* During Hurricane Dennis and Hurricane Ivan, people along the panhandle of Florida were known to go right down to the beach to look at the large waves, only to come home and find out they were close to having gotten hit by tornadoes and/or waterspouts when they were out there.
* During "In Conclusion", the young girl confidently ignores the dangers of the woods and makes it to her mother's house without incident. Actually seeing just how dangerous the woods can be, however, seems to deeply traumatize and terrify her.
* During "In Marge We Trust", after learning why Homer's face is on a box of dish detergent from Japan:
* during Instrumentality and Kaoru reveals that in order to get ready to try to change the future he had to see inside Shinji's soul and relive all his memories, including Shinji's love towards Asuka. It was so intense that for a while Kaoru pretended he was Shinji and Asuka his wife.
* During "introduction" in a prison cell, new inmates might be asked some kind of trick question with a sadistic streak, just to see what they're made of. Usually it will involve a hurtful option and a debasing one, the stock variant being "What'll it be? A fork in the eye or a pork in the ass?" You
* During its first year, Plucky Duck centric shorts and episodes aired on Saturday mornings as "The Plucky Duck Show"
* During its guest host phase, The Muppets were the guest stars for Halloween Raw and yes, Divas were in costume again.
* During its hegemony in the 4th century BC, the Greek city-state of Thebes had an elite unit called the Sacred Band consisting of 150 soldiers, each paired with his adolescent gay lover. After the battle in which he defeated them,
* During its late-80s slump, Oldsmobile attempted this with its decidedly unsubtle "Not Your Father's Oldsmobile" campaign with its 1988 Cutlass Supreme, attempting to market the popular Cutlass line to "the New Generation of Olds" in the hopes of expanding its customer base. One advert even had Melanie Shatner behind of the wheel of the Cutlass with her father and Captain Kirk himself, William Shatner in the passenger seat. This campaign backfired spectacularly, failing to entice younger buyers while also alienating Oldsmobile's loyal customer base by undermining its own history of innovation and reliability. Despite its sturdy build, the Cutlass failed to sell in the numbers needed to break even and the botched campaign is often blamed for hastening Oldsmobile's decline until it liquidated in 2004.
* during its run - and you can expect other Japanese media to make reference to them from time to time.
* During its second season one of the main characters (Maya) constantly changed shape, size and mass without even a nod given to where the energy/mass had to come from/go to for this to work.
* During Jacob's romance, he points out that "one-nighting the Commander is a good way to get airlocked".
* during Jaune's kidnapping and being introduced to Raven's gladiatorial system, is a complete lack of Grimm being spawned from all the death and general negativity with the Greycloaks camp, avoiding the issue of why they aren't constantly attacked. As of Book 7, the Grimm have been entirely forgotten in the story.
* During Joan Rivers' roast, SHE admonished the crowd when they booed a rather mean joke at her expense. "Lighten up! It was funny!"
* During Joker's handheld video threat to Batman with a captured Brian Douglas, he continues to address Brian in his usual low-volume mock-playful Joker voice until he gets really loud for the first time in the film, and it is unnerving, especially since he's off-screen so there's no warning it's coming.
* During Jon's reign, he initially had three prominent female allies: Sansa, Brienne, and Mellisandre. However, he ultimately exiled Melissandre thus playing this trope straight.
* During Josephine's romance arc, her family betroth her to a young nobleman, whom the Inquisitor can challenge to a duel for her hand in marriage. However, after seeing that the two are legitimately in love rather than just being a fling, the lord in question calls off the duel and is happy for them. (Oddly, this never comes

up if Josephine is
* During Jotaro and DIO's fight, it escalates into near-DBZ tier when both of them start flying, but what tops the "Holy Shit" cake is when DIO drops a motherfucking STEAMROLLER onto Jotaro.
* During Laharl's anime-rific cutscene, Taro pees down his leg in fearsome awe.
* During Leo McGarry's heart attack during the peace talks at Camp David, he initially appears to simply be short of breath, not showing any signs of pain. Eventually, though, he falls to his knees clutching his chest.
* During Lindesfarne's pregnancy, she craves very specific exotic insects. (Since she's a hedgehog, insects in general aren't an example of the trope.)
* During live performances of "The Saga Begins", Al likes to stretch one line: "I'm still here and heeeeeeeeeeeeeeeeeeeeeeeeee's a ghost" (the band will even stop to wait!).
* During Loguetown, Usopp acquires a fresh set of goggles that become part of his standard outfit from then on, but are strangely never mentioned in dialogue. This is because originally there would've been a storyline where he had an encounter with an old rival of his father that lead to him acquiring the goggles, which was cut as Oda wanted the Straw Hats to set off for the Grand Line in Chapter 100.
* During longer musical numbers (especially in Season 2), the animation has a notable improvement. For example, you can see the pony's hair flowing and bouncing better, instead of a single object being stretched and moved around.
* During LOST's 4th season, some areas would regularly see a local commercial touting social security (or home security), just before the end of the commercial break. It was always just before the show resumed, and only the last second of the commercial was shown, making the word 'security' muttered by an aging woman the unofficial prompt to 'find your seats, the show is about to begin'.
* During Mac Gargan's stint as Venom, Gargan devouring people willy-nilly due to the symbiote's influence was, for the most part,
* During Makoto's story, Hazama finds Makoto and Tsubaki and talks to the latter about Jin, eventually bringing up that Major Kisaragi's here because Ragna the Bloodedge is. He advises that Tsubaki go down before the boys meet, and that since combat wasn't his forte, he'd sit this one out. Makoto refused to buy that last bit, and told Tsubaki to go ahead while she settles personal business.
* During M.A. Larson's explanation of why he despises the now infamous "Fame and Misfortune", one of his major complaints was how the higher-ups demanded that they, to use his own words, wrote all the characters to be assholes despite he wanting to use much more nuance and do a much more positive episode.
* During Marik's fifth "Evil Council" video, Bakura defects to Dartz' Evil Council, and Marik declares that
* During Marineford, after having several of his plans and contigencies foiled by Cross a frustrated Sengoku wishes for the pirate to end up in the deepest, darkest hell. Exactly where Kuma sent Cross for the two year training session, The Seventh Hell of Darkness, The Eternal Rotting Tree, Serpent.
* During Martin Luther King Day weekend of 2018, they held a marathon of
* During Matt and Karen's first date in season 2, Karen remarks that she grew up in a small town in Vermont where the most ethnic thing provided was French fries. In season 3, we see what Karen meant by this: her family ran a diner in Fagan Corners named Penny's place, named after Karen's late mom Penelope. The place is a failing business, with Karen's dad and brother running the kitchen while Karen handles waitressing and the books.
* During Mike Knox's short run in WWE, he attacked Rey Mysterio multiple weeks in a row. When asked what he had against Rey Mysterio, he said he didn't have anything against Mysterio. He was then asked why he kept attacking him, to which Knox replied
* During Miranda Lawson's loyalty mission, she confronts the asari leader of the Eclipse mercenaries who's trying to abduct Miranda's sister Oriana. Enyala proceeds to insult Miranda's rather revealing outfit, and if Jack(who hates Miranda) is the other squadmate, she will agree with the insults.
* During Modern Warfare 2, Captain Price disappears inside a Russian submarine,

followed by an immediate missile launch. Like in the first game, the player doesn't actually see
* During Montgomery's effort to grill Barry about his relation with Vanessa, people and bees should be making objections of relevance.
* During most of the nineties and some of the early two thousands, there was an Argentine tv show shown and Sundays that was called
* During most of the series, this seems to be the case of Kevin and Winnie in
* During most season 1 episodes' premieres and during early reruns of the show, the same promo for
* During MSNBC's coverage of the American missile strikes on Syria on April 7, 2017, while showing footage of the missiles being launched, reporter
* During much of history, in the Western world and elsewhere, long hair on women was ubiquitous to the point of being, to a greater or lesser extent, virtually an
* During Naruto's training with Killer Bee to control the Nine-Tails, he is made to fight his
* During NBC's pregame show for a Thanksgiving NFL game in 1985, sideline reporter Ahmad Rashad interrupted his analysis to
* During Nintendo's 2018 E3 trailer, Ridley was revealed as a playable character in
* During "Oceans Unmoving", Quartermaster Flipp complains about not getting any characterization... and is knocked overboard to certain death in the very next strip. Of course, it's subverted when, after the whole plot and the deaths of many major and minor characters, it's revealed that he didn't die, but instead is sent through time.
* During O-Chul's imprisonment in Xykon's tower, Redcloak interrogates O-Chul in front of several civilian prisoners he intends to throw from a tower if O-Chul doesn't cooperate. When O-Chul doesn't talk, he leaves, saying he's going to let them all stew in the knowledge that O-Chul didn't care enough about the people to talk before he comes back to do the actual torture.
* During October of 2004, Ray González, who had already been exposed as
* During Odd Summer, betting pools open on which sectors will get hit with a
* During Omatsuri Island, we are shown Zou, and its rulers Lord Nekomamushi and Duke Inuarashi. More of them were seen in the Enies Lobby arc. They quite like Soundbite's Abbott and Costello, to the point decided to organize a baseball game as a substitute for their usual battles. Their aide Wanda swears revenge against Cross for that very reason.
* During one ad break, the same Wal-Mart ad started and began the same ad break.
* During one Alliance quest in Spires of Arak, the traitor who was selling plans to the Horde turns out to be a drunk with a history of disciplinary problems, meaning he clearly wasn't even pretending to be a model soldier.
* During one battle in World War II's Pacific Theater, the medics doing triage at the field hospital came across a soldier with an entrance wound in his forehead and an exit wound at the back of his head. Upon hearing a medic declare him dead, the head-shot young man sat up and stated: "The hell I am!" Turns out the bullet hit him at a very shallow angle, traveled along his skull under the scalp, and exited at the rear.
* During one battle of the Revolutionary War, the dog of British Commander-in-Chief William Howe wandered into the colonial camp. Washington had the dog returned with a friendly letter, and Howe wrote a glowing assessment of Washington's character in his journal.
* During one convoluted scheme, Colonel von Strom, Lieutenant Gruber and Captain Bertorelli get caught by the Communist Resistance. René convinces the resistance leader not to shoot them and hold them to ransom because General von Klinkerhoffen will pay for their release. The German officers are worthy of one million francs. The Italian captain? Ten cans of beans.
* During one episode, Buttercup winds up covered head-to-toe in assorted waste, and everything refuses to associate with her until she bathes.
* During one fight with Venom, Eddie nearly rips up most of Spidey's costume during their battle. With Peter hunting for him, he doesn't have the time to switch

to a new costume and has to make do with his damaged suit. It ends up being a relief for him one point when he has to switch to his civilian clothes just so he can wear something that isn't torn up for a bit.
* During one game on Christmas Day against the Indiana Pacers, before the game Bird told Chuck Person that he had a Christmas present waiting for him. During the game, when Person was on the bench, Bird shot a three-pointer on the baseline right in front of Person. Immediately after releasing the ball, Bird said to Person, "Merry fuckin' Christmas!", and then the shot went in. This was no doubt inspired by Person (nicknamed the "Rifleman") stating prior to the game that "The Rifleman is Coming, and He's Going Bird Hunting."
* During one group stage in the 2019 Women's World Cup, Cameroon and New Zealand played each other for the chance to get out of the group - since some third place teams were allowed out, either of them would advance if they won (and ended up with three points), while neither would advance if they tied and both had one point. The two teams were tied at the 90-minute mark and tied for nearly all of the few minutes of stoppage time, only for Cameroon to score in the literal last play before the final whistle was blown.
* During one of Chandler's relationship crises, Phoebe accuses him of trying to do this. Joey then asks "You know about that?"
* During one of France's many wars of religion, the port of La Rochelle was besieged by the royal army but was kept supplied by their English allies. The royal army, commanded by the cardinal de Richelieu (
* During one of her Pierre dreams, Paige receives two chocolate bunnies the size of
* During one of his later stand-up specials, Katt Williams talked about how he was outraged by the racist jokes during the Flavor Flav roast, if only because he felt it was the higher ups using the largely black dais'
* During one of his many trials and tribulations as the Centauri Republic's ambassador to the station, Londo Mollari sarcastically says to himself, "Go be the Ambassador on Babylon 5", they said! "It will be an easy assignment!"
* During one of Joe's manic "I HATE LUCKY LUKE!" outbursts, a prison guard chided him for the rocks he was breaking as it was costing the penitentiary money.
* During one of Nodoka's visits late in the manga, Akane takes advantage of her doting on "Ranko" to get back at Ranma for saying her breasts are small. Akane talks Nodoka into taking Ranma shopping for a bra, gets his stained clothes replaced at a women's boutique
* During one of the anime filler episodes that added onto the Long Ring Long Land Arc, the crew is doing Red Light Green Light with Foxy's crew as part of the Davy Back games. Despite the fact that it is daytime, the pathways they are taking are surrounded by water, and there is no way to get lost whatsoever, Zoro
* During one of the Apollo missions, an ad for a convenience food (roast beef slices in gravy) was aired. It showed two servants working the roasting spit in a mediaeval castle kitchen, one proclaiming his dream that one day, roast beef will be available in little boxes. The other sneeringly replied "One day, a man will land on the moon!"
* During one of the chapter openings, Terriermon lists every single one of the nicknames in order to make up for the last chapter being rather short.
* During one of the debates between candidates for the 2012 Republican Presidential nomination, Governor Rick Perry declared, "And I will tell you, it is three agencies of government when I get there that are gone. Commerce, Education, and the... what's the third one there?" After an awkward pause (during which a few of the other candidates and the debate moderator tried to prompt him), he finally concluded, "I can't. The third one, I can't. Sorry. Oops."
* During one of the lunch encounters, you can opt to do flower-arranging with the
* During one of the OVA, where the students do rescue training, Uraraka is supposed to be "unconscious" while Iida plays a hysterical civilian. Iida's acting is so over the top that Uraraka struggles to hold her laughter in the whole time,
* During one of the "Spacecataz" segments, Oglethorpe and Emory have the following discussion after the Mooninites expose themselves at them:

* During one of the special missions, your reconnaissance wing discovers huge mysterious machines deep within Shivan space. When you destroy them, your commander notes that there are strange energy readings coming from the collapsing wreck and you should get away as fast as you can.
* During one of the world wars, a pilot was hit six times and managed to land the plane through the rush of sheer adrenaline. The story goes that he got out of the plane and basically died on the spot.
* During one of Will's dates with Matt, the narration notes that she keeps
* During one possible branching Makoto ends up sleeping with Youko, Sekai's mother, without realizing that she's about twice his age. When talking to Setsuna's mother later without knowing who
* During one quest Ryder has to find dock records for an angaran, but the dock manager of Kadara Port can't help them. He also can't tell them to look in the records computer over there, nor can he tell them the exact code needed to access the files.
* During one sack of the city of Rome, a Gaul general named Brennus offered to ransom the city in return for a payment of gold by weight. When some of the Roman tribunes noticed that the Gaul-provided weights for determining the ransom were fixed and dared to tell him this, he responded by unsheathing his sword, throwing it upon the scale as well, and telling them (presumably through a translator) "Vae victis" or "Woe to the vanquished."
* During one scene he ends up joining Ryusei for a marathon of a super robot anime, because after Ryusei's love interest who watched it as an excuse to spend time with him, but ended up really getting into it, and their CO who ended up watching it because she didn't want the other two alone in the same room with the door closed (Ryusei's love interest is her younger sister) and ended up analysing every battle in terms of strategic value, he didn't want to be the only one on their team who had no idea what Ryusei was going on about. He refuses to admit whether he liked it or not.
* During one skit, “All Guys Are The Same!,” for... research purposes, Colette asks Lloyd if girls like Princess Hilda are his type. Lloyd says he thinks Hilda is pretty, then says he thinks Colette is cuter, then proceeds to complement all the other girls in the party, angering Colette and making her think he’s just like
* During one stage of the Haven/Manticore war, the propagandists of the People's Republic of Haven tell their citizens that the Manticoran Navy regularly destroys the escape pods of Peep ships. It is a complete lie, but it creates a great deal of anger amongst the largely uneducated Havenites.
* During one story, he is attacked by C-list villain Will O'the Wisp. Spider-Man's response is "And you are...?" Wisp gives a rundown of every encounter they've had, to which Spider-Man repeatedly responds that he doesn't remember any of this. Subverted by Spidey's narration, where he reveals that he knows perfectly well who Will O'the Wisp is, and is just messing with him.
* During one storyline, minor villain Fusion (whose only power is the ability to create detailed illusions that can be thrown off once the other person realises what he's capable of) believed that he had successfully intimidated long-time Spidey foe Doctor Octopus into acting as his flunky as he tried to acquire the control device for an advanced tracking satellite, but once they have acquired the control device, Octavius reveals that he was actually feigning weakness and just letting Fusion do the hard work until he was ready to take over the other man's scheme.
* during one stretch of the race, Applejack falls in mud. Rarity comes out of the mud in Applejack's place, and runs the rest of the race with Sweetie Belle, who only sees a mud-caked pony and doesn't realize until the end that it's Rarity.
* During one test, an hour passed on the outside of SCP-728 while only 1 minute thirty seconds elapsed inside it.
* During one test a subject inside SCP-728 experienced two hours of elapsed time while only five minutes passed outside.
* During Operation Barbarossa, the Soviets experimented with training dogs to

associate the underside of tanks with food, then strapping mines to their backs and setting them loose when conducting counter-attacks against German panzer forces. Unfortunately for them, due to not having genuine German tanks to train them with (they used their own tanks mocked up to look like German ones - most of the following confusion likely came from the real deal running on petrol engines rather than diesel that they would have become familiar with the scent of), most of the dogs sought out their own tanks instead. The Germans caught on very quickly in any case, shooting all dogs on sight upon hearing of it.
* During Operation Desert Storm, some US Marine Recon units switched back to their retired M1911A1s as a sidearm, since their standard-issue Beretta M9s tended to jam up when exposed to sand. They even made a
* During Operation Market Garden, an American soldier recounted finding the remains of a destroyed British convoy along the infamous "Hell's Highway." The Germans had pulled out before they'd had the chance to loot the convoy, and so he and his buddies found the destroyed trucks filled with food items such as chocolate, biscuits, and, yes, brewing equipment. He then noticed that some of the equipment was set up, and came to the conclusion that the British had been ambushed when they'd stopped for tea.
* During Pain's attack on Konoha, Nine-Tails gets released and fights Pain. Art completely changes during the fight.
* During Paul's battle with Brandon, all of his Pokémon are beaten in one or two hits without getting any damage in, but Paul's Nidoking actually does rather decently against Registeel, eating a few attacks and getting a few super-effective hits in on it's own. Even Brandon noted that Nidoking was strong.
* During Pedro's fight with Tamago, the latter is going through a second transformation, but Pedro doesn't feel fighting a stronger form and wants to finish him off while in the middle of the transformation. The
* During "Peggy Hill: The Decline and Fall" Bobby is left stuck doing all the care for Cotton and Didi's new baby, thanks to Didi's depression, Peggy being in a full-body cast, and Cotton being...Cotton. After almost the entire episode, Didi innocently asks him to get her some lottery tickets. And he finally snaps.
* During PMD-B Tagg's group allowing the last two Super Mutants to get away doomed Necropolis by having the Master send his army to destroy the place in reprisal.
* During Pokémon League tournaments, it's against the rules for competing Pokémon and their trainers to pick fights with each other outside of official matches.
* During "Pork and Burns", Bart lists various objects in his room that he's not throwing out as they still give him joy, including a report card showing Lisa's only B grade, which brings him "super joy".
* During post-battle celebrations, Tormund Giantsbane jokes, "Which one of you cowards shit in my pants?"
* During preproduction for IV, there was concern about how much they'd have to make the characters worry about their wardrobes. They concluded that they could walk around San Francisco in full dress uniform and
* During presidential elections in the US (and mid-terms to a lesser extent), pretty much every channel that's running continuous election coverage will have this trope in play to track their latest updates to which candidate/party "is projected" (no one wants to take that
* During prohibition, a magazine held a contest to create a word for a person who illegally drank alcohol. Mr Henry Irving Dale and Miss Kate L. Butler both sent in the winning entry,
* During Prohibition, "bargain days" were the only way many courts could keep up with the alcohol-related workload. Everyone who agreed to plead guilty in exchange for the smallest penalty the judge could get away with would be scheduled for the same court date, and the formalities were zipped through to clear as many cases off the docket as possible.
* During Prohibition, there were numerous bootleggers who cut their teeth in the trenches of Europe.
* During Prohibition, Vino Sano and Fruit Industries, Inc. sold compressed blocks

of grapes marked, "
* During Q&As on the Palisades message board, Ken Lilly's standard response to questions about potential upcoming figures and accessories was "anything is possible." After the company folded, he admitted that the answer was usually "no" due to reasons of cost or complexity, but saying so straight-out would have been discouraging to future questions.
* During Queen Chrysalis' origin story, she went to a teller. The teller does several readings and repeatedly draws The Lust, alternately called The Hunger, which represents how Chrysalis is an
* During Ragnarok, how many steps backward will Thor take after slaying Jormungand before keeling over from the poison? The
* During Ray Romano's stand-up comedy special where he performed at Carnegie Hall, his first line expressed how happy he was to be there.
* During recording, as the piano faded Lennon turned the gain up so that it remained audible for longer.
* During Reggie Bennett's tenure in Japan in the 1990s, she eventually gained a younger sister, Jessica Bennett, portrayed by fellow American Jessica Soto.
* During Reika's final ritual, she watches the man she loved die right in front of her, which causes the Manor of Sleep to be engulfed in The Rift.
* During Repo Man's entrance at the Wrestlemania X-7 Gimmick Battle Royal:
* During Roxy and Calliope's conversation in a Dream Bubble, one of the stars in the background looks a lot more like the meteor that Rose, Dave, and the remaining Trolls are travelling on. Some time later, Rose starts dreaming in the same bubble and almost meets Roxy for the first time, only for Calliope to force them both to wake up.
* During Russia's Time of Troubles, the invading Polish Army was searching the countryside in pursuit of Tsar Michael I of Russia when they learned that he was hiding in a particular monastery in the woods. A local named Ivan Susanin offered a Polish detachment to guide them there, but being a supporter of Michael, instead took them so deep into the woods that none (not even Susanin) came out alive. (Actually, while Susanin is a historical figure, the wood story is most probably fiction.)
* during's agricultural section were on that one car, or if the disaster merely reduced their numbers below the point of genetic recovery; either way, it's described as an "extinction-level event".
* During said speech Nyarko remarks that her boss is unreasonable, naps all the time, and gets angry enough to destroy the universe if you wake him up — which reveals to fans of the
* during SBS broadcasts and then coordinate an attack with both them and the Kung Fu Pirates on 'Task Force Cerberus' before they can join the forces on Enies Lobby.
* During Scott's fight with Matt Patel, Ramona's First Evil Ex-Boyfriend, Scott tries to rattle Matt by asking about the time Matt and Ramona dated.
* During Season 0, even Yugi's spirit partner (the Pharaoh) could easily be interpreted as evil, or at least a
* During Season 19, Mr. Garrison left South Park to run for President of the United States of America, becoming a
* During Season 19, PC Principal intimidates a lot of people for the pursuit of social justice and has gone as far as assaulting people who say something he considers insensitive (like savagely attacking Cartman because he used the words "capiche" and "spokesman"), and he's never gotten any retribution for it. Come Season 20, he is forced to live with the fact that his actions partially caused one of the most politically incorrect characters to become president, who proceeds to rub it in his face and force him to suck his dick.
* during Season 23 to sabotage the actress and producer. The team's 'continuity advisor' Ian Levine hated the character so much that he quit over her inclusion; most fans today regard this event as one of the reasons for the show becoming more creatively interesting for its last couple of seasons.
* During season 2, Bojack and film director Kelsey Jannings try to make a gritty, realistic and tragic movie about the life of the racehorse Secretariat. The studio

eventually develops some reservations about the movie, leading to Kelsey getting fired and a script rewrite making the movie more sentimental and optimistic with a new director attached. This is portrayed as a creatively bankrupt decision made entirely with money and audience accessibility in mind, with the new direction being treated as trite and hackneyed compared to the honest, emotionally weighty movie that Bojack and Kelsey wanted to make. Though things become a bit more mixed when the movie is released and it's a lot better than Bojack was expecting.
* During Season 2, Liu has become the undefeated champion of Megalonia for five years, having first won the title and defended it twice with no losses on his record.
* During season 4, the Good Place Committee return, and this time they
* During season 5, the Knights of Byzantium start off as possibly ally or enemy (attack Buffy, but also beat up Glory's
* During season 5, the set of the bridge was damaged after a fire, so while it was repaired, they quickly assembled a script that allowed most of the action to take place away from the bridge, "Bride Of Chaotica!", a holodeck story that was a
* During season four, we flash back to the time Mr. Quinlan tried to kill The Master in Victorian England. He fails and The Master threatens to go after a woman he has a romantic relationship with and her daughter.
* During season twelve Reid is sent to prison for a crime he did not commit. There he meets Calvin Shaw, a former FBI Agent who murdered his confidential informant. He claims that she was
* During season two: "You will get your Libby episode. This season." They also claimed that a Rose and Bernard episode would only happen in a subsequent season. Libby gets killed off before having her own episode, while Rose and Bernard's episode shows up earlier than expected. However, Libby does get a flashback at the end of the Hurley episode
* During Series 5, Amy would occasionally bulge her eyes and pucker her mouth — known to fans as the :I face.
* During "Shall We Play a Game?", positive shots flash red, white, and blue (representing America), while negative shots flash red and yellow (representing China).
* During "Shanghai Moon", set in space, when he discovers his momentum hampered by the lack of gravity, he adjusts his attack names accordingly. "Tiger Prowls! ...through ... pudding...?" (slow motion punch)
* During Shimousa, a single swing from one of Muramasa's swords is enough to completely splatter the entire upper half of Lancer Purgatorio's body, forcing him to regrow everything from the waist up aside from his hands.
* During Shirogane's reelection, Kaguya gets Hayato to drop out of the race with a
* During "Silence in the Library"/"Forest of the Dead", the minds of people killed by the Vashta Nerada (or any other means within the library) are uploaded into a virtual world to live in while they cannot be saved in the real world.
* During sneaking sections, enemies will only notice the player character, not any AI escorts or party members. Appropriately, the AI sneaks around corners as well as a player can, but if you're careful, you may notice a few times when the bad guys ought to be noticing the escorts but don't.
* During solar flares, wormholes have a tendency to travel back in time, with the strength of the flare determining how far back/forward in time the wormhole can go. Strangely, the first time this happened, SG-1 were rematerialized without a stargate, something thought to be impossible. This forms the plotline of several episodes as well as the
* During some boss fights, the characters will go up to Level 3 with only one orb container.
* During "Something Blue", Spike gives Buffy his gothic punk ring after Willow's "My Will Be Done Spell" makes them get engaged, since it's the only one he
* During some unspecified time in his early childhood, the macho, self-assured protagonist wet the bed. And his father took a picture, too, which he later pulled out while Ranma
* During Sonic's showdown with Metal Sonic, he attempts to do some kind of paradox

by saying the now-famous line:
* During Spain's War of Independence, the city of Saragossa suffered TWO sieges by the French Army. The first (1808) ended with a Spanish victory; The second one (1809), historically noted for its brutality, ended with a French victory. Saragossa was reduced to 12,000 people from its pre-second siege population of 100,000.
* During Spider-Island, Pete's then love interest Carlie Cooper got spider powers with everyone else. Though her physique hadn't changed her spider strength is still evident without demonstrating it because her muscles were all rock hard.
* During Splatfests, there are percentage rankings for both team popularity and team performance. Typically, the popularity percentage is usually inverse to the performance percentage, with some of them overlapping, but the problem lies in the performance percentage. The points rewarded for performance percentage is nearly
* During "Squirrel in the Classroom", when Raven gets suspicious of Grace's memory, he suddenly realizes something, withdraws his objection, and uses this trope to explain his previous anger at Grace.
* During Stanley Yelnats's great-great-grandfather's story, Elya (the grandpa) is the poor one and he's up against a fat slob rich guy
* During Stilt-Man's funeral, it's revealed that he and Princess Python from the Circus of Crime had been married. Later
* During sufficiently large salmon runs in Alaska, grizzly bears love to eat
* During Super Bowl 50, there was a commercial that was advertising the website, Wix, but at the same time promoting the movie,
* During supper, Elly suspiciously asked Michael if he was feeding Farley under the table. Michael said he wasn't. He was actually feeding Farley by surreptitiously tossing food scraps behind his chair.
* During Tahu's purification, Lewa uses Tahu's Magma Sword and activates its fire power, when the fact that most tools can only channel the power of their user has been established in the very first comic. Lewa's power is air, so the Magma Sword would have been spewing wind rather than heat.
* During Ted Cruz's unsuccessful 2016 presidential campaign, internet users opposed to the Texas senator jokingly accused him of being the Zodiac Killer, based on noted physical similarities between Cruz and a police sketch of the killer; the joke became popular enough to be referenced on
* During Texas's brief stint as an independent republic, the Texan dollar (colloquially the "redback") became so inflated that even the Texan government wouldn't accept it for payment of taxes, insisting instead on U.S. dollars, gold, or silver.
* During that campaign season, many of the Democratic characters on the show admitted to want to vote for him, especially during the debates with the Democratic presidential candidate Matthew Santos.
* During that very incident, Roy also insisted Belkar not know. Subverted in that Belkar knew it was Roy all along and was comfortable enough with his masculinity to hit on Roy purely to mess with him.
* During the 108 years of heartbreak the Cubs endured, seasons would end in two ways. Being obliterated out of the Playoffs (2007, 2008, 2015) or being very close only to choke in the end (1969, 1984, 2003). What better way to end the century of heartbreak by being on the other side of the table, the team that many people count out after being down 3-1 in the World Series against the Indians, only for the Cubs to come all the way back to win the Series.
* During the 12th season, Tucker, Grif, Simmons, and Caboose are given their own squads, and
* During the 13th Black Crusader, Abaddon the Despoiler launches a Blackstone Fortress towards the fortress world of Cadia, destroying the planet.
* During the ‘’Kitchen Irish’’ Arc, one of the SAS soldiers Frank works with is the son of a soldier murdered by one of the IRA members they're chasing.
* During the 1453 Siege of Constantinople, Venetian surgeon Niccolò Barbaro described an attack by the Janissaries where they suffered heavy losses, but would

not leave their dead behind.
* During the 17th Century, many people believed that only a silver bullet could kill a king.
* During the 18th century Age of Liberty in Sweden, a series of events led to a name stamp (with the king's signature) in the hands of the parliament legally filling in for the king when he didn't want to co-operate. The only thing hindering it being called a literal rubber stamp monarchy is that it isn't entirely certain the stamp was actually made of
* During the 18th century hunt for the Beast Of Gévaudan, Jean Chastel reportedly loaded his gun with silver bullets. However, in this case the bullets were not 'special' because they were made of silver, but because the silver was obtained from a blessed medallion of the Virgin Mary (the creature was thought to be demonic in nature).
* During the 18th century, many new agricultural practices were invented and spread from Britain throughout the rest of Europe. Leading to a population boom, and after the new people came of age, to great changes in society - cottage industries in Britain, preparing the Industrial Revolution, and the French Revolution on the continent.
* During the 1920's, Piggly Wiggly faced a decrease in business in Florida, which forced the chain's owner to sell his stores. A businessman in Atlanta purchased them, but chose not to visit the stores. One of the chain's managers, George W. Jenkins, decided to visit the new owner personally so that they could discuss the future of the business. But when Jenkins got to Atlanta, he was told the new owner was unavailable to talk due to a "critical business consultation". Jenkins overheard the new owner discussing his golf game over the phone, which only enraged him. Jenkins returned to Florida and started his own business, Publix Supermarkets, in order to compete against the new owner of Piggly Wiggly.
* During the 1940s, the Russian born wrestler Maurice Tillet was starting to get over big in the United States as The French Angel. He was billed as "The World's Ugliest Man" and pushed as nearly unstoppable for two years as champion of the Boston territory (Known as The American Wrestling Association but unrelated to
* During the 1950s/60s, on weekdays, the BBC used to broadcast a midday show with a live audience. One of the regular guests was a stand-up comic called Ted Lune, who always finished his act by reading out a letter from his mother. The letter relied heavily on all different kinds of reading-out-loud tropes, and invariably finished with an inversion of this particular one; for example, "Mrs Jones next door has bought six pigs. She keeps them in the back yard and there's an awful smell from your loving mother." Media-switch version
* During the 1950s, MGM's cartoons used the plot of "a character constantly runs out of the building to avoid waking up his grouchy master". This occurred in
* During the 1950's, the comic book industry was nearly destroyed. Why? A psychiatrist named Fredric Wertham (not entirely a bad guy, mind you, as he spoke out a lot against school segregation) noticed that a lot of the troubled boys he worked with described "reading comic books" as their favorite activity. Failing to take into account that pretty much every young boy at the time read comic books (not to mention failing to ask what
* During the 1960s-1970s, Madame Alexander released an 18" Vinyl Elise fashion doll
* During the 1960s and 1970s, at the University of Nebraska-Lincoln, fans would often throw oranges onto the football field after the first Nebraska touchdown of the game. Unlike most other examples on this page, this was a form of applause; at the time, Nebraska was part of the Big 8 conference, and the Big 8 champion always played in the Orange Bowl. Oranges on the field were a way of saying "We're going to the Orange Bowl!" Oranges on the field also caused a mess, especially after Nebraska installed artificial turf in 1970, and for at least half the season were likely to be frozen solid (thanks to Nebraska weather) before they were thrown, with obvious risks. The university finally managed to convince fans to just stick with the traditional balloon release to celebrate the first touchdown.
* During the 1960s and 1970s, the Bonanno family split into various factions,

mainly over who should become boss. This began when family namesake Joe Bonanno attempted to take over the Commission in 1964, but was forced to step down, triggering a brief mob war over his succession. The Commission then intervened and anointed Phillip Rastelli as Bonanno's successor, but this was challenged by Carmine Galante, who felt he should be the boss, but was assassinated by Rastelli loyalists in 1979. The Bonannos almost split up again in 1981 when several Galante loyalists attempted to avenge his death by taking over the brugad, but were wiped out by Rastelli backers who were tired of people defying his authority.
* During the 1960s, it was routine for US music labels, when importing UK albums, to remove a few songs. When they'd accumulated enough extra songs, they'd be released as an "extra" album.
* During the 1960s, off the Orkney Islands, was one source of inert steel salvaged at the time. Nowadays the background radiation level is lower and there's now numerous types of air filters that didn't exist in the 1960s, so this usually isn't an issue.
* During the 1961 putsch in French Algeria by military officers wanting Algeria to remain French, most conscripted soldiers, after hearing Charles de Gaulle ordering them to absolutely disobey to mutineed officers, mutinied against the putschists. In at least one case, an unit arrested their officer!
* During the 1970 NBA finals, Willis Reed played in game 7 with a torn hamstring, an injury which would plague him for years and lead to an early end to his career.
* During the 1970 October Crisis, when asked how far he would go to combat the FLQ
* During the 1970s and 1980s, Converse Chuck Taylor All-Stars had other wannabe brands that almost (but not quite) resembled the original: Payless Shoe Stores had Pro Wings high-tops that (except for the heel patches) could be considered a low-budget version of Chuck Taylors. Kinney Shoes, a now-defunct shoe store chain, had Stadia hightops, which like Payless's Pro Wings hightops, had different heel patches. Both of these were made of canvas and had the same basic lace-up scheme. By contrast, modern dollar convenience stores (like Family Dollar, Dollar General, et al.) have inexpensive brands sold for about $10-$15 that have honeycomb soles instead of Converse's diamond patterned waffle soles and no heel patch emblems, not even coming close to resembling Converse high-tops.
* During the 1970s, Cap became disillusioned by the atmosphere of political corruption, unjust war and the general jaded mood of the country. For a time he abandoned the stars n' stripes for an all-black, millitaristic bodysuit, and called himself "Nomad: The Man Without a Country."
* During the 1970s, the then called Plymouth Arrow (now called Mitsubishi Lancer A70), used the Harry Nilsson song "Me and My Arrow" from
* During the 1970s, Wonder Woman went through a big makeover, which also didn't last too long. She sometimes wore a fringed jacket and pants and sometimes wore a minidress. Both of these still managed to show a lot of leg, because of the shortness of the dress and the fact that the pants had large circular holes in them running down the outside of the leg.
* During the 1976 Soviet Red Army vs. Philadelphia Flyers exhibition
* During the 1978 Korvac saga, Korvac and Carina fuse their bodies into one in a very sexual manner, the narration describing Korvac "as he softly slips between the delicate folds of Carina's soul".
* During the 1980s Cola Wars, Pepsi fielded an ad with variation of this centered around a
* During the 1980s, the beginning of the drunk-driving-is-wrong awareness era (thanks to MADD and other organizations), bars would often install breath-alysers as a public service, so that patrons could know "when to say when." The practice was discontinued when people started using the machines to adjudicate who's-the-most-drunk contests.
* During the 1980s trivia craze, many giant books of "facts" and "trivia" were published aimed at inquisitive children. Some of the information within them was true; some of it was
* During the 1980s, WDIV in Detroit would broadcast Detroit Tigers baseball games, and at the end of the broadcast would feature an animated version of

* During the 1985 World Series, the base of the trophy had allegedly been painted red for the heavily favored St. Louis Cardinals. It had to be repainted blue for Kansas City Royals, who won the series in seven games.
* During the 1986 arc where Garfield and Odie run away from home, Jon tries to reassure himself by saying "t's not like they're family or anything". Then the TV plays an "It's 10:00, do you know where your children are?" announcement, and Jon immediately breaks down crying.
* During the 1990s and into the early 2000s, Hasbro made figures based on several DC Comics, including the
* During the 1990s, when answering machines came down in price and became more common in American households, several companies released novelty answering machine greetings. Standard comedy skits and parodies of famous characters were used in greetings, in lieu of the standard, "Hello, you've reached
* During the 1994 Olympics, skater Nancy Kerrigan was waiting backstage for gold medalist Oksana Baiul for the medal ceremony to take place. After having skated the best performance of her life, not to mention having come back from a disastrous year and a vicious attack, Nancy was already irritated at having lost by an uber-slim margin (a mere tenth of a point gave Baiul the gold medal over her). Further annoyed both by the delay and then upon being told that the delay was because Baiul was putting on more makeup (wrongly, as it turns out, the delay was because the Ukrainian flag and a tape of the Ukrainian Anthem could not be found
* During the 1996 U.S. presidential election between Bill Clinton and Bob Dole, Dole gave a campaign speech in the which he reminisced about what he viewed as the glory days of the post-WWII decade of
* During the 1998 home run chase between Mark McGwire and Sammy Sosa, they gave off the image of being close friends united in a race for history—when McGwire broke the home run record, Sosa came and gave him a big hug. Years later they both admitted that they never really talked to each other at all outside of happenstance meetings and pre-arranged interviews.
* During the 2001 Japanese Motorcycle Grand Prix, which was held in Suzuka Circuit, rising motorcycle phenom Valentino Rossi flipped the bird to then-rival Max Biaggi after the latter attempted to force a bike crash on him by forcing him off the gravel. Rossi was mentally disoriented by this interference, but eventually he caught up to his rival and then flashed the gesture as a
* During the 2004 Olympics, Russian judoka Dmitri Nossov lost the semifinal, cutting his eyebrow muscle and seriously injuring his left arm. He still won a bronze medal
* During the 2006 World Cup Final, the Italian player Marco Materazzi insulted French player Zinedine Zidane. Though the incident was caught on camera, there were no microphones pointed at the pair at the time. The insult was apparently so vile that Zidane headbutted Materazzi and was ejected from the game, which France ultimately lost. This led to enormous speculation about what could have caused this reaction; popular consensus holds that Materazzi
* During the 2008-2009 season La Liga home match against Getafe, which is a record length in the history of La Liga.
* During the 2008 American Republican primaries, candidate Mike Huckabee showed a group of reporters a negative ad targeting one of his rivals, and announced that he had decided not to air it. The ad probably got much more attention than if he'd just run it normally. This sort of thing is relatively common in politics, though this example is worse than most. Remember, buying ad time costs money, but if the news airs it for you, it's free.
* During the 2008 Christmas season in the UK, a leisure park in the New Forest advertised a "British Lapland" complete with real log cabins, huskies, reindeer, a Christmas market, a nativity scene, and a tunnel of light. In reality, once visitors paid the £25 entry fee, they found that
* During the 2008 housing recession, many newspapers went out of business, with most cities only having one or two active newspapers lines, and many paper companies still have trouble as many people didn't resubscribe when the economy improved. The

* During the 2008 presidential election, political comedians often made these sort of jokes about John McCain. They became such a meme that
* During the 2008 Summer Olympic Games in Beijing, local crowds took every chance to chant "CHI-NA! CHI-NA!" in English.
* During the 2009 Bragging Rights DX promo where they bashed Smackdown's team. Triple H once again spits his water out when Shawn whispers to him, he blurts out what he says right after: "He's banging
* During the 2009 Bulls-Celtics playoffs during game five, Rondo fishhooked Brad Miller's face as Miller went for a layup. Rondo's hand was three feet away from the ball, and all Rondo got was a personal foul. He should have drawn a flagrant one at least. Official review upheld the decision. (Because to do otherwise would be like going on national television and saying, "Bulls, we may have cost you guys the game.") Can be seen
* During the 2010 Australian Federal Election, Peter Van Onselen of Sky News called the election for Labor at 8:01pm, before acknowledging three minutes later that this may have been premature - a good choice, since four hours later no one had a result. For this, Andrew and Chas of
* During the 2010 CFL season in a Week 18 matchup, the Alouettes were tied with the Toronto Argonauts 30-30 with 9 seconds left in regulation. Either a successful field goal OR Toronto failing to get the ball out of their end zone should the field goal attempt go wide, scoring a single, would give Montreal the win, otherwise the game would go into overtime. Montreal's field goal attempt does go wide, Toronto kicks the ball out of the back of their end zone, Montreal receives the punt at Toronto's 22-yard line, then punts it back into Toronto's end zone, Toronto tries to kick the ball back out of their end zone while it's on the ground, however, Montreal swats the ball near the goal line and recovers the fumble for the game-winning touchdown. This
* During the 2010 Naismith Memorial Basketball Hall of Fame induction ceremony, in which the Dream Team officially entered the Hall as a unit, Larry Bird came to the pedestal and said that the team was "a cast of characters and different personalities... then
* During the 2010s, the "Big Four" became the "Big Six" with the inclsuion of Manchester City and Tottenham Hotspur and out of the clubs, only Tottenham Hotspur has not won the league yet.
* During the 2010 UK general election, the makers of Marmite threatened legal action after the super far-right
* During the 2010 World Cup, Germany's coach Jogi Loew wore the same "lucky"
* During the 2010 World Cup round-robin match between the United States and Algeria, the United States needed a win to advance. The score was tied at 0-0 going into stoppage time in the second half. Landon Donovan scored the winning goal for the United States during stoppage time, causing
* During the 2011/2012 season, the Clippers eased past the Memphis Grizzlies in the 1st round, only to be swept by the San Antonio Spurs in the 2nd round.
* During the 2011 regular season, the St. Louis Cardinals were 10 1/2 games back from the wild card spot in the standings when
* During the 2011 US national budget meetings, former Senate Minority Whip Jon Kyl spoke in favor of defunding Planned Parenthood by claiming that "over 90%" of the organization's services were abortions. After it was revealed that only 3% of their services (and 11% of visits) were abortions, Senator Kyl claimed that he was exaggerating and that his claim was "not intended to be a factual statement".
* During the 2012 election, many believed that the Republicans wanted to ban tampons, based on a satirical article on the Freewood Post.
* During the 2012 National League Division Series, the San Francisco Giants were already down two games against the Cincinnati Reds. Before the third game,
* During the 2012 Presidential Election, there were times when it seemed like Mitt Romney was ahead enough in the polls to win the Presidency from
* During the 2012 Super Bowl, Marvel Studios released a trailer that promised "an extended look". The next scene was
* During the 2013 NBA Draft, David Stern was booed mercilessly by the crowd. Being

that it was his last draft, he encouraged the response and a couple times outright trolled the crowd. When he came up to announce Utah's pick, he said,
* During the 2013 siege of the Westgate Shopping Mall in Nairobi, Kenya, a four-year-old boy stood between his wounded mother and one of the gunmen, calling him "a very bad man".
* During the 2013 Stanley Cup playoffs, Ottawa coach Paul MacLean accused Montreal players of trying to hurt his players. One Montreal player responded by saying he "doesn't care what that bug-eyed fat walrus has to say." At MacLean's press conference the next day, he addressed that remark: "Bug-eyed? I've never been called that before, that's a new one. Walrus? Nah, that's too easy
* During the 2014 outbreak, families of Ebola victims in Liberia hid their sick and dead to prevent them being
* During the 2015 Academy Awards, Graham Moore, the winner of Best Adapted Screenplay for
* During the 2015 holiday season a Time Warner Cable ad featured a family that wanted more from their home Internet named —
* During the 2015 IWA Deep South "Softcore Cup", one of the commentators advised a man in the audience who accepted
* During the 2016 Fort McMurray wildfire in Alberta, Canada, one resident witnessed the destruction of his home via the
* During the 2016 occupation of an Oregon wildlife preservation facility by a pro-Second Amendment militia, the occupiers repeatedly asked for snacks and supplies from those who supported them. Instead, they were mailed sex toys, glitter, penis-shaped candles, and other such paraphernalia. John Ritzheimer filmed a video of him unboxing the "supplies" and while he did throw everything off of the table, he did remark that he found the Bag of Dicks (a bag of gummy penis-shaped candies) pretty hilarious.
* During the 2017-18 NHL season, Pittsburgh Penguins fans were quick to forge camaraderie with the Vegas Golden Knights, a new expansion team. This is primarily due to the Golden Knights acquiring goalkeeper Marc Andre-Fleury, who was a fan favorite back when he played for the Pens. The Knights were quick to reciprocate after the Pens made a touching tribute to Fleury when he returned to Pittsburgh. During their surprise run for the Stanley Cup, the Knights also received a lot of support from Pens fans, primarily because they were facing Pittsburgh's rival, the Washington Capitals.
* During the 2017 Nintendo World Championships, though not at E3, one announcer noted in the
* During the 2019 Hong Kong protests against China's attempts to control the city, numerous viral videos were made showing protesters responding to police attempts to use tear gas against them by pouring bottled water on the canisters or sticking them in buckets of water. Both ways turned out to be highly effective means of rendering the canisters harmless and the practise has since become popular for demonstrators worldwide.
* During the 2019 Hong Kong protests against the Beijing-backed government there,
* During the 2020 coronavirus pandemic, a Belgian supermarket generated buzz by proposing a sale consisting in "buy two Corona [the beer brand], get one Mort Subite for free". While it refers in context to a Belgian beer brand, "Mort Subite" literally means "sudden death" in French...
* During the 2020 Presidential election, there was a minor but recurring controversy that the Democratic candidate,
* During the 2020 Tokyo Olympics, Simone Biles of the United States had a rough day in qualifications and came down with an unfortunate case of the "twisties"
* During the 2021 World Juniors Hockey Championships on TSN in Canada, ads for
* During the 21st century Lionel Messi and Cristiano Ronaldo became basically the central focus of the football world.
* During the 26th century, "Dragons" is a racial slur for Draconians, a reptilian race the humans were at war with.
* During the 2nd Indo-Pakistanese War (1973), an Indian MiG fired a missile at a Pakistani Mirage IIIE, but the missile shot down the MiG's wingman.

* During the 3.5 Edition, Wizards of the Coast decided to release a supplement called
* During the 4th Succession War, Hanse Davion famously used a chemical weapon known as Green Smoke against the Capellan Confederation. Green Smoke is harmless to humans, but it's extremely corrosive against the Triple Strength Myomer that the Capellans were using to give their Battlemechs improved speed and melee combat ability. And the only reason they were using it was because it was a
* During the '50s and early '60s, West German TV would experience mysterious "Tonstörungen" (sound difficulties) whenever they were transmitting sports events of any kind - more precisely, whenever the East German anthem was played during the medal presentations.
* During the 60s and 70s, many TV actors would at times get extra work through dubbing.
* During the 70s-80s and even to an extent today, the Fender Stratocaster was a victim of frequent awful duplicates and clones until Fender took matters into their own hands and began to produce Squier guitars, budget-priced Japanese-made Fender products.
* During the 70s Mexican TV producer Roberto Gomez Bolaños (AKA: "Chespirito") used the same pool of actors on all of his shows, usually playing similar characters. This was particularly noticeable on
* During the 70s, the BBC would air a Compilation Movie of a previous serial at Christmas, These would then be used as replacement programs if bad weather had canceled a live sports game.
* During the 70's there was a commercial selling a classical music album based on this trope.
* During the 717-718 Arab Siege of Constantinople, the Arabs were certain to be able to attack the city from the sea, thus bypassing the invincible ground walls and having to deal only with a weak sea wall, thanks to the numerical superiority of their navy, and failing that they would have still been able to leverage their numerical superiority to blockade the city and starve it out. What they couldn't have accounted for was that
* During the 74th Hunger Games, Glimmer goes to great lengths to give Finch the District Five girl known as 'Foxface' in canon- a Viking-style funeral after she's killed by Marvel's spear. During the ‘funeral’, Glimmer privately admits to Katniss that she thinks that Finch could have excelled at the Academy as she had the spirit to be a great Career with training, not even crying when she was stabbed through the chest, where Glimmer had seen some Academy trainees bawling over far more minor wounds. While on her Victory Tour, Glimmer addresses District Five to tell them to be proud of Finch, who showed Glimmer that just being smart could be an asset.
* During the 7th Doctor adventure "Battlefield", the Doctor finds a note from his future self in what was supposed to be King Arthur's tomb warning that Morgaine was going to summon an
* During the '80s and '90s, The Sharper Image was a modestly popular electronics company specializing in appliances such as jogging watches. However, the company had its "big break" during the
* During the 80's, several DC Comics titles would feature "backup stories" in the last five or six pages of each issue. Most notably, the
* During the 80s, the Miami Hurricanes reveled in being the college football team America cheered against.
* During the 80's there was a fellow by the name of Michael Mills who had a radio show devoted to finding Satanic messages in rock songs. Among the bands he accused of corrupting its listeners were the usual suspects like Kiss and Led Zeppelin but he also included a few head-scratchers like ELO, Bow Wow Wow, and of all people, Dan Fogelberg.
* During the 80's, there was a hysterical panic that went around about Satanic ritual abuse that was supposedly happening in preschools and day care centers. It's almost certain that nothing of the sort happened and children were interviewed in misleading and coercive ways. The most egregoius case would probably be that of Ray

Buckey, who was charged with hundreds of counts of sexual abuse and spent five years in jail before being granted bail. He was cleared of all charges. The trial of his and his co-defendants was the longest and most expensive in California history
* During the 80s, the villain Arthur Light was retroactively established as having been the
* During the 8-bit era, the British software house CRL released a number of horror
* During the 8-Player match on Bowser's Enchanted Inferno, after a star gets bought, it moves right in front of Team Mollusk... only for the team who just bought the star to land on a Happening Space that changes its location.
* During the 90s, Cap had an encounter with a few of the X-Men in a scuffle which saw him getting frozen from the waist down by Iceman. The move did
* During the 90's, many puzzle games tried to emulate the success of
* During the '90s, the Melbourne Tigers in Australia's National Basketball League seemingly kept a player named Brett Rainbow on their list exclusively for slam dunk competitions, never playing him in an actual game.
* During the 90s, Vampirella was allied with the Danse Macabre, an organization that fought supernatural threats with considerably more extreme measures. They were unfortunately wiped out by the villainess Nyx who killed Vampirella herself.
* During the abortive scattering of her mother's ashes, Tanya starts telling a bunch of complete strangers all of her issues with her mother.
* During the absolutely silent, very tense sequence where Ethan breaks into the vault at Langley in
* During the Action Prologue, Poe gives the First Order Dreadnought a nasty case of "Trench Run Disease", hugging its hull and picking off its defensive guns to clear the way for the Resistance's fleet of heavy bombers. When Hux asks why Poe's X-Wing isn't taken down, Captain Canady retorts that the lone starfighter is too small and agile for the surface cannons to intercept, and bemoans that his crew should have sent out fighters instead of thinking they're invulnerable.
* During the "Acts of Vengeance" crossover, Dragon Man is sent to destroy Spidey, who engulfs him in flame. Fortunately, he was possessed by the power of Captain Universe at the moment, so he's left mostly unharmed, though stark naked due to his outfit being reduced to ashes. He simply uses his new power to make a new outfit instantly appear. This ends up happening to him a second time during the fight as well.
* During the actual anime, in the "Waking the Dragons" filler arc, Kaiba decides to go pay Dartz a visit. Since he's in a hurry he and Mokuba grab a random car from a car lot. When the salesman protests, Kaiba just writes a 500,000 dollar check for it before driving it out of the lot without giving him a chance to respond.
* During the Africa Korps strips, the Sergeants tries to lecture the newbies on edible cacti and picks up and eats one which he claims its called "Camel Cactus" due to its resemblance to camel's poop. Cue to the camel handler:
* During the aftermath of the 2000 presidential election, correspondents at
* During the aftermath of the tornado in the 4th season Gabrielle causes havoc in Carlos's accountant's wake while trying to find the right documents of her husband's foreign bank account.
* During the afterparty for the Chunin exams in chapter 31, Shizune announces that she's pregnant with Shisui's child and also reveals their engagement. The actual wedding is never shown as it happens during the
* During the "A Function of Firepower" arc, those dark matter entities create a micro-supernova in the Xuvoth system, home to a world with a population of three hundred billion. Petey immediately uses precision targeting to take out every single teraport denial system in the system, then deploys a device that had been referred to as a "soulgig" and teleports the brains of the people out - essentially killing them in order to ensure that there is something to revive them from later.
* During the age of American westward expansion, a number of high-ranking officials involved — most notably President Ulysses S. Grant, General William T. Sherman, and William "Buffalo Bill" Cody — set deliberate measures in place to kill as many American bison as they could, with the stated goal of making

the Great Plains as inhospitable as they could to the traditional Native American way of life, which had relied heavily on bison hunting. One colonel reportedly encouraged a hunter that "Every buffalo dead is an Indian gone."
* During the age of piracy, many governments would hire privateers, pirates who agreed to attack ships that belonged to rival countries and give their sponsors a cut of their loot. Queen Elizabeth I was noted for her high opinion of privateering, famously employing an entire military branch of pirates known as the "Sea Dogs" to harass Spanish vessels. The most famous Sea Dog was Francis Drake, who was knighted by Elizabeth for his actions and was made a vice admiral in the English fleet.
* During the Age of the Heroes, Elenei, the daughter of the sea god and the goddess of the wind. She gave her maidenhead to Durran Godsgrief,
* During the age while armies still utilized campfires at night, it was not uncommon for those to be used as a means of deception. Merely looking at a light source at night temporarily ruins the eye's low light adjustments, meaning that while looking at such a campfire (or for that matter any other light source at night), it was impossible to actually see the people (if any) that existed around it; only the light source would be visible. Armies got pretty creative with this back in the day, from setting up false camps (the enemy won't know there's no one by the fire until it's too late), to lighting a minimal number of fires to hide their number (sometimes going as far as just one big fire; good luck guessing how many people are sharing it), to ordering the camp to make several times its number in flames. A cunning general may even combine the various methods, essentially rendering the enemy's attempts to scout his position at night futile or downright counterproductive. Even in warfare, there are
* During the airing of the first four episodes of the final season of
* During the Akatsuki Invasion arc, Kakashi confronts Obito, who tells him point-blank that while Minato was a great ninja, he failed them as a teacher and protector. In the aftermath, Kakashi talks to
* During the Alabasta arc, when Usopp and Chopper finds out that the opponents they're fighting are using a
* During the album's promotion cycle, the first single ends up as the higher-charting for the novelty factor, but the follow-up (if not one of the follow-ups) ends up being the one that gets more recognized.
* During the ambush of Rommel's attacking force, another pair of bombers strafes the location of General Bradley's command post.
* During the American Civil War, Nathan Bedford Forrest did this a lot. Until recently, he was honored for that and other such things with a bust of himself in the Tennessee State Capitol.
* During the American Civil War, this was actually very common. Officers, whether actually in the cavalry or not, had the trappings of cavalry due to European military tradition. As such, while the rank and file had rifles with bayonets, officers were outfitted with revolvers and sabres. To see a cinematic example of how this can be both effective and awesome in the context of warfare that sits at the transition between pitched battles on open fields and WWI trenches, see
* During the American Great Depression, hawking pencils or apples was an equally common stock job in media.
* During the American invasion of Iraq, Iraqi Information Minister Mohammed Saeed al-Sahhaf went on television to proclaim that American troops were stalled outside of Baghdad and killing themselves by the hundreds. As he insists that there are no American tanks near Baghdad, the sound of American tanks firing as they advance up the streets can be heard in the background.
* During the American presidential election of 1800, Aaron Burr nearly worked himself to death due to
* During the American Revolutionary War, the British forces under Cornwallis were holed up in the city of Yorktown. When a French fleet blockaded Yorktown and prevented the Royal Navy from re-supplying the British forces, the troops were forced to surrender when the Continental Army struck.
* During the animated cinematic trailer for the game's 9th Edition, a Ultramarines

Assault Intercessor Sergeant makes his entry into the scene by impaling a Necron through the chest with his chainsword, saving the Sororitas Sister Superior that it had been duelling with.
* During the Apocalypse arc, the villain tries to do this to Magneto, but he sees through it, and with Mystique, had a back up plan just in case. "I never trusted you, Apocalypse. I'm not a fool."
* During the Apollo 13 disaster, the crew could see vapors venting from their damaged spacecraft. Of course, the Apollo spacecraft wasn't
* During the Apollo 13 incident, Stein distracts the entire control room at a crucial moment by singing the Banana Boat song.
* During the Apollo 16 lunar mission, while the astronauts were resting after a moonwalk, John Young told his colleague Charlie Duke how the potassium-laced orange juice they were given to drink was
* During the Apollo 16 moonwalks, astronaut Charlie Duke would occasionally pick up a dusty rock or a dusty piece of equipment and try to blow the dust off of it. People on Earth are used to getting rid of dust this way, but it doesn't work so well when you're wearing a helmet with a full-face visor.
* During the Archaic period, Amazons were linked with Scythian warrior women (well attested in kurgans, their skeletons adorned with armour and even bearing axe scars). In
* During the Arl of Redcliffe questline, Connor Guerrin has shades of this, due to being under
* During the assault on the Sandin family, the family's neighbors enter the house and dispatch their attackers, saving them from violent deaths.
* During the Atlantis Lostbelt, when Hektor is killed, Mandricardo picks up his spear Durindana (Mandricardo was the only one
* During the attack on Patton's headquarters by the Nazi bombers, the machine gunners in the planes' nose turrets strafe the ground, sending the American forces into confusion.
* During the attack on Pearl Harbor, able to do little more but watch in horror from his office, Commander in Chief of the United States Pacific Fleet Husband E. Kimmel removed his (acting/temporary/brevet) Admiral (four-star) insignia and replaced them with his (permanent) Rear Admiral (two-star) insignia, correctly anticipating this loss of status and command. (Officers cannot be reduced in permanent rank, but any temporary rank can be revoked.)
* During the attack on Pearl Harbor, the Japanese, in addition to the bomber planes, sent in some mini-submarines. Their mission was to do as much damage as they could, and if possible, get out afterwards. During the final communications between the sub-pilots and their commander, no mention was made of them not returning — that was a foregone conclusion.
* During the attack on the Messines Ridge in WWI, the British set up 21 vast mines underneath the German positions. Detonating them simultaneously, they destroyed the German positions atop the ridge and successfully captured it. It was then that they realized only 18 of the bombs had detonated. And then that they realized that the topography of the ridge had been so altered by the blasts that the remaining 3 couldn't be found. If they still had the map. Which they didn't. One of the bombs blew up in the 1950s after being exposed by a storm and hit by a lightning strike, killing a singularly hapless cow. Another has been found under an old man's farm.
* During the attack on the weather station, the ghost fog (or the zombies) cut the building's power supply, causing the man inside to open the door and get killed.
* During the attempted attack on Earth by Apophis and his son Klorel,
* During the Avengers attack on OsCorp, Kara is hit with a unibeam blast from Titanium Man, which burns away the torso of her costume and leaves her as an involuntary case of
* During the Azure City invasion, Redcloak initially leads from the rear, but later is moved by the way the Hobgoblins were sacrificing their lives, and charged personally into the battle with his war mammoth. This is able to turn the tide of the battle in his favor.
* During the backstory of the season four episode "For All You Know", a city

councilman kills a woman who he was having an affair with. A cleaning lady sees him disposing of bloody clothes and tries to get Sherlock to help. Since Sherlock is addicted to drugs, he is unable to help and the woman is murdered too. In the present, Sherlock himself is accused of committing the crime.
* During the Bad Guys Anonymous meeting, Kano mentions that being good guy isn't about what you do for work but that being good is all in your heart, as he is saying this he tears the heart out of a zombie sitting beside him, making a reference to his Fatality move from
* During the Baratie arc, as the Straw Hats head towards the titular restaurant, their guide Johnny tells Zoro that the "hawk-eyed man" he's looking for is said to show up there. Later, it's revealed he confused him with "Old Red-Eye, who drank so much, his eyes turned red." The anime keeps the first scene intact, but not the second, leaving Johnny's story hanging.
* During the Baratie Arc, it's stated that Don Krieg had a fleet of 50 ships with 5,000 men... which he lost when he entered the Grand Line and ran afoul of "Hawk-Eye" Mihawk. When he first appears, Krieg's Pirate Armada has been reduced to one battered ship and about 100 starving men. Krieg's motivation for stealing the oceangoing restaurant is using it to build a new fleet.
* During the Baratie arc, one of Don Krieg's crewmates, "Invincible" Pearl, boasted about never having spilled a single drop of blood... whereupon Luffy
* During the basketball game in Season 1, Avon makes a crack suggesting that "Proposition Joe" is illiterate. While it's certainly possible that Avon was just insulting his
* During the battle against Flavius, the Apple illusions used take on the form of people Bayek has killed, much like what Al Mualim did during his battle with Altaïr.
* During the battle against the Cell Jrs. Gohan decapitates two of them.
* During the battle against Wolfgeist, he possesses a piano and makes it look and act eerily similar to the infamous “Mad Piano” from Super Mario 64. As such it is incredibly satisfying to be able to completely destroy that piano.
* During the battle at Adamant, the Inquisitor can either have guest-star
* During the battle between Dominic and Celesto in the Storm of Souls arc, Celesto uses his powers as the Champion of Chaos to trap Dominic and try to use him as fuel for the
* During the battle between Paul and Cynthia, Cynthia wins four-zero. Pauls first three Pokémon are easily swept aside by Cynthia's Garchomp, but Torterra actually manages to bring Garchomp to it's knees with Giga Drain. Of course, Garchomp then proceeds to block Torterra's
* During the battle in the 11th Ward, Marude theorizes that the sniper pinning them down is probably a professional, as ghoul mercenaries are popular in war-torn parts of the world.
* During the Battle of Alesia, Julius Caesar wisely recognized this trope, so he avoided it on purpose by building a castle around a castle. His enemies tried to storm his siege wall multiple times and failed, eventually surrendering.
* During the battle of Alpha Centauri a badly damaged human starship rams a Nameless ship. This sequence is unusual in that the human ship is approaching from behind with a low overtake speed. The alien attempts to avoid impact means the contact is more of a graze than a direct hit, but is still crippling for both vessels.
* During the Battle of Beacon, she sees Adam stab Blake; by recklessly charging in with her Semblance at full-power, Yang leaves herself wide open to Adam's strike, which is so powerful that he cuts through her Aura and amputates her arm. In the battle, the school is destroyed, some of her friends are killed, and Blake flees Vale without saying anything to her team-mates. Yang spends Volume 4 in a lethargy of depression, betrayal and PTSD. She only begins her road to recovery when she realises that her father can't protect her younger sister, who ran away from home to investigate the villain that attacked Beacon, because he has to stay home to look after Yang. That makes her determined to get back on feet again so that she can go after Ruby to protect her.

