas, and other watched from their cars, so the pastor decided to stand at the pulpit, in the rain, and give his sermon. But the rain washed the ink off his notes, so he crumbled it up and said:
* Enforced in areas controlled by United Mankind. Their longstanding rivalry with the Abh has made any form of transhumanism anaethema to them and descendandts of those who might have received treatments before their homeworld came under United Mankind control are heavily discriminated against.
* Enforced in China by the government's one-child policy, to keep the already humongous population from completely exploding. It's been estimated that without this policy, there would be 400 million more Chinese people. However, ethnic minorities were exempted, and people who lost their child were allowed to have another. People also widely got around it by abandoning children (most are girls) or killing them. Now the government has scrapped the policy, fearing it went too far with a lopsided sex ratio.
* enforced in his nature how dangerous they consider Sheogorath's whims to be.
* Enforced in "I Second That Emotion." When Leela is offered up as a "virgin" sacrifice by the sewer mutants, the mutant leader orders a minion to chain her to a post, then tear her shirt a little.
* Enforced in most galaxies. So if you want your ship to have any staying power,

you can't really use those technologies, which requires a fallback to physical weaponry whose principles are universal across civilizations.
* Enforced in Starlight Glimmer's town in the season five premiere of
* Enforced in the case of the Putnams' daughter, since the Putnam girl who was an accuser in the Salem Witch Trials was named Ann, a name she shared with her mother (officially, they were Ann Putnam Jr. and Ann Putnam Sr.). The play changes the daughter's name to Ruth to prevent audiences from confusing the two.
* Enforced in the case of Tohsaka Tokiomi, who upon siring two talented daughters, made Rin his heir and gave Sakura to be the heir to the heir-less Matou house. The only problem is the Matou family treated Sakura horribly.
* Enforced in "To The Rescue Part II," when Chip angrily sends Dale home after the latter badly screwed up and ruined an attempt to recover the Clutchcoin Ruby. Dale does so, only to return later to save Chip's life.
* Enforced in-universe. Due to a three day limit being placed on initial trials, each individual case in the series takes place over a maximum of four days, including the initial investigation. In fact, only the latter two cases of the first game (three if you count Rise From the Ashes) actually take the full three days, so in most cases, that's three days.
* Enforced Inversion enough to hold onto her no matter what ugly form she took.
* enforced later on with Arthur, your AI companion, who copied himself into a blank biochip in your suit. Out of fear of what would happen if two of the same person met, he auto-recalls you from the time period if you try to reach his original self again.
* Enforced Method Acting: Getting the best acting by not telling actors about upcoming scenes or lines
* Enforced Method Acting the first take for the vast majority of scenes.
* Enforced Method Acting to coax realistic prisoner behavior out of him. It doesn't work, as Spike knows Angel too well and thus knows he's faking it.
* Enforced Method Acting: Using external conditions to force a genuine reaction from the actor.
* Enforced Method Acting: Using techniques and conditions to force a genuine reaction from the actor.
* Enforced Method Acting: Using techniques to force a genuine reaction from the actor.
* enforced of a martial art involves more than just learning the school's existing techniques and philosophy, but to fully understand and even expand on them. A 10th Dan (or the equivalent; some martial arts only have 5 Dan ranks) denotes the level of mastery that would be impossible without a lifetime of training, and thus many martial arts only confer it either with an age requirement or a requirement for number of years in the previous rank.
* Enforced Plugs are common on bigger TV events. Between matches, commentators will sloppily segue into a plug for the upcoming Pay-Per-View event, a sponsor’s product, the latest movie starring one of the wrestlers, the WWE Network, whatever. Commentators on independent shows will often employ even sloppier plugs for their upcoming live shows. Like many sports broadcasts, recap or highlight segments will have a sponsor.
* Enforced plugs are endemic on sports telecasts. Pretty much every segment or statistic now has its own sponsor (
* Enforced prepared to nuke an inhabited planet... before cooling down enough to have second thoughts and coming to Jack to ask for another option.
* Enforced's spike. Jacobs would blame himself for the instance and proceed to campaign against the American healthcare system in his Age Of The Fall.
* Enforced states that the Falcon's trip from Hoth to Bespin took several months because of the aforementioned issues, giving Luke enough time to get a crash course in Jedi training and arrive on Bespin at roughly the same time as them.
* Enforced Technology Levels: Only certain kinds of technology, or a certain level of technology, is allowed. By law, manmade or natural.
* Enforced Technology Levels: Rules exist limiting what kind of tech people can have.

* enforced. The Ecclesiarchy and the Adeptus Terra work to actively suppress knowledge of Chaos and the other forces in the galaxy that pose the most serious threats to the Imperium from the general populace, on the grounds that if everyone beyond the Imperium's armies really knew how badly everything in the galaxy was out to get them, the resulting panic and despair would tear the Imperium asunder.
* Enforced, the whole ordeal ends with one hostage getting executed with another getting killed during the ensuing S.A.S raid. All but one terrorist were also killed in the aftermath.
* enforced, they've all taken to giving themselves nicknames to differentiate from one another. Twilights being Twilights, they get their bureaucracy to give them short-form designations instead. (It probably makes filling out forms more convenient.)
* Enforced throughout the rest of the game, though, as killing a civilian in any other level will give you a
* enforced to compete with local talent and give more legitimacy to it's then new international image.
* enforced to expand their vocabulary. Usually dies out in high school/secondary school as students' lexicons expand to more appropriate words and usually less accessibility to dictionaries/thesauruses due to more rotating classes and thus not always being in English/Language Arts classrooms (where these books would probably be found and necessary more than in other classrooms).
* enforced, to learn compassion, but to gain it suddenly (such as by psychic projection), is such a shock that it is instantly fatal to the Brood in question.
* Enforced to subvert the "innocent" part of their cohabitation, but Gray won't let her, starting by the fact that they sleep in separate beds, much to her dismay.
* enforced. Tough, really. To get rid of those so-called agendas, you've got to get rid of me." (The heartbreakingly beautiful rendition of the hymn "The Old Rugged Cross" in "Gridlock" notwithstanding, apparently.)
* Enforced Trope and grow even stronger), Luffy, Boss, and Cross and his partners realize why the beasts are following them: the animals have been driving them into the paths of the alpha beasts (which they inevitably beat), the ones who had consumed enough toxin to stand strong alone until now, and as such have invited the other animals to feed on their corpses and grow even stronger in a very short amount of time. And since these animals have been trained to believe that eating the strong will make them stronger, they've already set their eyes on their final targets, those that have established themselves as the strongest on the archipelago. Guess who that is?
* Enforced Trope: apparently, after the first series of the show aired, one (or both) of them were approached by a Latino gangster who asked them why they didn't make any jokes about Latino gangsters. Key and Peele obliged, so in the second season, we got the "Chairs are for pussies" sketch.
* Enforced Trope are, unless from a confirmed Ph.D, the subject of ridicule.
* Enforced Trope games with CGA graphics, since the commonly-used Palette 1's only colors besides white and black were cyan and magenta. (Palette 0 was less commonly used since its four colors did not include white. CGA could be made to display 16 simultaneous colors by adapting one of its graphics modes for composite video output, which some monitors didn't support, or by hacking a semi-graphic character-based mode to increase the number of character rows, but relatively few games did either.)
* Enforced Trope. Gun season for deer is often only a week or two (with half that time dedicated to black powder arms), while bow season is open for the entire winter.
* Enforced Trope in Ancient Rome: Enslaving a Roman citizen was generally illegal, so there were fraudsters that pretended to be slaves and sold themselves to other people, only to run away with the money. The legal punishment for such people was to lose their citizenship and become a slave.
* Enforced Trope in Europe; since university sports are considered a purely amateur affair that brings in negligible revenue for the institution, there's no incentive to give a brilliant athlete any leeway where academic performance is concerned like

certain less reputable US colleges have been accused of.
* Enforced Trope in France, where laws punish those without visible means to gain their livelihood but who are consorting with persons involved into drug trafficking, prostitution or terrorism.
* Enforced Trope in particular is in full effect, with some ads being borderline pornographic.
* Enforced Trope. Of course, this causes problems for mundane tasks like getting dressed, going to the bathroom or opening doors.
* Enforced Trope one of their matches because Vince thought their punches were "too good."
* Enforced Trope, putting out a rollicking crowd-pleaser to attract people to their more serious work.
* Enforced Trope's "small army" each appear to be only four foot tall, due to a misreading of "minute men."
* Enforced Trope was in charge. He required that any story involving aliens must show them to be inferior to humans to reflect his personal belief that white men were superior to other races.
* enforced uniformity. It had the exact opposite effect to what it was intended to do, made even worse by blatant selective enforcement, and the relaxed attitude to dress codes is a legacy of the backlash against that period in history.
* enforced", uses and abuses that ability on the protagonists to make them do all of her dirty work for her.
* enforced ways (letting them faint in battle and spamming them with bitter Herbal medicines) to reduce it.
* Enforced were frequently cast as women—which made sense in an age where few women took up acting or singing in operas, which was seen as unladylike somehow. When female opera singing became more socially acceptable and stealing the manhoods of little boys was not, the practice gradually disappeared, and was finally banned in its primary center (Italy) in 1861 (shortly after unification).
* Enforced When a soldier gathers enough experience, he is upgraded to the next level and this is indicated by the soldier waving his weapon in the air happily, while wearing his new uniform. Since this usually happens in the middle of a battle, any damage to this unit is disabled until the transformation is complete.
* Enforced whenever uniforms are mandated to be worn, or if there is a sufficiently stringent dress code that prohibits a large enough section of garments to the point where fashion choices are extremely limited.
* Enforced when you do as much as graze a civilian with a stray bullet.
* Enforced, which has long refused to air matches where blood is spilled without editing the blood out first. This did not stop Mexico City mayor, Lic. Ernesto Uruchurtu, from banning televised professional wrestling matches during his term. Luckily for CMLL, magazines were the primary lucha libre media anyway and they were much less averse to blood, though getting back on TV lead to a business boom for them.
* Enforcement DiscretionThis trope is averted in many states for police officers, where any case brought by a county-prosecutor is required to go before a grand jury. Grand juries determine whether the prosecution has enough evidence (probable cause) of a case for a criminal indictment. It may be hard to secure a criminal indictment on police because many police departments have statutes authorizing "reasonable use of force" by their officers in order to cause an arrest or if the officer believes the person a danger to society. This is backed by ruling of the Supreme Court (Tennessee v. Garner 1985) which has deemed that police can use lethal force if they have a "reasonable belief" they are facing danger to their life.
* Enforcement of this trope is the reason that in Islamic Law a Caliph has to be in possession of all his senses. A blind man could rule, but he couldn't go to war.
* Enforcer demonstrate this well, lacking armor in some areas but being powerful infighters.
* enforcer). When Ron became a multi-millionaire, Shego considers switching sides.
* enforce this upon the game. If you switch on the "Historical Rulers" option, your

nation will have the same monarch names as in real life and the same relative military, diplomatic and administrative capabilities. Of course, given that a lot of nations in an average game will exist outside of when they did historically (or nations may exist that were never formed in reality) you can easily end up stuck with the same inept King for hundreds of years. With this option switched off, rulers will be generated randomly
* enforcing (fanfics must resemble an official installment as closely as possible).
* En forelskelse with the dad. Subverted in that the boy is the one who makes the first move.
* Engadlin, the region directly between warring Arcas and Luxia, has had this done to it so many times that the regional character trait is swift capitulation and a disturbingly relaxed attitude regarding cannibalism due to enduring a hundred years of famine. Even when it's the
* engaged to a female cub named either "Timira" or "Kirijah". Despite this, there's never been any source on this info and no one involved on the project seems to remember her. The closest source listed is a "Dan T. Guyton" but no one by that name worked on the film.
* Engaged to the Unidentified Since Kobeni is the only person in their house that can cook, Mashiro immediately apologizes to her.
* Engaged to the Unidentified, where on her sixteenth birthday Kobeni suddenly finds out that apparently her long-departed grandfather set her up with the grandson of one of his old friends from the countryside... And said surprise fiancé suddenly moves into her family's house in the city, with his bratty younger sister in tow as a "chaperone".
* Engage has the highest enemy count in the game with 35, as well as a constant neverending barrage of high-speed missiles heading straight for you. Not only that, but almost all of the enemy formations are very far away, leaving more room for a missile to block your shots and requiring more precise aim, and every enemy aircraft that you let escape will fire another missile on top of everything else. It is very likely that you will either run out of fuel trying to gun down all 35 enemies or get your aircraft destroyed by 5 of the 50+ enemy missiles that will bombard you throughout the mission.
* engage in behaviors that violate the boundaries of caste to be manufactured imperfectly, using technological augmentation to make up for things like reduced height and missing powers.
* Engagement Challenge: A set of rules, tests or tasks that one must meet in order to prove worthy of a spouse as their prize.
* Engagement Challenge, she is quite glad: "Let all of his complexion choose me so."
* Engagement Challenge), that the sons of Feanor, the creator of the silmarils, swore a terrible oath to not let anyoneelse, but them possess. Beren and Luthien in the end succeeded, but soon after Beren was killed by Carcharoth, the largest werewolf to ever live. Stricken by grief, Luthien died after him, and her soul went to Mandos, the vala of souls and fates, and she sang him such a beatiful song, it moved his heart, offering her two choices: be reincarnated by herself, and live-on as an elf forever in Valinor, the land of the gods, or be reborn, along with Beren as mortals, and live a short life together in Middle-Earth, and upon dying her soul would leave the world, and go where the souls of men do. She chose the latter. The subversion comes from the implication, that not only was their love destined, it was destined to succeed, since nothing in the world, not even the different afterlives meant for humans and elves, could keep them apart. Furthermore, they should't have been able to meet in the first place: the Girdle of Melian, a protective enchanment, was supposed to keep everyone out of Thingol's kigdom, that he did not allow to enter, and Melian even prophesied that someone sent by a higher power than herself would get around it.
* Engagement Challenge", the chief of Naharin makes suitors for his daughter climb a tall cliff to her window.
* engagement, to protect Harry from a proposed law that would require half-bloods to accept any marriage proposal from a pure-blood. The intent is that they won't

actually marry, but it will insulate Harry from any proposals until she's at least of age.
* engages in a similar behavior at the end of Blood Rites. By way of explanation, it's not pure sexual slavery, it's complete mental control, achieved through the use of their supernatural mojo.
* Engaging Conversation: Suddenly proposing to someone almost immediately after meeting them.
* engaging in oral sex with each other is that the oral sex is meant to be seen as a sign of the strength of their bond as sisters. A sporker of the series honestly couldn't tell if it was a joke or not when the girls declared themselves to be dating.
* Engaging in this practice on an Internet forum (or wiki) is derisively called "white knighting". Doing it is particularly laughable due to most net denizens being aware of
* En Garde! will be sentenced to serve in a frontier regiment as punishment for their crimes, or as a condition for having a death sentence commuted.
* Engelke's parodies of politician Regine Hildebrandt were also prominent for a while. There is a rumor that Hildebrandt once entered a cab and the driver was completely surprised that she was actually real.
* Engel killed off every adult in the world. And it happened more than once. No wonder that centuries from now Earth has managed to rebuild itself into a feudal level society.
* Engel when the wings can at most be folded to occupy 3 metres, as is simply lying down.
* engie and piono introduced each other to their split personalities.
* Engie-Tan to be a devotee of the Adeptus Mechanicus. And turns out to be surprised and a touch annoyed when no one else has any idea what a 'machine spirit' is.
* engine cars inside their engine cars, since it's as good a place to put them as any.
* engine, commonly splashed into other decks, that is the real Tier Zero.
* Engineer Corps and Signal Corps are treated as Technical Arms in the Finnish Army, and they tend to overlap (and co-operate)
* Engineered Heroics, with hardly any disguise. Both the King and his guards are completely fooled. Though it can be justified, since the guards quickly flee the scene and the King is scared senseless.
* Engineered Public Confession, but even after this, once the Elrics leave the city, Envy uses his shapeshifting powers to impersonate Cornello, successfully regaining enough followers to plunge the city into civil war, a perfect pretext for Amestrian military intervention.
* Engineered Public Confession by tricking him into publicly revealing his true colors.
* Engineered Public Confession, Fowler gets the case thrown out by revealing that Goody was still wearing the prototype uniform that he was modeling when he found the planted evidence.
* Engineered Public Confession gambit before preparing to unleash her Negative Hollows on the group... only to find that they're ignoring her in favor of salvaging what's left of the welcome meal that Hogback and Cindry had prepared for them.
* Engineered Public Confession gets exposed by the heroes when they trick him into publicly admitting that he's really a rotten scumbag playing everyone for saps.
* Engineered Public Confession gets exposed when the heroes trick him into openly confessing that he's really a rotten scumbag manipulating everyone.
* Engineered Public Confession, ironically right after chastising Gabbo for the faux pas.
* Engineered Public Confession: You succeed in getting someone to broadcast the truth in their own despite.
* engineered to be the "Party Posse" boy band debuts on the stage of the Springfield Elementary auditorium. The following follows:

* Engineering Solution 1: Hit it with a hammer. Solution 2: Hit it with a bigger hammer.
* Engineering teleporters. 4/5 times they will teleport you to a preset location, but that other 1/5 times...anything can happen, your character turns into the last person who went through, split into a "good" and "evil" side, turned into various small critters, end up anywhere else on the continent, and the most infamous one, simply teleport a mere 100 yards away from the teleport pad, or 100 yards straight up.
* Engineer Roger Boisjoly found evidence that an essential component of the Space Shuttle's rocket booster was rendered unreliable by cold temperatures
* Engineers) and blends into their skin. Buttons seems to be some kind of fatty nodule, and their architecture has plenty of rib-like ornamentation. The Aliens themselves grew out of their weapons program.
* Engineers at 3M were not initially happy to discover their efforts at making an improved adhesive were weak enough to be pulled away by hand. Then one of them, tired of having the bookmarks in his church hymnal fall out, added some of the weak adhesive to it. And that's why we have Post-It Notes.
* Engineers can also build a Gnomish Poultryfier, which will temporarily turn the target into a chicken, making it unable to attack. It has a chance to malfunction and turn the user into a chicken or turn the target into a giant chicken, increasing it's attack power.
* Engineers can get the Transporter Malfunction debuff "YOU ARE ON FIRE!!!"
* Engineers can make a Gnomish Battle Chicken. It usually hits for pitiful amounts of damage but occasionally enrages. It may also buff its owner with extra attack power. A non-combat version is also available from a series of quests
* Engineers can take over enemy buildings if given the time, while Spies and Ninja can shut down individual buildings (or, if they infiltrate a Nanocore Mainframe, simultaneously murder your entire fleet of Giga Fortresses).
* Engineers have an Orbital Strike power for use during ground missions that deals a lot of damage in a very localized area. A targeting grid appears on the ground, then a couple seconds later a
* Engineers, one of the main characters — Ziani Vaatzes — escapes prison after being sentenced to death. While escaping, he kills a guard with a lamp, dismembers another and decapitates a third. He then commits theft, arson, identity theft, and breaking and entering while escaping. The original crime he was sentenced to execution for? Creating a machine that contained components up to 1/8 inches off of the commercial standard — for personal use.
* Engine manufacturer S&S Cycle had to come up with their own designations for the Harley-Davidson clone motors they manufacture, e.g. "
* engine on a planet when all fuel sources were poisoned to keep the Transformers' battle away from them. The bad news is that both give up some autonomy.
* Engine Sentai Go-onger. A chainsaw monster goes on a sawing rampage, filling the air in a building with sawdust. A spark is all it takes for the whole building to go up.
* Engine Sentai Go-onger. A later episode involves a high school with a drama club that's rehearsing a scene straight out of Korean drama, complete with an impression of Korean drama idol Bae Yong-Jun.
* Engine Sentai Go-onger, an ancient counterpart of the villains known as the Horonderthals caused the dinosaurs to destroy themselves.
* Engine Sentai Go-onger are mechanical lifeforms from a parallel universe. Likewise, their enemies, the Barbaric Machine Clan Gaiark also fit this trope, as they are a race of robotic humanoids without a real origin.
* Engine Sentai Go-onger are this, most evident in Yogostein. They often praise their Monsters of the Week for doing well, even if they still didn't beat the good guys.
* Engine Sentai Go-onger can maintain their large forms in our universe for 10 minutes before rusting.
* Engine Sentai Go-onger: Engine Kishamoth / Paleozord. The main portion of the final mecha combination introduced, armed with freezing mist like ZyuMammoth.

* Engine Sentai Go-onger fits this pretty well, to the extent that other characters on the show have actually dubbed him the mom of the group.
* Engine Sentai Go-onger. Fortunately, once JumboWhale shows up, he's much friendlier and manages to talk them around.
* Engine Sentai Go-onger, Hant's got a different part-time job every time his work situation comes up.
* Engine Sentai Go-onger has the villains reviving the monster who destroyed the dinosaurs.
* Engine Sentai Go-onger: Hiramechimedes has his body destroyed, but returns in the next episode as a ghost. His ghost is then exorcised, which finally destroys him for good.
* Engine Sentai Go-onger Hiroto and Miu Suto being much more serious than the rest of the team. That being said, Hiroto has a very comical fear of ghosts and whenever Miu learns about whatever the main team is up to, her response is generally along the lines to "This is the dumbest idea I've ever heard, let me join you guys."
* Engine Sentai Go-onger (in her 40s and married with a daughter.) He is 16.
* Engine Sentai Go-onger Miu. Would also apply to the popular fan-pairing of Saki with Miu's brother Hiroto.
* Engine Sentai Go-onger showed that Sosuke and Miu had feelings for each other, but ultimately nothing comes of it and they return to their respective lives.
* Engine Sentai Go-onger's unusualness, such as the mecha designs, and poking fun at some of the franchise's tropes altogether.
* Engine Sentai Go-onger themselves all take turns narrating episodes, relating them like a story in the life of their Go-Onger partners
* Engine Sentai Go-onger. Villain Hiramechimedes has three lightbulbs on his head that light up in quick succession whenever he gets an idea.
* "ENGINES MUST OBEY CONTROL! ENGINES MUST OBEY CONTROL! DO WHAT YOU'RE TOLD!", only to be rebuffed by all the trains and carriages with a "SHUT IT!" in unison.
* Engines of Creation, is the story of a small Canadian town that finds itself trapped knee-deep in political turmoil and medieval magick when it is suddenly and mysteriously transported into the mystical Pactlands.
* Engines of Creation, Terra Murphy, a small-town Canadian girl and marijuana enthusiast suffers from the occasional debilitating vision-induced seizure.
* Engines of Creation: Terra Murphy is given the abilities of a Green Seer immediately after her arrival in the Pactlands through birthright.
* Enginesof Creation, the character of Boomer is quite adept at Parkour.
* Engines of Creation, the characters of Sergeant Boone and Lily Rasmussen are exceptionally adept at throwing numerous swear words into their dialogue.
* Engines of Creation, the various forms of magi utilize control over various elements.
* Engines of War, the Doctor describes a TARDIS graveyard as a home for old friends and points out to Cinder you can't run away with one without its permission.
* England’s Goodwood Festival of Speed has recreated the cars from
* England and China do this, mourning and sobbing spectacularly about their younger brothers America and Japan, both who had rebelled and separated from them. In the second case, China's mourning is
* England and Japan because of this. The strip featuring this event is even titled "The Anglo-Japanese Alliance Between Two Lonely People".
* England and Russia, which isn't what you'd expect from two of the main characters. In-universe, England's got a long-running
* England cricketer Ian Botham is well-known among fans of the sport for his rollercoaster professional career (the high point of which was leading England to snatch victory from the jaws of defeat at Headingley in the 1981 Ashes against Australia) and colourful personal life, but his football/soccer career is not as well-known - he made 17 appearances (and scored one goal) for Yeovil Town FC and 11 appearances for Scunthorpe United FC between 1978 and 1985, at the same time as his heroics on the cricket pitch.
* England, England focuses on the creation of a literal Theme Park Version of well, England, on the Isle of Wight.

* England goes to give America a chocolate bar that he had heard America wanted but sees that he already has an entire bucket full of chocolate.
* England has a city called Newcastle and a town also called Newcastle - more precisely speaking, the city is Newcastle-upon-Tyne, while the town is Newcastle-under-Lyme. "Newcastle" on its own is generally taken to be the city, unless perhaps you're near the market town.
* England himself has delved into some odd fantasies. Black Magic, Imaginary Friends and even characters from familiar books that often make some countries grow concerned about him (particularly America). Outside the series, it's actually quite true that the Real England did have some odd characters, for example, King Cholera, and some fans actually think England and Belarus seem suitable together (an underrated ship, however).
* England leaves the young America and tells him to grow taller and stronger. When they see each other again... oh, my. America is quite taller than England.
* England made a first tentative step to this when it came to their monarchy back with Queen Mary I (daughter of Henry VIII and older sister of Elizabeth I). It should be noted, however, that Mary only became Queen because her younger brother Edward (who had already reigned as King Edward VI) died with no issue and she was next in line for the throne. However, for the next 500 years (or so) England and its successor state, Great Britain, practiced male-preference primogeniture: i.e. a woman would inherit only if she had no brothers. That rule changed in March 2015, when the
* England runs afoul this trope in the Can't Escape from Italy strips. His Italian disguise is eventually perfected with the help of a spy, right down to taping a curl to the side of his head, but Germany sniffs him out when England stands posturing instead of hitting on the attractive women who pass by.
* England's Interregnum – the period between the execution of Charles I and the restoration of the monarchy under Charles II – lasted only 11½ years, from 1649 to 1660. However, the events during that time had a profound impact on English culture – it showed the English people would no longer take kindly to absolute rule, and was the first of many times Parliament would prove its superiority over the King. The excesses of
* England vs. Germany hosts. Except the steering car has been turned upside down, but only for the Australian team.
* English actors Amelia Bullmore and Ben Miller as Scottish relatives living in the Highlands in
* English actors Jim Sturgess and William Houston as IRA members, both very convincing. Englishwoman Natalie Press is also decent enough as the love interest Lara.
* English as a Second Language (ESL) teachers of adult learners are often split on the topic of just how clean your speech needs to be in class. On the one hand, teachers should be professional and this includes appropriate language. On the other, part of teaching your students about usage includes vulgarity (so they at least know just how bad
* "English as a Second Language", when Chang's replacement threatens to fail the Study group for walking out of their Spanish final to rescue Annie from Chang, Jeff and Britta respond in perfect Spanish, only for Pierce to do this ("Land of fire!").
* English As She Is Spoke began life as a mid-19th-century Portuguese-to-French phrasebook. It was translated—almost certainly without the author’s knowledge or consent—into English by a Portuguese writer who knew neither French nor English, working from an antiquated dictionary. The result is a comic classic.
* English author Zadie Smith avoided the ghetto with her first novel,
* English Billiards. Of course English Billiards can be exciting: this was the game played in Billiards rooms in a thousand murder mysteries and in Clue/Cluedo.
* "English Channel" by singer/songwriter Mark Spiro is written from the perspective of a man pining away for his loved one, who was forced to leave him behind in Continental Europe in order to live and work in London; he notes that

he's desperate enough to swim the English Channel just to see her again.
* English Civil War, but even he was unable to stop his officers' and men's tendency to go off in mad pursuit after a successful charge. Because his opposite number Oliver Cromwell, a newcomer to the military, averted the Cavalry Officer trope and always maintained strict discipline, the Parliamentarian side was able to exploit the absence of the Royalist horse, e. g. in the battle of Marston Moor.
* English Civil War. In the end, though, muskets had one massive advantage over longbows: while it takes years to train a man to use a longbow, it only takes weeks to train that same man to use a musket with comparable lethality.
* English Civil War of the 1640s often had the Royalists, Parliamentarians, and 'Club Men'. The latter were locals who just thought the other two factions should go and fight over the fate of the country somewhere else.
* English Civil War) the penalty for the opposition was only removal from office, not death, and most of the deposed MPs returned to Parliament after the Restoration of 1660.
* English Civil War was another rather good example of the limitations of castles versus artillery. Most of the remaining intact examples in the UK either missed the worst of the fighting, surrendered quickly or happened to be besieged by a force that was low on gunpowder; when the defenders chose to hold out there tended not to be much left except picturesque ruins.
* English Civil War what warrant Joyce had; after a few uncomfortable attempts to think of a reason or avoid the question, Joyce pointed to his soldiers.
* English class requires you to play a mini-game where you must unscramble letters to form as many words as you can. One level includes the letters F, G, H, I, S, T. If you spell 'shit' using those four letters, it doesn't count, and the teacher just gives an amused response. The PAL version updated English class so players get the same "funny but it doesn't count" response for 'git'.
* English comedian Les Dawson made a career out of telling mother-in-law jokes. His own mother-in-law thought they were hilarious.
* English comedian Russ Abbott's character of "See You Jimmy" is on the face of it a really insulting caricature of Scottish people in general and Glaswegians in particular. Sales of "See You Jimmy" hats and wigs in Scotland soar every time there is a national event, however, and the character was voted the third best Scottish person in a poll by the Glasgow Herald newspaper.
* English comedian Russell Howard said in a stand-up show that if he had a super power, it would be the ability to make people orgasm just by touching them once. In his words, "Not for sexual purposes, but that would be amazing in a fight." 'Kill him, Steve!' 'I'm trying to, but I'm too horny!' Either that, or he'd be "in a zoo, causing a great deal of mischief".
* English cricketer Ashley Giles (spin bowler and useful late-order bat) obtained an unlikely nickname in this manner when he ordered a batch of souvenir mugs for his benefit year that were meant to proclaim "Ashley Giles, the King of Spin". When the mugs arrived from the manufacturer they instead proclaimed him "The King of Spain". His fans embraced this, singing Viva España and
* English examples. England's 1966 World Cup winning squad (the England team of later years has been more notorious for its failures). Liverpool in the 1980's (after being crowned champions in 1990, they would have to wait until
* English folklore has traditionally used a variety of nondescript creatures given names such as "bogey", "bogeyman" or "bugbear", all generally derived from the word
* English folklore is full of ghostly hounds, typically haunting graveyards.
* English football team throughout England as MK Dons were relegated to League Two, meaning that in 2018–19, AFCW would play at a higher level than MK Dons for the first time. Though that only lasted one season; MK returned to League One for 2019–20, and both remain at that level in 2020–21.
* English gets a bad rap, but people tend to not mention that French is also very different from its written form. To an Anglophone learner, it may seem as if half of every word is silent because they represent sounds which are no longer pronounced but included for etymological reasons. In 1990 the French Academy instituted spelling changes for this reason, such as getting rid of the circumflex

over vowels in many instances, changing the spelling of some words, and eliminating the hyphen in the middle of many compound words (
* English history contains the Battle of Hastings, wherein the saxon King leading the English troops got an arrow to the eye and said troops broke formation and fell for a fake retreat. Since few people really cared who was king at the time, William the Conqueror pretty much won by default.
* English is a veteran inmate in Alcatraz prison in 1961. He tells Frank Morris his story of how he wound up in there. He was harassed by two men, who tried to attack him with knives. English killed them both. The reason why he got two life sentences, back-to-back?
* English is stated to be "the human language of commerce", which explains why most people in a major human-built hub of trade and diplomacy can speak or at least understand it.
* English is three languages stacked on top of one another in a trenchcoat pretending to be one language."
* English language cartoons end up with this trope when translated for a Japanese audience as many bits of the original dialogue and song lyrics (if there are songs) are retained as is for various reasons.
* English locomotives used to have an excellent reputation due to being the country in which they were invented. Today France, Germany, and Japan are regarded as the best in terms of
* Englishman: After accidentally getting out of his car while it was doing 70 mph on a motorway, Englishman adds: "So I notice, Mr Prime Minister. On behalf of centipedes everywhere I graciously accept this award for services to government corruption" before falling over.
* Englishman has a habit of stealing landmarks from other countries and relocating them to Paris.
* Englishman uses blatant spoonerised names of any real life individuals who appear.
* english paper: "Can't nobody say Strong Bad never did nothing for the peoples."
* English Premier League has also flourished in the U.S. under NBC and NBCSN. With its goal of not trying to "Americanize" its coverage (accomplished primarily by hiring British on-air talent, and helping to popularize the "Men in Blazers" duo of Roger Bennett and Michael Davies) to provide more authentic insights and not alienate actual soccer fans, offering every match through its platforms, along with increased U.S. interest in the sport in general, overall interest in the league has increased since NBC first acquired the contract (replacing a previous split between ESPN and Fox Sports).
* English Premier League's regal crowned lion with a leg propped up by a football.
* English Premier League The journalists burst out laughing — and so did Wilkinson.
* English Premier League this tends to manifest as "Second Season Syndrome," whereby a newly promoted team will excel in their first season, only to crash and burn (or at least do much poorer) in their second season after promotion. Examples include:
* English Premier League title for Arsenal, on which they went completely undefeated. This is not only strange in world football, it only had happened once in the highest level of English football... 115 years before.
* English Premier League to the Premier League title; Liverpool in the 2004/05 season — which came back from 3-0 down in the 2005 Champions League final against a heavily favored AC Milan, and then won on penalties; Leicester City in the 2015/16 season — which defied all expectations by winning the title after seriously risking relegation the previous season; Manchester City in the 2017/18 season — which broke numerous league records (including highest points tally, longest winning run, and most goals scored) on their way to the title; and finally, Liverpool again between 2018 and 2020, which not only won the club's sixth Champions League in 2019, but also won the English league title in 2020 after a 30-year-long wait.
* English princes (and Later Kings) Richard, Geoffrey and John, as depicted in

both
* English rioters during the Peasants' Revolt went around looking for Flemish weavers to beat up, identifying them by demanding people say "bread and cheese", which the Flemings did with a distinctive accent.
* English Rose: An archetypal English character with similar properties; popular standard for a Proper Lady's looks.
* English Rose: An English lady who's beautiful, modest, and upper class
* English Russia The only thing rather ominous about it is that the scientists went to some rather extreme lengths to keep everyone out of there, so much so that no one successfully broke in for upwards of fifteen years. They could have just been trying to assure that their research was found by the right people, though.
* English seaside resort Skegness had a famous advertising slogan: "Skegness is
* English Software 3, "Chop Suey" on 4 and 5 and "Elektra Glide" on 5, 6 and 7.
* English speakers also snicker at the name, as the first two syllables are pronounced exactly like "titty," a slang term for a woman's breasts, while the last two syllables are a common euphemism for the word "shit."
* English speakers learning German often have trouble with the sounds spelled "ie" and "ei." In military language schools, you can count on at least one student in each class habitually confusing the verbs
* English speakers who want to describe something they don't have a word for sometimes employ the French "
* "English Sports": The main components of the game are shown to be rolling a ring across the lawn in different ways, moving coloured pegs on a board similar to a chess board, and sitting behind a door in the middle of the field. Meanwhile, the referee speaks nonsense stuff with numbers, and the commentators calmly comment on each throw or move in a way guaranteed to make no sense and sometimes containing incomprehensible mumbled terms.
* English-style riding (also known as classical or European style riding, and is the type seen at the Olympics) places a lot of emphasis on the rider looking like they're doing nothing at all. This isn't a factor in Western riding. So, to use a bending (weaving in and out of poles/around barrels) exercise as an example, an English-style rider will touch the horse's left flank very gently with their heel to get them to turn to the left, and increase the pressure depending on how much of a turn is required (pressing firmly with the calf will usually get a well-trained horse turning almost 90 degrees.) In Western style riding, all steering is done with the reins; touching your heels to a horse or applying pressure with your legs will only tell it to move faster.
* English Vinglish, Shashi calls up the English class, and the lady there recites the different classes they have at high speed. Shashi asks her to speak slowly. The lady repeats what she said, more slowly and more loudly. Shashi understands it this time.
* English was one of several languages Delenn had to learn for her role as ambassador.
* English words written below it in Japanese letters, and one street sign says "I love you". Other store signs say "1234567" or "Monday"
* English you're using. In America, a date is written as month, day and year (March 30, 1998 or 3/30/1998) while in the rest of the English-speaking world, it's day, month and year (30 March, 1998 or 30/3/1998). Now, does 2/1/2000 mean January 2nd or February 1st?
* Engrenages, an apparently trivial incident in which a child was bitten by an inadequately-trained security dog leads to the uncovering of large-scale council corruption (the use of the dangerous dog was a sign of general corrupt penny-pinching).
* Engrenages, and then the fifth season heavily features a small group of racially-integrated female Gang Bangers who are just as violent and ruthless as the male variety.
* Engrenages featured a traffic accident investigator played by an extremely short actor. He was shown to use various aids to use normal-sized furniture but his stature was never discussed in dialogue.

* Engrenages had a murder-of-the-week in its second season in which a stereotypical alienated teen boy murdered his slightly older online girlfriend after they met face to face and she rejected him for being too young, then killed himself. However, the general tone of the ep didn't condemn the internet so much as his parents for not noticing how screwed-up he was.
* Engrenages, Joséphine Karlsson demonstrates her skills in this, when she manages to have a younger, less confident fellow lawyer beg her to take her (potentially sensational) case, after enthusiastically telling her how awesome it is to work on an affair with horrible odds that can potentially ruin your career.
* Engrenages Karlsson hates the police in general, because when she was a child the local cops covered up her mother being abused by her father because he was a judge, which eventually led to her mother killing herself.
* Engrish, and generally being competent, none of the non-white characters were racist caricatures, at least by '60s standards. They weren't always pretty, but they were far better than portrayals from earlier decades.
* Engrish.com, is dedicated for the inversion of this trope (Western malaproprisms and mistakes in Oriental languages and script).
* Engrish: Japanese promotion names such as Wrestle And Romance (later Wrestle Association R) and Big Mouth Loud. American wrestlers/promoters/reporters who never learned Japanese often find themselves speaking in broken English when they're with Japanese wrestlers.
* Enguerrand, though not a Seosten himself, has their powers. In addition to possessing his opponents, he occasionally possesses
* Enguerrand VII de Coucy had much the same stature as Charny in the later half of the 14th century. He was given to the English as a hostage to secure the release of King Jean II, who had been captured in the battle of Poitiers, but King Edward III of England was so impressed with his courtesy and character that he allowed him to marry his eldest daughter, Princess Isabel. He later returned all his English lands and titles upon the accession of Richard II. Coucy became the role model for a whole generation of young French knights as an experienced campaigner and paragon of virtue. Finally in 1397, he was wounded and captured in the Battle of Nicopolis against Ottoman Sultan Bayezid I, and died before he could be ransomed.
* Engutturalment Cephaloslamectomy to his band being described as wigger slam.
* Enhance Button algorithms they use for their own, actual spy satellites.
* enhanced agility exhibited by the hostages you rescue (they can keep up with the Warframes), and other general oddities.
* Enhanced by the fact that the title character's CG persona when talking to his employers was a pretty obvious Bruce Willis look-alike.
* Enhanced Configuration Project, occupants of exploded vehicles will sometimes leap out and run around, on fire and screaming in agony, until they expire or are put out of their misery.
* Enhanced Editions added some other quality of life improvements. The original games obviously didn't allow you to equip a shield and a two-handed weapon (like bows) at the same time. But if you wanted to equip a shield in the off hand, you had to pause, access the inventory, remove any two-handed weapons from the first-hand slots even if you were equipping a one-handed weapon at the moment, then equip a shield. This was rather tedious. In the EE, you can place a shield in the off hand, but it won't be used (nor will it be shown) while equipping two-handed weapons. If you swap to a one-handed weapon from the quick slots, the shield will be automatically equipped as if you did the passages above, just without micromanaging. This also frees a slot in the backpack that would be otherwise occupied by an unused shield.
* Enhanced Edition, the first game even had female models only for humans and elves: female dwarves, halflings or gnomes were the same as their male counterparts.
* Enhanced human tale: MAD WANG 1160 mentions planet-sized ships but also claims their large size tend to make them a big target thus are relatively rare.
* Enhanced Interrogation Techniques: Non-physical forms of torture, usually psychological, that still freak someone out enough to work.

* Enhanced Interrogation Techniques, the cops know very well that it's illegal and will move heaven and earth to keep it out of the courthouse.
* enhancement touch is limited to his stamina, gets a stamina-boosting belt.
* Enhance, one of the 27 Dead Apostle Ancestors, is hunting down his own kin to slay all vampires. If he shows up at a vampire coven, he'll leave no survivors.
* Enhancer: Gives the possessed item special abilities depending on how powerful the fiend is.
* Enhancing your Speed attribute or Athletics skill to extreme levels will lead to this. Whether it's through the
* Enheduanna (c. 2285-2250 BC), Akkadian high priestess, poet and composer, possibly the earliest known author in any genre and also possibly the earliest known woman in human history.
* Enid and Dr. Stern have faith that once the military gets to the facility in force, the trope will be soundly
* Enid Blyton has even more - even in-story Irene's talent for maths and music is called "genius", Mavis has the voice of an opera singer at the age of fourteen or fifteen, and no-one can match Belinda's drawing skills.
* Enid Blyton is to have the girls sneak out of their dorms to have a midnight party, usually to celebrate someone's birthday.
* Enid Blyton rescue her friend dangling off a cliff, and they just barely hang on to each other until help arrives.
* Enid Blyton's "Adventure" series, although being a children's series this takes the form of shouting obnoxious quotes rather than swearing per se.
* Enid Blyton's many stories for children sometimes use this: authority figures like parents sometimes routinely deny a misbehaving child their dinner, sometimes combining this with locking them in their bedroom for the day or night. In the fourth Famous Five novel, "Five Go to Smuggler's Top", the Five are staying with a friend at the eerie eponymous old mansion (Timmy the dog in hiding, as he was forbidden from Smuggler's Top), and the unpleasant deaf servant Block punishes George by locking her in her room and serving her only bread and water, which she throws back in his face defiantly. He is literally deaf to any objections to the way he punishes her
* Enid Blyton's short story "The Determined Dustbin", the dustbin of the title becomes animate after its owner throws away a pair of shoes enchanted with a get-about spell. The spell transfers to the dustbin and gives it the power to move.
* Enid Blyton turns up to carry the heroes to safety before the tribe realize they've been had.
* Enid Jones a pretty young widow courted by Detective Murdoch when his on-again-off-again relationship with Dr. Ogden is off. She likes him a lot, but her son Alwyn is the most important person in her life, so she breaks it off because Murdoch appears too undecided and she doesn't want to see her son hurt.
* Enid Jones, a young widow courted by Detective Murdoch, bakes cake for Detective Murdoch as a thank you gift for helping to find her son, and she later brings him some food when he's sick and she even
* Enigma and transports them to a cardboard box somewhere else at random.
* Enigma definitely took place, and the British and US governments did indeed suppress evidence of it in order to keep their fragile alliance with the Soviet Union from falling apart, but the events as depicted in the book are entirely fabricated; the only spy to make it to the Bletchley Park station was British and passing information to the Soviets. The 2001 film takes it up a notch by cutting Alan Turing out of the film completely and assigning his role in the war to protagonist Tom Jericho, where in the book Jericho is a junior member of Turing's cryptanalysis staff.
* Enigma features The Head, a lizard monster that sucks peoples brains out through their noses.
* Enigma has the bad guys break into a lab, with explicit orders to steal a prototype and destroy its plans.
* Enigma, he simply said, "Never heard of them." Guess who performed a song revealing one of his predictions at the end of the show?

* Enigma: Rising Tide with an aft flight deck but still having her two forward 14.96" turrets.
* Enigma's Greatest Hits album is also planned to be re-released with a Giorno-themed cover thanks to "Modern Crusaders" being used as the second ending theme to Part 5.
* Enigmatic Minion: An antagonist whose villainy, and true agenda, are ambiguous and not fully known.
* Enigmatic Minion the Big Bad) whose actual agenda is left a mystery.
* "Enigmatic Observers" are the "Fanatic Xenophile" variant of Fallen Empire. They are arguably the only benevolent example in that their defining ideology is their intense fascination with alien life and their respect for the sovereignty of surrounding nations, they are nevertheless both scary and dogmatic. Dogmatic because their ideology will prompt them to intervene if/when sapient rights are violated, whether that be because sapient species are being either enslaved or purged. Scary because they have the endgame tech to discourage players from roleplaying their own scary dogmatic aliens.
* Enigmatic Observers/Fanatic Xenophiles can be seen as this or haughty but
* Enigmatis 2: The Mists of Ravenwood is a long-abandoned attraction magically disguised as a functioning facility in order to lure in sacrificial victims.
* Enigmatis. The subtitles make it clear that his response is an emotional one, but the voice acting... not so much.
* Enigmatis trilogy, when the detective has to climb the cliffs to the monastery. Her last few steps are especially tricky, but a friendly hand appears to stop her from falling.
* Enigmatis trilogy, with the older and world-weary Rick treating his younger colleague almost like a daughter in some respects.
* Enigme has the protagonist Haiba Sumio always trying to screw destiny towards his dream diary ability which foretells the future, and he proves to be good at it.
* Enishi agrees that it's all Kenshin's fault. Specifically, the thing that totally wasn't and all the nasty shit Enishi is now pulling on everyone Kenshin knows to punish the Battousai.
* Enishi Itoshiki's name becomes "zetsuen" ("disinherited") making reference to the fact he was an unseen character for much of the work's run.
* Enjin gets up from the pavement immediately and reenters the building. A few minutes later, X gets knocked unconscious and blown out a window by an explosion.
* Enjin has caught up to the sirens and Monster X is all the animals, from forest creatures to pets, start fleeing the area as fast as they can and leave the forest dead silent. This also happens when Mizu is rapidly moving across town at night, numerous pets sensing it passing by and being terrified.
* Enjo Kosai...but she's actually helping her dad pick out a gift for her mom.
* Enjolras and the rest of Les Amis de l'ABC start a rebellion, believing that the people of Paris will rise and support them. The support never comes, and they all end up dead.
* Enjolras - the leader of the Friends of the ABC, the student revolutionaries from
* enjoyable to achieve flight without understanding electricity, even if the units look no different...
* enjoy being stylish and looking cool, but Xykon understands that that has to take a backseat to practicality when the chips are down.
* enjoying a day on the beach at the Seafoam Islands, and at that point, Ash is pretty much becoming aware of his female companions' physical attributes and feeling somewhat uncomfortable for the fact he likes what he sees.
* enjoying date rape and she'd do it again, plenty of people didn't buy it.
* enjoying Flanders' misfortune and scrounged up as many left-handed customers as he could.
* Enjoying near-complete daylight air superiority during the first campaigns of the war, the Luftwaffe was able to continue using Henschel Hs 123 biplane divebombers as ground-attack aircraft. This type had gone out of production in 1937, but on the Eastern front continued to see active service until 1944.

* Enjoying the power of the Koreans repeating everything his says, Frank at one point has them parroting phrases like "We will not contaminate our drinking water with fluoridation."
* enjoys a good game of chess with Xavier or listening to classical music.
* enjoys it. In one episode he enters a mascot race at the local ball park.
* enjoys on her... and childishly pulls on her cheeks, much to Ayeka's embarrassment.
* enjoys the infamous "baked bads" in "Applebuck Season," which was made of potato chips, soda, lemons, and earthworms baked into muffins (and they made the rest of the town sick, including the aforementioned Pinkie Pie).
* enjoys this. That is until Pearl forces him to stand outside in a smiley crab costume to attract customers. This time, he doesn't enjoy it one bit.
* Enjoy tabloid. Titles like "Bane vs. Cyric — Winner Take All!!!!" and "Dire Pandas From Kara-Tur Invade the Unapproachable East!" — and much worse.
* enjoy the perks of being a celebrity — having enough money to be financially secure, being able to influence thousands of people listening to her radio emission — but she's pretty unhappy about reality intruding on her private time (paparazzi barging in the restaurant in which she took her boyfriend in a date).
* enjoy the show, asking if there's any place nearby where she can get some popcorn.
* Enjoy the Story, Skip the Game: A game which features both gameplay and story, but the gameplay is largely overlooked in favour of the story.
* enjoy this, because it gives Israeli viewers a chance to see actual commercials from other European countries, thus inadvertently fulfilling National Geographic's "cultural-exploration" theme! It helps that these commercials are often in Dutch, Romanian, Turkish, etcetera.
* Enjuhneer," but the author has mined her abilities for so many jokes that at times she practically feels like a second main character.
* Enjuhneer for being the first cosplayer that the creator had heard of.
* Enjuhneer has a primarily female main cast in a setting where almost all bit characters are male, so its faceless masses are black silhouettes with Mars symbols on their foreheads.
* Enjuhneer's artist bases almost all of her characters on people she actually knows.
* En kärlekshistoria), young teenage lovers Per and Annika walk through the woods holding hands with their fingers interlinked, swinging their hands between them. It's very natural and touching, like the rest of their love scenes.
* Enki Bilal and a version of ice hockey where the points are counted by goals, wounded and dead.
* Enki Bilal elite uses eugenics to minimize the percentage of females in their population, and keeps them out of sight in underground breeding farms. The eponymous protagonist, Alcide Nikopol, puts an end to the practice while turning the city-state to communism with the aid of the rebellious Egyptian god Horus. It's a surreal comic.
* Enki Bilal inspired from it), the Egyptian gods live in a pyramid that is also a cool spaceship. And it's going to destroy Paris (New York in the movie) unless they get fuel.
* En la calle Conesa, an Argentine one-act play. The realtor offers a house with two storeys to a customer. ("plantas") The customer states that the house feels dead because it only had two plants, one tall and one short. (also "plantas") Fast forward to another house advertised as "not noisy" (nada de ruido) but the client complains that it was demolished (derruido) In another house offered by the realtor:
* Enlightened Antagonist, is actually Romanticist, an anarchist attempting bring back the era of true freedom before governments.
* Enlightened Antagonist: They have achieved greater wisdom and understanding of the way the world works... just don't expect them to behave like some sort of peaceful monk.

* Enlightened Antagonist: They have deeply pondered about and finally understood the meaning of life, but it won't stop them from continuing their evil goals.
* Enlightened characters or energy beings can sometimes unlock these memories either via channeling ancestors rather than past lives or reading their DNA like a book.
* Enlightened Matriarchy: for certain feminist writers, especially second-wave feminists in the 1970s. On its way to being a Dead Horse Trope, at least in its more extreme versions, after the advent of third-wave feminism, which introduced the question of what happens to trans and nonbinary people under a system that favors a single gender.
* Enlightened Self-Interest: Do good things for others to serve your own best interest.
* Enlightened Self-Interest: Doing good things for others can be good for your own agenda.
* Enlightened Self-Interest: I'm doing good things just so I can get a lot of rewards and recognition.
* enlightening peyote trip It remains unclear whether his trip had supernatural qualities, or whether it was just a regular hallucination.
* Enlightenment advocates will usually believe that "widespread ignorance causes Dystopia" (sometimes bringing up the era that they called the "
* Enlightenment figures from the British tradition tend to assume absolute cynicism—
* Enlightenment figures from the European continent, particularly (for some reason) Germany, really were idealistic and optimistic (take Immanuel Kant and Leibniz as examples). Other Continental Enlightenment types (like
* "Enlightenment" is a bored alien god impersonating a Type Two space pirate.
* Enlightenments aware that gods exist since he's immortal due to having a chunk of the god Dormin's soul inside him, but at the start of the fic he's been dealt such a bad series of hands thanks to it that he initially wants nothing to do with them. Even as they do start to become closer, he never quite gets as reverent as a normal mortal would.
* Enlightenments came out and introduced the Enlightenments collectables that gave the fic its name.
* Enlightenments, given they initially consider the very abnormal situation with the Queen of the Castle in the Mist to still be a mortal problem for the mortals to solve.
* Enlightenment since when Turlough is rescued, he says "I would have exploded in the vacuum of space."
* Enlightenments: The god Dormin has very different senses from a mortal. The fic's entirely from their perspective, so various aspects of this are explored, such as how they see wayward bits of their soul as light (the horns of demigods created by their power glow to their vision because of this), and they see the Queen's shadows as a garbled mix of colours that hurts to look at for too long. They also don't have any real sense of day vs. night, so instead of 24-hour periods, they think in 20-hour periods.
* Enlightenments: The Queen of the Castle in the Mist seems to think that killing the horned boys is inducting them into her and Wander's family, as well as apparently believing her immortal husband is okay with her killing their daughters to power her own immortality so she can stay with him.
* Enlightenment Superpowers — Usually the result of using great discipline to achieve harmony.
* Enlightenment Superpowers: Superpowers are available to anyone who achieves the necessary level of spiritual enlightenment.
* Enlightenment Superpower which is a lesser form of chaos. In other words, disentegrate them.
* Enlightenments, Wander chooses to kill at least one of his daughters and an adopted son rather than let them be used as either the Queen's latest body or fuel to power the spell that lets her body hop.
* Enlightenments, Wander has very frequent nightmares. They're mostly about being

on the wrong end of an abusive relationship with his wife or his experiences with being forced to kill children.
* "Enlightenment" the Eternals have abducted various naval crews from Earth history to participate in their race.
* "Enlightenment" to the amazement of everyone. Except the 5th Doctor, who doesn't seem to notice. Much to Tegan's annoyance.
* "Enlightenment", with the Eternals vanishing the moment they go over the side (the human bodies they inhabit, of course, would not be so unaffected).
* Enlisted: 2LT Schneeberger. He goes out of his way to be as obnoxious as possible to everyone lower ranking than him, including a Command Sergeant Major (who may be lower rank but is meant to be viewed as a mentor by junior officers). Also has a tendency to steal the credit for anything that goes well, regardless of how much influence he had over it.
* Enlisted bears the title of 2nd best Irish Named Army Detachment In Southern Florida.
* Enlisted has PFC Gumble impersonate a doctor in a video testimonial. His disguise would be a lot more convincing if the video captions didn't list his title as "Real Doctor."
* Enlisted is literally a good-looking Private and his brothers are no slouches either, to the extent that oldest brother Pete is featured on a recruiting poster. The other men in the unit look more like us mere mortals but even they clean up pretty good in their dress uniforms for the unit formal.
* enlisted, no less — and yes, the elder McCain was married to Jimmy's mother.
* Enlisted pilots of Imperial Japanese Navy Air Force in WWII. The officers were usually fresh from flight school while enlisted men could be battle-hardened veterans. If the officer wasn't nice enough for his men, they would simply abandon him in the middle of the battle, resulting him being shot down.
* Enlisted pulls it off for the same reason, where you get your uniform out of a dispensing machine, and what settings you set it to (short, tall, etc), turn out to be the right ones.
* Enlisted: Three very different brothers, each soldiers in the U.S. Army, find themselves all assigned to the same unit: the fictional A Company, 2nd Battalion, 618th Infantry Regiment, 1st Brigade Combat Team, 18th Infantry Division (Mechanized), at the fictional Fort McGee, located in Florida.
* Enlisted works better on DVD if for no other reason than FOX broadcast the episodes ridiculously out of order. Watching in production order undoes continuity SNAFUs both great (Derrick ending his relationship with the bartender before he meets her) and small (Lt. Schneeberger introducing himself after having already been in an episode). It also allows for the appreciation of Pete's PTSD storyline, cited by some veterans as the most authentic portrayal of the condition they had ever seen.
* en masse), even though they were more successful later on. Today, well let's say that many of the world's most expensive paintings are by them...
* en masse, forcing their way in through their orifices or by biting open wounds, and taking control of their host's Essence flows to puppeteer their body as a mobile hive.
* en masse, founding their own colony, which up until Ryder gets there is doing pretty well for itself, a fact their leader, Nakmor Morda, takes pleasure in rubbing in Ryder's face.
* en masse in Cthol Murgos (which is where she wants them to go). The officers try to stop it, but pretty much the entire rank-and-file defect to the princess from her father.
* en masse in the final issue. Still managed to have a sequel series, by showing some of the characters' fates in the afterlife.
* en masse, so they have their own rules that are more relevant to their unique situation.
* en masse. The outcome, exactly in accordance with conventional wisdom, was a devastating French defeat.

* en masse, though it was mostly disabled prisoners who were exchanged.
* Ennead: It's a comic about Egyptian mythology, so this trope is practically a given. The most prevalent ships in the fandom are Seth/Horus (who are uncle and nephew) and Osiris/Seth (who are brothers). Nephthys/Isis (sisters) has a fair following as well.
* Ennio Morricone in the 1960's would average over twenty film scores a year. Even though he's done fewer scores each year since then, he still kept himself busy with conducting and concert projects (even in his eighties).
* Ennio Morricone Pastiche's music during western scenes a staple of pop culture.
* Ennoshita gets his day in the limelight during the second season, in a match against Wakutani when
* Ennui GO!. Another is a bubblegum-popping bimbo wanting a hot iced coffee.
* Ennui GO!: A PTA meeting turns into a brawl between Adelie and another parent, complete with clothes coming off.
* Ennui GO! as a mood lightener, and usually referred to as "creampies" with tongue firmly in cheek. The joke is taken to the extreme in one strip where Sarah jumps on Izzy and hits her in the face with a pie she's holding between her thighs.
* Ennui GO!: A series of strips shows us the world of Earth-11, where the genders of all characters are flipped.
* Ennui GO! began. Soon enough, upon looking back, Darcy manages to rise up and goes to fight Captain Orca again, driven by the love she has for her girlfriends.
* Ennui GO!: Coach Bobert is a slovenly, moronic pervert who forces his students to partake in inappropriate activities just so he can watch and get his rocks off. Needless to say, he is often a target of well-deserved abuse from Max.
* Ennui GO! happy about it for a while. Len does eventually get past this.
* Ennui GO! has brown hair and is an astrophysicist, and later becomes the Minister of Science on Key Manati.
* Ennui GO!. In fact, her entire relationship with Tanya started because she decided to randomly pay her $3000 for sex just to prove a point to Noah.
* Ennui GO! in her morning newspaper, much to her consternation - we also learn she's a Scorpio, a sign that seeks the extremes. Her horoscope specifies what the weirdnesses will be for today.
* Ennui GO!: In "Invitation" (652, NSFW), during a threesome with Izzy, Noah and Hashim decide to impersonate Darcy. Izzy warns them that Darcy could kill them for that, but Darcy actually finds the impersonations pretty good.
* Ennui GO!: In "Sex Ed", Max's creepy gym teacher Coach Bobert gives Max and his friends a horrible sex-ed class, including calling a condom a "linoleum wrapper" and telling them that holding your pee for too long will cause it to eventually back up into your brain and kill you. Additionally, one scrawl on the chalkboard is "pee is stored in the balls". The comic's author noted that the comic was taken directly from the sex-ed class he had as a teenager.
* Ennui GO!: In "Spray", rather than using the school's showers after gym class, Max's nemesis Skyler saturates himself with Ass body spray. He thinks it attracts girls, but when he walks by Max's friends Calixta and Bee, Bee remarks "Ugh, what smells like piss?", which echoes Max's opinion of how it smells.
* Ennui GO! is a blonde, but she dyes it pink. The only times her natural hair color is seen are during flashbacks to her childhood and the arc where she was trapped on a desereted island. It acts as a visual indicator to tell her apart from her identical twin sister Adelie (who leaves it blonde) and her clone Kirsty (who just dyes the tips).
* Ennui GO! is a member of the Clown Union; apparently it's been nothing but drama since they merged with the Mime Union.
* Ennui GO! is Chocly the Sweetboy, a monster that started out as a Christmas mascot but went horribly bad. It leaves kids it encounters slathered with fudge.
* Ennui GO! is tall, broad-shouldered, very muscular, very stacked, and frequently ends up in sexual situations. However, she tends to dress conservatively and her facial features are quite masculine. That doesn't detract the fact that most people find her quite attractive, especially her girlfriends Izzy and Tanya.
* Ennui GO!: Izzy's rule of Key Manati involves giving the police pink-tinted

visors so they can't tell what race the person they're beating is.
* Ennui GO!: Len's mother (one of Noah's exes) walks in on Len and Noah having sex. She keeps coming back in (wearing ever-more revealing clothing) to ask if Len wants to tag out.
* Ennui GO!, Max and his friends form one so he can climb into the ceiling after the Spaghetti Bandit. Cricket isn't entirely willing about the whole thing.
* Ennui GO!", Max learns this trope the hard way on his first day of high school, when he decides to pick a fight against one of the bullies in his school but gets his butt easily handed to him in turn.
* Ennui GO!: Max's perception of the world is very unusual. In "Cross-Eyed", he sees some kind of monster behind Cricket, and in "Cooling Off", he sees Calixta as a demon-like creature. However, in both cases Max seems to think this is perfectly normal. In part 2, this is shown again; Max still sees Calixta as the same creature (albeit with her current height and proportions), while he sees Robin as a mix of her Galiath and Scarab costumes.
* Ennui GO!: Midway through the Key Manati arc, we meet Sybil, who has a new job every time she's met, because she keeps getting fired for telling nightmarish company secrets and generally being toxic and obnoxious. This is later revealed to be intentional on her part.
* Ennui GO! (Noah and Len, Hashim and Sarah, for instance), everyone that lives with Izzy has sex with everyone on a fairly regular basis. The twists are that Darcy is a lesbian and focuses on Izzy and Tanya (the cast page specifically describes their relationship as poly), and the men usually only have sex with the women, although Hashim and Hiro had sex once on a whim.
* Ennui GO!, one of "Florida Man"'s sidekicks is a strange-looking woman who is revealed to be an exceptionally convincing mime.
* Ennui GO! Part 1 the cast largely sticks to specific outfits, although they sometimes wear other stuff for specific occasions, and the some of the cast switches to more weather-appropriate wear when the setting of the comic changes to a more tropical one. Averted in Part 2 when the characters start wearing different outfits each day.
* Ennui GO!: Renee's roller derby team is called the Screamin' Demons; when she orders team jerseys for them, they're mislabeled "Semen Demons".
* Ennui GO! seems to have a case of the same disorder, although it's thankfully treated with actual legal medication.
* Ennui GO! that speaks with a stutter. It becomes more noticeable when she's around and/or thinking about her crush/boyfriend Max.
* Ennui GO!: The SJW with his many buttholes, Noah's freakish elephant penis, and Jerry all come to mind.
* Ennui GO! to match. Because of it, she's often a big help for Izzy and co. whenever trouble happens.
* Ennui GO!: When Dr. Bald bemoans he won't makes money from his failed "Frankenhooker" experiment, Noah points out to him that he invented reanimation, which he could easily be monetized. Dr. Bald doesn't get how people could want their departed ones turned into hookers. Noah insists that he doesn't HAVE to turn them into hookers.
* Ennui GO! when they peek out of the janitor's closet after their trap for the Spaghetti Bandit is tripped.
* Ennui GO! who carries a strong distaste for women, especially Izzy whom he carries a particular grudge against.
* Ennui GO!: Xoltan claims to be one to Hashim, although his idea of evil includes things like swapping the stickers on organic and inorganic produce and not helping old ladies cross the street.
* Enoah Ballard delivers an absolutely beautiful one in the final volume of
* Enobaria and her fellow (high-rated) career trainees Declan, Pat and Maura.
* Enoch Arden at first. (She does finally come to return his feelings, however.)
* Enoch Arden: The main story is a love triangle where each of the people involved is sympathetic and well-meaning.
* Enoch, father of the more famous Methuselah, is sometimes argued to have lived

the longest out of all humans named in the Bible. This is because he is mentioned to have been "taken by God" and to "not see death", which is interpreted to mean he never actually died and was carried to Heaven while still alive. Given common Biblical timelines, that would make him around 5,000 years old.
* Enoch Soames fits the trope perfectly. Soames is a wannabee poet and poseur who puts on the airs of being a world weary artist and professes to scorn contemporary and past writers who are highly regarded. Additionally, he's able to pursue poetry as a vocation because he receives an annuity from a wealthy Aunt.
* Enola Holmes as a nun to wander the streets of London's worst neighborhoods at night, giving food and clothing to the poor, without fear of being caught by the police - or her brothers.
* Enola Holmes: Enola is horrified by the day her mother chose to ran off on. Slightly subverted, in that her mother had her reasons...
* Enola Holmes, hunting her to force her into finishing school, and finding that she's a great detective herself at the age of 14. At the end, Sherlock and Mycroft are agape at how capable she is for her age.
* Enola Holmes. Knowing how he thinks certainly helps and she plans her disguises accordingly.
* Enola Holmes than Sherlock, to the point that he occasionally takes control of the British government.
* Enola Holmes. When she shakes him again, he spends all night out scouring the city for her, but she successfully escapes by hiding in his house. (And, when she departs, she's able to use some of his disguise supplies to ensure she won't be spotted.)
* Enola Holmes, whom he managed to never mention in all his adventures.
* E Nomine, in that case due to fair parts being march music and repeated mentions to a 'Reich'. It's based on the Opera by Wagner.
* enormous. After the belchstorm dies down, Harley Quinn immediately complains about the smell, asking if Supergirl was eating day-old tuna and goat's cheese in the cafeteria, which Supergirl sheepishly confirms.
* Enormous areas of the game were made this when an expansion came out. Azeroth, the original two continents, were nearly totally abandoned when the Burning Crusade came out and everybody went to Outland. Only low levels and bank alts were left. Then the Wrath of the Lich King came out, and Outland was abandoned.
* enormous been like this—before the Wreckers came into being, he geeked out over the Primal Vanguard, an early Cybertronian peacekeeping detachment.
* enormous chin, which gives him a vaguely simian or Neanderthal appearance.
* enormous controversy; I have been called a hundred names and will be called a thousand more before the world goes dim and cold."
* enormous, each burst slows it down enough to help the pilot correct his aim.
* Enormous Engagement Ring: A woman receives a huge engagement ring as a gift.
* Enormous Engagement Ring, so much so that she has a major reaction to it.
* enormous from their control. How big is the fleet? Potentially, it's all of them. All the turians, all the krogans, all the quarians, all the geth, etc.
* enormous. In "The Dream Beam Invasion" however, when they once again start an excessive beatdown on Frizz and Nug, they grow to enormous size and terrify them into retreating. Noticeably, the Noops tend to use more pragmatic retaliations after this episode.
* enormous planets and moons (which could actually get a little creepy, if only because the player would not be used to seeing things like this). One planet visited in the first game is actually locked in orbit with another planet and their gravity fields are slowly tearing each other apart. It's stated that the planet only has a few years to go before it becomes uninhabitable. In the second game it's suggested that mass effect fields were commonly used by visitors to compensate for different gravity levels among worlds.
* enormous (pronounced "worm"). Sometimes, however, "wyrm" will simply be a synonym for dragons in general.
* enormous, realistically detailed dragon that looks like it belongs in a serious fantasy game, not the goofy, cartoony world of Mario.

* enormous vertical spinning bar that alone takes up over half of the robot's weight. The rest of the robot exists mainly to allow that bar to spin and move about. As a result, of its three matches fought that year, two of them ended in it eliminating itself from the fight by recoil — on its first hit.
* enormous, whereas in the text itself it seems possibly a case of looking for another god that is viewed as better (since at the time it seems Hebrews believed other gods existed, but forbid worshiping them).
* Enos dismissal when Boss loses patience with his honesty (he is demoted to records clerk); however, Enos will play a key role in capturing his successor, who is conspiring with a pair of extortion artists to blow up Hazzard Dam if Boss doesn't pay him $1 million.
* Enoshima, an island off the coast of Kamakura, is a favorite destination among
* Enos Strate, who has been shown to be a competent lawman on many occasions, even slips up once in awhile. His biggest mistake came in the 1983 episode "Too Many Roscoes", where he gets upset when Rosco's double (an experienced bank robber) flubs simple facts... and he is unable to call him on this when "Rosco" recalls a scheduled armored car delivery to exact detail.
* Enos was let go at least twice, most famously in "Enos Strate to the Top," the pilot for
* enough can count. Enough deployed correctly could quite handily destroy a city, as King Aerys' pet Guild of Alchemists knew very well.
* Enough comments appeared on the threads shipping Skitter and Clockblocker together that the author had Clockblocker explicitly sink it in canon.
* Enough features a protagonist who, after abuse and cheating from her husband, breaks into her husband's house with the full intention of beating him to death with her bare hands. Her threat, "self-defense isn't murder", rings pretty hollow considering she's instigating the fight in his home and not hers, goes out of her way to remove anything he could use to defend himself, and even plants evidence to prove the version of the story she plans to tell the cops. She gets the upper hand, but then she chickens out. After more struggling he falls out a two-story window.
* enough for Perturabo's tastes, in that it was not the pre-eminent Astartes force in the entire Crusade.
* enough from whatever game it's being compared to. An otherwise excellent game may get a lower score simply because it didn't revolutionize its entire genre.
* Enough: Husband refers to wife's place of employment as "the greasy spoon" ... and it's a fairly accurate description.
* Enough of an ex-husband Mitch, but finally gets sick of running and decides to fight back.
* Enough Rope ponder this idea in regards to Steve Rogers. The man might have been fairly progressive back during World War II, but over seventy years later, those same ideas of his range from outdated to condescending to outright racist.
* Enough Rope, Steve Rogers ignores all experts on principle due to having an almost pathological need to be the one people turn to for answers rather than the other way around. That Steve doesn't think long term and prefers to solve every problem with violence only makes things worse.
* Enough Rope, Tony Stark tells Rhodes to guess which act of his saved the most lives. While Rhodes guesses it was sending the nuke bound for New York through the Chitauri portal, Tony corrects him that it was inventing mosquito repelling fabric. Because of the clothes, screens, and nets made from that fabric (the last of which Tony donates in mass to charities), mosquito born diseases have almost been eradicated.
* Enough so that most casual baseball fans (at least outside Chicago's South Side) forget that Fisk spent the majority of his career with the White Sox.
* enough. The zealots lost the war and were exiled to the neighboring star system of Masada, which at the time of the books is even more primitive than Grayson.
* enough time to make an incredibly long speech while running across a tiny room. The novels, however, justify this because his opponent had used a spell to distort space. No such explanation is provided in the anime.
* "enough to last me the rest of my life", Jobs was known to joke). The author

describes one interview with Jobs at his home where Jobs showed him the contents of his closet, and there were indeed that many shirts in there. Jobs was given the shirts by the designer of the uniforms at a Japan-based company Apple had dealings with. Jobs had admired the uniforms the factory workers wore, and had unsuccessfully tried to convince Apple to adopt a uniform vest. The designer sent him several boxes full of the black shirts instead.
* Enquiry Concerning the Principles of Morals, in which he calls people who are "entirely disingenuous, and really do not believe the opinions they defend, but engage in the controversy from affectation, from a spirit of opposition, or from a desire of showing wit and ingenuity superior to the rest of mankind" the most irksome of all types of people. Hume goes on to state that "the only way, therefore, of converting an antagonist of this kind, is to leave him to himself. For, finding that no body keeps up the controversy with him, it is probable he will, at last, of himself, from mere weariness, come over to the side of common sense and reason." Had he lived to see the internet, he might well have retracted that statement.
* Enraged by Idiocy: A character who has absolutely no patience for stupid people.
* Enraged by Idiocy: How can you be this goddamned stupid?! I'm gonna beat the crap out of you if you don't stop being such an irksome dumbass, you moronic fuckwit!
* enraged, while Sonic and Silver try to get the last Chaos Emerald off of Zavok in order to defeat him and cure the Zombots.
* Enrica; for the first several volumes of the manga, we only know Enrica through Jose's flashbacks, all of which portray her as incredibly innocent. When the manga begins to detail the Croce family's backstory, Enrica is portrayed with a lot of human flaws that weren't initially shown. Not that her dying in the backstory doesn't suck, mind you.
* Enrico Berlinguer's disagreement with hardline Stalinist thought leads to him splitting from the Italian Communists and forming a more center-left workers' party, which partakes in an anti-Communist coalition. In this capacity, he serves as Minister of Justice, and later Prime Minister.
* Enrico Caruso: Italian opera singer who was world famous in the 1900s-1920s. He was the first musical artist whose records sold millions internationally.
* Enrico Dandalo, born in 1107, became the Doge of Venice aged 85 and blind. Venice reached the height of its power during his rule, which lasted until he died at the age of 98.
* Enrico Pucci is nowhere to be seen. Which is interesting, considering that he wanted to inflict this on the entire Joestar bloodline.
* Enrico Pucci looks black, but it's actually an important plot point that he's not. His parents are both white as snow. Given that he's of Italian descent, he may be Sicilian and his dark skin a product of recessive genes.
* Enrique may step out on his wife with impunity, but no other man better should go near her, unless he wants a black eye.
* Enrique Romero routinely undresses the heroines he draws for British newspaper strips.
* Enrique's and Ignacio's reunion as adults after not having seen each other after grade school in
* Enriqueta-2856's fighting style takes a hint from King Bradley in the v4 of
* Enriqueta-2856, which included an expy of him as her sword instructor.
* Enron hearings, after years of corporate fraud was discovered, both Kenneth Lay and Jeffrey Skilling, tried to put all of the blame on their third partner in crime, Andrew Fastow, who himself was putting a lot of money aside and was planning on abandoning Enron. He instead pleaded guilty to a lesser sentence in exchange for testifying against both Kenneth Lay and Jeffery Skilling.
* Enron is an example of this. Initially, the only question people had about Enron was whether its stock was overpriced. See Enron's example below for full details.
* Enron saw its luck sour, as many questioned how the company was managing its finances when their reported stock value was 55 times larger than their earnings, among numerous other opaque and bizarre accounting practices. This and other discrepancies led to the SEC looking into the company, and as the investigation

went on, more and more crimes were uncovered. What had essentially started into looking into the odd accounting practices of the company mushroomed into a laundry list of crimes committed by and with the knowledge of the majority of its executives that included embezzlement, insider trading and fraud, the last of which included the supervillain-level scheme of deliberately blacking out California to profit on hugely inflated energy prices. The end result saw several Enron executives going to prison (and one other executive who was convicted dying of a heart attack before he could be sentenced), the creation of stronger punishments for financial evidence tampering, Enron becoming the world's largest corporate bankruptcy in history until the collapse of WorldCom and destroyed the reputation of Arthur Andersen, one of the world's largest accounting firms, so thoroughly that they too soon folded.
* Enron: The Smartest Guys in the Room — raised a lot of awareness about accounting fraud.
* Ensemble Cast, and in some cases appeared in more episodes than actual stars.
* Ensemble Cast: A series that centers on a cast of characters rather than a single protagonist.
* Ensemble Cast disadvantaged by which stage is chosen; aerial fighters like Kain and Zidane struggle in the Phantom Train, ground-based fighter Firion has trouble in the sky-based Planet's Core, etc).
* Ensemble Cast, there is a sequence where a character tries to open several doors in a hallway, only to find bizarre things like tombstones or a room full of bats (and guano). Unusually for this trope, they're not stock footage but actually there. It's a very strange house.
* Ensemble Dark Horse: A character unexpectedly succeeds in appealing to readers/listeners/viewers/players.
* Ensemble Dark Horse: A minor character attracts major audience attention.
* Ensemble Dark Horse: A minor character who is popular with the audiences.
* Ensemble Dark Horse: A minor character who is very popular with audiences.
* Ensemble Dark Horse: A minor character who is very popular with the fans.
* Ensemble Dark Horse, and Hewkii only says a single line and some grunts.
* Ensemble Dark Horse calls humans "meatbags" and wonders how they can stand to walk around as sloshing bags of organs. He can even cause the player character to feel a moment of self-doubt.
* Ensemble Dark Horse makes him "a man seen only in mirror images" with no identity outside of references to what is around him, and that "in a world where our identities are shaped by our warped relationships to brands and commerce we are all Waluigi". While nobody takes this as anything other than a joke, it nevertheless led to Waluigi developing a semi-earnest, semi-ironic fandom amongst internet-philosophers and art dorks who hold up Waluigi as an icon of the Baudrillardian hollowness of late capitalism.
* Ensemble Dark Horse. Many alien minor characters, such as those on the Jedi Council, are played by actors of color as well; most wear heavy makeup or prosthetics however.
* Ensemble Dark Horse to join forces with protagonist Lelouch before finally receiving one of the few unambiguously happy endings out of the entire cast.
* Ensemble Dark Horse. Very little is known about her currently, though her website is still up and includes clips of Cima and other characters. She seems to have retired from voice acting and focused on political activism.
* Ensemble Girls! Memories's protagonist. We also learn that Mika Kagehira of the latter and Suzu Kuromori of the former were siblings separated at birth, and are happy to reunite once the discovery is made.
* Ensemble Stars! about less popular ones. Fans also often do very quick, unedited translations to twitter as soon as a new story is released so non-Japanese-speaking fans can quickly hear about any major new revelations.
* Ensemble Stars! all over the place, meaning that there is a very large number of relationships which seem romantic but aren't explicitly so.
* Ensemble Stars!, an eccentric who loves to poke at people to make them react.
* Ensemble Stars! appears to be of the mysterious variety, going with his ninja

motif... until you find out he actually suffers from severe social anxiety. He even tries to claim sexual harassment when Yuta tries to see under his bangs once.
* Ensemble Stars!: Arashi is often interpreted by fans as a trans girl due to having feminine hobbies and using pronouns associated with female speech.
* Ensemble Stars! as inconvenient as you'd logically think, but he does notice with disappointment that others around him often seem scared of him as a result.
* Ensemble Stars! as penance; his friends for the most part are so used to this that he's typically just scolded for overreacting again.
* Ensemble Stars! away these concerns, as making the characters have to choose between love and their careers, particularly in such a usually optimistic series, would generally be too depressing.
* Ensemble Stars! befriend Tsumugi define their relationship from then on.
* Ensemble Stars!, both Ritsu and Rei were held back a year. This helped contribute to Rei's delinquent image that led to him being named as one of the Five Oddballs, but none of the main characters seem to really care - he's well-known as one of the most talented, intelligent, and wise students in school regardless. Ritsu's being held back is rarely brought up, too, with characters being more likely to bring up his current laziness. (Incidentally, Ritsu and Rei are brothers, and both suffer from a chronic disease that leaves them tired during the middle of the day.) Valkyrie was also threatened with this - due to their unit having taken a break for a while due to fine's sabotage and Nazuna's leaving, they almost failed to participate in the mandatory minimum number of performances per school year.
* Ensemble Stars!, but he's not always as sweet as he looks, and is capable of being outright sadistic without a single change to his smile or cute way of speaking.
* Ensemble Stars!, but once Anzu transfers in, he tends to get tongue-tied whenever they're left alone together.
* Ensemble Stars!, but the fandom at large generally prefers to ignore these issues and let the characters be happy together in the present without bringing in their careers.
* Ensemble Stars!. By the end of the year, he's one of the few characters to have explicitly and clearly fallen in love with her and ultimately promises to meet up with her again someday and win her over properly.
* Ensemble Stars!, Christmas or Starlight Festival is an annual event all idol groups are expected to participate in. However, the theming tends to be more around stars and snow than typical red and green festive flair or even Japanese-style Christmas is for couples styling, perhaps because the former would be kinda jarring for some units (such as the ultra Japanese Akatsuki) and the latter overlaps too much with Chocolate Festival (Valentine's Day) two months later.
* Ensemble Stars! could still never corrupt Souma, because he has no darkness in him. However, Souma refutes this, saying that he is still human and does still feel sadness and anger and hate. And into his final year at school, he becomes increasingly discomfited by his seniors' attempts to keep him from getting involved in any questionable business, as he feels more like a coddled child and ends up worrying even more for their sake. In the end, Souma would rather be actively involved in what they're doing, even if that means he can't be a faultless victim anymore.
* Ensemble Stars! - due to a miscommunication, both 2wink and Trickstar end up assigned to perform the opening number for a baseball game, and decide to play a match of their own to decide who will take it. Naturally, they agree to put on a joint performance in the end.
* Ensemble Stars! explained by him always carrying around a real sword and practising with it every morning, but he certainly doesn't look it.
* Ensemble Stars! felt upset alongside everyone else but had no idea what to do with that feeling. In the present year, he's gotten a lot better, but he's still off-puttingly perky at times.
* Ensemble Stars! had the added benefit of making him seem responsible for fine's actions to the general public, making him an easy scapegoat.
* Ensemble Stars! has red hair with white streaks, which the fandom likes to

compare to crabsticks.
* Ensemble Stars! him and traps him in a soundproof room, keeping him from sleeping and only allowing him to eat when Izumi's hand feeds him until he will be 'honest'. After Makoto gets out of this, he still routinely stalks him and is extremely clingy whenever they meet, trying to separate Makoto from any other potential friends and allies. Eventually, Makoto manages to strike a bargain where he won't run from him on sight if Izumi heavily cuts down on the creepy behavior; he only mostly succeeds, and while Makoto stops being scared of him, when Izumi graduates Makoto is still basically happy to see him go, even if he hopes he'll be successful (far, far away from him).
* Ensemble Stars! if the card were not available; as it is, it still got to over 6 million.)
* Ensemble Stars! in that Natsume still admires Wataru and they still get along, this has just tarnished Natsume's opinion of Wataru.
* Ensemble Stars! It's a free game, but unless you actually buy diamonds, good luck getting the cards you actually want from the gacha.
* Ensemble Stars!. It's implied that this change was a consequence of the mental breakdown and disappearance of Leo, his closest friend.
* Ensemble Stars!: Kaoru often refers to Adonis by the wrong name, claiming that since he has no interest in making friends with other guys he can't be bothered to learn his name properly. He does care deep down, however.
* Ensemble Stars! like this idea, especially since he still feels guilty about his own (mostly unwitting) involvement in Kanata's scapegoating.
* Ensemble Stars! loves fish. When he's cooking a typical fish dish, that works! When he's cooking anything else, he'll probably try to add fish (or something related like seaweed) into it anyway, even if he's making something like chocolate.
* Ensemble Stars! loves to play around and have fun and hates having to do boring things. And as the trope name might suggest, he absolutely loves anything shiny to a crow-like extent, hoarding coins and anything else that sparkles such as ramune bottle marbles.
* Ensemble Stars! most of all? However, Adonis actually responds "Anpan." After a brief shock, the final panel shows Souma furiously kneading bread dough - if anpan is the food he likes the most, Souma will try to make his absolute favourite anpan!
* Ensemble Stars!, musing in one conversation that Souma's hair 'really is silky' and that his figure from behind is 'deceptive'.
* Ensemble Stars!: No matter how many times someone tells him, Souma just can't seem to understand that it's a bad idea (for both legal and social reasons) to constantly carry around a sword. By the time of the Main Story Keito admits that he puts up with it due to Souma being his junior in Akatsuki and instead just tries to at least keep him from brandishing it when he can.
* Ensemble Stars! normally come with an associated story that features all of the characters in the related cards, which can be unlocked through nodes on any of those cards' idol roads. (This means that you can see the whole story without needing every card from the set.) However, rarely the gacha story will actually be a collected set of individual stories for each of the card characters, where the chapter of each vignette can only be unlocked on that specific character's idol road. This seems to be associated with New Year's, as it's happened with both the 2018 and 2019 New Years sets.
* Ensemble Stars! number of votes. In the case of a tie, the rules state that the winner is decided by sudden death, but due to all of the performing he's done at this point, Eichi can barely stand. Physically incapable of continuing further, he forfeits, granting Trickstar the win.
* Ensemble Stars! poor Tomoya who wasn't aware of these script changes at all, and leaving him yelling for help as Kuro proceeds to pick him up and try to physically carry him to the ball.
* Ensemble Stars! rather than performers or objects to ogle at, and they pour in a lot of blood, sweat and tears to become stars, with many ending up with their dreams crushed.
* Ensemble Stars! share a scene together, with Tori claiming that Tsukasa is

irrelevant and stuck in the past, and Tsukasa saying that Tori is just a young upstart lacking the 'proper' noble social graces.
* Ensemble Stars! strongly, to the extent that she often runs away from him on sight. But as time goes on and he starts to really fall for her, he pulls back a lot and stops with the careless flirting.
* Ensemble Stars! strong word for love in Japanese that is rarely used in real life). When she immediately becomes flustered, he reacts with confusion - his idol unit sings lyrics like that all the time! Why would this be something strange?
* Ensemble Stars! styles herself as this, often referring to herself as 'neechan', particularly when it comes to Mitsuru, her junior in the track and field club.
* Ensemble Stars! that Adonis and Kouga weren't able to come due to Undead being busy.
* Ensemble Stars! that he'd prefer to get a buzz cut, but it suits the cute and girly style of his unit so he's forbidden to cut it.
* Ensemble Stars!, the different units tend to be associated with one or two particular colours, though it's more of a guideline and there is some overlap:
* Ensemble Stars! The story caused a big backlash in fandom, with many demanding that Keito at the very least apologise properly
* Ensemble Stars!, this was Eichi's favored tactic, presenting himself as a kindly savior and hero of justice to maximize his unit's popularity while secretly undermining and sabotaging any competing units.
* Ensemble Stars! to be considered cool and mature boyfriend material, but fans of his unit only ever seem to find them all cute...)
* Ensemble Stars! to his 'master', and comic willingness to suggest seppuku as penalty for any of his mistakes - he even identifies himself as one, even though for obvious reasons the whole warrior class doesn't actually exist anymore.
* Ensemble Stars! to Shuu, to the point of valuing his life and happiness far above his own. However, Shuu always cared more about Nazuna, leading to a very unequal relationship. Over time, Mika comes to value himself more and realise how destructive his obsession with Shuu is.
* Ensemble Stars!, to the point that character pages on the Wiki have appellation charts.
* Ensemble Stars! understand how they worked at first, and quickly decides they're an excitingly easy way of quickly obtaining food.
* Ensemble Stars! well. Contrast Souma and Keito playing Ugly Stepsisters in their performance of Cinderella, where neither really bothers to change their appearance at all beyond putting on a dress and so just kind of look normal. When Hajime (reluctantly) dresses as a girl in Love Comedy, he is also said to be very beautiful and passes completely, though the audience never gets to see it. In fact, it's often commented that Hajime would make an extremely cute girl, but he's not interested in cross-dressing so he doesn't really like that.
* Ensemble Stars! whenever he can. In the main story, after he is kidnapped my Izumi in an attempt to make him part of Knights and keep him from going back to Trickstar, he threatens a much more permanent version, telling Izumi he'll beat up his face so he's not beautiful anymore unless he releases him. He even starts to do it, but when it hurts even more than he anticipated, he switches to foley work making it merely sound like he's beating his face up. It's not entirely clear whether Izumi was upset that his face was being ruined or because Makoto was hurting himself, but he does release him as a result.
* Ensemble Stars! which explained in painful detail exactly how basically every member of Ryuuseitai and Akatsuki were broken by the events of the war, which also achieved the kinds of extremely high ranking borders that made the creators guarantee a ranking card at 5.5 million event points. The plot of Youth Play Ball? Trickstar and 2wink accidentally both sign up to perform at the same baseball game and decide to do a joint performance and also play some baseball!
* Ensemble Stars! who is doing the trolling, as he knows for a fact that Keito doesn't like him but loves to tease him anyway.
* Ensemble Stars!, who sports a pastel blue bob, a gentle and meek personality, and some rather feminine hobbies such as tea and herb sachets, not to mention a knack

for laundry. As a result many characters refer to him as a girl, calling him a younger sister or ideal wife. However, he always insists that he's a boy and actually doesn't like being mistaken this way - he'd like to cut his hair much shorter, but his current girly style suits the youthful theme of his idol unit, so everyone freaked out and begged him not to.
* Ensemble Stars! with Chiaki even before he was reminded of it indicates that some of the feeling remained regardless.
* Ensemble Stars! with Nazuna and jumping from a second-storey window to talk to him.
* Ensemble Stars!, with Tsukasa eventually realising that he's only hard on Tori because the rest of his family mocks him and he always feels pressured to live up to their expectations of him.
* Ensign example where a senior staff member is outranked by someone not on the staff, but it's the most blatant.
* Ensign George H. Gay was the only survivor of Torpedo Squadron 8's ill-fated attack on the Japanese carriers during the Battle of Midway.
* Ensign Helen Zilwicki is the daughter of two Naval officers. Her father retired from Naval Intelligence as a Captain and now works for his second (adoptive) daughter, Queen Berry of Torch, as a spymaster. Her mother was a starship captain, who in
* Ensign Ro Tal Celes, who in fan fiction is often "corrected" to Celes Tal.
* Ensign Sue Must Die, and wants to get Kirk and Spock into a torrid gay romance with each other (once she's "taught them", of course).
* Ensign Sue Must Die, but is just as smitten with Emperor Kirk as Ensign Sue is with Prime Kirk.
* Ensign Sue Must Die creates the Sueniverse for her and her progeny to have her 'perfect' world, a multiverse-spanning resistance forms to fight the Sues and anyone they corrupted, consisting of Kirk, Bones, The War Doctor, Sherlock Holmes, Optimus Prime, Mr. T, Snake Eyes, Snoopy (as the Red Baron), Superman, the SWAT Kats, Luigi, Michael Jordan, Pippi Longstocking, Hercules, Xena Warrior Princess, Sailor Moon, Applejack, Scrooge McDuck, Spinks, Sam and Dean Winchester, Agent Coulson, Buffy the Vampire Slayer, Moomintroll, Speedy Gonzales, Mega Man, Michaelangelo, and Bruce Lee.
* Ensign Sue Must Die fiction, naturally makes Ensign Sue half-whatever-is-convenient-for-the-plot. She manages to rack up quite the number of halves.
* Ensign Sue Must Die, Spock has one. Spock Prime's reaction simply rubs the salt in the wound.
* Ensign Sue Must Die Spock resolves to kill Sue, and has a phaser set to "Pocket Death Star" pointed at her, but is wavering, with his hand shaking. When she starts bragging about being a perfect marksman, he scowls and blasts her full-force. (But she turns out to be immune to phasers.}
* Enslaved album. Like several of the other examples above, it stops abruptly.
* Enslaved Elves: A once proud and powerful race forced into squalor and servitude.
* Enslaved marriage veto, in that the Tribe's shaman is very against Katara and Zuko's union. The fact that they're already technically married doesn't sway him in the slightest.
* Enslaved: Odyssey to the West, a faded sign in the ruins of New York advertised a new car costing $7,000,000.
* Enslaved: Odyssey to the West: A large portion of the game takes place in breathtaking ruins of cities so post-apocalyptic that they're covered in lush greenery.
* Enslaved: Odyssey to the West and is actually used as symbolism/foreshadowing.
* Enslaved: Odyssey to the West gives us Monkey and Trip. Monkey is a HUGE, muscular wild man who can pretty easily rip war robots into pieces. Trip is a light, young teenager who relies on her brains to get things done. He carries her around on his back and throws her onto ledges and across gaps like it's nothing. She's only nineteen, and we aren't really given an age for Monkey, but it's safe to assume that he's a few years older than her.
* Enslaved: Odyssey to the West, in the ruins of the modern times. What exactly

happened to nearly wipe out humanity is never even discussed, characters mostly focus on continuing their survival and barely question the relics of the past.
* Enslaved: Odyssey to the West off so he can be free, Monkey tells her to put it back on.
* Enslaved: Odyssey to the West, one of Monkey's animations for taking down a turret is identical to a Neck Snap, but done to the turret's barrel.
* Enslaved: Odyssey to the West received positive reviews, but sold poorly.
* Enslaved: Odyssey to the West: Robotic dragonflies are said to have "evolved" primitive sensors in order to seek out sources of energy to feed upon.
* Enslaved: Odyssey to the West that will crush his skull if he disobeys her or she dies, because she can't survive in the killbot-infested wasteland on their own.
* Enslaved: Odyssey to the West, there is such a scene in Pigsy's escape pod (which was designed for one person). "It's just your hand is ... right on my ... Penis."
* enslaved them for a generation until they managed to escape. That's why the Androsynth hate humans so much.
* Enslavers, a kind of noncorporeal alien, "possess" living creatures, and
* Enslavers are Chaos beings that can mind control organic entities. They are typically compared to a plague more than a species.
* enslaves vengeful spirits by using them to reanimate fetus corpses almost instantly started featuring fan art of Seiga preying on the kid, thus adding another layer of depravity to Gensoukyou's Wicked Hermit.
* En Solitaire in the US), is about a young refugee who stows away on a yacht taking part in a race around the world. As the sailors are supposed to be making the trip solo, the captain of the boat has to keep him hidden when others are watching.
* ensorcelled after drugging her with sleeping powder. She woke up just as he was digging the grave, though.
* ensuing raid are all shot in various parts of the Royal York Hotel in Toronto; Victoria's limo even lets her out in front of Toronto's Union Station.
* ensured that the "spark" that kicked off the development of life would take place.
* ensure peace and justice by suppressing dissent. (They still have their Batman, though. They'll be fine.)
* Ensure shakes are a tasty nutritional supplement. The ads cannot make clear how.
* Entartete Muzik, who had cut his performing teeth playing jazz and swing trumpet, sent this up savagely and accurately when he had Hitler, Goering, Himmler and Goebbels start their own Nazi Jazz band. The result is as dire as you could expect.
* Entebbe Pact peacekeeping force at the Lozi (formerly Zambia) border, leading to a tipping point in the escalating tensions between the Pact and the French Concordat-aligned nations of Africa, triggering an all out war.
* Entebbe raid in 1976 negotiated with the hijackers and secured the release of all non-Israelis on the aircraft. The French captain — and the rest of the crew — refused to go, choosing to remain hostages until all of the passengers were freed (which they were, in the eponymous raid by Israeli forces).
* entechment process of oneself. The only person known to try it was already evil when he went for it, but it didn't seem to affect his personality any.
* Entei almost says this word-for-word in the final of the third movie.
* Entei is a lion-like dog possibly based on similar myths as Arcanine. It's said to bark, and it has a mane and retractable claws like a lion.
* En Tempus Veritas; Clark was planning to propose to Lois, but she walked in on him as he was practising it and drove him to make it right then.
* En Tempus Veritas, Martha is an obvious example of this, with Lois immediately asking Martha for any advice on how to be a good parent. However, when Lois is present for Chloe’s reunion with Moira, Moira gives her niece her own advice on being a mother.
* Entendre Failure: The risque meaning of the double entendre is lost on someone.
* Enteprise faces the Borg (most notably "Q Who?" and "The Best of Both Worlds"), the ship cuts loose with a massive volley of phaser fire and continuous torpedo bombardments that is extremely impressive, though of course completely ineffective

against this enemy (oddly against other, lesser but still dangerous foes, the ship never displays such a capability).
* Enter and Return). Unfortunately the bizarre nature of their operations generally result most of the other doctors trying to have as little to do with them as possible.
* entered casual conversation as slang threatening to "Base Delta Zero" some incompetent recruits.
* entered into a treaty of annexation with the United States. Santo Domingo would have become a territory of the United States with the possibility of statehood to come. The treaty was rejected by the United States Senate on a 28-28 vote (not as close as it sounds, because treaties require 2/3 Senate majorities for ratification).
* entering his stomach via his gills, or dropping down his blowhole. He's a mechanical shark-like whale that floats in one place and eats garbage by grinding it up. No need to worry about any biology failings there.
* Entering one room and finding it empty, save for an operating chair and a door on the end. Go through that, and find TWO operating chairs. Repeat until blood starts appearing and the increasingly large volume of chairs start getting attached to the walls and the ceiling, as the walls start to progressively cave in. Hmm.
* entering residences uninvited episode shows Angel leaning against one of them, causing a slight ripple upon impact.
* Entering Room 2 of the Crew Quarters and finding either Alice's body, Luna's body, or in some routes Alice
* Entering "S-U-N" as your initials at the end of a good game prompts the screen to display "No, not the sun, arghhh!"
* Entering the EOF initiation test with a lighted lamp will disqualify you because you didn't obey the EOF's orders.
* entering the room by loudly declaring her plot foiled and teleporting away with Siesta, with whom she'd been having tea.
* Entering Week 14 of the 2016 season, the Lions were 9-4, in position to take the NFC North for the first time in decades. The Packers and Vikings were both 7-6, and seemingly in no position to challenge them. Naturally, they lost their next three games, including a for-the-division regular season finale against the Packers, and limped into the playoffs as a 9-7 Wild Card team. Getting clobbered by the Seahawks was basically inevitable at that point.
* Enter Ken Finlayson: features this such as using "freak" as an expletive. It is justified given the K+ rating of the story.
* Enter Ken Finlayson: Moloch the Death Raptor. He shows up half-way and is killed off in the second to last chapter in the first story in a series of fan fictions.
* Enter Ken Finlayson sequel "Snickery When Damp" manages to use this trope without the individual in question actually appearing in person. Mrs. Finlayson is only identified as Afro-Eurasian and since "Afro-Eurasia" is the name of the collected landmass that is Africa, Europe and Asia that does not narrow down anything, which Heidi of course lampshades. Apparently that is the extent of the rest of the Finlayson family's knowledge and would they ever find out Mrs. Finlayson would kill the entire family, extending it to in-laws and the children of Ken's older half-sister Ulrica.
* enter "kings of the battlefield" is, in fact, their ability to handle virtually every kind of terrain the game has to offer.
* Enter Laughing is named after an occurrence of this trope where the protagonist, a novice actor, reads the stage direction "Enter Laughing" in his first rehearsal.
* Enter Laughing takes its title from this trope, and the example therein.
* enter people's body through the mouth and take control of the host so that they can breed.
* Enterplay trading card that features Cloud Kicker as the main character.
* Enterprise accidentally time-travels back to the 1960s — he's breaking into a U.S. Air Force base to retrieve anachronistic footage of his ship.
* Enterprise, allegedly because it was a quick refit of another ship still under construction.

* Enterprise and all of the Vulcans from both sides died with the planetoid.
* Enterprise and being sent back to the Academy with Pike being infuriated at this (and at Kirk falsifying reports to hide his behavior. But Pike later pulls strings to make him his First Officer since he still has faith in him).
* Enterprise, and used him as the archetype for an entire species. However, when you look at how Vulcans were portrayed in the canon, you saw Vulcans acting in quite un-Spockish ways, even as far back as his "wife" in the original series who manipulated things to get out of her arranged marriage.
* Enterprise and vegetarianism. They claim that their designation is incorrect, as they believe that expressing emotions doesn't mean rejecting logic.
* Enterprise"), Archer could probably have replaced the sample set for about 50 bucks. But to the alien merchant, they were exotic spices from a distant world, which he could probably have sold for significantly more than the value of the formula he traded.
* Enterprise attempts to catch up, but it’s too late and the shuttle explodes in the atmosphere.
* Enterprise at the hands of the Xindi; for the rest of the season and into the next one, she looks like she's on the verge of falling apart.
* Enterprise back down—Chakotay intervenes to save the prisoner. This scene earned Janeway a "Madame Airlock" reputation well before Roslin.
* Enterprise being hijacked, pointing out that as an android he could be on-duty all the time if he chose to. Geordi tells him it wouldn't matter, as the theft could have just as easily happened with Data manning his station on the bridge.
* Enterprise being overrun by Ferengi. But the name of their species is never used.
* Enterprise bored him, and that he much prefers the many troubles and challenges that the station poses.
* Enterprise but about eighty percent of the artificial gravity will remain for quite some time.
* Enterprise, but does frighten them into opening communications and peace talks when their war computers are destroyed.
* Enterprise casts the Andorians as Romanticism incarnate, and Shran is an exemplary model of it.
* Enterprise, changing her into a brand new, state of the art ship, complete with a more advanced bridge, warp core, an integrated deflector dish, and a set of rectangular nacelles.
* Enterprise-class is designed to be Starfleet's most formidable Starship class, with a full 360 degree arc of fire for its phaser banks and is capable of firing salvos of photon torpedoes. In addition, it carries a large complement of shuttles for transporting VIPs and conducting away missions.
* Enterprise-class starship, the particular smugglers they were after were only interested in intercepting a pre-arranged transfer of equipment, so they weren't paying attention to the derelicts.
* Enterprise class. When Scotty from TOS era visits the ship he is placed in a standard guest quarters, he remarks that such a spacious room in his time would be reserved for an Admiral.
* Enterprise contradicted this by introducing Zephram Cochrane, the inventor of Warp Drive, a 21st century human.
* Enterprise-D also encountered a "coalescent organism", which killed someone and then replaced them. By the time they realized it, Geordi nearly became its next victim.
* Enterprise-D, believing that there is a traitor among them. When her investigation proves fruitless, she becomes rather unhinged, causing the saner admiral presiding over the events to excuse himself immediately and halt the investigation.
* Enterprise Despite the relatively mundane explanation this episode had some of the most genuinely creepy moments in the series.
* Enterprise destroys the dilithium-rich Pharos siteworld, resulting in the creation of a giant fireball that would burn for decades.
* Enterprise-D if she had been designed as a dedicated warship, and the effect is

pretty familiar to anyone who has served in a modern navy: crowded, utilitarian, and noisy — even aping the constant PA announcements in the background. If you listen closely, references to the ship's CIC can even be heard in a scene set in Ten-Forward, which is no longer a bar, but a place for the crew to gather and eat the Starfleet equivalent of B-rations.
* Enterprise-D is designed to accommodate families, making it full of Starfleet brats of all ages. Captain Picard, who is uncomfortable around children, is less than thrilled.
* Enterprise-D is less obviously mechanical-sounding than on the original series, but is still a very brisk, businesslike tone.
* Enterprise displays a notable exception to this rule in the fourth season (after playing it straight in the first season, with the same character no less) when Archer is briefly exposed and spends the rest of the episode struggling to walk and breathe, with his eyes completely bloodshot.
* Enterprise does the cool trick of firing half a dozen photon torpedoes simultaneously, appearing to be a single torpedo that splits into multiple ones to inflict damage on an attacking Klingon ship.
* Enterprise do often die, and even more lives are lost exploring the Gamma Quadrant.
* Enterprise-D's being generated by the computer itself to gain those same absolute administrator privileges!
* Enterprise-D, stardate 41153.7, correlates to February 20, 2364 at 5:36 am.
* Enterprise-D was pretty bad at it. Their crewmen were captured, their surveillance apparatuses blown wide open, their technology pillaged. When the Federation is probed by a heretofore unknown race (and not the other way around), things typically go much smoother.
* Enterprise Earth after being a live fill-in (though he had apparently been asked to join at least once prior to that, but declined because he was still trying to make Delusions of Grandeur go somewhere at the time) and became a much bigger name than his old band ever was as a whole.
* Enterprise Earth (bassist Rob Saireh and former guitarist Yusef Johnson)
* Enterprise-E novella; Geordi La Forge hangs around for a few stories more, until the new characters are established enough to carry the series.
* Enterprise episode "Yesterday's Enterprise", respectively), fueling some speculation about how they carried on Kirk's legacy.
* Enterprise even after Soval has suffered a total emotional breakdown, Soval angrily berates him for being stupid and insists that he crank his device up further until he's convinced.
* Enterprise. Even decidedly non-action types like Wesley and Troi got their moments to take the spotlight.
* Enterprise-E was slated to self-destruct on confirmation from Worf and Crusher since Riker was unavailable at the time.
* Enterprise. Fashions from dress uniforms to suits are shown as having developed from their modern-day equivalents.
* Enterprise fires a massive barrage of torpedoes into the atmosphere of a planet to try to intimidate the locals into releasing a captured officer. The gambit fails.
* Enterprise follows the Sphere and blows it up before jumping back to its own time.
* Enterprise found therein contained instructions that the ship would mostly confine its operations to Class-M planets, though the ship did, of course, carry spacesuits.
* Enterprise from a modified Boeing 747. This same 747 was later used to transport the Shuttle from its runway in California to its launch site in Florida.
* Enterprise had a brief appearance by a species that needs to be weaned from one atmospheric gas to another at age four. Given the timescales evolution works on in complex life forms, the difficulty of keeping gases separate on a planetary scale, and the requirement to pretty much re-grow the lungs, this being a result of natural evolution is akin to the chances of finding a moon made of cheese.

* Enterprise" had Trip unintentionally impregnated with an alien embryo after putting his hand in a box of "pebbles" at the same time as the Alien Babe Of The Week.
* Enterprise has a Korean-American (Linda Park) playing a Japanese woman (Hoshi). But in general, the later series were more accurate, with human characters either played by actors of appropriate nationality, or being from worlds other than Earth.
* Enterprise, has a third arm extending from his breastbone and a third leg between the other two.
* Enterprise has a whole wardrobe department stocked with historical uniforms and other clothing (this was before the replicator, which would have made more sense). Because Kirk and Spock have already been caught, and McCoy's boots don't fit quite right, McCoy is captured as well.
* Enterprise, he insists that his Maquis trainees eschew personal affectations.
* Enterprise. He orders the system removed and have the crew go back to using old-fashioned screens for communication. According to Pike, he never liked the damn thing anyway - it makes everyone looks like a ghost. Presumably, the rest of Starfleet will eventually follow suit to the point where it won't be re-introduced until the 24th century (and abandoned just as quickly).
* Enterprise herself, specifically her design, inspiration and construction has gotten backstories.
* Enterprise in "All Good Things" features an enormous phaser cannon on the bottom of its saucer section which can destroy powerful Klingon warships with a single shot; it does not appear to cause significant power drain or require a long reloading time.
* Enterprise in front of the crew, leading to this discussion in the Ready Room:
* Enterprise in orbit was silent. In the third cut, back to the surface, the phaser noise returns.
* Enterprise is already "easily offended") because on their planet you eat alone. "You eat like you mate!"
* Enterprise is deliberately sent back in time to Earth in 1968. Kirk and Spock are arrested as spies when they're caught inside McKinley Rocket Base.
* Enterprise is lured into the trap by its previous victim - a thousand year old ship which still has life support and gravity.
* Enterprise is neither the flagship nor the most technically-superior ship in the fleet, it has always the best crew by far.
* Enterprise is shown not to be able to hit anything with them. In another episode (pre-phase cannons), they're testing spatial torpedoes. When those fail, the crew acts as if the ship is defenseless, forgetting about plasma cannons. In fact, the only time a plasma weapon is successful is when a farmer shoots a pissed-off Klingon with a plasma rifle.
* Enterprise is that the official story about Saturn V was a coverup.) On the other hand, Spock also mentions a coup in Asia on the same day and indicates that the nuclear platform launch was just one of many that occurred, such that "the sky was full of orbiting H-bombs" at some point, but neither of these came to pass. (Spock's prediction of an uprising in Asia is sometimes tied to a coup in Iraq, but that was over three months after the King assassination and the Saturn V launch.)
* Enterprise it isn't even a formal bridge officer position — neither Worf nor Harry Kim were actually called communications officers, they just handled the hailing frequencies open/being hailed bit as part of their general duties.
* Enterprise jump to warp while executing a transport, as they were in a big hurry for another emergency and needed to offload the away team as quickly as possible. The transport doesn't kill anyone, but it has the effect of causing the away team to be briefly shifted a few meters from their destination. Deanna remarks that she thought she was inside a wall for a few moments, which Worf explains is exactly what happened.
* Enterprise just to teach Kirk a lesson. To reduce overpopulation by introducing disease into their society again, actually, so there was a logical reason for getting Kirk down there, although there was a simpler way to do it.
* Enterprise-J was built as a generational ship, capable of folding space to

instantly travel to other galaxies. It is so large that its turbolifts are replaced with site to site transporters, and it features massive parks and even an entire university on board. Its saucer is roughly 26 miles in diameter.
* Enterprise level to so much more advanced they couldn't even understand the underlying principles. At least one race built a working Dyson sphere, then evacuated it for uncertain reasons (though a likely explanation was that the star at its centre was becoming unstable) and then seemingly vanished without a trace.
* Enterprise long enough for her sparring partner to deck her. T'Pol calls Trip out on this afterwards.
* Enterprise much of the navigation system. That's engineers who are cetaceans. From Earth.
* Enterprise novel does address the issue and points out that Starfleet does have anti-fraternization rules in place, but a crewmember points out that they're just copied from the old navy and don't really apply to long-term space missions.
* Enterprise novels, where Shran starts to call Mayweather "pinkskin", and then realises, apparently for the first time, that this doesn't work.
* Enterprise offensive. When asked how they do it, the alien explains that it's the same, but eating in the presence of others is a disgusting act for them.
* Enterprise of this trope. The opening titles of this episode are changed to showcase humanity's history of war and destruction, and show us taking that heritage to the stars, in contrast to Trek's usual emphasis on humanity's history of exploration and curiosity.
* Enterprise on an asteroid. Because of the limited oxygen supply and reach of the shuttlepod, they believe they're stranded in space and try to face their oncoming deaths in their own conflicting ways.
* Enterprise. One of them is that replicators only produce cat's supplements, meals for Data's cat Spot.
* Enterprise only the bad guys ever enacted IT security pertaining to anything except the self-destruct. Forget circuit breakers, surge suppressors, seat belts, where were the PASSWORDS?
* Enterprise on the members of the very first Babel peace conference. An alliance of these powers would represent a greater threat to them, while war would eliminate them as threats for years to come. The Romulans' actions instead helped found this alliance, and the rest is history.
* Enterprise personnel were (voluntarily) possessed by alien mental entities. When speaking, their voices were very different (louder and a different pitch, like in an echo chamber).
* Enterprise, Picard refuses to engage the self-destruct and evacuate the ship.
* Enterprise, Picard walks into his room to find him listening to what sounds like a death metal band doing the sound effects for an iron foundry, played at eardrum-piercing levels. It is, apparently, the latest thing among Talarian teenagers.
* Enterprise posting because of a past relationship with Dr McCoy - who, of course, wasn't yet the CMO in the original timeline.)
* Enterprise provides a slight twist by being a Vulcan whose annoyance with humans isn't veiled as well as it could be. Jolene Blalock has claimed this is intentional, and this claim fits with the show's general depiction of Vulcans as being arrogant, hypocritical, and easily annoyed. She also becomes a bit of a crackhead in later seasons, addicted to a substance that breaks down her ability to control her emotions.
* Enterprise Q, beaten in a fight by Trelane, reduced to mere essence, and tossed back in time a million or so years, that provided the power to Mitchell and Dehner.
* Enterprise' Recruit Barracks at the Great Lakes USN base, which is organized as a ship for administrative purposes. Now that CVN-65 has been decommissioned, CVN-80 is expected to be number nine when it enters service in 2025.
* Enterprise rescues Picard/Locutus, who they use to destroy the Borg Cube...by telling them all to "go to sleep".
* Enterprise returns to a planet that a young Lt. James T. Kirk conducted a survey on, sometime previous.
* Enterprise - Role Play Game in Star Trek, a Japanese RPG published by Tsukuda

Hobby alongside their tabletop strategy games.
* Enterprise's. Also, Scotty is almost immediately seen back out working again; it's not stated but likely that Kirk realizes how pointless it all is.
* Enterprise's computer causes it to start talking flirtatiously and calling the captain "Dear". Kirk said that the folks the repairs had been outsourced to thought the computer needed a personality, "so they gave it one."
* Enterprise, scraping off some plating as though the shields aren't even there. Think about it, energy shields might be able to stop small energy fire and torpedo fires, but it won't do squat against giant spaceships with huge momentum behind them.
* Enterprise's five year journey is filled with them. Chapel, having given up on her crush on Spock, is thinking of becoming an M.D.. Kirk's getting bored with the heartbreak of captaining and is looking to pack it all in. Spock reflects on the many times he's lost emotional control over the original and animated series, thinking maybe it's time he got around to taking the kohlinahr.
* Enterprise silently move past the camera. That felt "dead" so the swish was added, and remained there for the rest of the series.
* Enterprise's is having engine troubles, but the ship's chief engineer hasn't come aboard yet. To save himself some time and hassle, he immediately puts O'Brien in charge of the engine room, despite his not yet actually being a member of the engineering staff.
* Enterprise's main computer with all the data from their home planet. In order to download it back into the planet's mainframe, a passcode needs to be entered. However, since the Bynars always operate in pairs the passcode has to be entered at two separate terminals simultaneously.
* Enterprise's medical officer, Dr Phlox, is from a species that must hibernate a few days every year. The crew try to wake him up with a stimulant to treat an ensign who's broken his leg, only for Phlox to emit a long stream of nonsense (both before and after he wakes up).
* Enterprise societies are terminally dependent — because of the profits of selling the drug, the race that provided them ended up structuring their economy around it.
* Enterprise's systems were not exactly optimized; Red Alert was as much an optimization of emergency systems such as hull plating polarization, allowing said systems to power up in seconds rather than minutes, as it was a warning for the crew.)
* Enterprise stating that Qo'nos was four days away at warp 4.5. The real-life equivalent star system, Omega Leonis, is 112 lightyears away.
* Enterprise's tech manuals and the manufacturer's originals was the line "Warranties void if evidence of tampering is discovered."
* Enterprise's, "The Best of Both Worlds": In the absence of any other way of stopping the Borg from assimilating Earth, Riker ordered Wesley to aim the ship at the Borg cube, and go to maximum warp. (It's unclear exactly what happens when a ship in warp hits a solid object, but at a minimum a forced collapse of the warp field would be tres chaotic.) Fortunately, this proves unnecessary.
* Enterprise suffers multiple hull breaches, one of which shows three redshirts getting blown into space.
* Enterprise that causes the head of Starfleet Intelligence to walk out in utter disgust.
* Enterprise (the fifth one, CV-6) had a steering engine breakdown in the middle of one of the carrier battles for Guadalcanal, jamming the rudder into a hard turn. Fortunately the crew had rigged an emergency steering engine in case this very thing happened. Unfortunately, everyone in the compartment with the backup was knocked out by toxic gas released from nearby fires. It took nearly thirty minutes for someone to reach the compartment, and before he could turn on the backup motor he passed out as well; fortunately he came to fifteen minutes later and managed to turn on the backup motor. While all this was going on, another Japanese air raid was detected approaching but turned away fifty miles out.
* Enterprise the Galaxy class proved its worth as the backbone of Starfleet.

* Enterprise the only ship close enough. Apparently, if the Romulans ever decide to bring the fight to our heroes, they'll only have to get past one ship...
* Enterprise. The Vulcans are characterized not only by logic and the silencing of emotion but also by duplicity and paranoia, not unlike Romulans of earlier series. The Syrrannites are a rogue sect who strive towards the ideals of Surak, a legendary Vulcan pathfinder (in that, if Vulcans bothered with religion, he would be their Moses). The Vulcans in that series claimed to follow the teachings of Surak, but had "fallen," so to speak — they forgot what Surak had really stood for. T'Pol says that reading Surak's works were a life-changing experience for her.
* Enterprise. The writers described him as the kind of guy "who fumbles around women, but is in love with his '57 Chevy."
* Enterprise, they had to discontinue this and instead began operating in fleet-sized groups.
* Enterprise to have the trial occur on the ship while they're in transit, and in the end the charges are dropped.
* Enterprise to him. He punctuates the demand with, "You have ten of your minutes".
* Enterprise to make it slow down and come in close enough to get in a single hit. Fortunately, that one hit cripples it.
* Enterprise to phaser blasts. So the crew turn to the one guaranteed way of killing off a crew member. They give her a promotion which changes her shirt colour from blue to red. They waste no time and go on an away mission, where she is killed almost immediately.
* Enterprise to send a message into the next loop, which helps the crew save themselves and the other ship.
* Enterprise to the Original Series, they actually introduced a storyline to explain the change.
* Enterprise, Tucker crash lands on a small moon that is habitable while it is night time. Once the moon rotates to face the sun, it is uninhabitable for human life, as it is too hot.
* Enterprise-type starship bombards the Lunar colonies with photonic torpedoes.
* Enterprise uses her phasers to bore a hole in a planet so an away team can beam to an underground location they couldn't get to otherwise.
* Enterprise visit an empire that arose from a group of Chinese colonists on a remote planet. Riker teaches the local nobles how to play poker but finds it far too easy to beat them. Then he realizes why: they never fold. When he asks them about it, they tell him that a true warrior never backs down from a fight. He then explains it in a way that makes sense to them: a good general will cut his losses and pull back his troops in order to win a battle or a war. Once they start seeing the game in this way, they get much better at it. Another local starts a rivalry with Worf and demands a duel to the death. They postpone it until the end of the book, but then they (quite sensibly) decide to settle this matter with a game of poker.
* Enterprise, Vulcans are apparently resistant or disciplined enough to defeat such measures. When a villain is interrogating T'Pol about the possibilities of time travel, she is able to respond using what is technically true: "The Vulcan science directorate has determined that time travel is impossible."
* Enterprise was involved in him getting the assignment to the Federation flagship).
* Enterprise was originally broadcast when TV was transitioning to color, the set design would need to look visually interesting in color while also providing contrast for viewers who still had black and white TV sets.
* Enterprise, we can't forget the numerous times the Suliban have been able to get in and out right under their noses. They're a slippery bunch indeed. They also had to deal with the Borg once.
* Enterprise were ordered to film an alternate version where they don't, but deliberately sabotaged every take to drain the budget). And that's not even mentioning things not affected by budgets, such as cloaking devices and hyposprays.
* Enterprise were originally ships captured from the French that had their names

reused for new ships after the original was lost.
* Enterprise when Dr. Arik Soong took augment embryos left over from the eugenics war and did a little tweaking in an attempt to make perfect humans. Unfortunately it didn't work and they still had the same ambition, ego and beliefs about genetic superiority.
* Enterprise: When human crewmember Elizabeth Cutler is attracted to the Denobulan Doctor Phlox, it's not mentioned whether his sixteen-inch tongue is part of the appeal.
* Enterprise, when it appears that they may not be able to return to their own time; as he prepares to attempt to rescue Data from the clutches of the Borg Queen, he gives the order that if he doesn't return, they should pursue happiness in this era, "and stay out of history's way."
* Enterprise, which still used the Gregorian calendar; the series predates the founding of the Federation which would in turn adopt the Stardate.
* Enterprise. While Charlie repents in the end and promises never to use the powers again, Kirk and the Thasians agree that it's too much of a temptation.
* Enterprise, who turn out to be trapped in a time loop, start getting weird memories and feelings that turn out to be bits of information and memory filtering in from past trips through the loop, the most noteworthy being a moment where several crewmembers suddenly hear voices that turn out to be audio echoes from an earlier loop. At the end of the episode, they figure out how to use this effect to send a message into the next loop, giving themselves critical information that allows them to break the loop and escape.
* Enterprise - with the titular ship getting caught in the middle of a war started by religious schism over whether creation took nine days or ten. At the end of the episode, it turns out their civilisation had destroyed itself, just like the previous incident.
* Enterprise XCV-330 that Jefferies actually might have designed it at some time after the end of TOS, for another Roddenberry-project which never did come into fruition.
* "Enter Sandman" is also the entrance music for Virginia Tech's football team at home games.
* Enters a whole other dimension of ham with Spanish-speaking commentators, hot Latin blood and all that:
* enters her dream, causing him to wake up. He immediately realizes that he has a large burn mark.
* Enter Shikari by switching between von Clownsticket solos, the band's standard synthesizer-heavy post hardcore and a trance instrumental.
* Enter Shikari fans and Hadouken! fans. We don't know the exact reason, but it's nice to be friends, right?
* Enter Shikari has 'Thumper', a black-and-white performance video with (terrifying) doodle-drawings of the band over it.
* Enter Shikari mixes post-hardcore with various electronic genres and in certain songs, rap.
* Enter Shikari's song "Gandhi, Mate, Gandhi", frontman Rou descends into borderline Angrish about halfway through, before being interrupted by voices urging him to "calm down mate, calm the fuck down" and "Gandhi, mate, just remember Gandhi". These lines were not prepared or written - fellow band members Liam/Rory and Chris were loitering outside the recording booth, drunk, and were heckling Rou as he recorded.
* Enter Stage Window: A character visits their friend via climbing through their window.
* enters the coffin to save Daisy, he admits himself that it wasn't just to save her, he thought it would have been better if he'd died trying
* enters the fight against Thanos's army by riding the bifrost into the middle of the field, taking out the Outriders pinning down his allies with a single throw of Stormbreaker, and then unleashing a massive lightning-laced blow that kills hundreds more.
* Entertainingly Wrong: Sound though your reasoning is, it nonetheless fails to

lead you to an accurate conclusion.
* Entertainingly Wrong (When somebody is wrong, for the right reasons.)
* entertainment center" – basically a stand with several dividers, which went along with the TV, VCR, audio equipment, connectors and remote control – whose components today would be worthless (except for perhaps the audio components, even though there's virtually no market today for cassette tapes and even compact discs are declining in share).
* Entertainment for one main oft-repeated reason: the former is direct, sad, and "brutal" whereas the latter is funny, and its praise for the performers is secondary.
* Entertainment for the Braindead, however, because, through a variety of playing styles (she picked it as normal, she played it with a violin bow, and she even played percussion on it) and plenty of tracking, she got an entire band's worth of sound out of that single instrument.
* Entertainment for the Braindead sometimes employs kitchen utensils, salt shakers, and drawers as instruments. She also uses actual instruments in non-standard ways, such as using a guitar or banjo as percussion.
* Entertainment Software Ratings Board in comparison and are only featured on the back, whereas ESRB ratings are large enough easily spotted, are far more descriptive concerning software content, and are on both sides of the package.
* Entertainment Tonight host John Tesh made a cameo as a holographic Klingon in the episode "
* Entertainment Tonight piano version of the theme plays at the start of each episode.
* Entertainment Tonight's Juan Pablo during her interview segment with him.
* Entertainment Tonight, the initial female anchors were Marjorie Wallace and subsequently, Dixie Whatley.
* Entertainment Tonight (the periodic symbol for iridium - the densest of the elements). This segment also provided the page quote.
* Entertainment Weekly) and how it went straight-to-video in the first place.
* Entertainment Weekly but also bragged about only watching two of the five episodes made available (and not even in order), they were utterly destroyed by readers and other critics for doing a terrible job at their jobs.
* Entertainment Weekly has a few examples in some pages, including the "Bullseye" sections.
* Entertainment Weekly, they've been finding other ways to acknowledge Pride since then.
* Entertech Water Pistols are one of the reasons that toy guns are molded in garish colors now to keep police from misinterpreting a child's toy as a real gun, and keep criminals from using them in holdups. The commercial even clearly
* Enter the band or choir rooms at school and it will probably look like insanity when not in rehearsal. Make them marching band kids and it will become even crazier. Heck, just throw a bunch of musicians in a room together and it will seem like a different world.
* Enter The Dojo, or something that looks more likely to hurt the user than the opponent (particularly "the Hurticane", which consists of flailing around like you're having an epileptic fit). Matt Page, the creator of the show, has claimed that a lot of them were based on actual "deadly techniques" espoused by self-proclaimed experts he'd met.
* Enter The Dojo, Stephen tries to get out of date with Fiona by saying he needs to drain his fish tank or his catfish will cough up another hairball. She doesn't buy it for a second, though.
* Enter the Dragon: After being defeated by taking that large kick by Bruce Lee's character, Oharra grabs a bottle and shatters it, intending to use it on Lee. Unfortunately for Oharra, this wasn't enough to prevent his death by being crushed underfoot by Lee.
* Enter the Dragon got quite badly lacerated during a take of his fight with O'Hara (Robert Wall), as the glass bottles Wall smashed to make his ersatz daggers were quite real.

* Enter the Dragon, Han tests Roper's moral limits with a near-literal example of this by placing his own cat in a guillotine. Roper balks. It turns out the guillotine was fake.
* Enter the Dragon, he remembers his master's advice and starts smashing the mirrors so that he can draw Han out.
* Enter the Dragon, Mr. Han. It is the first time we actually see Han in action so naturally, this trope in invoked.
* Enter the Dragon. Oddly enough, Lee was sent there for the specific purpose of bringing the villain down while the two minor characters were at the tournament for unrelated reasons.
* Enter the Dragon once fights a villain with different prosthetic hands. When going unarmed against the villain's weaponized hand, Jackie grabs other hands, which turn out to have rather mundane uses, like toothbrushes, instead of weapons.
* Enter the Dragon plays with this trope slightly by having the force that attacks the villain's base be released prisoners kept on that base.
* Enter the Dragon's character, who proceeds to demonstrate how it's done. This may not be shown on the edit/cut/version you're watching, though.
* Enter the Dragon, showing off his amazing physique as he beats up wave after wave of mooks.
* Enter the Dragon: Subverted when Roper and Lee, both captured, are ordered to fight each other, but refuse. Roper is instead forced to fight against Han's giant bodyguard Bolo - Lee having previously fought and killed another of Han's bodyguards, O'Hara.
* Enter the Dragon: The Big Boss is defeated. The two battered, exhausted heroes spot each other and exchange thumbs-ups. Then a bunch of helicopters arrive with backup. Bruce Lee regards them with a "now they get here" expression.
* Enter the Dragon when Roper brings several rickshaws worth of luggage with him on his way to the tournament.
* Enter the Dragon) while dressed in black wrestling briefs, shoes, shin coverings, and gloves. The opponent is dressed in nearly the same garb except his briefs are bikini-style.
* Enter the Dragon who received a big scar down the right side of his face from Lee's grandfather when he tried to rape Su Lin, Lee's sister.
* Enter the Eagles have Martin using dual pistols in his shootouts, notably when forcing villains Hussein and Karloff to back down, both at once.
* Enter The Farside, and Aberrant is neckless with four arms that join at his elbows.
* Enter the Farside, as well as parts of Staffordshire where the main character lives.
* Enter The Farside: Despite being gifted with immense strength and physical durability, Shaun just wants to be a normal person who goes through school and has a regular life.
* Enter The Farside has Jolly, leader of the Mancurian Freakshow. Jolly accepts any inhuman or physically deformed Fargraced, as long as they've been physically changed by the Farside and as long as you're useful and pull your weight.
* Enter The Farside, has made this his pet project. He even explains some of the pitfalls associated with having a suit of Power Armour, as well as why he can't mass produce them easily.
* Enter The Farside is the story written by Saramoff about a young adult with superpowers who joins the superpowered police of Manchester. The world is full of Eldritch Horrors, with Earth being linked to a parallel plane of alien, inscrutable madness called the Farside.
* Enter The Farside: Shaun is more than capable of hurting anybody with ease, so he intimidates and uses small displays of force to get that idea across to people, without actually having to hurt them at all. As long as people are aware that he can, they know better than to try anything.
* Enter the Florpus comic series, which began publishing in 2015 and once dedicated a whole issue to Zim and GIR getting obsessed with binge-watching a show.
* Enter the Gungeon actually has the table-flipping as a gameplay mechanic, except,

unlike most examples, it's done not as a sign of anger, but as a way to provide cover from the enemy fire. However, the Table Tech Rage item invokes this by having the character get mad after flipping the table, which increases their damage.
* Enter the Gungeon against you, this is a direct reference to the fist-fight that Solid and Liquid Snake held atop the machine. Of course, winning the third round is optional; your run still continues if the Rat knocks you out.
* Enter the Gungeon: All of the playable characters (Gungeoneers) try their luck in the Gungeon to find the Gun That Can Kill The Past and attempt to fix their pasts.
* Enter the Gungeon and uses it to erase all of their past mistakes, including these game overs.
* Enter the Gungeon during a run, since the higher it is, the bigger the chance an enemy spawns as Jammed. As a small bonus, silver bullets also deal a little more damage to bosses.
* Enter the Gungeon features The Lich, the undead form of the very first Gungeoneer, in Bullet Hell after defeating the boss of each Gungeoneer's past.
* Enter the Gungeon full of Religious-like elements and the Cardinal enemies, Bullet kin in priest clothing
* Enter the Gungeon good reason to use any more, but you also can hardly round a corner without tripping over one.
* Enter the Gungeon has the Sling weapon as an allusion to the trope namer. It's stated that the weapon should only be used as a last resort but it does decent damage the larger enemies are, and gives a massive 4X boost to its already respectable damage when fighting a boss.
* Enter the Gungeon. If you win, though, you're treated to a stash of items, weapons and pick-ups.
* Enter the Gungeon some shopkeepers, and even they might be hiding some crazy skills with a gun. The player characters can fit any type depending on the weapons they have, and if they pick up enough during a run, they can end up being all four at once.
* Enter the Gungeon states outright that words have power in the Gungeon so puns, idioms and metaphors can eventually become literal and be weaponized. The entry that mentions this is for the Barrel weapon, which shoots high velocity fish, as in "Shooting fish in a barrel".
* Enter the Gungeon (the Convict and the Hunter), possess revolvers as their default, infinite-ammo firearms. A lot of other handguns are also revolvers, and many are really cool. Examples include the Frost Giant (a large, powerful revolver, which fires as fast as the player pulls the trigger, and every shot from which also discharges a cone of ice from the barrel that freezes enemies up close), and the Devolver, which often converts the enemies it doesn't kill outright into the weak Arrowkin.
* Enter the Gungeon, the player characters are all questing for "The Gun that can Kill the Past", which can let them go back in time and deal with something from the past.
* Enter the Gungeon through clever use of certain gimmick weapons) and disappears automatically when the player has cleared the room.
* Enter the Matrix (2003) had all actor's movements, combos and speech mo-capped. This resulted in the very smooth movements, unfortunately overshadow by graphics, obsolete even by 2003 standards.
* Enter the Matrix but includes driving and hacking sections and concludes with a spaceship (well, hovercraft) combat sequence.
* Enter the Matrix, in some missions, if either Ghost or Niobe fail to save their allies, the mission fails and it will say "YOU FAILED TO PROTECT *insert ally’s name*". In two missions for Ghost, the missions will also fail if he doesn't shoot the plane's front tire to save his ally Axel, "YOU FAILED TO SHOOT THE TIRE OF THE PLANE", flee the control tower after destroying the Agent Helicopter "YOU FAILED TO LEAVE THE TOWER IN TIME" or losing the plane Niobe and Axel's in, in a different mission. "YOU LOST THE PLANE".
* Enter the Matrix. It's not necessary to shoot up civilian vehicles to pass the levels, but they take a lot less damage to blow up, and it's fun besides. The

Agents' cars, however, are immune to damage.
* Enter the Matrix, popping in and out of the actual plot of the film as needed.
* Enter the Matrix reason why they couldn't have let the player do that themselves.
* Enter the Matrix, you cannot kill agents by beating them down or shooting them, but in the rooftop level you can hit them until you push them off the precipice. The fall does them in.
* enter the Mirror World, they become visible but leave no reflections.
* Enter the Phoenix, Georgie Hung remembers the first time he realized he's gay...getting his temperature taken rectally at the age of 6 with a big smile. The credits also show some outtakes where different faces were made by the actor playing 6-year-old Georgie.
* enter the same dream together where he was trapped in a car with Gumball's unconscious body, which he'd started eating out of desperation.
* Enter the villain, unleashing a torrent of green netherworldly fire yelling,
* Enter the Void after his death. At least that is how his sister imagines it in a nightmare she is having.
* Enter the Void as the greatest opening credits sequence in film history.
* Enter the Void, during a drug deal at a club. The police start raiding the place and he heads for the toilet to flush down the drugs on him. A disgusting scene of him shoving the pills down the drain ensues.
* Enter the Void: Oscar and Linda's parents appear rather prominently in multiple flashbacks, but they're both long dead in the present after dying in a car crash.
* Enter the Void we see a flashback of Oscar as a kid as he walks in on his parents in their bedroom having sex.
* enthusiastically complies, maybe taking off much more clothing than expected (like not stopping at the underwear), before trying to get frisky with the man before he could explain that he didn't mean it that way.
* Enthusiastic Newbie Teacher: A friendly teacher who is just out of schooling.
* enthusiasts have put together giant lasers, glove-sized lighters, electromagnetic 'guns', various pranks, and useful tools.
* entire 1998 Belgian Grand Prix, but chiefly the almighty pile-up at the beginning. Michael Schumacher slamming into the back of David Coulthard — and then storming over to the McLaren garage and accusing Coulthard of trying to kill him — is a close second.
* entire air just one at a time, but blocks of two anti-Dish commercials combined with other DirecTV commercials are more common).
* entire and even dubbing the other's part...Anyway, it was funny as hell.
* entire are experts of solving problems via improvisation, from wiring a meteor to reposition the ship, to landing mobile workers onto enemy ship via ramming on it.
* entire as proof of Dukhovich's crimes despite this being set in the modern day and that is the only kind of evidence that seems to work.
* entire basis for Yeerk promotion Inspector the Council sends to check in on Visser Three.
* entire binomial or trinomial name, which can be quite confusing and unrelated species of organisms ocasionally having the same common name.
* entire body, including their DNA, effectively temporarily turning them into programs.
* entire body. There's a Numskull in the mouth whose job is to shovel food down the hatch, and another whose job is to process it when it gets to the stomach.
* entire career got the same fate in 2015 after it was found out he made racist and homophobic comments, but was allowed to return to WWE programming in 2018.
* entire cast demand it. Other varieties depend on how many animals you want in the cast and if you have a humane society demanding that any animals in your film survive it unharmed.
* entire centuries, but elf children can be seen prancing around Lletya and Prifddinas, so clearly fertility isn't a problem.
* entire city is in the jar and the people inside are just going about their daily lives and trying to ignore that their universe effectively ends at the City Limits signs. They probably consider that it's better than the alternative, given that

pretty much every other Kryptonian city blew up along with Krypton itself.
* Entire classes of chemicals have been banned (CFCs and insecticides, for example) due to their impact on the environment.
* entire collection into various bodies of water and sell bait (instead of the clothes themselves) to see people try to fish them up.
* entire. Depending on the light, it varies between green and black. His eyes changed from amber to dark brown and his shirt and pants changed from black to brown. His armor's colour scheme is also different, having shades of dark green and brown as opposed to bright green, black and red.
* entire. Due to hijinks relating to the body-switch premise of the manga, Momoi (in Uehara’s body) jumped on stage during a school production to stop a kiss between Uehara (in her body) and Senbongi and said she was jealous of all the time Uehara got to spend with Senbongi. All the girls in the audience got flustered, and the male student body president spent the whole night mass-producing yaoi manga of the two, which all the girls were shown reading and buying multiple copies of. Later, when Senbongi rebuffs the advances of some girls by saying he’s interested in someone else, they excitedly ask if it’s Uehara, and say they’d encourage such a relationship.
* entire episode was rife with these - all coming from the character's mouth.
* entire ER staff gets to hear Mark admit to Doug that he's never had sex with anyone but his ex-wife.
* entire essays of compiled evidence that they are actually in a relationship that their management covers up.
* entire family and the relationship would not have survived the episode no matter how you cut it.
* entire film was inspired had about a metal skeleton coming at him through fire.)
* entire first season opening, complete with the show's title appearing at the end of the scene (this was set up by the fact that the regular theme and title were not where they were supposed to be).
* entire fleets to throw at their problems. When Whitebeard goes to Navy Headquarters to rescue Ace, he doesn't just bring his own crew- which is so big that it needed four ships to ride- but also a few dozen other pirate crews allied with him.
* entire fleet). The Covenant leadership considered the first no great loss, and the second nothing more than a minor, if irritating, setback. That's how outgunned and outnumbered humanity was during the war; even early in the war, when the Covenant was dedicating such a small percentage of its forces that humanity actually held the numerical advantage in space, the UNSC was still forced on the defensive.
* entire freakin' point, but a good number of them are broken out by the Parr family so they can start a new life in the current timeframe of the story.
* entire fucking squadron by openly bragging about it over the radio, even after Bandog warns him numerous times that he's treading a very thin and dangerous line. So to save his own ass and the asses of the rest of Spare, Bandog tags the loudmouth pilot as an enemy during a lapse in reliable IFF, and gets him killed in the crossfire.
* entire galaxy coming together to form a third faction in a desperate attempt to beat the both of them down and end the conflict.
* entire game for everyone. Since there was no way to reverse the effect, it only got used once.
* entire game is based on an image by the artist Raita (proposing many of the female main characters) that became memetic on the /a/ board of 4chan before 4 Leaf Studios decided to make it a reality.
* entire genre good at it (although, sadly, some of the best at it became so due to mental health or alcohol and drug problems).
* Entire genres have come about from fans. Known as 'Wrock' and 'Trock' (short for '
* entire genre will never make an album on the level of their first solo records (with the possible exception of Ghostface Killah); the list goes on and on.

* entire head-esque helmet connected via tubes to a collar-like life support system around his neck.
* entire. His opposite number at Shiloh, Ulysses Simpson Grant, who commanded the larger army, at the time was just a major-general (two ranks lower).
* entire in the U.S. and Canada: while in the former countries, traditional animation is a dying breed and CGI animation is becoming more and more common, Japanese animators are notorious for sticking to their guns and still using traditional animation. There's a few Japanese CGI films and series, but most of the time they're experimental works and never intended for being used for replacing traditional animation as a whole.
* entire kitchen is filled with his friends and family for a surprise party.
* Entire light novels failed to be adapted! Volume XV takes place between the events depicted in season 2 and season 3, introduces even more of the characters seen in
* Entirely accidental, unlike many of the above examples, but the the battleship USS
* entirely accurate nickname of The Mad King have gone unrecorded, however...
* entirely, and (unlike Alison Steadman as Mole), she doesn't seem to be Doing a Voice that might be intended to sound male.
* entirely avoided when they think their parents didn't actually get married.
* entirely by accident. They tried to solve the world's energy problems with solar power satellites, but miscalculated the power of the microwave beams used to transmit the energy to the surface and almost burned off the entire atmosphere.
* entirely due to luck. in court. Even so, some pinball machines still sport "entertainment use only" warnings to allay nervous communities.
* Entirely justified in that the freed people are all Internet geeks and hackers and let's face it,
* Entirely new characters who live in the same fictional universe of a franchise and whose specific relation/association to the original characters may or may not be revealed. They can be complete strangers, new close friends, relatives including ancestors and descendants. In some cases, such as certain epic
* entirely non-comical. With his malfunctioning plane in a barely-controlled dive, Captain Whitaker has to wrestle the control yoke with both hands, forcing him to rely on his co-pilot and a stewardess to operate flaps, throttle and landing gear for the improvised landing.
* entirely playable for players that don't spend real cash on Aeria Points, keeping the balance between payers and skilled players.
* entirely popularity of the Soggy Bottom Boys, and it's practically reasonable.
* Entirely Presenting You, Alexis can't tell her closest family and friends about her secret-identity as the bloodsucking-superhero known as Blank Face.
* Entirely Presenting You, Alexis gets thinner and thinner as the story progresses, yet she boasts incredible super strength.
* Entirely Presenting You, Alexis takes a bullet through the head. Her healing factor saves her, but her personality and memories get affected, and she no longer feels connected to her old personality. Eventually she abandons her old life to be someone else.
* Entirely Presenting You, despite Alexis' hard-fought battle to save him.
* Entirely Presenting You develops a thirst for human blood upon gaining superpowers. ¨
* Entirely Presenting You is the story of Alexis, a girl coming to terms with her new superpowers, and becoming the world's first superhuman.
* Entirely Presenting You, on her first night out in the mask, Blank Face tries her best, but is forced to take questionable actions at times.
* Entirely Presenting You: The story follows a teenage girl as she comes to grips with gaining powers of a 'vampire.'
* entirely put their own twist on it, called "Friggin' in the Riggin'", in which it's even more obvious.
* entirely replaced Eliza's skeleton in exchange of granting Eliza eternal youth as long as she feeds on blood. The two of them have been together for so long that

their personalities have effectively merged and they no longer consider themselves separate individuals.
* entirely; rock bands who do this unsuccessfully generally end up merely jamming, which isn't the same thing.
* entirely sustained so he can sue him so he can have an expensive wedding with Luanne. It turns out that Dale built the railing himself—without a permit, makes his own poison (he's an exterminator), is his own boss, and made up a fake liability insurance carrier just to shut Hank up. Lucky's lawyer tries to sue Strickland Propane because Hank suggested that Dale hire Lucky.
* entirely The book is a cross between straight drama and an erotic romance novel—few laughs to be had at all.
* Entirely too many high-ranking officers and Warlords of the Draconis Combine have shown similar tendencies for the Dragon's comfort. In their case, the root cause tends to be a mix of ambition, obsession with martial glory, and the Combine's take on
* Entirely ubiquitous, everywhere, surrounding us and closing in, or being sold in large numbers to an unsuspecting public (such as a voodoo doll), etc.
* entirely white and given New York's status as a cultural melting pot with several immigrant communities it's more plausible for Peter's high school to be ethnically diverse.
* entirely with theoretical smarts, making them geniuses but ravaging maniacs at the same time. One character is infected with just one of the earwigs spreading the condition, making him just a bit geekier, but his crying daughter beats him to the ground with a club anyway (though he doesn't die). Zoë asks why she did it and she explains it's because he's a geek now and she's a cheerleader.
* entire male faculty challenging the varsity basketball players to a charity game.
* entire map without engaging a single enemy. In the spinoff, his palette swap Bro Caesar has the same ability.
* entire menu, rattled off in under thirty seconds in a mid-1980s TV spot. "BigMacMcDLT-aQuarterPounderwithsomecheese-Filet'OFish-ahamburger-acheeseburger-aHappyMeal-McNuggets-tastygoldenfrenchfries-regularorlargersize-andsalads-cheforgardenorachickensaladoriental-BigBigBreakfast-EggMcMuffinhothotcakes-andsausagemaybebiscuits-baconeggandcheeseasausage-danish-hashbrowns-too-andfordessert-hotapplepies-andsundaes-threevarieties-asoftservecone-threekindsofshakes-andchocolateychipcookies-andtodrinkaCocaCola-DietCokeand-orangedrink-aSpriteandcoffee-decaftoo-alowfatmilk-alsoanorangejuice-IloveMcDonald's-goodtimegreattaste-andIgetthisallatoneplace!" Fun fact: this was initially a promotional stunt, where anyone that recited the full thing in a certain amount of time won a free burger.
* entire of the backstory plot, and b) metaphors for overcoming your personal demons of the past (i.e., another echo of the plot).
* entire Ogg family turning on them. (It's noted that the main reason for Ogg family infighting is because Nanny Ogg deliberately provokes them into feuding with one another, mostly to relieve her boredom between supernatural crises.)
* entire outfit seems painted on. She's basically modelled as though she were naked but coloured red (blue in III).
* entire plane. The seal, for the record, wasn't made to save mortals from Asmodeus and his devils — but to save the other gods from him. Hence why mortals are free to poke holes at the seal and let devils come and do Faustian pacts. If you are dumb enough to do it, you deserve what's coming to you.
* entire plot of it; they have to go there to stop him every time he launches an attack.
* entire plot, with the second question being which scenes are "real" and which are hallucinations. The writer / director has admitted that he didn't even bother coming up with answers to any of that—he just had an idea and filmed it.
* entire point into better versions of themselves by training your firearms and driving skills, giving some cars powers like guns and jumping abilities.
* entire point series, since you're trying to peel away lies to uncover truths in the courtroom. Appropriately, the people being asked often react as if they've been

physically pierced by the questions.
* entire point was raised to believe this, but he still seems to have a bit of an entitlement complex about the whole thing.
* entire race) being killed off in a devastating Time War. Guilt compounded by the fact that the Doctor themself dealt the final blow, as first indicated in the episode "Dalek":
* entire reason should shoulder those burdens, and this just happens to mean he decides who gets killed and when.
* entire recorded output) is either directly or indirectly about (post-)punk rock and its pitfalls.
* entire restaurant when he goes to pick up the check. It works beautifully.
* entire robot cadaver as a life-support system for their critically wounded leader, and it's every bit as horrible as it sounds.
* entire route is North-South and "Northbound/Southbound" is what appears in the public timetables, but the officially north-south part of the route actually travels 20 miles farther to the west than it does to the south!
* entire screen turns red during Maugrim and Peter's fight. When Peter stabs him, there is no blood.
* entire series does this. The first episode opens with Tenchi delivering an internal monologue as he walks to school alone, lamenting the good old days when he used to hang out with those crazy girls from space... the show then spends nearly its entire run flashing back to how Tenchi met and went on adventures with said girls, until the last five minutes of the very last episode, when we return to Tenchi walking to school alone.
* entire series from the beginning instead of describing the plan, and finally is cut off by his father clarifying the actual battle plan.
* entire series, where individual serial killers and psychos end up joining together and, in some cases, dueling against one another. It's up to the viewer to decide who to root for, because everyone in the show is going to Hell anyway.
* entire series, with Naruto, Hinata and Rock Lee pretty much all saying "screw destiny" and fighting on.
* entire ship though, since it was not unknown for ships that caught fire to explode spectacularly when the flames reach the powder magazine.
* entire; should you somehow avoid this, the van will never show up, so you're stuck until you reset.
* entire show, but it actually came out in 2007. Unsurprisingly, the show was a flop. Whether or not the 90's-isms were because of the creators trying too hard to bring that type of cartoon to a new generation or the show being in development in the 90's is anyone's guess.
* entire species, become literally nothing but Evil with a lightsaber- making him possibly the only villain to ever hate himself out of the laws of reality.
* entire story can be considered a backstory to the Exiles, while also being a current series of events.
* entire story footsteps), and his counterpart here is turned into a mysoginistic bully that always gets what's coming to him by karma.
* entire territory a few times, before being snapped back on track by Cassandra.
* entire theme based around the US Coast Guard, which is, legally speaking, a branch of the military. However, the Coast Guard's primary function is rescue and law enforcement, making it acceptable by the company's standards. That said, at least one of these sets contains a model that wouldn't be allowed in any other context— a rescue helicopter that is clearly meant to be a Sikorsky HH-53.
* entire theme park filled with deadly traps and games just to get even with Yugi for the loss.
* entire, the notable exceptions being Kyle Broflovski himself and his adopted brother Ike.
* entire Thermian race. A specific Thermian, Laliari, also appears at the end of the movie in the credits for its relaunch.
* entire. The tape the main character buys in order to re-affirm his heterosexuality somehow knows that the main character is not doing what it asks him

to do, knows he has fallen in a trap and, after the song it puts ends, it knows he has been dancing. It's implied he really just imagined this, though, since at the end it asks how he did.
* entire, Thrash ended facing the very same fate he inflicted on the echidnas, gone and never coming back.
* entire town just to throw her a surprise welcome party. She only gets crazier from then on...
* entirety, means some terrible stuff can still happen. It's actually a part of the backstory that the sun never sets.
* entire Tyranid splinter fleet. And Emperor help you if you ever face them fighting all together as the Phoenix Court of Khaine...
* entire universes) our world, in which their adventures are described in a series of books by Stephen King — actually referred to as the "Keystone World", and the only one for which time travel is impossible. Destroying the Tower in either of these universes would lead to all of God's (er, "Gan's") creation being unraveled.
* entire village was slaughtered to create the Millennium items, also engender a lot of empathy.
* entire when Haruhi tries to explain the truth of her sex to the club's customers, the girls assure her that they've known all along and don't mind a bit. Only later, after Haruhi and Tamaki have left for America, is it revealed that what they "knew all along" was that Haruhi was a gay crossdresser and that Tamaki was in love with "him."
* entire, with no trial - so he can explain to her how terrible an idea that is. He tells her that he would outright murder her first, if for no other reason than that destroying Mike would almost certainly doom Luna's entire population of three million.
* entire year, during which his body and mind atrophy beyond repair, but he is given just enough medical attention to keep him physically alive, and his hand is amputated for use in leaving a clue that links him to the Greed murder. By the time he is discovered, he has long since chewed off his own tongue.
* Entitled Bastard: A character who mistreats another, yet expects them to help them.
* Entitled Bastard: Expecting the same person you insulted and bullied to save you when you're in trouble.
* Entitled Bastard hates them. Lelouch classifies the Kenshiki as terrorists that must be exterminated with extreme prejudice.
* Entitled Bastard: I can treat you however I want to treat you, and I expect you to do stuff for me or else!
* Entitled Bastard: Isn't grateful for your help, yet expects you to help them anyways.
* Entitled Bastard: I want your help, even though I've made your life a living hell.
* Entitled Bastard: These idiots should only be helping ME with my problems. Who cares how I treated them!
* Entitled Bastard: Treats people like crap, but still expects them to serve their interests.
* Entitled Bastard - When a villain expects the heroes to save them because they are "the good guys".
* entitled In the end, all Tirek cares about is hording all the power in the world for himself.
* entitled to have Mamoru since he's the reincarnation of Endymion and she felt herself to be the proper ruler of the Moon Kingdom (thus the queen of the moon should be married to the prince of Earth).
* Entitled to Have You: If you're a good person, you are obligated to have romantic and/or sexual relations with me. No exceptions.
* Entitled to Have You: Propertius devotes some of his poems to saying he's entitled to have Cynthia.
* Entitled to Have You simply for being part of a certain group, doing or not doing something, or simply for existing.

* Entitled to Have You: Somebody feels that a person worthy of their respect should have sex with them.
* Entitled to Have You: Someone believes that they are more deserving of the person they're attracted to than the one the person truly loves.
* Entitled to Have You: The character who believes they deserve sex or a relationship from another.
* Entitled to Have You: Who gives a shit if you're in love with someone else? You're mine to do whatever I want!
* Entitled to Have You: You're going to be mine, regardless of what YOU want! You have to be with me, I WANT you!
* entitled Vengeance thanks to chewing through ammo and being hard to keep in good repair.
* entitlement. Said financial trouble is due to spending most of her money on frivolities, like shoes or alcohol.
* Entity 303, also referred to as "The New Herobrine", was another popular
* Entourage, Andrew Klein pulls the rarer "on purpose" scenario to get back at his wife after she burned the notes he needed for an important business meeting.
* Entourage, Ari Gold's marriage is about as turbulent as any given war and yet they've remained together. "When we got married, we agreed to suffer this monogamy together, baby!"
* Entourage, Ari persuades Vince to do a very well paid Chinese energy drink commercial.
* Entourage), Billy Walsh proposes creating a tv show based on Vincent Chase and his entourage of friends and associate's experiences in Hollywood. Ari Gold thinks it's a terrible idea.
* Entourage, he forgets to turn off his microphone and the whole studio crew hears him.
* Entourage Johnny Drama has no trouble dating bodybuilder Tanya, and, despite his friend's taunts, has great things to say about the sex. Unfortunately, she also has considerable jealousy/ rage issues.
* Entourage: Turtle tries to track down a girl named Kelsie to whom he spoke with on the phone but hasn't yet met. Thinking he's found her, he asked a girl if her name was Kelsie and she replied, "Even if it was, I wouldn't admit it." Turtle walked away, cursing brutal honesty.
* Entourage when Ari played a round of golf against a studio head, wagering Vince's role in one of the studio's movies. The exec was coached by Phil Mickelson and it looked like Ari had no chance of winning. It all came down to the final putt which Ari missed. The miracle came when the exec began yelling at Ari, had a heart attack, and dropped dead. A stroke of luck, indeed.
* Entourage will do this. Matt Damon is the best example, with one episode ending with him begging for donations to a child charity on his phone, becoming more and more overly emotional each time and going further into overblown ham comedy.
* Entourage, with petty, egotistical actors and actresses who are easily tempted to ruining their lives with drugs, unscrupulous producers and studio heads, basically anything you can think of when showing the dark side of Hollywood, the show does and doesn’t hold back.
* entrails hung out (a.k.a disembowelment). Also, a working girl was hired to try to take some overzealous nibbles while working down below.
* "Entrance Qualifications", he was not actually hit by the door but by the ninja flying through the now-open door, but it's close.
* entrances. There are also much smaller person-sized worms that cast magic— although considering they are immobile in combat, it's needed to prevent them from being too damn easy to kill with ranged attacks.
* Entrancing Wendy fic where a married Wendy finds herself falling for Captain Hook after she reunites with him in England.
* Entrancing Wendy: Jeremy likes showing off his wife Wendy at events.
* Entrancing Wendy: Wendy finds that her husband isn't the same as he was when he was courting her. She loves him, but not quite like she used to.
* Entrancing Wendy, Wendy has a long-time childhood friend named Elizabeth "Lizzie"

Forbes. She's a few years younger than Wendy but they've been friends since their parents had known each other for years.
* Entrapment a clock's chimes are used to mask the sounds of breaking in.
* Entrapment bank system shutdown critical to the attempted $8 billion heist also ran the CIA room that was thieved in M:I.
* Entrapment in one of these as she slinked through a maze of trip beams, it's not clear.
* Entrapment: Mac destroys a security camera, before taking Gin into a room filled with gas, so the security patrol will think they try to avoid the gas-filled room.
* Entrapment performed most (some sources say all) of the climbing and gymnastics in the rafters herself.
* Entrapment played by Catherine Zeta Jones. Done to death in all its hilarious application.
* Entrapment: The film's climax is during the eve of Year 2000, thus making the epilogue set in this decade.
* Entrapment: When Max and Gin are escaping their chasers in the Petronas Towers, they try to climb along the lights hanging from the bridge joining the two towers, but the cable breaks and leaves them dangling a very long way above the ground. They manage to climb to safety, after which Gin takes some deep breaths.
* Entrapment, which started a heist-film revival after two decades of relative silence on the caper front.
* Entrapta becomes this, too. She defects to the Horde (albeit partially because she believes her friends abandoned her on purpose), but she isn't so much im
* Entropia is about a weapons manufacturer who begins to realize the implications of his job.
* Entropy. Dawn also walks into the house and catches sight of it, Willow covering her eyes comically. Of course this doesn't change the fact that Xander and Buffy have just seen their respective love interests going at it - and it's still presented as a tragic scene.
* Entropy) from her blood with little effort and, during the Draconequi/Alicorn War, created a creature called Nightmare Legion from the Shadows inhabiting her realm.
* Entropy It's not discussed on how she got the position, but it's plausible that her mother had a hand even if they note that there was notable friction between Amy and her mother.
* Entropy Max the tendency of Zafira getting ignored by both the writers and the fandom.
* Entropy of Mass Hysteria, on a regular basis to the point it's described as being equal to one member of a bickering couple shoving the other one.
* Entropy that he'd been trying to ignore and suppress his feelings but then at that moment, he discovers he can't deny it anymore, not to mention the only good times he's really had by this point (as the fics go into detail about how much crap he's gone through) are with her.
* Entropy" when vengeance demon Anya is trying to get someone to unwittingly curse Xander.
* Entry 31 does it again when Jay keeps spotting a guy in a hoodie on the same nature trail as him. He eventually just walks right up to the guy, who turns around to reveal
* Entry of the Gladiators as the Ringling Brothers/Barnum and Bailey circus music.
* "Entry of the Gladiators greatest, march of all time, but the number of people who would recognize it if they heard it is negligible compared to "Entry".
* Entry Pimp: Adding a particular trope or work to every page one can think of.
* Entry Pimp to its page wherever they can. Many are also Trope Creators (first spotting tropes that appear in their favorite work) or Browsers/Casual Example Adders (adding entries for their favorite work whenever they realise the trope turns up). If said work doesn't have a page, they're likely to take it through TLP to get some help with it.
* Entry to the subway tunnels underneath Downtown was built using an abandoned train tunnel that connected Penn Station in the Strip District and the mainline of

the Pennsylvania Railroad above the Southside. When subway was built the point where the tunnel curved toward Penn Station was turned into Steel Plaza Station, with a new tunnel splitting off to continue underneath downtown. However, the old tunnel continuing to Penn Station was kept along with a shuttle line and platform serving it, ostensibly to connect the subway with the Martin Luther King East Busway. This line became obsolete, however, when the Busway buses had their routes rerouted to take them into Downtown itself, and the shuttle line was cut. The platforms for the shuttle, however, are still at Steel Plaza Station and are rarely ever used.
* entry was a variation of this: She masqueraded as a physically disabled child wearing leg braces and needing crutches to walk, made a scene in the lobby when a security guard tried to deny her request to meet Candidate Johnson, and played on her "disability" in order to gain access to him and carry out the attack.
* Ents are just as long-lived as elves, as Treebeard explains to the hobbits. They have a tendency to get sleepy and tree-like, but they never age.
* Ents, being massive, unintelligent creatures that usually turn to stone in the sunlight.
* ents have likewise almost completely faded from the world after the loss of their women, with only a small doomed remnant remaining in Fangorn Forest. Middle-Earth is a fantastic and magic-filled land by our standards, but by its own it is a drab, grey and mundane world when compared to its ancient past.
* Entwined is blond and in no short supply of suitors and can barely say a bad word about someone.
* Enûma Eliš-dragons, various demons, scorpion-men, and rabid dogs.
* Enver Gjokaj. The producers joked that Sousa is the cop's grandfather.
* Enver Hoxha of Albania was pretty much this to the communist world in the
* Enver Pasha, one of the Triumvirate of "Young Turks" that ruled the Ottoman Empire during World War I. In 1922 he turned up in Central Asia organizing Muslim tribes in the hope of recreating the Ottoman Empire from scratch, in the midst of the Soviet Union no less.
* environmental appearances mod readds accessibility for these optional environmental encounters to Mother Base.
* Environmentalist and grizzly bear enthusiast Timothy Treadwell was killed (along with his girlfriend) by one of the very bears he swore to protect in 2003. When park rangers discovered his ruined campsite, they found his video camera, which had managed to record audio of the fatal attack.
* Environmental means, wherein the laws of nature are structured in such a way to punish any visible magic (Ex: Paradox from
* Environmental Narrative Games) tend to fall under this. Game mechanics and interactivity are extremely limited, the games rarely feature any characters onscreen and the emphasis tends to be placed on exploring an environment and storytelling.
* Environmental Narrative Games tend to receive this criticism, due to their limited interactivity and lack of challenge, to the point that some critics deny that they are even video games at all.
* "Environmental Science": Troy and Abed's duet of "Somewhere Out There".
* Environmental Station Alpha has various piles of pulsating flesh that damage you when you touch it.
* Environmental Station Alpha is the Hookshot and much of the game's platforming centers around careful use of the it to swing towards high places.
* Environment Specific Action Figures wearing a green costume in Gotham city.
* Environment-Specific Action Figure: The tendency for action figure lines to have multiple figures of the same character, but with differing costumes and accessories.
* enviro-tyranny. They outlaw laughter, judging that it unduly wastes air, one of Nature's precious treasures.
* En Vogue's "Free Your Mind" dismisses this trope - "I might date another race or color / It doesn't mean I don't like my strong black brothers!"
* Envy absolutely loves using this to make people squirm. Unfortunately for him,

he admits to killing
* Envy and Edward are one of the most popular anime ships, to a lesser extent in
* Envy at one point turns its lower arm into a blade when fighting Ling.
* Envy because of it, specifically because Ed, the one they hate the most, is showing it to them.
* Envy could have been lying, though, as Envy is wont to do, and the anime never really covered Envy's backstory, or his relationship with Dante. We know his true identity, and... pretty much nothing else.
* Envy deeply envies humans despite his vocal disdain for them, hence why he disguises himself as a human most of the time. Father desires freedom after spending his entire existence trapped in a container. Father seeks godhood because he believes that is the only way he can be truly free.
* Envy is a spiteful, sadistic psychopath who exists to cause discord and
* Envy. It finds it most useful to change into people, but isn't limited to that; its "true form" is...let's just say you don't want to meet it down a dark alley. Heck, its true form wouldn't even
* Envy's a disgusting, malignant sadist to be certain, but they're so comically inept and mindlessly hateful that they're able to make you laugh at their
* Envy uses the same trick on Ed, except this time he/she kills him with it
* Envy, was released straight to DVD in all of Europe following its negative American reception.
* Envy: When Tim becomes rich, J-Man demands money from him in exchange for not reporting him for killing Nick's horse.
* Enya prefers to stay out of the spotlight and very rarely appears in public. Part of this can possibly be attributed to the fact that she's had stalkers in the past, some of whom have broken into her home.
* Enyo, was, almost literally, the goddess of war crimes, charged with orchestrating the sacking of cities to make them as horrible as possible. Her job was literally to create
* Enzo Amore had a rather low-key hairstyle when he was first signed to WWE. He eventually became known for outrageous and impressive adjustments to his coif - notably shaving a leopard print design into the sides. In 2015 he also bleached his hair blond as a tribute to
* Enzo and Cass: Cass debuted in 2011, Enzo in 2012, a year later they teamed up.
* Enzo and Cass - Enzo Amore (Eric Arndt), Colin "Big Cass" Cassady (William Morrisey)
* Enzo getting glomped by AndrAIa earlier in the season. Not that he seemed to mind.
* Enzo Jannacci's song "Faceva il Palo" ("He Was the Lookout") is about a very skilled gang operating at the
* Enzyte or Extenze should show before and after photos... har har har.
* Eobard Thawne also has a lot of similar traits. He struggles to understand or relate to the emotions of others, has a very particular way of speaking and tends to repeat certain phrases, has very rigid internal rules and plans things far in advance, and fidgets a lot while stressed or thinking. The intensity of his obsession with the Flash is also very similar to the special interests that autistic people often have. He seems to be over that particular obsession by
* Eobard Thawne (as Harrison Wells) was revealed to have been watching Barry and his allies using hidden cameras to see what they have been doing.
* Eobard Thawne blames Barry Allen for every bad thing in his life, which makes no damn sense whatsoever. It doesn't help that Eobard is an
* Eobard Thawne comes from a future where cows are extinct, which has led him to have a hamburger obsession while living in the present.
* Eobard Thawne eventually learned how to tap into the Negative Speed Force, an energy that poisons and drains regular Speed Force users.
* Eobard Thawne is extremely self-centered and willing to trick or kill people he thinks of as friends for his own sake. It's revealed in Season Two that his mortal grudge against the Flash is based on the fact that he couldn't become a great hero like him. His ideal world, as shown in

* Eobard Thawne keeps adding aliases to his ever-growing list. He's been called Reverse-Flash, The Man in Yellow,
* Eobard Thawne/Professor Zoom was not only just as fast as Barry Allen, but he learned how to gain
* Eobard Thawne's New 52 suit, which is basically Barry's DC You suit, but worse because of off colours and "extreme" additions, like the busy black lightning and weird take on his symbol.
* Eobard Thawne. This has caused him to gain a half-joking reputation amongst fans as a petty troll who goes out of his way to be responsible for every bad thing that has ever happened to Flash, no matter how insignificant or harmless said bad thing is.
* Eogrus, who made a lot of semi-Slash Fanfics pretended to be Rated K+ or T.
* Eoin Colfer: "He lied, and we both knew; what we didn't know was whether the other knew that we knew."
* Eoin Colfer series. W.A.R.P. is actually "Witness Anonymous Relocation Program," which has the fantastic premise of hiding its subjects with the use of time travel to displace them in time. Thing is, time travel has a lot of problems that haven't really been hashed out and everything ends up falling apart.
* Eoleo is arrested for piracy and locked in a suspended cage outside Belinsk Castle to frighten him out of using his powers to get away. He is one of the two sentenced to Cruel and Unusual Death
* Eoleo is the son of the famous pirate, Briggs. In the previous game, he was just a baby with some powers. 30 years later? He's now pirate like his dad before him with a mastery of
* Eoleo's improbably red ponytail for a male example. Really, he's a pirate and he wears his hair like
* Eon. A Chronicle is a piece of historic fiction, intended to glorify the participants in a particular event, whereas a History is a bare-bones account of the facts surrounding a place or an event, and there are often both Histories and Chronicles describing the same events. For example, the Kharzim Chronicle stated that Kharzim drove back a Tirak horde so large that "grass no longer grew where it marched" from the gates of Hazr at the cost of his own life. The History of Hazr describes the same event as follows: "Skirmish with Tiraks at Hazr, Kharzim and 68 others dead. Enemy dead uncounted, but number does not exceed 200. Supplies running low, negotiations with humans concerning construction of trading post at Hazr in progress." The fun begins when well-meaning but clueless scholars from other cultures start taking Chronicles at face value.
* Eon also hails from an alternate universe, one where the Industrial Revolution took place in East Asia rather than Europe. It was written in 1975 and did not anticipate the collapse of the Warsaw Pact and the U.S.S.R. In this reality 2005 has come and gone without a nuclear war.
* Eon is seemingly locked inside the bathroom, and comes up with a brilliant escape plan involving a piece of soap, a razor, wire and some other articles, to which the main character responds: "Or we could just open the door." Turns out the door wasn't locked at all.
* Eon: Non-civilized tirak tribes often make armor out of bones, including making helmets out of skulls. It is common for old members of the largest sub-species to bequeath their heads to up-and-coming warriors of the smaller ones, so they will have materials for a good helmet.
* Eons Ago was involved in one long ago on Cybertron. It was called off when his fiancé died.
* eons less offensive than say, the United States. Even in first grade, one can get away with terms like "hell", "damn", "devil" and "Satan" without so much as a judging glare.
* Eon's wife was the daughter of an Arab sheik and loved her father so much that she could hardly bear to leave him even to marry a king. Her father had been a
* Eon. The Jarts are a species (really a conglomeration of assimilated species and whatever you'd call "original" Jarts) that exist primarily as virtual personality fragments as a sort of hive mind, where bits can be combined, split off and

downloaded into an artificial body to perform any given task. The book's protagonist, Olmy, discovers an "individual" Jart who had been captured by humanity centuries earlier and downloads it into his mental implants to study. The Jart, because of the "species'" inherent flexibility to modify itself to fit into any environment capable of holding a conscious entity is easily able to reverse engineer the implants interface and downloads itself directly into Olmy's mind, reversing their roles. (He gets better.)
* Eon the reason for elves' and dwarves' inability to get along is explained by the fact that the elves and dwarfs have fought five highly destructive "great wars" against one another. According to legend, the first one ironically started when the dwarfs accidentally made a terrible diplomatic faux pas by laying down their weapons in front of the elvish negotiatior. In elven culture, this is a declaration of war ("Now, the only thing that can be between us is arms!"). The conflict is easily fueled by the extreme differences in mentality and culture. Elves are famous for flowery language and long greetings. For dwarves, spoken language is for conveying information, and the subtleties are expressed with tone and body language.
* Eon: The Vrakylaks are a species of semi-sentient, crawling organs that embed themselves in the neck of their victims, manipulating them ether through promises of release or threat of violence (they're attached to their nervous system after all) to kidnap more people and bring them to a nest. When the time is right, all the little Vrakylak's newly hatched spawn crawl up to the secured victims, and the cycle begins anew. Oh, and victims progressively go blind from the symbiosis.
* Eon: Zigzagged. There are four Dwarven clans; Ghor, Roghan, Drezin and Zolod, each with their own culture putting them somewhere on the Straight-to-Subverted spectrum.
* eorl "warrior, leader, chief") because the French equivalent (Count) sounds too much like "cunt". However, the Earl's wife is still a Countess, and the next rank down is Viscount.
* Eosapiens, the most advanced life form on Darvin IV, are able to hover using large bags of methane gas. In
* Eos asked Zeus to grant her lover Tithonus immortality, but neglected to ask for eternal youth to go with it, and apparently Zeus was not in an especially giving mood when he granted her request.
* EoSD battle butlers named Satono Nishida and Mai Teireida as penultimate bosses.
* Eos of the dawn once fell in love with a mortal and asked for him to be immortal... but this only resulted in him shrivelling into a grasshopper or cicada, as she forgot the youth. When Selene, Eos' sister was in a similar situation, she asked for her lover to remain the way he was when she first saw him forever, forgetting that she is the titaness of the moon, so Endymion was asleep at the time.
* Eos was cursed by Aphrodite with an unsatisfiable sexual desire for sleeping with Ares, Aphrodite's favourite lover. Because of this, she carried away many handsome young men to be her lovers, including Tithonus, Cephalus, and Orion. Like other gods in the Greek pantheon, she
* Eox is a world of the dead after a superweapon tore it open to the core. The atmosphere was ripped away as radiation and sorcerous energies ravaged the surface. The native race transformed themselves into undead in an attempt to weather the cataclysm, while every other lifeform either died out or was warped into something new and horrible.
* EP-018 "Beauty and the Beach" is this, as there isn't much of a plot or battles in the episode, and is placed between the St. Anne Shipwreck Arc and a group of 6 episodes with very heavy and mature themes.
* EP-114 "The Underground Round Up". Episode based on Voltorb, placed between
* Ep 6, the detective! I may be an uninvited guest, but please, welcome me! I am the visitor, the 18th human on Rokkenjima!"
* Epaminondos is famous for winning at Leuctra (by overweighting one wing to make the side opposed collapse before the Spartans could compensate, while pulling back, "refusing" the other to buy time). His greatest achievement, though, was to realize

that Sparta's economy and military system was dependent on the labor of large numbers of Helots who had little reason to love Sparta and much reason not to. All he had to do was have an army-in-being for a long enough time in Spartan territory, large enough to survive, and the Helots would all run away at once, knowing their masters were busy. No Helots, no Sparta.
* EPCOT Center itself, is the literal Theme Park Version of Walt's Experimental Prototype City of Tomorrow.
* Epcot had an attraction called "Cranium Command" which was built around this trope. The hero had to "pilot" a twelve-year-old boy through his day with the aid/hindrance of the body's various organs, glands, etc. Especially noteworthy for Bobcat Goldthwaite's tender, nuanced performance as the adrenal glands. Curiously, the people who controlled the world's brains seemed to be randomly assigned and fired from hosts at random, one day piloting a chicken and then one day piloting a 12-year old boy.
* EPCOT has been sliding toward this as well, to the point that the original meaning of the name (Experimental Prototype Community of Tomorrow) and Walt Disney's original conception of EPCOT as a genuine "city of the future" are
* Epcot. It is a five minute simulator ride that takes you to Mars, but this is justified when the ride puts you into a pretend "hyper-sleep".
* Epcot parade, an aged immortal that tried promoting human unity through his Great Millennium Walk that involved lots of cool puppets and great music.
* Epel's hometown lacked people his age, and he only finally met people his age when he is enrolled to Night Raven College. Sebek claims that he would rather focus on protecting Malleus than think about romance.
* E Peterbus Unum", Peter discovers that his house isn't a part of the US, which makes him his own country, and it inevitably spirals out of control when he claims Joe's pool, ergo he invaded American soil. When Peter is left with Brian as his only supporter, Brian says that he's stuck with him through worse, then it cuts to them on a Ferris wheel where Peter is inexplicably on fire.
* E. Peterbus Unum", where Peter seceded from the US and Lois had to teach Meg and Chris. Chris tries to pass a note to Meg, Lois sees it...
* Ephaniah Grebe scratching at the door of the refuge hut in the middle of the night in
* Ephebophile: An adult with a rather unwholesome interest in underaged teenagers.
* Ephebophile: A person who is sexually interested in underage teenagers.
* Ephebophile" in which Buffy is just a sixteen-year-old coming out of school, giggling girlishly with her friends, while Angel sits in a car parked in the shadows, watching her without her knowing he exists.
* Ephebophile-like behavior, including Meg. Despite his lust for — and later, near-sexual relationship with — Meg, he has shown on many occasions that he cares for Meg, comforting her and giving her advice in her time of need.
* Ephebophile, Slade actually was having a sexual relationship with Terra, who was sixteen at the time.
* Ephebophile: Targeting children, except the character prefers them to have passed puberty.
* Ephebophile, to overlap with this (specifically statutory rape depending on the local age of consent, and sometimes veering into forcible rape).
* Ephedra sinica with the stem and bud colours reversed. (Ephedra is the plant which gives us ephedrine, a stimulant drug and a naturally occurring member of the amphetamine family, and is the most archaeologically evidenced candidate for the active ingredient of Soma, a sacred drink of the ancient Aryan war god cult).
* Ephemera books: you couldn't draw a map even if you wanted because two different people can end up in two different places by going through the same gate depending on where the "heart resonates" with.
* Ephemeral Fantasia. The game takes place on an island where time resets back to Monday at midnight on Friday, and the next ferry won't arrive until Saturday morning. Thus, only by ending the loop can one leave the island.
* Ephemeral Fantasia. The hero is initially the only one known to be unaffected, but he gradually frees others (who become playable) from the cycle by changing the

way events play out.
* Ephemerialization revolves around using progressively more advanced technology to do more with less until you can do anything with nothing.
* Ephesians 6:10-18 compares the Christians' struggle with sin and the Devil to a battlefield, with the Apostle Paul urging his followers to "put on the whole armour of God," which, considering the time period in which it was written, may have been modeled on a Roman legionary's uniform:
* Ephesians 6:4, however, it warns fathers not to drive their children to anger.
* Ephraim Kishon called himself a cheapskate, although this was well justified by the high taxes in Israel.
* Ephraim Kishon. Even two burglars join them watching. Everyone explains to each other and argues about details of old episodes.
* Ephraim Kishon example would be a carpenter who once promised to make him a table in a few weeks, and delivered after years.
* Ephraim Kishon) feared that they might write better satires than him.
* Ephraim Kishon in a story with a bagel salesman. The narrator thinks he wants to fool him into buying lower quality bagels, and goes through lengths with this trope, only to find out at the end that all the bagels always were fresh, and he suspected an innocent guy lying.
* Ephraim Kishon's stories. For example, if he describes the Sabras (an Israeli cactus fruit, or an Israeli born in the country). "On the outer side, very prickly, but on the inside, completely inedible."
* Ephraim Kishon used this when he and his wife go to a supermarket the first time. They end up buying stuff for more than thousand pounds.
* Ephraim Kishon uses the joke in a different context. His joke starts the same way, but in the end, the patient says instead: "Doctor, I've been at the circus, I've seen Pagliacci. He wasn't funny at all. He was the unfunniest clown I've ever seen." The doctor breaks down: "But mister... I'm Pagliacci!"
* Ephraim Kishon when he's in NYC. Kishon manages to confuse him by speaking Hebrew and acting clueless about the mugger's intention. When he tells his relative how he was not-mugged and what he did she is shocked.
* Ephraim Kishon, when he was in Paris. Even praying in Hebrew and cursing in Hungarian didn't help.
* Ephraim Kishon wrote, because a state of Israel didn't exist for 2000 years, they had for some time the first anything in Israel in 2000 years. The first driving school, the first broom factory, and he himself wrote the first collection of humorous short stories in 2000 years.
* Ephraim Kishon wrote on America, among other things, that Americans believe:
* Epic (1984), the characters, who were animated, were placed in videos or pictures of real or realistically painted environments to a somewhat bizarre but charming effect.
* Epic (1984) the children attempt to use fire against the Spirit of Evil, but it's ineffective and the Spirit of Evil then uses the fire against them.
* Epic (1984), the Spirit of Evil appears a couple of times in the reflection on the water of one of the protagonists.
* Epica and remains in the band despite the two of them breaking up not long afterwards.
* Epica base most of their albums upon themes and concepts. Usually abstract and existential or based in myth and religious ideals.
* EPICAC has the titular machine cause its own destruction (by either fire or explosion) with a "suicide" note reading, "I don't want to be a machine, and I don't want to think about war".
* Epic: ALL birds from Leafman perspective, but in particular the hummingbirds and crows which are actually used as mounts.
* epically other inmates had to hold her back. The girl herself was soon reduced to tears.
* Epica, name derived from the Kamelot album of the same name, combines some Heavy Mithril with lots of social commentary. Their target of choice is usually organized religion, which one album calls the "Divine Conspiracy" to enslave humanity.