* During the Battle of Blackwater, the Hound returns from a sortie shouting, "Someone, bring me a drink... Fuck the water. Bring me wine!"
* During the Battle of Blackwater, Tyrion Lannister successfully plays on this for his
* During the Battle of Castle Black, Alliser Thorne and Jon Snow do this for the Night's Watch while Styr and Tormund do it for the wildlings. When tasked with defending the inner gate, Grenn is also front and center among his men.
* During the Battle of Chalons in 451 AD, after the Visigothic King Theodoric had died, the Visigoths and Romans had managed to fight Attila the Hun to a standstill into the night. In the darkness, Thorismund, the new Visigothic king, was nearly killed when he rode toward Hunnic lines thinking they were his own soldiers. Luckily for him, he realized the truth in time and booked it. This was mere hours after his father died. The Visigoths almost lost two kings in a single battle.
* During the Battle of Chapultepec, Mexican forces were made to defend the military school, which was based on the Chapultepec castle, against the American invaders. They...
* During the Battle of Copenhagen, in order to ignore a recall signal from his senior officer, Lord Admiral Horatio Nelson held a spyglass to his near-blind eye, and reported, "I really do not see the signal." This is suspected to be where the saying "To turn a blind eye" comes from.
* During the Battle of Corellia, the Empire forms a blockade around the planet, and General Garza has to contract some smugglers to move troops past it.
* During the Battle of Crete, a Greek priest and his son broke into the village museum and stole pre-World War I weapons to use against the German paratroopers.
* During the battle of Doldrey, when Casca is about to reach the castle's battlements, he reveals himself at the top of the stairs wearing
* During the Battle off Samar, many of the American aircraft lacked the armor-piercing bombs necessary to damage the heavily armored Japanese warships they faced, having been equipped to provide air support to Marines fighting ashore. Hoping to buy time for their ships to escape, the aviators attacked the battleships and heavy cruisers with rockets, fragmentary bombs, and machine guns, before making aggressive unarmed passes once they had run out of ammo, in order to distract and frazzle the Japanese crews.
* During the battle of Gettysburg in the American Civil War, Joshua Chamberlain's 20th Maine regiment had to hold a vital hill on the flank of the Union Army. They repelled several enemy attacks, but ran out of bullets. In desperation, Chamberlain ordered a bayonet charge, which saved the Union Army and got him the Medal of Honor. Several battles in that war had soldiers
* During the battle of Haven, Cinder mocks Raven as being nowhere near as clever or powerful as her reputation claims. This triggers her attack on Vernal, which leads to a fight with Raven. When both their Auras shatter, Raven tells Cinder that if she "were stronger or more clever" she would remember to watch her back; behind her, Vernal uses the last of her strength to fire her weapon and distract Cinder, allowing Raven to throw Cinder off the vault ledge.
* During the Battle of Helheim's Gate, Spitelout tries to kill Stoick as a means of making Snotlout chief, hoping to make it look like Stock died from a dragon attack.
* During the battle of Hue the protagonist (a combat reporter) goes to a camera store to find a Marine
* During the Battle of Mogadishu, later depicted in the book and film
* During the Battle of Mogadishu, (more specifically The Day of the Rangers) two US UH-60 Black Hawk helicopters were shot down. The only member of
* During the battle of New York, Reign is laughing off the police's bullets and the army's artillery fire. One tank shoots another shell, which Reign also shrugs off before tearing the tank apart.
* During the Battle of Ocracoke Inlet, Royal Navy Lieutenant Robert Maynard ordered his crew to dump all non-essential items overboard in order to gain speed and cut off
* During the battle of Stalingrad, Yakov Pavlov commanded a platoon that took over

a apartment building (now known as Pavlov's House). They found that by placing Soviet anti-tank rifles on the roof they could actually shoot nearly straight down onto a tanks turret (with them being so high up the tank couldn't shoot back). Pavlov is said to have taken out over a dozen tanks himself this way. The fighting for the southern Grain Silo was also characterised by the defenders' ability to do this.
* During the Battle of the Bastards, Tormund brings Jon back to his senses as they both see a horse with a decapitated rider gallop by their side.
* During the Battle of the Blackwater, Tywin Lannister has someone impersonate the highly charismatic and popular (but very much dead) Renly Baratheon (mostly by wearing his elaborate armor) in order to support her allied troops' morale and gain the smallfolk's support. Tywin being little short of a strategic genius, it works out well.
* During the Battle of the Coral Sea (World War II), the Japanese thought they had fatally damaged the CV
* During the battle of the Loot Train in the Reach, Tyrion can only beg Jaime from afar to turn on his heels and flee the battle instead of making his suicide attack on a downed Drogon and Daenerys.
* During the Battle of Thessia in the Mekon War, the crippled Asari dreadnaught
* During the Battle of Torus Filney, the Rebellion's strategy hits a major stumbling block when
* During the battle of Trost, Dot Pixis told Eren a legend where a powerful non-human enemy appeared and all of Humanity would set aside their differences and unite forces to stop it. Eren scoffed at such a story and called it far too rosy to actually happen. So why did he decide to carry out the exact same type of plan?
* During the battle of Trost, Eren realizes that the Colossal Titan is moving strategically by kicking the door in (to let the smaller Titans in) and then smashing the defensive cannons on the wall (to decrease resistance).
* During the Battle of Waterloo, Lord Uxbridge lost his leg due to French cannon fire. Being a typical Englishman, he supposedly quipped
* During the beginning, Dream says, "Also according to YouTube's statistics only a small percentage of people who watch my videos are actually subscribed,
* During the beginning of Lil Bow Wow's rap career, he made a few songs, calling out
* During the beginning of the Zou Arc, Kanjuro the samurai draws a pathetic-looking dragon and brings it to life. The Straw Hats dub it "Ryuunosuke" and in her mind, Robin refers to it as "cute" 3 times, all while
* During the Beslan terrorist attack in Russia in 2004, the men set up dead man's switches so that if the terrorist were gassed, the bombs they set up would still go off.
* During the big chase scene with White She Devil, one of her mook's motorcycles crashes and immediately bursts into flames.
* During the big finale final battle, the villain tries to taunt him by pointing out that it happens to be the day before the anniversary of his parents' death (and how pointless their sacrifice was since it's all going to end now). Backfires of course, because Naruto just states that means it's also his birthday, and thus the anniversary of his parents'
* During the Bohrok arc, Pohatu and Onua, the two strongest Toa Mata, struggle to break a rock wall to escape before the room fills with lava. However, they're unable to make a single chip in it. Lewa realizes that there's
* During the "Bongo" segment, Bongo sneezes while on his unicycle. The sneeze causes him to fly backwards to the edge of a cliff, and he almost falls to his doom.
* During the bowling episode, the events happening over the eyecatch take longer than the catch did, so the catch was repeated several times. Naturally, the characters then wondered why the catch was being repeated so many times.
* During the Brazilian military dictatorship, journalists would respond to censorship by adding out of place things. Newspapers had a tendency to print cake recipes over cut content, while magazine

* During the Breachmaker battle Scarlet created various colored holograms. The final and most powerful was the Ultraviolet Hologram.
* During the Brecourt Manner assault in "Day of Days," a lost GI pokes his head up at the wrong moment while getting his bearings, and takes a round through the brain pan.
* During the bridge of "Livin' in the Fridge", the singer suggests carbon-dating the mysterious fridge-dweller, then offers fumigation as an alternative and finally wonders if he should just burn it and scatter the ashes at sea.
* During the briefing for Jeffrey Pelt on Soviet captain Marko Ramius, Jack Ryan realizes today's the anniversary of his wife's death, thus Ramius' real goal isn't attacking the United States, but defecting to them, instead. When he figures this out, Ryan quietly mutters "You son of a bitch...", before saying it loud enough for everybody else to hear, leading Pelt to quip "You wish to add something to our discussion, Dr. Ryan?"
* During the briefing prior to the Battle of the Colony, Adama orders the gun crews to keep firing until they run out of ammo, and then to start throwing rocks.
* During the brief proliferation in the late '90s/early '00s of one-hour sci-fi story series in the style of
* During the Brotherhood of Steel questline, it is possible to help Paladin Hardin to replace and depose Elder McNamara by finding evidence that he is unfit for command. Upon doing so, Hardin takes over as Elder while McNamara is demoted to a Knight. This will also affect the ending for the Brotherhood,
* During the brutal Liberian civil wars, many fighting bands took to wearing strange outfits to instill fear in the enemy. "General Butt Naked" (Joshua Blahyi) went into combat naked, and led a band of soldiers called "The Butt Naked Brigade". Their
* During the Buffy series, Dawn usually had waist-length hair. In the Buffy/Stargate crossover fic
* During the Buu Saga, Goten faces a loudmouth braggart named Ikose in a tournament. Ikose tries to show off by repeatedly punching the air, and runs out of breath doing it. Goten gets confused and asks him what the point of that was, then easily defeats him.
* During the Buu Saga, Vegeta becomes so obsessed with topping Goku that he makes a
* During the Buu Saga, Vegeta, in order to top Goku, deliberately lets Babidi turn him into a Majin in an attempt to bridge the gap between them. He knew that the energy released by the fight would revive
* During the Captain Jake's commercials that play in the queue for the
* During the card game tournament, Larry takes all the pointers on his bad behaviour to heart and not only apologizes directly to Sarah and Tedd for it, but promises to work on bettering himself so he doesn't do stuff like that again.
* During the caves of the Gi area as part of the main quest, the area boss Gi Nattak is vunerable to healing magic. A Phoenix down has a 1 in 4 chance of killing the boss, while an X-Potion which heals all life will instantly kill the boss. Two such potions can be found in the caves before the boss.
* During the CBC Newfoundland and Labrador broadcast of the 2017 Disney Parks Magical Christmas Celebration, an ad for Red Door Hearing and Speech played during literally every break without fail.
* During the C.B. radio craze of the mid-1970s, several country music songs played on the theme of corrupt highway patrolmen (and the then-prevailing 55-mph speed limit), using masquerades to lure unsuspecting truck drivers into speed traps. These included:
* During the Cell Games in the anime, an elderly couple who seem to know Chi-Chi comment on how irresponsible it is for her to let her husband go out fighting like that. Cut to Chi-Chi sneezing.
* During the Cell Saga, Earth's entire army surrounds Perfect Cell and lay on him with continuous gun, tank and missile fire for almost a full minute. It doesn't work and he annihilates them all with a single swipe of his hand.
* During the Cell Saga, Goku can't defeat Cell (and later ends up killing himself

in a
* During the Cell Saga, the Saiyan characters discover a "half-level" of Super Saiyan
* During the Cell Saga, Vegeta, after having trained for a year in the
* During the championship game, Coach Reilly orders McGill to take out Adam Banks, which he's only too happy to do.
* During the championship match against Kururomine, Momoga tries to move her Chi Nu Type 3 away from an ambush, but engages reverse by mistake. Though it moves her closer to the opponents, and her squad takes a fatal hit, it saves the flag tank from the kill shot by
* During the Chapter 5 trial, Chiaki starts acting strangely, ending with this, indirectly identifying herself as
* During the chase scene in "Weirdmageddon Part 1," Dipper and Wendy's voice actors
* During the Christmas event following Xan's initial attempt to destroy Falconreach and defeat Warlic, he finds the "Eggnognomicon," which acts as an Ice-aligned version of the Pyronomicon.
* During the Christmas season in 2012, the network showed the original
* During the Christmas Special, in approximately five to ten seconds, Carmilla goes from sarcastic and dismissive to effortlessly disemboweling a horrifyingly cannibalistic Mrs. Claus.
* During the Chunin Exams arc, Sasuke gives Naruto and Sakura a lengthy passphrase to identify them with, since there are enemies about who might impersonate them, despite Naruto's complaints. Naruto goes off to relieve himself, and upon return identifies himself with the correct phrase. Sasuke promptly beats up the imposter, as the
* During the Cimbrian War the Romans suffered various defeats, culminating in the annihilation of their field army at Arausio, with only Marius' army that was returning from victory in the Jugurtine War being available. Given full command and authority to do anything he deemed necessary, Marius did away with the property requirement for good to raise a new army, that, with the adoption of new tactics, was able to deal with the war. This ended up backfiring on Rome further down on the line, as the troops were now almost completely raised among the landless poors and more loyal to the generals responsible for their pay rather than the Senate, paving the way for the civil wars that would turn the Roman Republic in the Empire.
* During the Citadel DLC, you're required to infiltrate a party at a casino. Being detected is a Critical Mission Failure.
* During the Clan Invasion, the Clans that invaded the Inner Sphere and basically curb-stomped their way through a fifth of it were only four of seventeen total Clans, and on top of it three of the invaders
* During the classic series, the showrunners often had to contend with lighting engineer guidelines intended for light entertainment shows which bordered it in the schedules. Invariably the engineers wanted to light everything to levels that shoot beautifully on chat shows, and the producers would want more atmospheric levels appropriate for
* During the climactic swordfight, one of Robin's lunges through a window spears a bagel out of a crew member's hand.
* During the climax, a young boy in a toy Iron Man mask heroically attempts to stop a rampant droid, with the real Iron Man saving the kid right on time. Given that this all takes place in Queens, and the boy's age, many fans speculated this was
* During the climax, Batman has to take on the Joker, along with his goons and dogs, while simultaneously incapacitating S.W.A.T. officers who have been fooled by a
* During the climax Morgan outlines an elaborate and utterly barmy frame-up plot.
* During the climax of Act IV, the entire gang has this reaction when they discover that Hokuto,
* During the climax of "Legends of the Dark Mite!" Batman rides one of the
* During the climax of the Azure City war, Miko destroyed the Azure City Gate,

believing she was fulfilling the will of the 12 gods. The only problem with that was it was unnecessary as the ghost of Soon Kim was
* During the climax of the Dressrosa arc, Doflamingo gets his internal organs sliced apart by Law and instead of dying, he just stitches them back together with his Devil Fruit power and doesn't slow in the slightest
* During the climax of the Fairy Dance arc, Kirito dips into this after performing his
* During the climax of the game, failing either of the final two missions immediately ends the war in the aliens' victory. In the final mission,
* During the climax of the latter, Michael (who had previously been a complete pacifist) picks up a rock and uses it to bash in the head of a Burmese soldier.
* During the climax scene of the episode "Pressure" the action changes to a crude looking set of a tropical island with all the characters being rendered as objects on a stick, except Sandy who takes on the look of a taxidermy squirrel.
* during the climax where Bellwether attempts to do this to both Nick and Judy. She traps the two of them in a pit and shoots Nick with the Night Howler pellet, expecting Judy to be killed and savage Nick unable to reveal anything. It would have worked if the duo hadn't planned out a few things in advance
* During the Clone Wars, many GAR units took to referring to the ubiquitous B1 battle droids as "clankers" to differentiate them from the significantly more deadly Super Battle Droids, officially called B2s. Clones troopers fighting on Geonosis referred to the native insectoids as "bugs," for obvious reasons.
* During the Clone Wars, the Confederacy of Independent Systems would use the
* During the Clone Wars, the Old Republic uses highly skilled and well-equipped Clonetroopers led by Jedi and supported by other organic soldiers, while the Separatists deploy
* During the "Cod Wars" over north Atlantic fisheries between Iceland and UK, ramming was often the most serious option available to either side as actual shooting was not a possibility.
* During the Cold War and post-Cold War analysis of East German, Czech and Polish documents, many people confused the term "pre-emption" with "first strike". Pre-emption is like this: it is considered self-defense to draw and shoot if the other guy starts to draw his gun first.
* During the Cold War, a squad of SAS commandos were tasked with defending an Omani fort when they were suddenly attacked by hundreds of Communist guerrillas. In desperation, a couple of the SAS soldiers rushed over to a nearby shed that housed an antique WWII era artillery piece. They managed to get it working and it proved to be the deciding factor in the fight, buying them enough time for reinforcements to arrive.
* During the Cold War, at least one of the superpowers used dead rats to mark dead drops. Animals (like cats) ate the rats. So they used hot sauce to prevent them from eating the dead rats, and it worked.
* During the Cold War, in a rare meeting between senior military commanders from East and West, the Russian general looked at an American map showing the world from the usual Western perspective, centered on the Greenwich Meridian. From this point of view the USSR seemed to be extremely far from the USA. He then led his American counterpart to a room where a large map was pinned on the wall showing the world centered on Moscow. He explained that from this angle, the USSR saw itself having enemies on all sides: Europe on its western border, Turkey and Israel along its southern border, China on its eastern border, and the USA
* During the Cold War, people writing from the US to the Soviet Union and Soviet bloc countries, or the other direction, numbered their letters. It was unusual for a letter not to make it, but because they were sometimes opened and read, as a spot-checking method of looking for subversion, they would arrive out of order. If a letter 15 arrived after letter 16, you could mention casually in the next letter that it was alone in the envelope, or something, that way, you'd find out if something, like a personal photo, or newspaper clipping, had been removed.
* During the Cold War, the Americans acquired examples of a number of Soviet fighters via defecting pilots, from several countries. Some of these planes were

returned, but others were kept. The most famous example is Viktor Belenko, who defected with a MiG-25 in 1976 to Japan. He landed practically on fumes, missing another aircraft and overrunning the runway. While the Americans could only do ground tests on the thing and had to give it back to the USSR (they did so, in crates), they learned a massive amount about the "Foxbat", forced the cancellation of two Soviet aircraft carriers and forced the
* During the Cold War the Strategic Air Command (or SAC for short) were in control of the nuclear arsenal of the United States of America. The strategy in the event of a nuclear war was to drop calculated and precise B-52 nuclear strikes to weaken the Soviet's ability to mount a counter-attack and then nuclear warheads from our submarines and ground bases would be launched for an all out assault. The motto of the bomber wing (the guys who flew the B-52s and other tactical fighter planes) was "Death from Above" which makes sense as dropping a nuclear bomb definitely counts.
* During the Cold War, this was apparently the standard operating procedure for the Soviets exporting military technology to any place that wasn't East Germany. Tanks, aircraft and other hardware was made to a much inferior standard for export.
* During the Cold War, US Navy aircraft usually had a base coat of white paint, with
* During the College of Winterhold questline, as you journey through Labyrinthian, you see the ghosts of the former arch-mage, Savos Aren, and his group of friends that he explored the dungeon with, reliving their quest. The farther you go, the smaller their party gets, as they had died off one by one. In the end,
* During the colonization of America between the 1600s and 1800s, Native Americans were often targeted by the settlers for their land. The genocide and plague, while it did ultimately eradicated nearly 90% of all natives, had first initially massacred Native males in certain tribes. The shortage got so bad to the point where Native American women would attempt to purchase African slaves from the settlers simply to free and marry them into the tribe, since there were not enough native males. It's worth noting that the African slave trade had also initially targeted males, so there was plenty for them to buy.
* During the Comedy Central era, Crow T. Robot was shown to be an aspiring scriptwriter. However, whenever Crow shows off his scripts, it's usually Tom Servo who tells him his scripts suck. Usually really loudly and angrily.
* During the comics Aku checked in on Jack frequently, and within hours of Jack's magic sword being broken saw this and sent minions. "Time passes" though and Jack's seen disguised, with Aku's minions searching again and Aku himself waiting for word. These are not in continuity with Season Five, where Jack's sword is gone and Aku has no idea, apparently having long given up on watching him.
* During the commercial Choques for axe/Lynx, we can see a big number of fusions occuring while a man drives though the city. The females merge with the objective of creating a better woman for the man.
* During the conclusion of the Broken Circle tower, Uldred will rant about the glorious power of the setting's version of
* During the confrontation between Captain America and the Red Skull on the way out of the HYDRA base where he was being held prisoner, Bucky is staring in anger/horror not at the Skull but at Zola
* During the Congressional certification of the 2020 electors on January 6, 2021, Reps. Andy Harris (R-MD) and Colin Allred (D-TX) nearly came to blows during a speech by Rep. Conor Lamb (D-PA) condemning the pro-
* During the conquest of Constantinople, several neighborhoods were spared the
* During the construction of the Canadian Pacific Railway, this is the job that tended to get fobbed off to the Chinese migrant workers.
* During the construction of the Colorado Rockies' stadium, the workers discovered several dinosaur fossils, including a fully intact triceratops skull. This led to the team selecting a triceratops (Dinger) as their mascot.
* During the controversial Civil War storyline in Marvel Comics, Tony Stark is examining a file on Frank Castle (AKA the Punisher). The file details Frank's time as a U.S. Marine during the Vietnam War, specifically referring to him as having been a 21 year old Captain. Even more impressive/odd is that Frank originally

enlisted in the Marines, earning an officer's commission later on in his deployment. This may be somewhat justified, however, as Frank was an amazing soldier with a background in black ops; his promotions may have been based on skill as opposed to time served (in the MAX continuity, Nick Fury arranges for his promotion after he and Frank go on an assassination mission).
* During the coup attempt at the United States Capitol to prevent Joe Biden's electoral college victory from being certified, a rioter named Rosanne Boyland was trampled to death by other rioters
* During the course of an attempted murder, the apparent victim spilled ricin on her pen, and then killed herself by biting the end of it.
* During the course of the fic, Kuyou attacks Yokai Academy with the intent to get revenge on Tsukune for his previous defeat. It's ultimately revealed that Hokuto personally manipulated Kuyou into doing so by exploiting his hatred of Tsukune, using the resulting chaos as a distraction so he could break into the secured levels of the academy and steal an
* During the course of the game, if one of China’s major factions is defeated, but has allies in the
* During the course of the show, Dawn's middle name was never revealed. An early
* During the course of World War One a number of Royal Navy capital ships were fitted with flying off platforms mounted on the roofs and gun barrels of the main turrets. These allowed the ships to both carry and launch fighters or scouts. The obvious limitation of this system being that there was nowhere for the aircraft to land, necessitating ditching and the possible loss of the pilot.
* During the courtroom scene, it turns out that the paint can incident was filmed on camera. How filmed evidence of someone getting bullied was
* During the COVID-19 pandemic in 2020, ads for Dr. Squatch soaps and Audible were played before every 3rd video.
* During the crash, not on radio, the pilot also says with a disturbing amount of calm: "Hey, you gonna pull those PCS offline or what?"
* During the Crimean takeover, Russian army forces switched almost entirely to using messengers instead of radio for communication. This got Western intelligences completely fooled and taken by surprise, as they saw no increase in radio activity just before the invasion.
* During the cutscene that leads to the setup missions for the Paleto Score in
* During the Dance of the Dragons, Lord Cregan Stark pledged loyalty to Queen Rhaenyra over her brother King Aegon II. However, by the time he managed to rally the forces of the North and march south to join the conflict, not only was Rhaenyra dead, but Aegon's
* During the Dance of the Dragons, Queen Rhaenyra takes King's Landing, and has Queen Allicent brought to her in chains. Allicent suggests if Rhae wants a crown, when she was her father's named choice of heir, then they could split Westeros in two (Allicent's kids get the "good" parts, obviously). Rhaenyra offers another choice - give up or die. Allicent chooses to give up.
* During the Dark Tournament, Yusuke defeats Chu after a lengthy fight that included
* During the "David" arc in the series, once the team realizes how unstable and dangerous David is, they sometimes do this while discussing their plans, in case he is eavesdropping on them in morph.
* During the Day of Chaos, Discord turned Button Mash into one after tricking him into playing a cursed video game where no action or choice he made mattered, everything he did led to his character dying and the world being destroyed. Since Button's life revolves around video games, he then applied it to real life as well, saying things like the sky is an illusion to hide the fact the universe is already dead. He eventually snapped out of it thanks to the love of his mother.
* During the days of wheellock and flintlock firearms, it was not unusual for combatants to carry at least six pistols, as well as assorted melee weapons. This was bred out of necessity, as reloading times were long and misfires were notoriously common. Even in the later era of percussion firearms, when misfires were greatly reduced, it was common to carry multiple pistols, because reloading

was still slow. During
* During the days right before Raccoon City gets nuked (seen especially in, but not limited to,
* During the day, the world is filled with passive animals like sheep, cows, and pigs and neutral ones like wolves and polar bears, with almost nothing that will try to kill you unless you attack it first. However, hostile mobs like zombies and skeletons will come out during the night, and it will be quite necessary to have somewhere safe and well-lit to hole up. While the more common hostiles are undead and will catch fire and burn to death when dawn comes,
* During the Death Star battle, one of the pilots says "Red Six, can you see Red Five?" after Porkins (Red Six) has been killed.
* During the debate against positive discrimination in education this trope has inevitably been raised. Supporters of positive discrimination point out that standards have already been lowered whenever a student has sporting talent that a university or college can utilize for its own team.
* During the debates concerning where to put a new main airport in Norway, a certain scientist with good arguments against the current plans was found dead outside his hotel in Denmark, presumably thrown out of the window of his room. This example is jarring because he was naked, and all his data was stolen. The airport 'was laid out as planned — and nobody ever talked about it again.
* During the Deep Blood arc, Touma suckers Stiyl into sticking his tongue out, then uppercuts him.
* During the Demolition Derby, Lightning tells Cruz to "turn right to go left", a teaching Doc gave him in the first film.
* During the development of the original Macintosh, the engineers wanted to use a floppy drive made by Sony, but Steve Jobs thought it would be too expensive, and instead contracted another company to make a cheaper version of the Sony drive. The engineers secretly kept working with Sony, though, and on one occasion,
* During the development of the Shards of Alara block (and several times before) there were an idea to introduce a 6th basic land:
* During the "Dimension of Pain" Saturday story arc, the Dimension of Pain was taken over by a sneaky angel who managed to briefly turn the Dimension of Pain into the Dimension of Fun. The demonic hordes became
* During the direct examination of Mr. Klauss Vanderhayden of Honey Farms, the plaintiffs' defense should be objecting for relevance repeatedly.
* During the Dominion War, we routinely see parts of the Federation fleet are made up of
* During the dot-com bubble, Super Bowl advertising was almost totally consumed by random websites selling useless services, who folded shortly afterward (likely, because they blew a year's budget on a Super Bowl ad and people still didn't know what they sold). The most famous of these, by far, was the Pets.com sock puppet, which has been spoofed ruthlessly in years since.
* During the DRAGON Arc, Shiage Hamazura runs into Accelerator and attacks him, thinking he was sent to kill his girlfriend Rikou Takitsubo. Accelerator easily defeats him and leaves. Shiage realizes he was mistaken and berates himself.
* During the drama club version of the Sun social link, you follow Yumi to the hospital after she gets a call informing her that her mother collapsed. You then witness her confront her mother, who matter-of-factly admits that she lied to Yumi, and wanted Yumi to come to see her dying father, even though he'd abandoned the family. After the conversation ends, Yumi demands to know whether you were listening, at which point you can say, "Yeah, I heard," or "
* During the Dream Tag Arc, Perfect Choujin Neptuneman's Neptuneman has a few unique properties. First, if it is struck, the blows recharge Neptuneman Magnet Power, and second, the mask can't be forced off!
* During the Dreamwave Comics period, a lot of Transformers fan-artists were hired to work on the comics, apparently
* During the Dressrosa arc, once the spell that's turned most of Dressrosa's citizens turned into toys is undone, exposing Donquixoite Doflamingo as the villain he is, Doflamingo's Plan B is to KILL EVERYONE, so that they won't be able to tell

the rest of the world.
* During the Dressrosa arc, the fighting eventually boils down to the Straw Hats and their allies (including the Revolutionaries) who want to take down Doflamingo, the Donquixote Pirates who want their enemies dead, the Marines who want to capture the Straw Hats and Doflamingo's crew and stop the whole mess and the confused citizens who are trying to survive by capturing people on Doflamingo's blacklist.
* During the Dressrosa Arc, the gladiators from the tournament for the Mera Mera Fruit form one to take down Doflamingo for his treachery. The pirate Cavendish even points out that Doflamingo's actions have basically united an otherwise uncooperative bunch of outlaws, renegades, and champions from across the seas into a cohesive force dedicated to destroying him. After everything is said and done,
* During the "Drug issues", Mary Jane very harshly dumped Harry Osborn, which hastened his descent into drug addiction. Although she later became Peter Parker's girlfriend (and later wife), she did reconcile with Harry and she and Peter became the godparents of Harry's son Normie.
* During the duel between Xavier and Akiza, the audience gushes over The Fabled Cerburrel (a three-headed puppy) and The Fabled Caitsith (a black cat)
* During the Dwarf Noble origin story, you can potentially order the death of another dwarf this way in the
* During the earlier parts of the series, Rias Gremory would try pair her servants; Issei Hyoudou and Asia together, due to Issei being a
* During the earlier Peninsular War, the surrender of an entire corps at Bailen, the victory at Zaragoza, and the liberation of Portugal actually convinced many of the monarchs of Europe that French expulsion from the Iberian Peninsula was inevitable. Then Napoleon took command, the Spanish armies were routed, Britain was forced into a humiliating and disastrous retreat with only bad weather saving them from getting surrounded, and the French in dominant control of much of Iberia. This in turn led to a huge hope area for the French, as it was hoped that this would mark the begging of the end, but Spain and Britain got its act together and turned Iberia into a nightmare.
* During the early 1980s, California single mom Theresa Knorr tortured and starved her teenage daughters Suesan and Sheila to death, then dumped the bodies in remote locations. Suesan's death was particularly bizarre: she'd been shot in the chest by her mother but recovered, and some time later developed sepsis when Knorr tried to remove the bullet and was subsequently burned alive. The girls' bodies remained unidentified for nearly a decade until their surviving sister came forward with the bizarre stories of their deaths. Theresa Knorr was subsequently sentenced to two consecutive life terms. The story has been profiled on TV series such as
* During the early 20th century, the Catholic Church and the post-revolution Mexican government came into conflict. The Constitution of 1917 had several articles in it that severely limited the power of the church in Mexico, although not all of these were immediately enforced. During the administration of President Plutarco Calles, the government began secularizing education, forcing priests to register with the government, capping the number of priests in the country, and persecuting Catholics that resisted (violently or not). The Church wasn't pleased with this and, after putting the entire Church in Mexico on strike, numerous supporters of the church rose up in arms, calling themselves the Cristeros. The conflict escalated to the point where in 1928, the Mexican government executed José Sánchez del Río, a fifteen-year-old boy who refused to renounce his faith. He and others have been lately recognized as being martyrs.
* During the early '80s, the old Southwest Conference in college football had rampant recruiting violations by every member ("if you ain't cheating, you ain't trying"), and Southern Methodist University got smacked with the
* During the early 90s, the British Bulldogs were given a mascot in an actual bulldog named Matilda. Bulldogs are normally very placid and safe for using even on live television, but Afa
* During the early 90s, the Buffalo Bills were the best AFC football team in the NFL and went to four straight Super Bowls, only to lose them all. But it's the first

* During the early 90s, the Norwegian soft drink Solo ran a series of adverts that would always start out as stereotypical adverts of this kind... Only for nothing to really happen when they drank it, or
* During the early days of the Norman reign of England, the Normans instituted a policy where, if a Norman was killed in a (usually Saxon) village, the villagers would all be fined a large sum on the presumption of guilt. This almost immediately led to a
* During the early jet age, ejection seats would not operate until the cockpit canopy was jettisoned (today they can punch through the glass). A British pilot test-flying a Hawker-Siddeley Sea Hawk had his controls jam while in a moderate descent over open ocean. His canopy would not jettison, so he could not egress the doomed plane. He calmly narrated the last moments of his flight and his efforts to recover control so that later pilots might learn from what happened. The transmission was cut off at impact.
* During the early/mid-2010s, after the success of the above Wii, Nintendo saw their first years of operating income loss since entering the video game market in the 1980s. While part of this was due to the rocky start the
* During the early months of the Spanish Civil War, when Madrid was under siege by Franco's fascist-backed rebels, the embattled Republican militiamen defending the city against all odds, outgunned and outmatched, made up a little song to immortalize their fierce resistance in the face of a militarily superior foe.
* During the early part of Operation Phaaze she's hit from a direction she wasn't looking by a huge Phazon blast. Phazon, as in canon, is shown to corrupt anyone it comes into contact with (though Samus still fought against it). Anise? A readily-usable rainbow-colored strain with selective targeting (as in it won't affect her allies whatsoever).
* During the early part of the 20th century, there was competition for the title of "World's Tallest Building" which saw each construction taller than the last. To some degree, the competition still goes on, but not to the degree of the last century.
* During the early portion of the series, when the Elrics are spending a lot of time in
* During the early seasons, Senator-turned-President David Palmer had his Chief of Staff, Mike Novick, whom he put all his trust into. However, that ends when Mike betrays Palmer to help the rest of the U.S. government invoke the 25th amendment and displace Palmer, feeling his inaction against a potential (and false) threat could lead to disaster. Mike
* During the early spaceflight years the explosive bolts and cable cutters were far from being a mature technology
* During the early stages of the 1812 campaign, when the Grande Armée occupied Russian Lithuania, Napoleon raised a number of military units there (most of them officially part of the army of the duchy of Warsaw), offering recruits the motivation of fighting for the restoration of the autonomous duchy of Lithuania. Most of these soldiers perished during the retreat from Moscow, but a few continued to serve under Napoleon until 1814, including the tiny remnant of the squadron of Lithuanian Tatars of the Guard.
* During the early Twentieth century, being clean-shaven was the fashion; therefore, being bearded was a sign of either slovenliness or extreme poverty (or both), the more unkempt the beard the worse the person having it appeared. However, once revolutionaries such as Karl Marx started wearing the beard (both out of necessity and a political statement), it became fashionable for communists everywhere to grow a long, scraggly Beard of the Proletariat.
* During the early years, after solving a puzzle, a contestant was allowed to spend their winnings in prize showcases presented after the rounds. At any point, the contestant could choose to put his or her money "on account", meaning that it would carry over to any subsequent shopping rounds, or put it on a gift certificate to Service Merchandise. Likely because putting money "on account" left it vulnerable to a
* During the early years of WWII the Nazis planned to deport Europe's Jews to

Madagascar, which was under the control of Vichy France. The plan was put on hold when it became clear the UK would not surrender, then scrapped in favor of the
* During the Earth-Minbari War, the Minbari bypassed several Earth colony worlds and attacked Earth directly, resulting in the Battle of the Line.
* During the eighties and early nineties it was very common for US TV networks to transmit satellite feeds without any form of scrambling or encryption so anyone with a satellite dish and satellite TV tuner could view them. Because of this it was possible for people to watch (and record) satellite interviews as they were being conducted. For live broadcasts, the feed was usually setup far before the interview began and when the network cut to commercial or another segment of the program the satellite feed usually stayed on leading to many real-life instances of this trope. Several of them were collected in a documentary called
* During the eighties, a particular new postproduction technique resulted in a minor run of planets with colored skies, including Thoros Beta in
* During the election arc in the first half of season three, President Dalton, after losing his party's primary and unable to win a majority in the electoral college while running as an independent, instead forces a three-way draw so that the election will be punted to the House of Representatives, where he ekes out a win. This part is perfectly legitimate under the quite unique
* During the election for Lord Commander, Sam mocks Janos Slynt for hiding in a pantry during the recent Battle for Castle Black, saying, "I found him there after the battle was over... in a puddle of his own making." The joke lands with his audience, one of the rare times when Sam receives approval from the men.
* During the elections for the new Pope in 2013, many of the Italian cardinals assumed Milan Archbishop Angelo Scola would be picked, and had already sent him letters of congratulation when it was revealed that Argentinian Jorge Bergoglio was picked instead.
* During the end credits, an animated Deadpool looks at the "Starring" list and gets a huge boner for Ajax's actor, Ed Skrein, excitedly exclaiming that "He's the hottest!"
* During the end credits of the sequel he complains to the developers that the game itself isn't called "Deadpool and his Inferior Friends".
* During the end credits sequence, we see how much Shifu has lightened up when he watches Tigress doing a similar impression with a good-humored expression on his face.
* During the ending of "Dying for Pie", SpongeBob shows Squidward that he never ate the bomb pie, he was saving it in his pocket the whole time. He then trips, dropping the pie and causing an explosion (a live-action one to be specific), and then it cuts to Bikini Bottom in ruins.
* During the ending, the original playable character of the game can be briefly seen in the background.
* During the end of the Bakumatsu era, the samurai Kawakami Gensai, Kirino Toshiyaki, Tanaka Shinbei, and Okaa Izo became known as "the Four Hitokiri of the Bakumatsu",
* During the end of the Enies Lobby arc, Nami cries against Robin out of sheer relief that they managed to rescue her.
* During the end of the Horus Heresy, as Horus stood over the Emperor's broken body, a lone man (varying between a Guardsman, a Terminator, and a Custodes with each new write-up) attempted to fight back against the Primarch. When Horus flayed the man alive, the Emperor realized he was truly lost, and
* during the end of the news broadcast. He said "Holy shit, two garbagemen wishing happiness... (sic) (...) two damn garbagemen... one of the most worthless employments" while the microphone was still on. Following that, he was indicted for moral damages and was indemnified by the Court of Justice to pay R$60,000 to the men he attacked. He then apologized for that in another broadcast.
* During The End Times, Nagash managed to successfully usurp the Wind of Death from Morr, the result being that all souls turned to him after dying. This is a major problem as Nagash is otherwise known as
* During the End Times, the Incarnates each one held one of the eight winds of

magic within themselves.
* During the Enies Lobby arc, Fukuro was being chased by Franky who kept firing bullets at him, when he suddenly remembered he could
* During the episode about drunkenness myths, despite the labels being obscured, it was still clear that Jamie was drinking Gray Goose vodka, and Adam 12-year-old Glenlivet scotch.
* During the episode "Dancing With Angels" Max (who has been turned into a little girl) refuses to tell his parents where Alex, Harper and Justin have sneaked off to. His punishment? Being entered into a beauty pageant for 7-12 year-old girls.
* During the episode "Five's a Crowd", Kimmy shows a strong aversion to feeding the boys with baby food because
* During the episode in which Bart has his first day of school, he makes a drawing to commemorate the occasion, complete with a stick figure of himself being stabbed with knives and plenty of crayon blood. Homer's reaction?
* During the episode "Issues", Brock and Barbra Jean videotape themselves in bed, per the suggestion of a doctor, to find out why Brock has been sleep-deprived lately. The footage starts with a
* During the episode, "Le Master of Disguise", once Austin gets in the train, Uniqua tells him to show her his "ticket". Once he hears this, he gets an embarrassed look on his face.
* During the episode "Poisoned Motive", drug dealer Earl Talley runs to the bathroom to flush his drug stash minutes before police arrive.
* During the episode "The Bracket," Barney shows the other characters a scrapbook of his conquests — very specific attributes of theirs, which apparently does not include their faces. Though we never see the pictures, they apparently include "some minor celebrities, one government official, and what appears to be a national fast-food chain mascot." The government official is elsewhere established to be Madeleine Albright, but the mascot is left to our imaginations.
* during the episode, with the first scene explaining that he hadn't joined them in the Caribbean because it had turned out the great sailor didn't have a passport.
* During the escape following the failed Saint Denis robbery, Lenny is gunned down out of nowhere as he and Arthur escape via
* During the establishing shots of Dallas, a traffic reporter describes severe traffic congestion, while the viewer can see that the highway is clear.
* During the evacuation of Altihex, twenty to thirty Neutrals took control of a building, arguing for both Autobots and Decepticons to end the war, renounce their allegiances, and unite. Skywarp took a moment to consider whether or not to take advantage of their idealism... then decided to slag them.
* During the events of 'Amethyst Evolution: Angels of Fodlan' the failsafe is revealed to copy over when an S-Bond is activated, and completes the S-Bond when triggered. Edelgard honestly didn't know this in the hour she had her S-Bond to Anise active, given she went right after the Agarthan spy and he triggered the failsafe trying to take her with him.
* During the events of September 11, 2001, many news station tickers continued to show other headlines of the day, even as footage of the atrocity took place.
* During the events of the "Amazons Attack" storyline, in where the Amazons went to war against the US,
* During the exploration of Janjira, the camera moves in front of an aquarium with word "mothra" scratched on it. In the
* During "The Eye of the Beholder", the away team on Lactra 7 is captured by gastropod aliens, which have one elephant-like appendage with three or four tendril fingers. The aliens put the away team in a zoo, because they regard humans as dumb animals.
* During the fad days, people over the demographic age often disliked the show. It was sensational amongst kids, but teens and adults would often mock it as a
* During the Fairy Dance arc, one of Sugou's henchmen starts groping Asuna after recapturing her, only to get bitten for his troubles.
* During the Fairy Dance arc, Sugou brags to Asuna about his belief that Kirito is too scared to enter ALO to save her in an effort to demoralize her. It backfires;

Asuna
* During the Falkland Island war, the Argentines used mass wave tactics that overloaded the computer-based targeting systems of British anti-air defenses. Apparently, however, because the operators of the systems were young men versed in the video games of that day and age such as
* During the Falklands War in 1982, the BBC was accused of giving away too much information in its news coverage. It was pointed out that the Argentinean Embassy in London, which had not been closed down or otherwise ordered to leave, was monitoring news channels in Britain and sending digests of useful news home. This was due to technology having advanced faster than the existing guidelines for reporting from war zones could be modified, as the old rules were more suited to the 1950s and an era before satellite communications or even widespread use of TV.
* During the Falklands War of 1982, Royal Marine Commandos as good as sunk an Argentinian Navy frigate that came close to shore in South Georgia by shooting at it with anti-tank bazookas. The Marines hit it repeatedly under the waterline with Carl Gustav weapons, from such a close range that very few weapons on the frigate could be brought to bear on them. In any case, individual Marines are a hard target for a warship's weapons systems to target. The Argentinian ship was deliberately run aground by its captain to prevent it from sinking, and surrendered later to the Royal Navy.
* During the Fall of France, Rommel's division murdered numerous French colored soldiers after they'd been taken prisoners - a ffew time crushing them under their tanks' tracks. It was not on his orders (and other divisions did the same) but he knew of at least some of the murders and did nothing to prevent them.
* During the fall season, Halloween-themed costume shops such as Spirit and Halloween City sweep through the cities and towns of America only to disappear a week or two after Halloween.
* During the "Fame Game" segment, one card read "Mystery Money or Pick Again," where the contestant could take an unknown cash amount ($2 up to $2,000) or try to select another number. It was later modified to read "Mystery Money or Try Again", when the board was modified to work like
* During the Fawful Theater sequence, there is one female Goomba who always is late to her lines.
* During the Federal Assault Weapons Ban, certain firearms made before the ban's enactment were legal to own. Automatic weapons that were manufactured and registered before the Firearm Owners Protection Act (enacted May 19, 1986) may legally be transferred to civilians (any automatic weapons manufactured after that date can only be transferred to government agencies, or to private businesses licensed to handle them). Similarly, and until the
* During the few times Duke of Deception managed to succeed in usurping Mars, his own daugter Lya proved to be the Starscream to him. Lya successfully usurped Deception for a time, but when he regained power he banished Lya to Earth.
* During the Fifth Doctor's run, there was a no touching rule between the Doctor and his female companions to dispel the notion that he could be having a sexual relationship with either of them. It just made fans think he was having one with the token
* During the fifth trial, Shuichi sought to find the 'truth beyond the truth'. The case in question surrounded
* During the fight aboard the Helicarrier, Fury orders the helmsman to move the ship south. The helmsman tells him the nav systems are offline.
* During the fight against Phobos' forces in "Return of the Queen", Yan Lin paraphrases one of Uncle's usual lines by asking "Who wants a piece of Grandma?"
* During the fight between Fifth Espada Torch and Sternritter "B" Shining Armor, the former is able to use his Resurreccion successfully for two reasons: The first is that his
* During the fight between the SOS Brigade and the Student Council, the Brigade is forced to act like a Literary Club and publish a newsletter. In addition to the brigade members, Haruhi also shanghais Taniguchi, Kunikida, the computer club, and a couple artists from the art and manga clubs to help. Well, and Tsuruya, but she

actually genuinely volunteered.
* During the fight between Third Espada Catrina and Sternritter "I" Spitfire, the former doesn't use her Resurreccion despite the latter using Vollstandig partially because
* During the fight for Mechanicsburg, a soldier objects to an order to shoot civilians — though the commander does point out they have been fighting almost nothing but "civilians" who have taken up arms against them...
* During the fight in Dorian Gray's library, Captain Nemo twice kicks opposing
* During the fight with a symbiote-fueled Peter, Harry actually manages to get a few good hits in and even after Peter starts winning, he doesn't go down until
* During the fight with Black V for the Maskmen World Championship Tiger Mask defeats his opponent by ring-out, neutralizing
* During the fight with Maz Koshia at the end of "The Champions' Ballad" DLC, Link can use some Mighty Bananas as a
* During the fight with Monsoon, we see the extent of Raiden's psychological destruction at being a killing machine for so long.
* During the fight with Orge, Musica is able to neutralize one of his goldclaimer techniques, pointing out the basic alchemy process between metals is all the same with the only difference being power. In Volume 32, when Musica attempts to forge a new blade for Haru's Ten Powers sword, he remembers that instance and instead uses his alchemy powers to make the blade instead of trying to master swordsmithing in a short time.
* During the fight with Revolver Ocelot, if you jump into the cave you die in gameplay, but survive the fall in a cutscene.
* During the fight with Royal Guards 01 and 02, you can spare them by convincing 01 to confess his love to 02. When it briefly looks like 02 doesn't reciprocate his feelings, 01 awkwardly tries to brush it off as a joke.
* During the filming of a medical soap opera the doctors are consulting for, one of the actors insists on adding this to her character's backstory. It's played for complete
* During the film, the Ducks' star player Adam gets injured when an opposing player deliberately hits him with his stick on his arm that was exposed after he removed his glove. The film treats this as slashing, a common minor penalty where a player swings their stick at an opposing player. In reality, deliberately using a heavy overhead swing with your stick is not only a much stiffer penalty (intent to injure), it legally qualifies as assault. A similar real-life incident in the NHL
* During the final arc, Noir chef Don Calma decides to have Takumi's brother Isami kidnapped so he can't come to his aid during a team cooking duel. What he did not anticipate was that
* During the final arc, when August tries to anihilate Natsu and Lucy, Natsu manages to partially dispel his magic saving them both, but he lands on top of Lucy and once more grabbing her boobs (at least this time around she's dressed). Funnily enough, Natsu takes a while to let go of her even after Lucy asks him to get off of her.
* During the final battle, Darkseid is about to crush Supergirl's head when the remaining Legionnaires arrive.
* During the final battle, Hawkeye is driving a car through a warzone with Black Widow in the passenger seat, discussing his plans to knock down a wall in his house to turn the dining room into a workspace.
* During the final battle, no one is aware of Isshin and Ryuuken's arrival in the Royal Realm except for the audience. They eventually reveal themselves to Uryuu so that Ryuuken can give Uryuu a special arrow created from the soul silver that Yhwach used to kill Uryuu's mother. Ryuuken collected the silver to forge an arrow that can briefly stop Yhwach's power. Although initially surprised to see his father in the Royal Realm, Uryuu doesn't waste much time on either disbelief or needless questions — he's well aware that Ichigo's running out of time against Yhwach.
* During the final battle of the Tuchanka arc in Wrex/Wreav comms Shepard in the middle of dodging a Reaper's attacks while on foot, and evading an infinite number

of Brutes to heckle him/her on how long it's taking. Shepard is less than amused.
* During the final battle, Seliph can confront Manfroy who reveals that he was responsible for every bad things and griefs that plagued Jugdral for the sake of his plan to have his God engulf Jugdral in darkness.
* During the final battle, there is also a long sequence showing how the aforementioned waitress got from the diner to the bank where she was being held as a hostage. She is assisted by a police officer who aids her in getting through the ravaged streets, but is shot by the Chitauri while helping her escape. This was likely cut for being filler.
* During the final battle, the unarmed group of Yami and their students in YOMI
* During the final battle, Treize and Wufei have a rematch, this time in their mobile suits. They fight only using their melee weapons (Treize's beam saber and Wufei's beam trident), essentially negating the superiority of Wufei's Altron Gundam over Treize's Tallgeese II. This time Wufei wins but is devastated by the suspicion that Treize let him win.
* During the final battle with Jotaro, Dio managed to get a sufficient power-up which allowed him to
* During the final chapters of Act V, the actions of Babylon's minions lead the
* During the final chase scene, both subs surface to increase their speed. However, in
* During the final choral movement of Beethoven's Ninth Symphony, he makes the sopranos hold a note long enough to make them pass out.
* During the finale, it's found that Yayoi cooks (large) lunches for her husband, even hand delivering them.
* During the final exams, Harriet gets into an altercation with Daigo. Ivan covertly uses his fate manipulation power to calm down Daigo and make him leave. However, this leads to Daigo assuming that Harriet had messed with his head, which then leads him to confront her again later, and
* During the final game against the Hawks, Charlie Conway is awarded a penalty shot after time expires in regulation with the game tied. He scores to win the championship for the Ducks.
* During the final immunity challenge of the fourth season, Kathy lost her balance while attempting to stop a breast from slipping out of her shirt.
* During the final match of the Devil Chojin arc, Buffaloman manages to steal Kinnikuman's life force, killing him...and then burst into flame because the Burning Inner Strength was more than he could handle. He had to return the power to Kinnikuman's body and resurrect him to save his own life.
* During the final match of their 2002 World Cup qualifying campaign, England needed at least a draw to qualify, but were 2-1 down going into stoppage time. Cue David Beckham
* During the final mission, Nanoha flew towards the Throne Room of the
* During the final months of his time as president of the United States,
* During the final round, there was a category called "Double Uh Oh!" which
* During the final season, Lord Tirek, Queen Chrysalis and even Cozy Glow are recruited by new
* During the final season of , Sailor Lead Crow poses as a judge at an idol competition in order to steal the Star Seed of one of the panelists. When the competition starts, Sailor Tin Nyanko appears in her place, and states that she unexpectedly had to fill in for her friend. The scene then shifts backstage where Sailor Lead Crow is shown
* During the final week of testimony in the Casey Anthony murder trial, a 28-year-old spectator
* During the final weeks of the NHL season, disgruntled Toronto Maple Leafs fans may chant "
* During the Finnish run: the episode "The Ship That Wagged Its Tail" was accidentally translated
* During the first 5 weeks of CBS Dream Team, they played Oxi-Clean ads
* During the first appearance of Mr Linderman, who after half a series of build-up as a notorious mobster, is revealed to be an

* During the first battle between Seiya and Shaina the latter was caught completely by surprise when the former actually managed to start the transformation sequence, as she didn't think he could ever pull it off.
* During the first cat fight, Angewomon angrily rebukes AtlurKabuterimon for trying to help her or catching her when she got thrown around (for which
* During the first chapter, Healie -a Healslime- provides healing abilities for Ragnar, who has no magical abilities of his own.
* During the first chapter, the main character (Nine) has no clue what or where they are. Not long before it ends, their friend Ten tells them to take a picture of themselves. The resulting photo is of a space probe, shortly leading into a
* During the first "comeback" season, Peter mentions that Bonnie has been pregnant for "like six years", and tells her to either have the baby or not. Stewie's age has been lampshaded a few times, notably when he reacts to Brian telling him it's about time for him to grow up and let go of his stuffed toy Rupert, "Brian, I'm one!", and Brian replies "Still?" In one episode, Bonnie
* During the First Crusade, a group of Crusaders claimed they had found the head of the Lance of Longinus. It didn't help much.
* During the First Crusade the Christian (Frankish) army, huge for the time, divided into two columns to pass through Anatolia. The Muslim (Turkish) army attacked and encircled one Crusader force, and appeared likely to defeat it, when the other Crusader force showed up unexpectedly. Given that knights were rescuing knights, this would be a case of the Cavalry rescuing the (dismounted) Cavalry; since the Turks were almost all mounted archers, that would be...
* During the first deployment of the F-22 at Red Flag, the U.S. Air Force's largest air war exercise, the single squadron operating it was effortlessly curbstomping everyone. At one point, out of desperation, the Red Flag
* During the first episode, after Vaughn's first near-death experience when he and Rhys were shot at by bandits, he's pretty shaken up and tells Rhys that they'll probably both need therapy. But immediately after the second episode's opening sequence, when the gang outruns a moonshot and both Rhys and Vaughn are blown out the back of the caravan in the process, leaving them stranded in the desert, Vaughn exasperatedly lists all the dangers they've been exposed to in the last 48 hours or so...and then excitedly screams to the sky that he's never felt more alive!
* During the first episode, Miyuki describes some of the things that happen to her for spacing out, such as tripping on her own feet or cutting herself while slicing vegetables, things which Konata then describes as "moe points". The very next scene has her walking into a business sign while pacing back and forth.
* During the first few seasons, Misty did this regularly with cute Pokemon, either attempting to capture them (such as with Jigglypuff) or just picking them right up (such as Vulpix before Brock adopts it, which breathes fire into her face for it).
* During the first fight with King Piccolo, Piccolo is holding Goku by the collar, mocking him. Goku bites his thumb, causing Piccolo to scream in pain and suck his thumb afterwards. It's the only injury he sustained in that fight.
* During the First Gulf War, units of the French Foreign Legion had a certain amount of trouble liaising with American troops. 'Yes, I said Foreign Legion.' 'Yes, the guys with the kepis.' 'Yes, we are real.'
* During the first Gulf War, US tanks equipped with plows were used to fill in trenches manned by Iraqi soldiers,
* During the first Italian campaign Napoleon's army reaches Lodi only to find the drawbridge had been drawn, so they start preparing for a siege-and just as Napoleon starts giving the orders,
* During the first major fight against supervillains, Dabbler warns everyone not to touch one of her discarded weapons, as it's "mammary-trapped." Maxima corrects her to "booby-trapped," and Dabbler pulls out a "Make Maxima say __ bingo" card and crosses off "booby."
* During the first mandated travel to the pre-historic era, the Gate Key gets stolen and the party has to get it back to travel to various points in time. This includes using a metaphorical hop to the End of Time to swap out party members. Despite the key being stolen, the player can easily swap their third party member

(since
* During the first saga of the series, Yamcha, Tien, Chiaotzu, and Krillin all train in order to be able to combat the incoming Saiyans. Soon as Vegeta and Nappa get there and they, along with Gohan and Piccolo engage the two. Yamcha is blow up in a sneak attack by one of the man-made henchmen, the Saibamen. Chaiotzu ends up blowing himself up in vain to trying to kill Nappa. And Tien ends up losing an arm and using up all his energy just trying to take Nappa out... which also fails. And Krillin ends up being pretty damn useless as well, as Nappa punishes him and Gohan. So all that training was for naught. This repeats itself on the Android Arc, where the humans ultimately realize how underpowered they are compared to each new foe that appears. As a result, they give up on fighting... or at least Yamcha and Chiaotzu do.
* During the first scene in the bar, Eddie sees a hung-over Red Car conductor and asks a mute barfly what's wrong with him. He takes a notepad and writes the answer "LAID OFF".
* During the first season episode "A Taste of Armageddon", Kirk escapes captivity and waits in his captor's office to have a calm (albeit at gunpoint) conversation about the reasons for Kirk's imprisonment.
* During the first season finale, as the cabin from the movies turns into a full-blown
* During the first season, Jarod discovered The Three Stooges for the first time, sitting in a diner. He later makes a video of himself doing Curly's schtick to taunt Miss Parker.
* During the first season only Dewey appeared in every episode, and one episode featured him in a silent cameo. Huey, Louie and Scrooge each missed 2 episodes, Webby missed 3, Launchpad missed 6, Donald missed 12 and Mrs. Beakley missed 13. The episode "The Great Dime Chase!" features Dewey and Louie, but not Huey, making it the first time that not all of the triplets have appeared in the same episode.
* During the first season, several characters in other media adaptations had powers the same or similar to primary characters, although no two characters were shown to have the same power yet in the television series. Except for Peter Petrelli, whose power is that he can manifest other's powers that he comes into contact with (which is virtually the entire cast), and Sylar, who has to examine their brains to do it. In the second season, however, West has the same power as Nathan (flight) and
* During the first season, the guys frequently lament that they are in danger of going into foreclosure on their houses back home. Failure to find any gold means going home not just broke, but deeper in debt than when they started. Unfortunately, by the end of season one, they have failed to find more than a few ounces of gold valued in the tens of thousands of dollars. They need more than 100 ounces worth hundreds of thousands of dollars.
* During the first season, the network demanded a more formulaic episode, in which
* During the first season, there were a number of episodes in which Buster or Tobias were absent (fortunately, they've never been both been absent in one episode). Curiously, this may be why Tony Hale and David Cross were credited last aside from the "
* During the first season, this was instead applied to Whitney Fordman, the Smallville High quarterback who was being offered a scholarship to Kansas State, who starts off seeming like a regular jerk and playing a horrendous prank on Clark, but by the end of the season has become much more nice and sympathetic.
* During the first series, when we learn what the Omnitrix is called, Ghostfreak is seen
* During the first summer event ("Chaldea Summer Memory"), you are stranded on a tropical island, and Kiyohime offers to be your food if you can't find any, declaring that her serpent form's tail is "probably delicious,
* During the first two seasons we had Jenny Calendar, a self-described techno-pagan, who occasionally combined divination and other arcane abilities with computers and the Internet.
* During the first two seasons, XANA could have been defeated by simply turning

off the Supercomputer. But that
* During the First World War the toll amongst Britain's K-class submarines was high, with 3 lost and 4 seriously damaged:
* During the first years of World War II, the German invasions of Poland and France were won in about a month each.
* During the Fishmand Island Arc, Luffy runs into a room that is supposed to be locked against any intruders, and jumps straight into a giant pair of breasts, which belong to giant mermaid Shirahoshi. Since Luffy's a
* During the Five Galaxies War, the Tymbrimi and Tytlal defect from the Five Galaxies to the
* During the flashback missions that showcase the fighting in Europe before the Seattle invasion, the Soviets had destroyed much of the U.S. Sixth Fleet in the Mediterranean Sea, then followed up on it by staging an amphibious invasion of southern France in an attempt to open a second front as they had been stalemated in West Germany.
* During the flashback of when Trent Boyett starts the fire, Miss Claridge tries to put the fire out by using a blanket and not a fire extinguisher. It results in the blanket
* During the flashback that showed how Carly came to know Sam, Carly was eating alone. Probably justifiable since Carly had moved to Seattle from her existing home in California. Not friendless before that though, as she had Missy, her best friend back in California.
* During the flashback Twilight experiences due to the potion, Discord is carelessly munching on a bag of seeds as Celestia and Luna are approaching him for the battle that will end up sealing him away.
* During the Flim Flam Brothers' Invasion, Rainbow Dash teams up with Princess Rainbow Dash from Speed World and Shining Armor teams up with Sincere Heart, his alternate self from Ponyland.
* During the flying segment of Chapter 12, you have to make a detour to destroy
* During the food buffet scene in Episode 5, Ann does not briefly lash out at Ren and Ryuji like in the game, since she's more hurt than angry as over the incident. Instead, the three reasonably talk things out concerning the adults' mistreatment of them. Ann is not as resentful towards Makoto as in the game, and more readily admits that she couldn't do anything for Shiho, either.
* During the Fort Vaux siege of World War I, German army outnumbered the French defenders by more than
* During the Fourth Battle of Tiamat in the first movie Mückenberger sent his fleet out to the front of the battle unsupported, then gave the rest of his force orders to not worry about hitting friendlies when the shooting started. Just to make this clear, he was willing to kill over a thousand of
* During the Fourth Doctor era, Robert Holmes would often give the Doctor funny-sounding phrases to say, because
* During the fourth movie, Fry tells Bender he can bite his shiny metal
* During the Fourth Ninja War, Neji assumes leadership of the Close Combat Squad due to having the highest rank among his teammates
* During the fourth season, a recurring gag in news stories was to have the scene begin with the character(s) watching the tail end of a story about the ever-increasing size of Hillary Clinton's ass.
* During the fourth trial, evidence arises that implicates Toko in the murder
* During the Franco-Prussian War of 1870-1871, the feminist and socialist leader Louise Michel organized a women's complement to the Eighteenth Arrondissement Vigilance Committee, essentially a citizen militia to defend Paris.
* During the Freeza Saga, Krillin kept calling Dende "Little Green", despite the latter constantly telling him his name. When Dende comes back during the Cell Saga, and Krillin tries to call him that again, Dende
* During the French and Indian War, the French and British took advantage of the Native American practice of scalping their enemies and began offering bounties for the scalps. This resulted in some Native Americans killing civilians to get scalps to trade in.

* During the French Revolution, feminine personifications of Liberty, Equality and Fraternity also were often used or a personification of the Republic would be displayed with attributes to represent the three: The Phrygian bonnet for liberty, a builder's level for equality, and breast-feeding a child for fraternity.
* During the Frieza Saga, after being beaten to a pulp by Frieza and shot through the heart, Vegeta dies while crying his eyes out and begging Goku to kill Frieza and avenge the Saiyans.
* During the Full Moon Operation in July, the Protagonist and Yukari are caught in a Shadow's spell and Yukari is forced to take a shower. When she snaps out of it, she is only wearing a towel and slaps the Protagonist before returning to the bathroom to change her clothes.
* During the funeral for Homer's mother, Abe commented that he'd imagined himself dancing on it but no longer had the mood. (He was wearing tap shoes during the funeral.)
* During the Future Trunks Saga, the scene where Goku Black and Future Zamasu hugging each other after being acquainted may look adorable and sound like shipping material between them...until you realize that
* During the Gambling King arc, Ukyō makes a bet with Ranma that if he lost against the
* During the game itself, this is just one of the many, many self-destructive ways you can have your player character act as a coping mechanism. You can have him become obsessed with solving missing person cases, even when nobody is actually missing; he also gets derailed into many irrelevant quests (like investigating the Doomed Commercial Area, helping ravers start a nightclub, and hunting for cryptids) that your partner Kim Kitsuragi will complain have absolutely nothing to do with solving the case. Your character's political diversions can also lead into the idiotically world-saving,
* During the game's ending, where Shadow appears to have died, Rouge (voiced by Blue Lennox) calls Shadow "Hedgehog Jesus". Slightly later, while the recording session is being wrapped up, Blue wonders whether that means Shadow will come back to life and is immediately informed that he was indeed brought back in later games.
* During the game the player can decide to go full dark side, who will grant alternate quests, dialogue and the Dark side ending choice in the late game, where on
* During the Gemini arc when the girls land in a gothic horror-themed dimension, Vampire!Ethan is this. He's very cordial to the group, allows Harmony to stay in a wing of his home when she's chased there, and eats as few humans as possible. That being said he mainly allows the group inside because
* During the Gemini program, the question was raised as to what action to take if an astronaut died during an EVA, since it would be impossible for his colleague to fit the body back into the cramped cabin. The initial instruction was to
* During the Gemini XII mission, the rendezvous radar, which was to have guided the spacecraft to docking with the Agena target vehicle, failed. Fortunately, co-pilot Buzz Aldrin had specialized on space rendezvous during his doctoral studies at MIT (he was sometimes known as Dr. Rendezvous). He "simply" pulled out a sextant and a set of charts he had developed, and proceeded to feed correct target distance measurements into the computer.
* During the German campaign to take Norway, a Norwegian army unit managed to hold the German army at bay for
* During the German GP, racer Johji Ohtomo crashed, suffering serious injuries. Prior to the crash Johji and Hayato's Super Asruada had a minor collision, leading Hayato to beleive Johji's crash was a reslt of that incident. In reality, Johji turned off his car's computer because he was overwhelemed by the large amounts of data fed into it, hoping instead to race on his instincts. He crashed soon afterwards.
* During the German-Italian invasion of Yugoslavia in World War 2, the capital city and its garrison of tens of thousands of heavily armed men were essentially captured by a scouting party of six Germans. To quote Wikipedia: "On April 11, a German Officer, Fritz Klingenberg with 5 men, moved into Belgrade to reconnoitre

the city. However, after some scattered combat with Yugoslav troops, they entered the centre of the city, whereupon they bluffed about their size and incoming threats of bombardment. The city, represented by the Mayor, surrendered to them at 18:45 hours on the 12 of February."
* During the globally-televised opening of the 2008 Bejing Olympics, a cute girl lip-synced a beautiful song while an unattractive girl hidden behind the stage sang the actual song.
* During the Golden Age Diana accompanied the Holliday Girls on a couple of excursions that hoped to find magical or other useful items for the war effort during archaeological excavations.
* During the "Golden Age" of Major League Baseball, New York City boasted three teams: the Yankees, playing in the Bronx, the Giants in uptown Manhattan, and the Dodgers in Brooklyn. These teams accounted for over half of the pennants and World Series titles from 1940 until 1958, when the Dodgers and Giants moved to Los Angeles and San Francisco respectively. They also boasted some of the sport's most storied players: Babe Ruth, Lou Gehrig, Joe DiMaggio, Jackie Robinson, Mickey Mantle, Willie Mays, etc.
* During the golden era of heavyweight boxing, it was rumored that boxing great
* During the golden era of heavyweight boxing, the now late boxing legend Joe Frazier had to struggle and earn the heavyweight championship the hard way. However, he was always in the shadow of
* During the graduation season, Japanese bands will release tons of songs featuring the word "sakura" in the title. A short list: Ikimono-gakari ("SAKURA"), NIRGILIS ("sakura"), Remioromen ("Sakura"), Yazima Beauty Salon ("SAKURA - ハルヲウタワネバダ-"), YUI ("CHE.R.RY"), Kobukuro ("桜"), capsule ("さくら").
* During the Grand Magic Games arc, it at first seems that only one person had come back from the future to give warnings about what will soon happen, but that that person had given Princess Hisui and Captain Arcadios conflicting information for some reason. During the two's conversation late in the arc, Arcadios calls this informant a woman, causing Hisui to tell him that
* During the Grand Magic Games, Laxus reveals to Raven Tail that Fairy Tail has dug up all the dirt on them. Ravel Tail realizes that Gajeel, who'd tricked his way into their trust, had really been
* During the Great Crusade the Emperor personally oversaw the destruction of the entire
* During the Great Crusade, the Emperor sought to gain access to the Webway. In a top-secret chamber deep beneath his palace on Terra, he constructed a massive machine that allowed him to breach it. He had to put some heavy-duty psychic wards around the place to keep daemons from using the gate to enter Terra. Unfortunately, Magnus the Red broke those wards to tell him of Horus' betrayal. Since then, the Emperor has sat on the Golden Throne, using his psychic might (and the might of thousands of daily psyker sacrifices) to keep that gate closed.
* During the Great Crusade, the Primarchs (the head of the Space Marine Legions) would usually split the role of Number Two between the First Captain and their own Equerry. The First Captain would be the senior most commander after the Primarch, while the Equerry would be a personal adviser. For those Primarchs who went rogue, the First Captain would become
* During the Great Depression, a good number of comic strips shifted from domestic comedy to comedic adventure.
* During the Great Irish Famine, most of the ships carrying Irish immigrants to North America were overcrowded and filthy and provided little or no food or fresh water to their passengers. They came to be known as "coffin ships" because so many passengers died during their voyages, mostly from diseases like typhus. A ship called the
* During the Great Southern War, Tanzania loses territory to Uganda, Kenya, Mozambique, India, and a once-again independent Zanzibar (the latter causes the country to change its name back to Tanganyika).
* During the Great War, the Vacuo campaign consisted of Mantle and Anima

attempting to take control of Vacuo's resources, forcing the King of Vale to take to the front line to save Vale and Vacuo. The King of Vale, who until then had been only a reluctant participant in the war, entered battle with only a sword and his Royal sceptre. However, he single-handedly laid waste to battlefield and all four armies, raining down the wrath of nature itself. The Great War immediately ended because the leaders of Mantle, Anima, and even Vale's ally, Vacuo, were so terrified that they didn't simply surrender, they offered the King of Vale their crowns; instead of taking over the world, he used the opportunity to bring global peace. While Remnant historians debate the veracity of what the King of Vale was capable of, Vacuo still has not recovered eighty years on. The truth is even stranger than historians suspect:

* During the Greek War of Independence, Lord Elgin claimed that he obtained permission from Turkey to
* During the Green Goblin's first attack in public, a few cops get the drop on him. He immediately "surrenders". They lower their guns and approach him, and he immediately beats them up. Spidey himself isn't fooled for an instant but is too far away to do anything.
* During the Greyjoy Rebellion, a badly damaged Reach spaceship tries to ram Rodrik Greyjoy's ship, only for the latter to destroy the former before it gets close enough. Rodrik Greyjoy lampshades it as stupid, because ramming is an absurdly difficult maneuver to carry out even if the ship is brand new and it will destroy both the ramming and the rammed ship - and ships aren't cheap.
* During the group's play-through of Mario Party 2's Space Land (found on Mr. Doom's
* During the Gulf War, Cher came back from entertaining the troops to announce that America had the
* During the "Hakuna Matata" song, Pumbaa mentions that he was downhearted and is about to rhyme it with "every time that I farted", but Timon
* During the Halloween 2k5 Story Line, Ian finds a pill bottle that apparently reveals that his romantic rival Gino is hiding a terrible secret from Sasha. Meanwhile, the Mansion is inexplicably lit on fire. We never find out who started the fire, nor what was in those pill bottles.
* During the Halloween season, Cheetos has their white cheddar flavored "Bag of Bones", whose four shapes are a straight bone, skull, rib cage, and hand/foot.
* During the Hansel and Gretel arc, the titular twins' spree of carnage earns them an $80,000 bounty that has half the city coming after them. When Gretel learns of this from Eta, she simply offers Eta nearly double that to walk away and pretend she never saw her. Unfortunately, Eta's with
* During the Hawaii trip, Ann gets locked out of her room and decides to stay with the protagonist, Ryuji and Mishima. Though the boys are quick to point out that something could happen (whether the protagonist and Ann are in a relationship or not), she states that she trusts them. And sure enough, no hijinks occurs.
* During the health boom of the mid-2000s, Dunkin' Donuts commercials started focusing less on sugary fatty donuts and more on their coffee or breakfast sandwiches. Nowadays, any given Dunkin' Donuts commercial will not only never mention Donuts, but not use the word "Donuts" in their name, instead referring to itself only as "Dunkin'", down to their catchphrase "America Runs on Dunkin'". In Spain, the company's name is "Dunkin' Coffee" (though that's more due to a trademark dispute not letting them use "Donuts" in their name), and rumors say that DD may be gradually moving towards DC in the near future.
* During the heat of the 1972 Presidential Election, a novelty group called
* During the height of his popularity (about the 40s until the 60s)),
* During the height of the Ice Bucket Challenge, idiots everywhere rejoiced when some took it a step further, and invented the 'Fire Challenge'. In this challenge, potential
* During the Heroes vs. Villains exercise, the hero team of Momo and Izuku was losing badly to the villain team of Tenya and Shoto. Then they fused into Moku, who decimated their opponents in seven minutes, winning the match with twelve seconds to spare.

* During the heyday of the "quirky indie" style of movie, parodies and jokes about it often included barbs about them always featuring a guy hooking up with a gorgeous girl far out of his league. But while this is
* During the High Middle Ages, there were a significant number of these in the form of the Crusading Orders. While there were dozens, the big three, so to speak, were
* During the Hivebent arc fans would often comment on how Jade had been left falling for an awfully long time. The strip when she lands is appropriately titled "
* During the Homeland War, some Croatian units used M4 Sherman tanks and US WWII M36 Jackson tank destroyers. They proved effective in infantry support. The M4 Sherman remains in service (as of 2019, only as presidential honor guard) in certain parts of South America.
* During the Horus Heresy, the Alpha Legion often went out of their way to aid Imperial forces even though they were on Horus' side, leading to speculations that they were
* During the "Hoverboard-mania" of 2015-16, multiple (mostly Chinese) companies producing self-balancing scooters/"hoverboards" got entangled in legal battles over the patents related to the devices, including the inventor of the "hoverboard" Dan Chen and even Segway, who asserted that they held the patents to a self-balancing scooter. One Chinese manufacturer, Ninebot, instead of trying to help resolve the legal battle, chose to
* During the HTRN takedown arc was broadcasting their communications on an open channel so that Tagon was also in the loop.
* During the Hungarian Revolution of 1956 against the Soviet Union, the US and other Western countries welcomed and encouraged the revolutionaries to not give up, but when the Soviets sent an army to crush it and things turned ugly, they didn't intervene, not even in a diplomatic way. The USA was, of course, accused of encouraging a suicidal revolution, just to show the world how brutal the Soviets are. Meanwhile a lot of revolutionaries died with the belief that the American help is just about to arrive.
* During the Hungarian uprising in November 1956, a hated monumental statue of Joseph Stalin (erected on the site of the city's cathedral, which had been destroyed in WW2 and the site levelled by the incoming Communists for a parade square), was physically torn down. It left only one booted foot anchored to the plinth with the rest of Uncle Joe facedown in the square. Visualised as a diorama model
* During the Hunter Exam arc. Gon and his companions (plus Tonpa "The Rookie Killer", a
* During the Ice Time (a time when every water and ice type in the Seafoam Islands is empowered), Ash barely defeats a Dewgong only to come across four others with pups, marking them as mothers. Ash doesn't even try to fight and simply flees as fast as possible. He later passes on the same advice to Gary when the latter decides to train there.
* During the imagination sequence of "The Pig Who Would Be Queen", Skeeter tells Piggy that she has to complete some tasks in order to prove herself worthy of being queen, to which Piggy responds by complaining that by the time she'd be finished with the tasks, she'd be a grandmother. When Skeeter asks what she said, Piggy claims that she said "You look just like your brother".
* During the Impel Down riot, Mr. 2 does this with Buggy and Mr. 3. They get past Magellan and then manage to reach Level 5 (in order to save a captured and poisoned Luffy) thanks to Mr. 2's ability to change his face to look like someone else. He disguises as Hannyabal and then takes the other two with him as his prisoners.
* During the Indomitus Crusade launched by the revived Roboute Guilliman, the Crusade reached Catachan only to discover the planet's...well, everything, was so deadly and aggressive even the daemon armies of Chaos fled the world and avoided it. Much to the Crusade's amusement (it even boosted morale). After all, horrific, world-smashing abominations from beyond the pale are afraid of a planet humans successfully settled. "Badass" doesn't even begin to cover the Imperial Guard (who

survive to become Veterans, at least).
* During the infamous Invasion storyline, Vince was initially a heel and gloated about taking over WCW, only to have the rug pulled out from under him by his son Shane. Shane was cheered for buying WCW. However, during the Invasion proper, Vince and WWE were the faces and the the WCW/ECW alliance headed by his children were heels. It all ended with Vince and his team lead by Kurt Angle defeating the Alliance headed by Shane, Stephanie, and Steve Austin (who'd defected halfway through). The very next night after the Invasion ended, Vince and Angle turned heel and Austin turned face.
* During the infamous Max Headroom Broadcast Intrusion, the person pirating the signal freaks out (something he does on several occasions during the broadcast) and gives the camera the finger early on, with a prosthetic lengthening his finger to enhance the effect.
* During the infamous Satanic Panic of the 1980's, lots of metal bands such as
* During the infiltration of the reactor, Vasquez and Drake disobey direct orders from their commanding officer (Lieutenant Gorman) and 2nd in command (Sergeant Apone) and re-arm their smart guns.
* During the infiltration of Yoyodyne, John Parker snaps the neck of a Red Lectroid.
* During the initial fight between Guise and Wager Master in the backstory to
* During the initial skirmishes of the war, Elites initially mistook the
* During the initiation of the first-year students, Glynda expresses pity for the stoic, serious Ren being teamed up with energetic, crazy Nora because she cannot imagine how they could ever get along with each other. However, they were friends prior to entering Beacon Academy and are so close that other students think they're in a relationship; even their team-leader, Jaune, makes that mistake until corrected. It's later confirmed that their friendship started long ago in childhood when they were the sole survivors of a village that had been destroyed by Grimm. For most of their lives they had no-one to rely on but each other, and it made them inseparable.
* During the intense battle aboard the station in "Severed Dreams", Garibaldi tries to set up station security at a chokepoint to repel incoming boarders. However, the recently-recruited Narns charge forward, unused to such tactics, forcing everyone else to do the same, and the firefight quickly breaks down into a massive melee.
* During the interbellum, it was "Hungary called, they want Transylvania back."
* During the interception of a malfunctioning agricultural robot at the start of
* During the intermission featuring the Midnight Crew versus The Felt, the Felt members Crowbar, Matchsticks, and Quarters have already been killed by the Midnight Crew. Due to the various time and space manipulating powers of the Felt, however, Crowbar still winds up fighting Spades.
* During the introduction to "MLF Lullaby", Tom Lehrer quipped that "Much of this discussion took place during the baseball season, so the Chronicle may not have covered it".
* During the introductory assault course, the range master has two Desert Eagles, him brandishing the chrome-plated model
* During the invasion of Gracemeria, the Emmerians were on the verge of pushing back the Estovakians, only for the Estovakians to deploy the
* During the invasion of Iraq, there were reported instances of Iraqi soldiers who pretended to surrender and attacked the American soldiers when they came close.
* During the invasion of Malaya in 1942, Japanese troops reported capturing or destroying numerous British "tanks." These were in fact Bren Gun Carriers, which were small, open topped armored personnel carriers (in fact smaller than a modern-day Humvee, and used in similar roles) as the British had no real tanks on their Malaya colony.
* During their 2018 college football rivalry game, a Harvard running back gave the bird to a Yale defenseman as he scored a touchdown. The touchdown was retracted as the result of an ensuing unsportsmanlike conduct penalty.
* during their alliance type who could never hurt anyone and therefore lacks the

kind of worries that consume him.
* During the Iranian hostage crisis (1979-80), one of the U.S. Marine embassy guards wrote patriotic and anti-Iranian slogans on the walls of his cell, in Spanish. His captors could not read them, and it did not occur to them to ask what the words meant.
* During their childhood, Shirley and Theo experience loud knocking one night on the walls surrounding them. They cower in fear on the bed until their Dad comes in.
* During their dinner together, Kermit and Miss Piggy get served some Sparkling Muscatel, "one of the finest wines of
* During their Dungeons and Dragons playthrough, druid Merilwen reveals a power she was keeping a secret: A new Wild Shape that let her turn into a bear. Immediately, her compatriots launch into a wide variety of bear puns. Ellen plays along with them, but objects to Mike saying "top koala-ty", because koalas aren't technically bears.
* During their Extra Life '15 livestream, they got Lindsay Jones to read an excerpt from
* During their fight, Drake does this when she notices Gunner is able to accurately shoot at her without even looking at her.
* During their fight in a hospital, Monster X throws Enjin out the window.
* During their fight, Kaku figures out he can retract his giraffe neck into his body (Which Zoro notes real giraffes can't do). However, he ends up causing his arms and legs to stretch out! Kaku then reasons that it's the same principle behind a pasta machine; If you put dough in one end, noodles come out the other end. Zoro lampshades the stupidity of that logic.
* During their first battle against Zabuza, Naruto comes up with a successful paln for him and Sasuke to free their teacher Kakashi from Zabuza's water prison, without even speaking a word. He simply tosses a
* During their first encounter in the sewers, Bradley cut off Greed's arm and manage to capture him before Greed could attempt to transform his entire body into protective armor.
* During their first encounter with the xenomorphs, the Marines panic like a bunch of schoolchildren.
* During their first meeting, Tohru apparently entered Elma's house like this according to a flashback in chapter 44 of
* During their first secret meeting in the garden, Anne attempts to coax Richard into disclosing his romantic affection for her:
* During their game against Johzenji, the characters of team captain Terushima and team manager Misaki get explored.
* During their initial landing, the Martians massacre most of the humans present to greet them.
* During their last week, the departing president typically delivers a farewell address to the nation.
* During their November 13, 2013 Nintendo Direct, the first shot of Reggie Fils-Aime's office is of his giant stuffed Mii head resting in a chair. The camera then pans over to the real Reggie off to the side as he begins his preview of upcoming games. The Mii head has no connection to the games being shown and is never seen again in the Nintendo Direct.
* During the Iron Hordes conquest of Draenor, many powerful groups on Draenor such as The Breakers, The Evergrowth, the Ogre Empires, and the Adherents of Rukhmar were mostly toppled, and later collapsed completely because of the Alliance and Horde players chasing after the Iron Horde; resulting in a massive power vacuum to form on the planet.
* During the Iron Lords' campaign to break the power of other arisen Guardian warlords abusing their power, their preferred tactic was to hole up in a secured location where their Ghosts could safely resurrect them and just keep shooting the enemy Guardians, letting them kill each other until the warlords
* During their peak, Duran Duran had three members all with the last name Taylor. Not one of them was in any way related to either of the other two.
* During their search for the Nile, May breaks the skid plate on his low-slung

car. He fashions a new one from one of Clarkson's car doors without Clarkson's permission. When Clarkson finds out, he takes a patch for him door from May's bonnet. May responds by stealing a piece from Hammond's bonnet. Hammond responds by stealing the toilet seat (
* During their "shopping" episode (showing where they get all their stuff), the
* During their staff's temporary stay in Boston Pete informs them that they won't have internet access, and advises the guys to make arrangements "porn-wise".
* During their stay in Canada at Mae's house, Mae and George make out on the bed. Mae's mum comes in unexpectedly and they scramble away from eachother. Mae's mum proceeds to leave the door open.
* During their test of the Renault Twingo, Ross Kemp climbs into the boot (or "trunk" if you're American) to demonstrate the space inside. He stays there the rest of the segment...including when Jeremy tries to jump the car onto the ferry back to England. During the subsequent host segment, he says that Kemp did not survive.
* During their time in the Shanghai Police, William E. Fairbairn and Eric A. Sykes would create a modern dagger that would be heavily associated with the S.A.S., and a fighting style to go with it: the
* During their tournament battle, Neon's glowstick-nunchucks use Frost Dust to freeze Yang's extremities. Yang smashes the ice and continues fighting as if nothing had happened.
* During their travels, Belgarath and Garion encounter an alchemist who
* During the Ishval flashbacks we see that many of the Amestrian soldiers, including
* During the jailbreak in Remy's second season, there's a bet going on who can escape first. Nikolai ends up owing Vivienne a gelato after she beats him to the rendezvous point.
* During the Janjira plant incident, Sandra Brody and the other inspectors run while being followed by an enormous smoke cloud, representing the leaking radiation from the reactor. Unfortunately, none of the inspectors that were ahead of her make it before the blast shield closes.
* During the January 18th Internet blackout protest, Gawker had a headline of "Today, some of the best websites on the internet—and Reddit—are blacked out to protest SOPA."
* During the January 3, 1993 NFL playoff game between the Buffalo Bills and the Houston Oilers, Houston was ahead 28-3 at halftime, and Buffalo's starting quarterback, star running back, and leading defensive player were all out injured. And then, on their first possession of the third quarter, Buffalo threw and interception, which Houston ran back for a touchdown, putting Houston ahead 35-3. The Bills radio announcers more or less declared the game over at this point.
* During the January 6th attack on the Capitol building, the rioters were lured away from the Senate chambers by a black police officer, potentially saving many lives. His name? Eugene Goodman, a name that literally means "Noble Good Man".
* During the Japanese invasion of Malaysia in WW2, British commanders using the telephone to communicate would find themselves
* During the Japanese occupation of the Philippines, American soldiers who escaped capture took command of local guerrilla groups and promoted themselves to the rank appropriate for the size of their band. For the most part, the US military honored these self-made ranks after the war.
* During the Jihad, the Homeworld Clans saw their Invader brethren as being irrevocably “tainted” by the Inner Sphere’s “barbarianism,” leading to the Wars of Reaving that left four Clans destroyed and the two groups permanently estranged from another.
* During the Jihad, the Word of Blake dusted off the remaining intact old plans from the Star League's
* During the Johto arc, when Ash and Misty were battling over a Totodile, Ash sends out Pikachu; Misty sends out Togepi. She tells Togepi to give Pikachu a great big hug, and he does just that. Between that and a Charm attack, Pikachu is sent running off the battlefield, since he wouldn't willingly hurt Togepi.

* During the Joint Training arc, he copies Izuku Midoriya's Quirk: One For All, and Midoriya is terrified that Monoma is going to break every bone in his body
* During the Joker's "Zodiac Crimes" 3-parter, he fed our heroes to a giant clam. The cliffhanger has Robin in the clam's mouth.
* During the July 2005 child abuse investigation of Michelle Crockett's house, a rookie officer ran out to puke in the weeds upon seeing the building's disgusting state. A
* During the Katrina hurricane, there were a lot of reports of gunfire shots in New Orleans after the levees broke. Much of those were agents part of Delta Green death squads sent to hunt down and
* During the "Kayfabe" era, the only time villains typically fought were in battle royals. However, there were at least two "heel vs. heel" matches in the WWF, both in 1986, and one in
* During the kayfabe, pre-cable television era, where WWF fans got most of their fill of wrestling through its syndicated TV shows, handicap matches were a great way to get the popular
* During the KC Grand Championship arc, Kaiba gets a bad feeling about one of the competitors, Siegfried Lloyd, and starts gathering intel on him. When one of Siegfried's friends refuses to cooperate, Kaiba sends his goons to make said friend an offer that he can't refuse.
* During the Kingo Island arc, Entenkun and his frost-based dimensional Paopei are defeated easily by Fugen's superior Paopei, but the latter, being a pacifist, tries to talk Entenkun into surrendering and even puts down his Paopei. Entenkun is seemingly ready to give up... only to mistake Fugen's goodness for foolishness and attack one more time. Unfortunately for him, Fugen made preparations for this.
* During the King Piccolo Saga of the original series, Tien is briefly suspected to be the
* During the Kojirō arc, the story eventually returns to the time of the Battle of Sekigahara, but this time in a lengthier way: the characters are put in the time of the prelude, then in the battlefield proper, and then in the aftermath where they must carry out survival missions under heavy hostility from mobs of angry peasants.
* During the Korean War, a number of U.S.-built recoilless rifles were captured by Chinese troops, who attempted to use them without being aware of how they operated. They didn't do it twice.
* During the Korean War the Chinese managed to move several hundred thousand troops to the border of Korea in complete secrecy by moving only at night and constructing camouflaged camps to hide from air patrols. Soldiers were ordered to stay completely still if an aircraft passed by, upon pain of death. Their offensive was so fast and unexpected that many UN commanders didn't believe the Chinese were involved at all in the beginning stages.
* During the Korean War, when China was sending large units of soldiers into North Korea, in order to avoid detection by the Americans they only moved at night. When dawn approached, everyone dug in and stayed out of sight and motionless until nightfall. Anyone caught moving was immediately executed on the spot.
* During the kreely rescue arc, they have a pool for how many of the slavers will surrender and how many will get killed.
* During the Krogan Rebellions the krogan began dropping asteroids onto turian worlds when the turians intervened on the Citadel's behalf. They rendered several planets completely uninhabitable this way. This just pissed the turians off even more.
* During the Lance Banson boss fight, his fangirls (Banson being a famous opera singer and
* during the last appearance of Seifer, we can see him with a very sweet smile, rather than the Smug Smirk.
* During the last arc, Krillin and 18 have a daughter named Marron, showing they got a happy ending. Initially there's
* During the last duel, the Student Council has nothing they can do. They idle around the Student Council balcony, dropping vague symbolism, backstory, and

ultimately cooking potatoes over a campfire, while they await the outcome.
* During the last episode, Evangeline intercepts a shot from Remington Smisse meant for her sister Cleophelia. Fortunately, it just hits her shoulder.
* During the last ice age of the Ultimocene, a giant, trunked bird called the neckbeard and its tribbethere predator the sabertooth circuagodog become obvious expies of wooly mammoths and saber-toothed cats. There is also a herbivorous knuckle-walking tribbethere called the treeskinner that closely resembles a chalicothere.
* During the last months of his life, Jim Varney was playing Cookie in
* During the last year of Bush's first term, civil unrest broke out when a resurfaced video showed the LAPD beating an unarmed African-American man, Rodney King. While Bush condemned the police beating of King, he spent more time criticizing rioters and calling for law and order instead of trying to understand the underlying socioeconomic causes of the unrest, making him seem insensitive towards the racial injustice experienced by African-Americans. During the last year of Trump's first term, civil unrest broke out when a resurfaced video showed the Minneapolis Police killing an unarmed African-American man, George Floyd. While Trump condemned the police killing of George Floyd, he spent more time criticizing protestors and calling for law and order instead of trying to understand the underlying socioeconomic causes of the unrest, making him seem insensitive towards the racial injustice experienced by African-Americans. Furthering the similarity, Bill Barr served as Attorney General for both presidents and was criticized for using the same hardline approach in both protests. Though somewhat subverted in that while the LAPD officers that assaulted Rodney King were acquitted, the Minneapolis officer that killed George Floyd was convicted and sentenced.
* During the last years of the USSR the central authority decayed so much that Armenia and Azerbaijan, still Soviet Socialist Republics, declared war on each other and Moscow was powerless to do anything about it other than bleat about peace. The war continued after the USSR's final demise, and Armenia and Azerbaijan still aren't on speaking terms.
* During the late 18th century and the first half of the 19th, this was very much
* During the late 1990s, when the garbage fad was around it's strongest, one of Future Of Wrestling's most popular talents was Al Bino, known for lack of regard for his body and use of ladders and chairs. The style would prove the be popular in the future, but it was
* During the late '70s and the '80s (several years removed from the glory years of Matt Busby and the holy trinity of Best, Law and Charlton), they fielded talented squads yet never won a single Football League First Division (England's top flight before the Premier League) title thanks to Liverpool's dominance, which was occasionally challenged by local rivals Everton. Then came the '90s, Eric Cantona, Alex Ferguson and Fergie's Fledglings (Beckham, Giggs, Neville, Scholes, etc.); suddenly, United
* During the late '90s, Ad Council ran a series of PSAs that ended with a character being exhausted after rather minimal physical activity, followed by the announcer saying "Exercised lately?" and the tagline "Get up. Get out."
* During the late '90s and '00s, there was a boom in vehicle design designed to evoke older periods of such, driven partly as a backlash against the wind-tunnel-carved lines of cars in the late '80s and early-mid '90s.
* During the late-game "Rescue the Queen" quest, you set out to rescue Loghain's daughter, Anora, from a fortified estate. As you escape, you're besieged by Loghain's
* During the later parts of the series some alien characters (Aeryn in particular) try to learn English; since everything is
* During the later stages of the book, when the Elf King has decided that buying orc guns is a good idea, the training the new Elf Marines receive gives the Orc cadre marines plenty of chances for this.
* During the latter years of the Cold War, the Soviet government promoted the career of Dean Reed, an American expatriate living in East Germany, as an alternative to decadent "rohk" music, which had replaced decadent "jast" music on

their hit-list.
* During the legendary Battle of Thermopylae, the Greek soldiers who fought the Persians reportedly kept battling their enemies even after their spears and swords were broken, battering them with their shields, eventually being forced to use their teeth and fingernails as weapons. Deadliest Warrior suggests that a Spartan shield punch, while obviously not a move to be used in heavy combat, was as or more lethal than the spears or swords. That's a lot of weight coming at you. Not to mention the circular (and actually quite sharp) edge of most Spartan shields. They could very well break bones and tear open flesh (albeit rather shallow) if used by the right people. Like the
* During the Leveson Inquiry, a man broke into Parliament's chambers to throw a plate of shaving cream in Rupert Murdoch's face. His wife Wendi responded by lunging for the attacker and slamming him in the face with her palm.
* During the life-threatening duel between Yugi and Jonouchi, where the winner gets the key to free himself from the anchor, Yugi chooses himself as Jonouchi's Spell Card's target. Yugi lose all of his Life Points, but Jonouchi realizes that his Spell Card allows him to be attacked by Yugi's Red-Eyes Black Dragon, so Jonouchi would lose all of his Life Points as well. Regardless how you look, Yugi lost his Life Points first, and Jonouchi needs minutes to figure out that he himself can be attacked. Both effects of his Spell Card do not work simultaneously.
* During the live episode "Ambush", recently reunited lovers Doug and Carol sneaked off to canoodle and make plans for the following night. When they noticed that the camera guy had followed them, Doug made several snide comments which amused Carol—until she noticed that the guy was waving at them and promptly flipped out upon realizing that her microphone was still on and that he had heard everything (they were concealing their new relationship from everyone).
* During the local Colorado election in November of 2013, a vote was held to decide whether a few of the counties along the north-eastern part of the state would secede from Colorado and create the state of North Colorado. The vote was shot down with an overwhelming majority.
* During the Long Night, Sansa remarks to Tyrion that out of all her husbands he was the best of them. While Tyrion is touched by the statement, he also notes that she is comparing him to
* During the Lost Agent Arc, Ichigo's friends and family are brainwashed against him, and the one ally remaining to him turns on him, stabs him and steals his power. Ichigo is left on his knees, powerless and sobbing. The Shinigami turn up to restore his Shinigami power in the same fashion as Chapter 1. His resolve returns in full force and he thrashes the
* During the Lynda Carter Wonder Woman series, Lynda performs this lift into carry many times, mostly on heavy looking men, and does it with ease.
* During the Mages Guild quest line, you will take on some quests for Ajira, the Balmora Guild Hall resident alchemist, who has a bet with Galbedir, the Guild Hall's enchanter, over who will reach the rank of Journeyman first. Ajira's quests involve doing things like sabotaging Galbedir's experiments while Ajira herself takes full credit for her research,
* During the Mahora Festival arc Negi decides that he doesn't know whether the
* During the main quest, it is revealed that the legendary dragon Alduin, who is supposed to
* During the "make your own menu" dinner service, Season 5's Ben insisted on making some potato dish he called "pomme fondant". At service, Gordon pointed out that
* During the "Mallcop Command" arc, Tagon allows their client to negotiate away their weapons and armor, making their jobs much harder. Shodan angrily asks if Tagon has turned into an adrenaline junkie who "needs more and more risk to get a fix." And then he realizes that Tagon is just a terrible negotiator.
* During the Mamasapano Clash in 2015, 44 members of the Phillipine National Police Special Action Force were killed in a firefight with MILF and BIFF rebels,including 35 members of the 55SAC,the only survivor of this unit was PO2 Christopher Lalan.

* During the man-cave episode, a chef had to build a table from leftovers of a party. He ended up shoving a bunch of beer cans into trash bags and
* During the Marineford War, Kizaru determined that the best way to keep the casualties low was to take out Whitebeard early on. However, his attack is blocked by Marco.
* During the Marley arc, the soldier who lures Galliard and Pieck into a trapdoor has their face obscured by the camera angles, this made the readers to speculate that they were someone known, like a member of the Survey Corps in disguise, Pieck even mentions that their face is familiar. Then it turned out that it was an entirely new character.
* During the match between Seirin High and Kirisaki Daichi High, Kentaro Seto serves as the Joker for the latter in the second half, helping Hanamiya to get steals.
* During the May Day 2012 protests in Montreal, a photo was circulated of protesters mocking police by dangling
* During the mayoral election, Marcus Vansted throws his hat in the ring by having a large boxing ring constructed and throwing one of his hats into it.
* During the McDonald's arc, Dr. McNinja interrogates three workers to learn Ronald's whereabouts. After they refuse to talk, he "super sizes their pain" by throwing one of them out the window. They were robots, but still... and then there's this line.
* During the meeting between Napoleon and Tsar Alexander at Erfurt in 1808, Alexander's brother Constantine apparently told one of Napoleon's aides: "I say, Monsieur Oudinot, if your august master were to give me one of his swords, I should take it to bed with me!" (the original French sounded even more like a
* During the meeting between the Princesses and Swift-Pad, Swift-Pad presents Luna with the hammer his people had specifically created for her over a thousand years ago, which she had commissioned for use against a powerful foe. It was incomplete when she became Nightmare Moon, but they held onto it until the present day, and her ability to recognize the runes on it is what proves to Swift-Pad that she's the same Luna from back then.
* During the Meiji period the government encouraged adoption of parts of Western culture/society and technology in hopes of "catching up" to the Western powers, both economically and militarily (to some factions, as a means to an end — being able to kick out the Westerners). However, while the government had a somewhat set idea for how to go about this — "Western technology,
* During the meme review with Amelia Watson, they come across one that questioned how Ninomae Ina'nis' tentacles work. Coco believes they're all in her ass, but Ame believes they're all connected to a base that goes in her ass. Coco also asks if Ame can stick a finger inside her butt after showing her model's ability to scratch it.
* During the mid 80's-early 90's there were several masked jobber tag teams including but not limited to The Conquistadors, The Cruel Connection, The Shadows, The Galaxians, The Thunderfoots, The Executioners, The Head Hunters, and various assorted Demons.
* During the Middle Ages, Constantinople embodied this trope (and to a lesser extent, the rest of the Byzantine Empire) with regards to Europe. At a time when Western Europe was still recovering from the fall of Rome and the resulting collapse of infrastructure, they had a teeming cosmopolitan city that maintained and improved on most of the old Roman building traditions. Add in fairly high literacy rates, a university system, a mature legal system, and a stable bureaucracy, and then compare it to just about any other European country at the time. Europe got better
* During the middle ages, Knights often wore types of helmets that covered the face, like great helms.
* During the Middle Ages, the jurisdiction depended on the personal status of the party and/or the place where the action took place. These jurisdictions were the feudal justice, Church justice, City justice, and the nascing Royal justice. For example, a cleric might expect to be tried in a Church court applying Canon law, a

peasant might be tried by his lord while burghers might be tried by their city. Furthermore, there were matter-related jurisdictions, such as treason being tried by Royal justice while heresy and marriage-related cases being tried by Church ones.
* During the middle of the Marispan affair (or the beginning of the Bet Your Life arc) in
* During the Midnight Crew intermission, each Midnight Crew member has an item that turns into a pornographic magazine, often revealed at embarrassing moments. Such magazines include
* During the mid-to-late Eighties, Disney made numerous videos for songs and ran them between shows under the title 'DTV', named after
* During the Miners' Strike in the 1980's, a similar picture was used by The Sun (
* During the mission on Sur'Kesh, the party crosses paths with a rampaging yahg. Shepard and Garrus can't resist the opportunity to crack jokes about the last yahg they encountered, which teammate Liara T'Soni
* During the missions "Close Encounters of the Zoshi Kind", they had a plan to build a "Doom Ray" that had a giant magnifying glass which they planned to use to project the sun's light onto Mount Sillimanjaro and melt the snow, flooding the city.
* During the missions "Missing Moshling Egg" through "Super Weapon Showdown", they had a plan to build a weapon that would destroy the sun and leave Moshi World in darkness.
* During the mission "The Vanishing Of Tyler Freeborn," players find a dark world-style replica of the entire town of
* During the mission to track down Morinth, a pair of turian muggers
* During the monthly Splatfest events, all the maps, with the exception of the
* During the Montreal Olympics of 1976, American swimmer Shirley Babaschoff made a rather bad joke about the gold-winning East German swimming team and their members' records, commenting on their almost manly voices. She was accused of being this
* During the most part of season one, she relied on explosions of sheer magic to win her battles against the more experienced Trix. It's worth noting that said explosions were harmful to Bloom as well.
* During the "Motto" season, there is a movie 26 minutes long. It was part of a triple feature with
* During the "Movin' Right Along" number, Kermit's response to seeing
* During the Munich Crisis in 1938, Poland sided with Nazi Germany to claim the disputed Teschen territory from the Czechs, only to be invaded by the Germans only a year later. The Slovaks and Croats sided with the Nazis to gain independence for their countries. The Finns, Hungarians, and Romanians sided with the Germans to retake lost territories from their neighbors (Russia, Romania, and Russia again, respectively). The list can go on and on.
* During the Namek Saga, Goku mocks the Ginyu Force's obsession with
* During the Nami vs Miss Doublefinger fight, battle music starts up when Nami tries using her newly acquired Clima-Takt against her, but said music dies out immediately after it summons harmless doves, much to her anger.
* During the Napoleonic Wars, in the lead-up to the Battle of Wavre, the French forces under command of Marshal Grouchy were debating how to position their forces. Several of Grouchy's subordinates suggested they "follow the sound of the guns" and join in the fighting happening nearby at Waterloo. Grouchy however had orders from Napoleon to deploy his forces near Wavre to block the Prussians from reinforcing the Duke of Wellington.
* During the Napoleonic Wars, Napoleon managed to take Moscow after the Battle of Borodino. However, this trope was averted. The capital had already been largely abandoned and set ablaze in order to deny the French Emperor the prize. He spent about a month there before pulling out, faced with the harsh Russian winter. Low on supplies, his Grande Armée was quickly whittled down to a tiny fraction of its former self by the unforgiving elements and by constant Russian hit-and-run attacks. This contributed heavily to Napoleon's eventual defeat. Actually zigzagged in that Moscow was only the second capital of imperial Russia after Saint

Petersburg, which was never endangered.
* During the national conflicts in the last years of USSR, a number of armored vehicles were stolen from museums and monuments, especially in Armenia and Azerbaijan. Few had working or repairable engines, let alone weapons, but even a towed tank hull is good for blocking a (mountain) road.
* During the Naughty Sorceress quest, you eventually come across a door that can be opened by any key, the contents of the door changing to reflect what key you used. Normally, you're supposed to use 6 keys that many would not have if they rushed through the game without exploring (e.g. many players had no idea the 8-bit realm existed and therefore never knew the existence of the digital key). That's not this trope. What is however, is if you decide to insert a balloon mon
* During the Navi-Gator minigame, a scare chord plays whenever Pat spots something in the hallway that scares him.
* During the NBA dunk contest, it's gotten so ridiculous that, although there are official judges whose scores are the only ones who count, most of the fans in the stands will have score signs as well to show their approval.
* During the "Necropolis" arc, Mega City One is conquered by the Dark Judges and the Sisters of Death and turned into a slaughterhouse. Judge Death is installed as Chief Judge, the Sisters
* During the Neroimus War, each nation has its own "Unidentified Weapon" that acts as a superboss to help out a country on its last legs. The Sal Kari Unidentified Weapon, the Ghalib, is about 210 feet tall, but has a maximum height of around 330 feet when it opens up its
* During the newborn babies' musical number "This World is Something New to Me", all of them tinkle in unison like a fountain at the end.
* During the New Guinea campaign, he never went to the front lines, which resulted in him repeatedly
* During the NFL season, Tony Kornheiser's radio show has a regular segment called "Jaws versus the Monkey". In which football picks made by ESPN analyst Ron Jaworski are set against picks made by "Reginald the Monkey", from the DC Zoo.
* During the Nick Bruiser fight you get to hit him as much as you like for the first few seconds without retaliation. For each hit you land, his strength goes up. Once he starts moving, if you were foolish enough to fall for it, his fists play out this trope.
* During the Night of the Long Knives, a 1934 Nazi purge to eliminate those viewed as obstacles of the new regime, SA leader Ernst Röhm was given the opportunity to kill himself in custody. His response was to declare that if Hitler wanted him dead, he could do it himself. After he said this, his guards left, and when they returned, they saw him standing in his cell with his bare chest puffed out.
* During the Normandy landings and afterwards, US Army troops working alongside their British counterparts would often get somewhat annoyed that the Brits would sit down and get a
* During the Norwegian-Swedish war in 1814, the fortress of Halden stood its ground against Swedish attacks for two weeks without surrendering. This fortress surrendered only
* During the "Nuclear Meltdown" encountered during his escape attempt,
* During the Ocean Marketing fiasco, Paul Christoforo tried to do this by listing PAX, E3, Germany, the mayor of Boston, and many more as people who would back him. It backfired when
* During the official surrender ceremony in Tokyo Bay on September 2nd, 1945, the US and allies made an effort to impress upon the Japanese what a colossal mistake it had been to
* During the Okinawa trip, after Tomo nearly drops Chiyo-chan over a cliff (albeit accidentally), Kagura does this to Tomo, even asking the "What are you, stupid or something?" question.
* During the Old Republic era, all savvy criminals knew better than to kill members of the Jedi Order, because any time a Jedi disappeared or turned up dead, more Knights would soon show up to investigate. The Jedi maintained this policy unwaveringly for millennia until

* During the Old War, the Orokin originally tried using their blindingly advanced weapons to fight against the Sentients. But since the Sentients were
* During the ongoing drug war in Mexico, the drug cartels have killed anyone who looks at them funny, much less people who stand up to them. As such, entire armies of armed vigilantes have formed in the affected areas. One issue facing Mexican authorities has been figuring out how to handle them.
* During the opening credits, claims are made about the regime of the Shah of Iran that are based on propaganda from the 1970s and have now been denied even by the current Iranian government. In particular, reference is made to a large number of people that died in Iranian prisons. No evidence for the existence of such people has ever been found.
* During the opening exchange of Satomi's first match, Yuuki restrains her with an arm lock, then slips her hand down Satomi's vest and fondles her. She shrugs free and tells her to knock it off, but Yuuki
* During the opening phases of the second Gulf War, it was necessary for the
* During the opening scene of "The Stork Job" he's sporting a bruised and scraped cheek from a fall while playing football on pavement. Asked about it by one of the other characters, Eliot replies irritably, "How was I supposed to know it was a lesbian bar?"
* During the Orange Islands arc, a group of Scyther chop her hair up
* During the "Orders" arc, ARC trooper Fives discovers the existence of an organic chip implanted into each clone trooper's brain at birth, enabling one to command the clones to commit any action without hesitation, including killing the Jedi. When he attempts to present his findings to the Chancellor, he is secretly drugged by the lead scientist responsible for the organic chips to make him appear insane. Furthermore, the Chancellor reveals that he's the one who orchestrated the implantation of the organic chips, and has Fives hunted down and ultimately killed before Fives can reveal the truth to the Jedi.
* During the original "Death Egg Saga", Sonic, Tails, and Robotnik all donned powered armor, though Sonic and Tails' were quite unconventional — Sonic rode around in the shell of Silver Sonic while Tails rode around in the shell of a SWATBot.
* During the Ouroboros attack on the Pantagruel, Musse orders a suicide attack on the Glorious, which is averted when Olivert reveals himself to be alive and arrives in the Courageous II. After the attack is repelled, Rean reveals that he overheard her order and approaches her with an expression that is calm but a clear sign that she's in deep shit, telling her that he needs to talk with her about being willing to needlessly throw her life away like that.
* During the pageant in "Hearth's Warming Eve", Princess Platinum (Rarity) haughtily leaves a meeting between the three pony tribes, but the effect is somewhat ruined when she puts her crown on upside-down in her haste to leave.
* During the Pantasia Employee Examination, the candidates are asked to bake croissants ("kurowassan"). Azuma,
* During the Pantyhose Taro arc, this antagonist kidnaps Akane and takes her to a remote temple in the mountains, then leaves to confront Happosai. Akane escapes, comes across a river, and leaps in... only to splash and sputter her way back to shore. She even says "Oh no! I forgot I can't swim!" afterwards.
* During the Paris tournament, William starts losing on purpose because his
* During the partial decolonization of Africa in the 40s following the conclusion of the Second Great European War, civil wars break out in Libya and Ethiopia between their pre-war royal governments and strong Soviet-backed Communist movements.
* During the party at Shepard's apartment, you may find EDI questioning a thoroughly flustered and embarrassed Samantha Traynor on how she found EDI's voice sexually attractive when they first met. This eventually moves on to EDI offering to send her links to lesbian organic-on-synthetic porn sites, to which Traynor responds "What? NO! No, no, no, no, NO! Okay, sure." Tali's
* During the Pegasus duel, it seems like nobody involved knew how Toon Monsters worked, having them be Normal Summoned through Ultimate Offering and getting their

levels reduced via Cost Down to reduce Tribute requirements—neither of these are true in the real game, where Toons can only be Special Summoned and have an explicit number of monsters that need to be Tributed to play them. Curiously, their "summoning sickness" (being unable to attack on the turn they're summoned) is kept intact, and it's also correctly ignored for Toon Dark Magician Girl (who doesn't suffer from it in the real game).
* During the Peloponnesian War, the Athenian general Demosthenes once led a group of
* During the penultimate battle in the Super Spiral Universe, Team Dai-Gurren of
* During the period between Hawkgirl leaving the League and coming back, Dr. Fate put the mace into a pocket dimension rather than have it lying around his tower. Just having it around messed with his magic, nobody has to be weilding it.
* During the period of the 2018 referendum to repeal the Eight Amendment (which prohibited abortions within Ireland), both Facebook and Google banned all advertisements from both sides, after it was revealed that the anti-repeal movement had used foreign advertisers to increase their publicity.
* During the period when Super Sugar Crisp was changing its name to Super Golden Crisp, the commercial mascot (Sugar Bear) gained the power to transform himself into
* During the period where the name changed from Super Sugar Crisp to Super Golden Crisp (because sugar had recently become demonized), Sugar Bear could transform himself into "Super Bear." This was meant to transition to a mascot without "Sugar" in his name; however, Super Bear looked like a real, full sized,
* During the persecution of Jews in Eastern Europe brought on by an unofficial crusade (led by a monk between Urban II's call to crusade and the sanctioned departure time of the First Crusade), there were stories of Jewish women killing their children to avoid their dying a worse death or being forcibly converted.
* During the Pertwee era (and a little bit of the Tom Baker era), the only members of UNIT who do not wear British military uniforms are the Doctor and whoever is currently employed as his assistant(s) or whoever is going to be his companion at the end of this story, who wear their own civilian clothes. It's quite jarring to see shots of the Brigadier, Yates and a bunch of
* During the physical exam for hero school, Uraraka gets the high score for distance throwing by using her zero-gravity power to gently toss the ball out of orbit, ending in a twinkle.
* During the Piccolo Jr. Saga of the original series, Piccolo put Goku through a torture session so brutal and horrific it would make Frieza proud. First, he blasts a hole the size of a fist through Goku's shoulder with a
* During the planning for Emperor Gregor's wedding, Captain Ivan Xav Vorpatril is assigned to help the upper-class women planning the thing, which is strictly-speaking below his pay grade. This includes his own mother, the Emperor's social protocol manager. He describes the situation in the following picturesque metaphor;
* During the pod ride in the Citadel, among the Striders and Gunships you see are the
* During the Pool of Youth arc, Castor goes to confront Toar, an immense man. Toar socks Castor so hard that he goes flying right over Popeye's head.
* During the poorly received "The Other" storyline, a subplot involved Spidey fighting a new villain named Tracer. Tracer at first seems completely forgettable, literally just a punk with a gun, but he is later revealed to be a robotic entity that claims to have arisen from the internet as a sort of god to the world's computers. He gets destroyed, but declares that he'll be back. He hasn't been back.
* During the Pop-Tarts "Hide and Seek" campaign, Chocolate-Vanilla Splitz was cut in half by a door.
* During the Popularity Poll arc, Shinpachi wonders what Sadaharu and Elizabeth are up to due to having not seen them for the entire arc, after which it cuts to the former giving the latter an extremely graphic beatdown that's impossible to take seriously due to their appearances.
* During the post-TV series era, saying that Flippy has fully gotten over his flip-outs was enough to garner the wrath of fans. It didn't help that the next time

a flipped-out Flippy appears, it's only in Flaky's imagination ("Without a Hitch"). The fanbase has calmed down since the release of the Love Bite short "On My Mind", which depicts Flippy flipping out.
* During the post-war era, the Communist Russian villain was a common stock character in many local to national promotions of the time. The wrestler playing the Russian didn't even have to be from Eastern Europe or hail from behind the Iron Curtain ... he just merely had to affect an accent, come up with some anti-American rhetoric, wear clothing that had a hammer and sickle on them and voila, instant trope maker.
* During the Prague Spring, the inhabitants of Prague removed or painted over street names to confuse the invading Red Army.
* During the pre-cable and kayfabe eras, where the internet was still things of science fiction, many title changes weren't aired on television until several weeks — sometimes six weeks — after they happened, but the former champions will continue to defend their titles until the title change airs on television. One frequently cited example is
* During the pre-mid 1990s era, when wrestling operated as strict kayfabe and most wrestling programs consisted of several matches with established wrestlers taking on jobbers, promoters might turn an already imposing heel wrestler and turn him into an unstoppable monster by having him continue to physically punish a jobber long after scoring the victory. Often, this consisted of the heel using his finishing hold — always powerful, and used solely to inflict great injury — one or more times after the final bell. (Usually, the Heel would then take on the top babyface, who — sometimes after taking the finishing move several times — would fight back and defeat the heel.)
* During the premiere of "The Best Night Ever", the ad for the Gyrobowl kept playing during every break.
* During the premiere of the series finale, most of the ads were shown more than once. The most notable offenders were
* During the presentation of tributes in Emperor Ming's audience hall, Prince Vultan tries to give Ming the fabled Ice Jewel of Frigia. He says the Hawkmen took it in battle. Prince Barin angrily challenges him, saying that Vultan stole it while the Arborians were burying their dead. Klytus forbids them from fighting in the Emperor's palace, but it's apparently O.K. for kingdoms to fight one another everywhere else.
* During the presidential election episode, Nixon's head is asked if he would steal candy from a baby. A visibly flustered and stammering Nixon equivocates, then states he would certainly never hurt a child.
* During the Priestess Social Link, Yukiko's strongly considering leaving Inaba behind once she graduates from high school, rather than inherit her family's inn. However, she politely disagrees when a shady reporter calls Inaba "the dumps," and angrily calls him out when he proposes doing a sensationalist piece on the inn. Both instances, along with the numerous times she mentions how important her family and the inn's staff are to her help Yukiko to realize that the inn is important to her and convince her to stay in Inaba.
* During the prison sequence, you're told that there's an anti-magic field in the prison that prevents magic from being cast properly. Selphie attempts to use cure, but it doesn't work very well. As such, they say that they have to rely on their weapons, so it's up to Zell, since he uses his fists as his weapons. However, the second you gain control of Zell, he has full access to and use of magic, and so do your other characters during the battle with Biggs and Wedge. Afterwards, when you leave the cell, an announcement comes on that the anti-magic field will be lifted. This, however, doesn't explain why your characters were able to use magic before it was lifted.
* During the production halt observed for the 2007-08 Writers Guild of America strike,
* During the production of the Internet series, most of the writers, with the exception of Rhode Montijo, did not like Disco Bear because they found him annoying. It was not until the TV series

* During the Prohibition Era, alcohol (both locally-produced and smuggled in from abroad) was sold in secret bars called speakeasies.
* During the Prohibition era, the police and the bootleggers were public enemies but secret partners, and the police would casually look the other way on speakeasies and gin-mills for a small fee. Many of them were fired when they were seen buying diamond rings and expensive furs.
* During the prosecution of a young woman accused of killing her mother so that she could have her stepfather all to herself, the DA's began to suspect that the girl was telling the truth—that the man had seduced her and killed his wife when she found out and threatened to both divorce him and have him charged with statutory rape. To that end, they called both the girl and the stepfather's new girlfriend into a conference room and gently asked the girl to describe what the man had said and done when making advances to her. The girlfriend's horrified reaction to what the girl was saying cinched it.
* During the protests in Hong Kong (against the planned extradition bill), many pro-democrat protestors took to destroying surveillance cameras in Hong Kong Island in order to avoid being recorded and later on, arrested by Hong Kong law enforcement agencies.
* During the Protoss campaign, Tassadar is under attack from the Conclave for allying with the heretical Dark Templar, even though the Zerg are a considerably bigger threat. In the final level (the destruction of the Overmind), they finally approve of Tassadar's actions (although as Raynor dryly notes, they don't send any actual help).
* During the PTV Park era, it was common to see "Check It Out" and "Another Pointer From Paula Poundstone", as well as the
* During the quest "The World Wakes", the player is given a test to become a guardian of Guthix. To pass, you much give one
* During the quest where you have to collect Tannis's ECHO logs in Sanctuary, regardless of the order in which you retrieve the ECHO logs, the audio being played will still be in sequence as Tannis records her story from start to finish.
* During the quest where you have to find Helena Pierce's audio logs, if you try to destroy the ice block on top of the house near a vending machine (the location of the second ECHO log) before the audio of the first ECHO log even finishes, the ice block will respawn, with a chance of spawning additional cash.
* During the quick-cut montage of games showcasing the Angels' miraculous comeback from last place in the league all the way up to the top of the standings after the All-Star break, there is one instance of a game against the Yankees where George Knox (the Angels' bench manager), after seeing another outstanding defensive play, excitedly waves his arms to indicate the "angels are here" sign, only to turn and see Roger (the only one who can actually see said angels) just shake his head to say "no, there weren't angels there". Knox gives an understandably shocked, "No?!" of disbelief.
* During the Quincy assault on Las Noches, Gilda attempts to invoke her Resurreccion, but Twilight Sparkle casts a silence spell on her to prevent her speaking the
* During the "Race to the North" Richard Hammond got to ride the Vincent Black Shadow motorcycle and spent the early part of the race constantly mixing up the brake and the gear lever which were reversed compared to the more modern bikes he was used to. So every time he wanted to change gear he ended up stopping.
* During the Ragnarok arc, Takeda, being a former professional boxer, challenges Kenichi to a match with rules based on boxing (he draws a ring with chalk on the floor, has a stopwatch to keep count of the ten three-minute rounds, and victory is decided by knock out or a TKO from going down three times in a round. Also, Kenichi will be able to use all his limbs to strike because he's an amateur martial artist while Takeda will only use his right fist because he's a former pro boxer and because he can't actually use his injured left arm). And Takeda, in spite of being a gang member, actually means it: when he knocks Kenichi down twice in the first round he just starts the counting, and even when Kenichi gains the upper hand he refuses to use his legs for anything but movement, with his only bit of pragmatism

being attacking the moment the second round started while Kenichi was still engrossed in the tale he had been telling during the pause. On his part, Kenichi doesn't inflict him a knock-out hit because the stopwatch had just rung the end of the first round, though he takes full advantage of his ability to use kicks.
* During the raid at the beginning, Prestor just stands in the doorway, while the rebels spray his location with submachineguns. Despite them knowing where he is, and him being illuminated by their fire, none of the bullets hit him.
* During the Raid on Maybros, Durren Stallhart is shown fighting with
* During the raid, the pilots are trying to setup the 50 cal anti-aircraft gun. Another bomb skitters across the flight line and the guys duck for cover. When it stops near the AA gun, it sits there as a small propeller start to spin. Just as one of the pilots pops up and declares, "It's a dud! It's a (blam)."
* During the Rando Army battle, Brad suddenly develops new moves in the middle of the fight (
* During the rather light first instance, she broke into Kutou Palace with two Seishi to find the Shi Jin Ten Chi Sho and Tamahome; she is captured but manages to escape, and Yui lures her ex-best friend to her with food. Miaka tries to talk some sense into her, and the trope turns straight when Miaka sees
* During the Reapers' Final Offensive, one of them suicide rams Tuchanka with a Naquadah
* During the recasting for its remake, Pegasus Prime and the 3rd game, Legacy of Time, apparently he shaved it to a mustache.
* During the regency of Aegon III, Baela Targaryen proves to be a handful for the regents. When they're worried about the line of succession (since Aegon is quite young, and there's a
* During the Reigning storyline, Rune King Thor, which is THOR empowered with BOTH the Odinforce (his father Odin's power) and power gained from magical Asgardian Runes, curbstomps pretty much everyone in his path, even defeating both Thing and Hulk TOGETHER off-panel, but Cap lays quite the beatdown on him.
* During the Reilly's Ranger's quest, the main marker path leads you eastbound from Metro Central to Freedom Street and the Mutant-infested and irradiated Vernon Square, which is the main entrance to Our Lady of Hope Hospital, but Reilly recommends an alternate route to the hospital from Dupont Circle through the Dry Sewers.
* During the religious persecutions of the fanatical Mughal Emperor Aurangzeb, two Sikh boys
* During the retreat from Paris, the Allies are forced to destroy many landmarks to keep the Nazis from using them as vantage points; the Eiffel Tower is shown exploding.
* During the retreat, the Duke of Aosta, commander of the Third Army, had an infantry brigade and a cavalry one hold a rearguard action against pursuing Austro-Hungarian and German forces totaling three divisions.
* During the "Return of Queen Chrysalis" arc, the Mane 6 are affirmed of the CMCs' identity because of their talk of getting their cutie marks from being fillynapped (cue deadpan "It's them" from Applejack).
* During the revolt of the Hereros in the German South West Africa, Lothar von Trotha announced to his troops that he would pay 1,000 mark for each rebel chief, and 5,000 for Samuel Maherero.
* During the Rhine crossing in March 1945, an accident in handling the load caused several men to be soaked in the fuel mixture used by British flamethrower tanks. While this did not ignite (it was designed to be as inert as possible in the absence of sparks or naked flame), they had to be rushed to the rear — very carefully — for extensive chemical decontamination and medical treatment. One man got it in the eyes and was blinded for life. Paradoxically, the greatest hazard was not fire but cold. The sublimation of the chemical components under normal air pressure lowered the skin/body temperature of one completely immersed man, to the extent he had to be treated for exposure and possible frostbite.
* During the rise of image macro/"advice animal" memes in the early 2010s,
* During the ritual to cure Remus, a local wolf pack leader is displeased at

Harry's and the werewolf's presence, so he challenges Harry to a honor duel... and attempts to make it a fight to kill. However, with Harry's physical changes, all it does is nearly get
* During "The Robots of Riga", Lois and Jimmy are almost kidnapped to be put into a People Zoo. After Superman rescues them, Clark asks Lois if she has anything to do that afternoon, suggesting he and she might take a trip to the zoo. Lois responds by throwing something at Clark.
* During the Romantic/Victorian era, the English public developed a fad for "regional" cultures such as Wales and Scotland, which was exploited by writers
* During the Roseanne Roast, when she was doing her "shred the other roasters" rebuttal, she turned to
* During the Rumors Arc, she assumes the form of a filly named Creative Spirit while helping combat the Rumors with the other Elders.
* During the run up to the 50th anniversary in 2013, BBC America aired monthly specials called
* During the Russia Arc, a Russian ally's worker is sent on an errand and the protagonists end up receiving their pizza order with his sliced off face plastered across said pie. Also lets not forget what happened to the President during the final arc...
* During the Russian Civil War the Red Army was being routinely hammered by the Whites and all the revolutionary proletarian fervor in the world couldn't help them. Trotsky made the decision to recruit former Imperial Russian Army officers, despite the Communists' lumping them as members of the corrupt system they were trying to overthrow, and they managed to instill some professionalism and experience. Well, until a younger Stalin locked many of them in barges and sank them in the Volga River.
* During the Russian Revolution, the Bolsheviks briefly considered killing only Tsar Nicholas and his son Alexei to get rid of the heirs and letting his wife Alexandra and four daughters live to not be seen as callous murderers of women. They decided against it when they realized that their relatives in the rest of Europe (mostly Alexander's cousin Kaiser Wilhelm of Germany) would send their armies to get them out if they were alive. Not wanting to get dragged into a power struggle, all seven of them were murdered in July 1918.
* During the Russo-Japanese War there was an all-woman cavalry regiment. The officers were daughters of the country nobility who from hunting could ride and shoot as well as their brothers; the enlisted women were recruited from a Central Asian tribe with a strong Amazonian tradition.
* During the Ryugu Shelter arc, cyanide pills are thought of being slipped into everyone's food and water supply after the parasitoid infection became severe. The director of the shelter was finally given one but begged everyone to please hold up a while longer.
* During the Saboady Archipelago arc, the Straw Hats are forced to do this when they find themselves underpowered to deal with the Marine Science Captain, Sentoemaru, and a fresh Pacifista after just
* During the sack of King's Landing in Robert's Rebellion, Tywin Lannister told Gregor Clegane and Amory Lorch to find and kill the Royal family. Lorch killed Rhaenys Targaryen (a three-year old) by stabbing her
* During the "Sacred Ashes" quest, Dog licks an ominous desk covered in blood, and starts to growl at it, noting that something is not good within Haven.
* During the Saiyaman Saga, some thug picks a fight with Gohan, and punches him in the face. His reaction afterward? "I think I broke my hand on that guy's face!"
* During the same arc, Natsu and Wendy were captured by the king of Edolas and drained of their magic; having been unable to use it in Edolas, they couldn't use their powers to escape and had to be rescued by Lucy, Erza and Gray.
* During the same episode, Ayame realizes Tanukichi's begun to idealize her as well. So she reminds him that
* During the same episode, J.D. is singing "It's A Beautiful Morning"
* During the same episode, Marge's line "As long as everyone keeps filming one another, justice will be done." was a joke

* During the same episode, Ranier says "Remember when I said I would eat you last? I lied." to a steak.
* During the same mission, another SEAL is almost killed but ends up concussed and in a lot of pain instead. When the suicide bomber rushes the team, the injured SEAL is in a position to stop him but his injuries make him too slow to react. His comrade sacrifices himself instead to save the team. The injured man feels extremely guilty over this but a more experienced veteran tells him to knock it off. There was nothing he could have done given his injuries and they need to honor their friend's sacrifice by accepting the decision he made was the best one under the circumstances.
* During the same mission Shepard can order a turian to stop harassing an asari. If Shepard is female,
* During the same scenario, the ghost of Abel appears on the scene in an attempt to redeem Caine, offering forgiveness to his cursed brother. Storytellers have the option of letting this stand as a
* During the same time period in AAA, Silver King put the mask he lost to Hijo del Santo years beforehand back on, now calling himself Silver
* During the Sanctuary mission in the third game, Miranda reveals that everything she'd been doing in the past few months was a result of this feeling. Her words after killing her father? "It's finally over, for both of us. We can stop running."
* During the SARS outbreak, internet chain letters claimed things such as Vitamin C, Belladonna, and Colloidal Silver would cure it. Vitamin C is fairly tame, but Belladonna is a poisonous plant and Colloidal Silver will
* During the Sasuke Retrieval Arc, Shikamaru is facing off against a kunoichi that is able to control a group of monsters through flute-playing, and Shikamaru can't fight three opponents at once. He takes cover behind a tree and then goes over the inventory of the tools he has in his pouch. That's it. Next he's just throwing things at her...in a way precisely calculated to get her into the optimum position for him to use his final tool, a flash bomb that allows him to use his Shadow Controlling Jutsu to take control of her monsters and control them the way she does.
* During the scenario where Megumi and Minato disembark with Akito, they are removed from the Gravity Blast Cannon's animation.
* During the scene of Hal explaining why there are no subtitles for the speakable characters from episodes 8 and on, someone was apparently fiddling with the subtitles. The subtitles eventually turned into "I secretly love Kamek." when Hal said "Sometimes I really, really hate this place." Kamek saw this and said "I knew you were gay!"
* During the scene where character Norrington is made a Commodore of the British Navy, Davenport comments "how can one man be wearing that much brocade and
* During the scene where Donald Duck starts losing his mind due to a lack of food, he sees an axe and then looks evilly at Mickey. He goes to get the axe, and then Mickey says, "Donald! No!" It's set up to make you think Donald is going to kill Mickey, but Donald actually went outside to kill the cow.
* During the scene where the unnamed female champion of one of "The Programs" is shown on TV, the manga version of
* During the scene with Johnathan and the brides who proceed to seduce him, at one point, the camera cuts to a mirror above their bed. Johnathan is the only one reflected in it while invisible forces pull at his clothes and cut into his skin.
* During the scene with the collapsed TV tower, head of PR for the Tour, Virginia Vennett, is on the putting green to consider the rules in effect, and after it's determined that Happy has to play the ball with the collapsed tower in the way, suggests to Happy that he two-putt around it and go to a sudden-death playoff. Not only would there be very little reason for the head of PR to be involved in such a ruling, but it's explicitly illegal for a player to get "advice" (like, say, how to play a shot) from anyone other than their caddie. Exactly what the punishment would have been is questionable, considering that Happy didn't ask for Virginia's advice in the first place and ignored it anyway. But for
* During the School Arc, the elephant that Soma rides into school on also becomes

important twice- and yet it still manages to be hilarious every time it shows up. First it gets spooked and destroys Maurice Cole’s room, forcing him to share with Soma and giving Soma the chance to catch him sending notes to his underlings and

* During the school trip to Kyoto, the boys are still in the hot spring after it changes over from men-only to women-only. If they are caught, Mitsuru will not take any excuses and had them executed.
* During the Scrambled Eggs arc, Miku (disguised as Itsuki) tells Fuutarou that she wants to end her relationship with him. As she later tells to the real Itsuki, she did this because, in her mind, Fuutarou doesn't see them as girls, only as his students. When she conftronts him one last time and dares him to guess her identity, she's mentally
* During the second appearance of the Mood Reversal device, there wasn't any costume switching. However, when a person was hit, they would glow Red for evil or Blue for good. The only real change that could be noticed was that evil was less cowardly and Ron Stoppable was competent.
* During the second episode, an ad for Bennesse's Challenge Ichinensei program with a song by King and Prince played twice during the break before the show began.
* During the second fight between Yang and Adam, Adam screams "What does she see in you!?" There's a long list of reasons, but the most immediately relevant one is that Blake and Yang are equal partners who help each other, which contrasts with Adam who used emotional manipulation to make Blake feel guilty for hurting him whenever she stepped out of line.
* During the second half of the decade, Canada became the Anglosphere's cultural center. Already popular because of two fellows called Justin (
* During the second half of the final battle, if you stop blasting Mother Brain for a moment, you'll notice that she attacks much more frequently (bordering on
* During the second interlude, Cucumber is futzing around with his wand in the background while the Dream Oracle addresses the group. He's confirming that his wand can indeed equip the Disaster Stones (which he'd done by mistake earlier), an ability he puts to good use in Chapter 3.
* During the Second Opium War, the British and French sent what amounted to little more than three divisions (not even 60,000 troops) to escort their ambassadors to Peking - ostensibly in the hope that they would be recognised as equals rather than being made to do the kowtow and be officially recognised as vassals/servants. The Qing court umm-ed and ah-ed and eventually met them with armed force when they kept marching on the capital. However, their decently-armed but disorganised and ill-led force of 200,000 (which had zero experience of modern warfare to boot) was quickly routed and the Imperial Court fled the city still refusing to negotiate. The Allies stuck around and pillaged the place until they did.
* During the second round of the 2017 World Baseball Classic, Puerto Rico managed to defeat the United States in a narrow 6-5 game during their undefeated run to the championship game. With them set to play the USA again, the Puerto Ricans already began preparing for a championship win with customized t-shirts, a booked flight back to the island, and a parade in San Juan. Team USA caught wind of this and the players were
* During the second season, co-star Fred Berry demanded a higher salary and better studio accommodations for the actors, a dispute that eventually led to a full-fledged walkout by Berry and star Ernest Thomas during the second season episode "If I'm Elected".
* During the second season episode "What Ever Happened to Della Duck?!",
* During the second season (filmed in 2006), they revealed that they'd shot some footage to be used as a flashback for the
* During the Second World War, Hitler had tried to purge the German airwaves of everything "degenerate" and un-German. Towards the middle of the war, however, his propaganda minister, Joseph Goebbels, had realized that most people didn't want to spend the whole day listening to Wagner, stirring martial music, and Oom-pah-pah traditional tunes (while Allied bombers droned overhead), so he did the logical thing and

* During the Second World War, some bombs dropped over Britain by the Luftwaffe intentionally featured such designs, on the logic that simply blowing up a building causes trouble, but calling out the bomb squad could drive an entire town to a standstill. In fact, the later generations of bombs were designed to blow up when the disposal tech tried to follow the correct instructions for disarming the previous generation of bomb. It was only when the UXB teams got lucky and found a few duds of those models that they could safely take apart to figure out what the new extra disarming steps were that this stopped happening. There is a story, possibly apocryphal, that some of these German designs had been registered in the London Patent Office before the war, but that nobody thought to look there.
* During the Second World War, thanks to the armored flight decks of British aircraft carriers, they could no sell
* During the Second World War, the Finnish army made a point of this. Turns out it worked really well to scare your opponents. The Finns usually collected their dead during the night. Thus when morning came and the Russians surveyed the battlefield all they found were their own dead soldiers. Not knowing whether you actually killed any of your enemies (or the cold brought them back to life as Knife-wielding sniper-zombies) plays merry hell on their morale.
* During the September 11 attacks, FDNY Chief Peter J. Ganci Jr. remained at a command post at the World Trade Center, even when it was clear the North Tower would also collapse, and died when debris fell on him. The last thing he said was "I'm not leaving my men."
* During the September 11th, 2001 attacks, broadcasters had far bigger things to concentrate on than FCC regulations, so most news broadcasts gave viewers an almost uninterrupted 8-hour stream of
* During the sequel this gesture is used by Second Skeleton to show his distaste to others because he lacks both vocal cords and expressive facial muscles.
* During the series (and for many millennia before it), genetic manipulations of the Younger Races make them see the Vorlon
* During the series finale, Asami is the Sato family's last survivor, because her mother was killed by the Agni Kai triad when she was 6, and her father perished at the hands of Kuvira.
* During the series finale, Toph, Sokka, and Suki ride on an animal called an "eel hound" which is renowned for its speed over both land and water. It's supposed to be a hybrid of greyhound and eel, but in effect it resembles a four-legged dinosaur.
* During the series itself, Lennier commits such a tragedy in "Objects At Rest" when he
* During the "Sharp" season, there is a movie 27 minutes long. It was part of a triple feature with
* During the shooting itself, a library phone line was left open by a teacher who called 911 before the shooters' entrance forced her to leave the phone to go hide. The open line caught and recorded the sounds of students being killed and injured, the dialogue of the shooters to their victims and each other, and after the shooters leave, the surviving students being told to quickly flee out a nearby door, then dead air.
* During the shootout that leads to his cryo-imprisonment, Sgt. John Spartan does this with a pair of customized Super Blackhawks in the novelization of
* During the Showa era, writer Shozo Uehara likes to have his characters existing in a Verse.
* During the show's 25th season, one round had a "Big Money" space that could award up to $25,000 if a player hit it at the right time and found a letter in the puzzle. At least one contestant won the game because of it.
* During the show's first run, Lois would have Meg take Stewie up to his room before starting serious conversations that she thought too mature for him to witness. Here's one example.
* During the Sicily campaign, General George S. Patton slapped a soldier suffering from shell shock in two separate incidents. One was later found to be suffering from malaria, the other was

* During the side-quest "The Ice Man Cometh", Claptrap has the Vault Hunters sabotage the heaters in a bandit camp in the hopes that the bandits will "chill out". When this
* During the Siege of Alesia, the besieging Roman army under Julius Caesar received news that a massive Gallic relief force was coming. What did Caesar do? Break the siege and withdraw? Finish the siege before reinforcement arrived? Nope. He instead doubled down and built another layer of wall, so that when the relief force arrived, they had to
* During the Siege of Leningrad, the besieged civilians had almost no food and had to eat whatever they could scrape. The oft-told tales of
* During the Siege of Leningrad the pharmaceutical factory synthesizing Pervitin reportedly survived the initial attacks and was later considered an asset just as important as the dwindling food supplies. The meth probably was not the last reason why Leningrad survived the first, most brutal winter of the siege, when a huge city was left with no utilities and almost no supplies. Otherwise, though, Soviets weren't big on meth, limiting its use to the most desperate of the situations only. They had
* During the Siege of London, Floki attempts to negotiate Thorkell's return to the Danish fold (and the surrender of London) until Thorkell makes it clear
* During the siege of Malaga in 1487, an old Moor named Ibrahim al-Garbi went to the Christian camp and asked to be brought before King Ferdinand II, claiming that he was defecting and wanted to share information on the defenses of the city. Since Ferdinand was asleep, he was brought to a different tent to wait for an audience, where he found Queen Isabella's handmaiden Beatriz de Bobadilla, playing chess with a distant relative of the monarchs, Alvaro of Portugal. Mistaking the couple for the royals,
* During the Siege of Mechanicsburg, at least twice random Sparks send their clanks crashing in through walls to rant at and attack people.
* During the Silly Song "Oh Santa", this happens to the bank robber. Twice.
* During the sinking of the Titanic, the stern of the ship (where most people still alive had fled) broke off and appeared to be floating normally. For a moment, it appeared that a major disaster had been averted, until the stern too began to sink and doomed all but a few that hadn't escaped on lifeboats.
* During the Sith Warrior prologue, you deal with an assassin who killed a high-ranking operative in the Empire. The jailer, and quite a few other Sith, think that she was hired by the Republic, but she reveals herself as a freelancer who works for the highest bidder. The Light Side option is to recruit her into Imperial Intelligence. Your trainer, Overseer Tremel, commends you on the decision, telling you that
* During the sixth-season episode "The Housewarming", Reba meets Brock at a bar as his confidant and
* During the Slayer's Take quests, in which the party was split into two groups and joined by guest players, Percy loses his token status due to being put on a group with Lyra the human wizard
* during the snowmobile mission, he doesn't. May indicate that he is still not one the same level of badass as Price.
* During the Solomon Singularity, when Mash Kyrielight sacrifices herself to shield everyone from Goetia's attack, Ritsuka Fujimaru picks up her shield and uses it to beat Goetia to death. Mash is later resurrected and the shield is returned to her.
* During the song "I Just Can't Wait to be King" features weirdly colored animals, in contrast to the more-or-less realistic colors of the film. Though this may be considered an
* During the song "La-La-La-La-Labia" of the episode "Clara's Dirty Little Secret" of
* During the song "Mix and Mingle Machine" for one, which Mixes and Mingles you quite violently, especially when you want to travel tangential to your motion.
* During the song "The Reynolds Pamphlet," Thomas Jefferson gives a copy of the titular pamphlet to the director of the pit orchestra.

* During the So Totally the Drama arc when Clover learn that Kim and Ron we're dating she was disgusted, she mock the both of them behind there back, whispering to Alex that Kim is either desperate or hoping Ron would become rich again. Despite the fact that she dated Ron for his money and regret dumping him when she learn he get his money back.
* During the Soul Society arc, Yoruichi advises Ichigo and friends to run if they meet up with a Soul Society captain. Chad ignores the advice and ends up getting captured. Uryu uses a
* During the Soul Splice, Vaarsuvius' red robes turn black and their hair becomes long and wild.
* During the South America Special, as they hack through the rainforest:
* During the South Heights liquidation arc Cooper decides to fire an employee because she's been stealing from the till, and gets advice from Marla on how to do so without outright accusing her of such (cause that could lead to a lawsuit). Marla tells him to fire her not for stealing, but incompetence. Stuart (who has never trusted Cooper) is appalled that Cooper took action without consulting him, and then laughed at him when he found out Cooper consulted Marla because he
* During the Soviet advance on Berlin, the Nazis built three enormous
* During the Soviet-Afghan a lot of Soviet troops complained that their newer AK-74 wasn't as good as the older model, the infamous AKM (popularly known as the AK-47). However testing proved that this was mostly due to a "grass is greener" mindset. The 74 is more accurate, easier to use, and lighter. A soldier simply remembers every time his gun jams in combat and rarely notices when an enemy's does.
* During the Soviet Civil War, rebels capture most of north and central Russia, roughly all of Siberia east of the Yenisei River, a large chunk of the Urals, and the SSRs outside of Belarus and Central Asia.
* During the Soviet war in Afghanistan, some mujahidin preferred to fight Hinds with WWII AA guns instead of the US-supplied Stinger missiles.
* During the space between seasons 2 and 3, Hasbro released a series of
* During the Space Race between the United States and the Soviet Union astronauts and cosmonauts alike apparently viewed each other this way, seeing and appreciating the similar risks each took in the frontier days of manned space exploration. They've even sent expressions of mourning for when spacemen from either side died in the course of their work. Similarly, a lot of scientists and engineers often felt honest admiration and some envy for when their counterparts in the other program figured out or achieved something they hadn't quite gotten around to first.
* During the Spanish Civil War, the Republicans captured the son of José Moscardó e Ituarte, the Nationalist commandant during the
* During the Spanish Civil War, the Republicans (no, not those Republicans) captured the son of José Moscardó e Ituarte, the Nationalist commandant during the
* During The Spanish Inquisition, Crowley was sent a commendation from Hell for facilitating it even though all he was doing in Spain at the time was wandering around the fancy parts not really doing anything.
* During the special "Emperor's Escape" event which was available during the Zhanhu's release, the Wu Lin Emperor Gao Lei had to flee from his palace while being attacked by Blackstone Legion invaders. The playerswere tasked with serving as his bodyguards and
* During the Stadium Stampede match that took place as the main event of
* During the stage play, the player is given the opportunity to kiss the princess, the king or the Evil Dragon King. Kissing the king works just as well kissing his daughter. But kissing the Evil Dragon King turns him back into his original form of a girl, who the Hero hooks up with.
* During the stand off at the ice palace, Anna sees Elsa dying, while Hans tries to kill her with a sword.
* During the start of a V8 Supercars race in Perth, Australia, a Holden Commodore driven by Karl Reindler
* During the storm of chaos, the Empire is fighting the forces of Chaos led by

Archaon. Then Grimgor and his orcs turn up, fights their way through both forces, kills the Chaos leader to prove that he is the best and goes away — leaving both forces badly damaged. Most worldwide campaigns pit everyone against everyone, though. Old Imperium motto used by fans: "The enemy of my enemy is the next one to
* During the "Stormy Weather" performance, a girl waiting for the bus in dreary weather becomes a ballet dancer, and expresses the emotions of the song through dance.
* During the story arc in which Franklin Richards was sent to the distant future then came back with a
* During the storyline in which Tatewaki Kuno is possessed by a cherry tree in
* During "The Studio Secretary Murder" case, another suspect claims to have experienced the horrors of war firsthand in order to make himself sound more heroic, when in fact he was dishonorably discharged during training for physically assaulting a woman.
* During the sugar-is-now-evil transition from Super Sugar Crisp to Super Golden Crisp in the 1980s, Sugar Bear could turn himself into Super Bear. Super Bear was a realistic-looking grizzly bear with no traces of cuddliness whatsoever. Eventually, Post figured out that a scary carnivore might not be the best mascot for a children's cereal, and the concept was dropped.
* During the summer camp arc, Eugene Wu was the first nerd that Jason and Marcus couldn't stand. This was less because of his interests and more because of his
* During the summer holiday, Hiyoko decides to go for a run, and several backgrounds proceed to pass by.
* During the summer in the Tri-State area you can expect to see ads for local theme parks like Splish Splash and Adventureland overwritten by Cablevision during the middle of ad breaks. On the premiere of the "Here Come The Classic Yo-Kai!" episode of
* During the Summer it's Hell. During the Summer Rains it's Hell, some cold days and a few rainy days.
* During the summer months the regular Saturday morning show took a break. Replacements (usually from the BBC Regions, unlike the London-based main show) included
* During the summer of 2011, the WWE pulled off the rarely-successful main event tweener feud with
* During the summer of 2016 on radio station WPLJ, the ad for Playland Park (an amusment park formerly known as Rye Playland) was played every break.
* During the superheroes' abortive attempt to prevent the 9/11 attacks in
* During the Supersized Myths Jet Taxi segment, to make him even more animate than usual, they added a voiceover of Buster's thoughts just before they pulled his taxi behind the jumbo jet's engine exhaust: "I wonder if
* During the surge of flight sims during the early and mid-90s, extensive manuals were common "feelies". In many of the hard-core non-survey sims, a significant manual was a requirement not an "extra" as mastering the avionics systems was quite a feat in and of itself. Microprose and EA's line of
* During the "survival" episode, Excel accidentally shoots Menchi, with a lot of drama in it. In the "be right back" eyecatch, she tosses Menchi's corpse into the Great Will of the Macrocosm, asking her to reset it. In the "back to the show" eyecatch, the Great Will tells her it's done, and Excel pulls a revitalized Menchi back out.
* During the "Take On Me"/"When I Come Around" medley, Lee walks in, still in the Spice Girls costume from the previous bit.
* During the talent portion of the pageant Gracie improvises a self-defense demonstration using her partner Eric as an assistant. The final move she demonstrates is
* During the Team Winter arc, Fubuki dies and Mitsuru commits suicide
* During the Television Critics Association screening of his new show
* During the tense final scene, when Falken tries to access Joshua with his password and finds it's been taken out, David asks what they're going to do. Falken says "I don't know. Do you?", then for some reason, Jennifer says "I told you not

to play games with that thing". So, David thinks for a moment, then says "It's games. GAMES!", and proceeds to play games with Joshua.
* During the territorial era of USA pro wrestling, it was very common for a promoter to invite two long time enemies in another territory to act as a
* During the testimony of the first witness, Coombes objects to the witness referring to fuzzies as "people," and Brannhard immediately counter-objects to the witness being forced to
* During the Tet Offensive the Vietcong used firecrackers to cover the sound of gunfire.
* During the Texas Revolution, Texian forces opposed to President Santa Anna (at this point of the war, they were fighting for a restoration of the 1824 Mexican Constitution, rather than independence of Texas), besieged the city of San Antonio de Béxar
* During the third act, Colonel Foster gives the rest of the G-Team a fast-paced run-down explaining King Ghidorah's presence in Washington DC and that all four branches of the military will work together to keep Ghidorah occupied as a decoy.
* During the Third Act, Kaido announces his intentions to build more factories in Wano, and to use the people of the Flower Capital as workers. When Orochi protests this plan, he gets beheaded!
* During the third case, an incriminating piece of evidence against the defendant, Juniper Woods, is a recording of a woman shouting "You're a goner!", presumably to the victim. At one point, Athena notices that due to the poor quality of the recording, the voice could actually be saying "Hugh O'Conner", the name of a character in the case. Turns out the tape actually
* During the Third Doctor's era, the semi-regular UNIT characters were often left out. The most blatant example is in
* During the third game, Last Man Standing ignores body armor or ammo straps. You can shoot at an enemy anywhere to get back up, as opposed to needing a
* During the third game parody, the Author planned for George to inadvertently give Dr. Wily the idea for Doc Robot. However, a month earlier, Dr. Wily already mentioned that he built one. The Author soon realized his mistake, and closed the plot hole by
* During the third game there is a fleeting mention of asari-vorcha offspring. Vorcha live
* During the Third Impact Shinji is shown an alternate universe mirroring a stereotypical love comedy anime (which has since become an official
* During the Third Punic War, the Carthaginian people knew that it was all over for them...Rome had backed them into a corner and forced them to war with impossible demands. Their response? An all-out defense of their city, holding the Romans at bay for
* During the third season, the only focus is the match between Karasuno and
* During the third series, a Catalonian mercenary named Francisco is hired by
* During the third try at the JATO Rocket Car, the MBs did a nice job of chewing up their ramp with the rocket exhaust.
* During the three-point shooting contest on All-Star Weekend 1986, Bird entered the locker room, looked around without saying a word, then finally said, "I want all of you to know I am winning this thing. I'm just looking around to see who's gonna finish up second." He won the shooting contest.
* During the Thriller Bark arc, Perona is calling out Hogback for falling for the Straw Hats'
* During the time between Steve and Jefferson, Marcy made a reference to "doing her taxes". Which is odd, as she has shown more than once that she can "get a refund" without even being touched.
* During the time of the Judges, Israel had no king (except for God himself). The Israelites decided they didn't like this situation and wanted a human king like all the surrounding nations. So God tells them, "Alright, I'll give you your king, but
* During the Time of Troubles, all the gods were reduced to Physical Gods. (The novels actually gave the impression they might have been too
* During the time slip while Fry is frozen in the first episode, we see New York

being rebuilt as a more Classical-looking city after being destroyed. Then it is destroyed again.
* During the time that Commissioner Gordon left the force to become a teacher, he frequently had to tell his students that he would
* During the time that Mr. Hooper was alive, Big Bird almost never got Mr. Hooper's name right. Commonly, he would call him "Mr. Looper", even after he corrected him.
* During the Tough Break update, there was a Contract system that would reward players for playing the game while using a specific weapon. If the player didn't own the weapon, there was an option to temporarily rent one for the duration of the contract.
* During the Tournament of Power, Goku uses this to revive Master Roshi after he
* During the training camp, Alice wanders over to Souma's area to check out what he's doing before taunting him and then exiting with flair. She promptly walks right into her assistant standing behind her, ruining the moment completely.
* During the transitional period between the 2016 U.S. election and Donald Trump's inauguration, then-Vice President
* During the transition from his Tenth to Eleventh incarnation, the Doctor was extremely reluctant and panicked when undergoing the regeneration process. The eventual energy release blew apart portions of the TARDIS bridge.
* During the transition to digital television in the UK, Northern Ireland was the final region to perform the analogue shutdown.
* During the trial episode of season 1, Dr. Orpheus asks the bailiff to swear him in with his own book. A book that bears a suspicious resemblance to the Necronomicon. As the book snarls at the bailiff, Dr. Orpheus warns: "Careful, he's a nibbler!"
* During the trial of the Monarch, the judge wants the Monarch's comments about Phantom Limb "pounding his invisible meat" stricken from the record AND his memory.
* During the Trooping of the Colour ceremony in 1981, an unhinged assailant fired what turned out to be blank rounds at Queen Elizabeth II, causing her horse to bolt and gallop away, giving her an uncomfortable minute or so in the saddle until she was able to calm and control her mount. The first two people to confront and capture the attacker were soldiers of the Scots Guards who were lining the parade route. Even though their rifles were unloaded for ceremonial duty, and they were confronting a clearly armed man, neither hesitated in literally defending the monarch's life. It is believed that both men were formally admonished for breaking ranks without permission - but their commanding officer apologised afterwards and shook both by the hand, then promoted them.
* During the Troughton era, the BBC censor at the time forbade the Doctor from touching female companions of any degree. This led to a lot more touching with Jamie, particularly in "
* During the truce before the Battle of Poitiers, the great English knight Sir John Chandos rode out to look at the French army, and met the French Lord of Clermont coming the other way — and the two of them realized that, despite not being connected in any way, they were both wearing the same heraldric device. The resultant conversation can be summarized as: "You're a thief." "No, you're the thief." "Boy, you are so lucky that there is a truce on." "Yeah, well, there won't be a truce on tomorrow, so you'd better watch it!"
* During the tutorial mission, Eddie tries making up an invocation while trying to operate a Tainted Coil Overblesser.
* during the twelfth and thirteenth centuries and prohibited them from consorting with prostitutes.
* During the ugly face contest arc, Roy told Lanolin she couldn't "make a reeeally ugly face". face was supposed to be made ugly.
* During the Ultimocene, a species of very intelligent but not sapient flightless birds, called gravediggers, develop a hunting technique based on following their prey around until they learn their movement patterns and then setting a trap in their way. They prove so successful at this that wipe out all their local prey species but one, a type of antlear (very specialized fish descendants roughly

analogous to elk) which is just bright enough to spot the traps and avoid them. This leads to intense selective pressure where the gravediggers need to get smarter and more adaptive to set traps that the antlears won't recognize and the antlears need to become smarter themselves to keep up with the gravediggers' increasingly cunning traps. Eventually, both lineages breach into sapience, leading to the fairly unique situation of a sapient predator specialized for hunting sapient prey. The gravediggers eventually have to give up preying on the antlear people, though, although not because of moral qualms — by the end, hunting them had just become too difficult.
* During the Underbase storyline, Ratbat decided to start with some evil gloating to Danial and Hi-Q about his plan to take the Underbase's power for himself.
* During the Under New Management arc, Kevyn and Tagon discuss their current mission; being blackmailed by Xinchub into hunting down Kevyn's sister Breya. If they don't, Xinchub will have the Toughs arrested for a number of crimes. When Kevyn remains unhappy, Tagon asks who Xinchub will send after Breya once the Toughs are imprisoned. Kevyn responds, "I don't know... Some unimaginative, trigger-happy rear admiral, I guess."
* During the United States' bicentennial, a number of squadrons celebrated with a custom paint scheme for one (or all) of their aircraft. The Florida Air National Guard's 159th Fighter Squadron
* During the Unlimited Blade Works path, there is Rin and Shirou who have a classic
* During the Unseeing Eye quest, you are tasked to retrieve the pieces of a magical rod to restore it and kill your opponent, but warned that you must not bring it to the surface for any reason at all. If you do, the magical rod will kill you.
* During the US Civil War, the Army of the Potomac got within five miles of the Confederate capital at Richmond during the Peninsular Campaign, and only got driven back because of the timidity of Gen. McClellan, even though the Army of Northern Virginia took more casualties during the Seven Days' Battle, (and was smaller to begin with). Despite this, the North never again made any serious attempt to capture Richmond by moving northwest from Ft. Monroe.
* During the USJ attack, Izuku rapidly works out Shinsou has some form of brainwashing that is likely triggered by talking to him.
* During the Valentine Day episode, Leslie finds out that that Anne might be on a date with Chris. Considering how much grief Chris gave Leslie and Ben over their
* During the Vandenreich’s first invasion of Soul Society, Ichigo demands to know if
* During the very earliest stages of the Universe, just after the Big Bang
* During the Victorian era, this concept was widely held to be true; a person's physical appearance was a reflection on their morality and social standing. The introduction discusses 19th Century quackery discourses of
* During the victory years, the Germans selectively amassed examples of all the tank types captured from defeated enemies. The intention was eventually to house them in a Victory Museum depicting the heroic struggle of the German Army. These were temporarily stored at a tank base on the Baltic coast, but, as the war turned, this stock of captured vehicles was plundered for operational requirements. It is likely many of the Shermans put into service, as described above, came from this stock. Captured French and British tanks were rebuilt as assault guns, and vehicles used to deceive American forces in the Bulge fighting came from here.
* During the video game trailer, Amy lands like this, whereas the boys hit the ground in less dignified manners.
* During the Vietnam War, a great deal of soldiers on both sides died not from combat, but from insect-carried diseases. Which was pretty standard for
* During the Vietnam War, due to the nebulous nature of the conflict, the US Army resorted to body count of dead PAVN soldiers as a measure of its effectiveness. Unfortunately, this led to a great deal of abuse, such as counting limbs as whole bodies, or writing off dead civilians caught in artillery or aircraft bombardments as "Viet Cong." Interestingly, when the Vietnamese government finally released its