* epic and brag about it to their friends. Carly finally gets the upper hand in the verbal fight by calling out Freddie for his jealously, that never in a million years would she sleep with him, and his mother is a psycho 'whore' who sleeps with their crazy doorman. Carly smugly thinks that she'd won.
* Epic and deploy them directly into the upper floors of enemy held buildings and defensive walls, turning the Titan into a massive, walking siege tower.
* Epic. A seasoned Leafman warrior, leader of the Leafmen, Nod's guardian and teacher, and a friend of Nod's late father
* Epic Battle Boredom: Even something such as a hectic warfare won't stave this guy's boredom... because they just deals with them easily and casually.
* Epic Battle Fantasy 1: There are different colored versions of enemies:
* Epic Battle Fantasy 3: He occasionally gives a random team member a random item. Sadly, Nolegs fits into the worthless pet category as it is rarely the item you need nor the team member who needs it.
* Epic Battle Fantasy 3: One of the first people the party runs across in Rock Lake is a naked old man that horrifies all of them. Just a few screens later is a nude woman who gives a quest, Lance finding the whole deal awkward and she tells the group to stop staring at her.
* Epic Battle Fantasy 3 references. Two of the player characters can learn a special move that summons a huge drill from below the ground, dealing enormous damage to enemies with buffed defense, and one late-game enemy is a Flying Drill-Bot. Seriously, that's its NAME.
* Epic Battle Fantasy 4, and making the weapon appear requires defeating four bosh rushes of basically anything in the game stronger than mook. Good luck.
* Epic Battle Fantasy 4. Averted with the other naked NPC, where no comment is made about his nudity at all.
* Epic Battle Fantasy 4, calls her one: —> Defeat a busty succubus on Epic Difficulty.
* Epic Battle Fantasy 4, where the desert area is in the north of the world map and the snowy area is in the south.
* Epic Battle Fantasy 5. Before Version 2 added the Battle Arena, Data Bunker, and Arcade minibosses, there wasn't that much left to use it on outside of the final area.
* Epic Battle Fantasy 5, costs 69 SP. It also has 2169 base HP, though you won't know that unless you look it up on a wiki or in the game's files.
* Epic Battle Fantasy 5 have all powerful attacks as summons, but you need to catch them (which is in their case much more difficult than just defeat them), and there is not a stronger enemy that them. However, God really takes the cake, as he is much stronger than all of them, but once you catch him, he costs 180SP to summon, much more than anything else.
* Epic Battle Fantasy 5, Natalie tells the party that the reason she's hanging around with with them was because she got caught writing smutty fan fics of real people, much to her embarrassment, leading her to leave the university. She then says to herself that she just hides it better now.
* Epic Battle Fantasy 5, zombies can be found as both NPCs around Mystic Woods and enemies in the form of the Zombie Arms. They're always green and caused by some sort of curse. For some reason, some of them appear mindless and unintelligible, while others seem sapient and talk clearly. Three Greenwood Village residents become converted to zombies when they enter the Mystic Woods, and revert back once Laurelin is defeated or captured.
* Epic Battle Fantasy has existed for so long that he doesn't remember when or how he came into being in the first place. He can still remember some things, such as being sealed, defeated, and released countless times by different heroes throughout the ages.
* Epic Battle Fantasy of years and no longer even remembers when or how he came into being. He remarks that he has been defeated, weakened, and imprisoned countless times, but ultimately, he endures while his enemies fall to the ravages of time.
* Epic Battle Fantasy series: A majority of the games have one in-game, such as:

* Epic Battle Fantasy series has a handful of naked beachgoer NPCs played for laughs:
* Epic Battle Fantasy series has a tank called the Valkyrie. It's a fully-fledged WWII supertank with several different types of turrets. In fact, the scan data for it says that it didn't get finished in time for WWII.
* Epic Battle Fantasy series has multiple spinoffs, one of them turning into a series of its own:
* Epic Battle Fantasy series tend to be immune to disabling status ailments (stun, syphon, freeze), and instant death.
* Epic Battle Fantasy: the Tera Drill skill does more damage to the target the more buffed its defense is.
* Epic Battle Fantasy: The third game gives you options whether or not to carry over your weapons, weapon levels, skills, items and golds, EXP levels and having no level limit on NG+.
* Epic Battle Fantasy, with just about every enemy in the third game onwards has around three/four species variations with different attacks, weaknesses and resistances, and drops. In an interesting use of this trope, none of the enemy variants can really be considered "stronger"; since enemies use a leveling system like the heroes, an early game-enemy can appear among its later-game variants and still be just as strong, meaning that no single enemy becomes obsolete.
* Epic Bomba has a library of animal and nature sounds kept on a 4th gen iPod Touch.
* epic bursts through the floor of the Main Order Room riding Galeon to rescue Mikoto and the GGG bridge crew from the Nail and Ear Primevals.
* Epic by Conor Kostick, everyone on New Earth participates in an immersive MMO called Epic. In addition to the game dictating one's station in life - for example, do well in it as a student and you get the chance to go to university - player vs player combat is used to settle disputes and grievances, as violence is banned on New Earth.
* Epic Card Game, the gods made a truce after tearing the old universe apart with their wars. After reconstructing reality the deities agreed to fight their wars through mortal proxies. But other than that everything (including time manipulation, zombie apocalypses, necromancy, and so forth) is fair game.
* Epic Card Game: The Zombie Apocalypse card results in either destroying all Champions and giving all players Zombies... or it just giving a player two cards.
* Epic Cards Battle 2 Yumi describes the Shrine Alliance as "Alliance formed of angles from heaven, human and dwarf forces. Believed in the power of Shrine, the human have built many great cities, prospect under the guard of angles. The brave human and dwarfs protect their homeland together."
* Epic Catalog is probably the most famous one in ancient epic poetry.
* Epic characters from 3rd and 4th edition break through the 20 Level
* epic clash. It is also widely believed that it will be the final naval battle ever.
* Epic Dragon Pack has scales hanging off it's horns and the constellation has long since been associated with law.
* EpicDuel has a race called Krampus in it, and has three Krampus NPC in it. There are two Krampus Warriors (one level five and level eleven), who will give you missions and you can also challenge to fights. Then there's the Krampus Technician, whom is level twenty, believes magic simply be advanced technology, and will challenge you to a duel. They are all from Frysteland, which has been taken over by a tyrant named Alydriah
* Epicene at the time the play was written. (It isn't staged much today.)
* Epicene, or the Silent Woman, by Shakespeare's contemporary Ben Jonson, in which the protagonist persuades his eccentric, noise-hating uncle Morose to marry the title character as part of a plot to secure his inheritance: since he stands to lose it if his uncle marries, his plan is to provide him with a wife he doesn't like and then offer Morose a reason to end the marriage on the condition he gets his inheritance. Which he does by revealing to both the characters and the audience that Epicene has been a boy in disguise all along — which would have been a

big surprise to an audience accustomed to seeing female characters played by boys.
* Epicenter which causes anyone he autoattacks to explode on death, dealing even more damage.
* Epic Fail (absolutely no-one believed it), the fact that Germany claimed self-defense as a reason to go to war is regarded as an interesting bit of trivia instead of an important historical fact.
* Epic Fail fashion, being eliminated without so much as scoring a goal!
* Epic Fail inside, to go critical and explode. Later, he does the same thing to a model proton accelerator.
* Epic Fail" like so many in canon. However, his actions cause the senior Swollen Eyeball agents to decide in the following episode to assign Steve and Viera to help him, thus significantly changing the status quo.
* Epic Fail, shows more competence and insight into how drug gangs work than Marimow does.
* Epic Fail: Someone fails so badly that they manage to achieve a failure that isn't physically possible.
* Epic Fail: Someone manages to fail at something in a way that just isn't possible.
* Epic Fail that potentially endangers the company or actively tries to sink it, you have to go through a precise legal procedure where even a tiny mistake (such as sending a letter too soon) can result in a trial against you (the guy will still need a very good lawyer in case of a major blunder, though). If the employee can prove he/she's been fired due to a bias of the employer (discrimination, minor fault, etc.), in 99 cases out of 100, you'll have to re-hire the employee or pay very large fines and severance packages.
* Epic Fail (the actual problem with the Sergeant York was because it used a radar system that was designed for a jet and thus wasn't designed to handle all the close objects found on the ground).
* Epic Fail. The whole thing was planned so badly, no one could really believe that there had been any danger. Plus, successful unrelated terrorist attacks less than a month ago had the country on high alert, making even the timing a terrible decision.
* Epic Fail. To add even more insult to injury, his corpse is then devoured by walkers.
* Epic Fail, where a contestant gives an obviously bad answer, if they're able to even answer — e.g., "Man, that was such an easy puzzle; I can't believe you missed it that badly!")
* Epic Games action figure — not because of the figure itself, but because of the also custom-made blister box he put it in, which the lawyers claimed was "too realistic".
* Epic Games Store for free for a week starting on May 14th, 2020, their website quickly crashed due to sheer demand. Additionally, the email verification sending servers crashed the following day, which caused many to be unable to even play it due to requiring a Rockstar Social Club account to do so, which in turn requires a verified email.
* Epic give him a personal quest and an immensely valuable jewel, of the sort it takes years of leveling to afford, right out of the gate.
* Epic has a self-made pair of goggles that allows him to see the Leafmne in slow motion.
* Epic has Finn, the Leafman with the orange beard. His name is only in the closing credits.
* Epic; his outdated computers and messy house suggest he really doesn't get out much.
* Epic However, the bats aren't actually loyal to the Boggins; in one scene, a Leafman knocks a Boggin off his bat and takes the reins, and the bat has no complaints. Birds such as sparrows are considered inferior to hummingbirds and are generally used only for racing.
* Epic Illustrated has a three-page strip in which a couch potato is lazing in front of his TV set with a beer. A voice from the TV announces a test of the

Emergency Broadcast System. The guy swigs a beer as the warning tone sounds, then starts to look uncomfortable and sweat, before finally writhing in agony and melting into a skeleton. In the final panel we see that the world outside has been incinerated. Meanwhile the voice on TV blithely announces "this was only a test."
* Epic Illustrated includes a story about an attempt to tap energy directly from the core of the Earth's sun. This goes horribly wrong, causing the sun to go nova.
* epic, including lines like "Pier 1 Imports," "This place has got everything," and "The new Oldsmobiles are in early this year."
* Epic Instrumental Opener: Except that in Opera-ese we call it an overture.
* Epic Instrumental Opener it leads to an urge to skip forward. The most common examples are video game song remixes.
* Epic is already unused to interacting with humans, let alone his own daughter.
* Epic is an example. He's introduced by taking out an immortal, giant enemy that Laharl, Adell, and Mao couldn't beat. After that he gets dominated by Etna, a reaper, Baal's minions,
* Epic is billed third despite voicing the main character. Though this decision could have something to do with Seyfried having been on a box office cold streak during production.
* Epic is only as powerful as the scrolls that write the forests' activities, which cannot predict the future, and can only record so much. In the climax, MK calls him out on how he's relatively useless on his own.
* Epic items are colored purple. They tend to make the bulk of items that can be obtained in raids and high-difficulty dungeons. Epic equippable items are often separated by "tiers" (indicated by their item level) as epic items introduced later into an expansion are better than the ones introduced beforehand.
* Epic, just when Professor Bomba's recording equipment would have been useful (tiny MK needed him and his iPhone), he starts disconnecting them. Fortunately, he finds the needle MK moved on his map to indicate the Leafmen lair.
* Epic kill his son. (Of course, it's not really justified as Mandrake struck first, and he was going to take the pod anyway.)
* Epic-level characters in 3.5 can invert this by taking the epic feat Distant Shot. It allows the character to shoot any target the can see without penalty. This means a character with this feat has the same chance to hit the orc standing on the horizon as to hit the orc standing 30 feet away. Thanks to a lack of adjustments to the combat mechanics for extremely long ranges, the attack will also REACH the orc on the horizon just as quickly as it would reach the nearer orc, with no increase in damage for this obviously greatly increased velocity.
* Epic Level Handbook)...and also 200-1200 points of damage to the user.
* Epic Level Handbook but grants a character fluency in absolutely every language, down to the most obscure regional accent.
* Epic Level Handbook dead. (Specifically, they destroy their victims' bodies beyond resurrection, and in cases that require a 100% certainty, they bring the bodies to the head of the organization so that she can remove them from the multiverse altogether. Naturally, the amount they charge for this is astronomical.)
* Epic Level Handbook done. This helps in giving them a name for themselves, but they know enough not to take just any contract willy-nilly, lest their enemies muster enough courage and supporters to put and end to them.
* Epic Level Handbook for an army of worms, gaining insect-related powers and a great deal of additional resilience. Usually it's the evil ones that choose this method of life after death. Players can actually turn themselves into a Worm That Walks, although it carries a chance of failing and just leaving them as a rotting corpse. Later editions rename them larva mages, but keep the lore more or less the same.
* Epic Level Handbook has the sirrush, a large creature that looks vaguely like an armor-plated lynx and likes hunting dragons.
* Epic Level Handbook in D&D3E contains an adventure which includes a wizard tower with walls made of two thick layers of obsidian with a thin forcefield in-between.
* Epic Level Handbook start at level 14. However, the city didn't have much appeal

compared to mainstays like Sigil, partially because of the limited space to cover it in the book and partially because epic-level play didn't catch on too well.
* Epic look like a cross between frogs and sharks. Mandrake and his son, however, look more cat- and human-like.
* Epic Mafia can create fake versions of items. This includes a fake gun which backfires and kills the user.
* Epic Mandrake complains that no matter how much they destroy, Queen Tara can regrow it all back with a wave of her hand. Of course, if she were gone and had no successor...
* Epic, Mandrake's rot-arrow reduces a riding bat to a bare skeleton, which falls apart as its Leafman rider goes plummeting to the ground.
* Epic: Mandrake, which otherwise refers to a magical plant with human-shaped roots that emitted a deadly scream upon being picked and the leaves of which were poison.
* Epic Meal Time and completely unhealthy, such as a lasagna made out of burgers and pizza, with food items that stretch into the hundreds of thousands of calories. The entire thing is hosted only by men, and their mascot is a silent dude-bro named Muscles Glasses who typically chomps down the things they make with his bare hands. Also, they add bacon strips (and bacon strips, and bacon strips) to every dish, and all the narration is done with emphasis on everything with intense music playing in the background.
* Epic Meal Time a run for its money. Best of all they're fertile. Unfortunately this also means that those interested in conserving the American Bison population are having problems since cattle are so prevalent in America. Only a minority of remaining bison herds are purely bison; the rest contain at least some cattle genes.
* Epic Meal Time). Despite the departure of the beloved Muscles Glasses and fans complaining it isn't as fun as it used to be, the show still goes on.
* Epic Meal Time episode "Breakfast Pizza". Harley gets out frozen pizza for breakfast, then sees a plate of sausage and eggs, and suddenly gets one. Tyler promptly lampshades it.
* Epic Meal Time: Harvey Morenstein can't be making much money from this gig so far, so given how expensive buying five different birds for one meal must be, it'd almost have to be this.
* Epic Meal Time. He shaved it off for "Breakfast Lasagna" and is letting it grow in again.
* Epic Meal Time is a direct result of consuming so much of it with the massive amount of chili and bacon (he'd later have to be stuffed into the bathroom for several hours to dry off).
* Epic Meal Time rarely appears without a bottle of Jack in hand. One time, he and the others made breakfast with alcohol.
* Epic Meal Time, who routinely prepare massive dishes with five- (sometimes six-) figure calorie counts and then eat them on camera. What probably helps their frames is that Harley is rather tall and Muscles Glasses (a personal trainer in real life) is often hitting the gym.
* Epic Megagames makes extensive use of palette swaps. The game has 11 distinct (sprite) models of robots, but many more colour-schemes, all of which are achieved by changing parts of the game palette. In tournament mode, you can customize your robot's colour-scheme in three areas, and the game provides you with 16 colours to choose from.
* Epic Mickey 2: The Power of Two. However, due to the game's poor sales which led to the closing of Junction Point Studios, a third game is highly unlikely.
* Epic Mickey, and his "purified" form uses Kevin Flynn's. Tomorrow City also borrows heavily from the movie in more than just the lines.
* Epic Mickey, as the Doctor turns on the Blot and renounces to kill Oswald.
* Epic Mickey: Before Mickey came to the Wastelands, Shadow Blot and the Mad Doctor had pretty much won the Blot War; they have conquered Oswald's castle and petrified his wife Ortensia, an act which sends him into a deep depression and causes him to lose his will to fight, leaving the fighting to small, weak bands of resistance groups. One of them, the crew of Captain Hook, has most of the members dead or

turned into Beetleworx and the rest scattered leaderless in the jungle. Another group, The Gremlins, has been more successful in fighting off Blot's forces, but the sheer force of Blot's forces causes most of the Gremlins to be taken as prisoners, and their own village was under siege before Mickey helped in turning the tide.
* Epic Mickey came with a figurine of Mickey (with removable paintbrush), decals for the Wii and Wii Remote, and a behind-the-scenes DVD of the game, which also included several original cartoon shorts. Sadly, the "Clock Cleaners" cartoon is the censored version.
* Epic Mickey cheerful after being ravaged by a flood of corruptive paint thinner.
* Epic Mickey deliberately invokes this as a homage to old cartoons. Toon objects, which can be affected by Paint and Thinner, are bright and colorful, while Inert objects look dark and menacing, and cannot be painted or thinned.
* Epic Mickey, even before the game's plot, which hinges on fans being at least passingly familiar with very old Mickey Mouse shorts.
* Epic Mickey features creepy versions of classic Disney songs mixed into the soundtrack:
* Epic Mickey, Gremlin Gus attempts to launch the fireworks Mickey primed, only to realize that the detonator's batteries are dead. He replaces them in a jiffy, but before launching them, he is grabbed by the Blot.
* Epic Mickey, gumming up their pages and making them fall out of the sky so they can be collected.
* Epic Mickey has a replica of the Disneyland statue, but with Oswald the Rabbit instead of Mickey, as Oswald is Wasteland's ruler.
* Epic Mickey has become notorious for this, as many found the game's dark and twisted concept art and the scrapped ideas contained within them to be far cooler and more well, "epic", compared to the game proper, which many have found to be a disappointment due to the final game not living up to what was initially promised by its concept art.
* Epic Mickey has the Mad Doctor build him animatronic versions of Mickey Mouse's friends, as he wants Mickey's life for himself.
* Epic Mickey has this effect. It restores damages from thinner and redeems enemies into friends.
* Epic Mickey in motorcycle with sidecar. Like the below Donald Duck game, it met its end with Junction Point.
* Epic Mickey is the Mad Doctor wanting to be human again as the Blot no longer exists and his too-quickly-made animatronic parts are starting to break down. And yet, readers who knew the first story only from the graphic novel and had not played the first game itself did not have a clue what the whole "Mad Doctor is a robot" plot point was about.
* Epic Mickey, Mickey's reserves of Paint or Thinner will slowly refill to one-third of their maximum if they ever fall below the amount.
* Epic Mickey on them. These screens showing the cartoons act as bridges of sorts from area to area.
* Epic Mickey, Oswald's inclusion was one of the key aspects which drew people into the game, and he has a solid fanbase in Japan.
* Epic Mickey, Oswald suggests that he and Mickey shake and start over. But Mickey holds back and confesses to causing the Thinner Disaster.
* Epic Mickey, Oswald The Lucky Rabbit will shoot faces at Mickey when his back his turned. Turn around to face him again and he'll start whistling innocently.
* Epic Mickey Perhaps unsurprisingly, Disney balked at their mascot being taken in such an overtly mature direction, and the game ended up as a much more conventional, if still slightly grim, platform game.
* Epic Mickey playing backwards during the Gremlin Village level. According to Warren Spector, the launch version was supposed to have the lyrical version as the boss for the Clock Tower, but copyright reasons kept this from happening. One can assume this is why the song doesn't play backwards at any point in the game.
* Epic Mickey profile, "whether she's busy fending off unwelcome advances from the notorious Pete or wishing that Oswald would spend more time with her and their

copious children, Ortensia is - in every way - Oswald's better half".
* Epic Mickey sitting on a table in Yen Sid's tower. But to an observer actually inside the Wasteland, it seems to be a group of floating islands.
* Epic Mickey: The game's main antagonist, the Blot, is an enormous monster made from an oozing black mixture of paint and thinner. Its corrupting slime has dripped and spread all over Wasteland, creating smaller enemy blobs called Blotlings and causing all sorts of destruction.
* Epic Mickey: The Phantom Blot as he appears in the original Mickey Mouse comics is just a thief in a stark black suit. Here, he's the Shadow Blot, a monstrous creature made out of paint and thinner out to destroy the Cartoon Wasteland.
* Epic Mickey, the straight man of the late 1930s, or the more modern 'hero' Mickey.
* Epic Mickey the world you're supposed to save by using your paintbrush and tools (namely, regular paint or paint thinner).
* Epic Mickey, which are based on the iconic animated shorts, will often have dancing scenery. Most often, this is to be used as moving platforms (like the coconut trees in "Jungle Drums"), though they will sometimes steer Mickey into trouble (like the trolley in "Trolley Troubles," which has obstacle and enemy placement to match the trolley's movements).
* Epic MK doesn't like how Nod and Ronin are making fun of stompers, particularly her dad who is sitting beside them and saddened by his daughter's departure. Then she blatantly points out that she is also a stomper.
* Epic Movie above, features all the main characters making silly faces against a red title and white background. It's hard to derive much about the film's premise from the poster alone, but the faces and poster format guarantee that this is a comedy.
* Epic Movie, also with tongue-tearing results. She even looks around to see if anyone is around (even though she's in the middle of the woods). In the unrated cut of the film, her tongue stretches to an insane length and she attempts to cut free with a knife and axe.
* Epic Movie. Alternatively, it turns out that the technology needed to convincingly move the genre forward wasn't as viable as people thought. Gaze upon the many, many aborted attempts to have fully-3D characters replacing "real" actors in a movie or 3D gaming.
* Epic Movie and a larger ass...also a monobrow and for her to have a fat flabby grandma body type, which turns him on. She then has his way with him. Even if his requests are...unconventional, it's clear he's not into her for her personality...
* Epic Movie employed this for laughs when Aslan (a middle-aged white man) is suddenly replaced by a young Asian guy in a bad wig for a fight scene.
* Epic Movie features full-frontal nudity for some scenes. For example, when the wardrobe is first opened, a girl runs out and tells Lucy not to go in there. In the theater cut, she's wearing a bikini. In the unrated DVD version, she's entirely nude. The gross vomiting scene is also extended in the unrated version.
* Epic Movie for his enjoyment during sex. Considering he drools at this sight and they start to get it on after, it seems it worked.
* Epic Movie has Kal Penn lustily devouring what he thinks is chocolate for a good twenty or so seconds; more than enough time for the viewer to correctly guess that it's really poop from an inexplicably open sewer line.
* Epic Movie has Willy Wonka use human tissue as a vital ingredient in his candy bars.
* Epic Movie might I add, all night long near the end of the film comes almost completely out of nowhere.
* Epic Movie (more broadly defined, includes film adaptations of the literary epic as defined here)
* Epic Movie, Peter is arguably this. He has a strong British accent and is rather shy throughout the film, especially towards his crush, a parody of Mystique. When she finally decides to hook up with him in bed, she asks what he'd like her to shapeshifter into during sex. *He's rather shy, But says some rather requests.
* Epic Movie (Something along the lines of "A Not-Romantic-At-All Comedy").

* Epic Movie, the character Susan ends up being persuaded into chugging a couple gallons of beer and it goes about as well as one might suspect. She ends up puking out a couple gallons of puke on the crowds who were cheering her on, grossing them out in the process. She clearly needs to puke more, but doesn't want to puke on anymore of the crowd and also clearly doesn't want to gross them out... so she finds an archer close by and... locks lips with him, while holding his head in place, not letting him escape... she clearly was trying to make it seem like she was just making out with the archer, but everyone quickly realized that the poor archer wasn't making out with a hot woman, but said hot woman was pumping puke down his throat with no escape... this is said to be the main reason why no one showed up to the battle the following day.
* Epic Movie. This wasn't done with their other films released by Fox.
* Epic Movie to please his various fetishes: unibrows, giant butts, flabby arms, etc.
* Epic Movie, where Mr. Tumnus reacts with disgust upon learning that both of Lucy's parents were human (his own dad screwed a goat).
* Epic Movie, while trying to escape a prison cell, Captain Swallows stabs Edward in the abdomen to ensure his pain is realistic enough to get the guards in.
* Epic Narrative (modern literary epics, as well as some traditional narratives)
* Epic Nim's tree is a data recorder example. Everything that happens in the forest is recorded on the scrolls within, down to the most minute actions.
* Epic NPC Man on Ben can be seen to leave his neck and crawl into his mouth after he collapses.
* Epic. Of course they don't explain this to the audience at all. For those familiar with the law it's a refreshing accuracy, but one wonders how many kids, who don't even know what a cube is, were left wondered why they good guys seemed so indifferent about throwing people off of birds to their apparent-death all the time.
* Epic Ozzie bumps into things constantly on account of his lacking depth perception and reduced mobility.
* Epic: Ozzie growls at the bat call, which is being sung by Mandrake.
* Epic Poem bathed in the Amburayan River after accumulating so much dirt in battle that the fishes and other animals around him died. There's no ill effect to the women attending to him though.
* Epic, Professor Bomba has built gadgets that allow him to adjust to the "speed" of miniature creatures, allowing him to communicate with them.
* Epic Race, but as it goes on it becomes a matter of finding the Corpse Parts.
* Epic Race: The characters have to proceed from a starting line to a finishing line under some set of rules over the course of an extended period of time.
* Epic Rage Time: The Incredible Derp when the latter calls for "more lasers" just as Derpy is calming down.
* EPIC!!! RAP!!! BATTLES!!! OF!!!! HIS! TO! RY!!!!!!!!!!!!!!!!!!!!!!!!
* Epic Rap Battles of History. All we see is him picking up the Luger, the screen going black, shortly followed by a gunshot.
* Epic Rap Battles of History also has real-life historical figures as some of their many characters, there's bound to be at least a few lines about them having a relationship with their cousin.
* Epic Rap Battles of History, and most likely because of this, they have battled two more times throughout the series making them the only trilogy of the show to date.
* Epic Rap Battles of History, and Peter dressing in drag to play a trans woman may have been seen as offensive.
* Epic Rap Battles of History: Apparently, Vlad the Impaler is so filthy that Count Dracula gets nauseous at the thought of biting him.
* Epic Rap Battles of History as the only survivor, and he's clearly shaken by the ending.
* Epic Rap Battles of History begins with "You think I haven't heard those things before?"
* Epic Rap Battles of History: Bob Ross accuses Picasso of this and specifically

mentions his "Blue Period". This contrasts his own belief that paintings can be happy and loving.
* Epic Rap Battles of History case of this in the "Jack the Ripper vs. Hannibal Lecter" video. The former says "I'm terrorising London, fuck the 7/7 bombers", which causes the latter to accuse him of trying to stay relevant by stealing from headlines.
* Epic Rap Battles of History crew into finishing season 2, lest he chisel himself out of Mount Rushmore and crush them to death with his moustache.
* Epic Rap Battles of History!" Cue the East Team falling apart in squabbling of their own.
* Epic Rap Battles of History, Darth Vader is a rapping version. He ends his fights with Hitler by (in order) freezing him in carbonite, dropping him into a rancor pit, and slicing him in half with his lightsaber.
* Epic Rap Battles of History does this at the end as he starts his verse, reflecting the modern bombast of his movies.
* Epic Rap Battles of History: Due to the unstable political climate in the United States, Nice Peter and EpicLLOYD decided to omit the "Hitler vs. Vader Trilogy" from their touring repertoire since 2017.
* Epic Rap Battles of History, Epic Lloyd as Genghis Khan draws his sword and cuts an easter egg in half in just one take while filming "Genghis Khan vs. The Easter Bunny".
* Epic Rap Battles of History episode with Steve Jobs and Bill Gates, Steve Jobs doesn't bat an eye at Gates calling him an "arrogant prick", talking about Jobs being abandoned at birth, etc., but Gates finally draws a reaction when he makes a rather playful jab about Jobs taking credit for the work of others and then asks if Steve Wozniak wrote the lyrics that Jobs is rapping.
* Epic Rap Battles of History for the battle has the loop existing long enough for the video to be ten minutes long.
* Epic Rap Battles of History: Frank Sinatra makes comments that are considered racist and homophobic by our standards, so you would never think of him to be the guy who integrated Las Vegas.
* Epic Rap Battles of History Further down the line during the rap, he also points out that he owns the entire series.
* Epic Rap Battles of History, George Washington has a very ugly and visually distracting set of false teeth, which he references once. The appearance helps to reinforce his very undignified rapping style.
* Epic Rap Battles of History had an episode with Gandalf and Dumbledore. Of course there were plenty of references to the latter's sexuality, including a Lockhard expy as a boy toy.
* Epic Rap Battles of History in the Shakespeare vs Doctor Seuss battle, where Shakespeare drops this line:
* Epic Rap Battles of History: Ivan the Terrible does this twice in his rap battle against Alexander the Great and Frederick the Great. After each has had a go, Ivan would immediately declare his loss and bemoan how Alex and Frederick have bested him, then offer them a celebratory drink and a comfy chair to rest in, respectively; of course, Alex is fatally poisoned by the drink and while he had meant to strangle Frederick with garrote wire while he slept, he wound up dying of natural causes during his nap anyway. He tries it again when Catherine the Great shows up, offering her a horse for her "victory", but Catherine calls bullshit on both him and the horse story and keeps ripping into him.
* Epic Rap Battles of History, Jobs interrupts the announcer in the middle of introducing the contestants and goes straight into a high energy rap, trying to blitz Gates with it.
* Epic Rap Battles of History managed to rhyme "purple" with "turtles".
* Epic Rap Battles of History, "Mitt Romney vs. Barack Obama", we get this:
* Epic Rap Battles of History occasionally pitches two villains against one another:
* Epic Rap Battles of History on the other so as to disrupt team flow:
* Epic Rap Battles of History out his full name (or nearly so)- and it takes up

most of his second verse.
* Epic Rap Battles of History: Rasputin raps this to Stalin in the form of a rhetorical question, as we already know the answer. A more serious example than most on this page.
* Epic Rap Battles of History, reaching through two iPads to smack Jobs with an iPhone.
* Epic Rap Battles of History's cocaine habit after it went over Pennywise's head.
* Epic Rap Battles of History, showing that even he thought the line was beyond the pale.
* Epic Rap Battles of History, since the performance is based on an interview with the real deal where he expressed similar sentiments. Thanos of course, mocks him for it.
* Epic Rap Battles of History: Since the series frequently involves rap battles between supernatural beings, this comes up a lot.
* Epic Rap Battles of History's "Mozart vs Skrillex" has Mozart boasting to Skrillex about how he's a musical prodigy, finally topping his verses with the final line as seen on the page quote.
* Epic Rap Battles of History so that their heights could align with the exceedingly tall Rhett.
* Epic Rap Battles of History, Stalin calls himself the "Pride of Lenin." 2 lines later?
* Epic Rap Battles of History. The actress playing Child imitates her distinctive voice perfectly.
* Epic Rap Battles of History: The entire point of this series is poking fun at historical characters.
* Epic Rap Battles of History, there is an impressive special effect where Pennywise opens up his head like this. It's incredibly creepy.
* Epic Rap Battles of History. The very next day after the video was released, Donald Trump himself tweeted about the video, understandably confused and asking "What's with this rap stuff between me and Ebenezer Scrooge?"
* Epic Rap Battles of History, very attractive. Some have speculated that this is the reason why the characters he plays tend to win over EpicLLOYD's characters in the fan polls.
* Epic Rap Battles of History vs Bruce Jenner" in one of their funniest burns ever:
* Epic Rap Battles of History was the last original run of the show before their two-year hiatus and their last year with Maker Studios.
* Epic Rap Battles of History were produced by Maker Studios, but after Maker got fully absorbed into Disney (getting rebranded as the Disney Digital Network), ERB opted to go independent from Season 6 onwards.
* Epic Rap Battles of History). When Sun Tzu tells Socrates to apologize to his two students (pointing to Nietzsche and Voltaire), Nietzsche counters that he would not call himself a student of "this plebe", pointing to Socrates. Except "plebs" is a Roman word, referring either to the lower assembly or the lower class in general. Of course, the modern usage of the word implies inferiority, so there could be a double-meaning here.
* Epic Rap Battles of History where during his first verse, Steve described his opponent as if he were observing a dangerous and rare creature.
* Epic Rap Battles of History with a third person dropping by to smack both contestants:
* Epic rather than that being a normal Boggin mount. On the good guys' side, the heroes take a ride on a deer—which is ABSURDLY large compared to them—though this is not considered typical either.
* Epic Records. One hundred million copies, seven top ten singles, and eight Grammy Awards later, Michael Jackson would cement his legacy as the "King of Pop".
* Epic Riff is surprisingly obscure nowadays for such a prolific and popular band. And the riff itself is lifted from a Gil Evans jazz piece.
* Epic Riff to accompany two boys arm-wrestling for the last Cool Quencher (which is taken by a small girl while they're doing it).
* Epic, Ronin puts up a cold exterior which he only drops around people he's close

to, like Tara.
* Epics and holy scriptures tend to be this, due to them having been collected from stories told for eons.
* Epic scale also brings the Capitol Imperialis and Leviathan to the Imperials. Both are giant tanks the size of, and capable of going toe-to-toe with,
* Epic scale Death Dealer daemon engine of Khorne is a mobile siege tower with a mechanical torso fitted to the front. The daemon engine is designed to disgorge hordes of fanatical warriors straight onto a fortresses walls while the daemon's robotic body uses it's deadly close combat weapons to slaughter the defenders.
* Epic's Gameshows had DevinWithDevin, who was a relentless bully who showed no signs of kindness or an improved attitude as the season went on.
* Epic's Gameshows own up to his bullying, refuse to do an interview after his elimination and chose to just leave.
* epic shouting match) with Misha. Shizune and Hisao take the opportunity to bail out and disappear together.
* Epic Spell Wars of the Battle Wizards loose definition of the word "wizard".
* Epic Spell Wars tells a story about accidentally punching himself in the nuts while walking his dog. Even the female players gasp in shock.
* Epic Storytime. They became best friends near graduation and when they made it out of college, the two stayed drinking buddies and had went to the bar every Friday night since then. Hmac later returned to the underworld, seeking him for answers of who was attacking the U.S. and why.
* Epic Tales is immune to bullets. And everything else. Now, if only the writer would take better advantage of this, and put him in all sorts of deadly situations.
* Epic Tales is only able to interact with the physical world by possessing human hosts. In his first appearance he switches between multiple different hosts as the situation requires.
* Epic Tales is set in New York. However, the complete lack of references to any actual places leads one to believe that the writer has never actually been to New York, and is just treating it as a generic city.
* Epic Tales may have a full body costume, but he uses his birth name as his superhero identity. His logic is that it's such an obvious connection, that people will think it's too obvious. So far everyone who has met both of his identities has been able to figure it out, as well as a few who have only met one of his identities, but know of the other.
* Epic Tales series Shadow Hawk has an ongoing arc about Shadow Hawk wanting to get revenge on the Shapeshifter, who killed his father. It also has a subplot arc about how he got a girl pregnant in the first story.
* Epic Tales this is Shadow Hawk's motivation for being a superhero. Or so he claims. His best friend Diana thinks he just doing it for the thrills, although this is only mentioned once. Also the revenge thing gets glossed over in later books.
* Epic Tales 'verse David Wilson died in the first Shadow Hawk story only to become the Astral Controller.
* Epic the Boggans are ugly, and the animals they use as mounts (bats, crows, and a star-nosed mole) are ones that are generally disliked by humans. Whereas the Leafmen are all good-looking and ride hummingbirds.
* Epic: The forces of the forest (good) and the forces of rot (evil). Rot is necessary for continued growth, but too much can doom the whole forest.
* Epic the life of the forest has to do this every hundred years. The film opens on the very day Queen Tara is to choose her heir.
* Epic: The rich greens and golds of the forest (the use of yellow contributing to the 'warmness'), versus the cold colour palette and mud-browns of Mandrake and his allies. Also, the brightness of the forest, compared to the relatively subdued colours used in the house.
* Epic: The Third Survivor in Raccoon City, Chief Irons rapes the Mayor's daughter before killing her in chapter 5, the chapter being fittingly titled "Monsters Can Be Human Too."
* Epic. The villainous Mandrake is about to destroy the heroic Leafman Ronin.

* Epic. This Land Speeder ranged ahead of its Titan partner, relaying targeting information that allowed the God-Machine to fire at targets of its line-of-sight with far greater accuracy.
* Epic Tracking Shot - camera movement that defies typical expectations, with unusual complexity, length or "impossible" movement
* Epic Unicorn History The Beards Of Harmony all have beards, and they can defeat a stone-encrusted mountain lion, a pack of timberwolves, outsmart changelings and also act stallionly.
* Epic Unicorn History The Beards Of Harmony: Hushbeard is a large pony who wouldn't hurt a fly.
* Epic Unicorn History The Beards Of Harmony: It happened to King Grundle after gaining enough strength by drinking the blood generously (though reluctantly) offered by Prancebeard.
* Epic Unicorn History The Beards Of Harmony. They are also destined to become friends and save the newly founded Equestria from a threat in the Everfree Forest.
* Epicureanism are reported as advising to be this. Indeed while judging pleasure to be the highest good, Epicurus made a classification of pleasure: 1) the natural and necessary ones (eating and sleeping), 2) the natural but unnecessary (sex), and 3) the unnecessary and unnatural (power and politics). Giving that according to Epicurus sex fits the second type and that he himself never married and had no children, it's pretty clear that he encouraged people to be single. However, there's no indication that he forbade it either, as there's mention of married Epicureans in the Garden, and one letter has him advise a young man who loves sex on how to do this responsibly (since he clearly wasn't just going to stop). The later Epicureans appears to have been more positive on this, and most probably married. Moreover, translation of the quote that Epicurus is reported to have laid this out in has been questioned by later scholars, who feel the real meaning was that a wise person should refrain from marriage and sex only depending on the circumstances. Epicurus' will, for instance, provides for one student's child marrying another Epicurean in the future. What's indisputable, however, is that he and later Epicureans cautioned people to take care with romantic love, knowing it could cause harm. Epicurus extolled friendship-we can surmise that he'd think marriage should be based on that.
* Epicus Maximus which is almost certainly an inversion of this trope.
* Epic when he wins a race that they had previously agreed he would lose, but is prevented from doing so by Ronin, who needs Nod's help.
* Epic, which she couldn't hear at the time, are seen later in a mystical "flashback" created by one of Nim Galuu's barkscrolls. Tara starts off by saying (paraphrased) "If you're hearing this, it means you made it to Nim's," and anticipates what MK's reaction will be.
* Epic, while not malicious, are heavily influenced by them. Chris Wedge's motivation to make the film came from seeing a museum painting of tiny fairy folk in a forest.
* Epideme is an intelligent artificial virus designed to block nicotine cravings. Unfortunately, he decided he'd rather spend his time stealing his various hosts' knowledge before killing them by starving their bodies of nutrients and oxygen, then hijacking their bodies, each time forcing them to bite someone else and transfer him to a new host.
* Epidemiologists use these a lot when tracking and predicting the spread of infectious diseases.
* Epidemiology", Señor Chang dresses up as a female figure skater for Halloween, purely for the sake of "proving" everybody racist by asking them to guess specifically who it is he's dressed up as. When they inevitably guess the name of an Asian figure skater (e.g. Michelle Kwan, Kristi Yamaguchi), he calls them racist and smugly reveals that he's actually dressed as Peggy Fleming (who is white). Because he's "the racist prover". Shirley is the only one to guess Peggy Fleming correctly on her first try.
* Epigraph — A quotation at the beginning of a work, often a line of poetry.
* Epigraphs at the start of each chapter form a continuous narrative that reveal a

great deal of significant information about what's going to happen at the end of each book, but a large portion of readers totally miss it.
* epigraphs has an epigraph from a "St. Veneric" which mentions the fickleness of Gwynedd's weather in March, and chapter fifteen of the same book has this from an unknown Deryni monk: "The humans kill what they do not understand."
* Epik are the alternatives to traditional hosting providers and domains such as GoDaddy and Cloudflare, respectively. Although their main focus is the buying and selling of domains, Epik made headlines because it publicly announced that it would provide hosting and domain services to Gab, after GoDaddy and Amazon deplatformed them. Although Epik is in favour of freedom of speech, they do not accept forums and imageboards whose moderation is not effectively implemented, such as 8chan. However, Epik has Gab, Bitchute, Hispachan and Infowars as customers.
* Epik High's "Over" and "Spoiler" have shades of this, and a lot of their instrumental pieces (e.g. "Forest" and "Ocean. Sand. Trees.") are basically these.
* Epilepsy is directly triggered by this, since the optical assault overloads your neurons and makes them fire all at once (they should be firing in rapid, but distinct and perceivable patterns). Epilepsy is literally what happens when your brain's Flash plugin crashes.
* Epileptics can sometimes remember up to the very moment the seizure begins, then have a blank during the seizure and for several minutes after. For example, they may not remember such acts as standing up from being trapped in a corner, or even painful actions such as having a nail snapped back into place. Sometimes the only reason an epileptic knows they have had a seizure may be because of these suspicious blanks in their memories.
* Epileptic Trees about the origin of flying saucers amongst human society.
* Epileptic Trees. And, of course, unseen entities that move about and influence the world from beyond the veil. Who's to say Oedon isn't a stronger version of the Kind Faerie?
* Epileptic Trees: Fan theories; the audience making up their own hypotheses as to what really happened in a work.
* Epileptic Trees in the weave of Creation to Pattern Spiders. He has been known to employ them at least on one account to retroactively vanish an Essence Cannon from the character, so…
* Epileptic Trees may be this. That is, minus the human avatar and all.
* Epileptic Trees that a monotheist group closely connected to the creation of Cylons also used the same symbol.
* Epileptic Tree will state that it is true, no matter how ridiculous it sounds, even if it contradicts established fact.
* Epilogues, freed to incorporate more explicit sexual content due to the characters being adults, run with this and spend huge chunks of prose ruminating on the perfection of Jake's butt.
* epilogue, Tristan meets his demise at the claws of a grizzly played by Bart the Bear.
* "Epinikion" by Desmond Warzel, the alien Squids have natural weaponry that not only does this to their human opponents, but leaves them alive for several hours after being bisected.
* "Epinikion" on a human — and secretions that keep the victim alive for hours after being bisected.
* Epiphanic Prison: A prison someone can't escape from unless they have an epiphany.
* Epiphany, Aerith gets plastered in her room after meeting Sephiroth. Overwhelmed by the knowledge that tens of thousands of people in Midgar will die in a matter of days, Sephiroth's own evil plans, and the Arbiters blocking her attempts to stop all of it, she copes with it all by downing Elmyra's cooking sherry and baking brandy that night.
* Epiphany has an erotic dream about Sephiroth. Later, when he attempts to get Aerith to tell him what her dream was about, pointing out that since it was about him, that would make it his business, she acknowledges the point, but still refuses to tell him.

* Epiphany", is completely forgotten for the entirety of the season 5 arc.
* Epiphany is standing outside Aerith's church just before Cloud drops in, Reno comes up with an entourage of troopers. Sephiroth,who everyone thinks is dead, greets him amiably enough.
* Epiphany tries very hard to convince Aerith he actually cares about her well-being, but it only serves to make him even more revolting.
* Episode 00 is in 4:3 aspect ratio while the rest of the series is widescreen. The first
* "Episode 0: Allocation" is set on Schrödinger Station, the first station beyond
* Episode "100" has Reaper meet his end BRUTALLY in this manner at Hotch's hands.
* Episode 101 of the original anime. In a flashback, Kakashi easily defeats the pathetic Moya Triad who had been pestering a random woman, and afterwards she's completely smitten with Kakashi.
* Episode 101 shows a group of filler ninja who are after Kakashi. While at a hotsprings, they decide to use a poisonous dart against him. Just as the blow dart is flying toward Kakashi, there's a slow-motion shot of him bowing down to get into the water and avoiding it completely. The funny part comes when during the scene, he actually states that he's going in slow motion.
* Episode 1068 is about Ash encountering Celebi and getting taken back in time and meeting Professor Kukui when he was younger. This may sound familiar to anyone who's seen
* Episode 10. An audience only example when Mariel lists Taro's daily activities and they appear (as if being typed) in the air over Taro's head, gradually squashing his head down.
* Episode 10 ends with a list of the people calling in for New Year's. The viewer's heard of most of them before... with the exception of Hinata's "friends."
* Episode 10 focuses almost exclusively on Tenn's mission on Meekrob, acting as a springboard to introduce her into the main story.
* Episode 10 gives us this glorious exchange when Kirito offers to help them secure the deal with the King of the Ashes.
* Episode 10 has Dino attempt to demonstrate this with Mafuyu, but it fails due to the height difference resulting from Dino being the tallest member of the cast and Mafuyu being the
* Episode 10 has Tuff decide to go on a crime-spree to prevent the only cop in town, Chief Bookem, from being fired.
* episode 10 instead of displaying the kinds of skills a cheer captain would need to possess.
* Episode 10. It begins with Hannah talking to Ciel and saying that she has something to show him. Then her mouth opens unnaturally wide to reveal
* episode 10 of his father Aang (with whom, by Tenzin's account, she got along quite well).
* Episode 10 shows that life in the Plantation inner city is basically
* Episode 10 when Ally and Kim see Nighthook with Havoc. It starts out as lying about Nighthook being their waiter, and it goes downhill from there.
* Episode 10. When Mariel is washing Taro's back after a long day he turns to her and their faces move together...then Ikuyo Suzuki runs in yelling to
* Episode 11.5, and mixes it with the already awesome nature of the game to bring some really insane animation that will make you go "What the Hell just happened?"
* Episode 11, after Allen gets chased out of a party he gatecrashed. Wanted posters of him are hung up around the college, with a sketched picture of him that is detailed perfectly. Allen complains loudly about the poster, complaining that the guy on it has copied his army helmet look, noting that it looks ridiculous.
* Episode 11 "Daemonseed". A giant tree grows in Paradigm City and starts destroying buildings with its animated roots. The Big O attacks it for a while, but the tree stops growing by itself and doesn't have to be killed.
* Episode 11 is called "A Present For Christmas", although more than one present is given.
* Episode 11: Never work together! or One skilled individual will trump teamwork

by unskilled individuals.
* Episode 11 of the same Volume reveals that General Ironwood, already speculated to have a metal arm, is a cyborg. Half of his body is metal.
* episode 11, when she acknowledges that her efforts to save Madoka for the past 100+ timelines have been for nothing, and everything she does only makes things worse.
* Episode 11, where Bulma is amazed at the speed of Mr. Popo's magic carpet:
* Episode 127 when the Vizard Hiyori Sarugaki jumps into the sky while carrying Orihime Inoue.
* Episode 12 has the reveal of the Conduit's master plan, which involves
* Episode 12 of the anime version has Haruko lose consciousness and collapse atop Takeru after she uses Murakumo
* Episode 12: Vegeta is fully healed and fresh off removing the liver from one of his colleagues when Cui tries to cut him off; Cui points out that Frieza and his men are en route to Namek to grab their Dragon Balls thanks to Vegeta's intel. Vegeta argues that Frieza couldn't have known because his transmitter was off the entire time, and then he remembers that he wasn't alone.
* Episode 13, when one character starts thinking of another and mentions her name, she sneezes.
* Episode 14 also focuses on Tenn as she adjusts to life on Earth, with Tak alone being the only other main character to show up more than once or twice.
* Episode 14: Kairi and Fiore meet and agree to team up for the time being.
* Episode 14 — Gordon Ambler, the mysterious stranger who knows more than he says, is really
* episode 14 on a magic fast is unable to open a jar, and Bella opens it for her. That she would need Bella's help, of all people, depresses Hermione even further.
* episode 14. Secret calls Marena a "bossy overweight oversexed shapeshifting cow", and the comic's title (only visible in the archive page) is "I am not a cow!"
* episode 14 tells a story about how his mother explained that gay "means that you like to kiss boys," leading him to think he might be gay since he never kissed a girl before and liked when his dad kissed him good night every night.
* episode 152, in which the highly-competent Princess Sara volunteers to help the heroes defeat a random encounter. She does not take their response very well.
* Episode 153 of the anime has Gintoki listen to a radio story "guaranteed to make you cry in four minutes or less", hoping it'll help him sleep. The story, titled "I'm Sorry, Jerry", is about a girl and her loyal dog whom she's forced to leave behind when she moves to another town. The story lasts well over four minutes, and does genuinely tug at the heartstrings,
* Episode 15: Albert Wesker, who is for some reason an evil moon ala
* Episode 15 and the Love Hotel, Chie, Yukiko, and Rise in the rotating bed having giggle fits. Something similar happens when Teddie, Yosuke, and Kanji end up in a bed together, except in that case the only one laughing is Teddie.
* Episode 15, Derpy Hooves drops several heavy objects on Twilight Sparkle, among them an anvil and a piano. She survives, although not unscathed.
* Episode 15, two characters are discussing a ridiculously good student and we cut to a particular character sneezing.
* Episode 1610 ("Josephine the Short-Necked Giraffe") features a dedication to John Reardon, who passed away in 1988.
* Episode 17 of NGE features a sudden shift in drawing styles; the characters look like they're all babies. With the notable exception of Misato. Thankfully, by the next episode, everything is back to normal.
* Episode 17 of Season 9 makes the damage he took in that fight seem trivial. He takes a sniper round to the chest, a full pistol clip point blank in the throat and is thrown into oncoming traffic at extreme speeds, this is WITHOUT any armor enhancements or AI like later in the series. The only permanent damage he takes is his loss of ability to speak.
* Episode 17 sees Excel and Hyatt on a mission to the United States, where Excel
* Episode 17: The Emperor's sex life before the Age of Strife causes
* Episode 18: "Blood Runs Deep" appears to function like the above mission; Venom

Snake has been hired to eliminate six rebel soldiers that are currently imprisoned to make sure they don't leak any information to the enemy. It turns out five of them are
* Episode 18 has Vegeta realize that the Dragon Ball he left underwater has gone missing, and tries to look for it for a short time. He then remembered that Gohan was flying
* Episode 18 is entirely about Gaz, with the only other major character who shows up being Dib, and he's only in it for one scene.
* Episode 18: William Shakespeare writes in his book and dramatically narrates the events that happened so far, then he breaks the fourth wall to ask how Jeanne's conflict with Shirou will go, and what role Sieg will play.
* episode 190. Of course, this lasted one manga chapter too, only 14 pages aren't exactly the same as 22 minutes.
* Episode 19 focuses on the cultural festival right after a tense episode about Nanako's mother's death.
* Episode 19. Misato and co. are about to be vaporized by an Angel, when Unit 01 bursts through a wall and punches it in the face. You read that right. Dynamic Entry, as performed by a
* Episode 19 "Wild Horses". When a pirate spaceship escapes Faye and Jet, it flies off into the distance and disappears in a twinkle.
* "Episode 1: Arrival" video, so you can see just how much detail was put into the recreation.
* Episode 1: A young girl named Laeticia prays to Jeanne d'Arc, then Jeanne is summoned and takes over her body.
* Episode 1 ends with a brief shot of Hinata at her convenience store job, looking at Antarctica on a globe.
* Episode 1 ends with Touko officially announcing her candidacy for student council president, and asking Yuu to be her campaign manager.
* Episode 1 had a minor conversation between Azaka and Touko concerning Kirie Fujyou.
* Episode 1: Most of the side conquests in between the said episode and the Tenri-Hen
* Episode 1 (poorly). Dana tries to get him to stop by throwing chalk at him and yelling "SHUT UP" over and over again.
* Episode 1 switches back and forth between Jonathan Harker recounting his time with Dracula to two nuns in a convent.
* Episode 1. While Taro is walking down some stairs he accidentally steps on a trap trigger and a giant ball drops from above and starts rolling down the stairs after him.
* Episode 204, "Chariots of the Dogs" has you visit the office shortly into the future, at which point you exchange a remote control for an egg. You exchange the egg for the remote control in Episode 205.
* Episode 20 has a similar thing happening to Shinji: he immersed into his berserking Eva so much his body melted into LCL and they had to figure out how to rebuild it and bind his soul in it. Same thing happened to his mother
* Episode 20 — The leader of the pirates who are attacking Captain Strong's ship is
* Episode #213, after Tessai throws Kon (in Ichigo's body) through a hole in the ceiling of Kisuke Urahara's underground.
* Episode 214. As Kon and his team try to fight their way into the Hollow fortress, Tatsuki tells him that the rest of the team will take care of things at the entrance and that he should proceed to the core of the fortress and attack the nucleus.
* Episode 215, Ichigo is fighting the Arrancar Exequias and their leader, Rudbornn Chelute when Renji, Chad and Rukia show up. They deal with the Arrancar so Ichigo can continue on and save Orihime.
* Episode 21: An injured Astolfo wakes up and wanders through flaming surroundings. Achilles shows up and gives him one of his Noble Phantasms to honor Chiron's request.

* Episode 22 "Hydra". The Big O confronts a gigantic monster known as the Hydra Eel. It appears to be related to the "Eel" monster the Big O fought in Episode 3 "Electric City", but has three heads. Like the Eel, it uses electricity as a weapon.
* Episode 22 of the second season the bad guys spread a cloud across the entire battlefield which prevents the use of beam weapons. Cue nearly two minute long battle royale of everyone firing and dodging MMMs.
* Episode 22 was probably a major example of this. Aside from the debut of
* Episode 23: Jeanne attempts to engage Semiramis, who sends her off to confront Shakespeare instead, as she anticipates the arrival of a few guests.
* Episode #23, the party splits up to investigate a dungeon's restrooms. While the men's room is a dark, smelly horror, the ladies' room is amazingly shiny and elegant:
* Episode 24, Elfman punches Totomaru, who was frozen by Gray. Added with Elfman's Speech during the punch and a 'wow' sound effect when a twinkle appeared
* episode 24, Mami Bibir, Prima and Bambang hear from Pipin that she and Alan are in hospital after a motorcycle accident. While Alan is away taking care of Wawan's hospital bills, Mami Bibir, Prima and Bambang find Pipin sitting by a corpse covered in sheet. They mistake it for Alan's body and immediately sobs for him (Pipin doesn't explain things very well). Then Alan shows up asking about the dorm discount that Mami Bibir was telling the corpse about.
* Episode 25 has a poorly animated Hilda model in the background of one scene. It'd be excusable, as the characters are usually rendered in CG for mecha sequences...
* Episode 26 contains a scene in which the girls imagine Hana in various outfits, done in the style of Sun-Star's dress up stickers that were being sold at the time.
* Episode 26 has the sketch "Lifeboat (Cannibalism)", where five sailors in a lifeboat starving, decide to resort to cannibalism. They begin arguing about who they should kill and eat.
* Episode 26 is even more blunt. His Super Asurada is having a problem, yet he beats Shinjyo out of determination in the last stretch in the English GP. In fact, Hayato is always seems to be this case up until SAGA Arc.
* Episode 28.5, "The Last Episode Ever". In it, Simmons comes back as a ghost, but is really
* Episode 296 is the biggest example in this series. The first half, featured piles of letters and cards sent by old minor characters. In the second half, there was a competition involving one member of every alien race shown in the series up to that point.
* Episode 2, again picks up where the first one ends and starts with Gordon and Alyx knocked out by the explosion. Assuming they didn't sleep through the night and wake up the next day, Gordon and Alyx wake up when it is still day out and travel all afternoon, and get to the resistance base near sundown.
* Episode 2. During Ryuuka's contest with Mariel a washtub falls on her head. The idea was for the person to step out of the way and catch the washtub as it falls, which Mariel does perfectly.
* Episode 2 has the Count and Van Helsing playing a game of chess while Dracula tells the tale of his journey to England aboard the
* Episode 2 includes a scene where Chloe is lounging on some railroad tracks and gets her foot caught in the switch. It's up to Max to figure out how to get her loose before she gets splattered by a train.
* Episode 2 introduces Leone "Leo" Cass, who has a very similar build to Koga.
* Episode 2 of Fullmetal Alchemist Brotherhood Abridged features this one liner:
* Episode 2. Taro almost kisses Mariel, but it turns out to be a dream.
* Episode 2: The initial groundwork for the reconquests were heavily distilled: Keima's second encounter with Jun (in order to confirm the goddess host remembers the conquest
* Episode 2: The maids use a bright light to cover up their assisting Taro in solving a math problem in class. When one of the maids tries to explain the light as a U.F.O., another maid gives her one of these and tells her to think of a better

excuse.
* Episode 2, when Taro is kicked into the sky by Ryuuka he ends up as a twinkle of light.
* Episode 300 was celebrated with 10 episodes uploaded in the same day, each one had the hosts for one episode to appear in.
* Episode 30 had the Cures recall past memories by using the Mirai Pad, since
* Episode 30 in particular has some of the best animation in franchise to date, better than even some of the movies.
* Episode 319. The overall details of things such as lighting and coloring are
* Episode 31 has this in regards to the conflict between Hana and Eri, the one who Hana stood up for in the past
* Episode 31, "There's Something About Maron", is set up to be the first episode of an adaptation of the Garlic Jr.
* episode 321 the fact that another player just answered him as if he could hear it.
* Episode 32 mentions several space electronics stores, namely Space Radio Shack, Space Best Buy, and presumably Space Circuit City (Freeza was malfuntioning at the time, and didn't actually include the "Space" prefix before the word).
* Episode 333: The imposter shows up in front of the real Naruto Uzumaki and declares that he is Naruto Uzumaki. Until Naruto said that
* Episode 336 had a unique eyecatch featuring Chopperman in a brawl with several other characters from the episode.
* Episode 33 reveals that it's not actually false, but not completely true either.
* Episode 342 was pure Rukia porn. Her character in several scenes is drawn even better than movie quality.
* Episode 344 shows a very expanded version of the grapple system rolls and counter-rolls during the five seconds or so of screen time Padme was struggling with a Geonosian.
* Episode 34 reveals that in Trunks' timeline, Yamcha, instead of dying to the androids, hanged himself after learning that Bulma was pregnant with Vegeta's child.
* Episode 352 has a straight example where the Detective Boys participate in a fishing tournament and catch a boot.
* Episode 35 offscreen. The spanking is played for laughs because the one being spanked is actually more upset about having been emotionally manipulated than physically hurt.
* Episode 36" for the first time, which prompts him to set the bourbon aside.
* Episode 375, with its incredibly-animated Obito vs Kakashi fight, is one of the largest disparities of inter-episode animation quality. Obito's absorption of the Juubi is animated with similar quality to the fight, yet the subsequent episode plays the same scene through (from a different view) with the commonly-used sub-par budget animation.
* Episode 37. After Tatsufusa Enjoji, the assistant adjutant and 3rd seat of the Eighth Division confronts Chad and does a lot of boasting, Chad knocks him into the sky with a single punch.
* Episode 37 features a rock man who turns anything he touches into stone. Among the people he turns into stone are Happy S.'s teammates, Sweet S., Smart S., and Careless S.
* Episode 38 has Dr. Gero gradually growing more and more desperate to kill Goku and his friends, only for his situation to get progressively worse, with this bit of inner monologue:
* Episode 3. After Taro gets off a couch, he accidentally falls face first into Mariel's chest.
* Episode 3 "Electric City". The Big O must battle a giant monster (known as the Eel) that lives in the lake behind a hydroelectric dam.
* Episode 3 features Nick being attacked by a mosasaur, only to have said mosasaur eaten by an even larger mosasaur right before it's about to chomp down on him.
* Episode 3 focuses on Miyako's and Yuki's relationships with Yamato and their motives for wanting him.

* Episode 3 forces the actor playing Jellicoe to help the robot down some steps while pretending to be hiding behind it, because the actor in the robot costume couldn't see where he was going.
* episode 3. He sends his men into the field for the sole purpose of forcing the enemy to waste bullets cutting them down, and fails to anticipate an ambush...not once, but twice.
* Episode 3 "Honky Tonk Woman". After Faye blasts out of the casino in her ship with Spike and Jet clinging to her windshield, she flies straight up and disappears in a twinkle.
* Episode 3 "Marquis de Carabas." While Naota is talking to Haruko about his father, an audience only sign appears with his father's face on it.
* episode 3 of "Trial of a Time Lord" involves Merdeen seemingly firing his crossbow at the Doctor. However, the reprise in episode 4, reveals he was actually aiming at the traitor Grell, lurking behind the Doctor and Peri.
* episode 3 series on the Cuban Missile Crisis, as tensions run high between Russia, Cuba and America, Dan describes a Soviet bomber dropping a bomb 20 times as powerful as the one used on Hiroshima ... it's a standard atmospheric test taking place in the Arctic Circle, and was scheduled before the crisis began.
* Episode 420", the police couldn't care less that Peter is driving drunk or that he has a blood-soaked trash bag in the back of his car, but they go ballistic when they find out that Brian has "a small amount of pot".
* episode 4.3, he is asked what the plot of a movie with no cliches would be. He responds: "I would say, 2 1/2 hours of blowing up a baby. Think about it: have you ever seen a baby blow up in a movie before?"
* Episode 45 — The cow that's been following Randy the Cabin Boy around is really
* Episode 46 & 47 — Marlin, the amnesiac bartender, is really
* Episode 47 opens with a Wham Line that will have many saying "Oh shit":
* Episode 496 has the same clip of Paddi kissing Sparky played twice.
* Episode 4 ends with Megumi in a café, getting an email from Kimari and noticeably being silent.
* Episode 4: Ends with the Red Guy discovering a doorway to some kind of recording studio, where he discovers body-suited actors staging a crude recreation of the earlier videos... then his head explodes. Unlike the others, there's no indication that this is some kind of dream or hallucination. He shows up in the next episode, fortunately, although his place or presence in the plot is now unclear.
* Episode 4 features R2-D2 whistle something to C-3PO in one scene, to which he is told "Watch your language!"
* Episode 4 focuses on Bull Randleman getting separated from his comrades in the heat of battle and trapped behind the German line after Operation Market Garden goes south for the Allies. He manages to make it back, but not after killing a German soldier before he can reveal his location.
* Episode 4 focuses on the sidekick group of GIR, Phil, Minimoose, and MIMI.
* Episode 4 has Hauser intentionally invoking this trope as a delaying tactic — the villain of the week has taken hostages in a bank, and the police have arrived to deal with it. Hauser plays the role of traditional FBI agent in these situations in order to distract the cops long enough for Rebecca to sneak in and extract the target.
* Episode 4. Ryuuka uses a series of audience only examples to explain the rivalry between the Jihyou and Hanaukyo families.
* Episode 4 where Neil says that the main lesson is "never try to change anything, because someone more powerful than you will always get in the way and keep you down."
* Episode 5005 (also known as "Mick and The Good Fit") ends with a dedication to Caroll Spinney, who had passed away a week prior, that read "Thank you for bringing so much life to Big Bird and Oscar. We'll miss you, Caroll". The documentary
* Episode 50 — King Guber's spy, who had infiltrated Captain Strong's crew, turns out to be
* Episode 51: Happy becomes a twinkle as well when he makes a comment about Gray

being shirtless and stalking girls. Before he could get to finish his sentence of Gray is a giant pervert, he got punched into the sky by Gray.
* Episode 54 sees Vinny choose one of two islanders to be removed by having them fight in
* Episode 57 16 is giving him. 16 doesn't snap out of his inner thoughts until after the episode ends!
* Episode 58 (the one where Mr. Cat goes on a rigged game show hosted by
* Episode 5, bringing the plot to a halt after the Shadow Yukiko battle.
* Episode 5 "Brittle Bullet." A blackboard appears while Haruko is wearing the Elvis Presley costume.
* Episode 5 featured a challenge to see who could get the most attention for the money on their way out to a cover shoot out of town, the two contenders being a new rental Lamborghini and a Model A rat rod borrowed from Sailor Jerry, with an overwhelming gender divide - all males they encountered wanted the Italian supercar while all females encountered wanted the rat rod - after getting the thing to stop doing its Old Faithful act, whilst dealing with its lack of instrumentation (it stopped, so obviously you're out of fuel) lack of comfort (you pull the door shut with string tied to the door's inner structure, as it has no interior lining) and low ground clearance (the first thing it does upon leaving the Motor Trend carpark is delay their breakfast out by over an hour, byh running aground on the kerb interface and resisting all attempts to budge it for over 45 minutes).
* Episode 5 features Easy Company participating in Operation Pegasus, where they help evacuate a group of British paratroopers who had gotten stuck behind the German line during Market Garden.
* Episode 5 had a minor conversation between Shiki and Mikiya discussing the aftermath of the events.
* Episode 5 has one about how there are some things in life more horrifying than ghosts, namely old people having sick pervy sex.
* Episode 5 has the scene where a number of people are gathered in the dining hall, and there's nobody outside in the hallway. Yet suddenly, a knock on the door is heard, and when the door is opened there's a letter outside. Earlier, the narration talked at length about one of the people present fiddling with a tape player, so it's natural to suspect shenanigans involving playing back a knock from a tape. Erika (the detective) assumes exactly that. However, it turns out to be false.
* Episode 5 of the anime has Shinji dropping off stuff at Rei's apartment when a naked-except-for-a-towel Rei steps out of the shower. Shinji trips and falls on top of her, his hand landing on her naked breast. Her reaction?
* Episode 5 seems like just another case of "Dib tries to find an edge on Zim and suffers
* Episode 5: She pretty much implied she has been having sex with Sorata all night, through use of "
* Episode 5: Shirou Kotomine brainwashes the other Masters of Red into giving him their Command Spells.
* Episode 5 states that Geese Howard's birth name was something else (likely German in origin), but that he no longer remembers what it was.
* Episode 5, where it appears in the void after it is pruned from the timeline.
* Episode 60 Epilogue has Trunks scream openly in a deleted blooper scene where Bulma talks about her sex life with Vegeta, despite Trunks'
* Episode 63 has a villainous example. Sonic, Shadow, and Eric turn into their Super forms and are on the verge of defeating Tsali once and for all. So what does Tsali do? He
* Episode 67, after a ballet performance where Stumpy is suspended from the air using ropes, everyone goes home but forgets to untie him.
* Episode 67 had so little to do with the overall plot, it was actually left out of
* Episode 69 has Marmolim. A planet inhabited by cute beady-eyed aliens with a penchant for magic. Sounds great — except for the fact that they've nearly been wiped out by Shroud, and are torn in a religious civil war between Christians

and Maledict-worshipers.
* Episode 6, "Echoes", has Corin tell the story of the Echo Tree Forest, which is now off-limits after a man stubbed his toe and went insane from the Echo Trees repeating his own scream back at him. When the company sends their body-collectors-who-happen-to-be-deaf, they complete their job but, despite being unable to hear the screaming, also complained about a cold vibration inside of their bones.
* Episode 6 features a horoscopes section where each of the zodiac signs are given increasingly odd/hilarious horoscopes. Among other things, Cecil warns Capricorns that "those were not contact lenses you put in this morning", announces that its Taurus's "annual crime day" where they're exempt from all laws, and simply curses Scorpios and their families and calls them "vile".
* Episode 6 features a scene in which Nick is rescued from a future predator when said predator is attacked by a gorgonopsid.
* Episode 6 has Sarek invited to what is supposed to be negotiations with a splinter Klingon group. Good thing Sarek was almost killed on the way and they had to send a Human admiral instead.
* episode 6 playing in the background. When it turns out the villains armor is really just a car, the music winds down. Considering how serious the context for the music has been used up until this point, this comes as a humorous surprise to the viewer, even though the idea of mislabeling a car as an armor was brought up previously in the episode.
* Episode 6. While running around a corner, Taro runs into the mansion's nurse.
* Episode 75. Two fleets - a Demon fleet and a Metarex fleet led by the Blue Typhoon - are facing off. Maledict and the heroes are about to have their final climactic showdown. And then
* Episode 7. After Taro accidentally falls on Mariel, she cups his face in her hands and pulls him toward her. They almost kiss, but Taro pulls away from her.
* Episode 7 features Reika standing on a tower atop Mt. Fuji explaining her reasons for choosing it as their secret base, complete with appropriately dramatic music. Cue the rest of the girls being unable to hear her as the wind sucks the air out of the band.
* Episode 7 has Pip downing Zorin with his pistol and then picking up Seras to walk off at the behest of his men. Just when you think they'll be able to escape, that hope gets yanked right out from under their feet in gruesome fashion.
* Episode 7 has tons of censoring speech by Sōsuke, who was quoting verbatim all the lines from the exceptionally foul-mouthed Gunny from
* Episode 7 later reveals that the Japanese military did not accept being forced to yield to NERV for handling the Angels and tried to develop their own
* Episode 7 R2 has a creepy scene where Korczak, a Refrain drug dealer, saunters up to Lelouch and gently caresses his face with the back of his hand. In the English Dub he refers to Lelouch as "my dearest."
* Episode 7 (season 2) features Rudolf, who's a living teddy bear with a raging libido. The shopkeeper Himegami bought him from tells her she used to be one of his lovers, until she caught him cheating on her
* Episode 7: she does get splattered with mud, but there's no blood or any other visible injuries.
* Episode 7 "Unidentified Living Creature". While the protagonists are exploring an underground passageway Ryuuka and Ikuyo Suzuki deliberately set off a number of booby traps, some of which drop washtubs on poor Taro's head.
* Episode 7, when Ryuuka uses a grenade underground she becomes a twinkle.
* Episode 7. While in a hot springs house Taro's 3 personal maids hold up signs they pull from nowhere to describe the nature and beneficial effects of the hot springs waters.
* Episode 85 has a more specific, immediate example: The Mighty Nein, having learned that agents of the cult are entering the Empire's capital city of Rexxentrum, teleport there in pursuit. They arrive to learn that the city has
* Episode 8 ends with Gin bringing flowers for someone, presumably Takako.
* Episode 8 focuses on a rivalry between Viera and Gaz, with the only other major characters to show up being Dib and Norlock, for one scene each.

* Episode 8 has Shinji waiting as Asuka is changing clothes downstairs. Impatiently he peeks at her to see if she is done and he sees her partially naked. Cue Asuka donning a
* Episode 8 is just filler about Viera and Gaz coming to blows (ultimately literally) due to clashing personalities. But Gaz maintains a serious grudge over this, to the point that come Episode 19 she
* Episode 8 "Missing Cat". The Big O must defeat a giant genetically engineered monstrosity known as the Chimera.
* Episode 8 of II2 also includes a Bland Name variant of the Apple corporation, which is, as you'd expect, Meeple. Its' creator is Steve Cobs.
* episode 8, she just hands it to her. And then she keeps hounding Buffy with more jars until the vampire slayer shows Bella how to use a jar opener.
* Episode 8 when Asuka sleepwalks and lies down next to him, placing her cleavage a couple of inches from his face.
* Episode 97 reuses animation of Goku dodging energy blasts from episode 85. The same animation is reused in episode 103, when Goku dodges Rozy energy attacks.
* Episode 9 begins with a gag sub of the real episode from the Spanish dub.
* Episode 9 has Gohan making a threat like this in a rather eloquent manner in reaction to Piccolo's death.
* Episode 9 is called "Christmas Eve". It starts out like a Christmas episode up until Nanoha and Fate visit the hospital where Hayate's staying so she won't be alone on Christmas. Little do they know that Hayate's the
* Episode 9: Just as Mordred is about to kill Astolfo, Sieg arrives and challenges her.
* Episode 9 of Season 2 has Fantasy Con, a convention for the fantasy genre as a whole.
* Episode 9 of the 2011 release had a question about the definition of a "pyrrhic victory", and demonstrates by having Old Man suffer one when he manages to drink a gallon of milk in one hour, but gets a nasty case of diarrhea in the process.
* Episode 9 wrestling personalities, both those who were and weren't part of the series, sometimes many people on one episode.
* Episode "Amazonian Women in the Mood" in which the men are sentenced to "death by snu snu".
* Episode and remake of "A Feasibility Study". A random neighborhood from a typical suburban town is transported to an alien planet in order to determine whether the inhabitants are suitable for the environment
* Episode "A Piece of the Action" has the natives of a planet building their entire society in mimicry of a book "Chicago Mobs of the Twenties" left behind accidentally by an earlier starship. An incredibly info-dense book, too, as the locals even copy the fashions, automotive styling, architecture, and firearm designs of 1920's America. At the end of the episode Bones suspects he may have left some Federation tech behind, and wonders aloud if the locals might trade up from being gangster fanboys to being, well, Trekkies.
* Episode: "Batman Sets the Pace". At the end of the episode, a mask is pulled off the face of the Maharajah of Nimpa, revealing him to be the Joker in disguise.
* Episode "Batman Sets The Pace". Batman and Robin crawl up the inside of a chimney to escape the Joker's poison gas trap. After they exit the top of the building, they use their gloved hands to slide down a wire to the ground.
* episode being a good example), so being told you're going to be part of a special/episode of a new series is hardly unbelievable.
* Episode "Blood" implied that those people compelled to kill were sent subliminal messages, though it's possible they had just hallucinated them because of the drugs that were used in the community.
* Episode "Borg Collective", mission "Collateral Damage" has Undine warships begin glassing a planet the Borg are assimilating. The season 9 update replaced this mission with "A Gathering Darkness", where the Undine ships start with small-scale tactical bombardment then switch to an
* Episode "Computer Affair". Straker decides to use one of the "new anodynes" on a captured alien in the hope that it will act as a

* Episode "Copper Bullet" ends with the team enjoying themselves at a concert of some band. Everybody's dancing — Jane with Lisbon, Abbot with his wife Lena, Wylie with his crush Vega —
* Episode "Dancin' Homer" had Marge and the kids sitting in the nosebleed section near the players' ex-wives when they watch the Capital City baseball game with Homer filling in as the mascot.
* Episode "Darkness Falls" is about Mulder and Scully's nice trip to the woods. Or so Mulder thought at first, Not only do they have to deal with eco-terrorists who sabotage their car, radio, and other equipment, but they discover that certain mysterious and deadly bugs are responsible for loggers' deaths. They nearly don't make it out.
* Episode "Dominion Domination", mission "The New Link" has one of the KDF PC's bridge officers suggest calling in the fleet for a quick bombardment to make sure that
* Episode "Dumped." Gary shows a sudden and inexplicable urge to be around
* episode even. In "Chosen" Spike gets a long, drawn out, dramatic death (which doesn't stick) while Anya gets a quick slice through the torso.
* episode, featuring the character Dr. Herringway, commander of the eponymous expedition.
* episode forty", Earth was rendered a radioactive wasteland by the devastating fallout from the Earth Wars in 1987, leading the survivors to evacuate the planet and establish a colony on Mars.
* episode forty-one", Bat Ears Brady continually refers to the Landro natives as "Gimpoes".
* Episode four has a background gag where a man orders a steak, which is then served by an anthro cow. We wouldn't learn where genuine animal meat comes from until much later in season two.
* Episode "From Out of the Deep". When the alien sensor units fire on Samson and Goliath the sound is the "skeleton beam" firing. The sensor units units attached to the feet of the alien ship use the "electronic rattlesnake" warmup noise of the heat ray.
* Episode "Galaxy Trio and the Sleeping Planet". When an Intergalactic Headquarters radio officer receives a signal he concludes the transmission with "Over and out", and when Meteor Man receives a transmission from Intergalactic Headquarters he does the same thing.
* episode had a HYDRA weapon discovered hidden in Peru, with mention that some HYDRA members fled to South America "with their Nazi friends".
* Episode "Harmony Steals the Show" has Harmony on trial for his soul after he has a
* episode has a warning at the start of the video about "disturbing stuff." This warning is also present in their "best of" compilations for the playthrough.
* Episode "Heavenly Smurfs" has the Smurfs tricking Gargamel into thinking that he died and is facing a trial by Angels and Devils.
* Episode "Honky Tonk Women". The criminal boss's ship fires one of these at Faye's fleeing ship.
* Episode "How the Test Was Won" ends with Principal Skinner lifting the ban on dancing and the school dances to "Footloose". Even Superintendent Chalmers.
* Episode "Identified". After a UFO is shot down one of the aliens aboard it is captured. After he's exposed to the Earth's atmosphere he suffers from
* Episode III — Revenge of the Sith shows dozens of clone troopers experiencing this when Yoda and Obi Wan re-enter the Jedi Temple. The Jedi hardly break stride as they slaughter them all without a scratch.
* Episode III: Revenge of the Sith and avoid the path his father took.
* Episode III: Revenge of the Sith has the same guy ordering the newly christened Darth Vader to wipe out Viceroy Gunray and the other Separatist leaders. As well as, a few scenes earlier, the Jedi at the Temple.
* Episode III, which shows both remarkable incompetence and that the ships were far too close to their target to begin with.
* Episode I — The Phantom Menace shows the Trade Federation leaders panicking

as the implacable Jedi make their way to the bridge, mowing down any droids they send against them.
* Episode "In Like Ed" featured this gag, produced by a baking powder smoke bomb
* episode is presented through the Machine running several simulations of how events will play out based on what it tells Root to do, with it "resetting" back to real-time events every time the outcome is unfavorable.
* Episode I, the only thing still spiffy and clean are the machines the military uses to keep the populace in line, and those look better when they look mean than when they look pretty.
* Episode IV: A New Hope, only Luke's run is so difficult that the only way he was able to do was with some timely assistance by Han and Chewie eliminating his pursuers while he used The Force to hit the impossible target.
* Episode IV gives us our first mention of the Clone Wars, mentioning only that Obi-Wan fought in it alongside Anakin Skywalker, Darth Vader, and Bail Organa. (Though those first two
* Episode IV, is introduced as a physically frail old man who unleashes previously unseen powers or abilities by the end of the film. Obi-Wan literally "become[s] more powerful than you can possibly imagine".
* Episode IX: The Rise of Skywalker groups, which predictably satisfied neither.
* Episode "Jupiter Jazz, part II" replaced the normal credits music "The Real Folk Blues" with different music ("Space Lion" by The Seatbelts), and the usual "See you space cowboy" with
* Episode "Ma Parker". The cells of Ma Parker and her criminal children each had a label with the occupant's name.
* Episode "Mary 25" has a robot nanny bought to work in a household, just to be molested by the children's violent and abusive father. It doesn't end well...
* Episode "Memorial" has the crew affected by traumatic memories of crimes of war
* Episode "Monday" opens with Skinner arriving at a bank that Mulder and Scully are inside, shortly before the bank blows up. All this happens in the teaser. After the credits and commercial break, we're in the hallway outside Mulder's apartment a few hours before the explosion as his day begins badly (
* Episode "My Big Fat Geek Wedding", Skinner admits he does not want to marry Edna and the Simpsons have to work to keep him from leaving her at the altar. However, Edna finds out and chooses to dump him instead.
* Episode "Nerod". When one of Nerod's gladiatorial robots fires sword blades at Samson the "skeleton beam" sound can be heard.
* Episode "Nightmare". A group of United Earth troops is captured by the alien Ebons and subjected to interrogation using physical and psychological torture.
* Episode Nine — Germany is close to final surrender, and the unit seems to mostly be behind the front line, where they find a concentration camp.
* Episode N), thus making the movie's status in canon questionable at best (not helped by the duality gimmick making them interchangeable).
* episode of the animated web series “Whirlgirl” had the titular super-hero character grow to giant size.
* Episode of the Dead: A chapter, episode, level, or stage dedicated solely to zombies.
* episode of the fact he thought she was his sister. It's not lost on the crew, however, and they spend the episode making jokes about it.
* Episode "Oh Do You Know the Poffin Plan!" Forsythia's shy Roserade can only fight when dressed as a superhero (with its face covered by a scarf). Meowth removes its scarf and it's captured by Team Rocket. Forsythia gives it a rousing speech, it realizes it doesn't need the scarf to be a hero and beats up Team Rocket.
* Episode "Old School" has Rosa, Amy, Charles, Jake and Hitchcock goof around with a bomb-disposal robot and they blow up Scully's smelly shoes in the
* Episode One — training in the US and England, and the conflict with
* Episode One, attempting to call Bubs using Homestar's phone results in a phone tree. Strong Bad quickly hangs up because "You can't prank a phone tree. Besides, the last time I navigated Bubs' TeleStand, I wound up with a crate full of rhino

horns... and not even the endangered kind!"
* Episode One", Bitsy wonders how could the dog walker lose Shampagne, but Helen assures her that he seemed competent when she interviewed him. A quick flashback revealed that Helen purposely hired an incompetent dog walker so Shampagne can get lost so she would be next in line to inherit Bitsy's fortune.
* Episode One of Season 3 has Cinder driving around picking up people for "nefarious reasons" (and being pretty
* Episode One", Owen is the only person in his family and the park who's excited about the Hot Lips Turtlehead flower blooming in Central Park.
* Episode One reveals that the "suppression field" mentioned apparently doesn't suppress the drive: only the formation of embryos.
* episode on Newmen #1 has flashing "extreme!" text, at on the final repeat there also appears "if you can read this, you paused the video".
* Episode "Pete: part 1". Kryten, Kochanski and the Cat come upon a team of Canaries frozen by the Time Wand. When Kryten tries to fix them, they instead intermittently unpause.
* Episode "Replaceable You" ends with a dance party to "Golden Years".
* Episode "Requiem" opens with the characters attending the funeral of Leo McGarry, who had passed away in the previous episode. The funeral — and episode — was very obviously a send-off to actor
* Episode Ryuu (full names "Lunoire Faust" and "Chloe Rollo"), and Ryuu knows both of them personally.
* Episodes 115-116, aptly titled "Storm the Tower", features one team (between Team Lads (Gavin, Michael and Ray) and Team Gents (Geoff, Ryan and Jack)) attempting to get to the top of a large fortified tower and capture the Tower of Pimps within one hour, while the other team attempts to stop them.
* Episodes 8, 9, and 10 of the Despair Arc take place over the course of a single day.
* Episodes 97, 99, 103 and 107 use a frontal shot of Beerus screaming to the camera.
* Episodes: After reconciling with his father after his father's death Matt Leblanc decides to fufil his father's wishes by scattering his ashes in the ocean. Unfortunately the wind is blowing the wrong way, covering Matt with the remains.
* Episodes, a group of Hollywood TV executives discuss a potential premise for their network's vampire style show. Many ideas are mentioned, culminating in Myra recommending the paranormal creatures in their show should be Gypsies. She recommends it twice, before somebody tells her that Gypsies are real.
* Episode "School Nurse," Nurse Kirkman, having been soured by an earlier date with Coach McGuirk, tells Jason (who has made clear his
* Episodes ends on this note: Sean and Beverly get a new show, which they start watching in the final scene - enter the Episodes opening sequence.
* Episode seven has arguably the highest disposal count of the entire series: in this case, the team has to bury the bodies of
* Episodes is forced to take a job as a game show host because he owes a lot of tax money, and needs to pay it off fast.
* Episodes is that of a husband-and-wife team of British television writers finding themselves living this trope, with all its attendant pitfalls.
* Episode: "Smack in the Middle". The Riddler's henchwoman Molly puts on a mask made from Robin's face and masquerades as him.
* Episodes of the classic series referred to several different events, including the survivors of the destruction of Phaester Osiris defeating Sutekh and sealing him in a
* Episodes starting with the TARDIS responding to a distress call include
* Episodes such as "The Answer", "Reunited" and "Hit the Diamond" were never allowed to broadcast in Russia and the Middle East due to the presence of same-sex couples. Other episodes containing these themes were not outright banned but heavily edited.
* Episodes that take place in (and poke fun at) countries other than America don't tend to be popular in the given countries. While aware of this phenomenon,

* Episodes, then 28-Year-Old Mircea Monroe portraying the very much aged (possibly 40s or 50s) actress Morning Randolph, who was said to have plastic surgeries to stay young.
* Episodes (which revolves around a couple of British scriptwriters in Hollywood) is a jaunty tune backed by typewriter noises. Interludes between are also frequently bridged with typewriter sounds, such as typing, dinging bells, and ratcheting.
* Episodes with villains were few and far between, but one had a giant monster made of goo named "Crud", who had a hyper, overenthusiastic, comical lackey named Smudge.
* Episode Ten — Set in Austria after VE Day, and everyone is wondering if they will have to go and fight against Japan. There is an Action Scene, involving what their CO calls "men with firearms, alcohol, and too much time on their hands."
* Episode "Terms of Endearment" is all about a demon who's trying to father a child that
* Episode "That '70s Show": During construction a body is discovered inside a support column of a building. It is revealed to be that of a prominent mobster who disappeared during
* Episode "The Condemned Of Space". The Robinsons encounter an abandoned prison filled with inmates who served out their sentences while frozen. When their sentences were up, they were unfrozen and released.
* Episode "The Fortune Hunters": When a fortune telling book says James is like Moltres, James' confidence skyrockets and he becomes a total badass. When he is informed that fortune telling is just a scam, he turns into a loser again.
* Episode "The Infinite Vulcan". The Phylosians are very reverent toward Keniclius 5, despite his predecessor having caused all their problems in the first place.
* Episode "The Jimmy Jab Games" has the office event described by Diaz as "a bunch of dumb contests we play to kill time" while waiting for a VIP to arrive; examples would be "the monster mouth bagel toss" (trying to hit Scully's open mouth with a piece of bagel), "the mouthathon" (eating month-old Chinese food from the fridge) or "bulky bulky run run" (the bomb suit foot race), "keep your cover" (they must talk to as many officers as they can without being recognized) and "obstacle course".
* Episode "The Loneliness of the Long Distance Golfer" from Marty Feldman's sketch show
* Episode "The Lorelei Signal". Every 27 years, a starship is lured to a planet where female aliens drain the life force of the male crew members. While explaining the situation to Lieutenant Uhura:
* Episode "The Naked Time". The Enterprise is minutes away from burning up in the planet's atmosphere.
* Episode "The Penguin's A Jinx". The Penguin and his henchmen fire a rope line from the top of one building to another and slide across using umbrellas with special devices attached to the end.
* Episode "The Schizoid Man": After a Village agent surgically altered to look like #6 is killed, #6 attempts to masquerade as the agent to escape. Unfortunately, he talks too much and makes several mistakes, causing #2 to become suspicious. #2 mentions someone named Susan saying something "only a month ago": #6 doesn't react. He asks #6 to "give Susan my regards" and #6 agrees. Later, after #6's escape has been foiled, #2 tells him that Susan died a year ago.
* Episode "The Sea Haunt". As the title creature climbs onto the deck of the ship the captain tells a crewman to "Sound the alarm! All hands on deck!", and an alarm bell starts ringing.
* episode, the title character uses the threat of a poor customer service rating to get a vendor's account representative to participate in a wheelie-chair race down a three-story parking garage.
* episode thirty-one", the residents of the Lower Levels of the Ship refer to the Mutants who live on the Upper Levels as "Muties".
* Episode "Tithonus" featured a photographer who could detect people who were about to die, and used it in an attempt to photograph Death.

* Episode Title Card: A television series' episodes have a card showing the episode's title every time.
* Episode Title Card. This may suggest that Ava was testing the two of them the entire time.
* Episode "True Blue Swablu": Max tricks an injured Swablu into thinking that the "magic powder" sprinkled on the Pokémon would help it to fly, except that the powder was actually just
* Episode Two a Combine Hunter appears on top one of the buildings before quickly running away. Another then appears in the back of a building after switching on a light before running away.
* Episode Two. Incidentally, he gets fooled into tagging along with a forest weasel of questionable morals, Prima.
* Episode Two, it's shown that Gordon ruining someone's lunch in the first game by leaving it in the microwave too long is canon (it was Magnusson's).
* Episode Two, the G-Man's endgame reports have been replaced with Vortessent messages, the most amusing of which comments that "the Magnusson's misgivings about the Freeman were completely justified" if the player fails to protect the base.
* episode, unsuccessfully of course, for his Boating School class photo.
* Episode "Versus the Moltens of Meteorus". While Vapor Man is talking with his superior at Intergalactic Security (a military-style organization) he ends a radio conversation (where he received the message) by saying "Over and out".
* Episode VIII: The Last Jedi he orders no quarter when the First Order attacks the Resistance on Crait.
* Episode VII: The Force Awakens does. The difference mostly just comes from smarter use and ten+ years of technology making CGI rendering less of a problem. So in this case, it's more of just telling the base what they want to hear than actually pandering to them.
* Episode VII: The Force Awakens who could have told the Resistance what happened to Poe.
* Episode VI — Return of the Jedi: The moment Luke Skywalker and his lightsaber are reunited at the Pit of Carkoon, everything goes downhill fast for Jabba the Hutt's assorted gangsters as they are blasted, sliced, sent flying headlong into the Sarlaac's gaping maw, or all three. Jabba himself is strangled to death in the dark by Princess Leia.
* Episode "Wetwired" dealt with subliminal messaging on cable television driving people to murder. Mulder finds that he is immune to this subliminal messaging because he is red/green colorblind, and the messaging is heavily reliant on that. Scully, on the other hand, is temporarily brainwashed, convinced that Mulder is one of the men who abducted her and has been lying to her from the beginning. This almost ends tragically as she pulls a gun on him in her mother's home. Scully insists that Mulder never trusted her, and Mulder replies with "You are the
* episode where Peter and Brian win a tour of the Pawtucket Brewery, Peter says something to the effect of "It's like I died and went to Heaven, but they realized it wasn't my time so they sent me back to a brewery."
* episode which centered on the morning wood. It turned out the reason for it was a "Morning Wood Fairy".
* Episode XXV has the 300 Spartans fighting an evil machine that sends hordes of robots to attack day after day with no end in sight because the machine strips the battlefield of fallen robots to either repair them or salvage them for spare parts. The Spartans fight to protect their homeland from being stripped of its natural resources. The war ends when Jack shows them a hidden path that allows a strike team to attack the robots' main base. During the background story, the king admits he's the fifth king in the war and with his son fighting, that means the war has been going on for at least 6 generations.
* Episode Zero, which makes the Maganacs the first real friends he ever had.
* Episodic films (though not the Anthology films) begin with the opening narration scrolling against a starry sky. When the narration ends, the camera pans to a ship flying through space.
* Episodic Game: A game that is divided into separate episodes, and allows for

cheaper prices, shorter wait times, and shorter development times.
* Epistolary Novel: A novel is presented as if it was a compilation of multiple other writings.
* Epistolary Novel: A story told entirely through an exchange of letters.
* Epistolary Novel (Cárcel de amor) by Diego de San Pedro, 1485.
* Epitaph Road centered on a virus called Elisha's Bear, that wiped out most of the men in the world. It's revealed that it was intentionally released by an angry radical feminist.
* Epitaph Road, which tells the story of a boy in a society where a virus, which turns out to have been deliberately released, drastically reduced the male population and led to a society ruled by women.
* Epithet Erased creator Brendan "JelloApocalypse" Blaber has stated that he doesn't mind porn of his characters unless it's of Molly (who is underage), in which case he hates it with a burning passion and is annoyed that people aren't making porn of Zora and Mera instead. He's also confused as to why there's more porn of Bugsy than there is of either Mera or Zora.
* Epithet Erased. Cut to everyone else staring at him and wondering if he's okay.
* Epithet Erased despite being inscribed herself, since she believes that epithets give people an unfair advantage over mundies who'd have to spend their whole lives training to keep up.
* Epithet Erased, Giovanni embodies this trope. From his very first appearance in episode 1:
* Epithet Erased: Giovanni is less effective in a straight fight than the other Inscribed, but he's learned enough variety in his powers to give him some advantages they don't have, such as a high level of mobility.
* Epithet Erased has Molly's "Dumb" ability, which, as you can guess from its inclusion here, would actually be best described as a negation ability (by way of "dumbing down" things). In addition to creating cones of silence around herself, she can temporarily lower a person's intelligence to allow for easy manipulation, reduce pain or a weapon's damaging power into practically nothing to protect herself and others, and weaken any summons created by another Enscribed until they fade from existence. Upon seeing her demonstrate that last use, another character asks in slight terror if she can do the same to actual people, to which she fearfully admits to being unsure of and unwilling to find out.
* Epithet Erased. He then comes across the police, who are here to stop the robbery...
* Epithet Erased: Mera and Indus are arrested at the end of the first arc for trying to steal the Arsene Amulet from the museum and subsequently disappear from the story. In a similar vein Sylvie, who was injured during the attempted robbery, makes no later appearances after being carted off to the hospital at the end of the arc.
* Epithet Erased, so time will tell if the rest of Bliss Ocean is as lax about their principles as her.
* Epithet Erased the characters will often loudly announce what they are doing, referring to themselves in the third person. One of the more notable ones is Giovanni's repeated "Teleports behind you..."
* Epithet Erased, there are screens that pop up before and after ad-breaks, showing facts about various characters, complete with said character saying a variation of the show's name.
* Epithet Erased where scenes are fully animated, such as the opening credits.
* ''Epitome'' how Tantalus was punished in Hades because, among other things, he "blabbed the mysteries of the gods" to his fellow men.
* Epitomized by the Demolisher series of tanks. Massive tanks ranging from 80 to 100 tons carrying
* E Pluribus Unum has Nancy at its mercy on the floor and roars into her face from inches away.
* "E Pluribus Wiggum" caused controversy in Argentina prior to its broadcast there. The controversy is over an exchange between Lenny and Carl. Carl says "I could really go for some kind of military dictator, like Juan Perón. When he

'disappeared' you, you stayed 'disappeared'!". Fox decided not to air the episode in Latin America, except in Brazil. Some national TV networks in the region, Caracol in Colombia, Canal 13 in Chile, Televen in Venezuela, and TV Azteca in Mexico have aired the episode. FOX Latin America finally aired the episode for the first time on September 6, 2016, after 8 years of censorship.
* E Pluribus Wiggum" never reveals how Ralph's presidential campaign turned out. We see a fake ad asking the people of Springfield to vote for him and then...credits.
* Epoch Evolution launching three nukes to destroy the American station, whose purpose is to destroy ballistic nukes with lasers. The station personnel manages to destroy two of the nukes far enough away, but a Chinese satellite jams the third laser turret, preventing a lock until the nuke is too close. It's still destroyed, but the blast wave destroys the station as well.
* Epoch. Rand and Czaban find out that the US military plans to blow up the Torus (a huge, spinning alien artifact that threatens to cause a new Ice Age) with a nuke. Since the Torus is likely the reason for all life on Earth, the figure that this act of violence would only show its alien creators that humans cannot be allowed to live. They sneak into the Torus and reach the bomb site. Rand, an experienced engineer, tries to figure out how to disarm the bomb only to realize that this particular design cannot be disarmed with this trope. They kiss, and the screen fades to white... only to reveal that the Torus absorbs the energy of the explosion and not only keeps Rand and Czaban alive but also cures Rand's terminal illness and impregnates Czaban with Rand's child.
* Epoch that they can change shape, resurrect the dead, and change between matter and energy forms with ease. It is theorized that they may have started life on Earth, controlling its cycles of extinction and recovery.
* Epoch, the military wants to do this to the torus, and they eventually get a nuke inside the thing, but it absorbs the explosion, only shaking a bit.
* Epomis beetles feed on frogs and other amphibians in this way. They first disable their prey with a bite to the throat/underside (larvae) or pelvic region (adult beetles), then begin feeding. Sometimes they end up on the receiving end of this trope, but that doesn't mean they get digested; one observed case of a frog eating an Epomis larva resulted in the frog regurgitating it a few hours later.
* Epona, a Celtic goddess associated with horses, is sometimes depicted as half-horse. One backstory is that her father hated women and thus had kids with a horse instead.
* Eponine and Marius sing "A Little Fall of Rain" as Eponine lies in Marius's arms, dying of a gunshot wound. She dies before they can finish the last note.
* eponymous character") series. Whenever he tells one of his past adventures, his three grandkids usually don't believe a word of it.
* eponymous comic book, was apparently enough of a fan of "capes" to major in studying them at college, despite the crappy job prospects. She also wears "Capitan Rivet" underwear in some panels.
* eponymous organization that would focus on the plot to be announced for a 2020 release date (later pushed to 2021, later moved to 2022).
* eponymous series can come across as this, given that he casually murders people who challenge him to a fight without a second thought.
* eponymous series new career as a teen prostitute with an axe. They're both normal high school students again the next day. (Her for real, him only apparently.)
* eponymous. Since most people expect death to befall them when they open the box, that's exactly what happens. The reason why our heroes survive is that they were skeptical of its reputation.
* eponymous substance proved to be much tougher than they could've anticipated.
* Epps gets another one earlier, when he sees the various Decepticons coming at their group of soldiers and Autobots:
* E Ps featuring two B-Sides each that contribute to the Cornish/Gaelic feel of the aforementioned song's parent album (Although, rather thankfully, his latest batch of singles avoid this).
* Epsilon is metastable/rampant. Metastability in the Halo universe is, to borrow a phrase from the forums, a big deal, involving some very obvious and extreme

stages. Epsilon hasn't really exhibited any of these (except maybe anger) and it's likely he's not even capable of it (being a fragment, not a full AI), yet it's such a common fan theory that it's often stated as fact, even on
* Epsilon is stuck in the Monitor body and being worshipped by the aliens, he's called upon to give a eulogy. He begins this way.
* Epsilon-, leaving Tucker to take over in Season 12. Tucker is clearly resentful about this and struggles with insecurity, but ultimately steps into the role of leader and actually develops several traits similar to Church. Then, when Church returns, the two start to clash when Church tries to reassume his old role, since Tucker is both accustomed to being the leader and pissed about Church leaving him to fill in his shoes.
* Epsilon. Of course, he has the original's personality and memories, so it's not too big of a deal for him.
* Epsilon: PsiCorps is Balanced, whose main strength lies in mind control technology and amphibious assaults. HQ is slightly more of a Powerhouse, focusing on territorial control, defence and strong infantry. Scorpion Cell is the most Subversive, favouring cheap, spammable and
* Epsilon! to activate, leading to the use of a variation of this trope.
* Epstein (1953–2019), American financier, philanthropist, and sex offender".
* Epyx fall under this trope, including giant centipedes, giant leeches, giant ticks, giant wasps, giant fire bugs, and giant mosquitos. Possibly justified as Apshai is described as a giant Insect God.
* Epyx — it is possible to converse with some monsters and get safe passage if you leave them alone. However, subsequently attacking them or attempting to steal their treasure will get you in trouble.
* Epyx, where the entire point of the game was to enter the Apshai temples, fight the monsters, and grab the loot.
* Equal Impact, opens up with a beaten competitor from the Northwest Karate Tournament trying to fight the protagonist in the parking lot.
* Equalist biplanes are painted in a grey shade with black insignias set inside a red circle, looking very similar to Luftwaffe paint schemes. Bonus points for the insignias resembling the Balkenkreuz cross.
* Equalists. A few trainees and hangers-on have gone down easily enough, but the uniformed members are usually able to give even the main characters a good fight. In their first appearance they actually beat the heroes in even odds!
* Equal Justice in "Sugar Blues" (1x10), where a prisoner defends himself on a murder charge. While he ends up losing, he gives the prosecutor a very hard time. He turned himself into a jailhouse lawyer inside and had apparently won previous cases at trial. An old woman who comes just to watch trials claims he's her favorite since he's that good.
* Equal Justice: One entire episode revolves around police officers that are on trial for beating a suspect, while in another Barry gets an officer to ease off while arresting one of the disabled activists by threatening to prosecute him over this.
* Equal Justice: The defendant in "The Big Game and Other Crimes" (2x06) is accused of arson for burning down a crack house he felt was a threat to his neighborhood.
* Equally delusional mass murderer John Linley Frazier claimed to have killed an entire family
* Equally fun is a few strips earlier when Ebbirnoth describes having had his
* equally have a unified culture under default settings, only it's in a state of civil war at present...
* Equally if not even more ironic, Cupid, the god of love, had one wife and was faithful to her. The other Olympian who was completely faithful? Hades, god of the underworld.
* Equally important at this point is having dedicated supply runners whose sole purpose is to provide the soldiers with ammo and snacks, as any zombie engaged can potentially call a nigh-limitless horde to their location, turning a skirmish into a days-long siege.
* Equally, Magneto had great respect for his chief "sparring partner" back in the

bad old days, Special Agent Alan Scott of SHIELD. Yes,
* Equal-Opportunity Evil: An evil organization invites everyone regardless of what race, gender, etc.
* Equal-Opportunity Evil: Bad guys apparently don't discriminate, resulting in a diverse group or organization of villains.
* Equal-Opportunity Evil: It's just not polite to be prejudiced, even if you are a villain.
* Equal-Opportunity Evil: The villains are willing to hire anyone as their minions, regardless of their race or ethnicity.
* Equal-Opportunity Evil: They'll gladly hire anyone to do their dirty work; regardless of gender, sexuality, race, religion, etc.
* Equal-Opportunity Evil they look or act like, just as long as they get the job done.
* Equal-Opportunity Offender: A creator doesn't play favorites on any side.
* Equal-Opportunity Offender: Character loves insulting people, no specific preference.
* Equal-Opportunity Offender: I shit on whoever I feel like, regardless of if they're black, white, Asian, Hispanic, male, female, non-binary, straight, gay, bi, a pansy, whatever!
* Equal-Opportunity Offender: This type of humor is nowadays seen as trying-too-hard-to-be-edgy and offensive in the politically correct modern day, but it's still alive and kicking.
* Equal Rites, a colony of ants that developed a civilization due to exposure to magic at Unseen University steals a sugar lump from the breakfast table. The ants evidently consider sugar to be a treasure of royal calibre, as it's what they use to build a miniature pyramid in which to entomb a mummified queen.
* Equal Rites archetypes. In a funny sort of way, both parties can eventually claim, by the last verse, to have "won"....
* Equal Rites dimensions, the narrator describes the fact that a cat appears to simultaneously be its own age, a newborn kitten, and a decrepit moggy, as resembling a kind of white, cat-shaped carrot, "which will have to suffice until someone is able to devise effective fourth-dimensional adjectives".
* Equal Rites, Granny Weatherwax forcibly imposes this trope on a hungry bear, causing it to walk headfirst into a tree and knock itself out.
* Equal Rites, Granny Weatherwax is a cunning witch, but not portrayed as anything out of the ordinary - though her duel with Archchancellor Cutangle, which ended as a draw (albeit one where Cutangle's inner monologue uneasily notes that if it had gone on much longer, she'd have beaten him) is an indication of just how powerful she really is. A few books later and she is the most respected and feared person in the entire Ramtops, and entire cultures have nicknames for her which basically translate to "Avoid at all costs".
* Equal Rites, Granny Weatherwax's dramatic entrance to the Unseen University great hall is ruined when the door bounces back and hits her in the knee.
* Equal Rites had an easy time of it with Granny Weatherwax: she became Ouma Wedersmeer. He was stumped in trying to translate her broomstick being the equivalent of an elderly Morris Minor: the reference is to a clunky ugly British car that while mechanically sound didn't want to go very fast. This concept would not directly translate into Dutch. Then he realized a kind of old, ugly, slow but reliable bike in Holland is nicknamed the "Granny Wagon". Bingo...
* Equal Rites has just been discovered by such a recruiter when we first meet him.
* Equal Rites is a much more humble figure than the one she would eventually become.
* Equal Rites: Just after Drum Billet has passed on his staff to baby Esk, Granny Weatherwax turns back the blanket to show that the baby's a girl.
* Equal Rites mentions the existence of Magicians (essentially failed students who are reduced to being lab assistants to proper Wizards) and Thaumaturgists (untrained dogs bodies who go and fetch dangerous spell components such as "the semen of a live tiger"). Neither are ever heard of again despite several books focusing pretty heavily on the Wizards.

* Equal Rites of stealing his work! The similarities between them mostly amount to this: there is a school for magic users, someone in the book uses a broomstick to fly. Someone is turned partially or entirely into a pig, goats are mentioned a couple times.
* Equal Rites parody: "Grampone the White? He'll be Grampone the Grey if he doesn't take better care of his laundry."
* Equal Rites references this, saying that magic has a habit of lying low, like a rake in the grass.
* Equal Rites, there's a young wizard master named Simon, who has great difficulty with saying words that begin with certain letters, to the point where other characters often attempt to fill in the words for him so he won't have to go to the struggle of saying them.
* Equal Rites, the Unseen University refuses to accept female students, arguing that it would be "against the lore". "Lore" and "law" sound identical in RP.
* Equal Rites, the wizards are standing around unsure of what to do until Esk yells, "You're wizards! Bloody well wizz!" (This was before the "power from not doing magic" thing started, so they weren't doing it deliberately; they just actually were unsure they should wizz.)
* Equal Rites, the world's most powerful Witch, Granny Weatherwax, and the world's most powerful Wizard, Arch-Chancellor Cutangle, fight a magical duel which involves continually shape-shifting into creatures and things, each trying to get the definitive winning edge on the other. The battle expends so much magic that it threatens to open a doorway to the Dungeon Dimensions, and just for a while it is being fought in two worlds simultaneously.
* Equal Rites where the clash was more conceptual than physical (at once point Cutangle transformed into a snake and Granny Weatherwax countered by transforming into a basket). It's interrupted by the approach of abominations from the Dungeon Dimensions, to Cutangle's great relief since he had a nasty feeling he was going to lose; he compared fighting Granny to being like trying to swat a fly that keeps landing on your own nose. Notably it's one of the few times in the series that Granny disregards headology completely and engages in full-blown physical magic.
* Equal Rites, with Esk in Ged's role, and Granny Weatherwax as both the unnamed village witch and Ged's mentor Ogion.
* Equestria: Across the Multiverse. Amelia (a giant pony) then smirks and casually crushes him.
* Equestria: Across the Multiverse due to Mainline Equestria's technology leap. They genuinely do come in peace and their first message is actually introducing themselves and asking to be friends. Subverted with Black Star the Light Stealer, who's one of the supervillains that has attacked their world several times and teams up with Chrysalis.
* Equestria: Across the Multiverse during the Winter Wedding battle who accepted becoming one.
* Equestria: Across the Multiverse level threats, such as Seiryu (a Magitek Mechagodzilla) and the Great Harmony (a gigantic flying super battleship). Things only increase from there as more and more worlds join the Alliance and pool their knowledge and resources.
* Equestria: Across the Multiverse sons. They have apparently done this to a larger number of worlds by this point, but Mainline Equestria ultimately proves too much for them.
* Equestria: Across the Multiverse style. Their first indication things are like this is seeing Mr. and Mrs. Cake walk by in their fused state, though it's unclear if they're permanently fused or not. Supplemental materials reveal this is rather common in this universe.
* Equestria: Across the Multiverse the have this trope attached is the Bard Armor, but that's because it runs on Innocence Magic, and only certain ponies can use that anyway.
* Equestria: Across the Multiverse versions of the G1 Troggles and powers them up further to become equal to Warhammer Orks specifically to counter them.
* Equestria: Across the Multiverse video games on this world are co-op for this

reason.
* Equestria: Across the Multiverse, which is able to severely weaken the ram necromancers Storm King got on loan from Grogar that were strong enough to give the Hegemony forces trouble.
* Equestria: A History Revealed and blatant disregards for common sense, so this claim is questionable.
* Equestria: A History Revealed and fight to reclaim her old nation in the Equestrian Civil War.
* Equestria: A History Revealed and her lack of evidence on this matter, she may just be making it up.
* Equestria: A History Revealed, as hinted at in canon and confirmed in the comics, Princess Luna's transformation into Nightmare Moon is said to have been due to the fleeing Nightmare forces possessing her; to exact a toll for her failures.
* Equestria: A History Revealed, as well as her ignorance of basic math fulfills this trope.
* Equestria: A History Revealed: Celestia is forced to create the resistance to reclaim all of Equestria that she lost in her absence to Nightmare Moon. She reclaims small towns at first, relying on guerilla tactics while slowly amassing a larger and larger army of ponies who choose to fight on her side, before eventually reclaiming the east with a large enough army to move into the rest of Equestria.
* Equestria: A History Revealed certainly fits this well. She tends to analyze minute details behind word choice in an attempt to find some hidden meaning. However, this is not always the case, as sometimes she ignores the literal meaning for a more symbolic one. She really tends to go either way depending on what supports her way of thinking the best at the moment.
* Equestria: A History Revealed college student), she believes that her essay (the story) will bring her fame for revealing the truth behind Equestria (otherwise known as her rambling anti-Celestia conspiracies), and she's deeply jealous of other ponies who have powers she doesn't, but covers it up with a facade of Earth Pony supremacy.
* Equestria: A History Revealed considers everything to be a symbol, such as religious allegory. Even certain word choice from ancient sources. She spent three paragraphs analyzing the meaning behind the inclusion of the word hellfire before concluding that it meant an evil fire.
* Equestria: A History Revealed, during the Equestrian Civil War, Princess Luna, upon losing the bulk of her forces at the Battle of Canterlot and knowing the war was lost, pulls this tactic with her remaining forces in the Battle of the Everfree Fields; in order to take down as many of Celestia's ponies with her army as she can.
* Equestria: A History Revealed example, the Griffon nation has their own prince in response to Shining Armor, Shining Amour.
* Equestria: A History Revealed finally arrive and help them out, as a form of apology for their previous inaction.
* Equestria: A History Revealed. He knows what he's doing is wrong, but sees it as the only option available to him.
* Equestria: A History Revealed, he still felt the need to publish the results of his evil experiments with the rest of the world as a continuation of his science-loving side, and possibly his need for peer-review.
* Equestria: A History Revealed, in which the narrator purposefully miscites sources, and her "proof" for her ridiculously implausible theories.
* Equestria: A History Revealed is guilty of this herself, as usually when she talks about both princesses, she just says, "Celestia (and Luna)." Even King Sombra only narrowly includes Luna's name in his paragraph-long curse of Celestia, adding a "and Luna too I suppose" at the end of it. It's almost no wonder why she turned evil.
* Equestria: A History Revealed, it becomes increasingly obvious that this is clearly not the case.
* Equestria: A History Revealed; it was just the awkward way she worded her sentence. She seemed to be aware of this however and went out of her way to ask the

reader not to quote her on that.
* Equestria: A History Revealed, leaving her mostly just insufferable.
* Equestria: A History Revealed, most of the names fall into this trope. The in-universe conspiracy theorist narrator Loose Change, the real-life author, Hoofry Poneigher, and most of the authors listed in the bibliography all have unashamedly punny names. At a point, the bibliography has a field day with crystal pun names before promising to stop.
* Equestria: A History Revealed narrator, it may not stand true in-universe.
* Equestria: A History Revealed needs to learn about this, as she picks apart benign things and events for evidence while breezing past events of actual significance. Her analysis includes, among other things: the word choice of select sources, what rocks can metaphorically represent, citation of a cereal box and a hobo, and making a far-fetched leap in logic to relate Celestia to Italian food when a cooking book mentions "the elements of a good pizza".
* Equestria: A History Revealed notes that it would've been funny if this did occur.
* Equestria: A History Revealed often does this at times, before returning to her supremely arrogant appearance.
* Equestria: A History Revealed often forgets the point of her metaphors, or worse, gets lost in her train of thoughts, and continues on with the metaphor as though it was the point itself.
* Equestria: A History Revealed, Princess Luna does this with her remaining Nightmare forces in the Battle of the Everfree forces. Knowing the war is lost, she personally sits this one out as she orders her armies to take out as many of Celestia's forces as possible. It ends with most of her forces dead or fleeing to be captured later.
* Equestria: A History Revealed seems to go out of her way to demonize Celestia every time she gets, even when in subtext, it is made clear that Celestia is one of the few good guys in the fic.
* Equestria: A History Revealed, the entire concept of the fic is played for laughs, as a parody of the professionalism expected from a historical essay.
* Equestria: A History Revealed, the Equestrian Civil War, when Luna first became Nightmare Moon and attempted to usurp Celestia.
* Equestria: A History Revealed, the griffon Chancellor Papillon fits this trope to a T. It's even hinted at he may have been responsible for a mass famine to take even more power for himself, eventually crowning himself emperor.
* Equestria: A History Revealed, the narrator, and by extension, one of her sources, Crazy Larry definitely qualify. The narrator goes to the extent of stating she is the only "true" historian in all of Equestria, and all the rest have been paid off by Celestia to support her lies.
* Equestria: A History Revealed, the narrator directly belittles her professor who is currently marking her work, and curses at him a couple of times in-text.
* Equestria: A History Revealed, the narrator's confusing take on time travel and method for dealing with the Starswirl inconsistency tends to invoke this trope more than a few times.
* Equestria: A History Revealed, the validity of the latter is quite questionable. A one-off mention of the game Yahtzee is expanded into a massive cover-up on the absence of Princess Luna and the guards during the Changeling invasion, with the narrator going as far to cite a pair of dice found in Luna's bedroom as evidence of this.
* Equestria: A History Revealed, this trope is literally invoked when the narrator says that most flaws in logic can be handwaved by the work of wizards/magic.
* Equestria: A History Revealed, to explain how a pony of his esteemed position would choose to fall so low.
* Equestria: A History Revealed to handwave the historical issues regarding Clover the Clever and Starswirl the Bearded.
* Equestria: A History Revealed; to wipe out as many Celestia's forces as she could. The only main difference between this and most of the other examples on this page was that Luna chose to sit this battle out, waiting for Celestia to confront

her herself.
* Equestria," and overall they're unaware of the scale of the destruction the galaxy underwent at the hands of the Reapers.
* Equestria at War and its mods are present as well, albeit with modified names and the bodies of fantasy creatures, but they otherwise interact with the world and MLP's characters with their real-life personalities and ideals.
* Equestria at War, the nation of Equestria starts out as one giant united nation. It is possible however for a civil war to erupt through events, which splits the country in two between supporters of Princess Celestia and supporters of Princess Luna, with several regions breaking away and forming their own nations.
* Equestria Chronicles: Flapper Jack's special talent is protecting ponies... and the guard he's in grows increasingly corrupt and abusive.
* Equestria Chronicles has Nova Storm. Interestingly, she was born with three legs and had to get a fourth in order to join the guard.
* Equestria Chronicles has Shiloh, who looks like a filly and has been mistaken for one on multiple occasions.
* Equestria Chronicles has Wishing Star give Iron Hoof the talk. For context: Iron Hoof's mom was very strict and psychologically abusive, while Wishing Star is very casual talking about sex and has experimented quite a bit...
* Equestria Chronicles: Icarus, established as a kind and loving pony, is told to execute a prisoner in front of the entire city. On penalty of death. While his Dad looks on. He's given five minutes to prepare.
* Equestria Chronicles: "In the middle of a civil war, ponies throw a Nightmare Night party."
* Equestria Chronicles: The royal guard is corrupt and abusive, although its officers try to keep things safe and reasonable.
* Equestria Chronicles, transgender transformation pins exist. However, they've only been shown to last a couple of weeks at the most; hourly transformations are more common.
* Equestria: Civil War. After Starlight Glimmer causes a major accident that injuries many innocent ponies, an act of checks and balances against all former antagonists is made. The mane 6 and all of Equestria are split on the act and divided into two factions, with Princess Twilight leading the faction against the act supporting the right for a former villain to choose their own destiny, and Moon Dancer leading the other to support accountability and consequences.
* Equestria Daily acknowledge its existence, but it also sent official material, from an extended cut of "Equestria Girls" to exclusive interviews with the show's creative staff.
* Equestria Daily are still running strong, and fan artists are still making things left and right.
* Equestria Daily tends to get a pretty pronounced boost in popularity.
* Equestria Divided can tell you there are some parts that you'd rather keep away from.
* Equestria Divided doesn't have an army like the other factions; rather, most of its forces are composed of mercenaries of various species — chiefly ponies, griffons, diamond dogs and zebras.
* Equestria Divided fights mostly using a combination of medieval weaponry and clockpunk war machines and does a pretty good job at it.
* Equestria Divided: House Earthborn makes extensive use of these, including large cannons, enormous battering rams moved by teams of earth ponies, heavily armored bomber helicopters, and the Fortbusters/Beastbusters, powerful war machines designed to take down enemy fortifications, constructs and monsters.
* Equestria Divided, in Pinkie's case) warring with each other for total dominance of the country they used to defend.
* Equestria Divided, mounting howdahs on their backs to carry warriors into battle. Boars, rhinos and hippos are also used as less powerful but cheaper alternatives for the same purpose.
* Equestria Divided. No one really knows how that affects the voting but apparently it works.

* Equestria Divided, on the other hand, has the Whitegold Militia and Sapphire Sirens units, which are what you get when the thieves and whores get an actual military budget.
* Equestria Divided or did she want to come back that way? Only the Laughing Mare knows.
* Equestria Games, Derpy follows them silently. The Cloudsdale team appears prominently, but none of them have lines this time around.
* Equestria Games, even the largest of crowds are completely made of actual ponies.
* Equestria Games, in addition to the Saddle Arabians (who are more horse-like than pony), there are pony-like delegates from other cultures: a mare with a half-sun-like headdress akin to the Incan or Mayan culture, and a stallion with a very Mesopotamian headdress, beard, and hair/mane style. We find next episode these two are representatives from Maretonia.
* "Equestria Games", Rainbow Dash encourages the Ponyville teams to win the gold... except for her team, who she admits probably won't do as well.
* Equestria Games, Rainbow Dash gives one to the other Ponyville competitors at the start. When it comes to her team, however, she acknowledges that being pitted against the Wonderbolts doesn't put the odds in their favour.
* Equestria Games" shows that, for the duration of said games, unicorn spectators have to go through gates (looking like metal-detector walkthroughs) that neutralize the magic of their horns. This is in order to avoid any cheating.
* Equestria Games, the four princesses each have their own elaborate thrones at the Games, emblazoned with stylized renditions of their cutie marks. This is similar to the VIP seating for the heads-of-state at the Olympics, including the leader of the host nation.
* Equestria Games this with an enthusiastic hoof-bump at the finish line after the relay race.
* Equestria Games", when Spike is brought before Cadance upon arriving in the Crystal Empire, he falls face-first on the ground when the guards transporting him come to a halt.
* Equestria Games": Who are the delegates from other lands, and what are their kingdoms like? Plus, all the characters on the other teams, and what events the other ponies from Ponyville were participating in, and how the parts of the games that we didn't see (which were most of them) went, and Equestria's relationship with the griffon kingdom that sent a team (assuming it wasn't a griffon-majority territory located in Equestrian boundaries), and how the actual anthems of Ponyville and Cloudsdale go...
* Equestria Girls: A Fairly Odd Friendship: Crocker. Every single one of his plans blows up in his face, and usually results in bodily harm for him.
* Equestria Girls: A Fairly Odd Friendship. Sunset is annoyed with Timmy at how he's pining for someone like Trixie, a popular girl who rejects him and clarifies she is not interested in him. Sunset bluntly told Timmy he is wasting his time on someone who will never like him; Sunset becomes sympathetic once Timmy tells her why he likes Trixie. Later, when Timmy asked Rarity for advice on how to talk with girls, Rarity spells out how his attempts at romance (saying that the girl the love of his life) are obsessive and creepy. She cites Zephyr Breeze, pointing out his lame come ons just make him look pathetic. Timmy takes that to heart and listens to Rarity's advice so he would not end up like Zephyr Breeze.
* Equestria Girls: A Fairly Odd Friendship. The Rainbooms expect Timmy to not believe them when they tell him about Equestria and all the related magic, but given all the other weird stuff he's been through, he takes it all in with ease.
* Equestria Girls: A Fairly Odd Friendship: Timmy giving two WHOLE...cookies to Shallowgrave to get him to look the other way. He happily takes the deal.
* Equestria Girls: A Fairly Odd Friendship: When Mr. Turner witnesses Rainbow about to vandalize Dinkleberg's car with a crowbar, he admonishes her... for using a weak weapon, advising her instead to use a brick or a golf club so she can destroy his windshield much more quickly and make a clean getaway.
* Equestria Girls and she at least is wearing shorts longer than the skirt, but its still odd seeing them in skirts for lots of fans. Applejack's skirt actually gets

shortened intentionally by Rarity in the scene where they dress for the school dance.
* Equestria Girls: Applejack spits out fizzy apple juice upon hearing that Twilight will be competing against Sunset for princess of the Fall Formal.
* Equestria Girls by saying the moral is "age and maturity are two different things."
* Equestria Girls counterpart of Rainbow Dash, lack of makeup and all.
* Equestria Girls: Dinosapien, Maia Search's gymnastics career was ended when she broke her leg. Although it healed, she still walks with a limp, so she becomes a camp counselor instead.
* Equestria Girls: Dinosapien trying to intimidate them away after Sandalwood accidentally spooked the cub going for his trail food. She and Eno square off briefly but aside from a light tackle from Eno, they don't physically fight and just back off.
* Equestria Girls do not have anything to do with each other, apart from the characters.
* Equestria Girls films, but Luca Sandri does his humming in "Filli Vanilli".
* Equestria Girls follows the standard evens-over-odds curse with its movies/longer specials. The second, fourth, and sixth are much better received than the first, third, and fifth.
* Equestria Girls forms. Likewise, the human forms of the princesses — Celestia, Luna, and Cadance — all have hair that reaches past their hips.
* Equestria Girls: Friendship Souls, according to what Shining Armor tells Twilight.
* Equestria Girls: Friendship Souls: All of the factions use technology that makes use of spiritual energy to some degree.
* Equestria Girls: Friendship Souls and injecting her reiatsu into others to weaken or dominate her enemies while also using the same principles to power up herself and her allies, but as she improves she gains the ability to use that same power to heal others and herself while developing her hand-to-hand skills.
* Equestria Girls: Friendship Souls feels a sense of disgust and pity at what he's literally mutilated his own soul into for power. Granted, this is more to show the depths of depravity he would sink to; it's made clear from his appearances before the reveal of his Resurreccion he was rotten long before he started "upgrading" himself to surpass his natural limits.
* Equestria Girls: Friendship Souls happens quite often, but the most prominent examples:
* Equestria Girls: Friendship Souls have finally signaled the turning point for the war to heat up to a decisive conclusion, with all sides gearing up for the coming storm.
* Equestria Girls: Friendship Souls. He's still standing after that so they think he's still alive, but he did indeed die.
* Equestria Girls: Friendship Souls, it can probably be assumed he feels similarly about that too.
* Equestria Girls: Friendship Souls: Las Noches, and to a lesser extent all of Hueco Mundo, runs on this. Tirek, as possibly the most powerful Hollow/Arrancar to ever exist, is at the top of the hierarchy, and position in the Espada below him is determined by strength (though in some cases useful abilities can compensate somewhat for lack of raw power, like with Squirk and his Garganta creation skills, Grogar's technical skills, etc.). Part of the reason he goes with this approach is because he wants strong warriors to fight the Quincy and Soul Reapers.
* Equestria Girls: Friendship Souls she can use them to fly. Her Completed Fulbring is a near perfectly form fitting golden armour with skull motif and many faintly visible circular ports. It even extends into her body, forming around her very bone, keeping them together even if they break.
* Equestria Girls: Friendship Souls: Sombra and Twilight Sparkle discuss this trope in regards to Twilight Velvet. He says that she was this when she was a part of Xcution and, like Twilight, wanted peace between the Quincy and Soul Society. However, he also says that she became jaded due to Soul Society's actions, turning

into the woman she is today. He thinks that the same thing will happen to her. Twilight, naturally, doesn't believe him.
* Equestria Girls: Friendship Souls so that he can be the true and uncontested guide to improving the Hollow condition as he sees fit to.
* Equestria Girls: Friendship Souls: What Sunset's Bankai turns her into.
* Equestria Girls: Friendship Souls: While Shining Armor is training Twilight Sparkle, she complains that she's in pain. He says, "Your body will adapt, and it will get easier, but it always hurts the first time..." Twilight gets embarrassed as he realizes how dirty that sounded and says, "Yeesh, never thought I'd be saying stuff like that to my little sister."
* Equestria Girls: Friendship Souls, while the actual fastest Catrina can not only make multiple tangible speed clones, but they can all physically attack their targets and take damage themselves without hurting Catrina herself.
* Equestria Girls (How did she adjust and survive? How long has she even been there?) being gigantic blank slates, even after the sequels fleshed out her character a bit more.
* Equestria Girls in Japan and is now airing the third season almost 7 years after it originally aired in the US and during the show's final season elsewhere.
* Equestria Girls is often an afterthought, with no strong opinions surrounding it.
* EQuestria Girls Marvel Universe: Flash is still good friends with his ex-girlfriend Sunset Shimmer, with Sunset especially helping Flash deal with the grief of his Uncle Ben's death. Downplayed, as Flash's journal reveals they weren't actually "together", more like they had a "hang-out-with-me-and-act-like-we're-together thing", and he is completely afraid of what she might do to him and Thorax when they tell her they told Sci-Twi about the magic around CHS.
* EQuestria Girls Marvel Universe together uninterrupted. As they are leaning in for a second one though, Shining Armor purposely interrupts them, telling them to break it up and for his sister to go inside. Sci-Twi gives Flash a quick goodbye kiss before going inside anyway just to spite her brother.
* Equestria Girls seems to be intent on showing off the acting talents of the singing doubles, Rebecca Shoichet (Singing voice for Twilight Sparkle) and Kazumi Evans (Singing voice for Rarity and Princess Luna) have both gotten major roles.
* Equestria Girls shows Sunset Shimmer trying on Twilight Sparkle's glasses.
* Equestria Girls Silver Spoon are seen uncharacteristically getting into the spirit of "Help Twilight Win The Crown" and appear to be nicer in the human world than they are in Equestria. Fast forward to season 5 where Diamond Tiara and Silver Spoon get redeemed for real.
* Equestria Girls special "Mirror Magic", while most of the Humane 7 are trapped in the alternate dimension inside Juniper's mirror, Twilight Sparkle tries to reach the portal leading back into the real world with Applejack giving her a boost. The process gets interrupted when Sunset Shimmer comes crashing in through the portal.
* Equestria Girls spinoff has a different ending to one of the scenes made into a short. In the short, DJ Pon-3 puts in earphones after Principal Celestia takes them away. In the book, Celestia takes them away because there's a fire drill.
* Equestria Girls spinoff opens once "every thirty moons" for three days. Twilight later uses an invention to open the mirror manually so they can go through whenever they want.
* Equestria Girls stumbles on an enchanted hand mirror and uses it to get revenge on the Humane 7 for exposing her sabotage of the Daring Do movie in "Movie Magic".
* Equestria Girls. The only thing to come from the series since then was a one-shot comic book called "Cantorlot High: March Radness" and some shorts that were held over into mid-2020. There's been no news of the series since then.
* Equestria Girls universe is likewise able to reset her frazzled hair back to perfect by just running her hand through it, having messed it up moving a piano.
* Equestria Girls, we get this bit of dialogue when the girls learn that convicted serial anal rapist Ben Dover has escaped prison.
* Equestria has a fleet of Earth Pony built zeppelins and the as of yet, unseen Pegasus
* Equestria has a sport called hoofball that's mentioned in "The Cutie Map",

presumably a fantasy counterpart sport to
* Equestrian dragons are as they appear in the show. They can mature naturally as well as experience rapid growth caused by excessive greed, at the cost of becoming rabid. Greed-growth isn't reliant on just material greed and can be caused by craving anything from prey to revenge. Most aside from Spike are a bunch of jerks.
* Equestrian Legends: Beret Swirl invokes this trope to get free drinks.
* Equestrian Legends canon, as well as other creatures from myth and legend.
* Equestrian Loop. How horrifying is something when creating further multiversal instability is better than letting it continue to exist? Also note the Sleipnir is portrayed as one of the most responsible and levelheaded of the admins.
* Equestrian sports. Like sailing, they're generally perceived as elitist and upper class. In the case of actor
* equestrian sport, where riders are often physically able to compete into their 40s and 50s, so careers can be long and incorporate several breaks due to injury or other circumstances. As of 2019, legendary New Zealand eventer Sir Mark Todd was trying to retire again aged 63, but even 'retirement' for him means training a string of racehorses.
* Equestria Online, which she appears able to continue uninterrupted and indefinitely.
* Equestria's First Human her crush shows up from time to time in the sequel stories.
* Equestria Total War features a full-on invasion of Equestria by Gryphonia.
* Equestrylvania about why Dracula's minions would do the things they do, leading to an explanation of this trope.
* Equestrylvania, and actively torments travelers in attempts to feast on their minds.
* Equestrylvania: Due to the Castle dimensionally displacing the royal castle and everyone in it (including the Princesses) and replacing it, it's child's play for Dracula's forces to occupy Canterlot and wipe out the Royal Guard.
* Equestrylvania. For the ponies of Equestria, however, he switches to skinning their cutie marks off and taking those.
* Equestrylvania: The aura from just one of Dracula's body parts is described as feeling worse than Nightmare Moon, King Sombra, or even his own minions.
* Equestrylvania the viewer, causing them to relive every terrible memory they have.
* Equilibrium after John Preston stops taking his medicine, he pulls this trope when he catches a dying resistance fighter in his arms that his partner shot, almost transfixed by the blood on his gloves and gun.
* Equilibrium: "A heavy cost. I pay it gladly." Partridge refuses to give in to Preston, deconstructing the meaning of a system without emotion. Being aware that he has just committed a sense offence, he faces death in the most composed way possible as a form of his defiance, because he'd rather die for his beliefs than be committed to a corrupted establishment. Fair to say, his words continue to reverberate as Preston unravels the truth and the Resistance gain a chance to seep through.
* Equilibrium, apologizing for the various things that they had to cut corners on for bugetary reasons, and generally discribing the superior film that could have been made had they been given enough time and money.
* Equilibrium are also fit in this trope. They are referred to as clerics and their leader is called Father.
* Equilibrium, but the goddamn dog refuses to leave, leading directly to the hero's first act against the government..
* Equilibrium Commentaries from the movie's makers says they see belief in exemption from their own oppressive rules is a mark of a despot.
* Equilibrium: During the final battle of the movie, John Preston disarms and incapacitates his former partner with four quick, obviously fatal slices. The former partner sinks to his knees and looks shocked before his face slides off.
* Equilibrium, emotions are demonized and people are made to take medications not to feel them.

* Equilibrium: Father turns out to have in fact died years ago, with DuPont taking his place as leader of Libria.
* Equilibrium. First fight scene is illuminated entirely by muzzle flashes from the protagonist's pistols.
* Equilibrium has outlawed all human emotion in an effort to stop another disastrous war from coming to pass. Including love. Although sex for reproduction purposes still works normally.
* Equilibrium have any emotion; his huge smile has nothing to do with real happiness or real satisfaction. Knowing this makes it pretty creepy.
* Equilibrium, illuminating himself and small other parts of the room with muzzle flash, wiping out the mooks. It's all very beautifully done.
* Equilibrium), in a hostile tone. The scene escalates the sense of an impending shootout, just when the commander recognizes Preston, makes an excuse and turns around. And then it ends in a shootout anyway.
* Equilibrium is a clearly Romanticist work, as it is about an evil futuristic society where emotion is outlawed, and the extreme Enlightenment idea of suppressing all emotion through technology is definitely shown as wrong. However, the ending, while portrayed positively, never exactly comes clear on whether restoring human emotion is a good thing.
* Equilibrium is for the most part bloodless with its violence. In fact, it pulls off an unusual variation. Every bullet impact is shown, often in loving slow motion, but with black powder squibs. The only blood squib used in the film is for a particularly brutal broken arm. This gets slightly surreal when the main character slices a chunk off one of his opponents, which then slide off (again in slow motion) without a trace of the red stuff. Meanwhile, his sword is beaded by a single drop of white fluid.
* Equilibrium is full of zeppelins. In at least one scene the zeppelin has a screen on the side to broadcast propaganda.
* Equilibrium is labeled as a "Sense Offenser" and rebels against the tyranny of the Grammaton Clerics.
* Equilibrium is shot from overhead and has a (vertically ejected) shell casing bounce off the camera lens. The filmmakers deemed it important enough to modify the pistol at significant expense, then have it animated in when they couldn't get the trick to work right mechanically.
* Equilibrium. It is strongly implied, however, that even drugs cannot fully eradicate human capacity for love, since even John Preston, who dutifully took them all his life, displayed behavior consistent with emotional reaction when the state took his wife away from him.
* Equilibrium, it's entirely possible that Bale was the one who got Jovovich started on the trope.
* Equilibrium, Preston makes his entrance by having two SWAT team members shoot the hinges off a door as he leaps at it, timing it so that he kicks in the hingeless door and slides into the pitch black room, into the midst of a dozen or so men armed with automatic weaponry. They stop shooting, the whole room goes dark, and for a moment we think nothing's going to happen.... then there's a 30 second scene comprised entirely of muzzle flashes illuminating Preston blowing all of his enemies away with no effort whatsoever.
* Equilibrium quickly wiped out that fanbase, and he hasn't directed another film since.
* Equilibrium's interrogation scenes between Preston and Mary, despite simply being two people speaking to each other, were incredibly expensive. Mary required multiple dresses of various shades of pink, and each scene required a smaller table than the one preceding it. Director Kurt Wimmer felt that it was absolutely necessary, despite squeezing the film's already tight budget, because the richer colors and the closing distance between the two characters showed that Preston was emotionally opening up and beginning to perceive beauty.
* Equilibrium takes a similar approach. The entire reason for the plot was because human emotions were a flaw and the cause of 'man's inhumanity to man.' The ending, while portrayed positively, never exactly comes clear on whether restoring human

emotion is a good thing.
* Equilibrium. These guys are either Elite Mooks, or complete idiots, for fighting only with swords in a world where everyone is equipped with automatic weapons. In any case they don't do noticeably better against the hero than all the previous Mooks...i.e. they all get killed in about 6 or 7 seconds.
* Equilibrium use the trappings of this trope, although they serve a secular state.
* Equilibrium, which teaches its practitioners to seek out locations in a fight where there is minimum probability of getting shot at and it's not "behind cover"). In a later fight, Preston reloads by a mechanism that inserts fresh magazines into the guns from his sleeves.
* Equilibrium, which uses a polygraph—not necessarily to detect lies, but to detect emotional fluctuations.
* Equilibrium wife, who not only gets the Gaussian treatment, but shots of her include actual colours, as opposed to the slightly desaturated/bleached out effect of Librium as a whole. There's even a sequence (as she's being arrested for sense-crime) in which she shares a shot with and kisses her husband as she's dragged away. Her side of the screen? Sparkly, glowy, soft-focus. His side? Cold, harsh, slightly desaturated hard focus. Even in the middle of the kiss.
* Equilibrium, with a flag consisting of four Ts, as a reference to the Tetragrammaton government (Tetrarammaton being a phrase referring to four letters and the name of god).
* Equine-Ranch. Sure, it's free to play indefinitely...unless you want to actually do something, like breed or train your horses to a winning level of even the basic level competition...or even own horses that aren't just "Grade" horses.
* Equinox crew, informing them they've been stripped of rank for their actions, and will continue as such until she determines otherwise.
* Equinox Flower Hirayama tries hard to exercise this, not even for any specific reason, but just because he wasn't asked ahead of time. He eventually finds out that the veto is no longer in effect in Japan.
* Equinox is one of the oldest examples and may be the oldest put to film. The symbol magic in the film is explicitly treated like a science.
* Equinox's captain, Ransom. She threatens to lower the shields in the room, which would allow the aliens an opening to get through and attack the man, while she and Chakotay leave the room. The crewmember demonstrates his familiarity with this trope, looking at Chakotay and asking "I suppose the plan is that you're going to come to my rescue now, right?" Chakotay, however, admits that "There's no plan as far as I know. The Captain's on her own." When the crewman continues not to talk, Janeway and Chakotay leave the room and Janeway proceeds to do just what she said she was going to do, shocking Chakotay, who thought she was only bluffing. (The crewmember does crack, but not before being badly spooked.)
* Equin: The Lantern, glove items have a Slap move that drains some of the enemy's stamina while not costing any from you. Unfortunately, the stamina damage is too low for it to matter most of the time and the stronger enemies and bosses always have unending pools of it anyway.
* Equipment also introduces a lot of weirdness when it comes to things like wielding three melee weapons at once, decking yourself out in two suits of armour and so on. A late-game Kled can have the Black Cleaver (an axe), Titanic Hydra (an axe), and the Blade of the Ruined King (a sword) all at once, which he is somehow wielding from the back of a
* Equipment-Based ProgressionOccasionally an RPG will make characters more powerful by having them find better equipment, instead of leveling up with experience points (or by having them level up their equipment).
* Equipment Hiding Fashion: Allows players to have their character's armor covered by clothes, even when they logically shouldn't, to allow for more customization of a character's appearance.
* Equipment SpoilerFinding an unusable piece of equipment means that someone able to use it will join the party at some point.
* equipment transplant to the moth breeder's body. Before 790 could get his freak on, his head was knocked off, leaving him bodiless again, and Xev went to "find"

the moth breeder.
* Equipment Upgrade: Enhance your equippable items instead of replacing them!
* equipped a very-short-range BFG beforehand that visually resembles the unreliable weapon. He annihilates his enemy's 'Mech in two shots.
* Equipping an apron but no other top on a female created character in
* Equipping a Novacat in MW4 with a quartet of ER PPCs will result in a mech that can oneshot light and some medium mechs without ammunition issues. However, not even spending all other tonnage on heatsinks can save you from overheating after each shot — perfect for snipers, suicide for everyone else (gauss cannons have a similar damage output and longer range, but very limited ammo). On the other hand, shutdown due to overheating will hide you from enemy radar while you are cycling for the next shot.
* Equipping Mary with the Frying Pan in the PSX version gives her access to the move "Zan!", which is so powerful it was later made into a Mystic Arte.
* Equipping the gas mask will change the look of the player's first-person mode to simulate looking through the eye-holes of a real gas mask.
* Equire : "I am the malevolent WASP" (although his father was a German immigrant).
* equites cataphractarii, a long thrusting lance. They were effectively the predecessors of the medieval knights, with specialized saddles allowing them to replicate the same devastating effect (see below) before the invention of the stirrups.
* Equius himself died with the most idiotic look on his face after being strangled.
* Equius is also on the lower end of popularity among the trolls, mostly because he's a sweaty pervert who gets off on both obeying
* Equius replaces the sounds 'loo' and 'ool' with '100' and '001', probably a reference to his namesake Zahhak, known as "he who has 10,000 (one hundred hundred) horses" and a pun on
* Equius's alternate universe counterpart, Horuss, has Equius's STRENGTH, but is smart enough to build not only robots, but also a steam-powered suit to actively reduce his STRENGTH so that he doesn't break stuff. (Of course, being a member of the Zahhak family,
* Equius Zahaak for his wounded allies. He also builds robots for various personal uses.
* Equius Zahhak has a not-so-hidden collection of musclebeast furry porn. And in the interactive flashes, you can find more in chests.
* Equius Zahhak sticks to genteel curses like "fudgesicles" unless he's extremely flustered, and berates others for foul language, believing it to be a habit of the
* Equivalent Exchange: Giving up something is equal to what a character desires.
* Equivalent Exchange: Giving up something that is equal to what a character desires.
* Equivalent Exchange: If you want great power, prepare to make a great sacrifice. Nothing is free, you know.
* Equivalent Exchange: In order to be able to do something, somebody must give up something equivalent.
* Equivalent Exchange like a corpse. Ed has to thin out Al's armor in order to repair the parts of him that are destroyed.
* Equivalent Exchange seems to be a thing with fae folk: since Gil often helped Ardsley and gave him gifts, Ardsley finds himself in his debt and could be forced to do Gil's bidding. Gil is genuinely horrified to learn this detail.
* Equivalent Exchange: When shifting into a certain form requires exchanging it with someone or something that already has it.
* Equivalent to the superheating described above, you can also supercool a fluid below the freezing point in a clean, smooth, container. Adding a nucleation site (or even just jolting the container) can cause it to instantly freeze.
* Equivicatio Romana by which each of the gods and goddesses of the other pantheons the Romans encountered was said to be another name for the nearest equivalent in their pantheon—sometimes by a great deal of squinting.
* Equivocation and his daughter Judith: her twin died as a child, and he can't help

wishing that she had been the one to die instead.
* Equus. He read a newspaper article about a teenager who blinded six horses, then wrote a story that would explain it.
* Equus is the story narrated by a psychiatrist about a particularly disturbing case, inside the same story his patient recalls the events that led to his hospitalization through hypnosis.
* Equus October team was sacrificed and the inhabitants of two competing neighborhoods would fight over possession of the severed horse head.
* Equus was filmed in Toronto, despite being set in England. It was made during the era of the UK/Canada tax shelter co-production, plus Richard Burton was a tax refugee from the Inland Revenue. The extras look quite Canadian, and the locations look not quite right, especially the farm and the streets. They're not completely unconvincing, but they're not quite perfect matches either. This odd feel actually adds to the film's discomforting feel. Plus extras have audible Canadian accents.
* ER: 6'4" Luka Kovac (Goran Visnjic) dated 5'2" Abby Lockhart (Maura Tierney) and 5'3" Samantha Taggart (Linda Cardellini).
* ER, actor Noah Wyle rapidly inserted an IV so that she could receive fluids, having clearly learned to do so after years of playing a physician.
* Eradica has its ultimate ability which makes it more powerful the more damage it takes and when its health finally runs out it gets 2 minutes of invulnerability before being destroyed.
* eradicates any and all punctuation and grammar within a radius of one post.
* ER admits to doing this when describing to her how much he loves her.
* ER, after Doug tells him he has reconciled with Carol, best friend Mark teasingly asks him if she makes him submit to this as a condition (Doug cheated on her left and right the first time they dated).
* ER, after Gallant has been killed in Iraq, two military police show up at the hospital, looking for his wife, Neela. The minute he lays eyes on them, it's obvious that the desk clerk, a veteran himself, knows what they're going to tell her.
* ER. After the death of his granddaughter caused by a crazy bomber who happened to be taken into the same hospital, the man who was previously shown to be friendly and calm went and strangled the guy to death. When Gates's best friend's wife finds out he was dating Neela, she got drunk, went to the ER, and flew into a rage at both Gates and Neela. In another instance, when a man found out his girlfriend was dying, he brought in a gun and threatened the doctors working on her to continue working on her and bring her back, even though her heart had stopped.
* ER, after their relationship took a series of strange turns for the worse, climaxing in her bipolar brother falling into his grandmother's grave.
* Eragon and any of his elf friends. In particular, Arya, who's about 80 years older than him.
* Eragon blessed a baby who grows to about four years old in her next appearance. It turns out he actually cursed her, forcing her to eat huge amounts of food, making her mature mentally and physically at a rate far faster than normal.
* Eragon. Brom politely asks her "Could you tell us which house Jeod lives in", to which she replies "I could", then he asks her "Will you tell us?", and she answers "Yes", until he finally asks her directly and gets the answer.
* Eragon for her, considering one of the things about elves is their iron control over themselves. Arya is also more withdrawn and closed than most of them, and for her, even a clenched jaw might equal something stronger from others. This is eventually addressed much later in the series, in the third book, when Eragon notes that she never talks about what happened to her. This leads to her breaking down and weeping while sharing the details of her captivity and its effects on her.
* Eragon: Like the books and film it's based on, a dragon is one of the central characters.
* Eragon, magic is very rarely used because it drains the caster. Indeed, the main character almost dies by using magic. Specifically, spells use the same amount of energy that the caster would have to expend to perform the same task without magic. Using a spell to, say, lift a penny off the the floor right in front of you would

be almost effortless. If you were to use the same spell to levitate the same penny from a mile away, it would take the same amount of effort that it would've taken you to walk all the way over to it.
* Eragon once the player has to face, solo, a pair of bosses that are immune to everything except magic.
* Eragon plays with this a bit with the title character having visions of a girl in prison. He crushes on her and rescues her, but she's not interested in him in that way.
* Eragon start getting a little bit more original, though depending on who you ask they may not actually be all that much better.
* Eragon, the Dragon Riders themselves are Soul Jars for their dragons. A Rider can live on if their dragon is killed, but if a rider dies, so does their dragon. Because of this trope, Saphira goes to a lot of lengths to save Eragon.
* Eragon: The first book in the above-mentioned series, it revolves around farm boy Eragon and a dragon he finds, hatches, befriends, and names Saphira.
* Eragon: The part of Alagaësia where all of the action takes place has giant woods flanking it from north and north-east, mountains in the south and east, and sea in the west and south-west.
* Eragon, the story takes place over months to give Saphira time to grow up. In the movie, time is compressed to a matter of weeks so a magical age-up was introduced.
* Eragon, the title character and his mentor, Brom enter the city of Teirm under the aliases of Evan and Neal. Brom plays the role of the slightly senile uncle and Eragon comments to a guard that he had a bit too much sun and now has a touch of the brain fever. After they are safely inside the city, Brom comments "A touch of brain fever?" and Eragon replies that he couldn't let him have all the fun.
* Eragon, the titular character is forced to do this to himself after he's captured and imprisoned. When he first awakens, he finds himself in a pleasantly dimwitted haze and vaguely realizes that he's been drugged. Eragon eventually discovers that the substance used to stupefy him is hidden in his food and water, and has to go without until he can escape.
* Eragon tries this with a mysterious canteen he finds while tracking the Ra'Zac. It ends up eating through a few layers of skin, though Brom commends him for having the good sense not to try and drink it.
* Eragon was that the author finished the first draft when he was fifteen — he was nineteen by the time it was published (after extensive revision) and also received a lot of critical slack for that reason. Whether or not it has outgrown its beardom is a matter of debate.
* Eragon, which felt that people would think they were ripping off Tolkien's creations.
* ER also has a subversion, in that the outside of the hospital is not shown until the very end of the final episode. But it's played straight with the inside of the hospital, as the second scene of the first episode follows Dr. Mark Greene through a hallway of the ER toward the admissions desk.
* ER. And then, eventually, Mark himself, though in a much slower form.
* ER an injured toddler comes in and shouts that Uncle Charlie hurt him. Someone asks if they should call Social Services only for someone else to point at another, unharmed but still grouchy, toddler, and say "That's Uncle Charlie".
* ER"", a number of former actors from the show turned up for his funeral, including Dr. Benton and Dr. Finch. Notably absent were arguably his two closest friends, Doug Ross and Carol Hathaway.
* Era Of Errors, with the author having thousands of pages of storyline/notes/character sheets/backstory written, including most of the entire series storyline.
* ER apartment, wearing nothing but her underwear, while he's shirtless. She freaks and runs out. Although she's clearly hoping that he merely took her home to sleep off her alcoholic binge, flashbacks reveal that they did in fact sleep together.
* ER, a policeman's wife comes in badly hurt by her husband. Some of his coworkers are witnesses, but won't speak against him because of cop code. Benton shows the abuser's lieutenant her medical records, showing that he's been beating her up for

years. While the other cops still don't give him up, they do beat the shit out of him with the cover story that he fell while chasing a suspect.
* ER. As Doug tries to rescue a boy trapped in a storm drain, he forces him to sing "Take Me Out To The Ballgame" to keep him from passing out from hypothermi, turning a normally cheerful song into a desperate tool of survival.
* erase all ghosts within them from existence. This includes the alternate universe Dave that Jack killed, the John from Davesprite's timeline, and countless versions of the trolls.
* ERASED and also holds the knife that was used to stab her (which doesn't have the killer's fingerprints since they were using a glove). A neighbor who hears the commotion checks to see what the problem is and calls the police to report him for murdering his mother. Also not helped that the protagonist and his mother got into an argument the previous night, which makes people think he killed her in a fit.
* ERASED, a young man known for hanging around kids, of serially kidnapping and murdering three children. The real killer deliberately used Yuuki's reputation to pin the crimes on him, even going so far as to plant homosexual-related books in his room to explain the one male victim.
* erased from historical record and replaced with William Henry Harrison, Trembly is referred to as the 8 1/2th president.
* ERASED has Satoru able to jump back in time to prevent some kind of tragedy, although he doesn't really have any control over when it happens.
* ERASED. He's had one hit manga but has mostly been in a slump, with his editor telling him that his stories don't seem to connect for some reason. He works part-time as a pizza delivery driver to help make ends meet in the meantime.
* erased people from existence retroactively - after reality literally started unraveling from its overuse. Thousands of years later, the weave is still banned, and Aes Sedai generally have their panties in a bunch about Rand's liberal use of it.
* Erased Potential: After Nedzu repeatedly manipulates Toshinori, tricking him into revealing Izuku's status as a Recommended Student to the whole class, Izuku wants an apology. Nedzu initially pretends he didn't hear what he asked, followed by a pithy "Then I am sorry that I caused you trouble, Midoriya-kun." Aizawa immediately calls him out on this non-apology, and Nedzu affirms that he still thinks his actions were completely justified.
* Erased Potential costumes, seeing them as emphasizing 'marketability' over function. He's especially disgusted by what was designed for Yaoyorozu. This is blamed upon U.A. branching out and working with other suppliers; when Aizawa contacts their original supplier, they share his horror, and help salvage what they can while completely redesigning other outfits.
* Erased Potential despite being Quirkless. Katsuki first learns about this shift when Izuku stands up for himself against their middle school teacher's attempt to humiliate him into giving up on U.A.
* ERASED that Satoru's teacher Yashiro is Kayo's killer as a huge twist, despite Yashiro being literally the sole character who fits the very basic information one is given concerning the culprit.
* ERASED, the protagonist is not especially smart, but since he does have the ability to go back in time, he has significantly more information than other people around him. He uses this power to solve a series of murders that occurred around him when he was a little kid, and since his 29-year-old mind is in his 11-year-old body, he's constantly being underestimated.
* ERASED was guessed by majority and is considered one of the weakest aspects of the story.
* Eraser. A character fakes a seizure to create a distraction, and while he's in the building infirmary, pulls out the cable monitoring his heart rate out of curiosity. This causes the flatlining alarm to go off, so the nurse immediately starts zapping him, with him furiously struggling. She actually gives it to him three times with no ill effects.
* Eraser: A fridge door was used to block the flechettes from a grenade. It worked... more or less. It was also used by the heroes to hide behind, as the X-ray

scopes couldn't see through it.
* Eraser, a mob informant is relocated to working as a bartender at just such an establishment. It looks pretty flashy and bizarre, but not very scary. The informant asks Schwarzenegger to please not let on that he's straight, to avoid breaking any hearts.
* Eraser. Arnie lands in a car wrecking yard after barely getting his parachute open.
* Eraser, Arnold uses a fridge door as a shield to protect against a grenade that apparently fires straight shards of metal. One pierces his right hand between the knuckles of the index and middle finger, which forces him to drag his hand off the spike. This in no way affects his accuracy for the rest of the film.
* Eraser: During the cabin shootout, Krueger (Arnie), hanging from the ceiling, takes out a mook in this fashion kicking him out of a window.
* "Erase/Rewind" also has two endings: The band is stuck in a room with
* Eraser guys pretend to be members of the dockworkers' union, demanding their cut. The guard captain simply tells them to get lost and indicates his assault rifle. He gets distracted by Kruger making noise and is promptly beaten down by the mob.
* Eraserhead gives a quip of his own after the League are rapidly defeated and captured in the hideout raid:
* Eraserhead, included the nightmarish Man in the Planet, the eerie-but-sweet Lady in the Radiator, and the mysterious Beautiful Girl Across the Hall.
* Eraserhead kind of human in order to add to the wrongness. Also the small cabinet and the tree cart.
* Eraserhead loves using it, and to great effect; an especially unnerving drone is played at the end, matching the equally terryfing imagery.
* Eraser Head wields a "capture weapon" — a giant, super-strong scarf used to entangle enemies — and can use it to create
* Eraser in this manner, when it becomes clear that he will never be convicted.
* Eraser involves a car being struck by a train moments before the end of the film and blowing apart into manageably small pieces. Fate of occupants a foregone conclusion. Given that this was a real effects shot with a car actually being struck by a locomotive, though, it's at least excusable that they wanted to break up the car a little bit to try to avoid any unfortunate derailing during filming.
* Eraser is about a federal agent who fakes people's deaths for the Witness Protection Program.
* Eraser is the titular US Marshal whose job it is to make those in the federal Witness Protection Program disappear, as far as the world of the witness is concerned.
* Eraser: John Kruger saves mob snitch Johnny Casteleone from some thugs sent to silence him. Kruger plants his firearm in one dead thug's hand, then takes photos of Johnny C. and his wife posing as murder victims. This is done to make the mob boss think that Johnny has been silenced and that his thugs got into a lethal argument among themselves.
* Eraser, Kruger takes part in a rescue mission to save a compromised witness but it turns out his team is dirty. The witness and her protectors are killed and he is framed for it.
* Eraser, the participants in the Witness Protection Program acquired a new identity and had all the fixings of their old one destroyed.
* Eraser, which then explodes, covering the bad guys with water… And alligators.
* erases all evidence of their encounter with Picard's crew, believing that divulging the existence of aliens would cause panic and civil unrest. Even some warp-capable species want nothing to do with those weirdos.
* Erase Una Vez, or "Once Upon A Time," instead of "La Cenicienta," as intended. If that wasn't bad enough, the film was deemed politically permeated, especially after it came to light that there were plans to produce a Catalan dub. One poster made light of this, decorating the frame with Cinderella's name in various languages, including the Catalan "Ventafocs."
* erasing her memories, leaving her mentally an infant. Shortly before Raynare is

killed, she soils herself because infants have no control over their bladders and bowels.
* erasing his family's memories every day until they give him the perfect Father's Day and he's been doing this for six months.
* Erasing someone's recent memory to prevent them from "knowing too much" is a common device. This has been used in
* Erasmus Montanus: While Erasmus himself is legitimately well-read, just very prideful and a bit absent-minded, Deacon Peer is definitely this trope. He presumably had a priest's education but has clearly forgotten or skipped over most of it, and any time he proves his intellect he's just making up nonsense. The townsfolk, who lack education, believe every word he says and think the Deacon won his "debate" with Erasmus because Erasmus was too flabbergasted by the nonsense to have proper answers.
* Erasmus Tycho was originally just a Blood Angels captain who appeared in a
* Eras of Alchemy (having aided an alchemically powered AI in recreating all forms of life on Earth after an environmentally devastating meteor strike wipes out most creatures on the surface), players are treated to a dance party. HERA's avatar and the human sprites dance joyfully.
* Eras of Alchemy is to help an alchemically-powered AI recreate life on Earth after a meteor strike wipes out most life on the surface. Players are given the task to create griffins, pegasi, fairies, dragons, flying unicorns (or "pegacorns"), and phoenixes during the "Mythical Era," after having re-created dinosaurs and extinct ice age megafauna.
* Erastes Eromenos way. On other stories, though, Eros is the son of Khaos, which is the mother of Gaia, which is the mother of Kronos, which is the father of Zeus, who is the father of Ares.
* Erast Fandorin appears to become a confirmed bachelor after the death of his first wife in the very first novel. It takes a midlife crisis for him to consider marrying again (though his second marriage proves disastrous for entirely different reasons).
* Erast Fandorin, but it has been established that luck alternates every generation in his family: both his father and his son were Born Unlucky (while his grandson Nicholas was extremely lucky again). The unlucky Fandorins, however, don't get mentioned much.
* Erast Fandorin cycle of novels, set in Imperial Russia, and sometimes Imperial Japan.
* Erast Fandorin: Fandorin does this after Renate spins her story about how she killed Gauche because he was trying to kill her.
* Erast Fandorin he takes on as a protege Anisii Tulipov, a rookie cop who is brave and good-hearted but by no means an expert in deduction. Tulipov has to have pretty much everything explained to him by Fandorin all the time.
* Erast Fandorin is so good at this that some characters get confused, which of his appearances is the real, original one.
* Erast Fandorin, on his first crime scene (in his defense, it was an exceptionally gruesome murder).
* Erast Fandorin types of this trope. From the point of view of a modern reader he's in an alien setting (nineteenth-century Russia), and from the point of view of his contemporaries he's unusual because of the time he spent in Japan and the way it influenced him.
* Erasure. However, Aizawa makes up for it with his wits and being skilled in combat, capture equipment, and stealth to win a fight. His stats give him an average 3/5 in Power and Cooperation, but a good 4/5 in Speed and Intelligence, and an overwhelming 6/5 in Technique.
* Erasure: If queer people aren't mentioned, they disappear. Related to the assumption above.
* Erasure's "ABBAesque EP", as well as the release of "ABBA Gold", a compilation of the group's Greatest Hits.
* Erasure, the true story of Van Go Jenkins, a youth in the ghetto. He intended it to be a blatant parody: the book itself is incredibly awful, reproduced in its

entirety and written completely in Ebonics. And then it hits the bestseller list and people start wanting to meet the (completely fictional) author who wrote such a "raw and stunning work." Oops.
* ER: At least one episode zigzags the trope, though. A drug-addict takes a hostage in order to get IV Demerol, which the ER attending provides, but the nurse intentionally overdoses. Subverted in that he was actually cooperating with her attempt to administer the injection IV; played straight in that he just barely made it past the triage desk before pitching over.
* ER at this point) going out for drinks. In the next episode, she is clearly trying to avoid him and they're both very uncomfortable when they do run into each other, leaving viewers to speculate that they'd slept together and now couldn't handle it. It turns out they hadn't.
* Erayu is a video game being played by main character Josh, who gives comments on various events from time to time.
* ER, Benton's portrayer, Eriq LaSalle was equally uncomfortable with the relationship, feeling that it sent a negative message to the African-American community and asked the show's writers to nix it.
* ER, "Blizzard", a young black man nonchalantly walked up to Dr. Doug Ross with a loose bandage around one hand. Dr. Ross removed it, to find the man's thumb missing. He was keeping it in a small plastic bag. Doug had Malik wheel him straight upstairs to surgery.
* ER: Carol's fiancé dumps her on their wedding day after gently, but firmly getting her to admit she doesn't love him the way he loves her.
* ER. Carter after his friend Gant's death, blasting himself for not acknowledging that Gant was depressed and struggling, and also after Lucy's death, outright declaring himself to be partly responsible.
* ER cold openers generally focus on interpersonal ties (more than the hustle and bustle of the meat of the show could, anyway). A 12th season episode, "The Gallant Hero & the Tragic Victor", actually kills off a main character in the teaser.
* Ercole contro il gigante Golia... but it's a far cry from the 10-meter/30-foot behemoth he was "shown" as earlier.
* ERCOT also ignored experts on a smaller scale as they made minimal preparations in the couple of weeks leading up to the storm as they only really focused on the weather forecasts predicting snow and sleet, rather than the days of freezing cold.
* Erdős only turned to speed in his 60s; before that he did just fine on
* Erdenstern is a German group producing 'music for your head cnema' - sound tracks usable in role-playing games. Each album by Erdenstern followes a certain theme, such as seafaring (Into the Blue), cold and ice (Into the White) or high-tech SF (Into the Grrey). The sepatrate tracks are seamlessly loopable, but just having them sorfted by themes is very useful.
* ER does this when Mark Greene dies and most of the cast (including a couple of characters who had left the show) go to the funeral. Which raises some questions: was the hospital even open? (explained, albeit unrealistically, with a flashback later on), and of course, makes long-time fans wonder what happened with those who weren't there (namely Dr. Ross and Nurse Hathaway). That was subverted later on when Greg Pratt died, as they didn't show the funeral but commented on how most past and present characters went or at least sent flowers.
* ER, Doug Ross was treating a young man dying of cystic fibrosis who wanted to enact a DNR. Unfortunately, as he was not yet 18, Doug could not do this, and so, at his mother's bidding, intubated him against his will. As the kid is wheeled off to be admitted to the hospital, he gives Doug the finger in response to the latter's apologies. This was the first time this happened in the show's run, but it made sporadic appearances throughout — Romano flipped off his physical therapist in response to her questions about his motility, and a wrongly arrested, deaf patient flipped off the cops even as they apologized to him (aside from the fact that he was friends with the woman he was wrongly accused of attacking, it's implied the cops leaped to conclusions because she was white and he was black). The amused interpreter declared, "I don't think you need me to translate that one"
* ER: Dr. Doug Ross and medical student Harper Tracy sleep together after a rough

day. Doug's supervisor (and best friend) Mark is furious when he finds out—this is a major rules violation—despite both of them insisting that the encounter was completely mutual and their was no force or coercion on Doug's part.
* ER Dr. Kim Legaspi. Even then, it's not until Kim points out Kerry's behavior—frequently calling on her for consults, etc, that Kerry realizes that she's been acting like someone with a crush. They soon begin a relationship but break up due to Kerry's constant wavering. Not until several months later does Kerry blurt out that she's a lesbian, and even then, it's not to Kim, it's to someone making derogatory comments about her. Although it doesn't work out between the two, following this, Kerry pursues several lesbian relationships with ease, even marrying and having a child with one woman.
* ER, Dr. [Mark] Greene called to "Dr. Carter" at the end of the first episode; the series ends with Dr. Carter calling to (future) "Dr. [Rachel] Greene." Meanwhile the old gang—including Drs. Corday, Weaver, and Rasgotra—are shown to be happily settled in to their lives post-County.
* ER, Dr. Robert Romano. As much as everyone hated, you couldn't deny that he freely admitted to being an egomaniac whose sole concern was his own well-being. This is in stark contrast to Kerry Weaver, who hid this same behavior under a facade of friendly concern, only to backstab anyone foolish enough to trust her.
* Erebonia invaded Liberl shortly after that. It was almost the perfect excuse. To an outsider, it was as if Liberl had hired the jaegers, equipped them, and ordered them to attack the village. When Loewe and Joshua were found by the local garrison after the incident, the military was adamant that it was Liberl. After the war however, they were told a different story. That the jaegers had turned rogue, and were engaging in pure brigandry. Regardless, they were threatened and told to never speak of this again. After the incident, the Erebonian government quickly and hastily gathered up all of the people responsible and executed them. In the peace agreement between Erebonia and Liberl, one of the requirements was that no one could ever speak of this again, to prevent a rebellion from occuring. Erebonian history texts were changed to say that the village was destroyed in a landslide, and that was that.
* Erebos, all NPCs in the eponymous game are able to react almost uncannily realistic to the players' words and actions, including forming plans based on the intel they gather.
* Erebos Luna into Nightmare Moon; and Luna suspects that he was manipulating the conflict between the hippocampi and the dragons of the Scaly Back River Clan for his own benefit (though this hasn't been confirmed yet).
* Erebos. The protagonist, Nick, decides against it - But somebody else models their character after him, even naming himself LordNick.
* Erebus is a being similar to Nyarlathotep and Philemon, but he embodies humanity's desire for death. Erebus sees to make contact with Nyx to enact the Fall, which would wipe out all of humanity. The protagonist of Persona 3 sacrificed their soul to become the Great Seal that keeps Erebus from Nyx. Erebus has been destroyed in the epilogue chapter of Persona 3 FES: The Answer, and has also been destroyed on a yearly basis by Elizabeth as seen in Persona 4 Arena. However, it was stated repeatedly that Erebus would continue to revive itself every year, and can only cease to exist if humanity stops wishing for death.
* Erebus of the Word Bearers managed to bring about the Horus Heresy with a few carefully timed manipulations. First, he teamed up with Lorgar's mentor Kor Phaeron to lead Lorgar to the Chaos gods. Then he followed up by executing a convoluted scheme to get Horus sworn to darkness. Unfortunately for him, he has trouble when the pieces in his plans act for themselves, leading to him
* Erebus' plan to infiltrate the Atlas Strongest Tournament is a chance at revenge on Twilight Sparkle for her defeat at the wedding.
* Erebus Sequence are interwoven. The second book uses fewer flashbacks, but there's still a reasonable number.
* Erebus Sequence, but again, we don't see a corpse, so we can't be sure.
* Erebus Sequence, Dino attracts a degree of female interest, but realises that

he's gay. However, prejudice means that he's unwilling to simply say so, which means everyone ends up unhappy with their love life.
* Erebus Sequence, is also both the nastiest and stupidest. He's being prepared for a role as dumb muscle, but thinks he's being prepared to be the next king. (He doesn't genuinely care, and just wants to strike out at people who think they're better than him.)
* Erebus Sequence: It turns out that the reason Anea wears a veil and can't speak is that she doesn't have a jaw.
* Erebus Sequence much older than him, and is more his nanny and maid than mother figure, but their relationship nevertheless started out as caregiver-and-kid.
* Erebus Sequence, some nobles in Demesne don't think much of the way it's run. Stephania Prospero, in particular, defies her mother and supports attempts at reform. At the end of the second book, she has to flee but doesn't think she'll miss the place much.
* Erebus Sequence, this is given to someone without their knowledge; Rafaela has been secretly building up Lucien's immunity to the poison Golia uses due to the (correct) fear that it will eventually be needed.
* Erecting a sprawling civilian metropolis directly atop a military base that is
* EREDAR LORD OF THE BURNING LEGION!! who has 15 HP, but possesses a 3/8 Weapon and his heroic ability lets you summon a 6/6 creature for 2 mana every turn.
* Erek King is an ageless, nearly-indestructible android perfectly capable of being a
* ER: Elizabeth Corday tries to invoke this when she meets Susan Lewis, an old friend of her husband Mark, when the latter invites her to have coffee, declining with, "I don't drink coffee, I'm breastfeeding." Unfortunately, all it does is make her look incredibly rude, as A)Susan already knew about the kid, so there's no shock factor, and B) Susan had no romantic interest in Mark and was trying to befriend Elizabeth to assure her of this.
* Eren (183cm) gets a lot of ambiguously shippy interactions with Historia, the shortest member of the 104th.
* Eren attempts to end the war in the most horrifying way possible; by murdering most of the world and enslaving the survivors on Paradis Island. His supporters believe this will make the world 'smaller and manageable', even if the war continues.
* Eren decides he wants to destroy the concept of slavery, even if it means mass-genocide of slave races (which includes all
* ER ended up with a prosthetic arm, effectively ending his career as a surgeon.
* Erendis dies in Second Age 985, over a century before Aldarion dies. Aldarion lived to be 398; Erendis died at only 214. She did drown herself, but she was already very old for a non-royal Númenórean. Ancalimë inherits her father's longevity and actually lives even longer than him - she dies at the age of 412.
* Eren ends up losing control of his Titan form during the Trost counter-offensive.
* Eren. He has no extraordinary skills, but still placed 5th in the top 10 of his squad. Subverted with
* Eren is like this at first when he discovers his Titan-Shifting powers. The
* ER. Enraged at the cops' failure to find his assailant, Dr. Mark Greene trashes the lounge.
* Eren's father Grisha is the only member of the Eldian restorationists
* Eren's father, Grisha just by eavesdropping. Maybe the Royal Government's information security just needs work.
* Eren's feelings towards the Colossal and Armored Titans who destroyed his hometown. It's the same as his feelings towards all Titans, but turned
* Eren somehow used the Founding Titan's power to give Mikasa memories of an Alternate Timeline.
* Eren's titan shifting ability manifested when their group was surrounded by titans outside the wall with little hope of surviving.
* ER episode "Twenty-One Guns". Abby places one on a door window just before

slumping over and falling to the floor.
* Erepublik), an online social strategy, suffers from this. While free play is possible, the international currency is virtual gold. This can be earned in small amounts for various infrequent achievements, or bought on the currency markets (prohibitive due to its high value), but is required in moderate and large amounts to create organizations, newspapers, companies, and political parties; to upgrade buildings; and to buy wellness packs that allow players to fight more times each day. In short, any major in-game enterprise tends to become expensive.
* eRepublik by permanent bans to any one found with multiple primary accounts and the way you're allowed to make as many stripped down secondary accounts as you want. Doesn't stop some people.
* eRepublik has World Wars I to V, completely unrelated to historical ones.

* Eres Veneno ++ greatest example of The Masochism Tango. As was once commented, "there's love, and then there's bitchy love."
* Eretz Nehederet-esque pig for a head) was featured. Host Eyal Kitsis went over a list of his assets, which included, among many others, the phrase ‘Holy shit, get a load of those tits!’ and the word ‘morning’.
* Eretz Nehederet interviews with actors playing public figures, and skits in the formats of news reports.
* Eretz Nehederet is particularly known for bringing a few neologisms every season, some of them sticking for quite a while.
* Eretz Nehederet's depiction of John Kerry had him speak machine-translated Hebrew, complete with painfully shoving Hebrew words into English grammar and translating loanwords.
* ER fanfic centered around the reviled Kerry Weaver had her wishing she'd never come to work at County. Sure enough, her guardian angel showed her how bad things would have been otherwise.
* ER fanfic had Doug walking in on Carol as she was doing this. She is of course, self-conscious and embarrassed that he caught her like this, even as he tries to reassure her that it was beautiful to see her that way—the very reason he walked in was that he was so turned on that he wanted to have sex right then and there.
* Erfar the Silvertongue. extraordinaire aside, he will likely drop from a single attack. He doesn't even have the dignity to leave something decent behind, instead granting only one coin.
* ER: Fellow nurse Malik offers to be Carol Hathaway's coach, though it's her friend Dr. Mark Greene serving this role when the day comes (and we never see the classes).
* ER frequently used made-up medical emergencies as a way to get the victim into the room where the surprise party was being held. And they could never say no and take the chance of it being a real emergency.
* ER: Frustrated with an impending lawsuit, his nagging boss, and worsening PTSD following a vicious attack, Mark Greene is trying to talk to a deaf, elderly woman about her husband's condition and growing even more frustrated because she can't understand him. He finally gets fed up and screams at her that her husband is terminally ill, just as everyone else in the waiting area and the nurse's station shuts up, leaving him thoroughly humiliated by his behavior.
* Erfworld. A divine artifact backs him up on this point. Or not, since croakamancer Wanda Firebaugh has one too, and apparently so does Charlie of Charlescomm.
* Erfworld, after having his views on royalty changed by the events at Gobwin Knob, insists that he is "merely a warlord formerly known as Prince."
* Erfworld after her and Jillian's experiences with trying to fight Fate just made things harder on them. Wanda chose to submit to Fate and became rather stoic and hopeless as a result, but generally gets what she wants. Jillian herself keeps fighting Fate despite the futility and is usually happier and more fulfilled even

though she always seems to end up suffering and losing eventually. So, who won?
* Erfworld), and at one point enables a blinded Jillian to "see" by broadcasting an illusion of his own perception into her head. He's almost-singlehandedly the reason why Faq managed to remain an unknown kingdom for as long as it did.
* Erfworld and custom clothes. Ace can't stand that, though, and prefers to use his talents to make "accessories", such as a jet pack, and a laser pistol.
* Erfworld and everyone can naturally see everyone else's stats by looking at them — except Parson, who cannot see stats and has no stats anyone else can see. Partway through the series, though, he obtains a pair of old-fashioned 3-D glasses that allow him to see unit stats.
* Erfworld; and nearly succeeded, although Parson was very good at exploiting the weaknesses of that strategy:
* Erfworld are rendered images superimposed on the drawn art. In this case, it's a deliberate effect intended to make them stand out by looking a bit "otherworldly". In a similar vein, the use of digital brushes is very conspicuous in the scenes with masses of bats.
* Erfworld. As this speech happened two "volumes" ago in-comic, it isn't much of a spoiler that he finds a way.
* Erfworld (attacking during negotiations especially being practically a signature move) means that the side's attempts at diplomacy once their position is secure are crippled before they begin.
* Erfworld becomes a lot sexier (and much more open towards the protagonist) when she does this late in the comic.
* Erfworld built the eponymous universe with laws of physics which seem designed to make peace impossible. However, recent events indicate they may be still active.
* Erfworld combines the powers of different mages to revive a dead volcano.
* Erfworld doesn't just take place a world with its own cultures, and an unfamiliar set of fundamental universal laws. It features a protagonist from outside of that world learning about the world alongside the reader... who then hunts down and exploits loopholes within the world's established construction in ways that rock the world to its foundations and destabilize whole civilizations with long and (internally) storied histories.
* Erfworld. Erfworlders instinctively understand the meaning of such words (as they do most other Earth words), but they are revolted by them and never use them themselves.
* Erfworlders also near-universally use the term "croak" or "croaked" where Stupidworlders say "kill" or "dead". They still know what "kill" means, but if someone uses it they find the term highly vulgar.
* Erfworld first sight. Merely hearing Wanda's name with no further context was enough to send Jillian's heart racing. Then Wanda captured her and tortured her for a few dozen turns, and then Wanda joined Jillian and helped her croak Wanda's Ruler, and then Wanda betrayed Jillian's father while Jillian was out in the field, and then Wanda captured Jillian and tortured her a few more times. Their relationship is... complicated, even without bringing in the large amount of Fate connecting them.
* Erfworld gains red eyes after completing his sword, in a panel that makes him look genuinely frightening for the first time in the series.
* Erfworld gets the bright idea to take out the throne room's defenders by dropping a balcony on them with a purple dragon, excited by the irony of croaking them with falling statues of their own heroes. However, he doesn't seem to have commanded a dwagon in combat before, because the beast doesn't stop short enough to prevent them both from being crushed. His last words upon realizing what's happened are "Irony, really."
* Erfworld had a bit of fun with this one, as it was the title of part two of Book 2, and it was a central plot point.
* Erfworld has Jillian, who has three people in love with her. After she leaves two behind to go after the third, one of them asks the other why he didn't go with her.
* Erfworld has many types of golems, from cloth (giant stuffed animals) to metal (including soft, hard, and acid), to — as Sizemore is discussing with Bogroll

— crap.
* Erfworld has the protagonist conduct a number of hit-and-run attacks that technically count as "losses" by the world's rules, but his opponent loses far more valuable siege units.
* Erfworld has the Titans, the beings who created Erfworld. They can only be described as omnipotent mile-high Elvis impersonators.
* Erfworld) hits Parson and he has to wonder how much he was influenced by the spell that summoned him and how much by his own free will and genuine desire to command a battle.
* Erfworld if they doubt their Ruler's ability to act in their Faction's best interests.
* Erfworld: If you fail to pay the upkeep, the unit disappears, and the leader is normally given a psychic indicator that their forces have decreased from starvation. If the leader doesn't get such an update, then that's usually due to "Carnymancer" trickery and the ignored death is intentionally orchestrated.
* Erfworld. (In an even more delicious twist of irony, this school retroactively replaced a school called Deletionism, which was itself deleted.)
* Erfworld" in order to explain how a change was retroactively made to a character's special ability. Therefore, Deletionism has never existed.
* Erfworld IRC. According to a "news" post on the main site, "You may NOT quote what I say as Word of God. There's a lot of thinking out loud. Anything I say in there is not canon, and may be changed, ignored, or totally reversed."
* Erfworld is a firm believer in what is called in-universe "Fatalism." Functionally, Fatalism teaches that if you have a Fate, that Fate will come to pass no matter what you do. You can make your life easier by seeking out your Fate and sticking to its dictates, or pointlessly torment yourself by trying to work against your Fate, which does absolutely nothing besides make more trouble and pain for you and everyone you care about.
* Erfworld is almost entirely drawn in 2D — except for the Arkentools, which are rendered in 3D CGI.
* Erfworld is home to a broad variety of mounts, including spidews, dwagons, gwiffons, unipegataurs, megalogwiffs, tankeroos (kangaroo-formed cloth golems), elephant-formed cloth golems, and a glass golem which appears to actually be in the form of a horse.
* Erfworld is ordered to prepare a plan to betray and conquer the city he's serving as liason to - and whose ruler he is in love with - he does so with trepidation but no hesitation, and stands ready to carry it out if and when the order comes down. His side is his side, and his personal feelings don't enter into it.
* Erfworld, is responsible for many reprehensible acts, but he wishes Parson, the protagonist, no personal harm, and is only trying to stall Parson's fate to kill him for as long as he can. But as long as Fate continues to manipulate events, conflict between him and Parson is inevitable.
* Erfworld is something like "rockstar" in the Magic Kingdom, where all the other magic users appreciate his abilities and willingness to lend a hand to anyone. Back home in Gobwin Knob, his boss refers to him "as the shit guy" and his job is basically taking everyone's waste and making terrible smelling golems out of it. He starts getting more respect at home once Parson takes over as Chief Warlord, but that comes at the cost of his popularity in the Magic Kingdom (as more and more people become unwilling to associate with him due to his side's actions and expansion)
* Erfworld) It was established early on that units can bend or break orders when necessary to their overlord's survival:
* Erfworld, Jack uses this to screw with a bunch of spellcasters; he's looking through the portal when suddenly it fizzles out, decapitating him instantly. Two panels later he drops the illusion spell to show both he and the portal are perfectly fine.
* Erfworld Judging from the way the story is going, this was just the start.
* Erfworld made on her. It didn't turn out well for her loved ones and the prophecy came true anyway, so she came to believe that the only way to avoid/minimize

suffering is trying to fulfill your Fate as quickly and directly as possible.
* Erfworld master they need, but he has to learn the local rules first... It's also deconstructed; he's not really an everman, but rather so obsessed with his gaming hobby that it completely dominated his life as he let everything else fall apart out of sheer disinterest. One of the people who saw him disappear remarks that it's the first plan he's ever followed through on.
* Erfworld mind - he asks a sorceress what she was like as a child, and gets a blank look. (This fact, by extension, also means that Erfworld has a much more casual attitude towards sexuality than a medieval society normally would, as well as general equality of the sexes since women aren't held back by pregnancy.) Regardless, this is of the "it's just how it works" variety - presumably because their entire world is designed around warfare, so there's no room for kids (or civilians, for that matter).
* Erfworld parodies this with its "dwagons", "gwiffons", "spidews", and other such beasts. Main character Parson Gotti, from Earth, explains to his boss Stanley that he's used to "dragons" and "griffons" on Earth. Stanley replies that they sound stupid, especially "Earth".
* Erfworld. Parson describes it as "really useful, really dangerous" magic.
* Erfworld, Parson goads Ansom into striking before he's ready by claiming that his (imbecilic) overlord Stanley is superior to Ansom's royal status (a sensitive issue with Ansom) due to Stanley's possession of a divine artifact. Cut to Stanley chocking a subordinate in frustration.
* Erfworld. Parson Gotti, meanwhile, is from our world and has these strange notions of "free will", "choice", and "not taking sexual advantage of underlings". Egad. Made worse when Maggie, a spellcaster and therefore one of the few units who exercise some amount of free will, mocks him for being reluctant to take advantage of the situation.
* Erfworld, Parson, still not quite sure it's not all a dream, tries pinching himself to "wake up".
* Erfworld Parson, who needs special help to do so. No-one can see Parson's stats, however they do figure some of them out by how the bonuses he grants affect other units.
* Erfworld, perform other magical feats, and is a formidable weapon in close combat. In keeping with the outwardly cutesy appearances of everything else, however, it's also a plastic toy squeaky mallet. As one fan put it: "It's only a toy if you're a Titan; mere mortals have to settle for using it as an insanely powerful artifact." It turns every fifth walnut it cracks into a pigeon, and supposedly every fifth bird it kills into a walnut.
* Erfworld premise. Taking out the enemy ruler will end their entire side unless there is an heir (and heirs are very costly to pop or designate). This tactic is attempted against Gobwin Knob in Book 1 and Jetstone in Book 2, though it fails for different reasons. It's successfully used against Haffaton in Book 0.
* Erfworld, Prince Ansom uses a rolled-up one as a mount. It can be unrolled and used in the traditional fashion if he wants to accommodate additional riders.
* Erfworld, Prince Tramennis greets his fallen brother, (formerly Prince) Ossomer, after Ossomer had been killed and Decrypted by Wanda, just like Ansom was.
* Erfworld requires a huge amount of attention to detail just to figure out the rules of the world, and that still leaves the mystery of what exactly the world is, and who is working behind the scenes.
* Erfworld, resulting in gwiffons, dwagons and spidews. When the protagonist makes note of this and asks if it shouldn't be "dragon" instead, the other characters seem to be quite weirded out by these "incredible stupid words" and state that they "really don't want to know what you call spidews in Stupidworld or whatever you call it". Note that "erf" sounds slightly like "earth". "earthworld"?
* Erfworld say (e.g. clinical terms like "testes" are permitted) to sidestep this limitation.
* Erfworld she says: "Arrange it so that he thinks it was his idea. Let him have your way."
* Erfworld: Since the world is based on a turn-based strategy wargame, this is to

be expected. If a Ruler is croaked, their Side falls unless they have an heir. Heirs can either be popped naturally or designated at great expense. When a Side ends, any units in the field disband (cease to exist), while any cities go "neutral," meaning they freeze in time until someone attacks them. If all the cities are captured or razed when the Ruler is croaked, then if they have an heir, that heir will become a barbarian, a nomadic unit without a true Side. Barbarians have a limited purse and no easy way of making more money, but if they capture another capital they can start a new Side.
* Erfworld: Since the world is based on tabletop wargames, the various Sides fit into these roles. Traditionally, the Ruler of the Side decides on the Grand Strategy (unit production, etc), and the Chief Warlord chooses how to fulfill their goals using the provided units.
* Erfworld Sizemore appear there from time to time but operate primarily in the field.
* Erfworld, Slately decides that he can not leave the city before his son leads the attack; his son must leave before he leads the attack.
* Erfworld spells asks "May I give you a suggestion, lord?", you may want to think about your answer.....
* Erfworld. Stanley has a tactical table with real-time intelligence and images generated by his linked casters; Ansom uses a more prosaic map-and-counters representation of his available intel.
* Erfworld structures. That and towers apparently have no stats whatsoever. Although it isn't known if it is true or not, some characters think that what afterlife you get when you croak is determine by an invisible stat called a score. Some other weird things is that many buildings in cities are completely empty of workers but still do their function and somehow do their function better when they are visited by a warlord. And because units pop into existence as adults they have no concept of childhood and very little concept of family. Even things like the laws of probability and statistics don't work the same way as they do in our world. Random events are determined by abstract dice which can be manipulated through Luckamancy, however, there is a limited supply of good dice rolls, so blessing someone with good luck steals good dice roles from somebody else. According to Predictomancers and Carnymancers the future is predictable because the game is rigged; you can fight fate, but Fate fights back and it can hit harder than you.
* Erf World summer updates, Parson gets into a discussion with Jack and Maggie about the nature of time in Erfworld. At some point, he realizes that he is either too drunk or not drunk enough to participate in the conversation. Having no way to sober up, he gambles on the latter, and downs a wineskin.
* Erfworld than truly understanding how magic works. The Thinkamancers, for example, view everything in terms of Grandiocosmic strings, to the point that they never even noticed that key parts of their own discipline involve quite a lot of Date-a-mancy.
* Erfworld, the Battle for Gobwin Knob: The titular battle included siege towers pushed by 20m tall Cloth Golems and Wiener Rammers: living battering rams in the shape of elongated wiener dogs with rams horns. Upon striking the gates of Gobwin's Knob they invoke "YTMND!": they are drawing their striking power from the "You're The Man Now, Dog" meme.
* Erfworld, the entrance to the caves leading to Gobwin Knob has a sinister resemblance to a mouth.
* Erfworld, the guard comments on the "fascinating" things he overheard and tries to ask a few questions. Wanda tosses some magic powder in his face and tells him, "You heard only the screams for mercy."
* Erfworld, the mysterious Charlie assumes a variety of different forms whenever he psychically communicates with someone. To the reader, they come off as fourth-wall-shattering references, but given that almost everything in Erfworld is a warped version of Earth pop culture to begin with....
* Erfworld, this one's invoked by Charlie and the Jetstone side, in order to trap Parson in an unwinnable situation. (More an emotional slam than a physical one: Parson was hoping to keep that portal open as an escape route.)

* Erfworld. Though everyone at least suspects that mind control is involved, with most people believing it completely.
* Erfworld to make him leave the room and appoint Parson chief warlord.
* Erfworld, took time off in November 2011 to deal with her dying mother. During this time, the text only "Inner Peace (Through Superior Firepower" was posted instead, which was set before the events of the main comic.
* Erfworld to Superman. His brother Ansom has a less pronounced (but still pretty manly) chin. Their brother Tramennis has the cleft, but his chin is quite narrow, so it's not as noticeable. Their father King Slately probably has one as well, underneath that King-of-Hearts beard.
* Erfworld trope; he has to patiently explain that even perfect strategy doesn't mean you never lose.
* Erfworld uses a card game like this to demonstrate the rudiments of Carnymancy. The basic rules are simple, but after the cards are dealt, everyone gets to make a new rule. The twist is that no player can use a rule he made himself to win a trick.
* Erfworld uses a cat-o-nine-tails in her "hobbies" of torture, interrogation and, well, BDSM, while wearing appropriate outfits.
* Erfworld, Wanda and Jillian arguably had such a relationship at one point.
* Erfworld, Wanda is lying broken and beaten before Prince Ansom and begs him to strike her down, just to let her touch "them" (the Arken Pliers). Ansom is so creeped out by it that he leaves her where she is without attacking again. Things might arguably have gone much smoother for him shortly there-after if he had just done as she asked at first. But then again, maybe not...
* Erfworld was a Hippiemancer who specialised in Flower Power. Most Hippiemancers despise war, but Olive was perfectly happy to put her talents toward war and killing, and did so mainly out of spite. She killed at least ten of her siblings, tried to kill her father and took control of her side by getting her Ruler hooked on a horrific drug that she also used to kill off her fellow casters from spite. Olive was a master at poisons and drugs, and didn't discriminate, happily manipulating and torturing anyone she felt deserved it in her quest for dominance.
* Erfworld was apparently created by the Titans of Arc, who are worshiped its inhabitants and who look like giant Elvis impersonators.
* Erfworld) webcomic before he got plotted into Erfworld. It's actually been up since before the comic that shows it was posted — hasn't been updated since then either. Presumably it'll get some fresh content when (if) he makes it back to the "real world".
* Erfworld when Lord Stanley is called a "tool" by Parson, he declares that "Tool" will be his title from now on, because he didn't realize it was an insult.
* Erfworld (which he could not do before due to Erfworld's censorship) to signify how he won't be controlled. Judging from a recent chat with Charlie, he can now swear at will. When determining what he wants in life, one of the things he decides is that if fate is a thing that exists, then its hold over the world should be broken.
* Erfworld, with the usual half-cutesy twists added. Here, the "death" mages are called Croakamancers, the illusion-casters are called Foolamancers, and the earth-specialist is a Dirtamancer. Every school of magic (except for a few, like Hat Magic) bears the Mancy suffix, and we get stuff like Hippymancy, Lookamancy, Luckamancy, etc. Dirtamancers do move earth, but they can also use... night soil.
* Erfworld with the written message "Hey, Bogroll, order me to speak!"; however, Bogroll can't read. When we next see Parson, he's conversing with Sizemore, who presumably did read and follow such a request.
* Erfworld would probably count. Though being golems, they might only qualify as crap-based automata.
* Erfworld would rather not be, but nobody he's interested in can consent in a way he considers meaningful thanks to power discrepancy. This raises some eyebrows in-universe since hooking up with attractive underlings whenever you want is generally considered one of the perks of command.
* ER. Gallant clearly doesn't want his MS-afflicted sister becoming involved with

Pratt, who is something of a player. However, when said sister gives Pratt the brush-off after their night of passion, it becomes obvious that Gallant was trying to protect Pratt from HER, not the other way around.
* ER). George Clooney accepted standard union scale pay for his cameo, which he did mainly as a favor to actress Julianna Margulies.
* Ergo Proxy: An Entourage Auto Reiv belonging to Re-l Mayer, Iggy contracted the Cogito Virus and grew to become enraged at Re-l's lack of regard for him. He despises Proxies and blames Vincent for taking Re-l — his sole reason for existence — away from him. He develops an unusual state of both loving and hating Re-l, and locks her up to "protect" her, while he attempts to kill Vincent. However, an Auto Reiv belonging to a Proxy that Re-l killed, attempts to kill Re-l at the same time, causing Iggy to return to Re-l. The Auto Reiv goes into a self-detonation mode and destroyed much of Iggy except for part of his head (which left Iggy "conscious" to some extent). In the end, not wanting to see Iggy suffer due to the virus, Re-l shoots him and buries his head.
* Ergo Proxy, as the proxies mentally war for supremacy. The ones involving Vincent have him and his friends appearing to steadily go mad, however one less serious episode involves little girl-robot Pino playing inside another proxy's gaudy Disney-esque Theme Park.
* Ergo Proxy, cannot be killed by conventional weaponry. Later on it is found that only UV radiating bullets can kill them.
* Ergo Proxy, Ergo Proxy's first couple of on-screen transformations involve lots of painful screaming. The transition seems to become smoother later on.
* Ergo Proxy had a very interesting method of revealing its backstory: the characters ended up in a bizarre gameshow, where most questions and answers were directly related to the plot. The gameshow host MCQ played the part of Mr. Exposition.
* Ergo Proxy is a dominating trait in the series and during Vincent's second journey from Mosk to Romdeau he and Pino have their dreams invaded which tells them more about the world.
* Ergo Proxy looks like Hitler. Even more hitlarious when watching the German dub, where in the earliest episodes, before the main characters leave Romdeau, his voice is completely normal, and by episode 21, when they return, he talks with the stereotypical Führer accent.
* Ergo Proxy, meaning everyone probably started this way. The proxies themselves, or at least the one from Romdeau, were kept in people jars as well.
* Ergo Proxy, Monad Proxy pursues Vincent Law through a crowded mall, violently flinging aside every bystander in its path with lethal force.
* Ergo Proxy Pino, happily chimes in that the power is in fact working.
* Ergo Proxy: Pino, who is really more like a Genki Robot that looks like a girl.
* Ergo Proxy Raul and Daedalus both get their priorities straight just before dying.
* Ergo Proxy Raul Creed becomes this as he loses his sanity over the course of the show.
* Ergo Proxy Raul, the newly-appointed Director-General of the Citizen Security Bureau is to blame for this.
* Ergo Proxy shows a future in which advertisements are constantly blaring on loudspeaker in the domed city of Romdeau without any breaks between them.
* Ergo Proxy. Similarly, the other Proxies also exhibit this trope when initiating aggressive action.
* Ergo Proxy's intro has little live-action pigeons flying about in it.
* Ergo Proxy: The last scene shows Vincent standing at the top of the ruins of Romdeau, with his caplet billowing in the wind. It's a very badass ending.
* Ergo Proxy: The Post-Apocalyptic wasteland outside the dome cities is constantly covered by a thick layer of clouds, creating an artificial nighttime.
* Ergo Proxy: There's a scene wherein Raul Creed is threatening Daedalus into helping him, coming up quite close and, if memory serves, touching him on the face. Though both characters are attractive, the whole thing feels very much like rape, making it highly disturbing.

* Ergo Proxy, though already post-apocalyptic, just made it worse when the last known bastion of humanity fell since its patron Proxy abandoned it, as well as almost every Proxy burns to death. The only survivors are a Proxy, two cogito-infected autoreivs, and a person who is either another Proxy or sterile. However, this is considered good because the small populations of humanity who retreated from the planet a thousand years before begin to return due to the Earth finally recovering from the nuclear winter. Every character we knew that even survived will likely be slaughtered because none of them were meant to survive — Proxies were genetically altered to have a deathly reaction to UV rays and autoreivs were meant to destroy all the sterile humans and then themselves by way of the cogito virus.
* Ergo Proxy typically come to regret it; in fact, the most common reaction to Becoming A Real Boy is a violent psychotic breakdown from crash-course existential angst and the inability to reconcile their new sapience with a lack of life experience.
* Ergo Proxy. Vincent is rapidly asked several trivia questions, culminating in "What is the title of this song?" - upon which we cut to the opening. And Vincent apparently knew the answer to that.
* Ergo Proxy, whose pure white skin, pitch black hair, and liberal amounts of blue eyeshadow make her rather striking and creepy.
* ER had a doctor and her husband being diagnosed with HIV. The husband had not known about this and accidentally infected a co-worker during a work-related accident. The co-worker saw the doctor and her husband in a diner in one episode and began to harass them until the husband stepped in and fought him. It was one of the more dramatic examples of this trope.
* ER had a haggard-looking English patient being treated, and when asked if he has hit his head or blacked out, he cheerily answers, "Of course I hit my head, it's rugby."
* ER had asked to be written out of the show. Needless to say, the only true surprise in the cliffhanger of the episode was that the producers actually had her die instead of just writing her off.
* ER had a veritable cornucopia of these. Examples include Elizabeth and Peter, Luka and Abby, Luka and Sam, Abby and Carter, Carter and Susan, Doug and Carol, Mark and Chuny...the list goes on.
* ER had episodes directed by Laura Innes (12 total), Paul McCrane (9), and Anthony Edwards (4). Laura Innes and Paul McCrane even directed episodes after leaving the cast.
* ER had John Carter in renal failure due to both injuries he received when stabbed 9 years prior and an infection he picked up while working in Africa. He finally received a kidney towards the end of the season.
* ER has a familial version with Abby and her bipolar mother Maggie. Abby outright describes their relationship as "the dance we do"—-her mother shows up all cheerful and enthusiastically swearing that things are going to be different than the hundred other times this has happened. Abby however, recognizes this as the beginning of a manic phase and knows that it's only a matter of time before she goes off the wall and causes chaos—she outright says this to Carter just after this has indeed happened. Her mother then disappears for months before turning up again, this time in a depressed phase, possibly to the point of being suicidal. Despite how miserable the whole thing makes Abby, it's obvious that she can't bring herself to get out of it, even telling her mother after her latest suicide attempt, "I will always show up because you have that power over me."
* ER has Doctor Kovac and Nurse Sam after they dated and decided to remain friends. Likewise with Abby and Carter. Even earlier, with Elizabeth and Peter, when she finally realizes that their personalities are far too different and that he'll never get over his discomfort with their interracial relationship.
* ER has one of the women losing her engagement ring in the drain. Romano later retrieves it with an endoscope.
* ER: he charges into the other trauma room, where said father is being treated, and attacks him.

* ER. He's Carol Hathaway's rebound guy after her breakup with Doug Ross and subsequent suicide attempt. They're quickly engaged, but he leaves her at the altar at the end of the season because he knows she'll never be as thrilled to be with him as he is with her.
* ER. He's the the new medical student so the other doctors (mostly Benton) explain how things run at the hospital and many medical stuff too.
* ER, however, it's because he hasn't eaten anything all day, thanks to the abovementioned search.
* Erica Carroll initially played a nurse in a one-off role in an early season, and then was brought back playing an angel named Hannah in season 9.
* Erica Durance's feet (on screen) before running to him. One of the more visible examples, as the moment in question eventually made it into the opening credits.
* Erica herself is an odd example. While everyone appreciates her skill set, her strict professionalism and reluctance to socialize mean that her eventual boyfriend Ben is the only one to get along with her well on a personal level (especially in the earlier books).
* Erica is actually a trans woman. However, Vincent, Orlando and Jonny are aware of it, and there are several hints dropped over the course of the game before the actual reveal. It's only this trope to Toby, who lost his virginity to her.
* Erica Lindbeck, has stated in interviews she personally interpreted Futaba as having Asperger's Syndrome.
* Erica Lowenstein, the Lois Lane on some villains and ended up falling into a vat of chemicals and becoming virtually indestructible and transparent.
* Erica Luttrell (Father is American, moved to U.S. when she was a teenager)
* Erica Mendez, Mexican-American voice actress for various anime and video games, is asexual.
* Eric and Ernie's skits revolved around Ernie doing an impression of a newspaper salesman and a butcher. They both sound the same.
* Eric, and merely intended the horse to distract the defenders while he and his men got into the city another way.
* Eric and Nell get an almost identical scene in season 8's "Getaway."
* Eri can do this in a sense, as her "Rewind" Quirk can bring anyone she comes in contact with in a previous state when activated. Izuku Midoriya/Deku was able to rely on her Quirk to heal himself from constant injury while using One For All at maximum power against Kai Chisaki/Overhaul. Since she is still just a child who is unable to understand or control it on her own, there is a chance she could rewind someone out of existence if not used correctly,
* Eric and Sookie's relationship has elements of this. She can't read his mind, he can't glamour her or make her quit her job and live safely as an odd type of housewife. This has nothing to do with the challenge and everything to do with the fact that hearing a guy's thoughts tends to really screw things up for Sookie, e.g. unflattering commentary on her body.
* Eric and Wednesday Burns-White's experiences with the visa interview.
* Eric, as an otherworlder (i.e. someone who came from another dimension) is subjected to a harmless version of this when he first arrives on Threa; basically magical x-rays. Although the
* Eric Balfour. This led to his character Milo getting shot in the face late in the season.
* Eric B. & Rakim only had one charting entry on the Hot 100. It wasn't "Paid In Full", "Eric B. Is President", or "I Ain't No Joke", but rather the much-less remembered "Juice (Know the Ledge)". Their only Top 40 appearance was a featured credit on Jody Watley's now-long forgotten #9 hit "Friends".
* Eric B. & Rakim's "Paid in Full" is well-liked in its original form, but Coldcut's "Seven Minutes of Madness" remix is probably the best known version of the song as it became a dance hit overseas, and its sample-heavy style was influential for a wide range of genres.
* Eric Bischoff and had been dying it for many years. Now that he was in his mid-forties, he was ready to embrace his natural gray hair. He went through the same scenario again in his 2002-2005 WWE run, as Vince McMahon personally requested

Bischoff to dye his hair black again upon being hired and it was shaved on-screen once more towards the end of Bischoff's run.
* Eric Bischoff booked the controversial Starrcade 1997 finish. Sting showed up on the day of the event pale, out of shape and unenthusiastic (Sting was struggling with substance abuse and marital problems unbeknownst to Bischoff at that time) and Bischoff panicked. He shortened the match and changed the finish a few hours before showtime. Bischoff is adamant that Hogan lobbied for the original finish to put Sting over clean because of the year-plus that had been put into the build. As for the pacing of the count, Nick Patrick said he simply forgot about the change to the match and counted regularly.
* Eric Bischoff. He reverted to his natural color in 1999, re-dyed it in 2002 at Vince McMahon's request, then went back to gray and stayed that way.
* Eric Bischoff (invaders) and Heartland Wrestling Association (talent developmental) in its place.
* Eric Bischoff, just not enough to get over their difficulties in working together.
* Eric Bischoff, one of the few to spot Bischoff, summed it up by saying, "Tell me I didn't just see that".
* Eric Bischoff stated that he'd drawn heavily on WarGames to create the match concept.
* Eric Bischoff that Bischoff would tell the announcers to call the matches as if they were "shoots" (real.) Heenan said that they'd never seen a shoot and wouldn't recognize one if they saw one.
* Eric Bischoff the face by default, so he has no real motivation to be nice to anyone other than perhaps to save his own skin. Otherwise he's just stringing you along, don't listen.
* Eric Bischoff to the know-nothing corporate suits at Turner, as opposed to his predecessor, the reactionary, bullying dinosaur Cowboy Bill Watts.
* Eric Bischoff was being put on trial to see if he could remain RAW GM. "The Masterpiece" Chris Masters was called in to testify on behalf of Bischoff, but Vince was able to discredit his testimony by proving he committed perjury, as his name isn't really Chris Masters, but Chris Mordetzky. This was quickly forgotten and his real last name was never mentioned on TV again.
* Eric Bischoff were running roughshod over WCW, they still had to answer to "Ted Turner", who frequently came down hard on them.
* Eric Bischoff, who stacks a multi-jurisdiction task force with hand-selected cops who he knows are on the take.
* Eric Bloodaxe's Interlude quest reveals that his wife, witch-queen Gunnhildr, is actively scrying on him from the Throne of Heroes, and quite unhappy that the player summoned
* Eric Bogle's "Introduction Song", the members of the band's nicknames are 'Wee Short-Arse' (Eric), 'Garbage Guts' (Brent) and 'Old Dogs Balls' (Andy).
* Eric Bogle's song "Nobody's Moggie Now" contains the lyric "Decapitating tweety birds, and masticating mice". On one live recording, Eric sings "masturbating" instead of "masticating". It takes more than a minute before the band and the audience are ready for the song to continue.
* Eric Bogle) Tony Miles wrote a pastiche of "And the Band Played 'And the Band Played "Waltzing Matilda"'", about a folkie who tours Australia and finds that, wherever he goes, all anyone can talk about is the bloody Bogle song. Apparently he wrote this after he happened to go on tour two weeks after Eric and hit most of the same venues.
* Eric Bogle, which is based on Bogle saying goodbye to his mother at the train station as he left to emigrate to Australia.
* Eric Bruntlett hit a World Series-clinching win for the Philadelphia Phillies in 2008, and performed only the 15th unassisted triple play in history in 2009 at 31 years old. A year later, he was out of baseball entirely.
* Eric "Butterbean" Esch had little footwork and dodged basically nothing, but was tough enough a man broke his elbow against his face and Butterbean kept on trucking, and he had enough knockout power to instantly floor

* Eric Cantona's post-kung fu kick statement was "When the seagulls follow trawler
* Eric Cantona took direct retribution on a fan who was heckling him during the 1994-1995 season. Cantona famously leapt into the crowd and delivered a roundhouse kick to the chest; he was banned from all football for a year and faced a criminal investigation. Man U fans still sing about this when playing Crystal Palace.
* Eric Carmen, the lead singer of 70s power poppers The Raspberries, pursued a solo career that lasted until the 1980s.
* Eric Cartman. And probably, one of the most sadistic moments in the entire series was in the ending of "Scott Tenorman Must Die".
* Eric Cartman can be quite clueless over certain things, but is also a completely
* Eric Cartman constantly makes fun of gingers, even after finding out his father was one, therefore making him half-ginger.
* Eric Cartman in general, but especially as The Coon in the Coon Trilogy, where he will maim anyone for his gain (including harming a small child for liking Mint Berry Crunch better than him) and rationalize it as a heroic action.
* Eric Cartman in the "Coon & Friends" trilogy where the two proceed to destroy everything the former doesn't like.
* Eric Cartman once posed as a teacher for a bunch of hooligan teens. Instead of teaching them all that normal stuff, he taught them to cheat at tests.
* Eric Cartman once tried to bulk up with Weight Gain 4000, thinking it would make him more muscular. He just ends up getting fatter still, until he is a thousand-pound blob of immobile fat being interviewed by Geraldo Rivera.
* Eric Cartman raising his hand. Principal Victoria rather understandably tries to scout out another student, but Cartman remains the only willing volunteer, so unfortunately she has no choice but to enlist him.
* Eric Cartman relishes on the trope whenever he isn't extracting revenge. He will go to any lengths to piss people off or make someone miserable as long as it amuses him, especially if that person is Kyle.
* Eric Cartman serves as this for Season 21. His relationship with Heidi Turner is this season biggest plot driver where he emotionally abuses her and manipulates her into staying with him. This causes Heidi to become Cartman's
* Eric Cartman. Usually a sign that he's taking a giant leap over the
* Eric Cartman. When he is on the good side he'll still insult and suggest violent methods. He seems to be the default leader of the fourth grade boys in the case of a crisis, e.g. "Make Love Not Warcraft", "Marjorine", "The List". That said, his
* Eric Church's "Kill a Word" was originally a solo song with Rhiannon Giddens singing backing vocals. However, the remix had her sing most of the second verse by herself, and this is the version that became more familiar to listeners.
* Eric Church to his fan club with no advance warning to anyone that he was working on a new album.
* Eric Clapton did just that back in the Blues Breakers in 1966, he ended up inventing modern rock guitar as we know it.
* Eric Clapton, he briefly shacked up with Pattie's sister Paula. Paula ditched him, however, upon realizing that she was just a Pattie substitute.
* Eric Clapton himself counts. At the time Cream was together, Jack Bruce was probably the best known member. Nowadays, however, Bruce is best known as "that guy who was in Cream", while Clapton is a household name.
* Eric Clapton's famous little acoustic tune "Change the World" is awesome. It's also a Wynonna Judd cover.
* Eric Clapton's then-wife Patti Boyd, who Clapton was infatuated with. They later got together, though the relationship didn't last.
* Eric Clapton's wife Pattie Boyd... except that it's averted since Clapton did eventually end up marrying her.
* Eric Clapton's "Wonderful Tonight" (actually his then-wife, and muse, Pattie Boyd).
* Eric Clapton to legendary status; neither model were known as high sellers at the time. The Les Paul had been discontinued for years when Clapton and his peers started using it. Not only did Gibson bring it back to great success, it also drove up the prices of the original 1950s models to insane levels. A 1959 Les Paul

Standard is the most expensive guitar in the world, all thanks to Clapton. Sales of high-wattage Marshall amplifiers also increased, along with effects boxes like wah-wah pedals, distortion boxes and phase shifters.
* Eric Clapton with Marley; thus, it can't beat "Tears in Heaven" (#2), "Wonderful Tonight" (#16), or "Layla" with Derek & The Dominos (#10) as his signature.
* Eric Close, as did his co-star Marianne Jean-Baptiste (Vivian Johnson).
* Eric, Count von Stenbock, is marred by his having made the villain of the piece a "certain Portuguese Jew" called Mendes. He's not only a slick, greedy bastard, but Stenbock drops a couple of hints that he's after more from the little girl than her albatross egg.
* Eric did it once or twice as well, most notably in the graduation episode when he was trying to persuade Mr. Feeny not to retire.
* Eric did this to Marnie's companion Roy in Episode 4x11 who attempts a: "You'll have to
* Eric Dolphy: Gifted multi-instrumentalist, playing alto sax, flute and bass clarinet with equal facility. Influenced by hard bop, free jazz and also 20th century classical music such as Bartok and Stravinsky; played with Mingus and Coltrane and was equally at home with both. His style was notable for its use of wide intervals; he used to listen to birdsong and try to imitate it. Beloved by everyone who worked with him, apparently. Died young of an undiagnosed diabetic condition after collapsing onstage in Germany.
* Eric Dolphy: Influential jazz musician who started a solo career in 1960, released five albums, and then died in 1964 of an insulin shock after being in a diabetic coma.
* Eric Dragomir, the dead father of Lissa and Andre, is fleshed out a bit. He grew depressed at realizing his family was dying out
* Eric empire, Quetzovercoatl, the Feathered Boa. Half-man, half-chicken, half-jaguar, half-serpent, half-scorpion and half-mad (a total of three homicidal maniacs).
* Eric, except that they don't need to stretch very far to make Eric's wishes backfire.
* Eric Flint, and humans are only capable of digesting regurgitated "childfood" (partially digested vegetation) produced by the maia (a larger, less-evolved sophont than the gukuy).
* Eric Flint books, Virginia Shaw, adopts a chainsaw as her personal weapon.
* Eric Flint editors. But within that framework, Flint actually kind of likes seeing what the fans come up with.
* Eric Flint series, but in this case the future is brought back to the past. The up-timers (who came from West Virginia USA approximately 2000) are brought back to the middle of Germany in 1632, and every down-timer who meets them comments on their health, their lack of pox marks and scars from childhood diseases, the percentage of children who survive to adult-hood, and mostly their amazingly healthy teeth. The up-timers attempt to implement some public health measures and supply antibiotics to help with all of these. It helps somewhat, but some up-timers still fall ill with the plague and other down-time diseases.
* Eric Flint series favors a whip in combat. It's not very deadly, but combined with the right words, can be terribly demoralizing.
* Eric Flint-verse is a "shared universe" open to anyone who wants in. In other words, any fan of the series can write their own contributions to it and have them entered into canon if they pass muster with a review board for the series. Flint and his co-writers then tend to take characters introduced in these stories and work them into the main series. Thankfully, the short stories that have the most impact on the main story have been collected into their own "Ring of Fire" anthologies.
* Eric. (France, we are told, simply had fast food executives shot on sight.)
* Eric Frank Russell") being sent to Sirian worlds to start sabotage and information wars to disorganize the planets before the Terran fleet arrives to invade.
* Eric Frank Russell do - nothing at all. But the aliens that keep our creative

hero prisoner don't know. He finally even manages to end a space war by his bluff.
* Eric Frank Russell, "faplap" and "enk" in "Next to Kin" (AKA "The Space Willies" AKA "Plus X"), some all-purpose insult for (alien) people.
* Eric Frank Russell is practically only known for his humoristic SF, but if you look closely into his oeuvre, you find the one or other crime novel.
* Eric Frank Russell, is sent down alone to an alien planet to stir up as much trouble as he possibly can.
* Eric Frank Russell is that the dull, dreary legwork gives us more opportunities for Eureka moments. Without all the investigation of the bizarre bank thefts, the police commissioner would not have been able to connect them with Harasha Vanash's UFO.
* Eric Frank Russell) organization called Dirac Angestun Gesept (Sirian Freedom Party). He also proceeds to hire contract killers to take out Kaitampi officials.
* Eric Frank Russell's "And Then There Were None": interstellar travel is so prohibitively expensive that a would-be pirate has to become a millionaire first.
* Eric Frank Russell short story "Displaced Person" implies that God Himself may be an example of this trope.
* Eric gets around the invitation to Sookie's house by buying her house
* Eric gets called "Foreskin" from time to time (his last name is Foreman). In one episode, it's revealed that
* Eric Harris and Dylan Klebold was to get immortalized by the media for their crimes. It worked well enough that it got them an entire page on this very wiki.
* Eric has a lengthy digression about the British habit of attempting to mimic an American product exactly, only without the one thing that made the American version worthwhile, such as slow fast food, and hotels that sacrifice atmosphere for efficiency, without the efficiency.
* Eric has the Aztec-flavoured god Quezovercoatl, who is described as "half-man, half-chicken, half-jaguar, half-serpent, half-scorpion and half-mad", making "a wossname total of three homicidal maniacs".
* Eric have never bothered much about judging the souls of the dead, and so people only go to hell if they believe, in their deepest heart, that they deserve to go. Which they won't do if they don't know about it. This explains why it is important to shoot missionaries on sight."
* Eric having the last name Montgomery. He must just look it. This concept is so established in
* Erich Hartmann, history's highest-scoring fighter ace, had a stylized flower, a black tulip, on the nose of his
* Erich Honecker, the longest-ruling and most well known leader of East Germany, was quite possibly the most conservative of all East Bloc leaders, and his country was notorious for its all-pervading, soul-crushing bureaucracy. He even
* Eric himself, and he is a self-parody of Pratchett's own act of creation in writing the novels.
* Erich Maria Remarque was fond of this trope: many of his novels feature noble Russian immigrants who are usually friends of the protagonist. Notable examples include Boris Morozov from
* Erich von Daniken is famous for claims that the first human civilizations were created by aliens, similar to the
* Erich von Manstein's best strategist, devising the Fall of France and numerous battles on the Eastern Front.
* Erich von Stroheim aristocrats. Von Stroheim presumably wasn't a criminal, but he was a fake aristocrat, the son of a Viennese haberdasher. When he emigrated to America he added the aristocratic "von" to his name and made himself out to be an Austrian count.
* Erich von Stroheim, as "The Man You Love to Hate" was the nickname he earned for his silent-era villainy.
* Eric Idle can be seen biting down on his scythe to keep from laughing in that scene because John Cleese let a beat hang for longer than expected.
* Eric Idle group who doesn't speak in a shrill, high voice when imitating a woman.
* Eric Idle recalled going to Chapman's house for a writing session. Idle decided

that, this time, he was going to wait for Chapman to speak first. After about an hour of total silence, Chapman checked his watch, said he really must be going, and left.
* Eric Idle's character Berthold is an extreme super speedster. He wears heavy leg irons to stop himself from dashing all over the place.
* Eric Idle unnecessary bleeps for comedic effect. Some of the bleeped words seem like they might be perfectly innocent, while some others are just impossible to guess.
* Eric in a coup by the other demons, who are frustrated with his attempts to run Hell like a modern corporation, with boredom as its chief form of torture. The demons give him a "promotion" that ends with him alone in an office with absolutely nothing to do, and a callbox that doesn't reach anyone. He actually seems quite satisfied with this arrangement.
* Eric is a slightly more sympathetic example, although Rincerwind feels that spending your entire life searching for the Fountian of Youth is kind of missing the point.
* Eric is said to be this several times by Mr. Feeny. It's true that as time goes on he becomes a
* Eric is unique in that his personality dramatically changed and he had no memorabilia, friends or support network with which to piece together his former life.
* Eric is what ultimately made him realize that he has feelings for Kim.
* Eric Jacobuss, Walter finishes baking his pie and pours himself a glass of thoroughly spoiled milk before taking a sip and spraying said milk all over his new pie, ruining it (followed by attempting to wash his mouth out with the Tabasco in the fridge, and failing to get the glass right-side-up to get water to quench the hot sauce...), necessitating the convenience store trip that kicks off the plot. Why he didn't notice the smell...
* Erick Avari, an Indian who grew up in the Himalayan foothills, has played members of over 24 nationalities, including ancient Egyptian in both the original
* Erick Avari, in point of fact, says that he's "portrayed representatives of more than 24 different nationalities".
* Eric Kripke described her as an enthusiastic, innocent girl who takes a "girl-next-door" approach to hunting.
* Eric Kripke explained on that Season's DVD commentary that the storyline wasn't working and so had all the psychic kids killed off in a battle royale storyline at the end of Season 2.
* Eric Kripke, is either hailed as a God or as a Lying Liar That Lies Anti-Christ.
* Eric Kripke only intended the show to run for five seasons, which is why the fifth ends on what is, by all appearances, a
* Eric Kripke, the creator and original showrunner, released spoilers that Sam would have a new waitress
* Erick Rowan: In February 2011, Ruud signed a developmental contract with WWE and was assigned to their developmental territory Florida Championship Wrestling under the ring name Erick Rowan, where he debuted as a member of the Wyatt Family.
* Erick Rowan Music Video Raven's Flight, Crack The Sky and Mjolner, Hammer Of Thor.
* Eric Laneuville (Luther Hawkins) directed 19 episodes from Season Two onwards.
* Eric Massa. "Do you know how awkward it is to have a political argument with a naked man?" Massa (a US congressional representative) and Rahm Emanuel (then White House Chief of Staff) were in the showers at the gym at the time, so the nakedness was expected, but this combined with it being Rahm Emanuel no doubt made it awkward.
* Eric met his defeat when Rufus bit him in the ankle, causing his syntho-gel to leak.
* Eric mocks the tale of Argos, saying what killed the dog was holding his master's slippers in his mouth for twenty years nonstop.
* Eric Morecambe also had a heart attack during a stage performance in 1984 and died the following day. In that stage show, ironically enough, he joked about the

death of Tommy Cooper (whose death recounted above happened a month prior) and how he'd "hate to die like that".
* Eric Morecambe, at one time half of the most famous comedy double act in Britain, used to get by in public by taking his trademark glasses off and affecting a limp. His son has stated that this worked so well he wouldn't even get recognized by people sitting next to him on trains or planes.
* Eric Morecambe, which are set in a parody Überwald environment.
* Eric Northman and Pam Beaufort are (probably) a platonic version. Eric, in turn, cared deeply for his maker, Godric... very deeply. This gets
* Eric O'Grady, the third Ant-Man, would later use his shrinking to spy on two women, ON DIFFERENT OCCASIONS, showering. Unintended versions of this have also popped up with him ending up in the second
* Erico's fanverse for Mega Man features Doctor James Cain of the Maverick Hunters, who the troops revere as a father. For some, such as X and Zero, he's the closest thing to a real father figure they have.
* Erico the Superbard's fanfics have his original characters making use of small, handheld teleport units to dispose of nukes and other hazardous material, by teleporting them close to the sun, where they'd be drawn in.
* Eric "Otter" Stratton has his room this way, which is humorous both for being the only non-messy place in the house and for being so obviously a "bachelor pad" of this type.
* Eric Prydz has also had success with this tactic, creating less mainstream material under the label Pryda and techno under the label Cirez D.
* Eric Raymond, The Misfits' manager, doubly so. The guy (and his proteges by proxy) can get away with pretty much anything because he's rich. His catchphrase?
* Eric receives two of these: The Spirit and Its Power for general spirit powers and Introduction to Magecraft, which is
* Eric R. England, another Vietnam sniper with 98 confirmed kills, was described by the above-mentioned Hathcock, as "a great man, a great shooter, and a great Marine."
* Eric Roberts being among the names thrown around. Eventually, Fox agreed to cast McGann under the condition that a name actor play the Master instead.
* Eric Roberts series. The film itself even treats him like a celebrity by playing a fancy cue when he's introduced.
* Eric Rudolph is a member of this group and gets arrested in 2014 for bombing a tech business.
* Eric Sacks. It allows him to go head-to-head with the Turtles, sports several retractable blades per arm, and the blades can even be launched out as projectiles and drawn back with magnets.
* Eric Saward's favourite monster was the Cybermen, an affection that some fans (and
* Eric's civilian boss on Threa wore one of these to his commerical energy company because he still thinks he's in the military.
* Eric's sister Laurie starts off as the favorite, but as the series progresses Red begins to see the strong character in Eric while becoming more and more disappointed in how the promiscuous Laurie turned out.
* Eric Stoltz as Eddie Carson in "Under Pressure", "Entrapment" and "All About Eve".
* Eric's Vista Cruiser, Kelso's Volkswagen Samba Bus, and Red's Chevy Corvette from
* Erics World with the image of a pipe wrench, rather than a bat) to call a plumber, who arrives less than ten seconds later.
* Eric the Cavalier from D&D, Wheeler from Captain Planet, or Judd Nelson from The Breakfast Club. Those characters annoy everyone on their team equally instead of just having a rivalry or grudge against one specific person on the team.
* Eric, the description of the demon guarding the gates of Hell says "it would be a lazy use of language to say that the thing that answered the door was a nightmare. Nightmares are usually rather daft things and it's very hard to explain to a listener what was so dreadful about your socks coming alive or giant carrots

jumping out of hedgerows. This thing was the kind of terrifying thing that could only be created by someone sitting down and thinking horrible thoughts very clearly."
* Eric the Hedgehog's character basically revolves around this trope, and his Super form takes it
* Eric the Penguin birthday card had Eric in a coffee shop with a menu listing various expensive drinks, and a sign saying "Free wi-fi". So he tries to order "a free wiffy".
* Eric the Unready featured a magical banana which could be summoned out of any body of water by speaking a magic word.
* Eric the Unready, the titular protagonist manages to set off one of these during a banquet, burning down the entire building.
* Eric the Unready, you officially start on your heroic adventure by being the only one able to draw the legendary banana out of a stone.
* Eric the victims. The newest demon king attempts to turn the whole thing on its head by instituting new torture in the form of extreme boredom and pointlessness.
* Eric training consisted of 50+ years of fighting and not getting eaten by the various horrible creatures the Discworld has to offer).
* Eric vowed to protect his love interest, Annala, and while she initially needed it, he maintains this vow even after she becomes an
* Eric wears a wig to pose as a girl in a girls' gym class for a school radio program segment in the episode "The Last to Know". Rachel, who takes Eric to the girls' gym class teacher, introduces Eric as "Eric... a. Erica!", in order to keep the masquerade going. The gym teacher lets Eric in without question.
* Eric, when Eric is about to let slip that they were the ones who let the Ephebian army into Tsort.
* Eric, when the besieging army builds a wooden horse, and when the defenders are all gathered around it waiting for it to open, they sneak in through the back door.
* Eric, when the Odysseus-inspired character of Lavaeolus uses the Tsortean Horse for this purpose. The Tsorteans take in the big wooden horse, see that it's full of air holes, and surround it with spearmen. Then Lavaeolus' small, elite squad sneak in through the secret entrance, which they know about because they got the janitor drunk.
* Eric, where Eric has typical adolescent male fantasies of all-female kingdoms in the jungle who regularly kidnap men and make them live with them for certain services only men can provide until they die of exhaustion. However, these "certain services" are more along the lines of mowing lawns, changing lightbulbs, killing spiders and sorting out strange noises in the attic.
* Eric, where Hell's new punishments include, instead of being forced to push a boulder up a hill, being forced to listen to all the safety regulations for manhandling large objects. Neither the sinner nor the demon are happy about this.
* Eric, where the inscription has been crossed out in favor of "You Don't Have To Be Damned To Work Here, But It Helps!!!"
* Eric which ends by saying that three wishes provided a happy ending for most of the people they've affected and giving as examples the Tezumen, who continue to slaughter people but no longer do so because of religion so they don't need to get up so early; the Tsorteans and Ephebians, whose war is over, allowing them to prepare for the next one; the demons and damned souls, who get back to inflicting/experiencing material punishment on immaterial spirit in the knowledge that at least it's not Astfgl's psychological torture; and Astfgl himself, who as Life President of Hell gets to spend his time writing policy statements entirely unaware that the rest of the demonic lowerarchy is completely ignoring him. What happened to our actual protagonists, we don't get told beyond "It could be worse". Lampshaded by the last two lines "And this too was happiness. Of a sort."
* Eric, which rings true, given Rincewind's life for years on end consisted of running from one danger into another all over the world (Lavaeolus is also faux-Greek for “rinse wind”).
* Eric, who hasn't had an education, but simply spent the last forty years fighting people and monsters.

* Eric XIV of Sweden (reigned 1560-1568) managed to upset large parts of the Swedish nobility, including his own brothers, during his reign because of his sometimes violent insanity and paranoia. His decision to marry his mistress Karin Månsdotter, the daughter of a common jailkeeper, became the final straw that made it possible for his brothers and other political opponents to dethrone him.
* Eric Young and ODB, especially since the former used to be a poster girl for
* Eric Young (played with during the final months of the stable's existence)
* Eridan also appears to have quite an extensive vocabulary and is not hesitant to show it.
* Eridan also shows Narcissistic tendencies — for example, his feelings of
* Eridan also was this. He's in a moirallegiance with Feferi, and their dialogue implies that they've know each other for a long time. But their moirallegiance goes badly, and by the time Eridan's got up the courage to confess that his feelings for her are romantic, Feferi wants to break up with him and is too emotionally exhausted to consider a romantic relationship.
* Eridan Ampora falls under this. He already had very few friends before his breakup with Feferi, after which he becomes intolerable. After crossing the
* Eridan Ampora is practically the classic example. Being from a naturally bisexual species, his options are a bit more widely ranging than most. Doesn't do him any good, though - not only is he rejected every time he tries but by the time
* Eridan Ampora is similarly hated by the fandom due to his creepy, desperate attitude towards Feferi, his
* Eridan Ampora was introduced as a genocidal racist. Then, it was shown that he was an
* Eridan continues trying to go after Feferi even after she rejects him and starts a relationship with Sollux.
* Eridan cut in half. Bam, plot points to half of the trolls have been revealed right there.
* Eridan has actually never said "Nyeh!" in canon. It originated in an OctoPimp video (Thrown in because he couldn't think of anything better), and now you can frequently find fanart of him saying that.
* Eridan lives in a world which canonically contains ghosts, telekinesis, clairvoyance, psychic mind control, dragons, telepathy, time-travelling demons, trolls who spontaneously sprout butterfly wings enabling them to fly,
* Eridan, pre-flipout. It says something about him that even Kanaya and Equius can't stand him and Feferi actively resigns from being his
* Eridan's NPCs in the Land of Wrath and Angels were supposed to be unkillable, but Eridan believes they were enemies — despite, as Karkat observes, the fact that they don't drop loot like actual enemies — and somehow manages to kill them all through sheer determination. Sheer determination and
* Erigor can create a wall of wind that can trap enemies and even make an armor out of the wind.
* Erigor's wind magic, which is supposed to shred him to ribbons. It doesn't even scratch his clothes.
* Erika and the Princes in Distress Prince Aurel with a terrible breath, which causes most people to faint on the spot if they get too close.
* Erika and the Princes in Distress : Queen Lagertha only accepts challenges from people she sees as worthy to face her. For this reason, she does not allow for men to challenge her, and also refuses to duel Erika for the throne. Citizens of the Kingdom of Brutes seem to share this ideal, as one woman seen early in the comic implies that pretenders to the throne would much rather access it by defeating Lagertha than Erika, because lowering themselves to duel the latter would be humiliating.
* Erika and the Princes in Distress. Somewhat subverted however, when Pita then pats the back of Erika's head, and she actually cowers and lets out a cry of pain.
* Erika and the Princes in Distress : The story is divided in arcs that each focus on a specific Prince, and take place in their respective kingdom.
* Erika and the Princes in Distress when she goes as far as to kiss, pounce on, or tear the clothes of men unprovoked, and actually gets called out on that attitude

by Irvine, who berates her for disregarding his friend's physical boundaries.
* Erika does this to prevent the secret from being discovered, with disastrous consequences.
* Erika favors the Oddish family, particularly Vileplume. Quiet and unassuming like Erika herself, they can lash out with poison and energy-draining techniques at the slightest provocation.
* Erika Furudo, introduced later in the series, definitely comes off like this because of her obsessive behavior and egomania. It says something when the Ushiromiyas, who themselves are a major case of
* Erika Furudo is not only unfazed, but actually excited by the murders occurring, partly because she "knows" that wherever a detective like her goes, a murder occurs. Needless to say, when questioning witnesses, she doesn't bother with delicacy.
* Erika Hammerschmidt, was diagnosed with Asperger Syndrome at the age of 11.
* Erika Karisawa has no problem with telling her friends that she fantasizes about them having gay sex.
* Erika Karisawa, who happily and loudly ships pretty much any two men that so much as breathe on each other (including her friends. Kadota is not amused at finding out he's among her yaoibait). It doesn't help that she tends to
* Erika, Lorelei... is one as well, since the Mykene grafted their brains in robotic bodies to survive underground, but it is harder to say with her.
* Erik and Raven. When she's holding a spike to his throat, he just quips, "It's been a while since we were this close." There is also a hint when Charles asks Erik for the second time, "How is she [Raven]?", and Charles' facial expression when he hears the answer reads, "Oh, god, he has slept with my sister."
* Erika of Celadon City. She's an excellent gym leader, the head of one of the largest department store chains in the world, and a major player in Kanto politics. And she carries a lot of respect in all three fields.
* Erika's anime portrayal was one of the least liked Gym Leaders in the series run, while the Reset version is depicted as a lot more likable and competent, though she had to partially recover in-fic as well for a somewhat controversial debut appearance.
* Erika the Radical, Erika is understandably miffed about all of this.
* Erika the Radical her off the hijacked Saint-Chamond tank for her treachery.
* Erika used The Glomp with Kouji in episode 63, much to Sayaka's jealous wrath.
* Erik Danielsson of Watain. Watch or read any interview of his. The "wtf?" creeps in when you realize he's not kidding about anything he says.
* Erik Gates, a rocketry expert and honorary MythBuster, died unexpectedly in late 2009. The episode that aired the next week had an "In Memory" graphic at the end of the credits.
* Erik hardly ever takes his shades off, even during sex, and definitely has a cool image. It's possible that he works at this consciously, with the shades as a prop; his cool does crack a little occasionally.
* Erik has this issue when he first enrolls at his new school, which is aimed at students with mental health problems. Erik can't help but wonder "what's wrong" with Ela, the first student he meets. Even ignoring mental problems, Erik has a hard time ignoring the fact that Katja has an eyepatch on her right eye and that Lena wears a metal mask.
* Erik is pretty much the perfect boyfriend to Zoey for the first three books. Then he suddenly turns out to be a possessive jerk in later books, thus justifying Zoey's displays of interest in other boys. Though considering that Zoey wasn't exactly a faithful girlfriend to him, his new attitude toward her might be somewhat justified. In addition, he exhibited a surprisingly cold, condescending, and sometimes insulting behavior towards his ex-girlfriend Aphrodite, which everyone overlooked because they saw her as a borderline
* Erik Killmonger version of the Panther suit, even though Killmonger's coup is a key second act plot point that was deliberately kept out of the initial trailer and promos.
* Erik Lehnsherr ditches his civilian clothing, reasserts his Magneto identity,

and is gifted with red
* Erik Lehnsherr serves this role to Charles Xavier for much of the film. They specifically fulfill the
* Erik of Internet Comment Etiquette has become well known over the years for his sophisticated and well written ad segments. In his lesson "Jump Scares"
* Erik Per Sullivan actually knows how to play the piano and was able to work it into the series.
* Erik Satie and Camille St. Saëns, two composers he personally loathed.
* Erik Satie: Hailed as one of the great innovators of classical music, yet apart from "Trois Gymnopédies", which can be heard on soundtracks once in a while, his music isn't that well known to the general public.
* Erik Satie was seen as a musical lightweight who composed silly little tunes with often comedic titles and littered his scores with sarcastic remarks. His legacy as a historically important musical innovator only came decades later after his death.
* Erik Satie wrote a piece called "Vexations", which consists of two faintly unsettling bars of music that would otherwise be unremarkable save for the instructions to repeat it 840 times, which takes at least 24 uninterrupted hours to perform. When Australian pianist Peter Evans tried to perform it as instructed in 1970, he reported that he started panicking and hallucinating before he had to stop. He was at repetition number 595.
* Erik's coworkers are visibly distressed at the sight of Apocalypse.
* Erik Segersäll who fought his nephew and the Jomsvikings at the battle of Fyrisvall, his son Olof Skötkonung who led the Swedish fleet at the battle of Svolder, Magnus Eriksson who led a crusade into Russia, etc.
* Erik "The Lizardman" Sprague is a sideshow performer who has modified himself to resemble a lizard, including a bifurcated tongue. Actually a more-common-than-you'd-think form of body modification; it's done by gradually splitting the tongue with a razor-sharp blade after a procedure similar to a normal tongue piercing. Given time, the split tongue muscles adapt and you can wiggle the two halves
* Erik the Viking also has a slave galley (chasing the heroes' boat). Here the brutal first mate is Japanese (with silly subtitles).
* Erik the Viking, Erik makes a dramatic speech about the quest he and his men are going on, mentioning the dangers they might face. He only succeeds in making the families of his crew start mourning their deaths before they even clear the dock.
* Erik the Viking, Halfdan the Black got his nickname from being evil.
* Erik the Viking is a comedy in a historical setting, directed by Terry Jones and also features him and John Cleese in a cameo role. Despite all that it has nothing to do with Monty Python at all.
* Erik the Viking is one comedic example. His father is also a berserker and lectures him on berserking. He goes into a rage over every little thing, which leaves him with insufficient pent-up rage when he actually needs it.
* Erik the Viking see it, because he doesn't believe in it (he is a Christian, after all), but it certainly causes a great deal of frustration with his crewmates. Turns out to be a plot device when the Missionary is the only one who can leave Valhalla to save them all, since he doesn't believe in it.
* Erik the Viking: The island of Hy-Brasil is sinking, and the people of the island insist that it is not. The king continues his denial even as the waters rise over his head and reduce his speech to bubbles.
* Erik the Viking, the title character, needing to borrow his girlfriend's invisibility cloak, scales the wall to her quarters using a pair of knives. Her first question upon his entering is why he didn't just use the stairs that were right next to the wall he climbed.
* Erik the Viking. This partially averts the usual "flat error" (that "back then everyone thought the world was flat"). The token Christian disbelieves in the edge of the world.
* Erik the Viking to bring them all back home while the other Vikings are trapped.
* Erik the Viking use swords. Thorfinn Skullsplitter prefers his trusty battle-axe.
* Erik the Viking, where Erik thoroughly botches it. "And... we may not die HORRIBLE deaths...")

* Erik the Viking" Where Erik uses grappling hooks to scale the tower where Prince Aud lives, only to have her ask, "Why didn't you take the stairs?"
* Erimem delivers one to unite the Musketeers and the Cardinal's Guards into a cohesive force to fight Buckingham's troops in
* Erina, Alice, Mimasaka, Akira, and to some extent Eishi is based around them learning to accept that for all their skills and special talents, they aren't untouchable.
* Erina Nakiri is probably the most obvious of them and is known as God's Tongue in the culinary world for her picky tastes and perfectionist attitude. Unfortunately, her arrogance is entirely warranted and further amplified by her just having
* Erin and Melan, she later reveals that he is like a brother to her.
* Erin Andrews, it has become for common for sideline and courtside reporters to be female.
* Erin Brockovich: "Goddamnit!" — Erin shortly after breaking her nail getting into the car, and shortly before getting T-boned.
* Erin Brockovich, he said that the film "lacks focus and energy, the character development is facile and thin."
* Erin Brockovich: "I may dress like a cheap table dancer / but give me a call if you think you've got cancer.."
* Erin Brockovich shows why most people have a NIMBY reaction: in the movie's case, toxic substances are leeching into the water supply.
* Erin Brockovich - Though it's a platonic love, this is exactly the relationship between Erin Brockovich and Ed Masry.
* Erin Cox. The police didn't take action because Cox, while committing a technical violation by going to the party site while underage, didn't drink any alcohol herself and was preventing a case of drunk driving which could've been fatal — in fact, the police came to Cox's defense, just like many in the public who heard about the situation.
* Erin Dies Alone before activating the sprinklers above a villain made of water-soluble crystal, Rad tries to make up for it afterward.
* Erin Esurance ads took place in a baseball game. A song about saving money with Esurance to the tune of "Take Me Out to the Ball Game" even plays in it!
* Erin Esurance, the female agent in the pre-2010 Esurance commercials, frequently sported one.
* Erin Esurance, when they realized that the majority of search engine results for "Esurance" were fetishistic artwork starring Erin rather than anything having to do with car insurance.
* Erin Gilbert to Peter Venkman. Like Venkman, she's initially the least enthused about busting ghosts, and joins the team after losing her university teaching gig. But where Venkman was a self-centered, slovenly,
* E-Ring is named Miguel Carrera. Not even Mikel Korrika." Four years later, an ETA leader named Miguel Carrera was arrested in France for the murder of a Gendarme.
* E-Ring to anyone familiar with the history of terrorism in Spain, but it corrects three errors from the original version:
* E-Ring to compare its files with the record of the kidnapper's voice he has. This leads to the obvious question of why on Earth would a government keep a voice database of all its citizens if it had no way of consulting it.
* Erin Hunter do not. As a result, the various series can differ in style:
* Erin Hunter for her series'. However, most are commonly known by their title plus the species the work is themed around (including on this Wiki) for convenience's sake:
* Erin Hunter has an entirely new team and isn't connected to any of the people responsible for the other two series.
* Erin Hunter.) It's characterized by being in all capital letters, with the first and last letter a larger size than the others, and long tails trailing from letters like R and A.
* Erin Hunter series, often jokes that she likes doomed romance. And apparently this is true:

* Erin Hunter the aforementioned series — and has the most content released annually.
* Erin Hunter, under the same pen name, around the same time that Vicky stepped down due to her health, and since then a multiple-person "story team" has been behind all of the Erin Hunter books (with at least 5 individual authors to turn the detailed storylines into full books).
* Erin Hunter (Victoria Holmes, Kate Cary, Cherith Baldry, Tui Sutherland, Gillian Philip, Inbali Iserles, and Erica Sussman).
* Erin is an assistant district attorney prosecuting major cases and working closely with the District Attorney.
* Erin: It's implied in the last scene that Elin and Ialu are married with a child.
* Erin Moran (Joanie) and Donny Most (Ralph) are mysteriously absent in the season 6 episode "Chachi's Incredo-Wax".
* Erin Morgenstern, Bailey draws the Knight of Swords, showing a knight charging, sword drawn.
* Erin Morgenstern, Mr. A. H— casts no shadow. Noticing this nearly drives Chandresh mad.
* Erin Morgenstern, when Mr. A. H— speaks of how Marco and Celia are clearly besotted, Hector Bowen tells him he should have been a matchmaker.
* Erin Pizzey, age 76. Created the first battered women's shelter, Chiswick Women's Aid, in London. Worked with what she called "violence-prone women" who grew up in violence and conflict and came to accept it as normal to teach them that there was a better way than violence and conflict. Tried to do the same for men (she failed due to not receiving any funding), received death threat, bomb threats, had her family dog shot, but none of these prevented her from speaking about violence-prone people and how to actually solve domestic violence which mostly involves dysfunctional people with broken childhoods who revert to the only way of handling relationships they know if they aren't taught a healthier way.
* ER) insist that they have never and would never harbor improper thoughts about an attractive male patient.
* Erin Strauss' witch hunt of Hotch and Gideon in Season Two shouldn't sit well with her superiors, as well as her rather comical mishandling of the crime scenes at the beginning of Season Three, but she still keeps her job.
* ER in the final episode of her arc by walking into a store, demanding a job, trying to steal an expensive scarf and eventually running through a glass window. When she's brought to the hospital for treatment, she repeats the "running and screaming" bit from before. Even worse, Abby's detached attitude throughout the entire segment indicates that this is the umpteenth time she's had to deal with incidents like this.
* ER. In the seventh season episode "Thy Will Be Done," Carter and Abby share one when Abby accompanies Carter to his grandparents' charity ball. The two were established friends by that point, but if the dance wasn't the turning point for both of them, it noticeably was for Carter...
* Erinyes also appear on the devil's side, but have lost this angle, instead adhering to their mythological inspiration as pursuers of vengeance and bloody justice. The bestiary specifically notes that they lack the subtlety and patience to be seducers. The first "Book of the Damned" notes that they detest mortals and the closest they come to such intimacies is letting those beguiled by their beauty approach before attacking them.
* Erinyes are rank 9. Hell's furies that bring vengeance and punishment. As fallen angels, they occupy a strange position in the hierarchy.
* Erio and Caro have alternated in carrying each other bridal style in both the series and promotional material.
* Erio being stopped by a police officer after kissing Caro in public.
* Eripoyo. The characteristic she's most known, however, is the genuine love she has for her favorite idol and the great lengths she'll go to in order to make Maina happy and number one in her group.
* Eris/Discordia follows this to a lesser degree: The Greeks portrayed Eris as just a spiteful bitch who makes people fight

* Eris, in turn, gave birth to Ponos (Toil), Lethe (Forgetfulness), Limos (Famine), Algos (Sorrow), Hysminai (Combats), Makhai (Battles), Phonoi (Murders), Androctasiai (Manslaughters), Neikea (Quarrels), Pseudologoi (Lies), Amphilogiai (Disputes), Dysnomia (Lawlessness), Ate (Ruination), and Horkos (Oaths).
* Eris is shown eating Hoss Delgado several times when she gets mad in "Chaos Theory", though she always uses her powers to spit him out/restore him afterwards.
* Erisolsprite does this during the Act 6 Part 5 opener. Jake English doesn't seem offended at all.
* Erisolsprite of the first order, to be a "friendly guide" despite the sprite in question emphasising how much he hates Jake in every other sentence.
* Eris tell a different story. The way she's animated certainly helps; her form is constantly moving and shifting, and she seems to be physically more 3-dimensional than the other characters, making her look generally otherworldly.
* Er Ist Wieder Da, Adolf Hitler himself comes back to life in the modern world and manages to become a media sensation despite not hiding in the slightest that he is literally Hitler. Everyone just assumes that he is a comedian whose shtick is that he never breaks character.
* Er Ist Wieder Da" ("He's Back" or "Look Who's Back"), none other than Adolf Hitler experiences 2011.
* Er Ist Wieder Da. In a way, this is much more terrifying than the bumbling idiot or screaming madman portrayals typically seen.
* Eritrea has women in all positions from combat to special forces and women make more than 30% of the military, and is capable of drafting women.
* ER: John's got a major crush on Abby, but she's with Luka; when they break up, she makes it understood that she wants to be with John, but he's already with Susan. There's also a bit of that with Ray and Neela later on.
* Er Kang also confesses his love for Zi Wei by telling her that his marriage prospects are not his own choices or even the choices of his parents, and that his marriage will be decided by emperor, and there is next to no chance that the emperor will allow him to marry Zi Wei when he doesn’t even know Zi Wei exists.
* ER, Kerry Weaver did increasingly underhanded and immoral things in order to advance her career.
* ER, Kerry Weaver tries to implement a code system for people's injuries and illnesses so that they don't have to be embarrassed by having the gory or gross details posted on the admission board. Unfortunately, everyone whines and complains and can't be bothered to learn the various codes, forcing the idea to be abandoned in less than a day.
* Erky Perky: "... so I said 'If you're doing that with my teeth, we should get married.'"
* Erky Perky, whenever the bugs get into the refrigerator. Fortunately, most of the characters have detachable tongues.
* Erle Stanley Gardner (1946). The fact that most of the intervening years had been occupied with World War 2 went some way to explaining why the characters had taken so long to get involved in another murder.
* ERLL had a luchador known as Alberto Dos Rios, a composite of El Patron Alberto's former
* Erl of Toulouse, a queen is saved by a champion after two knights falsely accuse her of infidelity for refusing their advances.
* ER. Luka gets his new girlfriend a job at the hospital. It's soon offhandedly mentioned that the petty cash is missing. Later, Abby mentions that she can't find her wallet. Later still, the desk clerk is looking for his PDA when he hears it chiming (he sets an alarm to remind him to take his medication) from the girl's purse. Sure enough, she has it, and everyone instantly realizes that she's responsible for everything else. She takes off, and in his futile efforts to find her, Luka learns that she was also stealing from the bar where she previously worked.
* Erma among many of the village inhabitants, including his family, this arrival brings any activity to a screeching halt and the lookout even sound an alarm via a

bell. But the real kicker, the man is only in a small form at the current, showcasing just how imposing he truly is.
* Erma Bombeck once wrote a joke about asking a gas station attendant directions on how to get to a baseball field. The guy starts into the complicated turn left turn right you've gone too far, only to have her say that they're already at the last landmark. The guy says that's cause she's here already, the baseball field is behind the station. What a wisenheimer.
* Erma Bombeck, where Erma writes about how her husband keeps switching the channels on the TV without asking:
* Erma. But when (some of) an episode is finally shown onscreen, it turns out to be surprisingly dark and violent.
* Erma girl with supernatural powers which she mostly uses for mischievous purposes, from hovering during jump rope to summoning an avalanche during a snowball fight.
* Erma had the ability to stop it. Erma smiles and nods at then returns to eating her lunch. The next scene has her friend pushing her to the area saying "that means you".
* Erma is never seen talking on panel. It's implied that she can talk but prefers acting things out or drawing pictures, and any time she's about to talk she's conveniently interrupted.
* Erma mother. They're shown to be a perfectly normal, loving family like any other.
* ER, Mark Greene gets beat up in the men's room by an unknown assailant. The last thing the guy does is break two of Mark's fingers.
* ER, Mark Greene's daughter Rachel starts her period unexpectedly while at Elizabeth Corday's apartment for Thanksgiving dinner. Elizabeth is reluctant to give her tampons given how young she is (ten and change) and tells Mark's father that one of them will have to stay with Rachel while the other goes down to the corner drug store to buy sanitary napkins. He quickly volunteers, but slips on the ice coming back, suffering a minor head wound and having to go to County (where Mark is working). He grumbles about the confusing variety while being stitched up.
* Erma she becomes so relieved that all she can do is hold unto Felicia and sob.
* Erma, the dog Siris, despite his small size, drags the babysitter Felicia when she takes him for a walk.
* Erma: This comic plays a lot of common horror movie themes for laughs.
* Erma to eat with the area where her mouth would be, though it's not shown how. She's never shown speaking, though it's unclear whether she can.
* Erma, which her playmates find and play dress-up with. Cut to the poor boy in girly clothes and makeup.
* Erma with a hugely stretchy, flexible neck. However, she can retract it to a normal length when she wants to pass for human.
* ER—that his character had previously had lousy relationships with two other black women, yet now had a functional one with the white Elizabeth. Sure enough, the following season, a black female doctor was brought on to be his love interest, despite them having zero chemistry (but very similar personalities).
* ER—the pregnancies still had to be concealed for some time, as the actresses in question were much further along than their characters were.
* Ermey in an overall more sedate style, but there's still enough hints at his DSN nature in there...
* Ermey, who instilled within him the drive of a drill instructor and inspired him to push his own recruits as hard as possible so they'll have a better chance of simply surviving once they graduate to full Lantern.
* Ermine Cape EffectFancy clothing is an easy way for us to tell which characters are royalty.
* Ermine Cape EffectFor royalty and nobility who choose to wear their regalia everywhere.
* Ermine Cape Effect: With royalty becoming less distant these days, this is largely becoming discredited, save for nations that still have absolute monarchies.
* ER, Morris attends his son's soccer match (via a sperm donation he made in

college). The boy's parents, having not been told that their son had tracked his biological father down, grow increasingly worried and suspicious about this stranger who is constantly calling out to the boy and cheering him on. When they exchange hugs after he scores a goal, the enraged mother physically attacks him. Only when poor Morris is being led away in handcuffs does the boy speak up and reveal who he is.
* Ernest Armand "Binder" Tinwhistle, a century-old minor talent mercenary, is also a pragmatic man when it comes to payments. He accepts money and nothing else. When protagonist Harry Dresden has to work with him, Harry tries to win his loyalty by hinting at some of the political factions Harry had connections to, but Binder retorts that favors from Fae Queens and the White Council might sound nice but both groups are schemers and would twist that "favor" into an action that puts Binder in their debt or not be that helpful in the end. He also
* Ernest Borgnine episodes prominently featuring Mermaid Man and Barnacle Boy.
* Ernest Borgnine. The film came out a year before his passing on July 8, 2012.
* Ernest carries a pair of mechanical folding wings that open up to provide him a bit of a glide during certain jumps of his. It's not on par with that of his fellow Aviant Benedict though and is more of a cosmetic animation than an actual glide.
* Ernest Cline gained a lot of acclaim and recognition for his first book
* Ernest Goes to Africa, Ernest tells the tribesmen a joke with the punchline "It's a knick-knack, Patty Black, give the frog a loan!" The actual joke is about a frog trying to get a bank loan using a miniature model of the Eiffel Tower as collateral.
* Ernest Goes to Camp and admits Sherman lied to get his hands on ownership of the camp to guarantee the camp's safety.
* Ernest Goes To Jail: Chuck sings "Ernest and Charlotte sitting in a tree..." when claiming that Ernest (who is Nash wearing Ernest's clothes but not his hat) is in love.
* Ernest Goes To Jail, Ernest replies: "Real men are not intimidated by physical threats against their personal selves, and, ironically, neither am I."
* Ernest Goes To Jail features several scenes not in the VHS or DVD releases, including a final scene before the credits where Ernest finally becomes a bank clerk...only to be magnetized again by an electric shock from his keyboard and chased from his desk by a filing cabinet.
* Ernest Goes To Jail is full of these types of machines. They're all even synchronized to Ernest's walking speed.
* Ernest Goes To Jail) is why he went to prison and got the chair in the first place.
* Ernest Goes To Jail looks exactly like his boss. He arranges for the jurors to visit the prison where the crime was committed, after which Nash knocks out Ernest and changes places. After that, Nash insists on finding his henchman innocent, keeping the henchman from getting his sentence upped to life, and then Nash walks out of the courthouse a free man, leaving Ernest in jail to serve out Nash's sentence (of death).
* Ernest Goes To Jail — and helps his boss hatch a plot to switch places with Ernest.
* Ernest Goes To Jail. There is actually mention of a higher court - but it's refused to hear Felix Nash's case, meaning that Ernest P. Worrell (who has been switched with Nash in jail) is going to the chair.
* Ernest Goes To School has to redo 12th grade to keep his job since the school board require all school employees to have a high school diploma.
* Ernest Hemingway as a mocking parody of the style used by Liverwright's favorite author.
* Ernest Hemingway, being among the last journalists to leave the country after covering the Battle of the Ebro, the last stand of the Republican forces.
* Ernest Hemingway, considering that the boy is young enough to not know.
* Ernest Hemingway), Greek, Russian, Mexican, Maltese, German, Hungarian. There was one Spanish actor too.
* Ernest Hemingway is concerned, you're a REMF, you're crazy, or you're dead. And

if you're not dead, you're going to be dead. Soon. Alone. In the rain.
* Ernest Hemingway poem by John Donne and touches on the idea thematically.
* Ernest Hemingway short story "Hills Like White Elephants" follows a couple talking at a train station, with the man attempting to convince the woman to have an abortion. The actual nature of the operation he's pressing, however, and the reason for it are conspicuously never mentioned.
* Ernest Hemingway's reply: "A bitch is a bitch is a bitch is a bitch." Roddy Woomble adds, "Gertrude Stein says, 'That's enough.'" (from the song "Roseability", by Idlewild)
* Ernest Hemingway's short story "Hills Like White Elephants" does not gloss over a single line of dialogue. Where another story might have said "They ordered drinks" and moved on, this one recounts every word spoken, with precisely the same level of detail used for the "important" part of the conversation.
* Ernest Hemingway. The protagonist suffers from a vaguely described wartime injury that leads to sexual dysfunction; the book is filled with Freudian imagery and oblique references to his sexual frustration.
* Ernest Hemingway was a renowned writer but had a miserable life. Traumatized by war, unable to stay in a romantic relationship, he eventually killed himself.
* Ernest Hemingway was the walking talking embodiment of this trope in his own lifetime. His works play this trope straight, subvert it or both.
* Ernest Hemingway. We only need to see the tip of the iceberg to know the rest of it is there.
* Ernestine Shepherd. In the Guinness Book of World Records as the oldest female bodybuilder at
* Ernest In The Army. Ernest had heard the euphemism about a bullet with your name on it and failed to realize it's not literal. He has one of these with his own name on it that he carries around with him, in the belief that it means he can't be shot.
* Ernest Moniz is the former U.S. Secretary of Energy and nuclear physicist
* Ernest movies has a scene where title character Ernest P. Worrell opens his closet to specifically show the viewer two dozen copies of his iconic blue-jeans vest outfit.
* Ernesto "Che" Guevara before surrendering afterwards with two loaded and primed pistols. Though to be fair, he did surrender only after taking two bullets, and his last remaining comrade fought to the end to protect him. Despite leading revolutionaries in Africa, Guevara was overheard disparaging his local African fellow travelers, stating that black people did not have the intelligence to make communism work, and placing Afro-Cubans in his command over the native Congolese.
* Ernesto Díaz Espinoza all of which are action / superhero films with numerous well-choreographed fight scenes.
* Ernesto died in 1942 when he was crushed by a falling bell at the conclusion of his song he murdered Hector for, "Remember Me", due to a stagehand leaning on the wrong lever.
* Ernesto is jealous of Miguel's talent and skill and does not want the boy to outshine them.
* Ernesto Miranda, the defendant who went all the way to the U.S. Supreme Court and won, ended up serving the exact same sentence. The Supreme Court ruled that, because he had not been made aware of his right to not answer questions, his confession was not admissible, and the prosecution wasn't allowed to bring it up. However, the Court didn't simply let Miranda
* Ernesto recognizes that Miguel should be allowed to follow his heart and play music. He is also not wrong in saying that achieving your dreams sometimes means sacrifice and making difficult choices.
* Ernest P. Worrell did commercials for regional banks involving this trope. While toasters weren't mentioned specifically, other appliances were featured such as a television and a Weber brand grill.
* Ernest P. Worrell got his start as a spokesman for practically everything under the sun.
* Ernest P. Worrell — 9 "Ernest" films have been made until the death of the

main actor.
* Ernest P. Worrell the part of a kindhearted simpleton and even at his technical best his creations tend to fail in comedic ways.
* Ernest Saves Christmas deals with this plot too, as Santa is looking for his successor to the job.
* Ernest Saves Christmas has led to them floating in space above Earth. Right after Ernest says, "Nobody moves, nobody dies," one of the elves sneezes, sending the sleigh falling back to Earth. (They survive.)
* Ernest Saves Christmas. Hell, the whole plot of the movie is that he's running out of time to pick a new Santa Claus because he literally loves doing good so much that he's stretched the clock as long as it will go just so he can continue doing it.
* Ernest Saves Christmas, Santa temporarily assigns Ernest his job as he's incarcerated after attempting to get a hold of the real guy who has been chosen to be the next Santa. Passing down the mantle is needed to "recharge" Santa's mystical capabilities, which gradually fade as someone carries it out for too long putting Christmas itself in jeopardy.
* Ernest Saves Christmas to make the switch and still prefers working with children but his career as an actor had taken a big hit and he felt this was the only way to start getting roles again.
* Ernest Scared Stupid after Ernest shows him the love and innocence of a child.
* Ernest Scared Stupid, but it flops when takes a moment to chuckle at his cleverness.
* Ernest Scared Stupid, Ernest manages to get himself stuck inside his garbage truck and compacted into a trash box.
* Ernest Scared Stupid gives us a Ham-to-Ham Combat between Jim Varney and Eartha Kitt.
* Ernest Scared Stupid has the titular character releasing a troll on Halloween.
* Ernest Scared Stupid: It takes Ernest 10 seconds of careful, calculated thinking before he realizes that his fingers have been slammed in the lid of a dumpster and that he should scream in pain.
* Ernest Scared Stupid, the troll Trantor's signature power is to turn kids into little wooden dolls that give him his power.
* Ernest Scared Stupid, trolls can be killed by milk (which represents "a mother's care"). When Trantor becomes more powerful, milk can't stop him. The only thing Ernest can do is to defeat him with "the heart of a child" — unconditional love — and hugging and dancing with him does the trick.
* Ernest Scared Stupid uses the horror variation, when a little girl checking for monsters under her bad finds a hideous troll in bed next to her when she finishes.
* Ernest Scared Stupid, what's scaring Ernest so much are a variety of trolls who, legend has it, are vulnerable to... milk.
* Ernest Scared Stupid, when garbage is falling out of Ernest's truck, you can clearly see a stage hand pushing the garbage out of the truck with a hammer.
* Ernest's ex, Helen Sharp (Goldie Hawn), has also taken the potion, and uses it to seduce him back. The rest of the plot has Madeline and Helen, two drop dead gorgeous women, fighting over poor over-the-hill Ernest.
* Ernest Shackleton's crew which had travelled to the opposite side of Antarctica were lost.)
* Ernest "The Cat" Miller. Debuted in 1997, stayed with WCW until the end in 2001, had small runs in WWAS and WWE.
* Ernie and Bert happen to fly their plane just above the truck in which Big Bird had gotten a ride.
* Ernie, a sleazy boss tries to get Doris to sleep with her, threatening to fire her if she doesn't go along. She beats him up and quits on her own. However, this was apparently not enough punishment for some people (the next strip is of the artist being chewed out by his wife and banished to the couch because the sleaze "got away with it"), so the boss is later on vacation and tries the hot tub... which is then occupied by several recently-conceiving mothers. Uh, yeah. If this seems a bit convoluted to you, you're not alone.

* Ernie Kovacs did a parody of this on one of his shows. A gangster is shown doing a St. Valentine's Day-like massacre, and then he stops what he's doing and does a commercial for Fluffy Slice bread, saying "it doesn't hardly have no air holes in it."
* Ernie Kovacs parodied this trope with a series of "more sex and violence" book covers, showing
* Ernie Kovacs was a critical and cult favorite but never had much in the way of mainstream success. He was rediscovered after his death and is now considered one of the founding fathers of TV comedy.
* Ernie Potts, the diminutive demolitions man, gets involved with his crush — a tall, full-figured (a.k.a. "Large and Lovely") model named Lola.
* Ernie's "Rubber Duckie" song ended up becoming a surprise novelty hit, reaching #16 one Billboard Hot 100 in September 1970.
* "Ernie, the Fastest Milkman in the West" plays the trope perfectly straight, but Ernie's rival Ted gets a
* Ernie, the giant chicken mascot (and combat enemy to Peter Griffin) in
* Ern Malley in an attempt to embarrass its founder Max Harris. Naturally, Harris fell for the hoax and devoted the next issue to Malley. When the con was revealed, he was humiliated and subsequently fined for publishing the poems on the grounds that they were obscene, and his magazine ceased publishing in 1946. While the hoax proved to be a major setback for the cause of Australian modernist literature, it was not long before the Ern Malley poems became celebrated as a successful example of surrealist poetry in their own right in spite of their well-known status as a forgery.
* er... Not Mikey?. Of course that one is a medical drama and most of the characters are medical personal. But the others are mostly nurses while "not Mikey" is a front line Corpsman.
* ER, not two seconds after a pizza delivery guy calls the hospital to inform them that he's been shot and is driving himself in, his car crashes through the front doors of the hospital.
* Ernst Jüngers Books Heliopolis, at the marble cliffs and eumeswil are set in a future which reverted to feudalism.
* Ernst Lubitsch. It's set in the town square, rather than a hallway, but very much fits the spirit of the trope otherwise.
* Ernst Lubitsch not being in the mood for movies that satirized militarism.
* Ernst Stavro Blofeld. Maybe. They act like it, but technically, Blofeld is Bunt's boss.
* Ernst Stavro Blofeld, the archnemesis of James Bond and leader of supercrime organisation SPECTRE, runs various illicit operations, plots terror attacks, and makes multiple attempts to start wars behind the scenes throughout his various incarnations.
* Ernst Thaelmann (which picks up seven years later with Fiete's release from prison) which might suggest an interfilm discretion shot.
* Ernst Thälmann: Führer Seiner Klasse is a notable case in that it's an East German film made in 1955, showing the Soviets singlehandedly winning the war- so many shots of T-34s racing dramatically across snow and plains. The British only show up as bombers overhead, depicted as lights in the sky. Granted, this is actually pretty accurate in terms of the numbers on the eastern vs. western fronts, but it was done here to show the Russian Communists rescuing their German comrades from evil fascists and capitalists. Bit more complicated in reality.
* ER of support among the fanbase; to this day, a number of fans cite her as their favorite character on the show, and many more cite her as among their favorites.
* ER of them end up not only crammed into one bathroom stall, they manage to do so in a way that has only one person's feet showing under the door.
* Eroge (a Japanese abbreviation of "Erotic Game") are sometimes referred to as "Eroge games" in text.
* eroge) a variety of cute (and sexy) monster girls- lamias, mermaids, centaurs, slime girls etc etc, far more than we could list here.
* eroge is completely devoid of any erotic content, even kisses. Justified in that

it's an educational (sort of) visual novel and thus needs to be accessed by anyone (mostly otaku, though).
* eroge, Llun's hair reaches her hips, and Roze's hair is long enough to drag on the ground, despite the fact that they're are supposed to be soldiers.
* eroge scene in the original game, which turns out to be All Just A Wet Dream.
* Eroge! Sex and Games Make Sexy Games; Kisara wonder why the water suddenly stopped running in an Inn's bathroom, and when she goes over to check, she's blasted by a torrent of cold water gushing out.
* Eroge! Sex and Games Make Sexy Games president of the main Eroge company, has a droopy one.
* Eroge! Sex and Games Make Sexy Games with grant you their bad endings.
* eroge stash in the closet. Konata answered that they were in her father's study as the two of them share the games.
* eroge, which was also animated twice under the same contract, was completely clean in the first place.
* Eroica entry, Napoleon's first claim to fame saw him having been kicked out of the army (even if not for political reasons but for refusing to serve as infantry general when he was from artillery) and being recalled into service because he was already known as capable and the Convention had nobody competent around.
* Eroica will occasionally complain about how he's supposed to be the main character when he hasn't been getting much screentime.
* Erol abandons the spider legged frame of the terraformer, and tries to fly away in the body. It is implied to be some kind of escape attempt, but he crashes for no apparent reason, leading to final phase of the battle
* ER. One particular episode he stars in has him as a pig who exploits a multitude of women for sex in order to have copious amounts of children, and he sweet-talks them out of whatever job they may have.
* Eron goes on to gripe about an "unsightly half-elf" living in the city.
* Eroninja given that she can only control about as much sand as his gourd holds and has to manipulate it with hand gestures, unlike Gaara who can control hundreds of tons while barely moving. However, she's much faster with it and can manipulate sand more finely than Gaara can.
* Eroninja is punished for almost killing Suzume (in retaliation for her attempt on Naruto's life) by... Naruto having sex with her every night for a month. Seems great initially, except Naruto goes out of his way to wear her out which, on top of a huge workload dealing with an upcoming event, means she gets through each day barely conscious.
* Eroninja, some of the kunoichi bitterly reflect that the reserve forces are jokingly called the "United Mom Alliance" because when a kunoichi gets pregnant (especially with a shinobi), she's expected to retire so her child doesn't lose both parents to missions gone bad. Though at least some try to justify this that one parent should retire, and the mother is going to be out of action for months anyway so it's more logical for her to retire than the father.
* Eroninja the subject of the Temptation's Touch Jutsu only reaches the final level not when they fall in love with the wielder but when they truly understand their feelings, such as when Tayuya realizes how much Naruto cares for her and he'll never abandon her like Orochimaru did.
* Eroninja, upon discovering that she doesn't have any more equipment that she had while being a part of Naruto.
* ER only one character really gave a damn. Another even twisted the knife posthumously by naming a wing for LGBT patients after the notorious homophobe.
* ER on occasion. The most obvious case is Dr. Kerry Weaver, who angles for any promotion she can get, generally letting the power go to her head immediately. This was also the case for Doug Ross, who was put in charge of a pediatric mini-ER, but let that spiral out of control while helping a woman with a terminally ill child. Mark Greene was an Attending, but continually was reminded that he was lacking in the discipline department, while Carter, while a very caring doctor, screwed up surprisingly often for a guy who seemed to be one of the senior residents. In fairness, Weaver didn't seem all that interested in hiring him as an Attending (she

did so due to a shortage, mainly), and he was only made Chief Resident after Chen was fired.
* Ero-OVA series", it was then decided that she would marry Kouichi Hayama.
* ero-ren'ai game market — a game will come out with an interesting UI enhancement, gameplay trick, or oddball fetish, and upon being successful, will be mimicked by dozens of companies.
* Eros, after a quarrel with Apollo, got back at him by shooting him with an arrow that made him fall in love with Daphne at first sight,
* Eros is also visited on the show, mainly between Twilight Sparkle's brother Shining Armor and his eventual wife Princess Cadance. Rarity expresses a desire for eros early on in the series, and is disappointed that her dream guy, Prince Bluebood turns out a total jerk. Even Twilight gets a brief encounter with eros in regards to Flash Sentry in
* Eros (or Pothos) in Greek Mythology. Aphrodite's son, sent (sometimes reluctantly) to put his mother's nefarious plots in action. Portrayed much more sympathetically than his mother. Depends on who tells the story. In Hesiod's
* Eros (Romance): A major part of why characters develop into better people is that they fall in love with someone. Kaguya only started to really
* Eros (Romance) - Rose and Greg really did love each other, even though Rose thought of Greg as a mere amusement at first. Pearl was madly in love with Rose, and was bitter towards Greg because of it, but they amend their relationship and Pearl has truly moved on from Rose. Ruby and Sapphire are two different gems with different roles in Gem society, but against all odds, they fall in love, become fused permanently as Garnet, and eventually marry. Sadie had a huge crush on Lars, but their relationship didn't work out, and Sadie is happier with her new significant other Shep. Steven and Connie form a deep relationship over the course of the series, and are dating towards the end. A major theme is that love takes time and work, and there's no such thing as love at first sight.
* eros - she's sassy, flirty and a bit emotionally manipulative - but is able to let him go in the end, so there's a little agape in there, as well.
* Eros, the god of sexual attraction, is supposed to be very handsome and is usually depicted as a
* Eros Turannos, Firmus Piett goes from Cadet to Lieutenant Commander instantly when Vader promotes him; Piett expresses uncertainty if he's ready for this responsibility, but one of Vader's clone troopers observes that Vader recognises talent and must have promoted Piett because he sees that the man will try to earn his promotion despite his initial inexperience.
* Eros Turannos, Padme and Darth Vader are each noted to be this in their own way. While Vader is harsh when punishing failure, it is explicitly noted that he also rewards success and competence, and never punishes anyone just because he feels like venting his frustrations on somebody.
* Eros Turannos, Padme only learns that Vader already has an artificial arm when he cuts it off to get out of a crashed ship.
* Eros with Sean. Mindy has slight affection for Mitchell and really wants him to come out of his shell, because she sees the good in him, and Mitchell feels the same way towards her.
* Erotic Asphyxiation: Choking yourself or someone else to turn you on.
* Erotic Dream. Waking up, she finds Maze sitting at her bedside, eating popcorn and apparently enjoying the show.
* Erotic-fantasy artist Luis Royo paints lot and lots of these, notably of the "consensual" type...
* erotic female uses her spiked ovipositor, a organ that looks like a horse penis with spines at the tip, to rend the sperm sacs and suck up the sperm to fertilize her eggs. If the female is an alpha of her group, she will make a lesser female gestate her eggs. Yeah.
* erotic fetish photos of her were found online ended up winning the contest and later becoming Divas' Champion. In terms of wrestling ability, Aloisa was seen as clumsy and uncoordinated in the ring - while Kaitlyn caught onto wrestling pretty fast.

* Erotic Film: As porn theaters started to close and moral guardians fought pornography, erotic movies went underground again. They did manage to make back their profit thanks to the success of video rentals and sales.
* Erotic Ghost Story has one attacking three vixen spirits, because one of them thought he was cute. It's surprisingly watchable, even when the neighbour starts coughing up cherry seeds.
* Erotic Tales out to rescue her colleague. (Turns out the whole thing is a fever dream fantasy the policeman is having about the nurse at the hospital, where he's guarding an ordinary criminal).
* ER plan a pregnancy—Doug and Carol—still had this trope apply. When they were blissfully happy together, they struggled to conceive, only for her to discover that she was pregnant just after he resigned in disgrace and left town.
* ER plays a patient who annoys the staff so much that they finally make up a pretext to take his temperature— and then leave him with a sunflower up his ass.
* Errand of Mercy and force both sides to back down, mediating a truce.
* "Errand of Mercy" The Organians appear to be technologically backward
* errant cannonball incident there) where the MythBusters were banned from the Alameda County Sheriff's Facility and had to conduct their tests at a bomb range in Yolo County.
* Errant Story, although it does manage to pull it off quite well with the storytelling style. In-story there's a lot of background, but the layout manages to nicely blend the text with the pictures most of the time.
* Errant Story and fairies in role, but looking like the latter), sports the specs, although as a semi-divine being, she shouldn't really need them.
* Errant Story and helped them escape, even setting them up with foster families.
* Errant Story, and neither has any illusions about the other one's goals and objectives, but they find it convenient to work together. At least, until they don't, but by then it's too late.
* Errant Story and the melees became much more serious (and much more elaborate), that all changed.
* Errant Story And then it was back to more years of UST, which was still there as the story approached its end.
* Errant Story and they spent the next thousand years hiding from the rest of the world in an underground city.
* Errant Story and turn himself in, but Jon prefers a more ... direct ... approach.
* Errant Story, and whatever was removed, he assumes, must have been far worse than a one-night stand.
* Errant Story a normal example of the literary trope, because it serves to drive the plot rather than resolve it.
* Errant Story ends on a rather bittersweet note, with Sarine visiting Jon's grave after they had been married for decades. That's the bitter part. The sweet part? Their full-grown daughter shows up to bring her mother back home.
* Errant Story Features "Durus Flamma" weapons, that look a lot like lightsabers and are used by the elves exclusively for duels. And a dual bladed one, that is completely impractical, (even in-universe) but the one person who uses them anyway is just that badass.
* Errant Story has had two varieties of Omake, first a sequence called "Fun With Familiars" featuring familiars Ellis and Rape-kun back in the old high-school days, and later, "Errant Commentary" featuring characters Bani and Sara at the end of each chapter.
* Errant Story has the dubious honour of being the first to backstab someone from the front with a sword.
* Errant Story have super speed via their time manipulation powers; they can move much faster than any human can, as well as dodge things that no one could dodge with human reflexes (including *bullets*). However, they still have their limits - the ability is magical, meaning that it can be shut off with anti-magic effects, and they still have a limited amount of attention, which means they can't do two things at once - such as block a sword blow and a bullet coming from opposite

sides.
* Errant Story, it doesn't really deter him to any significant degree...
* Errant Story: it isn't just the good guys who are on the receiving end of this trope.
* Errant Story Jon and single mom, kleptomaniac and "seamstress" Polly, mainly to show what a nice guy Jon really is.
* Errant Story Jon has a model of the genre, as a roof collapses under him as he's prowling the rooftops to sneak into Saus. This leads to a slightly uncomfortable reunion.
* Errant Story. (Make the obvious substitution for "sarcasm" in the line Sarine quotes from the play.)
* Errant Story manacles and gets bonus badass points for using her injured hand to grab Meji and run off.
* Errant Story, Misa to Sara, improbably enough (at least having the 1400-year-old immortal be the fangirl to the young woman barely out of her teens seems to fit the "improbable" category).
* Errant Story, often lampshaded, and made disturbing in a sequence where for the purposes of subterfuge, she assumes an appearance and attitude that are very out-of-character for her.
* Errant Story over-rely on their time-manipulation magic to win fights. Their commander laments the fact that she has to spar with trainees just to train with people who remember how to fight without being much much faster than their opponent.
* Errant Story, sort of) ending, but Meji and Sara are still out there, having things happen to them and vice versa.
* Errant Story the long-lived elves consider a near-eternal relationship to be tragic because you'll inevitably grow bored with each other, even if it takes thousands of years. One of their greatest forms of romance is when your partner dies at the peak of your relationship, so you can go on remembering all the good times without it being spoiled by your memories of falling out of love. Humans were considered ideal for this purpose thanks to their short life spans.
* Errant Story they are still fertile with humans, since errant Meji is only 17, and errants can be very long-lived. The elves originally took advantage of this to increase their population, until one powerful errant mage went mad for some reason and went on a rampage. The elves thought it was an inherent problem with errants and forbade future errant births.
* Errant Story, things do go badly, although not exactly in the way she fears.
* Errant Story-types anyway, he's stopped putting much effort into making them look lifelike and actually calls them zombies. They work fine as cannon fodder.
* Errant Story. When Sarine throws her dagger, her opponent knew Sarine was trying this and blocked it with her sword. Which is why Sarine charged it with lightning beforehand.
* Errant Story when taking on a mission from the Wraiths to assassinate a priest.
* Errant Story, which, of course, she puts to good use, only to have Ellis volley it right back to her.
* Errant Venture as well as a harrassing enemy squadron. Han comments that, "It works pretty well with a Star Destroyer."
* Errastas, the Elder God of mischief, sees a chance to take advantage of K'rul's newly created magic in
* Errata for the Plutonium Dragon had to say that "You are roasted and eaten" meant that you were dead.
* erratically and out of character, as Buffy had been hoping there was an external reason for her recent odd and self-destructive behavior rather than her own severe depression since returning.
* Errementari Patxi seems to keep a little boy locked up in a cage in his smithy. But as we learn, it's not really a human child at all...
* Errol Flynn, both had crushes on each other but sadly didn't act on them before his death.
* Errol Flynn soldiers using this trope even though Japanese grenades operated in a

different manner from American and British grenades (after a safety pin was removed, the grenade was struck on a hard surface to prime).
* Errol Flynn, who was an Australian of partial-Irish descent, passed himself as Irish in his early Hollywood career in the belief that few people knew of Australia.
* Erron Black's is him underhand tossing a stick of dynamite to his opponent; they'll struggle to catch it, and subsequently sustain an explosion that tosses them into the air like a ragdoll.
* Erron Black uses a level-action hunting rifle in battle, and the individual shots are only marginally more powerful than his fists.
* Error Of Judgment: After Dr. Stiehl's testimony about his removal of healthy organs, Dr. Prince tries to argue that it isn't conclusive proof, before they threaten to call another doctor from the hospital who resigned in protest over the lenient treatment he got. Defeated, Prince backs down, only for it to be revealed that they hadn't been able to find the contact information for that doctor, and aren't even sure if he's still alive.
* Error Of Judgment: Dr. Stiehl caught onto Prince and exposed him not due to personal exposure to a patient, but simply by studying his records and noticing that he had a significantly higher number of uterus removals than other doctors, with less cancer warning signs for many of them than women with actual ovarian cancer had.
* Error Of Judgment: The incriminating evidence against Prince comes from his nurse/mistress after she realizes he'll never leave his wife for her.
* Errors in Corporate Judgment" included a Magic Eye puzzle with a description that used "Froggy" as a synonym for "awesome," Peter Paltridge closed the article by declaring "Froggy" official slang for the website.
* ER, Sam's son Alex strikes up a friendship with Dr. Kovac, perhaps trying to get him and his mother together.
* Ersatz – Dusan Vukotic, Zagreb Film, 1961 (only European cartoon on list)
* Ersatz: A man at the beach has the ability to create anything, literally anything, with blow-up balloons. Eventually, he creates a woman. After he's done, he looks her over, then goes back to the air pump and uses it to inflate her breasts to a bigger size.
* ersatz). Averted in 3e, where halflings are no more or less likely to wear shoes than anyone else.
* Ersatz has the power to make anything, anything at all, out of blow-up balloons. He makes a sexy bikini woman, but she dumps him for a surfer. After the man tracks the woman down, he interrupts their sex and kills the woman by pulling her plug out.
* ER says it changed how she thought about her body and life in general.
* ER's Doug Ross more or less lets her catch him with another woman. Only as she's storming off does it occur to the idiot what he's done, but she dismisses his pathetic pleas of "It won't happen again" by practically laughing as she declares, "Yes, it will."
* ER simply ended much in the way it began. A hectic day at work, first day on the job for a new doctor, and a mass trauma coming in and everyone rolling up their sleeves and getting to work.
* ER's Kerry Weaver pulled numerous unethical stunts in order to advance her career, never incurring punishment for any of them, eventually becoming Chief of Staff after the worst one of all—hiding an alderman's STD diagnosis instead of reporting it to the department of health as she's legally obligated to do and treating his similarly infected boyfriend off the record, essentially killing the man when he suffers a severe allergic reaction to the antibiotics she gives him. She's finally demoted and eventually fired when she finally has the guts and decency to admit to her fault in hiring a mentally unstable physician and ignoring repeated complaints about the man's erratic and violent behavior.
* ER's legendary "Hell and High Water" episode, after rescuing a boy from a storm drain, Doug commandeers a news chopper to get him to County Hospital. The reporter films Doug's efforts to keep the boy alive until they get to the hospital …

where everyone is playing a video game. Not until the emergency is called in does everyone look up and see Doug on the television.
* ER slight or reprimand, starting from the season premiere when she was ticked off at the absence of African-Americans among the new crop of medical students.
* ER's Michael Gallant was one and eventually joined the Army himself. During a conversation with his mother, his wife Neela is startled to learn that she's actually quite bitter about the years she spent packing up and moving to follow his career and worried about what this means for their marriage. Sadly, he's killed in action before this can ever become an issue.
* ER's most famous episodes, "Love's Labor Lost" comes very close to averting this when Dr. Green mishandles a routine birth, and up until the final moments of the episode, it seemed very likely that the baby would die, only for him to survive while his mother did not.
* ER's new characters were introduced in this mold: Dr. John Carter (from the very first episode), later Lucy Knight, Abby Lockhart, Michael Gallant, Neela Rasgotra, etc. Even the last episode was the firstday for a neophyte physician, Dr. Julia Wise.
* ER son. However, we find out that he is just as strict with his biological son, which was why said son preferred his stepbrother over his father. Even when the stepbrother went into critical condition, the father was more concerned with his real son. Ray angrily called him out on it.
* ER spent the entirety of one episode narrating his feelings as if he were talking with a psychiatrist, only to be revealed as talking to a prostitute at the end.
* ER started out with an end-point prologue while the bulk of the episode explained how things got to this point.
* Erste Allgemeine Verunsicherung had their first international hit with a song called "Ba-Ba-Banküberfall" which is about someone who is flat broke and desperately needs money, who then tries to rob a bank but isn't taken seriously by anyone. It even has a couple of English lines.
* ER story has Doug playing this for Carol, even though she'd earlier derided the whole scenario, She rolls her eyes, but jumps his bones anyway.
* Erstwhile and ending better. (One where Snow White talks to the bear, and another when the girls go in town, see a poster about the missing prince and meet his brother.)
* Erstwhile followed by his proposing and her accepting, with the only condition that her brother come with her to the castle.
* Erstwhile. The protagonist's now-widowed father may also be hitting it off with some random woman at the wedding.
* Erstwhile. Which by making him less threatening did help with the effect of his finding her in the woods and instantly asking her to marry him.
* ER suggesting that successful middle-class black people were "above" dating other black people.
* ER, Susan Lewis gets along well with nurse Chuck Martin after both their annulled marriage and their later breakup.
* ER tell him that he understands that he isn't over Carol. Doug, who was clearly expecting to be verbally, if not physically eviscerated, is left looking completely gobsmacked by this turn of events.
* ER, the active ingredient, and has the potential to promote development of resistance to similar antibiotics.
* ER. The dying Mark Greene teaches his daughter Rachel to drive. She complains the entire time, but he insists that it's better to learn how to drive a stick shift first. As the scene ends, she gets the hang of it.
* ER the one in which the ER staff learned of his death. And the final season episode that featured his "return" (as all the original six cast members did) was actually a flashback to his final days at the hospital.
* ER. The pilot episode was to feature Nurse Carol Hathaway committing suicide via a drug overdose. However, test audiences liked her character and were intrigued by the relationship hinted at between her and Dr. Doug Ross. As a result, Carol miraculously recovered and became one of the show's best known heroines.

* ER, the player is frequently called over the intercom to be assigned a new task. One of these calls...
* ER, the pregnancies of two actresses were incorporated into the show. Problem is, both actresses were quite far along at a point where their TV pregnancies hadn't even been disclosed or discovered, so both of them still had to conceal their developing tummies until this time.
* ER, the Thanksgiving episode where Carol goes into labor, she is carrying two pumpkin pies, one which is dropped before she gets there.
* ER, this, paired with the hand-twitching, is how a hungover Doug Ross awakens after one of his random one-night stands.
* ER, to varying, sometimes understandable degrees—jumping out of his skin when approached in the hospital parking lot, pulling a gun on several youths who he thought (possibly correctly) were going to mug him, snapping at his coworkers and finally humiliating himself by screaming at the bereaved widow of a patient. His is the most extreme example—all other staff members who went through similar traumas appeared to recover quite rapidly—in that very same season, Carol was held hostage during a grocery store robbery, yet suffered no lingering effects, and neither did Sam after having been kidnapped and raped by her ex and finally more-or-less forced to shoot him in self-defense.
* ER trope when Mark Greene dashed to the train station to declare his love to the departing Susan Lewis and beg her not to leave, only to have her rebuff him and leave anyway.
* Ertuğrul sank off the coast of Wakayama, Japan, after having an audience with Emperor Meiji. The surviving sailors were taken back to Istanbul by two Japanese frigates. In 1985, Turkey sent frigates to rescue 215 Japanese nationals who were living in Tehran at the time and endangered by the effects of the Iran-Iraq war. A statement released by the Turkish government mentioned it as returning the favor from 1890.
* Eruca is thoroughly guilty of this herself, both in sprites and being the only character to use dress-class armors.
* Erudite dresses in blue formal attire befitting their intellectual nature.
* Eru is always involved in these events, and it's perceived as giving up something incredibly valuable in return for something else in both cases.
* Erune, both females and males, wear backless outfits and seem to prefer more revealing clothes in general, compared to humans. Surprisingly, combining a backless top with a cape is also rather common.
* ER. Unless the patient suffered a catastrophic brain injury, decapitation, or a very high severing of the spinal cord, it usually takes several minutes for a patient to flatline as arrhythmias disrupt the flow of oxygenated blood to the brain. Except in rare cases, such as suppression by poisoning, extreme intoxication or extreme hypothermia, it is an extremely rare case that a patient who reaches asystole will be revived.
* ER, until the actor playing Benton got upset with the situation and the producers broke them up and set him up with a new, black character.
* Eruphytes are plants that became hosts to minds or souls cast loose from their bodies or the afterlife, becoming intelligent, telepathic and possessed of
* Eruption Precious Wilson left after the latter, and the hits stopped.
* Erusea is France; like Belka, its incarnations in the different games is based on previous history, as Erusea in
* ER used this several times. A surgical intern leaped to his death on the elevated train tracks, while its landmark 150th episode featured the mass casualty caused by a train derailment, which was itself caused by a suicidal young woman parking her car on the tracks.
* ER usually have good reasons why; in the final season, a child who was flatlining was found to have gotten into her uncle's medication, and treating the resulting overdose allowed her to be revived.
* ER wanted to leave the show, wanting to pursue other projects as she'd never really fit in during her time on the show.
* ER was always shot on film, and in widescreen. The first seven seasons were aired

in 4:3 pan-and-scan; it began airing first-run in widescreen HD with the eighth season. The moment DVD became widely available, Warner Bros. created the DVDs using the original widescreen film. These masters are very high quality. However, as of yet, they have not been restored in any way. So the film masters of the early seasons can be dirty at times, and sometimes will show equipment on the edges that were intended not to air, but were left in because of the original intent to air in a standard aspect ratio.
* ER wasn't really one, but was accused of it after dating a couple of older women.
* ER ways, he never throws his familial connections around and is an excellent physician.
* ER, we never see Elizabeth Corday show a hint of interest in anyone else after Mark Greene dies.
* ER, when a benzene-exposed Carter is hastily stripped and hosed down in a prefab shower-stall in the ambulance bay. Not played for Fanservice, either.
* ER when a hungover Doug woke up following one of his random one-night stands.
* ER; when Carol announces that she and Doug are back together she is greeted by a few seconds of silence. Then a nurse holds out her hand and says, "Pay up."
* ER, when Doctor Pratt was seeing off a patient up on the roof, there were two faint lights behind him. Then, when Pratt turned around, we see that the two lights collided. A commercial plane and a private jet had crashed.
* ER whenever a doctor has to break the news of a patient's death. Results vary.
* ER. When Kerry and Mark suspect that Carter has become addicted to painkillers, Kerry calls the Chief Of Staff and addresses the situation on hypotheticals to find out what protocol to follow. Unusually, this only reveals that a staff member has a drug problem, not the name of the person in question.
* ER: when Mark (protagonist of the first eight seasons) has his last day at the hospital, his last words before leaving are "you set the tone, Carter." After he dies, Dr. Carter "inherits" Mark's stethoscope.
* ER when the doctors and nurses go on autopilot to get through the latest tragedy.
* ER) who are implied to have their own regular sitcom style dating misadventures.
* Erwin explains his plan for the audience to hear, and it plays out exactly as he describes. The remaining soldiers sacrifice themselves to distract the Beast Titan, allowing Levi to swoop in and tear him apart. Unfortunately, Erwin forgot to account for the Cart Titan, who rushes in to rescue Zeke as Levi is planning his next move.
* Erwin Rommel attained a reputation as one for his supposed strategic prowess against the Allied Forces in World War 2, though this was heavily exaggerated by the wartime media.
* Erwin Rommel, at the age of fourteen, was building and piloting his own gliders, as well as dismantling and rebuilding motorcycles.
* Erwin Rommel be blown back into your face and eyes. Especially in vehicles where the glass windscreen has been removed as dangerous and impractical (it reflects the sun, and if hit will throw glass fragments around). For that reason, sand goggles were widely issued to both sides. Rommel continued to wear his goggles (which were actually British anti-gas shields given to him by a captured British officer) in Italy and France, where the practical need for them was a lot less.
* Erwin Rommel long. However, it was only later revealed that he had them marching around in circles to create the illusion of a vast number of tanks and men.
* Erwin Rommel's Swabian heritage and accent caused him problems during his career, as the German officer corps was entirely dominated by Prussian aristocrats.
* Erwin Rommel War Crimes at all, not even letting POW die of neglect or implementing the standard Retaliation Ratios (50:1 for wounded, 100:1 for dead) in response to partisan attacks! He is one of two Generals of Combat or Security units, of more than five hundred, known not to have done these things. He also embarrassed the Wehrmacht by refusing to execute Jewish POWs, and even demanding that slaves be paid for their labour (when building the 'Atlantic Wall' of anti-amphibious-landing defenses in France using French slaves)!
* Erwin Rommel would be cowering in a bunker 50 miles away from the front.
* Erwin, Tennessee is primarily known as the location for one of the most bizarre

and notorious cases of animal abuse in history, when Mary the Elephant was
* ER with Doug and Carol... sort of. Subverted with Mark and Susan when she left the show, and when she came back he'd moved on and married.
* ER with friend Susan Lewis, she naturally comes to the conclusion that they're having an affair. Only for the truth to be even worse—Mark went to New York to visit the neurosurgeon who had previously operated on him, because his lethal brain tumor has returned.
* ER: Written in 1974 and filmed in 1994 with only minimal changes to the script, this is an extreme example of the gap between pilots and regular episodes. A male doctor was even changed into a woman - without altering his dialogue.
* ER years after ER's actors stopped being nominated) but was only ever nominated for Support.
* Eryi's Action will cause Eryi to get her butt burned, during her death animation.
* Erymanthoi reproduce through pain. When an erymanthus is seared with vitriol and its skin is pierced with iron spikes at very specific points, it emits a howl of agony that transforms into a new blood-ape.
* Erza and Jellal. Lucy is the most concerned for this particular pairing because, after all of the
* Erza and Jellal's scene in the latter half of episode 154 is one of the most gorgeously animated moments in the series. The rest of the episode was fairly average.
* Erza herself became an example of this trope while trying to defend Jellal from both Midnight and Kagura.
* Erza is very serious and stern, especially when she's introduced. However, she's a caring and loyal friend just like everyone in the guild. She also shows a very soft and vulnerable side around Jellal.
* Erza often analyzes her opponents's abilities during a battle to find out their weaknesses before choosing the right armor to take advantage of their weak spots.
* Erza Scarlet herself even tries to Invert this trope at times. For example, at one point during Natsu's fight with Laxus, Erza punches Natsu in the stomach and attempts to take on Laxus herself.
* Erza Scarlett and Jellal Fernandez. Both have confessed (or been interupted while confessing) to have loved one another, spend more time thinking about one another than any other potential couple in the series (except maybe the two background characters whose whole schtick is not being able to confess their love), have displayed a
* Erza, so it was a race against time for the rest of the alliance to save Erza's life.
* Erza will often scold her guildmates for their constant brawling, and the ensuing destruction it causes. However, if anyone provokes her in the slightest way, she'll almost certainly jump in to join. Including one notorious incident regarding a
* ESA, launched in February 2020, that while will not approach as close to the Sun as the former —"just" a bit closer than Mercury will study the Daystar with different instruments. Similarly to the Parker Solar Probe, it will need several fly-bys of Venus plus one of Earth to reach its destination.
* Esau forgives and reconciles with Jacob, abandoning his plans for revenge.
* Esben And The Witch rather than the Danish fairy tale of the same name.
* Esben and the Witch", when Esben and his brothers stay at the witch's, she tries to murder them in their sleep. Fortunately, Esben shifted around the nightcaps so she murdered her own daughters instead; then, when they go to the king, he proceeds to rob her of her treasures one by one.
* Esben and the Witch", whenever Esben succeeds in a task, his enemy at court incites the king to give him another, and the king is only too willing to listen.
* Es' birthday is October 15th, Pregnancy and Infant Loss Remembrance Day. It's a reference to her source game,
* Escaflowne being guided by Hitomi's prophetic abilities to take over the world in one of his visions. This doesn't happen so explicitly but that's what happens throughout the series.

* Escalating Chase: The number of pursuers ramps up until a whole crowd is after someone.
* escalating prank war between Margaret and Hawkeye and B.J., Margaret steals the boys clothes while they are showering. Hawkeye and B.J. are forced to walk naked through the camp back to their tent, only to find it full of nurses waiting for them.
* escalating prank war on the plane to Vegas, Ross draws a beard and moustache on Rachel's face. She doesn't notice until they reach their destination and discovers that it won't come off. Later on, Ross suggests that she draws on him so she won't feel so self-conscious. She gives him whiskers and writes 'Ross' on his forehead. They then get married and stumble drunkenly about Vegas together, calling one another Mrs. Ross and Mr. Rachel.
* Escalating Punchline: The punch line keeps on being extended to heighten the comic effect.
* escalating the All Valley School Brawl. and successfully does so after making a deal with Armand to take it from Johnny.
* Escalating War Dewey takes it and as he walks back to his room to read it, wishes Malcolm a happy birthday as he and Reese, still bandaged from their fight, perform menial labor around the house.
* Escalating War ends, Donald or Jones would say or do something that causes it to start up again. In one story, an attempt of Donald's to borrow Jones' lawnmower results in both of their houses being destroyed by automated cutters. Once he's moved into a new house, Donald notices that his new lawn needs cutting and goes to borrow the mower from his new neighbor...who happens to be Jones!
* Escalating War kind. Marge writes a somewhat condescending letter to Roger Meyers Jr about the violent nature of his cartoons. Meyers replies with an openly insulting one that makes clear he is not empathetic ("...and the horse I rode in on???"). Marge in turn encourages other parents to write to Meyers, resulting in the studio getting a truck load of hate mail bordering on death threats.
* Escalating War of pranks with the girls. They compound the folly by deciding to use the leaves as camouflage.
* Escalating War when he messed with her birth control pills; Hank (who's in on the prank) tells Bobby he has to marry her. Hank and his friends then arrange a fake wedding for Bobby and Luanne...and then prank Luanne back by claiming that they accidentally got a real minister and what do you know, legally you can't get a divorce until at least a year after the wedding.
* Escalating War: When one minor slight leads to a situation where opposing sides have to come up with larger and larger schemes to one-up their opponent.
* Escalator (moving staircases). To the point that it can no longer be trademarked and hasn't been for quite some time.
* escalator to Heaven turns into a slide to Hell after he spits over the side.
* Escanaba in Da Moonlight Jimmer finishing off the rest of the other guys' drinks.
* Escanaba in Da Moonlight: The ingredients list for the potion starts out normally enough, with milk, yeast, and barley, but it also apparently contains roasted earthworms, blackflies, squirrel guts and the dried and powdered left testicle of a fully grown moose.
* Escape 2000 delinquents and political dissidents are herded into prison camps where they are hunted for sport by VIP's.
* Escape 2000: President Clark seeks to slaughter the Bronx so he can gentrify it.
* Escape 2000, vans explode in giant balls of flame after being hit by mere shotgun shells and pistol bullets. Not even high explosive rounds would do the amount of damage these bullets do. The trope even extends to a helicopter in the movie, as the hero Trash is able to blow it up with a regular pistol. At least American movies generally use high caliber bullets when they cause cars and helicopters to blow up.
* Escape 2000, with Servo even singing the phrase repeatedly along to the music at the end credits. But when the movie is over and Mike tries to make the joke again, Crow tells him that it's not funny any more.
* Escape!, and only opens under the computer's command. The crew has enough to eat

and drink, but only beans and milk for weeks. Earth can contact the ship, but they can't respond. Technically it does everything they ask of it, just not quite the way they wanted/expected.
* Escape and Utility Pods have been seen in the background, but otherwise don't play a vital role in the franchise.
* Escape Artist: A performer whose acts involve managing to escape the most secure of death traps.
* Escape at Dannemora and holds his co-conspirator back during their flight to Canada. He panics as soon as the pair reach freedom, tries to hide in someone's yard and gets them noticed by the homeowner, ignores the advice to not drink straight from a river, repeatedly gets drunk on stolen booze, and starts firing on passing cars in a pathetic attempt to steal a ride.
* Escape at Dannemora. The incident was apparently justified because Sweat was an escaped murderer.
* Escape at Dannemora: The protagonists are two convicted murderers and the philandering prison employee who helps them escape.
* Escape at Dannemora: The series opens with a scene in which Tilly is being interviewed by the state inspector general. Most of the series is a flashback leading up to this point. At the end of the final episode, we see the first part of this scene again from a different camera angle.
* Escape at Dannemora: Two murderers with life sentences stage an escape from prison with the help of a prison employee whom they've seduced. Based on a true story.
* Escape Call: A character arranges for someone to call them in order to get out of an event.
* Escape Call: Someone doesn't want to attend an event, so they have someone phone them and pretend there's an emergency.
* Escape Clause, with the recipient realizing too late the logical consequences.
* escape cling when trying to hide from his mother as she pulled off the covers from his futon.
* Escape Club had a song called "I'll Be There" about a ghost who was haunting the one he loved.
* Escaped Animal Rampage: A zoo animal escapes from captivity and causes trouble.
* Escaped Animal Rampage: When an animal escapes from a zoo, a circus, a pound, a laboratory, or some other kind of area where it formerly lived in restricted conditions.
* Escaped Animal Rampage: When people failed to keep animals locked in their cages.
* Escaped from Hell: A character who ends up in but ultimately escapes from Hell
* Escaped from the Lab: A character who from an early age was raised in a lab as a test subject, but eventually escaped.
* Escaped from the Lab: The character is a refugee from a laboratory that experimented on them.
* escaped into the comics pages, and has on one occasion to date left Rat bound and gagged for being an idiot (the same offense Rat punished through Dickie in the comic-within-the-comic.)
* escaped. Saya immediately hates Diva for killing everyone but Diva is oblivious to her rage and earnestly believes that Saya will join her as soon as the humans are out of the way.
* Escape from Alcatraz: Morris and English. A white convict and escape artist and the jaded leader of the black gang in the 1960s Alcatraz prison quickly see eye to eye, becoming unlikely friends.
* Escape from Alcatraz utilized so many of the classic jailbreak story idioms.
* Escape from Alcatraz, who are simply trying to contain a prison full of dangerous criminals. The only completely unsympathetic "good" character in the film is the Warden.
* Escape from Butcher Bay: After Riddick bombs the elevator a couple of guards are escorting him in, it crashes into a deep, subterranean part of the planetoid inhabited by large and extremely vicious creatures. Both guards only have the torches mounted on their weapons to see with, while Riddick can, of course, see

everything with his eye shine. When one of the guards is effortlessly grabbed and ripped limb from limb by one of the monsters, Riddick simply murmurs "beautiful..." in an awestruck manner.
* Escape from Butcher Bay: In Butcher Bay prison, the most dangerous and escape-prone convicts are kept in cryogenic suspension for the duration of their sentences and let out only a few minutes each day for exercise in a sealed room. Which is all that Riddick needed in order to escape.
* Escape from Butcher Bay is for the most part a thrilling mashup of throat-slashing stealth and amazing first-person melee combat. Fighting an armed prison guard head-on is likely to get you killed. 2/3rds through you finally pick up a firearm of your own, which turns it into a 1st-person shooter. The REAL gameplay change though, comes after you get access to a nigh-indestructible mech and get to crush all those enemies you hid from for most of the game in pure power fantasy style.
* Escape from Butcher Bay of his former self who can only mutter things about birds and occasionally keel over.
* Escape from Butcher Bay the guards have DNA-locked assault rifles that shock Riddick if he tries to pick one up.
* Escape from Butcher Bay, when Riddick kills Rust, the leader of one of the prison gangs, in order to gain respect and influence with his fellow inmates.
* escape from captivity while on Paradis Island. And on another occasion, she accuses Nikolo, a Marleyan who was in love with Sasha Blaus, of being "blinded" and "seduced" by the "Devils of the Island".
* Escape From Cleveland: After stealing the U.S. Bill of Rights, a group of rebels attempt to enlist Snake to help them fight when the USPF besieges the city. He books it out of there and leaves them to be massacred by the police force.
* Escape from Colditz is about a group of prisoners trying to escape from one of these.
* Escape From Eden Park is an angry, spiteful spirit, holding onto her anger and jealousy at her older sister, who overshadowed her while they were both alive.
* Escape from Florida Florida under the pretense that it will protect him from the United States Police Force, only to be captured by two twins who are planning a civil war against the mainland. He repeatedly tries to escape, but is conscripted into training recruits, which eventually leads to him sabotaging the Twins' efforts before escaping.
* Escape from Furnace: Hilariously between Zee and Alex, with Zee stating that Alex, with his worn out, ragged, ill-fitting prison outfit, is looking "practically indecent".
* Escape from Ironheart is to, well, escape from Ironheart, a massive, supposedly inescapable prison.
* Escape from L.A., Cuervo Jones forces Snake Plissken to play a deadly game of solitaire basketball for the amusement of him and the crowd.
* Escape from L.A., gives Los Angeles the same treatment. After an earthquake separates the city from the US mainland, the government turns it into a walled-off, heavily guarded colony for the morally undesirable. Anyone convicted of any crime can either choose to repent and be electrocuted, or accept lifetime exile to the island.
* Escape from L.A. has in the deportation center an option to "repent your sins", leading deportees to be electrocuted on the spot.
* Escape from L.A. in order to retrieve the weapon and stop the invasion.
* Escape from L.A. is a Pinto. Snake also managed to turn one car into a giant Molotov cocktail.
* Escape from L.A. Jake by sharing anecdotes that Marco doesn't know Tom was around to witness.
* Escape from L.A.-led Latin America is on the verge of invading the US.
* Escape from L.A., Snake is given a special all-black outfit to wear for his mission, which includes a long black trenchcoat. Unfortunately, it gets stolen by a mook early on, but Snake runs into the same mook near the end and makes a point of stealing it back from his corpse.

* Escape from L.A., Snake meets a female gang boss named Hershey who has an unusually deep voice. He immediately recognizes the voice as an old buddy of his. He proceeds to perform this trope. It's not clear what he finds. It's clear the buddy had a sex change. It's not clear how complete it was.
* Escape from L.A., so much so that you could practically take the script of the latter, change the names of people and locations without touching any of the rest of the script, and you'd almost have the former.
* Escape from L.A.. The American President is a religious fascist who turned his country into a police state and is willing to destroy entire countries if necessary to maintain his supremacy. Meanwhile, Cuervo Jones runs the largest gang in Los Angeles and has united Latin America under the Shining Path to invade the United States to get that power himself.
* Escape from L.A., the Beverly Hills area is inhabited by a group of freaks who, due to undergoing too much plastic surgery, must regularly kidnap prisoners and harvest them for body parts in order to keep themselves alive. Snake very nearly ends up becoming one of their next victims.
* Escape from L.A., the hologram of Snake appears flawless until after half an army tries to shoot the hell out of it. Then a guy walks forward and passes his hand through it, making it ripple.
* Escape from L.A., the new extreme right wing President who takes over the United States outlaws all religions other than Christianity as well as atheism. It is punishable by death through deportation to the hellish, crime-ridden Los Angeles Penitentiary Island. Taslima, one of the inhabitants, tells Snake that she was an American Muslim before she was shipped off to L.A.
* Escape from L.A. (the prologue opens in 2000, then skips to 2013 for the main story)
* Escape from L.A., the US has become a totalitarian state with a permanent Christian fundamentalist President. Naturally, he immediately outlaws many of the things we enjoy today including smoking, alcohol, red meat, and extramarital sex. It's a good thing Snake doesn't much care for laws.
* Escape from L.A. to Jerry Falwell, the founder of the "Moral Majority", whose Thomas Road Baptist Church is in the town). Anything he considers to be against his new "Moral America" laws (read: anything he doesn't like — tobacco, alcohol, red meat, guns, profanity, non-Christian religions, atheism, non-marital sex and more) is banned, with those who break the laws having to choose between getting deported to Los Angeles Island, which is every bit the hellhole that Manhattan Island Penitentiary was, or being executed in the electric chair. Snake lampshades it when he sarcastically calls the new states "the land of the free". At the same time, the country's military has degraded to the point where a ragtag force of Latin American countries has a legitimate chance of invading the US.
* Escape from L.A. turns the United States into a virtual theocracy. He makes Christianity mandatory country-wide and religious heterodoxy punishable by death, while enforcing a set of new moral laws for the 'new America'.
* Escape from L.A. wants. Plissken's destruction of the tape isn't going to cause another war: it's just going to ensure that the balance of power remains unchanged and business carries on as usual.)
* Escape from L.A. When Snake is looking for the original soldier sent into Los Angeles to retrieve the Sword of Damocles, he runs into a bunch of Neo-Nazis using the guy's corpse for target practice. When they try to kill Snake over an insult he shoots one of them with his machine gun, looking nearly bored.
* Escape from L.A. (where Snake has been at some point between 1997 and 2013) is mentioned as being United States territory.
* Escape from Monkey Island also had the logo change to a monkey holding a banana.
* Escape from Monkey Island and a mention of other Insult sports (you actually engage in a round of Insult Armwrestling in the game).
* Escape from Monkey Island, and everything he achieved falls to ruin.
* Escape from Monkey Island becomes one of these after winning the gubernatorial vote with his "Good Times, Free Grog" policy, which the local pirates cannot possibly resist.

* Escape from Monkey Island but this sequel was created by a different production team to the one that set the question. Original creator Ron Gilbert has his own answer, but remains disinclined to tell anyone.
* Escape from Monkey Island can be brought to life — turns out, she's got a voice like she's been smoking cigarettes since childhood, and she proceeds to grouse bitterly at Guybrush about her lot in life.
* Escape from Monkey Island, Elaine and Guybrush run into "Timmy the Monkey" after their return to Melee Island. After some wild misguesses from Guybrush, Timmy manages to communicate that there's trouble at the governor's mansion.
* Escape from Monkey Island features "piratised" versions of some well-known chains, like "Starbuccaneers" and "Planet Threepwood".
* Escape from Monkey Island, Guybrush has to talk to the law firm of Whipp, Thrawtle, and Digg in order to stop the attempts to demolish his wife's house.
* Escape from Monkey Island has a wooden catapult exploding in a huge fireball when it goes over cliff.
* Escape from Monkey Island has Carla drinking at the microbrewery on Jambalaya Island to forget her time on Monkey Island. Unfortunately, Guybrush inadvertently reminds her of what she was drinking to forget, and she complains "Thanksh a load, Threepwood. Now I gotta shtart all over again."
* Escape from Monkey Island. He stops when she threatens to take out HIS baby pictures.
* Escape from Monkey Island, if you have Guybrush examine the appropriate part of the hand-shaped table in the Voodoo Lady's home, he'll remark "Ah, the middle finger. The most communicative of fingers."
* Escape from Monkey Island if you have him examine a "No Cursing" sign in a school.
* Escape from Monkey Island, in order to solve a puzzle, Guybrush needs to "borrow" a time clock from two chess players, Castaneda and Santiago, so he gets the two mad enough at each other that they're too busy Volleying Insults (such as "Falstaff stand-in!" and "Weasel worrier!") to notice him take it. "FRINGE CANDIDATE!"
* Escape from Monkey Island is possibly the worst offender in this regard thanks to the late-game introduction of "MONKEY KOMBAT". The idea is that, by chanting a certain combination of four different monkey sounds, the player adopts one of five different fighting stances, all of which have a 50/50 chance of either winning or losing, like an overly complicated game of Rock Paper Scissors. The Monkey Island series has had its fair share of game-halting "insult swordfighting" sections, but Monkey Kombat takes the cake for worst combat system in a Lucasarts game by virtue of it being entirely unclear which stances beat which, on top of it being a grind to even figure out the stances.
* Escape from Monkey Island, once you have solved either of the necessary puzzles, an entire barrel of Mega Monkey Meal Coupons will appear, ripe for the taking.
* Escape from Monkey Island rolls backwards off of a cliff and explodes in a fireball.
* Escape from Monkey Island runs on the same engine, and it suffers from the same issue.
* Escape from Monkey Island: The bank teller on Lucre Island refuses to accept Ozzie Mandrill's traveller's checks because they've had to tighten their security, and they've never heard of "Australia" or the weird animal depicted on the checks he calls a "kangaroo".
* Escape from Monkey Island, the first game's ending where Guybrush sinks the ship and leaves Otis, Carla and Meathook stranded on Monkey Island is canon.
* Escape from Monkey Island, the machine still doesn't dispense any grog, but if you kick it enough, some empty cans eventually tumble out.
* Escape from Monkey Island them) and also sabotaging the competition.
* Escape from Monkey Island the one possibility of death is a brief time-traveling episode in a swamp. Future Guybrush would tell present Guybrush things and give him things in a specific order, and if that order was not replicated exactly by the player (when the player controls future Guybrush), a time vortex would open and swallow everything. (And that doesn't really end the game — you get another

try to do the sequence right. For shocks, you can also try shooting your alter ego with the gun he had handed you...)
* Escape from Monkey Island this by wondering what kind of duck it is.
* Escape from Monkey Island. This is part of a puzzle to hit a drunk's party balloon and startle him so you can steal his pretzels.
* Escape from Monkey Island when he travels to Lucre Island to consult the Marley family lawyers. Of course, none of the lawyers actually get the jokes...
* Escape from Monkey Island, where Guybrush tries to use the "What about the children?" to Ozzie Mandrill and his plan to make the Tri-Island County a tourist attraction, Ozzie simply responds "What about them?", to which Guybrush admits that he hasn't thought that far.
* Escape from Monkey Island, while its islet, the dismal pirate reservation Nuttin Atoll, is always around midnight. The two even share the same overworld map, with one side being brightly lit and the other side dark.
* Escape from Monkey Island with a bank teller is to act outraged at the lack of free toasters.
* Escape from Monkey Island with the "Voodoo Anklet of Extreme Discomfort" which prevents the player character from leaving Lucre Island.
* Escape From Moonbase Alpha, Deadly Doris, an animated television set, has a chance of turning the player into a frog when she attacks.
* Escape From Mr. Lemoncello: These are everywhere in the library. The front desk is manned by a recreation of Lemoncello’s childhood librarian, the atrium is ringed by holographic busts of famous authors, and the rest of the library contains projectors that show anything from a white tiger to Johannes Gutenberg.
* Escape from New York, a creepy punk taunts the government troops with the kidnapped President's severed finger.
* Escape from New York are blatantly just M16s with the handguards removed.
* Escape from New York as parts of the area had suffered enough damage to make for a convincing post-apocalyptic setting. A number of the shooting locations have since been restored or rebuilt.
* Escape from New York: A woman from the communist resistance/terrorist organization named the National Liberation Front hijacked Air Force One somehow and crashes it into Manhattan Island in hopes of killing the US President.
* Escape from New York feature a war-ravaged USA under a dictatorship in all but name, and former great cities used as penal colonies.
* Escape from New York had 24 hours to save the President, or the tiny explosives they injected him with would detonate, open up his jugular veins, and kill him.
* Escape from New York, in 1981, predicted that by 1997 crime rates would have risen to such catastrophic levels that Manhattan Island would be turned into a penal colony for containing all the convicts. While the high crime rates of the 1970s-80s made it look more plausible then, the fact they started falling just ten years on left it looking silly when the actual 1997 rolled around.
* Escape from New York: In 1997, all crimes are punished by life on Manhattan Island, whether state or federal apparently, since the rule is once people enter they don't leave alive.
* Escape from New York in order to infiltrate Manhattan without detection. Apparently there are no tunnels for use by guards...
* Escape from New York insists on being called "Snake". "Brain" also hates being called Harold, though Snake does it anyway.
* Escape from New York, it's a more conventional boxing/wrestling match he's forced to participate in.
* Escape from New York, Manhattan is a giant, walled-off prison with no guards. When the President is unlucky enough to get stuck there after Airforce One is shot down, condemned criminal Snake Plissken is offered his freedom in exchange for rescuing him.
* Escape from New York — Post-apocalyptic action series. 2 films since 1981.
* Escape from New York (players control larger than life "Hunters", often with their own gimmicks). The goal is to earn points by killing criminals in walled off sections of the prison cities.

* Escape from New York. Snake Plissken is offered a Presidential pardon for all of the federal crimes he committed. The catch: the President is currently held prisoner inside the New York Maximum Security Penitentiary, so Snake has to rescue him before he can get the pardon.
* Escape from New York: Snake Plissken vs a huge guy. First they fight with baseball bats, then with baseball bats with huge nails.
* Escape from New York's son Steven appears as a Secret Service agent.
* Escape from New York. The novelization turns this trope even more literal by mentioning the fact the government exploited the fact the city was hit with a massive nerve gas attack to justify blocking off the city to begin with — turning it into a Penitentiary was just the natural evolution of that.
* Escape from New York, the only hint that he might care is when he asks the president how he felt about all the people who died to rescue him and is not impressed with the president's flippant response.
* Escape from New York: The self-proclaimed Duke of New York. He isn't a real aristocrat but behaves as if he is.
* Escape from New York. The tape with the secret of nuclear fusion. Apparently every shred of data that was involved in creating it was destroyed and everyone involved in making it either given amnesia or killed, because absolutely no attempt was made to obtain a backup copy after it was lost in New York.
* Escape from New York, the title cities have been deliberately cut off from the rest of the country and turned into prison facilities. Still, the United States has also apparently expanded internationally: the second film mentions Bangkok as a U.S. territory.
* Escape from New York the United States Police are armed with M16s with the handguards removed (which would burn the hands of the people using them).
* Escape from New York: The United States Police have face-concealing visors that they mostly keep down.
* Escape from New York to motivate Snake into performing his mission. This version takes the form of two tiny explosives implanted in the neck that are just large enough to fatally open his arteries when they go off, which will happen when their coatings dissolve in about 24 hours. Snake has that much time to find the President and bring him back; if he succeeds, his captors will neutralize the implants.
* Escape from New York. When Snake Plisskin arrives at the facility, he is taken to a meeting with Police Commissioner Bob Hauk. Plisskin was a U.S. soldier during a war with Russia. He received two Purple Hearts and was the youngest man ever to be decorated by the President. However, Plisskin robbed a Federal Reserve depository and was sentenced to the Manhattan prison. Hauk tells Plisskin "I'm ready to kick your ass out of the world, war hero."
* Escape from Planet Earth is to destroy every inhabited planet in the universe!
* Escape from Planet Earth provides a cryo prison, where Gary and Scorch are held captive, if only for a while, before the villain's plot starts crumbling; thanks to Gary's cunning plan.
* Escape from Planet Earth's logo appears, if only for a brief moment, before it bleeds into the lights of a UFO that carries the whole sigil away with it.
* Escape From Rungistan game starts with "escape from a jail cell". You had to (a) ask a guard to bring you dinner (b) give a piece of cheese to a mouse (c) move your bed under a window (d) give a piece of candy to a child and (e) dig a hole in a wall to get out.
* Escape From Scorpion Island involved the contestants running downhill away from a large fake boulder. If the boulder caught them, they were eliminated. To make things more challenging, they had to crawl under a cargo net at one point.
* Escape from Sobibór, a girl named Naomi is offered a chance to live at the cost of her baby, which she was trying to hide. Her response is to spit in the Nazi's face (figuratively and literally).
* Escape from Sobibór is a 1987 prison escape/war/Holocaust movie set in 1943, in the Sobibor extermination camp, where inmates who have been selectively spared for their skills in manufacturing material goods plot their escape from the camp, in part utilizing the skills they possess.