official record of military losses during the Vietnam War (849,018+ dead), it was found that U.S. body count estimates were pretty damn close to the truth. Of course, given the scale of the war, a relatively small margin of error for PAVN military losses such as 10% corresponded to roughly a hundred thousand people...
* During the Vietnam Wars, CIA and other intelligence agents undercover as officers were known to mistakenly salute enlisted men and NCO's or address them as "Sir". One would wonder why they weren't properly briefed on military protocol, unless they were set up for failure to amuse the more senior agents.
* During the Vietnam War the CIA had a whole lot of things going on, including the Phoenix Program: a program of infiltration, capture, terrorism, and assassination. President
* During the Vietnam War, there were quite a few American athletes who managed to have "injuries" that prevented them from being drafted yet somehow failed to impair them from continuing to play professional sports.
* During the Vietnam War, when U.S. troops were forbidden to fire upon Vietcong soldiers until being shot at first, a Marine Lieutenant named Gordon Evans tried to provoke an attack (so he could take out a group of soldiers he saw) by flying his plane extremely low to the ground, making a good target. The Vietcong response? They dropped their pants and mooned him as he flew by.
* During the Virtual World arc, the villain Noah turns the Kaiba Bros. into stone after Seto loses by risking to use Last Turn, causing Yugi to take over and continue the duel. When Noah gets fed up with Yugi getting the upper hand and talking him down to reality, he threatens to turn all of Yugi's supporters into stone, and does, in this order: Duke,
* During the Volume 2 climax, Team RWBY has to split up to stop a train from breaching the kingdom's defensive walls. Neo's first fight in the show is against Yang, the team's power-fighter. However, Yang is barely able to land a solid hit on Neo, who is acrobatic and keeps dodging or deflecting Yang's attacks. Neo's taunting style of fighting also aggravates Yang's quick temper. When Neo defeats Yang and renders her unconscious, she doesn't suffer a single injury from Yang.
* During the Wano Arc, one of Kaido's top lieutenants, Queen, outright tells their
* During the war, he reinforces his false reputation, by accidentally going up against the world's greatest swordsman. Luckily for Buggy, his Devil Fruit power makes him immune to swords.
* During "The Warlock's Revenge", the Warlock brings a monster movie poster to life to menace Lois. After everything is wrapped up, Clark says she needs some downtime and suggests they see the same movie.
* During the War of 1812, after the USS Constitution claimed her second kill (HMS Java), the British Admiralty issued an order to "Not engage American Heavy Frigates in Single Combat". Towards the end of the war, the USS Constitution sortied out to look for more prey to sink, and ran into two British Frigates (HMS Cyane and HMS Lavant). After several hours exchanging broadsides with each ship in turn
* During the War of 1812, American prisoners of war were held in Halifax and allowed to wander around the city as they pleased during the day so long as they returned to their cells in the evening. Not a single man even attempted to flee, and many of them stayed in Halifax after the war ended.
* During the War of 1812, "Walnut St." in Washington DC was changed to "
* During the War of the Beast, the Fist Exemplar and the Iron Warriors stumbled across some that the Orks had set up, the aliens drugging and fattening up thousands of human slaves for food. Even the Iron Warriors, stone cold siege specialists who consider planetary genocide and
* During the War of the Beast, the Imperial Fists Chapter was utterly destroyed to a man, with the Chapter Master himself dying on an assault against the titular Ork Warlord Beast. However, just before the fateful assault, Chapter Master Slaughter Koorland had called all the Imperial Fists successor chapters together under a decree made by their Primarch, Rogal Dorn, during the reforms after the
* During the wars between the Buggers and humanity, the Buggers had never attacked a human planetary population, and the humans reciprocated by never attacking a Bugger-occupied planet. During the last battle between the Bugger and human fleets

over the Bugger home planet, Ender
* During the Wars of Independence in Spanish America, the sudden need for military commanders resulted in many civilians from the upper echelons of society to suddenly become military officers. One of the most notable examples is Manuel Belgrano, a respected lawyer, public servant, economist and newspaper editor from Buenos Aires who suddenly became General of the patriotic army, read a few books on military tactics and cartography, and off to the front he went. To the surprise of nobody, after a few military victories he suffered a catastrophic defeat and had to retreat back home. Of course, since everyone understood that those were desperate times, and he was just a civilian doing his best when there was no-one else to call for, his military blunders are excused, while his political achievements are praised.
* During the wars of independence in Spanish South America, there was
* During the war, the Belkans developed two other superweapons that were not used during the war, the XB-O, and the V2. They were both highjacked by the organization, “A World With No Boundaries”, and it would not be until six months after the war ended that they would see use.
* During the war, the North, having the most textile factories, had the more consistent uniforms (making for a better-dressed army), while the South frequently had to make do with a "butternut" color instead of grey.
* During the war, when Sisko received a new assignment, Dax became commander of the Defiant.
* During the war with Haven Trevor's Star serves as Strategic since its holds a Junction Terminus that would allow Haven access to the Manitcore system. It's also becoming the Capital World of the burgeoning Star Empire of Manticore.
* During the war with the Spanish, the tlatoani (emperor) of the Aztecs, Cuitláhuac, died of smallpox. It didn't help either that when Tenochtitlan was seized, the Spaniards and natives (more that 90% of Cortés's men were allied tribes) dropped corpses on Lake Texcoco to infect the water supply.
* During the "Way of the Platypus" musical montage in "Doof Dynasty", Baljeet tries to karate chop a board in half. Instead, the cinder blocks the board is on disintegrate and the board itself remains in mid-air.
* During the "Weak Drinkers" trophy event, Ilmeria will get so drunk that she falls asleep and tells Firis to never leave her side in her sleep.
* During the Wedding Arc, Pinkie Pie takes down a Changeling by using her 4th wall breaking powers to produce a piece of fan art of Queen Chrysalis and Discord together. The Changeling screams and collapses, clutching his eyes.
* During the Wedding Arc, Prince Blueblood inadvertently foils Queen Chrysalis' plan just because he wanted to take a girl on a date.
* During the Wedding Arc, things get so desperate that Twilight and Cadence seriously consider the possibility of releasing Discord to
* During the Wedding Arc, this role falls to the Mane Six, the real Cadence and her entourage, and
* During the week leading up to Super Bowl XX, Bears quarterback Jim McMahon got tired of being asked about his rear end which had been injured earlier in the season and decided to literally show one reporter that it was okay.
* During "The Weight of the World," Spike and Xander get in a fight with
* During the well-publicized trial of Aaron Hernandez for the shooting death of Odin Lloyd,
* During the whiskey raid at the Canadian border, Oscar Wallace sneaks a mouthful from a shot-up barrel once the gunfire has stopped.
* During the winter at Valley Forge, when Washington took up residence in a local farmhouse, he actually paid rent (as opposed to simply occupying the house by force).
* During the Winter War, the Soviet Union dropped large numbers of incendiary cluster bombs on Finnish cities as part of their attacks. The Soviet foreign minister, Vyacheslav Molotov, went out in the international press and claimed that this 'bombardment' was a filthy lie; they were actually food drops to help feed Finnish refugees from the war. The Finnish responded by naming the bombs "Molotov

bread baskets" in his honor and began referring to the mass-produced incendiary bomb (filled with high-proof vodka provided by the state liquor monopoly) they used on the Soviet as the
* During the Women's Floor Exercise final, Italian gymnast and 2006 all-around champion Vanessa Ferrari tore her Achilles tendon (similar to Iordache's injury a few days earlier) and had to be carried off the podium.
* During the World Purge OVA, Laura has a fantasy that she's married to Ichika and he convinces her to wear only an apron. During the end credits, she's still wearing it, and she runs while holding it down with her hands.
* during the Wraith attack of Earth, a pair of Darts escapes the F-302 squadron and crash into the main Area 51 complex, destroying the Ancient control chair brought back from Antarctica, depriving the planet of its last line of defense.
* During the Xindi arc, over 19 XB of information relating to the Spheres and Anomalies in the Delphic Expanse, gets wiped when a group of religious extremists who worship the Spheres seize control the ship. Presumably the writers realised how
* During the Yarnell Hill Fire in Yarnell, Arizona in 2013, 19 members of the Prescott Fire Department's Granite Mountain Hotshots were killed, the only survivor, Brendan McDonough was posted on lookout and was not anywhere near when the fire over took the others.
* during the year that she is missing presumed dead, making it his house. For extra dickishness points he builds an extra windowless room that connects to Sookie's bedroom.
* During the Yugi/Pegasus duel at the end of Duelist Kingdom, Pegasus uses the Gorgon's Eye trap to turn all of Yugi's defense monsters to stone — and whenever one is destroyed, Yugi loses Life Points equal to half of the monster's Defense Points.
* During the Zanpakuto Rebellion Arc it is clearly stated that the destruction of a zanpakuto spirit by anyone except its master will permanently destroy the zanpakuto itself. Late in the arc the brainwashing is reversed and the spirits reunite with their masters, but so are at least two zanpakutos that were supposedly destroyed permanently. This is completely ignored. It's not even given a
* During this commercial for "My Pal 2000" midway through, the male announcer lists off what the toy robot can do to the point where his voice is fast-forwarded to chipmunk voice until the toy robot interrupts and says "Easy. Easy."
* During this time period, "Thanksgiving" was frequently played in early 2015 due to being paired with "Serious Business", one of the show's most popular episodes.
* During times of extreme political turmoil, European radio stations have been known to switch to an all-classical all-the-time format.
* During Tom Lennon's turn as Humperdinck, his son Oliver, eleven years old at the time of shooting, plays Count Rugen for the early search for Buttercup.
* During Tracy Taylor's defense of the WXCW and PGWA title belts against Nemesis, there were at least two calls from the audience for her to punch Nemesis's ear.
* During training, Yao gets his butt set on fire by a stray flaming arrow. Also counts as
* During "Trigger Warnings", at the climax, Wolfang has several of these; determining that the scribbling note he found on Lidar's body says "wings post-forging", that murder victim Twirl was trying to hide her original alt-mode, and that she was a Targetmaster. Then, when it looks like everything's wrapped up, he recalls something Blackarachnia told him, that Overrun, a nerdy tech guy, introduced Blackarachnia and Twirl.
* During Unlimited Blade Works Archer Oh, and in all cases Shirou still has a hard time projecting things accurately, which means they break easily.
* During Vilgax's attack on Arcadia, Coulson notes that S.H.I.E.L.D. has failed to keep up with the nature of threats in a world where superpowered individuals and alien invasions are becoming increasingly common.
* During Volume 4, Mohinder gets woken up with a bucket of water thrown at him in the classic tied-to-a-chair situation after being recaptured by Danko's team... although they actually
* During Warren's bad STP trip, he sees other people as zombies and his arm as

rotten and infested with maggots, leading him to try to kill his friends and cut his arm off.
* During "Weekend Update" in the first season, there was a segment about contaminated marijuana (in which, unbeknownst to the network, the joint shown on camera was real). Chevy gave an address for viewers to send theirs in for testing.
* During Weekend Updates in the Colin Jose/Michael Che era, they've had "Supercentenarian Mort Fallen" (Mikey Day) on as a guest. He reads what sounds like upbeat news about what his cohorts are up to, only to turn it into bad news, usually about the person's death.
* During which they are tracked the whole way and shot at by arrows,
* During "Who Killed the Caliph", Iznogoud seems to care for Wa'at and saves him from execution after he has been mistaken for a spy. He catches the Executioner trying to get Wa'at to pay him for mercy, and angrily states that mercy should not be bought. He then notices a tortured prisoner and orders the Executioner to release him, causing Wa'at to wonder if he's having pity after all... then he appoints the prisoner new Executioner, and orders him to torture the former one.
* During World Cup of Soccer 2006 Stephen trash talked together with Alexi Lalas.
* During World War 1, the Italian Army created some of the world's first shock troops called the "Arditi" meaning "daring ones". Their main armament was their daggers, and their most valuable use in battle was to charge enemy lines during artillery bombardment, and leaping into trenches just as the shells let up. Most Arditi didn't even bother carrying carbines or pistols, their knives were all they needed to secure victory and hold it Untilt he main italian force arrived. The Arditi training regimen was so harsh that many recruits actually died just during basic.
* During World War 2, US Intelligence intercepted Japanese Navy communications about plans to attack a target but couldn't tell what the target was. They suspected it to be Midway Atoll, so they had the Midway base transmit a radio message that they were running low on water. Sure enough, Japanese communications were soon intercepted stating that the target was low on water, confirming that the Japanese intended to attack Midway.
* During World War 2, when German communications concerning the V-weapons were intercepted, British scientists viewed with deep suspicion Hitler's references to a "devastating weapon with which we ourselves cannot be attacked". The actual weapons referred to - early pulse-jet cruise missiles and ballistic rocket missiles - were several guesses below "death rays" on the scientists' list of suspects. In the late phase of
* During World War I, Hughes dispensed government supply contracts to his friends, forcing Canadian soldiers to go into battle
* During World War II, among Britain's successful exploits in the intelligence and espionage battle with Nazi Germany was the Twenty Committee, led by John Cecil Masterman, who was able to catch and turn
* During World War II, an Allied spy named Virginia Hall was arrested by Spanish police for being in the country with improper documentation (she'd crossed the Pyrenees in a hurry to escape infamous SS officer Klaus Barbie). While in jail, she nursed a young prostitute named Elena back to health. When Elena was released, she told the American consulate about Hall's predicament, and they got her out of jail.
* During World War II, both British and Germans developed the practice of treating important prisoners of war who might have valuable information to fine meals and otherwise excellent treatment, especially early on in their captivity. This was, of course, a calculated trick, so that POWs might slip up and reveal potentially useful information when
* During World War II, Danette Reilly took over the Firebrand identity from her brother Rod.
* During World War II, German military tribunals gained notoriety for their part in the summary executions of all kinds of people like partisans, deserters and plunderers.
* During World War II, in the Pacific Theater, a fighter pilot crashed upon landing and was trapped in the burning wreckage. The first officer to arrive on the

scene, hearing the pilot's screams as he was burned alive and knowing that the firefighting equipment to put out the fire and extricate him from the wreck would never get there in time,
* During World War II, many older battleships qualified, though especially USS West Virginia in her post-Pearl Harbor configuration and the British Nelson class. All three ships had the firepower, armor, and fire control to tangle with any fast battleship short of a Yamato, and were only no longer frontline battleships due to a top speed of 21 and 23 knots, respectively.
* During World War II, Sicilian-born mobster Charles "Lucky" Luciano aided the US government the complete assistance of his organization in fighting German and Italian spies, and was crushed when his crimes led to him being deported back to Sicily after the war ended.
* During World War II, the Allies realized that one could confuse enemy radar by dropping small pieces of aluminum, i.e., chaff,
* During World War II, the British armed merchant cruiser (a passenger ship converted into a light warship to raid enemy shipping)
* During World War II, the International Labour Organization was faced with the potential of this. They were an agency of the League of Nations but were autonomous enough to keep running despite the League's issues. The problem they realized was that one thing they by their constitution couldn't do was change their constitution without getting approval from the League — so if the League ceased to exist in any sense capable of giving approval, then the constitution couldn't be changed and they'd be stuck as an agency of an organization that no longer existed. Ultimately they just decided that such a situation meant that article of the constitution
* During World War II, the Irish government censored new media severely in order to maintain an image of neutrality. When Germany fell to the Allies, the editor of the
* During World War II the Japanese never intended to invade the mainland of the US, and were intending to invoke this trope after Pearl Harbor. They only intended to neutralize the US Pacific fleet to prevent American intervention while they secured a defensive perimeter of island colonies so they could continue their main goal of exploiting the resources of Southeast Asia. This backfired horribly (for them) as they were ones whose Pacific fleet ended up being neutralized. The American carriers being out of town at the time didn't help the Japanese cause.
* During World War II, the period in which German U-boats enjoyed the upper hand against the British and later the Americans was called "the Happy Times." The first period lasted from roughly mid-1940 to late 1941, with the second period (consisting of German attacks on the American East Coast) lasting from January to August 1942. Once the battle shifted against the Germans, these became replaced with "the Sour Pickle Time"; by then, German crews had no more fun going out into the Atlantic.
* During World War II the so-called "Chindits" were British special forces who performed operations of great heroism and derring-do and was widely publicized... But they suffered such heavy casualties and were so expensive to supply and train that their effectiveness was questionable. Field Marshall William Slim was probably speaking of the Chindits when he made the below quote. The Chindits spent 1942 and 43 playing hide-and-seek behind the Japanese lines in Burma to little effect. Slim took over the 14th Army in late 1943 and turned the entire force into highly mobile light infantry. Over the next two years he kicked the Japanese entirely out of Burma; his key tactic was to let his units be surrounded and rely on airdropped supplies to outlast the enemy offensives. He taught the 14th not to rely on conventional supply lines and make frequent offensive patrols — he refused to let his men think the Japanese were superior jungle fighters. In 1945 Slim's army was, man for man, the toughest fighting force in the world.
* During World War II, the trope was invoked and played with by USAAF fighter pilot Wah Kau Kong in an interview with an Army public relations officer:
* During World War II the Western Allies' intelligence agencies, such as the OSS, SOE, and MI-6, gave their agents officer rank in the hope that if captured, the

Germans would treat them as POW and not spies. This is because the "Commando Order" mandated the immediate execution of spies upon their discovery.
* During World War II, while attempting to create a synthetic rubber substitute, James Wright dropped boric acid into silicone oil. The result was a polymerized substance that bounced, but it took several years to find a use for the product. Finally, in 1950, marketing expert Peter Hodgson saw its potential as a toy, and renamed it Silly Putty.
* During World War I the Germans did bomb London several times with zeppelins. They did a better job of frightening the civilians than actually destroying strategic targets, but it worked out all the same until they started getting blown out of the sky.
* During World War I, the "Red Baron", Manfred von Richthofen, became one of the most famous users of an "ace custom" with his bright red Albatros D.III with a reinforced spar on the aircraft's lower wing. The rest of his squadron similarly customized their planes, resulting in their becoming known as "the Flying Circus."
* During WW2, SOE agent Violette Szabo damaged her ankle during parachute training. The ankle gave out again while her Resistance group was being pursued by German soldiers, leading to her capture.
* During WW2, the British armed forces and merchant marine reluctantly accepted drafts from prisons, of cons offered remission or pardon provided they joined up. Most of the time this worked, after a fashion, with close supervision and intelligent management. But the Merchant Navy slipped up with a draft from the notorious Barlinnie prison in Glasgow. Despite urgent advice, men from Barlinnie who had been part of street gangs were not broken up into smaller groups and separated. One ship out of Glasgow found (having accepted the superficially reasonable argument that "mates" should be allowed to serve together) that it had two of the most vicious
* During WW2, the Luftwaffe often painted parts of their fighter aircraft in bright colours, especially yellow, for easy recognition, e. g., during the Battle of Britain, so that they would not be fired on by trigger-happy tail-gunners of the bombers they were escorting. These colours, e. g. on the propeller spinner, engine cowl or tailfin, were also used to set apart sub-units of a
* During WWE's infamous "Rosie O'Donnell" vs. "Donald Trump" match, fans got so sick of what they were seeing,
* During WWI and WWII almost all aircrews named their birds, as they were assigned to fly only one. In those days production standards couldn't be as high as they were today, so every airplane had its own ticks and tricks. This was more noticeable in bombers. Nearly every B-29 bomber ever produced had its own unique flaw that would have made it inoperable. One of the design engineers, Victor Agather, had to fix 600 of these fatal flaws in a three-day time period. Every bomber's crew were the only people who could keep it flying, so they would only be paired with that aircraft, kicking off the relationship between crew and machine. Most of them even made their own extensive modifications to keep their birds flying, like waxing the props. Many bomber crews would not only refer to their airplanes as female, but went so far as to refer to the airplane's model as if it were the airplane's ethnicity. For that matter, the very fact that aircrews
* During WWI and WWII, captured Axis prisoners of war were sent to the POW camps in the Prairies of America or Canada. These camps generally needed no walls or heavy guard, as they were so far away from civilization that a person can walk for days without encountering another person. An oft-told story concerns a band of ragged and starving escapees (unused to the sheer size of North American countries and provinces/states) finally encountering a person after a grueling march and asking him if they are in Mexico—only to be informed that they have not even made it past the county lines yet.
* During WWI, his unit was sent to capture a German railroad, when they came under fire from dozens of hidden German Maxim machine gun nests. With half the squad dead and the other half pinned down, York stood alone with his M1917 Enfield and took concentrated fire from
* During WWII Allied prisoners of war would make alcohol in German prison camps.

It gets scary when you read how they used lead pipes for their stills but apparently no one died from lead poisoning due to the lack of exposure. Although one book,
* During WWII, German spies would often try to infiltrate Britain via neutral Spain, posing as Swiss businessmen in order to travel to Spain. The problem was, German standards of discipline were
* During WWII, Italian prisoners of war kept at a camp in northern New Jersey were frequently given weekend passes to stay with Italian families living in Philadelphia.
* During WWII, meat was severely rationed so housewives often had to fake it with meat that was tough or poor quality, plus organ meats and other less-valued pieces. These were put in a grinder along with oatmeal or some other meat-extender (even soy was used) and shaped into steaks or another more appetizing form. One name for this meal was "Emergency Steak".
* During WWII, the Army Air Force created the First Motion Picture Unit for the purpose of creating training and propaganda films. Most members of the unit were civilians specifically recruited for their background in the film industry, and thus many were above normal military recruiting age or were otherwise unfit for combat. Basic training for this unit was greatly simplified, and protocol barely followed, since many of the members had known each other on a first name basis for years from working together in the private sector.
* During WWII the Russians trained dogs to run under tanks, the plan being to strap them with bombs and unleash them on the advancing Germans. They lacked actual German tanks to train with, however. Many stories exist as to how badly this plan failed, though one involves the dogs performing
* During Yosuke's social link, he comes over to your room and outright asks if "the goods [are] under the futon?" You can then deny it or say yes. Yosuke remarks that he used to keep his there, too, until his mom found it during cleaning. The scene ends with Yosuke actually walking to your futon, saying: "Alright. Let's check under that futon..." while you, the main character, start to panic. What Yosuke finds there is left up to you.
* Durin's Bane, the balrog of Moria, is a twenty-foot tall demon of shadow and flame. The goblins and trolls it rules are almost as terrified of it as the heroes are.
* Durkon and Minrah offer him an alternative plan on behalf of Thor, in which the goblins would get all the recognition they need in exchange for the Dark One helping the other gods to seal up the Snarl
* Durkon, being a cleric, is just as powerful as V, if not more so. His displayed spells include healing to the point of resurrection, paralyzing at range, turning into a giant, tossing around lightning, changing the weather, flying, sending messages across long ranges, and making people immune to
* Durkon decides to convince Redcloak to save the world. While at first the discussion is civilized, Redcloak decides the deal doesn't satisfy his Sunk Cost Fallacy
* Durkon has one of these in his background. He's going to cause bad things to happen when next he returns to the dwarven kingdoms, so his boss (High Priest Hurak) send him away without telling him why, and tell him never to return. But he would never have really been able to return if he hadn't left. (
* Durkon has technically been in a Snipe Hunt since before the start of the comic: a prophecy foretold that Durkon's return to his home would cause the destruction of the dwarven homelands. Therefore, his superiors sent an unknowing Durkon to the human lands and told him not to return until they called him back. Another Oracle foretold that Durkon eventually WILL return...posthumously.
* Durkon is a cleric of Thor, and uses a shield, so it's quite fitting, though that'll have to mean his entire family fits the same description as well.
* Durkon of them had never left their cells (because Durkon had stayed behind), then claiming that the cell door wasn't secure because of a mechanical defect (if you count "being able to be picked by a rogue" as a mechanical defect).
* Durkon's mother does this in a flashback scene — despite having only one

arm.
* Durkon's vampirization, as the "happy ending" illusion in Girard's pyramid has Durkon showing up alive and Belkar dying. For context, when Malack attacked Belkar, Durkon intervened and fought Malack. Durkon lost and was vampirized, while Malack spared Belkar as a final gesture of respect to Durkon.
* Durkon. They have sex once, and we find out 1000 pages later that she bore his child from the encounter.
* Durkon vs. Malack, reclaiming the dignity of divine spellcasters everywhere.
* Durkon was sent to the human lands and ordered to stay there until he was called back, in an attempt to prevent a prophecy that he would bring disaster when he returned. As such, the dwarves responsible had no intention of ever letting him return. Recent events show that
* Dursleys enchantment, it meant that as long as Harry was under the guardianship of her family, he had magical protection away from Hogwarts from the Death Eaters. Petunia Dursley, Lily's estranged older sister, was the only remaining relative of hers, leaving Dumbledore with no choice but to leave Harry there. Later, Dumbledore apologizes to Harry for putting him through all of that and admits that Harry grew up to become a much better person than anybody would have expected under those kind of circumstances. He also gives the Dursleys a much-deserved telling off for the abuse and neglect they dished out, acknowledging in-universe that they'd treated him abominably.
* Durthu, Eldest of Ancients, a spirit of Athel Loren, is the oldest living thing in the Warhammer world and blames all the tragedy he's experienced over the eons on creatures made of flesh (which, to be fair, is true). He intends to exterminate everything in the world that isn't a natural spirit.
* Durwood Fincher are particularly great. Although he usually reveals that he's a parody artist at the end of the interview, the increasing confusion that leads up to that moment is quite hilarious.
* Durzo Blint, and later Azoth/Kylar Stern gain immortality after bonding with the Black Ka'kari by Brent Weeks.
* Dusik has some sort of firearm he designed himself which he says fires nails.
* DUSK, any enemy can be one hit killed with the soap, and that includes bosses.
* Dusk are an especially murderous and hate-filled variant. They are also tremendous hypocrites in that they use powers that, while technically not magic (according to the Red Monks), are pretty damn hard to distinguish from it.
* Duskers' has caused The Singularity, using humans and organic matter as a resource.
* Duskers talks about the gray goo possibly wiping out life in the universe, or just within the Drone pilots area of operation.
* DUSK helped popularize the genre, to the point of the trailers features a lot of wordplay referencing their inspirations.
* Dusk Maiden of Amnesia: Boy meets girl. Girl turns out to be amnesiac ghost of a 50-year-old corpse in the school basement. Mysteries ensue.
* Dusk Maiden of Amnesia has one between Momoe (who can't see or hear ghosts), Teiichi (who can), and Yuuko (a ghost). Thus, Momoe interprets some of the things Teiichi says to Yuuko or his reactions to Yuuko's antics as him reading her thoughts. It gets even better when Kirie (who can see and hear Yuuko) joins in and snaps at Yuuko for her flirtatious antics, which Momoe misinterprets as being directed at her.
* Dusk Maiden of Amnesia murder. Much of the plot involves distinguishing between rumors or ghost stories and true mysteries.
* Dusk Maiden of Amnesia: Teiichi doesn't realize Yuuko is a ghost when he first meets her, but she's quick to point it out, and has him convinced before long. It doesn't stop him from falling for her when they start spending time together in the newly-formed Paranormal Investigations Club.
* Duskmon. Like Omni/Omegamon, the blades are extended from his "hands" with are shaped like a pair of draconic skulls. Unlike Omnimon, he spends a great deal of time in this form, making one wonder how he held things other than "biting" them.
* Dusk of the Dead, a survivor has a conversation with a bitten person that goes

something like this:
* Dusk's Dawn doesn't emote outside of assertiveness, inquisition and disappointment.
* Dusk's Dawn Doodlecute's talent is allying herself with nature and plants.
* Dusk's Dawn has bravery as his element, as he gallops through a storm to save Star Whistle.
* Dusk's Dawn is a boy. A cursory glance at the works trope page will show you how difficult it is for the audience to pick up on that.
* Dusk's Dawn is one, formed after one of the De Noirs goes into the family library. He takes over the De Noir's son's body.
* Dusk's Dawn is this to Rainbow Dash, both being able to fly, cracking jokes and having a strong sense of adventure.
* Dusk's Dawn is voiced by a male actor and is most likely male. Still, it's never really made clear.
* Dusk's Dawn leads the group throughout the castle and calls himself a "royal guard."
* Dusk's Dawn logo. What this has to do with anything relevant to the story is anyone's guess.
* Dusk's Dawn. She seems to be the most emotional and fragile of the group.
* Dusk's Dawn, sort of. It's inferred that she's an expert in the medical field by her Cutie Mark, and she senses something bad is happening in the De Noir's castle.
* Dusk's Dawn specializes in medical work, as evidenced by working in a hospital and her Cutie Mark.
* Dusk's Dawn, we are treated to... Donut walking through a corridor for an extended period of time talking to himself about how bored he is.
* Dusk Shine In Pursuit Of Happiness, Rainbow Dash is in complete denial that she has feelings for Dusk Shine, but she still leaps at every opportunity to get closer to him.
* DUSK takes several cues from the KKK. The members wear robes and pointed hoods, there's an elite mook called the "Grand Wizard", and there are two bosses named the "Duke Brothers" (possibly a reference to David Duke; a real life Klan leader).
* Duskull, if "it finds bad children who won't listen to their parents, it will spirit them away—or so it's said, and "loves the crying of children."
* Duskwood. They're half-siblings, unknown to her but known to him. Having no other family, he reached out to her a few years before the game begins, wanting to connect. The thing is, he didn't tell her they're related, with his reasoning being that he didn't want to cause strife in her family, as his existence is the result of Hannah's father cheating on her mother. He was content to just be friends with no familial connection, but Hannah, unaware of the truth, fell in love with him. When he realized, he quickly distanced himself from her and finally cut all contact.
* DUST 514 allows squad leaders to call down strikes from orbiting ships once their squads accrue enough war points during a battle.
* DUST 514 has two forms. The MCC is one of them, and the Skirmish game mode involves destroying the enemy's while defending yours. The other is the, erm, Dropship, a small transport that can carry six people and two gunners.
* DUST 514, the player characters are immortal clone soldiers turned mercenary. EVE players were able to hire them to defend or seize planetary assets while the game was active.
* DUST 514 will of necessity be adding troop ships and drop ships, it remains unclear whether EVE players will ever be able to pilot either.
* Dust and Echoes careful to ally/annex Remnant as positively as possible.
* Dust: An Elysian Tail and stays in forests, hills and plains at first. The middle part of the game is spent in a cave, cemetery and snowy mountain (complete with ice spikes and avalanches), and it finally ends in a volcanic area.
* Dust: An Elysian Tail has, as Fidget puts it, "glowing evil eyes of evil". As it turns out, he's not evil at all and quite eager to do business with you.
* Dust: An Elysian Tail is enveloped by the lava of the Everdawn Volcano after defeating General Gaius. In the end his spirit is implied to depart with the Blade

of Ahrah, whether to the sword's resting place or a new danger is unclear.
* Dust: An Elysian Tail was designed, programmed, and illustrated almost entirely by Dean Dodrill, with only voice-acting and music coming from other people.
* Dust: An Elysian Tail was one of the few anthro-focused Metroidvanias.
* Dust: An Elysian Tail, your projectile-casting sidekick Fidget somehow learns how to shoot fireballs and lightning, respectively, after defeating the first two bosses. Combining them with your character's Dust Storm ability replicates the bosses' special attacks and makes you a true force to be reckoned with.
* Dust, a series of wargames, based on Paolo Parente's comic and set in an alternate 1947 with walking tanks, energy weapons, superheroes, zombies and war-apes.
* Dust: A Tale of the Wired West. They're a complete 180 from the point-and-click gameplay of these adventure games, but not only are they pretty easy, there's no penalty for failing (other than missing out on one or two insignificant pieces of dialogue). The game will proceed exactly as if you'd succeeded.
* Dust bathing is a typical self-grooming behavior for many birds and some mammals.
* Dustbin Baby, April is sent to Fairgate, where girls with issues such as anorexia, Down syndrome or general behavioural problems are sent.
* Dust Bowl Ballads, specifically in Oklahoma, where both economic recession and dust storms hit everybody hard.
* Dustbowl, Goldrush and Gravel Pit are the most commonly seen "24/7" server maps in
* Dust Devil, a 1993 cult film by Richard Stanley set in South Africa was, according to the DVD commentary, inspired by the director's memory of being told the Vanishing Hitchhiker legend as a youngster.
* Dust Devil: It's the Dust Devil's weapon of choice when he cuts up his victims.
* Dust Devil, Mark is a paranoid husband who thinks Wendy is cheating on him, and hits her whenever he thinks she’s lying.
* Dust Devil: The Dust Devil severs the fingers of his victims, and keeps them in a jewel box.
* Dust Devil: While the term "demon" is never used, the Dust Devils certainly seem demonic. They’re vicious wind spirits of human origin that have to reside in human bodies, but wish to escape into the spirit realm through use of black magic.
* Duster 2015 has a flashback to his days in the war when he discovers the tunnel he and Jo tried to escape the Nazis in caved in.
* Dust fits best, as all of the sides are now officially independent and constantly warring with each other.
* Dustforce doesn't have anything resembling a plot. Only cleaners and locations needing to be cleaned.
* Dustforce is built off this, and has a clever mechanic whereby the dust you are sweeping hints at routes and what acrobatics are required to progress.
* Dust Force, the dirt has turned many things against janitors like residents of the area, books, trash cans, wildlife and other things.
* Dustin - actually quite small - tends to be exaggerated in-universe.)
* Dust", in a Wild West village "built of crumbling clay and rotting wood," a man named Luis Gallegos, who got drunk, went out in his wagon and struck and killed a little girl, is about to be hanged. A peddler named Sykes arrives in town and tells Gallegos' father that he can save his son by spreading special dust, which will cause the crowd to have a change of heart.
* Dustin Diamond and Lark Voorhies never had any high profile roles since
* Dustin Hoffman as if she were his ex-wife, hurling constant and horrific verbal abuse at her before eventually punching her in the face just to get into character, prompting an enraged Streep to swear she would never work with him again (and she hasn't).
* Dustin Hoffman, having acted mainly in theatre and had one small film credit to his name.
* Dustin Hoffman is that Dustin was chosen because he was far enough away from his early 20s to have an attitude about that time of his life, and "get rid of that

self-pity".
* Dustin Hoffman—Streep with the death of her partner, Hoffman with a divorce—infusing the scenes of their crumbling marriage and subsequent custody battle with a dash of painful realism.
* Dustin Hoffman missed a payment of bond interest. Within a few years, it was discovered that all four events had one thing in common: they resulted from the financial indiscrepencies of one Giancarlo Parretti, a saga of racketeering and fraud which entangled not just the studio that once boasted of having "more stars than there are in the heavens" but also Crédit Lyonnais, then the largest bank in France, and numerous smaller film studios, of which those that survived the ordeal, if any, can be counted on one hand.
* Dustin Hoffman's Mumbles (his confession of "Big Boy did it!" is rendered "Beebeedit!" until the police play his testimony back in slow motion). This was also a characteristic of Mumbles in the comic strip, who talked so fast he didn't bother to pronounce vowels (which, in English at least, are naturally slower than the consonants).
* Dustin Hoffman's soothsayer, despite being the main driving force behind both Shen and Po's character's is billed tenth.
* Dustin Hoffman where Hoffman demands "Bring me Peter Pan!" in response to Tom asking if there's anything he could ever do for him which only warrants a chuckle from Tom.
* Dustin (Phlegmatic) — The apathetic and easy-going title character.
* Dustin Rhodes. A rare "visible feet" occurrence of the trope in a live-action setting.
* Dustin Rhodes burning his Goldust suit and Beaver Cleavage (Charles "Headbanger Mosh"/"Chaz" Warrington) are examples of wrestlers on air refusing to keep playing some lame gimmick (in Beaver Cleavage's case, a 50's schoolboy with a creepy attachment to his mother) and berating the writers for it. Though these are usually scripted rages, they more than likely have a basis in fact.
* Dustin, the main character's parents have almost a whole decade between them, which is sometimes exaggerated—at a restaurant, the waiter asked for their I.D.'s: he wasn't sure if Dad qualified for a senior discount and had his doubts about Mom being old enough to drink.
* Dust is the energy resource of the world of Remnant, mined from the ground in crystalline form. It exists in several natural forms, as well as several naturally occuring combinations. Humans have also been able to create artificial combinations as well. Every form of Dust, whether natural or artificial, raw or combined, has its own elemental power. When used in its raw form, Dust can even produce elemental effects such as summoning thunderstorms and lightning. Other forms of Dust can produce fire, ice, rock, and even gravity. The rarest form of Dust produces
* Dust is the most illegal and most commonly used drug in the galaxy. Thanks to a technological component even droids can do it!
* Dust", Luís Gallegos survives his execution by hanging because the rope breaks at the precise moment that he falls. This is the moment that everybody in town decides (on top of everything else that has happened throughout the episode that was making them undecided about whether following through with this whole charade was actually a good idea) to let him go.
* Dust Man has a puppet-like mouth plate, with his vacuum being moved back.
* Dust of Dreams close to tesla coils. They generate enough electricity to enable them to shoot lightning at their enemies.
* Dust of Dreams, introduces the Shi'Gal Assassins of the K'Chain Che'Malle (best described as telepathically communicating intelligent dinosaurs). They are the hive Matron's personal executives. There are up to three of them at any one time, and they are bred to have anathema mindsets, so that they would under no circumstances form an alliance and turn on the Matron.
* Dust on the job via Operation Six, which isn't described in detail but sounds a lot like C-53 mildly electrocuting him. The punishment backfires when Dar and Bargie think it looks fun and ask C-53 to do it to them too.
* Dust ordinary infantry soldiers can carry heavy machineguns or magazine-fed semi-

automatic bazookas.
* Dustpit Follies, it turns out that Atlantis sunk because aliens attacked. The city was of the "technology more advanced than modern day" varient. One of the characters has a harddrive that apparently survived the destuction and thousands of years. He bought it from a flea market for 10 bucks.
* Dust Storm (Dust Storm Warning - DSW, real life from storm in the US state of Arizona)
* DUST Tactics is about an alternative history World War 2 featuring walking tanks, powered armour, Nazi zombies and the like.
* Dust) that are being taken advantage of by foreign invaders and corporations. Due to this foreign intervention, it's almost entirely a lawless wasteland, with multiple factions vying for control. While there may still be a significant central power in the area (Shade Academy), in practice there is no significantly powerful central government. In other words, Vacuo is the Remnant equivalent of both the African Congo and Middle East (Syria in particular) after the end of Western imperialism.
* Dust, the Sino-Soviet Union (SSU), continues to use tanks as their Walker technology is just developing. The mightiest of their tanks are the superheavy tanks "Karl Marx" (heavy Tesla cannon and 3 12.7mm machine guns) and its variant "Lavrentiy Beria" which uses a 152mm cannon, a flame cannon and a pair of 12.7mm machine guns.
* Dust this close to Salem's tower, which flies in the face of everything Weiss knows about Dust.
* Dust to help her fight Torchwick while she battles a White Fang lieutenant.
* Dust while drilling for oil and adapt the tech into mechs, flying wing planes, bio-engineered cyborg gorillas, and zombies.
* Dust (who deposed Hitler from power) with the capacity to turn the Russian campaign into something more manageable, allowed them to succeed when they performed Operation Sealion, and at the time of the "present day" on the game's setting they have now started a campaign of limited ground warfare on the coasts of the United States. The best hope the United States has is their own super-tech, engineered from that which they have captured from the Axis and a recent UFO crash on Roswell, New Mexico...
* Dust would apparently be an example of this done right, given that despite his fanbase he spent most of his time in the RPG double-crossing or otherwise getting in the way of everybody.
* Dusty Answer sometimes switches to this from third person, forcing the reader to closely identify with the heroine. Could this be why it was her most insanely popular novel, leading to multiple marriage proposals? Could be.
* Dusty Desert body of sand, it splashes. And if you happen to let the sand come above a character's ankles, they'll die instantly as if they fell into water.
* Dusty helps Bulldog pull out of his death dive, and then guides him to the runway. It costs him though in that he's dead last for the second leg in a row.
* Dusty Joy, her bad day has already been made worse by the fact that she got smacked in her flank by a stallion who crept up behind her as she was leaning over during her cleaning duties. She retaliated by kicking his face, which her boss Peach Seed reprimanded her for before having the guards escort the stallion away.
* Dusty Rhodes gimmicks of Dusty and put him in that polkadot singlet, which Dusty took as a challenge, Dusty's pest status wasn't exactly a secret.
* Dusty Rhodes. It helped that it was one of the few times that Dusty, who was previously a long-time booker of Jim Crockett Promotions, didn't have to worry about booking or running a promotion, allowing him to just relax and enjoy wrestling.
* Dusty Rhodes PPV—which consisted of nothing, but cage matches—was born.
* Dusty Rhodes to have more than just a professional relationship but said his mindset was "To each his own." until he believed they were getting in his business.
* Dusty Rhodes with the stipulation that if Dusty and Dustin won, Flair had to kiss Dusty's white ass. Because Dusty won the match, Flair was forced to kiss Dusty's

white ass, a white mule with the words "Dusty's Ass" written on its backside.
* Dusty Rhodes wrestled his last match in 2010 at the age of 64. It was a six-man tag with his sons.
* Dusty Springfield, bisexual British soul singer who came out in a 1970 interview, although her sexuality was not widely publicly known until after her death.
* Dusty Springfield had two big hit singles early in her career, "I Only Want to Be with You" and "Wishin' and Hopin'," and a less memorable single between them, "Stay Awhile."
* Dusty Springfield kicked off her solo career in 1963 with "I Only Want to Be with You", a heavy song in her rather light career. Somehow, it shot to #4 in her native UK but missed the Top 10 in the US.
* Dusty Springfield's "You Don't Have to Say You Love Me" is a song about a woman begging her beloved to stay with her, they don't have to admit their love for each other, because just being with her is enough. The fact that Dusty was a bisexual seems to add an extra layer of potential sadness to the song.
* Dusty Springfield - "What Do You Do When Love Dies" and "I Just Don't Know What to Do With Myself".
* Dusty's Trail: In "Here Come the Brides, There Go the Grooms", two hillbillies kidnap Dusty and Callahan to become husbands for their ugly sisters in a double-barreled shotgun wedding.
* Dusty's Trail: In "John J. Callahan", Callahan will win $500 in a boxing match if he can last 5 minutes against the Champ. But the Champ has kidnapped Mrs. Brookhaven.
* Dusty's Trail: When Dusty and the gang stumble upon an apparent ghost town in "Brookhaven, U.S.A", Mr. Brookhaven decides to rename it and turn it into a real town again.
* Dusty the Fat, Bitter Cat was a long-time columnist in the Internet wrestling community. He started on parody site ScoopThis as a satire of cynical, snark-laden wrestling columns (with the cat character thrown on because "on the internet, nobody knows you're
* Du Svardenvyrd back into the world. The book doesn't have any inherent mystical power, but the secrets it reveals are too much for a sane mind to accept.
* Dutch also has pretty good HR skills and an eye for keeping morale up among his people.
* Dutch also says in the manga that he doesn’t want to risk himself in an operation that could make him a lot of money, (dooming himself to work for significantly less money than other operators) because he knows
* "Dutch Art & Dutch Courage" reveals that Alfie gives AMAZING massages.
* Dutch author of children's books Paul van Loon is never seen in public without his shades. This rather adds to his mystique, being a writer of mostly
* Dutch bikes are considered a guarantee for quality in the parts of Germany that border to the Netherlands. They can be identified by the chain guard that goes
* Dutch comedian Herman Finkers had a sketch on when he tried to gesture to a man in the car next to him that there was a fly next to him, resulting in him doing half a dozen different rude gestures, one after the other. For instance, his attempts of communicating to the man that the fly was flying around his ears, and then maybe suggesting what finger to kill it with. It ended with the man being thoroughly insulted and using a handy near-by axe to bash in Herman's tail light. His response? "Is it dead?"
* Dutch engineer Johan van Veen. From 1937 on he started petitioning and warning the Dutch government to reinforce the diking system in the south-western part of the Netherlands. Nobody listened to him. Cue 1953, a freak storm and much of the province Zeeland was flooded, with 1800 people dead. After the stormflood... he got all of his plans approved and this started a 30 year project of protecting the south-western lands from the North Sea. Knowing the government would not listen to his warning, how did he sign his proposals before the fated storm? Dr. Cassandra.
* Dutch has the same problem, when the diminutive isn't used — 'mijn vriendin' literally means 'my female friend' or 'my girlfriend', but people usually assume it's the second meaning. 'Een vriendin' means 'A female friend' or 'A

girlfriend', but people generally assume it's the first meaning. Though the rules about this aren't as strict as in German, there's still some misunderstanding involved whenever you talk about 'mijn vriendin', if it's a platonic female friend.
* Dutch. He also refuses to abandon the boy no matter what, because that would end his relationship with the mother. Doyle senses all this and takes full advantage.
* Dutch insurance company Centraal Beheer is famous for its advertisement catchphrase "Even Apeldoorn bellen" ("Just call Apeldoorn", Apeldoorn being the city in the Netherlands where their head office is); they've used the phrase for over a decade, but people tend to forget which company it is. Then again, there's only one insurance company with their head office in Apeldoorn so that's okay.
* Dutch is probably the cleanest of the main characters but even he succumbs to temptation, planting evidence in the house of a suspect that he knows, but can't prove, is guilty (although he has a change of heart and returns to remove the evidence before it's discovered).
* Dutchman Michiel van der Kuy produced italo-disco and spacesynth in the 80's under the names Laserdance (with Erik van Vliet), Koto, Proxyon, Rygar, etc., techno-rave in the early 90's as L.A. Style (with Wessel van Diepen, later co-founder of the Vengaboys), Eurobeat with various vocalists (in the early days of the genre), and later even co-produced a couple songs with Alice Deejay. In the mid-2000s, he teamed up with Rob van Elijk as Area 51, but has since reverted back to Rygar.
* Dutch Mantel used to regularly come to the ring with a whip he called "Shoo-baby"
* Dutch-on-Dutch/Afghani: During January 2008 in the Uruzgan Province, a unit of the Dutch Army attacked a composite group of Dutch and Afghan soldiers that they had mistaken for the Taliban. Two Dutch and two Afghani soldiers were killed before the firefight ended.
* Dutch openly states in the third episode that he'll work for anyone who pays his fees, and at one point knowingly does a job for a Nazi general, though he is anything but happy with the man's racist shit, flat out telling him to go to hell once the job is over.
* Dutch poet and singer Drs. P found his poetry to be his crowning masterpiece, but it's already clear now that he will be better remembered after death for his comedic songs.
* Dutch politician Pim Fortuyn famously told a female colleague: "Woman, go
* Dutch resistance freed 44 prisoners from Leeuwarden prison during the German occupation in 1944 by sending five men into the prison using this trope.
* Dutch runs illegal booze, slaves, guns, and drugs. He does piracy when the delivery business goes slow. He does not, however, condone his employees running off
* 'Dutch' (Scottish) sets up the Van Gogh display she attends to meet him in the first place.
* Dutch's horse, The Count, is said to be an Albino Arabian Stallion. In real life, horses cannot carry true albinism due to Lethal White Syndrome. Albino horses are born with non-functioning colons and die within a few days of birth. (Then again, this might be an intentional clue to highlight Dutch's tendency to lie and exaggerate, and thus simply be a white horse.)
* Dutch starts ignoring his long-time supporters in favour of new blood who has lots of questionable ideas on how to make money. Again, often seen as a metaphor for Rockstar's new focus on
* "Dutch". The character thinks "Dutch" could make anything sound interesting. "If anyone was a great communicator, he was the man."
* Dutch TV commercials for Grolsch beer even with just the opening bars of the signature tune.
* Dutch van der Linde is shown to have been a flaming narcissist during
* Dutch van der Linde murders a young woman by the name of Heidi McCourt in cold blood in the botched Blackwater ferry job that happened right before the beginning of the game. Allegedly, the job was going well until he was goaded into killing her by Micah. This got the law on their tail and made them stash the take (worth over

$4 million today when adjusted for inflation) which was enough for them all two dozen or so of them to retire from the outlaw life. It was their
* Duterte is now the 2016 president-elect of the Philippines, running on a platform of being "tough on crime, lenient only to surrendering criminals." Judging by the type of punishments he inflicts, minor offenders are likely to do what he wants.
* duty-bound to rule over others responsibly. The Magisters who aren't just in it for themselves genuinely seem to believe that they are serving mankind's best interests as Magisters.
* Duty Calls tendencies even has higher morale than would be associated with their usual losses, since these losses are mostly fungs.
* Duty Calls, the Imperial fleet supporting the Imperial Guard's ground operations against a Tyranid invasion by blasting any 'nid-held locations they find out about. The planet's weather patterns make finding out about them difficult, unfortunately.
* Duty Calls to decapitate a psyker cultist who was trying to assassinate him.
* Duty Calls, Zemelda, a vendor Amberley adds to her retinue, speaks in frequently-grating slang... which is lampshaded in that neither Cain nor Amberley understand half of it.
* "Duty": Captain Hornblower orders flogging to Styles who was in charge of the kitchen and its stove's fire might have burnt their ship down. Other people aboard suggest he should be hanged for it but Mr Bush spoke for him as it was not intention, but negligence. However, it was actually the antagonist Wolfe who set Styles up.
* Duty That Transcends Death that even when they die, they keep doing it.
* Duty That Transcends Death: When a character's sense of responsibility lets them come back from the dead in some way or shape.
* Duty to rescue falls under two broad categories. The first category is when the person in question created the dangerous situation that someone else needs to be saved from, they're responsible for doing so. The second is that people who are considered to be responsible for others (parents, the captain of a ship or airplane, an employer, a property owner who invites someone onto their property, and in many places, spouses) are required to rescue those they are responsible for.
* Düppeler Schanzen-Sturmmarsch written by the Prussian march composer Johann Gottfried Piefke during the Second Schleswig War against Denmark in 1864. It was created specifically to be played on the front-lines by a military orchestra during the Prussian attack on the Danish forces in the Battle of Dybbøl. As the Prussian army had expected, the outnumbered Danes had their positions completely overrun and suffered a crushing defeat, and their fate as the losers of the war was effectively sealed.
* Duumvirate, and there's a subplot involving "room eraser" spread weapons.
* Duumvirate for that matter, you tend to get a deep appreciation for genetic superiority.
* Duumvirate has electric eel DNA. Turns out his girlfriend enjoys electrical play.
* Duumvirate has wings in its juvenile stage, but loses its ability to fly as it grows up.
* Duumvirate have the shapeshifting, fusion-powered Deathmobile. There's a crematorium under the hood for body disposal.
* Duumvirate humans have regeneration, super strength, and super speed.
* Duumvirate is written from the point of view of the Illuminati themselves.
* Duumvirate's fusion-powered jet can take them to Mars without a booster.
* Duumvirate. Subverted in that the master might be even more physically dangerous.
* Duumvirate was buxom before she could genetically alter herself. After, she jumped chest-first into this trope.
* Duval astounds some of the main characters. Thankfully for both parties, Sanji kicked Duval pretty, and looks very handsome and nothing like sanji, save for the blonde hair and swirly eyebrow.
* Duval crushes a glass of wine in his hand when he hears that the Straw Hats pirates, including the hated Sanji, are coming near his island.
* Duval's identity was done like this. He started out having a personal beef with

the Straw Hat Pirates, but
* Duval's scar on his back used to hurt whenever he thought about Sanji. It was forgotten about when he underwent a
* Duv attempts this (using slave labour to dig a hole) in order to gain an
* Duverger's law states that single-member district plurality electoral systems tend to lead to two dominant political parties because people will not vote for candidates from smaller parties and instead vote for one from the two largest parties that they believe have a chance of winning.
* "Duwang" panel to have Kira saying it as a joke, but the memes quickly grew from there and many aren't aware it wasn't from the original scans. In the corresponding panel in the actual Duwang scan, he simply says "you can't escape."
* DV8. Further investigation revealed that Menlove was actually a former International Operations instructor who got kicked out for molesting one of his charges... who turned out to be Bliss, who promptly killed him after realizing that he was her abuser all those years ago.
* DV8 has control over her density — she can walk through walls or be tougher than diamonds. She mostly goes for the latter choice, being a very talented and skilled hand-to-hand fighter and all.
* Dv8s mutated by the same Phlebotinum that gave the others powers, and tries to get him to have sex with her in front of them.
* D.va is based on the stereotype of Koreans loving video games, but breaks the mold in: 1. turning her gaming skills into
* D.Va's lovely pink ride, equipped with fusion cannons, a defense matrix, jump jets, and a self destruct button. Notably, she doesn't wear it or even drive it so much as
* DVD and Blu-ray releases of PPV events can spoil what were surprise returns at the PPVs (like
* DVD Bonus Content: A DVD release includes additional content besides the work itself.
* DVD Bonus Content - DVD stands for Digital Versatile Disc (formerly Digital Video Disc)
* DVD cases with brackets. Have you ever tried to open one of these DVD cases like you would any other case only for it to
* DVD Commentary: A DVD release has an audio track where the production team talk about the development of the movie while watching it.
* DVD Commentary, and the only reason why he hasn't done it is the royalties he'd have to pay the Degrassi people.
* DVD Commentary, creator Mike Mignola mentions that Hellboy's entire shtick is taking mystical artifacts and objects and turning them into tools and other utilitarian objects, specifically noting the scene where Hellboy's gear is presented. There's a sledgehammer in there, for instance. The metal for his gun was obtained by melting down several holy relics. The wooden handle is carved from a piece of the True Cross. The emblem set into the handle is in fact a magical amulet on each side. Naturally, on top of that there are various different types of bullets for battling different supernatural creatures, including ones containing silver and wood.
* DVD Commentary for Season 1 that fans shouldn't get their hopes up for a white raven as described in the books, since the rare bird is very difficult to secure for filming. Sure enough, one appeared in the Season 2 premiere, shot long before their commentary.
* DVD Commentary for "The Chronicles of Meap", Dr. Doofenshmirtz states that he doesn't trust Ferb and disapproves of his crush on Vanessa when it comes up during the episode.
* DVD Commentary" from series one), it might be fine if you watch them in immediate succession, but when they first air a week apart, you can't help thinking the characters have been standing there all week themselves.
* DVD Commentary", in fact, gives us a taste of how he would have played it.
* DVD Commentary insist that it's a dramatization of real events. We believe them.
* DVD Commentary is described as an "homage", to which the reply by writer Mike

Reiss is "Yes, homage: French for theft."
* DVD Commentary: It was the first episode in the series where the universe was in danger of ending (Farnsworth's plan to win the harmless match led to a harmful collapse of time and space).
* DVD Commentary, Nicholas Meyer talks at great length about how dated the way David wears his sweater is, citing it as an example of how "all works of art are inevitably products of their time".
* DVD Commentary: One of the DVD's bonus content is an audio track where the people who worked on the show/movie talk about the work's development while watching it.
* DVD Commentary points out and jokes about it that Gandalf could not use the magic he used to turn away the forces of Mordor a second time because he used up all the power in his staff, "And all the shops in Minas Tirith were sold out of batteries."
* DVD commentary reveals that the production team always uses period-accurate real-world alcohol bottles, with one exception: A real brand is never used in a drinking-and-driving situation.
* DVD Commentary's scenes seem to exist for the purpose of letting Urban chew scenery.
* DVD Commentary, the creators joked that all of MH can be summed up as: "Agh! Look at the background!"
* DVD Commentary, the show's staff discuss Homer's wild mood swings, coming to the conclusion that the character's ability to immediately return to a default-jolly state from any other emotional state is one of his most endearing qualities. They also observe that Homer, more than any other male main character in probably all of fiction, will burst into tears at the drop of a hat.
* DVD Commentary, the writers discuss how the original story had Seann William Scott's character being killed by the villain and Jaime King's character becoming the Monk's successor. The studio wouldn't allow it, so the writers had to fudge the ending, allowing both characters to live and share the Monk's power.
* DVD Commentary, the writer, Sera Gamble, said she loved Andy. She said, "You know my heart belongs to the geeks, the nerdier... If you live in a van filled with weird books then I’m your friend, you know?"
* DVD Commentary, they talk about how they kept cutting to the fireworks so that they could draw out the kiss longer.
* DVD Commentary Weird Al reveals that the part where the Mormon Tabernacle Choir sings "The Battle Hymn of the Republic" after Stanley finishes his impassioned speech during his first time on TV is this.
* DVD Commentary", when it was still uncertain if the show would stay on, one of the guys talking asked, "What if we had a fifth season?"
* DVD Commentary, when the Professor first creates the girls and stares right up at the screen, this was supposed to make the audience see his face the way the tiny girls did — huge and staring at them.
* DVD Commentary writer/director Stephen Chbosky said he made a conscious effort to cast members of his protagonist Charlie's family with actors that look related.
* DVD extras also show us the past of drug kingpin "Proposition" Joe Stewart, generally called Prop Joe. The extra scene shows Prop Joe selling stolen test answers to a group of his fellow classmates. First he deflects their threats to simply beat him up and pay nothing for the answers by pointing out there are more tests in other subjects coming up, and if they take that approach they won't get anything. Then when they only pay him half the agreed upon price, he promptly turns around and sells the teacher information on who'll be cheating on the test to make up for the shortfall!
* DVD itself proved to be the Killer App for home theaters that LaserDisc had hoped to be. In addition to noticeable picture improvements over VHS, DVD also brought high quality surround sound that encouraged the sales of multichannel speaker systems.
* DVD-R Hell' advice for children dealing with 'strangers' is for the child to 'Go for the nuts'.
* DV Ds, besides internationalization and on other niche cases such as concerts, is for erotica, as it sure is exciting for the viewer to see the action unfold at

different camera angles.
* DVDs can suffer from this. If a DVD+RW (not tested with -RW) is quick-erased (marked for overwriting) and new content incorrectly recorded, the video recorded over the old content will play to the end, then the player playing the disc will freeze as it tries to make head or tail of the abrupt transition between the end of the new content and the middle of the old content. Then any parts of the old content that haven't been overwritten will play (if the new video takes up less space on the disc than the old one), usually with glitchy video or sound.
* DVD's Survival Mode then Teasle as he did most of the sadistic abuse towards Rambo presumably out of rancorous jealousy for being a vet who had seen actual combat, while Galt did not.
* DVDs used to come in big cardboard boxes twice the length of the actual case, in an attempt to convince people that there was more than just a disk being sold.
* DVD Verdict review for comments that "You know you have a stinker the size of Texas on your hands when the best review quote they could find for the box was '...great scene transitions and some of the better special effects of the year...'" The reviewer himself takes it even further in "The Evidence" part of his review (where praise of a film's good qualities normally goes) by going, "Umm...lemme see...the DVD itself is a picture disc. And there are end credits. See, I can spot the good in everything if I try."
* DVD watching a Blu-Ray might get you to the menu because you pressed "Stop" when you wanted "Pause".
* Dvine [LUV] has three characters fitting this trope: Mia, Sakura, and Youra, though the latter gets her hair cut.
* Dvipantara, one of Overture's colonies, is a stand-in for Indonesia; the place itself is never seen, but its inhabitants have Indonesian names, enjoy traditional Indonesian foods, and the scientific name for
* D'Vorah. She at first serves Kotal Kahn, who took over Outworld after overthrowing Mileena.
* DW7 Lianshi. Keep in mind that the ending is a feast, one that follows the euphoria of a major battle of independence. You would think they show more than that.
* Dwadge and Zaku III (with a special system to let her use its Funnels without her needing Newtype powers) instead of anything she piloted in the show.
* D-War contains a scene in which six helicopters explode spectacularly within minutes of each other.
* D-War did a good job of killing Buraki's forces, the problem was there were too many of them to deal with.
* dwarf adolescence, i.e. age 50. Carrot's girlfriend Angua opts for demonstration over explanation.
* Dwarf Bread becomes a better alternative for food. Including roots, berries, moss, small rocks, or your own legs. Dwarfs probably wish it could attract rats, rats being a staple of their diet, but the best way to catch rats with Dwarf Bread probably involves throwing it at them.
* Dwarf Bread to eat. You carry it so that your shoes taste better by comparison. And if you've run out of those, your own feet.
* Dwarfen Tide, since the Dwarfs not only use the old system, but have a laundry list of positive relation modifiers and technologies that make confederating far easier (and far more common, in the AI's case) for them. This can even sink entire campaigns if you happen to be at war with a minor Dwarfen faction and they suddenly get confederated, leaving you at war with a mighty juggernaut you can't possibly overcome.
* Dwarf folklore is an interesting deviation; it holds that dwarfs and trolls are diametric opposites and will forever hate each other.
* Dwarf Fortess does this in Adventure Mode with anyone you can talk to, especially the ones you've been sent to kill. Speeches typically have their name, relation to other historical figures, kill list, and then the obligatory "prepare to die" if they're trying to kill you.
* Dwarf Fortress, according to modifiable parameters. This is a huge part of the

game's charm.
* Dwarf Fortress Adventure mode as a Human Outsider, that is, in the wilderness, outside of any village or civilization.
* Dwarf Fortress: All the dwarves have names, as do any visiting humans and elves. But for the monsters to have names they have to slaughter enough dwarves to become important. As creatures which start out with names (dwarves, goblins, humans, etc.) rack up kills, they eventually gain an extension of their original name. Because of this, one can often tell who the local badasses are by looking at who has the longest name(s).
* Dwarf Fortress also allows you to butcher captured and / or fallen enemies for food and other by-products.
* Dwarf Fortress and abide by goblin societal norms. This can reach such an extreme as to circle into inversion, in which none of the members of a goblin community are goblin by blood, and may be homogeneously elves, humans or even dwarves. The only exception is one aversion; only full blooded goblins seem to become priests, and they may be the only racial goblins present at a nominally goblin settlement.
* Dwarf Fortress and a penchant for snatching weapons off attackers and using them in addition to their claws and sting.
* Dwarf Fortress and covered with blood, strangling them with your bare hands, and then use the corpse as a bludgeon to kill more bears. Or even throw dead bears at other bears and KILL them with it!
* Dwarf Fortress and establishes a small colony, but hands over the reins to his successor before any of the actual governing starts. Cue an earwig monster kicking down the doors and the colony being sealed off until some other crazy bastard sets up shop down there.
* Dwarf Fortress, and eventually rose to become king of his dwarven civilization.
* Dwarf Fortress), and lacking that start punching, kicking, biting and wrestling. Expect such scenes to come by the dozen when a siege occurs.
* Dwarf Fortress, and the "afflicted" organs duly amputated. Tragically, the patient didn't survive.
* Dwarf Fortress, and while it doesn't exactly tear people apart, they have been known to knock people out of small boats. In true Dwarf Fortress form, what has the government decided to do about this invasive species? Nothing.
* Dwarf Fortress: Antmen, one of the primitive underground animal people, come in four castes: workers, a third the size of a dwarf; drones, the same size and winged; warriors, as big a dwarf, that will defend the queen at all costs; and the queen, the size of a lion and the only female.
* Dwarf Fortress, any dwarf can become one of these with practice. Prepared food has an inordinately high value, a legendary chef can turn raw tiger intestines and bear brains into a barrel full of gourmet meals with a value rivaling adamantine weaponry.
* Dwarf Fortress are forgotten remnants from when the gods created a given world. Each one is unique as a result of being procedurally generated, and can vary in terms of limb count, tails, flight, dangerous excretions, and sometimes being made of inorganic things like glass or mist.
* Dwarf Fortress are sometimes admired for their "corrupt intentions".
* Dwarf Fortress are still alive in the world, following into varying Eras of mortal races and potentially into Ages of Death or Emptiness if mortal civilizations got eradicated by something.
* Dwarf Fortress as he almost immediately nerfed the value of mermaid bone after finding out about it.
* Dwarf Fortress, as of DF:2010, allows elephants to be trained for war. Unfortunately, your dwarves can't actually ride them.
* Dwarf Fortress as the "circus" or the "clown car" or the "circus tent", the inhabitants as "clowns", and the stuff you dig through to get there as "cotton candy" or just "candy" has met with mixed results, with some fans amusedly adopting the phrasing and others finding it ridiculous.
* Dwarf Fortress, as wealthy settlements attract larger and more frequent raids by goblins and other hostiles.