* Escape From St. Mary's, but when you meet a reporter, she turns out rather apathetic. No one reads the paper but the staff.
* Escape From St. Mary's has trouble remembering the injuries he experienced just minutes ago, among other intellectual shortcomings.
* Escape From St. Mary's. It doesn't work. It does for another student.
* Escape From St. Mary's lets a couple men in black loose in a private school to hunt down an alien.
* Escape From St. Mary's: Mrs. Desai knows you're only in the chemistry lab to make bombs.
* Escape From St. Mary's: Set fully in a high school, with typical school tasks, like playing basketball, working with the website team, hunting for aliens, traveling through time...
* Escape From St. Mary's: You first think you're looking for a shriveled green man, for your search's actual result turns out more like this.
* Escape from Tarkov features a familiar blue-and-yellow-themed furniture megastore named "IDEA" (IKEA).
* Escape from Tarkov has the slight twist of having various guns of differing makes and quality handled by multiple different arms dealers, who span the breadth of the sub-types. Prapor is a Russian warrant officer who secretly sells Soviet-bloc weapons and ammo, Skier is a former customs worker who sells civilian-grade weapons as a typical Gangland-runner type, Peacekeeper is a corrupt UN officer who sells NATO guns, Mechanic sells guns he personally customizes, and Jaeger sells various "hunting" weapons like rifles and shotguns.
* Escape from Terra, but the Belters avert it along with every other "victimless crime". In one case a hippie who had to leave California in a hurry gets a steady job on Ceres growing cannabis in the agricultural tower, while his "friend" the drug dealer finds it hard to get customers.
* Escape from Terra details the United World's brief attempt to bring down the Cerean "rebellion".
* Escape from Terra has "tanglenet" using quantum entanglement, and somehow they were able to make an "internet" that cannot be intercepted.
* Escape from Terra, in addition the Martian calendar and system of time measurement is decimalized (1 Martian day = 100 centimes).
* Escape from Terra most Belters use a decimalized calendar and time-keeping system designed by the Mars colonists. Particularly "centimes" (about 14.8 minutes) and "decadays" (10 Martian days).
* Escape from Terra, obviously. And many of the planet's inhabitants are referred to as "Terries".
* Escape from Terra, rejuvenation treatments are one of many examples of bio- and nanotechnology that are officially banned on Earth. Reggie King and Babbette the elder undergo the treatment on Mars, and the first man on Mars is a great-great-great-grandfather who looks no older than 30.
* Escape from Terra the United World government hides a cloned neanderthal girl in Area 51, prompting a Belter raid to rescue her when she is scheduled to be terminated.
* Escape from Terra, though Ceres and a few other asteroids are developed enough to support populations with different professions. Also the source of the mineral wealth that the United World is desperate to get their hands on.
* Escape from Terra where Guy dreams he has no pants on while talking to Fiorella.
* Escape from the Crazy Place: A character is trapped in a horror setting from which they must escape.
* Escape from the Crazy Place: The main premise of many survival horror stories - just escape from this place!
* Escape From The Hokage's Hat: A large squad of over 50 Iwa ninja bump into Tsunade's group (Tsunade, Naruto, Hinata, Shizune and Hana) and engage them in a fight (read: surprise attack). While frustrated at how the group is somewhat surviving the attack, many find themselves constantly switching from sheer abject rage to deep terror when they start noticing that there is a blonde 13 year old boy in the group. Who is skilled at Taijutsu, moves incredibly quickly, and knows how

to use the Rasengan. Just like Konoha's Yellow Flash.
* Escape from the Hokage's Hat and Naruto keeps shooting glances at Hinata since her clothes are torn in all the right places.
* Escape from the Hokage's Hat are catching up to them after 4 months.
* Escape from the Hokage's Hat: Fresh from the Sasuke retrieval mission (a success in this case) Tsunade drops this bombshell on Naruto.
* Escape From The Hokage's Hat) from Tsunade, comments on how he wants to "hold Hinata and never let her go" and suddenly be turned on by Hinata's laugh.
* Escape From The Hokage's Hat: Hanabi loses her position as heir and ends up either bullied or treated with indifference by her clan. She does eventually get to voice her frustration to Neji and asks why they are treating her like that while they only have nice things to say about Hinata. Neji replies by telling her that it's because she isn't a nice person and Hinata is liked because the Branch members don't want to torment the only Main branch Hyuuga who is genuinely nice to them.
* Escape From The Hokage's Hat has Naruto with multiple seals placed on him (by various Konoha ninja) to limit his growth. They were all made with blood. His own. After many a beating. Judging from a bit of dialogue between Tsunade and Shizune when they find out, placing a blood seal on someone is implied to be excruciatingly painful. Naruto got them between the ages of 6 and 9.
* Escape From The Hokage's Hat) he mopes about everyone hating Sasuke for it.
* Escape from the Hokage's Hat: Naruto like in canon is like this. At least until he realizes the village had multiple blood seals placed on him by the village ninja to limit his growth (mental and physical). Then he ever so slowly comes to the realization of how bad his life is.
* Escape From The Hokage's Hat, want Sasuke's prison sentence forgotten, and were smart enough to get the Daimyo to agree with any of their decisions. Tsunade's response? Shove Sasuke in one of the darkest ANBU cells being kept barely alive, setting up the collapse of Konoha's economy, taking money from the accounts of every clan that ever wronged Naruto, and finally making Jiraiya (temporary) Sixth Hokage while she leaves with Shizune, Hinata, and Naruto for a six-month training trip. When she explains why she did it to Naruto, she has this to say:
* Escape From The Hokage's Hat while he taught so much to Sasuke, his reply was that he wasn't sure that Naruto or Sakura would make responsible use of more advanced techniques. The irony that he taught Sasuke, the most mentally unbalanced of his Genin, an extremely lethal technique, goes completely over his head. There's also the fact that he seemed more worried about Sasuke being imprisoned for life over the fact that Naruto nearly died while attempting to bring him back, while absolutely paying no concern over what's going to become of Sakura now that Team 7 is dissolved.
* Escape From The Mindmaster. They're just trying to find their way out just like you, but if you bump into one, you lose a chance.
* Escape From the Moon, averting this trope is one reason Luna and Celestia don’t want to send Spliced to Tartarus, regardless of her crimes; they’re afraid Tirek (who is imprisoned there) might do this to her and become immortal.
* Escape From the Moon: Doa’s magic is referred to as “thaumatics”.
* Escape From the Moon, it's revealed that in her native dimension, Spliced was dubbed the “Viral Maniac” for her crimes.
* Escape From the Moon, Pharynx has apparently learned how to do this, as he teleports back to the hive for a quick word with Thorax, and then back to the Crystal Empire afterward. Thorax makes a note to learn it himself.
* Escape From the Moon, Pharynx says he's going to give one to Chrysalis once they catch her. When Thorax points out that she doesn't wear clothes, Pharynx says that clothes or no clothes, he's still capable of doing it to her, and Thorax is both intrigued and terrified by the idea.
* Escape From the Moon Powers (their six Powers being sub-Powers of Harmony), while Discord is the Lord of Disharmony (and his sub-Powers are Lies, Oathbreaking, Sorrow, Cruelty, Self-centeredness and Technology), after a visit to the Valley of Alicorns. Other Powers named at this time include Day (Celestia), Night (Luna), Dreams (also Luna) and Nightmares (also Luna, formerly an unidentified stallion -

Nightmare Moon was the result of his trying to take over Luna's body). Twilight later meets her Opposite, the Lady of Technology, and finds they can work together rather than being enemies; Gear Shaft also identifies an individual named Bit Collector as a Power, though not which one, and mentions Life as a Power.
* Escape From the Moon, Spliced Genome hasn’t aged in six thousand years.
* Escape From the Moon, Spliced Genome is able to heal, or "fix", others with her magic... up to and including effectively generating them a new limb, as shown when she restores Aerostorm's lost wing.
* Escape From the Moon, Spliced mentions having had to deal with a few of these in her classes as a younger pony, including one student who, after failing a history exam, still insisted he was right and the textbook was wrong. Then there was the one who went as far as trying to change the historical records to match up with what he claimed was right, but was caught almost immediately.
* Escape From the Moon) takes place in a small space station and the area right outside.
* Escape From the Moon, the voice-changing effect of Poison Joke is replicated in chapter 16, this time on Sweetie Belle (as a demonstration of the plant's abilities). Scootaloo is barely restraining herself from laughing herself sick at the results, and Spliced herself has to suppress a snort of laughter when she hears it gives Fluttershy the same voice.
* Escape From the Moon trip outside, but omits it from her journal entry.
* Escape From the Moon, will eventually leave her immune to both the sun and to Celestia’s magic, something she decides is too big of a risk.
* Escape from the Planet of the Apes did this with the tape of Zira's accidental slip of the word 'dissection' during her talk before the committee.
* Escape from the Planet of the Apes during the court scene, Roddy McDowell and Kim Hunter did their bits as apes Cornelius and Zira, then had the makeup/prosthetics removed before shooting the opposite angle shots of the attorneys questioning them; they read in their parts. After McDowell saw the dailies he realized that he spoke differently and thus gave a different performance without the prosthetics, so from then on he didn't take off the makeup until the day's shooting was complete.
* Escape from the Planet of the Apes focuses on the chimpanzees Doctors Zira and Cornelius, supporting characters in the previous films. Zira is hot-tempered but intelligent, assertive but loving, while Cornelius, though of comparable intelligence, is a lot more laid-back and easygoing, though as we see, both are perfectly capable of going to extreme lengths to protect those they love.
* Escape from the Planet of the Apes movie. The ape trio used the ship to go backwards in time to the way the human crew came, landing them on the same time when Taylor left on Earth. Since the ape planet was destroyed, they are now stuck in the present Earth in the 70s.
* Escape from the Planet of the Apes of his usurped destiny. So not only is the story where Aldo is the hero never really told in much detail, it's actively erased from the timeline, and the kicker is, none of the characters ever figure this out.
* Escape from the Planet of the Apes omits Dr Milo. Zira and Cornelius are instead the only occupants of the spaceship and it is Cornelius who susses out that he and Zira have travelled back in time.
* Escape from the Planet of the Apes, this does happen, sort of, but only when Caesar's forces are about to beat a human to death and Caesar's love interest plaintively whispers, "n-no..."
* Escape from the Planet of the Apes. To be fair, she is warned that the truth serum will have the same effect as champagne she had earlier, which is true: she just got drunk and talkative both times.
* Escape From the Planet of the Apes, when Zira and Cornelius hop a spaceship and get thrown back in time after Earth is destroyed. They're amazed by how advanced human civilization is and perplexed by human things like prize fights, human clothes, wine (a.k.a. "grape juice plus"), not to mention the fact that apes are wild animals kept in zoos.
* Escape from the Planet of the Apes with a line that Hunter found extremely cathartic.

* Escape from the Planet of the Robot Monsters. All robots are enemies, and all enemies are robots.
* Escape From The Planet Of The Robot Monsters calls escalators "Electro-Stairs."
* Escape From The Valley Of The Tapes is revealed — he wants them to sell Hollywood blockbusters! At this point the owner of the cult video store tears off the man's sunglasses to reveal an eyeless horror, and flees in terror.
* Escape from Tomorrow. After the film's release, he did a couple of interviews and such and then practically vanished off the face of the earth.
* Escape from Tomorrow enough to recognize what they were doing and that the filmmakers lacked the money to market it beyond Disney coming after it, so they simply ignored it completely and the movie made all of $171,000 on the way to Netflix obscurity.
* Escape from Tomorrow, he can't fault the fact that the actors were actually quite good, even the child actors. What brought it up was the protagonist, Jim, shitting his brains out from the "cat flu", doing so with such conviction despite the fact that it will likely be the only thing he is ever known for.
* Escape from Tomorrow takes place in a version of Disney World that is one of these.
* Escape" has The Silver Banshee, who first takes control of an unnamed woman, then Chloe and, finally, Lois.
* Escape: is usually involved here, it's often an additional hazard rather than the crux of the danger in and of itself).
* Escape keepers who are trapped in their tower by a starving horde of rats.
* Escape Lala has a slot machine in the pirate ship. You need to win it to progress, but you can't seem to get lucky enough to win on your own. Fortunately, you can obtain a Luck Spell that makes the slot machine land on three of the same picture so that you win.
* Escape Lala plot, are both dead, and a big part of the game involves helping them move on to the afterlife.
* Escape of the Artful Dodger set in Australia, both the Artful Dodger and Fagin are transported to the show's setting this way.
* Escape of the Witch, Salmhofer has the titular character being an artificial being.
* Escape of the Witch, Salmhofer, representing Hansel and Gretel, the "red fruits".
* Escape Plan all wear full coverage black uniforms with expressionless black face masks to remove all individuality, so the prisoners can determine nothing about them; even ethnicity. Breslin and Rottmayer are still able to pick out individual guards and assign them nicknames base on movement, habits, quirks, etc.
* Escape Plan, Breslin wears a firefighter uniform and hitches a ride under a firetruck, only to emerge undisturbed while the actual firemen put out the fire caused by one of his accomplices outside.
* Escape Plan, he enjoys exercising absolute power over his personal fiefdom.
* Escape Plan is home to one of the most punishing examples of solitary confinement. Prisoners in solitary are kept in a small enclosed space thats probably no wider than a casket, with barely enough room to stand up, and a set of powerful halogen lamps that shine bright intense light and heat on them like a reptile in a terrarium, while the lights go on and off after an amount of time. These lamps are a torture instrument designed to inflict sensory overload (bright lights, intense heat, loud buzzing of the lamps), sleep deprivation, and accelerated dehydration on a prisoner, essentially weakening them without laying a hand on them, or cooking the belligerent prisoners in an oven.
* Escape Plan looks confused till he notices the spreading pool of fuel under the drums. Breslin then fires a final shot that ignites the whole lot into a gigantic fireball.
* Escape Plan lurking in the back seat of his car. A cloth soaked in chloroform clamped over his nose and mouth soon follow.
* Escape Plan, Ray Breslin's job was to break out of prisons in order to test out their level of security. The majority of the movie is him working together with Emil Rottmayer to break out of a top-secret prison known as the Tomb.

* Escape Plan's character Ray Breslin wears these just after he's released from prison at the beginning of the film.
* Escape plot, similar to the Rescue, except the captive rescues himself/herself.
* Escape Pod and Space Fighters. When the MS gets destroyed the Core Fighter will detach and try to escape at high speed. While extremely weak against MS they can be armed and can be used as fighters on their own.
* Escape Pod, but it's necessary to take it with you if you want to unlock another character in a later level.
* escape pod for the two-man crew, ejecting into a highly radioactive area might not be healthy for the pilots.
* Escape Pod is still recognizably masculine, his girl-voices aren't parodies.
* Escape Pod moments before the explosion. He ends up having his Iscape removed and committing suicide.
* Escape Pod out of the way so the main cast can save the day at the last possible moment.
* Escape pods in particular land hot and rough. Virtually every escape pod that lands in the original
* Escape Pod, your character can watch a subspace news broadcast from Sirius, whose anchorman unprofessionally rambles between articles such as the Auroran government vetoing a grant for the titular city, the Voyager probe being found 12 lightyears from Earth, and an Earth Day fair on planet Magellan.
* Escape Room (2017) are killed by an acidic gas that causes their flesh to dissolve. Amazingly, they do not even notice till their flesh starts to slough off.
* Escape Room (2017): beginning with protagonists having dinner in the early evening and ending just before dawn.
* Escape Room (2017) spends a large amount of time at Tyler's party, introducing viewers to some fairly unpleasant yuppies, before it ever reaches the escape room. And then more time with them arguing inside the escape room before the dying starts.
* Escape Room (2017): The entire escape room is a death course, with the occupants only having one hour to figure out all of the puzzles and escape. Even if a player does solve a puzzle, they might still be killed if they do not act quickly enough.
* Escape Room (2017): Two players are trapped in the autopsy room when the door locks on them. The other players can only watch helplessly through the observation window and the room fills with acidic gas, which causes them to dissolve.
* Escape Room (2017), who has to count to work out that 'E' is the fifth letter of the alphabet.
* Escape Room, Each of the players is the sole survivor of a horrific accident. It turns out that this is why they were all chosen — the people behind the game want to see whether it was luck or skill which enabled this, and which of them is the most capable survivor. To be more specific:
* Escape Rooms are basically designed to be this on purpose. The clues to getting out of the room are built into the room itself. Sometimes they involve kludging together some items to improvise a solution, and other times it just involves finding an alternative item to open a lock that otherwise has no key present.
* Escape Room: Tournament Of Champions, all of whom were cut in the theatrical release, whereas Woll was cut in the extended release. On another note, the theatrical version has Zoey seeing a therapist (played by Lucy Newman-Williams) who is revealed to have colluded with the creator of the Escape Room, something that was also excised in the extended cut since it would have conflicted with the new plot.
* Escape Rope to take the player to the nearest town. Both take a few seconds to activate, but may be used to escape combat unless the enemy uses an interrupting attack.
* Escape Route Surprise: A false route of escape, usually with a door leading to danger instead of an exit.
* Escape Route Surprise: The way out of danger is suddenly revealed to be dangerous.
* Escape Sequence: If the protagonists are successful, they'll get one.

* escapes, unharmed and untouched. He was never there to be caught. At the ending, where the wealthy businessman is headed to bed. Shaking in terror all the way, he locks the multiple locks on his door, climbs into bed with a double-barreled shotgun, and cringes in paranoia.
* Escape Tales: Low Memory has a first chapter ending showing a chalk outline of Elizabeth being killed by a burglar. A second chapter ending also has a chalk outline surrounding the second body, the same person in the first chapter but this time a suicide.
* escape the alien ship without destroying the Star Generator, leaving them free to use it.
* Escape the Fate's "Let It Go" consists of the singer asking himself if he lets his girl go, since she's not his to own, would the emotional scars and trauma she's inflicted go away or remain.
* Escape the Hokage's Hat, Jiraiya makes Homura and Koharu perform 100 D rank missions, and if anyone interferes they have to start all over again. Aside from the fact the two are really old and these missions include digging for potatoes and retrieving a very aggressive cat nearly daily, they don't get paid.
* escape the island and returned in this state in the season 2 finale. Plus his time travelling woes led him to the bottle too (although Charlie and Hurley were exploiting him a bit).
* Escape the Museum often depends on this trope, as you use literal museum pieces (a cannon, a steam engine, a blowgun, a bow and arrow) to make your way from room to room.
* Escape the Museum, the ledge between two windows provides a route from one room to another. Subverted when you manage to raise a window-washers' platform from below and cross on that instead of the ledge.
* Escape the Night displays several examples of this, the majority of them being female.
* Escape the Night has Matt and Lele, who dislike each other for extremely petty and vague reasons. This is the only rivalry in the show that wasn't just for camera, these two actually hated each other in real life. The fights, arguments and insults we see in the show were actually real.
* Escape the Night (her ditziness was still there, but not that prominent).
* Escape the Night. Her persistence and capacity for badassery surpassed the fandom's expectations, as cinnamon rolls in ETN usually don't become Badass Adorable.
* Escape the Night: In-universe, Matt and Lele do not get along, in real life, even less so. Joey confirmed this in a commentary while he was rewatching the pilot, stating that Lele truly hated Matt and that most arguments in the show were real arguments between the duo.
* Escape the Night is considered to be one of the smartest people to ever be on the show and he obviously has brunette hair.
* Escape the Night is not too far off from her canon counterpart, who only survives as long as she did through dumb luck.
* Escape the Night, Matthew and Rosanna from the third season count. While both come back, Ro ultimately ends up dying a second time.
* Escape the Night: Timothy can't help but flirt with every girl he comes across, but he's too endearing and funny to truly be disgusted by his actions.
* Escape the Night who happily gloats about having killed Alex' girlfriend Lauren.
* "Escape (The Pina Colada Song)" references this, with the iconic lyrics of a man seeing a personal ad specifying a love of Pina Coladas and getting caught in the rain.
* "Escape (The Pina Colada Song)". There are apparently no repercussions between the couple who were both planning on cheating, but he just happened to answer her anonymous personal ad.
* "Escape (The Piña Colada Song)" by Rupert Holmes, who otherwise does serious work. This song is "the success that ruined his career."
* escape the simultaneous destruction of both universes) was initially meant to go up in August or September, but significant delays pushed it back until October.

Hussie then delayed it a few days longer, so it could go up on October 25 (10/25).
* escape through the number 9 door, leaving everyone else behind forever, before he says who it is.
* Escape to Athena (1979). Telly Savalas sabotages the brakes on a Nazi officer's car. It not only slams into a wall and explodes, it also blows up a German ammunition dump in the process. Result!
* Escape to Athena (1979). The POW's put on a variety act for their German guards, the climax of which is a strip show by an interned female USO performer. While the Germans are busy leering over her performance, the Greek Resistance sneak up and take them all prisoner.
* Escape to Athena (1979). The V2 missile launching crew have all-black uniforms with silver reflecting facemasks. It doesn't resemble any WWII uniform but makes them look suitably spooky.
* Escape to Athena when a Greek priest takes a bite from a fruit, then throws it at the German soldiers. It explodes, apparently being a disguised grenade.
* Escape To Ravenhearst, a mannequin's head explodes after you beat it at cards.
* Escape to Victory, and accuses the Allied players of deliberate foul when it was actually the Nazis cheating.
* Escape to Victory is another WWII-era escape movie. This one involves a propaganda soccer game between POWs and the Germans. The players opt to finish the game rather than escape at halftime. They escape, anyway, when the crowd rushes the field at the end.
* Escape to Victory Nazi PoW camp, where a group of Allied prisoners train to play in a soccer game vs. a German team.
* Escape to Victory, the German team commits many violent fouls against the Allied players, which the referee doesn't call. The reason is that the referee has been ordered by the German Army officers to cheat and help the German team win.
* Escape to Victory the POW's cover for Hatch's escape by holding a mannequin of him while in formation. The guards eventually catch on....
* Escape to Witch Mountain the telepathic & telekinetic siblings Tia and Tony eventually learn that they are aliens who fled to earth to escape their dying planet, a world which had two suns. Tia's "starcase", which is crucial to the plot, is decorated with an emblem depicting two stars.
* Escape to Witch Mountain. Tony cannot make her understand why adults see it as a crime, and since she is mute the adults assume she's (at best) rebellious.
* Escape to Witch Mountain when Tia gets her memory back she recalls the spaceship her and Tony were on had problems and they had to make it to Earth on lifeboats, thus separating them from the rest of the refugees.
* Escape Tropes Woody initially breaks out of the day care centre through a bathroom window.
* Escape Velocity. A basic cargo shuttle costs maybe ten to twenty grand.
* Escape Velocity act out this trope, even if they don't look like whales. Despite their ominous appearance, they're typically harmless unless you provoke them (or unless you're flying a ship from the Polaris, who did all the provoking for you in the backstory).
* Escape Velocity also uses the sublight version: if you don't have too slow a ship to begin with, mashing the afterburner lets you outpace not only most pursuers but most
* Escape Velocity, although it happens millennia after the player's involvement ceases.
* Escape Velocity a peace treaty, but no one seems to bother about it outside the treaty station of Pax), but has devolved into frequent border skirmishes.
* Escape Velocity are present but largely ignored. As for the precursors, little remains of their leavings and even less is understood; they're just gone.
* Escape Velocity are still separate and a subject of ongoing negotiation and planning).
* Escape Velocity argue that it's the other's responsibility to take care of them.
* Escape Velocity]ascend into becoming a part of the universe itself). Only the Federation and Pirate storylines lacks the Vell-os ascending and an epilogue

stating that, in some far-off distant future, humanity as a whole will leave the corporeal behind.
* Escape Velocity Auroran colonies have at least one arcology, even the ones that presumably aren't quite so polluted (as they export food grown outside the arcologies).
* Escape Velocity: basically, it shoots every weapon in its arsenal (except those coded as point-defense) at a target if it's in range.
* Escape Velocity being pretty poor due to their resource depletion)... but as you explore more of the galaxy, it becomes clear that energy weapons have advantages of their own, and the previous impression was because the game is balanced so that the Voinian design paradigm (slow, lumbering heavily armoured ships relying primarily on relatively slow-firing but powerful energy weapons) is countered by the UE design paradigm (fairly nimble rocket-heavy ships and with significant fighter usage) and relies specifically on what Emalgha mass drivers are good against (mass drivers are absolutely terrible against shields, and chews through armour like nothing else. Since Voinians have weak shields, strong armour and tend to be easy to hit...).
* Escape Velocity both feature wars the Earth lead governments are starting against outer colonies. Who won depended on which side you supported.
* Escape Velocity but with a very short range. Some projectiles, though, are faster or slower in the third game: "blaster" shots are fast, with railguns and fusion pulse shots being slower. Weapons described as "lasers" like the Capacitor Pulse laser, Bio Relay laser, and the Thunderhead do hit instantly, but all had visible beams. There were also some non-laser beam weapons that hit instantly.
* Escape Velocity called FATE. The game's FAQ reveals that TCTLIDS was supposed to stand for "The Creature That Lives In Deep Space" before being removed from the Nova universe during its development.
* Escape Velocity confirms the mysterious project that's "sure to bring humanity to its knees" mentioned at the end (and brushed off as too important to bring a human in on) was the Dreadnaught.
* Escape Velocity eventually, but that at that point the UE was stronger strategically (the frontier is pushed significantly closer to Voinia in the UE storylines, and several important resource-extraction worlds are denied to the Voinians), militarily (the UE was able to use the aforementioned as well as a number of other factors to expand and upgun its fleet) and technologically (plenty of Voinian technology was reverse-engineered, and mutually beneficial commercial ties were established with a friendlier advanced alien society), leaving it rather less of a war-winner than the Voinians had hoped for.
* Escape Velocity for everything except pure kinetic weapons, which are fairly uncommon. Missiles detonate at the end of their range, while shots from plasma casters fade out. However, weapon velocity and range are completely independent of ship velocity, which makes it fairly safe to engage a capital ship by retreating from it at the same speed it pursues just at the edge of proton cannon range.
* Escape Velocity. (Fortunately, there's also the fourth faction: the Rebellion against the Bureau.)
* Escape Velocity games feature all kinds of planets, including gas giants. The most you'll ever see of one, though, is a little pre-rendered image. Many of the ones that you can actually interact with are habitable for one or another reason.
* Escape Velocity games was an NPC who would remind players to register (pay for) the shareware game. After the 30 day trial period ended, the Cap'n would start warping in to attack your starship every chance she got, usually resulting in a very quick death. However, while Hector was invincible to conventional attack, it was possible to kill or disable her with splash damage in the original game.
* Escape Velocity had a dozen planets named "New" something, most notably New England and New Ireland. Nova also has Neo New York, though that colony has long since been abandoned when the game starts
* Escape Velocity has a bunch of planets and moons named this way. In the third game there's a planet called Neo New York that was apparently depopulated by a plague.

* Escape Velocity has Hyper News Network (the Federation's news service), as well as two News Services, two News Corps, two Info Commands, one Info Service and one Intel Corps — all of them with three-letter acronyms.
* Escape Velocity have largely mastered it, with several planets listed as terraformed in the "communicate with planet" dialog box.
* Escape Velocity if your ship starts to break up. Oh, and you'll have to issue the escape command manually... unless you buy the auto-eject feature for an additional fee.
* Escape Velocity is otherwise a totally by-the-books high-tech space opera setting (as are the other two games), the Vell-Os are a faction of psychic Hindu mystics whose "spaceships" are revealed to actually be giant telekinetic projections the size of a star destroyer created (and manned) by one Vell-Os.
* Escape Velocity kind) tens of thousands of years after the game ends.
* Escape Velocity Krypt believes itself to be the only intelligent creature in the universe.
* Escape Velocity limits this trope (there is a top speed, but the only circumstance in which such ships slow down on their own is if they had topped that speed with afterburners). Disabled ships, however, slow to a halt (presumably to make it easier to dock with them), and ships with inertial dampeners only move while engines are running.
* Escape Velocity Maneuver", where you run away from enemy ships, then turn your ship 180 degrees (you'll still keep moving in the original direction!) and fire at the ships. You will be out of range of the enemy while they're still in range of you, even with non-lightspeed weapons.
* Escape Velocity, many worlds have a "special" commodity that is generally only traded at two or three worlds (some supplying it, others demanding it), which are either valuable or just interesting flavor.
* Escape Velocity — the equivalent there is solar panels). Mechanically they increase your fuel regeneration rate (which is pretty useful for longer sojourns, since the standard rate is zero).
* Escape Velocity mode makes buying an escape pod a wise move. There's an auto-eject option which automatically launches it if your ship is breaking up.
* Escape Velocity more common, being mounted on all their capital ships save the Dragon (frigate analog).
* Escape Velocity: Nova, but randomly, to other ends. By re-entering the wormholes it's possible to randomly cycle through them and end up the where you want.
* Escape Velocity: Nova fit this trope well. Their technology, which is head and shoulders above the rest of the galaxy, allows them to create serene, idyllic worlds to match their culture, even on planets specializing in industries like mining and manufacturing.
* Escape Velocity Nova. Polaris scientists managed to reverse engineer the aliens' ability to form energy beams and cloak themselves at will, neutralizing any advantage the Wraith had in battle. They are currently camped out deep in uncolonized space, defending themselves when possible but wishing the humans would simply leave them alone.
* Escape Velocity Nova will deposit you out of another random wormhole in the galaxy.
* Escape Velocity: Nova, would often respond to questions regarding some of the more mysterious elements of the game universe with a simple "*Cryptic grin*".
* Escape Velocity, railgun rails and ammunition must be made of, naturally, a material with high conductivity - "something cheap, like copper or gold". One can only theorize that, somewhere in the game's universe, there exists a planet(s) with obscene amounts of the stuff. Metal even seems to have more worth, being a tradable commodity.
* Escape Velocity-saucer as the basis of their ship designs (cut vertically), but the shipyard description of their Scout class mentions that earlier generations of it were full saucers.
* Escape Velocity's Auroran storyline normally starts with the player being hired as a blockade runner and then doing multiple supply runs to the Dominance station.

Both the Federation and Pirate (really more smuggler, but it's officially called Pirate) storylines have the player hired to bring supplies to several Federation border outposts past Auroran raiders.
* Escape Velocity sequels began life as total conversion projects for the previous game.
* Escape Velocity series have more firepower than other ships their faction has access to. This is probably because fighter bays can be installed on any ship with enough room, and anything big enough to carry much heavy firepower tends to be enormous anyways.
* Escape Velocity series may lock onto the originating ship if jammed, provided that weapon has a particular Boolean flag turned on in its wëap resource. The games don't feature any examples, but the modders have added them.
* Escape Velocity series of shareware games use most of these aspects. Spaceships are ships, bridges are either at the front or on top, 2-d space, sound, only a few days to the next system, etc. However, until the player buys and "inertial damper," there is no friction in space (unless, oddly enough, a ship is disabled), which makes combat turn out like jousting.
* Escape Velocity series will just be the usual yellow-orange-red atmospheric looking fireballs, the very most awesome ships and weapons exploding will make planer and ring shockwaves in pretty colors.
* Escape Velocity's gameplay for a number of reasons, which can lead to some exciting nailbiters:
* Escape Velocity ships may also send distress calls when under attack.
* Escape Velocity's HyperMelee. This also makes it far easier to flood the screen with weapons fire.
* Escape Velocity, since each game in the trilogy takes place in a new universe:
* Escape Velocity's more advanced mechanics make the game piracy a bit more believable: the player's ship can actually be disabled, unlike in the other games, and pirates can and will board ships they disable to steal money or cargo.
* Escape Velocity: Some missions allow the PC to earn money by transporting garbage to uninhabited planets and dumping it.
* Escape Velocity that have to be charted with unmanned probes. It's not even entirely clear how much of the Milky Way is explored.
* Escape Velocity that you throw at your enemy to distract them from the big guns on the mothership. Averted with escape pods, which don't actually exist as collision-mapped objects (they shoot out a little ways from a disintegrating starship, then disappear).
* Escape Velocity. The flavor text states that although the Polaris have only settled 3% of Tre'ar Helonis's surface area, that's enough to grow enough food to feed the entire Polaris population in the galaxy.
* Escape Velocity the immediate political changes in other storylines isn't even represented in-game once you complete the storyline. The Pirate epilogue also only extends to what happens right after you complete the final mission, while the other storylines' goes at least a few decades ahead.
* Escape Velocity. There are also (equally unused but possible in the third) repulsion beams, who mechanically are simply beams with a positive number in the impact field but (like tractor beams) doing zero damage.
* Escape Velocity. They are not shown as looked down upon by other castes, but many of them consider their Casteless Caste a mark of shame for themselves and their peers (one usually bubbly Mu'hari is seen depressed on the day she must swear in new members to the caste)
* Escape Velocity: This is the method by which enemy ships are captured. The chance of success depends on how many crew the boarding and boarded vessels have. a relative "power" rating for the ships in question, and the presence (and number) of any "Marine Platoon" outfits equipped on the boarding ship.
* Escape Velocity tribe led by a prince named Vell-os. They have various psychic powers, which they used to leave Earth for deep space circa 980 AD. They also have an organ that produces nanites which complement their powers.
* Escape Velocity would show a schematic for any targeted ship in the status

window.
* Escape Velocity years use the suffix "NC", for "New Calendar". The game starts in 1177 NC; 0 NC was 2780 AD, the year FTL inventor Omata Kane died.
* Escape Velocity, you can take random missions to dump garbage on uninhabited worlds.
* Escape Velocity, you could mine asteroids for water, metal and opals.
* escaping from the jail cell comic book. Princess Toadstool fools the Koopalings into coming into her cell in this way, then beats them up and locks them in.
* Escaping Peril, Peril gets frustrated at Turtle for popping up just when she was finally alone with Clay.
* Escapism, and learning to overcome it and accept hard truths of life, is one of the key themes of
* "Escapism". Obviously, no one had yet told her that Steven can do that.
* "Escapism", resulting in an episode more lighthearted than the ones before and after it.
* Escapism. There's no interactivity beyond basic movement, and the graphics are rendered in an archaic 8-bit style that conserves only the most important details.
* Escapist Dream has a unique setting. The story takes place in a virtual reality world inhabited by comic nerds, anime otakus, gamers, and all sorts of geeks; all of whom created their own districts and societies inside.
* Escapist Dream: It's wacky premise basically spells most of what it is. It is a story about a virtual reality world where geeks can live a life similar to their favorite comic book, anime, video game, and literary stories. While marketed as a science fiction, it has elements of superhero fiction, Game Lit, anime, action, horror and so many more in the speculative fiction totem. It is most famous as an example of geeky pop culture fiction due to its number of references to comics, anime, video games, and books.
* Escapist Dream. The book tells the story about a virtual reality world that can grant anyone the fun escapist lives they have always wanted. You want to gain superpowers and become a superhero, live a life of an anime character, or just be with your deceased wife and kid? Come and visit this world. The major theme of this book is how escapism can drove some into irrationality and insanity, especially with those who have lost something in the real world.
* Escapist Dream. These endings pretty much ties the theme of the book: that no matter how much the geeks try to escape the real world into a place made solely for them, the problems of the real world would continue to hound them and force them to face it.
* Escapist Dream was "better than Ready Player One" in his article. For the most part, Ernest Cline's novel seems to have the better writing since it is a traditionally published book compared to its self-published counterpart, but Louis Bulaong's novel is noted to have better likeable characters and references that made sense.
* Escapist had an episode where the titular heroes-for-hire realized they were working for the bad guys. They immediately switched sides.
* Escapist, which uses a mix of original cartoon drawings and found images (often macros). In one episode, the line "things we can't even imagine" is accompanied by cartoonist Allison Theus at her drawing board saying "Things we can't even imagine? How the f**k am I supposed to draw that?!"
* Escargoon screams this in an earlier episode, "Sweet & Sour Puss", when he, despite not knowing that Togeira took away his ability to get angry, finally realizes that nothing that happens to and around King Dedede can make him angry and he stays calm and nice through it all.
* Escaton. The version that the game tells us are told in taverns all over Jadame, on the other hand, has him put plot-relevant magical keys on the table in front of him, tell you that if they disappear while he isn't watching, "how will he know how they went missing?", and then turn around to study the wall.
* Eschalon does this in several instances. It ain't a minotaur, it's a Taurax. It ain't a giant spider, it's a Phase Hunter. It ain't a giant black beetle, it's a Goliath Borehead.

* Eschalon. It's completely separate from being agnostic, in which case you get no divine bonuses or penalties. Made curious by the fact that the player could presumably see divine magic working on other people, so one has to wonder how he keeps up that suspension of (dis?)belief.
* Escher gangs have access to the 'Nightshade' chem-thrower. Developed from the gas injectors used in House Escher's gene-labs, the chem-thrower is able to fill a corridor with clouds of chemical fog. The exact nature of the gas emitted by the chem-thrower varies from the relatively mild choke gas to insidious bio-toxins that attack the target's cellular structure, liquefying their flesh and internal organs. In-game chem-throwers are a deadly weapon that causes has a chance to inflict an Injury against an opponent without any saves and ignores their Wounds characteristic but can be resisted with respirators.
* eschew shoes have all regularly or semi-regularly performed barefoot at some point in their careers.
* Escort Distraction: One person takes an unwanted third party elsewhere.
* Escort/Light CarrierTypically around the same size as an assault carrier, but trades in most of the assault's guns for a larger fighter wing. An escort carrier rarely shows up on its own.
* Escort Mission has a demolitions expert carrying explosives that will "take out half the mountain" if set off.
* Escort Mission has a fear of clocks and gears, which even he admits is irrational. So, naturally, that takes place in the Old Clockworks mansion. And you've gotta carry him past that which scares him.
* Escort Mission. Let her wander offscreen and she gets kidnapped instantly.
* Escort Mission, often while his position was under heavy North Korean attack.
* Escort Missions. "Essential" characters can only be knocked out, not killed, and will spring back up after a few seconds. Similarly, Quest Items are clearly marked as such and cannot be removed from your inventory until their associated quest is completed to prevent that quest from being unwinnable.
* Escort Mission that made use of an inifinite power up to be fought. There's probably others too. The developers all but admitted they had gotten very bored of making Spyro during the second game and decided to all out experiment with this one.
* "Escort" or "transport" services like these are used or recommended by many "troubled teen" programs, and are one of the biggest
* Escorts protect other ships from smaller, faster craft — much like the original role of the Destroyer. But thanks to their less impressive name, Escorts have been largely limited to a background role. And more often than not, they end up as red shirts — they tend to be the first to go in a fight, more so than any other tin-can ships. A bit of history: Destroyer Escorts (DE) were used in WWII to protect merchant convoys. They were actually smaller than fleet Destroyers and were much cheaper.
* E series, where contestants would receive an "Elephant in the Room Bonus" for spotting the elephant as the answer to one of the questions during the episode.
* Es, es, es und es about a journeyman's reasons to leave town contains the line "Ihr Essen war so zugericht', manchmal fraßen's selbst die Schweine nicht" ("her food was prepared in a way that sometimes even the pigs wouldn't eat it").
* Es fiel ein Reif in der Frühlingsnacht ("They ran far into the strange land, / They had neither fortune nor star, / They perished, they died.")
* Esham used "the Witch" to refer to Satan earlier, on his 1992 song "Acid".
* Eska and Bolin. While it was seen as comic relief, Eska's behavior drifts off into dangerous territory. The scene where she "proposes" to Bolin is the reason why this couple is here. Fans who have seen this claim that the necklace Eska gave Bolin looks like a BDSM collar. There have also been thoughts about what their first night together would have been like, some of them including Desna watching the couple have sex. What completes this is Eska's face when she's approaching Varrick's yacht. Even though
* Eska pulls an impressive one on Bolin at the end of Book 2, nearly giving him (and the viewers) a heart-attack.

* Eskimo Bob: In the special "Return of the girl", Bob and Alfonzo (or rather their clones) can do the Composite example by doing the animation the originals do in the beginning of each episode. The Penguin and Sams can do the power booster example with the help of the alien business men. And The Fish in a space ship can do this with the Fishticons.
* Eskimo Day, Neil from a family of modest means meets Pippa from a wealthy family, when they have interviews at the university of Cambridge. This difference does not bother them, but it matters to their parents.
* Eskimos Aren't Real: An idiot that actually believes that real things, such as ponies or Hawaii, don't exist.
* Eskimos Aren't Real, but here the disbelieved thing is common, not bizarre or kitschy.
* Eskimos Aren't Real: Someone believes that something real doesn't exist.
* Eskimos. Or even many more than English's "slush", "sleet", "blizzard", "powder", and so on. They really only have two: Snow on the ground, and snow in the air. Everything else comes from combining these with other words, or adding adjectives.
* Esme & Roy, Hugo is tired of his sister Fig never having to do anything for herself because she's a baby, so he dresses up as a baby and reverts to babyhood himself.
* Esme & Roy, Snugs is getting cold but really wants to keep playing outside. Esme and Roy bundle him up in a bunch of winter gear, so much that it completely covers his mouth. Esme asks what he thinks and he replies that "It's kind of hard to talk with all this stuff on." It comes out completely muffled, so Esme asks "What?" and he says again. She asks Roy if he caught any of that and Roy replies "He said..." and then imitates the muffled speech. Snugs then takes off the clothing and repeats it. "Hard to move too."
* Esme & Roy teaches kids how to control their emotions and problem solve.
* Esme & Roy, "The Monster Shimmy" song is record-needle scratched and ended abruptly when Esme and Roy realize despite their best song and dance efforts in getting Fig to put on her raincoat and hat, she's taken them off.
* Esme & Roy uses this trope in almost every episode whenever every little monster cries. And Esme shows the glitter jar to calm each little monster down.
* Esme and Astrid are both in their late 30's/40's, yet are attracted to 24 year old Gabriel, with Astrid actively competing to become his mate, though this is partly because he's the most likely candidate to become the pack's next leader.
* ES Members are commonly sent on suicide missions because GOTT can always resurrect them.
* Esmeralda battle boat in 1879, he immediately wrote the Esmeralda captain's widow praising her dead husband's bravery and sent her the guy's personal effects.
* Esmeralda escapes the guards by jumping into the crowd, who carry her off to safety.
* Esmeralda Iceworth and Lily Haverlock. Both are old-fashioned and mainly ship traditional couples, but while Lily is polite about her preferences and a classic
* Esmeralda is unrequitedly in love with Phoebus, who in the book is a jerk.
* Esmeralda. The most explanation we get is, she has some vague Magic, or something?
* Esme's backstory is how she met Carlisle and was smitten with him as a teenager, was abused by her husband as an adult, and was saved and turned into a vampire by Carlisle.
* Esme Squallor's personal library full of books cataloging what was in and out in various months, years, etc.
* Esoboks, a kind of bestial psychopomps, enjoy eating undead flesh, and pursue and ravenously consume undead creatures at every opportunity.
* Esophagogastroduodenoscopy is a type of endoscopy to investigate inside the stomach with a camera through the mouth and the esophagus.
* Esoteric Happy Ending: An ending wants to present itself as a happy ending, but it rubs the audience off the wrong way.
* Esoteric Happy Ending? It's in line with what we believe; therefore, it's a Happy Ending!

* Esoteric Happy Ending only seems to be considered as such by the author.
* Esoteric Happy Ending: The audience might not think this ending is happy for us, but we do!
* Esoteric Happy Ending: The creator is presumed to be the only one who considers this to be idealistic.
* Esoteric Happy Ending: The ending is supposed to be happy, but the audience disagrees.
* Esoteric Happy Ending: When the author thinks the story ends on a happy note.
* Esoteric Happy Ending - when the 'happy' ending doesn't sound like one
* Esoteric Happy Ending: You, the creator, are the only one who thinks the ending's happy.
* Esoteric Hitlerism is basically the idea of the Ghostapo turned into a new religious movement (and likely inspiration for
* Esoteric movements within religions often take the stance that their holy texts have hidden messages accessible only to those who have been "illuminated" with supernatural wisdom and understanding, and that understanding these messages grants a deeper knowledge (and, in some cases, more control) regarding how the universe works. The most famous of these is the Kabbalistic tradition within Judaism, but there are many others. A less literal version of this is pretty much universal in any religion concurrent with or predating early Christianity. While it wasn't usually a literal book due to low literacy rates even among priests, secret rituals and prayers giving the priest greater influence on various things were pretty much par for the course, especially in early Hinduism and the Roman mystery cults. Some
* E's Otherwise has a "species" of human suddenly flare up with incredible psychic power, but normal humans ostracize them.
* E's Otherwise is not seen alive or dead after the explosion in the final episode.
* Espada da Galáxia subverted this by having both Terrestrials and Metalians call themselves 'humans' on first contact. They agree to call themselves after their origin planets thereafter.
* Espada Da Galaxia, the metalians' method of space traveling consists of putting "command bridges" and Space Folders inside Space Whales, beings made of living metal whose power source is similar to that of a star. They not only have a behavior much similar to that of loner whales, they live as long as a star tends to, and have natural force fields!
* ESP and we get to see how having ESP can both help and hinder the path to true love.
* especially ammo bins, causing them to cook off and add to the carnage.
* especially applies if, as heretical theologians suggest, the dot is actually a bit of fly poo. Apparently if the dot was moved slightly more it would mean "licorice". This (well, the first part, not the licorice) is a reference to the split between the Eastern and Western Churches over a Greek word that could mean either 'of God' or 'of man' in the Nicaean Creed depending on if it differed by an iota (the smallest Greek letter). Hence the phrase 'not one iota of difference'.
* , especially as around 300 people died (many of them high school students), and the captain was found guilty of homicide and given a life sentence.
* Especially as in at least one episode it was shown he was a Squad Leader of a group of soldiers in World War II and a bonafide
* Especially as regards imports, censorship standards can be a problem. If a work is
* , especially at the climax, where the protagonist manages to successfully finish off the second-in-command of Al Qaeda but is quickly forgotten after his unit learns that one of the other soldiers found a rare monster at the same site.
* Especially awesome given that her supernatural combat enhancements had just worn off, so she was trying to continue to distract Roy by stripping. Also, she's a shapeshifter and a succubus attempting to drain levels via sexual contact.
* Especially awful villains go to the Birdcage, an ultra prison designed so that nobody leaves, ever. The whole complex is suspended inside a hollowed mountain, which is a perfect vacuum and guarded by an army of drones. Any attempt to breach the walls, even with super powers, will cause the whole complex to suffocate and

the drones to start shooting whoever's left. Other defenses, such as spatial warping, are suspected but unconfirmed. The mountain is also hardened against electricity and radiation to ensure no communication can enter or leave. Prisoners get monthly deliveries of newspapers, food, uniforms, and novels, but otherwise must fend for themselves.
* Especially awkward is EVE's shuttle, which extends down a container capsule, then extends an arm that removes EVE's pod from the capsule,
* Especially bad with Jack, who biotically punches three massive YMIR mechs — each a substantial boss fight on their own — into shreds. Actual abilities? Two long-range biotic attacks, an
* Especially because she claimed repeatedly that she'd been clean and sober for over a year, which led to more than one person saying what amounted to, "Honey, if you're not on drugs, you should be."
* especially but it's likely that Vitani is Scar's daughter, making her the second cousin of Simba's cubs.
* Especially comes up during reclamations and adventurer modes focused on lost fortresses.
* Especially considering his tendency to tie up and imprison the Doctor, once for an entire year! It would be harder to believe he
* Especially considering she used it to hand Luke Skywalker his ass on a plate in their big showdown.
* Especially considering Umineko can be argued as being in the fantasy genre. Magic makes up a very large part of the series. Whether it's real or not is an important concept of the game Beatrice and Battler play.
* especially Daisy/Whore) (???/Blur), and Lily likes to add "-dear" to names.
* especially designed to mess with their heads. Turns out that these were actually robots meant to perfectly emulate the two heroes, and realize that they're just imperfect copies because they didn't have either hero's mental fortitude.
* Especially difficult is the "No Wood Challenge", where players must eventually defeat the Ender Dragon, without ever allowing wood into the inventory. This includes chests, sticks, and crafting tables. However, you can still use Crafting Tables, assuming one had been placed during world generation. If this isn't enough of a challenge, attempt it in Hardcore mode.
* especially difficult process to write out and calculate. People without the money to hire an accountant tend to never quite feel they've gotten it right, always worrying about whether they took too large a deduction or could have gotten a slightly larger refund.
* Especially during bleak economic times, this shows up in commercials attempting to sell "investors' kits" for the purchasing of stable commodities, particularly gold (at least in the United States). The pitch is that you're part of a wise secret club that's using information that those Wall Street fatcats don't want you to know about in order to make yourself recession-proof.
* Especially earlier in the series, the Rangers specialize in being discreet, as evidenced by the fact that they show up
* especially English and Language Arts books. Paragraphs about paragraphs, sentences about sentences, topic sentences about topic sentences, and so forth.
* especially era. About a third of his stories included refinery settings doubling for research facilities or mining operations.
* Especially Falco. That's his thing. He's even slightly more competent in the actual gameplay.
* Especially for kids shows, it will include the most popular songs from the series with one unique song, so the "live show" CD
* Especially for the fights involving the actual Eva in both the original series and
* Especially from the second half of the 1960s on, many album covers by rock bands and artists have become more artsy, especially by psychedelic and progressive rock bands. Art photographers, painters and designers were hired to provide beautifully crafted covers and gatefolds that had stunning visuals, lots of
* Especially funny as the regular police try using spike strips to stop the tank.

* Especially funny considering the last time this pair of actors worked together, on
* Especially funny in an early episode when Homer called Bart over for a father-son talk: Bart, assuming he was in trouble, immediately pulled down his shorts and underpants and threw himself across Homer's knees! Subverted.
* especially funny since Desler allowed it to happen to ferret out the conspirators against him: The Yamato manages to catch the last portal out before the hub blows up. This leaves most of Gamilas vast fleet to crawl back home without the portals... and unable to catch up to the Yamato before it reaches their capital planet.
* especially Gilbert) are quite lovely when the mangaka puts them in pretty pretty dresses in an omake.
* Especially given "Initiations". Chakotay is given a phaser and told to kill Kar, a Kazon
* Especially good because the Dark Angels and Space Wolves can't stand each other. Though it's more of a friendly rivalry.
* Especially highlighted with the Ugmon, a type of monster where an ugly person fixates on their appearance, becoming an absolutely
* especially his version of Communism, which (unusually for a collective ideology) stars him as the most important 'Communism builder'. However, everything is more connected than it initially appears, and every diversion ends up being a feature in the solution of the mystery.
* Especially housekeeping, or child care, or laundry, or making dinner. And if the wife is too sick or busy to cook, time to call for pizza!
* especially if he can steal a smaller sum and anger a larger number of people.
* especially if it's the rubber game (the last in the series, usually game seven).
* especially if the retail launch goes fine, but the backer launch doesn't), or engage in serious financial mismanagement or outright fraud.
* especially if they begin to suffer from senility in their old age and often won't even recognize you, much less act as the people you knew.
* especially if they're a healer., earning them a bit of fear and/or hatred by others.
* Especially if what you wanted when making the earlier plan contradicts what you want now.
* especially if you remember the common aspect of ghost stories that they lightly disturb objects with their presence alone.
* especially, including massive time sink content that provide no meaningful rewards like the Champion's Challenge (1/5k chance to get each scroll from monsters that have no meaningful drops, and there's 12 of them), killing 4000 chompy birds, 1300 black knights, and much more. What does trimming it do? Slightly changes the emote.
* Especially in comparison to a similar scene later in the series where the bullied Nishi
* Especially in developing countries, for example in Mexico: Not only Macs are more expensive in Mexico compared with even branded PCs (not to mention assembled PCs) the only places in that country you will find someone using Macs are music studios, TV and radio stations and universities and even in Mexican universities, the use of a Mac is
* Especially in earlier days and editions, when the game's focus was more on world simulation and the detailed logistics of adventuring (counting arrows and torches, keeping track of food and water, deciding who should carry what loot...) were emphasized more, advice on dungeon design would almost inevitably manage to squeeze in a bit about not forgetting that any place inhabited by intelligent living creatures had better include toilets of
* Especially in earlier episodes, Earthling is used as a derogatory term for humans, usually when they've just been conquered... again.
* especially infuriatingly), the show writes him leaving Erin behind to go on a three-month boat trip with his family's old yacht and barely keeping contact with her, conveniently leaving the new guy Pete to comfort her.

* Especially in high profile cases like these, it's now fairly common practice for police not to release a key detail about the crime scene or victim, so they can easily tell that a confession is false if the confessor doesn't know that detail.
* Especially in modern times, it's (one of) the Flash(es) that do this. As seen in the Justice League TV series, but prior to that, it was the Flash, due to being a poster boy for
* Especially in the 1930s, the Nazis regularly claimed that Shakespeare was Aryan and his plays were written in German.
* especially in the 2008 NFL season, the Wildcat formation. On the defensive side, there's the 46 Defense, the zone blitz, and the Tampa 2. There's a reason why the NFL is often called a "copycat league".
* Especially in the age of direct creator support and crowdfunding, some attempt to use their "fan" work for actual monetary support or funding for unrelated projects. The line between good faith and bad faith can be thin, and make things difficult for
* Especially in the appearances after his first, Doctor Octopus becomes a cunning
* Especially in the beginning, with most of Miles' interactions at his new school, which can be summed up with "How much can Morales humiliate himself in front of his schoolmates?" Starting with his father bringing him to school in a police car and forcing his son to say "I love you..." before the other students.
* Especially in the d20 fork, there are a lot of transhuman options (of varying degrees of alteration from the base norm) available for good characters (good, of course, being by its nature opposed to a lot of the classic symptoms of a
* Especially in the early to mid-1960s a lot of rock groups looked and sounded like Beatle clones:
* Especially in the first season, Tony is constantly ducking out of class and other events to go to the bathroom, to the point where Happy starts commenting occasionally on his apparent digestive troubles.
* Especially in the Golden Age, a lot of super-heroes had Cool Cars. Star-Spangled Kid had
* Especially in the IWC (Internet Wrestling Community). There were a lot more haters of
* especially in the second season with the gradual reveal that under a quiet and reasonably cheerful town it turns out there are mysterious otherworldly beings, including one who delights in possessing people's bodies and committing brutal murders, though he is found and apparently defeated
* Especially in the suburbs and rural areas of the northeastern US and in rural Germany, but also in other places around the world that rely on volunteer firefighters, these sirens will often be instead used to alert volunteer firefighters, almost always alongside pagers. However, many communities have begun to remove their fire sirens due to noise complaints and rising call volumes.
* especially in, well, Complex, where rank, soldier population, and morale system is introduced). PDS started out as...a small mod for point defense systems, which became the popular mod they are now. The Tactical Fleet Simulator mod aims somewhat differently unlike the former two. While Complex and PDS emphasizes grand strategy with a lot of decked out units and careful planning, TFS gives decked out units purposely built for intense, fast-paced combats which ups the "tactics" aspect more than "strategy" aspect, which the game is already good for anyway.
* especially, it's safe to say that Jason hates the Joker even more than Bruce does.
* Especially Kirk could verge on this trope: a naval Captain does have an equivalent NATO officer code of OF-5 (the same as a Colonel), and Kirk repeatedly went down to planets himself and got into dangerous situations (it's a rare
* especially, met up again, and then finally headed down to Fishman island, that was chapter 602. For those keeping track, that's exactly 112 chapters, not even including the month-long hiatus that the manga went on for the time skip.
* ESPECIALLY Miracles (Veemon -> Magnamon — a HOLY ***ING KNIGHT and therefore a Mega in all but name) and Destiny (Terriermon -> Gold Rapidmon - a variant of an Ultimate level).

* Especially modern humans. Archaic ones seemed to be more peaceful, though that could be due to smaller numbers only.
* especially New Yorkers, with death and mayhem on a rather regular basis.
* Especially notable as each of the three has a specialty they are generally considered unrivaled at. Shirou specializes in Japanese food as the protagonist, highlighting his fondness for traditional things, like his classical Japanese-style house, the ancient Japanese art of archery, and swords. Sakura specializes in Western food but often tries Japanese food to appeal to Shirou, highlighting the Matou family's Western-style house and diminishing magic from leaving their native lands and insisting on staying in a foreign land that did not suit them. Rin specializes in Chinese food, which at first seems weird as she also lives in a Western-style house and has nothing obviously Chinese about her or her magic/interests, but cleverly foreshadows
* Especially notable in Saber's case, as she was betrayed by Kiritsugu in
* Especially notable in that Akihiko —the only one in the group who has known Mitsuru for several years, a very confident boxer, and the most self-assured character in the game —
* Especially notable in the 2003 version, since the human body she was created from was Ishbalan, meaning she would have had significantly
* Especially notable is General David Petraeus' field manual on Counter-insurgency, for
* Especially notable is that, according to one of the final battles, joining a game already in progress and ganging up on a single person is allowed by the rules. Because ganging up equals the power of friendship. This is despite the villains being condemned for it earlier in the show.
* Especially notable is the countries that formerly comprised Yugoslavia. Tito, the strongman who dominated the country for most of its history, was a savvy politician who managed to prevent Russia from taking direct control of Yugoslavia's operations. This spared his people many of the abuses that other Soviet satellites experienced. This, as well as his success at suppressing internal conflict between ethnic groups (much more impressive given the conflicts of the '90s), makes many Balkan people nostalgic for his rule.
* especially not helmets with face coverings). In reality, this is NEVER done, for what should be obvious reasons - even a wooden weapon is fully capable of killing someone if it lands in the right spot with sufficient power. If live sparring takes place, it is always done with full body armour, including helmets with face screens, and never using actual bladed weapons.
* Especially Numbuhs One and Five. They've both been in life-threatening situations too many times to count. Numbuh Five's got the wisdom of somebody at least twice her age, and Numbuh One has a relationship with his girlfriend that some grown men would envy.
* Especially odd was the use of Swahili by such groups, as it is an East African language that none of the West African slaves would have understood or even heard of. They actually spoke a wide variety of tongues — Fon, Wolof, Yoruba, Ibo, Fula, etc., but virtually none would have spoken Swahili.
* especially old-timey and/or supernatural ones. But because of the Undertaker's popularity and longevity with the WWE, he's been allowed to keep his 1800's mortician/wrestling zombie schtick, as all attempts at updating the character, like making him a biker, never really caught on (though the biker look does come back from time to time, since it's a real-life hobby of his).
* Especially O'Neill. Then again, that could just be the actor noting how small the distance really is from his previous role in
* Especially on his appearances in I Love the (Era), when he's... not so
* especially on the internet says that this is why Anvil tries to dress as femininely as possible and sports long hair; she's insecure about her body being seen as "manly".
* Especially pairing Usagi with some other guy besides Mamoru. There are even two dedicated categories for
* especially Part of the misdirect is Duval acting as though this problem has

followed him for years... But after the reveal the whole situation turns absurd, as at this point in time Sanji had only had his wanted poster for, at MOST, a couple weeks.
* Especially present in the Low Chaos final mission, Light At The End. At this point in the game, it's effectively shunted you into one of two endings, and depending on the level name, that's the ending you'll get no matter how many high or low chaos actions you do. On low chaos and playing as a conservative, stealthy ghost,
* especially prone to this and will always get a greater share of the credit or blame than they deserve. The goalkeeper position in hockey and soccer/football are often this trope as well.
* Especially prone to this treatment are usually rap songs since they usually contain quite a bit of vulgarity or general raunch that even rap fans admit is pretty extreme. Take for example, a version of the page for Lil Kim's song "How Many Licks?"
* especially) release versions of a figure or vehicle from a couple years ago with a new color scheme, and attempt to pass it off as a new one. Usually by this time the original is no longer for sale and has been dropped from the listing on the back of the box/card. Amusingly, sometimes the "new" figure will have completely new flavor text and new names for its special actions and accessories, even though it's just describing the same thing in different words.
* especially say he felt "like [he] shot his own horse" when he did, but he still did, and so did the others. (So all this botched plan accomplished was to prove that COBRA can't claim that the Joes have better equipment as an excuse for their failures...)
* especially sessions. This sound (and experimentation with Paul's melodic bass playing and Ringo's tom-tom-heavy drumming techniques) proved very influential and paved the way for how bass and drums were recorded even in American studios (as well as The Beatles' music from then on).
* Especially since at the end they mention a "hydrogen core cluster intelligence" in a class 9 star that wants to get friendly, unless they're referring to something like a Matroishka Brain.
* Especially since Mussolini started out as a leftist, then had a change of heart. Fascism in general is well known for being the exemplar of
* Especially since the Chinese originally assumed that the British government had nothing to do with the opium trade and thus felt that there'd be no consequences to destroying all of the opium in the warehouses. The Royal Navy showed them the error of their thinking.
* Especially since the scene was actually filmed in an old mine (now a tourist trap) in the Highlands.
* Especially so in the former case because you've already been initiated as a Space Marine.
* especially taken out for those purposes before being secured back in the Arms Room afterward, with strict accountability of every single weapon.
* Especially talented and intelligent children may often receive poor grades for a variety of reasons. Studies have shown that intelligence can manifest in many different ways. For example, a kid with good tactile intelligence might perform poorly in mathematics even if he has an intrinsic understanding of mechanics. Teaching styles often only address certain kinds of intelligence, putting certain children at a disadvantage. Intelligent children with learning disabilities such as dyslexia can also fall behind if their needs are not properly addressed.
* especially that use solid fuel pellets (<1% efficient to the MSR's >90% fuel efficiency). The planned follow up Molten Salt Breeder Reactor (the more recently proposed Liquid Fluoride Thorium Reactor, or LFTR (pronounced "lifter") for short, is essentially the MSBR brought into the 21st century.) was never built.
* Especially the Brak's Comedy Gold skits, in which Brak, attempting to do stand-up, would often play every joke he told straight.
* Especially the case in any of the games that allow rewatching the cutscenes but with the ability to switch the characters/models used. Old ladies with assault

rifles and handbags storming the freighter at the beginning of MGS2? Priceless.
* especially the Lich King), black dragons, Kalecgos-when-mind-controlled-and-forced-to-attack-you, and good grief I could go on for HOURS. Warcraft BREATHES this trope. It's like some kind of drug to the voice actors.
* Especially the low level Barrens for the Horde. The zone is as exciting as it sounds, and it's extremely big, with plenty of quests that have you scour large areas to find those elusive kodos that
* especially the ones made by Warner Bros., and is usually followed by: "Watch that first step, it's a lulu", or some other variant. Although often, this same phrase was accompanied with a gag where a character would inadvertently walk off the edge of a cliff.
* especially the Presidential primary) is who the media (seeing a pattern here?) claims is "leading". This is why most of the attention is given to the earliest primary states, and why states (like Florida in '08, for instance) jockey for the earliest races.
* Especially the recent revival, which is frequently criticised for being overly sentimental to appeal to a more mainstream audience. The
* especially the tacked on post-Destiel-is canon-and-then-Bury Your Gays
* especially). They tend to refrain from pranking people they respect (such as Dumbledore or McGonagall) or people who they feel are genuinely maligned (like Harry), although neither group is entirely exempt from the occasional quip at their expense.
* especially to turn into a pipe-swinging free-for-all in the streets in five seconds flat.
* especially touchy, later becomes incredibly annoying to almost anybody, to the point that the audience empathizes with those whom the character infuriates.
* Especially tricky because the movie is almost over when he's finally taken down:
* Especially true of Fred and George, who are known for making jokes about everything.
* Especially Undertaker. In general, this applies to whenever a beloved mid-carder with perceived superior skills goes up against an opponent they could not legitimately be expected to defeat for story reasons.
* especially unknown pitchers with no professional experience — typically go through the minor leagues before hitting the majors.
* especially until much later from an Iron Bank envoy (the Bank having found out via Daenerys).
* especially water. The canals and coastline around City 17 all show signs that the oceans have fallen by five meters, filled with garbage, rusting wrecks and radioactive waste everywhere.
* Especially weird because spells like Raise Dead and Resurrection explicitly state they cannot be used on an unwilling target. This prevents someone from being killed by their enemies and raised afterwards while in enemy hands.
* especially what Valerie planned to do now that she knew of Vlad's true nature and the identities of two out of three of the show's half-ghosts.
* , especially when he wants to find out more information from his royal friends
* especially when his goal is to prod and goad whoever he's talking to.
* Especially when Hogie runs to his own mother for help dealing with The Common Cold. She proceeds to save the day
* especially when the tree took it seriously,) but Genma and Nodoka did this too when they were dating.
* especially with dumbphones. Manufacturers sure like to use completely different keys for commands like "space".
* Especially with their already eerie black-and-white designs, X-Chara and later on
* Especially Xander. Throughout the show, he gets jealous when it comes to any girl he's interested in (including Buffy, who he never actually dated) and had a major
* Espen Aarseth actually points out that the game's Azeroth is similar to Florida's Disney World in size (before expansions) and layout in addition to

purpose. "Both contain different thematic zones connected by paths, roads, and rail-based transportation, which cater to differing tastes, age groups, or levels."
* Espen Askeladd, aka Askeladden (the Ash-Lad) from Norwegian folklore qualifies as one of these. Most of the sticky situations he gets in he resolves by outsmarting the baddie. For some examples, he convinces a hungry troll not to eat him by demonstrating his prodigous strength by squeezing the piece of cheese in his pocket, impressing the troll by squeezing "the water from a stone." In a rock-throwing contest, Askeladden grabs a bird out of a nearby bush and gives it a hurl. He is also sometimes called Per Gynt, and formed the basis for the
* Esperanto: The suffix -aĵ- means essentially "the physical substance associated with". "Bovo" (cow) + "-aĵ-" = "bovaĵo" (beef). "Segi" (to saw) + "-aĵ-" = "segaĵo" (sawdust). "Aĵo" by itself just means "stuff".
* Esperanto, the Universal Language) literally mean maness, fatheress and boyess.
* Esperanza has a much stronger relationship with her uncle than her father in
* Esperanza Spalding in the process. Inside the jazz world, Spalding is one of the top contemporary fusion artists, known for incorporating indie rock, art rock, funk and R&B influences into her music.
* Esperanza Spalding. Today, Spalding is solely remembered by mainstream audiences as "that jazz singer who Bieber lost the 2011 Grammy for Best New Artist to."
* Esper Mami: At the start of the series, Mami can only read thoughts clearly if she's touching the person. Later she learns she can do it if they're both touching a metal wire (insulation does not stop the telepathy).
* Esper Mami has the eponymous teenager's telekinetic powers disassemble items when she sneezes — thankfully she is lifting a truck, not a person, when she discovers this. Her teleportation also gets wonky when she's drunk.
* Esper Mami who one day manifests supernatural powers, including teleportation, telepathy, and telekinesis.
* Esper Mami who one day manifests supernatural powers, including teleportation, telepathy, and telekinesis, which she uses to solve mysteries and help people in trouble.
* Esper, one of the Shards of Alara and know for being host to a civilization that keeps everything —
* ESPers, one of them with telekinetic and the other with teleporting ability, showing up on both wings of his plane, to demonstrate him what an ESPer can do in a battle situation. (And to prepare him psychologically for the upcoming practice battle with little Kyousuke.)
* Espers with Powerful Magnetic Field can set it to repel metallic objects, granting them extra protection against certain physical attacks.
* Espgaluda, there are three colors of bullets: red, blue, and purple. Red and blue bullets can be shot away, but purple shots cannot.
* Espill tells the story of a Parisian inn that serves human flesh instead of meat, predating Sweeney Todd by over 300 years.
* Espio the Chameleon is this for Team Chaotix, having studied in the ways of ninjutsu.
* Esplin 9466 (Visser Three) started with a Gedd, just to learn how to infest a host, but quickly moved to a much more effective Hork-Bajir. He actually managed to infest
* ESPN.com's humor section, Page 2, has taken a single comment made by Terrell Owens that seemed to reference this trope and put it through
* ESPN did a preview of the EURO 2012. Apparently Argentina participates in the
* ESPN did a series of NBA commercials. One of them featured Shaquille O'Neil's
* ESPNews when the ESPN's can't carry it", along with repeats of sports talk shows.
* ESPN Extreme Games, and two, because the developer had lost the license to ESPN, which meant that all of the ESPN branding (including pre and post-level cutscenes of ESPN 2 anchor Suzy Kolber) was removed.
* ESPN for a lot of teams, but some lower-profile teams don't view it as harshly.
* ESPN) for Internet streaming, has gotten into the game with commercials that portray thinly-veiled Comcast employees as bullying schoolchildren, forcing you to

give them your lunch money — that is, pay for 400 cable channels you don't want — and making fun of you to their friends when you try to call customer support.
* ESPN for the 2008 WNBA season, and Aloe Blacc's "The Man" for the 2014 NFL Draft.
* ESPN held the "Dream Job" contest, where the winner would become a
* ESPN is Tony Kornheiser's penguin dance, which annoys Michael Wilbon to no end. Once, plushie penguins joined in on the fun.
* ESPN miniseries. However, while Cosell did comment on the fire during ABC's telecast of the game, saying that no one was injured as a result, he never actually said "The Bronx is burning".
* ESPN MLB 2K5 had a gimmick mechanic called Slam Zone; if a pitcher screwed up badly in delivering a pitch or a batter guessed location and pitch correctly, the game would break into a mini-game in which the pitcher and batter tapped the buttons as fast as possible, while the pitch was zoomed in on in slow motion. If the batter won the duel, he would uncork a home run. Not only did it break the immersive TV-like presentation, but was also very much un-sim for a baseball simulation. It wasn't brought back after the one-year experiment.
* ESPN Not because they want updating on their sports news (the show is recorded at 10pm and rebroadcast all night). But because the repetition of the same jokes, catch phrases and tag lines is mesmerizing. And also to catch the sneaky edits that the late night team makes when the first airing screwed something up, and they refilm a segment before the next airing.
* ESPN often does the same thing as TSN, often running shortened (well, two hour block) versions of the night's big game on the network around 2 AM or so on ESPN 2, giving night owls the phrase "Due to time constraints, we'll move ahead to further action."
* ESPN partners with certain college football conferences (particularly the SEC) to show some second or third-rate conference games on limited distribution networks; a viewer has to subscribe to the obscure channel the game is broadcast on or order it through Pay Per View. Unsurprisingly, these games have few sponsors, and throughout the three hours of Florida vs. Crappy Sun Belt Team Destined To Lose By 60 Points viewers will see the same commercials several times.
* ESPN Radio's Mike & Mike have made this an occasional segment. They'll take the radio call of an exciting moment, then add in random bleeps between words, claiming that's how it would sound if co-host Mike Greenberg was doing the call.
* ESPN snagged the rights for the entire tournament. ESPN's coverage was a significant factor in popularizing the tournament and ESPN itself.
* ESPN sportscaster Chris Berman has a nickname for everyone. Usually they are
* ESPN's practices have now moved to regional sports networks, allowing second shifters to catch their games.
* ESPN's Sunday Night Baseball program has been accused of pandering to certain teams' fans. What was once a Sunday night tradition to see two different teams slowly became the Red Sox, Yankees, Dodgers, and Cardinals show, in an attempt to pander to said fans.
* ESPN. Taking it further, he repeatedly complains that ultra-thin fashion models are terrible standards of beauty and holds up athletic cheerleaders as a better one.
* ESPN. The man in question is Asian-American, which added another level of irony. In the end, memes were made and ESPN was embarrassed.
* ESPN the ticker in the bottom-right to promote their next game broadcast, but has since streamlined it into the ticker itself. The tab is still used for breaking news headlines, though.
* ESPN, where ESPN would ultimately play the song so much that Fall Out Boy actually apologized for it becoming an annoyance to college football fans.
* ESPN (who owns 80% of the network) wants to hype up, and even some non-Disney ones.
* E.S. Posthumus has their lyrics in a fictional Latin derivative. People still try to translate them.
* E.S. Posthumus is about a map that was discovered in 1929 and the race of

explorers that could have made this map.
* ESP Ra.De. if you turn on the stage progress widget in the PS4 and Switch ports.
* Espurr also. It has enough psychic energy to blast everything within 300 feet of itself, but it has no control over its power. The only way to protect itself and its environment is closing its ears, so that no power can leak out.
* Espurr, in canon, is a slightly unnerving bipedal kitten with powerful psychic powers. Fandom portrays it as anywhere from a
* Esquire cartoon showed two very proper British explorers up to their necks in you-know-what captioned 'You know Smithers, I've half a mind to struggle.'
* Essais: "Trogus Pompeius says of Herostratus, and Titus Livius of Manlius Capitolinus, that they were more ambitious of a great reputation than of a good one. This is very common; we are more solicitous that men speak of us than how they speak: and it is enough for us that our names are often mentioned, be it after what manner it will."
* Essay (hero), Gimble (neutral) and Triton (villain) are notable examples in the
* essay suggests that one way to avoid a superpowered fetus killing Lois Lane is by having Superman carry the baby instead.
* Essence Drop: Dead enemies drop some intangible thing (usually spheres) that refill your health, magic, etc.
* Essence he is in canon. He doesn't mind appreciating girl's looks, especially much older ones, such as Officer Jenny and Misty's teenage sisters.
* Essence know that there is porn on the internet probably lives under a rock, or at the very least doesn't have any teenage kids.
* "Essence of Life" takes place in 2014, eleven years after a devastating plague.
* essence of nothingness from concepts, which basically means she can pull objects out of thin air, even if they don't exist, because she stole the fact that they don't exist.
* Essence of the Wild operates this way, turning any other creature you cast or otherwise put into play into a copy of itself. Since they will then also have the copying ability...
* essence of this trope. A farmer who's been away from home for a week drives back into town and stops for some cigarettes before he reaches his house. The sheriff pulls up and tells him some bad news...
* Essence, though that has the drawback of keeping them from regaining any Essence they spend on using magic.
* Essendon hasn't won a finals match since 2004, and in most of their finals matches since have lost by large margins.
* Essentia and Alex parting ways, the latter leaving to find a new reality where he can become a better person to cap things off.
* essential. It was also a result of the fact that most Soviet orders had no classes (it being a classless society and all that), so instead you could be awarded the same order or medal several times.
* Essentially all military recruitment ads and war propaganda in every country (and every war) ever. The tendency is for such ads to assert how badass you will become if you join the army/navy and even plays up how tough the training is in order to appeal the
* Essentially every reality show where someone hires an expert to help them fix their business (such as
* Essentially for Orks, it doesn't matter whether you win or lose, as long as you participate.
* Essentially happened with Angel and Drusilla before the show's continuity. Angel, as Angelus drove her mad and killed all her family before turning her into a vampire. However now he's good with a soul while she's evil and crazy.
* essentially is about keeping a Rube Goldberg machine running smoothly.
* essentially made up of multiple rubber bands, it loses a bit of health every time it does something like this. If the rubber bands are on the battlefield, it can call the bands back to it and rejoin with them, regaining a little bit of health.
* Essentially, Middle-earth has three "levels" of divinity. At the top is Eru Iluvatar, the monotheistic creator (Big-G God). Next are the Valar, powerful

angelic personifications of forces and principles (little-g gods or archangels). At the bottom are the Maiar, who belong to the same race (Ainur) as the Valar but are less powerful and generally work for them (demigods or ordinary angels). In general, only Eru is worshipped, and that lightly and indirectly; hymns to the Valar (particularly Varda) show up in the text, but are more like tribute than actual worship. However, Sauron (a corrupted Maia) usually mandates worship of himself as God in territories under his control.
* Essentially, no matter what you do, you're furthering one or more plans of Tzeentch. I'm straining to remember the title, but one short story had a fairly prominent sorcerer engaged in a pitched battle: the forces of Chaos had far greater numbers and armaments, but the defenders were well dug in and supplied. The battle took months, and in the end a last-ditch effort on the part of the Imperials routed the remnants of his army and caused him to flee. The sorcerer feared for his life and soul, but on the first night had a vision from Tzeentch
* Essentially required of characters (including NPC monsters) with superhuman toughness and/or regeneration in
* Essentially the entire concept behind the style of dress of the Team Galactic
* Essentially the entire town of Punxsutawney, Pennsylvania, maintain the pretense that the town's famous groundhog, Punxsutawney Phil, has been alive and serving as regional February 2nd weather-forecaster since 1886. The same pretext holds that Phil's caretakers and spokesmen, the Inner Circle, hold the secret to Phil's prolonged lifespan and that the Circle's president communicates with the rodent in "Groundhogese".
* Essentially the idea behind "psychosomatic symptoms". Again, a number of illnesses have been written off as this, then found to be real as medical
* Essentially the main point of "separating an artist from their art;" namely, acknowledging one's creative abilities while still holding them accountable for misdeeds.
* Essentially, the metagame consists of attempting to move your opponent into a zone where (s)he is less comfortable than you are, even if it is not your most comfortable zone. A strong grappler with an OK punch and good submissions would rather strike against a great grappler and submissions guy who can't throw a punch.
* Essentially the reason why a lot of people dislike or even hate certain successful sports sides like Manchester United (association football) or Australia (many sports, but especially cricket). Also part of the reason why
* Essentially the role of aggressor pilots in the US Navy and in Top Gun, during the Cold War. Flying outdated F-5 Tigers and A-4 Skyhawks, the more experienced aggressors regularly curbstomped pilots in the Navy's newest Cool Planes: The F-14 and F/A-18.
* Essentially, the show takes great lengths to avert this with the point it always makes being that getting somewhere is generally very easy. Ultimately, all security has some sort of weak spot whether it's a keycard, a person, or what not. It's getting into the right position to enter or leave without anyone thinking you're not supposed to be there that poses the problem.
* Essentially, the Whoniverse is what you get when an otherwise Lovecraftian universe is (mostly) tamed by an ancient and powerful race of Monster Slayers. Or at least, where one of the Lovecraftian entities (the Time Lords) are keeping the others in check. Most of the time. The new series indicates that the Time War escalated to full-on
* Essentially this is what the Lich King did to Arthas Menethil through Frostmourne. Because the sword took a piece of Arthas' soul, the Lich King was able to fill that void in Arthas with his own spirit. Which is why he turned all evil and stuff (although Arthas was doing questionable things already).
* essential or otherwise treacherous, and all the rest are under a cloud.
* essential rare exceptions, but for the most part, people get frustrated when devices don't behave the way they expect them to, which includes fake buttons clicking.
* Essential Visual Enhancements critical death animations that leave behind charred ribcages, skulls and other assorted bones.

* Essex and only because the escort carriers of Taffy 3 were unable to outrun the Center Force.
* Essex County trilogy, the comic-within-a-comic drawn by a young child in the story is actually a real comic made by author Jeff Lemire when he was a child.
* Essex girl and a walrus? One has whiskers and smells of fish, and the other's a walrus."
* Essex Girl. The trope itself in general isn't obsolete, but the Essex version is. Audience reactions on this are mixed, to say the least.
* Esso Asso — When a person tries to avoid a traffic light midsection by driving through a corner parking lot (where there usually stands a gas station, hence the 'Esso' part).
* established as early as the very first episode of the series won the board and Holms, in his anger, Rage Quit by shutting the game off.
* Established Broadway actor Stephen DeRosa plays historical vaudeville actor Eddie Cantor in the show, and his talents show repeatedly. He sings the
* Established entries also suffer from this, as each user tries to increase exposure for his or her favorite meme, and create tons of filler and related posts.
* establishes that with most of the United States devastated by the Martians, a provisional government has been set up in Honolulu, officially recognized and supported by the United Nations.
* establish how badass Future Trunks is- and, by extension, how threatening the Androids he was talking about must be.
* Establishing Character Moment; after he overdoses on drugs and recovers in the back of an ambulance, he high-fives the paramedic that's with him, suggesting that they've done this routine plenty of times before.
* Establishing Character Moment and an assortment of packs of gum and chocolate bars by the time he checks into his hotel room, after which he promptly empties the bathroom of towels and toiletries, then scoops up the tourist brochures and local restaurant menus and anything else that isn't nailed down.
* Establishing Character Moment), and drives on (making sure not to run the flower over).
* Establishing Character Moment by offering apples to random people... and most of the apples contains a deadly explosive.
* Establishing Character Moment; Chapter 1 ends with him chewing on Cross's ass.
* Establishing Character Moment epic rant to a customer for denigrating the work of these highly-trained and hard-working professionals.
* establishing character moment for Miss Piggy: in one of her earliest appearances, the script called for her to slap Kermit over some disagreement. Frank Oz, however was having trouble trying to do a convincing-looking slap. He eventually got frustrated and had her karate-chop Kermit with a wild yell. The rest is history.
* Establishing Character Moment for the rich obstructor, van Statten, who confers with the Ninth Doctor on an alien device that turns out to be a delicate musical instrument. He plays a few notes, then, content that he knows all he needs about it, casually tosses it aside.
* Establishing Character Moment; Fraser is shown bringing a suspect into custody during the middle of a blizzard, and telling him "That's the last time you fish over the limit." When his superior starts criticizing him for his overzealous pursuit of such a petty crime, Fraser tells him that the suspect was using dynamite to blast fish out of a lake to the point where he was using a front-end loader to scoop out his haul; after Fraser caught and arrested the overfisher, he then donated the fish to local Inuit communities as supplies to help them get through the blizzard.
* Establishing Character Moment half-guiltily side-eyes the camera after a picture of him wearing lipstick pops up.
* Establishing Character Moment has him be fascinated with Cody's harmonica, and then later make a Cybertronian sized one out of scrap.
* Establishing Character Moment has him cheat at golf twice - once by distracting his opponent during his drive, and once by planting an extra ball on the fairway rather than bothering to look for where his ball actually landed - followed by

delight at his father's recent demise because it means that he just inherited the family estate.
* Establishing Character Moment has him explain how he owns the insults pinned to him.
* Establishing Character Moment has his minions killed when he doesn't need them anymore. Amusingly enough when Babidi finds out they brought him far more energy than he thought they did he thinks he didn't give them enough credit and maybe he should have kept them around after all, though he just shrugs and thinks it's still no big deal.
* Establishing Character Moment in the Soul Society arc, where he cuts off the arm of the giant guarding the Seiretei gate and the blood splatters all over. The name of the chapter is even named 'Rain Of Blood'.
* Establishing Character Moment in "The State Dinner" is her unsubtly trying to set CJ up with the son of some of her friends while pointedly mentioning that he's a successful cardiologist and that CJ is single.
* Establishing Character Moment is boredly slapping RPGs like nothing.
* Establishing Character Moment is him revealing that his cat's name is Elizabeth the 3rd and ordering the other RFA members to not disrespect her, all with complete seriousness.
* Establishing Character Moment is in a car with his coworkers when a bee starts flying around. Everyone tries to swat it ineffectually while Smiley calmly waits for the right moment and opens the window allowing it to leave.
* Establishing Character Moment. It was his way of symbolically sharing one last meal with him.
* Establishing Character Moment, Luca Blight and the Highland Army set fire to a town, killing all the townsfolk they can find. One woman even begs for him to spare her, saying she'll do anything. His demand is that she crawls around and act like a pig, which she complies. His response? Gleefully laugh in her face, yell "Die pig!" and kill her anyway.
* Establishing Character Moment of an advanced society that had been repeatedly bombed into the stone age by the Wraith. For instance, not only does their settlement reside in the shadow of ruined high-tech city, but one of the rare pieces of Athosian technology to survive is a lighter that uses energy beams to ignite objects.
* Establishing Character Moment of Red snapping after the poke, and the cake ends up on the customer's head.
* Establishing Character Moment only to compose herself the moment the elevator doors open, with the music just heard faintly through her earphones again.
* Establishing Character Moments brings up the time she faked her own death to have an Edible Arrangement sent to her house.
* Establishing Character Moment, she can reach mach 10 (over 7000 miles per hour). Even these numbers don't reflect what the creators intended, it's clearly stated that the Sonic Rainboom is a sonic boom, so at least her top speed exceeds the speed of sound. The only other pegasus who may have achieved that onscreen was Rainbow's idol Spitfire, who once, in "Hurricane Fluttershy", created a puff of cloud while flying somewhat like an airplane breaking the sound barrier in real life.
* Establishing Character Moment, Stannis freely admits that he and Robert never loved each other when Matthos is dictating a letter for him.
* Establishing Character Moment. The exact status of print media back on Earth was never really spelled out, but the cost of shipping items off-world is such that you have to be a dedicated bibliophile, extremely rich or both to even contemplate bringing your collection to the Moon with you.
* Establishing Character Moment: The first thing a character says or does that makes it clear the kind of person they are.
* Establishing Character Moment. Then, asks for a towel to wipe himself off. When The Chosen One tries this, it goes horribly wrong.
* Establishing Character Moment to eagerly taking 'misaligned' photos of a pair of short-skirted female tourists who asked for his help with their camera.

* Establishing Character Moment was killing Frieza and his father like they were mooks, is terrified of the androids who murdered everyone he knew save for his mother.
* Establishing Character Moment: When a character is introduced in a work, there is a scene—or even as small as a moment—that lets the audience know what kind of character they're going to be.
* Establishing Character Moment. When Kaneki is sent to help Yomo harvest bodies for the cafe, he's understandably intimidated by the silent Ghoul. But when they arrive on site and discover the body of a recent suicide, Yomo pauses to pray over the victim prior to getting to work. Afterwards, it becomes clear that Yomo is actually an incredibly kind person.
* Establishing Character Moment, which is the list of charges he has filed against Lister, namely: 123 counts of insulting a superior technician, 39 counts of dereliction of duty, 84 counts of general insubordination and one count of mutiny.
* Establishing Character Moment while acting drunk and unprofessional.
* Establishing Character Music: A character's personality is established through music.
* Establishing Character Music: Background music establishes someone's personality.
* establishing GoBots as sapient robots constructed on Earth by humans rather than an organic alien race who had their brains put into robotic bodies to survive a disaster.
* Establishing Series Moment: The one moment that represents what the whole series will be about.
* Establishing Shot know what he's doing is wrong (at least as Fat Buu), and Mr Satan manages to single-handedly convert him to good.
* establishing shot of "The Big House" appears… with the jail of New Jersey next to it.
* establishing shots began and were not supplemented with new shots until the season 8. It becomes very noticeable when watching the show on DVD as there were less than a dozen shots, the film was degrading and in one of the most used shots a guard is mysteriously holding his rifle while at the same time having it slung over his back.
* establishing shots of the Springfield nuclear plant, perhaps as a sign of the ominous doings that often occur therein.
* establishing song) originally began with a recitative that was cut from the original production. Later revivals cut the number and the scene in which it appeared, though it remained in underscoring, until the 1994 revival brought the scene back with new staging.
* Estado Novo were any "Russian"/Soviet film (between 1936 and 1970), any Eastern European film (between 1947 and 1970), and any Indian film (between 1953 and 1973), the latter due to the invasions of Portuguese India.
* Estanatreich not only functions as this, it has an entire colony on its back. Justified as it is the one and only de facto territory of TERRA faction. Other ships exist as well, particularly the NESS carrierships.
* Estancia won awards for Best Use Of The Infinite Canvas - it had amounts of material roughly the size of half an issue of a normal comic book each presented in a one-panel-wide column. The dialogue and action still flow smoothly, but when it was made into print books, the artist had to get pretty creative...
* Estate of Panic, a contestant had brought back a $1,000 urn from one of the rooms and told Steve he accidentally spilled some of the ashes on the floor, to which Steve replied that they were his uncle.
* Estate of Panic, similar to the above, but with adult contestants ransacking a haunted mansion filled with booby traps and unpleasant animals to find cash.
* Estate of Panic simply reveled in this, with each room the contestants need to search for money in having a particular "deadly" trap, many inspired from the above list.
* Estate of Panic: The show's winner is the only one seen actually leaving the house. Three of the losers are left trapped in the rooms, and the other three are escorted to some unknown place in the mansion by the butler.

* estate over. How the Third Imperium assures loyalty in it's nobles is not made clear (though it's implied the Imperial Navy and Marines have something to do with it).
* Estée and Joseph Lauder, founders of The Estée Lauder Companies Inc., one of the biggest manufacturer and marketer of prestige skincare, makeup, fragrance and hair care products. Baring the small period of separation in 1939-1942 they were together till Joseph's death in 1982. And they also worked together to make their business what it is now.
* Esteban and Clara's eldest daughter Blanca was rather ugly when she was born, average-looking as a child and a total beauty as a teenager/adult.
* Esteban and Esmeralda Batiste, nicknamed "The Eebs", are a husband/wife assassin team for the
* Esteban blatantly points out how they would make a democracy (America), but how Carey and Maddie (women) or Zack and Cody (children) would not receive a vote. However, he does
* Esteban's mother, Muran'Kel, volunteers to become the Custodian of the Cities of Gold. She died as her brain was integrated into the cities' computer network, but her mind lives on as a holographic construct
* Estella Erith. One name is a pseudonym, it's not hard to guess which one isn't real.
* Estella Warren is a former synchronised swimmer and member of the Canadian national team. She displays this skill in a very plot-unrelated scene in
* Estella Warren planned to make a big comeback with a supporting role, but her part - she and Adam Brody play a husband and wife who get wrapped up in the film's plot - was deleted from the final print (although Brody remains in the movie).
* Estelle and Flynncount, though the fact she keeps slipping from his watch could count as a subversion.
* Estelle becomes a boy over the course of a year thanks to her mutation.
* Estelle, believed that if he was there, he'd easily thwart their plans.
* Estelle can get a cat teaser as a weapon, which replaces her standard burst arte with a joke one that makes her crouch down and start waving the cat teaser up and down as if to entice some invisible kitty. Each wave of the teaser will damage enemies touching it very slightly, and can actually combo some of them for a surprisingly long time, depending how much Estelle decides to wave it around. It's very likely to be interrupted if she's not using the invincible level four Overlimit, though. Amusingly, this becomes a surprisingly effective way of damaging enemies in the PS3 remake of the game, thanks to the new Burst Keep skill, which makes Overlimit last until a burst arte finishes. Couple this with the fact that Overlimit level four is invincible and prevents flinching from almost everything and the fact that Estelle can play with the cat teaser
* Estelle, has only voiced Garnet. She works primarily as a singer and, while not really a "mainstream star", has a cult following that included members of the show's production crew (specifically its composers), which is partially how she get the role in the first place.
* Estelle is a healer who sports the highest defense scores in the game and a fast track to the protective skills. You could viably play her as the party tank and leave spot heals to your less proficient members, as she has an array of melee attacks to take advantage of. She's also no sap at supporting from the sidelines with her light based attack magic.
* Esteros, a 2016 Argentinian film about two estranged childhood friends rekindling atrraction they had with each other more than 10 years after they had been separated.
* Esther Diamond, actress Esther is playing a prostitute while filming on location in Harlem. After witnessing some terrifying magic late at night, she runs out into traffic screaming about zombies and men with swords. Unsurprisingly, the drivers who stop for her assume she's on drugs and either tell her to get out of the way or try to hire her.
* Esther Diamond: Both Barclay Preston-Cole and Garry Goudini in Disappearing Nightly as they recount how their respective assistants disappeared during their

acts.
* Esther Diamond co-star Rachel does this a lot in the fourth book, both for serious threats and minor irritations.
* Esther Diamond is a profile writer, but the deliberately-sensationalist direction his profiles actually take cements him as this.
* Esther Diamond summoning a demon that will want to rape a virgin, only to be thrown to it himself once the hero realizes that he’s one. We hear him screaming horribly for a bit, then coming in hunched over and glaring, while the demon looks flushed and satisfied.
* Esther Friesner a dragon. No problem: the Welsh au pair calmly picks up a sword and proceeds to chop her way through the first hedge in the way. The maze, not being stupid, immediately opens a clear path for her.
* Esther Friesner has gods and anthropomorphic personifications (e.g. the Fates) like this, with rebellious teenage demigods, curmudgeonly elder gods, and so on.
* Esther Friesner into a frog, so she can use this to prove her point that she still loves him.
* Esther Friesner, one such elf is found to have once been a small-time rock star in the 1970s.
* Esther Friesner series, about historical or semihistorical (or straight-up mythical) princesses of history during their childhood and young adulthood. So far she has taken on Helen of Troy, Nefertiti of Egypt, Himiko of Yamatai/Japan, and Maeve of Connacht/Ireland.
* Esther Friesner series, Tim Desmond's mother's Russian ancestry causes a bannik (a household domestic sprite) to move in, which ends up driving her crazy with its obsessive cleanliness.
* Esther Friesner, the protagonist is saddled with a Welfin wife when he takes her hand to go to dinner. She's pleased because she loathes the Welfin way of life, the other Welfies are pleased because it means they can make demands of the protagonist, and nobody really cares what he thinks of it.
* Esther Friesner the witch isn't illegal, after all, and if the witch turns out to be too powerful and has to be appeased with trade goods, that's not the mob's fault. And if they find useful herbal remedies of completely unknown origin placed near her cottage, well, it must be their lucky day.
* Esther is hands down the hardest hitting weapon in the game, which you would expect with it being a legendary version of the Fat Man and all. You can pretty much one shot anything using this weapon, the right perks, and the right ammo. Its surprisingly versatile due to the special ammo added by the DLC. It also grants extra armor and rad resistance, something no other weapon does.
* Esther McQueen attempts a military coup against the Havenite regime herself, entirely in line with the series' tendency to parallel the French Revolutionary Wars (with Esther "Admiral Cluster Bomb" McQueen in the Napoleon role) — only for the series to go
* Esther Williams was a competitive swimmer before landing an acting contract with
* estimated that at the rate razor blade technology has expanded in the past century, we will soon have razors with infinite blades.
* estimate They ran tests with the very same railway car in the exact same circumstances, and the car never got below room temperature.
* Estimating enemy losses in battles is pretty much ubiquitous across modern militaries for both pragmatic reasons (it helps to determine what the enemy's strength currently is, after all) and propaganda. Oftentimes, the publicly released figure will differ from the more accurate internal figure, which itself differs from the real figure due to the imperfect methods of estimating enemy losses (these are only accurately established after the war is over and each side releases their medical records). A great example is the
* Estimations, twice as large as previously thought, and it's not the largest lunar basin.
* "Estival" is also an archaic word roughly meaning "summery," which fits the setting like a glove.
* Est Machina - really Deus Est Machina, but that title is already a trope.

* Esto es peor ("This is worse") shows the mutilated body of a Spanish fighter spiked on a tree, surrounded by the corpses of French soldiers.
* Estonia are not citizens of these countries but rather stateless, holding the status of "permanent residents". This is because these states only allow naturalization for those holding a correct level of fluency in the national language. It is rather notable in Latvia because Riga (its capital city) was primarily a Russian city until 2006, and Daugavpils (its second-largest city) still is.
* Estonian folklore tells the story of Tõll, a giant who came to the aid of the Estonian people in a time of conflict, transporting soldiers en masse on giant wheels. During the subsequent battle, Tõll was decapitated and placed his own head on his sword. He then walked to his grave, promising to rise again in the event of another war against Estonia.
* Estonians and Finns are commonly seen as very slow-witted (partly due to their tendency to speak Russian very slowly compared to native speakers) and ironically referred to as "
* Estonia, of the Baltic girls trio, just wants to party with the cute Nordic boys. They however hide from her in fear. Except for Finland, who does accept her booze before slamming the door in her face.
* Estovakia is Yugoslavia fused with Romania, fitting well into the Yugoslav theme as many aces, both major and minor have names derived from the former Yugoslavia and Romania, coupled with a Civil War that appears to share some parallels (albeit loosely) to
* Estranged Soap Family: Family members never show up for their relative's important life events.
* Estrogen Brigade for each and every male character, as well as an IRL one.
* Estrogen Brigade in auctions. Fans use these to make "ita-bags", a bag with a clear panel in the front, behind which merchandise of a single character (or pairing) is artfully arranged, covering the entire front of the bag.
* "Estuans interius ira vehementi". Odds are you're not thinking of one of the poems, or even the Orff rendition, as much as you're thinking of
* Estus Pirkle entered into politics first by becoming Governor of Mississippi and later running an unsuccessful presidential campaign in 1992 rather than remain an obscure preacher whose teachings would serve as the inspiration for the 1971 film
* Est, who has been captured by pirates and her older sisters Palla and Catria join Celica's party in an attempt to rescue her. When they do, they scold her over her recklessness.
* Esurance of Erin, which was the reason why she was dropped in 2010 as their mascot before the company was acquired by Allstate and started promoting more family-friendly ads for the company.
* Es waren zwei Königskinder ("There were two royal children"). Here the three candles in the window are extinguished by a "false nun" (who in some versions is a Norn).
* ESWAT has the I.C.E. suit, worn by police officers who graduate to the E.S.W.A.T. level.
* ESWAT takes the player into one, with the message "WORLD CONQUEST" unsubtly flashing over a map of the world.
* e-Sword, a freeware Bible program for Windows. It has an Android counterpart called MySword.
* ET 1, as well as most public radio stations remained on air, often with the help of other, small local radio and TV stations lending ERT's staff their frequencies (which faced jamming and penalties by the government for doing so) and through webstreaming. The (ex-)staff, being for all intents and purposes fired, used their new-found editorial freedom to explain how government meddling ruined the once successful public broadcaster to benefit private interests (June 2013 was the month were the digital TV broadcasting licenses were going to be auctioned, and private channels really didn't want ERT getting one on their own, rather wanted them to be their private consortium's client). They also invited disenfranchised groups of people to the studios and aired a lot of crowdsourced documentaries that indie

creators offered to (ex-)ERT, curiously, all related to subjects that traditional media avoids (racism, corruption in the government and so on). The newscasters played this trope straight when they redubbed ERT (Elliniki Radiofonia Tileorasi: Greek Radio Television) to Eleftheri Radiofonia Tileorasi (Free Radio Television), initialized the same in Greek. Their broadcast still goes on as of the moment for writing (August 2013), although severely weakened because of more government meddling, and also, people who decided that bringing bread back home might be more urgent than defending a concept and protesting an unlawful dismissal (you can't really fault them, seeing the unemployment rates and poverty in Greece). The role of public broadcaster was hastily replaced by the government (after public outcry) with an entity with no legal standing and public domain movies on loop.
* Eta Boötis IV's local name, "Al Haris al Sama", means "Guardian of Heaven" in Arabic.
* et'Ada came to an end when he and the other pre-creation spirits settled into their roles, with Akatosh specifically creating linear time as a concept.
* E.T. Adventure, Bontanicus exclusively refers to the guests as "earth people".
* E.T. Adventure, Bontanicus tells the guests to bring E.T. home with either a spaceship or their bikes. When the attraction first opened, there was a special vehicle for wheelchair-bound guests that resembled E.T.'s mothership, which is what Bontanicus is referring to when he says "spaceship". For unknown reasons, the special vehicles were taken out at some point, leaving this part of his holographic distress call a bit of a headscratcher.
* E.T. Adventure, E.T. sends the "bicycles" the guests ride on into hyperspace in order to reach E.T.'s homeworld, which was previously said to be over three million light years away from Earth.
* E.T. Adventure, E.T.'s teacher appears in a projection, where he pleads for the guests to return E.T. to the Green Planet so that he can heal his friends along with the rest of the planet.
* E.T. Adventure is the only one that can save the Green Planet from dying, due to his healing touch.
* E.T. Adventure means you're not really at lightspeed; to a hypothetical particle traveling at the speed of light, it takes exactly zero time to go any distance, no matter how long.
* E.T. Adventure reveals that E.T.'s homeworld is a lot like Earth when it comes to oxygen and atmospheric pressure.
* E.T. Adventure reveals what E.T.'s planet looks like, who some of his alien friends are, and the other types of alien species that live on his planet.
* E.T. Adventure shows all of E.T.'s friends that weren't shown in the film or any of its spin-off material, including Tikli, Orbidon, and Magdol.
* E.T. Adventure shows us the Green Planet, a bright and colorful place that's extremely festive, friendly, and always curious.
* E.T. Adventure that the sky colors of the green planet is always a mixture of red, orange, and pink.
* E.T. Adventure, though it can be argued that he is "spiritually" there, since the guests are essentially assuming his role.
* E.T. Adventure to explain the situation to the guests, introduce them to E.T., and explain what they need to do.
* E. T. A. Hoffmann (Dolphins have a single blowhole on the top of their head, and they don't actually blow water out through it.)
* E. T. A. Hoffmann), once the young male lead is transformed into a nutcracker, he must find a woman who can love him despite his ugliness to have any hope of breaking the curse.
* E. T. A. Hoffmann's eponymous novella, is a poetess in her seventies at the court of King Louis XIV of France, when she gets roped into the hunt for a serial killer who murders wealthy lovers on their way to their mistresses with expensive jewelery.
* E. T. A. Hoffmann Sometimes her thrown shoe only distracts him and gives the Nutcracker the chance to stab him. And still others have Clara grab the Nutcracker's sword and stab the King herself.

* E. T. A. Hoffmann", the main character falls in love with a woman named Olimpia, who is eventually revealed to be a robot.
* E. T. A. Hoffmann, the titular character offers to bite Peregrinus in the finger as a sign of friendship, since obviously they cannot shake hands.
* E. T. A. Hoffmann versions that include her, with his mother the Mouse Queen:
* eTalk. What it failed to mention was that Bell Media has a stake in the production.
* etc. Day". Schemes like this already exist in other calendars (including both the Jewish and Muslim calendars) and in many other languages as well.
* Et Cetera, both characters managed to get almost royal straight flushes.
* Etcetera Group and Maria Jose Estevez) to record from there, allowing them to keep their roles after emigrating.
* Et Cetera it happens when the protagonists get trapped in an underground tunnel on their way to the Syndicate's base.
* Et Cetera look like toy guns with their odd shaped cylinders, can not fire proper bullets, and only elicit scorn and derision when their wielders try to point them at their enemies. If used correctly, fired while in contact with something related to one of the animals of their respective zodiacs, they can be very destructive, and are considered two of the strongest guns in existence.
* Et Cetera: Mingchao awakens in her hotel room to find the place trashed. Baskerville and Benkate are sleeping beside each other against the wall, and she wonders at first if they had fought over who got to sleep on the bed. But then she notices how peaceful and relaxed they are, with Benkate leaning against Baskerville.
* etched on the metal plates in the skulls were directions to discovering the archived knowledge from the second timeline. Namely, a frequency to be used to locate the data. They were discovered in the third timeline's 1955 and used this knowledge to honor Kemal's Heroic Sacrifice.
* etc.). Simply grinding to level 99 is forbidden, and every optional quest must also be beaten, except for the Magi Master.
* ET, Elliot emulates the movie E.T. is watching at home, culminating in the film's Big Damn Kiss.
* Eternal Alice has "stories" inside of people. From the way these operate, they mostly contain aspects of memory, though there seems to be a slight overlap with soul in them.
* Eternal Bushido is a Wuxia work written by K. W. Robertson that focuses on a young woman who must rely on a stranger to help bring her home's attackers to justice, all the while risking to plunge the empire of Vesitgia into civil war.
* Eternal Calm is also justified. The rest of the Gullwings are Al Bhed, who already are used to going underwater.
* Eternal Card Game. And that's on top of dinosaurs, gunslingers, and a mechanical race called the grenadin.
* Eternal Card Game includes axes as weapons, both for units and the players themselves.
* Eternal Card Game nullify the first spell or effect used on them by the enemy.
* Eternal Card Game, perhaps unsurprisingly, has many of these in its ranks.
* Eternal Card Game require a payment of life, whether up-front or over time.
* Eternal Card Game, Time, and to a lesser extent, Justice, have some healing spells and units.
* Eternal Champion, after Ekrose promises the Queen he will destroy all of the Eldren (whom he has come to respect far more than humanity), he becomes an emotionless, remorseless killing machine. Socially, none wanted to be with him, but all (humans) were glad to have him leading them in battle.
* Eternal Champions and even leg (Riptide has Jetta's stance and Shadow's legs) swaps.
* Eternal Champions (and since they did no damage, if they were blocked, they had no effect whatsoever).
* Eternal Champions by virtue of anatomical correctness: if someone explodes, you don't get fourteen legs and five ribcages; you get shredded flesh, shattered bones,

and bloody organs.
* Eternal Champions features several fighters well versed in martial arts, and then it has the caveman Slash. His fighting style is listed simply as "Pain". The game further describes his style as using underhanded moves such as eye gouges, nose tweaks and ear smashes to inflict a great amount of pain, making it increasingly difficult for his opponent to properly focus on the fight.
* Eternal Champions has stage-specific "Overkill" attacks that finish the loser off in a gruesome manner (especially in the Sega CD version), including (in the Genesis version alone):
* Eternal Champions. He searches through time and finds ones that could have prevented the future from happening, but died before they had the chance. He gathers them together and has them fight in a tournament to decide who gets the chance to avert their own death and prevent this future.
* Eternal Champions. In this duology, you are a generic martial artist who's helping the Eternal Champion and the other characters from the game.
* Eternal Champions the roof of their headquarters — they gave her no other way to leave.
* Eternal Champions, this was the cause for Xavier's death. There's even a smoldering stake in the immediate background of his stage that you knock your opponent into.
* Eternal Champions Xavier Pendragon was burned at the stake for being a warlock despite the manual saying that his abilities were based in science.
* Eternal Champion, where the humans' technology level is roughly Middle Ages, the elf-like non-human Eldren have invented many 20th Century modern weapons of destruction, including futuristic ray guns but have never succeeded in making a flying machine. Erekose (who, in another life, has much experience with modern technology) is surprised at this gap in their knowledge.
* Eternal Champion which develops into more genuine love. This has far-reaching consequences by the end of the story.
* Eternal City, there will be an ending, and after that, the cycle will be reset, allowing the player to see or achieve different outcomes.
* Eternal Darkness, after each level (interpreted as Alex Roivas reading a page of the Tome of Eternal Darkness), her sanity will have decreased a bit more and more. A serene mountain landscape hanging on the hallway will warp into a hellish landscape of torment when this happens.
* Eternal Darkness after Nintendo intervened and course corrected its development.
* Eternal Darkness; and Alex Roivas has a gladius, a revolver and a shotgun.
* Eternal Darkness, and all the forbidden city levels (Pious, Karim, Roberto and Michael), as the forbidden city has no obvious exit.
* Eternal Darkness, and are associated with the colors green, blue, and red, respectively. The fourth god, Mantorok, is associated with the color purple and can overpower or out-strategize any of the three other gods.
* Eternal Darkness and consigned it to a slow and inevitable death, it is probably fitting.
* Eternal Darkness..." and "Controller unplugged" messages. One particularly involved example pretends to restart the console, letting the player attempt to load his save only to find all his saves deleted. Occasionally the console restarts with a different loading screen. "But I'm not playing on an Xbox..."
* Eternal Darkness and not only will you be trying to describe something that sounds insane, you probably are insane. Even if the psychological tricks don't scare you, let that sanity bar run out and your vitality will quickly go down the drain.
* Eternal Darkness and Xel'lotath's zombie will instantly produce a ghostly head in the original's place; that said, aiming for the noggin is a guaranteed way to deal good damage to them.
* Eternal Darkness at times. Many players have attempted to finish the game with minimal sanity to make the game harder.
* Eternal Darkness. But, by that time, there's nothing left to see in the game. Plus, playing on the game on low sanity is arguably more fun, if only for the

interesting and unique sanity effects.
* Eternal Darkness, but the dental records cannot be used (because the victim's head is missing).
* Eternal Darkness, but the more physically active characters have no excuse.
* Eternal Darkness, but ultimately harmless. However, when your Sanity Gauge has run out entirely, anything that would normally only reduce your Sanity will start taking chunks out of your health instead, most likely due to this trope.
* Eternal Darkness centuries-spanning plot involving numerous player characters.
* Eternal Darkness don't mean anything, but one of them is the scraping or sharpening of knives, followed by the sounds of someone being tortured on another floor...
* Eternal Darkness: Edward Roivas has bottles of Liquid Courage in his Inventory. Three guesses as to what they hold...
* Eternal Darkness, effectively limiting how much use the axe will see in practice.
* Eternal Darkness: Examining the bathtub while you're Alex is a prime example.
* Eternal Darkness had the lead character Alex unlock an old safe through the use of a 200-year-old Stethoscope.
* Eternal Darkness had this happen every time a character (from chapter 3 on) picked up the tome of Eternal Darkness.
* Eternal Darkness has a couple moments where, instead of fully rendering out a scene, the game will instead use a texture map to depict something that won't be seen past a certain cutscene. The biggest example is right in the introduction, when Alex is brought to identify the corpse of her grandfather Edward; both the view of his corpse and the close-up of his family ring are extremely obvious texture maps.
* Eternal Darkness has an insanity effect that tells the player the game is to be continued in the sequel, then the effect ends and the game continues.
* Eternal Darkness has a statue that turns its head to look at you, even when your sanity is at its highest. It serves no purpose, other than to creep you out.
* Eternal Darkness has Bonethieves. They like to burrow down people's throats and then control their host's joints directly. The victims are still conscious but are unable to control themselves.
* Eternal Darkness has one of the characters wandering around a spooky mansion in the day with the sun getting ready to set and still manages to give off the uneasy feeling that monsters are watching you and can strike at any moment.
* Eternal Darkness has several character return from the dead as glowing blue ghosts to continue their struggle against the Darkness.
* Eternal Darkness head Denis Dyack's father Ben, who passed away during its production.
* Eternal Darkness, if you take too long to shake them off, they'll claw their way into your character's body, taking them over and ending the game.
* Eternal Darkness, in one of the few boss battles it has, using bullets on the Black Guardian all but makes it mock you for even thinking or trying to harm it with guns.
* Eternal Darkness: Inverted. Most of the monsters cause sanity loss when they see the player character, regardless of what the player character sees. But played straight in some cases. For instance, watching a bone their burst from its host will lower your sanity.
* Eternal Darkness involves the narrator informing you that he is dead.
* Eternal Darkness is used to represent great evil or madness in the soundtrack.
* Eternal Darkness. It kills you, it gets a new host. Maximillian's ravings and paranoid fear of the Bonethieves are quite justified in-game, as it's revealed that at least one of the servants he slaughtered was indeed a Bonethief host.
* Eternal Darkness just before your character reaches it. The sounds continue until you open the door, at which point your character passes into the next room, and finds it empty.
* Eternal Darkness Later, as Michael, you can use the Enchant Item spell on his portable flashlight to change the color of its beam to match the Ancient fueling the spell.

* Eternal Darkness. Mantorok, who seems to have posed as a relatively benevolent god to a Khmer group, is a possible exception, but not an option you can pick.
* Eternal Darkness may be none too steady is the way her sobs when she first sees her grandfather's dead body are shot through with thin veins of laughter.
* Eternal Darkness — the Heart(s) of Mantorok, the Claw of Chattur'gha, the Sigil of Xel'lotath, and the Veil of Ulyaoth.
* Eternal Darkness — way scarier than any monster could possibly be.
* Eternal Darkness. More subtly, close inspection of the Roivas family tree displayed in the manor's library reveals that the artist added a hanged corpse on one branch.
* Eternal Darkness never changes out of his centurion armor (though it's burnt black over the centuries).
* Eternal Darkness often results in their standing back up & attacking you again. Don't abandon your melee weapons; gun finishers burn ammo quicker than you'd think.
* Eternal Darkness (One chapter is set in the aftermath of the war as Michael Edwards leads a firefighting team to extinguish burning oil fields.)
* Eternal Darkness: One of the Sanity effects in the Roivas mansion involves books in the library flying between the shelves.
* Eternal Darkness pits a supernatural spellcasting monster called a Black Guardian against Peter Jacob, who is in fact a normal human who realized his capacity for magic only about an hour before the fact, so this counts.
* Eternal Darkness plays on this trope with one of the characters going insane (well he wasn't really but he sure sounded like it) after seeing "beyond the veil".
* Eternal Darkness really only has two true boss battles. The first is immune to bullets and impossible to reach with melee attacks, and has to be killed by magic cast at just the right times. The second is mostly immune to everything, except assaults on his relic of power and attacks from spirits of those who came before. Until the very end, of course.
* Eternal Darkness, recoil is usually shown with at least some realism, with all shotguns and rifles having some recoil, and the Holland & Holland elephant gun literally knocking the character to the floor if they don't take a moment to brace themselves (doing so still causes the character to take a long step back).
* Eternal Darkness refers to its "many mouths" when it talks about how it will destroy Ulyaoth.
* Eternal Darkness says that the Roivas family was persecuted upon coming to America and often burned for witchcraft, but enough survived to have descendants in the form of Maximillian, Edward and Alexandra, among others.
* Eternal Darkness scale than your personal survival, and it has an extremely heavy emphasis on melee combat and unleashing powerful spells (both of which are effectively unlimited).
* Eternal Darkness that will trigger. Everything else, which would very likely interrupt your chances of survival, won't start triggering again until the boss has been defeated.
* Eternal Darkness. The chapter of Dr. Maximilian Roivas, "The Lurking Horror", plays out the closet to how one of Lovecraft's stories would, ending with Max locked up in an asylum.
* Eternal Darkness, the heart remains intact for over 1000 years so that Alex can use it in the final battle. Unfortunately, you don't see the heart beating in-game (presumably to match the other essences, which don't move in any way), so this trope is only partly adhered to.
* Eternal Darkness: The Pillar of Flesh is constructed by The Ancients to facilitate their entry into our world. It is built of people smothered with concrete.
* Eternal Darkness. There are also players who play the game with their character's sanity meter at rock bottom just to make the game more interesting.
* Eternal Darkness, there's at least three ghosts, a secret passage, and a sealed-up room on the second floor, but that's nothing compared to what's in the basement...

* Eternal Darkness, the Surreal Horror angle runs rampant, especially once your sanity meter runs low. The whole thing is just one big screwed up wide awake nightmare.
* Eternal Darkness: The Tome of Eternal Darkness allows its bearer to summon Trappers, Zombies, and Horrors with the Tier, Aretak and Pargon runes, as well as one of the Ancients' runes. Just don't waste your time trying to use Mantorok to fuel the spell.
* Eternal Darkness; they take a few seconds and can be cancelled by the slightest movement of the caster.
* Eternal Darkness to a downed monster to regain some sanity points. The one time you're in a modern day story and get a fully-automatic assault rifle with underslung grenade launcher, it's much easier to take the nasties down.
* Eternal Darkness to end a period of enlightenment brought about by the emperor unifying Europe under his banner.
* Eternal Darkness to get a hit in, and they're able to summon lesser mooks if you give them the opportunity.
* Eternal Darkness to Lovecraft. The Ancient Ulyaoth always has a vocabulary to match his grand size.
* Eternal Darkness was an advert for a sequel appearing, implying that the game was over.
* Eternal Darkness was still being planned for the Nintendo 64, one of its playable characters was Joseph de Molay, a Templar Knight. His chapter ended up being scrapped in the final product, but when you find Roberto Bianchi's chapter page, you're given a short scene of Pious threatening a knight who can see his true form as a liche; he's merely credited as "Defeated Knight", but this was actually a repurposed Joseph.
* Eternal Darkness when your sanity gets really low the ceilings appear to drip blood. This causes damage to you, indicating that your body is starting to suffer from the stress on your mind.
* Eternal Darkness, where, amongst other things, bugs will crawl on the screen if your sanity drops low enough.
* Eternal Darkness, with the infamous "bathtub scare" that features a vision of Alexandra Roivas's mutilated corpse in a bathtub of blood.
* Eternal Darkness would qualify. Most of the fighting and exposition takes place in the catacombs beneath it, though.
* Eternal Daughter, Baphomet is the true mastermind behind the Dungaga's conquest, and is the final boss.
* Eternal Daughter: "roundface", used by military officials from Dungaga as a derogatory term to refer to humans.
* Eternal deconstructs this by featuring an entire world where this technology is possible. People who were not cloned are exploited for their pure dna. There are also things called 'death parties' where teenagers killed themselves for the fun of it.
* Eternal Eden, and the two probably had a more developed romance in the new continuity that the protagonist knew nothing about.
* Eternal Eden fell in love with Jean despite Jean telling him that he's a man.
* Eternal Eden, so her relationship with Lynette don't count as being a lesbian relationship even if both look female.
* Eternal Eden, where the events that take place in the game did not happen in the new reality, and the two probably had an offscreen romance.
* Eternal Engine: A titanic factory or machine typically filled with sprawling tangles of dangerous mechanisms.
* Eternal Engines has one whose location allows it to forgo self-reliance in favor of more production: Guard regiments are alays stopping there to resupply and take care of defense, while food is imported, rationed, and not stored for maximum efficiency, resulting in riots when the approaching Tyranids scare off the deliveries.
* Eternal Eyes are pumpkin- & kabocha-based. Mappemon no. 112 & no. 113 are Pumpkin Head and Head (Pumpkill in Japanese), which are respectively a pumpkin- and

a kabocha-headed humanoid. They take off their heads to swing at opponents. Mappemon no. 114, no. 115, and no. 157 are Mad Pumpkin (Mad Pump in Japanese), Big Head, and Y.P.puppet (Typhoon in Japanese), which are respectively a large pumpkin, a large kabocha, and a large yellow pumpkin. They attack by jumping up and falling down on their opponents.
* Eternal Fighter Zero, even a huge surprise barrel, which she can drop on her opponent's head; and her Final Memory involves riding on a giant plushie to ram her opponent.
* Eternal Fighter Zero freeze her opponent into a block of ice, but no lasting effects ever linger. This is especially odd when she proceeds to shatter her frozen opponent for her Final Memory move, which is powerful, but by no means an instant kill.
* Eternal Fighter Zero, Mizuka Nagamori's Final Memory move, "Eternal Poem", freezes time and allows her to freely wail on the opponent for a while.
* Eternal Fighter Zero, playing a tree actually has a practical use: Ikumi Amasawa's blocking animation has her disguise herself as a tree to block high, a rock to block low, and a cloud to air-block.
* Eternal Fighter Zero, Rumi Nanase uses a wooden kendo sword. Interestingly enough, her attacks do more damage than Mai Kawasumi's, even though the latter uses a real sword.
* Eternal Fighter Zero that already know how horrible her jam is have special reactions during the attack; other characters simply eat it unwittingly.
* Eternal Fighter Zero, who is Nayuki's mom, and a strong and agile character with fights with an assortment of household tools.
* Eternal Fire of Baba Gurgur. The fire itself isn't as spectacular as the crater at Darvaza, but it's been burning there for 2,500 years.
* Eternal Flowers: Seeing as Persocoms are considered another type of lifeform… the list includes sensing not only wifi and radio waves, but mircowaves and even magic as well.
* Eternal Flowers, there was an accident mentioned involving a limousine that is probably the reason for Amber's legs being replaced with those of a Persocom.
* Eternal Forces. The non-religious community objected because they saw it as conservative Christian propaganda, and the Religious Right disliked the game because it portrayed the faithful as trigger-happy vigilantes.
* Eternal had a child with her father. Apparently this is not abnormal in svelk culture.
* Eternal Hero Birgitte. Their uniforms are designed to trick people into mistaking them for ceremonial guards, but they're actually elite fighters to a woman.
* Eternal Hero: The hero has existed for eons and will likely continue existing for eons.
* eternal life after their bodies gave up, or just ended up that way because of their power.
* Eternal Lords are basically fantasy vikings, and also mammoth-riding ice-people. Like orcs, they aren't necessarily evil, but they fight well and quite enjoy raiding.
* Eternal Loser by Leslie Fish is about a space hero whose love interest dies at the end of each "episode." By the end of the song, he's afraid his ship will leave him too.
* Eternally alone Lucia makes a love connection with Carl. The epilogue shows them with children, and Lucia has become much happier.
* Eternally Pearly-White Teeth: Actors generally have healthy teeth, even when the medieval characters they're portraying wouldn't. But hey, our heroes have to look good.
* eternally trapped but alive. There are some powerful creatures who couldn't make it through. By now the wall is so covered with those trapped by it that it looks like a wall made entirely of screaming faces as far as the eye can see.
* Eternally unlucky protagonist of his neighbours' mother, whereas it's actually herbal tea. He replaces it with burnt toilet paper, which later ends up being fed back to him when his wife makes him some of the tea.

* Eternally uptight Principal Skinner and the free-minded Edna Krabappel. However, she ends up leaving him at the altar because of his
* Eternal (MLP), unicorns are immortal. Galaxy is the oldest, being older than time itself.
* Eternal (MLP) , unicorns stop aging after a certain period. Galaxy is eons old but doesn't look older than thirty.
* Eternal Moonshine of the Simpson Mind", Marge says her black eye is due to walking into a door. Wiggum voices his skepticism and then walks into a door himself.
* Eternal Moonshine of the Simpson Mind to forget the event, and could only remember snippets.
* Eternal Moonshine of the Simpson Mind" when Homer tries his dog to help him find his family:
* Eternal Poison, books are a favorite weapon of witches (such as Thage) and can be used to break spiritual barriers on certain Majin.
* Eternal Prohibition: Laws and taboos regarding unhealthy substances (drugs, alcohol, etc.) in the future are identical to whatever they were at the time the work was written.
* Eternal Prohibition: The prohibition continues on into the future, where very few, if any, drugs are allowed.
* Eternal Punishment at Tatsuya, and sure enough he and the other characters have an extremely hard time describing these things. Tatsuya's descriptions make no sense, and Ulala just gives up describing them and calls them impossibly ugly.
* Eternal Punishment has Maya taking the protagonist role, but the final party plays this straight once again (Maya, Ulala, Baofu, Katsuya, and Tatsuya). You get to pick your initial fifth party member prior to Tatsuya's recruitment this time, meaning you can play this straight through the entire game by picking Kei or averting it by picking Eriko.
* Eternal Punishment to throw coins and other small objects at ridiculously high (and lethal) speeds.
* Eternal Punishment, when Tatsuya reveals the Innocent Sin side, how he failed to stop Nyarlathotep and get the Maya on that side dead and the world destroyed, he's utterly troubled. EP!Maya (you, the protagonist) has the option to let him cry on her chest.
* Eternal Radiance: Celeste's Shield skill creates a barrier around her that soaks up a certain amount of damage. This barrier takes her max HP and defense into consideration, and having more of both is important to make the barrier effective against stronger enemies.
* Eternal Recurrence albums, starting with their very first (Chronicle).
* Eternals (2021), it turns out that the Machine created a network of "subdimensional threads" so that the Eternals can teleport over long distances. However, due to it's complexity, it's also unreliable. "It is the teleportation equivalent of a mass transit system in a major Earth city."
* Eternals (2021) (see below), it also uses data pages to convey a lot of information.
* Eternals (2021), Titano, the fallen capital of the Eternals, is "superimposed between three seconds from now and two seconds ago."
* Eternal Sabbath. However she eventually admits that, while she hated and feared her father, she hated her mother just as much if not more for being too cowardly to try protecting her beyond meekly asking him to stop. Whenever her father beat her, her mother would buy her candy to try apologizing to her, but she could never even taste it.
* Eternal Sabbath revolves around getting Shura to kill Isaac, as Shura is the only one who understands Isaac enough to stop him.
* Eternals came from the tie-in Lego kits and Marvel Legends figures, the latter of which leaked out online a full six months before the release of the first trailer.
* Eternal Senia due to being about half of Senia's height, much bigger than normal.
* Eternal Senia: Hydrangea After The Rain: Watching ads rewards Amethysts, which are otherwise won in a daily tournament, and are used to buy revivals, companion

cards and battle points, which are themselves used to buy non-story boss battles.
* Eternal Senia: The Jack-in-the-Chest, a talking chest that's trying to be funny:
* Eternal Sexual Freedom: Characters do something sexual that was not allowed in the time period they're set in, and it's not mentioned not to be allowed.
* Eternal Sonata, Allegretto tends to be very expressive with his hands when talking.
* Eternal Sonata. Both Frederic Chopin and Serenade have direct healing abilities as well. Viola can heal also, though it seems to be some sort of fusion power with her bow.
* Eternal Sonata, characters like Polka wear beautiful, bulky layered dresses which remain static and unmoving in all weather, and the characters run around with their arms at a perpetual 45-degree angle to avoid having to interact with the fabric.
* Eternal Sonata does this for a large part of the middle of the game.
* Eternal Sonata even though Polka's twenty-five years younger than him (and officially paired with Allegretto).
* Eternal Sonata, Frederic Chopin does this when he wakes up following his defeat in battle and sees that Polka is gone and that the world around him hasn't changed. He blames himself for not being able to do anything to stop her sacrifice. "Why? The dream was at an end. Oh no. It can't be. Not Polka."
* Eternal Sonata gives people the ability to use magic and heals illness before it turns them insane and kills them.
* Eternal Sonata has Encore Mode, which makes all enemies 1.5x as strong, though the amount of experience gained remains the same. You are, however, allowed to keep all Party Levels you have already gained (either Party Level 5 or Party Level 6 depending on whether you visited a certain optional dungeon) and also keep all music pieces from the game to listen to in the menu, as well as all Score Pieces from the Score Piece sidequest. Additionally, in the PS3 version, you get to keep all of the alternate character costumes that you've found. You also get to keep the Hero's Crest item that opens up the previously mentioned final dungeon. Finally, playing Encore Mode opens up a number of new sidequests by providing you access to a portal device that allows you to revisit all areas you've been to previously. (In the first playthrough, this device allows you to travel to a particular area to continue the plot, but the part of it that would allow you to travel back to other places is broken down).
* Eternal Sonata has some extra dungeons and bosses and the difficulty is up to eleven, some of the cutscenes changed as well.
* Eternal Sonata has the Heaven's Mirror, a flower that hides in its buds during the daylight and releases it all in a brilliant display at exactly 2 A.M. in the morning, symbolic of the playable character Polka, and the time of death of the famous real-life composer and playable character Frederic Chopin. There's also the Simile flower, which only blooms with water from Simile Spring, but wilts if you water it with regular water.
* Eternal Sonata has this in spades. Every special attack needs to be invoked, and if the power gauge is more full (resulting in a more powerful attack and a longer more dramatic pause), a longer invocation is said. However, most aren't even coherently audible.
* Eternal Sonata has this in the form of its light and dark battle system. Standing in a lighted portion of the arena gives you access to different special attacks than when standing in shaded portions, and some enemies change forms when moving between light and dark areas.
* Eternal Sonata, he comes to believe in it and chooses to stay while his physical body dies; otherwise, he wakes up... on his deathbed, with tuberculosis.
* Eternal Sonata. "I can't believe this. How could I lose? Impossible. I will not accept it. I will never accept defeat!"
* Eternal Sonata, if you're able to use magic powers, it also means that you have vaguely defined illness that is eventually fatal, though it's hard to say exactly when.
* Eternal Sonata in a second bonus dungeon if you play it after she's been revived.
* Eternal Sonata is a power-hungry maniac who kills his own citizens by having them

drink mineral power to gain magic powers and turn them into soldiers. His ambition is to conquer neighboring country Baroque and eventually gain limitless power.
* Eternal Sonata make quite a scene about going across a fairly sturdy bridge that comes to nothing until a boss a little later in the game destroys it in a final blow.
* Eternal Sonata. Oddly enough, standing behind one of these sticks will cause an enemy on the other side of the stick to be seemingly unable to see you.
* Eternal Sonata, Phil does this to an old man and is run off. He heads in the direction of the cliffs, which you have to descend to find him.
* Eternal Sonata!" Polka and Frederic, however, note that he's studying magic, and quickly explain that they're both magic users, delighting him as he rarely gets to meet live magic users, and he reveals a lot of interesting information.
* Eternal Sonata: Polka, judging by the first two cutscenes with her in it. Good job, Solfege.
* Eternal Sonata's main character is Frederic Francois Chopin. Yes, the famous pianist and composer. The whole game's set in the fever-induced deathbed dreams of Chopin himself...
* Eternal Sonata, the attack, special attack and guard buttons will start to randomly switch in the middle of battle.
* Eternal Sonata. The "Chopin's Dream" part makes plenty of sense, but what's a "trusty bell" and what does it have to do with anything?
* Eternal Sonata, the events that happen are indicated to take place in the real world in a period of just over three hours during the dying throes of famous composer Frederic Francois Chopin, but the journey that takes place in his dreamworld extends for at least two weeks based on the information given, if not longer.
* Eternal Sonata, the main antagonist, Count Waltz, wears a crown and robes that are mostly a royal shade of deep purple.
* Eternal Sonata Then we proceed beyond the scene and see what's probably been happening afterward.
* Eternal Sonata, the party is about to cross the unstable-looking Cabasa Bridge. Beat thinks he's going to wet himself. After they cross, Allegretto asks if he did, and Beat denies it nervously.
* Eternal Sonata. There is angst, just nowhere near as much as you'd expect from someone in her situation.
* Eternal Sonata use musical weapons, such as a clarinet/gun/mallet and a fencing rapier shaped like a conductor's baton.
* Eternal Sonata when a boss villain destroys the bridge on which you're standing. Half of the party is rescued by a passing ship and the other half washes ashore in a swamp. Conveniently, the villain doesn't end up with either group and is never heard from again.
* Eternal Sonata with the blowing wind variant. The party is trying to decide whether or not to use a secret passage, so they turn to Allegretto to make the decision. He decides to go for it, commenting "You know what they say — 'If you don't go into the lion's den, you can't count your chickens.'" There is a sound of wind blowing from the tunnel and after a pause, Viola comments "That doesn't make any sense."
* Eternal Sunshine of the Spotless Mind: After he discovers she's had her memories of him erased following a bad break-up, Joel initially wants to erase his memories of Clementine as well. As he relives his memories of her in backwards order as they're erased one by one, however, he realizes that they had a lot of happy times together and tries to stop the erasing process going on in his mind.
* Eternal Sunshine of the Spotless Mind, also written by Charlie Kaufman.
* Eternal Sunshine of the Spotless Mind are Joel's best friends and showcase similar relationship issues Joel has with Clementine.
* Eternal Sunshine of the Spotless Mind are roughly 15 minutes into the movie.
* Eternal Sunshine of the Spotless Mind: A science fiction romance movie, most of which takes place inside the main character's head.
* Eternal Sunshine of the Spotless Mind example above, plays it painfully straight

here.
* Eternal Sunshine of the Spotless Mind has Joel and Clementine get told about erasing their memories of each other — and the film ends uncertainly about whether they will give things another try. An alternate ending would have shown a much older Clementine going to Lacuna to erase Joel again — only to be told that she and him have been doing that repeatedly over the years and always ending up finding each other again.
* Eternal Sunshine of the Spotless Mind has three Mexican Spanish dubs: one for Universal's DVD release, another for TV airings and Netflix, and a third for another medium.
* Eternal Sunshine of the Spotless Mind. Her hair is orange, red, blue, green, and other colours over the course of the film.
* Eternal Sunshine of the Spotless Mind is also far more complicated: "I'm not a concept, I'm just a fucked-up girl looking for a peace of mind".
* Eternal Sunshine of the Spotless Mind is usually referred to as a romantic drama film or a psychological drama, despite being based around a premise that wouldn't seem the least bit out of place in a Philip K. Dick novel (a fictional technology that allows one to selectively erase a person's memories). Nevertheless, it's one of the most critically acclaimed films of the 2000s and won an Oscar for its screenplay.
* Eternal Sunshine of the Spotless Mind, one of Joel's memories is getting caught masturbating.
* Eternal Sunshine of the Spotless Mind should have stayed. It has some of the character's best acting and makes her actions at the end of the movie a lot more understandable.
* Eternal Sunshine of the Spotless Mind) that the audience often jumps, thinking he's committed some act of real violence against himself. Kate Winslet walks in, however, and is not fooled (or even amused) for even a moment.
* Eternal Sunshine of the Spotless Mind this to a certain degree, saying that Joel shouldn't expect her to "save" him, and that she's "just a fucked-up girl looking for her own peace of mind." Joel sums up her MPDG-ness and the film's deconstruction of it during his tape recording for Lacuna:
* Eternal Sunshine of the Spotless Mind to remove the memories of his ex girlfriend. But as they proceed, the hero relives past memories and starts regretting his decision. The challenge is how he can make the process stop. The closest thing to a villain or antagonist is the technician who is trying to take advantage of the situation by using both of their files to make the female lead fall in love with him. It seems like it might be working, but she intuits something disingenuous and creepy in his recreated romantic moments, gifts, and lines, so she distances herself and then dumps him and moves on (with the hero again).
* Eternal Sunshine of the Spotless Mind, we first meet Joel and Clem when they are at the Dead Sparks stage of the relationship. The rest of the movie is about how they ignited those sparks in the first place and ends with the hope that they could be reignited.
* Eternal Sunshine of the Spotless Mind, when Joel escapes with the memory of his ex-girlfriend into an already-erased memory, the characters he sees are distorted and have no faces. In another scene, he confronts the memory of his ex-girlfriend's new boyfriend (who, coincidentally, is erasing his memories) he forcibly turns him around, but since he's only ever seen him from behind all he gets is the back of his head again.
* Eternal Sunshine of the Spotless Mind when lovers Joel and Clementine are running on the beach and it starts to snow.
* Eternal Sunshine of the Spotless Mind, which concerns a company that can specifically erase your memory of a particular person, used (for example) when a subject wishes to forget a devastating love affair. The explanation of the process is mainly technobabble, but is believable and internally consistent, with some noticeable secondary memory loss.
* Eternal Sunshine-style. It's not a foolproof treatment, since it doesn't erase the memories but disconnects them from the client's consciousness, meaning that

they can be brought back with a sufficiently strong reminder.
* Eternal, the Sun takes on the form of a radiantly cruel Celestia. On top of this, Celestia is 'the part of The Sun that's a pony', while The Sun is the part of Celestia that is the sun.
* Eternal to chainsaw or Glory Kill in case they need health or ammunition.
* eternal trickster with incredibly low sexual restraint (for the Norse gods, at least; he'd be a prude in plenty of other pantheons).
* Eternal Twilight: Each save file keeps track of various "Trophies" based on player accomplishments, which come with prizes. Most of the prizes are junk items to be converted into essence, though there are rare items such as AP increasing items, new recipes, and accessories.
* Eternal Twilight: The ending seems to show all the locations of the world at peace, until it cuts to Sidamo Mountain, where Minerva is possessed by an unknown entity and claims the dangerous COSMOS relic.
* Eternal Twilight: While healing mages from other RPGs usually have separate skills for offense and healing, Damien has two offensive spells that heal the party at the same time. His normal attack also performs light healing on the party.
* eternal war between themselves and the Coalition (which the Coalition was winning).
* Eternal Wings and the Lost Ocean gets off to a rocky start. The card-based battle system is something that you really have to experiment with to master; even if you read the manual cover to cover, you'll still spend the first few battles just pushing buttons. Just to add to that, you spend most of Sadal Suud with nobody but Kalas in your party, which slows battles against even the weakest enemies to a crawl. Finally, to top the whole thing off, there's little to no strategy involved; most of your weapons are simple nonelemental swords with only one spirit number, reducing battles to little more than hitting the enemies over and over. It's probably intended to ease players into the system, but it makes the whole thing feel clunky and tedious.
* Eternam has what can only be described as an ankle high fence. Rocks, on the other hand, can be walked through.
* Eternatus is said to have arrived in Galar from space inside a meteor 20,000 years ago, with it likely being far older than that.
* Eternia, is shrouded in eternal night. (The second version calls it the Dark Hemisphere and gave an explanation for it in the second season.) Naturally, it's the half where the villains live.
* "Eternity" by Orion, a project of trance DJ-producer Darren Tate, was originally a slow chillout song. Said version was overshadowed by Tate's club remix, and later the Ayla mix.
* Eternity Road, a future civilization studies the religious monuments of the past. Highways. They must have been of great spiritual significance, because the ancestors built them everywhere. They even call our civilization the "Roadmakers".
* Eternity Road since the robot is armed with a stun gun. Rather, it's shoplift and slowly starve to death as the robot forces you to wait for the long-deceased real police to arrive and haul you off to jail. One protagonist who stayed outside helps the rest by committing another crime: impersonating an officer.
* Eternity Road they're secretly carrying. Unfortunately because their attention is on Avila, the moment people start collapsing for no apparent reason and Avila grabs a gun, the pirates concentrate all their fire on her.
* Eternity: The reason for Jun'you's heavy drinking habit is that she was one of the very few who fought Enterprise and lived to tell about it. For reference, When Enterprise, now Yonaga after serving Japan for decades, looks at the mirror and sees her Pacific War-self, she sees herself as a Wo-Class. Thankfully, the years after the War greatly mellowed her out.
* Eternity", where Cordelia says that she knows he's still Angel because Angelus would never wear the outfit Angel had on.
* Eternium Man: Never enter a village or city, and do not read books in the wilderness. Then stand in one place in the Small Mountain Cave. Said cave is the most dangerous location in the game; monsters spawn faster and have double your

experience
* ET. ET is often fascinated with mundane objects and panics when they fall over or move unexpectedly. In some scenes, he acts not unlike a wild animal.
* E.T. Gave Us Wi-Fi: Technology is revealed to have been given to humans by aliens.
* E.T. Gave Us Wi-Fi that suggests that a type of real-world technology is actually of alien origin or design.
* E.T. Gave Us Wi-Fi: The idea that aliens invented or helped invent some modern technology.
* Ethan after he kills her three daughters. Although in a subversion, unlike her predecessors she can be fought and killed very early in the game to make way for the other bosses.
* Ethan and Lilah run away to Jamaica, and then decide to have the big wedding after all. Hiding their already-married status until the big wedding day becomes a big plot point (and a source of blackmail for one character).
* Ethan) and saw him as "safe," though she came slowly to realize that this wouldn't work long-term.
* Ethan Carter III was to be the "rich nephew" of the company's owner. He thus carried on as if no one could touch him because of his wealth. The best example would be when he and his cronies refuse to leave an arena and police are called in to escort them out. ECIII arrogantly starts tossing money at them only for them to tackle him down and arrest him.
* Ethan Carter III way possible. Ironically, he's very popular with whatever is left of TNA's dwindling fanbase.
* Ethan Embry, who plays Carter in the Season 6 premiere, originally auditioned for the roles of Rick and Shane.
* Ethan Gabriel Owens. As noted below, Ethan Page later kept his name despite again coming into a company where Hangman Page was well established when he was signed to AEW in 2021.
* Ethan had to retire from his promising football career after an injury caused by
* Ethan has a vivid nightmare/hallucination sequence while traumatized and sleep-deprived in
* Ethan himself is frequently mocked by his own audience for his physical appearance, particularly his impending baldness, his weight, and his "addiction" to pies. Fans often pay good money to send him derisive super-chats mentioning those things (which he is guaranteed to read out-loud during the show).
* Ethan Hunt blows up the floor-to-ceiling aquariums in a restaurant as cover for his escape in
* Ethan Hunt is running across London after the villain who is wearing a
* Ethan jerry-rigs a defibrillator out of some live wires to short out the implant in his own head
* Ethan of Athos advances suggesting that the creation of zygotes using the genes of two same-sex parents may be possible in the near-term. To catch up, Bujold introduced advances from Beta Colony that allow for such offspring to be produced in any modern Galactic reproduction center.
* Ethan of Athos, Elli Quinn proposes this to Dr. Urquhart, as a way to meet up, if and when:
* Ethan of Athos Elli Quinn wants to make sure her scheme to get a pair of Cetagandan intelligence agents arrested goes as planned, so she drags Ethan into a convenient alcove near the agents' rooms and enacts this trope. Ethan is a bit perturbed since he's from a male-only planet with religious beliefs that women are the source of all sin and temptation, but he manages to play along.
* Ethan of Athos, gets sent on a mission to find ovaries. He has never even seen what they are normally attached to.
* Ethan of Athos is the story of "homosexual obstetrician" Ethan, who is sent to find out what happened to a shipment of vital ovarian tissue cultures. These are needed for his people to reproduce because Athos (named after Mount Athos in Greece, which has been off-limits to women for millennia) is a single-gender planet of almost entirely homosexual men.

* Ethan of Athos's body. "Have you ever given thought to the difficulty of getting rid of a body on a space station?" Because of the closed, finite resources of the station there is simply no way to hide or remove it from the station without it being noticed, since the obvious things like dumping it in the recycler or throwing it out the airlock will trigger the standard alarms about overused equipment and safety risks. She eventually hits on the bright idea of buying a large amount of foodstuffs, tossing the body into the waste recycler in its place, and then having the foodstuffs stored for later transport off the station.
* Ethan of Athos, the planet of Athos is populated entirely by men who grow babies using egg cells taken from ovarian tissue cultures; children are usually reared by couples in an informal kind of marriage. When the ovarian cultures start to fail and their replacement order is sabotaged, a doctor is forced to venture off-world to resolve the nascent fertility crisis.
* Ethan of Athos. The planet was originally settled centuries ago by an ultra-religious sect of zealot monks. The sect's founder believed that women were unclean, so he sought to found a sanctuary where no women were ever allowed to set foot, and this then blossomed into full-blown paranoia and superstitious fear about women. In the present, off-world literature written by women is censored, only men considered morally stable are allowed to read scientific articles written by women for fear they might be infected with this madness, and few Athosians leave their planet. While the founders apparently intended "no women" to lead to "no sex", that is... not really how it's worked out.
* Ethan Phillips played a Ferengi in the TNG episode "Menage a Troi" before playing Neelix on
* Ethan Rayne can't take Giles in a fight, but he has a flair for magic-induced chaos.
* Ethan Rayne episode "Halloween" opens a costume shop that sells items bewitched to make their wearers actually become the things they dressed up as.
* Ethan Rayne likes doing this. And its the only thing The First Evil ever really did, being intangible. Angelus was good at it too.
* Ethan Stewart goes into a bit more detail, and the Zerg Campaign will likely go into more...
* Ethan Thomas gets thrown from a window and lands on a car at the end of the first chapter of
* Ethan Van Sciver in general) are this. It's effectively stipulated that everyone on the show can take a joke, however.
* Ethan watched Melissa, Dylan, and the others making their preparations to fight Melinda while in the Possessor Ghost's dimension in 'Confronting the Dark'. He wickedly says to himself that now there is nobody around to protect the Overlord of Evil's seal.
* Ethan Winters has no combat training; he's just an average Joe looking for his missing wife.
* Ethan Wright falls under this as well, though he's not quite as dumb as Frank and also nicer than him.
* E.T. has long fingers compared with the rest of him. Like most examples, ET is creepy-looking and ugly. Unlike most examples, he's benevolent, lovable, etc. Elliott sees through his creepy exterior to the lovable character inside.
* E.T. he is teased by bullies for only having a single finger glow while they can do the same with all of them. They don't appreciate it when he responds by flipping that one finger.
* Ethel also does it in another episode when rehearsing a play that Lucy wrote, although it wasn't technically a stage direction that she read out loud. Her character was giving Lucy's character compliments about her appearance, which ended with "and your nose is continued on the next page."
* Ethel Is an Elephant - a failed sitcom about a NY photographer who shares his home with an abandoned circus elephant.
* Ethel is having difficulty getting a passport and threatens to report an
* Ethel Merman as a shell-shocked lieutenant who believes he's Ethel Merman.
* Ethel Merman is best known nowadays for appearing as an asylum inmate who

claimed to be her.
* Ethel Merman look-alike to sing in a Boy Scout fund-raiser, in an effort to live up to her inflated promise about getting the famed star to participate. Needless to say, the real Ms. Merman decides to go along with the charade, considering it's for a worthy cause, and allows Lucy to "teach her to sing like Ethel Merman."
* Ethel Merman of her dress. The other characters turn her upside down and shake the keys back out.
* Ethel Merman once bragged she was able to hold a note as long as the Chase Manhattan Bank.
* Ethel Merman singing the first song in the score. (Merman didn't record it until 1947.)
* Ethel Merman wrote songs for five Ethel Merman shows, and she was the only performer whose name he associated with the song ideas in his personal notebook.
* Ethereal Choir: A choir singing in harmony to signify otherworldiness.
* Ethereal Choir and bright light is revealed to be an actual sound effect triggered by opening a door.
* Ethereal Choir is in-universe singing by the Petalars that flows into a more expansive theme after they finish singing.
* Ethereal Giant Space Hamster: Has translucent flesh and fur, causing it to appear as an animated giant hamster skeleton.
* Ethereals call most playable races "fleshlings", even the ones they
* Ethereal units are a subversion: they can cast spells but can't attack and can only be harmed by magic, but two ethereal units can't attack each other. Two ethereal units can kill each other if they both have offensive spells, however.
* Ethereal White Dress: White clothing worn to make a character look otherwordly.
* Ether energy exists in elemental dichotomies, and they cancel each other out: a fire Blade is weakened when they get wet, a lightning Blade can't do much about an inert boulder, and so on.
* Ethereum Gladiator, given there's no gravity outside the Nethercity's ecodomes.
* Etheria being released from Despondos, Hord Prime launching a full-scale invasion, and the Sword of Protection being shattered; a powerless and increasingly reckless
* Etheria continued the tradition of arranged marriages by betrothing her daughter Skywynne to Filbric Flowers. Luckily, it was a
* Etheric side of the classroom is effectively one crazy playground, and inhabitants generally are childish, but so adorable and hilarious that Annie puts up with their manners (or rather lack thereof) and joins the fun... not that everything was so simple.
* "Etherium clouded my eyes, clogged my ears, desensitized my skin. Now that I can feel, I can begin to learn."
* Etherlords: The synthet live on land where plants walk and flesh withers, so instead, they seek to increase their perfection: "the presence of specially created synthetic elements in the body, to replace and supplement imperfect organic elements".
* Ethernaut tells the story of the fall of Troy from the Trojans' point of view.
* Ether One gives its protagonist glowing blue veins when using their memory-restoring device.
* Ether particles are subject to the normal laws of thermodynamics. As an area approaches absolute zero, they lose energy.
* Etherscope: In an alternate 1984 that could be described as steampowered cyberpunk, the United States expands into South America and the region becomes the new Wild West. The region is even called the Savage South in-universe and is known for its cybernetically enhanced gunslingers and other outlaws.
* Etherscope is also home to the Fey, an ancient human subspecies distinguished by its natural affinity for manipulating occult energy, which rose up to found the lost antediluvian civilization of Lemuria.
* Etheru states that he planned on Joey and Catherine acting as foils for one another, but arcadiarika's decision to refuse developing the character any longer shoots this possibility down.

* Ether Vapor), enhanced sound quality, online leaderboards, and easier unlockable content.
* Ether Vapor, refusing to allow the enemy to shoot him from behind, and destroys the battleship instead.
* Ethical axis: Lawful, Neutral, and Chaotic. Lawful represents honor and obedience to the law; Chaotic leans toward personal freedom, without regards to the law; and Neutral is an intermediate position that either doesn't care or seeks balance between the two ends.
* ethical dilemma: If five people are about to be killed by a runaway trolley, and the only way to stop them is to push a fat man in front of the trolley, would you kill the fat man to save the five, etc. Cynics and people who are tired of the dilemma being trotted out all the time typically point out that anyone heavy enough to successfully stop the trolley is probably going to be far too big to be involuntarily pushed in front of said trolley.
* Ethical Slut discusses the difference in her Charmed reviews. She claims the reason she considers Phoebe a "whore" is because she mistreats her boyfriends and places her love life above her Charmed One duties, whereas Paige manages to sleep with lots of guys without it interfering with her responsibilities.
* Ethical Slut: Has a very active sex life, but goes about it in a moral and responsible way.
* Ethical Slut: She's slutty, she knows it, and she doesn't see anything wrong with that.
* Ethical Slut: This character is a moral and benevolent person, at least when it comes to matters of romance and sexuality.
* ET hides from Elliot's mother by pretending to be one of Gertie's stuffed dolls.
* Ethiopian Emperor Menelik II. The Italians also suffered from poor morale and inaccurate maps, while the Ethiopians knew the terrain well and forced the Italians to fight on terrain of their choosing.
* Ethnic and gender stereotypes or caricatures (along with cartoon violence) were very prevalent in cartoons made during
* Ethnic Cleansing and say "I need to take a siesta" when shot), and Jews (who are dressed like Hasidim incarnate and shout "oy vey!" when shot). As you can probably guess, it was made by a white supremacist/neo-Nazi group.
* Ethnic Cleansing, where almost all characters are of non-white races, save for the protagonist and few NPCs. However, the reason for this, as the name implies, is quite nefarious.
* ethnic" immigrant/descendant of immigrants. Most often these are Greek, but Jewish, Polish, and Russian ones are not uncommon in the Northeast. This impacts the menu: Greek diners usually have gyros and moussaka, while the Jewish, Polish, and Russian ones can be counted on to have blintzes.
* Ethnicity Obscuring Mutation: Someone undergoes a transformation where it is now impossible to tell what ethnicity they are.
* ethnicity, they don't count as long as the artist doesn't hold objective misconceptions about the character.
* Ethnic Magician: A mage who is a member of some "exotic" nation or race.
* Ethnic Menial Labor: Poor immigrants are used as a source of cheap labor for local businesses.
* Ethnic Menial Labor: Poor laborers and servants are often depicted as being ethnic minorities (especially foreign immigrants).
* Ethnic Scrappy: A character is disliked for basically being an offensive racial stereotype.
* Ethnic Scrappy: A character is disliked for being an offensive racial stereotype.
* Ethnic Scrappy: A character is disliked for being a politically incorrect portrayal of a minority.
* Ethnic Scrappy: A character is disliked for being a politically incorrect portrayal of a specific minority.
* Ethnic Scrappy for being an offensive ethnic/national/racial stereotype.
* Ethnic Scrappy — Scrappy-Doo is not based on any ethnic group.
* Ethnic Scrappy: The audience doesn't like a character based on racist

stereotypes.
* Ethnic Scrappy: Viewers hate the character for being an ethnic stereotype.
* Ethnic stereotypes. The Russians have a lot of ethnic stereotypes similar to Rabinovich above. A typical joke goes like "An Englishman, a French guy, and a Russian sit in a bar..." and is quite similar to analogous jokes in Anglophone humour. Favorite targets are:
* Ethnic white groups Catholics, just "greasy" Latin people and the like (their revulsion toward the Vatican motivated as much by its being Italian as by its being Catholic).
* Etika, gained popularity for his comedic reactions to Smash Bros. and other gaming-related premiere trailers among other content. Etika had struggled heavily with his mental health, and had several incidents relating to assaulting police officers and disappearances, even giving away large sums of money to people just for responding to people on Twitter. On June 25th, 2019, the NYPD reported he had committed suicide in the New York East River.
* Etika - Game streamer who was known for his hyped-up reactions to various Nintendo-related announcements and products
* E.T. is finally going home. The music swells, the bright lights of his egg-shaped spacecraft bathe him in an orange aura and after the ramp pulls in, it lifts off.
* Etna is both powerful and wise enough to be the Overlord, but as the Etna Mode (where she ultimately decides it is not worth it) and the Prinny games (where she leaves the position open even though Laharl is a Prinny) have exemplified, she is too irresponsible and lacks the drive to do it.
* Etna's contradictory relationship with Laharl is the result of this: she
* ETN Mystic series, is autistic and features an autistic protagonist in the series.
* Eto declares that she's falling for Kaneki when she sees him maiming Tsukiyama and Kanae. When he proceeds to act violent towards her it only seems to enhance her
* Eto Demerzel is also very old, but younger than Daneel. Its exact age is unknown, but is estimated to be roughly 19,000 years.
* Eto does this as she's declaring her love for Kaneki as he throws her mutilated body off of a building.
* Eto gets this after she kidnaps and tortures Kanae in a fairly sexual manner. After breaking Kanae down by taunting her over her obsession with her cousin, Eto subjects her to lengthy torture with needles and thread. She praises Kanae as being "cute", after having sewn her eyes open and her mouth shut. She does this while they're
* Etoile: American ballerina Claire is possessed by the ghost of a ballerina who died in an accident.
* Etoile de l'empire invisible and other books by French occultist Jean Parvulesco: The whole history and especially the Soviet Union and the second world war are mainly a result of a covert war between an ancient egyptian Cult of Horus and a Cult of seth. Main Players in that war are masonic lodges, german bankers, old royal bloodlines and so on. The culmination of this war of conspiracies was Vladimir Putins rise to power. Parvulescos Books are a cross between conspiracy Thrillers and explainations of real conspiracy theories the author believed.
* Etoiles Mourantes. As their name implies, they are able to host other species, including humans, inside them.
* Eton Wall Game which is a combination of edificeering, squash, and violence. Most games go into injury time, sometimes forever.
* Eto Rangers have to use the Revealing Mirror on the disguised Jyarei to get them to reveal their true form.
* Eto seems to be this. She's mostly naked and acts seductive while committing acts of violence and mayhem.
* Etotama often tells jokes, but is so serious in nature that everyone takes her seriously then start getting frustrated as she keeps doing it.
* Etotama's Chinese Zodiac, has her feet as an erogenous zone. A later episode has random magical effects turn her entire body into one, leaving her writhing on the floor.

* E-Trade (a stock trading website) had a commercial parodying this format. It was an ad for the fictional allergy medication Nozulla, featuring a woman frolicking in a field of flowers, while the narrator explained that "Nozulla may cause the following symptoms: itchy rashes, full-body hair loss, projectile vomiting, gigantic eyeball, the condition known as "hotdog fingers", children born with the head of a golden retriever, seeing the dead, bone liquefication, possession by the Prince of Darkness, tail growth, elderly pregnancy..."
* E* Trade came out with an ad about a man being wheeled through an emergency room who had an unusual medical condition — he had money coming out the wazoo. The point of the ad was that, unless you had the same "problem", you should consider their services.
* ET received a G rating in Australia. Because the 20th-anniversary re-release was edited (to remove guns), the film had to be re-submitted, and received a PG rating for "supernatural themes".
* Etrian Odyssey and bosses that will destroy a party with on-par levels if they don't prepare accordingly. Several of these bears are part of dungeon puzzles in which the player has to lure them towards wooden barricades covered with honey so that they can destroy those barricades and allow the player to progress.
* Etrian Odyssey) Avoiding them requires three things: the realization that you are supposed to avoid them, knowledge of their movement pattern and prayer that regular enemies won't slow you down as you run the hell away.
* Etrian Odyssey, but later they can deal some of the best damage in the game. (Caduceus!!!)
* Etrian Odyssey came with a CD containing rough drafts of the game's music. Additionally, the CD's case doubled as a booklet containing concept art and a couple of comics.
* Etrian Odyssey can contain enemies' skills along with regular class skills.
* Etrian Odyssey character can equip and use books... probably because it doesn't take much training to smack people around with one.
* Etrian Odyssey class features large, artificial, crystalline wings in all of its character portraits. While they appear to allow the Zodiacs to hover in place in said portraits, they don't serve any kind of purpose whatsoever in gameplay.
* Etrian Odyssey, expect to deal with an attack so strong (Biting Flurry) that will likely instantly kill many or all of your party members if their defense isn't high enough.
* Etrian Odyssey. Fortresses in the fourth installment get in on the action, too.
* Etrian Odyssey games are set in a City of Adventure built around a labyrinth or dungeon; the third features a port town as your base of operations.
* Etrian Odyssey has a mechanic where inflicting a status ailment or bind on an enemy or ally will increase that character's resistance to that effect for the remainder of the battle. In the fourth game, Arcanists have a skill called "Release Spell" that undoes this.
* Etrian Odyssey has a Medic Class, whose abilities are primarily steeped in healing. The Protector class can also use low-level healing spells if sufficiently levelled up.
* Etrian Odyssey has just this strand of idiot hair. And while there's no actual personality given to her (or any playable character) in-game, official comics from the game creators portray her as a bit of a ditz.
* Etrian Odyssey, i.e. if you wish to forfeit one challenge, you will have to forfeit any and all future challenges on your file as well.
* Etrian Odyssey introduces the Necromancer class, the moveset of which primarily revolves around summoning and manipulating wraiths, whether to command them to attack or use them up for other abilities.
* Etrian Odyssey, is in a similar state, Ontario is just the only one still going by its original name.
* Etrian Odyssey may have slept in a stasis capsule for over a thousand years, but she still wears her hair in small twintails that emphasize her "born-again youth", girlishness, and innocence from amnesia.
* Etrian Odyssey most of the monsters are named after real life animals, so you

have chubby green Hares, white and purple Mantises with pink wings, Largeants that look more like spiders with a skull for a face, Sloths that more closely resemble a gorilla, and so on...
* Etrian Odyssey: Once you've triggered an F.O.E. encounter, you pretty much won't get rid of it until you kill it or it wipes your party.
* Etrian Odyssey's demands. Sure, he's a pampered aristocrat with his fluffy lapdog, but when the chips are down, he considers his own life to be expendable if it will help protect Tharsis.
* Etrian Odyssey series' Medics can be powerful front-line fighters, the exact opposite of their intended role as fragile healers. This requires very deliberate skill-tree setups but is surprisingly practical.
* Etrian Odyssey skill called "Nuclear Formula", whose description outright states that it uses nuclear fusion to cause an explosion.
* Etrian Odyssey). Subsequent games in the series retain the feature, and in them you can also choose exactly what out of your items, characters, and map you want to carry over to the next run.
* Etrian Odyssey, the Arcanist has a spell that resets this resistance; it costs an extremely large amount of TP, but may still be worth it against particularly tough enemies.
* Etrian Odyssey to have them chase you as they're obstructing the path to the boss room).
* Etrian Odyssey, using grid-based maps, characters that you give names, cosmetic customizations, and skill builds to, and relentless enemies that can get beginner players killed easily as early as the first floor of the main dungeon. The early games even intentionally use synthesized soundtracks and sound effects! While some of the cosmetic elements were modernized when the series moved from the DS to the 3DS, most notably the soundtrack, the core gameplay of exploring grid dungeons with player-created characters remains the same.
* Etrian Odyssey wears even more ornate armor (and earrings) and a sweeping cape, while the younger prince has a tiny crown and fur-trimmed cape with a huge gem brooch. And they apparently explore the Yggdrasil Labyrinth in all of this...
* Etrian Odyssey, which actually requires you to kill all enemies in the game multiple many times over (depending on the game).
* Etrigan. Even when she ultimately killed him, he died with a satisfied smile on his face.
* Etrigan. The demon uppercutted him so hard, he went from the surface of the ground and smashed into the Moon.
* Etrigan. There is absolutely no reason at all for why Etrigan should be a baby or why Etrigan should be in this episode at all. One would think that Mordred would have banished Etrigan along with all the other adults, seeing as they've been mortal enemies literally for centuries. But damn if Baby Etrigan isn't the funniest thing you ever did see.
* Etrigan wears a cape that gets extra cool points for being tattered and ripped on the ends.
* Etro's intervention at the end of the previous game (i.e. freeing everyone from crystal stasis) caused the paradoxes, and hence, all of the anomalies and disappearances.
* Etsu Inagaki Sugimoto an immigrant to America and the writer of the memoir
* Etsu Inagaki Sugimoto was a Japanese woman of noble birth, who describes in her autobiography,
* Etta Candy. Her Rebirth iteration has had her confidence and competence restored and is now a lesbian African Amercian rather than a short straight white gal.
* Etta Candy insulting her in one go was a good way to ensure Wonder Woman wouldn't have to worry about a villain since Etta had already wiped the floor with them.
* Etta wasn't the first such character in the WW mythos; Phillip Darnel (the USAAF colonel Diana Prince was secretary to) started out as a colonel with nerves of steel before getting promoted in the
* E.T.: The Book of the Green Planet, E.T. tries to return to Earth by building a spaceship almost entirely out of plants — the hull is a giant turnip, and

more exotic alien plants collected by his race are used for lighting, life support, propulsion, etc.
* E.T. the Extra-Terrestrial. An alien that can at best be described as wrinkled and stubby, and also one of the most sympathetic and beloved characters in cinema history.
* E.T. the Extra-Terrestrial. And this is moments before the government stepped in and placed their entire house under quarantine.
* ET The Extraterrestrial, as Elliot's brother thinks the eponymous alien may just be a worker, and isn't necessarily a great scientist or anything. E.T. is actually a botanist, but has more than enough engineering know-how to make a communication device. Then again, he ran away screaming when a can of pencils fell over and the kids did initially think he was a hairless monkey.
* E.T. the Extra-Terrestrial box is mysteriously tossed at him. He picks up the game, and plays it with his mom on the Atari 2600.
* E.T. the Extra-Terrestrial: "Boy meets alien, boy loves alien, boy loses alien". As Elliot's parting from E.T. is permanent, it's a subversion.
* E.T. the Extra-Terrestrial, Elliot tells his friends about E.T., prompting the question,
* E.T. the Extra-Terrestrial Elliott's mom doesn't completely drop what she's doing when she sees E.T. isn't just a great Halloween costume, but her fingers go slack on her coffee cup and it dangles from her fingers, spilling messily to the floor.
* E.T. the Extra-Terrestrial, E.T. came to Earth in the first place as he was a botanist, studying alien (to him) plant life. And he did seem to have a symbiotic relationship to plants as well as with Eliot. When he "died" a flowering plant seemed to wither and die; then, when he came back to life, the plant bloomed again.
* E.T. the Extra-Terrestrial: E.T. is able to make his neck longer. He usually does this when he is frightened, but near the end when he has to say goodbye to Elliott's older brother he does this too.
* E.T. the Extra-Terrestrial, E.T. quickly develops a fondness for Reece's Pieces candy.
* ET The Extraterrestrial food, he has an actual disease, or if his species needs to be physically near each other to survive.
* E.T. the Extra-Terrestrial for the Atari 2600. Inserting the game into the console, the extraterrestrial nonchalantly begins playing. The dog notices a boy and girl emerging from the bedroom door and walking down the stairs with great anticipation.
* E.T. the Extra-Terrestrial, giving the story of what happened when E.T. went home. It was written by William Kotzwinkle, who had written the novelization of the movie, and was presented as if it were the novelization of a non-existent sequel film, even being released in both a full novel and an abridged "storybook" with extra illustrations.
* E.T. the Extra-Terrestrial had it removed, feeling Ford's presence was too distracting.
* E.T. the Extra-Terrestrial in 2002, several foreign-language versions were re-dubbed. Examples include Brazilian Portuguese, French, Hungarian, Italian, Japanese, Latin Spanish, and Spanish European.
* E.T. the Extra-Terrestrial. M&M-Mars certainly thought it would be forgettable. Hershey, on the other hand, gave it a chance. Thus, the film put Reese's Pieces on the candy map.
* E.T. the Extra-Terrestrial, Michael's Halloween costume includes a gag item simulating something sharp stuck through his head. ET appears concerned that he's been genuinely injured.
* E.T. the Extra-Terrestrial, one develops between ET and Elliott. The first becomes apparent when ET unknowingly drinks beer at Elliott's house and Elliott, who is at school, gets drunk as a result.
* E.T. the Extra-Terrestrial practically embodies this trope. However, at least some of this is probably due to being young.
* E.T. the Extra-Terrestrial speak as if they had been using the proper terms for years because, well, they hadn't been.

* E.T. the Extra-Terrestrial takes a very Disney approach to this theme.
* E.T. the Extra-Terrestrial takes place a few days before, during and a couple more days after Halloween.
* E.T. the Extra-Terrestrial, the fact that the life forces of ET and Elliot have been linked is indicated by electrocardiograms. As E.T. slowly dies, the link breaks and Elliot's own life signs get better while E.T.'s dive towards a flatline. In the end, E.T., too, gets better.
* E.T. the Extra-Terrestrial: the show had basic words sounded out next to a picture of what it was talking about. It is a show directed at preschoolers, after all.
* E.T. the Extra-Terrestrial to jerk the tears here, culminating in his mom arriving on the awful scene by helicopter (she'd been searching for him). But the aliens emerge from the flames unharmed, and use their powers to revive him.
* E.T. the Extra-Terrestrial: When Gertie walks into the bedroom and first sees E.T., the continuous screaming starts — especially funny given the sound of ET's scream and his expression.
* E.T. the Extra-Terrestrial: When left unwatched, Gertie dresses up E.T. in women's clothes. Elliot is upset when finding his friend this way.
* E.T. the Extra-Terrestrial. While it does sound like something a kid his age would use as an insult, he's really calling Michael a cocksucker.
* E.T. the Extra-Terrestrial, whose title character heals Elliott's cut finger with his own glowing fingertip.
* E.T.. The titular alien has the ability to form empathic bonds, perform psychokinesis, make flowers grow, and heal with a touch... but he's not only so small that an adult human could punt him, but Earth's environment physically sickens him.
* Ettins are smaller, two-headed colossi; according to in-game descriptions, their heads have a tendency to argue. They aren't as big as giants, but need to be decapitated twice to be killed and can use weapons.
* Et Tu, Babe the protagonist gets high on Abraham Lincoln's morning breath, and is arrested for 'Theft of a Federally Protected Biospecimen'. Some of the sentences for this crime are execution by underwater speargunning, nasal septumectomy, and punitive confiscation. The protagonist makes a plea to get the latter, and while the sentence is carried out, he is restrained in a van and forced to watch the wooden narrative scenes from porn movies. This last is stated as having later been ruled cruel and unusual.
* Et Tu, Brattus?" as he starts getting thrown around by the water pressure of the hose.
* Et Tu, Brattus?", Bogus cuts up a piece of wood and paints it like a slice of cheese in order to fool Ratty into getting caught by the bully's box trap.
* Et Tu, Brattus?" had Bogus start stomping on a ringing wristwatch in order to stop it from ringing so loudly.
* Et Tu, Brattus?", while Brattus rides on the spider, Brattus's face filling the screen.
* Et Tu, Brute?: Betrayal is one of the worst things that can happen to a character, and it can especially hit hard if it's someone the character trusted most in the world.
* ETU Animated Stories: Cameron's former teacher Jenny crushes on him, despite the fact that he is married. After he rejects her advances, she ruins his marriage so that he will move into her house.
* ETU Animated Stories: Many stories feature neglectful or downright abusive parents. Some of them are very petty.
* ETU Animated Stories: Steph has to go to the bathroom after Derrick laced her food with laxative after she mocked him for being a waiter.
* ETU Animated Stories: Tina, Milton's sister turned over a new leaf over the course of the story and became a hardworking woman unlike her other sisters who continue to sabotage their brother's success.
* Etymologiae, compiling all of the ancient scholarly work on pretty much everything an ancient or medieval person could think of. It was one of the most

refernced and read works of the Middle Ages and Early Modern Era.
* Eubian Aristos are Space Dark Elves. Universally attractive with pale skin, glittery black hair, red eyes with an
* Eucalyptus Trees. They're filled with highly-flammable oil, and can literally EXPLODE in bushfires. In the
* Euchre — a partnership-based trick-taking game in the Bridge-Whist family played with a deck of 24 cards (A, K, Q, J, 10, and 9 of each suit). A common pastime in the midwest of America, particularly the Great Lakes area, where it was probably developed by German immigrants;
* Euclidean geometry, mathematically speaking, is a special case: it only applies to forms in a space with zero curvature (for the two-dimensional case, a perfectly flat plane); something that is, strictly speaking, an abstract concept (in light of the fact that time and space are demonstrably curved by gravity.) Consider that you cannot, in Euclidean geometry, draw a triangle with three right angles, but it is perfectly possible on the surface of a sphere. The Poincaré dodecahedron, to make its angles meet without gaps, lives on the hyper-surface of a hyper-sphere.
* Euclid's C-Finder is a toy gun that is actually the target designator for the Archimedes II
* Eudico was once Vox Solaris, the voice of the Solaris' resistance against Nef Anyo's oppression. But after the events of Deck 12, Eudico tried to placate Nef through any means necessary to protect the survivors. Once she realizes he can't be reasoned with, she returns in full force.
* Eudocia manages to avert it despite using a voice synthesizer — she custom-built her own, using her enhanced knowledge of sonics to make it sound very close to a real human voice.
* Eugène François Vidocq, a criminal-turned-detective who is notable for creating the very first private detective agency in Real Life.
* Eugène-François Vidocq was one of these in France for a while, before he was slandered and eventually fired for being a former convict and using informers effectively. However, he started the first private detective agency shortly after and was able to coast on his name-recognition until the police arrested him on trumped-up charges and took all his files.
* Eugène Pirou made a short film in which a woman performs a striptease in 1896.
* Eugène Vidocq who founded the Sûreté Nationale, and is regarded as the father of modern criminology.
* Eugene at times decided not to emulate his favorite wrestlers, but to be Superman, and thus wore a cape.
* Eugene Black has two people serving as moderators in his trolling clan: Tyler King and Colin Hunt.
* Eugene casually mentions that he used to read to the other orphans at the orphanage he grew up in. Also, that he really dreamed of being a character from the books, whose wealth let him do all sorts of things, which puts a new light on his
* Eugene Debs (S-IN): Labor union activist and Socialist Party politician who served in the Indiana General Assembly (state legislature), and ran five times as a presidential candidate.
* Eugene declines to shake hands when sealing a deal with Lord Shojo in
* Eugene Fitzhubert better than Flynn Rider, Flynn says that if so, she's the first person to do so.
* Eugene Galt writes about gay dominant/submissive relationships and identifies as "a gay man who has lived the life."
* Eugene Greenhilt doesn't miss an opportunity to show off his (utterly lack off) tact during
* Eugene Greenhilt favored his daughter Julia over his son Roy, because Julia became a wizard like him, while Roy became a fighter. ("I can tell because you almost never use the phrase, 'crushing depression' when talking about her.")
* Eugene Greenhilt (Roy's father) swore a blood oath of revenge on Xykon for killing his mentor (Eugene's own father was alive or had died of natural causes at that point, but in either case the two were estranged). However, it's utterly

subverted as Eugene eventually ditches that ambition and dies of natural causes. Roy's own motivation to take out Xykon is the Blood Oath passed down from his father, but this too is subverted eventually. Roy decides that Xykon needs to die because he is an evil prick, not because of a personal vendetta.
* Eugene Greenhilt to his son in the afterlife, after finding out Roy's body was turned into a bone golem: "...
* Eugene has no shortage of nicknames for his girlfriend, such as "Sweetheart," "Sunshine," "Blondie," etc.
* Eugene Horowitz, in "Coach Wittenberg", bowling. He throws the ball, falls flat on his face, but makes a wide split
* Eugene is right, the defendant isn't guilty. Through examination of the evidence and testimony, he manages to also convince 10 of the other 11 jurors of this fact, and the jury is disqualified when the last advocate of a guilty verdict is discovered to have a pre-existing grudge against the defendant.
* Eugene Levy by winning Emmys for Best Actor and Actress in a Comedy, respectively.
* Eugene Levy co-stars could qualify in this regard, particularly Martin Short.
* Eugene Levy has a recurring role in the show, but her character Twyla is not related to her father and brother's characters, while Annie Murphy plays their daughter/sister Alexis.
* Eugene Levy scenes that lean in to their history as comic actors, with Levy's awkwardness and Elliott's oafishness on full display.
* Eugene Levy that devolves into Johnny melting down and describing what a hell the Roses's lives have become since moving to the town. Moira, who had told Johnny about a similar experience she had had at the funeral of a former co-worker and how she had sung her way out of it, breaks into "Danny Boy" to save Johnny.
* Eugene Mirman — Secret agent: "Je m'appelle Eugene. Mon fromage est rouge. Shhhhh. Ma casa est ta voiture." ("My name is Eugene. My cheese is red. Shhhhh. My house is your car."). Later supplemented by some vocalisations that are translated only as "Hna ha hun ha?"
* Eugene often offers his opponents a pre-match handshake. His opponents often just attack him.
* Eugene Onegin, and the name’s popularity skyrocketed among all the social classes.
* Eugene Onegin in Russian middle schools (equivalent to American high school)
* Eugene Onegin is this to a T. A young girl who loves romance novels and dreams of finding love with the titular character, she writes a letter with mad hope of him reciprocating her feelings.
* Eugene Onegin, Tatiana confesses her love to Onegin in a beautiful letter.
* Eugene Onegin Tatyana's affections until after she married Prince Gremin, after which he realized that he had loved her all along. They meet, and it becomes clear that she still loves him as well, but she decides to remain faithful to her husband.
* Eugene Onegin: the titular character is a baritone role, and while he's not exactly a villain, he's not really a straight-up hero either.
* Eugene Onegin. The young Tatyana writes a love letter to Eugene, who does not return her affections. It is only after she marries Prince Gremin that he realizes his true feelings for her. She admits that she still loves him, but decides to stay with her husband because he treats her better than Onegin ever would.
* Eugene Onegin with the Deutsche Oper Berlin in 2015. They have married since then, and frequently perform together in productions and concerts.
* Eugene O'Neill, the characters are trapped in their past behavioural patterns, most notably Mary with her morphine addiction and James with his alcoholism and hurtful tongue.
* Eugene Porter claims to be this when he encounters Rick's group. He tells them he is a scientist who knows what caused the zombie outbreak and is working on a way to combat it.
* Eugene Schieffelin released 60 European Starlings into New York City's Central Park, because the bird was mentioned in one of

* Eugene Simon (Lancel Lannister) originally auditioned to play Joffrey Baratheon.
* Eugenesis agrees to take part in the fight against the Quintessons, knowingly risking his life, not to mention using time-travel himself, for the same reasons.
* Eugenesis and attacked Cybertron. (Optimus gets excused because he was dead.)
* Eugenesis, before taking part in a battle against Unicron, his religion's devil. Of course, he did watch Primus get killed a short time later as well. And as later events in the story prove, he might have a reason to doubt Primus after all...
* Eugenesis by Sygnet, a Decepticon scientist, who sees Galvatron as having the worst parts of Megatron's personality amplified a thousand-fold.
* Eugenesis deals with the end of war on Cybertron, but there's hell to pay first.
* Eugenesis description of what's left of him once the Sharkticons are done.
* Eugenesis explicitly labels the Guardian droids, each of which has an annoying tendency to be ludicrously overpowered and liable to turn on its creators on a dime, as the creations of Wheeljack.
* Eugenesis he claims to have been present for the events of the main story, but he “remembers” the falsified version being fed to the public and doesn’t know of people he logically should, like Kup.
* Eugenesis himself narrowly avoiding death or capture. When he finally meets up with Sixshot's battalion, Sixshot attempts to make excuses and pleasantries but Soundwave is done tolerating failure and shoots him dead.
* Eugenesis is an insanely dark story, where the plot just happens to start just before Christmas Day. A massive amount of death and carnage occur on the actual day, and the story continues on in increasingly bleakness right through to the new year.
* Eugenesis, neither of whom are liked by most (if any) of their fellow Autobots. Prowl is worse off because of his total lack of people skills or leadership abilities.
* Eugenesis notes that a lot of Cybertron's surface has been nuked over the course of the war. Since its inhabitants are robots, it's not as dangerous for them as it would be for most lifeforms, but most of the nuked cities are long abandoned anyway.
* Eugenesis showed up to eat everyone, with "theo-scientists" pouring out of the woodwork to calmly disseminate every aspect of Cybertron's religious texts. Of course, even they haven't figured out how the Matrix functions. And they become oddly quiet when the subject of the built-in kill-switch every Cybertronian has comes up.
* Eugenesis. Some of the villains of the piece worship him, but they don't make any effort to free him.
* Eugenesis: The Decepticon scientist Sygnet doesn't care about that whole civil war thing, or that his inventions are used by some of the most psychotic warlords the universe has ever seen. He just wants some recognition, dammit.
* Eugenesis: the scene in the epilogue where Soundwave gives birth to a deformed Quintesson.
* Eugenesis to the operating table and drugged out of their mind beforehand. Even the most thuggish Decepticons are horrified by this twenty years on, so it's no wonder their scientists aren't respected. What makes it worse is that Sygnet, one of the higher profile Decepticon scientists still alive, joined to 'cons to get respect.
* Eugenesis, we hear Nightbeat's thoughts on pre-Earth Optimus Prime: Large and blocky, a proud staple of Golden Age Cybertronian engineering. However this means by modern (meaning 2012) standards he's woefully fuel-inefficient.
* Eugene's peers (bar Arnold) ostracize him for being a jinx and being all-around unlucky. However, he has a lot of fans for his charming personality.
* Eugene started out as a minor character in the 1997 Camp story arc, but 3 years later, the Wus, including him, returned, but aside for one strip early on, he never appeared. That is, until
* Eugene temporarily moves in with Bernard while his dorm room is being fumigated, and it’s not long before they're at each other's throats.
* Eugene tries to make it up for him by holding several parties, but all of them go

wrong in some way. When he finally sets one up in the backyard of the boarding house, the whole place gets rained on by its own Personal Raincloud.
* Eugene used a top rope double axe handle as a finishing move, after giving the opponent an airplane spin first... which is actually a good example of "more elaborate."
* Eugene Victor Tooms bare-ly has an-y in-to-na-tion at all and talks real-ly slow-ly. It's ser-i-ous-ly freak-y.
* Eugenia "Skeeter" Phelan is temporarily mistaken for gay by her own mother, mostly because she's 23 and hasn't had a boyfriend yet.
* Eugenics. 100 years ago, it was accepted as scientific truth that some races/phenotypes were inherently inferior/superior. Although there is no technical reason the human gene pool couldn't be altered through selective breeding just like is done all the time with domestic plants and animals, the concept of "race" itself is now considered biologically meaningless.
* Eugenics is the concept of trying to encourage breeding to develop desirable traits, the concept of race was never a mandatory on intrinsic aspect of eugenics. What was found is that while the
* Eugenics Wars went unnoticed by the population at large. When they saw the brushfire wars of the 1990s, they were really seeing the children of Chrysalis trying to take over the world.
* Eugenics was already practiced (before the advent of biological science) by leaving defective and sick babies to die. Think of your childhood consisting of pain (no changing clothes, fighting against your best friends, usually to death, you are encouraged to steal, but if you get caught you were punished...not for stealing, but for getting caught, and finally being dumped in the wilderness, etc). Adulthood was extremely military, and the extreme views of Spartan society have given them an almost mythical reputation now in history. Ultimately it undid them because they were limited in number to at most a few thousand of them and the loss of even a few hundred warriors was a major blow to them. So they quickly reached their maximum extent. "Oliganthropia" (i.e. "having few people") was the perennial issue facing the Spartans since only an elite few were the famed warriors (Spartiates) caused over time due to the aforementioned eugenicist infanticide,
* Eugenides series has a few different prosthetics he uses to replace his missing hand, including a cosmetic false hand and a hook that he's used to kill a would-be assassin.
* Eugenio Derbez) and dubbing himself, for obvious reasons, in the dub of Rob.
* Eugenio Derbez had a witness describe the suspect as having yellowish skin, a round face and a "sinister smile" and the sketch that comes out is simply a yellow smily face. Subverted at the end when the cops capture the criminal and they claim "he looks nothing like the sketch", only for them to notice he has a mask and underneath he looks just like a smiley face.
* Eugenius! can somehow dream about events that are happening in outer space without realising they're real.
* Eugenius! is allergic to love so his sidekick Super Hot Lady can never have him. Though he is implied to be gay at the end.
* Eugenius! writes a superhero comic based on his dreams. He later finds out he's dreaming true events that are happening in space.
* Euhemerism who lived long ago and whose reputations snowballed until they became gods.
* Eukaryotic cells: organelles gave rise to a whole new level of complexity and possibilities for life.
* EU law is such that the names "Parmesan" and "Feta" can no longer be used to refer generically to cheese varieties, but only to cheeses specifically from their original production regions. Hence there's a lot of "Greek-style salad cheese" and "Italian-style cheese" around. It is probably only a matter of time before we see "Canadian West-Country Style cheese".
* Eulice's reaction when she hears Gary blurting out that Zii has no job.
* eulogizes. Really, female Mon Calamari should never join any squadron headed by Wedge.

* EU material says this is how Vastra met Jenny—her future wife. Apparently Miss Flint was being
* Eunice aphroditois. They are also the real-life inspiration for Mass Effect's thresher maws.
* Eunice Branca After she is killed and Johann's brain is transplanted into her body, he finds her mind still present. It is left ambiguous whether she is actually still there or whether Johann is hallucinating her continued existence.
* Eunuchs Are Evil: People who have had their sex organs removed are depicted as villains.
* Eunuchs Are Evil: People who've had their genitals removed are portrayed as evil.
* Eunuchs Are Evil: The "logical" extreme of the idea that male virginity is a bad thing.
* eunuchs who become so for God's sake (with the disclaimer that it's not for everyone, but for those who can take it). Most interpret this as advocating celibacy. However. some early Christians took it literally and castrated themselves.
* Eun uses a makeshift flamethrower from a lighter and a can of aerosol.
* Euphemia Allen. This little waltz song was her only work, which she composed in 1877, at the age of 16, under the pseudonym Arthur de Lulli.
* Euphemia and Nunally talk about how they fought over who would marry their brother Lelouch when they were little girls and laugh about it. Incidentally, in the entire series, those two are the only characters Lelouch explicitly admitted loving... though in regards to the "incident" itself, by the next day both Euphemia and Nunnally had basically forgotten about it and thought Lelouch sitting up worrying who to pick was very amusing.
* Euphemia and Suzaku are another pair. Although they were on the same sides, Suzaku was still considered inferior.
* Euphemia is the only pacifist in her family of soldiers and strategists.
* Euphemia li Britannia, Shirley Fennete and Rolo Lamperouge defaulting to the Zero Requiem route.
* Euphemia's she knows about Lelouch? My, this could not only solve the episode's issues, but the whole season's main conflict. All they need to do is to walk to the stage and announce it. But the episode is only halfway through...
* Euphemia would never order a massacre if she hadn't been mind controlled. Tohdoh sarcastically demands if Zero mind controlled her into ordering the massacre at Saitama, or if he made Clovis purge Shinjuku, or if the Emperor conquered Japan on Zero's orders. The Britannian royal family never had a problem massacring innocent Japanese before, so why should they believe that Euphemia did.
* euphemisms. If somebody is turned later and/or wearing a wire, then they can argue that the orders they gave were misintepreted, and the people who carried them out had acted on their own.
* Euphorbia upchucuanhae) that helps the group in their plans, when they use it to give a bellyache to everyone in the Institute so that Reynie and Sticky can get their turns in the Whisperer sooner.
* Euphoria: Ali complains of this in "Trouble Don't Last Always", saying that advertisers and businesses have weaponized "revolutions" to sell things, which he thinks stops actual change or at least controls the impact. He relates that Nike put up a sign reading "Our people matter" (about black people) while still charging a bundle for sneakers, which costs them nothing, looks good and lets them still charge the same huge price (he notes they were likely made by slaves or near enough in China too).
* Euphoria: Cal Jacobs, when Jules reveals herself to him at the chili cookoff, finds her when she's alone and says he knows she can destroy him by revealing they had sex. He outright begs her not to, unaware Jules has no intention of doing so.
* Euphoria in the game. Her dying body just disappears from the electric chair room after the events of the first "Keyhole" room, no matter who you choose. This is something even her VA brings up in the extras.
* Euphoria: In "The Trials and Tribulations of Trying to Pee While Depressed", Rue suffers urinary difficulties as a result of severe depression, culminating in her

peeing herself while trying to get to the bathroom.
* Euphoria: Jules doesn't really feel anything for the guys she's had sex with, and possibly the only reason she falls so hard for "Tyler" is that his supposed distance means that they are unlikely to have sex anytime soon, forcing her to develop other kinds of intimacy. On the other end of things, she hugs, kisses, cuddles, and holds hands with Rue frequently, and her ideal living arrangement is one where she and Rue fall asleep together every night, even though she never expected to feel any sexual attraction towards Rue.
* Euphoria: Kat's written a lot of fanfics on Tumblr, most of them explicit and NSFW.
* Euphoria (lesbian main character, bisexual transgender female supporting character, queer female romance)
* Euphoria: Nate has Tyler framed by coercing him into falsely confessing he assaulted Maddy, and blackmailing Jules into claiming she witnessed it.
* Euphoria: On the field, Nate Jacobs is a star quarterback for his high school football team. Off the field, he's a mess of neuroses.
* Euphoria realize that she's only into women (she also finds her friend Lexi attractive), reflecting on having sex with guys but never really enjoying it.
* Euphoria, Rika does the skirt-grab variant of this trope while being trapped with the others.
* Euphoria, Rika isn't a kid but is treated such as one by everyone, using her cuteness as a way of getting everything she wants. Byakuya and Takato even drop the name of the trope in Rinne's route, and Byakuya proceeds to try to correct her behaviour.
* Euphoria: Rue ends up curled up in Jules' lap in the second episode after getting high on fentanyl.
* Euphoria: Rue's struggle with her drug addiction is transposed from series creator Sam Levinson's own experiences with addiction in his teenage years.
* Euphoria (since it's Japan). In Rika's route, one of the games involves simple, uh, "Keyhole" stuff, except that it's being broadcast through the Internet and Rika has to say very embarrassing things to the camera. The game never goes into detail about the implications of this, but the humiliation part is here, just as the nasty comments you would expect from anonymous people on the Internet, floating through the screen.
* Euphoria, the final scenes take place three years after the main events have ended.
* Euphoria: "The Next Episode" has McKay at the receiving end of a hazing ritual that has frat members hold him face-down to the floor and call him "McGay" several times, just as he is about to have sex with Cassie. It falls into the "humiliating" aspect of the trope.
* Euphoria, this is the end of Rinne's route. After Keisuke wakes up in a bed in a room inside a house stated to both his and Rinne, where Rinne is watching over him, he says to her that he had a bad dream, she assures that she will always be by his side, and the route just ends after Keisuke assures himself he don't have to think about the dream after all. But don't worry, it's not the True Ending.
* Euphoria this way. Nate Jacobs, who has extremely fucked-up ideas about how women should look and behave, becomes obsessed with trans girl Jules, who he knows would not meet his exacting standards, and sets about trying to force her to "reform" under threat of having her arrested for underage sexting.
* Eurabia: All or most of the nations of Europe (and the Western/Christian world) have somehow been conquered and converted by the Arab/Muslim world.
* Eurabia: Fundamentalist Muslims take over Europe if not the whole world and turn it into a repressive theocracy. The United States feared a variant of this trope post 9/11, but the refugee crisis from the Middle East in the 2010s led to renewed fears of this in Europe.
* Eurabia through immigration and terrorism, and then convert or destroy every single non-Muslim.
* Eurabia: Xenophobic fears over (mostly brown) immigrants from Muslim countries "replacing" or subjugating white people in Western countries.

* Eurasian Blackbird of the bird world, and they are constantly shouting their alarm calls - which range from a sharp, endlessly repeated "SNIP!!! SNIP!!!" to an ear-piercing, shrill yell.
* Eureeka's Castle. Eureeka once noted of how he wants to go to school only for her to inform him that he’s too young.
* Eureeka's Castle has been known to cause the whole castle to shake whenever he sneezes. Justified seeing that he's a dragon and much larger than most of the other characters. Luckily for everyone, he doesn't appear to be of the fire-breathing variety.
* Eureeka's Castle has Emma which is funny, since not only is she a small mouse, but she is smaller than the main characters.
* Eureeka's Castle". He's even clumsier than usual when he loses his glasses.
* Eureeka's Castle, it's Batly's birthday, and everyone proceeds to bring him gifts. As he opens them one by one, they all end up being the same thing: underpants. After the last gift is opened and everyone laughs, Eureeka tells Batly that the underpants were just a joke, and they actually got him the things he really wanted.
* Eureeka's Castle. Magellan, a dragon, towers over everyone, but he's also the nicest character of the show, and essentially the kid of the group. The Giant is even larger, and often watches in amusement as his friends in the castle get into crazy antics.
* Eureeka's Castle Nightmare On Magellan Street," Magellan sees a monster outside the window at night and sets out to catch it to prove to Eureeka and the others that it's not just his imagination.
* Eureeka's Castle: There was a horror-themed episode that dealt with fear of movies, fear of a real monster, and pranks revolving around fear. Its opening had three rodents (puppets) scurrying around outside in a storm, screaming their heads off, running from a monster, and wearing yellow raincoats.
* Eureka, a computer simulation of Jack tries to kill Zane, only for the real Jack to show up moments later with no idea what just happened. Zane gets the drop on him and Jack frantically tries to explain how he came to be there and that it's really him. Zane believes him because "no computer simulation of you could be that incoherent."
* Eureka admit they love each other and spend the night together in the middle of season 4.
* Eureka, a doomsday machine jumps from 20-something hours to 7 hours when the wrong wire is cut.
* Eureka, Allison Blake's brother is played by the actress's real-life husband.
* Eureka: Almost every couple naturally as the whole town is populated by geniuses.
* Eureka. Also, Carter's ex-wife shows up for an episode, but neither has any intention of getting back together.
* Eureka, and due to his common-sense way of thinking, always saves the town from self-destructing from their own scientific curiosity. In fact, when an android deputy was commissioned to replace him, things went so spectacularly south during the test drive of the android's abilities that he concludes at the end of his report that with Sheriff Carter around, the town's odds of survival is much better.
* Eureka and have the ticket stolen. Later he works out this happened and uses this technique to recover a partial license plate. Amusingly, Henry starts to talk about a high-tech method he can use to recover it, only to trail off as Carter does it.
* Eureka, and the top of their profession. For example, the town Sheriff is a US Marshal, the local dog-catcher is one of the world's top animal trackers, the chef at the local café is one of the world's top chefs, and so on. It doesn't help that most of the residents have little or no contact or interest in the outside world.
* Eureka), Andy becoming a cartoonish robot, and Jo becoming a Disney-like princess. All of this was the result of an interactive storybook unexpectedly interfering with a large-scale holoprojector.
* Eureka, any and all interesting new technologies presented or talked about early in the episode is inevitably going to turn out to be either A) part of the cause of

that week's crisis, or B) part of the solution to said crisis.
* Eureka as Carter was appointed the Sheriff of Eureka by the federal government rather than elected by local residents, as is normal in the United States.
* Eureka asked to have Nathan Stark die, because his character arc was heavily tied into The Artifact, and without it Nathan had nothing left to do.
* Eureka: As punishment for murdering Holly, Beverly locks Senator Wen in a virtual version of the Sheriff's office, bringing her back in to the one-room building every time she tries to leave.
* Eureka: Australian tracker Taggart blindfolds himself to try to find his way through a building with pure intuition. As soon as he walks out of frame, we hear the sound of flesh meeting wall and a "Crikey!"
* Eureka a weaponized attack drone went out of control and started targeting the defense system it was designed to test, leading to the following:
* Eureka by Beverly and the cabal she works for, simulating them returning to the titular town 4 years after they left. The idea of the time-shift is to avoid any inconsistencies. Additionally, the machine is building the virtual world based on the subjects' own memories and thoughts within the set parameters. However, the machine was designed with 20 people in mind, so, with 21 people hooked up, there's not enough processing power to smooth over any glitches. As such, the characters begin to notice certain things, such as a dragon suddenly appearing when one of them imagines one (the computer couldn't tell it wasn't a real memory). Said dragon then "de-rezzes" for a split-second. A simulator character then walks right through a bar counter, a bird appears stuck halfway into a boulder, and a wound keeps appearing and disappearing.
* Eureka: Carl Carlson winds up integrating with the godlike Artifact.
* Eureka, Carter and Allison do this when they enter a room right after having spent the night together.
* Eureka; Carter and Allison enter a suddenly and mysteriously cold Cafe Diem, and Carter offers Allison the orange traffic vest he's wearing, as payback for a comment she made earlier. She's... less than impressed.
* Eureka, Carter is warned that Allison's brother Marcus is prejudiced.
* Eureka channel. After seeing the movie, executives turned the story into a series.
* Eureka creates a human body nearly from scratch and backups all information into the person's cells.
* Eureka died in reality and in the shared dream at the same time... but it turned out to be coincidental.
* Eureka, director of Global Dynamics Allison Blake discovers that through a freak accident, her son Kevin is able to access and control what they refer to as the "Akashic Field."
* Eureka does this a lot, but one of the funniest examples comes not from the scientists, but from Vincent, the Cafe Diem owner/chef, at Holly's wake:
* Eureka "Do You See What I See?" A machine in town malfunctioned and turned everyone into various animated styles. They used everything from Peanuts to claymation.
* Eureka episode "E=MC...?", eating cloned chicken meat causes most of the town to lose their knowledge, common sense, attention span, emotional maturity, etc.
* Eureka episode "Family Reunion", while leading someone into his jail cell.
* Eureka episode "Primal" has an army of Nathan Starks, which is actually an army of nanobots.
* Eureka episode "Smarter Carter", Kevin gives Jack a substance that turns him into a genius, so that Jack can impress Kevin's visiting (genius) uncle.
* Eureka episode "What Goes Around Comes Around" has a particle accelerator that's cooled by liquid helium. Naturally the cooling line breaks and everyone becomes squeaky for about half a scene until they can shut the line off.
* Eureka, Fargo's grandfather is woken from (accidental) cryonic freezing. For the entire episode he's trying to figure out the 'new world' as 50 years have gone past.
* Eureka favor "Vincepressos", and Vince sometimes displays a preternatural sense

of when they need one.
* Eureka features several people petrifying in the aptly titled episode "Stoned".
* Eureka, for just such situations involving interstellar craft. Used twice, first to stop a near relativistic speed spacecraft from turning the town into a mile deep crater, then later to catch the Mercury Era space pod containing Fargo and Zane that's equipped with the newly invented but untested Wormhole FTL Drive.
* Eureka for the guys from Area 51. The Eureka bowling team mocks theirs about it.
* Eureka from Eureka. When he walks in on them being... intimate, his only reaction is "now my day is complete" and then turns to work on the issue of the week. At the end of the episode, it is commented on his self-restraint not making any threats while they are making out in public.
* Eureka full of genius inventors, all busily cooking up amazing stuff (and amazing trouble) in their garages. One of the main characters even works out of an auto shop.
* Eureka G.D. not away—and thus the device at G.D. they thought was the cause was actually the target.
* Eureka) get into it. The fight isn't over a man — it's because Beverly blabbed professional confidences about Alison over the town's PA system.
* Eureka has several people watch a bad B-movie about an alien invasion. Shortly after that, one of them disappears only to be found in field surrounded by crop circles. It's quickly discovered that he used a log to make the circle, having been affected by a "psycho-beam" while watching the movie.
* Eureka has Sheriff Carter mistaking terms like "p-brane" as insults to his intelligence.
* Eureka has the accumulated space junk accidentally forming into this level of a threat. Not so much a colony drop, but space junk drop to make it implicit to only the title town.
* Eureka, Henry accidentally hops timelines, discovers that in the alternate timeline he's married to a woman he barely knows, and falls in love with "his" wife. At first she naturally resents him for displacing her real husband, but she ends up falling in love with him as well.
* Eureka himself to participate or be made responsible for whatever was needed that week, but had his position derided by other specialists at GD. Except Larry, who is always competing to take over his position that is.
* Eureka in Season 9. After injuring herself in the cheerleading challenge, Eureka barely mentioned the injury and carried on as normal, until it became too much to bear and she had to do the entirety of episode five on crutches. After Cynthia Lee Fontaine and Farrah Moan lip-synced, it looked like RuPaul was gearing up to send one of them home, when she announced that Eureka would be leaving the competition to allow her injured knee to heal. Eureka did receive an open invitation to return to Season 10, however.
* Eureka: In "Up in the Air", Sheriff Carter gets a call about a bank robbery, and is overjoyed to have a nice, normal crime to investigate for a change — until he gets to the scene and discovers that the entire bank has gone missing.
* Eureka. It opens with Jack being excited about being called to a good old fashioned bank robbery, "no black holes, no blobs". When he arrives at the scene he finds an empty foundation and Deputy Andy informs him "they stole the whole thing". Halfway through the episode, it's averted when they learn it wasn't stolen but a problem with gravity made it float away.
* Eureka: Jack is dating Callie and the relationship is progressing nicely by the end of Season 2. Season 3 starts and Callie is never seen or mentioned again, and Jack is single.
* Eureka. Jack tells Trevor that he's merely "a distraction".. Trevor asks if that's what the kids are calling boyfriends these days.
* Eureka, Jo walks up to a mirror and looks at herself. Mirror!Jo reaches out and grabs her by the throat. Jo slams her in the face a few times and Mirror!Jo doesn't even flinch.
* Eureka lives in an experimental intelligent house that is underground. It doesn't fulfill all of the requirements, but it's underground, it's where he lives, and

it's full of exciting gadgets, so it counts.
* Eureka made a genetically identical copy of his wife (she didn't want to live in Eureka or have children) and he even had a child with her. This was all discovered when she died, and the original wife eventually took in the child, as the father had also died.
* Eureka Marshall Jack Carter, and inadvertently, the owner of the town's biggest (and possibly only) café.
* "Eureka!" Moment about how thief managed to seemingly be in two places at once.
* "Eureka!" Moment: Moment of getting a clue that gives a character the inspiration they need to solve a problem or mystery.
* "Eureka!" Moment washes over him. The story ends there, with no mention of what happened to the birds.
* "Eureka!" Moment watching a man doing work on the school library with safety goggles and a face mask, and decides to buy a cheap pair of goggles to protect her face.
* "Eureka!" Moment when he was trying to find a way to check whether a golden crown his king received was genuine or fake. As he sat in his bath he noticed that the water level had risen because of his body displacing its water. This, of course, led him to the idea that a golden crown could be put under to determine its exact volume, then have the same process repeated with a real gold crown, thus finding out whether the first crown was all gold.
* Eureka murders her to prevent her from telling the others. Then she orders her goons to dispose of her remains respectfully and discreetly. No one knows where she's buried, but at least the bad guy made an effort.
* Eureka: Nathan Stark admits in one episode that he has dreams about world domination. "But not all the time!"
* Eureka often starts with something going wrong. And then goes on for a good period of time after. Probably about ten minutes.
* Eureka, one episode had a scientist who cloned chicken meat to stop the slaughter of the real thing. The problem of the week ensues when the chicken induces rampant stupidity (due to the chemicals the scientist flooded the meat with to make it grow absent a whole chicken) while there's a potentially cataclysmic experiment running that everyone in town is now too dumb to properly monitor.
* Eureka: "Phased and Confused" had this as the intersection of its A and B plots. The mysteriously solid floors became very noticeable when a phased character noisily runs down a short staircase, immediately after not being able to touch things was an obstacle.
* Eureka rather than prophecies. The season 1 finale has Carter travel back in time from a point where he's married to Allison. As a result, in the season 2 opener, he acts overly familiar with her, she's mildly put off, and they don't go on their first date as he remembers it; in the end that first date doesn't happen for almost three more years.
* Eurekas Castle variant on this. His tail is the long object, so for instance he'll build something out of blocks and knock it down with his tail when he turns around. Typically, he then scolds his tail as if it were sentient.
* Eureka, season 2 episode 6: "Noche de Sueños". A gas truck filled with toxic waste, sideswipes a little sports car, causing it (the little car) to explode fantastically.
* Eureka section below, they got this right that it protonates matter. Over the course of the episode a cow is reduced to black and white goo, a jeep is rendered into a puddle, and a bunch of wires in a wall start dripping like water.
* Eureka Seven, a breather episode for both the audience and the characters.
* Eureka Seven after a certain episode, which stick around for most of the series.
* Eureka Seven, an anti-military commune which opposes the United Federation.
* Eureka Seven and admits to using him for the mecha. What does Renton do about this? Sulk about how he wants to continue to protect this girl and continue to take abuse.
* Eureka Seven and a kind girl who is a loving mother to her adopted children. Her warmer personality eventually takes over thanks to the influence of her lover

Renton.
* Eureka Seven and initiates False Flag Operations to gain public support for a genocide against the Coralians.
* Eureka Seven and just goes back to leading Gekkostate properly while leaving control of the Nirvash TypeZERO and Eureka's protection to Renton.
* Eureka Seven, and urged Eureka to tell him about his dad. This sudden outburst made Eureka confused and uncomfortable, so she ran away. Eventually, she did come back to Renton and shared her experience with Adrock after learning from Stoner that Renton is eager to learn about his dad very much.
* Eureka Seven AO may well have written him out of the memories of everyone he knew or cared about. Yet the ending wants us to believe he's perfectly fine with all this.
* Eureka Seven AO starts using the Macross Missile Massacre in episode 13, just as the connections between the two shows start tightening up.
* Eureka Seven AO was a middle schooler voiced by a fourteen-year-old boy in the Japanese version.
* Eureka Seven AO, who previously had permanent wings, learns to hide them and is mainly shown wingless. She does use them in several scenes, though, so she's able to manifest them at will.
* Eureka Seven attack specific points to slowly kill it. These attacks also caused huge uprisings of monstrous creatures that killed everyone very violently, and they then used the publicity of their ineffectual efforts to stop it to get public support.
* Eureka Seven between Renton and Eureka is supplemented by the Coralian sub-plot. The very next episode after they get together, the Coralian plot takes center stage.
* Eureka Seven bit after the series' midpoint, allowing it to better contend with theEND, as well as adding an additional vehicle mode.
* Eureka Seven, but a bit more ambitious. In the show's universe there's a theory that too much thinking by sentient organisms will create what is essentially a thought black hole, and the world-covering Coralian life form is dormant to avoid crossing that threshold and destroying the planet. So he tries to wake up the Coralian collective. All of them.
* Eureka Seven by Eureka and tried ways to gain back her attention and trust (involving beating up Renton), which ultimately backfired and nailed the coffin on his chance with Eureka during their quarrel in the second season finale. Renton and Eureka meeting each other and falling in love, as well as them being together ever after, is also proven by the events in both TV series and movie to be a destined thing. One good example is Eureka being always able to make a come back in some form in the ending and stay with Renton, one way or another (Tv, movie, manga). There's a dialogue said by Talho in the movie when Renton reunites with Eureka after 8 years: "A first-timer breaking through a net of monsters...Is this just a coincidence? Or is it the work of a mysterious power?"
* Eureka Seven clear that nobody at all has to stay behind. Not a single person left (though off-screen apprehension was hinted at).
* Eureka Seven. Colonel Dewey Novak of the U.F. Forces leads a coup to overthrow the U.F. Sage Council.
* Eureka Seven, Colonel Dewey pulls a literal Dead Man Switch upon his suicide, in which a collar that Eureka had been wearing through out the series forces her to become a second Control Cluster which will cause the end of reality as we know it. This from the guy whose stated aim was to save the world. He rationalizes minutes before that the Scub has irreversibly tainted the world, and thus it is better off not existing.
* Eureka Seven consistent couples, and the characters involved in these relationships make up most of the main cast. In this story, love is a theme, so these couples are used to make a point.
* Eureka Seven, Dewey Novak fires one called "Oratorio #8" once at the Scab Coral to make a hole for TheEND to fly through, and again to target the beacon TheEND placed on the Control Cluster. After the second shot, the thing self-destructed and

STILL rained death down on the poor planet with its highly explosive debris.
* Eureka Seven, Eureka realizes her feelings for Renton upon learning of his departure in episode 24.
* Eureka Seven: Eureka's wings growing from her back is not a pleasant experience.
* Eureka Seven extending about a foot around his body when his crush's adopted children brutally cut down his "compatibility" with her - in front of her.
* Eureka Seven features the Macross Missile Massacre prominently, in both missile and "homing laser" form. Unsurprisingly, it shares a mechanical designer with the Macross franchise.
* Eureka Seven fits this trope perfectly, at least when she's on her medication (without it, not so much). In a way, she could be seen as a female version of Dilandau (well, not including the androgynous nature).
* Eureka Seven for over 1 year until they find their way home. The Gekkostate lifestyle is also full of this, considering they are mercenaries. The couple Ray & Charles as well.
* Eureka Seven Good Night Sleep Tight Young Lovers, Eureka waited patiently and hoped for the moment she could be reunited with Renton, considering she thought of suicide throughout the 8 years of imprisonment.
* Eureka Seven Good Night Sleep Tight Young Lovers movie, Renton commented to Eureka in the sickbay that she has grown pretty since he last saw her 8 years ago.
* Eureka Seven: Greg and Mischa. They were divorced prior to Greg's initial appearance, apparently.
* Eureka Seven has an example. When Eureka is incapacitated by an alien scub, Holland sets out on a mission to both earn the team more money and cure her. Their mark is a priest from the Vodrac Religion and he planned to rescue the priest so he could cure Eureka. Unfortunately he never tells Renton any of this. Instead, he insults Renton and beats him up before heading off on the mission. When its revealed that Holland is in mortal danger, Renton says that he cursed himself by only caring about the money instead of Eureka and that it serves him right. Talhoe responds by slapping him in the face and explaining Holland's motives at which point, Renton rushes out to help.
* Eureka Seven has a working sense of direction, but he can't read a map for the life of him. He'll find his intended destination if he isn't relying on a map at all.
* Eureka Seven has Holland, who at first rules his crew with an iron fist, frequently beating on Renton and others for stepping out of line. He becomes a competent (as well as compassionate!) captain by the end.
* Eureka Seven has the relationship between Renton and Eureka. They are quite obviously in love with each other, but between fighting a war, various arguments, and the fact that her adoptive kids don't like him at first, among other reasons, they don't even kiss until the series finale, and that requires an absurd amount of effort on Renton's part to make possible. Keep in mind that Renton is only fourteen and Eureka probably isn't any older.
* Eureka Seven, Holland had to consume drugs in order to pilot the LFO typeB303 "Devilfish" seen from Episode 43 onwards. Overdose of the drugs could shorten lifespan or even result in death.
* Eureka Seven horrifically. Shortly afterward, Eureka's pissed at the whole crew for egging him all this time, which causes them to drop all ideas of messing with him and treat him as an equal.
* Eureka Seven, (including in some of the title sequences,) though often without the actual words being spoken. Oh, and it usually happens thousands of feet in the air, with one character in a giant flying robot. Because that's how they roll.
* Eureka Seven in the main series) initiates his anti-government movement while main character Sumner Sturgeon is busy dealing with his own issues.
* Eureka Seven. In the movie version, she also made the same choice despite knowing life would be harsh because she can get to be with her lover Renton.
* Eureka Seven is a large aircraft that is capable of entering low orbit for quick trans-globe travel.
* Eureka Seven, is extremely confused when someone suggests she's in love with

Renton. However, she seems to have figured out familial love on her own, since she adopted children and is very affectionate towards them.
* Eureka Seven is revealed to be more and more involved in the main plot as the story moves on.
* Eureka Seven is something on an example... it's just that his lethargy and intelligence don't really interact very much. His reclusive nature and slow speed of movement are mainly due to his colossal size and enormous weight problem.
* Eureka Seven is titled "Sakura" and has "Cherry Blossom" repeated in the lyrics. The lyrics of the song is actually symbolic to the ending of the show.
* Eureka Seven, Matthew and Moondoggie are seen Feng Schwinging Renton's room in order to help him and Eureka reach past first base. Holland is not amused.
* Eureka Seven — on both sides of the screen. The guys back on the Gekko watching it all were laughing their asses off, almost to the point of literally rolling on the floor.
* Eureka Seven: Most people live near or in some very, very tall tower-cities.
* Eureka Seven movie ending, though he didn't do it immediately and was not fazed by her nakedness. This deed is done off-screen as well.
* Eureka Seven movie ending, too bad the latter won't recall anything about it.
* Eureka Seven movie, Eureka is destined to have a male partner and together they will "change" the world. Apparently this comes to pass for both TV and movie version.
* Eureka Seven movie, Eureka's hair mysteriously grown very long, up to her hips. It's the longest version of her hair that was seen compared to the TV episode 30 flashback version of herself.
* Eureka Seven movie. Eureka was able to enter Renton's dream during their childhood, and demonstrated this ability again as the naked long hair girl in Renton's dream, adding the fact that the world might have turned into or connected to Renton's dream world.
* Eureka Seven movie. The final scene either takes place in Renton's dream, or the real world merged and connected with Renton's dream.
* Eureka Seven movie which is shown after the credits, a single lunar Crystal flower is shown along with Renton & Eureka's pendant, emitting rainbow light that is believed to grant wishes to whoever prays to it.
* Eureka Seven. Namely Holland x Talho, Ray x Charles, Sakuya x Norb. Dominic x Anemone is probably the most popular. Subverted by Dominic x Anemone. They face loads of troubles in their relationship throughout the series (mostly for Dominic, who spends almost the entire anime trying to get Anemone to notice him), and thus their relationship is more of a parallel to the main pair than a mere Beta Couple. The same may also be said for Holland x Talho. A true Beta Couple from the series would be Moondoggie x Gidget or, as suggested above, Norb x Sakuya.
* Eureka Seven of a story contains the theme of creating your own myth, instead of following someone else's.
* Eureka Seven on his efforts after his quarrel with Eureka in episode 26.
* Eureka Seven, or defense for that matter. For obvious reasons it's mentioned not-so-subtly that this is something you would not want to use on a regular (let alone semi-regular) basis.
* Eureka Seven protagonist; however, it improves as we learn more about the characters and their world, and it's the love story between Renton and Eureka that really sells it.
* Eureka Seven, Renton carries Eureka this way in space when they kissed each other for the 2nd time. After a year, they officially became husband and wife in the Thurston family register.
* Eureka Seven, Renton refuses to acknowledge that his lover Eureka is dead and will continue to wait upon the day she returns back. The final page indicates they might have finally reunited after 2 years.
* Eureka Seven series has Renton's Compac Drive, with the name Eureka and other minamul streaming et cetera.
* Eureka Seven. She doesn't have any friends and doesn't open her heart to anyone prior to meeting the protagonist Renton. In the first episode, she did an

insensitive thing by burning Renton's house down and she does not seem to comprehend why Renton reacted so miserable about it. She does not even know what is "cool", what love is and how to be pregnant with a baby. It is this lack of social skills that she had a hard time being a mother to her 3 kids. She eventually become a more sociable person towards the end of the series, thanks to the influence of her lover Renton.
* Eureka Seven. She stated that she could only exist as long as Renton lives and dreams.
* Eureka Seven so that they can enjoy the third epic kiss as they float down from orbit.
* Eureka Seven, suffers "vein" scars which cover half of her left body (including her face) after an incident in Episode 19 and remains that way until the final episode whereby her scars are no longer visible on her.
* Eureka Seven takes it to another level, when Eureka crashes a giant robot into Renton's house. She then holds a funeral for his room, and asks for a flamethrower. It's the start of a beautiful love story.
* Eureka Seven: The anime can go into many genres, but both the manga adaptations were published in Shōnen magazines.
* Eureka Seven. The eyes of the titular character, which are the same eyes as the monsters that murdered his entire city, frightens a mute child so deeply that he pees his pants and begins crying.
* Eureka Seven. The girl is literally close to emotionless since her birth until she met her destined partner Renton and gradually fell deeply in love with him. Although 3 years ago she did experience her first emotion which is "surprise" when she realized she orphaned the three children she would later adopt.
* Eureka Seven, the way Renton left the Gekko and Holland commented that he has graduated from Gekkostate.
* Eureka Seven, though it's only shown a handful of times. It's called the Megaroad in the movie.
* Eureka Seven upon the Scab Coral's demise. Its a rather unfair ending for Renton...
* Eureka Seven uses this planet takeover history to justify his actions against the Scub Coral which was just trying to communicate with humanity.
* Eureka Seven, was originally rated Teen/13+ by Bandai Entertainment, but on its digital rerelease by Viz Media was bumped up to Older Teen/16+ with no difference in content.
* Eureka Seven, we have Matthieu, Hilda and Gidget. Their skin colors are actually slightly different shades.
* Eureka Seven when he sees a hallucination while mercilessly ripping apart an LFO in Episode 20.
* Eureka Seven, where even some of the Humongous Mecha use Hover Boards. Unlike most though, they're more analogous to surfboards than skateboards. Curiously, they do have wheels — just one, though, and the axle runs the same direction as the board itself. They seem to be involved in handling, since Renton mentions that a bigger wheel limits the rider's capacity to make sharp turns.
* Eureka, Sheriff Carter experiences couvade syndrome because of some technology that still needed some tweaking, not related to the main crisis of the week.
* Eureka, since the Henry that travelled back was the one who originally lost her.
* Eureka: Subverted when Allison thinks she's seeing a ghost, but really it's a hologram programmed into her logic diamond necklace.
* Eureka talking and looking sweet together. "It's the oldest one in the book. Boy meets girl. Boy loses girl. Boy meets computer."
* Eureka that made every woman in the town want to tackle him, rape him, and eat him.
* Eureka that shortens the countdown. When the weapon's designer shows up and simply removes the launch keys, the system seems to shut down, then activates a "deadman's protocol", an anti-sabotage strike calling for an even bigger boom. The designer asks, "Did someone cut the blue wire?"
* Eureka that the Artifact is older than the universe itself, having been created

in the universe before this one, and managed to survive the Big Crunch and another Big Bang.
* Eureka, the cryo sleep chamber that was used to put Fargo's grandfather in suspended animation could have been used many times to buy time during emergencies where people are mutating or dying of some horrible disease.
* Eureka, the ice rapidly spreading over town turns out to be the result of the fungus growing in the ice.
* Eureka The season 4 episode "Crossing Over" had objects from 1947 being pulled into the present by an unstable wormhole. Red Woods through the rotunda, a fighter plane through the wall of Cafe Diem, a nuclear warhead through the infirmary, and worst of all an unfired 50 caliber bullet in the chest of Joe Lupo (luckily missing her heart and lungs by a cm).
* Eureka. The second featured an antagonist sninja, snowman-ninja, complete with anime-style ass-kicking climax.
* Eureka The second time, it's Fargo going all the way in the middle of a serious electromagnetic disaster...
* Eureka, they discover Fargo's long-lost grandfather in a cryopod. They defrost and revive him. He doesn't remember what happened (it's eventually revealed that a jealous friend pushed him in). However, after a while, his body starts to age rapidly, until he looks the way a man of his age ought to look (rather than the young man he was frozen as). The doctors figure out that it's a side effect of the imperfect freezing. They manage to stabilize him, but he still remains in the body of an old man. Strangely, he's fine about it. In the altered timeline, this event never happened, and he became an influential figure in Eureka, using his clout to put his grandson in charge of Global Dynamics.
* Eureka this in "Up in the Air" by painting it with a protective osmium coating, but it only leads to the Jeep being literally lost in space. The Jeep was brought to life in the 2011 Christmas special due to some hologram wackiness, and had choice words for Jack for its constant abuse.
* Eureka to his town full of supergeniuses. He has street smarts in addition to what would be considered a high degree of education anywhere else in the world. This works in his favor as the running theme of the series is how the super-geniuses go for overcomplicated answers but it's Carter pointing out the simplest solution that saves the day.
* Eureka uses this technology, actually reaching out and grabbing the windows and moving them. Actually reaching out and grabbing on and crumbling it up before tossing it into the real trashcan.
* Eureka when a decelerating spacecraft needed a high-energy "cushion" to slow it down. While the energy from the spacecraft was absorbed by the field, there's no mention of what the field did with the energy.
* Eureka when Carter retrieves a Nobel Prize by smashing the glass pane of a display case.
* Eureka where Beverly is hypnotizing Fargo. She gives the standard end-of-hypnosis "when I snap my fingers, you will return to normal and forget all about this" speech and snaps her fingers, causing him to finish explaining to her exactly why hypnosis is impossible.
* Eureka where the magi-tech dress that Allison is wearing has short circuited and she can't get it off without having Carter unzip her.
* Eureka, while trapped in 1947, Allison revives a man using jumper cables hooked up to a car battery.
* Eureka, who is also the coroner/forensics expert is usually the scientist to Carter's cop.
* Eureka, with the FTL drive to explore Titan. It's not clear if there is ever a plan to send a ship to another star, as the show ends before any large-scale construction takes place.
* Eure, tank ace Heinz Guderian recounted an incident where an enemy B1-bis was inflicting heavy casualties and he could only watch helplessly as all the shells that he and his comrades shot at it simply bounced off its armor.
* Eurico the Presbyter), but they are more like the exception than the rule.

* Eurico the Presbyter: Several Visigothic nobles such as Sisebuto, Ebas and Count Julian assist the Umayyads invade Visigothic Spain into conquering Hispania for pure self-interests or personal grudges and not because they believe in Islam, which is why their allies hold them in contempt as "infidels".
* Eurico the Presbyter, since the Arab conquest of the Iberian penisula took place before the Crusades themselves were declared by a few centuries.
* Eurico the Presbyter, the Arabs are served by Sudanese warriors that act as guardsmen and bodyguards for their emirs and sheikhs.
* Euridyce is voiced by Francesca Hogan, with her singing voice produced by Ashley Barret.
* Euripides: Admetus is enraged that not even his parents could bring themselves to die for him, causing Alcestis to die instead.
* Euripides (c. 480 BC - c. 406 BC): a Greek playwright who adapted many myths and legends.
* Euripides. Interestingly, his case is the result of tragic romance, as opposed to how most of Zeus' children were conceived... The fact that his aunts and cousin deny his divine parentage sparks the conflict of the ancient play.
* Euripides is generally Pro-Enlightenment with some Romantic streaks. His plays focus on the horrors of warfare, the suffering of women and generally portray Gods and deities in a manner that makes them human and accessible.
* Euripides made Euripides a character in one of his plays and had him at one point enter the stage with a crane. Examples include:
* Euripides. Modern readers often have to read annotations to get the references.
* Euripides notes an episode where Themis loses control of the Pytho (a.k.a. Delphi), where the prophetic oracle Pythia lived, to Apollo. In response, Themis's mother the Earth starts sending prophetic dreams to all humans, rendering the Pythia obsolete. Apollo complained to Zeus, and Zeus took away the prophetic dreams from humanity, ending the Earth's efforts and restoring the authority of the Pythia, and thus Apollo, over prophecy.
* Euripides, Odysseus sees the leader of the satyrs captured by the titular cyclops and decides to stab it in the eye with a flaming brand. He asks the satyrs for help.
* Euripides references this when pleading with her husband not to remarry after her death; he must spare her children any possible stepmother.
* Euripides survives, but it is widely believed that in the original version outraged the audience because Phaedra (wife of the great hero Theseus) lusts without shame after her step-son Hippolytus, and brazenly attempts to seduce him. The second, surviving version bends over backwards to make Phaedra blameless (she's deeply ashamed of her feelings, and only seems to come on to her step-son because her nurse betrays her). She still comes to no good end, committing suicide and attempting to frame Hippolytus for rape.
* Euripides, the eponymous Taurian princess killed her own children by Jason when she learned that Jason planned to leave her for another woman.
* Eurisko all unaided human opposition in the Traveller: TCS tournament in 1981 and 1982, and only stopped competing once tournament officials threatened to shut down the tournament permanently if Eurisko won again.
* Euro 2004 started with Greece beating Portugal. It ended with Greece beating Portugal.
* Euro 2020 fans after their own performance in the ensuing tournament (listed above).
* Euro 2020. Thanks to the quick actions of his teammates (one had enough First Aid knowledge to put him into the recovery position) and the referee who stopped the match immediately, medical help got to him very quickly. Despite the fact that the rest of the Danish team had formed a human wall around Eriksen to shield him from the TV cameras, and the fans in the stadium, viewers across Europe could still see him being given CPR on the pitch, and the defibrillator bring used. Thankfully the efforts of the medical team were not in vain, and Eriksen was stretchered off the pitch to be taken to hospital half an hour later, conscious, with a oxygen mask on, and looking very dazed by it all.

* Eurobeat anime that popularized it, prompting many eurobeat labels to release their music worldwide on digital platforms, and several artists returned to the genre full-time.
* Eurobeat artist/producer Davide di Marcantonio, the man behind John Desire of "Hot Limit" fame, also has used the aliases Dave Mc Loud, David Bird, Dee Dee, Chemical Boy, Eurobeat Lovers("Yozora no Muko", another
* Eurobeat, even played the song on his car stereo as he was speeding away from the scene of the crime. The song itself is Italian, but it features numerous traits shared with other victims of this trope, such as its operatic chants, steady thumping beat, and grandiose production. The enthusiasm with which Manuel screams his lines becomes truly morbid when heard through this lens. Like most Eurobeat vocalists, not much is known about Manuel himself, but he has been reportedly outraged by these memes and has tried hard to discourage them to no avail.
* eurobeat music", even if the song has never been featured in the series.
* Eurobeat singer Davide di Marcantonio often did this, likely with the aid of pitch-shifting, especially in
* Euro Disneyland's version of Tomorrowland went even further, actively promoting the fact it was displaying the future imagined by Jules Verne (having an actor dressed as Verne in the park's commercials), and basing many of the rides on his works.
* Eurogamer writer Robert Florence posted an article about how video game journalists seem to be indistinguishable from public relations, which included some tweets from Lauren Wainwright regarding her suspicious enthusiasm towards
* Eurogames, which often revolve around a skill-based challenge of maximizing points (often called "Victory Points", where
* Euron boasting about his plans to take the Ironborn's fleet and ply Dany's affections with it gives Theon and Yara the idea to do the same before he can get the chance to. They ultimately succeed in this, so Euron changes strategies with brutal efficiency.
* Euron cackles maniacally as he cuts people down on the battlefield.
* Euron "Crow's Eye" is the black sheep (squid?) of the Greyjoy family. And in a family that believes in
* Euronews, and given that it has to run in several languages simultaneously, there are no presenters and reports take the form of "footage + voiceover" with occasional quotes from whoever the story is about.
* Euron Greyjoy becomes King of the Iron Islands, and actually pays the iron price by leading his men into battle.
* Euron Greyjoy can come across as rather over-the-top when he's not trying to intimidate anyone, to the point of cracking macabre jokes and even bluntly asking Jaime for sex tips. It's eminent how Euron doesn't take anyone, including himself, too seriously.
* Euron Greyjoy crosses this line with gusto and likes manipulating people before torturing them for that extra evil touch.
* Euron Greyjoy. He drops his laid back attitude in battle and goes in screaming like a madman.
* Euron Greyjoy is also obsessed with defeating Jade, seeing her as a rival in magic, and believes she is also working to defeat him.
* Euron Greyjoy is an interesting case of playing with this trope: he's both hated by his family and feared by the general populace of the Ironmen for his sinister reputation and cruelty, while also being respected as a
* Euron Greyjoy is a terror in battle and, while "hero" is probably the last word most people think of for some of his kills, he still manages to murder Balon effortlessly, slay Obara and Nym in battle, and defeat his badass niece, Yara, in combat, resulting in him taking her hostage.
* Euron Greyjoy... is getting there. He's a more sophisticated Ramsey Bolton with better looks, more charm, bigger plans and way more abuse of his family. That is, if he isn't actually just a little bit
* Euron Greyjoy is the captain of a ship called "The Silence", captained by a crew who have their tongues cut out.

* Euron Greyjoy, one of the most eerie and depraved characters in the series, is known as the Crow's Eye, has crows on his personal coat of arms, and uses them in metaphors quite a bit.
* Euron Greyjoy's sexual abuse of his two younger brothers including Aeron and his oozing interaction with some of the characters has earn him this reputation among the fandom.
* Euron is also this with Aeron. Euron is a bombastic, arrogant, flamboyant pirate. Aeron is a cold, stoic, solemn Priest.
* Euron is an axe-wielding berserk captain who personally leads his boarding party with an attacking zeal and passing regard at best for actively defending himself (uncommon for a berserker, he wears heavy armor). When he boards Yara's flagship, he takes several hits from the Sand Snakes and Yara during their respective fights, but shrugs them off as easily as mosquito bites.
* Euron is an insane, sinister pirate with a faintly muttonstache-style beard to match.
* Euron is everything Balon was not. Euron, for all his faults, is brave, proactive, cunning, and willing to make alliances, fight beside his men and actually go out and pay the iron price.
* Euron is one of the few people to observe the undead Gregor Clegane with admiration instead of horror.
* Euro notes were originally fictional — since there were twelve member states and only seven denominations, it would be impossible to choose real bridges without leaving several countries unrepresented. Then a designer in the Netherlands decided to build real-world replicas of all those bridges, thereby "claiming" them for the Netherlands.
* Euron says that he was fascinated by how Jaime effortlessly cut down his men during the Greyjoy's rebellion.
* Euron wields a massive bearded axe when he joins the fray. While it's probably coincidental given that the style of axe is centuries old, it's worth pointing out that Euron's axe is essentially a pimped out version of Zombietools' Kraken model, which is a
* Europa: 24-month year, 8-circad week, with 32 circads per month, plus a week in month 24 in leap years.
* "Europa and the Pirate Twins" Thomas Dolby, a song about very young lovers separated by war. Possibly allegorical.
* Europa Clipper as said probe's main target will be Jupiter's moon Europa, thought to harbor an ocean under a thick crust of ice.
* Europa Europa at the orphanage, climbing onto the wall so he can spy through the open window at her in her night gown.
* Europa Europa: The Soviet instructors at the Komsomal academy in Poland stage one to "prove" that God does not exist for their students after one Polish boy disputes this. He's told he should pray for candy from God, which doesn't come. At the same time one of the Soviet men goes up on the roof and drops in candy to the students, which they say is from Stalin. Thus they claim God doesn't exist and won't give them candy, but Stalin always will. Solly does not look at all convinced by this, but wisely stays quiet.
* Europa has a pink haze hovering over its icy horizons, with a sight of Corpus Obelisk and Grineer Fomorian duking it out in orbit and Jupiter looming above it all.
* Europa Report by letting himself drift off into space when a failed maintenance job sprays a toxic substance over his spacesuit and he runs the risk of poisoning the atmosphere of the ship.
* Europa Report form, yet still somehow manages to convey the same sense of wonder that is intrinsic of this trope.
* Europa Report, this is the crew's motivation to go on with the mission after things start to go wrong.
* Europa's) surfaces are composed of one giant ice-covered ocean. Both are also prime contenders for extraterrestrial life.
* Europa Universalis and its sequel feature historical events and rulers largely

unchanged from our timeline, even in the default start. Mostly averted by the third game.
* Europa Universalis. Board game to series of computer games to board game.
* Europa Universalis DLC) has the Slacken recruitment standards interaction. Mechanically it drops the army professionalism level (which measures, well, how professional your army is, from 0 to 100) by 5 in exchange for giving you two years' worth of manpower.
* Europa Universalis includes California, Texas and a reinstated Confederacy. Their ideology is technically dependent on what ideology an eventual occupier who wishes to partition the USA has, but the Confederacy ministers are all fascist, the Texas ministers are all paternal autocrat, and the California ministers are all social democrat. Other nations can be similarly divided (like Russia, China and large sections of the British Empire).
* Europa Universalis. In fact Paradox encourages moders to form teams that will create something for them to publish.
* Europa Universalis is usually quite good at detecting when it's losing and proposing a suitable peace deal, based on the Casus Belli used and the claims/cores you have on its provinces. On occasion, however, this system can glitch out and lead to the computer offering to get out of a Reconquest of half its current territory for war reparations and a handful of ducats, even though you've crushed all its armies and are currently busy sieging down its capital.
* Europa Universalis IV feature forts that must be besieged to occupy their surrounding provinces in war. Artillery units provide a significant bonus to your siege speed which becomes particularly important against high level forts, that have such formidable defenses that attempting to besiege them without artillery is almost impossible. Artillery also allows you to fire barrages at the walls to breach them, making direct assaults much easier to pull off.
* Europa Universalis IV has a national idea called "Adyghe Beauty", which decreases presitge decay for the country.
* Europa Universalis joke, would have involved a romance between a male Ulm and a female France.
* Europa Universalis larger army or navy, respectively, but at the cost of making the other costlier without becoming more powerful.
* Europa Universalis series live and breathe this trope, since the game spans virtually the entire Golden Age of Sail.
* Europa Universalis the presence of wine and tobacco as goods which can be traded) contributing to its 12+ rating, alongside (very) "mild violence" consisting of sprites bloodlessly shooting at each other.
* Europa Universalis; while the player is unlikely to let it get too out of hand, some AI can get into a bankruptcy loop that results in both an incredibly unstable country and having to pay three or four times as much as everyone else for everything. (Inflation points increase the price of all things that cost money by 1% each, and are gained by event, reliance on gold, or minting coins — the equivalent of printing money).
* Europe 1200 (prior to his spiritual conversion) as a hirable party member.
* Europe 2, a Czech commercial radio station, used to have a segment called "Fidelity Test" as a part of their morning show in the Naughties. Usually, it never went well for those who ordered it. The radio hosts were asked to call their significant others and try to seduce them, usually just asking for a date. In vast majority of cases, the men (and mostly they were men) agreed to go. If they were in fact committed to the relationship, they got furious for lack of trust or for being suspected or being tested. There were many immediate break-ups. When the show got more known, some call-ees proved genre-savyy and refused to go, but admitted they knew what was happening — and got pissed off anyway.
* Europe '51 and perishes, causing his mother to realize how awful's she was being.
* European and Anglophone countries), for the same reasons as the Parsis.
* European Championship as well, especially when the Soviet Union played in the 1964 final against Spain.
* European Championship saw an extraordinary feat of serial giant-killing. Greece

arrived as rank outsiders, having only qualified once before when they were knocked out at the group stage. They were widely expected to repeat this feat. But they won their first group match against the hosts, Portugal. Still, they only just reached the quarter-finals ahead of Spain and Russia, and only beat Spain on goals scored. Nobody expected them to win their quarter-final against France, the defending champions and one of the pre-tournament favourites. But they did, and found themselves up against the Czech Republic in the semi-final. The Czechs were considered the form team, having won all three of their group matches and having won their quarter-final 3-0. Surely Greece couldn't beat them? They could, and reached the final. Could they somehow possibly be able to beat Portugal on their own soil for a second time? Yup, somehow they did, and took the trophy home.
* European colonists have done this to other parts of the world for centuries, bringing their home plants and animals even to places where local domestic alternatives existed. This has sometimes lead to ecological disasters, particularly on islands.
* European colonists in the Americas accidentally introduced old world diseases to the Native Americans, which ultimately killed far more people than the colonists did via warfare and forced labor. Smallpox was the biggest killer amongst the introduced diseases, though contrary to popular legend, it was no more lethal to the Native Americans than it was to the Europeans. That is a small comfort, though; as no one in the population had previously been exposed to the disease, during the initial wave of exposure, it wiped out 20-30% of the population all at once, rather than in successive waves as was the case in Europe.
* European comic boy genius Olivier Delabranche invents a two-person scooter out of his school bag but then sleeps through class and dreams in class that human laziness will cause evolution to phase out toes... then feet, legs, hands why not? Until humans are big brains on wheels. When he wakes up, he smashes the scooter with a rock, repeating over and over
* European Community: stretches from Ireland to Russia. Capital: Brussels.
* European countries including Germany and Britain still discover unexploded bombs from
* European Crusaders, American adventurer Richard Halliburton witnessed them and wrote about how they volunteered to join the Russian army... while still dressed like crusaders.
* European/Europan. "European" refers to someone or something from Europe, which is next to Asia. "Europan" refers to someone or something from Europa, which is in orbit around Jupiter (or, less commonly used, within the Asteroid Belt). "The astronauts shared some European wine in celebration of safely landing on the Europan plains."
* European finance ministers refused to disburse the bailout funds that might save Greece. Riots erupted, and despite the best efforts of riot police, the crowds refused to disperse.
* European football's looking into penalties for teams that took part; the concept of the Super League is in increasing jeopardy.
* European French (Le Petit Musc in 2000, Bayard in 2013). Most of the character names are changed in Bayard's edition.
* European knights largely did away with carrying shields themselves in the same era as the golden age of the Samurai. When covered head-to-toe in a full suit of plate armour, a shield is somewhat redundant. You also need the second hand to wield a weapon heavy enough to breach the other guy's plate.
* European nobility in space (with the occasional bodyguard, attendant, and courtesan thrown in), blending the elaborate costumes of pre-Revolutionary Bourbon Frenchmen and late 18th century Prussia with the intrigue-heavy culture of Renaissance Italians and/or Early Imperial Romans, down to freakishly Italianesque names such as Londo Mollari, Vir Coto, Cartagia, and the eye-roll-inducing name of Antono Refa.
* European nobles in the middle ages were known for their arranged marriages and the associated tradition of an aristocrat selecting his wife by means of a painted portrait. This resulted in a veritable avalanche of contemporary jokes about what

happened when the portraits were... less than accurate, as well as several high-profile actual diplomatic incidents.
* European Parliament, despite being a by-word for a legislative body no one cares about, occasionally has heated debates that spill into violence:
* European Portuguese dubs are only produced for children's movies and series. While most mature series/movies are dubbed in Brazil, they are only subtitled in Portugal.
* Europeans Are Kinky: The stereotype that Europeans tend to be more sexually deviant.
* Europeans have a long history of stereotyping and making fun of each other, and such humour is not considered particularly offensive in Europe so long as you're not referencing old wars or making fun of genocide. In America, a melting pot where immigrants from various European countries attempted to keep a personal cultural identity while living with others doing the same, many experiencing serious class oppression due to coming from the wrong 'old country', it comes off as much more mean-spirited.
* European Spanish magazines and newspapers tend to be wordier than their Latin American counterparts since Spaniards love detailed explanations. On the other side, Mexican magazines and newspapers (with few exceptions) generally try to get to the point more quickly than the European Spanish ones.
* European video games of the 1980s and 1990s developed a reputation for lacking the polish of their American and Japanese counterparts, with issues like poor collision detection or unsteady frame rates being fairly common. This got to a point where the term "Eurojank" (a portmanteau of "European jankiness") was used by game players to describe these titles, with some bemoaning the lack of Eurojank in more modern titles.
* Europe has a history of having short wars. In fact, many believed that WWI
* Europe in Concert gig in Brussels, the fans celebrated his 45th birthday. A concert bootleg actually contains "Happy Birthday" sung by the audience.
* Europe in Turmoil, published by Compass Games, is a two-player card-driven game of the political and social conflict between "Liberal" (represented by Britain and France) and "Authoritarian" (Germany, Austria-Hungary and Russia) ideologies from 1890 (when, as mentioned above, Otto von Bismarck was dismissed as German Chancellor by Wilhelm II) to the Great War. Europe is the main theater of the game but events in other parts of the world are represented as well.
* Europe, it isn't nearly as iconic as "The Final Countdown", which has become a stadium anthem.
* Europe's 1987 classic "The Final Countdown" was their biggest hit in most countries, topping the charts in a few countries… but not in the USA, where it peaked at #8 and was outpeaked by the far less iconic ballad "Carrie", a #3 hit that fall.
* Europe, seeing as the song has a kind of "love during wartime" theme.
* Europe, talks about how humans are leaving Earth, because its no longer habitable, with the hope of found a new place to live and new things to discover.
* Europe, with predictable results, forcing the band to go an hiatus for a number of years.
* Euro Pop artist Jonny Jakobsen is famous for adopting over-the-top Funny Foreigner personae for his novelty songs, such as the faux-Indian Dr. Bombay and the mock-Mexican Carlito.
* Europop). Instead it was "Sexual (Li Da Di)", which reached #42 in 2000, after her overall popularity had waned stateside. Likewise, she had 5 #1's on the Billboard Dance chart, including "Sexual", but the former three songs only peaked at #10, #5, and #9, respectively. Ditto the UK, where "This Is Your Night", "Colour" and "One More Night" completely failed to chart, whilst "Read My Mind" and "Sexual" hit #34 and #23, respectively.
* Euro Spy, we have a very handsome Hungarian spy named Gabor. He attracts many girls.
* Eurostar has a series of ads promoting the high-speed train line between London and Paris by pitting two symbols of London and Paris against each other. One lets

the
* Euro starter kits were sets of a few coins totaling around from about 4 to 20 Euros given out before the actual introduction of Euro cash. Many of these were simply the first Euros people spent — and these people are now probably kicking themselves as complete, unopened kits can nowadays be worth ten times their original value as collector items. The record is held by Finnish kits, which are worth forty times the nominal value of their coins.
* EuroTemps by the Midnight Rose Collective has a framing device of powerful sorcerer and DPR offical Loric looking through reports and using magic to turn them into narratives.
* Euro Trip, and given the name of this film, a literal example of the world mocking his loss.
* Euro Trip, as a subversion of the standard formula for teen comedies; the writers eventually went with a more traditional ending.
* Euro Trip, at least one German singer in the background belts out a song whose only lyric is "Du kannst mich nichts verstehen" ("You can't understand me). Which is true, if you don't speak German. There's also a kind of subversion on the ladies' nude beach in France – two girls are talking and when one answers "Oui" (French for "yes") they translate it with "Let's make out".
* Euro Trip, called "The Green Fairy" due to its color, in Europe, Jenny and Jamie, who are brother and sister, start making out. The Green Fairy appears by the stunned Scott and Cooper and says "Can you say 'what the fuck did I do last night'?"
* EuroTrip features the crew playing a drinking game during the movie.
* Euro Trip involved a nude beach scene. In it, the main male characters try to visit a nude beach to check out naked European women, only to discover it's full of naked men who had the same idea. When the main girl character takes her shirt off to tan in her bikini, they're chased down the beach by hordes of naked men desperate to see a nude girl. Later in the film, the girl who is the main character's love interest strips down and has sex with him in a confession booth, and her buttocks are squashed into a vent and seen through glass for comic effect.
* Euro Trip involves Scott tossing a small coin to a hotel employee, who then quits and announces that he intends to buy his own fancy hotel with the coin.
* Euro Trip one of the characters gets trapped in a BDSM club/torture chamber, and is raped by a domme.
* Euro Trip on live international television. And getting away with it.
* Euro Trip. Scottie meets the hot German girl's family. Her kid brother goose-steps, draws a Hitler-stache on his face, and does Nazi salutes while his dad isn't looking.
* EuroTrip, Scotty's ex-girlfriend Fiona's new boyfriend's song, "Scotty Doesn't Know" (about Fiona cheating on Scotty), becomes something of an Ear Worm for the entire cast — starting with Scotty's best friend. Not only that, but it becomes a major hit all over Europe.
* Euro Trip, the characters make it to Slovakia by accident and find they only have $1.83 US on them — which, apparently, makes them close to being millionaires and grants them access to a lavish hotel room. (Naturally, this joke doesn't work anymore since Slovakia adopted the euro.)
* EuroTrip: The first time Scotty hears the song "Scotty Doesn't Know" (in which the singer goes into great detail about how Fiona cheated on Scotty with him) it was incredibly traumatizing for him. But later in the film, he admits that it's a really catchy tune and starts singing it along with his friends.
* Euro Trip), the liquor starts flowing and the thugs join them in a rendition.
* EuroTrip: The main character is in the Vatican, and he sneaks about in a private room of the Pope that leads to his balcony. There he quarrels with his friend, who puts a pope hat on his head. He slips and grabs the curtain of the balcony door, and it falls down with him. When he gets up, he accidentally opens the door and the curtain wrapped all around him looks like a pope's robe and the curtain rail in his hands like a pope's staff. With him looking like this, the huge crowd on Saint Peter's Square thinks he is the new Pope. It goes even deeper than that. Prior to

this, the bell signalling the death of the Pope is rung by one of the protagonists who "wonders what this rope is for" and one of the pope hats catches on fire and is thrown into the fireplace, releasing the white smoke that signals a new Pope has been selected. The crowd is waiting for his appearance when Scotty appears on the balcony.
* Euro Trip. The most glaring example is the all-female nude beach at the base of the workers' monument. Also, the orange juice commercial with the nude lesbians making out.
* Euro Trip visits a brothel in Amsterdam. As soon as he consents to a sexual encounter (with an unintelligible foreign safeword), the context is changed to a BDSM fetish room. He reappears the next morning clearly traumatized but having earned a free T-shirt.
* EuroTrip were filmed in or near Prague. No scene was set in the Czech Republic itself, though Slovakia, which was unified with it as Czechoslovakia until 1993, is featured.
* Euro Trip, when Scotty is fighting the robot street performer in Paris, a nearby busking Buddhist with a guzheng notices the fight and provides appropriate soundtrack.
* EuroTrip when the guy who has no concept of geography lays out their travel plans using the table and food as a map. The film keeps harking back to this metaphor when the group travels, showing where on the table (or over on the neighboring table) they are headed.
* Euro Trip: When the main characters visit Mieke's home, Mieke's younger brother is shown imitating Hitler and goosestepping through the apartment without his parents noticing.
* EuroTrip when two characters walk into a Jamaican coffee shop in Amsterdam and order what they think are hash brownies, hallucinating wildly until they're snapped back to reality when told by the waiter they're just regular brownies.
* Eurovision Song Contest (2001) song "(I Would) Die For You" by Antique, Greece. Says itself, really.
* Eurovision Song Contest, a 2016 interval act describing a perfect Eurovision song:
* Eurovision Song Contest, an anthem of the previous year's Orange Revolution, as a "wildcard" entry in the final. It won the vote (and promptly had to be rewritten to remove the political content, in accordance with Eurovision rules).
* Eurovision Song Contest and Italy to shed references to Chanel in their 2017 entry.
* Eurovision Song Contest because the singer they chose to enter, Yulia Samoylova, is barred from entering the host country, Ukraine, due to traveling to Crimea via Russia, who had annexed that region.
* Eurovision Song Contest entry, "Dancing Lasha Tumbai", caused some controversy as 'Lasha Tumbai' sounds like saying 'Russia Goodbye' in a Ukrainian accent.
* Eurovision Song Contest example: the winning country traditionally hosts next year's contest, at high cost.
* Eurovision Song Contest has seen a few very tight finishes in the finals.
* Eurovision Song Contest in 2014, "We Are Slavic" by Donatan and Cleo, is basically about how Slavic women are the hottest in the world. The music video is all about extreme closeups on the cleavages of women in Polish national dress.
* Eurovision Song Contest, kept their monster makeup on the whole time and wound up winning (although their monstrous appearance didn't dictate their behavior).
* Eurovision Song Contest Naturally, the occasional one slips out (one of the hosts in 2001 had a notable one when it looked like he broke the trophy), but it's usually avoided. Most recently, one of the backing dancers for the Dutch entry in 2018 seemed to be clearly screaming "Fuck yeah!" to the camera when they finally qualified.
* Eurovision Song Contest of all things. The various capital cities don't tend to say it so much these days, but the UK still does.
* Eurovision Song Contest) released a song called "Sex with Your Ex", in which she sings about sleeping with an ex for fun while not really wanting to get back

together ("I just want you, I don't miss you", she sings at one point).
* Eurovision Song Contest shows the Russian performer (which is only seen as her face) aging throughout the course of the song while singing the lyrics, in sync with the actual performer's, joined by five backing singers wearing folk-inspired costumes.
* Eurovision Song Contest. Sometimes it's just as simple as being particularly great at dancing, playing an instrument, or (shocker!) singing, but there are also often showcases for if the performer is accomplished at gymnastics, yodeling, or some other such unique skill. One of the most famous examples is Norway's Alexander Rybak, who both sang and played the violin in his song "Fairytale" and won the contest.
* Eurovision Song Contest that's obviously intended as a parody of the kind of novelty songs that show up at the contest, they inevitably just transform into the exact kind of song they're trying to mock.
* Eurovision Song Contest, their spokesperson offered Sakis Rouvas (the host of the contest) his phone number, which Rouvas said "I bet it’s 696969."
* Eurovision Song Contest, though due to the maximum length rule they don't last as long as most of the other examples already listed. The longest note in the contest happens in Natalia Gordienko's 2021 Moldovan entry Sugar, in which the high note capping off the bridge lasts for 17 seconds and goes over the entirety of the last chorus.
* Eurovision Song Contest, usually by way of "flirting." Usually in English, which is not their first language. On at least one occasion (Denmark, 2001), rhyming couplets were employed for the purpose.
* Eurovision Song Contest winner Dima Bilan (born Dmitry), who changed his legal name so he matched his artistic name to avoid claims of ownership of the second by his late producer's family.
* Eurovision tag, they became hugely successful in the second half of the 1970s and the early 1980s.
* Eurydice is in a classic Damsel In Distress situation. Unfortunately, Orpheus does not come up to expectations.
* Eurydice picking up where Orpheus left off post-canon and campaigning for better treatment for the workers is a popular fanfic topic, with some having her lead a resistance against Hades while others have her working with him and Persephone to bring change.
* Eurythmics (1984). Tracks include "Room 101", "Doubleplusgood," "Sexcrime (1984)" and "Greetings from a Dead Man."
* Eurythmics. After Eurythmics broke up (or at least went on extended hiatus), Annie Lennox started a very successful solo career, while Dave Stewart was limited to producing.
* Eusidore the Blue: "I am Usidore! Wizard of the 12th Realm of Ephysiyies, Master of Light and Shadow, Manipulator of Magical Delights, Devourer of Chaos, Champion of the Great Halls of Terr’akkas. The elves know me as Fi’ang Yalok. The dwarves know me as Zoenen Hoogstandjes. And I am also known in the Northeast as Gaismunēnas Meistar.
* Eusocial hymenopteran insects like Bees and Ants have three sexes: fertile females (queens), fertile males (drones), and sterile females (workers). These sexes are generally produced in ratios of 1:10s:10,000s; and though queens, drones, and workers all have different tasks to perform; 'worship' or 'enslavement' is just not the right terminology, as bee and ant hives cannot really be said to be composed of individuals - they are superorganisms, with queens and drones being the genitals of the composite creature. That being said, a lot of effort is devoted to the health and well-being of the reproductive units of the hive/colony at the expense of the sterile workers; but that maintenance often includes killing old or diseased or foreign queens.
* Eusocial insects have a reproductive caste (which makes up a small proportion of the group) and a sterile worker caste (which makes up the majority).
* Eusociality isn't limited to insects, either. Naked mole rats are eusocial mammals.

* Eusociality, which most famously shows up in certain insects like bees and ants, refers to a complex social structure involving reproductive and non-reproductive castes:
* Eustace becomes a dragon due to falling asleep thinking dragonish thoughts on a pile of dragon's gold.
* Eustace is also this to an extent. In spite of his grouchy and callous personality, he is well-liked by some fans (although he's a
* Eustace, Jill, and Puddleglum stop to look at the far-off gigantic statues lying in a field. Jill remarks on how lifelike they look. Then they stand up and start throwing rocks the size of cars. Fortunately, the giants were throwing at each other as a game; unfortunately, they have lousy aim.
* Eustace Scrubb and Jill Pole grow close and remain best friends after their adventures, but they don't have much
* Eustace. Throughout the series the only moment he ever showed true empathy was when he hallucinated Courage as a version of his younger self, and gave him his hat out of pity. It makes the audience wonder what worth his kind wife Muriel sees in him.
* Eustass Kid ends up falling in love and being loved back by the lady marine officer he kidnaps in
* Euthanizing a pet to spare them the pain of a disease or lifelong injury. To say it's unpleasant is an understatement, but it's a selfless act of pure love.
* E.U.. The band would have two more top ten hits on the R&B chart but never made the Hot 100 again.
* EUThey all seem to work just fine in rain, which doesn't seem to be enough to connect the two parts of the energy circuit and cause a short, so it's an ambiguous point.
* Eutopia: A Novel of Terrible Optimism. The cover is especially creepy.
* EVA-02's self-destruction against the MP-EVAs. However it is not Asuka who sacrifices herself. It's Kyoko who, after bidding her daughter goodbye, ejects her before blowing herself up.
* Eva’s fatal flaw is her temper. She has a tendency to react violently to the slightest of offenses, and was voted out twice for being unstable.
* Eva also uses a few bits of Stock Footage all through the series —
* Eva & Adam, about middle-schoolers in love in Stockholm, Eva only realises she likes the new boy Adam when her best friend seems to say she may be interested in Adam.
* Eva and Cali also serve this to the Sandins. While both of them are
* Eva and Carolina's father, who died shortly before the series began,
* Eva), and consider the 16-year-old Rei and the... much younger Unit 05 to be their parents. The Keiworu are AI copies of Kei Ayanami's mind randomized with elements of Kaworu's mind (both of them being 16), and also consider the two to be their parents.
* Evac could also be considered this to a lesser extent, though he mostly only qualifies for his size (he's even bigger than Grimlock). He could be considered a
* Eva claims this trope as her reason for abandoning the United States and going over to the Soviets. When she became a code breaker for the NSA, she realized she'd been carefully manipulated by propaganda her entire life.
* Evacuate Earth about what it would take for us to pull this off. The threat in this film comes from a rogue neutron star that will destroy our solar system in 75 years.
* Evacuate Earth about what it would take to build an interstellar ark in the decades before a rogue neutron star destroys the Earth.
* Eva, Dante's mother, was killed by the minions of the demon lord Mundus. This is what drove Dante to hunt demons in the first place.
* evades this due to commercials always taking place inbetween shows (not counting movies).
* evading execution as falsely-framed traitors with the help of an aircraft carrier. In gameplay terms, this means that several missions from that point on, during which you are launching directly from that carrier, require you to use

aircraft that are designed to take off from and land on aircraft carriers in real life, with you only getting your full complement of planes when you've stopped at an actual air base.
* Eva from Season 1 is a rare female version, who intimidates her fellow contestants with her
* Eva Green is actually a natural blonde but has favoured her hair black since she was fourteen.
* Eva Green often plays dark and charismatic nutcases - who are often sexually charged. Out of character, she says people would be surprised at how quiet and shy she actually is. She describes herself as a boring, private person - and the dark, sexual roles are a form of catharsis for her.
* Eva. However, they also have very strict prohibitions against killing humans, because humans, like them, are "people", and harming people is a bad thing according to their parental figures. Kaworu speculates that they may be closer to what humanity was like before the "Fall": uninhibited and unaware of Good and Evil.
* Eva Ibbotson has the son of the ghost family portrayed with a long term crush on a Cynthia Harbottle. When she turns up as a ghost in the final chapter, she is old, plump and selfish.
* Eva Ibbotson is paired off with one of the witches who didn't win the hand of the dark wizard. They fall in love remarkably fast, due to the machinations of the dark wizard's servants, who think they'd be a good match.
* Eva Ibbotson presence that gave Belladonna the dark powers, not the worm's.
* Eva Ibbotson, the police circulate composite drawings of the aunts, who are wanted for kidnapping. However, the descriptions result in grotesque caricatures that look nothing like the real women.
* "Eva" is about a man telling his beloved that when mankind turns mad and decides to destroy itself, he will leave with her in a spaceship, a "Noah's Ark" where he will be Adam and she'll be his small Eve (Eva!).
* Eva is brought out of the Aftermath studio to participate in "Suckers Punched" as Noah's opponent in the challenge.
* EVA is possibly the worst offender; despite being treated for her injuries after a motorcycle crash, she's still little more than dead weight, moving slowly and requiring constant feeding in order to keep up her stamina, refusing to go on if it gets too low. But when they reach the lake in the cutscene? She walks it off.
* Eva Longoria, and the one attempt for her to demonstrate her skills is unimpressive.
* Eva Longoria) is cast as a Sephardic Jew whose parents were born in Argentina. It's never suggested she has any German ancestry, however.
* Eva Longoria, the girlfriend of Detective Jake Peralta for part of Season 2.
* Eva Lord. She mentions that, if she were ever caught, people would be reluctant to call her evil. They would simply blame society.
* Eva Luna; nevertheless, they always remember these times very fondly.
* Eva Luna towards Eva, which makes her believe that the guy's not good enough for her very smart and kind "little sister".
* Eva Luna unhappy since she refuses to see the kindness under his deformity.
* Eva Marie: Debuted in 2013, retired in 2017. One of the most hated wrestlers in WWE history, and considered a symbol of everything wrong with WWE's women's division before 2016.
* Eva Marie, preventing her from actually wrestling, but fans still hated her.
* Eva Marie Saint, Sam Spiegel listed her as a Supporting Actress in the hopes of getting her a nomination. The ploy worked, and she won the Oscar.
* Evan Almighty became "Νώε για μια εβδομάδα" (Noah for a Week).
* Evan Almighty is basically a modern retelling of the original story of Noah, with a few twists (most notably, the flood comes not from rain but from a dam breaking).
* Evan Almighty — The main character Evan, who is a congressman, cosponsors the destruction of a natural forest for urban development.
* Evan Almighty, the village of Crozet (about 10 miles from Charlottesville) doubled for the much more urban Northern Virginia suburbs.

* Evan Almighty when the dam bursts. Fortunately the ark he's been building is quite big enough.
* Evan Almighty, who asks him to be the new Noah and build an ark, just like how Noah was instructed to build an arc in Genesis 6:14.
* Evan", a PSA uploaded by Sandy Hook Promise. We see various scenes of the title character interacting with a mystery girl through messages written on a library desk, and others where he's wondering who she could be. They finally meet, begin talking...and suddenly, another kid enters the school auditorium and loudly cocks a gun, leading to mass panic. The PSA then goes back and reveals that each previous scene showed the shooter and hinted at this outcome, with the message that such individuals are often overlooked until it's too late.
* Evan Bourne, formerly known as Matt Sydal. Hell, just calling him by his WWE name is enough to set off indy wrestling purists in some communities.
* Evan Bourne, Matt Korklan wrestled as Matt Sydal, and did so again upon leaving WWE.
* Evan Crose blogger who talks about books, anime, video games, and animation.
* Evander Holyfield (boxing, best known for having part of his ear bitten off by Mike Tyson)
* Evan Dorkin, he asks "What's this movie about?" "Dude," answers Bill; "it's about a planet of apes!"
* Evanescence, and their label asked Christian music stores to stop selling their CDs. It was probably a wise strategy since it's unlikely an artist strongly affiliated with the contemporary Christian music scene could have sold 15 million albums worldwide.
* Evanescence as well-known as "Under", a song that like "Life" is still held as a nu metal classic to this day (although not nearly as much in the mainstream). "My Immortal" wasn't released to rock radio, but the other three songs were their Top 5 hits on alternative radio (with "Life" being their only #1 there; but "Sober" outpeaked "Under" by one position).
* Evanescence - "Call Me When You're Sober", "Sweet Sacrifice" "Going Under" "Lacrymosa", "The Change", "Oceans" and "Made Of Stone".
* Evanescence fans tend to give this treatment to We Are The Fallen, made up of former Evanescence members Ben Moody, Rocky Gray and John LeCompt and singer Carly Smithson. Carly is often accused of sounding too much like Amy Lee, and the band of being an Evanescence ripoff.
* Evanescence if Seether's song "Breakdown" is about Morgan's relationship with Lee, or a different ex-girlfriend.
* Evanescence is a double up, A guy who she loves is her drug and she needs him to function, but also she addicted to the pain she feels and on purpose puts herself down because THAT is also a drug, which directly relates to their relationship which is based upon sadness.
* Evanescence, or the latter, as it is not grounded in reality and is ex-guitarist Ben Moody's creature anyway. Songs that are much more personal to her don't get nearly as much commercial recognition, nor are so ingrained into pop culture – "Good Enough", for instance, is a similarly piano-driven ballad, inspired by her then-fiancé and current husband, but its release as a single was cancelled by the label.
* Evanescence's "Bring Me To Life" suggests this — the main action is interspersed with shots of Amy asleep and apparently dreaming, and the video ends with her asleep.
* Evanescence's song "Lose Control" has this: "Mary had a lamb, his eyes black as coals. If we play very quiet, my lamb, Mary never has to know."
* Evanescence tagged on to them, both of which are ridiculous accusations.
* Evanescence that lacked it in 2017 (claiming to have been happy to do so).
* Evanescence two members called Will Hunt, both drummers. Vocalist Amy Lee dubbed the 'new' one Will 'Science' Hunt during his time with the group.
* Evanescence with only Lee's vocals, which is apparently closer to her own intent.
* Evan Evagora ("Remembrance", "Maps and Legends", "The End Is the Beginning")
* Evan Evagora shares a lot in common with his character Elnor, as he explains in

* Evangeline A.K. McDowell, the vampire mage, constantly tells the rest of the cast
* Evangeline A.K. McDowell, who was turned into a first-generation vampire at the age of ten. Oddly enough — or perhaps not so oddly when considering the illusion magic she uses — no non-protagonist really seems to even notice that she's a child, being terrified of her for
* Evangeline also does a good one at the beginning of book 4, when Asuna correctly guesses she was in love with Nagi Springfield, Negi's father.
* Evangeline also fits this perfectly. She loves giving Negi outrageous orders just to see if he'll go through with them, such as demanding that he lick her feet before she would teach him magic.
* Evangeline also manages to contain her vast boredom by dressing up her few remaining classmates as goth girls.
* Evangeline Athanasia Katherine McDowell gets more and more of these as time goes by, usually uttered by other mages to emphasize how casual the main group has gotten with her — and just how much of a figure of terrifying darkness she is to everyone else. Her known names are: Evangelina Athanasia Ecatherina MacDovell (on her
* Evangeline doesn't care about Negi's welfare and will occasionally help the villains if she feels it will be entertaining. Eva also seemed to treat the entire Battle of Mahora arc as a massive
* Evangeline, in particular, does this whenever she wants to scare people.
* Evangeline is also fond of evil gloating, especially when she isn't doing anything evil. She probably wants to remind everyone she most definitely has
* Evangeline says she ripped the man responsible for turning her into a vampire apart the first chance she got. Her first regaining consciousness surrounded by the bodies of her family with their blood on her hands
* Evangeline's first partner, the doll Chachazero, is a bloodthirsty thing that would rock
* Evangeline's opponent in the first round tried to avoid this by treating her as an equal and not to be underestimated; of course since Evangeline is one of the strongest characters in the setting even while depowered, she still took him down in a split-second with a half-hearted punch while distracted.
* Evangeline's partner Chachamaru, being a robot, will fight whoever she's ordered to by her mistresses, including the people she otherwise acts friendly around.
* Evangeline sure seems pleased with her immortality, though it's implied that when she was younger that wasn't the case. If anything, she probably wishes she could still be immortal
* Evangeline, the... hey, where are you going?! She's just getting warmed up here!
* Evangelion 1.0, Shinji wanders past one. He is so lost in his own depression (also his SDAT player) that he's largely oblivious.
* Evangelion 1.0, where Misato and Ritsko ride a chairlift down a shaft, Misato remarks, "My butt is freezing!" This would be funniest among fans who had been affectionately referring to the short shorts she wears as part of her uniform as her 'butt-freezers'.
* Evangelion: 1.0 You Are Not Alone with its sequel, as the plot diverges rather quickly.
* Evangelion: 2.0 has a rather horrific case of this. His outer 'skull' splits apart to reveal an extendable mouth with a tripartite jaw, out of which comes a purple, vaguely tongue-looking protrusion, out of which comes an enormously long 'inner mouth' with gigantic cutting teeth. All of this lovely display is accompanied by loud and unpleasant vomiting/retching sounds.
* Evangelion 303 accused Grummancat of blaming all USA gaffes and mistakes on an evil secret organization. Grummancat retorted that his story never implied such nonsense.
* Evangelion 303. After a day of arguing, they end up getting a Vegas wedding at three in the morning with Shinji and Asuka acting as witnesses. It's never stated if they still planned on having the regular wedding, but it's implied that they just told everyone else when they woke up.

* Evangelion 303: After his boyfriend broke off their relationship, Kaworu realized that he felt comfortable without feeling romantically tied to anybody and he did not need a lover right now.
* Evangelion 303: After his mother's death, Ritsuko became Shinji's caretaker and kind of stepmother. However, she was too busy with her job to raise him properly. As a result, Shinji barely saw his father's girlfriend and he does not really like her.
* Evangelion 303: After spending several months being lovers and getting engaged Asuka was able to bring herself to tell Shinji that she loved him.
* Evangelion 303 against Mari... but Mari shot her down a few seconds later. In a real battle she would be dead. Moreover, their little duel earned her another severe reprimand from Misato. Still Asuka was gloating later to Mari she she won. Mari laughed and called her a "kamikaze".
* Evangelion 303: Although Gendo seems to be less abusive than his canon self, he keeps a secret agenda and he’s using everyone –including his son and his son’s fiancée- to carry it out.
* Evangelion 303: Although the author is male, the male characters provide plenty fanservice in this doujin (not so much as the female characters, though).
* Evangelion 303 and Asuka asked if he could promise to be true to her for as long as he lives, he said yes.
* Evangelion 303-, and broke up with him. He regretted it, but for that time Kaworu had moved, and Saburo got increasingly jealous of the close relationship between Kaworu and Rei, lashing out at Rei, berating Kaworu for spending time with her, and resorting to hare-brained stunts to attract his ex-boyfriend's attention.
* Evangelion 303... and he concludes it is more than worth and he would not trade it for anything in the world.
* Evangelion 303 and his father -whom he has not seen in years- shows up to lecture him about -supposedly- neglecting his duties because he is infatuated with a pretty face. Feeling more angry and depressed, Shinji goes to a bar to drown his sorrows in alcohol.
* Evangelion 303 and if they broke up it might mess the pilots' teamwork up. However she was told that they should let them make their own choices so that she stopped to try to keep them apart.
* Evangelion 303 and other pilots flying advanced war planes. They were training duels, though.
* Evangelion 303 and reminded him that there was people like herself that depended on him to live.
* Evangelion 303, and she got instantly and subconsciously drawn to him. She started to look for excuses to talk with him, spend time together, sleep in his home… until she eventually admitted to herself that she had fallen in love with him and seduced him.
* Evangelion 303 and Shinji followed her to plead her to not leave him.
* Evangelion 303 and Shinji needed growing a spine to help her and save her from herself.
* Evangelion 303, and wanted nothing with Saburo. Saburo is constantly trying to get him back, but all that is he achieving is pushing Kaworu away from him and towards Rei.
* Evangelion 303 are facing when out of nowhere Toji gropes her. Hikari was not amused, but her disgust did not last long...
* Evangelion 303. Asuka is abrassive, proud, hot-tempered, emotional and confrontational. Hikari is kind, tranquil, rational and understanding. Still they are two good friends and fight together.
* Evangelion 303: Asuka is a very aggressive, hot-headed woman and Shinji is a non-confrontational, quiet, shy man. Asuka always claimed she wanted to someone confident, determined, and muscular and she was not interested in scrawny boys. Still, she fell in love with Shinji and after seducing him they are unable to live without each other.
* Evangelion 303: Asuka is the first girl that shows up in the history, and the first girl that Shinji meets when he arrives to the base. They got together.

* Evangelion 303, Asuka's temper got way, way worse. Anything could make her snap and lash out. Fortunately, she got better after a while.
* Evangelion 303 Asuka warned Shinji against telling anyone that they were sleeping together. After several days she stopped caring about people knowing but she forgot to tell him, so Shinji was still denying everything to his friends and trying to keep it secret as the same time that her friends pried everything out of her.
* Evangelion 303: Before the beginning of this story, Rei Ayanami was incredibly cheerful, energetic, and sunny the whole time, but an accident rendered her emotionless.
* Evangelion 303 but also because she knew that Mari wanted to mess with Shinji's mind for her own amusement.
* Evangelion 303; but instead of putting him in orbit as usual in this trope, her punch just results in him stumbling backwards and his nose bleeding.
* Evangelion 303... but she genuinely likes fighting and showing off her superiority.
* Evangelion 303 chapter. Usually Asuka takes one when she gets distraught, upset, or angry (and she often feels like that in this story).
* Evangelion 303: Dr. Ritsuko Akagi. She is Project Evangelion's head scientist and she is also responsible for crew assignments.
* Evangelion 303: During an argument with Kaworu after their breaking-up, Saburo grumbles:
* Evangelion 303: During their dates Kaworu unintentionally does many things (such as smiling or kissing her hand) that unintentionally get Rei flustered and even aroused.
* Evangelion 303: During their dog fight, Asuka was chasing Shinji and coming on his heels. Then Shinji abruptly braked and flew backwards. Asuka got frightened and swerved to dodge him, allowing Shinji to tag her.
* Evangelion 303: Female variant. In chapter 17 the female cast is holding a bachelorette party in a male strip club, and Asuka is trying to think of something else in order to not get too horny and do something stupid... so she starts thinking of her best friend getting married to "that monkey-faced brute" Touji Suzuhara (whom she cannot stand).
* Evangelion 303 for several weeks. And still, even though Asuka claimed that she hated everything and Shinji got emotionally hurt constantly, neither of them ever thought of breaking up. Put simply, neither of them thinks they can possibly be happy without each other.
* Evangelion 303: Gendo and Fuyutsuki –especially the latter- spend most of their time negotiating with politicians and bureaucrats in Washington. They find it very tiresome and distressing.
* Evangelion 303: Getting together with Shinji worked wonders on Asuka's brittle temper. She calmed down -a bit- and started being nicer to people she previously declared she could not stand like Rei or Kaworu. Several characters note that she has changed and is kinder: after finding out Shinji and Asuka are iving together Misato mutters "Oh. So that is because she is nicer now". Shortly after Asuka praises Rei's performance during a volleybal match and Rei gets flustered and shocked.
* Evangelion 303 has not changed that, and she does not want to see Mari anywhere near Shinji.
* Evangelion 303 her blue eyes glow red for a moment to heighten she is furious... and dangerous.
* Evangelion 303. Her death cast a dark shadow over the whole Part II and especially affected Asuka, who blamed herself for it.
* Evangelion 303. His doujin and his page are devoted to pics of Asuka and airship models.
* Evangelion 303: If someone checks Grummancat page before reading all chapters in order, that person will get spoiled that: Jessika was in love with Asuka, Unit-04 crashes and Jessika dies, Asuka falls in a coma but it only lasts several months, Asuka's suicide attempt fails, Shinji and Asuka got engaged and Mari Makinami is the Sixth Child.

* Evangelion 303: In chapter 12, while Asuka is arguing with herself during a breakdown, she yells out loud: "SHUT UP!!! Shut up Shut up Shut up Shut up Shut up Shut up SHUT UP!!!"
* Evangelion 303: In chapter 12, while she's arguing with herself, Asuka yells out loud: "SHUT UP!!! Shut up Shut up Shut up Shut up Shut up Shut up SHUT UP!!!"
* Evangelion 303: In chapter 13 Asuka tries — and fails — to convince Shinji to break up arguing that he is attached to her because she is the first woman that he has ever been with, and men often become attached to their first sexual relationship.
* Evangelion 303. In chapter 13 she is so sick of everything that she runs away because she thinks she is a miserable failure that has made huge messes, is good only for hurting people and is standing in the everyone's path and holding the project back, and she wants to find a place where nobody knows her and nobody cares about her.
* Evangelion 303: In chapter 15 Asuka resorted to this tactic to win her and Mari's "friendly" duel. Asuka's plane was about to fall down and she decided she only needed to survive long enough to shoot Mari's down, so she performed a suicidal attack to take Mari with her.
* Evangelion 303: In chapter 15, Mari and Kelly are taunting each other about their sex lives as having some drinks in Pancho's. Quickly their conversation enters "I did NOT want to know about it" territory, and the barman thinks: "Boy - If I had a dollar for every bit of info I had to "forget" around here...".
* Evangelion 303: In chapter 3, Nerv wanted to use a new, experimental aircraft to perform a reconnaissance mission. Maya points out that jet's never been flown, even for a test flight, and they're expecting it to fly to the other side of the world, and back, at nearly 4 times the speed of sound. Ritsuko admits that she feels the same way, but the Commander's going before the senate about the project's budget soon and needs an "ace in his pocket"; Plus, they don't know how much time they have left until SEELE's endgame. So, they launch.
* Evangelion 303: In chapter 4 Shinji goes in the bathroom and walks on Asuka right when she is leaving the shower. Much screaming, shouting and yelling followed.
* Evangelion 303: In chapter 4, Shinji walks in on Asuka right when she's just taken a shower and is towelling herself dry. Cue screaming and yelling.
* Evangelion 303: In Chapter 5 Jessika often teases Asuka about her liking Shinji. At the beginning, Asuka denies it vehemently and refuses to admit it to herself, but due to her friend's prolonged teasing, she starts to second-guess herself and realizes she really likes Shinji.
* Evangelion 303: In Chapter 6, Asuka clings to Shinji because she's frightened of losing him when they engage the enemy since he doesn't value his own life.
* Evangelion 303: In chapter 7 Kaworu returned to his home late and discovered that his ex-boyfriend had done this. Kaworu's reaction to Saburo saying "You're late" was: "What do you care and what are you doing in my home?"
* Evangelion 303 into remaining together and thinks that if he fails, she - the only woman that he has ever loved and will probably ever love - will vanish from his life forever.
* Evangelion 303 is extremely distraught and paranoid -due to several weeks of disappointments and frustrations- and she is starting to wonder if Shinji is actually trying to sabotage her. Then she angrily thinks: "This is unforgivable."
* Evangelion 303. Justified, since it is built so that the red portions of the suit can light up at night if the pilot needs to be rescued in wilderness.
* Evangelion 303: Kaworu/Rei/Saburo are a Type 3: Saburo and Rei both want Kaworu, but he wants to be single for now (and he wants nothing with Saburo).
* Evangelion 303 long night, Asuka and Shinji are quietly sipping coffee in a local shop when a thought occurs to her.
* Evangelion 303. Mandy loves Jessika and Jessika loves her, too. Hikari and Toji love each other. Rei and Saburo love Kaworu. Kaworu may have feelings for rei and he no longer loves Saburo. Misato is dating Shinji's ex-wingmate, and her ex-boyfriend Kaji is about to show up in the doujin. Gendo and Ritsuko are lovers and it is unknown like Gendo's marriage to his deceased wife Yui disrupts their

relationship...
* Evangelion 303 — are idiots or weirdoes. In the chapter 15, as she is putting up with the Mari and Kelly's antics, she thinks: "Idiots. Idiots both of them..."
* Evangelion 303 — it is a two-seater — so that they have to sit together during training, tests, missions, battles...
* Evangelion 303: Misato is the commanding officer of the "Evangelion" squad. She leads and trains the Children and chews them off when it is needed.
* Evangelion 303: Misato's house looks like a war zone. There's all sorts of trash — food leftovers, pizza boxes, crushed beer cans, plastic bottles, dishes, books, CDs... — scattered over the tables and the floor.
* Evangelion 303 of the "dark, large, with a central table and a row of seats surrounding it" kind.
* Evangelion 303: One chapter is titled "The Death of Asuka Langley Sohryu". No, it does not come to pass.
* Evangelion 303 page includes tons of bonus material, including extra pictures, fanservice drawings, characters' profiles and additional explanations.
* Evangelion 303: Played with. On the one hand the Evangelion squad members are allowed grow long hair, their commanding officer insists on them calling her Misato at all times, and some of them are dating despite of being members of the same unit. On the other hand their commanders expect obedience and demand discipline from them, Misato chews them out when they step out of line, and some officers think allow relationships between members of the same squad is a bad idea.
* Evangelion 303, reassuring it that “It would be only for a little while”.
* Evangelion 303: Rei suffered brain damage because of a trial flight gone wrong. She survived, but she stopped being cheerful and warm and became unemotional and quiet.
* Evangelion 303: Saburo felt ignored by Kaworu, so much so that he broke up with him. Later Saburo realized that he still loved him, so he offered to "forgive" his ex-boyfriend and take him back. By that time, Kaworu had realized that he enjoyed being single and didn't want Saburo back.
* Evangelion 303: Saburo was immature, sometimes overbearing, a borderline stalker and he did many dumb things and hurt people as he tried and failed to get Kaworu back... but he was not a bad person. He was just unable to control his emotions and let the past go. He also thought he was protecting Kaworu of a heart-break by interfering between Rei and him. When he realized that was not the case he gave up.
* Evangelion 303: Seele has been manipulating world politics for centuries in order to try to keep a power balance between countries, consistently supporting the military or political underdog.
* Evangelion 303. She got a very severe reprimand of Misato, who warned her that behavior was unacceptable and would not be tolerated.
* Evangelion 303 she was jealous, thinking wrongly Jessika had been unfaithful.
* Evangelion 303 she was totaly rebuilt, free from her latest traumas and looking better than ever.
* Evangelion 303: Shinji owns a 1963 Corvette red convertible. When she sees it, Asuka asks "How much are they paying you?"
* Evangelion 303: Shinji screams commands when he is in his Eva ("THRUST VECTORING ON!", "BRAKES OUT!", "AIR BRAKES OUT!").
* Evangelion 303, since Misato doesn't really care who they're sleeping with, but it's played completely straight in chapter 19 when they're told that all illicit relationships are forbidden while they're aboard the aircraft carrier (with special attention being drawn to the recently hooked up Kaworu and Rei).
* Evangelion 303 since they met and she drank several beers that afternoon (although Asuka claimed that she was perfectly sober and aware of her actions). After a short argument, she lies down beside him and says: "Last chance: Do you want to do this or not?". He takes up her offer.
* Evangelion 303: Subverted with Ritsuko. Shinji does not like his father's lover, he hates when she orders him around, and some of his comments imply that she barely

took care of him. However, he never said that she intentionally abused him.
* Evangelion 303: The author used it very extensively in scenes featuring couples. Some examples:
* Evangelion 303: The Children and their wingmen are young but accomplished pilots. The best in the base are Asuka — a steamroller — and Shinji — a bushwhacker — (and possibly Kaworu).
* Evangelion 303: The F-14E "Evangelions" (which in this alternate universe are experimental jet fighters rather giant robots). The first models are more powerful and have a better output than the latter ones. There also were talks to mass-produce them, but the Committee overseeing the project decided that it would be too expensive and the prototypes are good enough.
* Evangelion 303: The group of politicians tasked with overseeing the Evangelion project is always complaining about funding, the march of the program... and some of them would love an excuse for shutting it down. To be fair, their concerns are not without merit:
* Evangelion 303: The main couple is Shinji/Asuka. Rei/Kaworu and Hikari/Touji are the beta couples, often talking about Shinji and Asuka's troubles and even giving occasional advice.
* Evangelion 303: The original series used this trope so the author of the doujin, who was aiming for a more realistic universe, made a conscious effort to avert it and include seatbelts in the war planes.
* Evangelion 303- the red-headed girl. Mandy thought Jessika had been unfaithful and she even accused Asuka from being a home-wrecker, but Jessika never cheated, and those diary entries were merely her fantasies.
* Evangelion 303: This fanwebcomic started in 2010, it clocks over 1,200 pages and it is still ongoing.
* Evangelion 303: This is often used, such like relationships between characters (love triangles and characters with two close friends abound), and even in the story structure (it is split into three parts).
* Evangelion 303: Touji would do. He does not mind fighting with a woman, and he started a fistfight with Asuka in chapter 17.
* Evangelion 303 until he was old enough, and then Gendo sent him away for school.
* Evangelion 303 Up to that point, Shinji had seen her angry or depressed most of the time, and he was shocked and flushed.
* Evangelion 303 was nuking the whole country where they were hiding in lieu of building Evangelions to launch a pre-emptive targeted raid.
* Evangelion 303 whether she really said yes when he proposed to her or it was all a dream. In answer she asks "What do you think?" and she kisses him.
* Evangelion 303 while NERV's higher-ups tried to figure out what had happened to her.
* Evangelion Abridged, during its eighth episode, when the characters are discussing Asuka, only to find she's waiting at the top of the escalator they're riding:
* Evangelion Abridged, Misato says "I have a bad feeling about this... who writes this crap?"
* Evangelion, all episodes are named after musical terms like "Larghetto" or "Grave Non Troppo".
* Evangelion and single B-sides titled "NERV[/]SEELE" and "Shinji Ikari".
* Evangelion, Asuka is about to break the news to Shinji about her pregnancy.
* Evangelion during the children's hour. It barely managed to make it to episode five before being swiped off the air.
* Evangelion. Everyone gets occasional flashes to their previous lives in dreams meanwhile.
* Evangelion franchises which explored darker and more mature themes, material that before had been largely relegated to direct-to-video productions (the so-called OVAs) and therefore only reached a niche market.
* Evangelion, Gouken is heading back into the dojo when he finds Akuma standing on the porch. Gouken gets worried about his students, but Akuma states he has only come to warn Gouken about his disciples' future hardships.

* Evangelion, Gouken is watching TV while having lunch when a news broadcast shows a battle in Tokyo-3, and a giant robot using one of his fighting moves on a monster. Shocked, Gouken realizes that his underage disciples are being forced to fight giant aliens, and he needs to go to Tokyo-3 and give Gendo Ikari a piece of his mind.
* Evangelion lamented the death of the age ghetto in Japan in several interviews and cited the abundance of adult anime fans as proof of Japanese culture's degeneracy. He seems to have changed his tune somewhat, as he has gone back to working on anime.
* Evangelion, Misato playfully smacks Asuka on the back of the head when the younger girl is rolling her eyes at Shinji and their master Gouken getting all emotional. When Asuka protests, Misato reminds her that she got all teary-eyed when they left their master's dojo.
* Evangelion: ReDeath, Asuka sounds almost exactly like Schwarzenegger.
* Evangelion: ReDeath by Studio Sukod featuring Pimp Gendo, Uncle Kaji, and Valley Girl Rei. Most of the jokes are about sex, so it's not that different from the original anime.
* Evangelion: ReDeath gave us this immortal exchange between Misato and Ritsuko:
* Evangelion: ReDeath predates the original Yu-Gi-Oh The Abridged Series and consists of a single 34 minute video that parodies the plot of the Evangelion series and movies.
* Evangelion RE-TAKE. It's a very minimalistic example, since their fingers are only barely touching the other's, but for them, it's an extremely meaningful show of affection.
* Evangelion's backstory is expanded upon from the various official materials and videogame adaptations, revealing things that are only vaguely hinted at in the series itself. This trope is the origin of both the Angels and mankind, having been created when an ancestral alien species sent out progenitor beings (dubbed "Seeds of Life") billions of years in the past to different planets to seed intelligent life. The conflict in the series originated because two Seeds of Life landed on Earth by accident, creating two separate and different forms of "human" life - the Angels and humanity.
* Evangelion's Hideaki Anno — was actually pretty good, although it had always been a bit deliberately campy.
* Evangelion", Shinji feels guilty for nearly destroying the world twice and failing Asuka, so he asks her to punch him. She refuses to, though.
* Evangelion: Shinji points out there is nobody in the world other than Asuka and him, and Asuka refrains herself from chewing him out for a "lame Adam and Eve comparison".
* Evangelion: The Rite of Spring makes the battles with the Angels even more disturbing, as it moves the fight settings to Eldritch Location pocket universes. Kaworu and Rei's secret room in the theater may or may not count, but it certainly seems to defy the laws of nature.
* Evangelion Thumbnail Theater touches off a brief fad of anime series-based Thumbnail Theaters.
* Evangelion Unit-01. So long as a single human soul exists within it, it will stand as eternal proof that Humanity existed, even when the Sun, the Moon, and the Earth are all long gone. That's rather hopeful for a series well known for its terrifying imagery.
* Evangelische Omroep (EO), an evangelical broadcaster serving the Protestant Christian faith.
* Evangelist George Whitefield was well known in the 18th century for open-air preaching to crowds of thousands, some of whom didn't exactly treat his sermons with the reverence they might give in a church. He once wrote, "I was honored today with having a few stones, dirt, rotten eggs, and pieces of dead cat thrown at me."
* Evangelists in airports and the increased security measures that came with it got rid of this type of airport annoyance for good.
* Evangelist Ty Adams. It apparently emphasizes the solution instead of the problem.

* Evan Hunter lists at least five other pseudonyms he used from time to time.
* Evan Hunter to Evan Hunter. He exclusively employed the name Evan Hunter in his personal life from then on, and later wrote that he would not answer to "Sal" under any circumstances, not even if you had known him prior to the name change.
* Evan McCulloch, a.k.a Mirror Master II, is adapted as Eva McCulloch.
* Evan McCulloch, the second Mirror Master. He was an orphan and end up killing his father by accident in his job as a hit-man. As a result, his mother committed suicide. Another Rogue, Captain Cold, confronted his abusive father but couldn't bring himself to kill the man... so
* Evanna Lynch even uses an English accent for her on the audio-books), but after Evanna was cast, the fans have accepted her as canonically Irish.
* Evanna Lynch on her own initiative, and the directors liked them so much they let her include them.
* Evanna Lynch seems as if she's trying to avoid this. As she's the cast member who can be said to be most like her character, she has opted for darker roles to distance herself from Luna.
* Evanna Lynch she was cast as Luna Lovegood. When she showed up to the audition, she wore an outfit just as kooky as Luna's, including a pair of earrings that she made herself — which she was allowed to wear in the film itself.
* Evan Rachel Wood are shooting a scene together for Season 2, they both look confused and Harris looked at crew and said, "Why the fuck am I riding with Dolores!?" In a later interview, Harris found out about some of the stuff later on saying he would appreciate it if he knows about it at the time of the filming.
* Evan Rachel Wood who actually prefers first name or Evie as she’s never been too fond of the name Rachel.
* Evan Rachel Wood, who's openly bisexual, plays bisexual vampire Queen Sophie-Anne.
* Evan's Spiked Tentacles of Forced Intrusion mess with a wizard if he/she hasn't used up all his/her spell slots.
* Evan when dealing with real heavy hitters like ADAM, every fight against an Angel on
* Eva Perón involved more than just draining the blood and replacing it with glycerine, though this was done (or, to be more exact, a mixture of alcohol, glycerine and other preservative chemicals); the process, which took a year to complete, also involved replacing the corpse's water content with glycerin and ended up basically plasticizing Evita's body.
* evaporate due to the heat and thus keep it from having much effect anyway (which can happen with some poisons, at least).
* Evaporating Particle Beam with the Penetrator is also a guaranteed kill.
* Evard's black tentacles can summon a bunch of these over a 20-fr radius area. Anything in the area gets grappled and suffers damage over time.
* Eva (see the Comics section), it is generally acknowledged that he's eccentric.
* EVA Sessions: Someplace Vast and Dry intends for him to be around the same age as Rei, Shinji and Asuka.
* EVA Sessions: Someplace Vast and Dry. Justified as he is a Afrikaner (white South African descended from Dutch settlers).
* EVA Sessions: Someplace Vast and Dry, Misato is critically wounded while serving in a JSSDF anti-Other and peacekeeping operation in Indonesia, and because she now requires artificial organs to live, she is no longer fit for front-line duty. Gendo arranges for her to instead transfer to NERV as Operations Director, her canonical role in the original series.
* EVA Sessions: Someplace Vast and Dry, one of Rei's "Mermaid" siblings, Aimi, is explicitly described as such; she speaks in a formal and refined manner, as well as often defusing minor tiffs between the other Mermaids.
* EVA Sessions: Someplace Vast and Dry subtexts of her canon counterpart; Asuka also fondly remembers her as her babysitter.
* Evas might be this, but how they are created is never properly explained.
* Eva's proud and honour-obsessed sister-in-law, Natsuhi. The Man from 19 Years Ago plagues her with threatening phone calls, threatening to kill her husband if she

doesn't do what he says. By the end of it, both her husband and daughter are dead, and she's being blamed for Hideyoshi's murder as she was in the closet in the room where he was killed. Eva beats the living daylights out of her, and no-one tries to defend her. Only Battler knows Natsuhi is innocent, and he's unable to help her.
* Eva's villa in the manga operates on 24-1 ratio. This allows Negi to get a full day's worth of
* EVA Unit-00, identified as the prototype, supposedly has multiple flaws in its operation, from having minor synchronisation issues to
* Eva Unit are this trope, with their production process described as being grown from cybernetic fetuses.
* EVA units and the MAGI supercomputer are borderline examples. More like "
* E-vay fanart and comics, created a fan child for Sonic and Amy named "Aurora". She's popular among Sonamy fans and gets many fanworks in turn based on her, including fan games.
* E-vay's comics, Aurora asks her parents where baby comes from. Amy's explanation is that "Making a baby is like baking a cake! The Daddy puts the ingredients into the Mommy Oven and then it bakes for months". Sonic finds that silly, but his analogy isn't much better:
* Evdokiya Zavaliy Evdokim). She decided to play along and soon became a platoon commander. After her real gender was uncovered 8 months later (as usual, in a hospital) she was sent to the officer courses and became the one and only female Marine corps officer in Soviet history. She retired in 1947 in the rank of a guards colonel. She and her marine platoon was so feared by Nazis that they called her Frau Schwarzer Tod (Miss Black death).
* Eve 6's "Think Twice" is about a man who is jealous of another guy for being close to his lover.
* Eve 6 was filled with mellower, poppier songs. Among several songs from that album to hit the charts was one that took them even further from their roots - the ballad "Here's to the Night", making it, arguably, a black sheep among black sheep (or maybe a black goat).
* Eve also had another one of those moments on the show. On February 9, 2018; Gina Rodriguez made a guest appearance on The Talk to promote her series
* Eve also suffers from this as she tends to focus more on kissing Stanley while there's something happening but she does get herself back on track.
* Eve and Adam, and some characters had it from birth. There is also the ability to genetically engineer whole people, leading to the titular Adam.
* Eve, and their health bar (which normally takes up a small portion of a screen) stretches until it goes off the far edge of the screen and wraps back round onto the other side.
* Eve Arden announces her summer replacement, saying she would be listening to Steve Allen's show that summer. Everybody on the porch commending her nice speech. Allen, however, wonders if she'll really be listening. Cue Eve Arden saying of course she would, he has her job!
* Eve, at least early on in the game, looks like a young girl, but is actually the queen of an ancient race of robots that can rip anyone who gets in her way a new one with blades, support robots and deathrays. Later on she doesn't apply, though, because her class paths end up with her upgrading her body, making her look older.
* Eve can lie flawlessly — she needs to, being a spy. She also uses it to her own ends in civilian life, however.
* Eve girls came from a secret government's project. Its aim was to create and clone humans with superior strength and intelligence. Boys and men were called Adams, girls and women Eves. Pity the clones suffered from severe psychoses and had suicidal and murderous tendencies.
* Eve Harrington in the first episode, doesn't seem to care who she hurts to get established as a more serious reporter, although she's closer to Short-Sighted Ambition Is Evil And Stupid.
* Eve has a very good-looking body as she has a slim body, huge boobs and slim legs as well but her face has makeup on such as red lips and blue eyelids. She also turns her lips to comedic size which can put people off along with she also has

cartoony eyes and buck teeth as well but her being a nice girl is enough to make up for it as Stanley does find her very attractive even if he thinks that her face is off-putting because it's green headed even though she does not look that bad at all.
* EVE, including spying on the other odds-on favourites (especially the winner of the last three tournaments, Pandemic Legion) and successfully feeding intelligence to other teams in order to knock out Pandemic Legion's second team in the pre-qualifying round.
* Eve in the same series usually morphs one of her hands into a blade to use as a
* EVE is basically a floating sentient iProbe that appears to be made mostly of curves, folds up neatly, and is packed with numerous features. Makes sense, since her character design was done by Jonathan Ive, who designed... wait for it... the iPod.
* Eve is the only krogan female to survive Maelon's experiments and the side effects. Unless you didn't save his data, in which case she will die.
* Eve Kelly, were she got people to go skinny dipping in far off locations.
* Eveless Eden runs a company involved in selling blood products (everything from plasma to skin cream, as well as blood itself) taken from Ceausescu's hellish orphanage system. Thanks to the incompetent way the orphanages are run, HIV-tainted blood has long ago entered the system.
* Evelina, the eponymous heroine saves one Mr. MacCartney from suicide, since he believes he fell in love with his sister. MacCartney grows to idolize his savior Evelina in a quasi-romantic fashion. However, at the end of the novel, Evelina is revealed to be his real sister, while his original beloved was an unwitting (and unrelated) impostor.
* Evel Knievel all wear tight white T-shirts that accentuate their large breasts.
* Evel Knievel as motorcycle daredevil Evel Knievel, who travelled around the country getting into adventures and fighting bad guys.
* Evel Knievel for "most bones broken in a lifetime" (433, including seven times for his back alone). Given that the human body contains 206 bones, some of them have been broken multiple times.
* Evel Knievel for "most bones broken in a lifetime" (433, to be exact).
* Evel Knievel walking into the lot and pushing down on a plunger that blasts a small amount of confetti. Hall then says, "I stand corrected."
* Evel Knievel - World famous daredevil, who jumped his motorcycle over dangerous distances.
* Evelle and Gale are even worse. They leave Nathan, Jr. behind at not one but
* Eve loves these. When one of the wolves in the pack is hurt, she wants to track down the attacker, tear his tail off, and shove it down his throat. As if they wasn't bad, when her daughter goes missing, she gives this little speech to the other pack:
* Evelyn and Solas, not being able to control her emotions or use her magic. She also sees herself as physically unattractive, being extremely underweight due to not being able to take care of her health properly for two years. Solas always quickly assures her that he still finds her very desirable and that any hesitation on his part is only out of concern that he may hurt her.
* Evelyn ate her corpse before she finished all her metaphysical admissions paperwork.
* Evelyn/Cassandra uses a sling. As a hunting tool as much as a weapon, its the only weapon she was able to sneak around and master while in the palace, showing how set she is on making sure she's not just a frilly, useless princess.
* Evelyn Evelyn, a set of conjoined elephants named Bimba and Kimba, end up developing early-onset Alzheimer's and die of malnutrition. Two radical religious protest groups, one that believes all Siamese twins should be separated while the other thinks twins should stay conjoined because they'll play a role in the second coming of Christ, end up developing an interest in them and threaten to harm and kidnap them respectively. Fearing their safety, they run away at age seventeen. Their adult lives are not exactly perfect but they're far better than their childhood was.

* Evelyn Evelyn childhood. Luckily, they are able to express themselves quite well through their music.
* Evelyn Evelyn had their mother die in childbirth, their father killed, and their doctor killed all within minutes of birth. They were kidnapped by a chicken farmer who raised them in a cage amongst chickens. When he died a few years later, they ran of but ended up picked up by a brothel masquerading as an orphanage. At age thirteen they were given to a circus due to being "too old" for the men. At the circus, they were abused and harassed until they ran away a few years later.
* Evelyn Evelyn horrible childhood and have poor social skills, which likely resulted in them speaking in monotone.
* Evelyn Evelyn. She loved her sister and misses her but still wanted to prove that her boyfriend only wanted her.
* Evelyn Evelyn song "Have You Seen My My Sister Evelyn?" revolves around one of the twins looking for the other twin, who apparently knows a lot of guys:
* Evelyn Evelyn spent their teenage years a part of a freak show act. It was better than their previous place, though that's not saying much as they used to be pimped out to people. It's implied they were sexually abused by the clowns, the elephants were fed so poorly that they died, and the twins were overworked and beaten. The only good thing about their experience at the circus was that they learned how to play the ukulele, which helped them get interested in a music career.
* Evelyn Evelyn: The "Ask Evelyn Evelyn" bit of the stage show. The sisters give their answers one word at a time, trying to form a full sentence by following up on each other's words... which mostly involves Amanda and Jason trying to think of words that the other could not possibly follow up on.
* Evelyn Evelyn was murdered. This doesn't stop fans from speculating that she either ran away or was kicked out like Evelyn Evelyn were.
* Evelyn Evelyn were born, the doctor attempted to separate them with a chainsaw, accidentally killing their father in the process.
* Evelyn Glennie, the virtuoso percussionist, often performs barefoot, though for a good reason: she's profoundly deaf and it helps her to feel the music.
* Evelyn is extremely proud of the fact that Chad Kroeger from Nickelback performed at her funeral.
* Evelyn Nesbit is portrayed as practically throwing herself at White and being convinced to lie about White getting her drunk (when she was just 16, mind you) and sleeping with her at Thaw's family's urging during the trial.
* Evelyn Smith's short story "The Last of the Spode" is set in a gently post-apocalyptic England, where a handful of survivors play tennis, try to discuss the problem of repopulating the planet without getting too coarse, and drink tea from the last of the
* Evelyn, the narrator and protagonist of "Paper Chains" by Jane Langton, is a 183 cm redhead. And her parents have always encouraged her not to slouch.
* Evelyn Trevelyan and her diet suffers for it, she turns even more paler and thinner. That, combined with her attitude during that time, causes most people to find her very creepy to look at.
* Evelyn Trevelyan, often finds himself getting called out directly by her for his thoughtless comments.
* Evelyn Waugh a gossip columnist writes about the exploits of a socialite named Imogen Quest. Soon, all the most fashionable people in London claim to be her closest friend. The trouble is that she is actually a figment of the columnist's imagination.
* Evelyn Waugh a hopeless yes man that he can't quite bring himself to ever contradict his boss: instead of "No", he just says "Up to a point, Lord Copper."
* Evelyn Waugh as a Royal Marine during the war, during which he participated in several military actions... all of which were incompetently-managed and utterly ineffective fiascoes.
* Evelyn Waugh is a comic novel version of this — the protagonist and many supporting characters are all journalists covering an Eastern African country likely based on Ethiopia.
* Evelyn Waugh is sent to buy a variety of non-existent items to prepare for a

foreign journey. He's served by an extremely resentful shop assistant who has had the bad luck to always get stuck serving naifs on similar shopping excursions, and who believes that they're just pretending in order to waste his time.
* Evelyn Waugh just went ahead and named its version "Ruritania". The ex-king is a minor character who appears at a party and misses his old pen, which had an eagle on it.
* Eve months or years later. The game has kind of a scary metagame at times.
* Even 20th-century fashions that survived to 2015 didn't make it through unscathed. For instance, teens wear blue jeans inside out.
* Even '90s indie-pop got in on the game, as in "Anyone Else Isn't You" by The Field Mice, written by singer Bobby Wratten:
* Even a bird nesting in a tree can be considered this. Depending on their diet, however, they may be symbiotic by consuming the fruit of the tree and aiding reproduction by spreading its seed with their excrements.
* Even accounting for them being old and damaged animatronics, the Withered animatronics in
* Even across various iterations of the character, most fans will hear any character named
* Even a cursory glance at the standings page of any in-season sport quickly reveals just how massive the difference is between records of teams at home (it's not unusual for playoff-caliber NFL teams to run the table at home during the regular season, and the 1986 Boston Celtics hold the NBA record with a record of 40 wins and only one loss at home while going 27-14 on the road.) Rare indeed is the team that is better away.
* Even a decade ago, it was common to hear materialists insist that consciousness was an illusion (particularly A.I. researchers, because it would be extremely inconvenient for it to be real), but popular opinion has shifted somewhat.
* Even a failure rate of only a percent adds up to a lot of duds when tens of thousands if not
* Even a few of the monsters have monster dolls of their own. Herry Monster has Hercules, Telly has Freddy, and Elmo has Baby David, which he named after David, the proprietor of Hooper's Store at the time, in Episode 2256.
* Even a few space battles are this, with the Covenant achieving only a
* Even after a human has walked for many years, if one takes an injury that prevents them from walking for a period of time, the person has to relearn how to walk on top of their legs needing time to regain their strength to do so.
* Even after all the material in the Universe has decayed to its final state, the subatomic particles of which matter was once composed last effectively forever. It's recommended to take a look at this
* Even after Anakin becomes Darth Vader, he remains this trope among Imperial forces who tolerate him solely out of fear, necessity, or in Tarkin's case, begrudging respect. Palpatine holds a small quantity of affection for the fallen Skywalker, but being pure evil, he doesn't truly care about Anakin and is more than willing to cast him aside if he can find a stronger apprentice.
* Even after Arlong is dealt with, she's still just as greedy, justifying it by saying that she's now free to use her money as she pleases.
* Even after being forced to recognize that she's not Chloe after all, he continues to insist that he doesn't know why the idea upsets her so much. When she spells out to him that Chloe is a
* Even after being talked down from his psychotic killing spree, the only thing anyone has to say about
* Even after Bunny Colvin creates Hamsterdam (where any drugs can be bought, sold, and used completely legally), some of the gangsters in the city defiantly refuse to use it and just go about riskily doing their business where they always have, despite knowing perfectly well that a safer alternative is available to them.
* Even after deciding to eliminate rules on account of Yuu having no experience in
* Even after Everett went back to his homeworld, the Ducklair Foundation continued to provide weapons for various states, as shown in the PKNE stories when they provided the NATO and other major powers with

* Even after everything, neither Gendo nor Ritsuko cared about the welfare or mental health of the NERV pilots.
* Even after gaining control, her curse still interferes with a couple of things. She has trouble using focuses to channel her power, because her curse tries to destroy them from the inside instead of flowing through them properly.
* Even after Gettysburg, the South still had one last chance to win, or at the very least, get a negotiated peace that would leave the Confederacy intact. That would be by keeping Union forces stalemated in sieges until November 1864, when the Northern public, sick of a long, bloody war with no end in sight, would vote Lincoln out of office and elect George McClellan President, who was campaigning on a Peace platform. In the east, Grant's forces were held at bay at Petersburg while in the west, Sherman's forces were tied up in the siege of Atlanta. But Atlanta fell to Sherman's forces in early September, boosting Northern morale and resulting in Lincoln getting re-elected. When Atlanta fell, everyone knew the South had truly lost.
* Even after he dies, they're still caught up in this, annoying Garion until he finally forces them to get married and be happy. Ce'Nedra chastises him (tongue firmly in cheek) for ruining their noble suffering. Belgarath chastises him (tongue
* Even after he's destroyed in that battle he appears again at the end of the series seeking redemption and begins following Merrick.
* Even after he starts getting the hang of using One For All without breaking himself, his use of
* Even after his death in Part 3, Dio Brando's influence continues to have an effect on the later Parts.
* Even after it comes to light that Allison Doody's character Elsa Schneider in
* Even after its acquisition by the Canadian-based Anthem, and a complete re-brand that retired the TNA name, the newly-christened Impact Wrestling, under a returning Jeff Jarrett, was unwatchable in 2017, culminating in a near-universally panned Bound for Glory PPV that October. Fast forward to 2018, with the return of Don Callis and Scott D'Amore severing as Executive Vice Presidents. In the years since, Impact has been collaborating with both small independent promotions and even major competitors (such as
* Even after Lila unintentionally outs herself as a liar to Alya and Nino by claiming to have been Rena Rouge herself, causing Nino to have
* Even after our addition to the game lore, the human race plays a mostly insignificant role in most settings (the occasional legendary human in a given set might as well be replaced by any other creature); interestingly enough, most Planeswalkers (both in-game and lore-exclusive) are humans despite there being no mention at all about humans being special in any given way (other than the
* Even after Palpatine and Vader's deaths, the Empire and its successor state the First Order keep on fighting the New Republic for decades. While the Sith did not create the First Order
* Even after Po becomes a master, he's still a slapstick comedy protagonist. Near the beginning of
* Even after seventy years, Toph still gets a kick out of training (and beating up) the Avatar.
* Even after some point, Niles and Maris begin to fit this trope, when after the divorce and his marriage to
* ; even after spending years with Diana as a friend, Lois Lane is still surprised when Superman reveals that Diana's gods genuinely exist, to the extent that Persephone just visited the Watchtower to try and wake Diana up.
* Even after the big final battle, one is dropped in the winding-down finale:
* Even after the Constitution was implemented, states realized that although they couldn't issue paper money, they could issue charters to banks and allow
* Even after the emancipation of the serfs in 1861, the punishment continued until the early 20th century. By that time it was being used against workers and miners in cities too, particularly those who were involved in the civil unrest that evolved into the Revolutions of 1917. On the other hand, there were relatively few punishments (a handful of cases per year) and it may have decreased in severity.

* even after the last place team arrived and threatened to pass them, eventually quitting the task to come in last place.
* Even after the lyrics break out of the loop, the notes for "a broken record" repeat one more time for good measure.
* Even after the meteor business solidified the fact that the story was taking itself more seriously than its predecessors, it's still fairly light material. Then
* Even after the New Coke debacle of 1985, Coca-Cola was still intent on keeping that product alive, with both the new and original formulas remaining on the market simultaneously. As a result, two advertising campaigns were created. The original formula, now called "Coca-Cola Classic," went for ads reflecting the unabashed American patriotism associated with the soft drink, while New Coke went for the youth market that rival Pepsi succeeded in winning over. Enter
* Even after the Petrov incident, there were still tensions. Two weeks before the Able Archer exercise began, a Marine base in Beirut was hit by a suicide bomber, killing over 200 US Marines. All US bases around the world were put on alert after that, stoking Soviet paranoia. This was followed by considerable encrypted communications traffic between the White House and Downing Street concerning British objections to the U.S. invasion of Grenada (a Commonwealth Realm). Unable to decrypt that traffic, the Soviets assumed it concerned plans for a NATO attack. Then, Able Archer '83 entered its crescendo phase — the simulation of Soviet chemical attacks on Western Europe, and NATO commanders making the decision to launch retaliatory strikes on Eastern Europe. These messages were picked up by Soviet wiretaps, and sent Andropov and the Kremlin into a frothing panic. Soviet and Warsaw Pact troops were sent to their wartime mobilization positions, and nuclear bombers were put in the air as a precaution. It was only tamped down once a East German agent named TOPAZ
* Even after the show's cancellation, the identity of "Future Guy" remained muddled. Rick Berman claimed that they had never established his identity, while Manny Coto and Brannon Braga said he was probably a Romulan, only for Braga to later go back on that, claiming he had always intended him to be Archer, which still leaves unresolved
* even after the United States dropped an atomic bomb on the city because he wanted the glory of capturing the city that sparked the Confederacy.
* Even after the war ended (1453), relations between France and England were far from peachy. Both countries would remain at odds for the next four hundred years over matters such as religion or colonial ambition. In fact, it wasn't until the Crimean War (1853) that either of them actually managed to agree on anything.
* Even after they accept her, they don't like Dean, with opinions varying between dismissing him as a civilian and viewing him as an unstable threat. After he pummeled Oliver and killed Darhk, this has only increased.
* Even after this, it was unclear which end was the head: it was commonly assumed that a dark blot on one end was the creature's head, until 2014, when a closer examination revealed a pair of eyes on the
* even after trying to use a Love Potion bans love from the Dark Forest and imprisons the Sugar Plum Fairy, making sure that the Love Potion is never made again.
* even after Twilight tried to rob her because Pinkie Pie sincerely entertained her with the "One Small Thing" number.
* Even after watching him try to turn the Council of Acorn into his brainwashed servants,
* Even among Ashkenazi Jews there are numerous differences in religious rite and practice. The Eastern Ashkenazi rite is the most common and familiar among traditional Ashkenazi Jews; many don't even know that there is a Western Ashkenazi rite, and it can be found only in one synagogue in the world, in New York City.
* Even amongst a whole cast of characters looking and behaving very unlike themselves, Tiny Tiger in
* Even among the human crew members those actually native to Earth were a minority.
* Even among the Orks, however, the Looted Wagon is notoriously unreliable, since

any given Wagon has likely been with the Orks too long to have received proper maintenance for the stress being driven by an
* Even a Monkey Can Draw Manga: A manga about how to write cliché-filled manga.
* Even a Monkey Can Draw Manga uses this both for innate humor and to parody the stereotypical art styles of every major genre of manga.
* even and has nothing to do with feeding the Changelings. Not only did the main characters need rescuing from the Queen, but her own subjects did too.
* Even animals can give the Death Glare, as indicated by this famous quote by Robert Ruark on the Cape Buffalo.
* Even animals sometimes get in on this act, as in the velociraptor's crash through the laboratory window in
* Even an ordinary person's mind is deeply disturbing at times: Leitha herself states that most humans are much closer to animals than they would ever like to admit, and given that she's a rather beautiful woman, from men she tends to get
* Even anti-romantic Barney gets into it later. He refuses to leave a diner for a really long time until his love interest of the season, Nora, agrees to go out with him again.
* Even a Pikachu Short had this: Meloetta did this when it flew up into the sky.
* Even appears to be occurring to Phase, who is resisting with all his might the other two. However, it's not certain that it will end up like this, as Phase is still looking through 'outs'.
* even Arceus. Some would say that he is more recognized by divine forces that watch over Pokémon than humans.
* Even archeologists are not sure what the Egyptian god Set is supposed to be. There is an
* Even a relatively benign alien invasion will likely cause a huge existential crisis and much loss of life due to clashing ideologies, and this is supported by a game mechanic. Materialist Empire versus Spiritualist natives? Your agents prove that the "miracles" the superstitious natives believed in are easily provable as mundane, causing them to either fall into a deep state of depression or, worse, actively persecute religious pops and force them to renounce their beliefs or face imprisonment, banishment or even death. Spiritualist Empire versus Materialist natives? Your agents appear as godlike beings and their society's most brilliant minds just cannot find a way to disprove their "divinity" or prove their miracles are anything but, leading the population to
* even Ariel is like this to her own daughter, Melody. She doesn't even let her go in the water, probably to keep her safe from Morgana and to hope she doesn't do a repeat of the mistakes she made concerning Ursula.
* Even arthropods get involved in the action! One researcher studying cockroach reproductive habits noted that her research subjects eventually learned to recognize their handlers, and act differently around them than other humans.
* Even As... admits to screwing with ponies for his own amusement, saying that at least he doesn't act high and mighty about it, unlike Celestia, who manipulates them for the greater good.
* Even as a gangly teenager, Steve Rogers had a bit of this going on. As Marvel's foremost
* Even as an adult, Nelliel had her moments of hyperactivity, particularly when she mood-swung from calm and melancholic after blowing up Nnoitra, to ecstatic and girly before
* Even as a newly-minted Ensign, Miles Vorkosigan has a tendency to treat his superiors as "cattle to be driven", and those above him constantly complain about his "excessive initiative" or curse him by wishing he one day commands someone "just like him". In
* Even as clean it is when it comes to portraying martial arts and street fighting,
* Even as early as the first "Slapsgiving" episode, several months after the breakup, it was revealed they'd been more or less faking being
* Even a seven-minute cartoon can manage two acts. The first part of

* Even as far back as the second game, Brad Vickers survives the first
* even as he's being blown into a dozen bloody pieces by a rocket. though, this is more comical than morbid.
* Even Ash gets this treatment in "Alola Kanto!" when he gets ran over by his herd of Tauros.
* Even as late as the 1970s, many cars (and pretty much everything with a three-speed transmission) lacked synchronizers on first gear on the assumption that one would only use first to start out from a dead stop. It can come as a surprise for the unwary modern driver taking a classic for a spin.
* Even as of the current game, you're still required to pay double price just to play
* Even a sport itself can evolve beyond the abilities of former players. Take any Super Bowl-winning football team from the 20th Century and they'd be completely outclassed and dominated by the championship teams of today. This applies to virtually all sports. When Mark Spitz attempted an Olympic comeback, his times were actually
* Even at a species level, truly unified government seems rare: the Turian Hierarchy is fairly centralized, but the Systems Alliance is a multinational organization that provides interstellar defense and diplomatic representation to Earth's actual nation states, the Salarian Union is a semi-feudal collection of independent matrilinear clans, and the Asari Republics barely qualify as a government at all (their council member is the
* Even at the highest levels of classification this is rampant. Prokarya (monera) are basically all cellular organisms which aren't eukarya (hence including both true bacteria and archaea, which turned out to be in several ways as different to each other as they are to the eukarya). Amongst the eukarya, the protista are basically defined as any eukaryote which isn't a plant, animal or fungus.
* even at their slobbiest, to mock him. Instead, she stares open-mouthed and suggests that they have "angry sex" later.
* Even at the time it was more illusion than anything. It's hard to call the latter Industrial Revolution and the dawn of the 20th century "static" even if it might have seemed that way.
* Even at the time of publication, other parts of his work were easily discredited due to his lack of understanding of many of the subjects. For example, he often describes a "unique" rifle that can fire many shots. However, at the time repeater rifles such as the Winchester were already in use.
* Even at what would be a rather advanced age, he curb stomps a platoon of special forces operatives sent to capture him. "Is it my imagination, or are the new kids not as good as we used to be?" The fleet admiral he says this to, realizing that the new kids are just as good as Mantis has ever been, merely grunts "You've been practicing."
* Even back in the first game, during the Geth Incursion mission, you find a monitor with video of a quarian singing a "mournful a capella of worlds and innocence lost" to a hushed crowd, which the heretic geth are sending to geth worlds beyond the Veil.
* Even back in the One Year War, it's shown that the idea of women serving on the front lines isn't unheard of.
* Even Bad Men Love Their Mamas: A villain is sympathetic because of their care for their parents (usually his mother).
* Even Bad Men Love Their Mamas: Especially if that someone is your mother.
* Even Bad Men Love Their Mamas: Mothers are important to everybody, even villains.
* Even Bad Men Love Their Mamas: Sons with evil fathers are more likely to turn evil themselves than their female counterparts and any goodness they, or male villains in general, do have will come from their mother.
* Even Bad Men Love Their Mamas: Villains care about their mothers especially.
* Even Bagheera is noticeably less formidable in the movie. In the book, he's one of the jungle's most feared and respected inhabitants — not so much in the movie, where he's more of a
* Even Bart gets in on it is a voice spray that temporarily makes him sound like

Jerry Lewis when he takes it.
* Even basic training instructors are veterans, as indicated by them having the rank to do so (being career soldiers with
* Even Batman gets a watered down version of this when speaking to Vale about the Joker:
* Even before Bleeproducts are discovered: Intelligence Agent Architeuthis,
* Even before Christie, American writer Mary Roberts Rinehart (who's also believed to have coined the phrase "
* Even before first contact, the UNSC was already ahead in AI and computer technology, again because of the Covenant religion. The AIs themselves are a big part of the reason for humanity's surprising pace of advancement; in
* Even before getting burned to a crisp, Anakin Skywalker had a scar over one eye.
* . Even beforehand, Setsuna proved to be a dangerous opponent due to having centuries of combat experience and training.
* Even before he got the Intersect 2.0, however, Chuck had already picked up some serious marksmanship ability
* even before it's revealed she is the Spring Maiden. She also has the haughty demeanor, even if it's in service to a very selfish and amoral belief system.
* even before joining a criminal conspiracy to exploit the Mental World
* Even before Moffat became showrunner, episodes he contributed for the RTD era could fall into this. "The Girl in the Fireplace," his series 2 contribution, gets criticism from fans who ship the Tenth Doctor with Rose for having the Doctor act out of character, and willing to abandon Rose and Mickey on a spaceship in the 51st century to snog a courtesan in 18th century France, one episode after "School Reunion" where he told Rose that he would never leave her behind.
* Even before New Amsterdam, New York was called "New Angouleme", after the birthplace of the French king who'd bankrolled the expedition
* Even before she was Exalted, her mother evidently encouraged her in this direction. When we meet her Lunar mentor Racer, who's in many ways the masculine version of her (and at the time was traveling with a couple dozen women), it all makes sense.
* Even BEFORE St. Paul, the Gospel is according to his apostles or even Apostle's disciples.
* Even before that, during the Korlus mission, you tap into the Blue Suns' radio early on, letting you listen to their increasing panic as you slaughter your way through their base.
* Even before that, Goku looked too young to be the father of his professor Son Gohan (also keeping in mind that Gohan's own kid brother, Goten, is a teenager) but this is because Saiyans remain in their prime longer than humans. Neither Bulma nor Chi-Chi are thrilled, and you can guess how the latter reacts to her husband's further de-aging.
* Even before that Gul'dan created a demon-tainted volcano in Shadowmoon Valley which transformed the verdant region in a volcanic wasteland.
* Even before that, in the episode "Applebuck Season," Pinkie Pie refers to Applejack diverting a stampede of cows from Ponyville as "Appletastic."
* Even before that, one of Calvin's alternate personas, Spaceman Spiff, came to be as one of Watterson's earlier comic strip ideas, where he would go on galactic adventures in a space zeppelin with a dimwitted alien assistant named Fargle. The idea was rejected by the syndicates but he figured out he could reuse the idea through Calvin's imagination.
* Even before that, on the first bridge you cross in "AotCR", you can hug the cliff all the way down to the bottom. The rest of the enemies will not spawn so you skip about 95% of all the fighting in the level.
* Even before that point, when referring to Amsterdam's father, he says,
* Even before that, she tried it in a much more literal sense with Tavros.
* Even before that, the execution of Gol D. Roger became this, as the execution was supposed to serve as an example and suppressant to piracy in the world; instead, Roger's final words spurred a frenzied search for his lost treasure and a new generation of up-and-coming pirates.

* Even before that, the first two issues of Action Comics in which Superman appeared involved him stopping a war in South America that was started by munitions companies to boost sales.
* Even before that, their early arcade games received conversions of varying quality to many 8-bit computers like the ZX Spectrum and Commodore 64 a few months after release (albeit outsourced to porting houses) since the 80s. They even had
* Even before that, there is the infamous red straw hat that Madoka gives Kasuga in the very first episode.
* Even before that, the show is littered with examples of dangerous locations. The series premiere had the characters go into a forest that utterly terrified them, where they encountered two mythical monsters and a collapsing cliff. We later get to see a hydra and dragons on two seperate occasions, which the ponies just run from, a house-sized
* Even before that, Zoro did a non-verbal one on her to see if Nami is truly as cold-blooded as Arlong claims by throwing himself into the pool while tied up. Nami leaps after him without hesitation.
* Even before the '90s revamp, "Engine of Love", the first song ever written for the show, was replaced with "Call Me Rusty" when
* Even before the age of precision munitions, savvy warship designers were concerned about the possibility of a bomb or artillery shell going down a ship's smokestack
* Even before the Civil War, Osborn managed to pull this off when he publicly returned to life after faking his death following the discovery that his powers as the Goblin included an increased healing factor. Presenting fake evidence that he had never been the Goblin, Osborn was able to take control of the
* Even before their relationship becomes official, Asuka is very protective of Shinji. As
* Even before the Krogan Rebellions, their architecture was built with this in mind. In the second game it's mentioned that the hospitals are constructed like bunkers because injured krogan have a tendency to succumb to Blood Rage and destroy everything in their path.
* Even before the Night Elves were the trolls who, while being less advanced than most other races, built gigantic cities and temples that were abandoned after the Night Elf takeover. Modern trolls live in these ruins today, worshipping their ancientry, but unable to achieve their greatness — the ancient trolls are their own race's Precursors.
* Even before then, it's played with a bit in that even though Rick's Cafe Americain is a good place to go for a good time, it's also a place where the black market, espionage and various other schemers go to make contacts, arrange deals and such; even though the party's good, no one's entirely forgotten that there's a war on.
* Even before then, when Coraline first meets the Other Mother. She's kind, kinda witty, and
* Even before the reveal, its lampshaded that a preganglionic fiber and a postganglionic nerve are nothing alike and a student of his caliber couldn't have mistaken them, suggesting some motive or psychology for throwing the test.
* Even before the time skip, Zero Two said to Hiro that she would like to show him
* Even before the war the situation was really bad. US government cared little about where nuclear waste was dumped and what consequences it would have, for example they removed Grand Canyon's status as a national park and allowed careless Uranium mining which turned the entire canyon into a radioactive wasteland. Most of those barrels of nuclear waste you see in really weird and dangerous places have been sitting there since before the war.
* Even before this Captain Cold's Cold Gun was shown to be especially effective on the Flash, as coldness is based on atoms being still (IE, not moving), so his gun's icing effect is really just a side-effect of its actual purpose: Stopping movement. Ergo, it's often shown that a blast from the cold gun is enough to render a speedster drained of their speed (often only for a few seconds, but for a man as smart as Leonard Snart, that's all he needs). Strangely, unlike most

* Even before this, eldest daughter Liesl feels she has to sneak around to be with her boyfriend, and can only see him when he happens to be in the area. It's not entirely clear what the basis for the secrecy is, but it's safe to say that she didn't expect her father to react well.
* Even before this episode it is made clear that health care and medication are far better in the 31st century than in the present, resulting in a massive increase in the average life spans for humans. Living past the age of 160 is very common (which is why the Near Death Star was built), and flashbacks about professor Farnsworth's life show that even a man in his eighties can still look like a man in his late thirties - early forties in the world of Futurama. Also, injuries that would be permanently crippling to us (like having your hands bitten off by a T-Rex) are mere annoyances.
* Even before this is possible, using the Lancer's rockets or the tank to knock down walls to make shortcuts is also a common way to reach targets quickly.
* Even before, when Playstation Vita was in circulation, there existed the same thing but with Vita's layout.
* Even Beggars Won't Choose It: Not even vagabonds would be desperate enough for that kind of handout.
* Even better, after Clara begins fawning over the tiny TARDIS, something inside the console room can be seen letting off steam. Given that the TARDIS is a
* Even better, after their bullets prove utterly ineffective, a couple of agents try hitting her with expandable batons.
* Even better are his actual last words after being mortally wounded, causing the gods to remove the paladin's powers for committing an evil act.
* Even better, a run a few years back smashing that to pieces with a Nightmare run in
* Even better, at least one of the commercials showed the scary looking man lurking around the house and glaring menacingly through the windows before breaking in, making it abundantly clear that he knew there was someone in the house, but wasn't concerned because it was "just a woman."
* Even better, at one point Nemes uses his phase-shift ability to nearly stop time and the Shrike
* Even better, because the PC can respond, (Presumably equally deadpan), "Is it the first offence?" after receiving the reply, "Let's assume, no." The response becomes "Around 500."
* Even better, chicken stock is also sometimes translated as "cock juice".
* Even better considering he can do this to his clones making LITERAL Opposite Sex Clones.
* Even better, ephedra is a common ingredient in the production of meth. Will the
* Even better, "Fitz" in those days indicated that you were the acknowledged but not legitimate son of someone. That's right: his name literally means
* Even better from "Simon Seville, Superstar", Simon is asked if he considers himself a sex symbol (Bonus, Alvin does a more-or-less simultaneous and very loud gasp with the word "sex", just to confirm this trope). Simon demurs cutely and says "No... Only if glasses are sexy". When told that they
* Even better, he gets it in full view of a little girl in a blue dress and carrying a football (possibly Lucy van Pelt).
* Even better in another Fry and Laurie sketch when a father (Laurie) brings his son to the headmaster (Fry) complaining about the "vulgar lies" his son had been taught in his biology class: "Sexual intercourse sometimes leads to pregnancy in the adult female." Apparently the man believed that children came out of nowhere after a man and woman had gotten married and bought a house. This makes the headmaster realize that his son actually was
* Even better, in "A Scandal in Belgravia", after having his sexuality questioned yet again, John explodes with "Who the hell knows about Sherlock Holmes but for the record, if anyone out there still cares, I'm not actually gay." Irene Adler insists that they are a couple, even though John denies it.
* Even better: in one instance, his partner for that operation is the very attractive Sgt. Angua, a werewolf. Nobby can't imagine

* Even better: inserting a virtual version of yourself as part of your favorite team's roster and going to town on the hated rival team.
* Even better is his continuation of the "take someone's wallet" logic. If you
* Even better is how, on the second day of shopping, the contestant almost never considers that the hosts are watching, despite the fact that they do this every episode. Some even go as far as to willfully disregard the "rules" laid out earlier in the show for their shopping experience, buying things that fit into their old lifestyle instead of the new look. In fact, once, when a contestant managed to obey the rules on the first day to the letter, she was rewarded with the ability to spend that $5,000 on non-clothing items (she bought a computer). Who doesn't love free money?
* Even better is that the father is dressed like a working-class man, living in a working-class house, and the son is wearing a suit and tie...because that's the only thing he has to wear apart from his overalls.
* Even better is when they added this to the commercial for "The Cube," when the car never actually moves.
* even better margin than he did in 2016. Furthermore, Debbie Mucarsel-Powell and Donna Shalala, two Democratic congresswomen who represent Cuban-heavy districts in the area, were booted fron Congress after one term. While Mucarsel-Powell was expected to face a tough challenge from popular Miami-Dade Carlos Gimenez (albeit one she was still expected to win), very few people in either party saw Shalala's loss coming.
* Even better, Monk and Sharona begin visiting the dead woman's relatives, which include her comatose brother, her killer, staying in a hospital. Monk accidentally makes a mess and then unplugs the killer's life support to clean it up with a vacuum. When they visit the other brother the next day, Monk and Sharona learn this jolt was just enough to bring the brother out of his coma; this interview also coincides with the other brother getting his mail bomb, which Monk is able to prevent from detonating, and which ultimately leads to the comatose brother being identified as the killer.
* Even better: "Orks is made for fightin' an' winnin'. So if dey lose, den
* Even Better Sequel: The sequel is considered an improvement over the original.
* Even Better Sequel: When a sequel is widely considered superior to the original, or at least to the immediately preceding installment(s) which themselves were already beloved and considered good.
* Even better since the NCR (who controls Camp McCarran) prides itself for actually having a system of law and punishment - one of the first factions you interact with are escaped NCR prisoners. Although this is lampshaded in a loading screen, too – the NCR is apparently very unhappy about being forced into the position of the Mojave's police force and, as such, have made most crimes punishable by instant execution.
* Even better, Smithers thought Burns drowned and screamed: "Why do the good die so young?"
* Even better teams may sometimes have an incentive to not go all-out to win:
* Even better than that, while Travis does display open contempt for the Smiths at points, he shows it by being the most honest and trustworthy character in the game. When he says he'll talk "straight up," he's usually getting ready to tell you something you'd really rather not know.
* Even better, the characters use puns and neologisms specific to themselves as well. "Frankie Stein", being a
* Even better, the coin DOES hit the ground, but it is several minutes later (while Chandler is busy retrieving the knife). Now, if you include the time it took for the sound to actually reach him and use that to calculate the exact distance.....
* Even better, the Dragonborn can weaponize this weakness with the "Dragonrend" shout, composed of the words Joor, Zah, and Frul, meaning "mortal", "temporary", and "finite", respectively. Mechanically, all it really does is
* Even better, the entire 'mining for gold' thing is linked with their usual career of thievery by Isaac claiming that they're stealing from the Earth itself.