* Dwarf Fortress averts it or plays it straight, depending on the world generation seed.
* Dwarf Fortress blood), and do not breathe - which means there is literally no way to kill them. The only means to stop them are to encase them in ice or obsidian, or to take advantage of another glitch by crushing them under a drawbridge or luring them into a cave-in (which essentially erases them from the game).
* Dwarf Fortress. But there are some interesting specific ones outside that paradigm:
* Dwarf Fortress) by the players. In other words, they provide a good example of the origin of this trope.
* Dwarf Fortress can be created by deities, and the art of necromancy can spread further by being copied into books.
* Dwarf Fortress can involve this. A berserk dwarf will in some way anger another dwarf, whether by killing a loved one or destroying a valued possession, causing them to take revenge or go berserk themselves and repeat the pattern.
* Dwarf Fortress can lead to even trashy conscripts carving a sizeable dent in an actual army. And skilled, well-equipped warriors at a good Tactician's command can slowly whittle an entire city to a lifeless ruin with a little insistence.
* Dwarf Fortress) changes the colors to shades of green and all the ASCII letters and numbers to sufficiently similar Matrix-looking symbols.
* Dwarf Fortress. Depending on the player's treatment of dwarven children, this belief may not be unfounded.
* Dwarf Fortress Due to a quirk in how they build walls, they will always prefer to build them from the west side. This occasionally results in them walling themselves into an enclosed area and dying of dehydration.
* Dwarf Fortress: dwarf nobles have a tendency to sentence dwarves to "hammerings" (usually fatal, but not always) when their mandates are not met.
* Dwarf Fortress. Dwarves will cancel a task to pull a lever to activate a critical series or traps or other defensive mechanisms to go get a drink or take a nap. Military dwarves will, on some occasions, literally stop fighting an invading horde of monsters because they're sleepy or hungry.
* Dwarf Fortress Especially in the latest version, where bathing is a bit broken so attempts by dwarves to wash all that blood and vomit from battles off results in a giant puddle of blood all over the floor...
* Dwarf Fortress (except for the anvils), as real Kea are known for their tendency to breaking into cars, stealing items and keeping people awake at night by rolling down items from steel roofs.
* Dwarf Fortress falls under this or Video Games, the scene where Ironblood is betrayed by the nobles certainly springs to mind. Ironblood is poisoned by the nobles who are servants of an evil god, stripped naked, and thrown into the arena he himself ordered constructed. Then, to kill him, they release a hydra to kill him. While naked, poisoned, and vomiting, Ironblood kills the Hydra with his bare hands. By crushing its skulls. Then, he climbs out of the arena, and... well...
* Dwarf Fortress fans being what they are, "being on fire" is considered a supremely dorfy (read: good) thing. The !! thrown around in discussions (like
* Dwarf Fortress features dwarves that are different colors depending on their jobs, the result in your main meeting room being a mess of brown, white, grey, blue, etc. smiley faces.
* Dwarf Fortress features them. They'll siege your fortress now and then if you're close enough to one of their towers. You most likely won't know it's them attacking, though; usually the only way to tell a Necromancer siege apart from a run-of-the-mill zombie siege is that the zombies resurrect as soon as they go down — somewhere close by is a necromancer in hiding, raising whatever gets cut down.
* Dwarf Fortress. For example, a title along the lines of "I need to find a way to efficiently kill children." is not unheard of. And this doesn't count the various situations in-game that can occur by accident, like mothers using their babies as shields or occasionally weapons.
* Dwarf Fortress, for that matter, if you're an Adventurer instead. Both will give

you utter hell even by the game's standards.
* Dwarf Fortress GCS and will spend entire forum threads discussing safe methods of harvesting their valuable silk.
* Dwarf Fortress generator. Some details like monsters and magic will be different from world to world. And given the game's incredible modding potential, how much any given world plays straight or subverts the standards can easily depend on the player's whims.
* Dwarf Fortress get jammed if triggered enough times in quick succession and projectile weapon-based ones require reloading, but they don't require any maintenance and can stay functional indefinitely. Averted with the tombs that show up during worldgen, as they're littered with degraded traps that vastly reduce their ability to harm an adventurer.
* Dwarf Fortress goes mad with grief, quality steel weaponry and high combat skills make her killing spree all the messier.
* Dwarf Fortress grant bonuses or even make certain skills exclusive to one gender or the other, but currently doesn't.
* Dwarf Fortress had dwarves be generally non-plussed about picking up things on fire and being on fire themselves, which was highly amusing until you realized it made it nearly impossible to keep a fire under control.
* Dwarf Fortress has adamantine blades that are so sharp they cut through giant elephants like they are butter. A proper look at the raws reveals that the sharpest possible edge one can give an adamantine weapon is ten times as sharp as the best possible edge a steel weapon can be given. The latter can already decapitate a giant bronze statue in one swing in skilled hands; the former can do without the "skilled hands" part, and will tear anything into bloody confetti even when given to a weakling that's never trained a day in his life.
* Dwarf Fortress, has a PhD in mathematics from Stanford. He was doing a postdoc before going into software development full-time.
* Dwarf Fortress has dwarves rushing under the Elephants' feet to loot their trampled comrades.
* Dwarf Fortress has giant versions of many animals, the largest being the giant sperm whale which is larger then a real world blue whale. Gods help you should a giant sperm whale ever be infected with undeath as they will then proceed to come onto land to murder your entire fort. Other giant animals include giant sponges, which while not as deadly as in an earlier version where they were effectively invincible (except to copious amounts of magma, a drawbridge, having the water they were in drained, or a cave in) can still fuck your shit up far more then any sessile animal ought to be able to, and giant cave spiders which have a poison that will slowly but inevitably kill your dwarves (and most other creatures) via total paralysis followed by suffocation.
* Dwarf Fortress has mostly mundane plants such as bilberries, but a few unusual ones turn up, most notably underground crops such as the subterranean mushrooms known as plump helmets, the cloth-providing pig tails, or dimple cups, which can be ground into dye.
* Dwarf Fortress has too many examples to list, typically from applying the "giant" template to normal flying creatures. Most such creatures are content to leave dwarves alone, providing only atmosphere and the occasional hunting spoils, but a few are of note:
* Dwarf Fortress have an unhealthy relationship with fire. Specifically, they have a complete indifference to it. A dwarf on fire will continue with his/her normal routine, setting everything on fire that they pass. This will last until they burn to death or are somehow extinguished.
* Dwarf Fortress have no problems with serving in the military. The frequent breaks associated with military service, however, tends to lead to these dwarves having lots of babies if they ever get married. They also don't mind charging into battle juggling a crossbow and three babies. Nor do they mind using the babies as impromptu shields.
* Dwarf Fortress have the bad habit, when dismembered, to keep fighting as any part that has a grasping limb. Cut their hand off, and the hand may come to life and

strangle you. Behead them, and the head will chase you and bite at you.
* Dwarf Fortress having rains of blood or corpses coming back as the undead, and tentacles and eyes as "plants." Evil-aligned creatures include Creepy Crawlers (which resembles masses of human fingers) and Blood Men (humanoids made of "corrupted blood").
* Dwarf Fortress high dodging ability. This can be circumvented by having even one ally travel with you or sleeping in relatively "empty" biomes like mountains and by the beach, but being in the dark still greatly reduces visibility. Averted in certain regions, particularly savage and evil areas, which are full of enemies even in broad daylight.
* Dwarf Fortress: If there's lava somewhere on the map, it will eventually be pumped onto the surface by the player. There's a bug where if a volcano is spawned overlapping a bottomless pit on a local map, the result is an instantaneous eruption, forest fire, and death.
* Dwarf Fortress. If this happens, best case scenario is a centuries old king dies from old age as soon as they step into your fortress. Worst case? You get a frame to watch the surrealistic scenery you embarked into before physics apply and your dwarves get swallowed by the collapsing earth.
* Dwarf Fortress. If you can stand losing, often, and learn to play the game well, rigging up horrible deaths for all involved can be quite calming. Had a bad day? It's remarkably easy to flood your entire fortress and sit there watching the buggers break down as they flee the ever-rising watery death.
* Dwarf Fortress if you forget to label your levers. "Now was this the one that raises the drawbridge or the one that floods the fortress with lava?"
* Dwarf Fortress in Adventure Mode, and a source for necromancers to summon their armies from in Fortress Mode.
* Dwarf Fortress inherits this particular version, including the tileset option. For example, color is usually the only way to differentiate between rocks of different ores (which can be very important when you need to smelt metals) without looking at them specifically.
* Dwarf Fortress instead, which has 255 characters to standard ASCII's 128. It keeps the 16-colour limit for tradition's sake, despite requiring modern (future?) hardware.
* Dwarf Fortress. In the initial stages of the game, population growth is easy with big waves of migrants, but eventually they become insufficient to maintain the fortress. Experienced craftsdwarves and fighters suffer injuries and deaths, unskilled migrants can't fill their jobs and native fortress children take too long to grow up to matter in the long run. In addition to outside threats, stress of all previous loses eventually causes dwarves to turn on each other, furthering the spiral of doom.
* Dwarf Fortress is a procedural-generated fantasy game comprised of ASCII art, allowing it to have vast swathes of content without the limit of graphics. This lets it have tons of fantasy creatures mixed in there. It also has a mode called 'Legends Mode' that allows players to explore the histories of their generated fantasy world.
* Dwarf Fortress is flying creatures that can't figure out how to get from here to there because a valid ground path doesn't exist. If you then build the ground path, they will immediately remember that they don't need it and fly there like they should have done all along.
* Dwarf Fortress is to add these as a move in wrestling. It's as simple as going to the anatomy files, finding the neck, and adding the [JOINT] tag. From then on, you can snap a neck like it was an elbow or knee. Realistically enough, this isn't quite an instant kill but still cripples instantly, while the actual kill is done by the ensuing asphyxiation.
* Dwarf Fortress is to have all worlds be randomly generated mythopoeias, each update making the worlds you generate even more complex than before. The game even has a specific "legends" mode just for looking at the generated histories of the worlds.
* Dwarf Fortress, leading to a visible cloud of alcohol vapor erupting from the

barrel (easily mistaken for an explosion in the ASCII graphics of the game), and the loss of the fortress' vital alcohol stocks.
* Dwarf Fortress, lets you break into an ancient tomb and rob it of its treasure. If you disturb the mummy lying inside, it'll put a curse on you.
* Dwarf Fortress lets you build these as a very effective method of keeping your fortress safe from invaders. Interestingly, you can make an auxiliary entrance which invaders are forced to take when your drawbridge is up or your main entrance is sealed off in some other way. This entrance, of course, can be extremely long and extremely deadly.
* Dwarf Fortress levels. Did you just lose your four limbs? NO PROBLEM! Go, crawl through the landscape and bite your foes to death! No healing for you, unless you are a werebeast!
* Dwarf Fortress like the rest of the game. One notable bug is that thieving creatures can steal stepladders while the ladders are in use, resulting in the poor dwarf just hanging around in thin air, unable to use the no-longer-present stepladder to get down, until another dwarf enters the area and the game remembers that they're supposed to fall.
* Dwarf Fortress literally has no win condition. Just an astonishing number of lose conditions. There is a reason the official motto is "Losing is Fun!"
* Dwarf Fortress long time before it's near completion. Considering that as of 2018 it was still only version 0.44.12, early 2020s may have been optimistic.
* Dwarf Fortress, looking inside the mind of one of your denizens will often result in something like this:
* Dwarf Fortress, meaning creatures that spawn randomly and spoil food, along with more mundane creatures like rats and bats. The most unusual ones tend to live in evil biomes (which can hold demonic rats, pulsing bloodsucking insects and ghostly spiders) and the sometimes rather alien underground layers (which can produce infestations of crawling masses of fingerlike appendages or of the aforementioned snakes made out of fire).
* Dwarf Fortress Mining plays it straightest; the unmodded game uses a generic "axe" item for both combat and woodcutting, but using it on trees levels a separate skill from using it in combat. Pickaxes, for some reason, draw upon the "Mining" skill for both.
* Dwarf Fortress mod "Dig Deeper" is "star iron", which is both valuable and extremely rare.
* Dwarf Fortress, much more inexplicable considering other bosses are unaffected by traps altogether.
* Dwarf Fortress need to graze in a pasture, or they will starve to death. The mechanics of this are still pretty wonky, and several larger animals literally cannot eat fast enough to keep from starving. So much for your army of war elephants.
* Dwarf Fortress: no matter how careful you are with your military, there will inevitably come a point where they try badass solo charges against squads of goblin archers and end up shot to pieces in seconds. Or thundering in solo against powerful demons. Or otherwise get themselves killed in memorably messy fashion.
* Dwarf Fortress Notably, sentients of any other sort only start flocking to alcohol in the same manner when they've achieved the famed "doesn't care about anything anymore" level of emotional jadedness, and they'll match dwarves drink for drink no matter how much it hurts their lesser livers.
* Dwarf Fortress. Now, though these flights are rarer and less ridiculously long, the unfortunate victim now skids and bounces across the floor when thrown; longer flights tend to mangle the victim into "an unrecognizable mass" due to each bounce breaking a bone or three.
* Dwarf Fortress. Obviously it is a bad idea to leave rotting meat in an indoor refuse pile near a place dwarves will frequently have to pass through, as the miasma it gives off will disgust nearby fortress dwellers. More subtly, it is a bad idea to create bedrooms near frequently used crafting workshops, next to areas under current excavation, or just next to rooms in which dwarves are hauling around and placing furniture. Doing so will result in any dwarves sleeping in said rooms

having an unhappy through at their uneasy sleep due to the noise.
* Dwarf Fortress of elves fighting (and losing to) less than a hundred dwarves are not uncommon.
* Dwarf Fortress) off incest, kittens, and Plump Helmets. Some players generate worlds with no surviving civilizations to embark with this trope invoked. Embarking to an isolated island a simpler method. In either case, after the first wave of immigrants, there will be no contact with the outside world, or evidence that it exists.
* Dwarf Fortress of the DF-verse, is called the God of Blood, and the lore is that he regularly resets entire universes purely out of boredom.
* Dwarf Fortress on occasion, e.g. "The metalsmith has been stung by a honeybee!"
* Dwarf Fortress. Or going into a fell mood and killing some random dwarf.
* Dwarf Fortress or waist-deep pools of water that the dwarves have to wade through.
* Dwarf Fortress. Other than that, dwarves tend to have an orderly military.
* Dwarf Fortress: Players frequently build pits containing large and vile-tempered captured creatures. Sometimes these are trained, sometimes they're not. Crocodiles, zombies, wolves... people even build giant cave spider pits, and harvest the web left after a successful termination.
* Dwarf Fortress possibilities if it starts to rain speaks volumes about what kind of land we're dealing with.
* Dwarf Fortress. Put 'em in a combat unit, send them out to meet raiding parties or down into infested caverns.
* Dwarf Fortress randomly generates a world history for each new game, and divides it into Ages. Some are defined specifically by the fading of wondrous creatures from the world:
* Dwarf Fortress, rarely realized until the fort's defenses are put to the test.
* Dwarf Fortress, rats are a common vermin that devour your food, bone and shell stockpiles, give dwarves unhappy thoughts, and spontaneously appear in large swarms.
* Dwarf Fortress retreating (or even following a 'move' order) as long as there's something to attack. Ranged dwarves who've run out of ammo consider themselves to be melee dwarves, which tends to end badly if you haven't got the resources to give them proper armour. Really, the best you can do is station the lot of them around a corner somewhere and wait for enemies to walk into the mobile meatgrinder. On the plus side, the enemy AI isn't any smarter and can easily be led into ambushes.
* Dwarf Fortress, since vomit inspires other dwarves to vomit as well. Because of this, cave adaptation and the occasional gut-shot during combat, the front door of your fortress often gets a shallow moat of dwarf (and others') puke.
* Dwarf Fortress smelting, forging metal items, and other things that require great heat can get the heat from magma rather than by burning fuel. But since in the game magma remains at the same fixed temperature regardless of how much heat has been extracted from it, a small bit of magma isolated from the planet's core can supply an endless amount of heat energy.
* Dwarf Fortress, so hot that even going near it caused third-degree burns. No one could wield it. At great cost it was sealed in stone.
* Dwarf Fortress, some deities can be associated with the spheres of murder or torture. Moreover, cults worshipping demons or vampires can appear during generation.
* Dwarf Fortress sort of fits this, though in an odd way. It would be more accurate to say the player gets better. Simply, Dwarf Fortress is so complex that anyone new to the game simply will be unable to enjoy it yet. But once you figure out how to dig and build, you'll start enjoying the game. Then you can begin to scale that difficulty cliff, which provides you with an ever-increasing view of awesome that by the time you reach the top you feel you deserve every bit of fun you now get... until you realize you just climbed up the side of a volcano, and so on.
* Dwarf Fortress started a massive riot (due to unhappiness-induced tantrums), killing dozens and paralyzing the entire place for weeks.
* Dwarf Fortress tendencies to the attention of the fans there was a rather

heartwarming outpouring of concern for his long-term health and offers to send him some proper food or even find him a live-in housekeeper.
* Dwarf Fortress) that are hundreds of feet tall, made of pure gold, and with magma for eyes).
* Dwarf Fortress that governs how willing a civ is to engage in cannibalism (here defined as eating any creature with the Can_Learn tag). Dwarves, humans, and kobolds see cannibalism in any form as unthinkable, but elves will eat sapients killed in battle (though they won't kill other sapients specifically for food), and goblins just don't care and can butcher and eat anything. As major ethical conflicts can cause civilizations to go to war, this can result in dwarves and humans declaring war on elves and goblins over eating sapients, though other reasons can be cited instead.
* Dwarf Fortress) That said, many are still reluctant to give it a shot.
* Dwarf Fortress: The civilization-building races are the dwarves (who you play as), the humans (your most common allies and trade partners), the elves (who will go to war with whoever threatens their forests), and the goblins (who will war with anyone and everyone, and are often ruled by demons). Other species in the world include a tremendous variety of barbaric animal people, thieving gnomes, and a selection of giants, cyclopes and ettins who mostly just raid other people. Dragons, hydras and similar monsters appear as rare megabeasts that occasionally attack cities and fortresses.
* Dwarf Fortress) The main difference between savage-evil biomes and savage-good biomes often comes down to little more than whether your dwarves get massacred by rampaging zombies, or by rampaging unicorns.
* Dwarf Fortress: There's a pretty damn big chance your legendary axedwarf won't die in an epic battle worthy of history, but rather will get caught in a cave-in, drown/burn in a badly engineered cistern/magma reservoir, get caught in an accident with a minecart or ill-placed machinery, or simply dodge off a ledge and fall head-first.
* Dwarf Fortress the surfaces of evil regions have a variety of clouds of randomly named materials ("execrable soot", "accursed gloom", etc) which cause randomly determined symptoms, ranging from mild dizziness to all of your internal organs rotting to becoming a zombie.
* Dwarf Fortress. "The War of Ignition was waged by The Imperial Fells on The Council of Lances. One of the most significant causes of the conflict was a dispute over the treatment of plants."
* Dwarf Fortress. They’re not very dangerous by themselves, but the poisons they smear on their blow darts and spearheads can be quite nasty, and their ability to swim up your water reservoirs gives them an edge the other underground animal races lack.
* Dwarf Fortress They get rather unhappy from the draft if they have no military skills, and usually aren't terribly effective unless you take the time to arm them. This is mostly done by players who either want to buy some time for another purpose (say, buying time so that the actual military is in place before the invading army arrives), or for players who want to make sure that the dwarves who would run away anyway are more likely to run in the direction the player would prefer.
* Dwarf Fortress they're either descendant of a type of dragon not in the game or that they grew wings which served no purpose after coming underground.
* Dwarf Fortress, this is the general role of the broad class of "night creatures", hostile monsters that lurk in the dark of night or underground.
* Dwarf Fortress, this is the way all of the dwarves talk, in order to cement the impression that they are a totally different culture. It's combined with alien terminology, for example "elf" seems to stand for everything that is an enemy or related to such, "dreg" would be a pariah and "clod" a non-pariah dwarf.
* Dwarf Fortress to be the answer to everything, including cleaning up their junk.
* Dwarf Fortress to do this — one of the DF Wiki's "optional goals" is to create a fortress that is based entirely around surface structures.
* Dwarf Fortress trying to kill you! Even if you only steal a single bolt. Even the kids try to end your life! The fortress mode has a proportionate (if somewhat

crude) justice system in place.
* Dwarf Fortress up to a point, as touched upon in Real Life below.) Falling slightly out of favour after the massive combat mechanics overhaul that finally enabled swords to thrust as well as cut, however, whereas previously an axe and a sword were roughly equivalent in battle. Only slightly however; if removing body parts outright is specifically what you want, an axe is still your better bet.
* Dwarf Fortress used to have randomly generated squad names, resulting in such classics as "The Washed Bodices" and "The Frilly Corridors".
* Dwarf Fortress uses the Urist scale of temperature, where temperature in Urist is equal to temperature in Fahrenheit plus 9968. Water freezes at 10000 ºU.
* Dwarf Fortress water-based analog computers ("water integrators") were built and used in the Soviet Union for simulations. Though those were (obviously) not digital like the dwarfputers nor universally usable.
* Dwarf Fortress, where a headshot can K.O. a creature. Creatures with permanently injured brains also fall unconscious more frequently (and for less reason) than their healthy peers.
* Dwarf Fortress: While eyes are the easiest part to destroy with heat, it is almost impossible to totally destroy them with other type of damage. However, the reason they qualify to this trope is... if you manage to butcher dead creature and get eyeballs as a result, you can throw them at other enemies — possibly breaking bones and caving in skulls. With a bag of water and nerves.
* Dwarf Fortress: While it is certainly possible to kill things by severing their heads, in practice not only are called shots to the head with a ranged or thrown weapon considerably harder to achieve, but arrows and crossbow bolts will bounce off even a low-grade helmet. Melee attacks to the head, on the other hand, are significantly more reliable.
* Dwarf Fortress who meets with foreign dignitaries. Finally, some of the nobles have more reasonable tastes, coveting things that are easy to make or you actually do make often. Such nobles are usually kept because a guy that likes iron and shields is incomparably better to yet another one of those twits that demand clear glass when there's no sand anywhere in the goddamn map.
* Dwarf Fortress will eventually be a full fledged self-sustaining city able to go without outside trade. That's a big IF though.
* Dwarf Fortress. With enough wrestling skills, you can easily hold your opponent down by the head while you systematically pinch and gouge their facial features to your leisure.
* Dwarf Fortress world, but also features a physics simulation that is realistic in most non-magical respects. This causes side effects that put it firmly in this trope.
* Dwarf Fortress writes the story as a deliberate consequence of the complexity and balance of the intricate game mechanics.
* Dwarf Fortress, you can wield trap components in adventure mode. Leading to the quote, "I CANNOT HEAR YOU OVER THE SOUND OF ME DRILLING HOLES IN ELVES!". Funnily, it's actually a screw pump.
* Dwarf Fortress: You could pick up on enough procedurally generated history to assume your own plot and come up with a purpose for your fortress or adventurer, but it isn't necessary for most and doesn't change gameplay itself.
* Dwarf Fortress your dwarves throwing themselves into spiral of murder because of a lone kitten. However if you manage to survive all that, eventually and inevitably your fortress will grow so large that your computer will be unable to keep up and the FPS drop will force you to abandon it.
* dwarf. He seems to have mostly gotten over this in later appearances.
* Dwarf High Kings are chosen by deed. When the old High King is dying, potential successors go out into the world to accomplish as many great deeds as possible, and whoever accomplishes the most is crowned the new High King.
* Dwarf island dinosaurs were discovered in the form of Hateg Island dinosaurs and
* Dwarf, it's rare for the Warpfire Thrower to be used consistently on the enemy.
* Dwarf men and women look exactly the same. Originally it was frowned upon in dwarf society to openly identify their gender, but recently some females dwarfs

have begun to wear makeup and dresses to differentiate. Amusingly, nearly all of these are derivations on what the others wear; Cheri is shocked at the idea of shaving, clarifying
* Dwarf planets avert this. Of the five most recognized, three (Ceres, Eris, and Haumea) are feminine. Similarly, moons are more often female than male, with many of Jupiter's moons being named for his lovers (
* Dwarf Princess Mansherry loved Leo even more when he rescued her, but Leo
* Dwarf ran out of their primary milk supply a long time ago and switched to the emergency backup supply, dog's milk. Apparently it tastes the same spoiled as it does fresh.
* Dwarfs all claim they aren't religious. It doesn't take long for an outside observe to see that they have a class of dwarfs (grags) who decree what is and isn't dwarfish, try to have as little contact with the non-dwarven world as possible, and study and interpret the texts left by their ancestors (differences in interpretation leading to more than one underground war). In further books it becomes ever more blatant as the grags become a parallel to extremist fundamentalists of the Islamic variety (murdering those who disagree with them, declaring war on non-dwarfs who sympathize with their victims, destroying their own texts that they don't agree with, etc.).
* Dwarfs, and by extension Dwarf-by-adoption Carrot Ironfoundersson, manifest this on a racial level. In one case this proves fatal; fortunately, the victim deserved it. Though Carrot hadn't yet developed the
* Dwarfs are occasionally called "lawn ornaments" (the Dwarfish language equivalent of which is "a killing insult") and gritsuckers.
* Dwarfs, as peerless metalworkers, craftsmen and engineers, use sturdy, reliable and superlatively forged axes and hammers to fight with, paired with intricately carved round metal shields. They eschew swords, bows and wooden-hafted weapons as feeble, their preference for solid metal axes and hammers fitting with their blunt, no-nonsense demeanour. They also craft rifled handguns (or crossbows) and more technologically advanced war machines than the humans of the Empire, but being far more naturally conservative don't tend to go in for the same levels of steampunk insanity that Imperial engineers do. Their miners, as would be expected, use pickaxes.
* Dwarfs, being underground dwellers, enjoy rat in great quantities.
* Dwarfs, but being Lizardmen, they don't really need good weapons to kick your ass.
* Dwarfs' cities are mainly underground, with the surface section being much smaller by comparison.
* Dwarfs don't tend to speak with a Scottish accent, but with a thick Yorkshire accent — the ubiquitous English stereotype of Yorkshiremen being that they are gruff, grumpy mining folk with a strong disdain for soft southerners and their airy-fairy ways (and it is no accident that
* Dwarfs has some in ornaments of their armor and gears like artillery installations.
* Dwarfs have the option to put self-destruct runes on their war machines.
* Dwarfs, initially. It turns out to be more complicated than that later on;
* Dwarfs maintain the Book of Grudges, which lists every single slight against their race (Including any perceived slights incurred while settling an existing grudge, and any slights incurred while settling
* Dwarfs ostensibly have no religion, but being a dwarf itself is like a religion, and there are people who are fundamentalists about being dwarfs. Typically these are found among the grags, the (quasi-)religious specialists, though not all of them are like that. The extremists refuse to be touched by sunlight at all, since it's proper for dwarfs to be underground, and are opposed to dwarfs in human cities taking on foreign influences such as being openly female. In
* Dwarf species of deer and antelope, such as the muntjac or duikers, tend to have legs so skinny it's hard to believe they can stand upright, let alone run. Even species weighing over a hundred pounds can leave footprints the size of a kitten's. Compare that to the soup-dish feet of a moose or giant sable antelope. This is also

visible in dogs: the legs and feet of a Chihuahua are far more skinny than a moderately sized dog like a Beagle.
* Dwarfs such as Cheery Littlebottom have also been known to utter the words.
* Dwarfs take it up to twelve; the Khazalid word for "axe" (az) doubles as a prefix meaning "warrior". An "azdawi" or "axe-dwarf" is a Dwarf warrior, an "azumgi" or "axe-human" is a human warrior, etc. This applies even if the warrior in question uses a completely different weapon and has never touched an axe; axe <-> warrior as far as Dwarfs are concerned.
* dwarfs that dwarfs don't believe in them. And then there's the Summoning Dark, an ancient spirit of revenge that no dwarf worships but all dwarfs know to steer clear of.
* Dwarfs. They tend to be traditionalist, however, and often fall back on reliable bolt throwers and catapults, though occasionally put a Dwarf-y spin on them. The Grudge Thrower is a catapult whose boulders have been carved with runes detailing specific greivances against the enemy army, while the "Gob-Lobber" makes a novel use of goblin prisoners of war.
* Dwarfs. (Un)successful ones may graduate from Troll Slayers to become Giant Slayers, Dragon Slayer, or even Daemon Slayers.
* Dwarfs, while long-lived, don't last as long as elves. However, some have lived long enough to qualify, such as the Ancestor Gods — Grimnir for certain, possibly Grungni and Valaya — and the White Dwarf — who lived more than a thousand years as Snorri Whitebeard, "died", and has been popping up ever since.
* dwarf themselves have gotten into this, openly taking the "no beards" side since DND's 3rd Edition.
* dwarf. Unable to leave their horses until the dog did (which has yet to happen), Herla and his company were cursed to ride forever.
* Dwarf women are also often seen — however, they are physically indistinguishable from male Dwarfs. This has had an effect on their culture somewhat, in that many Dwarfs do not use female pronouns, courtship is largely devoted to very carefully finding out what sex, under all that leather and chainmail, the other Dwarf is, and a Dwarf identifying herself as female is treated akin to coming out as gay in a conservative society. Exemplified by Sergeant Cheery Littlebottom of the Ankh-Morpork Watch, who "comes out" as a female, wearing boiled leather skirts, high-heeled boots, and makeup, much to the chagrin of other dwarfs, but is never without her iron helmet, battleaxe, and
* D-War has the heroes' car blasted by a dragon's fireball, flip a few times in the air and skid along the ground, only to have the woman emerge (white sweater included) completely unscathed. Of course, there was a little bit of black soot on her face.
* D-War, the hero is left in the scarred wastelands of a forgotten realm, completely alone, with no obvious way of getting back to present-day Los Angeles.
* D-War: The main characters spend much of the movie fleeing from the dragons. Each time they find a new place to hide or to recover, the dragons eventually find them and kill most to all of the people there, and the main characters flee to somewhere else and let the cycle repeat. Nothing is ever spoken about these innocent people who perish just because they happen to be in the line of fire, nor do the heroes ever make any effort to warn them or help them—they're just there to show how dangerous the dragons are, and once they die, they're no longer part of the story.
* Dwarven "Child Care". "It's like regular childcare, except with more dogs, and less care." The basic version is dumping children in small pits with irritable, semi-feral dogs and food, though more dementedly sophisticated methods have been dreamed up in the forums to instill physical toughness and psychological numbness.
* dwarven council is in a deadlock and you need to choose which dwarf you want to be king in order to get their support. You can spend the entire time supporting one of them, but whomever you choose at the final choice is the one that ends up being king. Even if you've been against them the entire time until that very moment. In that case, you explicitly only get away with it because everybody but the candidates themselves is so sick of the situation that they would have agreed to a coin flip at that point.

* Dwarven Helmets exhibit this, with the faceplate of the mask crafted to look like a perpetually furious Dwemer (
* Dwarven Water Reactor, which is a power-producing perpetual motion machine that relies on using a pump to raise water to power multiple waterwheels (which are hooked up to the pump and whatever else needs power)
* Dwarves 4 have one female dwarf to a mine, and all the male dwarves are her children. Her eggs hatch into worker dwarves, some of which mature into soldier dwarves; if the workers can supply this outfit with metals and precious gems, it can further specialize dwarves into drones, magical smiths, and lay new queens to start new mines.
* Dwarves also have a custom involving paying the parents of the dwarf you marry the sum of what it cost them to raise your new spouse, as part of the (predictably long and complex) dwarf marriage process. This often freaks out humans, until they complete the explanation of the rest of the customs, which include a much larger gift from the parents to the couple to help them get started, and the fact that a dwarf who works for his parents is due wages like any other worker (which can come out to a tidy sum, since it gets paid when they leave the family to start their own). The reason behind it is to ceremonially pay off past debts, and start a new life free and clear. Once this is all explained, then it's just dwarves.
* Dwarves and Isengard fit Powerhouse, with mighty shock troops and hefty upgrades that take time. Goblins fit Subversive, focusing on fast-moving cheap infantry and enhanced maneuverability. Elves fit Cannon, due to their archery focus and powerful ranged upgrades. Men of the West and Angmar both generally end up as Balanced, with versatile troop layouts (though they go about it in very different ways; Men are very tactically basic and easy to learn while Angmar is all about wacky specialized units to deal with anything). Finally, Mordor's cheap orc armies, needless to say, fit them into the Horde.
* Dwarves and trolls are hereditary enemies. Dwarves mine, which involves smashing rocks to get valuable minerals out of them, and trolls are basically animate rocks with valuable minerals in. This despite the fact that
* Dwarves are also dying, and have stayed in decline since the destruction of their greatest kingdoms, something not at all helped by their obsession with grudges that causes them to constantly go from one war to the next.
* Dwarves are commented on as being rather out of place in the world of
* Dwarves are known for their sense of humour. In a way. People point them out and say "Those little buggers haven't got a sense of humour."
* Dwarves aren't born as such; in fact, they find sexual reproduction repulsive. Instead, they're essentially manufactured. The process requires a male-female pair to spend a few weeks using their respective "mortar" and "pestle" to create the blank template of a dwarf (the dwarves find this process horrific, and usually suppress their memories of the event). This is then placed in a caste-specific container to brew for a number of years, before being decanted as a young dwarf ready for labor.
* Dwarves aren't doing too well in general terms, but the Mostali are in an especially bad spot. While it can be used to refer to the dwarven race as a whole, "Mostali" strictly refers to the original dwarves made by the god Mostal, who benefited from the greater skill and knowledge of their maker and are thus more talented, cunning and skillful than lesser dwarves. Since Mostal is dead, no new Mostali can be made — Mostali and dwarves can manufacture new individuals of their kind, but lack the skill to create true Mostali. Almost all Mostali perished during the Great Darkness, and the few who made it through have slowly but steadily died off through the ages.
* Dwarves are probably a short subspecies of humanity (unless humans are a taller dwarf subspecies), at least if dwarfish creation myths are to be believed. They are definitely close enough to have children; Nanny Ogg has dwarf ancestry. For their part Dwarfs don't consider themselves a separate race at all, just a different culture. Case in point: Captain Carrot Ironfounderson is considered a dwarf by other dwarves, despite being better than 6 feet tall, because he has completed all the requisite rites of passage.

* Dwarves are supposed to be much like what you see in LOTR, with Gimli and his father Gloin looking properly stout and bearded and not what you'd call hot. Then Peter Jackson decided that it'd be appropriate to give the parts of the Line of Durin to
* Dwarves as-is are as straightforward a take on this trope as one can expect, being a grim, honorable, reclusive and highly traditionally-minded folk who live in beautifully decorated mountain fastnesses, often dedicate themselves to smithing, stonecarving, masonry and similar trades, and have been in fairly steady decline since the fall of their old empire.
* Dwarves can make armor out of bones. It's one of the worse materials for armor, but a starting fortress may have little else available to equip their dwarves. Additionally, a dwarf in a
* Dwarves can't be having with gender. A dwarf is a dwarf, and the tricky part of dwarfish courtship is — very tactfully — figuring out what reproductive organs are underneath the leather and chainmail. Then, some cosmopolitan dwarves start wearing skirts and rouge and there's a whole other kind of feminist movement started. Though opinion is split on if it's a better allegory for feminism, gay rights, transsexualism, or if it's just dwarves.
* Dwarves don't identify themselves as male or female and never even discuss in public that there are female dwarves. When the more progressive Ankh-Morpork dwarves start ignoring this taboo, it takes multiple books to avoid a civil war. It's mentioned that mating rituals among dwarves mostly involve attempting to surreptitiously verify what sex the other dwarf is.
* Dwarves, elves, gnomes and halflings are evil and should be killed. Other races who obviously are not human, but possess cultural traits such as music or clothing styles that the human audience can easily recognize or identify with, are also given preferential treatment over whatever evil races exist.
* Dwarves get a 10% chance of resisting hostile magic and cannot be mages, "thanks" to the resistance they developed from living around deposits of the magical substance known as
* Dwarves had a special job to clear out pockets of flammable gas, where a miner called a
* Dwarves in all three ages often had warrior-kings and warrior-princes. Examples include Azaghâl in
* Dwarves in the same have clan names that are either of the "Oakenshield" variety or are
* Dwarves in the setting typically grow beards because they get sick of being treated like children (which a lot of people think they resemble as adults due to their height) without them, which may explain why the stereotype of the "hot headed halfer" came about (as one dwarf tells you in Third Edition in the Dwarf racial description, "
* dwarves), not to mention humans being so vulnerable to Chaos corruption (dwarves use runes instead of the winds of magic, a much slower and rarer process but at least it doesn't backfire). They are honorable to fault, however, and will come to the Empire's aid as needed because of an oath dating back to Sigmar.
* Dwarves. Short and passionate people best known for their prodigious skills with the forge, many of them live under mountains although some have settled into human cities.
* Dwarves: Short, stout, bearded and fond of singing, drinking, mining and fighting. Dwarves — or "dwarfs" — are another group often portrayed as ancient and much more advanced than humanity, but diminishing and declining. Dwarves usually live in immense, richly decorated mountain holds, and are often master craftsmen and smiths. If any one race is making use of machinery and industry at a more than medieval level, it'll often be the dwarves. They don't get along with elves and like orcs even less, but tend to be on decent terms with humanity.
* Dwarves speak with North American accents (except Bodahn, who may be trying to affect the accent of humans), and while beards among men are fashionable, many others go with mustaches or even clean-shaven, and the women can be very feminine

and beautiful. Also, their society practices a rigid caste system and the capital city Orzammar is a
* Dwarves: Stout, honest folk who live in underground halls in the mountains.
* Dwarves toward the Falmer ("Snow Elves") and the Nedes, respectively. Additional details can be found on that trope page.
* Dwarves who step onto the surface for any reason are declared "lost to the Stone," stripped of their caste and any ability to hold a legal job back in Orzammar. They still come back, and in fact the trade the surface dwarves bring is the only thing keeping the ancient city alive, but they're treated as criminals and complete non-citizens. It's perfectly legal to kill a casteless dwarf in public with no repercussions.
* DW At Her Brattiest!, spoofing the fact that in the original episode, DW wasn't invited to the party in the first place.
* Dwayne gets sent to jail for burning down GPF Software's offices for the insurance in an early arc of
* Dwayne Johnson also addressed the chants as did an interview with him about them, though it was sort of in kayfabe.
* Dwayne Johnson (Father side. He's also a dual citizen, holding both American and Canadian citizenships.)
* Dwayne Johnson." He still finds the medication worthwhile, though, because "Xentrex gave me my life back. Hail Satan!"
* Dwayne Johnson (Maui) is half-Samoan; Oscar Kightley (who plays a fisherman) and former Pittsburgh Steelers player Troy Polamalu (the villager with the leaking roof) are both Samoan.
* Dwayne Johnson's characters are Polynesian and/or African-American like he is, but more interestingly, any time his character has children, they're always girls. Johnson only has daughters in real life, and this might be a stated preference of his in order to give a more convincing performance as a father.
* Dwayne Johnson's character), you'll end up getting Larroquette's "actual" voicemail.
* Dwayne Johnson started out smooth and slow, became increasingly hammier during his Nation and Corporation stints, became more high pitch during the "Hollywood" Rock era and switching back and forth after his 2011 return.
* Dwayne Johnson (The Rock) is half Black Canadian and half American Samoan; his maternal grandfather was in fact the High Chief of the Samoan people. Amusingly, he has portrayed white characters in the course of his acting career. To make it even more confusing, The Rock's childhood background saw him living in New Zealand, Hawaii, and Pennsylvania, before playing college football in Miami, Florida, where he was billed from during his WWE career.
* Dwayne Johnson told an anecdote on a talk show about him overhearing people who were trying to decide if he was The Rock and ultimately deciding he wasn't because he wasn't handsome enough.
* Dwayne Johnson (yes, The Rock) was recruited by the University of Miami to play football, but injuries kept him out of the starting lineup for most of his college career. His biggest moment in a game was when he became involved in a bench-clearing brawl (Miami vs. San Diego State) and was shown on ESPN chasing the San Diego mascot screaming "I'll kill you!"
* Dwayne McDuffie also quit offscreen after the death of his girlfriend. Each of those characters save for Green Lantern would later return in subsequent volumes of the franchise. Ironically enough, this happened to the majority of Robinson's new characters, who quit offscreen after his first three issues.
* Dwayne McDuffie, as is his comic book counterpart. When asked if Static knew, he replied "Not yet."
* Dwayne McDuffie, the team discovers a secret lab that only Reed Richards has ever entered before, every surface covered wall to ceiling with various equations. This lab, it turns out, is where Reed Richards had started what he called "Plan #101", a plan to solve all the problems in the world. Among them some of the guidelines he was following during the Civil War. Johnny points this out when they first see the room: "Dude, if you'd asked me, I'd buy you a notepad."

* Dwayne McDuffie, which he intensely disliked for promoting the "gangsta" image.
* Dwayne Robertson gets a penalty for "roping". Um, what about "too many players on the ice"? Or a game misconduct penalty for leaving the bench? The film did lampshade it by having the announcer say, "Two minutes for... roping? That's a new one on me." Dwayne also went onto the ice without his helmet, gloves or stick and was carrying a non-hockey-related instrument (the rope). Considering the sheer number of rules he was breaking at once, it's surprising he wasn't ejected.
* Dwayne "The Rock" Johnson. His film career worked out, as he eventually climbed to Hollywood's highest-paid actor in 2017 after a string of blockbuster hits. He has stated in interviews that he liked wrestling more, but making films paid better, didn't require him to travel as much and didn't take as much of a toll on his body.
* Dwayne "The Rock" Johnson Raisin', Step off the brake, Foot on the Gas, Always Ready to whup some Ass People's Champ!"
* Dwayne "The Rock" Johnson. Retired in 2004 to focus on his acting career. Returned to wrestling part-time in 2011.
* Dweep includes Harmless Freezing as part of its gameplay. It results from stepping on a "freeze plate". Dweep can be unfrozen with a torch or the ice broken with a hammer, and once unfrozen, he is wet, which can be used to bypass different kinds of obstacles.
* Dwellers in the Crucible, another Star Trek novel featuring Romulan infiltration, mentioned they couldn't give Sulu the green blood or the heartbeat, but they could give him sensory enhancers to mimic alien hearing and hypnotically condition him to dream in Rihan just in case he talked in his sleep.
* Dwemer allow for the "forging" and improving upon Dwemer gear using Dwemer metal, but it's implied that you're just melting down the already Ragnarok-Proofed metal and using it, not replicating exactly what the Dwemer did to create it initially.
* Dwemer by breaking them down to their base elements and then reforging them — it's possible Kagrenac succeeded or got the reforging step of the experiment wrong, but whatever the case, the entire Dwemer race simply vanished from the face of Nirn without a trace.
* Dwemer (Deep Elves or "Dwarves"), picked clean by centuries of looters.
* Dwemer (Deep Elves or "Dwarves"), the whole race, every one of them. Now all that is left are their machines and ruins picked clean by centuries of looters.
* Dwemer (Deep Elves or "Dwarves") to all but the most knowledgeable scholars).
* Dwemer of the day, Aldmeris). Names known from modern sources contain vowels, such as Yagrum Bagarn (although he could've taken up the name for convenient interaction with his hosts at Tel Fyr), Kagrenac or Dahrk Mezalf. Names mentioned in books - not necessarily (Bluthanch, Nchunak, Nblthd).
* Dwemer race, and have actually ascended. How would those still around on the "lower plane" know the difference?
* Dwemer, the "Deep Elves" or "Dwarves". Arniel Gane of the College of Winterhold tried to use an Dwemer dagger called Keening (the one used on the Heart of Lorkhan) and a warped soul gem to perform the ritual the Dwemer Tonal Architect Lord Kagrenac did on a much smaller scale... and he did it alright. After his quest, the Dragonborn can summon his shade from where ever he is now.
* Dwemer the left behind is still far more advanced than anything the extant races have been able to create even in the thousands of years since their disappearance.
* Dwemer were said to have an ability known as "The Calling" which allowed them a "silent and magickal" means of communicating with one another, even over vast distances.
* Dwendalian Empire has a small list of state-approved religions whose teaching are deemed in line with Imperial doctrine, and requires all religious practises to take place within state-sponsored temples. Any private religious practise or proven worship of a non-approved god can lead to a fine and a month's imprisonment.
* Dwerve dungeon-crawling RPG which defend against an army of trolls and monstrous creatures using traps and turrets.
* D. W. Griffith are shown as freedom fighters who are fighting corrupt and tyrannical Reconstructionists.

* D. W. Griffith which interweaves stories set at different historical periods. In the 20th Century story, the hero is framed for murder, but the heroine finds a witness to his innocence on the morning of his execution. A frantic race against time ensues for the Governor to issue his pardon before he is hanged.
* D.W. has also turned five and baby Kate was born and aged to around nine months to about a year, yet Arthur is still eight. Kate has shown signs of entering toddlerhood but it's unlikely Arthur will move up a grade as that'd remove Ratburn as a character and change the class structure. Eventually they did graduate in season 19 and Mr. Ratburn would move up to Grade 4 with them... only to remain in the third grade for seasons 20 and 21.
* dwich" (the lab tech) or "sammich" (the box). It plays out very similar to the page quote.
* Dwight also acts as the Lancer for Gail in her leadership of the Old Town girls. Gail's more vengeful and murderous than Dwight's strategic approach, but Gail's unquestionably in charge and Dwight doesn't forget it for a moment.
* Dwight and the Old Town girls subvert this by luring the mob out of their building, into the alley out back before attackign them.
* Dwight Arrow, AKA Bullet, has always loved the comics of his favorite hero Sky King, a
* Dwight D. Eisenhower before going into a military career and later the US presidency)
* Dwight D. Eisenhower even threatened to deploy nukes in the Middle East. Rather than reassert British and French dominance, the Suez Crisis only weakened their international standing and hastened the end of European colonialism while Nasser became a hero amongst Third World nations.
* Dwight D. Eisenhower never actually served in combat. He did face criticism for that from military leaders at the time (including George S. Patton), but he's still one of the most decorated military leaders in modern history and served in the military for over forty years, both before and after his presidency. This is justified, though, in that his position as Supreme Allied Commander required more skill in politics (getting headstrong commanders from numerous countries to work together) than leading troops.
* Dwight Dixon robs Chuck's father's grave in order to get his gold pocket watch. Ned and Chuck later
* Dwight does a lot of good for the girls of Old Town despite being wanted for murder.
* Dwight Eisenhower, since many Americans were blacklisted or otherwise punished (usually socially, not judicially) for dissenting views during the period.
* Dwight Eisenhower to the American Soviet Republic... after manipulating events to give several thousand troops the opportunity to follow him. They do.
* Dwight getting found by his Savior allies and getting taken away, ruining the plan.
* Dwight has a less painful variation in "The Big Fat Kill" where the
* Dwight Hendrickson attracts bullets toward himself. This was a significant problem for his lineage, who were attractors for musketballs and -
* Dwight Howard is enjoying a "less is more" Career Resurrection like Harper and McAdoo, and just like the latter, he's also doing it with the Lakers. Once a regular MVP candidate and arguably the best defensive big man in the NBA while playing for the Orlando Magic, Howard's first stint with the Lakers in 2012-13 was a disaster, one marred by bad chemistry with fellow superstar Kobe Bryant, among myriad other issues. This led to a six-year journeyman period where Howard played for the Houston Rockets, Atlanta Hawks, Charlotte Hornets, and finally the Washington Wizards, with each season yielding solid, albeit diminishing returns — with the Wizards, Howard played just 9 games due to injuries, but still averaged over 12 points and 9 rebounds a game. After returning to the Lakers as a free agent in the summer of 2019, Howard accepted a role off the bench and showed a noticeable increase in maturity, averaging career-lows across the board but serving as a meaningful component for the team that won the 2020 Finals.
* Dwight Howard of the Orlando Magic harmed his back prior to the playoffs.

* "Dwight" in 1945, and was elected President of the United States in late 1952.
* Dwight McCarthy from "The Big Fat Kill" combines the badass longcoat with
* Dwight McCarthy from the story "A Dame To Kill For". While healing from severe gunshot wounds and on the run from the cops, he had to convince the girls of Old Town to help him out. In a later story called "Family Values", he politely manipulates a crime family into ruin.
* Dwight McCarthy would also qualify — the woman in question is someone who burned him in the past, but when it turns out she's in danger, Dwight rushes in to save her. Dwight's adherence to this trope is lampshaded by his lover Gail.
* Dwight Schrute becomes the civilian equivalent whenever he is given even the slightest amount of authority.
* Dwight Schrute — Easily distracted on random topics and turns minor issues into
* Dwight Schrute's bobble head figure of himself can be bought as well as bobble heads of the whole main cast.
* Dwight Schultz and told her how big a fan he was of the show and her part in it. She had a word with the writers, resulting in Reg Barclay.
* Dwight Schultz is how blank the scripts would often be. This is because Dwight usually came up with the crazy Murdock stuff on his own since the writers sucked at portraying him right until the later seasons.
* Dwight's cousin Mose barely speaks, appears to have the mental age of a child, and just generally does weird things randomly for no apparent reason, like painting a room in the dark or stripping out and hiding all the wires in his and Dwight's home.
* Dwight Tilghman is a prison guard who routinely brutalizes Wee-Bey Brice because Wee-Bey killed a cousin of his. Avon Barksdale and Stringer Bell find out that Tilghman runs a side business of smuggling heroin into the prison. Stringer arranges for Tilghman's supplier to give him a tainted batch, and when several inmates are killed by the deadly drugs, an investigation is launched with the warden realizing that they'll need to promise reduced sentences to get potential cooperators willing to implicate the culprits.
* Dwight was shot in the face with what appeared to be a glancing hit and while he needed immediate medical attention, he remained conscious and survived with a little surgery.
* Dwight Yoakam" are also very popular despite only getting to #35 and #12 respectively; the latter is also his highest Hot 100 showing at #64.
* Dwight Yoakam as a guest artist. Owens was actually the first to record the song in 1973.
* Dwight Yoakam on "Streets of Bakersfield", that he began to record in his classic styles and made vintage Buck Owens music.
* Dwindling Party: Many slashers begin with a group of six to 10 teen-agers or young college students, often representing a cross section of interests and so forth. One by one, the antagonist (often a deeply troubled individual, but just as often someone who is pure evil) will kill off the kids in the most brutal way possible. Usually, only or two will survive in the end ... sometimes to help defeat the bad guy (usually by luring the villain into one of his own traps or by holding him off long enough for the hero to arrive), other times just leave to feel fortunate to survive. More than once, it is the villain who reigns supreme in the end by killing the last remaining opponent, often in a one-sided fight that ends with the most brutal, elaborate death.
* Dwindling Party: The group of survivors is getting smaller and smaller.
* DW is desperate to be told a secret, any secret, which she then tells other people — because what's the point of knowing a secret if you don't tell? She eventually learns
* DWM pointed out that in their top 200 stories poll of 2009 it was the 30th rated story of the 60s at 139 overall, but in 2014 it was the 10th rated and at 56.
* DWTerminator accusations from fans of the games he posts negative reviews of.
* DX-Ball 2 without hitting a destructible block, all indestructible blocks on the field are changed into destructible blocks (since this is usually caused by

indestructible blocks being a huge pain in the ass and keeping you from making the shot.)
* DX run, the anti-villain in his crusade against Hulk Hogan, and the retired/disinterested version during his various retirements and sabbaticals.
* DX's. On the other hand, it was this sort of attitude that lead to the simulated necrophilia of the Katie Vick angle, almost universally considered the low point of the company's writing.
* Dyatlov Pass incident arguing that premise. After the Soviet Union fell, analysis of their archives revealed that the government was as confused and disturbed by the events at Dyatlov pass as everybody else.
* Dyatlov Pass incident was an event in which nine Russian hikers died in the northern Ural Mountains between 1st and 2nd February 1959, under uncertain circumstances.
* Dyatlov Pass incident was Yuri Yudin, as he turned back due to illness.
* Dyedovshchina, meaning "Reign of the Granddads," in which senior conscripts severely haze the new recruits, ranging from simply doing extra chores to rape. It is unofficial, and leads to much trauma and even deaths of some recruits, mostly from suicide but outright murders aren't unheard of.
* Dye Hard: A person whose dyed hair is part of their characterization.
* Dye Hard: Hair-dying became extremely popular during the decade. Trends included ombre hair, "galaxy" hair, and "mermaid" hair.
* Dye Hard to rule the Earth. When he's about to repeat what Harley just said, Gordon points out Harley already said what he's going to do, angering him.
* Dyeing for Your Art: Actor dyes or shaves their hair in order to play the role.
* Dyeing for Your Art: An actor has their hair dyed or shaved so they can play a character who has a different hair color or lacks hair.
* Dye or Die: Where a secret agent has to dye his or her hair to avoid detection.
* Dye was relegated to women, who wore a Stola if married and a Chiton if single. Even then these were poor and the colors faded to pastels quickly.
* Dying Alone: It's sad that this person won't have anyone around to mourn their demise.
* Dying Alone: Someone dies without the presence of friends, family, or anyone else who personally cares about them to give them final comforts.
* dying and coming back as a Prinny takes a lot out of you. On the other hand he does have all of the abilities he previously had, as well as Pringer Beam, and like any character he can be built back up to his old level.
* Dying as Yourself: A person dies shortly after being freed of the corruption that took over them.
* Dying as Yourself: Someone dies after being freed of the corruption that took over them.
* Dying Breed a character winds up caught in more than one of these devices (including one around his head).
* Dying Breed. As you can expect, this is played for all the horror it's worth.
* Dying Breed: When Rebecca puts her hand up to Rowan's face, he bites off two of her fingers.
* Dying Clue. That said,anyone with a basic knowledge of the Latin alphabet could still easily figure it out.
* Dying Curse: A person's last words is to vow that harm will befall the people they loathe.
* Dying Curse from a minigod that was slain by a shark hero centuries ago, they are plagued by accidents that leaves them with scars until they finally die. They were forced to hide in a cavern system to minimize the danger to themselves and the prophecy is currently the only way to save them.
* Dying Curse: In the rare cases where the victim not only wishes, but makes good on their spiteful last words.
* Dying Curse, she prays to the gods that Aeneas' mission may fail, and that the Carthaginians may forever be enemies to the descendants of Aeneas' Trojans and may one day avenge her. While part of the curse comes true, it ultimately fails.
* dying curse. "The Shakespeare Code" tried to spin it as magic really being a

special kind of applied science, but basically, a lot of the science is magic.
* Dying Deal Upgrade: A dying character is given new powers and allowed to continue living in exchange for servitude.
* Dying Declaration of Hate: A character confesses their hatred of the person near them as they die.
* Dying Declaration of Hate: A character dies admitting that they never liked a person.
* Dying Declaration of Hate: A character tells someone they hated them before dying.
* Dying Declaration of Hate: Before I die... I just want to tell you something... I hate your fucking guts.
* Dying Declaration of Love: A character confesses their love to someone as they die.
* Dying Declaration of Love: A character declares their love to someone as they're dying.
* Dying Declaration of Love: A character dies while confessing their love for a person.
* Dying Declaration of Love: A character dying uses their last breath to confess their love for someone after never telling them about it before.
* Dying Declaration of Love: Confessing your love for somebody when you're dying.
* Dying Declaration of Love—A character declares/confesses their love for another on either party's deathbed.
* Dying Declaration of Love: Someone tragically dies as they confess their love for a person.
* Dying Dream. Again, the sequel Josses this, but for the reasons listed above, not all fans accept it as canon.
* Dying Dream: It's revealed that the story's events were all a hallucination the protagonist is experiencing as they die.
* Dying Dream: It's revealed that the story's events were all being hallucinated by the protagonist as they die.
* Dying Dream: It turns out the entire story was just a hallucination the protagonist is experiencing as they're dying.
* Dying Dream? Or is it just a tale of a wanderer, in a far-off land, trying to do the best he can?
* Dying Dream over the years — the early seasons were more grounded in somewhat realistic plots, but as Homer's mind falls away further and further, increasingly bizarre events begin to occur.
* Dying Earth are hired to deliver a "package", which turns out to be a body wrapped up in a carpet. They later discover that the body is actually still alive but drugged.
* Dying Earth books take place so far in the future that the sun is on the verge of going cold. Yet if humans look any different from the way they do now, the changes aren't noted.
* Dying Earth featured "oasts", huge humanlike primates whose riders sat on their shoulders. On at least one occasion, the hero Guyal was chased by a mounted troop on these creepy things.
* Dying Earth has the Twk-Men, who ride insects and exchange information for tiny measures of salt.
* Dying Earth living in squalor, but are so eager to savor this trope's illusions that they slave away for decades provisioning the village, merely for the promised opportunity to inherit a deceased resident's eye-cusps.
* Dying Earth: One story references Sadal Suud (from Sadalsuud, now more commonly known as Beta Aquarii).
* Dying Earth RPG. The Silver Desert has large scorpions (among other hazards).
* Dying Earth series, the character Iucounu the "Laughing Magician" perpetually supports one of these providing a clue that his sense of humor is not exactly benevolent.
* Dying Earth: Spellbooks left behind by Phandaal, last of Earth's legitimately-great sorcerers, are bound in purple.

* Dying Earth stories, Rhialto the Marvellous is a mighty wizard and in one of his tales, he and his fellow wizards are running low on IOUN stones (these artifacts can only found near black holes). So they travel to the edges of the universe to collect more.
* Dying Earth. The planet of Merchdilan is entirely devoted to business/commerce and entirely covered by city.
* Dying Earth. The River Skaters use ice skates to carry messages along the frozen Scaum River during winter.
* Dying Embers: Amadahy Love has raised her brothers and cousin for the past seven years.
* Dying enemies either turn into crystals or drop an equipment box if they've been dead long enough. In cutscenes, bodies will hang around long after they should have changed into the aforementioned items.
* dying in a volcanic eruption, and they find that death feels surprisingly familiar...
* Dying in battle was a family tradition for Lieutenant Dan Taylor in
* Dying Inside can read other people's minds, and he is unable to function in society because of it.
* Dying in single player may prompt the post-mission report to say "What color shirt were you wearing?"
* dying in weird ways, there's also the non-dying way to end the game by having your character just walk off the game map by the same path they took to get in, never to return. It's definitely the easiest way to avoid actually dying, aside from the fact that the backstory implies the forces of Chaos will then probably consume the world. (Unless, of course, you already stopped them, because you also leave that way to win in the normal ending.)
* Dying Light, and other characters reference the infected as zombies, as well. For the most part, though, people turned by the Harran virus are referred to by more specific names depending on their individual traits (like Biters, Volatiles, etc.)
* Dying Light, hero Kyle Crane uses trash piles to break his fall. At one point he wonders if he'll ever land on one full of rusty knives.
* Dying Light onto bags of garbage below. The teacher Rahim demonstrates...then complains about he leg after landing. His and Crane's dialogue afterwards:
* Dying Light prevent use of the Hookshot because Crane is suffering from seizures and simply doesn't have the stamina and motor control necessary to properly use it.
* Dying Light. Suffice to say, the endings hurt many potential players' desire to play the DLC, or even the original game, for that matter.
* Dying Light title alludes to, the game makes it a plot point to seek cover at night, because that's when seriously nasty creatures come out. Eventually, the game tasks you with quests where you need to venture out at night, knowing full well that you'll have to encounter them.
* Dying Moment of Awesome: A character ends up dying, but makes sure they go out doing something cool.
* Dying Moment of Awesome: A character ensures that they die doing something cool.
* Dying Moment of Awesome, believing that dying in such a manner is the only way he'll be truly remembered.
* dying of exhaustion and exposure Queen Hilda, the true caretaker, and release her from Poseidon's thrall so Saori passes the task back to her.
* Dying of the Light, Clarabelle makes up a story about a mage who fought a warlock after losing all his limbs - making him a master of "unarmed combat".
* "Dying of the Light" contacts Giles when she discovers that head Watcher Quentin Travers has betrayed Sunnydale to the demons of the Hellmouth.
* Dying of the Light, while women eventually became community breeders, kept in the securest parts of caves to avoid the plague. After a few generations, it congealed into a rather misogynistic society.
* dying of thirst or exposure before being found when people finally return and notice a smell, or sometimes aren't discovered at all until the building undergoes maintenance or is demolished.
* dying? Osborn claimed she saw it as "the performance of a lifetime," but you'd

think such an apparent maestro would want (and be able to qualify for) an actual acting role, not impersonating some random old lady unknown outside of her own family. Fourth, where and how did Norman find this absolute savant? Fifth, if Norman wanted to emotionally torture Peter by making him think his surrogate mom died, why not just kill her? The books never provided any answers, and just moved on from there without addressing it any further.
* Dying Race, and if that means manipulating millions of non-Eldar to their deaths to save one Eldar, then so be it. Farseers have the added edge of precognition to make manipulation easier.
* Dying Race, and so conscription is necessary to allow the tiny elven population to maintain a decent standing army. Spearmen, Archers, Lothern Sea Guard and bolt thrower operators are conscripts.
* Dying Smirk: A person who is about to die scoffs and smirks, grins, smiles spitefully or laughs ironically, showing off to their opponents that they still have the upper hand somehow.
* dying to ask me?" practically daring Clodagh to demand whether Kanchi is his lover. She refuses to ask, so the viewer never finds out either way.
* Dying to Be Replaced: A character is killed off so someone else can take their place.
* Dying to Live in Palm Beach accidentally took and used her wealthier friend's credit card, then began to do it deliberately until her friend mentioned her kids got her a bookkeeper. She poisons that friend, realizes she likes having money, arranges an overdose for another friend after abusing her card, and shoves a third off a boat when she catches her in the act.
* Dying to Please is a covert bodyguard as well as butler for her elderly boss.
* Dying to the final boss via collision damage gives you this mocking message:
* Dying Town: A town or city whose reason for existence disappeared a long time ago and left behind those who couldn't get out; when you have a lot of poor, desperate people in the same place, some of them will inevitably turn to crime, and that same desperation will also bring plenty of other social problems.
* Dying Town full of urban deprivation and violence caused by the massive unemployment epidemic in 1980s Britain, but several of the lyrics do touch upon a sense of empty and deserted post-apocalyptic doom ("This town's becomin' like a ghost town/all the clubs are being closed down...")
* Dying Town: Having lost its reason to exist, the town is largely shuttered and abandoned, home to only those who couldn't move elsewhere.
* Dying Truce: Enemies decide to stop fighting when one of them is near death.
* dying Vader admits to Luke that he was lying to himself all along and that Anakin Skywalker was still in there somewhere.
* Dying Will Flames. Because of this, all important groups of people also come in sets of seven.
* dying wish is for Giselle to find someone else and live a happy life
* Dying Young where a nurse falls for a man with leukemia whom she's supposed to be treating.
* Dykes to Watch Out For and humoured in her 'harmless delusion' that she creates the strip.
* Dykes to Watch Out For: Bechdel sometimes indulges in this. Take these examples using the letter "P":
* Dykes to Watch Out For by taking pictures of herself in costume to use as source images, which she then based her illustrations off of.
* Dykes to Watch Out For, Clarice and Toni (African American and Latina, respectively) are looking to buy a house in the suburbs (much to Clarice's chagrin). They bring their son Raffi (Toni's biological son) to check out a particular neighborhood, and while having lunch at a park a woman comes up to Clarice asking her if she's one of the new nannies in the neighborhood. Clarice of course is quite offended, and tells her off for assuming that just because she's black she must be hired help, while the woman tries to explain that she assumed so only because "he's obviously not yours".
* Dykes to Watch Out For contains lots of background goodies, such as a sign

reading "Try our gluten-free, lactose-free, low-fat white pizza!"
* Dykes to Watch Out For difficult to image the Mo we know now singing like that.
* Dykes to Watch Out For feels much the same as an extensive archive binge, and as it was produced between the late 80s and late 00s it is no small binge to engage in.
* Dykes to Watch Out For for Emma, and eventually enters into an uneasy triad relationship with her, but eventually tires of playing second fiddle to Emma's primary partner Dorothy.
* Dykes to Watch Out For, for example, used the word and it's censored out of syndicated reruns.
* Dykes to Watch Out For, Ginger dates a video artist who enjoys making these particular kinds of videos of their encounters. Naturally, Ginger's housemates Sparrow and Lois discover one of the tapes and give her a good ribbing about it.
* Dykes to Watch Out For in a polyamorous relationship already—her work is her primary relationship, while Mo is 'the other woman'. This also happens with Clarice and Toni, with Clarice's job as a lawyer almost immediately put a strain on the relationship.
* Dykes to Watch Out For. Initially Toni and Clarice had the happiest relationship (and marriage), while protagonist Mo and girlfriend Harriet could barely reconcile. A decade later, though, Toni's and Clarice's marriage declined due to the latter's workaholic tendacies, while Mo entered a relationship with Dr. Sydney and the two formed a fulfilling dynamic up to the strip's current day.
* Dykes to Watch Out For is about lesbian romance, mixed with drama and political commentary.
* Dykes to Watch Out For is distinguished by slapping a female characteristic (lips, long hair, the proverbial bow) on the male default. She also discusses how she was initially unable to draw women and only drew men — and was finally able to draw women only by thinking of them as lesbians and drawing them rather androgynously.
* Dykes to Watch Out For, Mo's friends stage a political "intervention" for her — they bury her in sand, then force her to listen to Lois live from the RNC protests, telling her not to vote for Nader again.
* Dykes to Watch Out For partner cowers under a blanket: "Don't let it get my beer can collection!"
* Dykes to Watch Out For (queer ensemble cast, lesbian main characters)
* Dykes to Watch Out For: Sparrow, described by the author as "the most cartoony of my characters," started as a fairly one-dimensional therapy-head and New Ager; she later came out as bisexual, had a child, became an atheist, and developed a grumpy side to her
* Dykes to Watch Out For: The Indelible Alison Bechdel included a strip called "Guys to Watch Out For" which showed each character's Spear Counterpart. In particular, Mo is being inaugurated as president of the United States.
* Dykes to Watch Out For where Mo is having cybersex with her girlfriend in the bookshop she works in. Then all the employees walk in while she's busy. They seem surprised the Martha Stuart fantasy turns her on. Then her employer walks in and everything just gets better for Mo as she realises her fly is still undone.
* Dylan and Brenda. S2: Dylan —> Brenda then Brenda —> Dylan. S3/4: Brenda —> Dylan.
* Dylan and Ochs both followed the footsteps of Woody Guthrie, who wrote songs like this; "Pretty Boy Floyd" and "Deportee (Plane Wreck at Los Gatos)" are probably the most famous.
* Dylan Andrews learns of the planet-destroying power the Blues and Reds' time machine-laser drill has.
* Dylan appears to be around Max's and Fang's age, but really nine months old.
* Dylan Bruno, guest starred in episodes of "Chinese Box" and "Jacked" as Tim King.
* Dylan Carlson holds one note on the guitar for over 30 minutes on the track Like Gold And Faceted.
* Dylan Dog, a penniless nightmare investigator ("L'indagatore dell'incubo") who defies the whole preceding horror tradition with a vein of surrealism and an anti-

bourgeois rhetoric.
* Dylan Dog comic, Dylan's sidekick Groucho is repeatedly trying trying to tell a joke about three men about to be executed (the guillotine blade keeps stopping just above their necks, so the first two are pardoned due to an Act of God, but the third man announces that he's figured out where the fault is) to a nice old lady who is an unwitting friend and companion of the evil witch, but is constantly interrupted before he can get to the punchline. After the witch is defeated, they later sit down for some tea, and Groucho finishes the joke. She doesn't get it. And then she decides to kill them all, monstering out and revealing herself to be considerably more powerful than her late friend despite acting like a dimwitted old granny the whole time.
* Dylan Dog desperate to have it back before the guy who he was supposed to sell the artifact to lost his patience.
* Dylan Dog) says. He actually used it to save a life once: as Bloch lay in a coma after being shot with the doctors not expecting him to get through the night, Groucho arrived to his side and unleashed lame pun after lame pun until Bloch woke up screaming that someone dragged him away.
* Dylan Dog that go around killing random citizens in creatively gruesome ways, which include violent mutilations, hanging, decapitation, skinning, melting and disembowelment.
* Dylan Dog, throwing himself from a palace had him bounce back where he jumped from, etc.).
* Dylan Dog will unleash them at a moment's notice — or even without notice. He has saved the day more than once with his puns, and brought Bloch out of a coma by telling him puns until he woke up just to scream somebody took him away.
* Dylan is sitting (uncomfortably) on the couch with Phil, waiting for Haley, watching baseball. Phil makes a comment about one of the players being "stuck at second base, and thinking about trying to steal third, which is just a terrible idea" then turns to him and asks how things are going with Haley. Phil may or may not have even realized the double entendre, but Claire, in the background, seems pleased to see Dylan squirm awkwardly.
* Dylan Moran does a brilliant routine in his 'Monster' DVD about how people use stupid euphemisms which there's no hope of guessing, where he enacts this conversation:
* Dylan Moran mentions this trope in one of his acts. He says "hotel rooms are the most corrupting places in the world. Where else do you start stealing everything that's not fixed down within minutes of arriving?"
* Dylan Moran once gave a summary of the consistency of a particular wine as follows: "Moccasins... denture fixture fluid... it's extraordinary. Lovely for when you're being chased by the Stasi. In a railway tunnel. Going to meet The Monk."
* Dylan Moran once quipped about his disappointment in the corporal punishment laws, saying how that there are only so many ways you can say things to a child before going over to "have an encounter."
* Dylann Roof, the 2015 Charleston, South Carolina church shooter, attempted this in 2016 and was quickly found guilty of nine counts of murder.
* Dyna Blade, the giant armor-covered god-bird, is completely CGI in all of her appearances. She is also rendered more realistically than the rest of the CGI, with gradual shading, more muted colors and highlights. Though a bit jarring seeing her with the other CGI and hand-drawn imagery, it does lend her an otherworldly feel.
* Dynaheir (who is also from Rashemen) and Edwin (from neighboring Thay) are also varying degrees of fake Russian, although Dynaheir edges close to
* Dynamic Character: A character who becomes more layered as the story progresses.
* Dynamic Difficulty, a game can be designed to be enjoyable but still challenging at any skill level.
* Dynamic Entry. And their fear probably would have been justified if Ace wasn't his brother.
* Dynamic Entry: A previously unseen character appears via attacking an enemy in a showy fashion.
* Dynamic Entry as these characters will either go in as fast as possible to save

their fallen comrade or blindside them to take advantage.
* Dynamic Entry in the Season Five finale by knocking Glory the Hellgod through a brick wall. With a wrecking ball.
* Dynamic Entry into the cells where Rukia is held is assisted by a giant winged device that is ONLY useful in the Seireitei. A giant wing comes from nowhere while Ichigo radiates his badass aura, to the surprise of two captains, before discarding it and landing next to Rukia.
* Dynamic Entry sequence, but Ethan's dropped his laser cutter so has to smash his way through the partly-cut window. It won't break, so he has to swing outwards (hanging by his one remaining glove) and kick his way through.
* Dynamic Entry wearing a sweater (the megalodon, not the Commander), it's reasonable to guess his team did.
* "Dynamics of a Point" and immediately regrets it. She apologizes with her first kiss to him, and he can only stare at her, shocked that she's furious with him one moment and then kissing him the next.
* Dynamis demons. Same as above, it's not stated whether they're actually from hell, though.
* Dynamis is a dream world originally created by the avatar Diabolos to escape the Emptiness, other beings began to be pulled in, and turned it into a Beastmen-dominated version of Vana'diel. The area itself is warped enough that aside from temporary visits by players (even then, they need spiritual assistance to get in), if you get stuck in there, it's for
* Dynamite Comics and Purgatori). It's also something of a "crossover" on a meta level, being written by a supergroup of the industry's most popular female writers. The publisher did not bag the rights to Lady Death, however, and so introduced its very own Bad Girl as a stand-in: Lady Hel.
* Dynamite Comics comic published at the same time used him too, a fact that Mona wasn't aware at start of his own series.
* Dynamite Dux downplays this, as three of the stages are based on Japan, Texas, and Chicago.
* Dynamite Dux has several of these in the Texas level, each showing a cat-looking thing.
* dynamite fishing. Woody adds dental adhesive to the dynamite to cause it to stick to Rottweiler's hand, blowing the latter up.
* Dynamite Headdy dies with a rather high-pitched explosion. The bosses make huge explosions with lots of bouncing debris when you beat them. Collect enough of the debris, and you get a continue. Sure, why not?
* Dynamite Headdy has a beam attack that takes up nearly the entire screen.
* Dynamite Headdy has a Bonus Boss called "The Money" that is unlockable with a password you get by beating the bonus game four times.
* Dynamite Headdy has the Vacuum Head which allows Headdy to suck up any enemy on screen.
* Dynamite Headdy, one of the heads that can be obtained is a giant vacuum that eats all the on-screen enemies.
* Dynamite Headdy the normal (though not very normal) platforming is replaced with a flying shoot'em up for one level.
* Dynamite Headdy: The Puppeteer boss is a clown puppet. While all the characters are puppets, this character looks particularly robotic because he has a propeller where his waist and legs should be.
* Dynamite Headdy when he dies and it gets replaced with a game over sign.
* Dynamite Headdy. Wooden Dresser, a giant wooden mannequin, is a boss character who uses costumes that give her various powers to try and kill Headdy.
* Dynamite Kid: Finished out his career in Japan, with his final match taking place in 1996.
* "Dynamite Mine" by Murder By Death (the band), also about the occupational hazards of being a coal miner who pissed someone off in the past.
* dynamite, taking about 80% of the town and at least 500 lives with it.
* Dynamite. They all have UK-exclusive songs that were supposed to be part of the actual album.

* Dynamite Tommy had issues with the Japanese equivalent of the IRS. (Komuro and Kisaki were both found guilty, with Komuro even serving a short prison sentence, while Dynamite Tommy was found not guilty and released post arrest, and Gackt's case is still under investigation...)
* Dynamite Warrior is a Thai movie about cowboys (well, buffalo traders and buffalo thieves, technically) who either have extraordinary Muay Thai skills, have magical powers, or (in the case of the titular character, the protagonist) fight using primitive rockets. In one scene two characters escape pursuit by using some of the rockets to propel their cart away from the people chasing them.
* Dynamix in the body of a death-dealing terror machine, and you pretty much have pLaGUe-DoG.
* Dynamix, which is a good way to bring down a HERC (and much less damaging to the tanks).
* Dynamo5. According to Chrysalis, Captain Dynamo/William Warner was close to Cynthia and told her that flying with her was one of the happiest times of his life. Cynthia outright questions if Dynamo 5 is worthy of inheriting their father's name and points out that she was the one he raised.
* Dynamo5. According to Scatterbrain (Gage Reinhart), the supervillain Chrysalis is afraid that her looks are fading and she can't attract men anymore. He said that she is jealous of her daughter Cynthia because of her looks and that she probably can better attract men. However, it appears that Chrysalis does not let her jealousy affect her relationship with her daughter, and they appear to be close.
* Dynamo5, a government agent pulls this on the main characters, without telling them, leading them to believe he's turned evil.
* Dynamo5. Captain Dynamo had an affair with one of his enemies, a supervillain named Chrysalis, and had a daughter with her, who he helped raise. While Chrysalis herself said that they were in love, that did not stop her and her daughter from taking advantage of his death to impersonate him to increase their power base. Ultimately, Chrysalis, an amoral and ruthless criminal who is willing to murder anyone in her way, only escapes justice because of her affair with Captain Dynamo.
* Dynamo5: Captain Dynamo, the world's greatest hero, did not die heroically in some battle or while saving the world. He died in bed, poisoned by the woman he was sleeping with. His body was left with his superhero costumes so people could identify him. Luckily for Captain Dynamo, details of his death were kept a secret from the public.
* Dynamo5: Chrysalis was never caught by Captain Dynamo because of their affair before the series, though he did try to stop her crimes. In the series, after her plan with her daughter to take advantage of Captain Dynamo's death to impersonate him to increase their power base failed, she and her daughter were captured. She was finally sent to jail and separated from her daughter, who had the memory of her mother wiped from her mind.
* Dynamo5 features the G.D.A. (Global Defence Agency) which is responsible for protecting the Earth from superhuman and extraterrestrial threats, and has at least one superhero team on its payroll. They don't get on too well.
* Dynamo5: In Dynamo 5 #17, when Scatterbrain enters Maddie Warner’s unconscious as she lies comatose, it is revealed that she tends to accept a disproportionate amount of responsibility for various unfortunate events in her life and harbors guilt over those incidents. Be it when a supervillain escapes, when Captain Dynamo is unable to save people's lives, or her personal relationships fail, like when her relationship with her former fiance Tom falls apart because of her secret life and the fact that she could not tell him she was an agent of F.L.A.G., a U.S. government organization that deals with threats posed by superhuman beings, though she used the cover of an award-winning investigative journalist. Or when her marriage to Captain Dynamo/William Warner became strained because of his Dynamo's career as a costumed crimefighter often kept him away from home for extended periods of time, and, unknown to her, Dynamo's absences were partially due to the numerous extramarital affairs that he had. It was by Scatterbrain's convincing Warner of her need to move beyond her guilt that he was able to bring her out of the coma.