* Even better, the hard rock playing during one of the chase scenes is coming from Slater's tape deck — and he changes the tape mid-chase!
* Even better, the player can do exactly that during Flashpoint: Directive 7 as the
* Even better, these "improvements" often move commonly purchased items "conveniently" to the back of the store to force customers to see other mechandise.
* Even better, the silhouette of her Ganmen from behind stylistically resembles the
* Even better, the soldier they shot was an army medic, who proceeded to treat one of the insurgents for bullet wounds after the squad hunted them down.
* Even better, the vocalist generally acts on stage as if their sex was based on that of their singing voice. So not only will he sing like a girl but also sway his hips.
* Even better, two seasons later he and the others engage in one long
* Even better was the contemporaneous wars in Ireland. It was already complicated — with Catholic Irish (who wanted to be ruled by the Pope), Less Catholic Irish (who wanted the king to treat them better), Nationalist Irish (who wanted independence) and English and Scottish settlers (who trusted each other as little as they trusted the natives). When the civil war broke out in Britain most factions then split along King or Parliament lines as well.
* Even better was the time he did his evil monologue in pop-up book form, which again ends with him explaining the plan to Perry.
* Even better when Clamp authorizes the "Final Broadcast" where a peaceful female voice over images of nature scenes and wildlife says, "Due to the end of civilization as we know it the Clamp Cable Network is now ceasing transmission." This is a parody of an
* Even better, you can see Mike Chioda, WWE's longest tenured referee and one of the few around when Jake was still an active wrestler, totally marking out.
* Even beyond that, White Wolf used to use the Black Dog imprint as a way to mark their extreme products (Clanbook: Giovanni for instance). They were the ones that pulled out the stops and could not be presented maturely to anyone under the age of twenty five. They didn't often have call for it, but it does mean that actual books with the Black Dog label exist, aiding the basic verisimilitude of the old World of Darkness setting. (The imprint had fallen into disuse by the time the
* Even beyond the Yasminkov guns, PSO has an odd fixation on kinetic weapons being leagues better than their energy equivalents. Sword or spear, gun or rocket launcher, one of the signs you've found a really,
* Even big companies have begun using the massive userbase of Facebook to try to scrape a little cash.
* Even bigger (10'2) in size, which would make it the tallest Bug-type (though Scolipede, a 2.5 meter (8'2) centipede Pokémon, is considered the true bearer of the title, as Totem Araquanid is merely an alternate form).
* Even bigger than the giant Asian hornet is the giant scarab-hunting wasp of Sumatra and Java. It's three inches long, and has a wingspan of more than four inches. Fortunately for the wasp-phobic among us, it's solitary and doesn't live in colonies. It preys on the larvae of the Atlas beetle, which also qualifies for this trope by being one of the world's largest beetles.
* Even BJ Blaskowicz himself fits this. He has his fair share of one-liners and dark witticisms, but he's also deeply traumatised by his abusive childhood, the deaths of almost everyone he's ever known, and the crushing responsibilities that he has taken on as a soldier.
* Even bloodier sports are practiced in Aztlan, including modern-day Aztec Court Ball matches and deadly last-man-standing game shows like
* Even Boba Fett is a case of this. He is not named when introduced in
* even breaks the laws of physics. They have no need for logistics, supply lines, energy supply, or maintenance, which even has the codex notes how impossible this should be. They create foot soldiers using the bodies of their dead enemies, create an effective shock trooper and psychological breaker. They can indoctrinate anyone who is close to them for a long enough period of time, creating the perfect sleeper

agents. Along with this, they have unbelievable firepower that is nearly 12 times more powerful than the firepower of the most powerful non-Reaper ship and near-impenetrable defenses. And while the smaller destroyers are not as powerful as the capital ships, they are nearly indestructible to ground attacks. And there are at least thousands of both the destroyers and capital ships.
* Even Brian has sadistic tendencies. He frequently kills and terrorizes squirrels for pure sadism.
* Even British secretary of state Lord Chesterfield decried these in the
* Even by comic book standards, the source of Marvel's Golden Age superhero The Whizzer's powers was pretty ludicrous: an injection of mongoose blood gave him the power to go really fast just like a mongoose does when it's killing a cobra.
* Even by independent circuit standards Emi Sakura's Ice Ribbon stood out in this regard as it didn't even have a ring. Shows consisted of children straight from its "dojo" wrestling on mats. With that said, the company has grown immensely from its humble origins to become one of the more recognizable women's feds since the fall of
* even by neighboring groups with similar cultures and religious systems.
* Even by the high standards of Westeros' top schemers, Tywin is regarded as
* Even by those who don't look particularly human. But she has categorically rejected every romantic encounter so far.
* Even cable networks are required to follow this law for sports games. During
* Even campaigns have two Game Masters, won't avoid the trope, since they're still playing everyone in the world, except the
* Even Caroline Forbes's is a pretty straight example. She was even more capable of putting her brute strength and compelling abilities in use without hesitation, especially when she forced Stefan to turn his humanity off to save his niece.
* Even characters who are explicitly stated to have no combat experience manage to find something to yell.
* Even characters who aren't normally warriors can pick up this habit. As Jay and Silent Bob leap in to save Bethany from the Stygian Triplets in
* Even characters who don't get as much screen time have them. Laguna has a limp that manifests itself only when nervous (usually around the object of his affections) and rubs the back of his head a lot, Kiros, a cool, reserved guy will cross his arms over his chest and Ward will wave his hand in front of his face to indicate something it's a bad idea, a character trait he shares with Raijin. His partner, Fujin, only speaks in one-word sentences, despite showing on occasion that she's capable of speaking normally. She'll also throw her hand to the side a lot.
* Even Cheery Littlebottom (despite disliking shouting at people) is made a Sergeant because she's good at thinking. Detritus the troll (despite, as he puts it, "them two short planks bein' as fick as Detritus") becomes one because he's good at shouting.
* Even children's shows have gotten away with implied male on male prison rape, as
* Even cisgender women with large breasts will sometimes wear garments that make their breasts look smaller ("minimizer" bras are a thing in larger cup sizes), often to keep them more contained, to make certain clothing fit better, and/or to avoid the
* even closer relatives, so all of the relationships are incestuous on one level or another.
* Even closer to the trope, Jade's powers first manifested to save her from being possibly beaten to death by her abusive father. Die or fly indeed.
* Even colors of uniforms were not standardized as late as the 19th century. The British had troops wearing green (most famously the Green Dragoons and the Rifle regiments) and blue; almost all nations' Zouave uniforms looked alike, in more or less French colors; in the American Civil War, the First Battle of Bull Run saw an incident where a Union unit in gray uniforms got almost on top of the Confederates before either side realized what was going on. (Or was it a Confederate unit in blue?)
* Even common Pokémon can be subject to this. Magcargo is a decent Fire/Rock type. According to the Pokédex, its body temperature is 18,000

degress Fahrenheit. The surface of the Sun is about 10,000 degrees Fahrenheit. Just one of these things should kill everything that comes anywhere near it.
* Even Conservative commentators have remarked that her treatment of the miners and their union, after the long bitter Strike ended, was needlessly vindictive, and provoked deep, bitter, and lasting resentment, which adds to the undeniable fact that vast swathes of
* Even contemporary/rock artists who identify as Christian, and who produce explicitly Christian music, are not immune to accusations of espousing Satanism. The folks at
* Even core spells can be used in this manner. For example, the spell "Mordenkainen's Magnificent Mansion" specifies that the extradimensional mansion comes staffed with 100 near-transparent, completely obedient servants that can perform any action a human servant can perform, with the exception of attacking or harming others. Furthermore, the caster decides the appearance and attire of said servants - if the caster (for example) decides they look like big-breasted
* Even Count Olaf isn't exactly competent by himself, it's just that he has a lot of resources to work with and usually only has to fool incompetent people. This becomes most apparent in the final book where
* Even Covenant dropships frequently rain down their troops from above when they don't have a proper space to land on.
* Even Cow's toys Manure the Bear, Piles the Beaver and Crabs the Warthog got an episode for themselves, entitled, well, "Cow's Toys". The story featured them escaping Cow and Chicken's home in search of their original owner, Maiden Hong Kong.
* Even creator Mort Walker stated that he had more characters in Beetle than any other comic strip that is running.
* Even creepier for the fact that that strain of flu probably originated from a bird flu.
* Even criminals know him as incorruptible, and consider him to be so even if he's not the sharpest knife in the drawer. Vimes privately suspects himself of being a spoon.
* Even Cruella di Vil isn't all that evil in the grand scheme of things because there's an entire industry that raises animals just for their fur.
* Even Daniel Jackson could be considered that, at least in his own field. This is
* Even Death May Die! qualifies, as a seemingly-impossible, armoured zeppelin.
* even differences in idiom can make purportedly identical languages untranslatable to those who don't know the idiom).
* Even different models in the same brand of laptop/computer will inevitably have changes that range from slightly to drastically different (size is often the biggest factor, as well as keyboard sensitivity). Buying a new laptop after the old one broke will spark quite a bit of readjustment.
* Even Digital Satellite TV (e.g. DirecTV, Dish Network) is delayed about 4 seconds relative to the cable feed the shows come from. This delay is mostly due to the processing time necessary to compress the data on-the-fly, however; the actual signal-propagation delay to and from the satellite is only a quarter of a second.
* Even discounting the above, the setting gives aspiring writers a very large timespan and region - even if they just stick to the titular 41st Millenium, that still gives them a thousand years and millions of worlds to work with.
* Even Disney content creators are not safe too. Traci Hines calls her Patreon supporters "The Mer-Crew", Sarah Ingle coins hers the "Queendom", among others.
* Even disregarding the above, you'd think the court would be a little more lax with the
* Even done with Lisa's brain a few times, like this exchange from "Trash of the Titans":
* Even doors, windows, small boxes and garbage bags will go up in a satisfying cloud of dust if struck with your knife. ** This is true of many games in the Battlefield series, where a vehicle that's been critically damaged - even if not by exposive weaponry - will spontaneously explode not once, but twice, both instances of which will damage or even kill anyone too close to the wreckage. This also

happens to vehicles that are abandoned, leading to hilarity ensuing when someone runs for awesome helicopter or plane that's been sitting around for too long only for it to blow up in his face and kill him.
* Even Doug gets his turn in the advertisement for the third DVD, playing with a knife while shirtless and torturing a guy he's kidnapped.
* Even during season 3, it was already starting to change. The focus was taken off the seemingly-supernatural mysteries and placed on the more earthly struggle against the apparently very-human Others. It's just that the bigger genre switching takes place in season 4 and 5 with time travel and visions of the future. Though 5 also has some strange genre of its own going on, what with it focusing on the Dharma Initiative. Then the final season has the fantasy/mythical/supernatural kitchen sink with human gods, earth mana, supernatural powers, and theological themes.
* Even during the aftermath of a deadly plane crash, Jack and Kate on
* Even during the "Battle of the Bastards" this is reflected. All the Bolton soldiers wear a black leather armor with a red flayed man on their chests and black helmets with the same thing on it. Ramsay is dressed all-in-black while his second-in-command, Smalljon Umber, all-in-dark red.
* Even during the first game focus on this, with many characters the party met asking them what are their purpose for fighting the
* Even during the time of the Republic, officials of Rome had his Lictors as a personal bodyguard. While they were less armed than normal examples of this trope, they carried an executioner's axe outside of the city, and lictors assigned to a dictator were the only people allowed to have any weapon within the city of Rome proper (inside the pomerium).
* Even earlier, both Mata Nui and Makuta tried to exploit this at the same time. Mata Nui determined which Matoran would become the Toa Metru, and a prophecy of their identities leaked out. The prophecy was quickly suppressed, but not before Makuta learned of it. He then tricked Toa Lhikan into deciding that the prophecized Matoran were not the ones truly destined to be Toa and caused Lhikan to pick six others who Lhikan thought would do the job. These six were, in fact, chosen by Makuta as six who would never be able to work together and therefor fail (and even if by some miracle they did succeed, he could at least have the satisfaction of knowing he screwed Mata Nui over). These six became the Toa and Makuta seemingly won (at least for a little while). Future averted, right?
* even earlier, by Pliny the Elder. It was his attempt to compile all the worldly knowledge of his day into a single work. Unfortunately, the world of his day knew little about volcanoes, and Pliny died amidst the eruption of Mount Vesuvius in AD 79, before the book's final revision.
* Even earlier: during his first Orange League gym battle, Ash has to compete with the leader in a Pokémon surfing race, with his Lapras. Lapras wins, but the sudden stop when he reaches ashore causes Ash to be sent flying and slam face first against a palm tree.
* Even earlier, he became strong enough to go toe-on-toe with Cell in
* Even earlier in Nickelodeon's catalog, the first Nanny from the pilot episode of the Romeo! Show. While the other three were intentionally obnoxious for their own reasons, she was almost too polite... were it not for the fact that she'd shamelessly, loudly fart every time she was onscreen.
* Even earlier, in "The Beast Below", Amy leaves a video recording for herself
* Even earlier, Matt faked the death of Mike, an identity he created (
* Even earlier on in the series - more specifically, the first episode - Soul and Maka go through this after realizing that Blair's soul didnt turn Soul into a Death Scythe.
* Even earlier, Ozy implies that cutting tags off mattresses is a worse crime than music piracy.
* Even earlier, Ranma was trying to grab the Phoenix Pill medicine which hung from
* Even earlier, Sam to Micheala. "Twenty years from now, when you look back on your life, don't you want to be able to say you had the courage to get in the car?"
* Even earlier than that, because a snippet of one of their songs makes watching

* Even earlier than that: the "agitators" (also known as "adjutators", apparently
* Even earlier that season, they were planning to sneak off during the day with no fanfare and just get married, but they stop by Michael's party first and realize they both actually
* Even earlier, The Cluster is essentially one as well, built by Homeworld (via experiments into fusion, which Homeworld only sees as viable for military purposes, to hammer home the parallels further) specifically for the purpose
* Even earlier, the episode "Elephant's Memory" focused on a boy taking his bullies hostage and shooting them, then heading into town to attack other people.
* Even earlier, this is how Adam's initially evil twin Stuart was introduced, having been locked away by Adam to keep him from harming himself or anyone else.
* Even earlier, when Whitebeard realized who Luffy is and why he's here, he says the younger captain won't live through this battle. Luffy promptly tells "
* Even economics' dull younger sibling accounting does this occasionally. One accountancy textbook used for TAFE courses in Australia contains a chapter in which nearly all the examples are
* Even Eldar Craftworlds are such. They are not planet sized spaceships, but rather entire fleets that gathered together for mutual protection, linked by gates and warps that are tangental to the Webway as a whole. Any given door doesn't open onto whatever's on the other side, but rather to wherever you are wanting to go in the Craftworld itself. On top of this, the physical linkages joining the Craftworld is made from, effectively, psychic powers turned into a solid, called Wraithbone — and acting as a conduit for the souls of every Eldar whose Soulstone was recovered. And at the core of each Craftworld is an area called the Dome of the Crystal Seers. The apparent statues in here aren't — they're the solidified bodies of the greatest farseers of the craftworld, converted into solid wraithbone.
* Even Elya faces this choice, sort of. In the old country, the girl he pursued was richer than he was but dumb as a brick. The one he ended up marrying in America, was a smart and capable farm girl.
* Even Envy helped Ed out at one point, though he states that the reason behind this was for Envy's own good, not Ed's.
* Even Eros/Cupid was himself not immune to this, as when he met his future wife Psyche he accidentally pranged himself on his own arrow and the rest is history. Well, mythology.
* even escaping and turning himself back in so he could clear his name legally's song "Wheat Kings" references Milgaard's story, and a TV movie was also made about his life.
* Even Evil Can Be Loved: A villain is humanized by the fact good characters still care about them and thus is more likely to have sympathetic qualities and/or be redeemable.
* Even Evil Can Be Loved: A villain who is humanized by the attachment a virtuous character feels for them.
* Even Evil Can Be Loved: Just because the villain's evil doesn't mean there are no people who care about him.
* Even Evil Can Be Loved: Someone decides to see the villain for who he is and not for how evil he is, and thus decide to love him even when other people think it's a bad idea.
* Even Evil Can Be Loved: Villains are humanized by being loved, especially from a heroic character.
* Even Evil Can Be Loved: Villains have people who care about them, making them seem more human.
* Even Evil Has Loved Ones: A villain is sympathetic for their care for their family, friends, etc.
* Even Evil Has Loved Ones: A villain who cares deeply about their family and friends.
* Even Evil Has Loved Ones: Bad guys love someone, romantically or not.
* Even Evil Has Loved Ones: Even the villains have people they love and care about.
* Even Evil Has Loved Ones: Heroes aren't the only ones who have people they care about.

* Even Evil Has Loved Ones: If they are nice to the people they love, fans forgive them for their evil acts towards everyone else.
* Even Evil Has Loved Ones: I may be a villain, but that doesn't mean that I don't have any love for anyone but myself.
* Even Evil Has Standards acknowledges how he is so unfathomably evil and twisted that the most hardened and depraved killers were themselves horrified at glimpsing his true nature.
* Even Evil Has Standards: An evildoer rejects some bad deed as too evil for them to be involved with.
* Even Evil Has Standards: A villain has certain moral lines they won't cross.
* Even Evil Has Standards: A villain isn't considered purely, irredeemably evil because he is against a Moral Event Horizon even if he crossed another one.
* Even Evil Has Standards: A villain is unwilling to go too far by committing certain misdeeds that even they find disgusting.
* Even Evil Has Standards: A villain who will not cross certain ethical and moral boundaries, and is outright disgusted or appalled by others who do so or even mention them.
* Even Evil Has Standards, but it is OOC if that character previously didn't appear to have standards)
* Even Evil Has Standards: Certain things are so immoral even an immoral person won't do them.
* Even Evil Has Standards: Come on! I may be a villain, but there are lines I wouldn't dare cross!
* Even Evil Has Standards: Malicious people have limits as to how far they're willing to go.
* Even Evil Has Standards, sociopathic monster he may be, is quick to call out Sector Seven's motives for releasing him. It's difficult to disagree with him.
* Even Evil Has Standards: There are certain acts of evil that even villains won't commit.
* Even Evil Has Standards: There are some misdeeds that even the bad guys refuse to do or are disgusted by.
* Even Evil Has Standards: They are evil, but there are lines they wouldn't dare to cross.
* Even Evil Has Standards when it comes to Freemium games. As the lord of temptation, he explains to Stan the nature of how the whole temptation thing works. He's pretty PO'd when he discovers the Canadian Devil has making Freemium games. After all, temptation has to be over something worthwhile and people making a conscious decision. Freemium games were just blatant Skinner box manipulation. Satan says it lacks nuance though he also shows disdain at the exploitation of mental issues rather than free will.
* Even Evil Has Standards: While this trope is not necessarily about hypocrisy, it can end up becoming an example of such if a villainous character expresses disgust at some sort of evil misdeeds that they have already committed in some other form.
* Even excluding one-shots and background cameos, the lack of a single main character/team (along with the
* Even ex-girlfriends aren't safe. Case in point: Jenny Shepard, possibly Lara Macy (their interactions in the
* Even fairly large animals can subsist on fecal matter, provided it's rich enough in undigested material. Barbels, African river fish that feed on hippos' dung as well as cleaning the huge herbivores' skin, can grow to a meter long, mainly on the half-digested grass fragments that disperse into the water when the hippos defecate.
* Even fairly mundane things like public transport follow this trope. The transport manufacturer Bombardier is particularly fond.
* Even fan remakes of the Pokemon are not safe. Someone will come along and hack into it, because of course
* Even fellow American Girls Samantha Parkington and Felicity Merriman were no exception to the parodies, with the latter being turned from a caring Revolutionary War-era girl into a merciless

* Even fewer people are aware that the book is partially based on real history - there really was a student-inspired republican rebellion in France in 1832, sparked by the death of General Lamarque.
* Even fewer people will realize that their only #1 on the Mainstream Rock songs chart was "Never Never" in 2013,
* Even fewer will get their only #1 on mainstream rock right: 2021's "Nowhere Generation", long after their prime.
* Even films made outside Hollywood follow this trope. In Norwegian disaster film
* Even food has had merchandise made out of it. A major example of this is Cup Noodle, which has spin-off products ranging from blankets to makeup made in its' image. Most of it comes from
* Even For Eternia: Moon Dust is a substance that can be used to make magic water for restoring MP. Unfortunately, it is also highly addictive and drives people insane, which is why most countries banned its use for purposes other than magic water. One sidequest involves stopping a group of Moon Dust smugglers.
* Even for feminine words that look like they could be original, it turned out that they actually derived from masculine words. This is the story behind words such as German
* Even for guns which apparently don't have fully enclosed turrets, there are no visible crewmen in
* Even for seasons that deviate the most from the source, it's still rare for a season to not have at least one episode that just straight up reshoots the Japanese episode.
* Even for the command staff, a shipment of real eggs is seen as an amazing luxury. Steak is similarly rare, though at one point the doctor fudges some paperwork to have a couple brought in after losing a bet with Garibaldi. An alien meat-based product called "spoo" is available, though it is extremely expensive and, to a human palate, not particularly good.
* even for the Goa'uld far beyond any regular Goa'uld. Furthermore, he made a lot of Goa'uld (including System Lords) work for him, and crushed the rest of them, including most of Yu's fleet.
* Even for the informed public and many governments, the byzantine internal politics of the USSR made it extremely hard for outside observers of the Soviet system and its policies to judge what they were thinking. This wasn't helped by the way policies by different government departments tended to clash - something of a holdover from the Imperial Russian system, these clashes were the inevitable product of the epic three-way struggle between the Party, the Military, and the KGB.
* Even for those who accept it's parody, the argument goes that those who take it for real might try and do that to actual kittens.
* Even from the first edition, there was one mecha in the game: a wondrous artifact that could be found was the "Apparatus of Kwalish", a crab-like
* Even from the first series, this show defies this trope. The original starship
* even from their own army and government. of delay and the Army asking the Navy why the operations weren't proceeding as planned that they found out the truth. Then they joined with the Navy in keeping it a secret from the government for even longer. Prime Minister Tojo, who had thought the war was proceeding according to plan and that the Americans were being decimated, didn't find out the truth until months after the Army did. Witnesses say that he basically suffered a BSOD when he realized how completely fucked Japan was at that point.
* Even fruit and produce that could be grown in the region was like this in winter. If it was something that didn't last long without refrigeration, like most green vegetables, it was generally only available when it was in season, or in canned or (later on) frozen form during the times of the year when it wasn't in season.
* Even functioning males such as Moist von Lipwig benefit: Adora Belle Dearheart wins a fight for him in the Mended Drum, sending a bully away whimpering by driving her high heel's point into the man's foot - clearly telling him how easy it would be to push it all the way

* Even funnier is that Apu actually already knew more about America than Homer did. The flag Homer showed him had 47 stars, which Apu deduced must have been made during that brief period in 1912 after New Mexico became a state but before Arizona did.
* Even funnier is that it is possible this mission takes place not long after Franklin was in a massive shootout at that same construction site.
* Even funnier is the end, where the enemy flagship goes down to both
* Even funnier, the second time she does this is to a woman who doesn't look even remotely masculine. Despite the fact that they had literally just met only seconds before, Miaka gropes her breasts purely on the basis that Hotohori and Nuriko have already fooled her before, and she "figures I have to check these days."
* Even funnier, they will sometimes, while on fire, go down to get some (highly explosive) booze. No prizes for guessing what happens next.
* Even funnier when repeated later in the same show, as part of a whole iteration of his routine in French: "Je dois partir maintenant, parce-que ma grand-mère est flambée..."
* even further by metaphorically throwing cows at the audience's and players faces at the end.
* even further" He pops up to fulfill his role in life as the guy who occasionally interrupts the plot to smile cutely and be smiled at in return... and there's no one who needs him for that, leaving him to give the same sad look. It's actually earned him a bit of sympathy from those who'd hated him, and Derpy being the one to pat him on the shoulder in those scenes has given him someone to be shipped with as well.
* Even further into the series, a slightly different iteration is used by divine beings and those worshiped as such. Rather than using magic to use telekinesis, they can use sheer might of will to subdue or kill other beings.
* even further. It also doubles down on the idea of there being infinite timelines. The explanation of why a player can have multiple versions of the same character, not just as different alts of the character, but multiples of the same unit, is because each unit is summoned from an alternate universe.
* Even further subverted when you look at Shinobu and see that he has blonde hair
* Even further: when Ranma used the Parlay du Fois Gras technique on
* Even Galcian himself plays the Heavy to the Valuan Empire and Empress Teodora
* Even games that don't actually use karts are subject to this, such as
* Even Gaz gets this to a degree. While she's officially one of the show's four main characters, she shows up fewer times than the other three and many of her appearances are short cameos. Still plenty popular with the fans, though.
* Even God could be harsh in granting wishes when the wishers were being too whiny. In response to the Israelites complaining about all manna and no meat, he gave them meat for a month "until it come out at your nostrils, and it be loathsome unto you" (KJV).
* "Even Gods Cry" games from Kratos' point of view. It seems rather out of place on an album mostly populated with grunge-metal tributes, although it's clear from the lyrics that it's at least somewhat parodic.
* even going as far as to deny them a goal in the second quarter. Richmond would win again in 2019 and 2020 against Greater Western Sydney and Geelong, respectively, and Adelaide got the wooden spoon in 2020.
* Even Gollum is shown still having a good side which can be coaxed out despite the extremely long time the Ring was in his possession.
* Even Grand Theft Auto III was originally supposed to be closer to that goal than it ultimately was; but due to when it was released and, the
* Even Granny Weatherwax's hard outer shell softens around the kitten she named You. She places
* even greater, an eldritch horror from Babylonian times that spawned nightmarish creatures and demons upon the Earth and it's implied that vampires are actually originated from it. The Vassals of the Morning Sun is said to have been actually founded to fight and destroy the Beast rather than to hunt vampires, but the VMS have focused their efforts exclusively on them ever since the Beast slumbered.

* Even greater is the Anomoly team which are composed entire of nanomachines... and ended up becoming living breathing organisms that function just like real ones. Even complete with a robot penis.
* Even grosser is Kryb, the Sinestro Corps member who compulsively abducts infants and keeps them in her exposed ribcage.
* even harder substances. The first of which, cubic boron nitride, was synthesized in 1957.
* Even Hargon gets a bit of this, despite being seemingly dead thanks to the events of
* Even Harry gets this on occasion. Though he is shown many times to be an advanced duelist for his age, he is completely unable to land a single hit against Lord Voldemort or Severus Snape. He doesn't do much better during his duel with Bellatrix and only survived his first two encounters with Dolohov because the latter got distracted.
* Even Harry's friend group, repeatedly indicated to include a number of proto Young Avengers, not only has Carol Danvers
* even has another song set to the tune of "Miracle Cure" called (what else?) "Extra Extra".
* EVEN HE COULDN'T BECOME A TRUE SAGE IN THE END JUST LIKE ME! My power in the sage mode...If you're Dr.Snakes, I hope you keep that in your mind... I'm no longer a snake... The perfect force of sage helped me shed my snake skin...AND I'M A DRAGON NOW!!
* Even Henry Avery, the pirate sometimes credited with kickstarting the golden age and the
* Even her attempts to seduce Zii away from Erik involve her shrewdly pointing out that Zii doesn't seem to find that relationship totally satisfying — which, given her usual level of smarts, could also qualify as a case of
* Even heroes with medical doctorates have been known to use their skills to incapacitate people as Dr. Mid-Nite from
* Even her signature song "Umbrella" falls into this, not so much in sound as it is in subject matter. Many, many of her songs are about love, and often,
* even he's wearing, you may not end up enjoying it as much as you would have.
* Even his ally/friend Trafalgar Law is not immune to Luffy's nicknames being called "Traffy" or "Torao", Though it seems likely that this is due to Luffy's inability to pronounce his surname. somewhat averted due to Luffy knowing but not calling him Law
* Even his complete non-sequitur reference to Pee-wee Herman is followed by her impassioned cry of "I love Pee-wee Herman/ but I doooooonnnn't love yooooooooouuuuu!"
* Even his recruitment, done by talking to him (when he's still an enemy unit) with Natasha, hinges on a bet.
* Even his singles have a tendency to wander into this trope, with both the "Tristan" and "Wind In The Wires"
* Even his tidbits that don't involve comparisons aren't immune. Dogasu jokingly made fun of Keldeo's dub voice in the trailer for
* Even Hogan used it at least once - he was about to make a total guess at how to disable a bomb (a wrong guess would detonate it) and had already told his men to get back, but they weren't going to leave him.
* Even Homer became this in "Strong Arms of the Ma". Marge is taking steroids because she got mugged, is going out of control, and actually
* Even Homer's attempted suicide in "Homer's Odyssey", which is otherwise played darkly and tragically straight, isn't completely immune to this. He ties a boulder to himself and drags it all the way across town to a bridge... only for there to be an identical boulder sitting right there that he could have used to save himself the effort.
* Even humans do it! It's most obvious with babies and toddlers, who can understand complex language well before they can reproduce it — if you underestimate them because they can't talk yet, they'll outsmart you and make you feel

* Even humans fit to some extent. There are a variety of methods to allow humans greatly extended lives, from
* Even hunting around for new playing cards to add to your deck and prove addicting.
* Even if aliens did theoretically exist, in settings where the population is confined to a single star system (or handful) and there is no (or very slow) FTL, neither humanity nor the aliens would be in any position to encounter the other.
* Even if all it did was make him look pathetic against the final boss...
* Even if an esper and a human have the exact same physique, the esper can still be markedly stronger than they are, because espers have a higher stat cap. Naturally, this goes double for somakinetics, since their powers come from gravity manipulation. Additionally, because not everyone has a body type that will bulk up with exercise, they can be relatively small and super-humanly strong.
* Even if communications are working, calling for help might not do anything.
* Even if D-Class manage to survive whatever the Foundation puts them through with their humanity intact, they are still put through regular psychiatric evaluations each month to determine whether they should be administered an amnestic or terminated.
* Even if he could have all of Big Boss' recessive genes, there is nothing about this that would make him inferior. Really, one learns in
* even if he has). For that matter, a lot of other robots seem to be designed for a specific purpose and appear overqualified for it.
* Even if he's a complete fool who doesn't know what he's doing, even if he is
* even if he's male. Best expressed by Noire in her supports with a female Avatar.
* "Even If It Breaks Your Heart" by the Eli Young Band is a cover of Will Hoge.
* Even if it existed, it was unwieldy. It was worse in the U.S. than elsewhere — the British, with their famous
* Even If It Was Just Once, I Regret It,, but then Kozuka's smartphone rings, and she learns that she didn't actually get a job offer. After hearing the news, the landlady abandons her attempt to confess.
* Even If It Was Just Once, I Regret It, Chiyo Kozuka, who quit her job at a game company after getting reassigned to general affairs, ends up taking a part-time job at a deli where she worked in high school. It's played with in that while this is not the job Chiyo wants, she's regained enough of her energy and confidence to work again, so the fact that she can do so is a sign of her recovery, rather than of desperation.
* Even if money still has a use in the outside world, its importance has dropped significantly and having that much money is dead weight at best.
* Even if most of the cast aren't specifically gangsters, many of them are either employees or patrons of the title speakeasy, and it takes place during Prohibition. In other words: still criminals. The author even jokingly suggests that the little old lady who innocently tried to dispose of some bad sardines down her sink drain is a criminal based on sanitary disposal laws at the time.
* Even if not needed for propulsion there would still be the need for power, lights, artificial gravity, etc.
* Even if one were to make use of the Spacetime/Reset Beam (which involves enabling the Plasma Beam and Spazer together using a boot upgrade), there is no animation for said beam; it earned its name by resetting all upgrades and bosses, with no visible projectile.
* Even if some arcs kind of dragged out, none were able to reach the level of hair-tearing stalemate of the World War Arc - which took nearly three years to tell the story of a day and a half, where two of those years were spent telling the story of a single battle which was presumably a few hours long. The first part is problematic enough, but the real nugget is that last battle, and particularly its pacing. The entirety of it is a tug-of-war marathon, with each side countering the other side with increasingly effective techniques that have very few lasting consequences. The villain takes forever to finally go through all their gambits, absolute defenses,
* even if the act is legal in the jurisdiction it occurred in. From the legal

standpoint of the Spanish courts, what Pinochet did or ordered done to Chileans was immaterial - but woe be him if he touched a single Spaniard. Interestingly, most subsequent dictators have not fully wised up to this.
* Even if the Big Rip doesn't happen, it's expected that star formation will someday end. The universe will grow dark. However, this won't happen for trillions of years, as new stars are being made all the time.
* "Even If the End Is Near" by Evan Greer, a bittersweet song about love in a time of climate change and ecological collapse, contains this verse, out of the blue:
* Even if the frame was damaged, there were ways available to straighten them out and return the car to the road.
* Even IF the heroes do manage by some miracle of fate to save the day, are they driven irreversibly mad by their experiences, or did they have to make one hell of a
* even if their conscious mind thinks they're telling the truth technology sometimes seen in the series.
* Even if their mutual distrust and loathing would have prevented Harry from talking to Snape, there was a forgotten
* Even if the morphs are instantaneous, they still go through a choreographed routine prior to activating their morphers, while yelling their morphing call.
* even if there is vast size differences between the two. The offspring will always be of the female's species, but with some of the male's moves.
* Even if the relative lack of new content made it feel a bit like a
* Even if the tactic failed its main goal, it still led to panic and confusion.
* Even if the taxonomy is in a state of constant flux and their status as a species fluctuates, fossil evidence points towards several different lineages of human cohabiting as recently as 50,000 years ago. Although their degree of sapience would vary quite a bit, all members of the genus
* Even if they aren't necessarily the villains, some of the Marines show this behaviour too, as the doctrine of "Absolute Justice" implies that any evil should be eradicated at any cost. This is shown during the Buster Call in Enies Lobby, when one warship was destroyed (along with one thousand marines) by the others in order to kill only one criminal; one of the captains even shot a marine who hesitated in following the order. Taken
* Even if they're given a bunch of chew toys, a lot of dogs will prefer to chew on discarded packaging like boxes or plastic bottles if given the opportunity. They might also go after their owner's shoes or socks if they leave them on the floor.
* Even if you believe that Cobb retires from crime by the end of the movie, what will other dream-thieves do once word gets out that inception (read:
* Even if you can drive stick, it’s recommended you hire an automatic when visiting a country such as the UK where they drive on the left as the shifter will be on the wrong side as the driving and passenger sides are reversed on cars over there.
* Even if you can mostly handle driving on the other side of the road, the issue comes with resolving how to get somewhere. You might think "if I make a left turn here, I can just pull in!" only to remember the place you're going is on the right side of the road and you're still on the left.
* Even if you cure the werewolves and end the curse, the cycle threatens to perpetuate itself with Dalish elves who now want revenge on the former werewolves for killing members of their clan. Hawke can encounter the daughter of a Dalish hunter-turned werewolf in
* Even if you go all the way back to UFC 1 and call Royce Gracie the first heavyweight champion, even by taking several different paths (depending on how you count his loss by default in UFC 3), or going by the first official HW champion crowned by the orginization, the linear title still leads to the last Pride HW champion Fedor Emelianenko, who was beaten finally by Fabricio Werdum after a decade of being undefeated. Werdum = Alistair Overreem = Bigfoot Silva = Current HW champ Cain Velsquez.
* even if you had your head chopped off) and arrests are canon for the rest of the game (unless you reset to the last save point obviously) and are counted up on your

stats screen. It should be noted though that it doesn't effect the gameplay at all.
* Even if you have bad or strange dreams no more often than usual, sleeping poorly thanks to indigestion could make you more likely to remember them.
* Even if you have nothing to hide, the question of whether or not to cooperate is still a somewhat murky one. On one hand, if you don't actually feel like you're in legal jeopardy, you really do have nothing to hide, and you
* Even if you haven't heard of Christina Dodd's medieval romance novel
* Even if you recruit him, he maintains that he was not trying to get Cailan killed but simply could not save him from his own foolishness. Buuut then again, other actions immediately before the battle hint that he was plotting something anyway, since Cailan was about to callously divorce his Hot Consort
* Even if you're not a Grass Type, Groudon starts so many squares away that if you have Iron Thorns or Silver Spikes, you can toss so many at him that he'll go down in a round or two of hits when he finally gets to you.
* Even if you steal another man's love interest, wreck his material possessions, try to kill him, or light him on fire, the only proper retribution is to get the offender
* Even if you weren't evil in life, becoming a ghost tends to make one somewhat amoral, with a tendency to scare living people at best and murder then at worst, including people who haven't done anything to deserve it. As Larry from
* Even ignoring the biological impossibility of a fox being born with two tails, there is no way, anatomically speaking, that Tails should be able to spin his tails like a propeller to lift himself into the air the way that he does - spinning both tails in the opposite direction, which would just result in them getting twisted together. And even if he did spin them in the same direction, it's very unlikely he'd be able to spin them fast enough to actually provide enough lift to get his body off the ground.
* Even Imperial Governors are not immune to this, those who send particularly sub-par tithes in either manpower or materials often receive a visit from the
* Even in 1977, "Who wants to see some dumb movie rated G for kids?" The film itself is rated PG, with a lone use of the word "shit" used to bump up the rating.
* Even in 2015 when downloadable demos are commonplace, Square-Enix still sold
* Even in a normal ending, Joker helps out by standing at the ship's outer door with an assault rifle and covering Shepard and co. as they run back to the Normandy. For most players, it's probably the
* Even In Arcadia has Master Odai, an old Fae who has secluded himself off in the forest. He's a retired Emerged, the most powerful type of known mage.
* Even In Arcadia that the Gaians are trading with them in drugs much like the British did before the Opium Wars.
* Even in a show of humongous mechas, some of them were EXTREMELY humongous. There was Sky Lynx and Omega Supreme, who were overshadowed by the fortress-bots Metroplex and Trypticon, who were in turn dinky compared to the city-bots Fortress Maximus and Scorponok. To say nothing of the Chaos Bringer, Unicron, or the Transformers' creator god, Primus, who are
* Even in cases of extreme Central Nervous System trauma (brain injury, severed spinal cord, etc) the heart can continue to beat with a detectable rhythm for up to 30 minutes after brain death. In 1887 a sphygmograph (a crude early heart monitor that drew a pulse pattern onto carbon paper)
* Even in cases where the new is near universally considered better, sometimes there are a few advantages that the older technology possessed. For example, digital TV is runs circles around analog tv in most regards. Digital is more compact, has an order of magnitude better resolution
* Even in developed countries like Japan, the prices for a Mac are insanely expensive compared to Windows-based computers. While Macs are ubiquitous in Western film and TV production, in Japanese anime and manga studios, as well as other media development in the rest of the world, the staff are happily using Windows PCs there. If you visit an Apple Store in Japan, the staff will be overwhelmingly American, since tourists from the US are their primary demographic.
* even in footage of a driver driving normally while obeying all relevant traffic

laws and not performing any stunts.
* Even in games that have not experienced this trope yet, individual weapons, characters, equipment, etc. within the game can be the victims of this. If something gets too popular, a good portion of the community will start to label whatever it is as overused. This often happens for competitive multiplayer games.
* Evening at the Improv once started his act this way (before moving on to a more earnest performance):
* Evening at the Improv one of the waitstaff doing a few jokes onstage to an empty house, presumably working on their craft after the club closed for the night.
* Evening Glory (Libris Mortis) is a lesser goddess of love, beauty and immortality through undeath.
* Evening Gown Match this kind of thing to happen), though it was billed as a "street fight." In the process of stripping each other, Jacqueline's right breast came out and she actually wrestled part of the match that way. Amazingly, she still managed to win.
* Evening Standard stand traders still do this though no extras. If you ever find yourself at Waterloo in London you might be interested to know that ["Reehaallbouddit"] translates as "Read all about it" and "Hetyorhevenstndaarhhd!" is "Get your Evening Standard". Manchester has similar ranters. If you're ever in the city centre and wondering why a bloke behind a yellow cart is yelling "Final!" every twenty seconds, it's because he's selling the third (and last) edition of the day's Manchester Evening News. Also frequently heard is "Evenin' News".
* "Evening Star"/"Midsummer Nights" from the same album was sent to country radio as a double A-side.
* even in harmless amounts. On what planet does this have no chemicals?
* Even in her normal Jennifer Walters form she's listed as 1,79 m (5'10").
* Even in his path where he takes Mina to a safe place and nurses her back to health after she saves him, he makes it quite clear to her that he's keeping her alive as a "hostage" to deter the White Order from killing him and mocks her for believing that he would thank her for saving him. When he seems to be developing genuine feelings for her after becoming frantic when she's severely injured and having a heartfelt conversation with her about their similar situations, he immediately begins plotting to use Mina's power to kill people more effectively the moment he learns about it and comes close to crossing the
* Even in his regular stand-up act, much of Norm's comedy gets its punch from this. His stand-up routines regularly
* Even in Homer, though, while Achilles is the greater fighter, Patroclus is the one who trains him to be a warrior before the Trojan War kicks off. Later Greeks reversed the ages of the two; Aeschylus'
* Even in less extreme situations, Mix and Match Critters are fairly common, at least in appearance, in One Piece. i.e., the Panshark (shark with panda markings), and bananawani (a large crocodile with a banana shaped growth on the head). It even becomes a
* even in other media interpretations frequently hire an older, established actor to play Mamoru with a more noticeable degree of ad-lib in his shorter appearances, especially if he doubles as another minor character.
* Even in real life, most people don't actually like hearing people complain, but they may listen anyway out of sympathy. With fiction, they expect to be entertained.
* Even in real life. When Wesley aced his second entrance exam for the Academy, Roddenberry commemorated it by presenting Wil with the second lieutenant bars Gene earned in the Air Corps. Present at the ceremony was General Colin Powell(!).
* Even in ships at sea, where you don't have civilians to outsource the potato peeling to, it's not used as a punishment detail anymore; everybody (below a certain rank) just gets to take a turn.
* Even in situations where everyone understands that no intoxicating substances are being taken by
* Even interpreting it the other way, it can still be viewed as a tragedy. Even with the ultimate villain (Light) finally dying in the end, he still ultimately

succeeded in killing almost all the heroes and protagonists and manipulating and using so many people before it happened.
* Even in the 19th century, it was viewed as all but impossible, Abraham Lincoln, before the Civil War, had a quote that sums it up:
* Even in the book, Gandalf later on claims to have been falling forever, but in the movie version of
* Even In The Deepest Heart Of Chaos A Glimmer Of Order Can Be Found is a variant: The author takes random photos from Flickr, then writes captions that tell a story which links the photos.
* Even in the early episodes before the characters became very exaggerated Bart showed signs of having concentration issues. In "
* Even in their case, its not a clear cut thing. With the yahg possessing ocular setups with more in common with Jumping Spiders than anything else, they are capable of easily picking up on the tiniest details. Like body-language - the sort that might indicate lying. What the diplomats actually told them is unknown, but it's clear that little ability was not something they appreciated.
* Even in the later rounds some contestants will fail to check if their meat is wholly cooked before serving it. Serving Ramsay raw meat is unforgivable on the show.
* Even in the main series, only the Brotherhood of Nod uses nukes; GDI has an
* Even in the modern day, Buddhism and Buddhist states have been very resistant to other religions.
* Even in the mostly democratic United States, a few agencies have at least approached this status:
* Even in the movies, where he is allowed to cut loose, there's a surprising lack of blood. Perhaps most notable is an instance in the first movie where he accidentally stabs Rogue in the chest. From her back, you can see the exit wounds, but when you see her from the front next, the front of her shirt is still entirely intact, and there isn't so much as a blood stain on her or the shirt.
* Even in the opening to the second game, Max is wracked with guilt for not having been punished for all the killings he committed in the first game... though that's less Survivor Guilt and more Killing-Lots-Of-People Guilt.
* Even in the original, common skeletons cease to be a serious threat after level 3 or so. But near the end, the game starts throwing the much nastier skeleton warriors at you, and one of the bonus bosses in the expansion is a death knight.
* Even in the original film Leia's claims of immunity are rather dubious, seeing that her ship was shown firing on the Imperial Star Destroyer, something that can be considered a rather serious diplomatic faux pas.
* Even in the Prime universe, Kaminar - the Kelpien home planet - has two sapient species, the Kelpien and the Ba'ul. Kelpien are the prey (or more accurately, livestock) and the Ba'ul are the predators / farmers.
* Even in the rare instances where he uses his words to solve problems more than violence, he will still be said be extraordinarily capable in fight. Often, the entire reason he uses his negotiation first is that he's
* Even in the Seven Kingdoms where people do respect lineage and rank, Jaime Lannister fears what will happen to his authority if people realize he can barely fight after losing his sword hand.
* Even in the Solar System, diamonds are far from rare; while there's no means of getting to them with our technology at this current time, it is thought that it
* Even in the trilogy, narrator Georgia Mason deserves special mention. She
* Even in this alternate universe, Minato and Itachi are still considered leagues above everyone else. Minato achieved Nirvana as a teenager using Seals, and even half dead and blind Itachi is considered a Paragon of ninja skill.
* Even into the 1970s, former French and Belgian colonies in Africa saw
* Even in unimportant five card hands with regular players, nobody ever has less than two pair. If the players ever
* Even in US arenas, you can often see Canadian flags hanging from the ceiling next to the American flag. NHL rules mandate that both countries' national anthems be played if an American team is playing a Canadian team. The Buffalo Sabres play

both national anthems before every game regardless of opponent as a tribute to the team's sizable Canadian fanbase (Buffalo itself is directly on the border; the KeyBank Center where the Sabres play is about 3.5 miles/5.6 kilometers
* Even invisibility is nearly useless as a power. It's done in a very realistic manner, by bending the light around the mage, but this means that the mage has no light to see by, and is stuck in pitch darkness the entire time he's invisible. And, of course, he can still be
* Even is appalled, and lets Olly know in no uncertain terms that he's crossed the line.
* even isocahedrons" she's treating the most common shape as though it were unexpected.
* Even Jake the Dog can be like this; he's generally good at heart, but very irresponsible and lazy. He'll sit out entire episodes if he doesn't feel like helping, usually when
* Even Jerome's packmates were willing to be torn up by Kaibutsu to keep Ohu safe. They clung onto the arteries in a wound on his flank and keep daring him to tear them off of him.
* Even Joseph's son Josuke and grandson Jotaro do this occasionally, once again to strategize against
* Even Joseph tries to uphold the family tradition: when Jacob, now Israel, starts to give his right-hand (i.e. primary) blessing to Joseph's younger son Ephraim over the older, Manessah, Joseph tries to stop him. Israel doesn't listen; apparently, YHWH is still favoring one kid over the others.
* Even Joyce assumes Buffy is a juvenile delinquent, when she's actually trying to do the right thing.
* Even just within England, referring to "London" can lead to some terminological confusion... it can depend whether you mean the actual City of London (also called "the Square Mile" or simply "The City"), the county of (Greater) London, or the metropolis/metropolitan area of London (which comprises mainly the county as well as some parts of Middlesex, Essex, Surrey, Kent, and Hertfordshire that border it). And trying to specify by referring to the city of London doesn't really help as much as you might think either, as you may be referring to "the city of London", or "The City of London"...
* Even kangaroos, which again, are a normally quiet species of animal, can be guttural if provoked into
* Even Kl'rt the Super-Skrull, the most iconic of Skrull villains is more willing to team up and work together with humans after he and Skrulls as whole were forced to pull on an
* Even Krill names fit (though Ed and Gordon couldn't have known it at the time). Examples: Teleya (female), Haros, Sazeron, Arnak (male). They likely have multiple names as the Krill delegate's signature "K.T.Z." suggests.
* Even Kuwabara and Yukina's relationship is that because ice maidens live for centuries and Kuwabara's just a human.
* Even Lambs Have Teeth features a Pacific-Northwest version. Two girls going to spend a month working on an organic farm are kidnapped by a gang of rednecks running a sexual slavery ring.
* Even Lambs Have Teeth, Katie and Sloan escape and hacking a bloody swath of revenge through those who abused them.
* Even Lambs Have Teeth, Katie and Sloan kill Boris by ramming a branch wrapped in barbed wire and nails up his ass.
* Even Lambs Have Teeth, Katie and Sloan soak the Pastor of gasoline and leave a trail leading away from him. They toss a lit match into the trail so he can see his fiery doom approaching him.
* Even Lambs Have Teeth: Katie squeals when she enters the farmhouse and comes face to face with a stuffed fox head mounted on the wall.
* Even Lambs Have Teeth, Sheriff Andrews is part of the sex trafficking ring.
* Even Lambs Have Teeth, Sloan and Katie are drugged and imprisoned in shipping containers and used as sex slaves.
* Even Lambs Have Teeth. Sloan and Katie light up a pastor using a normal gas can

and a lighter.
* Even Lambs Have Teeth, Sloan changes Katie's ringtone to an orgasmic giggle, much to Katie's embarrassment. Later, Jason attempts to call Katie and hears that ringtone go off in the sheriff's office, meaning that Sheriff Andrews was lying about not having seen her.
* Even Lambs Have Teeth, the Pastor visits the sex slave ring and rapes the girls while wearing a really creepy pig mask.
* Even La Muerte and Xibalba have one after they reconcile in form of a Kissing Discretion Shot
* Even larger amount believes that he had been dead for a long time and reports about it were postponed for a better time, politics-wise. Both opinions probably take fuel in same...details in reports. One could say that his corpse has been just hiding, for these people.
* Even later, after a ceremonial flight and patrol leads to fighting off a large wave of enemies, another wingman, Chopper, gets hit,
* Even later, in Episode 9 of Volume 3, the entire world learns the truth,
* Even later on, when we see Richard in a flashback his wrists are a bloody, infected mess from being in handcuffs for several months.
* Even later, when the Doctor does gain better control, it is often difficult to wind up exactly where he wants to go. It doesn't help that the TARDIS is, essentially,
* Even legally, there are limitations to "freedom of speech". The most commonly cited exception is "yelling 'Fire!' in a crowded theatre",
* Even less arguably C.J. Lamb is the token queer character. She describes herself as "flexible".
* Even less known is that the Mesoamerican natives also painted their pyramids in bright colors (the Aztecs mainly in white, while the Mayas favored red). This is probably where the penchant for bright colored buildings in modern day Mexico and Central America comes from.
* Even less welcome are Kuno's glompings of Akane and the Pigtailed Girl, sometimes simultaneously. He invariably receives a
* Even lions run for it when African honeybees get riled up, having no means of defense against their highly-aggressive swarms.
* Even locations seem to have alternate versions as the two Crystal Towers of
* Even locations within Springfield have signs of oddness. The neighborhood around Moe's Tavern, for instance, never seems to have the same buildings.
* Even locking one's self in the garage with the engine running has fallen prey to this trope. CO emissions are now so well-scrubbed in modern gasoline cars, people attempting suicide by this method have fallen asleep and woken back up with the engine still running.
* Even London becomes one when the Styx unleash the Armagi on the Topsoilers.
* Even low-level spells can be a pain in the DM's butt. Take "Knock", which undoes any mundane lock (and some magical locks too), instantly and 100% reliably.
* Even Luffy's home island has this; the Goa Kingdom seems like a perfect and beautiful place...but only because the kingdoms rulers throw
* Even Majin Buu suffers from this midway through his own saga, as his attempts to go good are immediately followed by the evil parts of his heart besting him in combat and absorbing him. After he frees himself, he's mostly used to distract Kid Buu so that he can't interrupt Goku's charging of the Spirit Bomb, and in
* Even male wrestlers have a tendency to have their names shortened down further and further. In recent years,
* even Maniac call her out on this insane plan, then take off to shoot him down. They both feel pretty crappy about it afterwards.
* Even Mario himself isn't immune to being this, as he was originally the main star of the show before Bowser Junior became an
* Even Maurice, Belle's father, initially thinks that Gaston is a decent enough guy only
* Even Max finds the dummy creepy. Max is also an abomination against reality.
* Even Megatron gets in on this at times; if his character notes are to be

believed, he enjoys
* Even merchandise isn't immune to this trope. For example, a plush toy of the Hunter from
* Even Meredith (the show's titular character) isn't above this; she is only heard in a voiceover in season 13's "You Can Look (But You'd Better Not Touch)" (which is set away from Seattle, and only features Arizona, Bailey, and Jo) and she is absent altogether from the same season's "Who Is He (And What Is He to You)?" the first episode which doesn't feature Meredith in anyway.
* Even Michael Cole joined in on the chant, possibly to get the crowd to stop booing R-Truth.
* Even minor religions like the Druze are still around and their forces are still influenced by their religion.
* Even Mooks Have Loved Ones: Evil henchmen aren't evil to their families.
* Even Mooks Have Loved Ones: The villain's minions have people they care about, which may affect their loyalty.
* Even more absurd in World War Hulk. New York is mostly leveled and a huge number of people remain despite evacuation orders. Despite this, it is specifically noted that no one was killed.
* Even more amazing is old lady Kokoro introduced in the Water 7 arc. She is never seen without a bottle of booze in hand, so one can only assume she constantly drinks and therefore is constantly drunk. But despite this she somehow retains the ability to drive a freakin' speeding out-of-control train.
* Even more amusingly (from the things the judge says), it seems that there's actually a treaty between the Vree government and the Earth Alliance that governs exactly such cases, meaning that these cases must happen
* Even more amusingly, the entire complex metagame has basically been thrown out the door and replaced by a new one, as the coming new expansion pack caused players to fight over certain resources. This triggered
* Even more amusing when the civilian you had just rescued on the street enters the same building you were about to enter to clear it of bad guys.
* Even more annoying than the audience laughing at a bad joke: the audience bursting in laughter too soon, obviously mistaking a mere set-up line for the punch-line. It's the exact opposite of
* Even more are introduced in seasons three and four. Tracy has the ice power, which Sylar had stolen from guy offscreen. Flint has the power of fire like Meridith, though his flames are blue. Matt's father has the same power as his son. Season four had another time traveler, even though he was crippled, and it had a speedster like Daphne.
* Even more averted at the end, when Dredd tosses her off a building and we see in close-up and slow motion the effect of her landing face-first on the ground two hundred storeys below.
* Even More Baby Songs, which then comes to life and begins playing with her.
* Even more baffling is the sequence where the player has to destroy a train while chasing it with a machine gun equipped motorcycle... and at least TWICE the motorcycle explodes for
* Even more bizarre is the paradox contained in the sequence in the first game in the series, in which Bonds had to go on patrol in a squad car. If you followed proper procedure and inspected each wheel of the vehicle by walking around it before driving off, there would be nothing wrong with it. If you failed to do so, one wheel
* Even more bizarre when you consider author of the book Ayn Rand's long extramarital affair with Nathaniel Branden, which actually started around the same year the book came out (although they kept it secret from everyone
* Even more blatant in the UK where his only number one came with 1994's "The Most Beautiful Girl in the World". Needless to say it's far less remembered than classics like "When Doves Cry" and "Let's Go Crazy".
* Even more blatant one is that all the Star Fury pilots from Babylon 5 have helmets with transparent visors, but when a pilot attacks civilian targets under an order from

* Even more, Cap couldn't lead them because it would tip the warlord off - he had
* Even more clever — the infrared sensor on the right joycon is used to measure the player's heart rate after a workout.
* even more complicated during the Russian Civil War. In addition to the Red (Bolshevik) Army and the White (Monarchist, Reactionary) Army, there was also the Green (anti-Bolshevik socialist) Army, the Black (Anarchist) Army, and various Ukranian nationalists as well.
* Even more complicated. The Mongols who conquered the Russian lands, the Golden Horde, converted to Islam and went to war against their Ilkhanate cousins in Persia.
* even more complicated with the Neville-Percy feud. The war between the two Plantagenet branches provided a neat way to resolve matters with cold steel by Nevilles and Percys on both sides.
* Even more confusing is that the TV version of the character, who is British, also uses the Constan-TEEN pronunciation.
* Even more confusing, Retro Studies has implied at least once that THEIR Cranky Kong
* , even more, convinced now that the two of them are absolutely smitten with each other.
* Even more dangerous is Centrepoint Station, which brought the planets into the system in the first place using a "hyperspace repulsor" engine, and can make stars go supernova from light-years away via the same process. It's also indicated (though never demonstrated) that if somebody had Centerpoint
* Even more despair-inducing than the engagement ring is one of those "insert-your-child's-name-here"
* Even more disturbing as the first thing the pizza says upon popping into existence is, "Howdy-doo! I love you!" His glee soon turns to screaming horror as Terrence begins to eat him.
* Even more disturbing, the brothers used to be triplets. Their extreme rivalry is the reason they're twins.
* Even more downplayed for the rest of the Scrub Clubbers, who can only turn into one thing (Taki always turns into a clock, Hot Shot and Chill always turn into faucets, etc).
* Even more egregiously, it was also revealed after the story's cancellation that even that false-Tuyet, and just about every other character that died in the Matoran Universe has been alive all these years — they are simply trapped on the Red Star. The writer could effectively bring back anybody he wants, if he ever found time to continue writing.
* Even more epic is the Horn-call of Buckland, as delivered by Meriadoc. Like Boromir's horn, Merry's horn is said to always bring aid when blown: the mostly peaceful hobbits, who have no military, jump up and organize in the middle of the night under the guidance of the returned hobbits, to defeat an army of Saruman's men in the Battle of Bywater, which is the turning point of the occupation of the Shire.
* even more evidence, with Nuts/Komachi as the Beta and Coco/Nozomi as the Alpha.
* Even more examples abound thanks to the post-Lucas films. As of this writing both
* Even more heartbreaking is Lennier with regards to Delenn. They both think the world of each other, but Lennier gets
* Even more hilarious, because that phrase is similar to 'Mistststück' ('bitch', literally 'piece of manure')!
* Even more hilarious when they try to weasel out of the mistake by claiming that one of them goes by when they first had sex, and the other goes by when they first kissed, causing an
* Even more hilarity essues when different anecdotal archetypes meet together.
* Even more humorously, the next time Commander Shepard confronts the Citadel Council, Shepard also uses the phrase "with all due respect" in what may very well be an intentional callback to Ashley's previous remark (or a bit of a
* Even more implied with Flounder. How the heck was he even able to get a giant

statue of a Prince into Ariel's Grotto. (Assuming the only people who knew about the Grotto were Ariel, Flounder, and Sebastian.)
* Even more importantly, certain locations may have laws about inactive accounts, stating that after a certain amount of time without any activity the account may be considered abandoned property and collected from the bank by an appropriate government agency. The accounts will then be held until someone with proper ID claims it.
* Even more impressive is that he did this without the manual, and actually did a better job than the people who developed the program Tim used. When
* Even more impressive is the Lunatic Pandora, a massive, mountain-sized craft that was buried in the ocean for the better part of two decades but remained fully functional when it was recovered. Those Estharian engineers
* Even more interesting is the smith's puppeting the hero's body to forge the
* Even more interesting, it was the same Sabine, shapeshifted as a blacksmith, the one who sent the party to search the aforementioned
* Even more interesting: While Kennedy was the president who brought the US military into
* Even more ironically, Black would go on to win what most fans consider a far more prestigious World title at
* Even more ironically, Dick Dastardly almost won a race through legitimate means (shouting as he did so, "I'm going to win this race fair and square even if I have to cheat to do it!") but stopped short of the finish line because Muttley wanted his autograph. The debut episode had him stop to pose when the narrator exclaimed the race would end in a photo finish.
* Even more ironically for the McCarthyism interpretations of the original is the main character, played by actor Kevin McCarthy.
* Even more ironically, the Gundam series' continued survival and success is largely down to the fact that Bandai chose to sponsor the series and sell plastic models. The original series' cancellation was in part due to poor merchandising.
* Even more ironic as the best-known of these depicted a boy pushing a bicycle up a steep hill in Shaftesbury, Dorset.
* Even more justified as some scholars suggest that kung fu was invented by people who had learned Pankration from
* even more. Khorne's followers in general qualify. The Blood God (aka the Lord of Skulls) has no interest in churches, altars or prayers. All he wants from his followers is to fight, kill, spill blood and collect skulls or die trying.
* Even more later on, Skyler nearly confesses to Marie that Walt is a drug dealer, only for Marie to pick up Walt's early conversation that Skyler is depressed due to Ted's accident. Skyler just goes along with that.
* Even more limiting, the courts would have a physician examine the recipient to estimate how many strokes he could survive - often meaning they weren't even prescribed the full 39. And he would be reexamined after every three strokes to make sure he could survive the next three. Accidentally killing someone who didn't deserve it was
* Even more magically, an ad had the wearer be a little bespectacled
* Even more meaningful is the exchange between Mustang and Hawkeye after the service, both standing before Hughes' grave. Up to this point Mustang has been played as the flippant, arrogant man who seems incapable of doing anything wrong. The transmutation he speaks of could at worst kill him, and is a known sin.
* Even more noteworthy in that the large majority of his career was spent arresting criminals, rather than killing them. In fact, if the stories are to be believed, until the series of events that eventually led to the showdown at the OK Corral,
* Even more noteworthy is Julius Caesar's use of this trope, because he isn't acting like a snivelling coward and it isn't played for laughs. Au contraire, he often appears at the end of a story, granting amnesty to Asterix and Obelix and even doing a few favours... because they have already fought through tooth and nail and the only way to save face and avoid a humiliating defeat, is acting in acceptance. Asterix usually plays along because it would complicate matters a

little otherwise.
* Even more obscure Charlton Horror Hosts include Mr. Bones, Colonel Whiteshroud, the Old Witch, Mr. Dee Munn, and Mortimer Tishin.
* Even more on this: when a group of retired engineers, technicians, etc. heard about this and other similar missions, they stepped forward to volunteer in place of the younger men.
* Even more powerful with Japanese cultural connotation, as he is doing a bow known as
* Even more pronounced in the Season Eight comics, where the Slayers are, suffice it to say,
* Even more reversed in the PSP and iPhone remake, where Warriors get Barbarian Swords...which is ALWAYS even MORE powerful then the Ultima Weapon, while the best the Black Mage gets is...a shiny new dagger. However, the lack of new effective offense spells makes Mages incredibly useless as anything besides support, especially since endgame Red Mages can do anything the Black Mage can, and more.
* even more screwed-up than the Candy Kingdom, and may be almost as big.
* Even more so, Chrollo. Being a nihilist that is not afraid to die, his heartbeat wouldn't change even in the slightest when kidnapped
* Even moreso for the Blades. One Blade can consider a dozen opponents an insult, and in the old days the Blades served as Aegon the Conqueror's personal elite guard after their much smaller force beat back his army and killed one of his dragons.
* Even moreso if the Player decides to go completely independent, commanding the
* Even more so in 3 when taking over a field causes the mooks in that field to explode in a chain reaction upon the slightest hit.
* Even more so in Season two, and after Demi Lovato's rehab stint for self-harm and bulimia.
* Even more so in the episode "Shindig". Mal is basically under house arrest pending his big swordfight with Atherton Wing; back on
* Even more-so in the fan-made expansion "Forgotten Enemies", ask a pilot of a Hadean Atlas to pick you up and he responds in an annoying "I could not."
* Even more so, PDF. Justified by the fact that stories about PDF doing their job and annihilating the invader by themselves are barely exciting, despite being rather frequent in-universe.
* Even more so Rich from pottery class, who has a load of mother issues after his brother died. On the outside, he comes over as the allegedly most charismatic and cool character on the show.
* Even more so, some broadcast companies will stream train journeys - from one hour to several long, with just ambient sound.
* Even more so, the Lich King in the Halls of Reflection, who easily kills anyone who gets too close, and the only way you survive is via a
* Even more so, the season finales are well-known for being some of the biggest drama bombs in television history:
* Even more so the two opposing sentient purposes that drive events throughout the books. And they are actually split personalities formed from the original purpose of the universe which is, oddly enough, as old as the universe itself. The gods fall somewhere in between.
* Even more so when he saves her from death by volcano by jumping into the lava without any sort of protective equipment.
* Even more so with Justin, who even says in "Taxi Dance" that while Alex sometimes gets
* Even more so with Norn Queens. Apparently, poisoning one can make entire tendril with multiple Hive Ships defenseless, at least for a while.
* Even more so with the "hellish rebuke" warlock power, an attack that takes the character's angry shouting (with a seemingly expected performance by the player), turns it into fire and hurls it at an opponent.
* Even more so with Winston Payne, who is hardly remembered by Phoenix and completely ignored by fellow prosecutor Edgeworth.
* Even-More-Space Metal, founded as a sort of side project by Piet Sielck (who used to be in Helloween) with Kai Hansen. Continues in the "Space Metal" oeuvre, with

the main focus of several of the albums being the story of a sentient spacecraft (the titular Iron Savior), which is somehow related to the lost city of Atlantis. Only the first three album from Iron Savior are concepts linked to the titular Space Fortress (from the lyrics it sounds more of a Death Star than a spaceship), the fourth one contained some songs mentioning a new Iron Savior story but also unrelated material, by the fifth album Iron Savior the songs and meaning have got much more subtle and seem like just another power metal band with a penchant for futuristic lyrics. But it doesn't make them any less awesome!
* Even more squicky is Drizzt's relationship with his sister (though they are actual siblings). She seemed taken with him from the time he was an
* even more stupid material, but she operated in such an obvious way, that every member sees it, and when brought into the Earth Science Club's room, she pretty much mentioned her intentions without any prodding.
* Even more tank would count even if most of them don't work. They make the list based on sheer principle.
* Even more than that, it's Crichton's (and humanity's) persistence in the face of the toughest odds that set them apart from other species. It is viewed as a flaw by many, that humans are so ignorant they don't know when they're beat, but that characteristic is what kept Crichton and his shipmates alive for so long.
* Even more than the 1975 World Series (though that one had a suspect call go against them in Game 3), the 1986 World Series stands out as an example of the Red Sox fizzling when it mattered most. With the Red Sox up three games to 2 and leading 5-3 with two out and nobody on in the bottom of the tenth inning of Game 6, Red Sox pitcher Calvin Schiraldi allowed three straight hits and was replaced with Bob Stanley. Stanley then threw a wild pitch that allowed the tying run to score and the winning run to go to second and then failed to cover first base when speedy Mookie Wilson hit a grounder to aging first baseman Bill Buckner, a lapse that probably
* Even more, the reason that worst cop was aiding the Riddler? He felt SORRY for Edward Nygma, whose mental state has clearly unraveled over the course of the series, and eventually, his questline in this game ends up with him occasionally having a Freudian slip about his father while fighting Batman. It's a far cry from the cops in
* Even more to the point, in reference to late-night Cinemax: "There was one on last night where the girl had a butt face but her breasts was immaculate."
* Even more tragically, later examinations showed a strong possibility that the towers should have stayed standing. The only reasons they came down was that the anti-fire foam surrounding the central cores was blasted off by the impact. If they had stayed on, it is possible the towers could have been salvaged, or at least survived long enough to put out the fire and rescue the people still stranded above the impact zones. Also, the towers were specially designed to withstand airplane impacts, but it was assumed such collisions would be accidental involving aircraft approaching New York's airports and thus low on fuel.
* Even more traumatically, Om later encounters the nigh-powerless remnant of an
* Even more true for countries outside the US. For example, Sweden suffering a gene-modded super plague apocalypse and Israel being annihilated by a
* Even more true in series 4 in that she A. warns the Doctor of the impending end of the universe B. sends Donna to the main dimension and C. kicks some Dalek can with her
* Even more weird, Secretary of the Navy Ray Mabus in late 2009 made an appearance on NCIS while not playing himself.
* Even more, whatever wasn't filmed in Pittsburgh or Los Angeles was filmed in New York City due to Mayor Michael Bloomberg being a fan of the series (not to mention a subtle tribute to the fact that Gotham, is, in fact, one of the DC Universe's homages to New York along with Metropolis; the Nolanverse even has such things as the police cars using a livery inspired by the one used by the NYPD in the 1990s). Notably, Bane's attack on the Gotham Stock Exchange had exterior filming on the same street as the New York Stock Exchange; and the final battle that takes up most of the film's final act has locations such as Saks Fifth Avenue clearly visible

during car chases
* even more, where Vita gains a new weapon called Warhammer. It's huge and looks like it has a fusion reactor in the middle.
* Even most metalheads might not know Finnish prog band Vanishing Point, but most everyone in the
* Even most of the cast don't even know what's going on with the show or what scene they are shooting as they were shot out of order. For example,
* Even Mr. Boynton take part. "Clay City English Teacher" sees him try to imitate Sam Spade in an effort to lure Miss Brooks away from the eponymous teacher.
* Even Mr. Mxyzptlk got a moment like this in his first episode. At the end he's permanently defeated by Superman and is stuck in his own dimension, but apparently has given up his obsession with trying to beat the Man of Stee—- oh no wait, no he hasn't.
* Even Mulder's informants can be seen as this, as they simultaneously offer Mulder information, withold it, and feed him incorrect information.
* Even Naegi himself comes close to death by getting hypnotized into suicide, but he came out okay too.
* Even Nani has a point, while arguing with her little sister isn't very productive, asking her angrily if she actually wants to be taken away after the disastrous visit with the social worker she does genuinely seem to wonder if that's what Lilo actually wants. Nani is trying her best while Lilo flat out implies that her sister hits her with bricks in a pillowcase, and also refuses to communicate to Nani when the woman is trying to get her to talk about why she behaved like that, just screaming no over and over again. Nani clearly made an effort to coax Lilo on how to get through these visits so they can stay together while the little girl in her own grief seems to be intentionally making everything harder. While she isn't actually doing it with that goal in mind, it's no wonder her sister is beginning to think that and lashes out in her own grief because Lilo refuses to let her older sister try to help her.
* Even nature gets in on the act. Drab colors are used to blend in with the environment, whereas bright colors (red especially) are used to warn predators of poison (or are used by nonpoisonous creatures to bluff). Unless it's a fruit, in which case red indicates ripeness.
* Even Nerds Have Standards: Someone's a nerd, but not a big enough nerd for this thing.
* Even Nerds Have Standards: There are things so geeky no self-respecting nerd would get involved with it.
* Even neutral parties can have powerful armies. It's best not to invoke the fury of
* Even Nina Heyn, Disney’s Executive Director of International Publicity, admitted (quoted from
* Even now, can sealers are tricky, finicky machines requiring constant minute adjustments and the whole set of high-tech gizmos to ensure the consistent quality of the seals, up to
* Even now, the Black Stone is a point of reverence for nearly every pilgrim that comes to the Ka'abah. However, no power nor miracles are ascribed to it by most Muslims. A famous saying by Umar, the Third Caliph, even goes so far as to claim that, were it not for the Prophet's habit of kissing it during pilgrimage or pointing at it, he would not have done so himself.
* Even now there's a notorious practice of using the best rendered cutscenes for
* Even nudity wouldn't necessarily bar a movie from a G rating in the early years. The 1973 version of
* Even occasionally slip through in narrations and voice-overs; for example "Forensic Detectives" had a dangerous crime scene being declared a "Big hazard" rather than "
* even older develops as Yukiko asserts herself as an asset to the team and wants Chikage to notice her, while Ayako gets jealous as Hell...
* Even older examples are Durthu, the oldest treeman, who is as old as Athel Loren, a forest the Old Ones seeded when they first arrived on the planet over

10,000 years ago.
* Even older film example: the gymnasium of Bedford Falls High School memorably transforms into a swimming pool in
* Even older incarnations of Link aren't immune. When Link revives Scrapper in
* Even older than Capek, the Victorian writer Samuel Butler addressed in some of his writings the idea of machines experiencing Darwinian evolution and rebelling against humans. The "Butlerian Jihad" of
* Even Older Than Dirt: There is a painting of a comet on a cliff wall in central Australia that is estimated to have been created some 9000 to 10,000 years ago. It is surrounded by painted figures of animals, and some paleoanthropologists believe that the comet was taken as an omen for lucky hunting.
* Even older than that, although not by much: the original birth of Christ in the Gospels took place against a backdrop of Roman occupation, mass infanticide, parents fleeing the country to save their baby...
* Even on a completely consistent week, he's only likely to get three pages up. And those pages might be a one-off gag or a Shirt Guy Dom day. The printed editions have all the story relevant pages up at the front, then have different section for SGD and one-off strips.
* Even on an an uneventful trip through the warp, timekeeping relative to the materium is a pain in the neck. Because all communication also uses the warp, the further a planet is from Terra the less certain they are of the actual date; the calendar the setting uses actually accounts for this.
* Even on a social level, many of the Covenant races are somewhat old-fashioned; the Elites live in a feudal society complete with serfdom, the Brutes and Grunts still organize themselves by clans and tribes, and the Jackals have no real governments of their own outside of the Covenant High Council, though it's worth noting that both the Jackals and Elites still managed to independently develop space colonization technologies not only back when humans were still using swords and bows, but
* Even once he becomes a good guy Woolsey, uniquely, remains a bureaucrat. In fact he gets a few CMOA out of his skills as a lawyer and underhanded politician.
* Even once the true nature of fossils was recognized, scientific assumptions about them could still be rather wide of the mark. Paleontologists of the early 19th century thought that the dinosaur genus
* Even one guy (Uzzah) who tried to prop it up when he noticed it was slipping out of the oxcart it was being transported in. For the record, he had it on an oxcart instead of having it carried by 4 priests like it was supposed to. If you're handling a holy artifact, you'd better damn well transport it in the prescribed fashion.
* Even one of Jon's mods, Ryan, has been on the receiving end of this. Most likely suspect is someone using the animated Mystery of the Ghost Fart to depict Ryan as Shantae (who maintains the half-genie's normal colors of red clothing and purple hair as Jontae has teal clothes and platinum-blonde hair, along with Ryan's Shantae look retaining her hoop earrings (Jontae wears star-shaped ones that appear to indicate a hint of Rosalina also being involved in the fusion)).
* Even one time when the twins themselves were feuding, Brie prevented
* Even one who was mostly one of the good ones, Karen Page, became addicted to drugs for a time and sold his secret identity to the Kingpin.
* Even on his spare-time this Badass directly challenges Italian mafiosos.
* Even on the inland seas...from the War of 1812, there were wooden-ship battles on the Great Lakes, and the Battle of Lake Erie provided a quote from Oliver Hazard Perry almost as famous as John Paul Jones's above:
* Even on their own, Squirtle and Ivysaur themselves qualify; it seems strange to add two more Generation I representatives that probably wouldn't be chosen as fighters without the Pokémon Trainer's gimmick, especially as the number of potential Pokémon keeps growing. But as mentioned before,
* Even on the nicest days, there's a literal dark cloud hovering over the Bundy house on
* Even on this Wiki there were quotes that, at a convention, one of the writers

said Amy and Tekno from
* Even on upright pianos, the soft pedal's implementation can vary, even though they follow the same principal of moving the hammers closer to the strings. On some pianos, depressing it causes the keys to fall slightly, thus shortening the key travel distance. On other pianos, the hammers move closer but
* Even ordinary young children can become this, because they don't always grasp the real-life ramifications of what they're talking about.
* Even Osamu Tezuka himself does it with seashells in his experimental film
* Even Oswald was fed up with his son, Edrick killed for the thrill of murder and lacked the sense of humor which made the Mad King popular as a spirit. Their relationship was tense and only made worse by Edrick's tendencies to commit pointless atrocities at the worst times. Edrick eventually tried to overthrow his father by slaughtering an entire village and laying the blame on Oswald, hoping to rally the peasants to his cause. Oswald found out and had his son sealed in a sarcophagus with the intention of releasing him once he'd learned his lesson, only for the mob riled up by Edrick to storm the castle. Oswald left Edrick sealed away and had all references to his name erased from the library as a final insult.
* Even other cats beside Hissy use this too, such as (so far) "Adopt-a-Palooza", "How ARF Got His Bark Back", "The Naptime Chronicles" and "Bingo and Rolly's Playcare Picnic Party".
* Even other minions of the Wyrm will destroy any Gray Mass infestation that shows up. Their corruption is so virulent and indiscriminate that they even jeopardize the other minions of the Wyrm and the Wyrm's greater plans.
* Even other personalities see this as immature. If you're not mature enough to
* Even our hero does it. While in his evil Angelus persona, he mentions using his superhearing to listen in on Fred and Gunn having sex and indulging in
* Even outside of Captain America and Nick Fury, several Marvel heroes had their backstories tied into wars. These examples were retconned in the series
* Even outside of ComStar, there are a number of major Megacorps, including Irian Technologies, Defiance Industries of Hesperus II (which is the defacto and dejure government of Hesperus II, though that's because the city-sized Defiance Industries factory is basically the only inhabited part of the planet), Interconnectdness Unlimited, the Ivory Trade of the Order of the Five Pillars (which morphed from an ivory cartel into a quasi-mystical order that is fanatically devoted to House Kurita and intimately connected with the ruling family), and the Ryan Iceship Cartel (which held a monopoly on the vital trade in ice to water-poor planets in the early days of colonization).
* Even outside of hero work, by the end of the series, members of the main cast gain great success in fashion, military and stunt work, teaching, etc. Still no outside of Ponyville seems to recognize them most of the time, while their hometown only ever holds them in high esteem within the context of their far more mundane day jobs, as they quickly came to see the occasional dangers that the group saves the town from as
* Even outside of M7Ms, triple-M is a really effective tactic since missiles are standardized, and the only limitation on how many you can carry is the size of your cargo bay.
* Even outside of melee, a dramatic revelation can easily wander into Distracting Disambiguation
* even overriding the damaged nerves in his severely burned hand so that he can play it effectively
* Even Paul the Delivery Guy, who had never before been seen in any episode before, gets his own episode, "Delivery of Destiny".
* Even people from technologically developed cultures who believe in curses often think that a photograph can be used in a manner similar to a
* Even people who can usually tolerate Cartman's bigotry and selfishness for being so over the top are quite disturbed by his behavior in Season 21, where his relationship with Heidi becomes emotionally abusive in a very realistic manner (Cartman threatening suicide if she breaks up with him and gaslighting her until she becomes just as miserable as he is).

* Even people who haven't seen the show are likely aware of the cultural phenomenon that is Mandy (aka "Naked Mandy"), the cold, ruthless
* Even perfectly ordinary rocks can fall under this trope if there's a sudden demand for them. White Jurassic limestone from Solnhofen, in Bavaria, was just a relatively mundane construction material for roofs and floors (it was used for some fine carving, but only locally) until 1796, when lithographic printing was invented and created an insatiable market for the stuff. When printing tech marched on, Solnhofen's limestone became more or less just another rock again (paleontologists know it for its good supply of Late Jurassic fossils, the most famous of which is
* Even planets that humans actively colonize aren't all Earthlike. Eden Prime, which you visit at the beginning of the game, is pretty close to Earth, except for its sixty-four hour days.
* even played by the same guy, who hasn't even changed his voice for the role. You've got them coming and going...
* Even Pokemon have this; Gardevoirs have "hair" that splits at the neck and goes over the shoulders like a pair of horns while the bangs rest on the face at a point and Gallades have their hair styled into a helmet-shape with a blue mohawk/crest with the same bangs as a Gardevoir.
* Even pornography is not immune to this trope. Larry Flynt, upon briefly becoming a born-again Christian in 1977, tried to redesign
* Even prior to the invasion, the Commissar Order was issued. It dictated that all captured Soviet commissars were to be shot immediately (in violation of international law, as they would be POWs) along with regular soldiers deemed thoroughly indoctrinated into Communist ideology. Exact numbers of those killed as a result are unknown, though it's estimated as in the thousands. All those issued the order enforced it, though many generals later claimed they hadn't to escape prosecution.
* Even pure oxygen can kill a human if it is breathed in for longer periods of time, especially if it is pressurized.
* Even putting the latest strip on the home page runs the risk of doing this. Woe betide any reader who just happens to arrive right after a major plot twist.
* Even Pyramid Head is this. In fact, Pyramid Head was designed visually to be this taken to the extreme: not only is he missing a face but his head isn't even
* even quirkier and dances after every successful mission (he's contractually obligated by King Cold to do the Dance of Joy, and by Cooler to do the Daddy's Little Princess Dance. He also has the Dance of Cheering You Up when Freeza gets upset, and the Dance of Solitude when he's alone).
* Even Ratchet's G1 incarnation, who's not really intended to represent any extreme of age the way Kup is, tends to get a lot of this trope. His canon appearances as a competent medic and go-to guy paved the way for his interpretation by the fans. Fandom is especially fond of causing him to bludgeon insubordinate/uncooperative patients with wrenches and other tools, go all
* Even RCTI have to cut out a scene (where Gian and Suneo watching wrestling with 3D glasses) from an
* Even reasonably competent cooks can do this by accident if they make substitutions in recipes without understanding how the ingredients combine. People making substitutions in online recipes and then
* Even repeat mothers looking for the true father(s) of their children are often seen acting hopeful and "110 percent" sure the alleged father is the real one, despite the same allegations not working multiple times before.
* even sample $20 plates to show how the serial numbers worked Some large proportion of $20s were said to be these indistinguishable "Superdollars", but supposedly changing things would have been too difficult until the redesign in 1998.
* Even Sandy Mitchell himself isn't sure if Cain just doesn't give himself enough credit.
* Even scholars on the subject were caught off-guard. History Professor Michael Hughes of University College of Wales, in the epilogue to his book
* Even scientists aren't exempt from this. A biology professor had David Suzuki

following him while he studied grizzly bears. At one point, the professor assisted with the filming of the bears at night with an IR camera. Suzuki, not liking how that looked on TV, replaced it with daytime footage, filtered so that it looked like night time. Needless to say, that was one very peeved biologist.
* Even Scrooge McDuck can't avoid this one. In one story, he rockets through space to claim a moon made entirely of
* Even setting incarnations aside, the Doctor can be loosely split up into decades:
* Even Shepard falls into this role. While by no means lacking in intelligence, they will often take the everyman seat and just let
* Even shorter was the Six-Day War in June 1967, though it contained many weeks of buildup and proved to be a very eventful six days (
* even shows up, when Mike finds out he's barely in the photo for his student ID.
* Even sillier as one of the girls is invisible until the end of the transformation sequence.
* Even similarly designed wireless systems have the limitation of their transmitter.
* Even small companies in barely-relevant regions get to have this, as Alaska's two locals, GCI (primarily the cable company) and ACS (the privatized version of formerly-public phone utility company ATU, merged with Internet Alaska, the first non-AOL ISP in the state) both regularly trash each other in various commercials - ACS largely on price (they resell Dish Network as well), while GCI goes on and on about DS Snail - while using one of the cast of
* Even small-scale popularity can have this happen. Some artists may be constantly bombarded with messages discussing commissions, people wanting to be their friends, or dealing with web-drama amongst their existing friends so getting a hold of them is
* "Even So Come" by Chris Tomlin, which is about waiting for the Lord's
* Even so, it should be noted that there have been a significant number of "suspension failures",
* Even Solution gets in on the act by getting jealous of the slime Ainz uses to degrime his skeleton and asking to be used instead.
* Even Soma gets into it, after doing a dramatic Takumi-esque rivalry speech to Akira, his attempt to leave is stopped by Jun throwing the door open and jabbing him in the stomach.
* Even some gaming oriented pre-builds are not immune. Despite being sold at large markups over the cost of parts and flashy looks, they tend to have brand name CPUs and GPUs and skimp on stuff like motherboards and power supplies. Moreover, the flashy cases tend to not be that great for airflow and general cooling capacity. There's a reason pre-builds are frowned upon by many enthusiasts who prefer to buy parts separately and build PCs themselves.
* Even some incredibly powerful forces of Good cannot be viewed safely by mortals. The
* Even some lower-rent places will helpfully tack the day's sports page up there.
* Even some loyalist Space Marine chapters fall prey to this, when quirks in their gene-seed cause initiates to develop unconventional traits. The Black Dragons for instance have a tendency to grow bony talons from their forearms,
* Even some male characters play along. Two villains — the Winter Soldier and the Grandmaster — wear the
* Even some Nazis found the Rape of Nanjing horrifying. John Rabe — a German businessman and Nazi party member — was one of the key figures in setting up the Nanjing Safety Zone at the height of the massacre and tried to save as many civilians as possible from rampaging soldiers. Rabe wrote to Hitler, expecting him to intervene if he knew, but the Gestapo intercepted the letter and arrested Rabe. They eventually released him but forbade him to mention the atrocities again.
* Even some of season 5's episodes had been released on DVD before their official airtime on DVD%20s such as "Friend or Foe?" ("The Original Fry Cook", "Night Light", "Fungus Among Us", and "Spy Buddies"), "Season 5 Volume 1" ("Fungus Among Us"), "Bikini Bottom Adventures" ("Boat Smarts", "Good Ol' Whatshisname", "New

Digs", "Krabs à la Mode", "Roller Cowards", "Bucket Sweet Bucket", and "Breath of Fresh Squidward"), "WhoBob WhatPants" ("Goo Goo Gas"), and "Season 5 Volume 2" ("Goo Goo Gas").
* Even some of the humanoid enemies are top heavy guys too, like the
* Even some of the retail servers allow game-masters and moderators to screw the rules of the game...whether this counts is a bit more debatable, as they're usually not used to
* Even something as simple as the color of a spell is caused by wizards expecting it to be that color.
* Even something we take as simple, like reading can be this. It allows one to hear the dead speak and anyone to communicate the most arcane knowledge. Non-literate societies were shocked to find people opening up dead leaves and producing voices and knowledge from them. Even in more "civilized" societies, like Ancient Rome, silent reading was a kind of magic, as recorded in Saint Augustine's confessions when he discusses Saint Ambrose, "When [Ambrose] read, his eyes scanned the page and his heart sought out the meaning, but his voice was silent and his tongue was still. Anyone could approach him freely and guests were not commonly announced, so that often, when we came to visit him, we found him reading like this in silence, for he never read aloud."
* Even some U.S. presidents were avid skinny dippers, with the most avid being
* Even so, the investigations are not renowned for their thoroughness or impartiality.
* Even so, they’re not above creating cyborgs to better protect their hatchlings. The half-skeletal Cyborg Midwives, fitted with laser weapons and created from ship’s nurses, are some of the most difficult and disturbing enemies in the game.
* Even Star's mother Queen Moon has the same kind of hair she does. She usually wears it in a large heart-shaped updo, but when dressed for battle, she wears it in a long braid. And as a teenager, Moon wore her hair loose just like Star does now (and in fact looked
* Even statues of humanoids can become animate and attack; living statues and golems are favorite guards in a wizard's abode.
* Even staying out of the Warp doesn't mean escaping this trope. Sometimes, a
* Even Stevens. A few of them involved trying to buy hot sneakers from a shady salesman, making the neighbor kid look like a genius so he could meet his favorite news anchor and rent out his house as a bed and breakfast while his parents were away in order to afford to go skiing for a weekend his best friend Alan Twitty was almost certainly expected to be involved.
* Even Stevens. After Ren ruins one school picture, she nearly sneezes during her retake photo, but this time the finger under the nose works.
* Even Stevens and more often than not causes trouble for the rest of the family, especially Ren.
* Even Stevens anyway during the dive. Nevertheless, his father is impressed with his son's actions and applauds him, which no one else joins in.
* Even Stevens did this twice, although not really in the fridge for both examples. One was some old food under Louis' bed which mutated badly enough to have to call in a hazmat crew. Another was an old sandwich in his locker which was alive and fierce enough to shred the tennis racket Louis tried to scoop it out with.
* Even Stevens episode "Secret World of Girls". After the girls realize the boys have been spying on their slumber party all night, they rush down to the basement to confront them. All of the frightened boys manage to scramble outside through the open window except for Louis; Ren grabs his ankle just as he's about to escape, and drags him back in as he screams.
* Even Stevens episode uses this at the end, when Ren is getting a retake of her school photo. She is about to sneeze, but Louis puts his finger under her nose to stop it and save her from being photographed mid-sneeze.
* Even Stevens features a subverted underwear-showing version of the trope, in which Louis gets wedgied by Beans with a fishing rod when he is crouching down next to his closet, exposing his underpants.

* Even Stevens has Louis help the school's baseball team's star pitcher, Twitty, improve his game. When Twitty strikes out the last hitter of an inning, Louis dumps a bucket of Gatorade on the coach, who angrily points out it's only the top of the sixth.
* Even Stevens has Ren and Louis Stevens sitting in front of the TV, each with a remote control trying to change channel to what they want to watch. When they can't agree, they turn their remote controls into lightsabers and begin to battle one another in a display of sibling rivalry.
* Even Stevens. He was essentially a parody of the Drop-In Character, since the Stevens family couldn't keep him out of their house no matter what they did. And not only were his parents never seen, but the only episode where anyone tries to track Beans back to his house led two of the main characters to conclude that Beans was in fact an alien.
* Even Stevens: In "Head Games", it is discovered that Twitty has incredibly aim when he is enraged at Louis. He joins the baseball team as a pitcher, with a photo of Louis on the catcher's mitt.
* Even Stevens: In one episode, Louis and Twitty play a game called "Sweaty Sock Ball", whose convoluted rules seem to change depending on the whim of the participants.
* Even Stevens: In "Ren-Gate", after Louis catches two bullies giving a kid a wedgie, he punishes them by giving them wedgies in return.
* Even Stevens pilot, the characters' voices never match their lips when they say "Stevens". The family's name was changed from Spivey to Stevens after filming and the new name was looped in before the episode aired.
* Even Stevens points it out too. Luckily, Twitch changes the subject before Louis embarrassed himself even more.
* Even Stevens Ren never hesitates to call Louis an idiot. However, after failing a band audition (big time) the guy judging it called Louis an idiot. Ren then told him that the only person allowed to call him an idiot is her.
* Even Stevens, Ren was excited to get her braces off on picture day. Unfortunately, some dental medication caused her cheeks to swell up enormously.
* Even Stevens. There's even an episode dedicated to how the Stevens would live if they didn't have Louis in their lives.
* Even Stevens they run away but Louis gets captured by his sister Ren and the other girls and forced into a makeover.
* Even Stevens) trips on a tree trunk and flies face-first into a mud puddle in the forest. He spends the rest of the episode caked in mud and attacked by girl scouts screaming "Mud Monster!"
* Even Stevens. When asked about the creative differences that led to the breaking up of the band with friend Twitty, Louis explains, "I'm creative, and he's different."
* Even Stevens which were TV-G in their original runs, TV-Y7 on ABC Kids, and TV-PG on Disney+, despite there being little to no inappropriate content.
* Even Stevens: While not actually dealing with death, this trope still applies: In one episode, the Stevens were going to move to Washington D.C. after Mrs. Stevens won the Senate seat, so the family tried to live out their last day in their hometown to do things (Ren Stevens having her friends paired up with a lookalike, Louis Stevens finally taping his feelings for his female friend, and Steve Stevens... well... telling off his boss.). Of course, once it turns out that they wouldn't be moving to Washington D.C. after all (Turns out they mixed up the ballots, which means it was actually her opponent who won the election.), they immediately attempt to rectify the situation. It's also subverted in the sense that Steve Stevens ended up refusing to rejoin his job in the end despite attempt to get it back, as well as Louis Stevens receiving a video from his crush explaining her feelings for him as well by mistake (he originally intended to get back his own tape). Played straight with Donny, though, as his coach ended up in Washington D.C. because he never got the memo.
* Even Stevens worked at a toast store and successfully lobbied for better working conditions.

* Even Steven, who is familiar with human culture, is prone to this due to his exuberant nature. When Garnet returns from a solo mission he asks if she brought him a present, he is handed a rock. He gleefully puts it in his mouth. This can also occur due to his unusual upbringing - he is also fascinated by Connie's description of a school, and a book series (which he doesn't know should be read in order, because the books he's used to don't have an order).
* Even still, Phyrexians in their newest form seem to move away from this trope. Ever since the Phyrexians took over Mirrodin, turning it into New Phyrexia, there have been five different factions corresponding to each of the five colors, and each being lead by a praetor, each with their own brand of pitch-black evil... Except the red praetor, Urabrask the Hidden, who, true to his red mana alignment, is a lot more individualistic and merciful than the other praetors, and therefore leads the only Phyrexian faction capable of free will and compassion. Probably due to this, he is the only Phyrexian leader who plots against the other praetors not simply to gain power but to actually work against Phyrexia as a whole. This is mainly because Phyrexia's primary goals strongly go against two of red's strongest points: freedom and emotion.
* Even stranger when one book specifically notes that a hard vacuum is a decently good insulator and that freezing to death isn't really a concern.
* Even Sun isn't exempt of this trope. When she realizes that Akeno is conducting a
* Even Susan gets in on the act, using her uncanny ability to rollerskate using improbable gadgets.
* Even sweeter? At first Gimli would ask for nothing, saying the hospitality he'd been shown was enough. Galadriel is so impressed with his humility that she has a command for all of Elfkind at that point.
* Even switching between Linux distributions can invoke this, as different distros have different commands/programs to fulfill the same purpose. The most notable of these are package managers: Debian-derived systems including Ubuntu use apt, Red Hat-based systems such as Fedora use dnf (which replaced yet another package manager yum), SUSE uses zypper, and Arch uses pacman.
* Even Sylar, after he steals Isaac's precognition power, does things like
* event and you have a very tedious, very annoying event from start to finish. Fortunately, if you know about the Bad Omen (it is visible in your inventory like other effects), it can be cured by drinking milk like any other effect.
* Event-Driven Clock: In-universe time and calendar is based around the hero's actions and progress rather than a real-time clock. Time of day can be very important to a scene, and technical difficulties can arise if the alternative is used, especially in pre-rendered cutscenes.
* Even Team Rocket has had cute Pokemon, especially Chimecho, Mime Jr., Cacnea, Wurmple, and Woobat and even Meowth.
* Even-tempered Joceyln Schitt is suffering from post-partum sleep deprivation and hints to Moira and others she is at her near breaking point. When she arranges for a babysitter (who is really a pet sitter but making an exception) so she can attend a Jazzagals rehearsal, Jocelyn arrives to discover that the rehearsal was moved up an hour to accommodate Twyla and Ronnie. She finally snaps and says her friends are acting like B-words.
* Event Flag: Something happens that triggers something else (not always related) to occur.
* eventful decided to stay home with his wife and children. Tragically, one bad day in the park gave him a new war to fight.
* Even that anti-religion line is pretty suspect in older editions, where they all
* Even that character is hardly cold. He does have the military history, but from the beginning, he's clear that he sought out SRU because he wanted to save lives instead of taking them. And he's just as devastated as the rest of the team when they have to kill someone, especially when it's his finger on the trigger.
* Even that depends on your definition of evil. If that happens to be malevolence, well the Borg do not hate any species and literally cannot wish harm against them. Their only desire is to advance the Collective, and they act exclusively on that

desire. It seems the more powerful they are in an area the less dangerous they - as a single isolated Borg will assimilate just to gain numbers on its side, but in the heart of Borg space they are happy to ignore individuals, ships or even the occasional (simplistic) species if they have nothing to specifically gain from assimilation. They are a major power in the Delta Quadrant, yet other species abound in space surrounding them. In the rare instances they respond to the idea others do not want to be assimilated they act confused, as if the assimilation is a kindness the rejection of which they cannot comprehend. And by all accounts, being part of the collective is quite the experience and apparently not an unhappy life - for a given definition of the word 'unhappy'.
* Even that might have been dealt with because of another safety measure designed in: the reactor power system had the capability of getting electricity from truck-mounted mobile generators, which were, in fact, on scene within a few hours. Only problem was that no one had verified that the generators and the power system they were supposed to supply emergency power for had compatible attachments for the power cables.
* Even that pales in comparison to Paratarsotomus macropalpis, the fastest animal in the world relative to its body size. It's a mite only 0.7 millimeters long, but it can move at 322 body lengths per second. That's the equivalent of a human running at
* Even the act of a baby tearing up a cake is too much: one segment had a competition to see what baby would make the biggest mess, with cakes provided by
* Even the Americans didn't avoid this trope entirely. Front-line US Navy units used biplanes such as the Grumman F3F and the Curtiss SBC Helldiver as late as 1941. Meanwhile, in the Philippine Islands, some of the American and Filipino defenders flew Boeing P-26 Peashooters, with their wire wing braces, fixed landing gear, and open cockpits, against the attacking Japanese forces. Despite their obsolescence, they achieved several victories against Japanese bombers and fighters in the first few weeks of the war.
* Even the Asgard (who are all clones) mention having political strife (although we never actually see much of it).
* Even the Bene Gesserit, an all-female group obsessed with breeding programs, will only use natural methods of impregnation, to the point of forcing the openly-gay Baron Harkonnen to have sex with one of them. This gets ludicrous when they're worried that bloodlines may die out when all they'd have to do is obtain sperm samples and keep those in nullentropy capsules to use in worst-case scenarios. These women claim to be entirely rational (they despise love because it clouds reasoning) but refuse to break irrational taboos. In fact, the only time this is broken is by one of them who does it
* Even the best endings in the "Time of Judgement" supplements for the
* Even the best episodes as bedside reading to allow him to run complex ships' systems and get into highly secure areas like Engineering, and to override the one security system the ship apparently had, knockout gas flooding all decks?
* Even the best, true ending is this. The entire plot of the game involves destroying alternate universes, and the game doesn't hide that everyone in those universes dies. While there are some scenes of party members feeling bad about it, they quickly get over it and the party just accepts this as a necessary evil. By the time of the ending, everyone is long done feeling bad about about destroying alternate realities, which means that not only does the ending involve killing trillions of people when all the remaining realities are destroyed, but nobody even cares.
* Even the Big Meg's judges aren't immune to this trope. The entirety of "The Pit" arc has Dredd assigned as sector 301's Sector Chief in order to weed out dirty judges on the take from the Frendz syndicate. It turns out that the dirtiest judge in the Pit is the sector's head of the
* Even the bright colours have practical basis. As darker colours absorb more heat, it make the material hotter and less comfortable as they're more likely to sweat under, whereas brighter colours would reflect more external light and heat away from them and be somewhat cooler. It also increases visibility, which unless

the hero is
* Even the Brotherhood of Steel and the Enclave can be argued to fall under the "low culture" part of this trope. The Brotherhood of Steel in
* Even the Capital Wasteland Mutants don't all follow the rule — it is
* Even the case for more recent shows. Everyone who was born before or during
* Even the cast and crew weren't averse to a bit of it among themselves. Roy Skelton, one of the Dalek voice actors during the classic series, says he and his colleagues would often compete with each other on set, to see who could be the most
* Even the Centers for Disease Control and Prevention (aka the CDC) is getting into it, with its
* Even the Chief did it, when on a mission so classified that he couldn't tell his agents about it. He pretended to be dating a much younger woman, and at one point they met on a park bench so she could give him a secret formula
* Even the Chozo, in Japanese: "choujin-zoku" means "birdman race". Chozo look like humanoid avians.
* Even the closest thing the setting has to "Good Guys" are pretty horrific. The Imperium is xenophobic Totalitarian Theocracy who feed 1000 souls to keep the
* Even the codex takes potshots at them, despite supposedly being from an objective in-universe source. The description for
* Even the combined might of the rest of the Eliatropes isn't enough to stop him. He is only foiled when a Dofus explodes right in his face, separating him from the Eliacube.
* Even the conventional "sylvan fey" of the Land of Mists can be nastier than elsewhere, due to the ambient influence of the Dark Powers throughout the setting.
* Even The Courier can run into this, as the Vault is filled with ammo, arms, armor, and gold ingots worth a fortune; but taking too much will slow you down so that you can barely move - while the timer on your explosive collar ticks down.
* Even the Dark Eldar have reserves, in a weird way (though not usually in tabletop terms). Almost all of the Dark Eldar race are clones quickly and cheaply, with live born children (called Trueborn) are considered special and are pampered and taken care of (and get their own unit). Oh and if you kill one of the leaders, so long as they get some of the corpse (not all, some) back to the
* Even the DCAU isn't immune. Harvey Bullock may have been more of a
* Even the dingo, an Australian icon, is one of these, brought to Australia by the first humans to settle there. Competition with dingos, as well as diseases transmitted from them, may have resulted in the extinction of the Thylacine (or Tasmanian tiger) on the Australian mainland, although it survived in Tasmania until 1936.
* Even the Dog Is Ashamed: Everybody is ashamed at someone, even their pet.
* Even the Dog Is Ashamed: Everybody is mad at somebody, even an animal.
* Even the Dog Is Ashamed is borderline; while the "Dog" in question does not have to be a Canine, it does have to be an animal, and it usually is a Canine.)
* Even the Dog Is Ashamed: The character has screwed up so badly that not even their loyal companion is willing to stick by them anymore.
* Even the DVD releases of Digimon for the US (Adventure, 02, Tamers and Frontier) also suffer from this. (This is from the same company that released the H2O example above.)
* Even the end of the Cold War didn't stop these close calls - a rocket carrying scientific equipment for studying the aurora borealis was
* Even the established torture-happy monsters like Gregor Clegane, who had people killed via terrified rats gnawing through their chests for the hell of it, don't hold a candle to just how utterly sadistic and cruel Ramsay can be with those who fall into his hands.
* Even the Evil Gods have their own loyalties and biases. Loki is still Evil and at odds with Thor, but willing to cooperate together and
* Even the fast-food industry has some of these. New hires at the local McDonald's will often be asked to go get "more steam for the bun steamer".
* Even the Federation uses it, having created Mother Brain-like super computers called Aurora Units and cybernetic war robots.

* Even the films referenced above don't play it exceptionally straight: while Threads makes mention of the fact that during the time the big nukes were flying, Western response times were slower than others, blame wasn't specifically placed on the USSR for shooting first. In The Day After, it's never made explicit who shot first strategically. (Though in both films, the events that lead to war are precipitated by Soviet armed forces expanding into regions like the Middle East, so...) This is partly excusable because there is/was a general public fear that any side could strike first contrary to stated policy (lookup Able Archer '83 for one nearly catastrophic example), and that one nuke's launch is enough to get the powder keg going.
* Even the fire breath is pretty harmless. Which is to say it doesn't have to be, but it's never been used in anger (an emotion Llewellyn seems incapable of feeling to begin with).
* Even the first game has Chinese-equivalent people in Xi'an and a Middle East region from Kalay (Turkey) to Lalivero (Egypt or Ethiopia), with appropriately-dressed NPCs.
* Even the floors are called "chambers" in a direct reference to the chambers in the revolver's cylinder, and the floor teleport tiles look exactly like a revolver's cylinder.
* Even the Freelancers, the results of an experimental and elite military program, are fairly lax about things, and are mostly left to do what they like how they like it. They still get orders (such as Wash's orders from Recovery Command), but they aren't really checked up on all that often, which shows very poor judgment on Command's part, considering the trouble they all get up to. Even in the group's glory days, as seen in
* Even the game developers endorse this. The late concept artist Adam Adamowicz comments on an "Elf Grinder" trap he devised for Skyrim:
* Even the gameplay mechanics have an amusing example, as every entry after
* Even the game's protagonists could qualify. It does, after all, begin with them blowing up a power plant that operates by
* Even the generic weapon shop might qualify for this if one of your party members is an
* Even the Ghost has one of these; an incredibly long-winded monologue about how terrifying everything is in Purgatory or whatever, and then adding that he's
* Even the Girls Want Her: A girl is so attractive that other girls love her.
* Even the Girls Want Her: A woman is so beautiful that even other women desire her.
* Even the Girls Want Her. Yumichika, who classifies beauty by his own unrelenting standards, is reduced to a mumbling wreck when he first meets her. By the time she's in her final year of school, she's the subject of wide-spread school gossip about how she's so beautiful and sneaking photos of her face. At one point, Shishigawara is sent flying backwards by her appearance alone, leaving him dazed, shaken and wondering if she's inhuman because nobody human could be that beautiful.
* Even the Global Occult Coalition is implied to not be as bad as the Foundation makes them out to be. It's sometimes heavily implied the whole "kill every SCP they come across" is just the Foundation's
* Even the Grey Wardens are less extreme in presentation but ultimately just as inclusive and binding. In theory, anyone can be conscripted — from blood-soaked psychopaths right out of the hangman's noose and the lowliest slaves to princes, kings, and lords — and in particular apostate mages (who'd otherwise be executed, lobotomized, or imprisoned) are free to fight right alongside everyone else. Their job is to stand between the darkspawn and the world, giving up everything (lives included) so the realm can exist in peace, and they are equally legendary and reviled for their heroism and absolute ruthlessness. In practice, the order's reputation has dwindled over the years and there are now far fewer high-status Wardens, leaving a fighting force of oddballs, criminals, and peasants sometimes unaware of the sacrifices Gray Warden are expected to make.
* Even the group of Insurrectionists the Freelancers were fighting would count (or at least the ones that aren't

* Even the Guys Want Him: A guy who's so attractive that other guys love him.
* Even the Guys Want Him: A man is so attractive that even other men desire him.
* Even the history plays are not immune to rapidly climbing death tolls.
* Even the illegitimate members get in on it; Vidar (illegitimate and much older half-brother of Thor, who dropped his claim in relief as soon as Thor was born, former God of Thunder, current spymaster and
* Even the Illusive Man, Human Supremacist Supreme, isn't exempt from this trope. Amongst the data the Shadow Broker keeps on him is a list of TIM's Sexual Liasons. There are a lot of human supermodels and an Asari Matriarch (twice). Averted in the case of his minion Kai Leng, who in the books finds
* Even the initial "reawakening" protocols and interment were flawed, causing many of the necrons to become quirky and insane before all this "resurrection" nonsense. Nemesor Zahndrekh is the most notable example, as he still thinks he's a creature of flesh and blood fighting against the other Necrontyr Dynasties rather than waging inter-galactic war against aliens. The Destroyer Cults are ones who were so thoroughly broken by their bio-transference that now they want to utterly annihilate everything (this madness extends to the aptly named Destroyer Lords, and the fluff indicates that this is also responsible for the entire earlier canon fluff; the first of the lords and warriors to awaken had their memories damaged so much that they thought they were still slaves to the C'tans, slavishly carrying out the wills of long-dead gods.
* Even the Internet falls victim to this. Because television shows are almost always licensed for viewing only in certain countries, online players will usually block users from foreign countries. Never mind asking
* Even their own mass production vehicles suffered this issue. German tanks are infamous for their inter-weaving wheels,
* Even the Ixians, whose entire planet is a giant underground machine factory (they are the ones who build the enormous Guild heighliners) use throngs of suboids, a specially-bred race of humans mostly incapable of independent thought. This is considering that factory machines like the ones we have don't need to have complex computer "brains", which is what they're really afraid of.
* Even the JSA gets into the mix. Stargirl went back in time to found Camelot as Merlin.
* Even the killer got trapped in the crime scene and then made it seem like he just arrived when the bridge was repaired and the police came, but you don't figure this out until late in the case.
* Even the Kingpin himself is shown to genuinely love his wife and son, and to be truly devastated when his life of crime costs him his family.
* Even the kings were occasionally punished for their wasteful wishes. When David fell in love with the married Bathsheba, he sent her husband Uriah to his death to have her for himself. God, furious, sent the prophet Nathan to tell David a story about two men, one rich and one poor. The rich man had many sheep, while the poor man had only one—but when the first man wanted to hold a banquet, he stole and slaughtered the second's sheep rather than serve one of his own. David, upset by this story, remarked that he wished the first man would be brutally punished for his selfishness and greed...whereupon Nathan told him that
* Even the Law of Knowledge is sometimes ignored, in cases where the person doesn't know he has magic powers uses them without meaning to. Like Harry Potter shrinking the horrible sweater, or teleporting away from the bullies, or freeing the snake.
* Even the literal word of God is shown to be wrong in season 13 when Gabriel is shown to be alive and well, having faked his death in season 5. Then a few episodes later, he's killed AGAIN. It seems to be the real deal this time, but given that he's already cheated death at least once, who knows if he's still out there?
* Even the longest of duels in GX were at most two full episodes, which is half the time of the average long duel in the original series. Most duels, even the important ones, begin in the latter third or quarter of an episode (where the first bit set up the scenario), end on a cliffhangers, then are finished in the first third or half of the next episode, using the remaining time to detail the aftermath

of the duel. Most duels that spent at least one full episode on a duel also had several cuts to other characters making progress on other parts of the story. Though the duel pacing is significantly increased, the amount of exposition is still sometimes painful.
* Even the "lots of Deaths" version is not always used for comedy purposes. In the
* Even the Loving Hero Has Hated Ones has at least one exception to their rule of loving others.
* Even the Loving Hero Has Hated Ones has people they dislike and consider unworthy of redemption.
* Even the Loving Hero Has Hated Ones hates someone, you know the hated character is really bad.
* Even the Loving Hero Has Hated Ones: I am very kind to everyone, except for this repulsive individual.
* Even the meanest, grumpiest male crocodile would soften up if you pair him with a female... unless one of them ate the other for dinner instead. In nature, male and female often only show interest in each other in that way at mating time; the rest of the time, it's just another rival/potential meal.
* Even the mention of the Targaryens can drive Robert into a frothing rage. While there are pragmatic reasons to send assassins after Daenerys, he does not care about them and just wants to see her family exterminated. This is presumably the reason why Ned Stark hid and protected his nephew Jon Snow, the son of Ned's sister Lyanna and Rhaegar Targaryen in Winterfell, passing him off as his illegitimate son.
* Even the merchandise was this. Disney based projections for toy sales based on initial sales of their previous princess films,
* Even the MMO game doesn't escape this fate in concern with the popularity and characterization of a few of its characters. Jaina Proudmore will be remembered (
* Even the mobile suits' non-beam-firing weapons aren't immune to this. In
* Even the more good-natured Chloe doesn't consider making such wishes, even though she does occasionally make world-benefitting wishes on a much smaller scale.
* Even the more obscure films out there subscribe to this notion. Superhero-in-training Rod Rescueman from
* Even the most "creative" (mis)uses of Ambrosia only make the game a little more convenient, generally during wars. The most infamous example is the use some people make of the feature which allows players to move a city to another island for 200 ambrosia (12,5 €, more or less), which is often used to move a city full of troops in an enemy island, attack and retreat immediately. There's possibly only one strategy to get the most out of Ambrosia, namely building all your cities on islands which have wine as their rare resource and using Ambrosia to convert it in other resources. It has many advantages, but even so, it's not a full
* Even the most staunch defenders of the franchise will find it difficult to deny that the very first
* Even the most venerable of children's shows can fall victim to this, as
* Even the naming conventions in the United States hint at a looser union than actually exists. The subdivisions of the US are called "states", a term that normally applies to an independent or quasi-independent entity. The name of the country, the "United States of America", is a phrase describing the political union rather than the name of a State per se. These are all a result of the original "United States" being thought of as a loose coalition of the former colonies with the states being the primary powers and the federal government being much less relevant.
* Even then his voice never wavers. He just looks utterly haunted as he continues to levelly answer Landa's questions.
* even the nicest Paragon Shepard Bonus points if Shepard is an Engineer, on top of all that.
* even then insisting that the landlord is bluffing. Moments later, it starts snowing, and only then does Ralph finally come to his senses and give in to the landlord. But even then, he stalls for a long time to come up with an acceptable reason for giving up:

* Even then, John Stanley worked on the Nancy comic book series, where he was given a last name, Haveall. Yes, his name is Rollo there and then on.
* Even then, NPH had left TV for stage work and had been doing mostly guest spots if anything for almost 10 years, Hannigan coming off of Buffy into a sitcom was hardly a lock... and Segal was just starting to attention, most of it still 'cultish' due to
* Even the normally unflappable NASA controller Gene Kranz cracks a little at guidance officer Steve Bales' exuberant 'Go!' on the roll call of controllers when the Apollo 11 lunar lander was lining up for descent, despite the fact that Bales's distinctive delivery was known across the controller team - so well known, in fact, that the
* even the Norscans and Kurgan think they are savage, stupid bastards. "Word of a Hung" is common slang for a worthless promise.
* Even then, reclaiming the North still needs to happen. Officially, the retaking of Last Hearth is considered the last battle of the War.
* Even then, regenerative medicines don't reduce drug effects; his editor Royce recalls the one time he found Spider in a bathtub bound with healing tape and desperately trying to find a vein because
* Even then, the game gives you a choice of character type between Heroes/Champions, with awesome stats, and White Hats/Investigators, with worse stats but more Drama Points to begin with plus a lower cost for more Drama Points. There is also a third option, Experienced Hero, which gives you better stats than the Hero and the Drama Point use of the White Hat. The Experienced Hero is designed for a whole party to use together, for balance, to reach the power level of a slightly more experienced canon character, although still not quite
* Even then, the Necrons are magnificently hammy even without speaking. Necron Lords in every medium, stomp, not walk,
* Even then, the process that clones the Grineer has its occasional hiccup, creating "defective" clones that lack the fanatical devotion to the Grineer Queens, albeit they prove much healthier compared to the normal Grineer.
* Even then, the Romans themselves had a rather significant problem with the surnames, as they, just like Welsh, had about a dozen surnames (called "nomen gentile") for
* Even then, the series has things like roll jumping (rolling off an edge, then jumping off of the thin air) and team throwing (throwing the current inactive kong up to a ledge, causing the active kong to appear there as well) as platforming tools, hilariously impossible things probably only put in to spit in reality's face.
* Even then, Third Edition still has some of the residual magical technology of the First Age sticking around. Mahalanka, the City of a Thousand Golden Delights, may be an autocratic police state ruled by a mad Lunar self-styled goddess, but at least they have air conditioning.
* Even then, this trope settles in: as most of the anime that tends to get exported are generally made for a teen to adult audience, it colors the perception that
* Even the Númenóreans are long-lived compared to other humans (most Númenóreans can live to 200—the royal line, which has Elvish blood, can live up to twice that). Dwarves have a similar lifespan—they live to about 250 on average. For that matter, so are Hobbits: a hobbit comes of age at thirty-three, and it's not uncommon for them to live well over a century.
* Even the official United States constitution can get like this, what with "no person who shall not have attained the age of [
* Even the original comic book, Penguin has gotten into the act a bit. In the 1990s, he stopped wearing his top hat (at least for a time) and made the transition to a
* Even the original sidescroller sometimes had elements of this, such as a section where you need to rapidly navigate three rooms filled with traps, tricky jumps, and spikes (which you'd probably navigated in the other direction over the course of several minutes) at a dead run in the space of about ten seconds, then leap down to

a door three screens below and dash through before it closes.
* Even the original St. Trinian films and the Ronald Searle cartoons were like this, 1950s style.
* Even the Orks get in on this trope: Your average boyz are a pack of gleefully raging
* Even the Orz, who are implied to be native to *below*, say that it's a terrible place where they were in constant *pain*. Hence why they like Realspace so much.
* Even the pacifistic religions sometimes to have this in their backstory. Several examples pop up in the early books of
* Even the people there know how to handle it. Nanny Ogg gives a handy list of how to handle being in vampire country:
* Even the professional parts of S.H.I.E.L.D. can get a bit lax at times. Maria Hill, the second highest-ranking agent in the organization, doodles a porcupine on Ward's evaluation
* Even the protagonist has the option to be this if the player chooses the wrong options while cooking. You have the option to
* Even the protagonist, Monkey D. Luffy, and his brother, Portgas D. Ace, were technically examples of this trope. At least with Luffy, it was revealed that his inhuman strength, stamina and outright
* Even the punches of any reasonably skilled martial artist (skill 4 or above) are enough to invoke this rule and kill you automatically on any hit to the head.
* Even the Rats Won't Touch It: A food is so gross, even vermin don't want it.
* Even the Rats Won't Touch It: Even vermin don't like the nasty food.
* Even the Rats Won't Touch It's food is so awful, it gets turned down by vermin.
* Even the Rats Won't Touch It: When a food is so gross or tough that even vermin aren't interested in it.
* Even the referees have access to "riot control" spells to break up player brawls.
* Even the "regular" humans encountered (which seems to include the Corpus) show great distinction from modern humans, like near-universal lack of hair in males,
* Even the regular stitchpunk versions of the characters get this treatment.
* Even there, it is questionable, since it was the Extremis armor, which allowed Iron Man to be unharmed from deep-space pressures, take hits from pissed off Thor who was not holding back, and while low on power, take blows from Spider-Man (who himself is far stronger than Cap) when Spidey was enhanced to twice his normal levels and even be unharmed from a point-blank nuclear explosion while low on power. So Cap's shield strikes > ground zero nuke explosion?
* Even the remake has something similar: first while driving to Hill House in her car, then in the garden while she looks at the statues of the woman and children, Eleanor is humming a wordless tune. This same tune is played later on as an
* Even there, Nog commented on how rapidly humanity progressed from mercantilism to a starfaring civilization. Apparently it took the Ferengi twice as long.
* Even the returning Solars sometimes divide along this line, between those that simply wish to return things to the way they were in the First Age and those who wish to forge an entirely new world of their own design.
* Even the revived Toonami on [adult swim] is still dishing out Colbert Bumps.
* Even the Romans would limit lashings to 39, as 40 was known to kill some men.
* Even the runes and upgrades rely on fours. There are four main rune shrines at the beginning of the game. There are four Great Fairies to upgrade armor and clothing up to four times. The Goddess Hylia statues's price for health or stamina is four spirit orbs.
* Even the second book put Simon and Merrin on a bus, for them to return in the fourth.
* Even the seemingly innocuous spell "Heat Metal" can cause this. Being forced to drop your white-hot weapon is... unpleasant. Use it against someone wearing plate armor and you can, in essence,
* Even the sequels got a share of it, complete with a prequel that had to be shot twice.
* Even the simpleminded but brutal and traitorous ruffian Jayne hides a soft spot

for his family, adores his momma, and "works" hard (at crime, violence, and selling out his comrades) to be a good son and send money home to support her and, apparently, his younger siblings.
* Even the slowest Servant speed rank is ten times better than what a human can ever achieve. Note that Nasuverse humans include the above Araya and both Shikis.
* even the smallest provocations (like telling her mom that Ed hit her when a newspaper lightly tapped her heels as it rolled to the ground).
* Even the small fighter craft are fully capable and willing to spew out several times their vehicular mass in missiles at the drop of a hat.
* Even the soft and fuzzy mammals of the Mesozoic have been abandoned for vicious and dangerous new ones such as the baskerville (glowing canine-like member of the possum-hounds), Digga-dumdums (large burrowing animals that can use their claws to rip up the face of even tyrannosaurs), the powerpus (large bulky platypus with fangs), Moby Duck (multi-ton marine platypus relative), the unrats (primitive mammals with venom so potent not even the hungriest gobbler would eat them), or the tree foxes (primates with sharp fangs and retractable-claws).
* Even the Spy hams it up sometimes, especially after dominating an opponent, or getting hit by
* Even the stoic and no-nonsense Grey Worm can't help but be roped into silly little contests with Daario. On a more poignant level, despite being a eunuch he is implied in "Two Swords" to have a crush on Missandei, which Daario good-naturedly taunts him over. He also makes jokes. Hilariously serious ones.
* Even the stories that aren't ostensibly about the Cold War will often find a way to work this in.
* Even the study of "world history" is still governed by a eurocentric bias.
* Even the Subtitler Is Stumped: The subtitles give up translating the character's dialogue after they apparently say something too bizarre to understand.
* Even the Subtitler Is Stumped: When subtitles show up to translate the dialogue of someone speaking a foreign language, there will eventually be subtitles left blank because it's become impossible to translate the current saying.
* Even the Subtitler Is Stumped: When the characters are speaking a foreign language and have subtitles translating their dialogue, eventually the translator just gives up.
* Even the Tainted Allure of Vice Umbra, which does make those who have it inhumanly attractive, specifies that this is a depraved attraction, such that just looking at a Darkened with this Umbra tempts you towards cruelty and depravity.
* Even the tame bear and television host Gentle Ben attacks his handler after hungrily going for the food table.
* Even the Tau have a breakaway faction led by a former military hero now bent on exterminating the orks, and while not currently actively hostile to the Tau Empire is an affront to their "Greater Good" philosophy and a deserter to boot.
* Even the Time-Life/K-Tel 'all the songs by the original artists' compilation album ads with loads of
* Even the title character frequently gets underestimated, though she also has almost as many problems with people OVERestimating her and reacting accordingly.
* Even the tongue-in-cheek approach can backfire. A Quiznos ad from autumn 2003 that took a potshot against Subway and — implicitly — its customers had two men sitting on a bench, one with a toasted Quiznos sub, and one with an untoasted sub that was obviously from Subway. The man with the Quiznos sub says "Untoasted? What, were you raised by wolves?" Cue the second guy (
* Even the traditionally-conservative country music industry was rocked hard by Hollywood's "progressive awakening". During the early 2010s, country music increasingly made inroads in "blue America" thanks to popular "countrypolitan"/pop crossover acts like Taylor Swift and Carrie Underwood, while the GOP's alleged embrace of sexist, anti-gay, and anti-immigrant politics led some of the genre's youngest (especially female) fans in "red states" to lean more like their "city cousins". The rise of Trump, the growing frequency of mass shootings (one of which was actually at a country music festival), the post-Parkland shooting student activism, the violent rally in Charlottesville, #MeToo, and the 2018 migrant crisis

contributed to the de-emphasizing of the "jingoistic, gun-toting, 'Dixie flag'-draped white male country singer" while the Dixie Chicks and the Guthries had their prestige restored after spending the 2000s in the "country blacklist" for their left-wing politics. Leading the charge for this trend tended to be alt-country acts and many of the women in the industry, with the conservative, more traditional acts becoming increasingly quiet about their political views (the exception being the artists who solely appealed to older audiences). This was largely cited as the reason as to why Swift was mostly silent on politics. Although she later endorsed a number of Democratic candidates in her home of Tennessee, which seemed to restore her reputation with liberal pop fans.
* Even the two men who planned to marry into the Hastings family, the equally creepy
* Even the Ultramarines' Primarch Roboute Guilliman, the closest thing to a
* Even the Ultramarines, which hold it as holy writ, are aware that it doesn't cover every situation, or that some unconventional solutions may be required, and that a commander has to use his best judgement in many situations.
* Even the United Kingdom gets in on the act with the Ed's Easy Diner chain, which seems to toe the line between being a nostalgia cafe based on a malt shop, and being an affectionate parody of one. It has the jukeboxes, art-deco motif and malt shakes, but they also have a menu of practically nothing but variations on hotdogs, chili and burgers, signs on the walls such as 'No dancing in the aisles', and the shakes themselves are enormous.
* Even the unmodded game can produce lesser Magitek - automatic potion factories, for instance.
* Even the use of the word to refer exclusively to a specific historical event (the Nazi genocide of the Jewish people and other minority groups) did not always refer to the specific incident we associate the term with today. Originally, the Historical event "The Holocaust" referred to was the Armenian Genocide, and became associated with the Nazi's genocide because it was so similar to the one committed by the Turks. The two events were originally "The Holocaust" (Turkey's crime) and "The Nazi Holocaust" until the scope of the horror of the latter started to eclipse the former. Now, when discussing the two events, it's "The Armenian Genocide" and "The Holocaust".
* Even the user interface isn't exempt from this trope, as there's a vocal minority who complain that Blizzard "hates mods" despite: directly supporting and advocating their use, deliberately keeping the core UI simple to encourage people to develop addons, and incorporating the best user-developed addon features into their own UI. Oh, and making sure that any addons that
* Even the video games have this. In the opening cutscene to the PC version of
* even the Vikings), because without a formation you would be cut to pieces.
* Even the villains of previous arcs get this treatment by Oda. Notable examples include
* Even the voice of Mario, Charles Martinet, is given to this at times, most notably when he claimed Mario's line when he throws Bowser a long distance in
* Even The Wizards Must Pay Their Due canon are on the hidden continent of Alfone, which cut itself off from the rest of the world when the inhabitants of the time got sick of the corruption in the rest of the world. Cavy thus uses the existent legend of Atlantis to neatly fill the plothole in any fanwork involving Amestris etc. existing in our world.
* even ''they'' couldn't help but laugh before they decided to go help him.)
* Even the Yeerks themselves are the targets of this. At one point, an Andalite black-ops team visits Earth hoping to infect the enemy with a similar quantum virus to the one that devastated the Hork-Bajir. Both the Andalite researchers and the Animorphs are appalled (and in the latter case very worried) about the near-certainty of the virus mutating to attack humans; none of them seem to consider whether the Yeerks really deserve it. (Possibly because, with the exception of Cassie and sometimes Tobias, they
* Even the Z-Fighters, or at least Piccolo, aren't innocent of this. When Cell managed to drain Piccolo's arm, Piccolo apparently seemed resigned to his fate of

being absorbed by Cell and instead asks that Cell at least explain to him what he is, what his plans are, and how he came to be. Turns out, this was a gambit thought up by Piccolo (or rather,
* even thinking they are elves born in human bodies. Surgery to get elven ears and angular features is common. Depending on how deeply involved the posers become, they can face anything from social penalties to actual transphobic violence, and are generally seen with disdain by elves and as race-traitors by human supremacists.
* Even this would not have been a problem had there not been a ventilation duct through the bulkhead. The bulkhead itself was strong enough to contain the explosion of the first torpedo (which itself had not had its welds tested since it was only a dud and thus had no warhead), but the vent was not, and thus allowed the blast to get through, and incapacitate everyone in the command room in the second compartment. The torpedo tube door itself should also have contained the blast, but it was a common issue that the doors often required several tries to properly close due to bad contacts. Finally the emergency buoy which should have automatically released in the event of a catastrophic failure was disabled after concerns during a previous mission in the Mediterranean that it would trigger accidentally and give away the submarine's position.
* Event Horizon. And at a certain point the creator of the Hyperdrive sees his dead wife.
* Event Horizon are armed with three turrets as well as several drones. Successfully conquering them earns you large amounts of loot, and conquered starbases offer services such as item manufacture and starship upgrade.
* Event Horizon. At any rate, there's certainly a lot of similarity to both.
* Event Horizon. At one point the inventor of the gravity warp drive (which turns out to be a pretty evil warp drive) proclaims: "Captain, there's no danger... It's contained behind three magnetic fields, it's perfectly safe!" Oh science, what are you like?
* Event Horizon cold very fast, just like a can of pressurized air for cleaning electronics does when you lower the pressure quickly.
* Event Horizon: Frontier the roles are reversed, as you are defending your own starbase.
* Event Horizon gets sucked into a Hell dimension along with the titular haunted spaceship as part of it is exploding.
* Event Horizon has Colossus, the capital ship of Zumbalari, disguised as a giant asteroid.
* Event Horizon has the Heavy Missile Launcher M2, which fires powerful long-range homing missiles that are almost impossible to dodge by slow ships. Normally it has a long cooldown, but becomes extremely effective when buffed and equipped on a ship with many missile slots, such as Megalodon.
* Event Horizon is the camera slowly exploring a space station, with such costly CGI that it reportedly took up a third of the film's budget.
* Event Horizon, Justin almost kills himself messily this way when the ship possesses him.
* Event Horizon. Miller doesn't buy the attempt to guilt-trip him for a minute though: "No. You're not Edward Corrick. I watched him die."
* Event Horizon, one of the characters, stranded outside the ship, uses the remaining air in his spacesuit as a rocket in order to get back to the air lock.
* Event Horizon rarely talks, and when he does, it's normally somewhat intimidating. There's a reason he's the one who's allowed to play with bone-saws.
* Event Horizon signs of life, but couldn't locate where any of them was from.
* Event Horizon). Somewhat justified since the direct translation of "event horizon" would've sounded completely bland and uninteresting to the target audience.
* Event Horizon: Storm of Magic, and they've introducing a lot of social and technological progress to these worlds as well.
* Event Horizon: Storm of Magic: Applies to the Company's colonies in relation to the lands they're located in. At one point, Fred boasts to the Small Council that

their little colony has a higher GDP and industrial output than the rest of the Seven Kingdoms combined.
* Event Horizon: Storm of Magic makes a killing (both figuratively and literally) selling weapons to medieval societies like Westeros and Middle-Earth.
* Event Horizon: Storm of Magic, the Lannisters definitely seem to take on characteristics of the Nazis as they modernize, complete with a "Lannister Salute", foot soldiers who dress up with spiked helmets, and Tywin Lannister openly discussing creating a "thousand year dynasty" and invading the Riverlands to obtain more "living space".
* Event Horizon's Warp that some tend to treat the movie as an unintentional prequel.
* Event Horizon was originally supposed to avert this trope as the creators wanted the entire movie to be done in zero gravity. However, doing so would have been too expensive and would have taken them over a decade, as stated in the making-of documentary, and the characters are only in zero gravity when they first enter the Event Horizon, before turning on the artificial gravity drive.
* Event Horizon. When the ship accelerates, any human not in a fluid-filled pod will be squished into fine red paste.
* Event Horizon. "Where we're going, we won't need eyes to see." Also a pretty badass line even with no context at all. And you can twist it to work for so many different scenarios.
* Event Horizon, who shows up bald, scarred-up and freaky for the final showdown in the gravity chamber.
* Event Horizon, with the door closing at the end... automatically, because no one's standing near it. Right?
* Even those collapse-of-civilization scenarios that harp upon mass famine, plague, and mayhem will seldom think to mention the grim prospects for people with chronic medical needs — cardiac patients, diabetics, transplant recipients — who'd be doomed to succumb to their ailments as their medication runs out.
* Even those plans are sometimes criticized by readers. The plan against Flash, for example, relies on him vibrating through a special bullet, instead of just, y'know, moving out of the way.
* Even those who know the source tale in and out can easily be confused by the film, unless they're aware of the dozens of different versions the story exists in, seeing as the movie borrows aspects from those as well.
* even though 2 of the other characters, Kratos and Zelos, can fly. The rest are only shards of the epilogue where Lloyd is tacked into someone else's ending, but in the previous dramatic cutscene only shows affection for Colette.
* Even though Al Bundy never wanted to have sex with his wife, sometimes Peg just wouldn't take no for an answer, and
* Even though almost all commercials, which he apparently loves, feature music.
* Even though Dylan sang "All Along the Watchtower" more often than any other song he wrote, plenty of people still think
* Even though English has long lost grammatical gender, generic pronouns such as
* Even though English has "queen", the word still suffers genericity, but in this case, for women, just like in other European languages. A "queen" can be either a female ruler (a "queen regnant") or a king's wife (a "queen consort"). On the other hand, a king is, without a doubt, a male ruler. A queen's husband would be called a "prince consort", such as Prince Philip, Queen Elizabeth II's husband.
* Even though few doubted who she'd wind up with, this is basically the plot of
* Even though friendlies are highlighted green and hostiles red, it's still easy in
* Even though Gensoukyou is cut off from the outside world, sometimes stuff from the outside world falls through holes in the barrier and some of the stuff includes scientific scriptures. This, it turns out, is like a plague in the setting. Yamabiko, the youkai race responsible for shouting your echo back at you, used to be common in Gensoukyou, but following a rumor that started to spread in the human village that echoes are actually just sound waves being reflected back at you from surfaces, the yamabiko are losing their purpose in life and essentially facing

extinction via
* Even though he died way back in 1973, Gram Parsons is the unquestionable patron saint of
* even though he doesn't need a guard, and the two slowly start coming together.
* Even though he finally gets the number one spot, he can't enjoy it because he knows he only got it by default due to All Might's retirement. He'll always be compared to All Might due to All Might's final battle, which will continue to inspire other heroes for decades to come. So no matter what he does now, he'll always feel that All Might has completely and utterly beat him. Worse still, for all the efforts he took to groom Shoto as his successor, there is a strong possibility that Shoto will eventually be surpassed by All Might's protege Izuku Midoriya. Shoto, Bakugo, and Izuku all apprentice at his agency, and he proves a good mentor to all three of them for different reasons.
* even though he himself has provoked them before). Does Q fear that the Borg will eventually become powerful enough to assimilate the Q Continuum, is he afraid of getting in trouble for causing the Borg to become angry and do damage to the other humanoids, or is it more the equivalent of saying, "Don't poke the neighbour's dog"?
* Even though he is heir to the throne, Prince Charles refused to take up his honorary Colonelcy of The Parachute regiment without passing first P company, the qualifying training to be a paratrooper. So the Warrior Prince heir to the throne is a
* even though he just told her he left Julie to be with her. She refuses to hear what the list was really about, and the episode ends with Ross and Rachel moping in their respective apartments. Yes, it's every bit as contrived as it sounds.
* Even though he's never tried to present himself as a tough man in his entire pro wrestling career,
* Even though he's no longer the world's strongest man, Master Roshi is still the most skilled martial artist in the world by far, to the point where even Goku still comes to him for fighting advice. The Tournament of Power arc showcases this nicely, as he beats several opponents far stronger than he is, and he displays insight that is so finely attuned that Beerus actually mistakes it for the god-like Ultra Instinct ability.
* Even though he's the leader of The Five, and actually knocks Mike on his ass in the cutscene where he's finally introduced, Dr. Victor Batrachian from
* Even though he was non-lethal, Roy Harper's attempts at vigilantism are repeatedly shot down early on, with Oliver even
* Even though he was only a one-shot character, the father of Jerry's
* even though he was the one that started each of their breakdowns due to their misanthropy.
* Even though he was working for several studios in California at the time,
* Even though his skin color is redder/less brown than Arthur himself (which, again, isn't saying much in this show), Allan/Brain is apparently black; one episode features a visit from his cousin from Africa, and in the Christmas special it's revealed that his family celebrates Kwanzaa.
* Even Though I'm a Former Noble and Single Mother openly refuses advancement past B-rank in the adventurer's guild because if she does advance, she'd be compelled, by law, to abandon her daughters and go off chasing whatever "emergency" the guild tells her to. The guild master has the gall to be shocked and confused at this, and yells at his secretary Yukina because the poor girl can't get Shirley to even consider it.
* Even Though I'm a Former Noble and Single Mother: Shirley is this to her daughters, as is the Demon King to his daughter. When they meet, they actually get into a fight over whose daughter(s) is the cutest.
* Even Though I'm a Former Noble and Single Mother wields two powerful swords, Igarima and Shul Shagana.
* Even though I may be little, I'm the answer to the Sphinx's riddle" - technically she's right as she is a human after all.
* even though impure sodium chloride doesn't have any genetic material.

* Even though interstellar travel is commonplace and it's known that there are colonies and settlements throughout the galaxy, the Earth is still treated as the whole world in
* Even though it involved two Communist countries with deep Buddhist heritages, it's worth mentioning that Vietnam sent about 150,000 troops in to invade Cambodia on Christmas Day 1978. It took the Vietnamese just two weeks to overthrow the Khmer Rouge government.
* Even though it is not necessarily a punch (at least most of the time), Team Rocket on the
* Even though it's a shonen series and thus we can expect liberties with everything, but the portrayal of
* even though it was Daenerys who saved her from execution. Mirri says that she had lost hope of living after seeing her fellow villagers die, and wanted to screw Drogo's loved ones as her last act of spite.
* Even though it wasn't a case of a truly major character, the death of Rousseau on is an example. Even though she was shot, her corpse was later found in a shallow grave,
* Even though it wasn't a stick figure comic to begin with, it's easy to see that
* Even though it was originally produced in English with the assistance of American animation, 2017 Chinese
* Even though Jonah wears nappies, he's so prone to these that Ben receives a plastic bag of soiled clothing at the end of every school day.
* Even though Jordan Belfort is a real person, there's no way you'll read
* Even though Ken Kirzinger was a stuntman when he played Jason Voorhees in
* Even though Lewis dies just barely off the edge of the screen, with the spire that tore through his torso and his torn clothes making it into the frame, and Arthur's arm is seen in Mystery's mouth directly after being torn off there is no blood seen in
* Even though Luka has feelings for Marinette and even confesses them to her, he is aware of her crush on Adrien and encourages her to talk to him, and he later tells her that he'll be happy for her if it works out for her.
* Even though Marius had planned to make Armand a vampire anyway, he didn't want to bring him over as early as he had to when Armand was about to die from a stab wound with a poisoned blade.
* Even though Momiji's father had promised to love him even more to compensate for his mother
* Even though most of the dialogue and cutscenes are the same with a male Shepard, Garrus and Femshep form a much more archetypal example. This is especially true in the
* Even though most of the staff consider Ullman an officious little prick, they admit that he's good at his job. Watson, the maintenance man, who HATES Ullman admits that Ullman is good at what he does and definitely earns his salary. Ullman is the first manager of the Overlook who's ever turned a profit for the place.
* Even though Naruto has no family and everyone around him hates him just for existing, he doesn't seem to have any angst at all, and further displays this trope in regards to being the jinchuriki of the Nine-Tailed Demon Fox, expressing little angst over the matter after he initially found out. Probably the most shocking instance is in an event where he is confronted with the villain that's the direct reason he grew up an orphan and had the fox sealed inside of him. Considering his reaction
* Even though Nights has happily tortured people in the past, Krauzer still takes this title in
* Even though nobody told Edna she's in a cartoon, she's aware that America voted for her and Ned to stay together.
* Even though Oasis herself came up with the idea, it's not at all clear she actually changes personalities between incarnations, as opposed to just as a reaction to different events and circumstances as part of her instability.
* Even though Sam does pretty much the exact same thing when Bartlet smacks down a conservative radio-show host. Awesome for Bartlet. For Sam... not so much.

* Even though she barely speaks to him throughout the movie (since her voice has been taken away), Ariel and Prince Eric from
* Even though she doesn't keep the formal rank long Jacky herself combines Plucky Middie with
* Even though she had every reason to be, since he didn't exactly work hard after she hired him.
* Even though she hates the idea of Romio and Juliet dating each other, Char from
* even though she knows absolutely nothing about designing clothes by acknowledging the hard work and talent demonstrated in creative projects.
* Even though she may not have made it obvious, Scourge (back then Tiny) believed his mother Quince liked Socks and Ruby more than him. Though it's hinted that she favors him over the others.
* even though she's not one of the best players; it's because she never goes under zero. Kirame doesn't reveal herself or get upset, though.
* Even though she's not stated outright to be this, Pinkie Pie works as a baker/candy maker and is pretty great at it.
* Even though she stays safe this time, her and Lelouch's roles are basically swapped because his
* Even though she's usually called a witch these days, Maleficent, of
* Even though she was probably joking, Kilo invokes this trope in the finale of
* Even though Shinji acts strangely and knows things he shouldn’t know, his guardian Misato doesn’t suspect that he’s a time-traveller.
* Even though some elements of this are present in the comic book, the
* Even though some of the Twelve Legendary Weapons are the best of their type, some, like the Excalibur, are outclassed by weapons like the Ragnarok. Then there's the Brave Blade and the Chicken Knife, whose power falls and rises respectively depending on how many times you fled battles. The Chicken Knife is the more popular option, though.
* Even though Stitch is canonically completely incapable of growing any taller or even aging, he has also been drawn with a humanoid body shape of either an athletic young adult or a bodybuilder, while still maintaining his overall alien genetic experiment looks (blue fur, claws, head, etc.). Some of
* Even though Talia Shire was perfectly willing to return as Adrian in
* Even though the Australian ratings board gave the final volume of the series (which includes the infamous too-hot-for-Japanese-TV "Going Too Far" episode) an M rating, Madman decided to bump this up to a MA15+ when they initially released it, perhaps to avoid parental complaints. When the series was rereleased in a complete collection set, Madman went back to the M rating.
* Even though the best way to kill Metroids at this point in the game is actually with charged-up Wave Beam shots and not even with missiles. The charged Wave Beam locks on and stuns the Metroid and keeps it from ever reaching you.
* Even though the boy comes into the family through adoption rather than marriage,
* Even though the characters are mostly mechanical cyborgs based on plastic toys, the first three
* Even though the focus of the story changes constantly and John is absent through most of the story (as the focus shifts to other characters or even his own companions), later events in the story have put him back in the spotlight, and characters will often refer to him as the de facto protagonist of the story even though he keeps getting put in the background of everyone else's plans and actions that drive the story.
* Even though the humans of Earth have access to tons of alien technology, modern-day weapons are still used for ground combat.
* Even though the Imperium as a whole is always at war, individual systems that don't border the territory of a hostile xenos race can often be at peace for decades or centuries at a time. However, since the leaders of said worlds spend the time between wars on political intrigue and enriching themselves rather than making sure their people will be ready for the next war, they invariably aren't, so each world individually slides slowly down the drain.
* Even though the manga began publication before the anime began airing, it was

made as a promotional tie-in for the anime series which was in production at the time, as with
* Even though the "murderer" in question is an animal and not a human, used frequently in
* Even though the NES's Japan-region counterpart, the Famicom, is known for being more durable and more developer-friendly than the NES, it does have one noticable design choice: the controllers are
* Even though the newer and heavier DeLorean would likely pancake Biff's convertible.
* Even though the pieces are lyricless, Gustav Holtz's "The Planets" seems to indicate that we are living in an entire Solar System of Ham.
* Even though the popular games explorer in Windows 8 was removed, it can still be accessed with the run command "%SystemRoot%\explorer.exe /E,::{ED228FDF-9EA8-4870-83b1-96b02CFE0D52}". Some programs for bringing back the start menu also use this. This still works in Windows 10 to a certain extent- the only issue is that the module to benchmark the performance of a machine has been removed from Windows 10 and thus the folder will permanently say that the performance of the machine has not yet been tested.
* Even though the reading of the will is not a legal requirement, some lawyers and executors will do it because it is expected, due to what people see on television and the movies.
* Even though there is little flow, there are ways to fake it, at least in the
* , even though the rest of the skeleton is buried. Fortunately for everyone, Titans are long extinct.
* Even though there were some innovative music videos before they came along, Russell Mulcahy and the directing team of Godley and Creme (former bandmates in 10cc) were the Trope Makers as far as creative, groundbreaking music videos go. Back when even Michael Jackson was just doing in-studio "performance" videos, Mulcahy was shooting filmic videos on location and Godley and Creme were using innovative visual effects and creating whole stories for their videos that put the focus away from straightforward performance videos.
* Even though the same thing happened in Spanish with the word "siniestra/o", there is an old idiom still somewhat in use:
* Even though the term was first coined in 1992, the term 'post-truth' has only recently (following the Brexit referendum and the election of
* Even though the terrorists' threats were widely diffused, the SWAT team safely defused their bomb.
* Even though the trope isn't played straight by any means, it's said in
* Even though the White House had just been destroyed by an alien death ray, the president laughs off Julius' belief in Roswell and Area 51, saying it's all a myth. As the President he probably assumed this is the kind of thing someone would have told him, only to find out he was left out to create
* Even though the writers had been so stupid about Maria's parents who had been written out and forgotten, that when Maria's husband Liam was murdered, and they turned up for his funeral, there was a heap of angsting about the fact that they'd never even met Liam, and Maria's mother was heaped with blame for the fact that she insisted she and her husband go on a cruise instead of attending Maria's wedding. (The current Coro writers don't like mothers.)
* Even though they are cubs and thus good the polar bears Muk and Luk spell this trope for their babysitter, "Uncle" Boris (who at one point says "I hate bears!"). Good thing that they apparently are stuck as cubs forever (if the time between the movie and sequels is of any indication).
* (even though they are), or that the staged fights aren't "realistic" enough. Hence, the custom of wrestlers slicing themselves on the sly for that good old "bloodbath" effect.
* Even though they are small and relatively obscure fandoms, a surprising amount of the
* Even though they both graduated at the top of their law school classes from prestigious schools, the first two women Supreme Court justices Sandra Day

O’Connor and Ruth Bader Ginsburg had trouble finding jobs post-graduation because they were both married. O’Connor took a job at a district attorney’s office and then later worked for the Army when her husband was drafted. She took a few years off while her kids were young before finding her way into various offices in Republican politics in the state of Arizona and then to the Supreme Court in 1981. Ginsburg ended up in academia where in her first job she was told she was being paid less because her husband had a good-paying job. In the 1970s, she ran the ACLU's women’s rights project while teaching full time. She was appointed to the federal bench in 1980 and then to the Supreme Court in 1993.
* Even though they broke off, Kaworu still blushed when he saw Saburo's naked body. Kaworu felt mortified about it because he wanted to put that relationship behind him.
* Even though they didn’t officially date in the series, Zoe loves Manny after he defeated her and would love to get his best friend Frida out of the way. She still torments him as Black Cuervo, probably because he gave her the boot so harshly after finding out she was manipulating him to hurt Frida.
* Even though they're all just randomizations of a couple of character models, the
* Even though they're both Evil, Nale can't stand his father, who he considers overly controlling. He spends his whole life trying to get out from under his wing and establish himself as a villain in his own right, doing things his own way. This leads to
* Even though they're brothers, Doug and Rob. They moved out of their parents' house and started living together, and proposed to their girlfriends on the same day.
* Even though they're cousins, and she's actually chronologically older than he is,
* Even though they're not romantic partners, Spike and Twilight Sparkle fit into this trope — Twilight's around twice his height.
* Even though they sell a wide variety of different gifts, collectibles, fandom merch, and novelties, for many, Spencer's will forever be known as "that store in the mall that sells sex toys".
* Even though they've been estranged for most of their lives, Sarek spends most of the film desperately trying to do right by Spock. Then, at the end, when the Vulcan priestess questions the logic of performing an all-but-forgotten procedure to reunite Spock's
* Even though they've only known each other for a couple of days, the oh-so-serious Erik Lehnsherr feels comfortable enough around the charming
* even though they were all actually guilty. Then, the club's butler murders all the members.
* Even though they were the intended pilots (for the most part), the
* Even though this is possibly the last trope in the world you'd expect to be
* Even though tired beyond measure by this ordeal, the galactic civilization
* even though Tsunade should have been right in her field of vision a legendary ninja; it's possible she can hide in plain sight.
* Even though Tywin has little patience for Joffrey's antics, he's shown suppressing a grin during Joffrey's "War of the Five Kings" reenactment-by-dwarf, which mocks his former rivals. Despite his aura of invincibility, he has never won a battle without overwhelming numerical superiority and once lost a battle to Edmure Tully, with greater numbers to boot.
* Even though using Dwight was a good strategy against the Saviors, Tara still wouldn't forgive him for killing her girlfriend. Because of that, she starts chasing him around the woods to kill him, resulting in
* even though US Marines don't wear berets. You may have noticed that urban and woodland patterns blend poorly with desert environments.
* even though we never get to see them behind the wheel, A5T3R-01D and Sir Robert Batrick also count.
* Even though WWE now features several prominent black wrestlers, traces of the hapless black hero of yore can still sometimes be seen, usually with
* Even throughout the 20th century, cavalry units were still used by major armies

all over the world. However, the final nail in the coffin for traditional horseback cavalry was no longer pikes nor rifle bayonets; the
* Even today fresh local meat, fish, and poultry is often less expensive than meat, fish, and poultry that's been tinned, salted, smoked, and/or cured so that it doesn't need refrigeration. High quality Smoked Salmon in vacuum sealed packaging which can be shipped by a post office without spoiling can cost over 40 times as much per pound as fresh beef and over 9 times as much per pound as fresh Salmon that's been flown halfway across a continent.
* Even today, it's very common to see kids starting to play the piano or stringed instruments at preschool age. This happens even if there are no expectations for stardom from the parents; it's just that since practically
* Even today, many doctors believe it is best to keep a woman from knowing if something is wrong with her unborn child — as stress
* Even today, mosquitoes cause more human deaths via spreading diseases than any other animal, even including other humans.
* Even today, the Japanese imperial family have no surname, a tradition that has been upheld since its creation. In Japan, calling emperors (and other royalty figures, but mostly the emperors) by their given name is considered disrespectful, so Naruhito (the current emperor) is simply called "His Imperial Majesty the Emperor"; his father Akihito, who abdicated in his son's favor in 2019, is
* Even today with modern rocketry, guidance, computers, and radar successfully intercepting an incoming ballistic missile with one of your own is an incredibly difficult and still not completely reliable task. For the early to mid-Cold War anti-ballistic missile designers tasked with protecting their cities from the enemy it was practically impossible to get their anti-missile missiles to hit incoming ICBMs with enough accuracy to stop them. So what did they do? Give up on the concept of a direct hit and arm their missiles with proximity fuses and
* Even to giants. Walls and various other constructions of the same type are cannot be destroyed by anything other than your own dwarves. Gets even sillier when you realise that fortifications (usually found on top of said walls) work as these too while allowing dorfs to fire things from behind them (if the fortifications are sufficiently submerged in water or lava, swimming creatures can pass them). Flying creatures can still bypass them.
* even to the point of being able to ignore many of the restrictions placed on other mages. Without her magic Vivienne would most likely have followed in her parents' footsteps as an impoverished merchant.
* Even to the Wulfenbach Jagers "uniform" seems to be wishful thinking. The Jagergenerals working for Klaus (perhaps "with Klaus" is a better way of putting it) have significantly divergent styles, with the only real uniformity being that they all seem to have a lot of red and gold in their costumes. The Jagers
* even trying to stab them transmits their Brown Note to you. As Lucan wrote, "What though the Moor the Basilisk hath slain, and pinned him lifeless to the sandy plain, up through the spear the subtle venom flies; the hand imbibes it, and the victor dies."
* Events back on Earth when Hanners, Marten and Marigold were in space.
* Events before 1999 are omitted since the only two sources on the Tirolian calendar give wildly different year lengths (~91 Earth days and 2066 Earth days).
* Events concerning the WAYWARD VAGABOND and other future scavengers are preceded with "YEARS IN THE FUTURE, BUT NOT MANY..." or some variation, like "Years in the future, but really not enough to write home about." They also match up with "present" events thanks to
* Events from subsequent sagas are added based on the official Harmony Gold timeline.
* Events from the Macross Saga are omitted where they duplicate events from the original
* Events in the real world conspired to produce a sort of unintentional Unreveal in the premiere episode of
* Events in Walter White's early life that may have triggered his Start of Darkness; his friendship-turned-subtle rivalry with Elliot Schwartz and former

romance with Gretchen, his initial involvement with Gray Matter Technologies and maybe how he met Skylar.
* Events like this happened so often in England when dueling was still legal that, until 1996 when it was finally abolished, one particularly interesting law was on the books, dubbed the '
* Events such as the 1991 Gulf War, the attacks of September 11th, 2001, the transit bombings in London, England on July 7th, 2005, the Sandy Hook shooting, the Paris attacks of November 13th 2015, or
* Events where players are expected to kill each other, whether they're purely PvP (Arigora Colosseum, Nation Wars, Territory Wars, Theater of Blood) or also feature PVE activity (Territory Resource Wars, Mayhem in Morai) suspend the "random PK" PvP rules that turn player-killers' names red and cause slain players to lose EXP, drop items, or have their gear shattered (or consume Guardian Scrolls in lieu of the above).
* " event, the Chthonic Snakes that the player encounters while exploring crumple to dust if the player binds their essence to the Ankh. Interestingly, they do not turn to dust if the player fights and defeats them in battle.
* eventual decline are chronicled in a bunch of audio-logs that are played on some of the levels.
* Eventual end result of the Soviets developing the atomic bomb first and dropping it on Berlin in the back story of
* eventual Face–Heel Turn. She was visibly snarling in the flashback sequence of her dueling Revan.
* Eventually, aberrations (the official term in-comic) become referred to as "vampires" frequently, even though none are as obviously vampiric as the one mentioned above. Instead, we get
* Eventually, a character finds a way to upgrade it, using a complicated lightning spell absorbed within his own body to move perform instant movement at about 150 kmps. However, it has the same weakness as the lesser version.
* eventually achieves his revenge by killing his mother. However she was only a vessel for a thousand years old witch and she continues to live on even after the end of the series
* eventually adds the "Hero", he does the most good in the first two books with cunning; his battle with Reacher Gilt features neither of them drawing a weapon, Moist isn't even in the room when it's won, and the whole thing is built on Moist's familiarity with swindling and con tricks.
* Eventually allows Morgana and the Protagonist to deduce Goro Akechi is the traitor.
* Eventually a recurring image of an eyeball X'ed out shows up. It refers to
* Eventually, Asbel adopts Sophie into his family — not as his sister, but as his daughter.
* Eventually averted. After Jessie, James, and Meowth wind up taking credit for the takedown of Team Galactic, Giovanni assigns them to be the Rocket Admins of Unova, at which point the massive confidence boost makes them incredibly effective at their job.
* Eventually, Baltar is put on trial for the Cylons' disastrous occupation of New Caprica. It really was his fault, but not for the reason they think. The witnesses have to resort to perjury to make the case against him, as none of the prosecutors know what he's actually guilty of, and he's ultimately acquitted.
* eventually becomes Seeing as she also is constantly in contact with the player, she feels just like this trope.
* eventually becomes the main conflict it was fought over and use it to reshape the universe to his liking.
* eventually be played by the same actress who played SORAS-ed Belle (Kirsten Storms).
* eventually, but by then, of course, Constantinople had long-since been raided by marauding crusaders and taken over by the Ottomans, under whom it continued to be rather well-kept relative to Europe until the 'Great Divergence'.
* Eventually Cas goes rogue from Heaven and begins to slowly Fall into a human,

firmly joining the Winchester group of
* Eventually ends with Xena sorting out all of the local problems—with the use of her trusty chakram—just in the nick of time, having spent several loops calculating the exact way to do so. The loop-breaker event that she had to intervene in happened just moments after she wakes up each time, so the final loop has her bolting awake and immediately letting fly with her chakram.
* eventually end up stealing from a member of the Order, and unwittingly giving a horcrux over to Dolores Umbridge.
* Eventually, even some demigods are able to come back from the dead without even realizing that they are. Freeing Thanatos puts a stop to that.
* Eventually, Flycatcher regained his memories, and was seen afterwards having something of a breakdown and lashing out at Santa Claus, who restored them.
* eventually gets them to something they wanted to see, but only after hours of wandering uselessly through the woods.
* Eventually, Goliath decides to hurl the Gate into the timestream by itself, effectively removing it from reality, as he's clearly sick of people who
* Eventually, he departs from NCIS himself after Ziva supposedly dies in the Season 13 finale to take care of their daughter, Tali.
* Eventually, he does block an attack, and ends up losing the fight because it bent his sword and ruined his technique.
* Eventually he had to write an entire science article both to sort this out
* Eventually, he has surgery to correct it, which involves hypnotic therapy, a computer chip, and a large drill.
* Eventually, Heine manages to convince Leonhard that he'll actually help him study and not hurt him, and Leonhard learns basic mathematics by being taught to visualise his favourite cake (for example, you have one slice. If you put another slice on your plate, how many do you have? Two slices). In a later chapter of the manga, Leonhard runs into one of his former tutors and
* Eventually he installed a device that automatically crushes his fridge and replaces it with an empty one every week.
* Eventually Hellbores were made part of a Bolo's secondary weapons to the point where a Bolo could have over a dozen Hellbores, granted the secondary Hellbores were smaller in size.
* Eventually, he's revealed to be extremely good under life-threatening pressure when he's the only one to keep his head enough to make everyone take advantage of Aizen and Gin confronting each other and flee before Aizen can turn on them. He was also able to put together something he'd seen hundreds of chapters ago which made him realise that a shinigami's weapon was the only thing that stood a chance against a being like Aizen, and he was prepared to use the weapon in a Heroic Sacrifice
* Eventually, he takes his records of the constant rain wherever he goes to some scientists who confirm it, but are baffled as to the cause. The man is able to retire on the income he receives
* Eventually he yells that he is his own person, not a cog in his schemes
* Eventually, however, the arguments and legal disputes were settled, masters were found, and Warner Brothers, which owns the copyright on the series, finally put the DVD boxset of the series out, first as a limited release through Time-Life Video in late 2007, and then under its own imprint the following year. It all ended happily; the boxset was received with delight by fans and, for the most part, highly positive reviews by critics.
* Eventually, in the 1980s, the development of Canary Wharf as a financial center, led to new proposals being floated for extending the Jubilee Line, including what was ultimately built: redirect the line to go from Green Park to Westminster, then following the route of the Waterloo and Greenwich Railway, continuing to Stratford via Canning Town alongside the North London Line. Even so, the approved route underwent some changes. A station was originally planned at Blackwall, but this was replaced by diverting the line between Canary Wharf and Stratford underneath the Thames to serve the Greenwich peninsula at North Greenwich station. Plans for the Millennium Dome did not yet exist, and this diversion was made to provide for a

planned housing development on the site of disused gasworks.
* Eventually inverted in both men's cases. Couture moved back to Light Heavyweight after losing Heavyweight title to
* Eventually it comes south for both as Misato has to start making hard choices that could mean putting her job above her personal feelings and Naoko has an emotional breakdown when she finds out Gendo doesn't really love her.
* Eventually, it's revealed that Patricia didn't actually die in the Tragedy, and in fact was one of the instigators of it. However, given what happened to her brother
* Eventually it was revealed that the reason for the hiatus was because Rei was working on
* Eventually Jaune (and the audience) learn that the people who trashed his cafe and beat him in
* eventually Laurence himself after his promotion to admiral in the final book and generally impresses everyone she meets. Technically, Temeraire himself also counts in book 5.
* eventually located, one in September 2014, the other two years later.
* Eventually made into a full blown game, with the exposition delivered as an aside facing the audience
* eventually made it back and saved them after 50 years in the future.
* Eventually parodied in a commercial when he was trying out nicknames for players — for Drew Bledsoe he tried "Drew bled so much he needed an infusion." Intended as a joke, it became
* Eventually played straight when the remaining nuclear reactors break down and produce the Primfaya death wave, turning nearly the entire surface into a desolate wasteland. The few survivors try to resettle in a valley that miraculously escaped serious harm, only to come into conflict with a returning group of criminal miners (in cryosleep since before the first apocalypse), and that haven ends up destroyed as well. They have no choice but to abandon Earth completely, taking the miners’ ship and going to a habitable planet in another system.
* eventually reaches the campground in the end, to everyone's astonishment.
* eventually realises what a terrible person she is when she decides to let Daenerys and Jon be slaughtered by the White Walkers after promising to help.
* Eventually revealed that the flat image of a person is just what it looks like when you're being
* eventually reveals that he is a war criminal out to kill other war criminals. So there's a good argument that he starts the game as a major bad guy, and indeed committed even more horrible acts before the game started than you can ever do in it.
* Eventually, Scourge was confirmed as having died somewhere during the
* Eventually, she chooses Masaomi over Izaya and the two leave town together.
* Eventually, she decides that she wants to stay in the Navy and is allowed to, taking the Navy punishment for her recent crime.
* Eventually, she fully abandoned this trope and embraced her growing "bad girl" image. While her 2010 album
* Eventually she was locked up and isolated. But even then, she refused conversion,
* Eventually "slag" morphed into "scrap" and occasionally "scrud" as the go-to Cybertronian curse words in more modern series such as
* Eventually, Sony began allowing slow spells to work on many bosses, but with limited effect. Casters would receive messages such as
* Eventually subverted as Vaarsuvius kills him anyway, just to avoid another side-plot.
* Eventually subverted. They become decidedly more openly relaxed with each other during the American half of the tournament, regularly spending time together, saving each other and even hints of affection when no one but Amidamaru was around (who of course respectfully looked away, blushing). Yoh seems less frightened of Anna, implying that she was particularly strict before to prepare him for the tournament, which is probably a huge reason for his survival.

* Eventually subverted when he begins attempting to pick off board members who stand up to him; the rest of the board finally says, effectively, "Screw your money, we're going home."
* Eventually subverted when Justine figures out she can have casual sex with other people
* Eventually Subverted with "Gagagigo The Risen" who's Gogiga Gagagigo after being redeemed.
* Eventually, Supergirl loses patience with Mary fawning all over Superman, so she decides to give her a taste of her own medicine by giving Mary's brother
* Eventually Tedd even gains the unique ability to alter his "base" form, and thus can decide to stay permanently as either gender.
* Eventually thanks to an Equestria were the natives are sapient robots that
* Eventually, the ENTIRE SHOW was pulled from air in the Middle East, North Africa, and Kenya.
* Eventually the French and the English made alliances against common foes despite not liking each other. The French monarchy became anglophiles and the latter monarchists at the onset of
* Eventually, the frogs burst from their mother's back. (WARNING: Not for the faint of heart.) Despite this, her body is evolved to allow this, and she's completely unharmed.
* Eventually, The Geezer does come up with a use for Old Faceful: He opens a car wash.
* Eventually, the landlord evicts the Kramdens from the premises, but
* Eventually, the locust take over Azura, likely kill most of the elitists there, and turn it into a science lab for captured human scientists. By the time COG arrives, only one doomed scientist is still alive. It's unknown if Azura is still structurally intact enough at the end of the game to become a cozy island base for the COG.
* Eventually, the medium reaches its developmental limit, forming its "climax community" (pun not intended, seriously). This is the point at which the new medium and its associated community will no longer develop because said medium's boundaries have been pushed as far as possible. As such, it can no longer support any more organisms than it already has (radio is at this stage).
* Eventually, the other characters get fed-up with the constant explosions and send him to rehab (apparently, there are a lot of people suffering from similar conditions, go figure)... the problem was that an
* Eventually, the perp drops the weapon and then comes out with his hands up.
* Eventually, the powers that be begin to realize both how good he is,
* Eventually, the seemingly random sentences (pulled from the aforementioned girlfriend’s post history) coalesce into something far more terrifying:
* Eventually, the significant other will be released, either by completion of mission or
* ...eventually. The strip ran for quite a while looking like leadership of the Toughs was going be by Kevyn, with a degree of awkward mentoring from Tagon's father. Technically, the time travel was mostly required to avert the death of
* Eventually, the team (those that decided to reform and be actual heroes) came under the leadership of
* Eventually, the tech leap that Equestria Prime makes results in a race of aliens called the Celestial Ponies making an organized
* Eventually, things move into the 2000's, so the fake ads include a
* Eventually, Timmain (who was one of the original aliens who landed 10,000 years ago, and was already old back then, and is the direct ancestor of the entire wolfrider tribe) ends up together with
* Eventually, Tony came out as Iron Man as part of a wave of secret identity refutations (Steve Rogers, a.k.a. Captain America, did the same thing around the same time).
* Eventually, when Norman Lovett, who played Holly, left, they just hired Hattie Hayridge, who played his Gender Flip Hilly and said that Holly got a sex change to look like Hilly.