* Dynamo5 In public, Captain Dynamo/William Warner boasted a public image as the greatest superhero in the world. In private, he was a habitual womanizer who cheated on his wife Maddie and fathered numerous children, even when it compromised his crime-fighting duties.
* Dynamo5. The more we learn about Captain Dynamo/William Warner, one of the world greatest heroes, the more despicable he appears to be. It is revealed in the series that he was a habitual womanizer who cheated on his wife, Maddie Warner, even when it compromised his crime-fighting duties. He also was not above using his shape shifting power to impersonate married women's husbands in order to sleep with them. He had an affair with one of his enemies, a supervillain named Chrysalis, and had a daughter with her named Cynthia, and led a second life to help raise her. The worst thing he did was when he fathered a child with an alien woman that he had met in outer space, after coming to the aid of her malfunctioning starship. When the mother gives him the child because she can't raise him herself, he leaves the infant at a F.L.A.G. research facility, where the child grows up without parents. When one of the scientists bonds with the child and begs Captain Dynamo to free him, Captain Dynamo refuses. However, his wife Maddie Warner and best friend Augie Ford still very much respect his memory and miss him, despite learning about his faults. It is implied that Captain Dynamo/William Warner truly did love his wife Maddie Warner and his best friend Augie Ford and aside from the cheating and womanizing, he took his crime-fighting duties as protector of Tower City seriously.
* Dynamo5. While Gage shows signs of this in the first issue, he's actually a nice enough guy, and is the first of the five siblings to start bonding with another, namely Hector, the geeky one in the group. In issue 2, they talk about girls while doing surveillance, and later Gage is very supportive of Hector's performance in the fight against Whiptail.
* Dynamo5, while Scatterbrain has sheer size on his side (he's a star football player.)
* Dynamo has the Shadow States which seem to resemble more normal cities (particularly the non-Shadow State city of Shade) but built upside down and lit up red. On top of that, most of its denizens look like silhouettes, sometimes with glowing red eyes.
* Dynamo Joe had Data Com One, a paraplegic whose brain was linked to a military computer, making him a brilliant strategist.
* Dynamo Joe which to that point have been believed to be mindless killing machines, and they are revealed to be fleeing in panic from an unknown enemy. The story ends with the allied civilizations of the galaxy, now including the Mellenares, preparing for the arrival of the new enemies.
* Dynamos (Photovoltaic cells and Thermoelectric generators being exceptions)
* Dyna's husband Gareth, who operated under the superhero name Big Kahuna in the 1990's, "
* Dynastic: The above factor oftentimes led to dynasties of executioners, since no one would give them relatives to marry and their children were often banned from doing other work, or training.
* Dynasty (1981). Apparently, the show's producers and writers were unaware that Moldavia was a real region and a historical country (not to mention that the real Moldavia isn't a monarchy).
* Dynasty (1981). A scenic catfight even happened on a lily pond, which is close to a pool as anyone can get.
* Dynasty (1981) at the start of the third season and Jason Connery taking up the mantle.
* Dynasty (1981): In an early season three episode, Fallon meets Adam at a bar and after some flirting, the two kiss. The following day, Alexis (Fallon's mother) informs her and Adam that they are siblings. Their relationship doesn't get any better from there.
* Dynasty (1981), including a famous one where Alexis and Krystle fighting in the mansion pond.
* Dynasty (1981), was probably one of the most notable early examples. He was depicted as being every bit as traditionally masculine as any of the other men on

the show, up to and including getting into fights with more than a few of them.
* Dynasty (2017), rich Fallon has been having an on/off affair with Michael, the family's limo driver. On Thanksgiving, she tracks down Michael to a soup kitchen where he's helping his parents serve dinner to homeless people. Fallon soon realizes Michael's family believes that he's a Vice-President at the Carrington's company. Michaels confesses to Fallon that his parents sacrificed so much to get him through college and he doesn't have the heart to tell them he's just a chauffeur. In a rare show of selflessness, Fallon talks of how great a worker for the company Michael is to keep his family proud.
* Dynasty (2017), they also net Fallon's step-mother Cristal so the two women bitch at each other constantly.
* Dynasty albums were played by Anton Fig, best known as the drummer for David Letterman's house band.
* Dynasty moved from Wednesdays to Fridays midway through its first season, where it remains since. The show was renewed for a fourth season in January 2020.
* Dynasty Warhammer 40k... The world might not be able to handle so much ham.
* Dynasty Warriors 2 around him, and it'd still take 6 minutes to finish him off. No surprise Koei dropped this like a bad habit.
* Dynasty Warriors 6 the general himelf, and then immediately find yourself getting slapped around by his elite goons.
* Dynasty Warriors 7 introduced the new character Deng Ai, who uses what can only be described as a drill lance as his primary weapon.
* Dynasty Warriors 8 who, except in specific missions where the entire point of the mission is to defeat him, is always immensely buffed to the point of effortlessly crushing everything in his way. While he does come after your forces in certain missions, if Diaochan is on the same map and the player defeats her, Lu Bu will become so enraged that he'll enter his buffed state if he isn't already and specifically target the player for the rest of the mission, which is frequently followed by a swift and horrific death at his hands unless you can play keep-away long enough to complete the mission.
* Dynasty Warriors 8: Xtreme Legends Complete Edition: Includes a new story, more modes and an extension of the Ambition mode.
* Dynasty Warriors also has the "Siege Spear" wielded by Xiahou Ba: a bizarre fusion of a spear and a rocket-propelled battering ram.
* Dynasty Warriors. Also notable in that, for someone who's not familiar with the original novel, the feats the characters in the games perform seem absolutely ridiculous, while reading the novel, you can tell that, yes, that's the way they were originally portrayed.
* Dynasty Warriors (and by extension, pretty much any warriors game) is hated to death by critics. While not necessarily as popular as some other examples, the series does sell well enough constantly to justify translating another game in the series.
* Dynasty Warriors and decided to take justice into his own hands once again.
* Dynasty Warriors and its subsequent releases turned this into an art form, adding over a hundred unlockable recolors for most of the cast, most of which reference different characters from across the Zelda franchise.
* Dynasty Warriors, and sometimes unlockable as a companion animal by the player character.
* Dynasty Warriors, and Yagyu Munenori who doesn't even have to draw his sword to kick your ass!
* Dynasty Warriors, as each character must play on one particular stage, completing a series of various tasks. This must also be done on the hard difficulty setting, which makes things even more challenging. Each weapon would give HUGE stat boosts to various different stats, which are different for every character. Also some of them added an element to the character's moveset. But, of course, that wasn't enough for Koei, so instead they decided in the Dynasty Warriors 3 Xtreme Legends update to add in fifth weapons! Same rule of obtaining them, but on a different stage, and this time you have to do it on the new VERY HARD DIFFICULTY! Good luck getting them all!

* Dynasty Warriors between all 4 on that team, and a backup condition, should the main objective of other matches not be met, is also this but with no limit. As with above, they all have an actual incentive to do it even when it's not the game mode, as you will score a little more honor if you've killed more mooks than your team.
* Dynasty Warriors character's infinite dash attack to wail at the gate without worry of falling until it breaks.
* Dynasty Warriors depicting events during the end of Eastern Han Dynasty (189-220 AD) and Three Kingdoms period in ancient China (220-280 AD).
* Dynasty Warriors during Shu's story mode. At the battle of Yi Ling, Liu Bei tries to take on the entire Wu army by himself to get revenge for his fallen sworn brothers. Zhao Yun, who had pleaded with him to fall back, finally stops him with an elbow to the stomach, which knocks him out, leaving him to be carried away from the battlefield by some allied troops.
* Dynasty Warriors entry, the Three Kingdoms era had many, though several famous figures are either overhyped or flatout misrepresented in fiction. Notably, Zhuge Liang was a pretty terrible commander and strategist. His two military achievements are having an army surrender to him after his two flank commanders defeated most of it already and "capturing" two counties Cao Cao had purposefully depopulated in order to create a buffer of dead land to make invasions from Hanzhong more difficult to launch and to make a success. He also engaged in harmful cronyism, favouring his political allies over genuinely skilled commanders like Wei Yan.
* Dynasty Warriors features Hypothetical routes in its story campaigns, in which any captains working for the Kingdom you're playing as avoid their historical deaths.
* Dynasty Warriors, fifth weapons are obtained by playing each character's Legend Mode on Very Hard and getting the best rating.
* Dynasty Warriors first, enemy to be defeated in any game, and his defeat kicks off the conflict of the Three Kingdoms. As later games expand to cover more of the timeline of events, Yellow Turban leader Zhang Jiao becomes the earliest antagonist.
* Dynasty Warriors for not providing the necessary funding for a better advertisement campaign.
* Dynasty Warriors" for the aptly named "chain whip". An actual martial arts weapon, mainly used for self defense due to it's small folding size.
* Dynasty Warriors for the same reasons, namely, ensuring Shu's success while making himself out to be a cold-hearted bastard so Liu Bei seems all the more virtuous for it.
* Dynasty Warriors franchise from Koei Tecmo feature characters that wield a blade and firearm simultaneously.
* Dynasty Warriors franchise was successful enough to spawn quite a few spinoffs. The spinoffs basically just take the original mob hack'n'slash gameplay formula of Dynasty Warriors, and apply it to different settings and universes. Some of them are even licensed properties, such as anime, manga, or other video game franchises.
* Dynasty Warriors game except for Empires (which has different battlefield mechanics), defeating a general instantly causes his troops' morale to drop permanently to zero and any officers under his command to flee. So if you can get to the generals and put them down (without getting killed, of course), you can quickly swing the battle with a minimum of fighting. There are a number of tasks (particularly in 3) that are nearly impossible to accomplish any other way.
* Dynasty Warriors games are all about pulling off those ridiculous, over-the-top abilities most other games only have cutscenes for, to such a degree that when some of the games tried to make things more "realistic", the fans complained. However, if the plot calls for somebody to die, then they're going to die no matter what, even if they might otherwise have survived if you had full control.
* Dynasty Warriors games. His children are warriors in the service of Shu just like him, and he makes it a point to show them how proud he is of them, calling them the future of Shu.
* Dynasty Warriors games. Some characters receive a great boost in fighting ability if they are mounted.

* Dynasty Warriors games take this trope to its logical extreme — only the player's characters can actually score military victories. The various Redshirts on the field are just there to rack up your kill count; they mostly just mill around and certainly have no chance on their own against you.
* Dynasty Warriors: Green for Shu, Indigo for Wei, Red for Wu, Cyan for Jin.
* Dynasty Warriors: Gundam as one of these after it tries pulling the very same trick on Scirocco himself.
* Dynasty Warriors: Gundam explode dramatically and harm enemies. A single exploding suit can spread enough exploding limbs to damage two dozen other mobile suits. Firing a charged shot into a packed crowd is basically summoning an explosion on command.
* Dynasty Warriors: Gundam have a plotline which has shades of this, and their Special Combo dialogue explicitly references it:
* Dynasty Warriors: Gundam itself. In fact he mostly seems to have fun with it in series other with than the constricting corset.
* Dynasty Warriors: Gundam — The previous three games had Japanese and English voice tracks, with most of the original cast (in both languages) reprising their roles from their respective anime series.
* Dynasty Warriors: Gundam, picking up the speed boost power up will cause your mobile suit to leave ghostly echoes of itself for a couple of seconds when it starts to move again after coming to a full stop. Also, the 'escape boost' causes a brief afterimage of your suit to flicker in the place you used to be while, implying that the emergency boost got your suit out of trouble so quickly that enemies are attacking where you seemed to be.
* Dynasty Warriors: Gundam reaction to getting shot down in battle by the player.
* Dynasty Warriors: Gundam treats Mobile Armors like this: you have to strike them when and where they are vulnerable to do any damage at all. Thankfully the third game does away with this: in that Mobile Armors can be harmed at any time, but you do a lot more damage if you strike the weak points.
* Dynasty Warriors: Gundam who simply love fighting for its own sake. One random event has the two of them show up as a team in identical Musha Gundams, happily crowing about how awesome these weapons are.
* Dynasty Warriors: Gundam. Yet, in the end, Ple convinces him to do the "School of the Undefeated of the East" kata with her and Domon.
* Dynasty Warriors had this in spades for most of their games (although it's improving with each iteration) where any character with a cape or long hair would have those parts of the character model freeze in a static horizontal position when moving forward, as noted however they are getting better with this.
* Dynasty Warriors has a K.O. count instead of kill count. In Musou Mode, a general will live or die depending on if his character is needed, meaning that most generals will only die on the last level. Justified in that, because not every general uses a weapon capable of killing, from staves to the power of wind, it's easier just to tack "K.O." on the counter and the bladed weapon just wounded them badly or they suffered blood loss.
* Dynasty Warriors), has a number of strategist characters that has expanded into an ensemble as the series has gone on:
* Dynasty Warriors has a poison swamp that quickly drains your health.
* Dynasty Warriors has fans who take every opportunity to bash the Shu Kingdom for not really being as heroic as the early games made them out to be. This hate comes from people who read the actual history surrounding the Three Kingdoms Era and realized that Shu and their officers were bloody, violent, less than scrupulous people who got their fame boosted by the novel. Unfortunately, those same people miss the point that both Romance of the Three Kingdoms and, subsequently, Dynasty Warriors are NOT based off of the actual Chinese history, but rather the books themselves. It's not going to feature Sun Jian historically slay Hua Xiong, because in the NOVEL, it was Guan Yu.
* Dynasty Warriors has the horse the random soldiers use from time to time. Anyone can use em, and they move faster than walking, but they're scared of EVERYTHING!!! Wanna move across the battlefield? Better hope there are no troops in the way

whatsoever. Yes, even your own. Otherwise, you're better off walking.
* Dynasty Warriors however changed things up a bit, as before that everyone had more or less always used the same weapon.
* Dynasty Warriors, if you're fighting on the side of Wei and your character takes a beating, Cao Cao will berate you, all the while sounding concerned for your well being.
* Dynasty Warriors: If you see Lu Bu, run away. Players new to the series will doubtlessly be cut down as though they were a mook. He is the most powerful character in the series, and once he shows up, your only hope of survival is running away and completing the mission objective before he catches up.
* Dynasty Warriors in an attempt to stop Lu Bu, not that it does them any good.
* Dynasty Warriors in an original storyline); how well this is pulled off and how well it is received by the target audience varies from game to game.
* Dynasty warriors in general love to do this. The opening cutscene in just about every game is especially blatant, oftentimes showing characters doing things that you could not possibly hope to do. The
* Dynasty Warriors. Instead of chastising him for his treachery, he criticizes the rebellion itself.
* Dynasty Warriors: In the later games, jumping into a group of enemies from a high enough elevation (usually on horseback) results in an 'Ambush' situation, where the enemies are temporarily terrified (causing them to attack rarely, while also reducing their defense.)
* Dynasty Warriors is basically a militaristic semi-documentary of China's Three Kingdoms period. There's barely even any women mentioned in.
* Dynasty Warriors is probably the video game poster child for this trope.
* Dynasty Warriors. Lu Bu took part in these battles in the hope that he could find some amusement. He thought that Chibi had its interesting moments. But at Guandu, he thought that the armies of Cao Cao and Yuan Shao were nothing but pathetic worms squirming about. It also didn't concern him that Cao Cao, Yuan Shao and Sun Quan took offence to his intrusions.
* Dynasty Warriors, Lu Xun’s death cutscene has him say “I’m too young to die”.
* Dynasty Warriors, Meng Huo, fat king of the Nanman barbarian tribe, is married to a hot babe Zhu Rong, daughter of the god of fire.
* Dynasty Warriors of Shu's old military, Jiang Wei, who rallies various allies (including remnants of Wu's forces) in a bid to retake Shu.
* Dynasty Warriors, one of Sima Zhao's conquest stages has him being attacked by his brother Sima Shi because he ate one his meat buns.
* Dynasty Warriors Online any character can use any weapon, and all weapons have a description. The flute descriptions, Zhen Ji's preferred weapon is the flute, will throw out jokes about how completely over the top weapon designs are. This is not just targeted on the games own fandom, but rather anybody who thinks that weapons or items in media can be odd, and sometimes just miss the point. Dynasty Warriors is still a clear target for this, though.
* Dynasty Warriors Online. Given that all mooks on different sides are simply palette swaps of each other, but the custom outfits can also be. You can individually "dye" each item so that they change color, There are three different dyes that give you a unique color for each one. the Weapons also change color when you add an innate element to it. They will take on a basic color for the element, but other colors on more complex looking weapons will change to fit the theme of the main color (like gold might change to silver). You have ice (blue and silver), fire (red and gold), wind (green and silver), Lightning (yellow and bronze), vorpal (purple and bronze).
* Dynasty Warriors Online: item grinding is rarely ever an exercise in catharsis, but in DWO it's one of the most common ways to grind. start up a battle in an unoccupied area, maybe get a few friends so it doesn't drag on, and then start smashing faces in until you find all random drops for that battle. you have minimum risk of dying, and you have the freedom just to watch mooks scatter.
* Dynasty Warriors Online, there are 3 skills, only 2 in the English version, that

allow you to heal your party of allies, and the combat part is pretty much a given. One just heals party members, the other heals them as well as giving a buff, but weakens you in the process. The latter can have a stat build specifically for making full use of it to heal your party, making it one of the only times there is a specific "support roll" in the entire hack and slash game. The Japanese only skill will allow you to even distribute the effects of an item between your friends, so you can prepare to find healing items allowing you heal your party in the process.
* Dynasty Warriors Online). Those are the only weapons that you can get and build any growth from.
* Dynasty Warriors onward drags hit enemies with it, apparently chopping them squarely in the middle.
* Dynasty Warriors, played this to the extreme. Now we have Cao Pi/Mitsunari, Ling Tong/Okuni, Sun Shang Xiang/Inahime, Tachibana/XingCai, and so on and so forth. Also, Da Ji regularly hits on Sakon in the second game's Dream Mode levels. Guo Jia/Ina gets some shipping going on in the third game despite the fact that Ina is both canonically and historically married to Yukimura's brother.
* Dynasty Warriors series feature a variety of siege engines on stages focused on taking a fortress. They range from rams to siege towers to cannon.
* Dynasty Warriors series is constantly pushing for war against Wei. This ends up bringing about the end of Shu, since Wei is stronger and Jiang Wei suffers major defeats.
* Dynasty Warriors series is hated by reviewers. Even if they make what most people would consider major changes to the combat scheme, it will still get panned as more of the same. Dynasty Warriors is also unique in that this trope is subverted among its fanbase, or rather, that the fanbase has always held the opposite opinion to the reviewers on this issue. This was shown with the backlash when 6 tried to change things up, mostly because what they tried (Renbu) was not well implemented.
* Dynasty Warriors series of games especially cutscenes thanks to scripted deaths (beating the prior to the time you should, personally, just makes them run away and say a snarky comment or berate themselves), though sometimes accomplishing totally unrelated missions will allow you to dispatch a few of them early.
* Dynasty Warriors series of games portray Yuan Shu this way, especially when playing under the Wu storyline. Yuan Shu's decision to delay much-needed supplies to Sun Jian, fueled entirely by gall at the idea of the latter stealing the former's glory, threatens to unravel the coalition against Dong Zhuo.
* Dynasty Warriors series use this trope very heavily, except in a handful of cutscenes.
* Dynasty Warriors series will have flames flickering around them, denoting that they are a lot stronger than normal. Lu Bu typically fights you with this in effect at all times.
* Dynasty Warriors: Shu — Green, Wei — Blue, Wu — Red, Jin — Teal.
* Dynasty Warriors. Sima Yi in particular is an oddly heroic example, as despite appearing and behaving like an evil schemer in every way, he ultimately has good intentions (to finally put an end to the war of the Three Kingdoms) while his superiors are portrayed as incompetent fools who disgrace the Cao family name.
* Dynasty Warriors's Yuan Shao has one constant and defining character trait: his unerring belief that he's the best and most deserving to rule on account of his "noble" lineage (though not mentioned in the games' story, the preceding four generations of his family had served in at least one of the Han Empire's three highest posts), and declares everyone else outside of his army to be lowly peasants.
* Dynasty Warriors. The one Musou attack is the only time we see it and he's never shown with it otherwise.
* Dynasty Warriors: Wang Yi's armored leggings are really rather close-cut.
* Dynasty Warriors was a vast improvement over the previous installment (which was certainly a step back from the other games).
* Dynasty Warriors. Wei's Xiahou Shang is traded for Shu's Chen Shi. The two slowly

walk towards each other across an open field while observed by generals from both sides, but the moment one passes the other, both break out into a run for their own lines. That appears to be the cue that the prisoner exchange is over, as arrows start flying from both sides immediately afterwards. This curtly concludes the cease fire and leads directly to the battle itself.
* Dynasty Warriors when he first appeared in the story to fight Guan Yu. Although he is actually a year younger than Jia Xu. However, Jia Xu appears much earlier in the story and as such is depicted as being much younger looking.
* Dynasty Warriors, where Yuanji showed a lot more affection and loyalty to Zhao.
* Dynasty Warriors. While most fans will say it sucks, there are a significant number who actually enjoyed the game. Almost everyone agrees that the others are better, though.
* Dynasty Warriors (while still going on about ambition,) while Zhong Hui cites his own ambitions as his reason for backstabbing the Sima family and attempting to seize Wei for himself.
* Dynasty Warriors with feminine features in his face that you can only confirm this guy's gender by hearing his voice, which is surprisingly pretty high for a guy (but not that overexaggerated).
* Dynasty Warriors worshiped as a bona fide Goddess by her people. Oh, and there's the obligatory jungle-kini in which she wanders round, too.
* Dynasty Warriors, you can "rest" with your spouse, which levels you up.
* Dynasty was the one who got married to a stripper who's wearing Fallon's ring.
* Dynomite Deluxe has "Stomped" mode, where failing to clear all the eggs in time gets you flattened by an angry mama dinosaur.
* Dynomutt, Dog Wonder, announces that the odds are a million to one... in his favor. (And yes, the odds do hold up this time.)
* Dynomutt, Dog Wonder: Blue Falcon's best buddy, Dynomutt, the Dog Wonder.
* Dynomutt, Dog Wonder: Dynomutt's most commonly displayed ability is his telescoping limbs.
* Dynomutt, Dog Wonder episode "How Now, Lowbrow", Blue Falcon drops Lowbrow from the Falconcar into prison.
* Dynomutt, Dog Wonder, Ironface sought revenge against Blue Falcon and the city officials who sent the villain to prison.
* Dynomutt, Dog Wonder overdue with another library book and ends up being arrested for it. He's so ego driven he considers it worse than being arrested for the main crime.
* Dynos, although before his name is revealed he's called the "Deathchanter".
* Dyrene i Afrika this when completely out of the blue the crocodile explodes in the last verse:
* Dyscourse is helping Teddy build a driftwood SOS. When you get back to camp Steve asks if Teddy's sure he spelled it right.
* Dyscourse was the government's way of getting them all in one place so that they can test them for some unspecified reason and that a rainstorm which happens if you help him build an SOS out of driftwood is the result of a government weather machine, among other equally-wacko things.
* Dysfunctional Family Circus strips, until Keane's publisher, King Features Syndicate, told DFC webmaster Greg Galcik to stop. During its run, DFC developed a complete set of tropes and in-jokes all its own- most of them as offensive as possible.
* Dysfunctional Family: The family where everyone behaves as though they don't like each other.
* Dysfunction Junction, immediately notice that something's off about her, and she quickly wears out her welcome.
* Dysfunction Junction: Many of these works tend to depict every single character as deeply disturbed and unhappy, even the non-violent ones.
* DYSNOMIA version for free through patches (before the developer's disillusion and their website going under in 2014 at least).
* Dyson says they had to destroy everything, which is what they do. The intended idea was to leave the idea open to whether or not they succeeded, rather than it

being a straight up
* Dysons "never lose suction!" as long as you don't overfill them (which admittedly is user error, as the dirt tank is see-through for this very reason). There is nothing but "cyclones of air" protecting the motor vents; if you overfill, then dirt will suction directly onto and into them.
* Dyson Sphere — a spherical shell built around a star, typically to capture all of a star's energy or to maximize living area.
* Dyson Sphere Program. Also of note is that the game features a Dyson swarm as an intermediate stage between planet-bound solar panels and the rigid Dyson shell that is the final goal.
* Dyson Sphere Program (which were originally conceived as solar energy collectors) can be built around black holes.
* Dyson Sphere's Niven ring. Most fans of speculative fiction these days get around this by dividing the Dyson Sphere concept into several types: the Dead Unicorn version is called the Dyson Shell, while the more plausible original version is called the Dyson Swarm.
* Dyson Sphere strongly implied that the builders of the Dyson Sphere went on to become the Borg.
* "Dyson Trees" are genetically engineered giant plants that can survive in vacuum and synthesizes nutrients from ices found in a comets or icy asteroids, into which they're rooted, and can grow into vast orbital habitats. Inside their trunks and larger branches there are sealed hollows filled with air, inside which other lifeforms — like humans — can live, while their spherical canopies support further air- and water-filled habitats, as well as space-adapted lifeforms.
* Dyson Trees are genetically engineered plants that can survive in vacuum and synthesize nutrients from comets or icy asteroids, into which they're rooted. They can grow into vast orbital habitats, forming miniature worlds floating in deep space. Inside their trunks and larger branches there are sealed hollows filled with air, inside which other lifeforms — like humans — can live, while their spherical canopies support further air- and water-filled habitats, as well as space-adapted lifeforms.
* Dyspraxia also leads to poor focus, difficulty in organising thoughts and poor short term memory, but doesn't have any effect on actual intelligence.
* D'Ysquith family that the second act opens with a song about how all the remaining family and friends hate the D'Ysquiths and are tired of attending nonstop funerals for them.
* Dystopia and bodily damage (HP loss). It is also possible to sneak behind a jacked-in player in Meatspace and kill them. The player's avatar is told that their Meatsack (body) is taking damage, and death simply deletes the Headspace avatar in the middle of whatever it was it was doing.
* Dystopia and the city tends to move often. It nearly sank during a terrorist attack.
* Dystopia city in the Atlantic Ocean. It has yet to be explained how the elevator maintains geosynchronous orbit.
* Dystopia Justifies the Means: Deliberately creating a horrible society.
* Dystopia Justifies the Means: I make life hell for everyone who walks this very earth and enjoy seeing them suffer!
* Dystopia Justifies the Means: My goal is to turn the world into a place where everybody suffers! Hahaha!
* Dystopia lies on the extreme end of shiny, and meatspace is on the medium-high part of gritty. This is especially noticeable in areas where cyberspace is shaped the same as meatspace. Punk architecture is usually more gritty than Corp architecture.
* Dystopia mod. The players can jack into a 3D interpretation of a computer by mentally connecting to the computer through the cyberdeck in their heads. Of course, since they are putting their own minds inside the machine, they leave their real bodies vulnerable to attack.
* Dystopian, as shown in the third volume when people go senile and suddenly die because their treatment doesn't work anymore.

* Dystopian, Biff Tannen murders George McFly, presumably to widow Lorraine and get revenge for the humiliation in high school. He tells Marty this, but Marty doesn't take revenge directly; instead, he repairs the timeline so Biff will be a loser (and George McFly still alive) again.
* Dystopian Edict: A dystopian nation is built around one very specific, very absurd law.
* Dystopian Edict: If you break the edict, you suffer the government's wrath.
* dystopian element. When it isn't dystopian, it either refuses to help Earth and/or gets blown up.
* Dystopian Oz: Oz is not a perfect utopia just over the rainbow after all.
* dystopian stuff in the past that culminated in environmental and technological menaces they engineered destroying their society.
* dystopian the only food available to the masses is aerosolized soup. This is listed as among the main complaints of the mad scientist trying to escape this dimension.
* Dystopian Wars has a large number of War Machines. For scale, a Small Tank base is the size of a Modern Tank. A Land Ship in game is so large they can mount Saint Paul's Catherdral on its chassis.
* Dystopian Wars on their backs, while also carrying various weapons that make them more than able to live up to their moniker.
* Dystopian Wars uses (too small to model at this scale) rocket-launched infantry to perform boarding actions, and they can launch from ships, landships or airships.
* Dystopia or oppressive alternate universes were big in '80s films/TV shows.
* Dystopia plays this for laughs. The heavies are actually human cyborgs, but they use Robo Speak and make jokes related to their more robotic tendencies.
* Dystopia Rising. It uses a lightest-touch combat system and features a fairly involved economy which includes resources and blueprints unique to different settlements.
* Dystopia setting, features Cyberspace as a significant part of gameplay. Your Commander during the tutorial justifies the techy-ness by saying:
* Dystopia: The first half of the decade was full of teen-oriented works featuring dystopian settings with young protagonists rebelling against oppressive regimes.
* Dystopia, the menu at an abandoned coffee shop sells three different kinds of soy products and no other food.
* Dystopia: The tutorial map has you enter an abandoned, underground arcology to retrieve sensitive software. Your CO will remark on some parts like a room having an artificial sky and another case where a tree has grown through solid concrete.
* Dystopia: The United States in the backstory began a downward spiral as its currency collapsed as more and more nations switched over to other reserve currencies. By the time of the game, it no longer exists, now broken up into several different nations, the most powerful being the United Dominion of Canada.
* Dystopia, where sex and human touch in general has been outlawed, but played straight after they free everyone from their oppressors.
* Dystopic where Project Inferno (ongoing in his reality) has progressed a few days faster and proceeds to destroy the world, thus giving him extra motivation to shut down his world's Project Inferno.
* Dzerzhinsky Military Academy of Rocket Forces, now Peter the Great Military Academy of the Strategic Missile Force, for staff officers in the
* Dzhokhar Tsarnaev, the perpetrator of the Boston Marathon bombings, couldn't be accused of being a terrorist "because he's way too handsome." Obviously, their claims didn't have an effect on his imprisonment.
* Dziewczyna i chłopak ("The girl and the boy"): a twin brother and sister switch places before going on summer vacation.
* "Dziura w całym" the main character digs a shallow hole to bury the leaves he had raked, but falls in and ends up in extensive cave system. His attempts to leave through three different tunnels lead him first to an upside-down world, then into the spout of his teapot and finally right into his own bedroom.
* Dziwne Przygody Koziolka Matolka. Nobody speaks intelligibly; speech is, at best, represented by hollow metal noises.

* Dziwne Przygody Koziolka Matolka: The episode "Złoty Szlak" features one in the form of a map.
* Dzo: Dzo are the ligers of the Bos family, becoming bigger and stronger than either their yak or cattle parents. The females are also fertile, allowing the generations to carry on.
* Dzwiedz 24 and drops obscure trivia. Sometimes all in the same sentence.
* Dzwiedz24 tends to utter one (or several) of those when he manages to survive or defeat an enemy against the odds.
* E3 2010 provided an interesting reversal: Microsoft and Sony both seemed to be making overtures at casual gamers, with
* E350, and an arc concerning the creation — and rampage — of a creature only known as ReGenesis.
* E350 and his friends, while E350 is busy trying to keep from being evicted from his house.
* E3 trailer to decapitate zombies with ease. And the box art features a zombie guardsman, hat included.
* E-40 had three top 40 hits - "Rapper's Ball", "U and Dat" and "Tell Me When To Go". The latter is easily the best-known out of the three, despite being the lowest-charting (and the second is probably associated more with T-Pain than with him).
* E4 routinely mocks the shows and movies it advertises in its promos (voiced by Patrick Allen and, following his death, Peter Dickson), making fun of the plot and montaging character lines to this effect. One such promo features a redubbing of the Ghostbusters theme, implying that everyone has already seen the movie and should only watch it again if they have nothing better to do. They even go so far as to suggest renting a DVD or going to the pub instead. Another for the series How I Met Your Mother implies that it is simply a rip-off of Friends.
* EA 271 not enter production. Instead, the VW Golf/Rabbit debuted in 1975 as a Beetle replacement.
* Eaarth, which describes how we have irreversibly changed our planet with global warming, etc.
* Each and every one of Tuxedo Mask's appearances, with his most over-the-top moment occurring in the S Movie, where he arrives on a Christmas float dressed as St. Nick himself.
* Each Angel from both teams (sans Vanilla) has a Hyper Weapon that, depending on who's being hit, serves this purpose.
* Each Beholder considers itself the paragon of its kind and will fly into a murderous frenzy upon seeing another, even if the differences between them are minute things like eye size or skin color.
* Each book also includes multiple bonus strips, as well as creator notes at the beginning of each chapter, which function similar to a DVD commentary. Certain art mistakes are also corrected, and the earliest strips had their jagged borders removed, after Rich Burlew decided they were ugly.
* Each category of weapons (except maybe for the joke ones) has a top-tier one, with the greatest damage output and combo. Namely, there are the
* Each chapter gives the player multiple items that can potentially be used in the confrontation with the chapter boss. Some of them have no effect at all and will lead to a Game Over if Akira tries to use them.
* , each chapter is a short phrase separated by a comma. Examples include "A Traitor, Exiled", "A Damsel, Distressed", "A House, Divided", and "A Truth, Revealed".
* : Each chapter is named after a real-life monastic order (Benedictine, Camillan, Carthusian, Camaldolese, Franciscan, Piarist, Teutonic, Jesuit, Carmelite, Fatebenefratelli, Crosier, Barnabite, Trappist, Dominican, Mercederian, and Trinitarian), to reflect the story following the search for an order of monastic healers.
* each chapter is titled "In Which [blank]", where [blank] is a very brief overview of the chapter.
* Each chapter presents at least one problem for the protagonists to solve. The

most dire of these must be solved by the next chapter, but attempts to solve any of the others are doomed to fail until the book is near its conclusion, leading to a steadily amassing pile of increasingly bizarre problems.
* Each character has an harmless-looking joke weapon that is a top tier weapon for them — Lloyd's is a pair of
* Each character has died many times over the course of the show, sometimes
* Each character has exclusive weapons, equippable only at Level 100, that are tailor-made to improve their unique aspects, and are usually the best weapons those characters can use (though there are some non-exclusive Level 100 weapons that are more useful). However, none can compare to Exdeath's ultimate weapon: Enuo's Scourge. Aside from its stats (which are good, but just as good as the other ultimate weapons), it has, like the other Exclusives, added effects based around the character. For Enuo's Scourge, those bonuses are Brave Point boost on block, and an effect called Riposte, which makes every attack a critical hit if done to a staggering character. Exdeath's abilities are based around blocks and counterattacks, meaning virtually EVERY hit he does will be done to a staggering opponent, reeling from their attacks being blocked. Boosting his Attack rating will make his critical hits do absurd damage, ensuring you'll be doing
* Each class of magic has its own methods of being used. Conjury draws aether from one's immediate surroundings to focus through their staves into spells. Thaumaturgy uses aether from the caster's own bodies, which they attune to specific elements.
* each country is controlled by the player who owns the most of their bonds by making two nations owned by them fight, as destroyed armies no longer consume upkeep, thus their countries have more money left which can be used paying interests to their investors.
* Each Dawn I Die (1939) stars Jimmy Cagney as a journalist framed for murder. Contains every sub-element of this trope, yet ends rather realistically with a riot-plus-hostage-situation that goes south. Don't worry, everything else that happens is gloriously ridiculous.
* each decade), Jack Beaumont and Susan Bright are always 27 years old, meeting and falling in love for the first time. No explanation is ever even attempted — this is just the way it happens.
* each Earth producing comics that recount what's happening somewhere else in the Multiverse, even if most people think they're fictional. This has long standing at DC — in the Silver Age, Earth-One's Flash, Barry Allen, read comics about Earth-Two's Flash, Jay Garrick.
* each, effectively making the split 75/25. The judges, who were pretty vocal about wanting Nicole to win, scored her 2 points higher than Evan (30-28) both times, turning what had been up to that point a tight contest into an easy victory for Nicole.
* Each enemy army gets their own unique background music during their turn to help individualize them as a unique faction.
* Each enemy group has its own particular Elite Mooks with unique weapons. Morning Star has sniper duos in helicopters, Luchadores have enemies with grenade launchers, Deckers have the agile,
* Each episode begins with Starlee meeting with her client to get a run-down of the case.
* Each episode contains creative commercials for the show's sponsors, Kind Snacks and Square Space.
* Each episode ends with Starlee giving a cryptic clue about the next episode, except for the last one, where she gave an explanation for the previous one.
* Each episode ends with the hosts promising that the next episode will be about the Tacoma Narrows Bridge Disaster.
* Each episode is consistently split in half between an episodic story and a
* Each faction has three unique units that can be produced during five epochs. Meaning the Japanese no longer know how to train samurai in the middle ages, and instead get the noncombat ninja instead, while the trusty Zero is able to compete with not-quite
* Each figure in the Mojo wave was originally supposed to include a member of the

X-Babies (child clones of various Marvel heroes created by Mojo). 1st Appearance
* Each game also features permanently summoned creatures, usually by sorcerers or necromancers. It's implied to
* Each game has its own theme for various enemies. While some are unique others are redesigned versions of past enemies like the Lakipea being a bean themed version of Lakitus. The Dreamy enemies in
* Each game has rumors of a secret vehicle, like drivable Scarabs and the "Golden Warthog". The "Yellow Banshee" was rumored to be in the original
* Each game has sidequests for each character to obtain their best weapons, best armor, best transformations, unique accessories, and the most powerful skills. These often require actions being taken throughout the entire game, in addition to the main storyline.
* Each game usually features a playable character or two whose action skill centres around deploying some robot or automated assistance in combat. Roland and Axton
* Each game will have the same cup names - Mushroom, Flower, Star and Special for new courses, and Shell, Banana, Leaf and Lightning for old courses. The sole exception is
* Each generation of Toys usually had a built-in "action" feature, beginning with the Toa Mata/Nuva's arm-swinging gimmick. These usually required a simple gear system set up and all sets in some form had a "action" feature built into them. After the Visorak saga, these were instead dropped in exchange for more posability in the sets, in turn resulting in many of the future sets following a certain "formula" (coined the "Inika" due to the Toa Inikas first using it) for builds, with whatever function being relegated into their weapons instead. While some sets got a bit creative (most notably the Barraki sets), the repetitiveness eventually caused fatique in buyers, as at that point the only interesting things about a new set was maybe one or two armor pieces and the mask/helmet.
* each girl declares she will return before this unless she succeeds in finding her fortune.
* Each girl was forced by A to do something to ruin their own lives because A was holding their therapist hostage. When the girls complete their tasks A gives them coordinates to where they have allegedly buried her alive, only for them to start digging and realize that they have just been framed to look like they are burying a murder weapon in the woods.
* each incarnation however the core standard rarely changes: his hair is usually kept short and he has bangs.
* Each incarnation of Avatar is the best bender in the world during their lifetime.
* Each incarnation of, but later the origin was retconned into the accidents connecting them to a mystical entity called the Speed Force.
* Each incarnation of the Doctor lasts a couple centuries on average, as a lot of off-screen adventures happen, and numerous episodes take place over a long period of time. However, due to the Davies-era generally following the "1 season = 1 year"-rule, the Tenth Doctor regenerated after only six in-universe years (possibly five, as it's unclear if he counted
* each, including the introduction of a variant of the Byakugan called the Jougan.
* Each line of dialogue from every character is properly lip-synched in the character models, no matter how incidental.
* Each Little Universe because of knowing real guitar, vice versa, or whether the two are unrelated.
* Each Little Universe, but the official arrangement seems to be that the partnerships are equal.
* Each Little Universe: Two slacker inventors meet a girl from the stars; hijinks ensue.
* Each loop only lasts 10 seconds and Naruto quickly finds it boring.
* Each map (and the general objective thereof) is also presented in the style of a strategy session on a chalkboard.
* Each member even has their own fanclub name- MVPs for Onew, Blingers for

Jonghyun, Lockets (original) /Lil' Freaks (new) for Key, Flames for Minho, and Taemints for Taemin.
* Each member of the clan gets to star in at least one episode (the "trio" each make a mortal enemy during their episodes; Hudson and Bronx make new friends during theirs).
* Each Mixel tribe has a leader. They take command of the actions of the group, as well as control their
* Each nation's clothing colors also follow a loose pattern. Water Tribes wear blues and grays, Earth Kingdom citizens favor green and brown and other earthtones, Fire Nation citizens wear red and black, and Air Nomads yellow and orange.
* Each of an octopus's eight arms carries its own individual brain, capable of controlling the arm even after it's been severed. During the animal's daily life, the central brain decides what each tentacle ought to accomplish, but the tentacle gets to decide how to go about it, and the easiest way for the octopus to determine where a tentacle is and exactly what it's doing is to look at it.
* , each of Discord's siblings represents a different aspect of Discord's personality. Animosity is his anger, Quarrel is his pride, Wrangle is his flair for the dramatic, Squall is how he's not ruthless, Schism is his mischievous nature, Strife is his need to be entertained, Dissonance is his tendency to do what he wants when he wants without knowing or even caring who gets hurt, Tiff is his lack of empathy, and Cacophony is his insanity. Their mother too, is one, she is the past, and dreams, hopes, or ambitions that have been tossed aside. As one might expect form that concept, she's evil.
* Each of Ezio's recruits in Rome was issued a Hidden Blade created by Leonardo da Vinci (as revealed in the Facebook game
* Each of his other series and books thus far have had totally different but similarly complex, highly developed rules-based magic systems. Not only that, but the entire set of systems, collective referred to by Investiture people in universe who aware of the existence of multiple magic systems, also has several overarching rules and guidelines that apply to the individual systems.
* Each of Metallo's first two episodes ended with him apparently being killed, only for the very end of the episode to reveal he was still alive.
* (each often with their own horrible requirements to get). Even the relevant characters wind up seriously confused for the few lines of dialogue they have.
* Each of the Bending styles also has specialized substyles, some which require a great amount of skill and special training, or are stronger in certain bloodlines. Some Firebenders can fire explosive beams from their forehead (referred to as "Combustionbending") or generate lightning, some Waterbenders can heal, calm spirits, or bend the blood of others, select Earthbenders can bend metal or even lava, and a few Airbenders can perform
* Each of the casters have a different way of managing their MP that suits the job's lore;
* Each of the characters' fur/feather/body color tends to follow them everywhere. An interesting case is Shadow, whose fur is Black with Red highlights: he is usually associated with Blacks and Grays or Dark Red, but for some reason, his attacks are all orange.
* Each of the four has her own flavor of it, too. Wind Whistler is basically a Vulcan in cartoon pony form. Peach Blossom has
* Each of the four turtles has a specific lit shot that must be made after plunging to achieve a Weapon Skill Shot. Achieving it lights the Weapon Hurry-Up.
* Each of the four worlds contains one level that must be played as one of the four characters you unlock: One's a Kangaroo who has ridiculously high jumps and gets a lot of platforming without gliding, one's a bomb dropping flying penguin who gets a lot of aerial assault type levels, one's a strongman yeti who gets a lot of combat heavy sections, and one's a gun wielding monkey who gets a lot of shooting stages.
* each of their major members were a match for the Dilgar. Thankfully, humanity proved not only willing to help, but also not insane as they seemed, heavily armed, and capable of rallying the League around themselves.

* Each of the main outsider species also has a very low-ranking caste or subspecies, generally the very least and weakest of their kind, that is commonly summoned for use as familiars by mortals of matching alignment who have become powerful enough to bond with them — thus, powerful wizards, sorcerers, and witches can be seen accompanied by things such as angel-winged living helmets, sapient celestial cats, winged mechanical orbs, colorful and airborne wormlike creatures, impish devils and demons, balls of flesh bound in metal and bristling with blades, and the like.
* Each of the main titles has at least one queer romance route — mostly female/female, but also a few female/non-binary and male/male. The romance is the main focus of the story.
* Each of the martial artists, being animals who each practice a style specifically designed after their species. But no-one associates a cute and cuddly species like a Giant Panda with aggression, and yet lead character Po learns to be exactly that. This is emphasized even more by the name the writers chose to give the panda:
* Each of the new enemy types have a specific weakness to one of Raz's psychic powers - in ways that mirror how one would actually deal with the negative thoughts they personify;
* Each of the other Avatar PC's have a similar Incantation. Interestingly, in an
* Each of the playable classes has a color associated with it, so a character's class can be discerned at a glance, e.g. on a listing of raid members. Warrior = Brown, Paladin = Pink, Death Knight = Red, Shaman = Blue
* Each of the Schools of Magic has one other it is neutralized by. To specify, Divine neutralizes Fae, which neutralizes Infernal, which neutralizes Arcane, which neutralizes Divine.
* Each of these continuities operate by their own sets of rules. Thus something that is portrayed as
* Each of the seven Sides has an actual name in addition to its Side number, though these are rarely used for some reason. The names are, in order, "Zarn", "Hatte", "Munzo" (or "Zeon" for most of UC), "Mua", "Loum", "Riah", and "Noa". Individual colonies tend to have both a numerical designation and an individual name (Side 1, Colony 1 is "Shangri-La").
* Each of the takedowns against Mr. Freeze only work once, as he'll adapt to them.
* Each of the three main companies has their own distinct style. Eclipse, for example, makes heavy use of asari Vanguards, salarian Engineers, and mechs. The Blue Suns use elite squads of heavily-armed human, turian, and batarian soldiers. The Blood Pack use regenerating vorcha and krogan troops, and a hefty amount of
* Each of the Three Orders of Morai (Luminance, Shroud, and Corona) offer Teleportation Scrolls to member players for a fee in Influence (Order-specific currency), teleporting them from the Midlands map to the home base of the issuing Order: Nexus of Luminance, Shrouded Temple, and Corona Sanctuary.
* Each of the trainers wear nice looking runners in each game, and in
* Each of the Valentine family member's ultimate armor is obtained through the lottery, requiring you to track ALL the members and play at least one game with them. Some are hidden in dark dungeons, behind scenery, and saying certain things to them. You need a ticket to play the game, which aren't common. The first game even required you to activate a scene first before meeting the lottery member. The good thing is that member has Margarete's ultimate weapon.
* Each of the Wiggles wear different colors so that people can tell them apart easier. Greg
* Each of the Wolf's targets corresponds with an aspect of the Chaos Gods: Clegane for Khorne (War), Ramsay for Slaanesh (Sadism), Baelish for Tzeentch (Treachery), the Night King for Nurgle (Decay), and Euron for Chaos Undivided (Nihilism).
* Each of the Zabis was known to personally take to the field to varying degrees. While Kycillia normally commanded from her flagship, in the anime she once personally engaged the Gundam alongside her subordinate M'Quve. In the backstory Dozle Zabi was known to sortie in a customised Zaku, and later met his death while pulling a

* EACH OF YOU SHALL PAY THE FINAL SUM! CRRRRRY FOR MERCY! THE RECKONING HAS COME!!
* each other (a humanoid warrior versus a squat bug-creature) and c) the various Rahi and Titan sets all had very different builds.
* each other, and threatens to make them shoot each other/themselves if Jessica does anything to him. A season later, Detective Costa recounts how terrifying the incident was and how he had nightmares that only stopped when Kilgrave died.
* each other. Attempting to ask about this subject will elicit this response, and even the Daizenshuu guidebooks use "perhaps", "maybe" and other weasel words instead of putting a definitive ruling on things.
* each other. Both ships were destroyed, and there was every chance that other ships nearby (meaning thousands of kilometers away) could have been taken out too.
* each other; Bunnyx/Alix and Pigella/Rose are known to Ladybug and Cat Noir; Viperion is known to Ladybug, Adrien, and Master Fu; Pegasus/Max is known to Ladybug, Cat Noir, Master Fu, and Markov; King Monkey is only known to Ladybug and Master Fu; Vesperia/Zoe, Mylene/Polymouse, and Purple Tigress/Juleka are known only to Ladybug.
* each other), Cyborg took charge and helped them stop quarreling and start gelling as a team.
* each other into their Soul Jars, hiding their "deaths" in each other's body. Killing one but not the other will result in the dead twin resurrecting in a few seconds.
* each other over real or imagined slights (and to understand that it's not good for the cavalry to ride down their own infantry just because they're in the way of where the best fighting is). The motto of Arends in general might as well be "Honor Before Everything, including Common Sense."
* each other's It's not until they find Tintin's wallet that they realize they have their pickpocket.
* each other, so they don't really have a base identity to lose or worry about getting back.
* Each plane has a respective Soul, which acts as that world's personification. Dominaria has Gaea, Alara has Progenitus and Kamigawa has O-Kagachi
* Each power he mimics is at approximately half the strength of the original user.
* Each protagonist makes himself new clothes after acquiring enough alchemy ingredients. John gets a rather dashing teal suit, but Dave later one-ups him by making a tuxedo, complete with bowtie!
* each round, with no saving throw of any kind. Yes, that's listed under his combat attributes. You get a roll to survive so long as there are 1D3+1 in the party. Technically, Cthulhu does have a damage roll, but he rolls more dice than humans can get hit points.
* Each solar system can only be jumped to from certain other systems, which means you typically need to jump through several systems to get anywhere. (An item in the third game allows you to move through multiple systems in a single jump, assuming you set the route in advance; this effectively allows you to bypass the "one system per jump" limitation.)
* Each Sold Separately) ending with Jason wondering if it was customary to approach network executives or toy manufacturers first.
* Each Space Marine chapter has a "fortress monastery" as its HQ. Each is basically a self-sufficient city complete with living quarters, workshops, temples, spaceport etc.
* Each sport in the Winter Olympics is organized by their respective world governing body, rather than the "International Alliance of Winter Sports".
* Each story, except for the fourth, has their first chapter's title be someone's yelled line:
* Each story's chapter titles are technically the first line of their chapter.
* Each subsequent game adds more stuff to do and get sidetracked by:
* Each swear is given various rates, while some letters are replaced by
* Each Targaryen attempt to outright force the Prince That Was Promised prophecy into happening in their specific generation (as it turns out, most of them premature, at best) has had long-lasting effects. Most being tragic ones, when not

being outright stupid
* Each team has different calls in rugby union for scrum plays and lineouts.
* Each time Cap's origin is retold, the level of 'bad' present gets worse. When he was first unfrozen in 1964's Avengers #4, only twenty years had passed. All his friends and loved ones were
* Each time someone asks Kurimaster about rather or not Yubel is fused with Jaden in “Dark Fusion” (apart of
* Each time The Winged Dragon of Ra is played it has a new power. First, there is that special writing which can only be seen under the light of the God (and that means the hologram). When Mai summons it, it doesn't work, since you need to read the text (that is written in Ancient Egyptian) to activate it. Marik promptly reads the text, taking Ra to his side of the field and activating it. Next battle, it has two new abilities: it can increase/decrease its ATK by decreasing/increasing his owner Life Points at the owner's will, and it can attack at the same turn as it has been summoned. And against Jonouchi, Ra has a Phoenix Mode that allows Marik to destroy all monsters of the opponent at the cost of 1000 LP, and it cannot be harmed in this mode. And this is all before the battle against Yugi, when it shows its real power.
* Each time they encounter the same phenomena they will always recap the events of the previous mission, and try to figure out if what they learned that time can be useful again. In
* Each time you lose/retreat from a reinfected stage, the enemy levels will drop by one to keep you from being stuck.
* Each Toa wield an element. To control it, they need elemental energy that slowly recharges itself when not in use, or by absorbing their own element. This energy allows them to create their element out of thin air (shooting fire or water), or to control nearby supplies of it (earthquakes, wind, etc.). As soon as they run out, however, they can't do a thing.
* Each to His Own, Olivia DeHavilland's character makes her fortune as selling "Lady Vyvyan" cosmetics. As her lowlife partner remarks "Classy, hunh?"
* Each unlock of a ship, which basically means beating certain levels.
* Each version of Getter 1 has this. From a fairly standard-sized tomahawk (relative to the mech itself) in the original to twin, double-bladed ones for G, a
* Each volume of the manga that has at least one character die has a panel at the end dedicated to them, showing them floating up to Heaven. There are two exceptions: first, Shou Tucker is the only character to go to Hell instead. Second, in volume nine when
* Each Warhammer Armies book also contains a more detailed full-page map of the homeland of the race it covers (The Empire, Ulthuan, Naggaroth, the Mountains of Mourn etc.). Even the Daemons of Chaos book has a stylised madman's envisioning of the parallel-dimension hell-realm where daemons come from, which cannot be mapped normally as it does not conform to the usual laws of space and time.
* Each werebeast clan is technically a Witch Species in itself. Any child born to a couple of the same clan is automatically a werebeast of the same clan. Additionally, all werebeasts are capable of regular magic, although to varying degrees. While the werebeasts are cross-fertile across their clans and with humans, such "halfbreed" children are weak, incapable of shapeshifting and most likely sterile.
* Each world also contains a top down shooter for Spyro's dragonfly to go through, that needs to be done to unlock the Sparx power-ups.
* Each world will have one of a set of moon appearances chosen during the world generation and will not change, with 1.4 adding a number of possibilities. In addition to a "regular" Moon, there could be a moon resembling Mars, a moon with two small moons orbitting it, or a pink moon with candy-like stripes. The sun may similarly be generated as a cartoony sun with sunglasses.
* Éamon de Valera joined the Irish Volunteers in 1913, fought in the 1916 Rising, was elected to the Irish parliament in 1918 and was then appointed President by the breakaway Sinn Fein government. He retired from politics in
* Édgar Ramírez because he could speak English, French and Spanish

very well and act in each language. Assayas didn't think he'd be able to cast the part because he didn't think anybody would have that facility with language and somehow he struck gold.
* Édith Piaf, is about a woman's yearning for an unhappy legionnaire she knew for a short time.
* Édith Piaf singing "Je ne regrette rien." Instead of an accurate translation, the subtitles claimed she's singing that there's actually one thing she does regret- she could have got cheap glasses from Specsavers.
* Édith Piaf's "Milord" once during a Beauty Queen (the Israeli equivalent to "Miss USA") contest. That song is about a prostitute trying to entertain her customer. One might wonder what they were trying to say about the contestants...
* Édith Piaf's "Mon Légionnaire", about a woman falling in love with a soldier.
* Édith Piaf". The singer was three years old in 1918, and thus not a celebrity at that time.
* Édith Piaf was banned because Piaf dedicated it to her lover Marcel Cerdan, with whom she had an adulterous affair at the time.
* Éliante is one for Alceste, although she is perfectly aware of this and really
* Élodie Yung, or took up too much screen time when a slew of other interesting events was going on. The fact that her hijacking of Matt both directly and indirectly played a role in the breaking up of Nelson & Murdock also doesn't help.
* Émile Waldteufel in film and television for winter landscapes and skating.
* Émile Zola and Paul Cézanne are doing this in 1937's
* Émile Zola's novels explicitly discuss trying to avert this trope. (The translators felt that what Zola wished to accomplish would be better rendered in modern English vernacular than in something overtly equivalent to the 19th-century French in which Zola wrote.)
* Éowyn chops the head off the Witch-King's Fell-Beast before facing him in person. It takes at least two strokes before the thing's head is severed.
* Éowyn; he was never a warrior by choice, only taking up the sword in a defensive war against an imminent threat.
* Éowyn is also stated to be tall, but never given a specific height. Her brother is 6'6"/198cm and she was able to dress up like a Rohirrim soldier, with Merry mistaking her for a "slender man". Usual estimates put her at 5'10/178cm to 5'11/180cm. She's played by the average height 5'5"/165cm
* Éowyn, the only human woman given any significant character development in
* Éponine sings "On My Own" in Act II of the stage version, after the rise of the barricades and just before she decides to rejoin the battle despite Marius having sent her away. In the film she sings it after the "Rue Plumet" sequence, before the stage version's Act I finale "One Day More," and before she sets off to the barricade for the first (and in the film, only) time. This makes more sense in a way, as the film has her sing the song before its inclusion in part of the
* Équinoxe, there is "Band In The Rain" which is the first half of "Equinoxe Part 8". It is made deliberately to sound somewhat like played on an electronic home organ in stark contrast to the rest of the album. It doesn't sound bad, it's just nowhere as sophisticated as the rest of the album.
* Évariste Galois, as a teenage mathematician, invented what would become the foundations for Galois theory and group theory before being killed in a duel at the age of twenty. He is almost certainly the shortest-lived mathematician to have a field of mathematics named after him.
* Ea Cycle narrates his own Disney Death in first person. He falls into afterlife for half a page or so and then gets promptly resurrected. After all, he couldn't very well write about his adventures if he remained dead.
* Ea Cycle, so that the individual's will becomes the will of the universe.
* Eador games, if a player loses the battle for a shard they're trying to claim, they don't get the benefits of that shard. Simple. If their homeshard is invaded by

another player (or vice versa) and the owner is defeated, they're utterly destroyed and cast into chaos. You do get various benefits when fighting on your home shard, though.
* Eador. The shards now drift in the Astral Plane, where they occasionally merge between each other, break apart, vanish completely only to reappear later sometimes, get consumed by Chaos or are forcefully included into bigger "worlds" that are ruled by immortal beings commonly known as the Astral Masters.
* eagerly goes through with the layoffs, figuring that he can just have his cake and eat it too.
* Eagle-Eye Detection: A detective whose main skill is being really observant.
* Eagle Eye is set across three hectic days - then the ending skips to what happened to the characters in the following months.
* Eagle Eye Mysteries. At Richview's north end is a farm area; northwest is the local Buccaneer Beach; downtown has two jewelry stores and a bank; and most of the map's lower half is residential.
* Eagle Eye Mysteries gives us Nancy Marx for the school paper in the first game, and Miranda Eagle and her fellow journalist Tungsten Wiles in the sequel.
* Eagle Eye Mysteries says that Jennifer Eagle's character was created specifically for her to be this. In-game, she built the Eagle Eye Detective Agency's TRAVIS hand-held computer, and is rather picky about who gets to wield it (only Eagle Eye members have the privilege).
* Eagle Eye plans on eliminating everyone in the line of succession, leaving the Secretary of Defense to become President.
* Eagle Eye the American protagonists are being blackmailed into terrorism by a mysterious voice on a phone with an uncanny ability to arrange accidents. They are ordered to meet a man in a similar position, who yells at them for assuming his Iranian ancestry would make him more likely to betray his country, and refuses to help. The protagonists don't have time to explain the misunderstanding before he is killed by a falling power wire.
* Eagle Eye: The pentultimate trumpet note of "The Star-Spangled Banner" is the signal for the detonator.
* Eagle Eye") to decide that the entire executive branch of the government is a threat to the nation and must be eliminated. For the greater good, of course...
* Eagleheart in the sky. Everything goes, up to and including murder. Naturally, a crime baron sets up a blimp as his base of operations where every type of crime is indulged and encouraged (except smoking, because of the hydrogen)
* Eagle Insurance of Illinois had their mascot Eagle Man who would lay an egg, which would hatch a chick holding the card with the company's rate quotes. See it
* Eagleland: American styled culture based around democracy, liberty, and freedom. For better or for worse.
* Eagleland. Ironically, it's implied that secretly both wish they were more like one another, with Canada wishing people would notice him more like in America's case, whereas America wishes he'd get along with others as well as Canada does.
* Eagleland Osmosis and an old and unique constitution, so your rights in the U.S. are not necessarily the same as they would be even in very similar countries like Canada.
* Eagleland Osmosis, and often assume the law works similarly when making one set in their own country.
* Eagleland Osmosis was mentioned or depicted widely. The depictions of the war are still largely shaped by the Western Front, with its images of the Americans and British liberating their future NATO allies to the detriment of the East and the Pacific. In the case of the Pacific, the experiences of the Chinese, the Burmese, the Indians during the War get little say compared to the naval war of the US on the Pacific.
* Eagleland: Portrayals and parodies of the United States, affectionate or critical, from other countries.
* Eagleland) since they can get a giggle out of the stereotype. Expect them to put a disclaimer at the bottom of the trope though, if said trope doesn't make it clear that this is not the case in reality.

* Eagle of the East by L. S. Lawrence follows the legion from the Battle of Carrhae.
* Eagles began as a quartet where lead vocals were relatively split (although Glenn Frey had a bit more input). Slowly, as Don Henley became the main lyricist and a fan favourite, he became, statistically, the band's most frequent lead singer.
* eagles, constantly looked pissed off or dead serious all the time, although this is more due to their facial muscles being more limited in expression that in humans.
* Eagles disbanded in 1980, drummer Don Henley had a rather fruitful solo career. So did Glenn Frey to a lesser extent.
* Eagle series of novels about the Roman Army, the two heroes are a hard-bitten centurion called Macro, who has risen to officer rank purely through merit and experience. And Quintus Licinius Cato, a youth who has grown up as an emancipated slave in the Emperor's palace. Macro is told by the imperial legate Vespasian that like it or not, Cato is on an unprecedented accelerated promotion through ther legion's ranks. He must, therefore, act as mentor to a young man who goes from recruit to Legionary to the junior officer rank of Optio in an incredibly short time, assisted by Vespasian's patronage. At first a man with no discernible military skills, Cato grows through the books into a very capable officer and soon outranks his friend Macro. And the manipulative future emperor Vespasian guards them and steers their missions for reasons all of his own...
* Eagle's Fall, the toast is used word for word by the surviving officers of Frank Company as the official surrender takes effect.
* Eagles Gathered ends without making it clear if Gold and Silver were ever lovers; if they were as of the end of the film; if either is still alive; or whether Gold ever existed at all.
* Eagles Gathered has unclear motivations and goals, like most characters in the film. He says he's supposed to "take care of" Silver, but it's left ambiguous whether that means to help her, or to see to it that she dies.
* Eagles, is all about how he was "too fast to live, but too young to die".
* Eagles of Death Metal. Far fewer people will be familiar with their music.
* Eagles: One of the most popular rock bands of all time, and one of the most universally critically reviled. Allmusic is one of the few review sites that has anything good to say about them.
* Eagles song "Lyin' Eyes" has a modern spin on this trope as part of the story. Young city girls marry rich old guys to have an easier life... but they pay an ugly price.
* Eagles' song "Take It Easy" which has the line "standing on a corner in Winslow, Arizona".
* Eagles's song "Hotel California" has several interpretations due to the way the lyrics were written. Don Henley called it "our interpretation of the high life in Los Angeles" and later reiterated "it's basically a song about the dark underbelly of the American dream and about excess in America, which is something we knew a lot about." Still it's interpreted as an allegory of cocaine addiction, Satanism, or a mental hospital.
* Eagles, the narrator arrives at the hotel and later discovers that he apparently can't leave.
* Eagle Strike, Alex crosses in front of an oncoming tram in order to escape the cars pursuing him on bike.
* Eagle Strike contain information about nuclear strategy, and equipment for the leader to communicate with, and authenticate himself to, the military personnel in individual silos (etc) who would actually carry out a launch.
* Eagle Strike, the fourth book, gets thrown out of Air Force One while "riding" a food trolley: "He went off his trolley."
* Eagle style New York cop who loses an eye in a shootout with some crooks. Returning to the force now sporting an eyepatch, he unleashes high caliber justice on the scum of New York.
* Eagles vibe. When Randy left Eagles, guess who replaced him? The fact they're both introverted serious family men (as opposed to other band members who were

party animals in their time) helps a lot too.
* Eagles were definitely this over the years. Especially towards the end. Glenn Frey had a reputation for being difficult, to say the least, and had a hard time getting along with EVERYBODY in the group (from initial producer Glyn Johns to bandmates Bernie Leadon and Don Felder). Even his relationship with Don Henley (who co-founded the group with him and was arguably his biggest ally in the group) was fraying.
* Eagle. Tommy was just an ordinary boy until he used his magic W sign, which awakened his powers to fight crime! Tommy's powers were limited though, so he was careful recharge them on a regular basis by eating Walls ice-cream... Yup, the entire strip was just a thinly-disguised advert.
* "Eagle Two"; the person under this codename that SRU Group One is protecting has one of these put on her, the people who did it claiming that if her husband publicly confesses to a crime he committed in the terrorists' home country years ago, it will be removed. If not...
* Eagle was set in a post-apocalyptic setting where electricity generation was impossible. The hero encountered a cult based in Battersea Power Station who worshiped electricity and pretended it still existed.
* Eagle) were photo comics as Fleetway attempted to cash in on the success it had had with girls comics in this format. The book later reverted to traditional drawn strips.
* Eagle (who was originally created as a sort of military chaplain in space, but changed to a straightforward pilot to better appeal to children).
* Ealing Studios was intended as a vehicle for Sim, and Guinness deliberately modelled his performance on Sim, to the point that a Mandela Effect has occurred, with people believing it a Sim movie.
* Eames is actually offered the position of captain but ends up declining partly because it was a bribe and partly because to accept it she had to throw Goren off the force. She does eventually show up as a Lieutenant in
* Ear Cleaning (using a stick/swab to clean your own or someone else's ear/s)
* EA recently introduced a subscription service which will be required to pay for if you want beta access to their games, something that was previously free. Admittedly you also get offers on games, but many users suspect more and more previously-free services will be gated off in this way.
* Earendil: Middle Earth first astronaut. Shot down a dragon big enough to shatter a mountain under its weight.
* Earendil the Mariner, slayer of Ancalagon the Black, the greatest dragon in Middle Earth's history, in some versions the slayer of Ungoliant (giant spider, possibly an
* Ear Fins Fins instead of ears, common for merfolk and other aquatic characters
* Earl and Fairy. His appearance is also used to show the discrimination obviously non-Anglo people in Victorian England faced.
* Earl and Valentine become somewhat famous - as do the Graboids - by the
* Earl Boen seems to do this quite often, voicing Sergei Gurlukovitch in
* Earl Camembert, among other things, tries to eat his dinner at the news desk, goes on-air stoned out of his mind, tries to have his son sit in for Floyd while the latter is out getting coffee, locks himself in a cell with violent prisoners to do an interview, and attempts to connect with the youth by roller-skating onto the set to disco music.
* Earle Hyman was openly gay and married to Norwegian sailor Rolf Sirnes for 50 years.
* Earl feels compelled to help his ex-wife Joy make bail when she's charged with kidnapping and grand theft auto. The judge sets her bail at $1,000,000, which is more money than Earl has even with his lottery winnings because this is her
* Earl goes to prison for a crime his ex-wife committed, and finds that his
* Earlier Aang finds himself in the rather odd situation of having the person he's trying to talk to be the moment killer: when he first tells Katara how he feels she's so completely not paying attention that she actually shushes him.
* Earlier, a delegate from Pennsylvania moves to postpone the vote. Judge Wilson

(also from Pennsylvania) gets excited and seconds the motion.
* Earlier, a DVD of the same film had been rated 12 on account of the special features, for using strong language (
* Earlier, a flood shifted the course of the river, transferring a barren, prey-poor piece of land called Sunningrocks from the RiverClan side to the ThunderClan one. Cue generations of bloody warfare over it, only ending when all the Clans were forced to leave by human activity. Ironically, they actually gather there before evacuating, because it's the last place that hasn't been bulldozed, chainsawed, or littered with traps and poison.
* Earlier against Queen Bean you have to attack her arms to deflate them (She's HUGELY muscular) and to make her lose her crown on her head, cause you know, spikes hurt when jumping on it.
* Earlier, a group of humans are sent back to Earth, never to be hunted again, as a reward of being the greatest of prey for not only surviving the hunt but also killing the Super Predators hunting them.
* Earlier aircraft carriers did approach a "cruiserstar" configuration — American carriers
* Earlier an accomplice tries to murder the hero and his associate while they're asleep. He starts by cutting the power to their room, but not only does this wake his targets up
* Earlier and similarly, "Boulevardier From The Bronx" had the Giants leading 3-0 in the bottom of the ninth. With two out, Giants pitcher Dizzy Dan deliberately loads the bases via walks so he could get to the other team's hick Claude and strike him out. On an 0-2 pitch, Claude hits a grand slam, winning the game for his team and getting the last laugh on Dizzy Dan.
* Earlier, Arthaus's 3E Ravenloft products had re-skinned half-orcs as a PC race called "calibans". Real orcs aren't actually native to the setting, but pregnant humans may give birth to calibans if they're exposed to curses or other malign eldritch forces.
* Earlier, a Triassic archosaur distantly related to dinosaurs called
* Earlier before the Matthew Patel fight, the drummer flips Wallace off.
* Earlier, Cammie, suffering PTSD from her terrifying first field mission, and eventually digitally modifying her own personality to be more aggressive, says little during this time period other than "Not gonna get me again."
* Earlier commercials featuring the Crook and the Cop played this trope straight by having the
* Earlier commercials had anyone, including an uptight adult librarian, shoot into the air and ride on a gusher of fruit juice upon eating them.
* earlier concept, where Lightning's powers were all based around gravity manipulation.
* Earlier continuities had the Legion's financier, R. J. Brande, inspired by 20th century heroes like Superboy (
* Earlier Crimbo seasons offered the Pet Rock and the (non)functionally identical Toothsome Rock.
* Earlier Disney Princess movies didn't identify the settings by name, but most of them derived part of their aesthetic from real-world cultures.
* earlier drafts was this to a villainous version of Elsa, who was going to freeze the country and Anna's heart on purpose, and at the end Anna changed her mind.
* Earlier, Dumbledore is able to disable the remaining fighting Death Eaters easily enough, except Bellatrix Lestrange who is able to casually deflect his spell (he does catch up to her and quickly disable her however).
* Earlier, during the Air Orb quest, Red Mage responded to being set on fire by attempting to
* Earlier during the Cell Games Mr. Satan is at the receiving end of one: having realized how to trigger Gohan's transformation into Super Saiyan 2 but reduced to a severed head, Android 16 asks Mr. Satan to bring him to Gohan, and when he starts making excuses, 16 asks, "
* Earlier during the villains meeting, Ralph asks if there's anything wrong with wanting a little more recognition for the role he plays in his game. The zombie

tells him "Yes".
* Earlier editions had a fair number of animals on the list. The elf might come back as a badger. The old
* Earlier editions made a point that Astartes chapter recruiting from a hive world is essentially this. However the fact that Astartes practice mind wipe and hypnosis during training probably helps.
* Earlier episodes also gave Bea Arthur the chance to demonstrate her singing skills –
* Earlier episodes enjoyed making fun of the fact most of the staff were Harvard Alums.
* Earlier episodes from the original series back this up. When in regeneration psychosis, the Doctor often mentions previous companions, either for no reason or referring to their current companions by some other name. Perhaps the companions are how the Doctor keeps track of their time: "That was when I with him, then there was a gap, and then I met
* Earlier episodes has Misty believing this about Ash, having little to no respect for the starting trainer, despite being the same age as him. When he does prove himself later on, however, her attitude towards him changes.
* Earlier episodes, however, did mention Whataburger, a real-life restaurant whose headquarters are in San Antonio.
* Earlier episodes included a new religion that believes "God" is too big a concept for any one tradition to grasp, and also a group of Catholic monks seeking to learn every name and view of God across the various species.
* earlier example; she gained fame quickly, even though she was originally meant to be a minor character next to Rowlf alongside Janice in the Veterinarian's Hospital sketches. While the latter two eventually made a comeback, it is still surprising to learn Piggy was never thought of as a major character in the beginning.
* Earlier, Fievel does this as well when he hugs a mirage of his parents, which turns out to be a cactus.
* Earlier forms of military conscriptions, e. g. that in France during the Revolutionary and
* Earlier games giving the computer unlimited specials. Granted the computer technically has unlimited
* Earlier, George mentions that there's a neat prize inside each box of Mrs. Hockenberger's Butter Cookies, though we never learn or hear any more about it once we find out what box he's actually holding.
* Earlier, George's students wanted him to teach them curse words, because they never know what people are saying to them when they're being cursed at. George figures he might as well go with it, since swearing is just as much a part of language as anything else.
* Earlier, Godfried himself managed a nice insult without breaking character.
* Earlier, Han, Luke, and company turn a corner and run directly into about half a dozen stormtroopers. Han shoots one and the rest flee in a panic. Han chases them screaming only to find a huge contingent of stormtroopers around the corner.
* Earlier he admitted to never kissing or even holding hands -- he's saving himself for marriage -- in obliviousness to what the woman asking him might mean by it.
* Earlier he claims to have done "horrifying things with salad tongs," and on his
* earlier. His sudden death meant he never gained much by his victory over Kozina and that would have given rise to the more legendary telling of the tale, in which "a year and a day" makes for a more narratively satisfying timespan.
* Earlier humans studied captured Bleem ship and invented "zorp" weapon by reverse-engineering its engines.
* Earlier, Ichigo becomes very upset when he hears that Chad has been beaten. He gets lost in thought trying to convince himself that he'll be okay...until his child companion Nel starts complaining that he's crushing her.
* Earlier in 1 Samuel, David was on the receiving end of this, when seeking the hand of King Saul's daughter Michal in marriage. Saul, who didn't like David and saw him as a threat to his authority (especially after that whole Goliath thing), but couldn't kill or banish David because he was charismatic and popular

(especially after that whole Goliath thing), sent David on a number of impossible missions from which Saul did not expect David to return. Inevitably, David survived, often doing
* Earlier, in "A Matter of Time", the SGC gets a taste of this when they gate to a world being consumed by a black hole. The team on the planet appears nearly frozen in time, and the
* Earlier, in "Bob & Deliver", Bob refers to Tina as his "favorite
* Earlier, Indy and his friends have boarded a plane just moments before the Chinese gangster Indy has angered show up. Indy throws a mocking grin of "Nice try, Lao Che." He then shut the door...letting the audience see the words LAO CHE AIR FREIGHT stamped on the side. Lao and his son are literally laughing as they mockingly wave to the pilots.
* Earlier in episode 64, after mistaking a random tourist for the Pony Games inspector, the tourist claims to be just a delusion.
* Earlier, in his introduction episode, (which is really Batman playing on all of the Injustice Gang) Batman is forced to trying to offer Ultra-Humanite double whatever Luthor was paying. Humanite counters by revealing he's not being paid but is in it because he cannot stand the lack of culture in modern society. Batman counters by offering to donate enough money to his favorite opera program on PBS to upgrade him from
* Earlier in its history, at the arguable height of its powers during the 16th and 17th century, there was a 130 year period known to historians as 'the Sultanate of Women', when the political manoeuvrings of the harem controlled the Empire.
* Earlier in its history, there was the Asgardian Civil War, with Odin, Vili, and Ve on one side and their older brother, Cul, on the other. The other three rose up largely because of how Cul a.k.a. the Serpent was abusing his power, over Earth in particular, which he'd transformed into the horrifying dystopia of Aesheim. Vili and Ve were killed in the war, and the consequences were so brutal that Odin had to enlist the assistance of several other pantheons to stitch Earth back together afterwards (achieved by essentially folding back time to before the Serpent's conquest and cutting off the loop, trapping Cul in his own timeline).
* Earlier in Mirrodin there is the Darksteel, magical metal that is plain Indestructible. Things made of Darksteel has eerie light balls orbiting them, be they weapons, golems, or metal fortresses.
* Earlier, in "Romeo & Juliet 2: Love Resurrected", Camp Campbell puts on a
* Earlier in Russian history than that, Peter the Great had three demons summoned to aid him in seizing Swedish land. As payment, they ensured that his sons would die young and that his heart would be cold and unfeeling.
* Earlier in season 2, Piper was torn between Dan, the Muggle love interest and Leo, who is a
* Earlier, in season 2, Tosh tells Owen that she loves him before he dies (again). There's some discomfort when he doesn't quite die.
* Earlier in "Secrets", there was Armin Selig, who had a concrete scoop about the Stargate Program. He got hit by a car after confronting Jack with his suspicions. Never explicitly said, but Jack was left half-believing it was arranged.
* Earlier, in "Semper Fidelis", Johnston ripped the insignia off of one of the fake marines as they were leaving.
* Earlier in "Stink Positive", Stinkbert blows up a balloon and gives it to Dash, advising him not to let it pop. Dash quickly plugs his nose and groans, saying he "wouldn't dream of it."
* Earlier, in Tech Noir, Sarah knocks over a bottle and bends down behind a table to pick it from the ground just as the Terminator turns to look in her direction. He sees her shortly after, so the trope only serves to draw out the suspense.
* Earlier in that episode he was running away from defacing Hokage Mountain. Keep in mind that you can see it from just about every point in the village. Turns out this is intentional: Naruto is
* Earlier in that episode, Homer's computer asks "Vent radioactive gas?", when Homer responds no the computer insists "Venting prevents explosion." Which becomes a

* Earlier in that same arc, Negi personally discovers that yes, Setsuna
* Earlier in that same battle, Nappa becomes enraged when Krillin does a small cut on his face with his
* Earlier in the 1st season, a guy was blackmailed by a rogue juror for killing his wife, but he didn't know who he was so he opted to kill everyone in the jury he was in.
* Earlier, in the Alabasta arc, Sanji invokes this trope by realizing the easiest way to get to the clock tower in this maze of a city is to kick through the walls of every building in his way. This later comes back to bite him in the ass when he overhears townsfolk complaining about the repair work they'll have to do.
* Earlier in the arc Souma is competing against Takumi, a student with the same work experience as himself. After their match ends in a draw, Takumi acts like a shounen manga rival and walks away saying they'll meet again one day to conclude their match. Five minutes later they're seated together on the bus while Takumi looks absolutely mortified.
* Earlier in the backstory, young Roland gains the edge of surprise when he
* Earlier in the Bible, we have Ishmael, who, at fourteen years old,
* Earlier in the book, after Harry informs his allies in the Order of St. Giles about the existence of a Red Court storage base in Nevada, they begin planning how to get there, scout out the facility, overpower whatever security exists, and search it for clues, all without Harry's assistance
* Earlier in the book, he also retrieves not just Ron, but the abandoned Gabrielle from the bottom of the lake (although, it turns out she wasn't in any real danger- didn't really think that one through).
* Earlier in the book, somebody else tried to kill Aral Vorkosigan this way, twice. It didn't work, mostly thanks to Aral's genius for ending up in a
* Earlier in the campaign, they needed to beat Olympiacos 1-0 or by 2 goals to progress to the knockout stage. Problem was, Olympiacos were the ones leading 1-0 at half time, which meant they needed to score at least three goals to progress. With three and a half minutes left, with the score at 2-1 to Liverpool, Gerrard responded with
* Earlier in the ceremony, Damien Chazelle won the Best Director award for
* Earlier in the comic, Dave was originally intended to die in his first encounter with
* Earlier in the CP9 arc, Usopp leaves the crew when he fights Luffy over what should be done with the crippled Merry Go
* Earlier in the DLC, Liara slaps aside two of the Shadow Broker's soldiers with her biotics while chasing after
* Earlier in the drafts, "Switch" was intended to be a female in the Matrix and a male in the real world.
* Earlier in the episode, he shared this with Touji and Kensuke. Touji's cap was blown in the wind and landed next to Asuka, who stepped on it. The three went to retrieve it, a dramatic wind flew, and since Asuka was wearing a sundress they caught a view of her panties. The next moment (and one cut to the episode's title later), Asuka has bitchslapped the three of them.
* Earlier in the episode, one of the aliens is beamed up in an effort to explain to her that this is the case,
* Earlier, in the episode "The Ghost", Gumball drinks a disgusting blend of slop so he'll have nasty breath and gross out Carrie. He grosses out everyone
* Earlier in the episode, the revelation that this Dalek is, to the best of both its and the Doctor's knowledge, the
* Earlier in the film, Abu does this after watching Jasmine pole vault to the next rooftop.
* Earlier in the film, after agreeing to be friends despite the years-long
* Earlier in the film, another player was similarly trash-talking Taylor.
* Earlier in the film, a typical scene is shown where some police chief chews out Eddie Murphy's character. This turns out to be an audition.
* Earlier in the film, Bill accurately predicted that she'd fulfill this trope if she ever took the time to dress up.