* Eventually Zoe came to the realization that not only was Torg in love with her, but she also loved him back! Which directly resulted in Oasis using pyrokinetic powers and almost killing her. She spent some time on life support. She was completely restored, except for the memory of the day in which she realized that she and Torg were in love and ended up getting incinerated by Oasis.
* Even Two-Face has his moments. When saved from The Judge by Batman who ends up pinned under rubble from the act, rather than take the opportunity to kill or unmask the Dark Knight, Two-Face instead just gives him a swift kick to the face to stun him and runs.
* Even Ty Lee's chi blocking is based off of the idea that acupuncture can block chi, and that bending uses chi as well.
* Even un-Exalted mortals can learn to wield spiritual power through meditation and training, and learn incredible supernatural martial arts and thaumaturgy.
* Even United States Senators aren't immune to this trope. Patrick Leahy (D-VT) is a lifelong Batman fan, and has cameoed in
* Even units that can keep their own formation may invoke this trope on the rest of the army. All you need to know is the unit attribute is called "
* even updated the phone to drastically lower the performance, even stopping charging above 15%! On the other hand, Samsung's full-disclosure approach to the problem contrasted with multiple other companies' "deny everything" scandals at the time, allowing the Samsung Galaxy brand to survive the Note 7's failure.
* Even using her powers to go after them in the ocean, along with her family/crew following right behind her.
* even using his last moments in life to help save Cleveland from a Covenant attack.
* Even video games as a medium weren't immune to politics, as many video games such as
* Even villain Nrvnqsr Chaos gets a super-deformed cat version of himself, Neco-Arc Chaos, in the later
* Even viruses get this treatment. The illness that is sometimes known as "the stomach flu" or "the 24-hour flu" is not even remotely the same virus as the one you get immunized against every year. The stomach flu, or gastroenteritis, affects the stomach and digestive tract. The flu, or influenza, is an upper respiratory infection.
* Even Walky's actual sister Sal acknowledges this, telling Billie she's the "daughter [our parents] like" and smiling when Walky tells her he wants to be a good brother — to
* Even warships are depicted as fully sentient and no one really questions it. The only real confusion comes in the form of Avatars, sentient androids who have more or less the same AI as the ship but usually see things differently. On more than one occasion, the titular ship has had an argument with herself. Even Avatars are respected as sentient beings, though; one even becomes captain of another ship.
* even weirder-looking him to get in trouble (must be getting a head start on the "moody ungrateful teenager" phase). Then it cuts to the family of weirdos sitting at Steak & Shake, and this tagline comes up: "Broken Penguin + 4 Meals Under $4 = What Broken Penguin?".
* Even weirder; the two mecha were never parts of each other before they were forcibly combined. There's only scant circumstantial evidence that the Lagann could be a modular attachment to a larger machine, but the attempt to merge it with a cobbled together Gurren caused obvious structural damage that pierced the cockpit, and narrowly avoided opening Kamina's skull to the sky.
* Even when all lights have gone out in the Degenerate Era, it is expected that stellar collisions or even accretion by dead stars of the very little remaining interstellar gas will produce from new ones
* Even when benevolent deities like the Salish or the Asgard appear, it's made clear that they, too, are aliens rather than gods, and SG-1 will often either encourage them to tell their followers the truth, or explain it to their followers themselves.
* Even when downsized to a puppy, the inugami Byakuei from still manages to fit a

huge double-bladed sword in his tail. His real size is a lot bigger, though.
* Even when EDI does make jokes, she tends to be bad at conveying sarcasm, and often has to clarify "That is a joke." when people take her seriously.
* Even when Haru becomes superior, it is due to his very magical sword that was created by the most powerful magic in the series. Technically, still an inversion as a fighter with magical weapons are still fighters.
* Even when he arranges to assassinate Emperor Cartagia, he's doing it chiefly to protect the Centauri people from a bonafide lunatic
* Even when he finds out he's a ghost (of a sort) and will fade away once Sin is defeated, he faces his end with a jubilant attitude.
* Even when he is acting goofy, there is some level of this. His goofy demeanor and tendency to show-off means a lot of criminals, especially those who pride themselves on their cleverness, underestimate him only to get hoodwinked and caught.
* Even when he is finally "defeated", it's less because anyone harmed him and more because his purpose was complete, so he committed suicide.
* Even when he is out for money, he only really wants it to fund his sadistic plans. One of the first things he does in Brian Azzarello's
* Even when he lived in London, most of Handel's operas were composed for Italian libretti, and it could be said Handel stunted the development of English opera with the popularity of his Italian works. When London's taste for Italian opera waned, he switched to composing oratorios in English rather than opera.
* even when he refuses later to stay friends, she can't understand the pain she'd cause him. Not until her own crush suggests a purely platonic relationship.
* Even when he's old enough to go to college, Max has his young teenage voice from
* even when insulting people) while she's a country girl who's in love with life, freedom, and fun. Their different social classes cause difficulties; he fumbles his attempts to compliment her and she has a habit of misinterpreting his respect for her honour as evidence he thinks she'd never be good enough for him under normal circumstances.
* Even when Jade gets hit with a Fon Slot Seal, he doesn't lose any of his awesomeness. In fact, it's by traveling with the party that he can learn the
* even when other Jewish leaders were begging her to convert, but she was beheaded as an apostate. The Muslims themselves were also hesitant to kill her and gave her several chances too - the governor allegedly instructed the executor to strike her lightly first in hopes that seeing her own blood would frighten her into accepting conversion. She earned the nickname "The Righteous Sol".
* Even when saving the Earth has shown himself to be very ruthless and brutal in his methods, though he subverts the trope in that he actually has some altruistic qualities.
* Even when Seven is still fully Borg she has noticeable ...implants. Apparently
* Even when someone attempts to use it fairly, the case tends to find some other way to screw them over, usually by having someone interfere and get the match thrown out.
* even when Spike's hand bursts into flame, during his Heroic Sacrifice.
* Even when Stryker's men invade the school, Wolverine stabs about 10 dudes full in the chest with both blades, yet somehow spills
* Even when the Auxilary-Animorphs are created, gender does not matter in the selection of the original Animorphs.
* Even when the brain is whole, people are capable of awesome hand waves. When confronted with moral decisions, people make them almost instantly (unless they're really tough, like whether it's okay to sacrifice four people to save five others). Essentially, three things happen when we make a moral decision. One portion of the brain feels empathy for those involved (oh, wook at da baaybeees). Another portion of the brain seeks a much more utilitarian solution (kill the spares, collect all the food, live as a king). Depending on how strongly these two fire, we reach a decision, usually some kind of balance between the two. Then the final act happens: our prefrontal cortex (the part of the frontal lobe responsible for, among other things, logical thought) justifies the decision we've reached. In other words, all

those books you had to read in philosophy 101 about morality and the justification for various ethics? So much handwaving for decisions stuffy German men had already made. But very, very sophisticated handwaving.
* Even when the Classic show was set on Earth, it has would generally call upon the
* Even when the horses are well, the series also goes out of its way to depict horses as living creatures with wills of their own and distinct personalities; they don't always do exactly what the rider wants them to do all the time, and riders also have to adjust their approach for each horse based on that horse's characteristics rather than expecting them all to respond identically to the same techniques.
* even when the last group warns them that a refusal to start negotiations would mean facing the full power of a properly prepared Imperial Fleet, as the Empire still had to properly transition to war economy and, after the failure of the expedition, doesn't have the means to launch another before the Alliance recovers;
* Even when the Pak flee their homeworld ahead of the core explosion, the Pak fleet is in a constant state of war with itself, which often spills over on planetary systems on their path, which the Pak fight to plunder for supplies.
* Even when the signs are language-independent, many symbols are unique to particular countries or groups of countries. In Poland for example the symbol for the toilets are triangles and circles for men and women respectively, rather than the representative figures ubiquitous in Western Europe. Can be very confusing if you're not expecting it, assuming you can even find the toilets in the first place.
* Even when the team exploits this ability, by arranging a sting wherein he dines with a hitwoman, he manages to go above and beyond. Said hitwoman has planned for this contingency and has a bomb planted under the restaurant, guaranteeing her safe escape. Reid convinces her to stay in place and continue chatting while his team sniffs out her accomplice, and after she's lost her leverage again convinces her to peacefully turn herself in.
* Even when the worst foul-ups happen, the human characters don't swear, either. An example from "The Cakes," when Penny's mom discovers the three pets have ruined her cakes in a food fight:
* Even when they try to let Eddy get away, he will ultimately blow his chances. In "Truth or Ed", he publishes a bunch of tabloid lies about the kids under the name of "Bobby Blabby". Just as Eddy could sneak out with the money he has earned, Ed mispronounces Bobby Blabby. So Eddy blurts out the correct term and, yes,
* Even when they were promoting the first half of Series 7, they basically described the whole thing as five individual movies. In order, you had an action-adventure (
* Even when this was the "primary" form of air-to-air combat, the most successful aces were often those who did what they could to avoid becoming embroiled in dogfights. One method preferred by many aces (one being the infamous Red Baron himself) was to dive on the enemy from above, attack, and then use the speed built-up in the dive to get away before setting up to do it again. To become embroiled in a turn-fight meant giving up this speed and all of the advantages that came with it. Another example comes from the Pacific Theater of
* even when Wright becomes his lawyer in 1-4 and believes in his innocence the whole time.
* Even when you don't need to destroy the entire planet, the various factions aren't above shelling the battlefield from orbit.
* Even when you take helping elves out of the equation, those who've read
* Even when Zuko manages to embrace this fact, Azula gleefully embraces it.
* Even where their usual duties were complicated by a city-wide blackout in New York. No sooner had the issue come out, New York City suffered a massive blackout.
* even while they are in government. You see, Bavaria has a strong current of people who don't think too highly of the "Prussians" in the rest of Germany and many of them vote CSU...
* Even Winchester gets into it (if not intentionally so) during the heat-wave episode, when he is staying up all night reviewing the Winchester family finances,

because the family's accountant has been arrested for, among other things, "countless counts concerning accounts for which he cannot...account".
* Even with all of these, though, there are a couple of instances that play it straight; at the conclusion of Season 3's "Wrestling With Demons", a human recruited to be a demon and one step away from the point of no return manages to turn away from evil when the Charmed Ones remind of his love for his mother.
* Even with all the supernatural events she's personally exposed to, Madoka Hiroo from
* Even with a split, it is possible that the official timeline showcases the route the story has evolved rather than actual chronology.
* Even with Chloe spelling out her issues with both of them directly during her big blow-up, both Goh and her father still struggle with understanding what's eating her. Goh naively believes that they just need to find her to fix everything, while her father gradually backslides as he finds other things to blame her running away on.
* Even with Heaven's light and the Virgin Mary's intercession empowering him, Dante can't keep even a flawed memory of what God is like in his head, losing more memory of that event than memory had been lost of events from two thousand years before.
* Even with her mother's training, Amaya is not fully prepared for combat on Gemworld. In her first swordfight, she is horrified when she kills the attacking swordsman and couldn't think straight in the heat of battle.
* Even within the show, werewolves were different. One episode of the series featured another werewolf who transformed by way of a "Werewolf Secret Formula", and who was nothing like the
* Even within the US it varies wildly. In the conservative South "hell" and "damn" are quite serious swearing, and even "heck" and "darn" are pushing it; in the West Coast and Northeast, they're so mild people forget they're curses at all. "Fuck" and its infinite variants have the same issue, being either an extremely taboo term or a meaningless emotional intensifier depending on who's speaking.
* (even with it, he can't see the color red on a white background), then prosecute the subsequent murder case and, well... generally be Godot.
* Even without being able to access them directly, all of humanity possesses a sub-conscious version of this. It was Leto II's goal to teach humanity "a lesson their bones would remember", essentially that the need to expand and seek frontiers would be built in through latent genetic memory.
* Even without declared rivalries, your situation with other empires is likely to devolve into this. Typically, the galaxy will become split into two or three major ideologically guided coalitions that are constantly declaring war on each other or subverting each other, but not enough to radically change the status quo.
* Even without magic, if a spirit willingly enters a container like a bottle and is trapped inside, the person who trapped them will have power over them. When someone tries to fool him into doing it though, he notes that this is an ancient trick and only an incredibly stupid spirit would fall for it these days.
* Even without mods, a direct shotgun headshot on someone without a helmet qualifies. Plenty of salsa for the next party (quite
* Even without supernatural curses or compulsions, each of the four virtues has drawbacks if you have three or more dots (and exalts have to have at least one virtue of 3+): compassionate characters have trouble making harsh decisions; temperate characters have trouble lying, cheating or going back on their word, no matter how dishonest the antagonist; valorous characters don't know how to back down from confrontation; and as for conviction,
* Even without that clause he's still asking a lot. Since he was born on
* Even without the obligatory "curse" backstory, "The Hands Resist Him" (above) is pretty damn creepy.
* Even without the Time War and the Siege of Trenzalore, the Doctor has watched a lot of people die over the centuries, and has felt personally responsible for many of them.
* Even with pop music acts this can be the case. Most people are only familiar

with the pop music they grew up with during their childhood, teenage years, and perhaps college period. As they grow older and don't quite listen to much hit parade music anymore they may be aware of the newer pop stars, but more because of their coverage in the popular press. At this moment, for instance, people can be aware of
* Even with proper annotation you'll be hard pressed to identify most of the references to Victorian literature in
* Even with steps taken to hide the doubles' faces, the switches are still sometimes obvious.
* Even with that aside she was needlessly violent when taking down perps, abusive of her fellow Wards, and generally rebellious.
* Even with the Empire's military might, they were still unable to stamp out the seemingly thousands of crime syndicates that flourished in the galaxy; some space was even ruled by crime lords! And let's not forget how the Empire was unable to exterminate the Rebels or crack down on Rebel Sympathizers. After all, it is very difficult to track down offenders in the vast void of space.
* Even with the explanation in place, what's stopping Batman from just killing him? Locking him in an air-tight chamber, lethal injection, explosions, there are plenty of methods that could allow The Joker to be killed while negating the danger of a toxin. Even just
* Even with the loss, defeating the Undertaker at 'Mania was still considered to be a big deal. 'Taker continued to win two more times at the showcase of the immortals until Wrestlemania XXXIII when he lost to
* Even with the presence of hyperspace, it still takes a long time to get anywhere in the
* even with the self-destructive strategy of animating one's ice- or players can focus on protecting their pillars from enemy spells.
* Even with the shields, the target ship still gets pushed by the impact. This can either cause the ship to collide with another object (such as a planet) or be pushed in such a way that the shield no longer protects it (deflectors only protect from frontal assaults).
* Even with this, it is stated will take many years for the hexed city to recover—which has had to be evacuated of residents.
* even women who are evil have some measure of sex appeal, which men don't need at all.
* Even words formed in English from foreign roots (Greek, Latin, and French especially) can run afoul of this, due to both the linguistic phenomenon of false cognates (cross-lingual words that look like they're related but aren't) and the presence in English of many doublets (words formed from roots that have been borrowed more than once, independently, in entirely separate contexts). Thus, to take Greek as an example, "herpetophobia" is the fear of snakes, not the fear of getting herpes. "Rhinoplasty" refers to getting plastic surgery done on one's nose, and is only related to the large african mammal by the fact that Rhinoceros is derived from its Greek name
ρινόκερως,
* Even words such as "shit" aren't censored in any media anywhere (the German equivalent of "shitty" is even less offensive; for instance, it made
* Even worse, a "hyperlimit" is not a strictly-defined sphere as it is in most such examples. It can easily be farther in one area than in another. It's usually a good idea to translate into n-space a fair distance from the "hyperlimit", if your charts don't have the "hyperlimit" of this system mapped.
* Even worse, as the years go by, pro wrestling's role as fun escapist entertainment has been near-fatally undermined by what wrestlers call "the sickness" — the scores of performer deaths due to abuse of performance-enhancing and recreational drugs, with
* Even worse, Dalmatians are notorious for having hearing problems—up to
* Even worse during the early days of the Internet, where only the privileged (usually offices and upperclasses) ones could make use of it, one strategy book consists of

* Even Worse, each album has a "polka medley", which consists of many popular songs performed to a polka tune.
* Even worse for people with Cursed: "Any time the GM feels like hosing you, he can, and you have no complaint coming, because you are Cursed." One thread in the SJGames forums reveal that the disadvantage frightened players so much that it was
* Even worse however, is that Yukari doesn't just limit herself to people she finds amusing. But she also spirits away people that are easily missed or suicidal. More or less with the express purpose of having them become Youkai food.
* Even worse is a secret organisation called The Dawn, from a short-lived mid-
* Even worse is his delivery of the line, "Maybe, I don't know...", in
* Even worse is near the end of the final book when Roland has to pluck one of the magical roses of the Dark Tower's field, whose thorns are extremely sharp. By the time Roland gets one in his mangled right hand, the palm has been deeply cut and one finger is still attached by only a single tendon.
* Even worse is omnigel. Everything is made of omnigel, and you can smear this 'gel' on everything to open it up.
* Even worse is the fact that the doll's owner's wife (who hated the thing...like
* Even worse is the Goa'uld Sokar. He basically takes the personage of the devil and even goes so far as to turn an entire planet into a literal hell just to invoke this trope, complete with people screaming in agony and gleefully listening to it.
* Even worse is the mysterious "Golden Freddy", a discolored Freddy suit that sometimes shows up, which outright
* Even worse, it can leave such a bad impression that the Eight Deadly Words can carry directly over to its sequels. Case in point,
* Even worse, it's necessary that the card specify "the game" and the rules clarify what the term means, as (while this should never happen in a tournament setting) there are ways in which you can be forced into playing additional games against the same opponents and there are ways in which a card played by somebody who
* even worse monkey to the camera. So the picture in the yearbook isn't even Kim-as-a-monkey.
* Even worse, most characters (but especially Ranma) have a tendency to munch and swallow anything put in their mouth, even against their will, rather than spit it out. Ranma has been neutralized once by tea mixed with a paralytic that Sentarō just threw toward her mouth. Another time, she's fed a drugged rice cake by Kunō — and the worst part is that it was
* Even worse near the start, where every game or toy was turned into a game that resulted in someone breaking psychologically. One wasn't Yami's fault, even; in "The Evil Dragon Cards", wannabe Imori tries to use the Soul Jar and the Dragon Card game to get ahold of the Millennium Puzzle; the dragons of the deck slowly consume the soul that gets trapped in the jar after losing the game. Yugi loses the first game, and Yami takes over.
* Even worse, someone posted a remix of "U.N. Owen Was Her?" as John Stump's "Death Waltz", causing much confusion between both songs
* even worse tanks was soon lost, and the astronauts inside would have died in a few hours if they hadn't been carrying a healthy lunar module with its own oxygen supply.
* Even worse than Athas is the hellish realm of Maladomini in standard
* Even worse than that is when they claim that somebody who actually did retire is supposedly coming back.
* Even worse, the brag of "patent pending," meaning the meaningless process isn't even
* Even worse, the finger was twitching due to a trick involving magnets. He wasn't actually able to move himself at all at the time, making it even safer, and Dio's reaction is what allowed Jotaro to realize he could move during the frozen time.
* even worse the Outer Gods, that is. They don't even originate from Nasuverse's reality: Nyarlathotep compares the presence of the Outer Gods in the Nasuverse is similar to a "vacation".
* Even worse, the same thing happened to teenage super-heroine Stratogale. At

least she went in head first.
* Even worse was the 'Separate Ways' bonus chapters present in the PS2 and subsequent versions of the game, in which you get to play as Ada Wong. The girl with the Zelda-style hookshot that can attach to anything, even hundreds of yards away. Since the device was entirely governed by action commands, the game just dictated when you could zip over obstacles, and when you had to run off on a 16-room detour.
* Even worse when it comes to his abilities. The intro shows Shadow driving his motorcycle into a large alien and leaping off at the last second leaving it to crash and cause a huge explosion to defeat it. In game the jump button becomes break on a vehicle so attempting to do this will cause Shadow to come to a full stop at the foot of your target before politely getting off/out of your vehicle. The intro also displays using multiple quick and short Chaos Controls to fight multiple enemies at once which also can't be done.
* Even worse when you consider that the "lame-o Sci-Fantasy explanation" is EXACTLY what happens to her next boyfriend.
* Even worse when you throw the mask into the equation and never know what he looks like
* even worse, which (of course) made it into the final episode. It should go without saying that being nice to both Ramsay and the diners would be paramount while the cameras are running, but many still ignore this lesson.
* Even worse, Zouken Matou. He doesn't pretend to be a good/neutral guy or even bother masking the fact that he's a vicious and creepy old man.
* Even wrestling moves can have punny names. One such example is the Fisherman's Suplex, so named because it involves 'hooking' your opponent's leg. Wrestler's finishing moves sometimes have puns based on their ring name, such as "Air
* Even writers have noticed this, as there is an increasing amount of
* Even years after her death, Harry continues to visit and tend to the grave of
* Even Yoshi gets this treatment. Not helping is that in the games he's able to swallow most of Mario's enemies whole and has a seemingly infinite appetite, so it's not hard to turn him into a vicious predator that'll eat everything in sight, even Mario, often as revenge for the so-called "abuse" above.
* Even young Spanish-speakers find it amusing, as it means something like "auntie poopoo" in English.
* Even your female dwarves can be very manly. Maternity break? What's that? They can give birth in the middle of an enemy siege
* Even Zatsuza pales in comparison to the end of the boss rush mode (Death Label) from the PS2 port of Daioujou:
* Eve of Destruction: After getting into a car crash, EVE's internal nuclear device is activated and set to go off within 24 hours. Col. Jim McQuade is pissed that his superiors didn't inform him of this before sending him out to catch her. The race to disarm her gets even more dire when EVE's rogue moves take her into New York City in the climax, endangering millions of people.
* Eve of Destruction: Colonel Jim McQuade to a realistic degree. An army veteran, expert marksman and counter-terrorism expert, he's the guy the government calls in to take down a rogue killer android, but he does get pretty banged up over the course of the film.
* Eve of Destruction: EVE and her handler are out on a field mission when they get caught in the middle of a bank robbery. The robbers kill EVE's handler and damage EVE herself, causing her to go into permanent combat mode.
* Eve of Destruction, "My speciality is a spinach lasagna in a tomato-basil sauce."
* Eve of Destruction: When Dr. Simmons realizes the pattern behind EVE's movements because her own memories were implanted in the gynoid, McQuade has to get it straight.
* EVE Online 25,000 years before. Even newer races introduced such as the Sleepers are believed to be of human origin. The only non-human life are flora and fauna.
* EVE Online. All in excess of 15km, and all ridiculously costly to build.
* EVE Online and blasters. The Caldari have utilitarian, gunmetal grey/blue, angular ships with railguns and missiles. The Minmatar have rust-brown/red

heaps'o'junk which fly at unsafe speeds and the larger ships fire car-sized artillery shells. Some of the minor factions also have their own designs. Angel Cartel fly ships that resemble the Shivans mentioned above, the Sansha ships look like they have been designed by a sadomasochist, the rogue drones are basically mechanical insects and the Jove fly Gigeresque biomechanical ships.
* EVE Online: Any player can put up a bounty on a character's head, which is visible to other players if they view his or her profile.
* EVE Online, a player can train industrial ships and become one of these, hauling others' goods around. Red Frog Freight is a particularly well-known player corporation that specializes in this.
* EVE Online aptly called the Hawks who advocate this. They are one of the largest bloc among the Gallente population and support the Federation in its expansion and military development.
* EVE Online are controlled by humans brainwashed and cybernetically-altered for that purpose.
* EVE Online are their base ships with different color schemes. This is true of their pirate counterparts as well.
* EVE Online are the precursors. We used the EVE wormhole to travel to the Galaxy of New Eden, but when the wormhole collapsed, so to did civilization in New Eden, and as new civilizations formed, their origins faded into myth and legend.
* EVE Online: Because of the hands off approach of CCP regarding player interactions many stories of legendary cons, scams, and other debauchery are abound in EVE.
* EVE Online. Be wary though: any semi-decent pirate uses warp disruptors, barring a good escape.
* EVE Online: but only for some peculiar and seriously confusing values of criminal.
* EVE Online, but stationary ships pitch parallel to the ecliptic plane for no explained reason. Also, there's always a sense of where "up" and "down" are, because the camera can't vertically rotate past top and bottom positions. There is also a tactical view, which superimposes a set of horizontal circles around your ship, no matter what direction your ship is facing.
* EVE Online...but the uproar was large enough (and mirrored in canceled subscriptions) that CCP backpedaled furiously (and many other consequences too lengthy to detail here).
* EVE Online can have up to eight missile racks, all missiles launched from a ship originate from the same spot, causing simultaneously launched missiles to travel in a neat, glowing ball'o'death instead of a swarm.
* EVE Online CEO of NCDot hadn't really been interested in joining in this mess in the first place, and when the war turned against NCDot, the alliance's internal politics grew more and more toxic until finally the two sides split apart completely.
* EVE Online, complete with a theocratic government and widespread use of slavery.
* EVE Online CONCORD has since been upgraded (and continues to be upgraded every time anybody tries to tank them) and everyone involved was banned (if the players somehow figure out a way to subvert CONCORD, that is considered an exploit and a bannable offense), but the Yulai Incident lives on in legend.
* EVE Online, Concord, the space police, will punish attacks on innocent players by immediately appearing to destroy your ship, having first locked it down to prevent you moving, shooting, or even being able to target anything. In the past, it could occasionally be possible to escape from them by setting up some very unusual situations that allowed you to escape to low-security space. CCP, the developer, responded to this by updating the rules to say that escaping from Concord is officially considered an exploit no matter how you manage it, and your ship will be removed anyway. Concord always get their man, even if they have to work through the metagame to manage it.
* EVE Online. Depending on the current patches and balance changes, kinetic weapons may or may not be better than lasers.
* EVE Online device caused several distant stars in the galaxy to flare and space-

time to rupture; the kaboom from one of the star flares burnt the inhabited mining world of Seylin I to a cinder.
* EVE Online do not use clones, because they believe cloning damages the soul.
* EVE Online. Downplayed in that these fleets probably wouldn't win a battle against a large coalition fleet, and their formation, all ships on a 2D grid, would be awful to fight with.
* EVE Online embarrassing; one fan-created wiki tells the story of a fearsome pirate that chose his character's name poorly, and was stuck for eternity with the name "Buttpipe."
* EVE Online escape pods for the crew; however, escape pods deep within a ship can only separate as the ship falls apart.
* EVE Online, every system is at least binary system due to the unique gravity interactions needed to make a stable jump gate. The initial gate from Earth was named EVE and was due to the sudden appearance of a wormhole in the solar system.
* EVE Online. Factions also maintain their own navies, but those are at least escapable, if not survivable.
* EVE Online fighters, which are significantly more powerful than the unmanned drones and can maneuver freely whilst carriers sit far away from trouble.
* EVE Online flee the Amarr empire and into deep space in order to practice their religion in relative peace.
* EVE Online focus on armour and lasers. Minmattar use mainly shields and a mix of long and short-range projectile guns (although are somewhat less specialised and also use missiles, drones, and armour). They also each focus on different kinds of electronic warfare. There are also a variety of minor "pirate" factions that mostly mix up aspects of two of the main factions, but also including some that focus on unusual attacks such as draining energy.
* EVE Online gives us AURA, the universal AI that acts as the (feminine) voice for your ship. Or rather, every ship, regardless of who is flying it. It's a bit disconcerting to have any ship from a harmless shuttle to a fleet-destroying Titan talk to you in the same calm, female voice.
* EVE Online had varying lengths of free trial up until a 2016 update which allowed for indefinite trial accounts. Trial accounts under both systems are limited in which of the game's many ships they can fly.
* EVE Online has cloaking as an ability. Pretty much all ships can do it with the right equipment (although it cripples the combat abilities of everything but specialized Covert Ops and Recon Vessels). It is the subject of much controversy in the community, as it is widely used by pirates and carebears alike.
* EVE Online has entire websites dedicated to tracking exactly who killed who with what where. They are known as killboards.
* EVE Online has it that a beverage once in development by the Quafe company owed its addictive properties to human biomass.
* EVE Online has New Caldari. One wonders what happened to Old Caldari.
* EVE Online has several ships dedicated to either preventing targets from escaping or dragging them out of warp. Waiting next to a stargate and trying to kill anyone who jumps through is such a common tactic that it is unwise to ever allow your ship to fly long distances on autopilot.
* EVE Online has shiny Amarr ships versus "flying junkyard" Minmatar ships. Conversely, Gallente ships have shiny, smooth, almost organic curves while Caldari ships are angular and much more utilitarian.
* EVE Online has the Gallente Federation, Minmatar Republic, Caldari State, Amarr Empire, Khanid Kingdom, and Ammatar Mandate.
* EVE Online has these on all ships. The Caldari and some Minmatar ships, rely on shields as their primary means of defense (as opposed to the Gallente and Amarr, who rely chiefly on armor plating).
* EVE Online has this as an actual gameplay mechanic, where Player versus Player combat encourages players to prevent enemy ships from escaping. This is where the Interdictors and Heavy Interdictors come in - these vessels can deploy large warp scrambling bubbles that prevent all ships from warping, and capital ships from using their Jump Drives (averted with Strategic Cruisers equipped with the

Interdiction Nullifier subsystem, which makes them immune to this). If one needs a slightly more fixed solution, Mobile Warp Disruptor Fields can be manufactured/purchased from the market and anchored in space for the same effect. Players can also equip regular Warp Disruptors to prevent targetted ships from warping away.
* EVE Online have their distinct stargate designs to facilitate interstellar travel.
* EVE Online. If your corp isn't making a profit on a war, someone certainly is.
* EVE Online in Caille on Gallente Prime is a region near the nexus of the city where every structure, and even the ground itself, is made out of specially nanofabricated crystal. Its actual purpose? A nigh-invulnerable command bunker in case of orbital bombardment. The only way to disable the planetary government and military command would be to pulverise the entire city so thoroughly that it would constitute an unconscionable war crime and throw galactic opinion overwhelmingly against the attackers.
* EVE Online invokes this trope both as intentional uses and accidents.
* EVE Online is heading to this direction with the proliferation of Titans, ships so large that their gravitational pull can mess with the tides of the planet they're orbiting. The current count for Titans owned by players is measured in thousands, and the NPC empires are implied to have even more.
* EVE Online is justified in the game's lore. The sounds aren't actually real, but because the player's character is piloting the ship from within a sense-depriving goo-filled pod, the outer-space sounds are created by the ship's computers to give the pilot's mind something to focus on.
* EVE Online its the only type of battle there really is, except for corporate warfare. Notable in that is the current record holder for largest battle in an MMO ever, with thousands of players joining a single fight.
* EVE Online, just warping and jumping through stargates are mentally traumatic experiences, to the point where ship crews are either permanently juicing anti-psychotic medication to keep them sane, or else are kept sedated when they're not actually needed for anything. A capsuleer's control pod does grant them immunity to this phenomenon, but considering that it tends to drive the user insane anyway, this could be considered a mixed blessing.
* EVE Online: Large scale plasma cannons and plasma railguns are the favored weapon of the Gallente Civilization.
* EVE Online lasers are visible as solid beams, but do strike the target instantly.
* EVE Online: Manipulating one affects the other as well, no matter the distance between the two particles. This was used to create a galaxy-wide network (not unlike the Internet) where latency due to physical distance is not an issue. Carrying one half of a particle pair on a spaceship allows one to "phone home" from any part of the galaxy.
* EVE Online — While star gates make the massive eve universe traversable, there are limits to where they can be built and how far they can travel, which accounts borders and giant holes in the eve universe.
* EVE Online member) over cultural assimilation and poor security in their home region with nods to player-originated "Intaki Seperatist" movements.
* EVE Online player characters are based around this: Once you are about to die, your escape pod kills you and awakens a previously contracted copy of yourself somewhere else, that has a printed brainscan of your life's memories up until the very moment of death.
* EVE Online players as "the nerds who are to nerds what nerds are to normal people", with an appropriate series of illustrations.
* EVE Online, players fly their ships by being inside a pod full of goo with a neural interface which connects to the ship's systems and can easily be transferred between ships as well as ejected in the case of the ship's destruction (and if it is destroyed, a neural scan allows the player's mind to be transferred to a clone maintained at a station to cheat death). The interface allows a single person to control all of the ship's systems on any ship from a shuttle to a 20km long titan, with much faster reactions and better control than a human crew manually

controlling it could have (NPC ships are controlled by crews, and with the exception of CONCORD, are relatively weak).
* EVE Online plays with this a bit. Failing to slow down while approaching another ship will usually cause a collision. No damage is taken however.
* EVE Online. Poorly-equipped ship flown by a 'newbie' presents easy kill, enemies go for kill, react in surprise and alarm as six battleships jump in and snipe them to death. Heartwarming.
* EVE Online: Religion of Amarr Empire approve of slavery, conquest and racial superiority. The Blood Raiders. Since their "religion" invovles vivisection with no anesthesia... And to a lesser extent Sansa's Nation. They believe in turning people in to "true humans" by destroying the personality yet keeping intelligence and creativity intact.
* EVE Online resulted in the destruction of 75 Titans (the most powerful ship in the entire game). CCP, the developers of the game, dedicated a memorial called "Titanomachy" for the 75 Titans and 4200 other ships destroyed in the battle.
* EVE Online, ship insurance payouts was originally based on a static mineral cost for the ship. However, the player driven economy drove the market value of the ships below the insurance payouts. Players started committing massive in-game insurance fraud by creating a ship, getting insurance, then blowing the ship up as soon as possible for a hefty profit. Eventually, insurance payouts were patched to be tied to the market value of the ship to stop this nonsense.
* EVE Online, since it is most likely the barge ejecting the excess material from extracting the ore.
* EVE Online: starships designed by the Triglavian faction utilize naked singularities contained on the external hull as their vessel's primary power source.
* EVE Online status. Later on, the Amarr reversed their fortune in the Battle of Mekhios, where they wiped out an entire Minmatar fleet and send the remnants of their forces packing.
* EVE Online-style top-down gameplay from the mainframe era and created the 3D space sim.
* EVE Online Supercarriers and Titans (ginormous capital ships). There's also fighters, which are NPC controlled and launched from Carriers and Supercarriers, as well as various non-combat ships and specialist ship types (such as interceptor or electronic warfare).
* EVE Online supplied by CCP that the ship has a largely-full conventional crew (the player character, a "capsuleer", replaces all command and control crew, but maintenance, etc. is still needed, and on large ships, that's a lot of people). A ship being destroyed is an inconvenience for the player, who in the worst case scenario is transferred to a clone and can start again in a new ship. As for the the rest of his crew (who may number one or two in the smallest of the frigates all the way to tens of thousands in the city sized titans), it's better to just not think about. Then there are the NPC ships you can fight, most of which are not capsuleer-controlled, so even the smallest involve full crews being killed off for (virtual) real.
* EVE Online's vast and foreboding metagame. Trade alts, hauler alts, cap alts, logistics alts, forum alts, scam alts, the list goes on.
* EVE Online: Systems in 0.0 space have numeric names like B-VIP9. Some of the constellations and regions also have numeric names.
* EVE Online the Amarr Empire makes a wide use of slaves. Although they could easily replace most of their slaves with advanced technology, like the other nations have done, the Amarr believe that, by enslaving "lesser" peoples like the Minmatar, they are saving these people's souls. It's no surprise that the Amarr are quite far behind technologically when compared to the Gallente and especially the Caldari.
* EVE Online, the Amarr use "terrorist" to characterize Minmatar who liberate slaves by force, or even simply attack Amarr military forces. The former definition includes a large section of the Minmatar roleplaying community, particularly the Ushra'Khan alliance. The latter includes virtually any player allied to the

Republic, as well as the Republic Fleet itself. Needless to say, the Minmatar consider these same people to be freedom fighters, or simply soldiers.
* EVE Online, the Capsuleers are this to any faction that employs their services for Security Missions. By the time a Capsuleer reaches Level 4 missions, said missions involve one lone Capsuleer up against entire fleets of dozens of NPC ships with at least half a dozen battleships on average, the biggest ships in EVE Online barring capital ships. With the appropriate ship and fittings, one Capsuleer can solo these fleets on their own.
* EVE Online. The decription of the "Phantasm," a craft the player can pilot, specifically mentions that the weird geometries of the ship show preternatural understanding of physics and starship design.
* EVE Online, the energy conservation rule doesn't exist at all. The main example would be the logistics ships, that can use (since they have energy usage bonuses on certain modules) a module giving 324 GJ to an ally for the cost of only 108 GJ energy usage. There are probably more examples.
* EVE Online: the expansion pack - Apocrypha - caused numerous wormholes to open all over New Eden. They transport ships absurd distances instantly, either to elsewhere in New Eden (distances that would take an hour to travel via stargates) or to uncharted Sleeper space (which could conceivably be in an entire other galaxy). They are only open for a limited time, and will only allow a certain amount of mass through before collapsing.
* EVE Online, the explosion effects look pretty much correct according to what is described above. They are slowed down, however, so that the players can savor in the shiny afterglow of the ship they just helped blow up.
* EVE Online. The falling wreckage from the Minmatar and Amarr fleets fighting over Mekhios were more destructive than any orbital bombardment could have been.
* EVE Online: The four dominant human races of the EVE Cluster: The Amarr Empire (Powerhouse), The Gallente Federation (Balanced), The Caldari State (Subversive), and The Minmatar Republic (Cannon)
* EVE Online, the Intaki supposedly have this, though details are vague. In a process derived from their religious practices, called "Rebirth", the personality of a dying adult is transfered to a newborn. Today it's done with technology, from which came a lot of cloning tech. Spiritual leaders called "Idama" apparently/supposedly still do it the old way, and with training can access past memories.
* EVE Online. The most efficient way of controlling a ship in the 'verse is to put the pilot into a jar and then plug all of the ship's sensors and controls directly into the pilot's nervous system. In addition, capsuleers have one or more clones standing by in jars in case they are killed and need a new body.
* EVE Online. The new wormhole systems are dangerous and lawless, but exploiting them can be very profitable. Its also speculated that the Sleepers were left behind or are the remnants of Humanity that was cut off when the Eden wormhole collapsed.
* EVE Online, the original introduction explains that humanity left Earth, 'a world outgrown', over 20 000 years ago and started colonizing the entire galaxy. Eventually we found a wormhole leading to what is presumably a completely different galaxy and colonized it as well, before the wormhole collapsed, leaving the inhabitants of this new galaxy cut off from the Milky Way. The very existence of Earth and the Milky Way has been forgotten or turned into myths and legends during the dark age that followed the collapse of the wormhole.
* EVE Online the range of ship weapons varies depending on the size and type of the weapon. Small ships usually have a max weapon range of few dozen kilometers for long range weapons and a few kilometers for short range ones. Large battleships can potentially hit targets from several hundred kilometers away (although their close range weapons still require getting very close, especially for such slow and hard to maneuver ships). Large scale space battles tend to consist out of two large groups of ships about 100 kilometers from each other, blowing up the other group by focusing fire to one ship at a time.
* EVE Online. The salvager won't even be marked as an outlaw if he only dismantles the wrecks for parts and leaves the cargo alone. Also, people stuck in wormhole

systems can occasionally find someone to point them to an exit wormhole for a price.
* EVE Online, they don't take no for an answer when recruiting people.
* EVE Online, this is taken to ridiculous extremes for an otherwise acceptably scientific game. Not only does space have friction in EVE, but avid fans have actually done the math and determined that space in the EVE universe has the consistency of WD-40. Bizarrely, ships have an acceleration curve.
* EVE Online to say the least. Various modifications and reforms to asteroid belt realism and the interactivity/fun of mining in general have been floated by CCP over the past few years, but so far they appear to be on the back burner. Finding a fix that doesn't destroy the economy is bound to be problematic.
* EVE Online used in their construction, for a while it was necessary for player alliances to control wormhole systems and the archaeological sites within them in order to build strategic cruisers. Now it is possible to find relic sites in high-sec, but the wormhole sites are still much more productive.
* EVE Online usually subverts this, there are usually a wide variety of goods available at a given market.
* EVE Online, where weapon ranges are waved away as being, variously, a product of projectile velocity, the targeting computer being unable to hit a target that small, or the missile running out of fuel. For projectile and laser weapons, there is no hard cutoff distance, but as distance increases they miss more often. Part of the range limit is the maximum range a ship can target at, being a possible maximum of 250km with appropriate skills and modules - it is possible to get railguns and missiles to have a longer actual range than this, but they can still only be fired at a targeted ship (although the range over 250 is still useful on missiles if the target is moving away from you, but in that case they would have more then enough time to warp off before any missiles reached them).
* EVE Online will be changing the ship cloaking effect (viewable only by the player using the cloaking device) from a water-like animated texture to a hexagonal pattern in the upcoming Oceanus update.
* EVE Online will have this at the site of any major PVP battle, at least until some macabre scavenger scoops up the corpses for his trophy collection.
* Eve Plumb is a legitimately talented artist, whose work was showcased in several episodes, starting with a detailed drawing of a sparrow that she drew in the first season's "Is There a Doctor in the House?" (In one of the retrospectives of the series, any item that the script called for the kids to make, that particular kid made; sure enough, Eve drew "Jan's" sparrow.)
* Eve Plumb wears her hair in a clip for most Season 1 episodes, but wears pigtails during the Grand Canyon episodes.
* Ever17, although it is only mentioned in the text and doesn't have an accompanying visual.
* Ever17 attempting to cover up the fact that a very deadly virus they manufactured, Tief Blau, had been released within the park.
* Ever17. Before visitors can enter the underwater theme park of LeMU, they must go through a compression chamber and adjust to the change in air pressure via helium. Earphones are given to each visitor to make everyone's voices sound normal, but when Takeshi removes them and talks to an already high-pitched Coco...
* Ever17, builds on this in a lot of ways. There's two (1+1) protagonists, the game is set in 2011, 31 (the 11th prime) victims of the plane crash, and Yuni is 11 years old, among other things.
* Ever17 But she cheers up quickly enough anyway and plays strange games like staring contests with dogs or pretending to be a chicken.
* Ever17 ends this way. While the kids in question were already teenagers by the ending, it was the first time their father had met them and it had been many years since they were last reunited with their mother, so it still counts.
* Ever17 has a romance between the male lead and a holographic projection, so no actual touching is possible (though one end does stretch this a tiny bit...).
* Ever17 is about a trip to an underwater amusement park, which by the way is named after Lemuria, gone wrong.

* Ever17(ish) Sora how to behave like a real woman of her (apparent) age; it doesn't stick, and he concludes in the end that he likes her better as she is. The game also explicitly compares Takeshi and Sora's relationship to the Pygmalion story at one point.
* Ever17 is to give the infected party a healing factor that makes it impossible for them to be killed.
* Ever17 Leiblich Pharmaceutical, which serves as backstory for several characters. Among others they were studying Tief Blau virus to sell it as bioweapon, which made them responsible (by negligence, not malice, but still) for outbreak that killed several thousands of poeple including You's parents and experiments related to Cure virus on Tsugumi and later her children.
* Ever17 Lemuria is also used as a metaphor about questioning reality, a recurring theme in the game.
* Ever17 Only later we find out that parties involved were parent and child and it's unclear if they knew at the time and if that's related to the argument.
* Ever17 Played straight with the other character, who reacts typically for someone his age to the news.
* Ever17. Plus they needed a way to suddenly make her get along better with Takeshi, so they introduced Chami the Djungarian Hamster. He's named Chami because he's charming.
* Ever17) reveal that she is more aware of how serious the situation is than most of the rest of the cast, despite being the youngest.
* Ever17 revolves around a group of people trapped in an underwater theme park.
* Ever17, Takeshi and Sora share a touch through a glass. Bonus points for Sora being a hologram, and therefore incorporeal. In fact, her incorporeality is why they do this - it's the closest thing he can get to touching her.
* Ever 17: The Out of Infinity You's father was a researcher at Leiblich Pharmaceutical, and disappeared under mysterious circumstances a year after You was born.
* Ever17. The story is directly about trying to escape the the park before it is crushed by water pressure and indirectly about figuring out what is actually going on.
* Ever17 The writer responsible for that scenario admitted that he did not know that at the time.
* Ever17: "This story is not an end yet. Because only you are in the infinity loop."
* Ever17: Three bad endings, four "good" endings (some of which are still tragic), and one spectacular, all-revealing ending that you can only unlock after clearing the four good endings.
* Ever17 tries to invoke this trope on Tsugumi in Kid's routes. During "picnic" he gives her special sandwich "just for her", and when she bites it he laughs and mentions every single one of over 30 spices that he put in there in order to make the sandwich inedible. Tsugumi then says she likes it and it tastes like pizza.
* Ever17, when explaining her existence as a hologram projected directly onto the retina (RSD) with distance and location where she chooses it to be, Sora mentions how her voice's location will also seem to change. When she's to the right, she seems to be heard from there, or to the left, or 60 feet behind. 'And when I am under you,' At which point Takeshi and The Kid question her being under them and she gets embarrassed and tries to end the conversation.
* ever about a woman who received an electric bill for nearly 300 billion dollars, specifically $284,460,000,000. It was billed in December 2017 with an initial stated required payment of $28,156 and due in full by November 2018. After a call to the utility company from the son, it was discovered that somehow a decimal point had been put in the wrong spot and the real bill was $284.46.
* Ever After Academy and Abel, the woodsman (for the male main character).
* Ever After Academy is a rare example of this being played completely straight, being noble, brave, kind, and a good leader.
* Ever After after she attacks her stepsister Marguerite. The flogging occurs off-screen. After the stepmother sentences Danielle to be flogged, it cuts to the nicer

stepsister, Jacqueline, treating the lashes on Danielle's back.
* Ever After and Oscar Isaac (born in Guatemala to Guatemalan and Cuban parents) in the third - the fake nationality triple play.
* Ever After, as Danielle saves a servant named Maurice from being arrested over the Baroness' debts, Prince Henry asks her why she would do such a deed. Danielle replies that she believes in this trope, since "a servant is not a thief... and those who are cannot help themselves."
* Ever After, as punishment for his disobedience, the king tells Prince Henry that he'll "deny [him] the crown and... live forever!" Doesn't work as well as the king hoped, though even his tone implies he realizes he should have said something more convincing.
* Ever After begins this way, with Drew Barrymore's character as a little tomboy who, quickly on, loses her father to heart attack, then the main plot takes place ten years later.
* Ever After claims that her deceased father was an expert swordsman and taught her to be likewise. Given that her father died when she was eight years old, however, it's entirely likely that she's bluffing.
* Ever After. Danielle attempts to explain her true identity to Henry, but he doesn't really give her the chance. Later, his mother explains that "Nicole" is engaged to a Belgian, which is what Danielle's stepmother has told her, and he thinks that what she was really trying to tell him was goodbye.
* Ever After: Everyone is occasionally (probably consciously, due to the quick changes between humor and seriousness) guilty of this, child!Danielle in particular.
* Ever After gets played straight, however - he manages to gasp for a few minutes and deliver some last words without the loss of consciousness before death that generally happens when someone dies suddenly of a heart attack.
* Ever After Henry immediately fires back, "Good. Agreed. I don't want it!" and walks off.
* Ever After High characters Alistair and Bunny both believe that the other is friendzoning them. How they came to this conclusion is never explained.
* Ever After High depicts the Cheshire Cat as Kitty Cheshire's mother, when the character was male in the novel by Lewis Carroll.
* Ever After High episode "The Day Ever After", Blondie nudges Dexter to make him nod in agreement with what their friends are saying. This is an early hint that Dexter is secretly part of the group she was mocking.
* Ever After High has Apple White, daughter of Snow White. She occasionally has several boys swooning over her.
* Ever After High Has slit-pupil eyes, and a sort of catty aloofness. She often accents the catgirl theme with a cat-ear headband.
* Ever After High has this as part of its theme. The characters are children of fairytale characters and each have their own views on their destinies. The Royals believe that they should follow their parents destiny, Apple White is sure to have a happy ending, but Duchess Swan is doomed to become a swan permanently. The Rebels choose to not follow the destinies set before them, Raven Queen for one refuses to follow her mothers footsteps as the next Evil Queen.
* Ever After High, hermagic glows in purple, and she happens to be a daughter of an evil queen. Fortunately she isn't like her mother, but her power can get out of control and do some unexpected damages.
* Ever After High is nearsighted, however, she refuses to wear her glasses.
* Ever After High is the daughter of the Cheshire Cat, and inherited the trait of leaving behind her signature grin.
* Ever After High Maddie Hatter is very aware of the narrators of the stories, and is irritated of their constant arguing. Kitty Cheshire is also aware of their existence, in the episode focusing on her, she trolls on them by making them guess weather she is a Royal or Rebel(she is neither, she just likes to sow chaos).
* Ever After High Raven, and is sincerely excited when Raven appears to agree... and visibly heartbroken when it's revealed Raven was faking her out.
* Ever After High's daughter, but she doesn't believe people should be forced into

a life they don't want, making her a Rebel.
* Ever After High. The fact he always carries a mirror to look at himself makes it really obvious.
* Ever After High. The transfers are accepted by their peers, but they speak another language and act oddly compared to natives of Ever. And some of them, like Lizzie, had to leave their families behind to escape. The parallels to refugee children are pretty clear.
* Ever After High to look forward to, right? This does not sit well with the Rebels, which is where the trouble starts...
* Ever After High yet, all signs seem to be pointing in that direction.
* Ever After is certainly evil, but she cares for her eldest daughter and wants the best social position possible for her, while not abusing her other daughter in a different way than when she insults her... There are hints that she was abused by her mother and misses her husband.
* Ever After. Jacqueline is Danielle's kind-hearted stepsister, the only member of her stepfamily to treat "Cinderella" with any decency, and Capt. Laurent is the prince's right-hand man. They meet at the ball where the romantic leads are expected to announce a betrothal and have a few other small scenes where they mostly interact silently - but there's a clear connection between them, and at the very end it's strongly implied that they are together.
* Ever After make plans for her to wear a dress that belonged to Danielle's deceased mother to the masquerade ball. After walking in on Marguerite about to try on the dress, Danielle angrily declares "I would rather die a thousand deaths than to see my mother's dress on that spoiled, selfish cow!"
* Ever After of handkerchiefs in his clothes, placed there by hopeful young girls.
* Ever After: Prince Henry is fascinated by the way "Nicole" climbs trees, swims alone, and is strong enough to hoist him over her shoulders.
* Ever After, Prince Henry shows up to save Danielle, but she's already freed herself.
* Ever After. Right at the altar, he realizes the reason why she was hysterically crying was because she was in love with someone else and didn't want to go through with the wedding, just like him. So he calls off the wedding and runs off to find Danielle, just as the princess runs into the arms of her beloved also.
* Ever After, Rodmilla de Ghent favors her eldest daughter Marguerite, who is beautiful and behaves the same way as her mother, compared to her stepdaughter Danielle and her younger daughter Jacqueline, who has a much sweeter, kinder personality.
* Ever After: Rodmilla does one of these to Auguste as he lays dying of a heart attack, but it's more selfish than loving since she's wailing that he "cannot leave [her] here" while basically ignoring his heartbroken young daughter kneeling beside him; after he does die, Rodmilla proceeds to be horrible to Danielle for the next ten years.
* Ever After, Rodmilla grabs Danielle hard by the ear and throws her into a chair when angry with her.
* Ever After. The pretty stepsister invokes this—the prince goes to hand her a treat (we find out later it's chocolate), and she closes her eyes and opens her mouth suggestively. The prince is obviously not aroused, and actually looks a little disturbed by it, but he feeds it to her.
* Ever After, the prince attempts to rescue Danielle after she is sold as a slave. She meets him on the road out of the castle, carrying the sword she used to rescue herself.
* Ever After, this is Danielle's reaction after Henry finally proposes to her.
* Ever After throughout the ceremony, ultimately prompting Henry to call off the wedding so they can both be happy.
* Ever After. To go to the Ball, Danielle gets help from her other stepsister Jacqueline as well as the family servants. The Prince, Henry, is a flawed human being with both pros and cons, and he doesn't take the revelation about Danielle being a "commoner" well, so Leonardo has to give him a harsh pep talk before he goes and apologizes to her.

* Ever After: when Danielle is sold into slavery, Prince Henry shows up to rescue her. But, being the capable heroine she is, she has already threatened the bad guy and freed herself.
* Ever After when Prince Henry informs Danielle that they are supposed to live happily ever after. The woman telling the story, who is their great-great-granddaughter, also invokes it in her closing comment.
* Ever After when Prince Henry shows up to “rescue” Danielle from Pierri Le Pieu.
* Ever After, which was the main reason for her stepmother's intense dislike of her.
* Ever and More!. It's largely an excuse for the guys of Free Country USA to sit around drinking Cold Ones and singing songs.
* ever, and was subsequently booked against less-popular heels of the 70s. Since his career ended when wrestling was still in the more divided territorial era, Ladd is mostly remembered as a heel, though.
* ever, are you to open a hyperspace jump inside a planetary atmosphere; your ship may or may not survive the jump AND you will create an atmospheric disaster area. So when Sheridan and crew on a ship are trapped in Jupiter's upper atmosphere, what with its large hydrogen concentration, they realize they just need a particularly strong surge of energy to set off a boom while they make a getaway...
* ever been pinned cleanly is up for debate (mostly due to the issue of semantics regarding the word "cleanly").
* Ever been to (or heard of) Arlington National Cemetery? That's one huge example of this trope. Union Quartermaster-General Montgomery C. Meigs was asked to find a new place to bury the
* ever been under the illusion that they are invincible — "shoot first!" is their international, eternal motto.
* Everblue is a well-known bounty hunter who goes around in a bikini top, a skirt, a pair of shin guards with attached sheaths for her knives, and bare feet. One could argue that wearing an outfit like that would probably make you well-known no matter what your job is.
* Everclear "One Hit Wonder" about such an artist. The song was partly autobiographical about the band's feelings after "Santa Monica" hit it big.
* Everclear's highest charter wasn't "Santa Monica" but rather "Wonderful". As "Wonderful" was the song that marked their transition from a firmly alternative post-grunge band to a more mainstream pop-rock act, it's not as well remembered as their earlier material. While "Santa Monica" was Everclear's only #1 on Mainstream Rock, their sole #1 on Alternative was… "Everything to Everyone", which is still well known (certainly more so than "Wonderful"), but not as much as "Father of Mine" or "I Will Buy You A New Life", let alone "Santa Monica". All of that said, "Santa Monica", despite peaking at #5 on the Alternative chart, had a long run and would be ranked #67 on Billboard's 25th Anniversary Top 100 Alternative Songs List.
* Everclear was derided by critics quite a bit in their heyday, but they still produced at least three hit singles ("Santa Monica," "Father of Mine," and "Wonderful").
* Ever come across a Sears store with a non-working "e" on the sign? That makes the sign instead display "S ARS". What about when the first "s" goes out, which makes the store all "EARS"? Or what about when both of them go out at the same time? That's a real pain in the ARS.
* ever continuing hostilities. Their warfare encompasses the entire range of musical instruments and practically anything that can be used to make loud noises.
* Ever Decreasing Circles episode "One Night Stand", the prudish Martin Bryce is targeted by a prank-loving colleague who gets him drunk and arranges for a local girl to be in his room when he wakes up the following morning. The horrified Martin assumes he has cheated on his wife, Ann, even though he cannot remember a single detail of his "indiscretion".
* Ever Decreasing Circles featured two instances of this for main couple Martin and Ann.

* Ever Decreasing Circles Martin concocts an ambitious plan to give his house a complete spring clean from top to bottom while his wife is in hospital recovering from surgery. He meticulously schedules both the cleaning and his usual Sunday "to do" list of planning the neighbourhood's group social activities, but his lack of housework experience means things soon go wrong: He overloads the washing machine, and when he hears it jolting across the kitchen floor, he takes his eyes off a carpet shampooer for just long enough for it to swamp the entire hallway with foam. As he tries feebly to clean up the foam with a dustpan and brush, he stops paying attention to the absurdly large amount of rice he is boiling for his lunch, which soon covers half the top of the cooker. His attempts to vacuum up the rice lead to the vacuum cleaner breaking, and when he tries putting the remaining rice down the kitchen sink, it quickly becomes clogged. Finally, his nerves completely frayed thanks to both the housework chaos and a neighbour who won't stop calling him with questions about forthcoming social activities, he throws a porkchop into a plastic tub and puts it in the oven to cook for dinner; the melting plastic soon fills the entire kitchen with smoke, and the oven is ruined.
* Ever Decreasing Circles uses Dmitri Shostakovich's Prelude in D-flat major, Op.34 No.15.
* ever died during the commercial break. The show will always return from the adspot with a somewhat-stable patient, and a their doctors will be in a completely different part of the hospital.
* Ever dreamed you can't turn your alarm or clock radio off? That's because it was really on, but you only
* Eveready Harton in Buried Treasure (1928) is the first adult animated film and the first to be pornographic in nature.
* Everest (2015): Averted. When Beck asks Ang Dorje if he can speak English, Ang Dorje replies with "Probably better than you" to much laughter at Beck's expense. Played with when it comes to Yasuko; it's made clear that English isn't her first language and she simply avoids speaking most of the time.
* Everest (2015): Comes up in a number of ways but the most prominent perhaps is when Doug insists on reaching the summit, despite being more than an hour after the 2:00 turnaround time. Rob, against his better judgement, allows it. As a result, when the storm rolls in, the two of them are much higher on the summit than everyone was expecting and no one can get to them with fresh O2 bottles.
* Everest (2015): Rob explains to his clients that once they climb above 8000 metres on Everest, they will be in the "Death Zone", and their body will begin to shut down. The climbers are constantly reminded during their summit attempt that they must keep moving or risk death.
* Everest (2015): When a medivac chopper is called in to get Beck off the mountain (well above where helicopters are supposed to fly) and to a hospital, they throw out everything they can get away with, including leaving the copilot behind, then make themselves as light as they can.
* Everest: A number of mountain climbers get stuck on Mt. Everest after a blizzard hits the mountain. They are forced to press through it to make it back to the (relative) safety of camp. Special mention to Anatoli Boukreev, who ventures back out into the storm to track down stragglers.
* Everest: In the trailer there's a scene where they announce they've made it to the summit to cheering back at base camp. Proves to be premature as the blizzard moves in not long after.
* Everest is the second film with that name to cover the same events, though this one does in a dramatized fashion.
* Everest occurred, and the film also became a chronicle of its events.
* Everest trilogy amuse themselves by coming up with superlatives that allow them all to break their own records. One character might be the first 31-year-old Jewish man to reach the summit, while someone else might be the first African American from Oklahoma to reach the summit. This is in contrast to Dominic Alexis, who aims to break Ethan Zaph's actually valuable record of youngest person to summit.
* Everett Dirksen scored a Top 40 hit with "Gallant Men" a recitation of a patriotic poem he had written backed by music. He was the first sitting United

States Senator to score a pop hit. Although Dirksen recorded several spoken word albums, "Gallant Men" was his only chart entry before his death in 1969.
* Everett Ducklair shares most of his inventions-in fact, he built up a massive economic empire out of it. His weaponry, however, is kept secret for the most part, and the one he sells to the US Army is tighly controlled because he knows very well the damage even the lesser things could do if they ended in the wrong hands.
* Everett Ducklair was implied to manufacture weapons, and the second series shows that he sells "sonic weapons" (sound-based
* ever feels love again, his existence as leader of Cryptmonsters ends.
* ever for the US Olympic basketball team. To this day, the American players from that game still refuse to accept the silver medals, and at least one has left it in his will that his family can never accept the medal after he dies.
* ever getting Inquisitorial allies because they refuse help from anyone. Additionally, although some fall to Chaos through despair or rage, many (such as Horus himself or the Inquisitors who believe they can control Chaos) enter the claws of the Dark Gods due to pride - Tzeentch's portfolio includes (in addition to the more infamous Hope and Change) Ambition.
* ever go down without a fight. She had every intention of this when she was forced to face a bear with only a wooden sword before her rescue in "The Bear and the Maiden Fair", as well as when she was dragged off to be gang-raped.
* Evergrace instantaneously. Later on, it gains floors which turn from invisible to visible and back, slowly, enemies can come onto them, and there's STILL no fences to save you.
* Evergreen, Hotaka has this reaction when Niki meets him for the first time since he was supposed to be alone with the teacher, and his embarrassment at his scar and weakness takes over.
* Evergreen is more refined and eccentric then the usual example but qualifies nonetheless.
* "Evergreen" shows that the time before the mass extinction of the dinosaurs was not unlike "modern"-day Ooo.
* Evergreen was jealous of Erza for having the nickname "Titania" (townspeople were awed by her strength and called her that, meaning "Queen of the Fairies") and tried to kill her so she could take it. Erza defeats her and says that she never cared about that nickname.
* "Evergreen" was the debut single from Will Young and is the biggest-selling single of the 21st Century in the United Kingdom. It was also an album track for Westlife.
* Evergrowth. Centuries later a civil war ended with one faction attempting to use the Breath and the other sabotaging it to prevent it from firing. The sabotage caused the Breath to detonate, wiping out the Apexis civilization, shattering the Spire of Arak, and nearly rendering the arakkoa extinct.
* ever had relevant powers in its various editions and sourcebooks...the list goes on.
* ever harm, or threaten to harm Wash in front of Zoe. Not if you want to live.
* Ever head of/drank the popular Tito's Vodka? Well the "Tito" in the name is a reference to its owner Tito
* Ever heard of the A1 Tornado? It's an updated version of a 60-year-old design called the Peppercorn A1.
* Ever heard of the Wilde Flowers? Well, they were the founding band of the Canterbury Scene. Those who jumped ship before it broke up founded Soft Machine, and the rest founded Caravan. Soft Machine itself had Daevid Allen as a founder member (he left after the first single to found Gong) and was later home to Karl "Adiemus" Jenkins.
* Ever heard someone called an ass[BLEEP]? Doesn't that sound like they got... rather creative, in their insults? The censored word is just the innocuous "hole,"
* Everhood is a space where you're immortal for as long as you live there. Mostly. The Everhood hosted countless people, but over billions upon billions of years of existence, the inhabitants grew bored and gave in to various vices to stave off nihilism. Everhood inhabitants can only die if they are killed, and they began

picking each other off until only a couple dozen inhabitants remain, trying to go about their days by getting rid of the one person left with the power to kill them.
* Everhood who wanders the maze in the castle. If it catches you, it will throw you into a battle that you must escape.
* Ever if the elves of the Tolkien legendarium don't follow the trope, it is at least invoked, and seems to be pervasive in the human lands by the end of the Third Age, both people having become estranged, even in Gondor.
* ever in his backstory). A completely ruthless fighter who causes only senseless destruction.
* Everland and unleashed onto England. The virus quickly wipes out its adult population while slower to take affect on those eighteen and under. Females are particularly vulnerable to it.
* Everlast, and wound up dead" on some radio stations. The second bleep is a legitimate swear word, but the first is "chrome .45." The gun-less version easily leads to some bad guesses about what exactly he "pulled out" that got him killed.
* Everlastin and not the painting who changes, fading in and out on the cover to indicate that he's actually a ghost.
* Everlasting death for the most faithful companion — loss of memories causing the reversion of a significant amount of character development.
* "Everlasting Love" was first performed by Robert Knight in 1967. Since then, it has been covered by practically everyone under the sun. Some of the most famous covers were by Love Affair (in 1968), Carl Carlton (in 1974), Rex Smith & Rachel Sweet (in 1981),
* Everlasting Summer has no age check on Steam and received an automated T rating from the ESRB on Google Play; however, this same version carries a 17+ rating in the iOS App Store.
* Everlasting Summer is a russian Visual Novel that brought many people to the genre due to it being one of the most popular and well-reviewed Visual Novels on Steam.
* Everlost by Neal Shustermann — Nick and Allie die when their respective cars collide. They become Afterlights, which is when the souls of children (ages 5-15) don't get to where they were going, because they lack the sense of direction needed. Afterlights roam the earth until the end of time, but they can be sucked into the center on the earth when they stand on living ground.
* Everlost crash ended up flying the ghost of the Hindenburg to Roswell for sixty years. Somehow it ends up being seen by non-Afterlights… in 1947.
* Everlost there's a monster known for "chiming" his captives—that is, hanging them upside down from the ceiling. Since the characters in Everlost are all ghosts, this doesn't cause them pain or put them at risk of death, but it does get very, very boring after a few centuries.
* Everly, as close to trope as you can get in a mostly realistic live-action movie. Someone tries to shoot him, but he sidesteps off screen, then back on right in front of the character to disarm and punch her.
* Ever made a forum post only to find a garbled mess of the wrong-shaped brackets staring you in the face? Exacerbated by the fact that HTML and
* ever marched all the way to Berlin effectively uncontested (most of the German army was stuck in France, and what remained back home was tied up with the mutinies).
* evermore: "ivy" opens with the narrator exclaiming and praising her lover... until the rest of the song revealed that she is very conflicting about this relationship affecting her current one with her husband (which mean either this is an affair or the lover she is exclaiming is dead and she still can't get over them) and compare their love to ivy that will destroy her.
* Everneath. It feels like they have been there for hundreds of years, but it ends up only being 6 months in Earth-time.
* Evernight is the rebellious 'bad boy' Bianca's parents don't approve of, while Balthazar is considered the more safe and sensible option.
* Evernight; Lucas realizes that Black Cross is wrong about all vampires being evil monsters, while Bianca realizes her parents have sheltered her from the darker side

of the vampire world.
* Evernight, the two meet and reconcile at the same gazebo after they temporarily broke up.
* Ever Oasis are sexually dimorphic. Male Seedlings have woodier, more branchlike horns, female Seedlings have split-down-the-middle horns that resemble seed pods.
* Ever Oasis so many of their favorite shops and items tend to be fashion.
* Ever Oasis was released in the West almost 3 weeks before its release in Japan, which is especially rare for niche JRPGs.
* ever often responsible for producing parents of grandchildren. So they produce fan wank to explain away the Doctor's "granddaughter" as not related to him at all.
* ever played the least bit seriously. What makes this especially dark is that all of the characters in the series are named after either classical authors and poets or major characters from classical literature, and the author he's named after was famously suicidal and ultimately drowned himself.
* ever-present three-layered poof of lace at his throat commercial, he has a pink Nintendo DS. All of the buttons on the touch screen of his own game are his signature magenta.
* Ever proving the ancient maxim, "There's the right way, the wrong way, and the Army way," The U.S. Department of Defense (which shows up on this page in several places) still uses the "two space" rule in official correspondence, even though the proportional Times New Roman is the mandatory font, and still has instructions like "indent three spaces," which don't make much sense when using proportional fonts.
* Everquest 2 has a few. If you are drunk or hit with an effect, your screen can blur and if you get drunk enough/hit enough, you will eventually be seeing quadruple. Some mobs also have abilities that give you Sonic Vision, also known as Piss Vision. Finally, in the Estate of Unrest there is an interface screw towards the end as the boss of the zone tries to come out the screen at you.
* EverQuest actually changed the game for the sake of people with alt-itis. Initially, choosing your character class was spread over 18 levels. You started as your race (lvl 1 human), then chose your base class (fighter, priest, rogue, wizard) a few levels after that, then a specialization after that (a priest could become a cleric, shaman, or druid), and at level 18, you picked between good and evil, and the good/evil versions of a class had somewhat (and sometimes extremely) different abilities. Anyway, this whole system was thrown out, allowing characters to start as their final class from level 1. The reaction was generally negative, as many players actually liked doing the class choosing quests.
* EverQuest) advertisement? You might not even know the game is still around and they are still releasing expansion packs every year.
* EverQuest also features the Arasai, an evil version of the Fae, a playable race of fairies. The Arasai were created by corrupting the flowers that the Fae themselves bloom from upon birth, and are quite malicious.
* EverQuest briefly turned into this due to an oversight on a single item: Donal's Chestplate of Mourning. This cleric-only breastplate allowed the wearer to cast a mana-free spell that completely healed the target, though the drawback was that it took 30 seconds to cast - longer than most tanks could survive without other sources of healing. Of course, if you have ten clerics with the chestplate, then it's a simple matter of getting the timing down by having the clerics each click their chestplate three seconds after the last one did, resulting in the tank recovering full hit points every three seconds. It was especially trivial because this rotation could be kept up indefinitely since it consumed no mana or charges. This oversight was eventually rectified by the game's developers so that any given player could only be healed by the Chestplate once every seven minutes.
* EverQuest d20 pen and paper game had a mistake similar to the page image: on page 140 the terror carver monster has an ability called "blood frenzy". At the end of the description for how the ability works one can find the following: [Steve: if this is similar to a 3E barbarian's rage, should there not also be a penalty to ac?]. Presumably this was a note from the editor that was never noticed or removed.
* EverQuest divides them into Griffawns (lowest-level), Griffennes (in the middle), and Griffons (highest-level)

* EverQuest do this to worlds they conquer. Collaborators from conquered worlds are given a place in the Muramite Legions and everyone else is enslaved.
* EverQuest drop light stones and greater light stones, which help adventurers see in the dark.
* EverQuest, featuring a giant reptilian skeleton jutting derelict from the ground.
* EverQuest generated a lot of these due to the heavy secrecy that Verant maintained regarding the mechanics of the game behind the scenes. Verant was adamant to ensure that the actual number of XP points gained and the formulas used in combat calculations were completely hidden from players, leading to numerous guesses and false rumors about the system's functionality:
* EverQuest has 4 human races: The baseline human, the large barbarians, the scholarly erudites and the dragon touched drakkin.
* EverQuest has the same powers but lacks the control he has causing concern that she could die using it.
* EverQuest has two examples: The Blind spell, which blacks your entire screen, causing many a frantic player to think their video card just crapped out; and Booze, which causes your character starts to wobble even when standing still and the entire screen to fisheye horribly.
* EverQuest have the ability to Lay on Hands a single character to restore a large amount of hit points. Shadowknights, being the evil opposites of Paladins, also have a touch ability called Harm Touch, but this does large amounts of damage. Both abilities can be only be used once a Norrathian day, every 72 minutes.
* EverQuest II averts this if an option is enabled — however, like the rest of the engine, this is not efficient and requires high-end hardware to enable unless you want your framerate to drop through the floor. With the option disabled, clothing just kind of wraps around the body.
* Everquest II, characters transferred to Drundar are isolated from characters belonging to rule-abiding players, and customer support is inaccessible there; players can use those characters to cheat all they want, because they're only cheating against other cheaters. (This doesn't ban the account, however; Daybreak Games maintains that, for now, this is an experiment.)
* EverQuest II features all of your standard fair of fantasy races, but separates player races into either Good, Neutral, or Evil at the character creation process. This determines where the player starts as their home city and which class they can initially start as.
* EverQuest II gives us the collection quest items, often nicknamed "shinies" by the players for two reasons. The first is that, well, they glow — they're small, glowing points on the ground with a question mark on top. The second is that you can expect many people to instantly take a leave of their senses and drop whatever it is they were doing (such as traveling, trying to avoid dangerous mobs, healing their group or trying NOT to aggro everything in sight) in order to dig them up. Even more so in groups, where there's a competitive aspect to it — first person to activate the shiny gets it, and the rare ones sell for a mint. A shiny popping up in the middle of a difficult fight can quite easily spell "wipe".
* EverQuest II giving a straight answer one way or another has frustrated many a customer into cancelling their accounts because of the sheer unpredictability of where the game was heading in terms of both story and gameplay mechanics.
* Everquest II has guards in major cities. Some which are harder than high end raid bosses.
* EverQuest II has Lord Nagafen, a dragon found at the bottom of the Solusek's Eye volcano. He plays a major story role in the base game's questlines. The game will program an NPC as either Non-Combat (meaning you can only talk to them, if even target them), and regular enemies with designated levels, damage output, HP, and stats. Nagafen falls into the latter because a foolish player who thinks can challenge him will find out how quick a death they will recieve. At the start of the game, the level cap was 50, and Nagafen was listed as a 100x4 epic mob. As the level cap increased closer to 90 with the Sentinel's Fate expansion, Nagafen was boosted to 120x4. With the level cap of 120 with Blood of Luclin, Naggy was increased to 150x4. One player almost managed to kill him using environmental

exploits, but was caught and punished before he could finish. Since then, Nagafen has an anti-cheat mechanic that prevents him from taking any forms of damage after a certain point, making the effort ultimately futile. There is a subversion in the form that Nagafen's Lair was later repurposed for the Kingdom of Sky storyline as a seperate zone. The Nagafen inside there is still 100x4, which is completely trivial to anyone geared up in the Reign of Shadows expansion and can be killed in one hit. He's oddly fitted out with tier 5 loot from level 50 from the base game.
* Everquest II has some sort of skeleton or zombie in almost every zone.
* EverQuest II introduced the Ratonga, a species of anthropomorphic rats. They've since become popular with furries.
* Everquest II makes Iksar females significantly slimmer than males and gives them breasts, albeit breasts that can only be described as "minimalist" by MMORPG standards.
* EverQuest II model where you could play for free, but with limited access to in-game features like not being able to use world-wide chat channels (an anti-spambot countermeasure), limited character slots, limited selection of races and classes, or only able to use up to certain quality of equipment. The last two were eventually reverted due to negative feedback, but the game has since allowed free-to-players to play up to level 100 and access all content up to the Altar of Malice expansion pack. Buying the current expansion will allow free-to-players to access all previously expansions and the content they contain, and sticking with the subscription allows free chatting, free fast travel around the world, 500 premium currency to claim each month (which is used for cosmetics and account services.)
* EverQuest II, one quest to infiltrate a group of troll pirates involves getting ordered to kill an arena full of kittens. If you choose not to do it, you can stuff them into a sack and hide them, instead. The dialog for not killing the kittens has your player telling the troll that you ate them.
* EverQuest II soundtrack, such as Nektulos Forest, seem almost entirely composed of scare chords or rapid string notes. A scare chord which signaled a player character had broken from combat and is attempting to flee has been removed.
* EverQuest II Venril Sathir built a new Sathirian Empire, using the ancient Sathirian Calendar themselves. None of these established calendars have any overlapping date of reference to pinpoint exactly when they take place on a universal calendar that the player can reference. This was done intentionally by the developers so they would have some leeway to fit in new events that happened during the 500 year period without conflicting with anything.
* EverQuest II When they die, either of natural or unnatural causes, a spirit bud is created which regenerates the body until they are ready to be reborn. However, the spirit bud can be destroyed, which leads to the fae or arasai's permanent death.
* EverQuest ingredients as well. Eating smoked Wood Elf, for example, gives you a temporary bonus to agility, and the&& less said about what goes into a Hero Sandwich, the better...
* EverQuest, in the Wakening Lands, the Giants of Kael Drakkel will threaten to use your bones for mortar when you fight them.
* EverQuest is set up so that most individual cities have Usual Adversaries. Freeport has the Deathfist orcs, Qeynos and Halas have the Blackburrow gnolls, Kaladim has the kragplooms, Felwithe and Kelethin have the Crushbone orcs, Oggok has the Tae Ew lizardmen, Grobb has the frogloks of Guk, and Erudin and Ak'Anon have wild kobolds.
* EverQuest: Kithicor Forest is a low-level zone by day, but becomes a mid-level zone with undead monsters by night.
* Everquest — Cazic-Thule the Faceless is a malevolent four-armed god whose worship is dominated by fear. His spiny head lacks any eyes (or nose, or teeth, or eyes for that matter).
* EverQuest Next and continued development as a separate project, until being shut down on February, 2017.
* Everquest, out of the many dozens of zones, only a couple see much action. For example, players in their teens and early 20s, level wise, hunt in Paludal Caverns.

Period.
* EverQuest: Secrets of Faydwer features a task called "Disrupt the Workshop", in which you are required to disguise yourself with a clockwork gnome illusion. This allows you to walk freely throughout S.H.I.P. Workshop without drawing the attention of most of its otherwise hostile inhabitants. Since you are allowed to refresh the disguise at will as long as the task is in your journal, this can be abused to make any endeavors in the zone much easier.
* EverQuest series, each god rules over a different physical or emotional domain, and all are clearly defined as Good, Evil, or Neutral. Among the evil gods are Cazic Thule and his daughter Terris Thule, who controls fear and nightmares, and Tholux Paells, the Demi-god of Lust. Among the good gods are Erollisi Marr is the goddess of Love and Quellious the god of Peace and Tranquility. An interesting note is that the extremely evil Rallos Zek, god of War, created Sullon Zek, Demi-goddess of rage and anger. Sullon herself and her domain are considered neutral.
* EverQuest's expansion packs came with a cloth or paper map of the world of Norrath and the new area that the expansion focused on. The Planes of Power went one step further and featured a figurine of the game's mascot character, Firiona Vie.
* EverQuest tabletop game, the Poles (both north and south) of the moon of Luclin are given the Antarctica treatment.
* EverQuest tactics against a dragon who was immune to all forms of magic except for the Shadowknight class' Harm Touch and the Wizard class' Mana Burn, but in the end, the dragon fell, and his corpse had no loot. A few weeks later, a game-wide announcement was told of the accomplishment.
* Everquest: The Erudites. Their skin was changed to gray for the sequel.
* Everquest: The Froglok are a species of anthropomorphic frogs that mainly worship Mithaniel Marr, the god of valor and honor and as such lean strongly towards the paladin class.
* EverQuest - the initial release and the first expansion featured a scantily clad human chick named Antonia Bayle on the cover, but all the other expansion packs have featured images of that expansion's main antagonist.
* EverQuest. There are three "Human" races, but two of them go by other names. The gods originally created the Barbarians, who the game developers modeled after Celtic influences. Living in Everfrost Peaks required the race to be rugged, burly, and strong. Over time, Barbarians moved down into the lowland plains of Karana, where they adapted to the more temperate environments, and gained more intelligence as they no longer had to devote so much time to survival. The Human race that resulted are all white and represent European cultures and societies. As more Humans began to spread out, a group of them who dedicated their lives to learning knowledge and practicing magic split off and moved to the tropical continent of Odus, eventually adapting and evolving further. The Erudites are all dark skinned, but have the highest intelligence stat, and are among the best magic users among every playable race.
* EverQuest. There's also Tholuxe Paells, the evil Demi-God of Lust. Not just sexual lust, but bloodlust and any other forms.
* EverQuest, they also happen to be the one race who has the most influence in the survivability of the other races in Norrath as well.
* EverQuest was banned because "the player can make morally ambiguous decisions, and thus the game is harmful to the consumer's mental health.”
* EverQuest went the same direction with Antonia Bayle. However, roughly about 2009 SoE deliberately phased out the sexy cover art for their games.
* EverQuest were outright immune to spells that slowed their attack speed since such spells could reduce a monster's damage output by upwards of 60% or more. Notable examples for their time were Derakor the Vindicator and the Avatar of War, two end-game bosses in the Scars of Velious expansion that were notorious for their extremely high melee damage output.
* EverQuest". What this means is that every mammalian race has the racial size equivalent of D-cups. The only exceptions are the races who don't have breasts in the first place.

* EverQuest, which borrowed a lot of cues from older tabletop games. At lower levels, melee classes are capable of fairly easily soloing enemies even a few levels higher than themselves, while casters must typically focus on enemies their own level or lower (due to the heavy influence of level disparity on spell resistance). However, by mid-level, spellcasters gain a plethora of tricks to make soloing quite easy, while melee classes are almost universally forced to get groups in order to grind experience.
* Everquest wizards get 3 Alternate advancement abilities called Pyromancy, Cyromancy, and Acromancy that cause additional damage and resist debuff to Fire, Cold, and Magic respectively.
* Ever seen advertising copy, for a Jewish-themed work, that says "You don't have to be Jewish to love X?" You can thank the 1960s
* Ever see those SlimQuick commercials? Men lose weight by simply drinking water instead of soda, while the woman - who hasn't had anything made with flour in over 5 years - is still fat and requires the product to lose the weight.
* Evershade from a guy to a girl, the titular character examines themselves in a mirror, and this trope is noted:
* Evershade, His little sister takes that as a reason to have this with him, now her:
* Evershade: Karen, formerly Kyle, can't return to being male as her regeneration forces her into a female form too fast for any surgical changes.
* Evershade: Karen's healing forces lost bodyparts to return to her and reassemble her body whole again.
* Ever since American production companies have noticed the gorgeous landscapes and cheaper production costs of New Zealand, the collective acting pool of Australia and New Zealand has been getting a pretty heavy workout.
* Ever since building a machine with artificial intelligence is outlawed. This is gotten around with servitors: vat grown or mind wiped humans with cybernetic implants. As per the peace terms between The Emperor and the Tech-Priests of Mars, all AI creation is strictly forbidden.
* Ever since drafting Steven Stamkos in 2008, the Tampa Bay Lightning took a while to get their footing, which happened around 2014 (the only playoff run before was quite deep, losing in the 2011 Eastern Finals to the eventual champions Boston Bruins). There, the absence of goalie Ben Bishop led them to be swept by the above mentioned Canadiens. In 2015, the Bolts finally went all in and got to their second ever Cup finals, only unlike the 2004 title, Tampa built a 2-1 lead before the Blackhawks won three and got the Cup. It was then followed by a conference final, missing the playoffs by
* Ever since Evolution of Combat came out, all but the strongest of bosses from before it are now painfully easy, as the player can simply spam special attacks at them until they die.
* Ever since her training in Braavos, Arya develops a tic of standing with her hands behind her back.
* Ever since he started doing short videos about video games and talking really fast in them,
* Ever since he was a kid, Kyo deeply wanted to protect his loved ones (in fact, he promises his mother Shizuka that he will do so when he's just eight years old), and that turned out to be one of the reasons why he was so powerful... but after gradually forgetting it in the middle of his turbulent life, he got Brought Down to Normal
* Ever since his introduction, Bowser Junior has been taking over other characters in first place,
* Ever since id Software was acquired by Bethesda's parent company ZeniMax Media, these fandoms have even overlapped with those of id's franchises, including
* Ever since its anime premiere in 2019, its almost impossible to discuss
* Ever since Lapland became famous on the news, the media reports on similar attractions every year, and always points out the similarities.
* Ever since Looker's debut in Generation IV, each generation has had at least one game in which he makes an appearance up until

* Ever since Microsoft included a version of the popular Klondike variation with Windows 3.0 in 1990, vastly more people have played
* Ever since Playfirst started to make games in the app industry, they rebooted the
* Ever since Ruby wounded her at the Fall of Beacon, Cinder has held a huge grudge against the rookie huntress. When Salem sends her team to strong-arm Raven Branwen into helping retrieve the Relic of Knowledge from Haven, Raven demands that they kill Qrow in return. Seeing this as a chance to pay Ruby back, Cinder eagerly accepts, even though it sacrifices their advantage of Haven being empty. During the battle, Cinder, Raven, and Vernal, the supposed "Spring Maiden" slip away but before any of them can open the Vault of the Spring Maiden, Cinder reveals she has a Grimm arm and kills Vernal to steal the Spring Maiden's power — except Vernal was just a decoy,
* Ever since Sonjai's death, a new Companion Cube named Mogo (not to be confused with the original identity of Cephalo the Pod) has replaced him.
* Ever since the 19th century, Coca-Cola has become easily the largest soft drink company on the planet. Finding a restaurant, convenience store, theme park or grocery store that doesn't serve Coca-Cola products will be harder than finding a UFO in the sky.
* Ever since the canon ship Steve Rogers/Bucky Barnes ("Stucky") exploded in popularity, many fics have been written that pair Steve with other characters played by Bucky's actor
* Ever since the divine right of kings was initially challenged 15 years previously when a coalition of lords overthrew
* Ever since the fall of 2020, they'll take any weekend they can to air
* Ever since the fidget spinners skyrocketed to becoming a trend in 2017, they received intense hatred. Haters claim that what was supposed to be a stress reliever for those with ADHD is now a status symbol for being cool. They also admit they're annoying.
* Ever since the franchise was bought out by Disney, there seems to have been a conscious effort to avert this trope.
* Ever since the inception of Sidemen Sunday, every member of the group would appear in the videos. However, on two separate ocassions in 2021, two members were notably absent, after being tested positive for
* Ever since the introduction of the move Dive in the third generation of games, its use to go underwater on certain areas has only made
* Ever since the mid-to-late '00s it seems that WWE has taken their policy a step further by making all newcomers use a WWE-given name, even those who previously wrestled under their real names or own their own names.
* Ever since the original iPad came out, numerous Android tablets from a myriad of manufacturers cashed in on the nascent smart device market. While some of them are of merit like Samsung's Galaxy Tab line, lower-end models especially those
* Ever since the season 2 finale aired, it has been a major point of argument among fans as to whether or not
* Ever since the show returned in 2005, it made Cardiff, the capital city and most populous county of Wales and the headquarters of BBC Wales (the producers of the show), a
* Ever since they rejoined the NFL in 1999, the Cleveland Browns had trouble finding a starting quarterback until they drafted Baker Mayfield first in 2018. A notorious jersey had the names of the 29 starting QBs before Mayfield.
* Ever since Warner Brothers bought out the series, there's been a stronger focus on story for
* Ever since "What Was Missing" the idea that Marceline and Bubblegum used to date swiftly became a fixture in the fandom. After years of
* Ever since "Wind of Change", all their hits have been ballads. And we're still talking about the band that gave us "Rock You Like a Hurricane".
* Eversion actually has more than one layer: there are 8 in total, but per level, you'll only be using 2 or 3 of them. At different layers, different objects may be obstacles or even enemies. In the lower levels, clouds can be platforms. In the

highest levels bushes are obstacles, go lower and they are death traps, beyond that they are just dead and background art. Enemies are deadly to different degrees with different one optimised for different levels.
* Eversion Mario-clone platformer at first, but after a few levels, you need to figure out how to "evert" in order to solve the puzzles. Then the game's major narrative elements start to kick in.
* Eversion plays this for laughs—the princess still turns into a monster, but the hero becomes a monster as well, and the two live happily ever after.
* Eversion quote. The warning is quite appropriate, as the game is noted for making nervous players slightly paranoid.
* Eversion turn out to be one too, so it's a happy romantic reunion between two monsters!
* Eversion, which makes for a surprisingly good ending, as you get along well with the princess.
* Eversor Assassins are designed to be walking one-man gorefest. However, they are not genetically modified like the Space Marines. They instead use a combination of bionics and a really wild cocktail of combat drugs to increase their killing power. The side effects of these drugs is that their bodies will explode on death, and they are in a permanent drug-induced rage, necessitating the operatives be sedated and transported in stasis between assignments. The other assassin temples rarely resort of such extremes,
* Eversor assassins are drug crazed close combat monsters capable of ripping apart an entire enemy command structure, often finishing the job by literally exploding.
* Eversor Assassins, who are turned into monsters with them and sent to destroy someone.
* Ever So Slightly'' shine while playing games with multiple endings, implying that she invokes this trope by seeking out the bad endings.
* EVERSPACE, all ships, except with the weapon override, which boost your weapon damage, and you'll turn space fields in scrapyards in no time.
* EVERSPACE has many energy-based weapons. They are usually more useful against shields than armor.
* EVERSPACE, lasers are common weapons. Lasers are strong against shields, but weak against hull. They coming in two types: Pulse laser or Beam laser.
* Everspace of a weapon with insane range and damage that only gets better the more damaged your hull is.
* Eversummer Eve in 2007 without notice, quietly leaving the site in early 2008. The comic has not been updated since, and the author has since indicated on Deviant Art that it's on hiatus, but she intends to come back to it and remake/reboot it at some undetermined point in time.
* Ever the generous soul, Isabela similarly provides for Bethany should she be taken to the Circle, but the books get confiscated for being "non-curricular."
* Ever, the story revolves around the efforts of mortal girl Kezi and minor god Olus to make Kezi a goddess.
* ever to having three), they can be easily competent in any class of their liking whereas other races' perks tend to encourage them to stick to the niches they're 'naturally' best suited for. They also get feats that are useful for anyone such as "human perserverence" and "stubbon servior". Humans are special in fourth and maybe third!
* ever. To put this in perspective, the Doctor's TARDIS was already a museum piece when he first acquired it hundreds of years ago, and it's still "the technology of the gods" compared to almost anyone else. After all, the Time Lords were "the oldest civilisation" who had "turned time travel into a game for children" before humans had discovered the wheel; they also developed effectively unlimited teleportation technology "when the universe was less than half its present size". It's been implied several times in the show (and outright stated by the expanded universe) that the reason the Doctor's TARDIS looks comparatively primitive, with its reliance on mechanical switches and levers and tendency towards steampunk clunkiness, is a combination of the Doctor's preferred "desktop theme" and because it just makes it easier to interact with.

* ever turn [her] back on people that need [her]". Thankfully, the other members of the group are better at recognizing that they can't always get distracted, and are more pragmatic.
* Everwar series was given a blurb, synopsis, and release date from the publisher, and then failed to ever come out. The author, literary agent, and publisher have never released any news regarding the book, and queries to the publisher go unanswered. The previous book ended on a cliffhanger leading up to the series finale, leaving fans very frustrated.
* ever was a POV shot of one's suction-cup arm ominously approaching a horror-stricken Barbara. Cue audiences frantically discussing what might be at the other end.
* ever was named because you'd have to be high to even imagine something like it. It looks like somebody combined a worm, an octopus, a hedgehog, and some other things that only a Lovecraft could love.
* Ever watch a war movie where there's always the one guy who starts giggling uncontrollably when
* Everway: immune to aging and vulnerable to only certain types of harm.
* Everway. It's more useful for providing light than for dealing damage, but hey, you're still on fire!
* Everway through any physical substance, known examples include cutting through the fabric of space-time to create portals between alternate universes, killing an opponent by cutting his soul free of his body (without actually leaving any physical wounds on his body), and destroying a pocket universe by slicing the substance of reality into its fundamental elemental components.
* ever, which this group certainly did. The regime was soon crushed by the Holy Roman Empire.
* ever willing to cooperate with each other was to fight a more powerful Symbiote that had been spawned from Carnage's Symbiote.
* Ever wondered why many nuclear power stations are built near the coast or some other large body of water? It's so that the core can be cooled with the local water source and not have to have water pumped in, and eliminates or reduces the need for massive cooling towers. However, it's also convenient because in an emergency, they can open the sluice gates and use all those millions of gallons of water as a heat-sink. This isn't very good for the environment because unlike during normal operation, the water enters the primary coolant loop instead of going through a heat exchanger, i.e.
* Ever wonder how all car insurance companies manage to advertise that "people who switch from <competing company> to <our company> save an average of <
* Ever wonder where the term "white elephant gift" came from? In southeast Asian kingdoms, especially Siam, any courtier who received a white elephant would receive a blessing and a curse: the sacred white elephant was a sign of the king's majesty and justice, as well as the kingdom's prosperity. Unfortunately for the recipient, they couldn't put the elephants to work or ride them as they pleased: they had to keep it on hand in case the king felt like taking a ride and being virtually unable to dispose of the beast, they had to feed it and clean up after it, in addition to paying for any damages the elephant caused when it damaged someone else's property. In fact, giving a sacred white elephant became a favorite tactic of kings who wanted to punish powerful people but had no legal means to do so—by "graciously" offering them the animal, the rulers ensured that their targets would be broke, miserable, and perpetually unable to do anything about it.
* Ever wonder why Draenei females have so few unique voice lines? It's because several of them leaned too hard into this trope and got removed! A full list
* Everwood. Also Andy and Nina for some extent, although at first there was no clear sign of UST between them.
* Everwood ("Bright") dated in real life while being siblings on the series.
* Everwood count as he's with Madison when Amy finally decides to be with him.
* Everwood; Dr Abbott even openly refers to it as a greasy spoon once. Both the trope and the name are swiftly deconstructed in the very first episode wherein the

diner appears:
* Everwood drops a glass when he starts having a seizure in a late first season episode.
* Everwood fans rented a Ferris wheel outside of Dawn Ostroff's offices, attempting to help renew the show, but to no avail.
* Everwood had Irv's funeral as the penultimate episode, bringing most of the storylines near their end and being a very well-written no-flashback-needed way to connect the past, present, and future of the characters. Extra points to the make-up artists to make all characters de-age almost at will. Not only it was a very meaningful funeral, but it also paved the way for the finale.
* Everwood. She even rides a motorbike! Her granddaughter adores her and even moves in for a while, and she acts as a great (grand)mother figure to Delia.
* Everwood sliced a tendon in his hand while cutting apart frozen elk steaks.
* Everwood: While cleaning out Nina's attic, 8-year-old Delia finds an issue of Penthouse. Caught off-guard, Nina says it's an artistic photography magazine. Delia keeps it and gives it to her classmate as a birthday present. Awkwardness ensues.
* Everworld: A fight begins during a diplomatic feast. Merlin reanimates the animals cooked for it (including a boar). He also reanimates people that died during the fight so that they can keep fighting.
* Everworld alternate world, introduce telegraphs to an Elven city, and use the technology to get rich.
* Everworld and does nothing to explain the myriad questions raised over the course of the series, such as the identity of the watcher in the void.
* Everworld and/or that the laws of physics in this world are just different and assumed to be "magic".
* Everworld ensues, and one of the satyrs finds himself split in half... and the only thing that disturbs him is that he can't hold his wine anymore (he doesn't have organs or blood either, just sort of sketches). The bottom half-a-satyr just keeps trundling alongside them, occasionally falling over, and is eventually exchanged by Christopher for entry into the fairy city.
* Everworld: every god of every mythology on Earth decides to collaborate in making a parallel universe where they could all have a sphere of influence. It really gets messy when gods from other universes, like those of the Hetwan and the Coo Hatch, start barging in. And even then it wasn't without friction: Zeus mentions "that usurper Jupiter and his brood", while the gods' followers (brought over to provide them with a steady supply of worship, food and virgins) will happily make war on each other (the first book features an Aztec-Viking war).
* Everworld frozen in the underworld. Justified, as almost nothing in Everworld works the way its supposed to.
* Everworld gave a cameo to Aphrodite when the group went to Olympus. She basically struts out, sexfully supports her lover Ares in an argument, and then struts away, having made the male protagonists temporarily forget their own names. Meanwhile Eros hovers nearby and makes lewd gestures at April.
* Everworld have towards the gods of yore. They acknowledge that the gods have tremendous powers and are a force to be reckoned with, but they refuse to accept them as gods per se, and frequently insult or manipulate them for their own ends. Merlin may be a native Everworld example.
* Everworld (her sister) notes that Senna can never be trusted, because even when she's telling the truth she twists it so much that it's just another lie.
* Everworld how odd that is for an African-American atheist. Also, the queen of the Amazons is named Pretty Little Flower.
* Everworld isn't even sure if they slept together—he thought they were going to, but...
* Everworld it happens a few times, with the male narrator euphemistically saying something like "my body responded" to whichever magically-attractive female character caused it this time.
* Everworld. It's also worth noting that David points out their grasp of something as comparably simple as knot-tying and the use of a pulley leaves much to be desired.

* Everworld know a bit about Brigid, though only because she takes time to study mythology while in the Old World.
* Everworld or Atlantis (perhaps implying that Atlantis didn't sink, it was transported to Everworld).
* Everworld run into the Amazons, it's mentioned they play grab-ass with David and Christopher (Jalil having already been claimed by April, to his surprise).
* Everworld seems to be their only real resource in Everworld, they naturally have to trade for anything else.
* Everworld series are fitting. They're four average teenagers from a suburb outside of late 1990s/early 2000s Chicago that get caught up in a web of events surrounding a witch. After being unceremoniously dumped into another universe — one where the heroes, gods, and monsters of mythology (not to mention aliens) exist — they get by through a combination of 20th-century knowledge, luck, improvisation, and a bit of help from the locals.
* Everworld series are, not surprisingly, rather hard to kill. You know, being gods and all. However, what is required to actually kill them varies according to book. At first, they can be killed only by another god or the weapon of a god. Period. Later on, it is said that Hel could've been vanquished by an enchanted sword, and one character says that a fall into a crater the group is at would kill even an immortal. Nonetheless, gods are stabbed with swords, cut with blades, and shot full of arrows with little effect over the course of the books. It is possible that the books' Coo-Hatch steel could kill an immortal, however.
* Everworld series gives a reason for why witches are burned or hanged in the eponymous alternate world: their blood is poison to crops, which means no one can really afford a beheading.
* Everworld started casting psychic illusions at age eight, and only got better at them as she grew older. Even after her power-up upon entering Everworld itself allowed her to use several new types of magic, illusion remained her strongest suit. She is able to make herself appear to be anyone or anything she can picture in her mind, turn invisible, and exclusively exclude certain targets from her trickery, allowing certain people to see her while she is invisible to others. She is also apparently able to spot others using illusion, as another witch tried and failed to fool her with the same tactic in the ninth book.
* Everworld that he is, tells his mooks to "kill the cowardly one slowly".
* Everworld that it must have looked like a scene from a corny romance novel.
* Everworld: The mayor of Atlantis is also a refugee from Earth, and spends his time fending off attempts by both Neptune and Poseidon (and presumably other sea gods of all religions) to conquer his city (it helps that gods of different pantheons hate each other).
* Everworld (though they're never called that), which still move after they're killed. They came from another universe separate from either Everworld or ours.
* Everworld to other worlds, like the Coo-Hatch and the Hetwans, look nothing like humans.
* Everworld will also be Wild Cards that she can control better than her enemies can. That being said, they become savvier as the series goes on, and pretty soon they're messing up her plans as well.
* Everworld witch who is Christopher's ex-girlfriend, and is David's current girlfriend for most of the series, and his ex-girlfriend at the very end.
* Everworld, with a character making an awful pun on "gymnosperm", then announcing he'd been stockpiling it since junior high.
* Everworld with the twist that the body was a living friend, but his friends were trying to smuggle him.
* Every 10,000 Points: Just the "Unsorted" section and perhaps the non-video game examples
* Every 2D Metroid game after Super Metroid did this. When Samus takes her last hit, she freezes in place & the entire screen turns black, except for her, and her body is exposed. Each game has a slight variance to this animation:
* Every 3DS comes with an SD card and the "new" 3DS line comes with a microSD card, but they only offer a paltry 2 and 4 GB respectively. While this is usually

no problem for small games like third party indie titles or
* Every 60 years there's surge of death in the outside world, and since Death is
* Every 75 years, The Senior Partners conduct The Review. One of them comes to Earth in an avatar to judge
* Every actor will at one point encounter fans who don't seem to understand the difference between the role they play and who they really are. Some common examples:
* every adaptation of the character in some form, and constantly being featured as an alternate outfit in video games.
* every adaptation since has veered away from this, making it a genetically-modified test subject instead.
* every and ESPN plugs started to die down, and ESPN later backed out of the deal.
* every, and if they don't defeat him in a show of their best ability e.g swordplay, they become assimilated into his subconscious.
* every, and that's not counting the thousands of small guerrilla bands that sprung up throughout Confederate territory. They were numerous enough that, even if the South had won the war, they likely would have collapsed into a civil war of their own almost immediately afterwards.
* every (an early human species from back when humans were much more ape-like).
* Every Angel has a bright red core which is its sole weak point. Attacks on other parts of its body are usually healed almost instantly; even weapons of mass destruction can only render them immobile for a time until they eventually regenerate all damage. This is the main reason for employing the Evangelions against the Angels; only by creating an opposing AT field can the core be made vulnerable.
* every apartment building in the whole of France has a view of the Eiffel Tower shows the Tower, before pulling back to reveal that it's only a poster showing the Tower.) The alternative — a gargoyle's view of the city from atop the Notre Dame — fortunately seems to be limited to Paris.
* every arc arcs) is a game whose installments are released three to four years apart rather than a weekly manga.
* every are all in essence big screwed up families on their own. Even members of the same blood house were known to plot against each other politically, which was seen as especially serious business.
* Every army in Codex: Space Marines isn't "pretty much Ultramarines". Depending on who you ask this is either Ultramarines propaganda, or egregious and atrocious canon manipulation by Matt Ward.
* Every aspect of nature is represented by an avatar for the aggregate sentience of that element, which is responsible for making sure it runs smoothly.
* every attack is cast from hit points: they cost charm activations and Essence, the two resources that fuel perfect defenses.
* every a twit. He's as competent as he is irritating and as compassionate as he is both. (Well, to people not currently trying to kill him, anyway.)
* Every bar in Gotham City pays to keep several of them open just so he can have places to overhear information.
* Everybody always gets dressed and undressed left-leg-first. Didn't you know that?)
* Everybody and their uncle have probably heard Josh Groban singing "You Raise Me Up" (or if you're from Britain or Ireland,
* Everybody And then there's Wario, who says "I give up!" before blowing himself up with a bomb.
* Everybody (besides the disciples of Rastullah above) uses the calendar of the Middlerealm, just with other names for the months. And even the disciples of the Onegod observe the Nameless Days.
* everybody cheered when the four main characters were sentenced to a year in prison.
* Everybody Did It: All the suspects were responsible for the crime in some way.
* Everybody Do the Endless Loop: Cartoon dancing looks stilted due to either repetition, not following the music, looking like the wrong kind of dance (for

instance, a tango looking like a waltz) or a combination.
* Everybody Edits, a common complaint was that there was too much focus on adding harder campaigns.
* Everybody Edits has the zombie potion, which turns the player into a zombie for a minute and spreads the effect to all other players touched. Being a zombie comes with the disadvantage of lower speed, jump height, and having to respawn after the effects end.
* Everybody Edits. Not much is known about it besides that it is represented by a yellow lightning bolt.
* Everybody except poor Carrie's boyfriend finds her getting doused with pig's blood to be the funniest goddamn thing in the world.
* Everybody from all races, even God himself, is incapable of breaking Sora & Shiro's undefeated streak in
* Everybody Has Lots of Sex: A work of fiction where all or most of the characters have a lot of sex.
* everybody has taken a level on a job; they can all do some minor hacking, and the Thief — who planned complex jobs when working alone — becomes the new nominal Mastermind.
* Everybody Hates Chris always has whatever the characters are looking for and can be purchased from the trunk of his car or from the inside of his jacket. The purchases usually end badly for the consumer; for instance, scalped tickets to a basketball game or concert are usually in nosebleed sections or a toaster will burn the toast.
* Everybody Hates Chris: An admittedly short example; when Rochelle's father dies, Chris picks up the slack left behind from her grief-induced depression, basically keeping the house and taking care of her relatives during their visit for the funeral. He finally snaps and yells at his grandmother when she picks on Rochelle about making sub-par iced tea (Rochelle's mother is even booshier than she is, and will take any opportunity to unfairly criticize her).
* Everybody Hates Chris are stated by his mother to be full of drop-outs and delinquents (though we never see these schools on-screen).
* Everybody Hates Chris Chris has the white racist boy Joey Caruso as arch nemesis.
* Everybody Hates Chris, Chris is antagonized by 99% of his school. Hell, even the title says it.
* Everybody Hates Chris, Chris is running for class president and finds himself in a debate against his opponent (the biggest bully on campus). Chris is really liking how his opponent is winning over the crowd, so he starts emulating him. One line Chris likes is "_____ now, _____ tomorrow and _____ forever." Problem is, he fouls up and ends up saying "Detention now, detention tomorrow and detention forever.". Cue about 200 pounds of mainly lettuce and tomatoes, with lots of other fruit and veggies mixed in, being tossed right at him.
* Everybody Hates Chris: Chris's father is so cheap that he even complains about how much electricity this stupid fan game uses.
* Everybody Hates Chris, Chris spends a long amount of time telling his friend how miserable Superman, Batman, and other superheroes would be without their archenemies.
* Everybody Hates Chris Drew beats his neighbor in a game of blackjack by getting four aces in sequence.
* Everybody Hates Chris episode, Chris points out that his father's lack of an appetite can only mean one thing. Cue shot of Satan shivering and rubbing his arms.
* Everybody Hates Chris epitomizes this trope, it takes place in the '80s (1982–87 to be precise) and almost every single popular '80s song you can think of is heard at some point.
* Everybody Hates Chris frequently used cutaway gags to illustrate jokes during his narrations.
* Everybody Hates Chris has Chris going to buy a lottery ticket for his dad, but he decides to spend the money on something else instead. Naturally, that's the day his dad's numbers turn out to win.
* Everybody Hates Chris has this as a main gimmick. You can pretty much expect a

few of these per episode.
* Everybody Hates Chris, he has Chris join the team. Subverted when Chris fails horribly at the sport.
* Everybody Hates Chris in its last episode, except with Bon Jovi taking the place of Journey.
* Everybody Hates Chris is arguably the most popular example of this trope in television history. Inspired by the childhood of comedian Chris Rock, the titular protagonist never fails to get the short end of the stick in every aspect of his life. Whether it’s bullies, girls, school, or his family - the poor kid can’t seem to catch a break.
* Everybody Hates Chris, Julius gives Drew a Wayne "Gritzky" jersey. Then in the episode "Everybody Hates Gretzky", a couple of white guys try to steal Drew's jersey, but back off when they realize it's misspelled.
* Everybody Hates Chris, Julius goes in the bathroom and grabs what he thinks is Rochelle's butt only for it to be their new neighbor.
* Everybody Hates Chris, Julius plays Santa at the mall for extra money. When the children tell him what they want for Christmas, he makes them cry merely by honestly telling them how expensive the toys/gifts are, how long their parents will have to work for it, and how they might not get what they want.
* Everybody Hates Chris, Julius would do this, at one point offering a bribe of a single penny.
* Everybody Hates Chris: Made in 2005, the show is set between 1982 to 1987.
* Everybody Hates Chris of his father doing this to him, prompting Chris to keep it a secret.
* Everybody Hates Chris: Oh so averted. The massive racial tensions that existed in New York City are front and center. Chris has to deal with the virulent racism from both his classmates and students alike.
* Everybody Hates Chris people", but as the coach continues, it becomes clear he's a misanthrope. He mentions several negative stereotypes applied to black people, concluding with "they're lazy. White people are so lazy that they needed slaves to do the work for 'em."
* Everybody Hates Chris played with this, with a joke in the episode revolving around how if you wanted the police to make an active effort to find your missing children, you couldn't say they were black.
* Everybody Hates Chris, the babysitter they have in one episode is a teenage mom. Tonya tells the babysitter's mother "My mom told me she would kick me out if I had a baby 'cause she ain't raisin' no babies. Why didn't you kick her out?"
* Everybody Hates Chris, when Chris is thinking up ways to get revenge on Caruso, Greg suggests putting Ex-Lax in his hot chocolate, which Chris dismisses as "too typical".
* Everybody Hates Chris, when the episode aired, a 19 inch TV was a common staple in every college dorm room.
* Everybody Hates Chris with a pizza box", he says; Narrator-Chris then comments that's how George Bush got into the White House.
* Everybody Hates Hades afterlife and make both as hellish as possible, so keep them off of your "places to visit" list.
* Everybody Hates Hades: Gods of Death and the Underworld portrayed as evil, regardless of the original myth.
* Everybody Hates Hades: The god of death/the dead is the most despised of the setting's deities.
* Everybody Hates Mathematics: All the main characters hate doing math.
* Everybody Hates Mathematics: It's okay to be horrible at math. But if you fail, say, English or history, you'll be labeled as an idiot.
* Everybody Hates Mathematics: Mathematics is the one subject every student dreads having to do.
* "Everybody Have Fun Tonight" directors Kevin Godley & Lol Creme did an even more extreme variant on its jump-cut style for the music video for Rob Jungklas' song "Boystown." Jungklas directly blames the unwatchable video for the failure of his

* Everybody in the galaxy far, far away has a fantastical design to their clothing. Upper class citizens dress in primary colors, and often some sort of robe. Middle to lower class dress in contemporary clothes, but often bulkier (or just dull robes similar to Jedi). Han Solo dresses like a gunslinger, and then of course we have the Jedi's robes, which are based on monks. Most species that can be called a
* Everybody in the Gilded Poppy has money riding on whether or not Nikolai and the heroine will
* Everybody in the mobile infantry (Johnny Rico's branch of the Terran Federation Army) starts out as a private. In the K-9 Corps for example, every neodog handler starts out as an officer.
* Everybody in the show had the same two or three stock footage movements. Man At Arms walking up toward the screen, Orko bouncing up and down like an idiot, etc.
* everybody is like this — until the protagonist, Jeff, wakes up and realizes how creepy it is.
* Everybody Is Single: A majority of the cast is not married or in a relationship.
* everybody is surprised that Flonne had an actually smart idea. Flonne later asks Aramis if he thinks she's dumb.
* Everybody Knew Already: Everyone actually knows your deep dark secret, but they're too polite to tell you.
* Everybody Knew Already: Something you think is a secret, but really isn't.
* Everybody knows Carrot is the true king of Ankh-Morpork, but nobody speaks openly about it. (While Carrot would probably make a good king, everyone, including himself, agrees that Ankh-Morpork does not
* "Everybody Knows (Except You)" by The Divine Comedy. The narrator can tell literally anyone about his feelings, and does (his parents, his friends to the point of driving them crazy, random strangers on the street and even making a small child cry) but he cannot bring himself to tell the one oblivious object of his affections.
* Everybody Knows (Except You) is a variant, in that everyone can see that the singer is in love with the girl, except the girl herself. Of course, this IS because he just went around telling everybody and everything about it (to the point of driving his friends away and making a small boy cry).
* Everybody knows that the second Death Star is meant to look incomplete as a disguise, but
* Everybody Laughs Ending: An episode that ends with everyone laughing.
* Everybody Laughs Ending. Then it cuts back to the ghost Titans just floating there with Cyborg wondering what to do now.
* "Everybody Likes Rad?" focuses on K.O.'s co-worker Radicles, and how he handles becoming famous thanks to a viral video.
* Everybody Lives scenario, a large portion of the cast/all of the cast are killed off.
* Everybody Loves Hypnotoad DVD box set. As well as all 365 episodes, it has deleted scenes (identical to the rest of the show), a blooper reel (where the toad is shown upside down) and an audio commentary ("ALL GLORY TO THE HYPNOTOAD").
* Everybody Loves Large Chests is a warlock who uses demons to help it eat people.
* Everybody Loves Large Chests shapeshifts into the form of a cute catgirl as one of it's favorite disguises.
* Everybody Loves Large Chests. Starts with Boxxy, a mimic who went From Nobody to Nightmare, through a trio of centuries old demons that are masters of fire magic, melee combat and assassination, ending in an Ax-Crazy metal golem who is so strong it was nicknamed "The Rustblood Juggernaut".
* Everybody Loves Large Chests that are adept at disguise and infiltrating the societies of the Enlightened.
* Everybody Loves Large Chests The protagonist attracts a gaggle of of attractive women, despite being a flesh-eating mimic.
* Everybody Loves Large Chests The protagonist, Boxxy, is a mimic that first learns to grow legs by imitating those of a spider it observes in the Litgar dungeon complex. As a result, the chest-shaped mimic grows to resemble a giant square

chest-shaped spider.
* Everybody Loves Large Chests, the protagonist has to eat a few individuals of a species before figuring out how to shapeshift into them.
* Everybody Loves Marinette chapter "Mireille", the titular Mireille tries doing a clever double-entendre.
* Everybody Loves Raymond. A doctor announces that they are having trouble resuscitating Raymond after a very minor surgery, but seconds later he is completely fine. Debra then made everyone swear not to let Raymond's mother know about the near-death experience, since it would bring out the worst in her motherly overprotectiveness. The episode did have a little more emotion than usual, but otherwise it had the same tone as any other episode of the series.
* Everybody Loves Raymond after nine seasons of the viewers being loyal customers.
* Everybody Loves Raymond. Amy invites Stefania over to a singles party because she thought Peter might like her, but Robert is not happy with her arrival.
* Everybody Loves Raymond, Amy McDougall's religiously pious father is appalled by Frank Barone's earthy profanity. He cannot bring himself to repeat the word "hell" and creates the euphemism "The Antipode of Heaven". Frank is stunned.
* Everybody Loves Raymond and Frank continuing to torment Ray and Robert into their adulthood.
* Everybody Loves Raymond, and Judy calls Robert out on his "white rapper" act being annoying.
* Everybody Loves Raymond and Marie immediately tells Ray off for humiliating his father.
* Everybody Loves Raymond), and to write about them afterwards. He also plays a lot of golf.
* Everybody Loves Raymond are constantly dropping into his home without notice. Such unwanted behavior even makes it into the musical introduction.
* Everybody Loves Raymond, a running story line is that Debra is overwhelmed by taking care of the three children, who are nonetheless offscreen most of the time. As Ray whispers to the camera in the early season title sequence, "It's not really about the kids."
* Everybody Loves Raymond, ask where Debra and Ray keep their "after-Marie liquor." Ray starts in—"We don't have any liquor in the"—only for Debra to immediately cut him off: "Top shelf, behind the Cream of Wheat."
* Everybody Loves Raymond. Before becoming Ray's lazy, sports-obsessed pal Giani, Joe Manfrellotti appeared in Season One's "The Game" as a cable repairman who discovers an illegal splitter sending cable to Frank and Marie's house.
* Everybody Loves Raymond: Both houses have the main entrance on stage left. Both houses also feature back doors on stage right, which are also frequently used. In fact, in Raymond's parents' home, the stage right back door was used far more frequently than the stage right "main" door. Also, Ray's house has the back staircase, facing the main entrance, a staircase in stage back to the basement, and an open floor plan with the kitchen and living room open to each other. Ray's parents' house is single-story and looks considerably older, as the kitchen and living room/dining area are separated by an actual wall and door.
* Everybody Loves Raymond brother (who Robert is based on) also does this.
* Everybody Loves Raymond bullying him, because she apparently views him as being her property (emphasized when she tells Peggy "if you've got a problem, you bring it up with me" as if Ray isn't his own person, and is merely just one of her possessions).
* Everybody Loves Raymond dabbled in this from time to time, like in the episode where Ray sat with his daughter on the school bus, and in another where Marie faxed a letter to someone interviewing Robert for a job. The crowning example though, is the episode "The Faux Pas," where Ray accidentally embarrasses a young boy, by unintentionally insulting his father's occupation. The family's attempts to fix the problem, only result in the situation only get worse and more humiliating.
* Everybody Loves Raymond dealt with this. Robert tried to propose to his girlfriend, but asked for her parents permission first just out of respect. Given he's just doing this as a formality, he's shocked when they say "No." ("But thanks

for asking!") When he goes ahead with the proposal anyway, which is very romantic and gets an enthusiastic "yes" from the bride-to-be, he's slightly distraught when she asks, "I know it's just a formality, but could you go to my father and ask for his blessing?"
* Everybody Loves Raymond: Debra and Marie are both this trope. Marie has been pulling this on the whole family for decades, using guilt to get everyone to go along with her wishes. Debra is also this trope, wanting Ray to be completely under her control, telling him when he's "allowed" to relax or spend time with his friends, beating him and emotionally tormenting him when she doesn't get her way. Arguably, a large amount of the conflict between Marie and Debra could be chalked up to the fact that they're both control freaks with competing agendas: each wants complete, uncontested control of Ray for herself, and since they can't both have this, they end up fighting, while poor Ray ends up living a miserable existence between the two of them.
* Everybody Loves Raymond, Debra finds out that Ray had proposed using a cubic zirconium ring, so she went out and bought a diamond to replace. Only to discover that Ray had purchased a replacement real diamond to secretly replace his original knockoff replacement. (Since he really felt guilty about the knockoff- it just took him a few years of saving his beer money to buy the real thing). Of course the new diamond wasn't nearly as expensive as the old diamond which Debra had discarded.
* Everybody Loves Raymond: Debra intervenes when Ray is getting the worst of it from Peggy The Cookie Nazi. The scary Peggy backs down quickly, recognizing an even more powerful force of nature, while a floored Ray looks on admiringly.
* Everybody Loves Raymond, despite mother-in-law Marie's constant digs about all the dirt and mess, Ray and Debra's house seems remarkably clean — just as clean, in fact, as neat-freak Marie's house (minus the plastic wrap on the furniture).
* Everybody Loves Raymond devotes a Halloween episode to this one. In deference to the relatively family-friendly nature of the show, the condoms are referred to as "the stuff." So Ray buys "the stuff" to prove to Debra that he can be responsible. Brightly colored ones, to be specific. Unfortunately, before Ray gets to use them, Frank sees them in the bag on the kitchen counter and, thinking they're colorful candy, gives them to the trick-or-treaters.
* Everybody Loves Raymond devotes an episode to this one. The original reason Raymond removed his wedding ring is a relatively harmless brand of idiocy ("Were you spinning it again?") but there's also some tension when an attractive single woman hits on him.
* Everybody Loves Raymond down to the kitchen for a midnight snack. Being Frank, he still returns an empty bottle to the fridge after drinking from it - one of Marie's pet hates. He competely ignores Debra, who has broken into the house in the middle of the night to steal one of Marie's recipes and who is amazed she has not been discovered.
* Everybody Loves Raymond episode, "Big Shots". On the way home from a disasterous event with the 69 Mets, Robert starts humming the "Meet the Mets," tune, so Ray turns on the radio; the louder Ray turns up the radio, the louder Robert sings, until finally Robert strains his throat, and gives in, as Ray cuts off the radio.
* Everybody Loves Raymond episode features Ray and Debra lying that they didn't have dinner with Marie since they were making sure an important football game for Ray to write about was taped properly. Frank then asks to watch the tape, and things build from there until their washing machine is destroyed from Frank's attempts to fix it ("This one part won't go back") and Marie easily figures everything out.
* Everybody Loves Raymond episode "Someone's Cranky" features a variation as Robert bitterly calls Debra "perfect":
* Everybody Loves Raymond episode "The Angry Family", when Michael tells a short story about a bickering family, it results in a chain of events in which Raymond, Debra, and their in-laws end up in therapy. It's at the end of the episode that Raymond and Debra learn that Michael actually based his story off a tv show he watches.

* Everybody Loves Raymond episode "The Mentor". Ray and Robert are both upset when they meet a man who Frank was nice to back when he was an accountant and he was never nice to them. Amy mentions that Robert was so upset, he punched a hole in the wall of their apartment. Robert, of course, denies this and claims that he only did it because he thought he heard a mouse in the wall.
* Everybody Loves Raymond episode, "The Sitter", Debra tells Ray that she didn't get the grocery shopping done because she had to leave the store in shame after the kids pulled down the salsa display.
* Everybody Loves Raymond episode "Turkey or Fish", Ray tells his mother he'll eat her turkey and then mouths to Debra that he won't.
* Everybody Loves Raymond. Even the show title suggests so. Robert always gets the short end of the stick from their parents.
* Everybody Loves Raymond fancies himself as an ace repairman and handyman. As he is retired, his good intentions are focused on his son Ray and daughter-in-law Debra, who live just over the street. Frank's doom-it-himself blunders include alienating the whole street by using power tools at seven on a Sunday morning; destroying Debra's bathroom with a bodged repair on the shower; destroying both Marie's and then Debra's stoves with bodged kitchen repairs; painting Ray's house the wrong colour; and causing the stairs to collapse at Ray and Debra's.
* Everybody Loves Raymond features Cousin Gerard, the epitome of this trope. He even plays accordion at Ray and Debra's vow renewal.
* Everybody Loves Raymond for daughter Ally. Evidently IKEA didn't pay nearly enough for a plug.
* Everybody Loves Raymond, Frank is upset to learn that Ray's sons are playing fairies in the school play, so Ray speaks with the teacher to get them different roles. The only other roles available are rocks. When he tries to get them changed back to fairies, the teacher tells him that those roles have been filled by superior actors.
* Everybody Loves Raymond, Frank startles Ray by showing up out of nowhere.
* Everybody Loves Raymond had Frank and Marie living in a retirement home, and almost immediately getting kicked out. Despite the home giving a full list of complaints against the two of them, the pair blamed each other and guilted Robert and Amy into giving up their home, which they paid for, so they could live there again.
* Everybody Loves Raymond had Ray Romano actually playing the piano at the end of the "Mozart" episode from Season 2.
* Everybody Loves Raymond had to wear platform shoes in all their scenes with him. (Never mind the fact that Gleason himself only stood at 5'10"!)
* Everybody Loves Raymond has a Closet Key, and that neither of them has met "Mr. Right". This mentality lasts at least until the end of the episode: when confronted with an extremely attractive UPS worker, Ray is extremely uncomfortable until he leaves. At which point, he passionately kisses his wife just to make sure.
* Everybody Loves Raymond has several of these. One prominent example is when Frank and Marie Barone argued for a full two minutes about what "fork split" on the side of a package of English Muffins means. Frank insisted that it instructs you not to cut the muffin, but to split it with a fork. Marie insisted that it meant that they already split it for you at the factory with a fork. At the end of the argument, Frank refused to eat the muffin, because it was cut with a knife, and thus Marie had "killed the crannies and smushed them into the nooks." Marie retaliates by splitting apart Frank's newspaper with a fork.
* Everybody Loves Raymond: In Season 6, Debra and Marie get into one of their biggest feuds that lasted several episodes and was finally resolved with the Season 7 opener. The shot heard round the world? Marie brought some of her friends over to showcase a knock-knock joke from Michael and Geoffrey. To be fair, Debra was trying to settle the boys down before Marie came in and her insistence with them telling the joke wasn't helping matters. Its brought up again at the end of that episode when Ray and Frank get into a brief shouting match of their own taking each other's wives' sides, Frank saying that knock-knock jokes are stupid.
* Everybody Loves Raymond. In their first meeting she beats him up and Ray has to

be rescued by wife Debra.
* Everybody Loves Raymond, in which Ray is home alone for the weekend and Robert teases him about it, before adding "Or ARE you?"
* Everybody Loves Raymond, in which The Couch is central in both households and, in the case of Raymond and Debra, gets totalled by a runaway car. Somehow, the damage to the couch is more shocking than the fact Frank and Marie have just driven a car through the wall.
* Everybody Loves Raymond, it sums up the Barone brothers' dynamic perfectly...
* Everybody Loves Raymond; many of the more interesting long-term storylines centered around Robbie's attempts to get his life back on track. Also, Amy's family arguably became this trope in some of the later episodes.
* Everybody Loves Raymond Marie takes Ray's temperature and when she checks it, she thinks that it's wrong. She then takes out another thermometer and tells Ray to roll over.
* Everybody Loves Raymond Maybe they stick together because they're Catholic. It may be because of dependency. They can't really start over and are too old to live in another way. Ironically, they (quite arguably) have the healthiest relationship on the entire show thanks to their blunt openness when dealing with each other.
* Everybody Loves Raymond, only for the woman to actually be older than him (the age is never stated, but Debra's father looked to be in his 60s and his new wife looked to be in her 80s).
* Everybody Loves Raymond parodied it with an almost cult-like group of hippie wannabes. Robert's cousin persuades him to join this "feel good about yourself" support group; Robert gets to feeling good and convinces Raymond to visit the group. It all turns out to be a big scam on the part of the group who just wanted to meet famous sportswriter Raymond.
* Everybody Loves Raymond, Patricia Heaton and Doris Roberts) would generally have continued success after the show ended. The only exception is Peter Boyle, who died shortly after the show ended. But even then, he was already an established actor going into the show.
* Everybody Loves Raymond persona to guilt people into doing what she wants. In "Thank You Notes", Marie tries to guilt Amy into writing thank you notes to Lee and Stan who bought candles for Amy and Robert's wedding. At the end of the episode, it's revealed Marie helped Lee and Stan pick out the candles in the first place.
* Everybody Loves Raymond. Plus occasional supporting characters played by Kevin James and Andy Kindler.
* Everybody Loves Raymond, Ray accidentally lost his wedding ring, and when Debra finds out another woman was flirting with him, and he didn't mention he was married until the end of their conversation, he stands in the yard, where she's throwing his stuff out the second floor window, while he tells her, "C'mon stop! The neighborhood already thinks you drink!"
* Everybody Loves Raymond, Ray accidentally walks in on Debra's parents (who have divorced, but since started a friends with benefits relationship) much to his horror.
* Everybody Loves Raymond Ray actually calls Peggy, the leader of his daughter's scout troop and mother of her best friend, his "arch enemy".
* Everybody Loves Raymond, Ray and Debra are debating whether or not to hold the twins back a year in school. This leads to a shocking revelation for Raymond: his mother made him repeat a grade in preschool, not for academic reasons, but because she enjoyed walking him to school.
* Everybody Loves Raymond, Ray discovers acting utterly pathetic is apparently the most attractive thing a man can do for a woman. He uses this to finally get some alone time with Debra, and a friend of his uses it at the very end to successfully woo a co-worker he's had a crush on.
* Everybody Loves Raymond: Ray is frequently called out for his bad poker face.
* Everybody Loves Raymond, Ray keeps fairly calm about his parents driving their car through his wall, and doesn't even complain when his father practically refuses to pay for the repairs despite the accident being entirely his fault. The replacement wallpaper not matching (by a near imperceptible margin), however, sends

him into a screaming fury.
* Everybody Loves Raymond. Raymond runs into trouble when attempting to prove to Debra that he is a responsible parent and husband. He buys a can of potent insect spray and liberally applies it everywhere in the kitchen, so as to avoid the expense of calling Rentokil. While he is on the phone, the inflammable spray catches light from the stove. Soon, the kitchen is ablaze. When he finally notices he runs out for the garden hose only to discover it doesn't stretch that far. Debra walks right past him and picks up a fire extinguisher...
* Everybody Loves Raymond, Ray's father Frank was a veteran. He served in Korea and tends to bring it up when he's trying to get away with something.
* Everybody Loves Raymond, Ray teases Robert about how when he was a child, he was scared of a shoe tree in his closet which he thought looked like "a monkey holding an axe".
* Everybody Loves Raymond revolves around Ray's taping a football game over his wedding video.
* Everybody Loves Raymond Robert Barone at first refuses to believe his father has lost his sense of taste and smell. He argues that the bottle of jalapeno sauce under debate has been hanging around his mother's kitchen since before the Korean War and has denatured. He then proves his argument by taking a long swallow. Thirty seconds later he is hanging on his back underneath the kitchen cold tap and Debra is berating him to at least use a glass.
* Everybody Loves Raymond, Robert either is this or becomes this over the course of the series due to his many misfortunes.
* Everybody Loves Raymond, Robert insists for several episodes that a bull gored him in the "upper thigh".
* Everybody Loves Raymond, Robert is purposely thumping a chair up and down so his mother will hear it through the walls and think he and Amy are trying to conceive.
* Everybody Loves Raymond seems to have a deep appreciation for monkeys. The best example is when he mentions this one time when he and his family were at a zoo, and he was watching a man with a monkey, and Debra simply gave him the "don't even think about it" look just for thinking it might be fun to have a monkey in the house.
* Everybody Loves Raymond sets in when you realize that the car flattened their couch — where they had been sitting just seconds earlier.
* Everybody Loves Raymond shows mediocre singing skills at the end of "Sweet Charity," Patricia Heaton is an accomplished singer.
* Everybody Loves Raymond spoofed this trope. Ray's brother Robert, desperate to fit in with his African-American partner on the police force and her friends, spends most of the episode trying to act stereotypically "black." Raymond and the rest of the family are bewildered by this. At the end of the episode, Robbie's partner reveals to Ray that Robbie's new behavior is annoying and offending her friends, unsurprisingly. When Ray tells Robert about this, it results in the classic line:
* Everybody Loves Raymond started off with Robert joining something similar to a Scientology group, and acting like he was lobotomized. Then he invited Raymond, and it was accidentally revealed that the only reason that Robert was invited in the first place was to get to Ray. Robert, naturally, was crushed. However, both of them used the group to stage an intervention in order to get Marie and Debra back on speaking terms.
* Everybody Loves Raymond that wherever men are gathered together who have done dumb bone-headed things to aggravate their wives, however dumb, however stupid, they can take comfort in saying
* Everybody Loves Raymond the good cop and the bad cop, switching between roles. To top it all off, he was trying to interrogate his brother and his father.
* Everybody Loves Raymond, then has to blunder his way through an explanation of what she shouted "Oh my god" at in Manhattan that caused him to think of the book.
* Everybody Loves Raymond. The poor woman had no idea that the brakes were out on the car.
* Everybody Loves Raymond, there is the episode where Debra Barone is arrested and

incarcerated for drunk driving. Seeing her in the lock-up makes her brother-in-law, Lieutenant Robert Barone, do a very big double-take.
* Everybody Loves Raymond. There was one that had Marie not wanting to meddle in Robert's life and Debra thinking it's not meddling as long as it's out of love. Another has Robert saying he found the love of his life Joanne who he later divorce. But the biggest would be a flashback of a pregnant Debra wanting to move to the house thats next door to Marie and Frank, thinking it be perfect since they could see them all the time.
* Everybody Loves Raymond: The Season 6 episode 'Tissues'. Ray complains that his wife won't allow him to make household decisions, like the style of kitchen curtains to buy, and she gives him more freedom. His decisions are all criticized by the family: the garden hose is too short, the tissues he buys are oily, etc. Later, he is alone in the kitchen and distracted by a phone call, when every decision he made contributes to the chaos. the oily tissues catch fire, which spreads quickly because of a flammable bug spray he purchased. Ray scrambles for his hose, which doesn't reach the kitchen. Finally, Debra stops the domino rally by grabbing a fire extinguisher she purchased and putting out the flames.
* Everybody Loves Raymond to her son, is appalled and takes Debra's side, considering Ray has really crossed a line here and behaved thoughtlessly.
* Everybody Loves Raymond uses this trope pretty regularly, but offered a realistic subversion in at least one episode. After Debra criticizes Raymond for not picking up on her hints, he responds by saying that, after being married to him for so long, she should've already known that he can't take hints, and thus should've just told him directly. She reconsiders, admits that he's right and apologizes as well.
* Everybody Loves Raymond very visibly pregnant when Debra certainly wouldn't be; they mostly went the baggy clothes route, which was...somewhat weird when the focus of the episode was Raymond moping about how he's not attractive enough for Debra, considering she looks like she's smuggling a basketball under a very loose shirt.
* Everybody Loves Raymond was gored by a bull in the backside (although he insists it was in the "upper thigh").
* Everybody Loves Raymond was made a producer on the show from the get-go, since the basic format was based almost entirely on his stand-up comedy.
* Everybody Loves Raymond, when Ray gets a satellite dish with all the sports packages to help with his job as a sports reporter, everyone in the neighborhood (including his parents) starts acting nicer towards both Ray himself and Debra, so they can come over to their house and watch TV.
* Everybody Loves Raymond. When Ray hurts himself in a particularly athletic bedroom session, he claims he tripped on a broken step to his parents. It backfires when turns out the stairs really were broken and Frank falls THROUGH them when he investigates.
* Everybody Loves Raymond. When Ray tries to put out the fire with a garden hose, it's too short to reach into the kitchen, and sprays water all over the living room. Debra appears and calmly saves the day with a fire extinguisher, and the episode ends with her looking through a book of samples for new kitchen curtains — and giving Ray a stony gaze when he moves to make a suggestion.
* Everybody Loves Raymond. When Robert found out, it became another point of contention against his younger brother Ray: "You were conceived legitimately. You win again."
* Everybody Loves Raymond where an episode shows what he's still up to when he and Doug hang out and try to go to a nightclub, acting as an epilogue to the character.
* Everybody Loves Raymond, whether or not more extended family members or Debra or Amy's parents are involved.
* Everybody Loves Raymond which uses a whole slew of these to drive the plot.
* Everybody Loves Raymond, which wanted to re-air the episodes the next morning for people who missed them, and as such decided to use pre-watershed censorship standards on a post-watershed show. In particular, Channel Four refused to air two Season Six episodes, "Marie's Statue" (suggestive artwork) and "No Roll!" (Ray and Debra's sex life).
* Everybody Loves Raymond will reveal some things during DVD commentaries. In the

commentary of season 6 episode, The Skit, He has stated that he gets fans asking him why Debra is always so mean to Raymond. He states his answer is always because Raymond has earned it.
* Everybody Loves Raymond with an emotionally illiterate father and play favorites to such an extent that you wonder if Social Services might at least have placed Robert and Ray on an at-risk register...
* Everybody Loves Raymond, with Raymond being woken and blurting out things like "There's pudding everywhere!" or "It's all squishy!"
* "Everybody Loves Saturday Night." Made ten times worse by the fact that the lyrics repeat in
* Everybody Loves Zeus: Gods of light and the heavens depicted as good and pure.
* Everybody Loves Zeus: Gods of light and the heavens portrayed as good and pure, regardless of the original myth.
* Everybody Must Get Stoned: Most or all of the cast gets exposed to some kind of substance that alters their behavior.
* Everybody Must Get Stoned of overlap with drug culture. Many hippie gatherings were notorious for spiking the beverages with psychoactive substances, or finding some other way for everybody to imbibe.
* Everybody Must Get Stoned: When a group of people get stoned, often by accident.
* Everybody on the ground knew that Soyuz was unready to fly, but the pressure to launch was coming from the utmost heights, so no one could really insist.
* Everybody Pees animated jingle by the National Kidney Foundation, the song has a lyric "Fido gets to mark his territory" and a dog is seen peeing on a couch.
* "Everybody Poops" by Buster Puppet, the three certainties are listed as death, taxes, and everybody poops.
* Everybody's Dead, Dave", the protagonist was the only survivor of his ship after a storm on the Red Sea.
* Everybody seems to take for granted that Howard Shore wrote the "Far Over the Misty Mountains Cold" tune for Peter Jackson's
* "Everybody's Everything" was based on the obscure single "Karate" by the Emperors.
* "Everybody's Fool": Either Amy endorsing the "Lies" soda drink can or the (
* Everybody's Gone to the Rapture. Blimey, no one's going to get THAT reference"!
* Everybody's Gone to the Rapture the titular "Rapture" itself is an example, particularly how hostile or benevolent it actually is.
* Everybody's Gone to the Rapture, this actually took place prior to the events of the game, in-universe; the village the game takes place in was apparently quarantined in the days leading up to the "Rapture." Plenty of people still tried to escape, with varying results.
* Everybody's got somebody but me". The title says it all, really. Surprisingly cheerful melody, though.
* Everybody's Gotta Leave Sometime gang has remained frozen in time since 1950 until Charles Schulz's retirement, but after the end of the strip they'll begin aging in real time. Charlie Brown wonders if he's already growing up.
* Everybody's Gotta Leave Sometime gang have a last get-together before parting ways forever. And even though it's their last day together, Lucy and Violet are unable to say their most heartfelt goodbyes to Charlie Brown without adding some putdowns.
* Everybody's Gotta Leave Sometime gang have a last get-together before parting ways forever, and for once Charlie Brown gets a little of happiness sent his way. Long-time bullies Violet and her friend Patty praise him a bit in their own way, and Lucy Van Pelt points out that his baseball team always sticked by him, even though they hardly won any games. Peppermint Patty also gets a bone when Charlie decides to keep hanging out with her.
* Everybody's Gotta Leave Sometime gang have just found out that their creator is retiring, which entails the end of their eternal childhood. After their last get-together they'll part ways, perhaps forever, and from that moment on, they'll grow up and eventually join the adult world.
* Everybody's Gotta Leave Sometime well-hidden but it exists, as proven when she

points out to Charlie Brown that his baseball team would never pick another manager.
* Everybody Smokes. It still shows up in period pieces, but even then modern attitudes towards smoking have caused a decline in those kind of depictions.
* everybody's stalking the protagonist, she's usually stalking the group. Of her friends, who often know she's there, and panel shots portray her as relaxing in their vicinity as much as actually watching them. This makes it come off as just a more extreme case of not being comfortable too close to too many new people at once, which isn't that odd for the shut-in she was at the start.
* everybody's submariners, simply because it was completely impractical to do anything else, and the laws were rewritten. An attempt to prosecute Admiral Doenitz at Nuremberg on this basis was dropped when US submarine commanders testified they did exactly the same thing, although he was convicted of other charges.
* Everybody's Talking About Jamie (2021): "This Was Me", which replaces "The Legend of Loco Chanelle (and the Blood Red Dress)".
* Everybody's Talking About Jamie, Jamie's teacher Miss Hedge assumes that his mom and her close friend who's helped to raise Jamie after his father left are dating.
* "Everybody's Talkin'" was written by Fred Neil, but is most often connected to
* Everybody Talks a girl in red sunglasses seduces several male patrons at a drive in movie theater, and once she gets them alone she turns into a fire breathing demoness and eats them.
* Everybody), the series really would have been a trilogy. Of course, this is intentional, as one of the major themes of the series is the problems caused by poor communication and unwillingness to talk.
* Everybody thought that CM Punk wouldn't go into detail about what happened when he left WWE back in January 2014. Then the 27th of November happened, and the Internet exploded.
* Everybody two inches from a recruit's face will impress upon said recruit how important the situation is.
* Everybody Wants Some!! but set in 1980, so fittingly it has a similar mix of iconic late seventies to early eighties hits.
* Everybody Wants the Hermaphrodite: An intersex character has the most admirers.
* Everybody Wants the Hermaphrodite: Hermaphrodites are sex bombs because they have men's "having sex is a mark of honor" code without women's "sex makes you a whore" stigma despite having attributes of both genders.
* Everybody Wants the Hermaphrodite: Since they have both genitals, intersex characters are found attractive by everyone regardless of gender.
* Everybody Wants the Hermaphrodite: The Priestesses of Ishtar were transexuals/crossdressers representing the Goddess. Having sex with "her" was a sacred duty and people jumped at the idea.
* Everybody Wants the Hermaphrodite (when the "dude" has female parts as well as male ones)
* Everybody Wants to Rule the World (which is the subject of the song).
* Everybody Was Kung-Fu Fighting: Many people are skilled martial artists.
* Everybody Was Kung-Fu Fighting: This is all over the place, though generally there's some narrative focus other than just the fighting.
* Everybody who becomes a Power Ranger automatically knows how to pilot their Zord. In the original series,
* every boss, but given the ease of most of them, its pretty pointless to do so. They are the ones that give the nice loot, after all. In addition, crafty players have found ways to bypass several normal enemies with various tricks, although the usefulness of some are debatable. And one of these, the infamous wall-walking bug, was almost entirely patched out of the game after a number of rather blatant exploits.
* Every boss not important to the story is simply a giant version of a normal enemy, a practice that would carry over to
* Every bowling game comes down to either striking out or converting an extremely tough split.
* Every boxing match ends with a knockout, usually after the scrappy underdog has

taken a beating that would certainly put him behind on points, and been knocked to the mat the maximum number of times possible without losing by TKO.
* Every Breath You Take a conventional love song, but rather a declaration of intent by a stalker, came like the proverbial bucket of cold water in the face...
* Every "Bret Easton Ellis" book share the same cast of characters and even places in the same world, even old characters making appears in later books, like for example in "The Rules of Attraction" on of the main characters is Sean Bateman, his brother "Patrick Bateman" had a chapter in the book and later became the main character in "American Psycho", even Sean had a minor appear. Also is indicated that "Story of My Life" by Ellis friend's "Jay McInerney" also is set in this world for the appear of the protagonist "Alison Poole" and she even is a main character in "Glamorama" as Victor's girlfriend.
* Every Bullet Is a TracerBullets leave visible trails in the air to make it easy to tell which way they went.
* Every Bullet Is a Tracer: You'll be able to see the path of bullets to assist in aiming or following the action. This helps deter camping and informs players where the fighting is.
* Every Button Hurts the Other Guy: After Afro's tirade of insults, Russel responds by call him a loser.
* Every Button Hurts the Other Guy classified, but this doesn't stop her from absent-mindedly letting most of it slip.
* Every Button Hurts the Other Guy has a poor (and inconsistent) grasp of English syntax, but is exceptional in this despite his being from a comic with an international cast. Russel sometimes gets in on this too, which is especially odd considering he's one of the few native English speakers.
* Every Button Hurts the Other Guy has matching blue hair and eyes as part of her deliberately anime-reminiscent aesthetic.
* Every Button Hurts the Other Guy Mao-Yin works for the Interpol stand-in Intercops.
* Every Button Hurts the Other Guy spouts a constant stream of the spiteful variety during his fight with Russel.
* Every Button Hurts the Other Guy, their name is given in a caption box, accompanied by a humorous title or description.
* every call for help as New York had plenty of police (and other heroes) to handle run-of-the-mill crime.
* Every camera, whether still picture or video, always captures the glamour form and never Tamamo's true form, much to the Photography Club's frustrations.
* Every cape has limitations to their powers, dictated by an in-universe law known as the Manton Effect
* Every Capture the Flag map is just two bases that are exactly the same except they're mirrored and palette-swapped, with a few paths in between that connect them.
* Every car Clark seems to come in contact with explodes for no apparent reason other than "it looks real neat on camera."
* Every card has a line for summoning, attacking, evolving, and dying.
* Every Car Is a Pinto did explode in collisions, but it was only one model of Pinto that was affected, and later models fixed the issue.
* Every Car Is a Pinto, the Hellhound Flame Tank can suffer a catastrophic explosion even to a mild hit as a result of its flamer tanks going up.
* Every cartoon Don Hertzfelt created, especially considering that he animates
* Every case Sherlock has to solve ends up having been orchestrated by Moriarty, looking for a fun challenge. It's implied that he, as a consulting criminal, has been arranging a vast array of crimes all over the place.
* every Celestia toy out there except for the Limited-Run white Talking Celestia.
* Every cell of my being burns with white-hot ecstasy. run of books. Thanks, DC.
* Every channel related to Disney closed in New Zealand on November 30, 2019, though the channels still lived on through Australia at the time. Other countries then followed suit, with all three channels affected, with some due to Disney+ coming in soon on these territories.

* every character confirmed to have Conqueror's Haki is capable of using it as a special, even characters who have yet to be shown using it.
* Every character has a standard vehicle with a standardized weight and whose stats are a compromise between balance and the character's strength and weaknesses. Pictured above, Mario is looking for the perfect balance, his stats being the closest to the middle.
* every character in the film could fit this trope. Possibly intentional? The four main girls were particularly creepy whenever they stood in a row and just stared someone down.
* Every character is absent for at least one episode in the eighth season. It gets really noticeable when there are whole episodes without JD, the star of the show. One episode only featured his voice, as he talked to Turk and Elliot on the phone. One scene had Turk upset to find that JD has gone to Disneyland without him. Strangely, Turk appears in more episodes than JD, according to
* Every character's fighting style is clearly influenced by their personalities and life experiences. Their techniques and game mechanics revolve around who they fundamentally are and what
* Every character that he kills off that gets a death scene of their own concludes it with the line "Oh well. Never did want to live forever!"
* Every character who eats the "Diet Cake" in the tenth episode of the
* Every character whose consciousness derives (either fully or partially) from a Xehanort will inevitably resort to this, usually for the purpose of monologuing. Master Xehanort gets to deliver a particularly-sesquipedalian two-word insult - "Feckless neophyte" - though the rest of the Xehanort incarnations each have their own chance to try their hands at it.
* every Christian has a "spiritual gift" which is a "manifestation of the Spirit for the common good". He ends up listing miracles & healing & prophecy alongside such mundane examples of service as "administration" and "teaching" and "encouraging".
* Every Christmas/New Year holiday break, Radio New Zealand goes "mufti day" and hosts the "
* Every CL4P-TP model has a self-censorship program installed that automatically bleeps swear words if they try to speak them. This is most commonly displayed by
* every class can be black if the yellow variant (default for spellcasters) is used.
* Every class except the Soldier can equip a Bio-Amp and/or an Omni-Tool. Most amps and tools focus on one or two of three factors. The Savant variation gives the maximum bonus on all three factors. The only reason to use any other amp or tool over a Savant is if you don't have enough to go around. Similar to the Colossus Armor, they require a certain license, and have a notoriously low spawn rate. Fortunately, completing the
* Every class of 'mech also tends to have a 'standard' ground speed, especially amongst 'mechs from the original 3025 timeline. This is because a 'mech's land speed is based on its engine size divided by its weight, and the heavier the engine is, the faster the 'mech is for its weight. This means each weight class of 'mech has 'mechs with intentionally undergunned engines, making it slower than the default but giving it more weight available for weapons and ammo. Classic examples of glaciers include the
* Every coming and twists the attack as needed, and so on until one side or the other goes down.
* Every commentary past the series midway point also somehow manages to bring up
* Every commercial advertising a pillow will show someone testing it by dropping a bowling ball, dumbbell or other heavy weight on it to show how supportive it is, often with a nice fragile egg under it to make a big messy result. But, unless you're a
* Every companion since Rose has had their phone upgraded. They're referred to as "superphones". The Doctor themself has one that originally belonged to Martha Jones.
* Every competition show on TV (especially cooking challenges) insists on going

into the back stories of the contestants. Their drug addictions, homelessness, sick kids. Has nothing to do with their winning or losing (hopefully), it just makes you glad if one guy wins and sad when another loses.
* "Every Contact Leaves a Trace"). When it went to court, the defendants attorney tried to argue that the real suspect must be whoever the vomit belonged to. Thankfully, the EMT came clean after the people on the scene were reinterviewed and the trial ended in a guilty verdict.
* Every couple of months, there will be an article in some magazine or a book by some non-writer about why African-American women can't seem to get married. The reasons cited will usually be the same: 1)
* Every couple of years, a story about a college fraternity (or occasionally even
* every Court student has unusual talents of some sort, so it may be less of a school and more of a research project. Time will tell.
* Every Covenant Shipmaster has his own on the bridge of his ship. It's a fairly simple gravity throne, without any of the Prophets' offensive attachments, but the simple fact that Elites like Rtas 'Vadum and Thel 'Vadam direct planetwide destruction from them is enough to make them cool.
* every cultural reference made. Suffice to say there are at least as many words in the annotations as there are in the original stories. One particularly in-depth aside takes up a full two-page spread, written in 8-point font. In a large-format hardback.
* Every cutscene you've triggered will be permanently unlocked in the Story Gallery, even if you didn't save. Equipment is also permanently acquired without needing to save the game. This makes farming items and collecting optional cutscenes much easier, since you can simply return to the story title screen whenever you need without losing any data. Unfortunately, if you lose a match and already arrive at the victory/loss screen, the loss will still count even if you shut down the game without saving.
* Every Dalai Lama is believed to be the reincarnation of the original Dalai Lama, who returns to help his followers rather than
* Everyday Chemistry during their solo career, with the central conceit being that it's actually an album from a parallel universe where they never broke up.
* Everyday Heroes) and was less than thrilled that Summer was about to enter such a fight with so little control.
* Everyday Heroes does, in fact, have only one Steve, it had at one point two Janes (who were members of the villainous team "The Jane Gang").
* Everyday Heroes from a speeding freight train, and foiled a bank robbery... all before he even got to the office. His biggest worry was being an hour late to work.
* Everyday Heroes from caving in her former boss' skull with a hammer.
* Everyday Heroes has a cast page that lists twelve major characters, plus a couple of dozen minors, not including one-episode appearances.
* Everyday Heroes. However, since it only took him two minutes of work, at his regular hourly rate, his fee amounts to five dollars total (or, as he puts it, "lunch at Taco Bell").
* Everyday Heroes Iron Jane to prevent her from committing murder for revenge.
* Everyday Heroes is actually "Wind Beneath My Wings". (If you can read music, you'll notice the melody is from the chorus, "Did I ever tell you you're my hero", which seems appropriate.)
* Everyday Heroes is much more humanoid than he is. Their kids are somewhere in between.
* Everyday Heroes is the speedster on the S.A.V.E.U.S. team. Her top speed hasn't been clocked; one treadmill got up to 400 mph before blowing up.
* Everyday Heroes Judging from hints in previous pages, this is Jane's cousin, who is married to her husband's arch-nemesis.
* Everyday Heroes. More recent chapters have lightened up and brought back the comedy.
* Everyday Heroes Mr. Mighty was ticketed for not carrying his registration while stopping a bank robbery. (It was his first day at his new job, and technically he hadn't started work yet.) Since it was a minor infraction, he simply had to do some

community service work (which in turn led to another story arc).
* Everyday Heroes - once in a brief flashback where Mr. Mighty thwarts one of Helen's capers and again where she appears as Dr. Unpleasant's lawyer.
* Everyday Heroes on the victor ... which, at age 7, amounts to "You big stinkybutt!"
* Everyday Heroes, resulting in a broken ankle for her (and some very unladylike language).
* Everyday Heroes's High Evolutionary (mentioned above), two members of the S.A.V.E.U.S. team were created by the Somewhat-Below-Average Evolutionary.
* Everyday Heroes. Their relationship and subsequent marriage is implied to be the reason Mr. Mighty has been relegated to the lower tiers of superherodom.
* Everyday Heroes. The main character, Mr. Mighty, wears his superhero outfit all the time, even when doing yard work and chatting with the neighbors.
* Everyday Heroes to hide the fact that he was a serial killer who targeted women. He's not discovered until he kills one of his teammates - because the female hero he'd targeted (under the guise of robbing the building she was guarding) was replaced with a male.
* Everyday Heroes was caught in a training accident while in the Army. Because of this, his spine is bent at a right angle; still, he manages to work full-time running an amusement arcade.
* Everyday Heroes, where she lets Summer's own words sink in, that really does it.)
* Everyday Heroes ... which has a label on the side that reads, "Warning, Plot Device!"
* Everyday Heroes, who are avatars for the author and his wife. Oddly, she's appeared more often than he has.
* every day. If a movie premieres on one of the channels (typically on Friday), you can expect it to air several more times throughout the weekend into the next week.
* Every Day. In the film adaptation, at least, A convinces Rhiannon to date one of her friends, and the next day said friend compliments her.
* Everyday is an adjective, meaning "ordinary". Every day is an adverb, indicating how often something is done.
* Every Day Is Earth Day”, Jet says that he loves Earth Day, but then asks what it is.
* Everyday Pleasant Goat is boring because it's literally just clips from older episodes. They prefer to watch the actual full episodes that the clips originally came from.
* Everyday Saints is a book written by a Christian bishop about his conversion, the monasteries he lived in and the ascetics who influenced his religious life. Nobody at all expected it to be a success among anyone but devoted churchgoers. Instead, it became wildly popular, topped the 2011 bestseller list in Russia, had to be reprinted six times within a year from the first publication, and was translated into over a dozen languages.
* Every Day so the only indication of his gender is in the book summary. A is content with his life, never getting too attached, until he wakes up in the body of Justin and falls in love with his girlfriend Rhiannon.
* Everyday Use, Mama's daughter Dee is trying to immerse herself in her family's African culture, but repeatedly fails to understand its true meaning, or what it means to her family. She changes her name to "Wangero Leewanika Kemanjo" to protest the oppression and cultural whitewashing of black Americans, ignoring Mama's protest that the name "Dee" is just as important to their family if not more, having been passed down through many generations. The title of the story comes from Dee/Wangero's reaction to Mama not giving her a particular handmade quilt to hang up, saying that it should go to her and not her sister Maggie because the latter would "probably be backward enough to put them to everyday use". Dee/Wangero only views the quilt as a kind of trophy, something to be used to display pride in her heritage, while Maggie learned to make quilts from their mother and even sewed some of her own quilts, showing a more in-depth understanding of their family's traditions that she doesn't flaunt or take unnecessary pride in.
* Every DC cartoon has had to deal with this since the end of the beloved and

influential
* every death and tragedy in the season, which took away much of the impact present in the original release; where everything went to shit with very little warning.
* Every December, they run a touching "TCM Remembers" montage between shows to acknowledge film-related personalities who passed away that year; it tends to run 5+ minutes due to its thorough approach — cult favorite figures and behind-the-camera talent such as special effects technicians and costume designers are afforded the same time and affection as A-list stars and directors.
* every", despite the fact that Adams was directly involved with every one of them that was made when he was alive, and intentionally designed each of them to have significant differences from one another.
* every detail about how things are currently going. Equally, a lot of empty phrases that Japanese use are often misinterpreted because of this by foreigners (such as the infamous cases of Japanese using "Yes" when being asked a question).
* Every diclonius, despite being little girls, have enormous psychic power. This coupled with constant abuse and being ostracized from normal humans as well as a predisposition towards killing said humans (this may be a side effect of the abuse) creates a tragic and deadly experience for all.
* Every disguise put on by Team Rocket for the main characters, ever. In fact, the only "disguise" the main characters
* Every Disney era film to date has also included a surprise cameo by a legacy character:
* every don't like watching them eat or even thinking about it. The vampires are nearly mindless predators, and most hominids will happily kill vampires whenever they can for self-defense if for no other reason.
* Every D.W. Griffith film made from about 1910 on. Sometimes The Cavalry is one man, sometimes it really is the Cavalry. And sometimes...well, see below.
* Every Earth in the multiverse has lost people, and hence all the heroes have lost people they love.
* Every edition of the game has had a major revision about halfway through in order to, depending on who you ask, fix balance issues or sell more books. The revision of third edition is officially called 3.5. The revision of second edition ("Player's Options") is frequently called 2.5 and that's no big deal. However, calling the revision of fourth edition ("Essentials") "4.5" is a berserk button among fans of that edition.
* Every Elder Evil is immune to a slew of status conditions and magical effects, including petrification, anything that would alter its form or reduce its ability scores, and mind control. Your wizard will
* Every elevator in that you can die from falling off has inevitably accumulated a kill count, but far and away the most notoriously evil are the Undercity elevators (coincidentally, the obvious way to enter the city), the Aldor Rise elevator in Shattrath City, and the
* every employer in the city has need of Shadowrunners. Including some of the older, richer 'Runners. Keep in mind that the Seattle Metroplex is basically a 2070s city-state, with a population higher than many modern countries. The average citizens aren't street toughs or Runners, they're the millions of perfectly normal wageslaves living their mundane little lives behind all the security and comfort of their favorite megacorp (after all, forcing your workers into poverty and death reduces productivity and profitability). Those couple thousand Shadowrunners are the rare tools used by the major players in the city, doing the sabotage and espionage that big corporations use to one-up each other, not a large portion of the overall population.
* Every engine, carriage, truck, and many other vehicles and machinery in
* Every engineering project has to choose between the two of three: how fast you can get it down, how cheaply you can do it, and how good the quality of the object is.
* Every Environmental Scare Ever. According to Paul Ehrlich we've all died of skin cancer from UV exposure thanks to aerosol cans, the world is so crowded people are falling off, and there's no clean water left to drink— oh, and the ever-

popular 'we're running out of resources!'. These issues are real, but irrational attempts to solve them can and have made matters worse.
* Every episode, Abby is this. Pauley Perrette has a degree in criminology.
* every episode, about halfway through, the show cuts to two of the Death Note rules showing in the screen back-to-back. However, instead of playing music over this part as usual, this episode leaves the moment entirely silent - with the exception of one bell toll. Not to mention, the rules that it's showing us are these:
* Every episode, and in English. Even though most episodes don't end on cliffhangers. Originally in all caps, it was changed to mixed case when the show shifted to widescreen. The more recent dubbed episodes have the narrator say "...as the journey continues" to coincide with this.
* Every Episode Ending: A recurring element that concludes each episode/entry of a series.
* Every episode. Most of the time, unlike the majority of the uses of this trope, the names don't correspond to the locations of the cons, but facets of the cons. For example, the first part of the second season finale is called "The Three Strikes Job", because the con involves a baseball team.
* Every Episode of Popular Space Show™, in which two spacecraft captains, during a confrontation, complain that the other's ship is at a weird angle. This cumulates in one teleporting the other onboard, sideways.
* Every episode on [adult swim] that was rated TV-PG was re-rated to TV-14 except for "Peter Got Woods".
* Every episode title follows the pattern "A and B," "B and C," "C and D," etc. The final episode title creates a loop.
* every even without the conspiracy angle, such as eyes incorporated into the logos of home-security products. This makes even less sense if you know the symbol can also be used to represent God (because he is omni-cognisant.)
* every. Everyone is a fighter, may they be waiters, labourers, cooks...
* Every Extend, although you can also summon him by having 8 Quickens (the cap) regardless of other conditions.
* every Fable gets their power from this; Frau Totenkinder specifically gets her power from 'other' sources. (Don't ask.) Popularity equals power is a theory that's never been tested under controlled conditions.
* every fact in this book that I can verify independently is wrong. about this would be to the benefit of her credibility.
* every faction acts like this, and other than a few defectors from the underclasses absolutely nobody is buying it.
* Every faction's basic infantry can be sent into an enemy-controlled neutral building to clear out the infantry bunkered inside. However, it's not longer a one-hit move; instead, sending in a shielded Allied Peacekeeper or banzai-charging Imperial Soldier will take out a few infantry, but they will die in the process. The Soviet Conscript, on the other hand, just tosses Molotovs into the building until everything in it is dead.
* Every Faggot Ever has VERY limited animation. All the characters are stiff figures who glide along the floor, reverse the wording on their clothes when facing the opposite direction, and only move their mouths when talking.
* Every Faggot Ever, the faggot starts making claims of how he and his army of atheists are going to shoot up the school, which a student tells him sounds like a legitimate threat. The faggot tries hiding behind the First Amendment to justify his saying such things, and it just gets him in trouble with the school security guard.
* Every Faggot Ever: The titular faggot is not well versed in the art of interacting with other people. He usually walks up to people and tries to rope them into conversations only he's interested in, and made a very vulgar come on to a woman in episode 5.
* Every famous figure in history is a Templar/Assassin/Ally of either side. For the third variety, see
* Every famous Linux distro has one of these. The Gentoo "hand", the Ubuntu

circle, the Debian spiral... you get the picture.
* Every fan theories that he is a Force-sensitive who slipped through the cracks.
* Every featured a bad guy of the week who would open a store that featured this particular trope as part of their product or service. It invariably sold ridiculously well.
* Every female Freelancer counts on one level or another, especially
* Every few months or so, an article comes out saying that Facebook, Twitter, and texting make children and teens less socially interactive/have less empathy/have poorer grammar (despite the fact that you could say that about anything that allows you to communicate without actually talking to the person). This may or may not be true, however the way the media goes on about it you would think all people under the age of 20 who use social media are anti-social basement dwellers who spend all their time "sexting". This is probably a continuation of the fear when
* Every few months, some major media network gets hold of a controversial scene/level/mechanic in a video game and raises a huge stink about it, claiming it's
* Every film also has the phrase "May the Force be with you" or a slight variation.
* Every film has the phrase, "I've got a bad feeling about this." Much
* Every fishman/mermaid and so far merman/mermaid couple falls under this. Also considering the almost random nature of seafolk genetics, and the fact that Queen Otohime was somehow able to give birth to Shirahoshi, this might also fall under
* Every floor in the game offers 3 or 4 medals by completing certain criteria. Getting all these medals requires doing a good bit of the aforementioned fishing and Spheda.
* Every forever. He can never have her, but is constantly tormented by visions of her and women who look just like her, both of which often cause him to take avoidable risks and make mistakes. If one hopes to have even a slim chance of defeating a Darklord, they must know what the flaw is and how to exploit it.
* Every formally-recognized country in the world has chickens, including ones with no other livestock. Even the Vatican maintains a small indoor coop of hens for fresh eggs.
* Every "fraud against consumers" style TV show tries to have those as often as possible, it gives a visual "proof" that whoever has just been explained to be a con artist is not even bothering to claim innocence. Smarter scammers set up rendezvous and don't show up which robs the show of the intensity this visual trope provides; thus fooling most consumers on how which fraud artists are skilled career criminals and which are amateurs.
* every. freakin'. time. how little the people from Key West have prepared for the upcoming weather and how every bar is open and handing Pina Coladas and beer to everyone in the eve of the storm.
* every friend he's ever had and everyone he knows (other than Katara, Sokka, and Bumi) having been dead for a hundred years, and most of them were burned to death in a genocide that started the global-scale war Aang has been charged with ending.
* Every Fusion is a giant woman, though Garnet, Rose, and Jasper are pretty big by themselves, with Rose and Jasper towering over the rest of the cast. In the Season One finale, however, it's revealed that
* Every game also has at least one named ally die over the course of the game, with the player having the ability to
* EVERY game), and in only one of these cases was not the actual defendant. Fortunately, her best friend and boss is Phoenix Wright himself.
* Every game has a different Youngster who likes shorts, because they're comfy and easy to wear. Except for
* Every game has a fat man in the first town who remarks that "The power of science is staggering!"
* Every game has a long area, usually consisting mostly of caverns, called Victory Road between the final gym and the Elite Four.
* Every game has an underwater section, accessed either by submarine or aqualung.
* Every game has a place that essentially acts as a Pokémon graveyard.

* Every game has at least one elf who either went to live among humans or at least has an open mind about them. Kirkis in Suikoden I was the only one among his tribe who figured out allying with the Liberation Army was the only way to prevent their impending fiery deaths, Paula in IV is noticeable as an elf just because of her ears, otherwise behaving as a perfectly normal if slightly solemn girl, and Isato of V serves the human Oracle partly in order to preserve his lands, and partly just out of pure loyalty. In general, the subplots involving elves always result in one of them calling out their own kin on the stupidity of their attitude.
* Every game has a villainous team trying to destroy/change/take over the world using the Cover's Legendary, though the last part only began to take form after Generation II.
* Every game in the main series features the late-game development of nuclear weapons (or "Planet Busters" in
* Every game is like this, with only a few of the most advanced factions (Brotherhood of Steel, Enclave) actually understanding any technology more complicated than basic firearms and explosives, although other factions do utilise them, thanks to it being a
* Every game makes some reference to Parakarry, a major character in the original
* Every game of (Advanced) Wanted requires this. The newbies who run on rooftops openly aren't even trying, but to spot more skilled players demands that you know what NPCs will and will not do. Then again that might not save you...
* every games past the first one, and then he states the proper names fans should give credit to. Not every fan hears it, though.
* Every game that includes the classic Battle Mode. They've added all kinds of new stuff over the years, but most people play just for that mode.
* Every game that requires the player to eliminate all enemies to advance to the next level/unlock a new area/complete a mission falls into this trope. (Aversions fall under
* Every game typically starts with something going horribly wrong that leads to the zombie/monster outbreak, followed by the player characters getting thrown into the mess when they try to investigate and then having to take matters into their own hands.
* Every game will always have a rival who always picks a starter Pokemon with a type advantage over yours. Inverted in
* Every game will feature at least one world where the BGM is an arrangement of a song from the source material instead of a new composition.
* every gate in the galaxy went offline. The invaders then constructed their own stargates in those 27 systems, linking them to each other, but the only way to get in or out of that isolated region is to hope for a random incoming wormhole.
* Every general in each game of the series has a counter (and can be captured or killed), as well as some colonels and the occasional major. As with most such games, their purpose is for command and control of the units under them, though most can influence melee combat if present. The more badass the general was historically, usually the better his ratings. (In the larger battles, overall commanders like Robert E. Lee are there for historical purposes and have no ratings.)
* Every generation after the first also tends to feature an early-route Pokémon resembling a small rodent or other similar creature in the vein of Rattata, A bug-type Pokémon not unlike Weedle or Caterpie, a bird Pokémon rather similar to Pidgey, and a powerful Pokémon, usually a dragon-type such as Dratini that takes starts off fairly weak and takes a long time to fully evolve.
* Every generation after the first will have an adorable electric rodent resembling Pikachu. The exact species varies (there have been mice and squirrels so far) but all of them have
* Every generation has three starter Pokémon that are Grass, Fire, and Water respectively, have two evolutions and their main ability boosts the power of their same-type attack bonus by 50% when their health is a third below their max.
* Every glasses wearer is familiar with spending the entire time they have lost

their glasses and are searching for them fighting the impulse to
* EVERY GOD like the other gods do and admits the gods tend to mess up the world they're supposed to be protecting.
* Every golf tournament comes down to making a long putt, or to getting out from a trap or some other nasty place.
* every good race is pretty, tall and blonde, as "Aryan" aesthics... Notwithstanding that most of the characters are not blonde or tall, Tolkien hated how the Nazis use of Germanic and Norse legends put them in bad light, and it is on record that he berated a German editor who asked him if he was "Aryan" (see Quotes page).
* Every guide for the teams was given a cyanide pill before being put into cryo-stasis. They were given in case they awoke
* Every Halloween, some local law enforcement agency, news program, or newspaper will run a story about drug dealers handing out drugs in the guise of "candy" to children out trick-or-treating, and how parents need to beware that they could end up in trick-or-treat bags. First of all, as mentioned further above, edibles are
* every has simulator runs, some of which are indeed meant to be (nearly) unwinnable. More often than not, however, it is Honor Harrington herself who sets up the exercise:
* Every Heart a Doorway: A story about children who go other, fantastical, worlds and adapt, and then they face this trope if they return:
* Every hersir unit has a name given to it, all of them in this style. 'Biscuitchiller' and 'Refreshingbeveragemaker' were among the more amusing possibilities.
* Every high school graduate has at least heard of the term "senioritis". Basically, by their second and last semester, a high school senior has all the credits they need, has gotten their college acceptances, and is working on their financial aid, so they think "Why do I need to do any more work?" Unfortunately, particularly bad cases of this have resulted in the subjects having their college acceptances revoked.
* Every horse is an individual and even similarly trained horses will respond differently to the same set of cues: One does NOT cue a hot thoroughbred the same as a phlegmatic warmblood... not if you want to live, anyway.
* every hotline and got in contact with USAgent, and as a result, they both brought the entire organization down. (A few "lone wolf" Scourges have shown up since then, but the actual organization does not appear to have ever recovered.)
* Every human enemy has a name and unique appearance, and the attacks and move they use reflect their personalities and their current status. Sugar Mountain doesn't take you seriously and will occasionally check his hair instead of paying attention. Trips Breezer refuses to fight you, and will only block your attacks, stall for time, and cry. This is everywhere throughout the game, but the most prominent example is the Rando Army, who grows gradually more terrified of Brad as the battle goes on and will waste turns shaking in fear. And their lieutenant
* Every hunter is this in spades, to the point of only being good at what they do by being so horribly broken. Capable of fighting monsters, demons, and undead nightmares, hiding from (or staying on the run from) the police and FBI for the crimes they commit doing their jobs, and all of them make the hardiest survivalist look like a pansy. The only reason any of them live the life they do is that either they were raised into it, which is a whole mess of issues right there, or they experienced firsthand losing someone close to them because of the things that go bump in the night and became obsessed with revenge. John Winchester was arguably the worst we've seen, often being remarked on as a hunter of unparalleled skill but uncaring of anything that wouldn't lead him to the Yellow-Eyed Demon, to the point of being abusive and neglectful towards his sons and raising them as soldiers to fight an unending daily war (which Sam and later Dean resent him for).
* Every Imperial Guard officer above Lieutenant (and sometimes below) is either incompetent, a jerk, a glory hound, cowardly, or any combination of those. This goes up even into the Munitorium.
* Every Imperial space ship in the universe basically fits this description, with

a crew size of at the lowest end 20,000 men, they have the population of a small to large city, defenses capable of dealing with both the threats of warp travel and capable of defending against the ridiculous firepower of anything in the same category with it for at least a short amount of time.
* Every incarnation portrays their relationship this way. Luthor is the one person Superman can't defeat with strength and Superman is the one person Luthor
* Every infraction, whether major or minor, committed in prison is apparently punished with "a night in the box".
* every initiative and tactical genius. As a result, despite the Talbott quadrant becoming an absolute hotbed of tactical genius with the arrival of Aivars Terekhov, Michelle Henke, Naomi Kaplan, Michael Oversteegen, and Abigail Hearns, among others, he remains in overall command because his skills as an administrator and politician make him the ideal ultimate military authority in a corner of space which is rather distant from Manticore's home system and government.
* Every insurance company likes to point out that people who switch to their company save hundreds of dollars. Impressive, until you realize that people who won't save money don't switch and are excluded from the calculation. Also an example of
* every involved a dam blowing up and changing water levels, using the exact same dam model to boot.
* every is a meme, but especially King Harkinian's. Here are some meme lines:
* every is an engineering genius: Scotty, Geordi La Forge, Miles O'Brien, B'Elanna Torres, "Trip" Tucker.
* every is suffering from this. In the original series, having so many people hiding their crimes by disguising themselves as monsters could be more excusable, since Scooby and the gang are constantly road tripping across the country, but all of the crimes in this show happen in one city. After reading in the local news about the 10th or 12th person to get caught using a monster disguise to hide their evil plans, you'd think more people would realize that it's not a very good idea.
* Every is this, since the comic is a progressive superhero fighting for social justice.
* every it feels good after fighting your way through an entire dungeon, facing a massive imposing beast, and then reducing it to a helpless fidgeting mass that you just feed damage to.
* Every Japanese Sword Is a Katana: All Japanese swords are katanas, even if they're not, because katanas are cooler.
* Every Kage of one of the five major ninja villages is expected to embody this trope. Candidates need to be one of the strongest ninjas in their village just to be even considered for the position. This requirement seems to hold for minor village leaders and samurai generals as well, if Hanzo and Mifune are any indication.
* Every knight errant ever created from King Arthur on down. In a variety of
* Every last large cat species in the game, from lions to tigers to panthers, also have large saber teeth (with the exception of the tigers on Pandaria and the Salhet's lions).
* Every lead character except Veronica and Keith would be absent from episodes of
* every Legendary Pokémon from Gens I through VI, an infinite number of Ultra Beasts, and even obtain Shiny Pokémon that aren't in the Alola Dex. Even better, it opens up right after Ultra Necrozma's defeat, before the player's final Trial. It's not at all unlikely a player will end the game with a different party than they had before as a result.
* Every Little Thing She Does", after the library is wrecked by Starlight's spell, just as Twilight comments "There's such a thing as too much studying...", a ladder behind her crashes to the floor.
* Every Little Thing She Does-style), then Twilight creates a hemispherical bubble, followed by Starlight encasing herself in a crystal-shaped field.
* every living thing down there,, so he counts them among his subjects.
* Every main character other than BoJack and Todd in the Christmas special.
* Every major battle involves one group of redshirts attacking another group of

redshirts with the main characters from both sides escaping unscathed:
* Every major Marvel team like the X-Men and Avengers have or had a time machine they took from Dr. Doom
* Every major Toa team is composed of five males and only one female.
* every male had to join the military, so it's entirely expected that they should know how to handle themselves in a fight. They should not, however, know Kung Fu.
* Every male who encounters Minerva Mink falls prey to this, especially in the comic.
* Everyman featured a character called the Vice, who was a personification of a sin, such as Covetousness, Lust, or Gluttony. While originally played for drama, the Vice was eventually played for comedy and tended to be the most popular character in the play.
* Everyman HYBRID, Alex's dog Sparky detects The Rake long before its first attack on Alex, and may well have been keeping The Rake from attacking while Sparky was in the room. Interesting given The Rake itself is a freakish dog-man.
* Everyman HYBRID all being part of their story, in addition to the multiple other Slender-blogs/-vlogs they've crossed over with.
* Everyman HYBRID all menace the three-man team of the fitness and excersize blog.
* Everyman HYBRID and other assorted problems; he also tries to lighten pretty much every situation, cracking jokes while exploring creepy abandoned buildings or even while dealing with a monster literally hiding in a closet at a friend's house. The latter is likely the best example of his humor backfiring for those around him, as he pulled this after said monster violently assaulted his friend's brother.
* Everyman HYBRID episode. Their close friend had died in a car accident heavily implied to be created by the monster tormenting them online, and the mutilation was so bad, his mother had to go and identify her son's body; Vinnie went with her, which is how he noticed some of the details not matching up with the official report.
* Everyman HYBRID: HABIT refers to Dr. Corenthal's house as being "in flux", as a place constantly shifting in impossible ways that even makes an immortal entity nervous. One of the results of this is that the house can loop, such as Vinnie and HABIT going to try and find HABIT's gun, only to wind up back where they had started.
* Everyman HYBRID, hairless wolfman. Its features are mostly human, with just enough canine there to be disturbing.
* Everyman HYBRID has literal jigsaw pieces scattered across the internet.
* Everyman HYBRID in another new room, where the knocking is even louder. Opening this last door transports him to HABIT's house.
* Everyman HYBRID is alive, the evil spirits and monsters have immense power, and the geography is utterly incomprehensible. He tries to get into an apartment complex, only for the stairs to loop him back to the beginning every time, which happens until he gives up.
* Everyman HYBRID. It starts out rather quiet, before suddenly springing incredibly loud distortion on you. Expect to have full britches afterwards.
* Everyman HYBRID: Jeff and his little brother Alex had lost their parents a year before. Alex struggled with moving on and continued to act as though they were alive- even using a tape recording of their voices to answer his questions. Later, after the Rake killed his dog Sparky, he wore a sock-puppet and insisted it was Sparky.
* Everyman HYBRID, "Joke's Over": Evan, on seeing what was inside the garbage bags hung up by the Slender Man. He hadn't completely snapped yet, but this was probably one of the first warning signs.
* Everyman HYBRID (much of which depicts "Mr. H" as either an evil anthropomorphic rabbit or a human with rabbit-like features).
* Everyman HYBRID one was a piece of paper with a single line of typed text.
* Everyman HYBRID that he actually worked with Sebastian Kraus during his time as Mengele.
* Everyman HYBRID. The audience only sees a red gasoline cannister and HABIT lighting the fire, not showing the actual murder but leaving it very clear how it

went down.
* Everyman HYBRID. The rest of the series is more dialogue-heavy than any other Slender-story on Youtube, but from that point on the characters are actually talking about relevant stuff.
* Everyman HYBRID they've attracted. Their reactions were fairly tame, although Evan describes it as being simultaneously disturbing and flattering.
* Everyman HYBRID web series that were all the rage at the time. Then the real one shows up.
* Everyman HYBRID with a baseball bat, and later the group attempts to run him over with a car. Both times the end result is cut away.
* Everyman. Ian Covey, the doppelganger, always appears to be the "real" version of the person he is impersonating, while the person being impersonating appears to be the fake. It's part of the horror.
* Everyman internet character has a stunningly attractive wife named Margie. Lots of fanart implies she think's he's awful looking, but keeps their marriage for unknown reasons.
* Every member of Planet Kinniku has to wear a full-face wrestling mask with a mohawk-fin on top from birth. If their faces are ever seen, they have to commit suicide. The masks are pretty damn
* Every member of the Task Force ends up being suckered in by Light at some point, not only buying his innocence, but also
* Every mermaid when not in human form, except Lucia, who only has this
* Every method preferable in manga instead of filling page after page with long speech bubbles. Still, the flashback should logically be told from Nojiko's and Jimbei's points of view, but there are still some scenes (especially in Jimbei's flashback) that they don't take part in and shouldn't realistically know about.
* Every military recruit that hasn't been mentally broken by encountering a Titan yet and expects good things after training. Some examples stand out, especially Eren, Marco, and Marlo, who are prime examples of soldiers wanting to enter the Survey Corps (Eren) and Military Police Brigade (Marco and Marlo) for the right reasons. Everyone gets a quick dose of the reality that battle with Titans is, though.
* Every military training inspector is this in the Grisaia universe, but Cpt. Garett stands out in
* Every Minecraft Manhunt feels incomplete without hearing the words:
* Every minion has a specific voice line for being summoned, attacking, and being killed. If a player's strategy involves repeatedly copying his own minions, this can end up being invoked.
* Every minor character seems incapable of pronouncing Mike Nesmith's last name. Among the variants: Nishwash, Nashmirth, Nipmop... Subverted in "Monkees in Texas," when the villains refer to Mike and his aunt as "Nesters"... he starts to correct them before his aunt explains that the word means "farmer" and that they were correct in their word choice.
* every mobile platform is a rifleman. Turians only have soldiers, asari have huntresses and commandos, Krogan don't have any military organization besides their clans, hanar rely on automated defenses and drell assassins, volus just bankroll the turian military, while salarians only have spies and special forces.
* Every movie made in the West and not specially approved for translation into Russian was banned. Light-hearted French comedies were approved and translated with little or no fuss, but something like
* every musician who had ever been a member of The Doobie Brothers showed up to perform. The stage that night was...crowded, to say the least.
* Every Mythbuster has taken a knock or two. Considering the extreme danger they create, it's a credit to their safety protocols that it wasn't more. But one member of the team stands out as a shining paragon of this trope: Buster. He's been exploded, dropped from great heights, and struck with great force countless times. In fact, there's very little that Wile E. Coyote has been subjected to that Buster hasn't, and Buster went through it
* Every named Creel, and befriend a Moor Cat. Although there's usually an element

or two from this list missing in each generation.
* Every narrator for an audio version of a book not done with a full cast fits this trope. In particular, Jim Dale, the American reader for the
* Every new generation introduces a sweet food associated with the region.
* every newspaper strip, including most of the serious, "soap opera" ones, so listing exceptions is probably a better idea.
* Every night Ra had to pass through the underworld and battle the serpent-god Apep (a.k.a. Apophis). Sometimes Apep would eat Ra alive, causing bad weather. If Apep went after Ra during the day, we got a solar eclipse.
* Every now and again, a player comes along and violates one of these rules, throwing away a game they otherwise could've won with a better wager. This tends to happen primarily in the Kids Tournament and Teen Tournament, since most of the adults who get on the show study wagering strategy ahead of time. The 2013 Teen Tournament saw at least 2 such contestants in the span of 2 weeks, one of which resulted in
* Every now and again, some unsuspecting editor will add an example to a trope page without checking to see if that page contains an example from that series already. If it does (especially if the example itself is repeated), that page becomes an example of this trope, albeit usually only temporarily.
* Every now and then a Dark Eldar grows weary of the figurative and literal backstabbing, hedonism, and soul-devouring villainy of his/her kind and joins a Craftworld.
* Every now and then, a somewhat creepy storyteller-narrator character appears on
* Every now and then, porn websites will have regular videos uploaded with this sort of title - i.e. bad political decision with "Old man fucks entire nation", or
* Every now and then, the kids themselves are guilty of this as well. In the book where they time travel, Ax spots the Hessians about to assassinate George Washington, but everyone brushes him off, even though he
* Every now and then there's a mention of Jason's dog, Sunny. Said dog has metallic, scaly legs, and a mane on top of that.
* Every now and then, the show introduces something new to the table. For example, "Hide and Seek" introduces Irving into the main friend group, and "Nerdy Dancin'" brings the creation of
* every NPC has unique dialogue for every item you can possibly present to them. This is especially notable with Boyd, whose mental world revolves almost entirely around held items (none of which you're ever told to show him, by the way).
* Every October, Perth hosts the Australian Telethon (simply known as 'Telethon') to raise money for sick kids. And for the last 10 years it has exceeded the 1 million dollar mark, with the current record being 6.5mil last year.
* every of the heirs would inherit the throne, it also meant that the Empire fell into anarchy and civil war until the new king had established himself. It eventually led to the collapse of the Empire.
* Every once and a while in the Marvel universe, Skrulls will decide to entertain themselves with their shapeshifting abilities and a dash of Earth culture. The world Kral is an entire planet of Skrulls imitating gangster movies from the 1950s. On Earth, four Skrulls apparently devoted themselves full time to their favorite Earth entertainers and became the Skrull Beatles.
* Every once in a while, someone decides to develop a free-as-in-freedom, non-commercial, open-source, decentralized social network as an alternative to e.g.
* everyone abandons not only Arthur's never-been-official-anyway club, but each other's as well, until everyone is a one-person "club" of their own. Eventually they all realize how stupid it all turned out, and get back together.
* everyone Adept at ranking people's talents? Eventually you'll get so good at it, you'll develop a superhuman ranking skill so intense that you'll NEGATE GRAVITY AROUND YOURSELF AS A SIDE EFFECT OF THINKING ABOUT IT. Oh, and also, a one-year-old infant can earn a PHD in advanced mathematics without giving up his day job as the world's most feared and respected mafia hitman. Inspiring!
* everyone after Flint's food machine produces a rain of cheeseburgers. Flint's gasp is especially and hilariously protracted.