* Earlier in the film Jess explains to a bunch of white teammates that she wouldn't be allowed to marry somebody white, definitely not someone black, and not someone Muslim- pretty well limiting her choices to a Hindu or Sikh Indian.
* Earlier in the film, Marty gets a thermometer from Melman as a birthday present and puts it in his mouth. He spits it out once Melman tells him it was his first
* Earlier in the film, Quicksilver and Scarlet Witch both easily overwhelm the other Avengers: Quicksilver is too fast for Captain America to keep track of, and Scarlet Witch is able to implant psychic visions in Captain America and Thor and force Banner to Hulk out.
* Earlier in the film Steve realizes the friends and colleagues piling into the elevator with him on apparently innocent business are there to attack or restrain him because he spots the tell-tale signs of nervousness and weapon-readiness they are trying to conceal. Being Steve Rogers, he gives away the element of surprise by asking if anyone wants to opt out of the coming fight.
* Earlier in the film, the Joker sets one of these up between three goons, forcing them into working for him, but claiming that only one spot is open and holding "try-outs". He leaves a broken pool cue in front of them and leaves, telling them to "Make it fast."
* Earlier in the film there is a scene where, after finding out his name in his former life (before he was rebuilt as RoboCop) was Alex Murphy, he goes to his old house and finds that
* Earlier in the film, there's a more typical example, when Pippet the dog disappears. The ominous hint at his fate comes when the stick he'd been running into the water to retrieve is seen floating on the water, abandoned. Not one second later, theme music kicks in and we get the
* Earlier in the film, when forced to tell a ghost story with the girls in her cabin, Wednesday ends the story in the most terrifying fashion: the ghost in the story punishes the girls who doubted its power by
* Earlier, in the fourth arc, several cats secretly go to the Dark Forest (the cat version of hell) in their dreams in order to get some literal
* Earlier in the game, Jack detonates a bomb to blow up a communications dish, and must run down a corridor to escape, as the fireball chases after him.
* Earlier in the game, Link has to make a wish to unlock the second pendant palace, though the wish is unstated. Notably, the palace entrance requirement is that he make
* Earlier in the game prior to the aforementioned final boss battle, there are also 3-way fights between Rayne, the Nazis and various Vampire creatures. And before that we also get Rayne vs the Nazis vs the Daemites.
* Earlier in the game, we have this exchange between Sly and Demetri, the first boss.
* Earlier in the General Blue saga in the anime Krillin whilst dangling over a lava pit accidentally pulled Bulma’s shorts shorts down and exposing some strawberry patterned panties.
* Earlier in the movie after a bedridden Cameron gets off the phone with Ferris:
* Earlier in the movie, Knives Chau gushes over Scott, telling him she's never dated anyone so talented. Scott correctly surmises that she hasn't dated that many people in general.
* Earlier in the movie, we're given a glimpse of a character who may have died mid-sentence
* Earlier in the movie, when McClane asks if Zeus can hotwire a car, Zeus says:
* Earlier in the narrative, Nate spends a gold dollar in a tavern, which gets him a quart of whiskey, a room for the night, a cooked breakfast for two and (most importantly in this context)
* Earlier in the same arc, Natsu and Wendy visit a black market to pick out magic weapons
* Earlier in the same book, an ambull came out of the tunnel wall to attack Cain who was "safely" in the middle of the party. This, of course, gave him an (unwanted) opportunity to show off what a badass he is with his chainsword.
* Earlier in the same book, one of the apprentices mouths off to Menolly, a

journeyman harper, who calmly reminds him that the official punishment for such an affront is three days' water rations.
* Earlier in the same book, the main characters had found a copy of Churchill's speeches in the president's personal library among ordinary books and had commented it was a disgrace to see something so valuable sitting there unappreciated.
* Earlier in the same episode, a defector is explaining that Barry is the new KGB head & has a master plan when
* Earlier in the same episode, Katara raises the possibility of resolving Zuko's inner conflict by using her skills to heal Zuko's facial burns - the physical embodiment of his daddy issues. But then Azula walks in and offers an alternate path to daddy's good graces: turn on Katara and bring down the Avatar.
* Earlier in the same episode, three of the Sisters (10032, 10039 and 13577) react to the discovery that Misaka 19090 has been dieting and reading a women's magazine by chasing her down like red-eyed demons. We never find out what happened. On the other hand, it's a case of
* Earlier in the same film, one of the Mob Bosses, Vinnie Ricorsco, denounced Jack Napier as such after the latter
* Earlier in the same film, Ringo and Fred are wandering around the Beatles' house looking for the rest of the band and they find a giant Frankenstein's monster with a lever next to it. Fred warns Ringo to leave it alone, but Ringo pulls the lever anyway, insisting "Can't help it, I'm a born
* Earlier in the same loop, furious after Aegon killed Jon, Joff chopped off his hands and tossed him to Ghost
* Earlier in the same mission you also find a room plastered with newspaper clippings, surveillance photos, and a detailed itinerary - of YOURSELF.
* Earlier in the same season, Nanoha is interrupted from firing her Starlight Breaker by
* Earlier in the season, Rainbow Dash uses the pool of it in her own front yard as war paint as part of a
* Earlier in the series, Aang, Katara and Sokka arrive at the city of Omashu only to discover that it has fallen to the Fire Nation.
* Earlier in the series, Agatha uses a modified pipe organ to control her army of clanks.
* Earlier in the series, an extremely underhanded character uses a batch of spiked drinks clear the field in the completely ludicrous
* Earlier in the series, as the Morituri become more successful at repelling
* Earlier in the series (at which time long-range FTL detection appears to work slightly differently), Virgil Samms has a
* Earlier in the series, a victim's husband suggests that Don was this to the victim.
* Earlier in the series, Ayame tried to warn Tanukichi about the dangers of idealizing someone, but he didn't listen. In his mind, Anna was pure and innocent. Even after she awakens to
* Earlier in the series, contrasting the Ghosts' uniforms to those of
* Earlier in the series, Demons had more of a presence in the story, temptations and all, but their place was usurped by the Fae. Lately, only the "Nickleheads" (Fallen Angels with mortal hosts) have made much of a presence for the Down-Below team.
* Earlier in the series during the Orange Islands arc, Satoshi / Ash and Pikachu see a fruit basket on the road and run to it. Kasumi / Misty stops them saying that the basket a likely a bait trap and then the action of Satoshi / Ash and Pikachu running towards it is rewound.
* Earlier in the series, Frieza's spacefaring flunkies, the Ginyu Force, were a parody of Sentai teams, despite being villains. They were big on striking dramatic poses.
* Earlier in the series, Kelly had a dream sequence featuring a contest between Zack and Slater - wherein she'd decide which boy to date. We only see the evening round and Kelly declares Slater the winner. But when Zack tells the interviewer he
* Earlier in the series, Sokka caused a rare heroic example of this trope. After

the
* Earlier in the series, Starbuck engages in a shootout with terrorists; and accidentally hits her perpetual
* Earlier in the series, Tex also qualifies. Though to a lesser degree. Her toughness was played for action and being a badass, rather than humor.
* Earlier in the series, there was Fallen Leaves. He died in the tunnels during an initiation some unspecified time before the Clans came to the lake, and was unable to even step outside, let alone pass on. Eventually, though, he does get to leave the tunnels, to join the rest of the Ancients in the
* Earlier in the series, the Two Witnesses are able to turn water to blood and vice versa, which squicks Carpathia out during his failed speech at Teddy Kollek Stadium when his mouth starts to run dry and he asks for water.
* Earlier in the series, Vera Bates unexpectedly commits suicide, allowing Bates to marry Anna. Not that this actually makes things any easier, since he's
* Earlier in the series, Will, then probably 35, briefly dated Scott, "23 and 3/4" — though when Scott initially asked Will out, Scott said he was 24 and thought Will was 27. Will felt embarrassed about Scott's age and broke it off with him.
* Earlier in the show, Poncho had a good one when he used a gas explosion to kill a
* Earlier in the show, the song "King of Broadway" features a section where Max reflects on his past glory while standing in the alley outside the theatre where his latest play just opened and closed. A mournful violin accompanies his speech, getting increasingly maudlin the more pathetic his story becomes. The violinist turns out to be a street performer whose help Max also declines.
* Earlier in the song, after Leo finishes his verse, a very moved Max says "Leo, I never realized... you're a good singer!"
* Earlier in the story, due to the changes in the ninja academy's training program, Sakura goes from the first student in the class to the dead last, to the point every other female student (even
* Earlier in the story, Ford pulls Arthur away from his sit down against a bulldozer and takes him to the Red Lion Pub to explain that (a) he's really an alien and (b) the Earth is going to be destroyed.
* Earlier in the story, Hinagiku showed that she had the ability to be one, including the singing ability, but has apparently chosen not to follow this path.
* Earlier in the story, once Kaede beat Kotaro, he just stood around promising he wouldn't run or pull a cheap trick.
* Earlier in the story, when Black Star challenges Patty to a sparring match, Black Star decides to "make it fair for her" by having Tsubaki tie his hands behind his back. Patty,
* Earlier in the story, Yue and Asuna come up against Takahata, their former teacher. Suspicious of how hostile he is towards them, Yue asks him to hit her. Despite Yue being an ordinary school girl and without a method to defend herself, he obliges.
* Earlier in the strip, BM's reaction to Lich giving a dramatic speech about the inevitability of death is to tell him, "Hush, the adults are talking."
* Earlier in the strip, Durkon is relieved that since he'll return home posthumously, he won't be eaten by some monster. How does he die? His blood is drained by a vampire.
* Earlier in the Yellow Trailer, the first phase of the background fight music ends when Yang slams the DJ's face on the turntable.
* Earlier, Itchy overhears two thugs talking about having to feed "Carface's little monster" and assumes this trope is in effect. Actually, the "monster" is Anne-Marie, the orphan girl Carface has captive.
* Earlier, John was forced by Nergal to disrupt the plans of The Resurrection Crusade, which planned to have an angel impregnate a human woman who would then give birth a new Christ. John accomplished this by making love to her first. It didn't matter that she was no longer a virgin — but the angel recoiled at the demonic taint in her, another side effect of John's transfusion from Nergal.

* Earlier, like all the way back in Season 1, there was Samantha and Daniel, who seemed to hit it off and share several very shippy emotional scenes. These dropped off significantly later on, so this can probably be chalked up to
* Earlier, Ling and Yao are chasing Mulan and stop short of running into a line of soldiers waiting for food. Chien-Po stops behind them and accidentally bumps them with his belly, knocking down the whole line.
* Earlier, Nami, while pretending to join Buggy and "betraying" her captain, was told by him to fire a cannon ball at Luffy. The funny thing was that at this point, Nami wasn't even part of Luffy's crew yet and was simply using Luffy as a means to an end. However, Nami noticeably hesitated because she hated pirates and didn't want to lower herself to their level by killing another human being.
* Earlier, Ned overhears a conversation mentioning "an anchorman in Kingston". When he later learns that Kingston is the capital of Jamaica, he realises that what he heard was "a nanka-man", nanka being a local term for the Jamaican Boa.
* Earlier, Norm explained that this sort of thing is pretty by the book: every time a human finds a genie, they wish for (in order): a dumb test wish (almost always for a sandwich), a wish for a position of power, which always results in the wishmaker getting lynched by a mob, prompting them to angrily declare "I wish I never met you".
* Earlier on, after being informed that what happened to Naruto's biological parents is an S-Rank secret, Karin asks "Geez, was your father a Hokage, or what?"
* Earlier on, after describing Nick describes their situation verbatim, Hillary says 'I know, it all sounds like some bad movie.' They both then look very slowly in the direction of the camera.
* Earlier on, before Vegeta makes his way to Namek to gather its Dragon Balls, Cui tells him that Freeza heard about Vegeta's plans whilst he was on Earth, because the scouter was on the entire time. Vegeta is shocked at this, claiming the transmitter was off the entire time, but then he realises that
* Earlier on, during the invasion of Konoha, Gai is the one trying to keep ahead of his
* Earlier on, during the Library Island arc, Kaede does this with books falling off of a bookshelf.
* Earlier on, during Tien's Kikoho barrage against Semi-Perfect Cell, Yamcha notes how useless he feels, and Master Roshi directly quotes the
* Earlier, on Elan and Nale's first meeting, Nale's comments on Elan's handsomeness (or rather, his
* Earlier on in the series, Black*Star goes through this multiple times while trying to overcome a jar of water that sucks out your soul.
* Earlier on in the series, Lily pretended to be Barney's wife so his one-night stands would leave in the morning and never bother him again.
* Earlier on, it's subverted. A couple of girls see Negi and Konoka and follow them around, thinking they're on a date. They even call the class president to inform her of what's going on, and she promptly drags both herself and Negi's roommate Asuna over to find out. Turns out that
* Earlier on Mars, all of the Cerberus troops had this reaction upon realising
* Earlier on, one of Spartacus's followers trash talks Spartacus to the man himself. He apologizes profusely when he realizes his error, but Spartacus shrugs it off and says he's not above criticism.
* Earlier on, Rainbow Dash wakes up to find Twilight, Applejack and Pinkie Pie all laying on top of her, and assumes they all got drunk and slept together. When she looks around and sees Sweetie Belle (their friend Rarity's little sister) looking at her, she assumes the younger filly was also involved and freaks out, only calming down once it's made clear that nobody slept with anybody; Twilight had been teleporting around to all their homes to pick them up, and the last teleport had taken all six of them (including Spike and an unconscious Fluttershy) from Rainbow Dash's home to Rarity's shop.
* Earlier on, the bus accident also prompted this, same with Melanie thanks to the trauma.
* Earlier on, the end of the second episode reveals that Aoi Asahina has bought

it. The very next episode reveals that she's okay, and another character just set up
* Earlier on, there's also Naruto's fight against Neji in the Chunin Exams finals. Neji tries to talk Naruto into giving up by telling him that he has
* Earlier on, there's a variation where Sidorak had an open invitation to another villain, his second-in-command, Roodaka; offering to make her co-ruler as Queen. She holds off on accepting until she can say
* Earlier on, the same character hijacked an old secret Soviet orbital weapons platform to nuke Canada.
* Earlier on, twice even, "Son of a BITCH!" becomes "I'm such a SNOT!", which sorta cancels out the well-handled rant.
* Earlier on, when Moody explains the escape plan to Harry. The reader has already been made aware of the fact that Voldemort knows when they're going to escape.
* Earlier on, when Sally and Conrad are arguing about which course of action to take, the Cat announces
* Earlier on, you can ask the researcher Piet to play Triple Triad while panic is spreading like wildfire throughout the Space Station due to Ultimecia's intervention. He even lampshades your ridiculous request. However, the only window of opportunity to obtain Alexander card is either here or during the aforementioned Time Compression.
* Earlier, Optimus is in a three-on-one fight between Megatron, Starscream and
* Earlier, Ozai was also prepared to kill off his then-10-year-old son on his father's command (
* Earlier, Pharaoh killed Hebrew sons to keep the Hebrews from becoming strong enough that in case of a war they could join the enemy and fight against Egypt. Fortunately for the Hebrews, Moses escaped slaughter.
* earlier portrayalsin which he wore other colours (green was a favourite) and styles of outfit, but this is only an urban legend; depictions of Santa in his red suit existed long before Coke thought up their ad campaign.
* Earlier Ramsey points out that the robot can pick up their live broadcast transmission.
* Earlier, Red Alert lighting can be seen inside of Riley's father's head as his emotions prepare to Put the foot Down.
* Earlier, Rico is breveted from lance-corporal/Assistant Squad leader to sergeant/Assistant Section Leader (skipping corporal/squad leader). The officer in charge feels that it makes more sense to leave as many squads as possible with their squad leaders, since the MI mostly operates by squad, and things have been rough lately.
* Earlier, Satan mocked Monique as thinking she was this. She countered that compared to him, she was.
* Earlier, Season 3's finale played with this by having Sean drive Danni (JD's girl of the season) home.
* Earlier seasons offered a subversion- Dinobot was head and shoulders taller than Optimus Primal, and Rhinox was equally as large if not larger. Late season two, Rampage is much larger than Megatron, who really doesn't need size to be scary... it just helps.
* Earlier seasons of the show had no problem mocking or just simply referencing products or people by using their actual names. In later episodes, the show has resorted to replacing real things with spoof versions (i.e. Apple becomes Mapple and Steve Jobs becomes Steve Mobbs).
* Earlier, Sleuth Dawg decided he was done and walked out, promising not to be seen again. In a Q&A, Ian Flynn admitted it was because he simply found him too boring a character.
* Earlier, Stanley's friends shove him under a shower spray fully clothed in an attempt to sober him up after he got drunk, subsequently lost his self-control, and hit Stella.
* Earlier still, at the very beginning of the story, Luffy as a young boy begged to be brought along into Shanks's crew. He concludes the opening chapter by declaring to form his own crew instead.

* Earlier still, in 1957, Italy sent the longest song to ever compete in the contest. Nunzio Gallo's "Corde della mia chitarra" was a whopping 5:09, which led to the establishment of the rule that songs could be no longer than three minutes long the following year.
* earlier strip, Jeremy holds it all day and rushes home because "nobody in their right mind ever uses the school bathrooms".
* earlier strip, when Marten first meets Hannelore. She invites him back to her place to play Scrabble.
* Earlier, Terezi gave John the code for a rocket pack so that he can skip building his house up past the second gate and zoom all the way to the seventh gate to sneak into the palace of the supposedly slumbering Denizen of his Land.
* Earlier than both of these examples, the Gnomekop doll powered from the Rat Talisman in the episode "Tough Break".
* Earlier than that, a young employee of a hotel is shot when he sees Rico after a kill. It's even worse since they had become friends earlier, but Rico is so brainwashed (or grateful for being able to walk) that she shoots him with a smile.
* Earlier than that, Gongenzaka was somewhat of a regular visitor of the You Show Duel School. He's a student of another Duel School, but he appeared in You Show so often that he was even allowed to duel for them as one of their three defenders.
* Earlier than that — an Alien action figure was in toy stores back in the 1970s immediately after the film was released. It was said to be the first ever toy based on an R-rated movie. Apparently this was supposed to be accompanied by a
* Earlier than that the CIA was treated to a very literal horror show when they witnessed Frank massacre dozens of mobsters via satellite. Even Frank's old buddy Microchip is shaken up by what he's seen.
* Earlier than that, the Eldar god of war, Kaela Mensha Khaine, managed to defeat
* Earlier than that, the lockers of the employees of Sector C all have the names of development team members.
* Earlier than this, it was specifically mentioned as something that should be done with Warlock powers so that they fit your character's contract, and used to explain why the contract labels for powers were dropped after the
* Earlier that case, an exchange like this happens between Phoenix and Edgeworth, when Phoenix,
* Earlier that season, they almost go through with a quickie wedding after Carla loses her mom but Turk realizes she's just having an emotional reaction and they (especially she) would end up regretting not having a real wedding ceremony with all their friends and family.
* Earlier, the alchemist observes that they can't change lead to gold, because that would drop the price of gold so dramatically as to make it worthless.
* Earlier the Baron had mild version of this type of reaction after hearing
* Earlier, the Bible had Shechem kidnap, rape, and decide to marry Dinah, the daughter of Jacob. Her brothers agreed to the marriage only if Shechem and all his countrymen agreed to be circumcised. Three days after the countrymen comply, her brothers turn out
* Earlier, the first time a Thing From The Dungeon Dimensions is mentioned is at the Temple of Bel-Shamaroth in
* Earlier, the Kumogashira (spider demons) try to do this to InuYasha.
* Earlier, the main character notices a glowing barn making strange noises, and finds
* Earlier, the narrator says (in Jade's perspective) "You have chalked it up to your family's longstanding propensity for eclectic
* Earlier there is the episode "Mary The Paralegal" where Barney tells Ted he's getting him an escort for the night but he reveals to the others that she isn't. The trope is played straight at the end of the episode because Ted doesn't know.
* Earlier, the resistance member is yelling angrily at Nazi tanks driving down the street, and Charlotte kisses him to shut him up and prevent him from being arrested or killed on the spot.
* Earlier, there was a series of strips where Lucy asks Charlie Brown to have her new little brother, Rerun, join the team. Because of his size, Rerun keeps getting

walks, and they actually manage to win their first game. Unfortunately, he and Linus are called in to a meeting with the Little League organization, who reveal that they have to forfeit their game when it was revealed that Rerun gambled on the game with Snoopy.
* Earlier, there was the Holodoc, whose bedside manner in the early seasons could be boiled down to "Please identify type of pain: burning, stabbing, stinging..."
* Earlier, the team defeated a mob boss by flinging burning ninja corpses at him.
* Earlier, the Temporal Security Annex has this when the time rip occurs: "Warning. Warning. Warning. Temporal rip detected. Alert status: Alpha. Temporal distortion imminent. Agent 5, proceed to Ready Room."
* Earlier, they entered the shuttle bay through a force field, much to Omnibus's
* Earlier, they parodied it with George W. Bush and his daughter Jenna as Vader and Luke respectively.
* Earlier, Topper and Saddam are sword-fighting - well, Saddam's using a sword, Topper is using a phone with an extended metal antenna — when the phone rings, and Saddam obliges while Topper answers the phone, finds out it's Saddam's wife on the line (Hillary Rodham Hussein), and then lies to her to cover for Saddam. Makes sense, it's Saddam's phone, after all.
* Earlier, Uriel had seen a once-possible future that involved a fine son whom he would have been proud of; he regrets it, but does not let that stop him.
* Earlier Uryu poses as a new member of fourth squad who reports to the seventh seat but doesn't remember his superior's name. Sadly for him, the seventh seat is standing right in front of him.
* Earlier, Vimes found a mysterious bag of white powder in his desk but explicitly refused to taste it, instead asking the on-staff alchemist to see if it was arsenic. Shortly afterwards Carrot did use this method. On a mysterious bag of white powder he'd just seen Vimes stuff a handful from into his mouth. It turned out to be sugar, Vimes having swapped out the bag for one from the canteen.
* Earlier, Vincent Vega and Mia Wallace both agree not to tell anyone, especially Mia's husband Marsellus, that she almost died of a heroin overdose and Vincent had to inject adrenaline directly into her heart to keep her alive.
* Earlier, we have Sandie Jones' "Ceol an Ghrá" (1972), which remains Ireland's only Irish-language entry. Subverted in regards to Ireland's Junior Eurovision participation, which is organized by Irish-language TV station TG4, thereby ensuring that every entry Ireland sends there is in Irish.
* Earlier, we see that Sarah owns a little music box with a princess-like figure in a
* Earlier, when Al and Peg watch the tape, Peg comments: "Whoa, I didn't know a human leg could do that. Oh, I want that! Oh, and I want that! And I
* Earlier, when a plane crashes into the house that they were staying at, Ray tells Rachel to keep her eyes on him as he carries her out.
* Earlier, when Bianca smugly thinks she's got Dresden cornered and is going to force him to sacrifice an innocent life, asks him logically if one woman is worth the price of war. He just responds quietly "I love her."
* Earlier, when he refuses to leave Ahch-To with Rey, Luke asks her (paraphrased): "Do you think I'm going to walk out with a laser sword and face down the whole First Order by myself? What did you think was going to happen here?" Many fans came into the film expecting Luke to do exactly that.
* Earlier, when preparing for dinner with Belle, the Beast is so caught up in his anxiety that he finally has a chance to break the curse and his despair that it still may never be broken that he didn’t realize Belle probably won’t want to dine with her captor.
* Earlier, when Yondu realizes Rocket's set a course for Ego, he explains why it's such a bad idea.
* Earlier, while he's looking for gold in the Yukon, he spends some time sitting on a mountaintop, enraptured by the scenery, and wondering if he should just give up his money-grubbing ways and live off the land... then he says to heck with that, and announces that he'd put an oil pipeline through it if it would make him rich.
* Earlier while visiting a hospital the trio is forced to wait uncomfortably as

their doctor examines an old nude man.
* earlier (who was apparently the source of chocolate chip cookie cereal, according to the ads).
* Earlier, Zoro agreed to the terms Helmeppo set that he would starve for a month to protect a little girl.
* Earlier, Zoro got on his knees and begged Kuma to spare Luffy's life by offering his own in exchange.
* earliest examples In the Sixth Square, Alice meets the Unicorn (of the nursery rhyme "The Lion and the Unicorn"), and they are shocked at each other's existence:
* earliest successful ditchings of a passenger aircraft and were rescued by a Coast Guard Vessel.
* earliest, which is well-known for being a mainstream success and more directly tailored to adult smartphone users).
* Earl "Madman" Muntz). Despite this, they struggled to conceal the fraud, and Crazy Eddie imploded when the SEC did its own audit after whistleblowers revealed the tax evasion that was running rampant. It convinced Sam to testify against his cousin Eddie, who fled to Israel but wasn't arrested and extradited back until 1993. Sam now works as a consultant advising regulators, while Eddie lived in relative obscurity until his death in 2016.
* Earl Morrall III as the heavy favorites over the AFL's New York Jets. Unfortunately, Morrall ended up playing the worst game of his career; throwing 3 2nd quarter interceptions (topped by a flea-flicker pass in which Morrall missed wide-open receiver Jimmy Orr). By the time Shula yanked Morrall in favor of the ailing Unitas, the score was 13-0 in favor of the Jets — who ultimately upset Baltimore 16-7.
* Earl of Lemongrab appears to be a parody of this trope. He's definitely a tyrannical overlord, but he isn't actually evil. Rather, he's
* Earl reported the theft because it was his car and the thieves did not want to give it back. In the old days the thieves would have returned it to him as a courtesy to a fellow thief. However, since Earl has gone straight, they felt that he was no longer covered by that Honour Among Thieves tradition. The cherry on top is that Earl figured out
* "Earl's Big Jackpot": Earl gets fired merely for getting injured on the job (after Richfield made his employees work overtime at the last minute, without pay). Earl ends up suing his boss. After Earl rubs in his new wealth, Richfield then fires all of his tree pushers and says it's because of the company losses. Robbie later convinces Earl to consider giving his money back, in exchange for rehiring the employees, which Richfield refuses.
* Earl's first wedding wasn't a picnic either. He was dating a woman named Jessie, but was spotted by Joy (who had recently been kicked out of her parents' house for becoming pregnant out of wedlock.) Joy and her friends served him "upside down martinis," and when he was too drunk to know what was what, Joy drove them to Vegas and they got married. The next morning, Earl notices that she's pregnant; the night before, he just thought she had a bit of a belly.
* Earl Slavitt in "A Different Kind of Death" was framed not only for murder, but the original crime he supposedly committed it in revenge for.
* Earl Swagger from Stephen Hunter's novels served with distinction in the United States Marines during WWII and won the Medal of Honor for his heroism. He then returns to civilian life and becomes an Arkansas State Trooper, where he continues his tradition of badass antics. His son Bob Lee Swagger combined this with
* Earl Swagger of six other gunmen (competitive shooters, Texas Rangers and another WWII vet) to storm a county ruled over by a corrupt sheriff and warden and bring an end to their actions.
* Earl, the car they dropped from a crane to test "Buster 2.0". And several one-time ballistics gel dummies they named.
* Earl Thomas Conley’s 1989 No. 1 country hit “What I’d Say” (not to be confused with the Ray Charles song of the same name) includes a line where a man — conflicted over his feelings for his ex-girlfriend and crazy over thinking about what he’d say to her if they met again — admits there

are times he is so angry (over the breakup and how the relationship ended) that he’d “put my fist right through the wall.”
* Earl uses this trope to play matchmaker with Valentine and Rhonda in
* Earl Valle is the most powerful and most studious necromancer to ever live, and his spellbook contains a few things generally thought impossible for necromancers by the setting's
* Early 1975 — peaked at No. 2 on the country chart; the Hank Sr. cover included vocal harmonies from her good friend, Emmylou Harris. (And yes, both sides got airplay on both country and pop radio.)
* early 1990's, who rehabilitates Hal Jordan and makes him the centerpiece of a massively popular, best-selling run.
* early 19th Century) refused to climb some mountain because he preferred to treat mountains like ladies: him at their feet.
* Early (1st-3rd Century) Christian martyrs in Rome were like this. The same thing applied to a lot of Protestants killed in the Inquisition, often continuing to preach even while they were being burned at the stake.
* early-2010s clothing during the rest of the 2010s and much of the 2020s.
* Early '60s, was that although she had a sensitive and nurturing environment and support team to work with, she had few true peers or role models in the industry she could fully relate to, look up to or personally consult with in her line of work or in her own position as a role model, and had to figure it all out by herself. She really, literally had no idea what she was doing or what would set a good example for her fans to do, and really had to play it by ear.
* , early '70s film starring Mark Hamill & Annie Potts. Both lower class: He's a just-graduated high school senior searching for a stolen Corvette, she's a self-proclaimed "prostitute in training."
* Early '80s UK pop group Bow Wow Wow mixed up punkish energy, surf music, and African-inspired beats and had a couple of hits, notably "I Want Candy", but they're still chiefly remembered for the UK cover of their first album
* Early-90s point and click adventure game Simon the Sorceror also has one - a group of wizards claim to be farmers, and the way to prove them wrong is by selecting the answer "but when I move the cursor over you it says 'wizards'
* Early 90s TV ads for the UK insurance company Clerical Medical featured two elderly muttonchopped men in the fashions of 1824 (when the company was founded) representing the professions in its name. Late 90s ones
* Early Adaptation Weirdness: An adaptation varies heavily from the later, more standardized canon of the source.
* Early Adaptation Weirdness, something seems a little off regarding the character as portrayed in their debuts compared to later installments.
* Early ads for Viagra used this trope. It was left to the viewers to ask the obvious final guess, "Hey, Joe, got wood?"
* early advert for Smash instant mashed potato has a spaceman getting his lamb chops and peas in the form of food pills, but of course "there'll never be a substitute for Cadbury's Smash". Which is basically a substitute mashed potato anyway...
* Early advertising example: A 1950s print ad for Heinz baked beans in the UK included the caption, "Beanz Buildz Kidz!" And that wasn't even their main slogan... it was "Beanz Meanz Heinz".
* Early Aflac commercials were like this, where the duck mascot would try to remind people of the company but something in the background would always drown him out, whether being on a roller coaster with screaming patrons or an auto mechanic with a loud drill (and a truck horn later in the same ad), among other scenarios.
* Early Animation: Covers animation in its earliest forms. No real starting date, but ends with the rise of the Silent Age, below.
* Early appearances of Decklan had him use a pair of katars (he's currently using a single katana).
* Early appearances of Kitty Pryde started her out as a Genki Girl, though she actually
* early (a re-release of the movie with added scenes by John Romero, the original's

co-writer) instead implies the zombie plague is demonic in origin.
* Early attempts at a disc-shaped aircraft with a fan for lift had difficulty getting more than a few feet off the ground. The design eventually morphed into the first hovercraft. See
* Early Australian Prime Minister George Reid was rather rotund, leading to the following exchange:
* Early Autumn: John Pentland is the scion of an old and very rich family, but that doesn't stop him from having a crazy wife locked up in one wing of the house. She's been there a long time; she was already roaming around the locked-up north wing when Olivia arrived 20 years before the story's setting to marry John Pentland's son Anson.
* Early aviation: the Wright Brothers' airplane; and later, the Silver Dart, the first Canadian flight (also the first flight in the British Empire), the first self-powered aircraft takeoff, and the first aircraft to use ailerons to roll.
* Early ballistic missile systems like Snark and Trident also used automated celestial navigation (using cameras fixed on particular stars) to improve their accuracy in the days before GPS and other more modern forms of guidance.
* Early baseball video games were forced to resort to these, thanks to trademark protections on the names of actual teams. Common examples included the Baltimore "Eagles" and the New York "Americans". In later decades, the actual team names were licensed, putting an end to this process. The practice restarted when EA Sports purchased exclusive licenses to the NFL, forcing other professional football games like
* Early battles involving only destroyers do tend to look like your typical scuffle, with ships passing one another while trading shots, especially since destroyers are unlikely to have missiles and tend to only have small turrets.
* Early-Bird Boss, but for reasons of the player's weakness rather than the boss's strength, so they should go on that page.
* Early-Bird Cameo: A character has a minor appearance before they are properly introduced later in the same work, in a sequel, or in their own series.
* Early-Bird Cameo: A character makes a brief appearance before being properly introduced.
* Early-Bird Cameo: A character makes a brief appearance before being properly introduced later within the work or within their own story.
* Early-Bird Cameo: A character makes a brief appearance before their supposed introduction.
* Early-Bird Cameo: A character makes an appearance before being properly introduced later in the work/series or before being given their own series.
* Early-Bird Cameo: A character who has a larger role in the story later on has a brief appearance earlier, without much attention drawn to them.
* Early Bird Cameos; Naruto had failed the Graduation Exam twice already, so he might simply have been moved to another class that had not taken the exam yet. There are at least 10 teams of three Genin so there should be at least 30 new Genin but we barely see half that number in any scene.
* Early-Bird Release: Owners release their work in another form of media before it makes its "official" debut.
* Early books seem to imply that the Yeerk homeworld is part of the Yeerk Empire—Visser One was apparently stationed there before visiting Earth in book 5, and the future Visser Three tries to use the Time Matrix to escape there in
* Early books seem to imply that the Yeerks had conquered numerous species; the Yeerk controlling Jake, for example, lists a couple random ones to imply how mighty the Empire is. Later books, however, never bring up any (totally) conquered species other than the Hork-Bajir, Taxxons and Gedds.
* Early books suggest these are the only kind of situations in which homosexuality naturally occurs, reflecting
* Early card games described characters and history completely differently than what was seen in the comics and online content. Most of the discrepancies have simply been declared non-canon, or examples of
* Early chapters. Helpfully, fatal choices are red links whereas choices that

advance the plot are green.
* Early Christians also tried to resist the introduction of punctuation and
* Early comics made a point of the overcomplicated nature of the kids' inventory methods. John was unable to reach anything not at the top or bottom of the stack, and managed to vandalize his room while he tried to flush needed things out of it. Dave's hashmap modus which had numbered slots for each item would throw things
* Early copies included a partial set of tarot cards. The other cards were included with
* Early Cuyler and most of the other characters are prone to this from time to time. With such lines as "Worky jobs" and "money checks".
* Early D&D also had climate-appropriate herbivores on its random encounter tables. If they were removed it was presumably trimming, there not being much one can do with camels aside from staring at them. On the other hand, getting in the way of a herd of bison is all sorts of exciting.
* early draft near the end. Holmes and Watson agree to never touch a razor again.
* Early drafts of the script gave about 50/50 screentime to Nick Morton and Ahmanet, but Cruise brought in writers he was more familiar with (
* Early Draft Tie-In has Marty escaping detention by filtering sunlight through a projector lens which ignites a matchbook and sets off the sprinklers.
* Early Draft Tie-In: Promotional merchandise for a work is reflective of an early draft of the project.
* Early during Galactic history, the mostly-company-owned planet of Anhur effectively legalized slavery in the system, which resulted in a civil war between the pro-slavery batarians and the anti-slavery humans (and their hired guns from the mercenary company Eclipse) that populate the planet. Eclipse would later spin the positive publicity gained from defeating the slavers for all it was worth.
* Early Edition (actually falling apart), but the threat successfully unnerves his attackers.
* Early Edition a day early. He mostly uses it for altruistic purposes, but sometimes if he's short of cash he'll place a bet at the track. His friend Chuck Fishman urges him to exploit it more, but Gary sees it as an abuse.
* Early Edition (and hangs himself after the guilty verdict) and tries to prove his innocence, to everyone else's annoyance.
* Early Edition: Chuck tries pitching a series about a guy who gets tomorrow's newspaper with no success.
* Early Edition. Complicated by the fact that Gary kept trying to sneak out to prevent the tragedies in tomorrow's paper.
* Early Edition episodes. The hero gets tomorrow's newspaper, which generally seems to predict the day as it would have gone had the newspaper not existed.
* Early Edition, Gary and some his friends were kidnapped and left on a stranded boat that contained a bomb. Gary suggested to his former-cop friend which wires to cut. But his friend told that the bomb's timer was entirely digital in nature and had no weak wires.
* Early Edition, Gary's "selfish" counterpart (who used the paper at least partially for his own gain) accidentally ruined the stock pricing of a (very) small computer company (three or five people) by selling all of their stock that he owned when the paper said they were going to crash.
* Early Edition" is that the mysterious paper Gary receives every day shows what will happen if Gary does not intervene. It's intended for Gary to use the knowledge to save people, putting it firmly in the "prophecies are guides, not rules" category.
* Early Edition. Most of the time they then ran an "exclusive" story on the behind-the-scenes making-of during that evening's late news.
* Early Edition once uses the paper to bet on horse races. He was so busy making money that he didn't read the part about a friend of his who died in a car crash.
* Early Edition setup for one of these, but when Gary reached the train station, the girl wasn't there: she'd decided to take an earlier train because she knew if he tried to talk her out of going, she'd probably stay.
* Early editions had rules for "henchmen" and "hirelings," who are essentially NPC

mercenaries paid to accompany the adventuring party. Later editions continue to publish rules for them, but their focus has faded to an afterthought.
* Early editions had rules for mixing potions, either externally or drinking one while another one with a duration was still in effect. A very bad roll could result in an external (bad) or internal (very bad) explosion.
* Early editions had the Detect Life cleric spell, which could detect living creatures at a distance, and even through solid non-metal barriers.
* Early editions have a spell for wizards to summon a familiar; most are animals, but there is a small chance to get a weak monster.
* Early editions have several types of hellhounds, including one that can breathe out fire and one as part of
* early editions in later editions when the writers realized the situation was unsustainable both from a plot point and economics point — can't sell new sourcebooks if there's no new mechs or starships!
* Early editions of the game had flasks of oil that could be set alight and hurled at monsters, like weak Molotov Cocktails. Now there are flasks of Alchemist's Fire with more or less the same effect. They burst into flame on impact.
* Early editions of the game stated the Adeptus Custodes, the bodyguards of the Emperor, showed their mourning by eschewing their armor, walking around the Imperial Palace in nothing but their helmets, capes, and
* Early Edition: "Take Me Out to the Ballgame". Chuck comes for a visit and offers to take Gary to a Cubs game wherein a promising rookie Pedro Mendoza is going to play. But Gary finds himself trying to help the owner of a restaurant who borrowed money from a loan shark who is demanding ownership in the restaurant as payment. And it seems that the owner of the restaurant and Mendoza are linked.
* Early Edition, the hero needs help, sees (he thinks) a lady cop, is told she has to do something first...
* Early Edition. The protagonist, Gary Hobbeson, gets tomorrow's newspaper today. He frequently asks for help from a detective on the police force, who eventually learns to trust his "intuition". Frustrating, because Gary would be so much more effective if someone on the police force just knew his secret, so he wouldn't have to persuade them from scratch to help out. They could just consider him a golden tip — but he never tells anyone, and each episode where he needs police help, he has to convince someone all over again. The detective, when he is around, usually reluctantly agrees to help based on years of experience with Gary.
* Early Edition two-parter, Gary is arrested for murder and tells a cop that his gloves will prove he didn't shoot the victim by the absence of powder on them. The last shot before "to be continued" shows a pair of hands pulling gloves out of an evidence bag, putting them on and firing a few shots with them...
* Early Eighties companion Adric does this a couple of times in "Four to Doomsday". Early in the story, he refers to the Milky Way galaxy as "Galaxia Kyklos"; Tegan thinks he's talking about somewhere in Corfu until the Doctor tells her that "Adric's just showing off". Later, while sharing a meal with the Doctor, Tegan and Nyssa, Adric asks if anyone will "pass the sodium chloride", by which he means salt.
* early-eighties, which is when manufacturers began making half t-shirts, young women would bare their midriffs by tying the bottom front into a knot.
* Early encounters with the Ferengi involved them acting like pirates, even trying to capture the
* early enough to arrive on Cybertron long before the Maximals got there. It's likely Megatron had years to put his plans into action while the Maximals were attacked immediately on arrival and had no chance at all to adapt like Megatron did.
* early episode "Angel One" had Riker and the leader of a Women-Dominant society.
* Early episode "Principal Charming" has Selma claim that Patty is the better-looking of the two. The only difference between the two is hairstyle.
* Early episodes also had Nell visibly pining for Jonathan, while being coldly polite to Martha. This was phased out, and eventually so was Nell.
* Early episodes of the series characterized Principal Seymour as a Vietnam war

veteran who has flashback about his tour of duty, with one episode (I Love Lisa) showing him still tormented by the death of a combat buddy. This aspect of Skinner's backstory gets downplayed as the series went on. As of 2013, The New York Times was estimating the average age of a Vietnam survivor to be 75.
* Early episodes show a giant penny on display in the Bat Cave, purely because he has one in the comics, which he got during his one and only encounter with Joe Coyne, aka The Penny Plunderer. The Penny Plunderer never appears in the cartoon, but a later episode gave it a new origin: Two-Face had tried to kill Batman by tying Batman to the penny and then launching it into the air, and "they let him keep it."
* early episodes, so there was no need for it once she became more assertive and outgoing. However, Inner Sakura did help her shake off Ino's mind control at one point, so whether it was an actual alternate personality or not is left up in the air.
* early example of little Nancy using brand name Band-Aids to treat her neighbors' scraped knees while teaching young readers basic first aid, a sampling of real Band-Aids were included in the back of the book.
* Early examples of the Russian BMD-series (Infantry Fighting Vehicles designed to be dropped out of planes) had magnesium armor in order to save weight. This was abandoned after it was discovered that the vehicles had a tendency to catch fire when hit by RPGs. Both the BMP-1 and -2 also have fuel tanks as
* Early explorers, biologists, and colonists named many North American birds for their resemblances to Old World species. When
* Early fans of Internet memes can be some of the most vitriolic out there.
* Early finale script drafts also had Xander die in the battle while the grieving Anya survives. In the actual episode, it's the other way around.
* Early firearms (prior to the mid-18th century or so) worked like this in ground battles. Sure, you could reload them... but it took so darned long (1-3 minutes) and the ranges of the weapons were so short (50-100 yards) that you'd be lucky to get off two (somewhat inaccurate) shots in the time it took for an enemy (on foot) to come within range, charge and attack you with something sharp and/or pointy. Bayonets were developed so that muskets could double as melee weapons, eliminating the need for pikemen. Contemporary hand grenades (thus Grenadier units) and rockets -
* Early floppy games could use the stepper motors in their floppy drives to play music. One YouTuber,
* Early formations were about all out attack or all out defence, such as 1-1-8, 1-2-7 or 2-2-6, with little midfield play.
* Early Game Hell: Very often the game starts out very hard and gets easier after you find more equipment.
* Early Golden Age Superman had no problem sending a carload of gangsters to their deaths and was seen as an outlaw. His Kryptonian heritage is rarely referenced. He was rough-and-tumble, generally anti-authority, and was fond of just straight-up punching people like domestic abusers. His most famous moment was probably "How Superman Would End The War", where he decides to stop World War II by simply bumrushing the German lines, pulling Hitler out of his office, and hauling him before a criminal court, claiming in the meantime that "I'd like to land a strictly non-Aryan sock on your jaw."
* Early heavy tanks designed and built toward the end of WWI era and some years later —
* Early human hand axes/bifaces. Used for pretty much any task people could imagine for hundreds of thousands of years: chopping, scraping, cutting, digging, drilling, stabbing, throwing, lighting fires, making more hand axes, you name it.
* Early in '04, a particularly active filker looking for a bigger challenge invented the
* Early in 2016, BSkyB revealed their new Sky Q service with its Fluid Viewing feature. There were some adverts broadcast where it'd play out as a normal commercial for something else to begin with, then around 10 seconds into it, the Sky Q Guide menu would appear with the commercial playing at the side of the

screen. A program would be selected (Most adverts used The Walking Dead), and then the Sky Q commercial would play as if it were the original advert.
* Early in canon, Naruto transforms into Sasuke in order to seduce Sakura. They almost end up kissing before they're interrupted. It's implied Sakura never catches on to this deception, nor does Sasuke even realize why Naruto tied him up.
* Early in Episode 47, Vinny casually browses through the apartments as usual — and then comes upon HOTDOG, an islander who was removed
* Early in H'aanit's chapter 4, it's mentioned that when Redeye moved into the Grimsand ruins, it caused all the monsters to flee the ruins to the surface. Yet when the Player makes it to the ruin, there will be plenty of random encounters as usual of any dungeon. (Downplayed by
* Early in his career, Buddy Roberts of the Fabulous Freebirds competed as Dale Valentine, brother of the legendary Johnny Valentine.
* Early in his career, he had a hit with "I Lost on Jeopardy". He competed on
* Early in his series, Link's age was indeterminate, and his sprite had too little detail to tell. In-manual art drew him like Peter Pan with more hair, making it more unclear how old he actually was. The exception is in
* Early in Part 2, Myne needs to change outfits in the Gilberta Company, but the fact that the employee changing rooms are in the attic doesn't mix well with her low stamina. Benno's solution is to have a screen set up in his office and call a female servant to help Myne change. When Myne's friend Lutz comes down from his own changing room and sees Myne in her new outfit, her explanation is that "Benno helped".
* Early in "Pre-Hibernation Week", SpongeBob and Sandy go sandboarding and Sandy goes fast enough to catch fire. She passes by a backpacker and sets him on fire, causing him to stop, drop, and roll.
* Early in Revenge of Meta-Knight the crew of the Halberd try to fry Kirby with the Halberd's exhaust as it takes off, it knocks him back but he's otherwise unharmed.
* Early in "Room for One More?", Stephanie and Michelle, who are taking care of a neighbor's pet pig, try to convince Danny to let the pig stay inside the house. Joey is on board with the idea, but Danny is unwilling and asks Jesse for his opinion when he turns up. Jesse assumes Danny was referring to Joey until Danny points to the pig in question, at which point the shock of seeing the pig causes Jesse to grab onto Joey, if only for a second, as Joey happens to be next to Jesse at the moment.
* Early in season 1, Ash made the mistake of voicing his opinions on thinking that perfume is stupid. He made the mistake of doing so in Erika's shop, and in front of Erika. Having pressed Erika's
* Early in season 1, Karen Page has some meetings with Ben Urich at the Square Diner in Tribeca. The diner reappears in season 2, this time being the place where Matt chews out Elektra for once again invading his life while she's busy wolfing down food.
* Early in season 2, Brandon almost married Amentia, princess of the Underealm, who had a crush on him, much to his and Stella's horror. Fortunately for both, Amentia made up her mind in the last moment thanks to Amore (Stella's bonded pixie)
* Early in season 3, Wilson Fisk pays Jasper Evans to shank him as part of a gambit to manipulate the FBI into moving him to the Presidential Hotel. There's a few points in later episodes where Fisk clutches his hand to his chest in the approximate location of the stab wound, implying that he still feels some lingering pain from the wound.
* Early in Season 4, Jason tells an unconscious Lana "If only you knew how much you mean to me…" Unfortunately, this is overheard by Lex Luthor.
* Early in Season 4, Jason tells an unconscious Lana "If only you knew how much you mean to me..." Unfortunately, this is overheard by
* Early Installment Character Design Difference: A character's earlier appearances have them sporting a character design that is notably different from how they appear in the rest of the series.
* Early Installment Character Design Difference into a timeline thing, as almost

all of the dirty blonde and brunette Link's belong to the "Downfall Timeline".
* Early Installment Weirdness and he's pretty much never threatened again for the rest of the series.
* Early Installment Weirdness and wouldn't look kindly on the Thieves' Guild trying to do their job.
* Early Installment Weirdness caused the designs to be dropped for almost a decade before being redesigned; they still look gangly, but not to the hilarious degree of the original designs.
* Early Installment Weirdness, comments cheerfully that it reminds him of his college fraternity days.)
* Early Installment Weirdness had exactly one episode that featured genuine supernatural activity and a woman with real psychic powers: "Zubrovnik's Ghost" in first season.
* Early Installment Weirdness included many references to the real world, classical mythology and/or religion. That faded partly because of a devotion to their own world-building and intellectual property, but also to placate Moral Guardians who didn't like upside-down burning pentagrams appearing in card art. The difference is particularly glaring between one printing of the card "Unholy Strength" and another, in which the art of the later version is missing the pentagram that takes up the entire background of the picture but is otherwise identical.
* Early Installment Weirdness in the original Russian" before breakfast. He's also been shown to speak it, along with French, Korean (he offered to do a "simultaneous whisper-translation" for an un-dubbed film festival), and Yoruba (a Nigerian language), the last of which surprises even an FBI translator (who doesn't seem to speak it herself).
* Early Installment Weirdness. It was created on the reasoning that with complete gender equality, a skirt uniform would have to be unisex.
* Early Installment Weirdness. Like all great Cordon Bleugh Chefs, Mrs. Davis' cooking is beyond reproach when applied to conventional dishes. In the main, that's exactly what Davis does in later radio episodes and in the television series.
* Early Installment Weirdness [recording] of the ship that lasts tried to meet with the insectoids, and this is in a series that later establishes that recordings could either be transmitted across space, uploaded and displayed from a ship's computer core, or transferred using isolinear chips (a type of storage object that's implied to be a hologram, laser, or light-based recording in a crystal or plastic medium).
* Early Installment Weirdness rulebook depicted them more as penal legions, drawing their recruits from convicts and sending them into battle high on combat drugs. Early artwork for the Space Marines drew inspiration from US conscripts in Vietnam; the Space Marines were commonly depicted with graffiti on their armour and weapons, often with misspellings such as "KIL KIL KIL".
* Early Installment Weirdness, Samantha weeps over his fatally injured body saying she never told him how she felt about him. Which is just... weird.
* Early Installment Weirdness's long blond hair in World Class Championship Wrestling.
* Early Installment Weirdness: Some late '90s influences and holdovers lingered in pop culture until 2003-04, giving the early part of the decade a distinct and weirder feel from the rest of the decade. Particularly in America, the period between January 1, 2000 and September 10, 2001 was notable for how peaceful it was compared to the tumultuous rest of the decade. There's a reason why this era was said to have culturally started with 9/11.
* Early Installment Weirdness that things like telekinesis and physical enhancement started being added to the Jedi repertoire, making Han's statement seem more out of place with each installment.
* Early Installment Weirdness: The early episodes of a series are vastly different than the later installments.
* Early Installment Weirdness: The early years of the decade was a recovery period from war, revolutions, and a pandemic that resulted in a wide recession that lasted around mid-1921. Men's fashions at the start of the decade were a casual

continuation of Edwardian styles, and women's fashions looked nothing like the popular depictions of 1920s fashions, with their baggy tunic structures, longer skirts, natural waistlines, and long windswept hairstyles decorated with elaborate headcombs.
* Early Installment Weirdness, this trope when she and Niles split up. In early episodes, Lilith's presence was interpreted as being downright demonic (as a play on her name). Also, Frasier and Lilith had just freshly divorced when the show started (on account of her cheating on him after a really subtle relationship decay), while Maris's foibles didn't lead to her and Niles separating until 3 or 4 seasons later; the divorce didn't even come until he discovered she was sleeping with their marriage counselor. After that, she was considered just as screwy as Lilith, if not more so.
* Early Installment Weirdness though. RED and BLU are now depicted as a pair of obsolete companies fighting over a resource that stopped being viable decades ago. The weapon and supply company was renamed to MannCo. While owning it is considered to be a highly desired, and the Administrator is still a class A manipulator, the world is clearly not under her control.
* Early Installment Weirdness, to suggest his fear of interfering with past events (or, from a Doylist perspective, the fact that purely historical adventures were most common in his era) is to avoid catching the attention of the Time Lords, and that he left Susan on Earth in 2164 so that she wouldn't be caught by them as well.
* Early in the 20th century, Ireland successfully gained independence in a bloody but brief war, only for it to be divided in 1922 between the Catholic-dominated 26-county Southern Ireland (later the Irish Free State, and then simply Ireland) and the Protestant-dominated six-county
* Early in the 20th-Century, set theory was redefined, automatically avoiding sets containing themselves (or forming loops of containment — indirect recursive containment). A standard version appears to be
* Early in the anime, Ryōga falls down a hill next to a sign reading "Warning: Landslide area."
* Early in the Ardenweald campaign, you're sent to locate Tyrande Whisperwind from the Maw, the
* Early in the Baroque Works arc, Miss Monday disguises herself as a nun as part of the organization's infiltration of Cactus Island. She engages in a drinking contest with Nami, but is no worse for wear because she was actually drinking
* Early in "The Blond Leading the Blind", Van initially doesn't find it suspicious about Reba treating him with a plate of homemade cookies... until he gives a recount of him lending his car to Reba and seeing Reba's guilty expression.
* Early in the book, Molly tries to solve a problem involving a donkey by adapting a spell that was designed to be used on cows. As the story progresses, she solves several more problems by using the same spell again, each time on a different kind of animal and never on an actual cow.
* Early in the book, the rabbits discover that sitting on a floating piece of wood allows a rabbit to float. This is a difficult concept for such simple animals, and only a couple of the group can wrap their heads around it. After using this principle to help a wounded rabbit get across the brook, Blackberry comments: "I admit it was a good idea. Let's remember it.
* Early in "The Case of the Vanishing Koalas", Miss Tan's is complaining about the students littering toilet rolls. Later, Maudie remembers this and has a
* Early in the comic, it's shown that Sarin tends to stoneskin herself when under attack, allowing her to shrug off daggers while keeping a freedom of movement.
* Early in the comic, Kaylane gets into a fight with another woman, and immediately takes her out with a single slice that makes her entire outfit fall down in pieces.
* Early in the comic, there's a short scene of Gamzee and Tavros chatting to each other like close friends, using each others's emoticons and rapping together (although we don't actually see the rap). This acted as enough
* Early in the current (and present) Baron Zemo's career, during a fight between him and Cap, he fell into a cauldron of a caustic chemical called Adhesive-X and

was left for dead by the hero. Zemo actually survived, due to the protective properties of his costume, but because he had lost his mask previously in the fight, his face was hideously marred, giving it the appearance of molten wax. (Of course, Zemo has changed from outright villain to
* Early in the episode "Room for One More?", Danny praises Stephanie and Michelle for taking their responsibility seriously with taking care of "Scruffy", which belongs to a neighbor. Danny assumes that it's a dog, only for Michelle to enter with the pet in question — a warthog.
* ; early in the fic, when Steve, Tony, Bruce, and Clint have been captured by one of Banner's old friends with the goal of experimenting on Steve's super-soldier-enhanced physiology, with Steve and Bruce trapped and Tony injured, Tony directs JARVIS to allow Clint to use the Iron Man armor to stop their enemies.
* Early in the film Nuke is said to have compiled 18 strikeouts and 18 walks in his first start. This would require a mathematical minimum of 126 pitches (already a high count for a rookie in the minors) and in reality probably more than 200 pitches (an absurdly high number).
* Early in the film, the sisters' royal parents are shown dealing with a family crisis (Anna's injury and Elsa's "curse"), re-organizing their lives to cope with and conceal Elsa's situation.
* Early in the film when Oliver is on the phone with his sister Sam he teasingly asks "You get lost on the ring road again?".
* Early in the first game, you're told that the wings aren't as functional as they look - short flights, like in battle, are fine, but you're going to fall a
* Early in the first season, Gourry carries Lina to a town after she was injured in a fight. Much to to latter's dismay.
* Early in the first season, Katara suffered from Power Incontinence while she was learning how to
* Early in the first season, Lelouch rescues his friend Suzaku by Geassing his captor Jeremiah Gottwald and mentioning something called "Orange"; according to him it's just a random word he threw out to make the Britannians think something deeper was going on. Indeed, loyal Britannians assume that "Orange" is code for some under-the-table deal Jeremiah had with Zero and start mockingly referring to Jeremiah as "Orange Boy", which drives him up the wall. In the second season we discover that he was fiercely loyal to Lelouch's mother Marianne and
* Early in the first season, most of the protagonists are sitting in a room on a ship while a railgun blows a hole in the wall about the size of a human head. Between the size of the hole relative to the size of the room, and the short amount of time for the crew to react,
* Early in the first season Oliver Queen is arrested on suspicion of being the Vigilante, and volunteers to take a lie detector test to prove his innocence. Laurel points out that such tests are inadmissible in court, but Oliver says it's for Laurel's father Quentin, the one who is suspicious of Oliver. Oliver passes, but Laurel notes a discrepancy: Oliver said he had never been to a specific location where the Vigilante had been seen, but Laurel knows he went there on a school trip as a kid. Normally that wouldn't be worth noting, he could have just forgotten, but there
* Early in the game, Celica offers up a Golden Dagger as payment to Saber for his services. When Saber joins, he automatically has it equipped, taking it away from whoever had it.
* Early in the game, clearing a house or even a stable of aliens can be very dangerous and time consuming. A simpler tactic is to throw a Heavy Explosive against a wall to make a hole and then fire exploding and/or incendiary ammunition into the building. This will clear out any walls or any other obstructions that can hide an alien. Any surviving aliens will end up in clear line of sight of your soldiers.
* Early in the game, Kreia loses a hand while fighting Darth Sion, leaving her incapable of equipping two-handed weapons and
* Early in the game, Lily rushes into the castle's throne room to confront her father, the king of Heartis. Try to return to the hallway after this scene, and

Arata wonders what Shina is doing before the door slams behind Lily. When the door opens again, Shina rushes in to find Lily's skewered corpse...before the door closes behind her.
* Early in the game Optimus passes by Grimlock's quarters, where Warpath was just searching for him. If you go inside (which you have no reason to do and wouldn't probably think of, given there's an attack going on) and look at the morbid stuff he has in there (weapon racks, a locker filled with heads, etc.), than Optimus will make some weary comments about Grimlock's violent nature. You can also turn on the TV in the room and sit down to watch it; doing so gets you a nasty comment from Ironhide over your radio chewing you out for not getting to the battlefield when you're needed.
* Early in the game, you can find a locked vault with a puzzle involving hexagonal dots and black and white squares. Much later, in the quarry, you can find a puzzle which is completely identical to the aforementioned puzzle except that it adds an annulation symbol. It's been reported that solving the later puzzle would open the vault even if the former puzzle hadn't been solved yet. However, this is an extremely rare situation, since it's unlikely the vault puzzle hasn't been solved by the time the player is able to reach said quarry puzzle.
* Early in the game you find a telescope and peer out over the water, seeing a pair of
* Early in the game, you have to get a medicinal herb for your Dragon, but you get ambushed by a pair of Hunters who are after it. In the pre-battle cutscene they shoot a Poisoned Arrow at
* Early in the game, you'll likely run into a dismembered corpse hanging from a tree with a sign reading "
* Early in the history of the server, Ponk pranked Sapnap and messed with his house for unknown reasons. This caused Sapnap to burn down Ponk's lemon tree in retaliation, where the fire spread to the point of almost destroying the entire tree. Enraged, Ponk allied himself with Alyssa and dragged Tommy and Tubbo, who had just joined the server, into the conflict.
* Early in the Hulk's adventures, Lee would frequently alternate between calling the Hulk's
* Early in their career, they were referred to as a shitty knockoff of Nirvana, or Pearl Jam.
* Early in their recording career, Minus The Bear were very fond of using strange,
* Early in the manga, Goku grabs Master Rabbit and his henchmen, extends his staff and plunks them onto the moon with absolutely no repercussions for Goku, or for them. And yet later, in the Freeza Arc, it's made a big deal that
* Early in the movie, a ghost couple get a six- or seven-digit number in Heaven's waiting room. It's then revealed that they had to spend three months here before being served.
* Early in the movie, Charley uses this to test his suspicions about Jerry when the latter comes to his house on the pretext of asking for a beer; he leaves Jerry standing on the doorstep while he fetches one from the kitchen, then comes back and holds the bottle out to him, but Jerry is apparently unable to take it until it passes over the threshold.
* Early in the movie, Dizzy Devil is afraid to spin (like the Tasmanian Devil) because he's shedding, and doesn't want to end up naked. Eventually he does spin and lose his fur, and spends the rest of the movie wearing a cardboard box and feeling ashamed for being naked.
* Early in the movie, we're introduced to a group of people who, dissatisfied with the real world, have chosen to live the remainder of their lives in a dream.
* Early in the movie when Col. Sandurs finishes explaining the Spaceballs' evil plot, Helmet pointedly turns to the camera and asks, "Everybody got that?"
* Early in the original series the creators put together a tape of intercom chatter to play as background during bridge scenes. At one point one of the voices reports that "Gravity is down to point eight." This tape was used over and over, particularly when the
* Early in the profession's history, stage magicians maintained their own

Masquerade to conceal how their tricks were done, keeping up a pretense that they actually possessed supernatural powers. As audiences grew more skeptical and came to appreciate magic more for its cleverness and theatrics than for mysticism, this ruse was generally abandoned, yet many still adhere to the "Magician's Oath" of secrecy as to
* Early in the Russian Civil War Red Army commanders would set White officers free provided those swore on their honour as officers and noblemen to not fight against Red Army anymore (regular soldiers naturally joined Red Army of their own free will). But the officers considered any word given to "peasants" null and void and led attacks against Red Army as soon as they go their troops. This led to tales of Red Army's cruelty as those understood their folly and started executing any captured White officer.
* Early in the second season of the show, the team tracks down a serial rapist but is unable to arrest him because they have no evidence.
* Early in the second season, Spike and Drusilla are completely devoted to each other despite the fact that she is quite out of her mind. Their first episode ends with them going off to relax and watch tv together - after Spike has just casually murdered the local
* Early in the series, Desire says in a seeming throwaway line that s/he'll "Bring the Kindly Ones down" on Morpheus. That's precisely what happens, though not in the way Desire planned.
* Early in the series, Don Krieg wanted to feed his starving crew at the Baratie so he won't lose the manpower at hand.
* Early in the series, Italy greets Japan with a hug. Japan then insists that Italy take responsibility for his actions.
* early in the series. She somewhat grows out of this as she gets older, although it still pops up from time to time, even after having Trunks and Bulla.
* Early in the series, Team Rocket were legitimately good at disguising themselves. As they became
* Early in the series there's a reference to part of the former Middle East (Saudi Arabia) being referred to as Area 38. Presumably these numbers designate actual places under rule by the Brittanians.
* Early in the series Turk encountered a sleeping patient whose heart monitor leads have fallen off, so Turk assumes he is flatlining and tries to shock him. Although it is used for comedy, as a doctor Turk should have known better than to defibrillate what he thought to be an asystole.
* Early in the series, when the Quirkless Izuku asks All Might if he could ever be a hero, All Might, fearing for Izuku's safety and using his
* Early in the show, when Kazuki is easing into the new world, alternate versions of the people who tried beat the crap out of him in the first episode for talking to Mitsuki use him as a medium to deliver their love letters.
* Early in the story, once Yamcha accidentally touched Bulma's boobs when she was naked while sleeping.
* Early in the story, the pilot confiscates a suitcase with 50.000 Chilean pesos (about 230000 US dollars in today's money) from a thief. This money is stored away and unmentioned during his time in Pacha Pulai. After leaving the city, he loses the suitcase, but chooses not to retrieve it as it was "ill-gotten money" (and he had the key to a treasury, where he'd later recover many riches in the form of gemstones).
* Early in the third episode of season 1, the case-hungry Sherlock travels to a prison in
* Early in the war, the Centauri were the Warriors to the Orieni's Soldiers, as the Centauri went in the war to conquer glory by destroying their old enemy while the Orieni carefully planned it, training their forces into an
* Early into the anime's run was a character-of-the-day named Seymour who gets tripped by Meowth, loses his glasses, and is essentially rendered incapacitated until he finds them.
* Early into the story, the hero Naofumi purchases a beast child named Raphtalia to be his combat slave. He does this because his shield's