* everyone agrees upon, Stark and Lannister alike, is that Robb and Tyrion should try trading Sansa & Arya for Jaime).
* everyone also wear their faceplates down, making them more apt representatives of the trope.
* Everyone, and all the characters are constantly walking right into Jigsaw's plans.
* Everyone and Catbert. Scott Adams has joked that he himself might be a sociopath.
* everyone and everything, it's just that things like bacteria, germs and vermin deserve love too, and they outnumber sentient life by several orders of magnitude.
* Everyone, and Jake and Dirk. Just about the only couple that is still together is Rose and Kanaya.
* Everyone, and no other dance craze has arguably come close to it since.
* everyone and we have to rely on clothing and how they're referred to by other characters to tell. V wears a wizard robe, so that's no help, and the other characters aren't any better since most of them have no idea what gender V is either.
* everyone a signed and approved leave pass doesn't guarantee that a soldier won't be called in.
* everyone as sidearm. Forget Beretta, Makarov, Norinco, or any other brand or caliber that would be more plausible for non-American folks to carry; heck, the only 9mm weapon in the entire game is the Micro-Uzi.
* everyone badass character doing something so awesome the jaws of the others drop in unison.
* everyone bad PR. The defense lawyer doesn't call any witnesses, and instead says that while she finds her client's behavior morally repugnant, it isn't illegal, so the jury has to find him not guilty. The judge then takes them both aside and "advises" Barba to offer a plea, and stresses the defense lawyer to take it as she's "a reasonable woman" and knows her client is an awful person. Barba takes a deal, as he recognizes that even if he does get a conviction, the judge will overturn it, as there is in fact no law being broken.
* everyone, beat the crap out of the nearest opposition player would mean these kind of tactics will just result in the whole team getting banned.)
* EVERYONE becomes a future badass, good or bad - Kenji started out as a loser who run a store, and by the epilogue, he had became a symbol for hope, a rock star, and ultimately Messiah.
* everyone becomes suspicious of Daenerys, fearing that she is unstable and will go mad. While Daenerys was under a lot of emotional pressure, it was her own allies holding her at arm's length and scheming against her which pushes her over the edge, just as they feared.
* everyone being a dick to Puny Parker, he's fairly popular, though Flash Thompson's still his nemesis 'cause hey, everyone's got an enemy or two.
* Everyone believes Konatsu to be the legendary Genius Kunôichi (female ninja), and have even braced themselves for her coming out of the closet to confess undying love for
* everyone beneath that higher-up will benefit from his removal, the technician quite willingly announces his intent to go tend to another location and to not return for the rest of the day.
* Everyone be that every character wanted a land they found to be named after themselves!
* Everyone briefly bring Zombies back into the mix; and after going two games without them, it's actually surprising again when they grab you.
* Everyone but Amanda does this upon seeing that Amanda's date looks exactly like Wilder,
* everyone but her could tell was gay until the point he was willing to open up about it. He was constantly an ear for her to share any and all guy troubles she had and their friendship continued throughout college as well. It came to the point that he was a way better friend to her than her actual best friend Carly (who pretty much disappeared after Season 6 sans a one-off cameo in a Season 9 episode).
* Everyone, but he still respects the emotional factor in others' decisions and

concedes after voicing his concerns.
* Everyone but Michael keeps having their minds erased from all of his hundred of reboots, but in the months between repeatedly fall in love only to have their memories erased again. However, Janet
* Everyone but you is an actor employed by the experimenter, including during the variants discussed below. The random process of determining teacher vs learner was rigged; you were always the teacher. No one was in any real physical danger.
* Everyone Calls Him "Barkeep". Biblical scholars have been trying to identify him for a long time.
* Everyone Calls Him "Barkeep": Someone is known only as their title/occupation.
* Everyone Calls Him "Barkeep": Someone's name is not revealed as everyone calls them by their job.
* Everyone can cheerfully enter into the relationship they were meant to be in all along.
* Everyone can copy Krillin's Kienzan / Destructo Disc, apparently. And as an extra "kick in the stones" to Krillin, some of those people can use it to greater success.
* Everyone Can See It as she's already engaged to (abrasive) warehouse employee Roy, and Jim, unable to torture himself further with Pam's impending nuptials, is on the cusp of transferring to another branch and takes his shot outside during a Dunder-Mifflin "casino night". However, Pam rejects him for the reasons above, leaving a welled-up Jim to leave. The season cliffhanger ends on Pam confessing to her mother on the phone she might reciprocate the feelings after all, before Jim comes in wordlessly and they kiss.
* Everyone Can See It: Everyone else knows they're attracted to each other, even if they don't realize it themselves.
* Everyone Can See It: It's claimed that two people being in love is obvious to everyone who knows them.
* Everyone Can See It: It's obvious that these two are meant to be together, if only they themselves saw it.
* Everyone Can See It partner, and everybody there thinks it's about time.
* everyone, catching on to Mayuuchi's idea, and showers him with whatever food they happen to carry. For added hilarity, Momoyo mentions that she's eaten half her yakisoba-pan (bread filled with noodles), which would mean an indirect kiss. This causes the rest of the girls to take bites out of what they gave him.
* Everyone Chasing You: A character is chased by a whole bunch of other characters.
* Everyone cheers as Pathfinder's signal arrives, letting them know Mark successfully revived it. In this case, "Mission Control" is a conference room crowded with people and computers, because the old Pathfinder mission center has long since been repurposed.
* "Everyone Comes Back" Fantasy Party Ending: A fantasy sequences where everyone who previously appeared comes back for a party.
* everyone, completely effective contraception, and/or cheap, reliable space colonization becomes available, immortality could be very bad for the human race in general.
* everyone destroy the entire Complex, and are told in no uncertain terms to keep it the hell away from him (among others).
* Everyone Dies, but it's only Hamilton plus his best friend John Laurens and son Philip]] that die in the timeline of the show. Washington does die off-stage, but no mention is made of it until "The World Was Wide Enough", when he's one of the people Hamilton sees in heaven, along with Laurens, his mother, and Philip. His sister-in-law Angelica and wife Eliza also pass away during the finale, but due to the nature of the end (that the actors step out of their character and into their role as present-day actors telling the stories of the founding fathers) that's kind of a given.
* Everyone dislikes Therron due to his laziness and stupidity. Any respect he does manage to get is just because he's a Tallest and the shorter Irkens are obligated to show it to him.
* Everyone drops articles (such as "a," "my," and "this") from their speech

whenever meaning is clear, because Latin didn't have indefinite or definite articles, and personal articles were considered inelegant.
* Everyone else freaks when Swift Wind starts talking. He only returns again in the last couple episodes, and his rather bored reaction to everyone freaking out makes it clear that he's been dealing with this a
* Everyone else, including the officers, are only support. This also applies to all ranks enlisted. When chow is served, Privates go to the front of the line. PFCs are next, then Lance Corporals. Your NCOs stand around watching, making sure the other Marines have eaten first. Then they go through the line.
* Everyone else in Free Country understanding The Cheat's squeaking perfectly is just one of the running gags of the site. Mostly used for implied cuss words a la
* everyone else in the director's chair (especially Jenny) or at least has a lot of dirty laundry on them (in Vance's case).
* everyone else. Oh, also, Robert ages, apparently. His hair's gone white and he's got liver spots now...
* Everyone Else's Parents Said Yes finds a piece of paper covered with names like Amanda Martin-Cohen and Mrs. Danny Cohen. He plans to use it to blackmail her, but his parents find out, so he doesn't get to do this.
* Everyone even a bit versed in European history knows about the multitude of revolutions that broke out all across the continent in 1848. There's the one in Hungary that required not one but
* everyone, even if that meant using pointy sticks. They took their standard rifle bayonet (which aside from minor revisions to simplify it for more rapid mass production, was unchanged since 1897), simplified it even more, and mounted it on a bamboo pole. They also manufactured cheap ceramic grenades to go with them, which were unused due to the war ending and eventually ended up in the hands of the Yakuza.
* Everyone, even Mono can end up becoming ambiguous. The only character who isn't at all subject to this is Agro, since, being a horse, she's just a loyal steed doing as her master directs her.
* Everyone except the Necrons and the Tau use manual labour. The Imperium has a phobia of effective robotics because
* Everyone flaunts their flawlessly sculpted bodies while wearing form-fitting clothing, skimpy swimwear, or nothing at all.
* Everyone, friends and enemies alike, have moments of confusion from the little monk.
* everyone from infecting everything and eventually spreading into other timelines.
* Everyone from the United States to Japan has toyed with making these, in which it actually was carrying biological weapons.
* everyone: Gaius Julius Caesar <some-nickname-to-distinguish-them>.
* Everyone got involved because of this, and it shows. Every single frame of the film is slathered in overwhelming joy and love for the silly '60s anime series.
* everyone had had the same sting of luck and he can't cover his bets. And not everyone is as nice as Nick is.
* everyone had to do it and she was the only one who was listening to Buffy anymore.
* everyone has a different story for why Catherine left. Instead of explaining why she left, Matthew explains how the coffee pot broke, which involves a sneaky man dressed as a cartoon burglar.
* Everyone has a time at which they are destined to die. It's only visible to those with a Shinigami's eyes...and even in that case, such a person
* Everyone has headshot quotes including Baird's "Sorry, was that your spine?" and the epic "So good I should charge admission."
* everyone has huge, thick forelocks of hair which are perpetually hanging in front of their faces. If you started selling hairpins in Meridiana, you could probably make millions.
* Everyone Has Standards: Even though they may disagree on where the line is, most people believe there are lines that shouldn't be crossed.
* Everyone Has Standards: Every character, regardless of moral alignment or clique,

has at least some level of decency.
* Everyone Has Standards: No matter who somebody is, there's still something that's going too far.
* Everyone Has Standards (OOC if the persons call out someone else on a fault that's no different from their own vice)
* Everyone Has Standards roast, most of them said that she was such a class act, they wished they'd gone easier on her. (This despite the fact that Marlee took it all in stride and, frankly, was able to give as well as she got.)
* Everyone Has Standards: Yes, I'm not the nicest person around, but that doesn't mean I don't have standards!
* Everyone has their own preference for control, and if you are accustomed to using a mouse but sit down at someone's computer that has the touchpad or a trackball can be confusing.
* everyone has these. It can only be assumed that any face-concealing helmet will have LEDs in the eyepieces. That said, the Salamanders chapter of the Adeptus Astartes actually DO have them: glowing red orbs that emit heat, with no pupil or iris.
* Everyone Hates Fruit Cakes: For some reason, all the characters seem to hate fruitcake.
* Everyone Hates Mimes: Mimes are depicted as being universally despised by everyone.
* Everyone having a mutant power is a treasonous rumour spread by commie mutant terrorists. There are only registered mutants and the occasional mutant terrorist. Please report anyone saying otherwise to your local termination center. Remember: Rumours are treason. Have a nice daycycle!
* everyone he ever purports to be friends with, but probably the biggest example is the way he ingratiates himself with Nino Schibetta while secretly slipping ground glass into the man's food.
* everyone: He sends Obi-Wan to kill Grievous, and would have killed Grievous if he had won; slaughters the Jedi once their role in the war and attacking him has been fulfilled; and finally to the Republic itself, dissolving it creating THE FIRST! GALACTIC! EMPIRE!.
* everyone hung up on Cheshire, the mother of his daughter, which has ruined any other serious relationship he's had.
* everyone Iao and Adonaios being associated with the Sun and Jupiter and the archon Horaios having a name that means "light".
* Everyone in attendance of Big Mom's tea party gets this when due to an explosion, Big Mom's skyscraper-sized castle begins to topple, sending everybody falling to the ground.
* everyone, including a little girl's pet, recognize Usopp for who he is immediately.
* , everyone, including the teachers, forgot that Izuku's costume comes with a respirator. Since he was pitted against Midnight during the exams, he almost effortlessly defeats her.
* Everyone in every fighting game ever. Sometimes there's a convenient tournament to justify the endless fights or the characters are competing over something, but often there's barely any justification at all.
* Everyone in Germany who has seen any TV during the 90s will remember
* everyone in Konoha knows where the old Anbu headquarters is. Apparently, it was disguised as an apartment building with several "very polite but firm" guards who insisted it was "private residence only" despite having a sign advertising apartments available for rent.
* everyone in Latvia speaks at least some English, with most being fully fluent, as every film and the majority of television shows are in English with Latvian subtitles. This makes the country an attractive exotic location for Americans, Canadians, and British tourists to visit.
* Everyone in Mystik Spiral. Though if you exclude the silly lyrics, "Freakin' Friends" is actually rather competent.
* everyone in the alienation zone are another matter, though; the evacuation order

wasn't followed that precisely there, so indeed many remained or went back in.
* everyone in the area so that they just plain don't see or hear him walking around.
* everyone in the audience getting up from their seat to enjoy the music.
* Everyone in the cast other than Alan Alda was missing for at least a couple of episodes.
* Everyone in the comic is either a liar, a cheat, or utterly stupid, if not all three, so conversations tend toward this. For example;
* Everyone in the Cooper family is their opposite: Mary is a partygirl, George is a pastor, Georgie is bald, Missy is super smart, Connie is a therapist from New York, Dr. Sturgis is a stereotypical Texan, and Sheldon is a normal kid.
* Everyone in the English branch is close with one another, but Calliope and Kiara are standout examples. At the time they were introduced, Kiara — in-character — had a completely one-sided crush on Calli, with Calli refusing to reciprocate and being a harsh
* EVERYONE in the future California of Demolition Man who isn't Sylvester Stallone or Wesley Snipes talks like this.
* Everyone in the Kuja Tribe except the leader, Boa Hancock, does this when Luffy
* Everyone in the Legion gets a "flight ring" which allows them to fly, in addition to their unique powers. This comes in handy for obvious reasons.
* everyone in them as a result. This also puts her in functional control of the country while they're at war, with everyone (even Celestia) referring to her as "Commander" for the duration, as happens when a declaration of war is made against the Storm King and his armies in chapter 5 of the second story.
* everyone, In the navy (yes, you can put your mind at ease), In the navy (come on now people, make a stand), In the navy, in the navy... can't you see we need a hand!"
* everyone in the open-topped boat have to crouch down. The bridge is popularly known as "the cheese slicer".
* everyone in the Red and Blue armies are this; the two sides consist of the UNSC's worst soldiers, who are used as training dummies for battle simulations, all while thinking they are fighting a real war.
* everyone in the Resistance except Kira, Damar, and Garak is wiped out. Damar ends up leading a new Resistance made up of civilians, who look to him as their leader and are willing to go along with what he says, avoiding most of the infighting of the previous attempt.
* Everyone in the series has some odd quirk and the detectives are no exception. Gumshoe's probably the most normal of the bunch.
* Everyone in the whole world who isn't a member of Tribulation Force, in the
* everyone in the world gets turned to stone. And they don't get turned back until the end of the third part.
* Everyone in the YWC (Youtube Wrestling Community) seems to switch sides so much that they seem to live inside thessentially door.
* Everyone in town and in his audience sees Li'l Gideon as a cute, lovable child. It quickly becomes clear that he is
* everyone in Valhalla starts looking down on Jormungandr for beating up the weaker Dewey and gloating about it. This includes Team Ragnarok's wolf, Fenrir.
* Everyone Involved in Pizza's Preparation, Delivery, Purchase Extremely High.
* everyone involved with the show, "I'd like to say sorry for lying to everyone."
* Everyone in Wrath of the Lich King is some variant of Mary Chillydeath or Frank Zombiesnow.
* Everyone Is Armed: You can bet that everyone in this crowd is packing heat.
* Everyone is a Super Ordinary Magician". Reimu seems to consider her human, but it's also established that Reimu is far more friendly with youkai than someone of her position should be.
* Everyone Is a Suspect: In movies where the killer's identity isn't known.
* Everyone Is a Suspect: There's reason to believe that every nearby witness to a crime may have been complicit in it.
* Everyone Is a Suspect: When the killer in a murder mystery could have been

anybody.
* Everyone Is Bi: All the characters are bi vs. none of the characters are bi.
* Everyone Is Bi and marriages consist of four people and thus anyone in love with one gender (straight or gay) is considered unusual. "Mountain Ways" has a lesbian disguising herself as a man to complete a marriage, then finding out to her relief that her future husband is straight and has no interest in her.
* Everyone Is Bi by people who otherwise appear to be purely heterosexual.
* Everyone Is Bi: Gender does not factor into the characters' formation of relationships.
* Everyone Is Bi in this setting, the social and power dynamics are more strictly divided. The Lord/Lady/Head of the household is the head of house that must be obeyed without question. The spouses, concubines and younger family members are left to their lord/lady's mercy and discretion and the mercy of higher-ranking spouses.
* Everyone Is Bi: Most of the Classical pantheon are. Hades and Ares are straight and Athena, Artemis and Hestia are aces, but apart from them, basically everyone else is so casual with sex the idea of heterosexuality is down-right quaint.
* Everyone Is Bi, so his discomfort was entirely based around the unwanted sexual descriptions rather than the gay implications. Notably, Karkat's crush on John, while hilarious, is mostly funny because of how badly Karkat goes about expressing it, and how totally incompatible they are in the way that Karkat wants them to be (specifically, Karkat wants them to have a romance based on mutual hatred, when neither of them hate each other).
* Everyone Is Bi with Gwen, and relationship to Ianto to play with, on top of literally any combination of his Torchwood team as well as anyone he or his team have ever said so much as "hello" to.
* everyone is black, making their color not really relevant. HB is by far the most physically imposing; he's easily half again as tall as SS and DD (who appear to be of "average" height) and closer to 3 times as tall as CD.
* Everyone Is Christian at Christmas: The holiday of Christmas is widely celebrated even beyond the Christian world.
* everyone is either a pirate or an evil merchant (another sort of pirate). In the third movie, a group of merchants say that they simply ally with the highest bidder.
* everyone is fairly evil, even the most unambiguously evil factions have their fans, and not just for the strength of their army list.
* Everyone Is Jesus in Purgatory: Audiences assume that everything in the work has a symbolic meaning to it.
* Everyone Is Jesus in Purgatory: Audiences find symbolism in a work where there wasn't any intended.
* Everyone Is Jesus in Purgatory: Everything can be seen as religious symbolism.
* Everyone Is Jesus in Purgatory of Opera is actually a product of this. In attempting to revive classical Greek plays to the theatre of the Renaissance era, interested scholars decided that the Greek plays were meant to be sung in their entirety. New works followed suit, and the rest is history.
* Everyone is like this to the kids. It backfires spectacularly when, during a reunion of everyone in the series, they refuse to believe the building they are in is on fire.
* everyone is pretty much against Garrosh, who has decided that the Horde should be an orc-only force, kicking out all of his allies. A combined force of the Horde (minus Garrosh's force) and Alliance prepares to storm Orgrimmar to take care of Garrosh once and for all. Not a legacy his father would've approved of.
* Everyone Is Satan in Hell are how we prove evil exists even where the lesser beings say it doesn't.
* Everyone Is Satan in Hell: A work of fiction receives unfounded accusations of featuring morally objectionable content
* Everyone Is Satan in Hell: A work receives unfounded accusations of featuring morally objectionable content.
* Everyone Is Satan in Hell: Everything can be accused of having nefarious subtext.

* everyone. It also happens to a Koopa Troopa who tries to tell Mario and his friends about Bowser's invasion and then face vaulting when he gets ignored.
* Everyone Join the Party: Random people join the hero or the villain for the final battle.
* Everyone knew about that superstitious couple at the end of the street, but nobody knew about their surreptitious habit of catching rabbits to actually cut their feet off.
* Everyone knew Regulus Black... the impressive people knew immediately after reading the initials (based on the locket found in his home early in the fifth book, which obsessive readers were able to recall easily). Everyone else knew because the Internet let them compare notes with other languages' editions — the initials were R.A.S. where the Black family's name was translated to Svaart, R.A.M. where it was Musta, etc. The fans also managed to anticipate his middle name, Arcturus. This is more impressive when you realize there are a lot of stars whose names begin with A that could have been used (Algol, Altair, Antares and Aldebaran for starters).
* Everyone knows about Salt-N-Pepa's "Push It", but did they know it only reached #19? Or that they had three songs chart higher, including two songs that went Top 5? All of them are still iconic, with "Whatta Man" being the best known of them all. The other two, "Shoop" and "Let's Talk About Sex", were mostly forgotten until they were revived in 2016 thanks to
* everyone knows is actually the heir to the Ankh-Morpork throne. Good luck getting him to acknowledge that fact, though. His adopted dwarf father is also technically a "king", though among dwarfs this is less a noble title and more like "chief mining engineer".
* everyone knows that Sailor V works with the police (actually false for most of her career, a youma simply assumed and sent her challenge letter for V to the police and the public fell for it), thus she couldn't be known cop-hater Minako Aino.
* Everyone knows the intended lesson of the expression "The early bird gets the worm," but what does this mean from the worm's point of view? He got up early and he
* everyone knows what happened ten years ago — except Legna, whom everyone does their utmost best to keep in the dark. Some assume he also knows already, but the Senate especially are hell-bent on keeping the truth from him.
* Everyone Loves Blondes: Blondes tend to get the most attention from people.
* Everyone loves to write all sorts of long essays about how she's "a freak of nature"
* everyone makes sure that important buildings are doppelgangered, or built on in both dimensions. The only exceptions are Modern Earth buildings that are several stories high, since there's no way to build something like that in the Gruinmarkt and nobody can get that high anyway.
* everyone Marie met was subject to her "polite" criticism. When she and Frank briefly move into a retirement community, it's promptly lampshaded: the woman running the place comments that Marie has a habit of saying that sound like compliments, but are really personal attacks.
* everyone — up to and including himself — by proving himself to be a thoroughly competent, honourable leader who backed Aivars Terekhov to the hilt despite the possible repercussions and had the good sense to get out of the way of his subordinates with far better tactical ability than himself.
* Everyone Meets Everyone: The first episode has the main cast meet each other for the first time.
* Everyone Meets Everyone: The first episode shows the main cast coming together.
* Everyone Meets Everyone: The main cast meets one another one by one. Some of them may already be acquainted, but it doubles to let the audience get to know them.
* everyone. Most of the dialogue in this game is spoken at just above a whisper, and all of it at a very high rate of speed. Thank goodness for subtitles.
* everyone. Nearly every time someone gets beaten up, they aren't unquestionably defeated until after their shades are gone. One exception is Morpheus, who takes

his off before Agent Johnson fights him on the truck, perhaps symbolizing the fight's ultimate futility. The final fight between Neo and Smith has them knocking each others' shades off early on, because armor is irrelevant with the level of control they both exert over the world.
* everyone. Nobody knows who's behind the chaos until the very end, after they've all beaten each other to a pulp.
* Everyone of powermasked people. Those magic-users too weak to make a contract still wear masks in imitation of the strong, although theirs are a tad less impressive.
* every one of their cars had been stolen except for the ones with manual transmissions.
* Every one of the several times Fry has "died," or done something that was supposed to result in his death, it turned out he either wasn't really dead, it didn't happen, etc. Though, he did die just like nearly everyone else as part of the premise of the "Rebirth" episode.
* Every one of VNV Nation's live performances, and we wouldn't have it any other way. If you're curious just search for some live performances on
* everyone on Earth. Unless they directly picket someone, most people just ignore them.
* Everyone, one of said five students, who used sex and his good looks to help out with cases more than once.
* EVERYONE over 5 miles will be blinded, friend or foe alike. It's designed to be inconvenient rather than outright painful. The lights aren't so bright as to intentionally cause blindness. It's just that everything suddenly turns completely green.
* everyone over his sloppiness before simply walking out the gate and making his escape.
* Everyone Owns a Mac: On top of seemingly everyone in a work owning a Mac, it's simply the only kind of computer device in the work.
* Everyone period piece, facial hair was in fashion, and the cast is 100% male.
* Everyone points out how red her face turned during her dance with Mr. Von Trapp at a party. Mr. Von Trapp briefly looks smug about it whereas his fiancee later confronts Maria and admits she's had reservations about the engagement, especially after seeing the two's body language when they finished dancing.
* Everyone Poops have brown skin and smooth black hair. Their ethnicity is not touched upon.
* Everyone Poops is about how everyone, including different animals, poop, and at one point it jokingly says that camels have humped poop.
* everyone poops, the topic doesn't usually come up in casual conversation – one might know more about a friend's sex life than their poop life - and certainly doesn't come up in any formal or business settings. The taboo surrounding bodily waste functions in general is a very enforced trope in real life - unless it's of immediate relevance, people seem to be under a non-verbal agreement to never bring up defecation or urination. In more extreme cases, theocratic leaders have even denied having to poo at all.
* Everyone present has this reaction when Luffy swallows the MH5 bomb and blows the gas back at Krieg, remaining perfectly unharmed thanks to his
* Everyone realizes just how much of a Contrived Coincidence each act is, and when the evidence supports the
* everyone remembered the former Playboy model that served as an aide in the debate.
* everyone respawns. However, some classes such as Soldier however are known to have killed people besides the mercenaries, who wouldn't respawn.
* Everyone's a Little Bit Racist, Christmas Eve complains about the personal hygiene of (presumably Indian) taxi-cab drivers. Everyone agrees with her except Gary Coleman who says "I can't even get a taxi!"
* "Everyone's A Little Bit Racist" is a We Are Song where the cast acknowledges that they all carry unconscious biases.
* Everyone Says I Love You- Holden first proposes to Schuyler by getting the waiter

to put the engagement ring in her favourite dessert during a romantic dinner at a restaurant. She tucks into dessert so enthusiastically, she swallows the ring before Holden can propose. Later in the film when they get back together at Halloween, he puts the ring in a box of crackerjacks and she swallows it again.
* Everyone Says I Love You, there is a quick exchange between Alan Alda's character and his son over political beliefs. He playfully exclaims, "How did I end up with a kid on the other end of the political spectrum? How did I fail? Steffi, get me a copy of my will... and an eraser."
* Everyone's Baby Sister: Threats on a character that everyone cares about gets characters to act against the threat.
* Everyone's beating the crap out of each other with giant swords and explode-y magic, the same ones that can reduce monsters into a pile of ashes in the original games, yet nobody seems worse for wear because of it. Final battles are fatal, however. It isn't explained how your final battles with them should be any different than the dozen or so times you've beaten them before. During their death scenes, none of them seem particularly injured at all, they just fade away.
* Everyone seems to be under the impression that Toko and Reiji have some kind of relationship in
* everyone seems to have been represented in the city, it had distinct ethnic neighborhoods, so it's very difficult to pin down as "a city of the X people".
* everyone's favorite jolly green giant rageaholic and has played the character in every appearance since.
* Everyone's had the experience where someone leaves, then comes back, and you're doing the same thing you were doing when they left, and they assume "you haven't moved", no matter
* everyone Shan'ann and their daughters, despite his attempting to act as if he was concerned.
* Everyone's Hero has "My head! My butt! My head! My butt!" coming from a talking baseball that's bouncing down some metal stairs.
* Everyone's Hero's called shot in the 1932 World Series... if they had not gotten EVERY SINGLE historical fact wrong in that movie. The list of historical inaccuracies in the film would take up this entire page (for example, the 1932 World Series did not go into seven games or have a 3-4 home field advantage format).
* Everyone simply assumes the couple in question did, and said couple never confirms or denies.
* Everyone's individual prescription differs, but one constant is people with decent vision's impression of blind without 'em. For most people, having your glasses off is just blurry, but not necessarily to the point they can't operate in general. While walking down the street a person without their glasses may not be able to read "stop" on a stop sign, but they can see the big, blurry red thing and can tell they're at an intersection, so the fact that it's a stop sign isn't much of a logical leap. The blurriness is just like an out-of-focus camera, only it's stereoscopic — some blurs are closer than others.
* Everyone's is colored differently, in a manner similar to their regular clothes.
* everyone. Strangely for a comedy series, most of the cast have a very dark and depressing background.
* everyone takes advantage of his generosity, until the Spirit of Christmas arrives and inadvertently inspires him to be mean like his ancestors.
* everyone takes a second seat to Goku, Gohan, Vegeta, Trunks and later Goten, no matter their gender, she also occasionally takes a backseat to Krillin after she marries him, despite usually being the stronger of the couple.
* Everyone that isn't dueling is only present to explain the rules to the viewers. Even Yuuma gets this treatment in the first episode, when he sees Shark Exceed Summoning a monster. Yuma then proceeds to explain how Exceed Summoning works to Kotori, who already knows how it works (but the viewers don't since it's a new game-mechanic added in ZEXAL). Later in the next episode, Shark explains with almost the same wording how Exceed Summoning works, right after having summoned his Levice Dragon. And then there's all the other Game Mechanics... Needless to say,

the duels in the first few episode almost use more time explaining how to play the game than actually playing the game.
* Everyone that you meet in the first game shows up in the sequel. EVERYONE. At least, everyone who isn't dead. Most of them are emailing you, though, and comment something like "Man, it was hard to get your address!" ...an address belonging to a
* Everyone.; the cooks were expected to cut the meat up beforehand into tiny pieces so no knives would be needed at the table.
* everyone. There are only two ways to defend against it: flee until it stops or hit it with a well-timed smash attack. Either will leave the Psyco Gundam back in mobile suit mode, temporarily stunned. The Alpha Azieru can do this attack as well, sans the transformation.
* everyone they (think they) may be. The point isn't so much to make you unbreakable as to teach you where that breaking point is, as well as how to cope and rebound once you've passed it.
* everyone they view as a threat — Hogwarts, SHIELD, the Ministry, various intelligence agencies and heads of state, etc. — and for the most part pull it off completely successfully.
* everyone thinks he killed Sayaka, which would have resulted in everyone's deaths including his own, but he just so happens to have the one door that sticks, which he can use to prove he didn't do it. Or, when Junko breaks into his room in the middle of the night to stab him, Kyoko had luckily just been wandering around at night to see Junko trying this and fight her off. It happens again in the fifth trial, where he's getting executed and by all means shouldn't survive, but Alter Ego managed to use the last of his strength to save him (keep in mind, if it's Kyoko getting executed instead, Alter Ego doesn't show up to help).
* everyone thinks it does. Tech-priest rituals involve a lot of chanting and sacred oils before they finally flip the "On" switch.
* Everyone thinks that Ling is immensely hot. She thinks that as well, which helps.
* Everyone thought Sir Reginald Derby had died in a colossal explosion of his landship but in fact, he was seen to be
* Everyone thought the Vortigaunts were just dumb slaves. Turns out they really aren't, as shown in
* Everyone throws off rubber masks at the end to reveal they're not as they seem!
* Everyone, up to and including Shepard, can die in the final mission. You must have upgraded the
* everyone walks in on Eric and Donna going at it on the kitchen table. Red and Kitty later are seen scrubbing the table with a mixture of bleach and lighter fluid, then deciding that they need a new table.
* everyone was magical, with Hercules no less magical than most of the monsters he kills.
* Everyone Went to School Together. One of the signs that a character is becoming popular or will get more screentime is when the writers give him a backstory.
* Everyone Went to School Together: The adult cast of a show turn out of have known each other for years and even went to the same school.
* Everyone, when the Doctor corrects River that there are not five people in the room, but six, because the
* everyone), where "jaunting" (teleporting without a teleporter, pretty much) means you can live anywhere on earth and still be able to get to work perfectly conveniently. It's not exactly an utopian future, though.
* everyone, which leaves open the possibility that Junko may still be the ultimate villain after all.
* everyone. While Bacall seemed calm, the other three nominees were open-mouthed and wide-eyed. Binoche herself looked more shocked than anyone as she headed to the stage. She noted she hadn't even bothered preparing anything as she was as convinced as anyone else Bacall would win this.
* everyone who cheated on her boyfriend with Jen's boyfriend and the rest of the film followed her until she too turns and is killed by Zoe in the last 5 minutes.
* everyone who doesn't have just an armor or an explicitly genetic basis to their abilities.

* Everyone who doesn't like that just listens to classical music. And reads classical literature. Sometimes it seems the 20th century never happened in
* Everyone who eats Hayate's food loves it, especially the ever cynical Vita. In fact, one of the
* everyone who hates nudism set, as most people don't really give it much thought at all.
* everyone who's been eliminated that season and make them compete for the chance to return! Yet as late as All-Stars 4, some queens still express surprise and displeasure at this "twist" (despite the fact that no queen has ever won a season on which she left and returned).
* Everyone who sees White Rose Dragon and Red Rose Dragon start to fawn and coo over them. Xavier even lampshades that he'd be fawning over them if he didn't forget that they would attack him with their claws.
* everyone who's gotten into the cockpit of a mobile suit got one. Shino upgrades from the Ryusei-Go III (a custom Shiden with an AV input system installed) to the Gundam Flauros, which his vanity renamed it the Ryusei-Go IV. Ride previously used a standard Shiden but gets the Ryusei-Go III and renames it Riden-Go, with a new paintjob and an additional gauntlet on the right forearm. Dante swaps out his standard run-of-the-mill Shiden for a Landman Rodi, a Man Rodi with improved ground capabilities. Hush switches from a Shiden to a Hekija (which was designed for ease of use).
* Everyone who started using the Internet after the mid-1990s seems to think that the Web and the Internet are synonymous.
* Everyone who treats the conflict over Westeros as a "game of thrones" and covets the Iron Throne as the ultimate prize. The
* everyone who works for Klaus in a non-military capacity seems to be some version of this trope.
* everyone will die, because of this trope, which makes asking him whether or not your current prognosis is terminal a moot point.
* everyone With no differentiation between organic and synthetic, the Reapers' no longer have the need to follow their directives, and join the reformed Milky Way to begin rebuilding and developing a Utopian society.
* every" only have commentaries for select episodes. Otherwise, the entire serial is commentated.
* every option will get you screwed. You can benefit from breaking a fork (if your opponent was expecting you to waffle, you can score a tempo advantage). You never benefit from a zugzwang.
* every), or a combination, while the Daedric Princes influencing the world is a matter of historical record.
* every or fictional cop show will feature criminals who try to invoke varying versions of this. Accident, suicide, self-defense, "someone else did it", etc.
* Every other branch of the service, including the Coast Guard, tells and retells the joke about how X individual joined the Marine Corps because they couldn't match the IQ requirement of Y branch of service, where "Y" is invariably the branch that the joker belongs to. While these are just jokes (and they
* Every other character in the books subverts this, as Harry is the only person with a revolver. Marcone uses an Assault Rifle and a Shotgun, Hendrix uses an assault rifle
* Every other ghost is made of ectoplasm and doesn't resemble any living or human being.
* every other kid on the risers take a tumble on stage. To top it all off, one of the decorative trees on the wings comes crashing down on the piano-playing choir teacher, knocking her off the bench.
* Every other Koopaling is associated to a track nodding to their respective locations in
* every other Princess of Jahad, is also a traditional case of being physically very strong while having a feminine frame. Other skilled Tower inhabitants, especially the damage-dealing Fishermen, can strengthen their body temporarily by reinforcing their body with Shinsu.

* every other Rugby team they ever played - no team has ever dominated any sport as much and not won world cups as the All Blacks have in Rugby. However, the ABs have since made this trope a thing of the past, successfully defending their World Cup crown in England in 2015.
* "Every Other Time" is actually a parody of LFO's "Every Other Time". A lot of people thought it was a Bob Ricci original song, even though the LFO version was more successful.
* Every other week on FXX, the channel seems to love showing the famously tearjerking film
* every overbearing mother ever. She loves her "children" with all her heart and ladles them with all sorts of gifts... at least, until she thinks that they'll betray her, at which points she drowns them in poison and acid, both literally and metaphorically.
* Every over the top element from the American cover of the original
* Every parahuman sees a vision of two massive entities when they or somebody nearby triggers, though the content varies. Aside from Miss Militia they immediately forget what they saw or even that they saw it.
* Every participant of any ideologically-motivated resistance movement against an occupying power feels this at times, or even constantly (or to the bitter end). Even when almost all hope seems lost, people will remember - or imagine - what it would be like to live a society in accordance with their ideology and draw strength from that vision. Humanity's capacity to imagine is very great indeed. The only way to make such ideals go away is to give them what they want - whereupon after a time they become disillusioned with the new or 'restored' society and eventually move on to believing something else is worth fighting, or dying, for. Such is life.
* Every personal weapon that isn't a knife for shanking mercs, is a pulse gun in Kieran Shea's
* Every person they pass pulls out a gun and joins the assault. The mail carrier, the trucker having engine problems, the couple with a stroller, the random guy with a Rasta hat, everyone. No word on how they cleared the area of civilians without tipping off the unsub, but it makes for a cool shot.
* Every person who enters the Gate of Truth has a unique pattern on the gate, representing the knowledge the user has. Father's gate is blank.
* Every pinball machine that provides unlimited balls but only allows you to play until time runs out—
* Every plan concocted by the Cutie Mark Crusaders ever to get their cutie marks. Rather than try and figure out what their special talents are, they just keep trying random things, hoping they'll get their cutie marks in them. Whether or not they're good at the thing in question, or even like the thing in question, is hardly ever brought up.
* Every planet and moon is numbered. Only planets in the homeworld systems of Amarr, New Caldari, Luminaire, and Pator, get proper names.
* every planet in Futurama is named this way. Thuban IX, Amphibios IX, Decapod X, Chapek IX, Dogdoo VII, Tweenis XII. there are few exceptions.
* Every planet procedural. Every planet unique. Every planet unexplored.
* Every planet will have one capital city or another "spot of activity", and controlling that spot means instantly conquering the entire planet. These planets are also almost invariably
* Every platforming game has an invisible timer that will take effect if the qualifying player count isn't reached in time, ensuring that everyone can eventually move on without having to wait forever for delayed/inactive players to finish.
* Every playable character has a different quote for when the final boss fight begins.
* Every playable character have some deep issues that bother them. Aeris, whiling having her own issues as well, is the most well-adjusted of the group. Despite the fact that her mother died protecting her while fleeing from Shinra, constantly being hunted down by Shinra, and growing up in the Midgar slums with her adoptive mother, Aeris remains quite cheerful and always has a positive outlook. This makes

her sudden death all the more tragic for everyone.
* Every (playable) race except the Liir (see aversions with FTL travel below) in
* Every player has a dream self on the moon of Derse or Prospit respectively. Then time shenanigans get involved, both via literal time travel and time traveling messages. Then some of the dead selves end up coming back to life as separate characters from the "main" characters. It only gets more confusing when
* every Pokémon in the game capable of using TMs can learn it too, even assisting Arceus in creating a new version of Dialga, Palkia, or Giratina in one event.
* Every poker game comes down to a high-ranking hand being beaten by an even higher-ranking hand.
* Every political party worships its founders and the politicians who benefitted the party the most by actual getting elected into office. Naming them all would take us to far and create intense flame wars between editors, so let's leave it at that.
* Everypony", caused by the Tantabus, a creature that creates and feeds on nightmares.
* Everypony is awed, impressed, and somewhat scared when a magically-uber Twilight takes out the side of the castle wall. Rarity is furious that she ruined the curtains made of the finest silk.
* Everypony is gay for Braeburn according to the fandom, including his cousin Big Macintosh.
* Every pope changes their name as they rise to the papacy, and they are known by that name rather than their birth name essentially forever. Jorge Mario Bergoglio will be known throughout history as "Pope Francis", and even Benedict XVI, despite resigning as pope, will keep that name in perpetuity.
* every possible human behavior or character type degree or other (as most symptoms of mental illnesses can be described as "doing something normal in an abnormal manner", so handwashing = normal, handwashing every five minutes = abnormal). It's an open secret that it was written this way just to make it easier for mental health practitioners to bill insurance companies.
* every possible route time MIGHT take finds him, he is awestruck to see his entire life at once played out with a different memory on a different single scale of the dragon's massive form.
* Every possible variation of this trope was more or less invented by
* every Power Ranger on Earth out of foot soldiers. Things do not go well for the Troobians.
* Every Presentation Ever. Presenter describes a generic presentation as they present.
* every prisoner aboard in the event of boarding or mutiny. Just getting caught with such a ship — regardless of any evidence that it's ever actually carried slaves — is enough to be shot. A slaver ship's true purpose is impossible to hide from the inside, so if they're boarded and don't have a cargo of slaves they're assumed to have spaced them beforehand and as such are automatically guilty of mass-murder. In the book where this is stated, one slaver captain, while flying without a cargo, muses that it would be better to get caught with a full load of slaves; slaving will just get the whole crew life in prison, whereas being charged with mass-murder will get them all shot on the spot.
* Every Proper Lady Should Curtsy wear dresses or skirts and keep their hair short or pinned up.
* Every properly equipped school has a fight song, a mascot, and two or three school colors.
* Every pro wrestling tag team ever, but some tandems exemplify the big guy/little guy dichotomy particularly well:
* Every public poll credited Hogan's strong anti-tax message and Brown's lack of any strong message for the upset.
* Every quest and significant development in Arcanum are recorded in your journal. Low intelligence characters record their impressions in broken
* Every race from Pandaria apparently speaks fluent Common/Orcish (except

* Every race has a mount favored by its culture, and for a long time, certain races were restricted from certain mounts if they were too large. For the Alliance, only gnomes and dwarves could ride the gnomes' mechanostriders (robot emus) since the other races were too big. On the Horde side, the tauren were too large to ride any ground mounts except their own (a
* Every raid boss in the game uses this trope: the most powerful abilities are employed as the boss is getting low on health. However, magnificently subverted in the Lich King encounter, where
* Every re-airing of the premiere episodes of the second and third season is edited down to the normal 42-or-so minute length as the originals were about 9 minutes longer as they did not feature any commercial interruption. Further, there is one instance in the Season 2 premiere in which some events occur in different orders.
* Every regeneration is a Freak Out in that it traumatically, completely and permanently changes the Doctor's personality and appearance, and catalyzes and concludes whatever that particular Doctor's character development is. A few examples:
* Every religion and power structure has been infiltrated to some extent by Chaos worshipers.
* every) results in her being bullied and ostracized at school since her classmates don't believe her hair or eye colors are natural.
* Every review episode opens with "This is the one with [noun], [noun], and [noun]."
* every roadsign in the land that has a number on it There's also the problem that nearly all UK cars display miles per hour as the primary unit; while kilometres per hour has been legally required to be also displayed for decades, the km/h figures are often small and hard to read.
* Every Robert Palmer video featured a group of models made up to look like emotionless mannequins.
* Every Roman centurion (not the grunts, except in the Olympics one and the palace guard-types) in
* Every romantic interest is portrayed as an interruption to the Booth/Brennan relationship. Brennan had Assistant Director Andrew Hacker, Jared Booth (referred to by Angela as 'Booth-lite'), the Botanist and the Deep-Sea Welder, and Tim "Sully" Sullivan. Booth had Tessa the lawyer, Cam,that Marine Biologist, and in season 6,Hannah Burley - who was met with a knowing scoff by both the viewers and every other character in the show. Booth and Brennan finally got together in the end of s6.
* Every scenario in the Gray Death Legion and Black Thorns sourcebooks for
* every scene, her closet contains nothing but a row of identical uniforms.
* Every school class receives three "crazy cards" per month. These cards are used to commit students to a mental institution — though never seen for very long in the "real" world,
* Every school, from kindergarten to postgraduate, sees this once a year. Not coincidentally, this is when any and all internet communities see a spate of new names piping in, and sometimes settling in.
* Every season 4 episode that aired in 2007 had already been released on "Season 4 Volume 2" DVD before they aired on TV.
* every season, including the premieres of seasons two, three as mentioned above (due to maternity leave and personal issues) and five.
* Every season, the main characters (Bojack, Princess Carolyn, Mr. Peanutbutter) get a new job.
* Every sentence out of Zapp Brannigan's mouth is a triumph of quotable lunacy.
* Every ship can mount a "Singularity Engine Time Accelerator" which can speed up the flow of time up to 10x, depending on the game settings. Its primary use is to speed up travel time in-system for the player's benefit. Activating the device at high settings is heavy on the CPU and tends to cause
* Every show begins with Lucinda giving a different content warning that the following hour will be absolutely fucking obscene.

* Every side has an enormous, Tier 3 artillery piece which takes a half hour to build and fires about once ever 10 or 15 seconds to a range of around 10-15km, enough to cross the small and medium maps and get almost across the large maps (the extra large maps are up to 81km). They're really only useful when used by UEF, and then in large numbers to try and take out the enemy's commander.
* EVERY SIMS MACHINIMA EVER (Parody) machinimas sparingly feature non-white Sims.
* EVERY SIMS MACHINIMA EVER (Parody) that Madylynne and Brandon were dating.
* every since the show is set in Akihabara, which is the center of Otaku culture in Japan.
* every single Ally McBeal. For one character, the fantasies turned into hallucinations brought on by a brain tumor.
* every single animal you meet them (in the case of ghouls, both sane and feral). Like all guns it also demands Perks to keep it usable (Nuclear Physicist and Gunslinger) which means it gets overshadowed by regular pistols as their ammo works on everything.
* every single arc ends in a perfect crime except the last one. It turns out that military Special Forces, with the full backing of the government, are even better at covering up crimes than Yakuza are. It isn't until Rika remembers the face of her killer in the final arc that the 'chain of mysterious deaths' is finally solved.
* Every single army during the 6th edition found itself in a precarious position with the introduction of Flyers, which were hard to hit due to the rule that all non-Skyfire shots fired at them would be snapshots (only hitting on a roll of a 6 on a 6 sided dice). As Skyfire itself is new, no models at the time had it. The only army that wasn't fazed by this was the Imperial Guard and the Orks, who had means of putting enough firepower into the air that they simply did not care about how impossible the odds were; they were only slightly worse than the conditions they're already used to!
* every single aspect, a sequel subverts the premise by having Humanity be the less advanced one.
* every single bit of credit for the Denver Broncos 2011 turnaround. When the Broncos defense intercepts the opposing quarterback's pass in his own territory near the end of the game, leading to the Broncos kicker getting an easy game-winning field goal, and everyone says "Tebow does it again!" it's gotten pretty ridiculous.
* Every. Single. Book. differently and just reuses Robert Langdon, who is nonetheless oblivious to the fact that the exact same plot keeps happening to him.
* EVERY SINGLE BREAK! Every week after that, they played ASPCA and UNICEF ads on every show, which still continues today.
* Every single card has an animated version, even the limited-time reprints of cards that come in base form such as Ta-G, Katana Unsheated and generated card Tokens such as Ghosts. If you use an animated card such as Urd to summon a copy of another follower, that new copy will become animated too. With the release of Seer's Globes, players can now freely animate any card of their choice.
* Every single career tribute alliance in the history of the Games. For example: in the first book, the alliance consists of seven total members: Cato, Clove, Glimmer, Marvel, an unnamed tribute from District 3 who reactivates a set of mines, another unnamed tribute from District 4, and
* every single channel shown by Clamp Cable as the titular critters wreak havoc throughout the building. Bonus points because the technical difficulties title card bear the image of a grinning gremlin.
* every single culture that isn't white, cis-hetero, or even contemporary. In some cases, modern hipsters have even been attributed as being a factor in gentrification of non-white neighborhoods.
* every single day in order for Bloo to avoid being adopted by someone.
* Every single enemy works this way. Since they're all X-Parasites mimicking various creatures, they revert to the cellular form when defeated. The only way to kill that form is to absorb it (which only Samus, or a metroid, can do). If the cell form isn't absorbed, it recreates its body or infects the killer. Some can

even spawn more cell forms, creating even more monsters.
* every single episode Radio just to hear him rage and rage... and rage.
* every single episode, the bad guys would appear right behind the good guys just as they'd discovered the relic of the week.
* every single episode without fail, often with little-to-no justification.
* Every single Esper. Their powers work by substituting their own reality into the real world using AIM (
* Every single game with a codified set of rules once started as Calvinball. Their creators made up the rulings as they went along, sometimes beforehand, sometimes in the middle of a game, adding and removing stuff, sometimes for logical reasons, sometimes not.
* Every single gem monster that the Crystal Gems fight over the course of the series is actually a Crystal Gem rebel that was corrupted by the Diamonds.
* Every single girl except for Kyoko (Tsukune's cute but human cousin) in
* Every single hero myth ever, across any culture, relies on this. The Greeks and Romans had stories like Jason and the Argonauts, Hercules, and the Aeneid, with heroes being sent on quests by a god or a king. The Middle Ages had many legends based around knights going in search of holy objects or to save a kingdom or a damsel or something to that effect.
* every single human being on Earth thinking about him with hope at the same exact moment. He not only restores his youth (having been artificially aged by the Master) but uses TK to form a bubble around him that blocks the Master's laser screwdriver. When the Master turns to fire at the Doctor's companions, the Doctor knocks the screwdriver out of the Master's hand from half a room away. He also uses it to float. Given the nature of the ability, the Doctor only has it for less than a minute.
* Every single incarnation of The Nameless One (prior to the current one) in
* Every single instance of Helen dragging Robert back into the house when he shaped up. The most obvious one, the scene where only her arms are to be seen...
* Every single in trying to sabotage their boss' competition by making Gemma late on her pizza runs, they are also clearly enjoying their jobs a little too much and seem to take a savage delight in putting her through petty abuses and trying to break her spirit.
* every single Jedi but Obi-Wan Kenobi, Barriss Offee and Mace Windu had figured it out on their own).
* every single knight in Oaklore Keep (except for Sir Baumbard, who says that he was never officially a knight there because "Sir" didn't work with his name) has a pun in their name (Sir Prize, Sir Charge, Sir Lee, Sir Vivor...) describing their personality. There's even a joke on a joke when Ash Dragonblade, a young boy in the town of Falconreach, laments that he'll never become a knight because his name isn't even a bad pun.
* Every. Single. Lacrosse match This is not an exaggeration. And there are about 6-7 across two seasons. Originality is not the writers' friend when it comes to Lacrosse games, it seems.
* every single lie spoken in the entire Imperium. The unlucky recipient swiftly went insane and turned traitor in almost record time.
* every single line amounts to a part of an extensive amount of ice-based puns.
* Every single main character's stories is too busy being chased by tentacled monsters and/or slowly losing his sanity to get involved in any kind of romantic and/or sexual relationship.
* every single male Centauri of age. Tellingly, all prominent Centauri characters are extremely dangerous:
* Every single member of Buggy's crew after Luffy's miraculous rescue.
* Every single member of the HUGE Kihara Family believes in this idea. Kihara Gensei, Therestina's grandfather, goes as far as saying that he would be fine with turning Mikoto Misaka (the #3 level 5) into a level 6 for a few seconds even if it would end up blowing up all of Academy City including himself right afterwards because he would have achieved scientific progress, which outweighs everyone else's deaths.

* every single named Gropo character, except for General Franklin and his senior NCO
* every single near the end of the game. Strangely, though, the South American militiamen don't seem to follow the same rule.
* Every single NPC that refer to you as a group, such as saying "what can I help you people with" or "I heard there were travelers on the road", have alternate lines if you have no party members with you. In these instances they instead refer to you as alone and sometimes even comment on your race. For example, after being warmly greeted by the dalish, a dalish player will then be asked why they are traveling without their clan.
* Every single one has long, flowing hair (with the occasional exception of Mercedes when she wears her hair natural) right up until the second season finale when Quinn, having lost her Prom King potential boyfriend, proceeds to fail at villainy as well and gets a cute short haircut from Santana and Brittany to make up for it.
* every single one just to do that. They also didn't see why the Marines would need their own paratroops anyway.
* every single one of his students. Regina at one mentions there was always tension between them, and given his previous students include her mother and half-sister, everyone she tells is understandably and visibly disgusted.
* Every single one of Roger's camping trips has been horrible from the get-go form, he doesn't ever notice that he's the only one to enjoy them: one year, he quits his job (more on that later) and once he gets it back, announces that they won't be able to go camping that year, is puzzled by the kid's (and wife's) obvious joy.
* Every single one of the actors and crew donated their time to make
* EVERY SINGLE ONE of their eponymous channels on 30 September 2020. Less than a year later, Fox shut down on July 1, 2021. The company's other channels (BabyTV and the National Geographic channels) continue to broadcast for the time being.
* every single one of your armies if you go full possession, all your units suffer a heavy debuff to their melee attack if you go full control) that it's widely acknowledged that the best way to play Malus is to actually play as another Dark Elf faction and confederate him. After a patch, the full control does not give penalties anymore, but just remaining at full control is an exceedingly difficult thing in itself.
* every single one, which is fairly unique. Most though end up in non-combat roles.
* Every single one. You can use the terminals in each department's security booth to track who is where on the station; not only can this be used to track down specific people, but it updates in real time to account for NPCs changing locations.
* every single person there gives him a very nasty look for not being a credit-card-using speed demon.
* Every single piece of free software ever. The developers don't expect to be paid. They just write it because it's what they want to do. The bigger projects tend to have paid developers as well, though, for the most part, they were working on it beforehand.
* Every single pitching Presidents' Day sales, most of them for car dealers.
* Every single playable character is a squishy wizard with a different elemental affiliation.
* every single player opened fire on the civilians despite no prompt to do so being given.
* Every single quest includes at least one pun (or at least a reference to some other movie/game/book/whatever) and
* every single regular-season game even if you're (otherwise) perfect in-conference!
* every single Rider. Even the villainous Riders carry swords as well.
* every single room is as hot as the worst parts of Upper Norfair. It's virtually impossible to get anywhere through it without a tool assisted run.
* Every single soldier after a while. Almost as if being a sociopath is a required trait in order for one to qualify as a soldier.

* Every single Special K commercial ever. "Oops! You're about to be tempted by this naughty, sinful piece of candy or chocolate cake. Good thing you're smarter than that, so you'll drink this flavored water and eat this crunchy nutrient-free cardboard instead! Because one little sweet can ruin an entire day of otherwise healthy eating!" Notice how whenever guys need to lose weight or eat healthy, they're just told not to stuff themselves with 2 double cheeseburgers and a jumbo order of fries in one sitting aka "what most people tend to do anyway".
* Every single thing in Nick's Random!Cartoons shorts collection, which was an attempt to capitalize on kids' obsession with surrealist humor and the non-sequitur.
* every single time she takes the elevator, Garibaldi is already in it. Sinclair thinks that this is just a coincidence, until the elevator arrives and Garibaldi is inside. Talia takes the stairs. Sinclair joins her.
* Every single time there is a TV series with nerds and guns, the following happens: Boy meets girl on team (spies, alien hunters, whatever). one or other is a nerd, and quite likes the other one. About the last episode of the series, they finally get round to doing something about it. By the end of the episode, one or both of them is (or are) bleeding to death on the floor.
* Every single universe is apparently a giant frog, which is made in the Sburb game session of the previous universe. I.e. Earth C is in a universe that's a giant frog in Earth A and B's universe, which in turn is in a universe that's a giant frog in the Troll's universe, and so on and so on.
* Every single woman would go on and on about how beautiful they were, though part of this is because Jeannie is massively jealous of all these women because she's in love with Nelson.
* every single word he's told, and eventually storms out not because he discovers the truth, but because he's become so convinced by their lies that he's convinced they're all horrible people. Leads to this classic line of dialogue:
* Every society or species, real, imaginary, sentient or otherwise is terminally dependent on something, oftentimes something which is completely taken for granted. For example, all life on earth is highly dependent on a massive hydrogen guzzling fusion engine in the sky, which we call the sun. The difference between continued existence and annihilation usually hinges on how tamper proof and/or sustainable that something is. In this case, our massive, flaming fusion plant is fairly tamper-resistant and looks to last quite some time.
* every software distributor sites, who often co-install other (not asked for) software or browser extensions such as a Search Tool Bar, by relying on the user just clicking "Accept" without reading to just get through the installation process.
* Every so many months there's a story of some thief who successfully breaks into someone's house... only to be caught when they use the homeowner's laptop to access their Facebook or Twitter. Similarly, a stolen mobile phone automatically uploading the thief's selfies to the rightful owner's cloud drive.
* Every Sonic game and television show is in canon, except that most exist in multiple universes, or 'Zones'. This includes: The 'Prime' Universe, the
* Every so often, a boss stage is played in which one player is transformed into a flying creature that rains projectiles on the other players in changing patterns.
* Every so often (especially in the guidebooks), a structural integrity field is used to explain why
* Every so often, McCartney will vocally gripe about the familiar "Lennon/McCartney" credit for Beatles songs, and how it unfairly implies that Lennon was the main creative force of the group. While this isn't an entirely unreasonable point of contention on McCartney's part, he has also tried on several occasions to convince or force the rest of the world to start using "McCartney/Lennon" instead, at least regarding songs he was primarily responsible for writing. Given how culturally embedded "Lennon/McCartney" is by this point, this quest is quixotic at best, and he appears more or less resigned to defeat in this case.
* Every so often, promotions will give a rookie wrestler a massive push to sell

him as a "young, uncannily talented phenom", with a major part of the push involving having the rookie defeat a couple well-established main eventers or former world champions. Notable examples include
* Every so often, Superman gets infected with a seemingly incurable alien illness. The Virus X in
* Every so often, Superman writers rehash the "Superman goes back to Krypton" plot from 1960 story
* Every so often, the line given will actually fit the scene, which in some ways is just as funny as when the line is massively out of place. For example, in a scene where the premise is a pastiche of Chris's departure from Vietnam in
* Every so often there is an episode where the universe itself seems hell-bent on beating Dale over the head with his wife's infidelity to finally make him realize it, only for him to
* Every so often, you'll see a random object pixellate and flicker, like a hologram whose red layer is momentarily misaligned. This glitching is accompanied by a slight buzzing sound, which is particularly jarring in contrast to the usually calm background music.
* every southern European country (or country colonized/influenced by a southern European country) is a World of Ham. This is especially prevalent in football matches.
* every Soviet book dealing with really distant future or a really developed society will have an Ancient Greece smell.
* Every Space Marine Chapter has its own specialization. The Space Wolves are tough melee fighters, the Raven Guard are masters of guerilla warfare and rapid assault, the Salamanders love flamethrowers, and the Ultramarines... have a thing for logistics. Guess which one is the one with the 500-world empire?
* every species in the series. Dogs are Doogans; birds are Craws, ants are Antottos, and quite a few other examples. The normal versions of the animals have their normal names.
* Every species is part of one or two egg-groups and could mate with any other pokémon of the same egg group as long as it's of the opposite gender,
* Every spellcaster has their own color-coded magic aura, usually based on or complimentary to their clothing colors. Sometimes it is based on eye color: the heterochromatic cleric/sorcerer Tsukiko casts arcane and divine magic in different colors. Vaarsuvius the evoker is pink, Durkon the cleric of Thor is white, Miko the paladin is light blue (most of the Sapphire Guard and people living in the area use blue, actually), etc.
* Every spell characters cast within the lore is fueled by mana drawn from planes. The different effects all come from the way the mana is channeled.
* Every spring since 1972, students at the Massachusetts Institute of Technology drop an old, irreparable piano from the roof of a dormitory six stories high to celebrate Drop Date, the last date one can drop classes at MIT. The resulting noise has spawned a unit of sound volume, known as the Bruno.
* Every squad has a brave soldier who has to open the UFO doors and take a ton of reaction fire when you're raiding crashed alien ships in
* Every star has anywhere from one to a dozen different referents depending on the number of catalogs it is recorded in, with each catalog having its own nomenclature. It can be the number of the star in the order it was discovered/examined, or a positional code. Most of the moons of the gas giants in our own system also fit this trope. Jupiter alone has 63 moons, the smaller ones only have a Roman numeral. A great many asteroids are also only known by a catalog number.
* every Story Arc used the Hogyoku, the same device that created the Arrancar, on himself, but it gradually turned him more Hollow-esque with each transformation. Even in the Lost Agent arc, where the antagonists are essentially superhumans, said superhumans only gained their abilities because Hollows attacked their pregnant mothers in the first place.
* every story either of them ever published was at least partly a collaboration, regardless of what name it was published under.

* Every stuck to this mostly, as did the earlier movies (with the exception of Saavik, a half Vulcan-half Romulan woman, and Maltz, a Klingon crewman). Worf broke the pattern.
* Every sufficiently large school district in the world will have at least one school that qualifies for this trope, or is at least
* Every summer, babies get rescued from the back seats of hot cars because their caregivers forgot they were there. Tragically,
* Every summer, /b/ sees a bit of extra traffic due to school being out. This is referred to by the /b/tards as "Newfag Summer". Naturally, "summerfags" are hardly welcomed.
* Every supublic. Justified in that most villains actively try to kill superheroes (and their sidekicks) and vice-versa, regardless of gender, so not hitting a female back would just be
* Every swing George takes ends with him crashing into something. The
* "Every tale has a beginning, but only one begins under the sea." —
* every team goes into the playoffs. In 2005, this allowed Ohio's Gibsonburg High School baseball team, with a regular-season 6-17 record, to win eight straight playoff games and win the Ohio state baseball championship with a losing record overall.
* Every team in American Football maintains a "playbook" full of dozens of
* Every television channel in the United States took the opportunity to promote
* every that they quickly resort to killing each other whenever there's nothing else around to fight.
* every. The committee's name was derived from the operation's name— "Double Cross", as in "to betray" and also what XX means in Roman numerals.
* every the main character and her friends look remarkably healthy and well-fed for residents of an orphanage in Depression-era America. (Especially considering the heavy implication that the director was neglectful and abusive; even kids in a respectable place would likely have been somewhat undernourished.)
* every, the monsters that XANA sends normally shoot laser beams from various parts of their bodies. Some have other type of attack, though, like Bloks (which in addition to lasers also can shoot ice beams and rings of fire).
* Every, then asking the judge, "If you take away our right to steal ideas, where are they going to come from?" He then points to Marge, whose best "original" idea for a cartoon is "Ghost Mutt."
* every. The war still rages on, but the victor will come out magintudes stronger than before. Unless they manage to kill more of each other quicker than they can each reproduce, that is. Also, once one side or the other wins, the Imperium can swoop in and blow up their planets and stuff before the bio-matter can be processed by Tyranids or used as food for Ork spores to spawn more of them.
* every they founded the Dominion, their people were apparently treated with suspicion, hostility, and outright persecution everywhere they went.
* everything2 a first person, tongue-in-cheek, exploration of this trope to a greater degree than most.
* everything, a bewildering array of requests. Ask Cortana about a restaurant, for instance and rather than just doing a web-search, it will display its menu and hours in a "restaurant" template created just for such questions.
* Everything aboard the Axiom and perhaps the exterior of the ship itself is indicative of this trope.
* Everything about Daigo, including his name, abusive father, tacky fashion sense, and vampiric powerset were inspired by Dio from
* everything about his past life in the fairy tale world... right before Regina decides to kill him.
* Everything about Kanon and Shannon as presented in the earlier games is a herring so strong that it almost caused a
* Everything about the Brexit referendum of 2016 — by which the UK formally voted to leave
* Everything allows players to visit alien worlds with purple grass, green skies, and giant fungi in the shape of trees, among other things.

* everything And they still do this when writing or talking about said era(s), but on the footage itself, all WWF logos and utterances are legal again.
* everything being published on the Internet is extremely useful if an apocalyptic event happens; in the past, war, plague, or an earthquake could raze an entire city and bury or burn everything. Nowadays, however, most important info is already stored in too many places to lose everything at once. Downside is that it's not going to last long past the collapse of human civilization.
* Everything Breaks: It's like as soon as you touch it, it crumbles into dust!
* everything Bubs sells is dangerous. The stuff he sells out back on the black market is quality goods. In fact, in his capacity as a black marketeer, he's so devoted to customer satisfaction (as opposed to his capacity as an official businessman, in which he relies on not having any competition) that if you specifically want something that will cause an allergic reaction, he'll sell you the allergenic stuff. Though he sold Strong Bad a piñata that was filled with...
* Everything but the Girl: A character can achieve or gain everything they want with the exception of their love interest's affections.
* Everything but the Girl: A person with new talents can get everything but the girl he wants
* Everything but the Girl's greatest hit was Todd Terry's dance remix of "Missing", which influenced them to undergo a
* Everything but the Girl: They can achieve or gain everything they want with the exception of their love interest's affections.
* Everything but the Rain flashback arc, Uryuu's father Ryuuken seems to be a Teen Genius as well. Even Aizen admits that Urahara is the smartest person in the series, but Ryuuken, as a mere human teenager, is able to follow Urahara's thought processes well enough to startle him into praising the boy.
* Everything came to a point when one reviewer by the name of Carl Hannigan pointed out that
* Everything Carl does kind of turns up this way, doesn't it? It becomes something of a
* "Everything Changes" again." Harkness's home era is the 51st century.
* Everything does change, except for the one thing that the characters actually
* Everything Dwight, Andy, Kevin, Creed, and to a lesser extent Kelly and Phyllis say in the American version of
* everything either) wear holy relics prominently, many of which are the bones of saints and martyrs. This is justified by Imperial symbolism; To them, the skull symbolizes the purity of humanity.
* everything else becomes irrelevant and your team automatically wins.)
* everything else combined. How does this system remain stable? Simple. The smaller fish breed like crazy and the carnivores keep eating them! Of course, the base of this food pyramid are eating microscopic organisms that are both photosynthetic, like plants, and yet capable of moving and feeding like animals. Depending how you look at it, the things that feed on this base layer are both herbivores and predators. Even then, however, the vast majority (89%) of the biomass is at the very top of the food web.
* Everything Else features the first verse played backwards during the solo.
* everything else, Interstate Commerce has greatly increased and so have the federal laws justified by regulating it. Because after all, if you have to regulate commerce between the states, you also have to regulate the railroads that carry the goods, right? And if you have to regulate the railroads, you also have to regulate the negotiations between railroads and their employees for salaries, right? And if you have to regulate that for railroads, the Fourteenth Amendment indicates you cannot treat a baker different from a railroad worker, right? Similarly, the Fourteenth Amendment is commonly interpreted to implicitly "incorporate" the Bill of Rights (which is usually worded as "Congress shall make no law"...) against the states, thus prohibiting Rhode Island from having a state religion (which it could and Maryland did when the Constitution was passed)
* Everything else (Mercury, most moons, asteroids, etc.) are mostly airless rocks

or ice balls (like Pluto and Charon).
* everything else trying to eat them. A well-known (if now under siege) anthropological theory is that the Amazon is a "wet desert", in which civilization can never arise, and which dissolves the underpinnings of civilizations that try to migrate there.
* everything else will drown if submerged. This also applies to creatures who are otherwise aquatic, like Fishmen. A Fishman with Devil Fruit powers will not drown, but they will still be rendered immobile and need rescue.
* everything, even their own lives, from their deities because they refused to give them anything. Some of the impossible thefts in question were a little regrettable however (their lesson in "if it's too easy to steal, it's because no one wants it" apparently came from stealing plagues from their gods).
* Everything, Everything, in which the two leads grow their bond in, despite Maddy being the one restricted to her home due to an illness.
* Everything, Everything. She allows Madeline to see Olly despite knowing Pauline would not promote this, leading to her getting fired.
* Everything Explodes Ending: An explosion is used as the final punchline.
* Everything Fades: Video game enemies disappear after they're defeated.
* everything, from getting a cup of coffee to petting a cat, which makes him easily annoyed that others don't share this way of thinking. Case in point, in a flashback, he was reluctant to tell Nurp-Naut a bedtime story because he already said "Night-night", and he assumed the Glowkies were invading when they just wanted to pay a visit.
* Everything from the now-infamous icing problem, the arc reactor's "Something Big For 15 Minutes Guarantee," right down to the flares plays a part in
* EVERYTHING Gendo has ever done, it's destined to get her back by his side.
* EVERYTHING glows. The fish glow, the plants glow, the coral glows, the seaweed glows, the giant translucent jelly mushrooms in that one cave glow. Which is extremely helpful, because it is really difficult to see where you are going at night without a flashlight. In a paranoia-inducing turn of events, the few things that don't glow include two relentless predators, one of which is also a gigantic oceanic monstrosity, so it's perfectly possible for them to sneak up on you at night.
* Everything goes except one piece, which an antagonist then smashes just to be a
* Everything goes except one piece, which the character hugs protectively
* Everything goes except one piece, which the character then throws over his shoulder with a sigh just to make the destruction complete
* Everything goes except one plate, which rolls on out of the destruction, then slowly spins to a halt.
* Everything goes, leaving the character to stand in the middle of the destruction, having failed to save anything
* everything got back to normal any collateral damage caused by the ice and the monsters).
* Everything Happens to Mel - a failed pilot for a half-hour musical sitcom starring Mel Torme.
* everything hates humans. But the Emperor of Mankind watches over and protects His servants. Any human, as long as he or she believes in Him on Terra, will have something worth fighting for and have Him as Father, Guardian and God. This isn't just their religion, by the way. This is actually the part of the laws of physics in this universe. The Emperor watches over all mankind, but he cannot, and therefore will not, protect those who do not serve him faithfully.
* everything, he doesn't feel too bad letting her get her way to a certain degree. Things get more complicated when they start to genuinely care about each other.
* everything. He traded away the other one, and the recipient can now see everything too.
* everything including the eyes in a one piece spandex outfit, usually either in one solid color or wild patterns such as leopard spots or zebra stripes.
* everything in her repertoire is pervertible, from literally hypnotizing people with her body parts, to a gun which shoots full-body restraints, to a psychic sense

for arousal and/or arousing situations (dubbed the "Porno Sense"). When mention is made of a global communication spell, Sydney immediately asks Dabbler if she uses it for sexting, which the latter confirms.
* everything is anime in Japan. It's just the word for anything animated. Yes, anime is literally cartoons.
* Everything Is an Instrument: Using things besides musical instruments to make music.
* Everything Is An I Pod In The Future: Apple introduced the iPod in 2001.
* Everything Is an iPod in the Future coming around. The skeuomorphism of the late 90s and early 2000s morphed into a futuristic, yet still glossy interface following the success of Apple's candylike icons and Windows 7's Aero in 2007-2009, then shifted to a more crisp and dual/triple-toned minimalist interface around 2012-2013 with Microsoft's Metro UI and iOS 7 inspiring simplistic yet informational looks. Even Google modified its iconic logo, "flattening" it (in 2013) and stripping its serifs (in 2015) for a cleaner look.
* Everything Is an iPod in the Future: Future technology will all look like it was designed by Apple.
* Everything Is An I Pod In The Future: The iPod came out in towards the beginning of this decade, and with it, a simple and smooth aesthetic for our handheld devices.
* Everything Is Big in Texas, but the two have very different approaches to this.
* Everything is Fine died, but for some reason have to pretend that he's still alive.
* Everything is Fine, is just straight-up ignored. Add to that the plethora of cameras positioned everywhere and the fact that for some reason everyone is wearing a mask that hides their heads completely.
* Everything is going as planned. and your plans are going right down the drain.
* Everything is legal in 0.0 space, where there is no police but that which the players muster themselves. And just like in the real world, drug manufacturing is quite profitable.
* Everything Is Online: "If it exists you'll find it on the Internet" became a popular slogan.
* everything is only $5 is $5 (meaning everything they do or use is $5 each).
* Everything Is Racist: A character accuses something innocuous of being racist for what are often absurd reasons.
* Everything Is Racist: Anything and everything can be taken as racist and/or discriminatory.
* Everything Is Racist: Anything and everything can potentially be misconstrued as racist or otherwise offensive.
* Everything Is Racist: Are you insulting my race, you intolerant douchebag?!
* Everything Is Racist: When someone has put his bar of racial sensitivity too high, everybody else's standards are deemed too rude.
* Everything-Is-Smashable Area: A confined space in a video game where every object surrounding you is smashable, usually for collecting points.
* everything it can do, then spends 96 hours practicing before using it for supervillainy. It fails to mention the administrative override Sinestro builds into each ring.
* everything labelled in this way, which included one item purporting to be sulphur.
* Everything Makes a Mushroom: A mushroom cloud appears even though the explosion did not involve radiation of any kind.
* Everything Makes a Mushroom explosion or sufficiently forceful impact will create a mushroom cloud.
* Everything Must Go: Nick Halsey befriends a neighborhood kid named Kenny who he teaches to play baseball and how to make sales.
* Everything Must Go Nick Halsey spies two of his neighbors engaged in BDSM sex acts, and uses it to blackmail them into letting his use their electricity and pool. Notable that the blackmail isn't explicitly stated, but implied through exchanged glances and looks.

* everything of a character's thoughts and feelings, not just the ones they voice. If all you've heard so far is whining and complaining from the character, no matter how valid their next complaint is, you're simply not going to care.
* everything. Of course, if they're feeling lazy or have to worry about technological limits such as memory, then just the good ol' fashioned blunt "blast" will be used.
* everything, only to find that a choice feature has been removed to save money or dumb-down the product for the average consumer.
* everything on the menu has spam. In fact, the first two items listed are bacon and egg and egg, sausage and bacon.)
* Everything or Nothing greets Bond with a powerful, backpack-mounted flamethrower. Considering that this particular battle takes place on a rapidly-falling elevator platform with no brakes, shooting the backpack merely serves as a distraction. Now covered in flames, Jaws furiously beats himself down, but doesn't notice that Bond has taken to the ejector seat of a nearby fighter jet. Whether or not Jaws survived the platform's crash remains to be seen.
* Everything or Nothing, he is forced to self-destruct his Porsche Cayenne Turbo as a distraction. Just before pressing the button, he looks skyward and says, "Forgive me, Q."
* Everything or Nothing: In "A Simple Exchange," Bond can either shoot at the cameras or hurl EMP-grenade coins at them. Something of a false choice—shooting them will alert the guards.
* Everything or Nothing, R&B singer Mýa, in addition to singing the theme song, voiced NSA double-agent Mya Starling.
* Everything or Nothing rocky outcroppings. And aim and blast bad guys he is rocketing past.
* Everything or Nothing the park explaining that she can't get away. It's his job to prevent her death when he finds out that her cover's been blown.
* Everything or Nothing. The swamps themselves are perfectly neutral here—they're simply being put to evil uses.
* Everything or Nothing. They're variously equipped with explosives, tranq-darts, invisibility cloaks, and missiles (used only once).
* Everything or Nothing to overthrow the Russian government and install himself as dictator, and then conquer Europe from there.
* Everything or Nothing when M mentions that Nikolai Diavolo was tutored by Max Zorin, which Bond replies with: "Yes, we once played bridge together. He lost."
* everything, right down to people's favorite flavor of pudding: Raj is "axiomatically wrong" to prefer tapioca, because the best pudding is chocolate. Period. This attitude makes him a far, far worse scientist than he thinks, as he refuses to even consider any criticism of his methods or results.
* "Everything Right is Wrong Again" has the line, "Every move is false, every four is waltz again." The time signature briefly changes when the singer says "waltz" — not waltz time but it's awareness nonetheless.
* everything (Rule 85) and that rule being accepted in the standard list now. That being said, you would be hard-pressed to find any fandom the bronies as a whole truly do not like. As for vice versa, your mileage may vary.
* Everything Rumpelstiltskin does in the first season, and first chunk of the second, are merely the closing moves of a
* Everything's Better with Dinosaurs in the early '90s, everything from toys and books to underwear and television shows featured dinosaurs. This got so big that when the NBA expanded into Canada in 1995, one of the new teams was named the Toronto Raptors.
* Everything's Better with Dinosaurs — Dinosaurs are way cooler than without dinosaurs.
* Everything's Better with Dinosaurs: These reptiles ruled the world once by kicking the asses of anything else that got in their way.
* Everything's Better With Elves: Sal has shades of this, especially in the prequel, "If You Give an Elf a Cookie".
* Everything's better with lens flares. Photography, digital art, you name it.

* Everything's Better with Monkeys — Look at the monkey! Look at the silly monkey!
* Everything's Better with Monkeys: Monkeys and apes portrayed as funny or friendly vs. monkeys and apes portrayed as evil.
* Everything's Better with Penguins — Way cooler with penguins than without.
* Everything's Better with Penguins: Penguins added to a story just for the sake of having them.
* Everything's Better with PlushiesLittle stuffed versions of your favorite... anything from the work.
* Everything's Better with Plushies — Plushies are always cute, right?
* Everything's Better with Rainbows: A rainbow appears because rainbows are special, represent good things, etc.
* Everything's Better with Rainbows: Everyone thinks rainbows are pretty.
* Everything's Better with Rainbows — Rainbows make any setting more colorful.
* Everything's Better with Rainbows the rainbow is Bifrost, the bridge between Asgard and Midgard, a solid road on which the gods travel.
* Everything's Better with Samurai: Even if it just doesn't make sense, there's a samurai in a work, because they're cool.
* Everything's Better with Samurai — Samurai are so much cooler than without samurai.
* Everything's Better with Samurai: You can bet that samurai warriors will make the story cooler.
* Everything's Better with Sparkles: For the instances where things sparkle for no clear reason.
* Everything's Better with Sparkles — Audiences like things that sparkle, shine, and shimmer.
* Everything's Deader with Zombies — Zombies in works not about them are so much cooler than without zombies.
* Everything's Deader with Zombies: When flesh-eating zombies are added to a story just for the sake of coolness.
* Everything seemed to be lining up for a big Tory win, with new Labour Party leader Jeremy Corbyn having had low approval ratings since he took office, the Liberal-Democrats still being yet to recover from being nearly wiped out two years prior, and UKIP's vote having collapsed following a lengthy leadership crisis and a shambolic attempt to get their latest leader elected to parliament in a by-election.
* Everything Sensor: A plot device that tells the heroes what and where the danger is.
* "Everything's Fine". As she immediately points out, the Gems don't need sleep.
* Everything's for an index of existing tropes using this naming pattern.
* everything's going to be all right. She tells Meg to get paper towels to clean up while she continues trying to calm the rest of the family, and:
* Everything's Gonna Be Okay and Lillian Carrier, who play autistic characters Matilda and Drea, respectively, are both on the autism spectrum. Carrier also works as an autism consultant on the show.
* Everything's Gonna Be Okay attracted to girls, and fears that she'll have to break up with Drea. Happily, it turns out that Drea is asexual but wants to stay in a romantic relationship with Matilda, and thus they work out an arrangement - Matilda and Drea continue to meet their romantic needs together, while Matilda slakes her sexual appetites with boys.
* Everything's Gonna Be Okay, awkward, autistic Matilda seeks to prove that she can function as well as anyone else by landing the attentions of Luke, the handsome black jock in her class. Despite her lack of social skills, she actually does manage to charm him. Unfortunately for her, he turns out to only like her as a friend.
* Everything's Gonna Be Okay (gay main character, lesbian supporting character, queer romance subplot)
* Everything's Gonna Be Okay, Nicholas' attempts to impose rules on his teenage

half-sister Matilda's sex life fall flat because it's hard to tell her that she can't have boys (or girls) over when he lets his boyfriend sleep over all the time. Similarly, he has a hard time trying to tell her she can't drink when he drinks on a regular basis.
* Everything's Gonna Be Okay with Matilda, who is initially presented as an autistic piano prodigy who's got a bright future at the Juilliard School waiting for her, but who has a number of character flaws - she's self-absorbed, bossy, insensitive, and easily distracted by alcohol and sex - that eventually derail her plans. Played more straight with her girlfriend Drea, who is also autistic and almost saintly with all of her good nature and patience.
* Everything's Gonna Be Okay would later discover that he was on the autism spectrum, too.
* everything she is and everything she has, from her weapons to her very existence itself, was stolen from Sora. She's an imperfect clone of him, made as a tool by her all-male superiors. Note however that she could be a subversion as she gets very much aware of it and ends up derailing her creators' plans, although not for too long given that one of those creators is a master at Xanatos Speed Chess.
* everything. Shirou even comments that it's more like he's staring through himself rather than Gilgamesh looking at him, as if he's not even recognizing him as a human being.
* Everything short of explicitly stated to have been successfully executed by
* Everything's Louder with Bagpipes, even if you know how to play them properly.
* Everything's Louder with Bagpipes: Playing the bagpipes to annoy people.
* everything." Some characters refer to it as God, but it is better understood as the personification of Truth: harsh, unforgiving, and immutable.
* Everything Sounds Sexier in French — Parler en français est tellement plus sexy que de ne pas le faire.
* Everything Sounds Sexier in French: The French language is sexualised.
* Everything Sounds Sexier in FrenchWhere the same sentence said in different language can give over different impressions (sexy, funny, charming, grating, etc.)
* everything's Shadow Pokémon and certain Gen 5 legendaries cannot be shiny? Factored in perfectly. Unusual stat totals? It's got that covered. An obscure glitch that only affects five species? Of course. And if a Pokémon has a Trainer/Secret ID of 00666 or some equally unlikely number, it displays the message "Suspicious trainer IDs." The only way past it is to hack a Pokémon that is identical to one that could have been generated by a core series/Gamecube Pokémon title. Which is the intention.
* Everything's Sparkly with Jewelry — Jewelry is so much more glamorous than without jewelry.
* Everything Sucks! features a group of high schoolers trying to figure out their place in the world.
* Everything Sucks! (lesbian main character, lesbian supporting character)
* Everything Sucks!, which premiered (and was canceled) in 2018 and is set in 1996.
* "Everything's Under Control", the protagonist gets one call to organize a solution to his elephant problem.
* Everything Super Meter gain. Of course, the reverse also works. If you're so sick at how evil he is, just put him as your training dummy for training and make him your personal sandbag to make you feel better. Same goes to Relius Clover. Also, for their evilness, it'll be a great catharsis to go online, find someone who uses them, then ASTRAL them.
* everythings with Club Kid's (creates an inescapable vortex that sucks you in and explodes), and Axel's (sends out a shockwave that hurls you into the air) who will, without fail, hit you with two or three of them if you ever dare to come within range.
* Everything's worse with a bear market, despite financial advisors'
* Everything's Worse with Snowclones: Trope names that are too similar.
* everything talking about the lore of heroes, villains, environments, and more. New episodes come out twice a week on tuesdays and thursdays.
* everything that crosses his/her mind in the interest of painting a more

"complete" picture of the author's/character's mindset.
* Everything that does not fit into any of those categories but is still considered an important element is a
* Everything that exists, the whole of creation, is chaotic energy that has been diluted and solidified. This is what creates both physical matter and ethereal souls. Earth, air, food, flesh etc. everything is fundamentally energy from Lady Chaos. Mages who truly understand this gain an
* Everything that goes on there isn't so much for the benefit of mankind as a whole but for the sole purpose of tearing physics a new one. This goes even further than that with Cave Johnson's tests, related through prerecorded audio. Blue paint instead of repulsion gel, mantis men, and replacing human blood with gasoline to name a few.
* Everything that happens in Gurren-Lagann is too crazy to work. And yet it does... Their universe operates in these rules, seen as at some point there are literal giant robots piloted by giant robots!
* everything that has been published purporting to be a newly discovered Sherlock Holmes case, then he would have been among the most prolific authors to have ever lived.
* Everything that has ever happened in the universe and beyond is the result of Tzeentch's plans. Including those plans of his that have been foiled. In fact, if you try to help him, he benefits, if you try to hinder him, he benefits, and if you do neither, he benefits.
* Everything that Sakura Haruno does always has something to do with Sasuke and Naruto. She broke off her friendship with Ino to compete for Sasuke's affections, she makes her hair long in hopes to impress Sasuke, and finally she wants to train with Tsunade because she wants to be equal with them.
* Everything the characters or mechs do, and even the laws of physics themselves, are subject to Rule Of Cool. The fight scenes especially make absolutely no logical sense whatsoever, but it really doesn't matter because they're so awesome.
* Everything the crippled pirate says is untranslated Latin, but always fits the situation.
* Everything the Romans did to mock and humiliate Jesus (the thorn crown, the I.N.R.I. moniker) is now standard Church imagery.
* everything they know that gave them such knowledge over other races, they gained from Prothean relics on their home planet. And the top levels of the Asari government hid this information from the rest of the galaxy while hypocritically enacting laws making it illegal for anyone else to use such Prothean relics. And the leadership's desire to hide these truths from the rest of the galaxy caused them to delay anyone from coming to their homeworld Thessia even as the Reapers were bearing down on them. By the time they allow Shepard to go, the planet is already a lost cause. By the end of the war, the Asari's homeworld has probably suffered the most aside from maybe Earth. were like this, too, though Javik himself argues that he is not representative of his entire species, being a carefully selected soldier who lived during the fall of the Prothean empire.
* everything to behave like this - they are used to carve open tanks like they were made out of butter.
* Everything Trying to Kill You: A location full of all sorts of hostile creatures.
* Everything. trying to kill you is Lady Spookyraven's ghost, the quest-giver NPC. Her also-deceased husband is the violent type, and apparently he turned the whole house evil with some sort of botched demonic ritual.
* Everything Trying to Kill You: Killers, zombies, monsters, mutants, bats, crows, random objects, everything!
* Everything Twilight does is to distract and hold back all the forces planning to attack the Slayer Organization.
* everything under the sun; in fact, in Russia the trope would have been named "Crimea Doubling".
* everything-verse believe the Aes Sedai to be evil and aligned with the Dark One. By and large, the most you could say about them is that they're incompetent.
* everything when their centuries-old buckets started disintegrating from wear,

followed by wooden workshops and beds.
* everything with "I don't know if that's a good or a bad thing." Case in point: One day he wakes up to find his only horse has run away: "I don't know if that's a good or a bad thing." The following day, the horse comes back with a herd of wild horses: "I don't know if that's a good or a bad thing." The day after, his son tries to break in the horses and breaks his leg: "I don't know if that's a good or a bad thing." A war breaks out the next day, and all the village's able-bodied young men are conscripted, sparing the son getting killed on the battlefield.
* Everything Wrong With has, among its many repeated jokes, that 'this movie suggests that stalking is an easy way to get girls to love you when I can personally vouch that this isn't true in real life'.
* Everything Wrong With Justin Bieber: Never Say Never in a hockey suit.
* Everything You Always Wanted To Know About Sex But Were Afraid To Ask.
* Everything You Always Wanted To Know About Sex But Were Afraid To Ask:
* Everything You Always Wanted To Know About Sex (But Were Afraid To Ask) as a sperm.
* Everything You Always Wanted to Know About Sex * But Were Afraid to Ask has a skit featuring Dr. Bernardo, a mad sex analyst whose experiments include measuring premature ejaculation on a hippopotamus and building a 400-foot diaphragm. ("Contraception for the entire nation at once!") The segment ends with Allen's character battling one of the doctor's creations — a gigantic, disembodied human breast.
* Everything You Always Wanted to Know About Sex but Were Afraid to Ask, once sincerely believed that this trope was inviolable law. Along with the perpetuation of the myth that Coca-Cola made an effective spermicide, the preaching of this stereotype was what made the book infamous long after its initial popularity died down. Thirty years later, he recanted this in a revised edition, apologizing for his earlier portrayal. In the new version being gay was treated neutrally.
* Everything you Always Wanted to Know About Sex But Were too Afraid to Ask, with a black sperm standing among all the white sperm about to be ejaculated.
* everything you can do. And yet he consistently makes people fall for variations on the same tricks, time after time. He basically subverts his own combat style at will just to screw with his enemies.
* Everything You Ever Wanted To Know About Sex But Were Afraid To Ask's character says, "There are some things about sex man was never meant to know. And with my luck, never will."
* "Everything You Know Is Wrong" also has the floating disembodied head of Colonel Sanders.
* Everything You Know Is Wrong gets his organs removed by aliens, but doesn't even die until the next verse (for different reasons), after which he goes on to narrate what happened after that:
* Everything You Know is Wrong, is considered a classic: "As my daddy says, 'son, it's in the water—that's why it's yellow'"
* Everything You Need to Know About Slumber Parties (But Were Afraid to Ask)
* everything, you probably can't blame said readers for thinking that the mechanical turtles symbolize something deep.
* Everything you've gone through over the years has been a training program that Equestria was doomed to destruction without the Mane Six there to save the day on the princess's behalf. And, as Twilight points out, the things they learned and accomplished over the years are different than the political experience this position would require.
* Every; this is where they got the idea. It's possible to coordinate a non-ragtag adventuring party with some pre-game work, but a Ragtag Bunch of Level 1 Misfits spontaneously joining up for mutual adventure and profit is the default assumption.
* every). Though it is worth noting that not only does outright warfare happen rarely and that the Turians work more like a militarized police for most of the galaxy, its mentioned that Turians are militarized on such a cultural level that prior to their unification the populations of captured cities were moved out of the city itself and into camps because otherwise there would be such rebellion that the

city would be effectively burned down by the populace. Conscription of teens who are probably raised to think of it as a rite of passage into the space police is a little different than most child soldiers.
* Every time a customer in a certain bar pays for a drink, the bartender puts half a dollar in the register and half a dollar in his pocket. After doing this for a while, he puts the whole dollar in his pocket. The owner says "What's the matter, ain't we partners anymore?"
* Every time an Aeldari Phoenix Lord dies, their soul is absorbed into the armor they wear. The next wearer of the armor adds their expertise to the knowledge and skills of all the prior Phoenix Lords, back to the first one whose name they still bear. No wonder these people can take on armies all by themselves.
* Every time a new character is introduced, dramatic music and sound-effects blare out as their name and role flashes on the screen in
* every time a regeneration occurs that regeneration feels like the death of the current incarnation.
* Every time Draco Malfoy pulls the sheet covering the Vanishing Cabinet in
* Every time Ebenezar McCoy protects Harry, and every interaction between them, gets ten times sweeter when it's revealed in
* Every time Gunha Sogiita is shown, he's fighting criminals, helping people, etc. Amusingly,
* Every time Harriet attempts to make more money, she has the plan fall apart on her and end up costing her money.
* every time Harry fell asleep he ended up in an alternate universe where he had to defend their version of the Malfoys against an attempt to legally execute them.
* Every time Jeremy Hardy appeared, he demonstrated his lack of singing ability; it quickly developed into a
* Every time Kerry Ellison heals someone, she takes on their illness or injury. And
* Every time Laurent and Thérèse try to have sex after they get married (or even try to sleep for that matter) in
* , every time Lelouch dies, he respawns at a random point in the original timeline. At one point he respawns during the Zero Requiem.
* every Time Lord, including their own children and grandchildren. The Doctor has to deal with the consequences of the Time War from time to time and sometimes they or somebody else makes a reference to some events of it, but it's still mostly a mystery.
* Every time one of the Seven Maidens is rescued, they tell a little more about the backstory of the game and what Agahnim's plans are.
* every time popular design of smoke stack; or the owners of one warehouse not only refused to ever abandon it, they also refused to change the style of their smoke stack.
* Every time Shadow Weaver seems to be showing a moment of kindness, it's swiftly revealed that she's spinning a line of bullshit. As an example, in "Light Spinner", she seems to be reaching out to Catra, telling her former ward that she was only
* Every time someone incorrectly accuses someone of being in disguise will be followed by the accuser (usually SpongeBob) yanking off the accused's (usually Squidward) face. Literally.
* Every time Tay Zonday has appeared on national TV he was definitely Adam Westing for himself... but nowhere is this more obvious than in the
* Every Time That It Rains" tells of a romantic encounter between the narrator and a waitress. They try to go for a second date but it's just not the same and they decide to be just friends.
* Every time the Butcher is killed, its powers and consciousness transfer over to its killer. We first encounter it in its 14th iteration, containing the powers and minds of 14 different parahumans.
* Every time the Celestials succeed in this, it destroys the universe. Which doesn't bother the Celestials, since they can survive it, and this is the only way that they can make more of themselves. Galactus was revealed to have originally been a survivor of a previous universe that the Celestials destroyed, and dedicated

his life to stopping them from ever succeeding again.
* Every time the Man of Steel is rebooted, the entirey of his non-essential supporting cast is left behind and forgotten. The only characters who have survived every reboot are his biological parents, the Kents,
* every time, then points out that milkmen don't even exist in most places anymore, listing other defunct professionals his mother might have had an affair with, such as the chimney sweep and the town crier.
* Every time the protagonists need to engage in a rescue there are always five members. The Soul Society arc had five Ryouka (Ichigo, Orihime, Sado, Uryuu and Yoruichi). The Arrancar arc had five invaders (Ichigo, Uryuu, Sado, Renji and Rukia). In response to an effort by Urahara, Isshin and Rukia during the Lost Agent arc, the Shinigami sent five representatives to rescue Ichigo (Byakuya, Renji, Kenpachi, Ikkaku and Hitsugaya). In the Thousand Year Blood War Arc, the Royal Guard is sent to pick up the pieces of a demolished Gotei 13, and sure enough, there are five members in total (Ichibei, Senjumaru, Ouetsu, Kirio and Tenjirou).
* Every time there is a hurricane or a tropical storm passing through South Florida, every news station will absolutely make sure to let the viewer know
* Every time the young, handsome police officer Derek appears in the web fiction serial
* every time they're seen in the thrall of the Dark Lord, but others serve him directly and can form entire armies.
* Every Time We Say Goodbye features an American RAF pilot played by Tom Hanks being stationed in Jerusalem, who meets and falls in love with a Sephardic girl and has to deal with her disapproving and large family. The film is notable for being partially in Ladino aka Judeo-Spanish, the language of Sephardic Jews.
* Every time you get a backstab, or riposte, you stun your enemy, giving you enough time to recover your health, and watch your damage
* Every time you kill a difficult enemy, or a boss that's been giving you a hard time,
* everytime you load a level this way (despite having them permanently unlocked by now).
* Every time you try to sail to areas your map doesn't cover, the King of Red Lions (your boat) says something along the lines of "In that direction is sea too dangerous for you to travel now." and refuses to sail through.
* Every titillating scene has a purpose and it usually takes way longer before the characters share an erotic moment together.
* Every Topic In The Universe Except Chickens agree to focus their vandalism exclusively on the article about chickens. Because "Dudes already know about chickens."
* every to their advantage. By this stage they have refined their sense of timing to the point that regardless of how fast you are, they are still where they need to be before you are. One of the most important things to learn in fighting is how to control the fight. Their experience has taught them their strengths, weaknesses, and how to use them to make their opponent fight to their benefit.
* every, to the point where Wodehouse himself had his own names for all the character tropes involved. The "parent" was always one of his governess sisters, and the resolution almost invariably ended with the Hon. Galahad Threepwood (or sometimes Uncle Fred) blackmailing said sister into letting the marriage through, generally using an element of the B-plot.
* Everytown, America, a revival produced 12 years after the main series ended. Actress Ann Rutherford, regarding the High School Sweethearts trope to be unrealistic, refused to return, so a new character was introduced as Andy's wife.
* Everytown, America: the stereotypical generic small town found almost everywhere in fiction and practically nowhere in reality.
* "Every town has its secrets. Some are just darker than others." —
* Every trainer seems to get their starter Pokémon handed to them by a Pokémon professor. While every game's player character gets their first Pokémon this way (as does Ash in the anime), this is almost certainly a relatively unique situation. After all, there's usually only one professor in any

given region, and he or she only has three Pokémon at most. You also just happen to be living in the same town as said professor. This is further supported by the fact that no one else you encounter have any of the Pokémon the professors give out, and the vast majority of trainers simply have Pokémon that can be caught in the local area of where you encounter them.
* Every type of Gem has a power, and so on. There are three caveats to this:
* Every UK detective drama features a stolid Detective Sergeant or Constable who the Detective Inspector can explain things to.
* Every unicorn has magic based on their special talent, and Cadence is
* Every unit has a team mom. They even give them presents on Mothers' Day. And yes, they are all male. (Gravi's mom is Aoi, Procella's is Yoru, SolidS' is Rikka, Quell's is Eichi, Growth's is Kouki.)
* every Unsurprisingly, you'd actually be hard-pressed to find a player running around in the TMP costume, though there are a number of players who are clamoring for the "skant"
* every Ursula) being the former and Jafar (ironically), Lady Tremaine, and Drizella Tremaine being the latter.
* Every vampiric clan has a nickname. It can be playful or an obvious slur. The Tremere, for instance, are more commonly nicknamed the "Warlocks," but those who hate them (and there's no shortage of Kindred who hate them) call them the "Usurpers" for all the ways they seized power to become a prominent clan. The more common insulting nicknames belong to the Brujah (Rabble), the Toreador (Degenerates), the Tzimisice (Fiends), and the Ravnos (Deceivers) - though the Tzimisce use theirs as a badge of pride.
* Every version of the Android operating system has a different Easter egg that can be found by going into the "about device" section of the system settings and quickly tapping the Android version number several times.
* Every version of the Pokédex has been made into a real life plastic toy with a digital screen in both Japan and the West; capable of displaying its respective region's Pokémon along with key attributes. The Pokédex for
* Every version starts the same way: the gang hear a loud noise and the main character (usually Hiroshi, but this applies to Takuro in the Korean fan remake of 2.0) goes off alone to investigate it. He enters the kitchen to find a recently-broken plate and returns to an empty main hall.
* Every video ever made. Normal thumbnails, normal names like "How to make lasagna", but everything goes straight to hell the second you click play...
* every villain besides himself. It was an era-appropriate early model, operated with a hand crank (although this was slightly undermined by the ammo belt; hand-cranked models invariably used a gravity-feed hopper). In the anime, he was stopped when it jammed after one of the villains stuck a poison dart in the ammo belt; in the manga, he simply ran out of bullets after mowing everyone down.
* Every violent multiplayer video game ever is a meta-example, if you think about it. However, there are
* Every Warren Miller ski documentary (there are over 50 of them) is this. They all have some nominal hook that claims to explore some concept in skiing, but films are a series of short vignettes following different skiiers, followed by a lot of amazing shots of people skiing which are the real reason people watch the movies.
* every. When the contractor was caught there again, Sinclair didn't charge him - he did something more drastic.
* everywhere all the time). Every other threat to humanity is either small (like chaos cults), disorganized (like beastmen), or far away (like the gods of chaos). So while the Skaven aren't the most serious threat they're the one most likely to cause paranoia and constant terror.
* everywhere, asks the driver to "please back the fuck up," gets little in the way of a response, and calmly walks back, telling Colbert their progress getting out is "Not going well." He earlier complains about a panicked colleague babbling Portuguese in the same scene with the comment: "Fucking Baptisa, how would he like it if I joined the Brazilian Marines and only spoke English."

* Everywhere at the End of Funk, prompting outrage from the rest of the greater community.
* "Everywhere At The End Of Time" allows the user to "access higher dimensional planes", essentially making them intangible at will and allowing them to teleport around. On top of that, their attacks will warp the victim's body, resulting in an almost certain
* Everywhere At The End Of Time, and uncertainty, a representation of the final degenerative states of dementia.
* Everywhere at the End of Time is about a person suffering from dementia. Their loss of memory and personality and eventual death is alluded from the very beginning with song titles such as "We don't have many days" and "A losing battle is raging". This doesn't make the project any less horrifying and saddening to listen to.
* Everywhere at the End of Time. While the albums have a description discussing the different stages of dementia, Stage 6 has a one sentence summary:
* everywhere doesn't freak out nearly as badly initially, but continual use throughout the story degrades his health and strains his brain as his eyes get more powerful and start showing him the death of things he shouldn't normally be able to comprehend (like buildings and concepts).
* everywhere. However, Ghazghkull Mag Uruk Thraka is trying his damnedest to fix this problem (and as of 8th Edition, he's doing a pretty good job at it).
* "Everywhere I Go", which is about stalking, was used in a Fruitopia commercial.
* everywhere in the background. And the intro for the next mission shows a little girl getting off her bike watching the Soviets drop down from the sky while a panicked man who calls into a local radio show can be heard screaming in the background "They're here! They're coming from the skies man! ... Look up in the skies man we're being invaded!" Seriously, how could you not notice that?
* everywhere in the Kingdom (and in a lot of places beyond) by the start of the series, both in physical hardcopy and in still quite popular songs based on the rudest bits, strangely enough. Oops.
* everywhere. In the same movie, though he's chiefly a warlord, he also explicitly has a head for self-promotion and a line of merchandise. The two-pronged symbol appears on his ships, troops and merchandise. Every one of his underlings (including Tempest, on the spot of her cutie mark) display it, and the seized Canterlot Castle is adorned with several banners to show the change of owner. Even the weapons of the common soldiers are spears with two blades in the same shape.
* Everywhere. Most blatant example: You go to hell for a "C" school note equivalent. No, I'm not making this up, read "Ole Lukøje."
* everywhere on their planet and in their culture, plus their technology is crystal-based.
* everywhere) Patricia Givens was a man for two books because she was always referred to as "admiral Givens" or "Pat".
* everywhere; portable technologies have lesser infrastructure requirements, leading to cases of farmers riding donkeys to the rice paddy while chatting on their cell phones. Phones and mobile Internet are also used for bill payment and tracking crops in developing nations (in some parts of Africa, transferable mobile phone minutes are used as currency substitute).
* everywhere. This applies to personality, fighting styles, what the kids want to be when they grow up, etc.... Occasionally the kids will have certain aspects of their grandparents if they showed up in the series and they were likable enough. When you get right down to it, many of these "original characters" are the same damn people and the only difference will depend on what the writer's favorite name is.
* Everywhere. Those who don't Remember are completely out of the loop, and even those that do are not spared. Thanks to the varying times of death, a lot of people who do Remember are still missing a lot of important information. Only those who made it to the Second Long Night have any real idea of what's going on. Take, for example, the Starks. Ned Stark is completely out of the loop even though he Remembers, thanks to his early death; the big explanation at the beginning is

mainly for his benefit. His wife and eldest son, Robb, hardly fare any better, since they died at the Red Wedding. Rickon, the last Stark to die in the previous timeline prior to the Long Night, is the only one who takes things relatively well, thanks to his young age and late death (he died at the Battle of the Bastards).
* everywhere. What's an RKO? A flat back bump. Taking a Rock Bottom or Chokeslam? Jump up, flat back bump. Taking a clothesline or superkick? Run into your opponent's limb and flat back bump. Receiving a suplex? Do a beel (or biel) bump, jump into a front flip and do a flat back bump while your opponent holds you. Sunset flips, senton bombs, DDTs, dropkicks, powerslams, suplexes, powerbombs, all involve variations of the flat back bump or beel bump, and once you know what to look for, you'll see them all over the place.
* everywhere, whether the target has a place for it or not. During the outbreak, it was a safe bet that a new "Pearl Diver" class would contain the ways to use it in every existing setting... even desert ones.
* Every Which Way but Loose, a big good ol' boy at a bar gets annoyed when Philo repeatedly reaches across him to grab a handful of peanuts from the bowl (presumably to bring home for Clyde the orangutan). When Philo takes his last handful, the guy yells, "Put 'em back!" and begins mocking Philo, earning him a punch to the jaw.
* Every Which Way but Loose's character constantly damages the Biker gang's motorcycles in different ways.
* Every Which Way but Loose. Their friendship survived the film's production, but afterwards they agreed that it'd probably be best for the sake of their sanity if they didn't work on the same film again.
* every which way —- the exact same plot as the "Dirty Hungarian Phrasebook" sketch!
* Every Which Way You Can where the Black Widow motorcycle gang appear ridiculous after losing their hair in an asphalt spray. But that might have something to do with the fact that they're wearing silly wigs to compensate — two highway patrolmen break down laughing rather than arrest them, much to their leader's fury.
* Every wide receiver who ever played the game of football, with the possible exception of Don Hutson
* Every... will chase you down to the ends of the earth in order to maul/feast upon your flesh. They will come after you through villages, forests, rivers, lakes, mountains, and plains, from the farthest western point of the map to to the farthest eastern point, in an all-consuming, single-minded drive to wreak vengeance on you for entering their line of sight.
* every wish she hears, including wishes like "I wish you were defeated." She even says "I... I must obey!"
* Every Witch Way: Andi harbors it for a zombie from a video game, even going so far as to consider him her actual boyfriend.
* Every Witch Way likewise got huge episode orders and enough viewership to justify a spin-off despite nearly every critic who screened it claiming it was almost literally unwatchable.
* Every Witch Way moment, as Andi is too short to reach the window and has to enlist the help of Katie (who has a legitimate reason to be there).
* Every wizard has their chance to overdo their lines when they call down the Great Magics. Put a couple big casters in with the right weapons against Lezard Valeth and watch the
* Every wizard is potentially one of these. When a wizard is dying they can unleash a Death Curse that will seriously mess up its target. The scope of the effect varies by the power of the wizard. Some Death Curses will just strip the killer of all their magical power (potentially lethal to another wizard or magical being) while others might destroy a few city blocks or an island.
* Every World's Fair. Ever. The Futurism of the 1962 Seattle World's Fair, and the Bell Telephone Company in particular, is captured in "
* Every writer of the horror genre or who includes supernatural elements in his books can be accused of this.
* Every year around the Thanksgiving/Christmas timeframe, TVs are flooded with

little vignettes of happy families being happy, usually involving food: eating meals with relatives, baking cookies, etc. At the very end of each, there's a brief mention of some grocery store.
* Every year during Thanksgiving, the sitting President of the USA "pardons" a turkey so that he can go live out the rest of his days on a farm. While this is often treated as if it were a long-standing tradition, it actually is much
* Every year in Boston, the days around September 1 see intense moving activity, as a disproportionately large share of residential leases start on that date (no doubt connected to the freakin' huge number of students in the area). Every year, the city and local universities warn movers not to take their moving trucks along Storrow Drive, a major thoroughfare in the area that often shows up on GPS as the quickest route from Point A to Point B... but also features an ungodly number of low overpasses that result in this very trope. Every year, several movers don't listen. And
* Every year it becomes less and less plausible can be a Holocaust survivor, with writers having to regularly de-age him through various means so that he doesn't become a decrepit old man. However, this aspect of his backstory is synonymous with the character and is unlikely to be changed anytime soon.
* Every year on Naharrai is a bit drier than the year before it, while the storms likewise grow more violent. The ellaticurids are well aware that their race and their world are dying, and they can do nothing about either.
* Every year people get ads in their newspapers showing collectibles for the big local pro or college sports team. Ceramic villages with the team logo on it, Santa wearing the jersey, etc. What you don't really see until you go online to their website is almost every city got the same ad for the same village and often the only thing different in the picture is the team logo and colors.
* Every year, Sander's Markets, a local supermarket chain located within the Lake Erie region of the United States, hosts a sale known as Moonlight Madness. When it comes time to promote the sale, they love squeezing their ads into almost every break to get people to buy the items on sale. Sometimes they'll air the ad
* Every Year They Fizzle Out for the Chicago Cubs, who won the game 8-7 in the 10th inning, ending a 108-year-long drought between World Series titles.
* Every Year They Fizzle Out make him easily the most-covered coach in college football.
* Every Year They Fizzle Out tendencies). Then the 1995 relocation controversy sent the original Browns to become the Baltimore Ravens, and what has haunted the league since the franchise was revived in 1999 can only be described as a punchline for the saddest joke to ever torture the good citizens of Cleveland.
* every year. Whoever was elected to replace the previous Overseer got to be in charge for a year before sacrificing themselves.
* Ever." (Zii then gets angry because she thinks Gary has been holding out on her.)
* Eve's Bayou and men are supposed to have better control over themselves and respect another man's "territory."
* Eve's Bayou does die at the end, as a direct result of Eve's actions, but it is never explained whether or not the voodoo had a hand in what happened.
* Eve's Bayou, Jurnee Smollett (Eve)'s real-life brother Jake plays Eve's younger brother Poe.
* Eve's Bayou. The movie taking place in relatively recent times, she's aware of the imagery and seems to enjoy playing it up as part of her fortuneteller act, and gets cheap laughs from scaring children.
* Eve's Bayou, the title character's father Louis is a southern doctor who makes house calls, and doesn't really try to hide from his daughter the fact that he often has sex with his younger female patients.
* Eve's Bayou When test audiences disliked this, the ending was changed to reveal a more definitive version of events.
* EVE's head and arms are even more easily detachable, since they just float alongside her body, as if they're connected by some kind of energy field. This creates some confusion for WALL•E in the repair ward.
* Eve's Other Children" and proceeds to tell Najeeb everything about baseball. We

don't see the game itself, but no doubt it's splendid. And what could be more American than that?
* Eve, the First Woman, was Lucifer's first love. All the stuff in the Bible about the apple was a metaphor for him seducing her.
* Eve, the "Mother of All", can disable angel powers, see and hear everything her children do, and custom-build monsters (including hybrids like Jefferson Starships). She's the creator of all of the Purgatory residents above except for Leviathans.
* Eve, the Mother of All Monsters, predates Angels, Humans and Demons and was implied to be related in some way to the Leviathans.
* Eve Torres and had the referee draw an X on Nikki so she couldn't switch. Ironically Brie won the match anyway.
* Eve Torres her (as she'd be retiring once she dropped the title), but she insisted on having a segment where she quits in kayfabe.
* Eve Torres is a really dark brown naturally (the colour she had when she won the Diva Search) but has since been recognised for dark blonde and light brown hair.
* Eve Torres: Peaked in 2012 after turning heel, retired the next year.
* Eve Torres. The only problem here might be that the chants persisted long after that storyline had faded from relevance.
* Eve Torres - they had a backstage segment after the match and she was definitely a little upset.
* Evetta Muradasilova, best known as the voice behind the Plain Doll and Lady Maria from
* Eve, unplugging Project Eternity involves removing a thick blueish cord connected to her stomach. Swaps abruptly to the other end of the metaphor when the teenage boy realises it's hurting her and, to save her life, thrusts the phallic plug at the end back into her middle...
* EVE Valkyrie features head-tracked missiles as the most prominent secondary weapon, and it's one of the major reasons why the game requires a VR headset to play.
* Eve Was Shamed: The cover of the book has Lady Justice holding her sword and scales, with her face marked off. This makes sense since the book is about how the British justice system is failing woman.
* Eveybody Pees, everybody pees, so let's be sure to keep our kidneys healthy.
* Evey gets her courage to go back to "regular" society after she is tortured.
* Evey Hammond is the queen of the Little "No". At the end, she replies to Finch with one when
* Evey Hammond, she had actually been looking forward to having her head shaved.
* Evey was V all along and her interactions with "V" were just hallucinations keeping her from noticing her own disassociative identity as he gradually molded her into a replacement.
* Evgenia Medvedeva in episode 10. She has been quite vocal about her love for the show on social media, cosplayed as Yuri (using an actual Team Japan jacket), and had art drawn of her, Victor, and Yuri, by the series creator.
* Evgeni Plushenko developed a back/spinal problem, aggravated by his work on quadruple Lutzes and Salchows. It would eventually get bad enough that he had to withdraw after the short program warmup for the 2014 Olympics and retire completely from the sport afterwards.
* Evgeni Plushenko watches fellow Russian Yurio's performance in episode 9.
* Evgeny Katz, a chemist at Clarkson University, has developed a way to use live snails to generate a small amount of electricity. The idea is to eventually make implanted medical devices such as pacemakers self-powered by applying similar principles to the human body. He eventually moved from snails to lobsters.
* Evidence: A sort of variation on the trope; the movie revolves around investigators searching for clues in video footage recovered from the scene of a mass murder.
* Evidence Dungeon: The villain has a lair where lots of incriminating evidence is.
* Evidence has shown that Dowsing is not better at detecting the flow of water or location of pipes than

* Evidence is essentially a found-footage horror movie framed by police investigators viewing the footage to try and determine who the killer was.
* evidence of foul play and possible murder in the apartment across the street
* Evidence of Immortality: Exposition that shows a character to be immortal or otherwise older than he appears to be can happen in any of the forms listed in Exposition of Immortality. However; memories, conversations, and flashback sequences don't tend to hold up too well as evidence. Photos, paintings,
* Evidence of Things Not Seen: Alvin Clark's dad, who owns the salvage yard, shoots tools that don't work properly. He tells the other tools, "This is what happens to lousy tools."
* Evidence of Things Not Seen: At the end of the class, when the teacher was droning on about due dates and the final, Tommy used to tap his pencil and jerk his legs to try to make time pass faster.
* Evidence of Things Not Seen is an illegal immigrant who learned most of his English from reading comic books.
* Evidence of Things Not Seen, she goes straight to her room with a bottle of wine and drinks until she passes out.
* Evidence of Things Not Seen: The highway pull-out where Tommy's motorbike is found is a popular spot for horny teenagers, as well as the subject of a lot of terrible jokes about girls putting out or boys pulling out.
* Evidence of Things Not Seen: When a cop tries to arrest Alvin, he repeatedly smashes his own head into the car door, hoping that his threat of a police brutality complaint will get the cop to leave him alone.
* Evidence of Things Not Seen: When Rachel asked Tommy what he was doing, he would often answer, "Talking to you." She would have to ask more specific questions, like "Where are you going?" or "What are you going to do?"
* evidence ramble about his intellectual superiority, which Nale would have done.
* Evidence revolves around a group of people on a bus to Las Vegas that crashes in the desert, leaving them stranded and ready to be picked off by the masked killer.
* Evidence, robots are better suited for public office than humans are. In fact, she claims there's no difference between a robot and a fundamentally decent person.
* Evidence room clerk Smitty in "Katastrophe" has a sergeant's three rank chevrons on his sleeves. No other sergeant has these. Confusingly, they're on his dress shirt,
* Evidence Scavenger Hunt: A scene about protagonists searching for clues.
* Evidence shows that some Sauropods — mainly, the Diplodocids — had
* Evidence": The different countries of Earth are replaced by nameless Regions, and laws are justified with references to individual Rights under the Regional Articles. It's made more explicit in the collection I, Robot, and Dr Calvin says the Regions of Earth formed a Federation in 2044.
* Evidence, there are two surviving girls...who then turn out to actually be the killers, who took turns taking on the role of the masked bad guy to throw everyone off.
* Evidence when Byerley points out that even if said someone spied on him, all they know is that he wasn't eating or sleeping then.
* Evidence": When Harroway attempts to surreptitiously x-ray Byerley, he learns that Byerley is wearing a personal shield that causes x-ray photographs to become overexposed, preventing anyone from invading his Right to Privacy.
* Evidence where the robot becomes willing to injure a human in order to prevent harm to a greater number of human beings.
* Evident Domain, a Soviet official is suddenly taken off from his job and is put under surveillance. After learning that his home is bugged, he fakes a fight with his wife about a lover that he "wasn't supposed to see anymore" so that she'll have an excuse to leave town while he investigates the matter.
* evidentiary hurdle that enabled him to present an open-and-shut case (or threaten to present it in order to force a plea). The most common example was a "Depraved Indifference" murder, where Jack only had to prove the defendant acted recklessly or neglected a legal burden to act in a given situation, even if they were not provably guilty of the actual murder.

* Evidently averted by the likes of Dr. Gonapus, Dr. Cyborg, and Cyrista's Bane during the
* Evidently, Frasier didn't listen, as a later episode has him and Roz discussing how Roz's unwanted collection of ceramic animals got destroyed in an "earthquake". After a moment, Frasier recalls how his last Christmas gift to her was also destroyed in said earthquake. They agree to just send one another booze next time... but another episode shows he forgot this. Learning from his mistakes is not one of Fras's defining attributes.
* Evident with Bluestar, who ends up pregnant with her lover Oakheart's kits, but due to them being in different clans, she has to leave her kits with him and not acknowledge her relationship with him or her kits for the rest of her life, up until she
* Evie and Margie, Evie tries out for the role of Cinderella in a school play. The play includes a scene where Cinderella cries after not being allowed to attend the ball. Evie figures out how to make herself cry by remembering a particular incident in which she was at a birthday party and didn't get a cupcake because they ran out, and they offered her a carrot stick instead.
* Evie and Margie, Margie gets the role of Cinderella in the school play while Evie is her understudy and a tree.
* Evie herself gets a moment like this; before they go on their expedition, we are used to seeing her in dowdy and plain librarian's clothes; but after they escape from the ship, Evie appears wearing an
* Evigishki Zealgigas is Steelswarm Hercules brought back with a Gishki ritual.
* Evil!Alice, after Arawn has let the heroes sneak into her bedroom to try to assassinate her.
* Evil Alien Conquerors stomps into a restaurant and starts screaming at the diners. Why? Because he's CROKER!!!
* Evil Alien Conquerors: You must acknowledge CROKER!!! or he will eat your head! It then gets played with when he gets shrunk down to human size as a result of being teleported to Earth, but doesn't acknowledge it and still acts as if he's gigantic.
* Evil Alien Overlord Grand Warlord Voss takes over the Earth if he has 10 or more Minions in play at the start of his turn.
* evil alien warlord called the Dark Matter Thieves to attack Earth. Their spaceship's energy cannon blows up most of City A, and they likely would've been able to conquer the whole planet had Saitama and the other elite superheroes not defeated them.
* Evil All Along: A character finds out that someone they believed was on their side and trusted was evil the entire time, manipulating them and never genuinely returning the favour.
* Evil All Along: A character thought to be good turns out to be evil.
* Evil All Along: An unsuspecting character turns out to have been behind the bad things that happened all along.
* Evil All Along: A villain's true colors are revealed via plot twist.
* Evil All Along episode "The Winning Edge", who works as Bane's caretaker and nurse, is never named on screen, but is identified on the credit as Jackson Chappell.
* Evil All Along: If the fans continue to insist that they are a good guy.
* Evil All Along: Oh no! It turns out the person I thought was my friend was actually a villain the whole time!
* Evil All Along: Someone pretending to be a good guy was actually a bad guy this whole time.
* Evil All Along. The fact that his characterization does a near complete 180 after the reveal makes this even worse.
* Evil All Along: the former dons a white longcoat coat over his Shihakusho, but eventually switches the black robes with a white Arrancar-style outfit plus a pink sash; and the latter dons a white long-sleeved robe first over his Shihakusho, and later over his own Arrancar clothing.
* Evil All Along: to get dumped. Whilst a Disposable Fiancé of this type is

the most straightforward in terms of getting the audience to root for the romantic lead, it can backfire if the audience can't see why the heroine got engaged to him in the first place. But in real life, many an abusive relationship involves a partner who starts off ideal, before gradually slipping into old habits and violent tendencies.
* Evil All Along variant surfaces when he hints to Jim that he dodged a bullet by not marrying Pam.
* Evil alter ego ("two percent of me," in his words) makes time stand still with Penfold frozen in it and challenges DM to a fight in "The Good, The Bad and the Motionless."
* evil and disgusting was to get fresh running water between it and you. Crossing a stream usually worked.
* EVIL and must be ended at all costs. Omnivores get a pass if they're willing to go vegan; obligate carnivores are out of luck.
* EVIL and winning multiple NJPW tag team titles over the rest of the decade.
* Evil Angels), based on the real life Azaria Chamberlain murder trial, has two of these:
* Evil Annie & Evil Jeff are together in the Darkest Timeline. When Evil Annie asks if he has a problem with the age difference, Evil Jeff says he wishes she were
* Evil Atom's wife used to be a superheroine known as Star Force, she retired after the wedding, while he decided to found Evil, Inc instead of pulling off conventional supervillainy.
* Evil Balloon is the one to die in an instant rather than Balloon. Balloon is, of course, delighted about surviving the episode.
* Evil Batman" Wrath have been motivated by hatred of cops, though this is usually due to the law coming down on his parents rather than him.
* Evil: Being nocturnal scavengers, especially with their ability to completely devour a body and leave not even bones behind, hyenas have long been seen as wicked and vile. Medieval Bestiaries use them as a symbol for the untrustworthy, the two-faced, the greedy and the lustful. This belief still influences Western cultures, and even in their native lands, hyenas are often seen as vile creatures — the Korè cult in Mali symbolically become and emulate hyenas specifically to put on elaborate
* Evil Belle features Sweetie Belle trying to become a dreaded villain-for some reason-, only to end up being this trope.
* Evil Belle, Sweetie tries every cliche from the black cloak to speak in a guttural voice.
* EVIL: Betrayed Los Ingobernables de Japón in 2020 to join Bullet Club, winning the IWGP Heavyweight and Intercontinental belts soon after.
* Evil Bomber. After getting 5s on every level on the first five planets to unlock the sixth planet — the toughest part of which is probably getting 5s on the boss levels — and going through two of the most insane levels in the game, you get to the last boss and...he's about as tough as Nitros, at worst.
* Evil Bong, isn't even a horror movie, but a combination of fantasy/adventure and stoner comedy.
* Evil Breed: The Legend of Samhain, Barbara grabs Steve and drags him into the shower where they have sex.
* Evil Breed: The Legend of Samhain, Barbara is grabbed by the ankles and dragged under the bed by the inbred cannibal hiding there.
* Evil Breed: The Legend of Samhain descended from Sawney Beane who are so inbred that they barely even look human anymore.
* Evil Breed: The Legend of Samhain even ends with a shot of Mark's torso rotating slowly on a spit over the fire.
* Evil Breed: The Legend of Samhain: Gary, the caretaker at the cottage, is younger than the traditional crusty caretaker, but was born on Samhain and has psychic visions. He keeps lunging out unexpectedly at people to warn them in the most cryptic and ominous way to stay on the paths.
* Evil Breed: The Legend of Samhain is set is Ireland but was shot in Quebec. It more or less works, especially as there is supposed to be a dreamlike quality to

the landscape, but they failed to secure any right-hand drive vehicles.
* Evil Breed: The Legend of Samhain, Shae hears someone coming around the corner in the mine tunnel and, assuming it is one of the cannibals, stabs them with a machete, only for it to turn out to be Paul.
* Evil Breed: The Legend of Samhain Steve remains hidden and watches the Shape gut Pandora without making any effort to help her.
* Evil Breed The Legend Of Sam Hain Steve says that she should be safe then.
* Evil Breed: The Legend of Samhain strung between two trees while running from the Shape.
* Evil Breed: The Legend of Samhain, the maggot-covered head found by Gary the caretaker is actually the head of the director, Christian Viel.
* Evil Breed: The Legend of Samhain, the Shape murders Gary by shoving his hand up Gary's ass and ripping out his intestines.
* Evil Brit and hates the "yanks" enough to try and cancel Independence Day!
* Evil BritAny character with a British accent, particularly an upper class English one, is likely to turn out to be a villain.
* Evil Brunette Twin: An evil twin who is dark-haired while the good twin is light-haired.
* Evil Brunette Twin: You can tell they're worse by their darker hair.
* evil. By the 2010s, most North American and European circuses had either closed down or were on the verge of. Ringling, Barnum, and Bailey, the last major American circus, filed for bankruptcy in 2017.
* Evil can brutalize, torture, humiliate, and abuse students to its heart's content, while the administration turns a blind eye. Whenever a student pisses the seniors off, the seniors arrange a cage match in which the student is usually beaten half to death.
* Evil Cannot Comprehend Good: A character is evil if they're unable to understand the reason behind the heroes' actions or assumes that the heroes' good deeds were actually done for evil reasons.
* Evil Cannot Comprehend Good: Inability to comprehend good altruistic behavior because of an incredibly selfish and evil nature.
* Evil Cannot Comprehend Good, in which the Devil often shown in this fashion, being unable to appeal to anything other than selfish desires when manipulating humans.
* Evil Cannot Comprehend Good: The villain is unable to understand the hero's motivations.
* Evil Cannot Comprehend Good: The villain misinterprets or is unable to understand why the good guys do what they do.
* Evil Cannot Comprehend Good). Thus, a lawful person could speak Lawful, a chaotic person could speak Chaotic, and so on. And if your alignment changed you forgot how to speak it, but could now speak the language of your new alignment.
* Evil Cannot Comprehend Good: Villains fail due to their inability to see how virtue motivates their adversaries.
* Evil Cannot Comprehend Good, when the reason for doing the good thing simply doesn't occur to them.
* Evil Cannot Stand Cuteness: A character's evil is characterized by their disgust of cutesy or adorable things or topics.
* "Evil Carny" punishes wicked souls by subjecting them to all the worst things about carnivals and amusement parks, including bad food, dangerous rides, long lines, and surly employees.
* evil CEO consists of nothing but "Evil Deeds", except for an hour break for "Lunch with Mom".
* Evil Chancellor and possessing seemingly no redeeming qualities, often willingly saves his assistant Wa'at Alahf from certain death, only to reveal when thanked by him that he did so because he required his help for things such as carrying important files or cleaning his shoes. In contrast, he often is willing to use Wa'at as a lab rat for his various plans.
* Evil Chancellor, and they now have the complete trust of the Earth King. Oh yeah, and the thing with Toph's parents was actually a trap set by people trying to

kidnap her.
* Evil Chancellor hams it up in every scene he's in, even to the point where other characters start commenting on it.
* Evil Chancellor has a pretty good one, seen (among other times) when Crono and gang escape through a time portal.
* Evil Chancellor: The "good emperor, evil chancellor" trope appears again and again.
* Evil Chancellor: The king's top royal adviser is evil and disloyal to their boss.
* Evil Chancellor: The ruler's top royal advisor is evil and (usually) trying to overthrow them.
* Evil Chancellor Traytor. The 'Evil' is just a title, and he carries around the poisoned knife Kingslayer to kill evil kings, and so that he would take the blame for killing a king. Traytor is ridiculously nice, donating large sums of money to charity and writing legislature for the disabled.
* Evil Chancellor. When Jafar actually convinces Hades to give it a shot, the big blue guy admits that "It's cleansing."
* Evil Chancellor who would destroy the Star League and plunge human space into 300 years of war. The symbol of the RWR? A shark.
* Evil clerics could use poison, non-evil clerics could not. Likewise, evil bards could use poison, non-evil ones couldn't.
* evil clone of Ian Nottingham. He also got beat to a pulp surprisingly regularly on the show.
* Evil clones of Cameron and DJ take over as the antagonists in the Nova arc.
* Evil Colonialist; depictions of the Horsemen only replaced Conquest with the more familiar figure of Pestilence starting around the time of the Black Death. This makes sense, given the amount of oppression that Judaea had endured under Roman rule by the time the Book of Revelation was written.
* Evil Colonialist, I help them with conquering weaker nations and subjugating inferior races.
* Evil Colonialist (not always but quite often related to race and racism)
* Evil Con Carne also is in a jar... and developed its own sentience. And both are occupying the body of a Russian circus bear named Boskov who can still act on his own despite his brain being replaced with Hector's. It's a weird show.
* Evil Con Carne and a disembodied stomach with a mind of its own, originally used in the pilot cartoon for the sake of a cheap pun on the phrase "listen to your gut."
* Evil Con Carne, Con Carne's brain ends up trapped outside his usual container, and as it crawls along, the bugler announces mess call. Cue Con Carne realizing he's in between his troops training area and the mess hall! This trope follows as he ends up trampled by his entire evil army ending with an elderly soldier using a walker walking over him.
* Evil Con Carne during their later seasons had additional scenes from the show's episode.
* Evil Con Carne episode "Christmas Con Carne" had Hector Con Carne attempt to take over Santa's body so he could give the children of the world toys with mind control devices inside them.
* Evil Con Carne episode "Devolver", General Skarr is seen devolving into lower life forms. After he turns into a smelly skunk, he turns into a lawyer.
* Evil Con Carne episode "Gridlocked And Loaded" where the team was in a traffic jam had Billy in a car next to them irritating General Skarr. Billy moons Skarr in one segment, after which Skarr turns his cannon on the car and blows it to kingdom come.
* Evil Con Carne episode "The Right to Bear Arms", where Boskov and Skarr switch arms but can still control their arms on the other's body, Boskov makes Skarr do this to himself. When they're recovering in the medical wing after Ghastly has chainsawed their arms off and reattached them to their respective bodies, she also sewed Skarr's face back on but sewed his lips together.
* Evil Con Carne. Ghastly handwaves this as being caused by "the miracle of love."
* Evil Con Carne shorts, one episode features the character Max Courage and his

family in what was apparently intended to be the pilot for a spin-off that never materialized.
* Evil Con Carne, Skarr rants against his mother and the military while crawling up a hill.
* Evil Con Carne; the plan falls apart because everyone at the meeting claims that he or she is the most evil and the most fit to lead the group.
* Evil Con Carne, there was a Girl Scout troop among the invitees. Even Skarr is afraid of them, and they gave him a box of butterscotch cookies that exploded in his face.
* Evil Con Carne: This trope was the reason Hector decided to start the League of Destruction. It only helps to make all the criminal masterminds butt heads directly at the same time which leaves his island ruined, all the villains passed out and a very perplexed invading security force.
* Evil Con Carne to keep an eye on them. Skarr then has the robots reprogrammed to obey him by putting his name on the controls. Afterwards, Skarr has Ghastly create a robot in his image that he calls his son, Skarr Junior. And when Skarr entrusts Junior to watch over the robot army, Junior puts his name on the controls to take over the robot army. When Skarr realizes that his son has betrayed him, his last words before he’s killed are that he’s proud of his son.
* Evil Costume Switch: Upon becoming a villain, the person switches to more sinister apparel.
* Evil Counterpart, as Livia/Eve, except she doesn't lose her memories.
* Evil Counterpart: A villain who is essentially an evil version of the hero and may be a rival with their heroic counterpart to accentuate their nature as the hero's moral opposite.
* Evil Counterpart, a womanizer who manages to seduce rich women into revealing their bank codes and bleed them dry. In comparison, Sam just finds himself a sugar-momma and provides genuine affection, company and is monogamous.
* Evil Counterpart backstory outlined that he only had his speed whenever he wore his costume, which was a Flash costume he'd found in a time capsule and scientifically increased its residual speed energy (from Barry's constant use of it) before then dyeing it in reverse-colors.
* Evil Counterpart Ben has to point out to him that he can phase through objects. He does get more creative in his power usage after realizing he's got so many different abilities, though.
* Evil Counterpart Black Mist/No. 96 is primarily black, red, and teal.
* Evil Counterpart, Bunny, and the stories are all framed as Bunny's memoirs.
* Evil Counterpart but Armand is absent much of the story and seems useless when he is there.
* Evil Counterpart Captain Pollution, is weak against pure wind, water, earth, and fire while being composed of concentrated pollution. This makes it interesting in that they're literally walking kryptonite to one another.
* Evil Counterpart, Count Sinestro, Blockbuster, and Doctor Felix Faust as the Society of Super-Villains.
* Evil Counterpart Drago Bludvist. He lost his arm at a young age seeing his whole village destroyed by dragons. He manages to hide the stump with a false arm, and is generally a bastard.
* Evil Counterpart explodes after going off a cliff — in spite of both vehicles supposedly being coated in a substance that makes components like their gas tanks effectively indestructible and incapable of exploding.
* Evil Counterpart fastest being in existence, and causing Linda Park's miscarriage.
* Evil Counterpart has no qualms with crying and begging when Sage takes over his show and proves far scarier than he could ever be.
* Evil Counterpart is a straight example of this trope. Moira O'Deorain, formerly of Overwatch's Blackwatch division, uses the setting's healing technology (biotics) to suck the life out of her enemies. She is responsible for giving the wraith-like Reaper his abilities and now works for the terrorist organization Talon, where she can continue her experiments unfettered "by law, by morality, and by fear." Her

character design is highly reminiscent of an evil witch, contrasting Mercy's angelic design.
* Evil Counterpart Ivan Vanko/Whiplash seemingly just slapped an arc reactor together out of stuff in his garage.
* Evil Counterpart Kevin 11 retained the same voice in all his forms when he was shapeshifting into several of Ben's different alien forms.
* Evil Counterpart of Batman who specialises in murdering law enforcement officials.
* Evil Counterpart of the Federation. While the latter is bounded by love and peace, the former is bounded by fear and intimidation. In addition, it's far more theocratic than other villain empires in the franchise. It was intended to have multiple Dominion races appear about their starships, but they ended up just having the Founders, Vorta, Jem'Hadar, and their Alpha Quadrant allies.
* Evil Counterpart, playing along with the "beguilement" and "deceitful" part of this trope.
* Evil Counterpart Race. To drive this point home, the unlockable Octoling Armor doesn't show nearly as much skin when worn by an Inkling of either gender.
* Evil Counterpart religion, whose deity is not so much worshiped or prayed for rather than appeased and bribed towards leaving mortals alone.
* Evil Counterparts, and they make Death bring them back each time, citing the number of games at which they beat him.
* evil counterparts, Cere Cere of the Amazoness Quartetto manipulates flowers. There were also several monsters with this ability- such as Petasos and the three Plant Sisters.
* Evil Counterparts) death by killing Belkar (who has it coming about a hundred times over). Nevetheless, he seems to have no qualms about letting the rest of the guild destroy a whole town if it means he can get to Belkar.
* Evil Counterparts grenades to the face on the highest difficulties before dying (if you could even make the stick, since in their earliest appearances, plasma and spike grenades would merely bounce off their armored sections). Other elite Brutes include Captains, Bodyguards, and Jumpers.
* Evil Counterpart similar Marvel character except, again, Tigra when her powers are really misbehaving) and has been speculated to be a catlike creature who can transform into a human instead of the other way around, but it's not made explicit.
* Evil(?) Counterparts of the Reds and Blues. While they didn't cause the main events of the series, they would be used as models for every subsequent simulation outpost, which plays a big hand in the events that would follow over the years. This also means that they were indirectly responsible for the formation of the Blood Gulch Crew.
* Evil Counterpart, the Iron Warriors, differ from most other Chaos Legions in that they don't view mutations as a sign of the gods' twisted favour; instead, they view them as annoying inconveniences, and tend to replace them with cybernetics at the first opportunity. It's not to honour their founder or anything of the sort, because the Iron Warriors are brutal pragmatists of the first order; it's just that if an arm can't be used to kill people effectively, the Iron Warriors don't view that arm as useful.
* Evil Counterpart), the Wizard sought a new supervillain to replace her. Among the applicants was a fellow named the Osprey, who had nifty-looking wings attached to his back. When the Wizard discovered the wings were nothing but decoration, and that the Osprey had no powers at all, he stuck an anti-gravity disk on the fellow and sent him floating helplessly into the upper atmosphere.
* Evil Counterpart (though oddly not Fantastic Four enemies), naturally also included an evil version of the Richards couple: Vector and Vapor.
* Evil Counterpart to. Midnighter killed Teuton, then he and the rescued Apollo massacred the rest of the G7 Authority.
* Evil Counterpart to normal dwarves) rarely drink much. Since their history is somewhat more traumatic than the regular dwarves, they avoid drinking, lest they risk revisiting memories of their centuries-long torture by the Ilithids.
* Evil Counterpart to the point that we'd be calling it The Kevin Effect if the

series had come along earlier. Waaaay later, we get the explanation: he can do matter and energy, but absorbing energy warps his mind. He has to stick to matter or he'll go evil again.
* Evil Counterpart; whereas Kise just copies his opponents' abilities, Haizaki is considered to steal them, since the players become unable to use their abilities once he copies them.
* Evil Counterpart, who has Colonel Moran as an Evil Watson, the Conduit Street Comanche as Evil Baker Street Irregulars, takes "cases" that are strangely parallel to Holmes's, and in his spare time breeds wasps (evil beekeeping).
* Evil Counterpart with bone-white skin, a skull-like face, bone-like spikes growing out of his body, insane glowing eyes, and teeth as long as a man's finger.
* Evil Counterpart, with his own counterpart to the Omnitrix, also demonstrates this trope with the only difference being subtle pitch variations, while Ben's aliens are still performances by multiple voice actors.
* Evil Counterpart Yes, any remotely clean source of drinking water sprayed in his face will make him bow down and crawl helplessly. This seriously deters his ability to establish himself as a credible threat.
* Evil Cripple. An injury from high school left him with a limp. It doesn't impair him overly much, and is only noticeable when characters call attention to it. At the same time, said limp is at the core of his anger with the world, and twenty years after receiving it, he still wants payback on the man who gave it to him.
* Evil Cripple, because being unable to take action also trumps a male character's morality.
* Evil Cripple: Observing their evil army from the comfort of their wheelchair.
* evil crossover review, he got extremely pumped up when Superman (one of his idols) defended his mother with extreme force, saying he could empathize.
* Evil Dead (2013), Olivia is in the bathroom and suddenly starts to become possessed by a demon, proceeding to vacate her bladder onto the floor.
* Evil Dead (2013), which is bloodier by far than the original series and features graphic dismemberments and mutilations (some self-inflicted), including a more brutal version of the original's tree-rape scene.
* Evil Dead 2, Ash amputates his own demon-possessed hand and replaces it with a chainsaw to battle the undead.
* Evil Dead 2, Ash does this on finding that the bridge is out and he can't escape.
* Evil Dead 2, Ash steps on the neck of a wounded Deadite then proceeds to give it a point blank shotgun blast. Considering that it's a Deadite, there is no need to mention the resulting copious gore.
* Evil Dead 2, Ash Williams wields a shotgun and a chainsaw in either hand. The shotgun is sawn down to wield in one hand, while the chainsaw is attached to his arm-stump.
* Evil Dead 2 contains a mounted deer head. In a state of stress, Ash hallucinates that it's laughing at him along other pieces of furniture.
* Evil Dead 2 for the first time, Russell walked up to him, shook hands, and without preamble demanded Campbell "say 'Work shed'."
* Evil Dead 2, in line with the increasingly comedic tone of the series, featured gallons of stage blood of various colors and visual gags involving zombie parts as it essentially parodied its own (more straightfaced) prequel.
* Evil Dead 2 is a retelling of the first movie, but cuts out a lot of the tedium and filler, as well as removes Ash's and Linda's two friends from continuity.
* Evil Dead 2 is full of creepy stuffed trophy heads. Who laugh at Ash.
* Evil Dead 2 moves like a creepy ballerina. The body pirouettes, the head stays still.
* Evil Dead 2 of it after blowing a hole in the cabin wall with his shotgun.
* Evil Dead 2: Revenge of the Krampus series, this one has Ash saving a kid who has been taken by Krampus.
* Evil Dead 2 sings "The Mockingbird Song" to try and lull her daughter into a trap. Later, Annie distracts her possessed mother long enough for Ash to get the edge over her by singing the same song.
* Evil Dead 2, when Ed is possessed, he grabs Jake by the face and throws him

vertically into the ceiling where he smashes a lightbulb.
* Evil Dead 2, whose neck starts extending when it escapes the fruit cellar.
* Evil Dead: A Fistful of Boomstick, can swap out his chainsaw hand for a gatling gun.
* Evil Dead: A Fistful of Boomstick, several vortices materialize in the town of Dearborn, and Ash is tasked by the local priest to close them with silver. This leads to a mission where he has to hunt for biker gang members who had raided stash of it recently.
* Evil Dead: Ash is for the most part a total idiot; but if there's one thing he's good at it's making dead things deader.
* Evil Dead Ash, who seems to be otherwise dumb as a post, actually catches on!
* Evil Dead, but his original choice for a weapon to fight the Deadites with was an axe.
* Evil Dead" can even appear to change back into their former selves, only to lure their former friends into reach.
* Evil Dead contains a haunted book, so, for all intents and purposes, it is haunted.
* Evil Dead film, but by the beginning of the next, he becomes a witless coward again.
* Evil Dead films could have saved themselves a lot of trouble by just leaving that tape recorder alone.
* Evil Dead film series is considered one of the big names of horror, despite consisting of only four movies (the original trilogy, made between 1981 and 1993, and a controversial reboot from 2013), compared to other big horror franchises which often go well into the double digits.
* Evil Dead: Hail to the King, which provides tips to repurpose any undrinkable results (namely how to create fuel and healing items with mushrooms).
* Evil Dead/Marvel Zombies crossover...but it was actually Ashley G. Williams, a supermarket employee who happened to be the Marvel Universe version of Ash.
* Evil Dead musical, where the trees are monsters and attack the main characters.
* Evil Dead. Not only does it possess human corpses and dead trees, but also damaged tissue on a still-living body. From there, it spreads rapidly like an infection, turning the afflicted into a Deadite. The spread can be stopped by amputation or sucked out like snake venom, but it can still animate anything it's already corrupted.
* Evil Dead, on the other hand, are straight horror films with next to no comedic elements.
* Evil Dead: Regeneration, Ash's half deadite sidekick. He gets better each time, but he still doesn't like dying. Killing him is actually a gameplay mechanic as well as something Ash does in the cutscenes.
* Evil Dead seems to takes place in the span of about three days (minus the epilogue), making the entire series happen in about a week.
* Evil Dead: the entire broadcast area is enveloped by the demon-summoning spell (let's be glad it was a local station).
* Evil Dead: The Musical: Ed, a person who gets constantly interrupted dialogue-wise and later gets turned into "the bit-part demon" because of it, is about to break out into his own musical number, and is promptly shot by Ash.
* Evil Dead: The Musical: "Join Us" has Ash state, "I'd rather look like this moose" than join the Evil Dead. Unfortunately, said moose is also a Candarian demon, which bites his hand.
* Evil Dead: The Musical's autobiography, and to have created the phrase "fo' shizzle, my nizzle!"
* Evil Dead: The Musical, with lots of "Oh no, now my [X] is torn." by the heroine. Followed by her ripping the offending bit of clothing off.
* Evil Dead. There was certainly no lack of talent in the original, but having 10 times the budget for the sequel definitely shows.
* Evil Dead the stuff you normally yell at people on the screen for not doing:
* Evil Dead Trap is held captive in a room with two deadly booby traps that are set to go off once the main character finds her.

* Evil Dead ups the ante with an upgraded one with extended guide bar and diamond-tipped cutting chain.
* Evil Dead, which totally dropped the Evil Dead name as well as most of the gore to make it more marketable to mainstream audiences and got so popular as a stand-alone movie that it's not uncommon to find fans of it who don't even know the rest of the franchise exists.
* Evil Dead who worshiped the evil entities (later named "Deadites") contained in a hellish dimension beyond ours. They wrote the book as a way to summon these entities into our world by reading the inscriptions aloud.
* Evil Dead wife Henrietta, and his failed attempt to survive the night. Unfortunately, he'd also recorded the recitation of the demon summoning spell that'd accidentally caused the mess to begin with, meaning that anyone who listens to the whole tape ends up going through the exact same thing.
* Evil Debt Collector: Alice collects debts for others by acting nasty to their debtors.
* Evil Debt Collector: Collections is a heavily regulated industry, and the actions agencies can take are heavily controlled. Harassing debtors, publicly shaming them, continuing to contact them after a debt is disputed or proven to be invalid, or other common sleazy collector practices will, at the very least, result in a big fat payout from either a successful lawsuit against the agency or from regulatory fines (often both).
* EVIL definitely evokes this trope, although his is a bit more casual with an unbuttoned collar and loosened tie.
* Evil-Detecting Dog: A dog or other animal is able to sense when a person is evil.
* Evil-Detecting Dog: A dog (or other animals) can sense when an evil being is present.
* Evil-Detecting Dog: An animal is able to sense the presence of evil people, dangerous situations, and/or supernatural phenomena.
* Evil-Detecting Dog, in which Merlin uses magic to disguise Uther as Gorlois but a dog is not fooled.
* Evil-Detecting Dog Ruby keeps staring at him: she's noticed a demon sinking its claws into her master's shoulder, making him very miserable and angry, so she's glaring at it to make it leave her master alone.
* Evil Diva, a webcomic about a devil girl who can't help doing good deeds for others.
* Evil Diva comic, Michelle is wondering where Diva and Loki have gotten to when people come running by screaming "They're headed for the gym! Run for your lives!"
* Evil Doppelgänger: A bad guy with an uncanny physical resemblance to a good guy.
* Evil Doppelgänger Black Siren. Despite his continual denial, it's apparent he sees her as the original Laurel and a second chance to save her.
* Evil Dread", Sam gets stung by a jellyfish and runs into Lake Wawanakwa to pee on himself to alleviate the pain.
* Evil Dread" when a trap triggers behind him, prompting him to turn around.
* Evil Duo: Two villains where one is cunning and bossy, the other is obedient and dim-witted.
* evil'd up Black Mage forests. After the conversation actually appeared, the major deaths that happened right before it were reverted, and the creator admitted that it was just made to distract people from actual important mysteries.
* Evil Easter 3 The Final Easter embodies multiple stereotypes of Nazis:
* Evil Egg Eater: If it eats other animals' eggs, it's depicted as being an evil trait.
* Evil Elevator in "It's a Terrible Life" and being splashed by blood.
* Evil Elevator: Sometimes controlled by a ghost or similar malicious entity.
* Evil Emperor Zurg pulled this during a climactic fight scene with the title character in an episode of
* Evil Empire and are still heavily involved in clandestine operations to kidnap or covertly buy elves from the officially slave free south. But they gladly will, and do, enslave people from any race. It's just that elves, being second-class citizens

at best, are much easily acquired and much of their original slave "stock" descends from the survivors of fallen Arlathan. Elven Magisters are uncommon but far from unheard of, and we even meet an elven Tevinter soldier who identifies as a Tevinter first and an elf second.
* Evil Empire and doesn't lose any sleep over it. Or when he recruits a Qwardian Weaponer and worshipper of the Anti-Monitor (destroyer of multiverses), because "he'll do less damage on Maltus than on Qward."
* Evil Empire named Ace Partner goes to a bar to search for a new victim, he is shocked to see a group of 5 woman with a men tied to a table. The woman are bragging that the man wishes that he was spending another night at that brothel instead of the bachelorette party, implying the women were having a bachelorette party and hired a male stripper they planned to murder.
* Evil Empire named Ace Partner goes to a bar to search for a new victim, he is shocked to see a group of 5 women with a man tied to a table. A woman is bragging that the man must wish that he was spending another night at that brothel instead of the bachelorette party, implying the women were having a bachelorette party and hired a male stripper they plan to murder.
* Evilenko, enabling him to lure his victims to their deaths. It even goes so far as to suggest that American or European agencies wanted to whisk him away in order to study his hypnotic powers but were denied.
* Evilenko: When Evilenko is finally captured and escorted to the courthouse, he has to be transported in an armored vehicle and accompanied by multiple guards to prevent the livid crowds of parents outside from ripping him to shreds before he can even stand trial for his murders.
* Evile references both using blood to restore youth and the vanity that would entail.
* Evil Ernie's murder spree began with him killing both of his abusive parents.
* eviler personality of LG Creepybloom who was already a version of Applebloom, but later she turned into the good side in HTF+CC 2.
* Eviler Than Thou: A villainous force claims themselves to be superior to the others.
* Eviler Than Thou: A villain proves themselves to be more evil than the other villain.
* Eviler Than Thou: A villain proves they're more evil than another villain.
* Eviler Than Thou when they ended up aiding Ash significantly in their defeat).
* evil-esque feud between Pridelanders and Outlanders, complete with massive public shaming and assault against by the former against anyone exiled, while the latter outright brainwash their cubs into treating everyone different from them as the enemy.
* Eviless manages to pass herself off as one of the Holliday Girls even to the girl's close friends and to Diana and Steve who had faced her before in her guise as one of the Saturnian Empire's slavers.
* evil examples of this. They don't care what planet they're helping the alien villains to conquer and why. As long as they get to fight and destroy things, they're happy.
* Evil eye beads, found throughout Greece, Turkey, Armenia and parts of the Middle East, stem from ancient beliefs that they can protect the wearer from any ill karmic effects given by a death glare.
* Evil Eye charms, consisting of round beads with blue eyes painted onto them said to ward off the effects of the evil eye, have been popular in Armenia, Turkey, and countries in the Middle East since ancient times. The "evil eye" is said to be a sort of
* Evil Eye Sigma if it's actually a tank on wings as it's often described. It can be assumed that magic, more than its sinister bat wings are what keep it airborne.
* Evileye was rescued by Ainz' warrior disguise Momon. Thankfully, neither Albedo nor Shalltear know about it, because while they're in agreement that Ainz is indeed everything a young maiden's dreams are made of, none will relinquish the proud title of
* Evil Falla has a disregard for other people's lives that borders on sociopathic,

openly comparing everyone around her to
* Evil Feels Good: Doing evil to others in general makes me feel good!
* evil flotilla of zeppelins in the finale are also largely CG. Unfortunately, in some wide shots, the CG suffers from an obvious low frame rate as compared to both the hand-drawn characters in the shot and the moving background paintings, causing them to visibly jump back and forth as the scene zooms out.
* evil foreigners, possibly stronger than him, almost as agile and easily as evil.
* Evil for Evil show up to collect his gear and end up taking him, too, thinking they can ransom him to the enemy. He eventually escapes after becoming ultra paranoid that they'll do just that.
* Evil Former Friend: When the arch-enemy used to be your best friend.
* evil (fraternal) twin brother have eye patches, and are some of the most competent fighters in the series. Dr. Director is primarily a parody/homage to Nick Fury.
* evil future Nightwing, called Deathwing, has a costume that includes shoulder spikes, a plunging neckline, and a nipple ring.
* Evil Genius 2 has a literal Trojan Horse as a loot item. When you finally steal it and place it in your base, a large group of ANVIL soldiers will jump out of it. After you defeat them, you can use the Horse in lucrative heists around the world.
* Evil Genius 2 Maximillian tries to buy a country early in his campaign. The mission only costs $20,000. He tries to buy a country for less than the cost of some of your lair's lab equipment.
* Evil Genius allowed you to create chains of traps that trigger one another. The more traps an enemy agent triggers in rapid succession, the more bonus cash you are awarded. A single trap triggering does not offer any reward (other than dealing with that pesky, pesky agent).
* Evil Genius, a lot of the evil plans you can do involve this, up to and including stealing the Sword in the Stone by just grabbing the stone and stealing the Eiffel Tower by shrinking it.
* Evil Genius, and you'll see how one of them, after trying to back off, is the victim of your hidden shrinking beam. Incidentally, it's the same one who gave you trouble by being too ballsy and had to be "convinced" to attend by force.
* Evil Genius: An extremely smart villain whose intelligence is their most important skill.
* Evil Genius, any object that catches fire will take damage continuously. After it takes enough damage, it explodes. This means any object in your base, even bunk beds and lockers, will explode and cause everything around them to catch on fire, leading to some humorous situations in, say, a room filled with bunk beds. True story.
* Evil Genius around the world, has the form of a tabletop map complete with little pawn figures for the mooks that get flicked over when they die.
* Evil Genius. As the videogame is essentially a big parody of spy fiction the agents sent after you from the forces of justice are all very colorful and stereotypical, making this trope inevitable.
* Evil Genius bodyguards once your Notoriety is high enough. If you're playing as Alexis (the female socialite), the trope is Gender Inverted and Bodyguard Hunks in Chippendale's-type outfits are deployed.
* Evil Genius, but managed to escape after one month. As a result, he is able to be recruited as a Henchman for the Evil Genius.
* Evil Genius eventually allows you to develop a shrink ray. Afterward, it becomes a mission goal to steal the Eiffel Tower.
* Evil Genius game where players take control of a wannabe overlord and set off to conquer the world with various criminal means.
* Evil Genius has a control room, which looks and acts like a war room. Except you dispatch mooks instead of conquering territories. It also has Inner Sanctum with Type 2 conference table.
* Evil Genius has the Venus Man Trap, which you can research. While it doesn't outright kill agents, it does take a big bite out of their health. There's even a sign next to it saying "Do Not Feed." The agents are obviously illiterate.

* Evil Genius, he notes that he never gave Experiment 626 (Stitch) a higher purpose.
* Evil Genius in your employ. The purpose of this is to get the mook killed in order to make the World Powers believe your Evil Genius is dead and lower your heat level.
* Evil Genius is a Diabolical Mastermind simulation, where you select one of several evil supergenius characters and build up a globe-spanning criminal empire, dealing with any spies or secret agents sent to take you out or disrupt your operation.
* Evil Genius, is a specialist in nuclear fusion and in charge of helping the evil businessman detonate a nuclear weapon in Fort Knox in an attempt to cripple the American economy.
* Evil Genius is entirely about building one of these, the larger and more full of traps the better! Now you just have to watch out for those pesky law enforcement agents sneaking in to make trouble...
* Evil Genius is making elaborate death traps for unwitting foreign agents.
* Evil Genius is to launch one of three Kill Sats to blackmail world leaders into total surrender. It works.
* Evil Genius. Lampshaded in-game, where a couple of the Acts of Infamy point out that the Evil Organization is equal-opportunity, and thus will spread pain and misery in equal amounts to everyone. One mission involves burning down a national park, if only because "we've been focusing on urban mayhem lately."
* Evil Genius. Later, Mannoroth is killed by Grom Hellscream, leaving Tichondrius as his only Dragon. Then Tichondrius is killed by Illidan, apparently Anetheron became Archimonde's new Dragon.
* Evil genius Mojo Jojo vs the girls and their superpowers. Chemical X is the cause of both; think about that. Possibly subverted in that the girls,
* Evil Genius no matter how much you do it. Still, given how much trouble these guy give you before you finally figure out how to get rid of each one, simply doing it is a good way to blow off steam.
* Evil Genius, one of the possible tortures your minions can inflict on your enemies is forcing them to watch as the minion does Michael Jackson dance moves.
* Evil Genius players have learned to exploit this behavior by creating a dummy entrance on the other side of the mountain that leads to either nowhere (running out the clock on the agent) or into a series of traps.
* Evil Genius scheme. He often builds it himself. One time, they let him fiddle with electronic gadgets in prison as a hobby, and he escaped by inventing a device that lets him turn into electricity.
* Evil Genius, sink her". And yet you can recruit him to be your henchman.
* Evil Genius smarts, you ask? It sucks the patient's brain out through their ear, washes it with a special chemical concoction, then sticks it back in again.