* Early ITV in the 1950s didn't have any limits on game show prizes. This meant that accounting for inflation, the top prize of the earlier British version
* Early manga tankoubons tended to have covers with a plain background and text, as well as some sort of square or rectangular image showcasing the series. While covers have gotten more elaborate designs over the years and expand as far as the whole page, some series collections have grown to be more iconic with the old cover layout. This is why long-running manga like
* Early Man, have also made DFS' TV ads for some years, so the link-up was more logical than most.)
* Early Man - two prehistoric tribes play a football match to decide who controls a valley
* Early Man was being massaged himself in order to make it more authentic.
* Early marks of Me-109 had a similar problem; the internal tanks were properly self-sealing, but the expendable drop-tanks were not. Most Luftwaffe pilots flat-out refused to fly with them attached, which often put them at a marked disadvantage when escorting bombers, as they'd often be perilously close to "bingo fuel"
* Early Mesopotamic cultures had imagery of humanoids and animals (of non-winged species) with wings. Ancient Greece took that feature and incorporated it into its own iconography, resulting in various gods, personifications, and creatures with wings in
* Early models for the Great Unclean One, Greater Daemon of Nurgle from
* Early models of a new-concept product such as a digital camera, being designed by-geeks-for-geeks, can sometimes have advanced features (foldout screens, own programming language) which get dropped in later models as the product goes mass-market. This can lead to howls of dismay from enthusiasts, who were expecting a new model to improve
* Early on, a drill sergeant mentions a species that turned a human colony into a
* Early on, after being friend-zoned by Zii and intimidated by DiDi, he seems to want to focus on Yuki, insofar as he has any opinions at all.
* Early on after moving to Cimbrean, Ava recommends the clanless Gaoian Gyotin to read
* Early on a Minbari warrior insults Sinclair by saying "You have a hole in your mind!", which Delenn reports is a repulsive insult.
* Early on, and soon after Twilight gets her castle, five of the Mane Six stumble upon Twilight's mother, Twilight Velvet, as she's kissing Rainbow Dash's old friend Gilda. Having not been seen by the couple, the five decide they have to tell Twilight, but their main concern is not because Velvet was kissing another woman - it's because she was kissing
* Early on, Anna would tease and make fun of Nitori. This is implied to be due to her
* Early on, before any major details are revealed, it's hinted that Locke is a skilled military man ("Colonel Locke, is this line secure?"). Although it's a few scenes later that it's revealed that he's talking to his wargaming friend.
* Early on, Captain Crozier decides to ignore Captain Franklin's orders and leave with a party down the Back River, hopefully finding civilization and rescue. This plan is stopped in it's tracks as he is collecting supplies
* Early on, "Darth" was implied to be some kind of noble rank. As the series evolved it simply became the title for all Sith Lords.
* Early on during the "Do You Want to Build a Snowman?" sequence/song which sets up the relationship between Anna and Elsa. Very sad and serious, but with Anna being adorably hilarious at the same time...
* Early on during the Russian Revolution the Red Army attempted this, as the bolsheviks believed notions of rank and discipline were a bourgeois affectation. After repeatedly getting their asses kicked by the more traditionally organized White forces, Trotsky reorganized the force including bringing in former imperial officers to make it a proper military force.
* : Early on, Ember reveals to Twilight and the others that as Dragon Lord, she spends a lot of time judging these. Due to her status, she can't really compete

herself, since it wouldn't be fair to the other dragons.
* Early on, Gordon Bombay trains the entire team to cheat, but Charlie Conway refuses to go along with it. This leads to a
* Early on, Group Captain Mandrake realizes there is no imminent Russian attack, and goes to tell General Ripper to call off his bombing mission. When Ripper challenges him on the facts, Mandrake counters:
* Early on, he actually reveals that he gets trashed in tennis every day. But he's playing his dad, who is like the strongest player in the world (unofficially).
* Early on, he was envisioned as an immaterial concept rather than a living being. Franchise co-creator Christian Faber based Makuta on his illness at the time, while Alastair Swinnerton thought of him as the force of destruction. Neither evil nor good, he was merely the other side of creation, essentially the act of taking apart LEGO models so they could be rebuilt into something else.
* Early on in "A Sombra Affair", Twilight panics that Sombra's going to kill everybody. Shining Armor claims that Sombra might
* Early on in his career, Hitler would get around both the law and this trope by making intentionally vague orders to be interpreted in the harshest way possible, mostly as a way of downplaying his involvement in some of the Nazi-associated paramilitary groups' more violent doings. You can bet that if he wanted some Social Democrat or Communist "taken care of", he meant that he wanted that person to be shanked, or worse.
* Early on in "Not All Megatrons", Megatron is ruminating on the Uprising, as he thinks about his old ant-droid farm. This is when he hits on the idea of severing proto-formers from their need for processed energon by taking on beast modes.
* Early on in part 1, Jess reunites with Leslie the night after five years of the latter being presumed dead, and Leslie ends up
* Early on in Season 2, The half-naked, bloodied, tied-to-a-chair Peter is awoken with a bucket of the wet stuff to the face by the Irish gangsters who are holding him captive.
* Early on in Season 5, Doc parts ways with Julius and Axel so that she can finally be reunited with Jolene and ride off into the sunset with her.
* Early on in the 2011 reboot things took a downward turn. The scarab is an
* Early on in the anime, Naruto fantasizes about becoming Hokage and beating
* Early on in the comic, the eponymous adventuring party skips two levels of a dungeon by taking the service stairwell.
* Early on in the first season, he hires some goons to attack and rob one of mob boss Maroni's restaurants, staging it to look like rival mobster Falcone is retaliating for an early offense, during which Cobblepot "saves" some of Maroni's money from being stolen. This not only increases tensions between the two mob bosses, but also allows Cobblepot to get himself further into Maroni's good graces.
* Early on in the game, if you talk to two girls at Shujin, they will remark about how Ann's best friend Shiho often meets with Kamoshida, her volleyball coach, for one-on-one sessions, and leaves feeling depressed. Rather than realize that Kamoshida is physically abusing Shiho
* Early on in their story, a Sith Warrior can intimidate criminals attempting to steal a package that you're trying to protect by screaming that you'll eat them. They'll decide that they'd rather not take the chance with someone crazy enough to make that threat and you can later clarify whether or not you were bluffing.
* Early on in the main series, Yasuko Fujita, a pro player, plays against and defeats Saki and Nodoka, then reveals that the best player on the team that won the prefectural tournament last year was able to defeat her.
* Early on in the movie, Chief tears the ear off of another dog while both dog packs fight over scraps. When one of the rival pack dogs remarks that Chief tore his ear off, the dog with the torn ear (named Igor) merely shrugs it off.
* Early on in the second series, Ash taught Pikachu to use the Steel-type move Iron Tail, giving it an edge against Rock- and Ground-types that were immune to its electric attacks.
* Early on in the series Hayate encountered Nagi naked a few times, since his reactions are quite un-perverted they trigger some insecurities in Nagi regarding

their 'relationship'. Nishizawa also had a similar moment in Greece. Even Aika, a minor character from the Student Council, got her clothes soaked while visiting and used it to manipulate Hayate into doing some embarrassing errands for her. Maria had about one moment when Hayate tripped on the carpet and landed face-first in her chest while attempting a joke for Sakuya (the actual "punchline" was Nagi beating the tar out of him since Maria didn't seem to react much).
* Early on in the series, however, the destruction of another major home world that brought about the fall of the Old Grand Empire of Arkon was treated as nothing more than a plot device.
* Early on in the story, Kratos has to throw his axe into the Lake of Nine in a cut-scene right after a boat-ride from the Witch's cave. Normally, when entering a boat, Kratos never recalls the axe, but when he enters the boat this time, he will recall the axe if he does not have it.
* early on in the strip, after royally screwing up his fetch modus and losing the beta in the process, despite there being no one around to have seen him.
* Early on in the strip, Roy throws Xykon into an Epic-level protective barrier. Just before he explodes, Xykon calmly states "Y'know, actually, this isn't that bad." Justified, like Richard's case, because he's an undead
* Early on in the third expansion, the infamous Goon Squad guild managed to kill
* Early on in the third story, Sara and Shulk end up breaking up because
* Early on in Upperdeck's Marvel/DC crossover card game using the "VS System", there was a card named Sadistic Choice, which was only usable by players using
* Early on, it is hypothesized that anyone killed in a Singularity is un-killed when the Singularity is resolved. Eventually you learn that the circumstances of their death are changed to something fitting the corrected history, but they're still dead.
* Early on, Izuku passes the written portion of the Entrance Exam with flying colours, with Power Loader describing his portfolio as impressive.
* Early on, John believed his father to work as a clown for a living aId that his whole life revolved around cl—
* Early on, Necromancer was a starting class with high Magic, though this was later abolished as well as the class system. A
* Early on Negi Springfield sort of had this attitude toward his students, although it's less sexism and more the fact that he believes it's his fault that they're in dangerous situations to begin with, which makes it his responsibility to protect them.
* Early on, one of the bad guys grumbles that thanks to Luna crashing their party, his mane's gotten burned, and he's going to have a time explaining
* Early on, Oolong shapeshifts into a pair of underwear and suggests that Bulma put him on; Bulma
* Early on, Satipo leaves Dr. Jones to die so he can escape the temple with the solid gold idol. Of course, he runs right into the spear trap they both avoided earlier.
* Early on, she cries on Rukia's shoulder after the deal with Acidwire
* Early on, shortly before the student council candidates' speeches, Sayaka greets Touko and Yuu.
* Early on, some of the heroes try to infiltrate a mansion with an array of gimmicky but mostly useless powers. When they come across a group of disco-themed villains guarding the mansion, they ridicule them for bringing pistols, junction pipes, switchblades, etc to the fight which have nothing to do with disco. A
* Early on, stations like KLIF in Dallas, Texas (though it was likely not the first Top 40 station) were looked upon as inspirations, with programmers and owners like Todd Storz, Rick Sklar (who helmed WABC, New York), Mike Joseph, and KLIF's Gordon McLendon hailed as geniuses.
* Early on, Stitches' full body is shown — and it's a mass of blood and guts, marking the quest's transition into horror.
* Early on, taking too long while chasing down Robert will cause the screen to go black and you're treated to the text "Robert got away".
* Early on the Baron calls out his son Gil for a foolish and risky move,

* Early on, the Cardassian Union is more often referred to as the Cardassian Empire, and they probably made the change because there are already enough Empires to go around. Retcon though it may be, I think it actually adds a touch of realism since such powers are often known by more than one name.
* Early on the franchise generally took the side of Stoicism, however as the franchise has gone on and.society has evolved and increasingly questioned stoicism the franchise has moved to reflect this.
* Early on, the Nazis advocated "Deutsche Physik" as an alternative to the physics mainstream. Led by advocates like Philipp Lenard, Rudolf Tomaschek, and Johannes Stark, it was popular among those who felt physics to be too dominated by Jews like
* Early on, the partners decide that Denny is beyond control and that the best way to get rid of him is to have him fail publicly and spectacularly in a high profile case. Brad Chase wants him gone as much as anyone, but he's disgusted by the intended means. He warns Denny, but Denny is convinced he
* Early on, the protagonist and Yosuke get stuck inside a dungeon, leaving Chie panicked and wondering what happened to the two. When they return several hours later, she's holding back tears and angrily ranting about how much they suck before storming off.
* Early on there's a bit of a rivalry between Starfleet and the Bajoran Militia, with Major Kira in particular not liking having to work for Commander Sisko. They warm up to each other. (The use of Army ranks for the Militia doesn't hurt the allusion.)
* Early on the rivalry between the Jungle Trolls and the Forsaken was played up, particularly in the
* Early on, the series did a few episodes based around sinister creatures who came to life through a combination of magic and memetic urban legend status. However, these
* Early on, the show's story editors found Waspinator's character problematic because his buzzing, drawn-out speaking pattern wasted precious screentime. Their solution was to
* Early on the title character used the identity of Walter Dorian until discovered by the police, with the issue "Diabolik, Who Are You?" eventually clarifying he survived a shipwreck as a child and taken in by criminals in the Far East, who never bothered to register him and didn't know where he came from. A later story then showed that Diabolik later found out of an
* Early on, Torg has this situation when he develops a crush on Val, who is revealed to be
* early onwards, though, his works take a completely new style, often violently clashing with the classic Commedia dell'Arte popular in Italy and France at the time.
* Early on, when Cass and her younger brother Flint wake up as an anthropomorphic goat and flying squirrel respectively.
* Early on, when Roronoa Zoro lost his duel with Dracule Mihawk, he made a point of turning to face Mihawk for the final blow.
* Early on when Rory breaks up with Dean, she immediately packs up everything that reminds her of him and asks Lorelai to get rid of it. However, Lorelai, knowing Rory will regret it later, secretly stashes the box away in her closet.
* Early on, when Roy is assaulted by a mind flayer, the other party members just stand there dumbfounded while Vaarsuvius rants furiously that they should be the one attacked, having the highest intelligence score.
* Early on, when Schlock helped the company reclaim the ship from food-service commandos.
* Early on, Willow got this role before basically passing it on to Anya. From "
* Early on, Zoot the shrew was so nearsighted that he didn't realize he was sharing the margins of
* Early on, Zorin decides to kill Bond by rolling his car into a lake, presumably to
* Early paleontologists believed that large dinosaurs lived in swamps, because they approach being too large to move under their own power without the buoyancy of

water. But
* Early PC CPUs were typically named something-86, after Intel's standard-setting 8086, which was followed by the 286, 386, and 486. While Intel stopped the trend officially with the first Pentiums, AMD and Cyrix continued the tradition for a while with "5x86" and "6x86" processors.
* Early promo material focused heavily on Noctis's girlfriend, Stella Nox Fleuret, who was hyped up as having a strong,
* Early promos for WHTZ New York (better known as "Z100") referred to "HTZ" as "the new way to spell 'hits'".
* Early prototypes of the Ford Pinto envisioned it as a highly safe car. However, the production version had many of the safety features removed.
* Early psychologists such as Sigmund Freud and Carl Jung believed that telepathy was an atropied sense in humans, based on the seeming mind-reading abilities of animals and what they thought were personal experience of telepathic dreams.
* Early reel Hector to step on the other side. He just goes straight up, and then straight back down.
* Early remote controls were mechanical and did have plastic buttons that clicked into place when you pressed them (hence the nickname "clicker"). In the earliest remotes (like the one linked), the clicking sound wasn't just a result of a mechanical button being moved, it's how they sent the signal to the T.V. Each button flicked a different time, setting it resonating (like a tuning fork), and the T.V. was able to detect this sound; different tones would trigger different functions. Naturally, there isn't a lot of bandwidth there, so these early remote controls did little more than adjust the volume, power, and sometimes change the channels. Said limited bandwidth could be sometimes problematic, with random noises (such as a toy xylophone's overtones) triggering the T.V., and the ultrasonic signals could be heard by (and annoy) some a la "The Mosquito". It was only later that televisions began to be signaled electrically, first by wired remote and later wireless (via infrared or radio-frequency).
* Early revisions of the script had the company named "Leland-Toyota", making it an even more literal version of the trope.
* Early Riser, being fat is considered a survival boost during the deadly winters, so characters partake in "gain weight quick" diets and exercise is perceived to be selfish and lazy.
* Early Riser is also slightly different in that it's titled "Jane Bond".
* Early Riser: The last few chapters take place as a blizzard sweeps into Sector 12, with temperatures at -40 degree Celsius and wind gusts that can lift a man off his feet. Multiple characters are forced to travel through the cold, both on foot and in large Sno-Trac vehicles. And while protagonist Charlie might be able to negotiate with trigger-happy Consul agents or scheming HiberTech security personnel, no one can negotiate with a blizzard.
* Early Riser: The perks of joining the Winter Consul, as listed off by senior Consulate officer Jack Logan during protagonist Charlie's interview for the position of Novice:
* Early seasons also have Buffy's friend Xander as the Gentleman and the vampire Angel as the Scoundrel.
* Early seasons had the words 'stroke' or 'stroking' used by humans as swear words (presumably a euphemism for masturbation).
* Early season six has an episode focusing on Bobby, with the brothers only appearing briefly.
* Early space-probe images of Miranda, one of the moons of Uranus, depicted such a patchwork of terrain that it's been theorized that this small moon was once shattered, then re-coalesced from its scattered pieces.
* Early stealth aircraft can very easily lose their stealthiness to the most mundane of things.
* Early strips (1955-1965, say) use Lucy telling these to Linus as a running joke, although those strips are rarely reprinted these days. An odd example given that Lucy actually believed these "facts" herself and it was Charlie Brown who had to try and protest them. An example is that leaves are actually flying south for the

winter when they fall (because south is down on a map).
* early strips did show him as a fairly talented (albeit eccentric) inventor, this has been gradually phased out as the comic focused entirely on office humor, giving readers little evidence of his over-qualifications. Averted greatly in the animated series, which routinely showed his mad-scientist level accomplishments.
* Early strips featured Calvin being part of a troop of Cub Scouts. Later strips however show Calvin as being someone who dislikes organized games, so Watterson abandoned the Scout strips. Although his personality was still the same — he really didn't work well with the Scouts and tried to avoid or lose them at every opportunity. It's easy to imagine he simply quit after it didn't work out (or more likely, got banned). Knowing Calvin's family, his dad probably urged him to try scouting as it "builds character."
* early strip showed Dogbert and Dilbert getting involved in a "pun war" about horses, which Dogbert eventually wins.
* early strip to a Diet Coke, but Belkar is a better example of this trope because the mind flayer compares him to a taco and thinks, "Too angry... I'd get heartburn."
* Early Sunday Morning into limericks, one book at a time. The third book goes as follows:
* Early T-34s could barely accommodate two men in its turret, leaving them cramped internally. The T-34M, which was under testing when Operation Barbarossa began, would have rectified this, but these new developments were hurriedly abandoned due to the necessity of cranking out as many tanks as possible before factories were overrun. The late T-34s armed with modified 85mm anti-aircraft gun managed to enlarge the turret but the turret design, like the Panther's, had shot traps that could make it vulnerable against guns that would otherwise fail to penetrate it. Armor protection, high for 1941, was inadequate against the guns of Panthers and Tigers, although it was still effective against smaller weapons at long ranges.
* Early T-34s were also borderline blind, a combination of not having a cupola, and terrible optics for both the Driver and Gunner, effectively blinding it, and further esclalating a problem of only being able to engage German tanks in close distances. Later models rectified some, but not all of the problems involving the T-34's visibility, with one tank commander straight-up referring to his T-34 with it's hatches sealed up as "deaf and blind".
* early. This distresses O'Neill, who had apparently ordered her to get a life.
* early-to-mid 2000s thanks to 26 standalone episodes in its second season (a few of which factored into the plot for Season 3).
* Early Total Nonstop Action featured cage dancers and a midget having sex in a trash can, making
* Early toys of Elan Sleazebaggano (the guy who tries to sell Obi-Wan death sticks in
* early trailer, Snowbell gives this little hum-ding after falling down the side of a skyscraper:
* Early versions of the game had what may be the most extreme version of this trope yet encountered, thanks to a bug. You could slaughter an entire village and steal everything not nailed down. But bounty hunters still come after you for your crimes, because they received a bounty from an avenging
* Early versions would have climaxed in Nick and Judy trying to foil an attack on a Gazelle concert.
* Early works of art, like the Bayeux Tapestry, depict warriors riding into battle on horses so small that the riders' feet appear to barely skim the ground. Some historians theorize that European horses were historically much smaller than they are today and that they were selectively bred to be larger and stronger as knights wore heavier and heavier suits of armor.
* Earmarking the money you donate so that it goes to a particular cause can lead to the more high-profile causes getting more attention at the expense of others. After the 2004 tsunami, charities started building McMansions in Indonesia in order to do
* earn any portion of happiness as long as he remains affiliated with SpongeBob and

Patrick.
* Earned in Blood. You can no longer run up to the tank and 'nade it right off the bat, as apparently the Germans decided to start locking their hatches shut. But if you have a Panzerfaust ready and hit it in the rear, the commander's hatch will open, allowing a grenade to be dropped in.
* earned just a Lannister political appointee. However, after the loss of his hand, he's no longer as competent a swordsman as he once was.
* Earnest Evans has the protagonist fighting windworms, skeletons flailing their pickaxes, ribcages, dagger-throwing scorpions, bats, spiders, things that are hard to identify, lava with fireballs and so on. And that's just normal enemies.
* Earnest Evans has this in its first level. Though, due to bad coding, it's possible to end up chasing the boulder that's meant for you.
* Earnest Shackleton's alleged advertisement for crew for his Antarctic expedition deliberately invokes this trope, to discourage all but
* Earnhardt's not alone here: Buddy Baker only won the Daytona 500 on his 18th try, while Darrell Waltrip only won it on his 17th try, and Bobby Allison, David Pearson and Michael Waltrip on their 15th tries.
* earn himself his soul back—you know, the very thing that was inflicted on Angel as a punishment
* earn. (How that comes out depends on the version; in the live-action version, she fails because Calypso's 'concubines' are actually his backup bodyguards, equipped with sub-machine guns.)
* earning craptons of gold very quickly, which logically pushes him towards carrying. However, he also possesses the unique ability to gave his team slotless Aghanim's Scepters. Combined with his powerful stun and reliable early game zoning from Acid Spray, there's nothing stopping Alchemist from playing support early on and then six-slotting himself after his team's carry gets farmed.
* Earning Forgiveness gets absolutely brutalized over the course of 3 days would be an understatement.
* Ear Notch: When an animal has a notch out of their ear, that's a sign that they've been through bad stuff and/or are tough or evil.
* earn their prestiges through their skill with the sword Maia is known as one of the strongest mercenaries in Eostia.
* Earn to Die 2: Exodus, the first armour upgrade for all three vehicles brings with it a circular saw mounted on the front. The police car adds a second one poking out of the bonnet like the world's most violent hood ornament, and the van has two small saws mounted on the front instead of one big one.
* Earn Your Bad Ending: A bad ending out of multiple endings that can only be seen if the player goes out of the way to achieve the requirements to watch it.
* Earn Your Bad Ending: A video game where it's more difficult to get the bad ending than the good ending.
* Earn Your Bad Ending requires a surprising amount of extra effort to reach.
* Earn Your Fun, unless they use the "discard" system to get a car that has the first 20 stages completed, and even then it's still at least 40 credits of grinding to do.
* Earn Your Happy Ending: After enduring hell, everything works out for you in the end.
* Earn Your Happy Ending, and 20 years of exile, angst, and heartsickness, to get home. This epic was held up as the prototype of comedy, which originally just meant any story with a happy ending.
* Earn Your Happy Ending end of the Twelfth Doctor's life, shortly before he regenerates).
* Earn Your Happy Ending - for when the Happy Ending comes after much darkness and angst
* Earn Your Happy Ending: Happy endings in survival horror are usually very tough to achieve, if at all.
* Earn Your Happy Ending: Some fairy tales require enormous effort for this.
* Earn Your Happy Ending: The character doesn't get their happy ending until after enduring a lot of suffering.

* Earn Your Happy Ending: We may have been through a lot, but all of that was worth it in the end! I'm so happy it ended on a high note!
* Earn Your Happy Ending: You will go through suffering, but in the end, you will be happy.
* Earn Your Title or epithet variety rather than inherited, as Honninscrave and Seadreamer are actually brothers.
* Earp actually never rose above Deputy Marshal in any place he served as lawman. In Tombstone, he wasn't even on the town payroll at the time of the famous Gunfight. His brother, Virgil, was acting City Marshal and temporarily deputized Wyatt and Doc Holliday. Wyatt did server as
* earpick. Again, this is something you use to remove earwax. Apparently, some people just like Digimon that much.
* Earpieces directly upload information into your mind (allowing for brainwashing).
* Earpoint is an old cat who can't remember Tailchaser's (admittedly unusual) name. He calls him "Tailchewer" then gives up on remembering his name.
* "Earrape" versions of just about any song or phrase with memetic connotation are quite popular, for those times when the original doesn't have enough emphasis. "Bass-boosted" versions fulfill the same role, and are practically the same barring some minor audio differences.
* Ears as Hair: An animal with elongated ears treats their ears as if they were hair, most commonly by wearing their ears in the style of a ponytail.
* Ears for Elves after she's wandered into the dark, dangerous forest without him.
* Ears for Elves, and almost Elon as well (his hair is a darker shade than his eyes). Kanryl fits this as well, with pale grey eyes and hair.
* Ears for Elves calls the rule by name and shows what Tanna and Luero would look like when gender-flipped.
* Ears for Elves doesn't make a big deal of it, but has yet to be seen wearing shoes/boots/moccasins. This is apparently something she has done since childhood.
* Ears for Elves fits this, possibly because he spends most of his time with animals.
* Ears for Elves for Tanna to protest/push him off/berate him. Therefore, there isn't a seiza but there would have been if he had stayed a moment longer.
* Ears for Elves has drawings of the artist and site maintainer dressing up. Well, more like one getting into the festive spirit and the other wondering what the point is...
* Ears for Elves isn't ever seen without animals of some kind, and ensures that others do not disturb any creatures.
* Ears for Elves, oh so much. Elon is cautious and methodical where Myari is impulsive and excitable.
* Ears for Elves on how she made a joke through exaggeration and her apparent humorous qualities, since Tanna missed the joke when it was made.
* Ears for Elves over a glowing basin, and it and similar orbs light up the whole chamber with mystical effects.
* Ears for Elves the window. It's strongly implied that Tanna and Rolan will enter through the window.
* Ears for Elves), though not on the head. She considers him stupid for wanting to apologise to a woman who is bigoted against him.
* Ears for Elves to be distracted when it's all so new to him, what with being a different culture and such...
* Earshot", Hogan feigns excitement at Percy's improved verbal skills. "I actually heard him complete a sentence," he tells Willow. "It had a clause and everything."
* Earshot", in which Buffy is temporarily telepathic and suddenly hears someone in the cafeteria think about killing everyone in the school. She's so shocked by this that she drops her lunch tray, and the whole cafeteria applauds her (while she, of course, goes into a mindless panic).
* Earshot" takes this a bit further, as the 'echo' comes from what Cordelia is thinking, before she speaks — while everyone else is thinking one thing and saying another, Cordelia thinks "I don't see what this has to do with me" then repeats that exact phrase out loud.

* ears on their heads), and see only in ultraviolet wavelengths with their pearly, pupilless eyes.
* Earth-10, a world where Superman landed in Nazi Germany, and grew up to become Overman. With the help of reverse-engineered Kryptonian technology — and, when he was old enough, Overman himself — the Nazis won
* Earth-10's Pre-Crisis analog, Earth-X, was a world where the Nazis won and the Freedom Fighters were
* Earth-13, home to a dark, magical Justice League called the League of Shadows, including
* Earth -14 counterpart Lamprey addresses Aquaman as Arthur Curry instead of his Atlantian name. In Atlantis, people opposed to Aquaman's rule would call him by his land name to imply that he's not Atlantian.
* Earth 14 (Janus): A planet with harsh winters and scorching summers. Spring is the only (barely) tolerable season. There is no moon and no magnetic fields. Initially appears lifeless, but one character insists that some human and animal life survives by migrating with the spring.
* Earth-15, a perfect world that was destroyed by Superboy-Prime. All that's left is a Cosmic Grail that was hidden in another world.
* Earth 16: It appears to be Earth stuck at the primordial stage with unceasing volcanic activity and radiation.
* Earth-16, with the children of the main DC universe's heroes and villains — Chris Kent as
* Earth-17, an Earth ravaged by atomic destruction. Humanity lives in domed cities, and the Atomic Knights of Justice are led by Adam Strange.
* Earth-17 before the Crisis was a world where all superheroes were created by the government, until Overman (that Earth's version of
* Earth-18, a Western-style world featuring the Justice Riders, who ride on
* Earth 18 (Preserve): A pristine world with no humans. Frequently treated as a resort place, provided the visitors clean up after themselves.
* Earth-18's status as a western world is taken to the extreme. Originally it was introduced in
* Earth (1930), Khoma Bilokin kills Vasyl at the crossroads, symbolizing the choice that Ukranian peasantry has to make, between collectivization and sharing the land between everyone (what Vasyl wants), and to resist change and selfishly hold on to private land (the Bilokin family won't give up their land to the collective).
* Earth-19, a world currently in the era of Edwardian England, home to the Bat Man, the Wonder Woman, the Accelerated Man, and the Shrinking Man. Bruce and Diana are based on
* Earth-19 is where Harrison "H.R." Wells is from. Apparently, that world has been invaded by another Earth at some point (the invasion was repelled at great cost), resulting in laws that punish attempts to travel to or from Earth-19 with death. The only ones allowed to travel this way are Collectors, whose job is to track down and capture violators. This world's Flash appears to be the Accelerated Man.
* Earth 1 (Arkan): A universe 35 years behind Earth 2 from a technological and historical viewpoint, although some areas of technology here are superior to Earth 2.
* Earth 2100, Lucy, has lived to be 91 years old and still in pretty good shape, while most of the world's population has died off from diseases and starvation.
* Earth 2150. All they add are new missions and a few new units. That's it.
* Earth 2150, but there's no reason why there should not have been more smaller empires.
* Earth 2150 Earth is sent hurling into the sun after massive nuclear explosion of thousands of nukes knock it of its orbit, forcing the UCS, Eurasian Dynasty, and Lunar Corporation to build their own spaceships to escape Earth.
* Earth2150: Eurasian Dynasty (Powerhouse), United Civilised States (Balanced), Lunar Corporation (Subversive).
* Earth 2150 expansion does indicate that a good number of people were left behind, though, and had to find alternative means of escape.
* Earth 2150 force heading to stop them. All this while the main forces of the

three powers are fighting tooth and nail to get the last remaining resources on Earth.
* Earth 2150 has lasers, which fire bright red beams that hit instantly. However, unlike a typical laser, it doesn't do any damage. Instead, it rapidly heats the target until the target's power plant or ammo stores explode. If the beam is interrupted, the target quickly cools down with no damage. Building are almost impossible to destroy with lasers, as stone has a higher melting point than metal.
* Earth 2150 suddenly has buildable knock-offs that are weaker than the original.
* Earth 2150 that can be mass-produced and they can increase their survival rate by sheltering in the faction-specific bunker.
* Earth 2150. The ED Gruz and the UCS Mammoth can both carry out tasks like digging trenches and tunnels, building bridges and walls, etc.
* Earth 2150, this is the ultimate goal of all three factions, on account of the imminent Earth-Shattering Kaboom. Throughout the campaigns, you not only have to complete missions to cripple your rivals, but stockpile your excess resources in order to build a colony ship to carry you to another world before the countdown expires.
* Earth 2150, while kinetic weapons and missiles pass right through them. The UCS superweapon is a giant plasma cannon with ballistic bolts guided by satellite.
* Earth 2160 Earthlike planet called Eden. The main characters are visibly surprised when they see a video from the surface, and some even suspect that it's actually old Earth footage.
* Earth 2160 has ED use the bolt version of the laser that does damage on impact.
* Earth 2160. It is implied that many others exist throughout the galaxy, given that the species that built them had been spread across at least three star systems and six planets.
* Earth 2160: This is how Lunar Corp builds their bases, with a Foundation module supporting living quarters, factories, defenses, resource storage, etc.
* Earth 2160 to clone and morph themselves, just like the ground forms.
* Earth 22 (Nirvana): A world with no animal life. Filled with plants that produce spores that trigger a narcotic effect. Used as a prison of sorts, since all people dumped here are permanently stuck in a drugged stupor. Taking someone out results in a lengthy withdrawal period.
* Earth-23, home of President Superman, where the world's greatest heroes are black (which can mean that they're black in the main DCU, as with Steel and Vixen; that a black holder of the legacy in the main DCU is Earth-23's primary holder, as seems to be the case with Green Lantern; that they're black versions of the hero, as with Superman; or that they're completely unique). The major exception is Batman.
* Earth 27 after Mack's involvement in the sex cult, NXIVM, came to light.
* Earth 27 finds Roy and Jason both drunk, wanting to see the Batmobile. She says that Oliver and Helena would be disappointed in both of them... when the later two enter, equally drunk.
* Earth 27, Kherans afflicted the Daemonites with one of these, leading to Daemonite scientist Arctus, who would be later known as Helspont, to look for a cure on Earth, with the intention of taking it over.
* Earth 27. Lampshaded in the "Oracle" Voxbox. Jason Todd wants Oracle to look up a pizza delivery boy's license plate because it's been 34 minutes and he hasn't gotten his calzone. Ironically there is no 30 minutes rule, but Jason just wants his calzone to be fresh.
* Earth 27. Literally called the Stinger, it reveals that not only did Fangirl survive the Bleed, but she has come upon a parallel earth where Batman and Wonder Woman have a daughter, and Lincoln March is not the Mayor of Gotham City. This thanks to the to a whole in the damaged walls that closes of Earth-27 from the other Earths.
* Earth 27, when people give ideas like renaming the "Birds of Prey" into "Girl Power".
* Earth 27, with so many immortal or ageless characters, like Amazons, sorcerers, and Kherans, it's not surprising that many of them no longer care about the gender

of their partners.
* Earth-2 and has been visited by various characters of Earth-1 and Earth-3 several times.
* Earth 2, a Superman clone named Brutaal, who identified himself as the original Superman but now working for Darkseid, begins destroying all the shrines and places of worship on Earth (including one whose sign read "SCIENTOL" with the rest being cut off by the panel), with the villain declaring all religions "fiction".
* Earth 2 climbs up the colossal Atom and pummels his face until he falls over. It doesn't keep him down for long, though.
* Earth 2 (Demos): Our world. One of the most technologically advanced known worlds. Nicknamed "Demos" for the prevalence of democracy.
* Earth 2 had the Terrians, humanoids with a complex and very alien psychology who traveled like sandworms through the soil of their (living, symbiotic) homeworld.
* Earth 2 has the Space Ark, which was funded by the most powerful and wealthy individuals of Earth so that they could escape in case of a planetary emergency such as a second Apokolips invasion. Too bad for them that Superman's clone stopped the ship and ripped it apart before they went too far.
* Earth 2 humanity has largely abandoned a hopelessly polluted Earth, and is in the process of colonizing Earth 2.
* Earth 2. It's implied several times in the series that the Terrians used to be much more like humans, and may even have had more conventional, industrial technology, before they evolved into a species of benevolent symbiotes. It's also implied that the Terrians are also not native to Earth 2 and are colonizing it as well.
* Earth 2, Jay Garrick finds himself drowning his sorrows in Buzz Beer after he just got dumped by his girlfriend Joan Williams (who in pre-New 52 DC Universe continuity was his wife) when Mercury came falling out of the sky, granting him the power of superspeed.
* Earth-2 Lionel did this to Lex, Tess, and Clark in his home universe, and tries it on Alexander when he makes his way to Earth-1.
* Earth 2, new superheroes began to appear; creating a new "Age of Wonders".
* Earth 2's final episode saw Devon Adair (Debrah Farentino) collapsing from an unknown illness and being put into cold-sleep until a cure could be developed. Meanwhile, Farentino was pregnant.
* Earth 2 the audience gets to see inside the cockpit of the starship that will take the colonists to their new home. It's a very modern glass cockpit with displays everywhere, but they are all heavy bulky CRTs.
* Earth 2, the engagement ring that Alan Scott meant to give to his boyfriend became a conduit for him to use the power of the Green as that world's Green Lantern after his boyfriend was killed in a train wreck.
* Earth 2, the new "trinity", Alan Scott, Jay Garrick and Kendra Saunders, were all put out of focus when new writer Tom Taylor came on board. He instead focused on the original trinity and their supporting cast.
* Earth 2: There's some disagreement on when it set in, but general consensus is that, by the time it ended, it was a mercy killing.
* Earth-2 Wells is noticeably more casual about his language, and is shown (in flashbacks) to be much more personable than his Earth-1 counterpart. His daughter, also a super-genius, uses standard idiomatic American English.
* Earth-2, where its conceit is "What if Clark Kent was raised by the Luthors instead of the Kents?"
* Earth-2, who claims that he lost his connection to the Speed Force after passing through the portal, but he has invaluable experience and takes over the mentor role. The new enemy is Zoom, who is obsessed with killing every other speedster in every world to be the only one. Eventually "Jay" was revealed to be Hunter Zolomon, a serial killer, and Zoom, their enemy.
* Earth 2 whose "reform" consists of a chip in his brain — when the chip malfunctions, he tries to kill everybody.
* Earth-31, a world ravaged by tsunamis and earthquakes, where modern pirates roam the seas. Captain Leatherwing and his crew of the Flying Fox act as a force for

good.
* Earth-37, a world based off the works of author Howard Chaykin, such as
* Earth-38, the show is ambiguous as to what the Music Meister is. Is he a metahuman? Maybe an alien? Is he magical? Or is he something else? The fact that he could escape a cell in the Pipeline, something no other metahuman is capable of, without anyone knowing and his powers are far more fantastical than what Barry or Kara usually deal with suggests he might not have been something they are used to. When asked if he's from another Earth, he gives a vague response that the heroes wouldn't understand where he came from.
* Earth-39, a world based off the works of artist Wally Wood, home to the
* Earth-3 Jay Garrick is the doppelganger of Barry Allen's father, Henry. Barry is visibly emotionally overcome trying to deal with someone who looks just like his recently murdered father. Jay later learns Barry's situation. He feels bad for Barry, but also reminds him that he is not Henry and wouldn't make a very good
* Earth-42, home to imp-like versions of the Justice League known as the Li'l Leaguers.
* Earth-44, the world of the Metal League, a fusion of the Justice League and the
* Earth-45, an Earth where Superman as a concept became perverted and corrupted by mass marketing and turned into the hyper-edgy Superdoomsday, whom later went on a homicidal rampage killing the Supermen of other Earths before being stopped by the Superman of Earth-0 in
* Earth 46: A technologically-advanced world, whose people have successfully resisted an inter-dimensional invasion. They practice
* Earth-48, the new home to Lady Quark and Lord Volt. A world bred as protectors of the Multiverse, where everyone is a superhero and every event is a Crossover.
* Earth 4 (Antik): A world stuck at the Classical stage of development with an "evolved" form of slavery (e.g. slaves can be richer than their owners and can rebel twice a year).
* Earth 5: Humans have a spring mating season and are at the 50s-60s level of development.
* Earth-65 counterpart goes a step farther as he was actually raised by the Hand after they killed his previous mentor, Stick.
* Earth-65 is the (cloned) descendant of his timeline's Captain America, and while he works for the good guys in S.H.I.E.L.D. as Cap's sidekick, his upbringing as a designer super-soldier didn't come with compassion or respect for human life.
* Earth-6's Pre-Crisis analog was a world where America lost the Revolutionary War and a royal family of superheroes protected the Earth. Its sole survivor was Lady Quark.
* Earth 717 continuity, Electro is gay, with his boyfriend Henry breaking up with him shortly before his transformation.
* Earth-8096. As their names in the titles implied, Wolverine, the Hulk and Thor were recurring figures among these works, with the former two's first encounter being depicted twice.
* Earth 8 (Firmament): A world dominated by the Catholic Church, stuck in
* Earth-8's Pre-Crisis analog was a world home to the heroes who debuted after the first Crisis. After
* Earth Abides as the single family that repopulates Northern California gradually loses the ability to count or write down anything since they are too busy learning how to live off the land with copper arrowheads made out of pennies.
* Earth Abides is full of dogs, so many that the main character is a little disturbed by their implications in this new "dog-eat-dog" world: "He had seen many dogs in the last two days, and he had tried to shut them out of his mind." The beginning of another chapter consists of a virtuoso meditation on how the disease that has wiped most humans off the face of the Earth has also fundamentally changed the dogs.
* Earth Abides: One character knows that the ruins of the cities and bridges were built by people called "the Americans". He then wonders if the land and skies were built by the older Americans depicted on coins.
* Earth Abides opens with a version of this, with protagonist Ish being bitten by a

snake in a remote part of the Sierra Nevada and becoming half-conscious with illness for several days. When he wakes up and gets back to civilisation he finds it... isn't... any more.
* Earth Abides who starts off with the intention of rebuilding civilization, but in his old age settles into comfort with the idea that, although technology has been set back to the Stone Age, the spirit of humanity lives on. The book also plays with this as the protagonist initially roams the US looking for survivors. On one hand, he finds a group fulfilling this trope living a reasonably comfortable life from looted goods in New York, but realizes they'll be doomed when the food runs out, or when winter comes. On the other, he meets a family of black semi-literate sharecroppers deep in the rural South, still growing their own vegetables and raising animals just as they did before the plague. Their descendants are probably doing just as well as (or even better than) Ish's tribe.
* Eartha Kitt in that she doesn't sing about riches, power, or triumphing over the hero, just everyday Jerkassery and slightly unwholesome behavior.
* Eartha Kitt where she guest-starred as an acrobat-contortionist used by the IMF to crawl through the vents of a foreign embassy.
* Eartha Kitt", which aired more than a year after her death in December 2008.
* Earth All Along that you can't "unexpectedly" reveal a planet to be Earth without the audience flashing back to Charlton Heston.
* Earth All Along: The desolated planet the story takes place on turns out to be Earth itself, not a fictional planet.
* Earth All Along: The ending reveals that the alien world was actually Earth.
* Earth All Along: The "Shaggy God Story" variant of this (where the end of a story turns out to be a variant, science-fiction or otherwise, of the beginning of Genesis from the Bible, complete with Adam and Eve or identical characters) became such an overused cliché in science fiction stories as early as the 1960s, that it became impossible to take it seriously.
* Earth All Along: Turns out that ruined planet you were on was actually Earth itself.
* Earth All Along: What was thought to be an alien planet turns out to really be Earth.
* Earth All Along when Lister recognized Mount Rushmore). At least until it "escapes" when a methane vent ignites and the Earth farts out of orbit.
* Earth All Along, where apes rule the Earth and the humans are enslaved.
* Earth Alliance: At the end of the first season President Santiago's ship explodes under mysterious circumstances. In the next couple seasons, considerable evidence that Vice President Clark was behind it is uncovered.
* Earth Alliance has the Interceptors, energy weapons with two uses: the first is to
* Earth Alliance, who are revealed during the series to have planet-killing ships in their fleet.
* Earth & Beyond after its servers were shut down revealed that this was not their true form, but one chosen specifically to play off humanities deepest primal fears and their technology was a perversion of human tech.
* Earth & Beyond, albeit in spaceships. In truth, they seem to be warriors first, monks second, which makes sense given that they are the Jenquai military.
* Earth & Beyond. All ships were equipped with thrusters for normal flight and warp drives for traveling around larger distances. Warping could be done in 2 methods; traveling by "autopilot" along a programmed course between navigation points, or "free warping" by pointing your ship in the direction you want to go and activating your warp drive. Using navigation points required only an initial energy drain on your reactor and then you could fly indefinitely until you reached your target, which did not have to be along a straight line. Free warping however pulled a constant drain on your reactor thereby limiting the distance you could travel, and there was no ability to turn while in free warp. Free warping was useful for making quick escapes from dangerous situations without opening your map to plot a course, and could be used to discover nav points that were too far from main routes for most sensors to detect.

* Earth & Beyond based maximum range on the type of weapon used, and from a real world physics stand point didn't make a whole lot of sense. Shortest range fell to projectile weapons with a range only a few times the ship's size, beam weapons claimed mid range being only slightly greater than projectiles, and missiles dominated with over twice the range of beams. If a Terran, the game's missile focused race, neglected their sensors it was possible to have a firing range greater than your ability to detect and target enemies.
* Earth & Beyond) because of our improper use of The Ancient Gates.
* Earth & Beyond. Earth is still called Earth, although humans who live on its surface (and those who owe allegiance to Earth) are called Terrans.
* Earth & Beyond. Humans are still called that, although the human race became divided during the initial colonization of the Solar System. Those who remained behind on Earth are called Terrans, those who settled Mars are called Progen, and those who colonized the moons of Jupiter are called Jenquai. By the events of the game, the terms refer to nation-states, not worlds of origin, as all three have colonized other star systems which remain under their rule.
* Earth & Beyond indicated that the insect-like appearance of them and their ships seen in game is not their true appearance. They took this form specifically to play off humanity's deepest primal fears.
* Earth & Beyond released after the game's cancellation revealed that this was not the V'rix true form, but rather one "constructed" specifically to trigger base human fears.
* Earth & Beyond, space - including the Solar System - is apparently full of various space-dwelling creatures. Admittedly, most are comparable in size to a single-man spacecraft, but a few are much larger.
* Earth & Beyond that the Ancient gates were actually a network, but when humans discovered them and started forcing them open without using their keys that they became locked onto a single destination. Had the game not been shut down this was presumably going to come out in game, as the story had a newly discovered unopened Ancient gate and its key introduced in its final patch.
* Earth & Beyond that was under construction near Cheron's Gate. This event was supposed to occur about 2-3 patches after where EA pulled all funding, and was going to have a full cinematic made.
* Earth & Beyond (with options of rolling on different axis), bonus points for being usable while in formation. If the formation leader did a barrel roll the entire formation would be forced to preform a giant arching circle through space around that barrel roll.
* Earth and..., a prequel trilogy following Jarra's summer before the main trilogy.
* Earth and Mars are no longer accessible via the Arches due to their environments becoming uninhabitable, with humanity spread out all over the galaxy along the "chain". The protagonists even witness Earth's Arch starting to collapse, its integrity no longer maintained by the Hypotheticals, although this takes place millions of years in the future.
* Earth and Sky, Applejack gets one when she's brooding after an argument with Soarin.
* Earth and Sky between Braeburn and Rainbow Dash isn't brought up again after chapter 34, where them getting together was left as a possibility in the future.
* Earth and Sky, Chrysalis is still on the loose, and has embarked on a scheme to replenish her strength by becoming a beloved foal actress.
* Earth and Sky: Despite having a rocket-powered flight harness that would allow them to easily outpace every other contestant in the Grand Pegalathon, the Flim-Flam brothers keep stopping to set up booby traps to delay everyone else, which usually only end up backfiring on them, not to mention increasingly angering the Princesses until they finally disqualify the brothers and order them arrested. Afterwards, they eventually admit that they let their egos and shortsightedness get the better of them and sabotaged themselves.
* Earth and Sky, Flim and Flam gladly accept a sentence of twenty years' hard labor.
* Earth and Sky; he didn't want them back then, but has since learned to enjoy the

concept of personal flight.
* Earth and Sky, he responds with "osculate-my-rump-onomy". "Osculate my rump" means "kiss my ass".
* Earth and Sky: If Diamond Tiara (who runs her husband Blueblood's airship company for him) hadn't downsized her staff, leading to Pipsqueak becoming unemployed, he wouldn't have been free to become Harmony Aeronautics test pony, meaning they wouldn't be in a position to threaten the company's business.
* Earth and Sky,) in Equestria, it's somewhat feasible that colors have distinct flavors that aren't tied to foods at all.
* Earth and Sky: In the first chapter, Pinkie's relief that her daughter Tootsie is safe is immediately replaced by anger that Tootsie left the house without telling anyone.
* Earth and Sky on prom night (a result of Diamond Tiara's cruel prank).
* Earth and Sky, Pinkie Pie is shown to have a craving for pickled peppers while pregnant with her second-born foal.
* Earth and Sky, Twilight first starts working on how to help non-pegasus ponies fly after her conversations with Pinkie and Pumpkin, but doesn't settle on the idea of using artificial wings until she sees Sweetie Belle wearing a pair as part of her Princess Celestia costume.
* Earth and Sky: Twilight Sparkle edges toward this when it comes to Spike.
* Earth and... something about it. They spend days fighting the fire together.
* Earth, and the entire Milky Way Galaxy for that matter, vanished from existence in the
* Earth and the Moon are sealed off by a cube-shaped force field after the humans fail the Space Cash Test.
* "Earth Angel" (1954) by The Penguins, a more sweet and romantic take on it:
* Earth, a planet who is almost physically unable to keep her nose out of everyone else's business
* Earth Aspect Dragon-Blooded are capable of this, as is anyone who uses the Earth Dragon or the Jade Mountain style of
* earthbenders and participate in the attempted invasion of the Fire Nation on the Day of Black Sun.
* Earthbenders are powerless if separated from earth, sand or stone, unless you can bend metal, like Toph. King Bumi on the other hand, can earthbend
* Earthbenders have an advantage when they have access to, well, earth, and the Fire Nation exploited this by creating a prison of an offshore rig made of metal which they could not bend.
* Earthbenders in general tend to be averse to footwear, beyond sole-less coverings for the top of their feet. All Earthbenders seem unperturbed by rough terrain and a large portion of their bending is based on stances and foot work to manipulate the earth.
* earthbends of the ring instead of the back, and hitting an opponent with a very long stream of water) turn out to be illegal moves.
* Earth-born angels. Earth-born angels are formed when someone sacrifices themselves to save someone without hope, causing the two to merge together. There are three Earth-born angels; the Angel of Fire, the Angel of Love and the Angel of Light. During the run of the
* Earth-born humans, however, are white more often than not. This is likely a result of the actors available in Vancouver.
* Earthborn humans tend to be atheist and at least one character remarks that "we don't believe in God on Earth in the 25th century". To which a Denali responds,
* Earthborn's Commander Shepard used to roll with the Tenth Street Reds. They dropped their flags after enlisting with the Systems Alliance when they turned 18.
* Earthbound 64, Itoi had mostly recovered from it, and the game's tone became suitably lighter.
* EarthBound, a few of the Happy-Happy Cultists do this when engaged. One of them gives you the curse "Don't go to heaven!"
* EarthBound after beating the boss of the area having the enemy that might drop it, is actually the only weapon which Poo can equip to advantage.

* EarthBound, after Pokey and his brother Picky arrive late at home, his father takes them both upstairs and a repeating smacking sound is heard. Afterward, when Ness talks to him, he says "I was really scolded by my father. Aa, my butt hurts." The American localization replaced the smacking sound with something more comical (though, from context, it's still obviously a hit) and Pokey replies with "My dad really got after me. He said I get no dessert for the rest of the decade..."
* EarthBound, and gain the appropriate PSI equivalent for it. For example, "generate a burst of steam" is the equivalent to PSI Fire Alpha for him.
* Earthbound and greatly backfired, which is speculated to have contributed to the game's low sales in the US (and indirectly why it wasn't exported to Europe at all).
* Earthbound and one item turns into something else (thus rendering it useless) after too much time passes. Fortunately, the player's guide (which was originally packaged with the game) eliminated most of the frustration by providing maps.
* EarthBound are totally submerged by it." So they're probably losing HP from having to hold their breath...
* EarthBound, a site that looks at changes made while bringing other games from Japan to English speaking regions, occasionally the other way around, and sometimes other combinations of "from" and "to" regions.
* Earthbound, as traveling back in time using the Phase Distorter would destroy organic bodies, so they're given robotic bodies to use for the journey.
* EarthBound at least before you beat Master Belch, it features zombie dogs, zombies, ghosts, a graveyard, coffins in an underground path leading to Grapefruit falls, and even a totally blatant Halloween enemy called the Trick or Trick kid.
* EarthBound: At one point, Ness tells Poo that he's free to "crash" at his house whenever he'd like. Poo asks why he'd want to do something like slam into his house, before Ness clears it up.
* EarthBound Beginnings also has people who have been kidnapped by aliens stuffed in tubes, making this a series-wide trope.
* EarthBound Beginnings and which don't even give enough EXP in order for the heroes to stand a chance against them. The reason for this is because deadlines were aproaching and the developers forewent any sort of playtesting for the area and left it unbalanced as a result.
* EarthBound Beginnings. But as soon as you first enter Magicant, the game gets a little better.
* EarthBound Beginnings created by Maria's lingering consciousness. With the song remembered, she can rest at last, and both she and Magicant disappear.
* EarthBound Beginnings for the party. It's also likely the reason why Ninten can "speak" to and understand certain animals.
* EarthBound Beginnings gave most enemy types multiple palette swaps, but had the decency to occasionally add subtle changes to their swapped sprites (a dog-collar on the wolf sprite to make a 'stray dog', rust marks on the robot sprite to make the 'scrapper'...)
* EarthBound Beginnings has your regular scorpions, as well as the more dangerous Bionic Scorps.
* EarthBound Beginnings in the English version (and subsequent Japanese versions) as well, with them losing the bullet holes riddling their chests and no longer having the blood-stained shirts they have in the original Famicom version of the game.
* EarthBound Beginnings — are this, with that game only seeing international release through the Virtual Console in 2015, twenty-six years after its initial Japan-only release.
* EarthBound Beginnings, Ninten and Ana dance together when they're alone in a healing house, after which Ana asks Ninten if he loves her. Due to technical limitations, the "dance" itself involves the two of them moving around the room using their walking sprites.
* EarthBound Beginnings, one NPC in Magicant has a spoon he wants someone to bend back into shape. Ninten does it with his PSI powers.
* EarthBound Beginnings plot, has a splash screen at the beginning depicting a

1950s American town being terrorized by flying saucers.
* EarthBound Beginnings songs, and even those didn't become a worldwide hit until well over a decade after they came out in Japan. One could likely blame this on the fact she had talent, but her solo career wasted it on attempted pop hits that didn't showcase that talent.
* Earthbound Beginnings, Starmen serve as Giygas' elite minions, and are usually among the final enemies faced in those respective games.
* EarthBound Beginnings, the first enemy you face is a possessed lamp.
* Earthbound Beginnings, the first of the 8 Melodies is a music box hidden in your sister's formerly possessed naked baby doll.
* Earthbound Beginnings The Jack of All Stats of that game, having both Ana's healing PSI (but not her attack PSI) and Teddy's physical might. Which just goes to show how relative this trope is.
* Earthbound Beginnings. There are a lot, but it's certainly more playable than some have made it out to be.
* EarthBound Beginnings, who was implied to have died in the original).
* EarthBound Beginnings, you can eat the Bread item to recover some HP. However, if you Use it instead, you get Crumbs, and by using Crumbs, you return to the spot you were in when you used the bread. Handy!
* EarthBound Beginnings, you start your adventure off fighting two possessed Lamps and a Baby Doll, and then you start to fight vehicles.
* Earthbound both have gratuitous mariachi slot machine men, Pincho, Pancho, and Tomas Jefferson. They are dressed up as both mariachis and slot machines. They let you play them as if they were slot machines.
* EarthBound came in an oversized box which included a player's guide, written and presented in the style of a travel guide with newspaper clippings.
* EarthBound comes with the official Player's Guide - which causes the box to be a lot larger than an average SNES game.
* EarthBound could qualify for this trope: Killer hippies, road signs, fire hydrants, paintings, cars, cups of coffee, goats, Salvador Dali clocks....
* EarthBound, despite the game itself not having much of that. Yeah, that's probably why the sales went badly.
* Earthbound does the same thing, only with the lead character collapsed on the ground instead.
* EarthBound due to laws in some places prohibiting stores from being open on Sundays unless they sell essential items. The easiest such essential item to obtain and sell is medicine, and so these drug stores become one-stop shopping in these towns for people who need (or really want) to buy something on a Sunday. Inversely, major department stores like Target and Walmart installed pharmacies into their locations so they could remain open too.
* EarthBound due to useless items like the Protractor and Ruler. Some NPCs don't say anything useful, but are there to add witty lines. Finally, there are plenty of food items that are usable, but impractical by the time you reach them. Sure, eating a hamburger in combat (effectively instantly, and with no chance of indigestion!) is funny, but PSI powers are generally far more practical.
* EarthBound. During one part of the game, you will need to defeat five moles, each of whom claims to be the third strongest of the moles.
* EarthBound fan hacked the game so that Lumine Hall would spell out a marriage proposal instead of Ness's stream-of-consciousness being projected onto the wall.
* EarthBound, giant robots, more mushrooms, more zombies, men's room signs, and to top it off, a walking statue with an obscene amount of HP.
* EarthBound, Giygas isn't even an anthropomorphic personification, he IS evil. Not just an evil being, but evil itself.
* EarthBound, Giygas' mind is destroyed from being inside the Devil's Machine. When you eventually fight him, Porky explains to you that he's the one running the show, deriding Giygas as an almighty idiot who is now trapped inside the machine before he shuts it down and reveals his true form.
* Earthbound had the material Zexonyte which was forged from meteoric metal, and is crucial to time travel.

* EarthBound has a black market weapons dealer that tends to hang around in alleys near or behind the drugstores where ordinary items are sold; mostly his wares are junk and bottle rockets, but later in the game he also sells bombs.
* EarthBound has absent minded Dr. Andonuts. When his son Jeff meets his father at his lab, Dr. Andonuts forgot that he even had a son.
* EarthBound has a creature called a Skelpion, which is basically a scorpion skeleton, which is weird because scorpions are invertebrates.
* EarthBound has a move in which it "[makes] something spin around!" What it is that's spinning will forever be a mystery. The something might just be whoever was affected by said attack, seeing as it renders the attack target unable to concentrate. (Read: Silence status ailment) Just a small theory though...
* EarthBound has destroyed the world in the future and that a boy named Ness would defeat him.
* Earthbound has Dungeon Man, a maze builder who opted to be literally turned into a giant walking dungeon.
* EarthBound has one area, the Lost Underworld, where everything is so huge that the characters' sprites shrink. This includes the enemies.
* EarthBound has Paula give a telepathic distress call to a sleeping Jeff when she and Ness get captured in Threed. She also gives these to a sleeping Ness shortly after he enters Twoson.
* Earthbound has the Cave Boy enemy, which, amusingly, is encountered just outside the prodigious Dr. Andonuts' Laboratory. One later sells goods inside the laboratory.
* EarthBound has the city of Moonside, which featured extremely bizarre enemies, including Abstract Art, which were literal living paintings.
* EarthBound has the "Happy-Happyists", a cult which wants to paint the world blue. They wear robes similar to the KKK's robes, but in blue. In the English-localized version, large pom-poms were added to the tip of their masks to further differentiate them from KKK outfits.
* Earthbound has this in the final Prayer cutscene of the Giygas battle.
* EarthBound has two remarkably terrifying scare chords: "Ambush!" when you are attacked by the zombies in the Threed hotel, and "Whoops!" immediately upon eating the Magic Cake. There are some fairly less frightening (but still shocking nonetheless) chords, namely "Whoa!" when something unexpected occurs in a cutscene (Pokey entering your house at the beginning of the game, Paula being kidnapped by the Dept. Store Spook, etc.) and the one you hear when an enemy touches you from behind and triggers the red swirl.
* EarthBound he has Magnet to replenish what he uses up when his involvement isn't necessary. It's a toss-up, really.
* EarthBound. He's capable of using laser guns, bombs and the like, and can turn various broken irons, antennas, harmonicas, and the like into powerful weapons and battle items overnight. And did we mention that he's only thirteen years old?
* Earthbound, if a party member leaves the group but was holding a key item in their inventory that will be needed before the party member returns, Tracy will call Ness and mention the item was placed into Escargo Express storage. And calling the Escargo Express phone number after her first call leads Tracy to specifically ask if the player is calling to obtain the certain item, meaning the player will not find themselves stuck at certain points or run the risk of calling, but forgetting what they wanted to get.
* EarthBound, if you play for more than two hours in one sitting, Ness's father will call to encourage him (or rather you, the player) to take a break from playing. The strange part is that this can occur before you get the Receiver Phone, the item that allows you to get (but not make) phone calls anywhere. Since this happens a few hours into the game, it's easy for you to get a call from Ness's father before Ness has a phone able to receive the call.
* EarthBound: In literally his first sentence to the main party, Jeff's father Dr. Andonuts blurts out that his son still wets the bed sometimes.
* EarthBound in videogame history, killing the boss frees all the captives with no discernable damage to the tubes, despite the fact that there's no apparent means of

egress whatsoever from the tubes.
* EarthBound is a swirling skull looking creature made out of red lines and the background behind It is black.
* Earthbound is both an excellent Low-Level Run and a terrible one. The first play area, Onett, turns out to be the biggest challenge in the game; defeating Frank and Frankystein is possible but difficult, but defeating Titanic Ant is virtually impossible without abusing savestates in an emulator, or leveling up once or twice to improve your chances. After that, it's relatively easy in terms of gameplay. However, purists will still find a challenge in attempting to dodge seemingly forced battles, including a miniboss fight. At its worst you'll find yourself scrambling for one pixel to avoid a fight.
* EarthBound : "...It hurts, ...it hurts... Ness, Ness, Ness, Ness, Ness..."
* EarthBound. Jeff's is only inferred from him being the son of Dr. Andonuts.
* EarthBound just for the sake of the infamously scary, trippy final boss battle against Gyigas.
* Earthbound Kraken. Made even worse in that the guide explicitly states how rare it is, and there only exist three of those Krakens in the area. An unsuspecting player might try in vain to obsessively reset the game, hoping in vain that one of these three Krakens drops the bat. Of course, it will never happen.
* EarthBound lampshades the aversion to the trope. They have bathrooms in the game, but they all are occupied or otherwise unusable. In the first bathroom you come to, walking towards the door will result in a cutscene where one guy rushes in ahead of you. Attempting to enter will make him say: "Occupied!"
* Earthbound lampshades the idea that spiders are particularly scary, as the spiders that you fight are called Arachnid!s and Arachnid!!!s.
* EarthBound liked this stuff (the entire franchise is specifically named after a Beatles song).
* EarthBound. Luckily for Ness, a time-travelling alien named Buzz Buzz found him first to protect him. Unfortunately, Buzz Buzz dies shortly afterward. In true Terminator fashion, it is this time-travel attack that kicks off the plot and sets Ness on the path to defeat Giygas. Happens in the endgame too: Giygas is launching his main assault in the past, so the heroes have to go there to fight him.
* EarthBound. Made better since originally the writer was originally trying to simply figure out the real lyrics. After hearing the writer gave up and typed what he heard, no matter how strange (e.i. "I believe in ramen sex").
* EarthBound, making it seem like a very different game once 2000 rolled around.
* EarthBound Master Belch can be defeated if you use Fly Honey to distract him; he'll waste turns to guzzle that mess down, leaving himself vulnerable to attack.
* Earthbound may heal using geysers found in the Lost Underworld. They shoot Ness and friends up into the air when used.
* Earthbound — Giygas looks like this when the Devil Machine is active. After that... it's a little hard to classify what he looks like, other than pure horror.
* EarthBound moment... and flips the switch on the robot's back. Success! If you use the power shield to bounce its missile back at the clumsy robot, you get to see the same scene twice.
* Earthbound, Monotoli describes Pokey like "such a nice boy, but a bit troubled". Seriously. It is not a wonder Pokey was able to exploit him.
* EarthBound: Ness is a rare Hero example, although it is just one of many.
* EarthBound, Ness is knocked unconscious after visiting the last Sanctuary, leading the player to explore Magicant, a surreal, idealized version of the game's world, populated with figures from Ness' life.
* EarthBound: "Ness, Ness..."
* Earthbound: Ness's special attack is named after his favorite thing (the player inputs the name.) When calling his mother to prevent homesickness, Ness's mom often mentions his favorite meal (also input by the player.)
* EarthBound of its game world, meaning revisiting any areas at all is entirely voluntary on the player's part.
* EarthBound of non-pharmaceutical items, like baseball bats, frying pans, and

broken equipment. Pretty much averted later on in the major cities, where there are large shopping malls which have individual shops with different specialties, of which drugstores with slightly more reasonable stock are a recurring component; obviously the malls still sell everything, but there's a reasonable reason for it this time.
* EarthBound, one NPC tells the following joke and despairs when Ness doesn't find it funny:
* EarthBound: Opening certain (yellowish) boxes in the game elicits a hilariously over-the-top reaction even if it's just a ruler or toothbrush or something:
* EarthBound outside of Japan. This lasted until it was announced to be officially re-released in English, even in countries that never got it for its original system. From then on, it's been treated very respectably, all things considered.
* EarthBound parodied this by giving the palette swaps goofy names — "Plain crocodile," (to suggest more varieties are to come) "Manly Fish's Brother," "Starman Deluxe," etc.
* EarthBound Paula's mother is in the middle of reading a book to a preschool class just as her daughter comes in to visit them:
* EarthBound plus one big attack, and Paula's elemental and status-effecting PSI.
* EarthBound series has more than a barrel full of monkeys factoring into the plot.
* EarthBound series having the main character Ness as a playable fighter.
* Earthbound she fails and the psychic energy explodes, leaving her charred.
* EarthBound so differently from before that he may as well be a totally different character.
* EarthBound's Paula who also starts out at level 1 when you get her and you have to travel through an area that has monsters that tend to one shot her. Although unlike Ana, she doesn't stay as that squishy and she isn't totally incompetent in physical damage as is the norm for this trope.
* EarthBound spend most of their time standing around being incompetent (when they're not corrupted by Giygas). However, after you defeat Frankie and the first My Sanctuary guardian in Onett, you're called into the chief of police's office, where they take turns attempting to inflict police brutality upon you before the chief himself attacks. Granted, it's implied that they're under Giygas' control.
* EarthBound's post-credits epilogue had Ness awakened by knocks at the front door, just like at the beginning of the game — but it's Picky at the door and not Porky, there to tell Ness that he has a note from his brother, proclaiming "Come and get me, loser!"
* EarthBound (such as the endgame Nuclear Reactor Robots), which are often just as effective when Poo is using their powers for you instead of against you.
* EarthBound, such as the Territorial Oak and the Smilin' Sphere, will explode on defeat. This almost always does "mortal damage" to the player—but due to the way the game's HP works (it drains out at a steady rate, rather than all at once), the player can usually escape the battle with only an extra chunk of HP lost. However, an ally at low health may very well die to them... and if the entire party is knocked out all at once by one of these attacks, it actually triggers a glitch.
* EarthBound sucks except the smiling orbs (but those are still pretty bad). They all hurt when you fight them, so you can either kill them last and have them hurt your party, or kill them first and suffer the explosion. The worst offender is the robots that heal HP. So now you really have to decide which one to kill first.
* EarthBound takes place. So we KNOW about the Holocaust, it's just the inferred part is who died because of it.
* EarthBound that can make anything from a Slime Generator from a broken iron to a Gaia Beam from a broken antenna.
* EarthBound, that never appears anywhere in the final game. Strangely, it's present in the Game Boy Advance remake as well, though still unused.
* EarthBound that the static, snow, and final cutout has a similar effect. Also, the static is blood red.
* EarthBound, the Beatles references never end: the Runaway Five, a yellow submarine, a set of default names for Ness & co. (in the Japanese version), when Nessie takes Jeff across the lake, the musical score is very obviously the

opening mellotron from Strawberry Fields Forever. Also, one of the NPC's in Onett will ask you to "Finish this famous Beatles song —-terday" with a yes or no prompt.
* EarthBound: The Chosen Four has the heroes going through one of these by the Plague Rat of Doom, Ness and Paula have a falling out, Jeff and Poo argue with each other.
* EarthBound: The Meteor that starts off the adventure by bringing Buzz Buzz to Onett is used much, much later to gain the material used to go back in time to defeat Giygas.
* EarthBound The MOTHER series in general has a habit of making jokes that only make sense in the context of a JRPG.
* EarthBound, the protagonist is visited by a bee (or not) from the future that starts up the plot of the game, is unceremoniously killed off moments later, and doesn't appear again until the credits.
* EarthBound there are several items you that have a 1/128 chance of being dropped by a specific enemy. The most annoying to get is probably the Gutsy Bat. It is only dropped by a very powerful, rare enemy on the last screen of the game. Plus, even if you get it, chances are that Ness's Offense will already be at max!
* Earthbound, there's an NPC in the Twoson hotel who will pay you to leave him alone if you talk to him enough.
* EarthBound, the sea captain who is ferrying the group to Scaraba exclaims that he thought that the foursome were just a group of kids upon them defeating the Kraken.
* EarthBound, The segment with Poo in Dalaam is basically one long string of these. To advance the plot, you need to complete your training atop of Mt. Mu, and are reminded of the importance of nothingness. To succeed, you need to do nothing and let everything happen to you, starting with ignoring a messenger from home pleading for your return, and ending with losing your arms, legs, ears and eyes to a spirit. You get better, but still...
* EarthBound, the Threed hotel briefly becomes one of these when it is overrun by zombies.
* Earthbound". This allows Jeff to unlock all of the lockers to gather supplies for his journey to find Ness and Paula. Said machine comes in handy to unlocking their cell door in Threed.
* EarthBound, to an extent. The Starmen (technically not robots but aliens) speak for the most part in normal English peppered with onomatopoeic machine sounds such as *whirr* and *click*. This is an invention of the localization, however; the original Japanese release differentiated the Starmen's robospeak by writing their dialogue entirely in katakana.
* Earthbound uses Guns as primary weapons, and instead of having PSI attacks like the other party members, he is the only one able to use some kinds of items, like rockets. Also, he is able to fix broken items.
* EarthBound Virtual Console release. The blood visible on the Mondo Mole/Guardian Digger and Plague Rat of Doom's sprites appear to be the primary culprit. Oddly, the ESRB had earlier rated a prospective Wii VC release E.
* Earthbound when a player names a character is actually a recording of creator Shigesato Itoi. He was recorded without his knowledge while speaking to one of the game's sound designers.
* Earthbound, when you choose to end the game, all the characters on-screen face to the camera, and repeat walking animations for a while before the credit rolls.
* EarthBound which feature countless billboards lampshading almost every known dungeon cliché, including the overdose on billboards itself.
* EarthBound, which you can only survive if you have enough HP left for the rolling health meter to stop before you leave the battle screen. Did we mention that your maximum HP at the point where you start to encounter them is likely to be in the ballpark of 150?
* EarthBound, whoever is the current party leader (which varies between chapters) won't utter a peep, but will promptly start speaking once the leader role changes. However, NPC's do imply your character saying things, such as a Cultist saying to Ness "What? You're saying I can only stand in one spot? That's not true, see?"

* EarthBound, whose game actually was set and made in the Eighties; most other characters' attire is also quite Eighties-like.
* EarthBound, with Fourside being a New York-like place. Foggyland (the area where Winters is) is Britain. The city of Summers appears to be a generic Southern-European resort, possibly Spain; Dalaam is Asia; Scaraba is obviously Egypt; and Deep Darkness appears to be Africa.
* Earthbound Zero/Mother. Unable to cope with his emotion, Giygas flees the planet.
* Earthboy Jacobus, the titular hero arrives on Earth in the mouth of a Space Whale.
* Earth Cargo Service against the early Starfleet. In the episode "Horizon", Ensign Travis Mayweather is berated by his brother about how recruits would rather join Starfleet than ECS.
* EarthCent Ambassador. Author E.M. Foner originally wrote it while taking a break from a more conventional sci-fi series, but its unexpected popularity on Kindle led to him getting bombarded with requests for sequels.
* EarthCent Ambassador ebooks, but EarthCent itself doesn't have much actual power over humans in general or Earth's nations in particular: it's initially little more than a formality imposed by the Stryx in exchange for FTL drive. Kelly's diplomatic exploits start to expand its influence over the course of the series.
* EarthCent Ambassador: Joe has a sideline in homebrewing and his products are served at a number of bars on Union Station. It evidently dates back to his mercenary days, since he's able to barter permission to land at a merc encampment when he offers several kegs to an old war buddy.
* EarthCent Ambassador moments, such as them running a dating service and pairing Assistant Consul Kelly Frank with an alien trying to do business with a group of Earth schoolchildren who don't actually have the legitimate authority to negotiate with him.
* EarthCent Ambassador). There's a plot thread in the first book of Kelly trying to crack down on subpar counterfeits that are giving legitimate vendors a bad name.
* EarthCent Ambassador The stryx uplift the humans because they had a global economical crisis and they were about to be conquered by another Alien race.
* EarthCent Ambassador: This trope is discussed by the Earthcents ambassadors in a reunion when they notice the presence of several planet-sized creatures in the Galactic maps. Someone suggest going there to check what's really in there, but they change idea when Libby tells them that the Stryx didn't put those creatures there for decoration, there really are planet-sized creatures in those places and they don't like anybody bothering them in their territories.
* EarthCent Ambassador (which surprises the hell out of the human players, for who it really is just a video game).
* Earth-chan of the Earth, who keeps complaining that people are calling her flat. The whole thing started as a jab at Flat-Earthers.
* Earth Children Are Weird as children, even though they met as adults in canon.
* Earth Children Are Weird. Young Mulder thinks a deep hole in the ground is a giant footprint, but Young Scully reveals that it's just a hole people are digging to build a swimming pool.
* Earth-C-Minus, the home of the Justa Lotta Animals, is shown to still exist as of
* EarthCore survive on the surface if necessary, but they can't live there full-time.
* Earthcrafters and firecrafters are able to affect the emotions of other people, the former by outright arousing them sexually. The fact that most "entertainers" are well practiced earthcrafters becomes a plot point.
* Earth Dawn 1st edition lists a creature called Wormskull that is just that — a humanoid creature with a mass of worms as its head (a wormskull's body can look different, however, and is usually heavily armoured).
* Earthdawn, and his beliefs and practices are a strong part of why slavery flourishes in that country.
* Earthdawn, bards have a talent called "Graceful Exit". It even gives them a head start!

* Earthdawn begins in 2012, with the return of dragons, magic, and the old races.
* Earthdawn Companion. Using the Swordmaster 13th Circle ability Keen Blade on a weapon requires the use of blood magic and the loss of two Damage Points. The user regains the two lost Damage Points a year and a day after the weapon leaves their possession.
* Earthdawn due to the Questor for Garlan "Seal Home" power. Garlan grants her questors the power to seal a certain number of windows and doors and keep out any intruders using her magic. Given that, an enemy going up against a sufficiently powerful Questor for Garlan can be better off trying to break through "those flimsy stone walls" rather than a door that has Garlan's power keeping it closed.
* Earthdawn Gamemaster Pack, "Gamemastering Earthdawn" booklet. All Blood Oaths last for a year and a day or until cancelled, whichever comes first. Once they end, they can be extended for another year and a day. All permanent damage caused by such oaths (including by violating them) can only be healed after a year and a day.
* Earthdawn has a couple of minor magic items, including magic cannons, self-heating magic pots or lighting crystals.
* Earthdawn. Having a high Charisma is essential for each of the following.
* Earthdawn. Horrors have the innate ability to place a Horror Mark on Namegivers. The Horror can use the mark to track the victim and even use other Horror abilities on them through it. Anyone with a Horror Mark on them is justifiably considered undesirable (to say the least) by other Namegivers and is usually sent away for everyone's good.
* Earthdawn If the roll in question is a damage roll, it becomes this trope.
* Earthdawn implies the Minoan Eruption hypothesis as Thera in the Fourth World (roughly 8,000-3,000 B.C.) is the capital of an empire spanning Europe, Asia, and North Africa built on airships, blood magic, and slaves, lots of slaves.
* Earth Dawn is unique in that humans are mysterious nomads, of which the other races are wary. Their racial powers are nearly nonexistent, save for their ability to crib abilities from other classes.
* Earthdawn return to Earth from astral space to torment and ravage its living creatures every few thousand years.
* Earthdawn something went wrong with the mechanism designed to tell the occupants it was time to leave, and the kaer's residents are slowly dying out in their needless confinement.
* Earthdawn, sort of: whenever a mage (or windling) uses his astral sight in a place where horror dwells, he takes damage.
* Earthdawn. The Circle 8 Wizard spell Compression Bubble forms around an opponent and contracts, causing damage to the opponent.
* Earthdawn. The entire population of the Earth had to hide from an interdimensional invasion. Most of them constructed and found refuge in kaers, magically protected underground cities. The dwarves of Throal actually hollowed out a mountain and used it as their kaer.
* Earthdawn, the primary adversaries in Earthdawn, will soon return to destroy the world. The ties were much stronger when FASA was producing both games, and were downplayed after FASA folded.
* Earthdawn. The Show Armor Flaw talent causes flaws in a target's armor to glow so that opponents can attack the weak spot(s) with a better chance of inflicting an Armor-Defeating hit.
* Earthdawn. The Theran Empire designated some of its slaves as "Pleasure Slaves".
* Earthdawn) to coerce total obedience in their humanoid Mooks and Moles.
* Earthdawn. When a Beastmaster uses the Animal Possession talent to put their spirit in the body of an animal, their own body falls into a coma until they return. During that time, their body can be damaged normally. If their body is killed while they're away, their spirit dies too.
* Earthdawn Wizards have a 5th circle spell called "Counterspell" which allows them to raise the magic defense of a target to ridiculous levels.
* Earth day. Ba'al just rolls his eyes and terminates the transmission.
* Earth Defense Force 2017. Amusingly, they were dubbed Ravagers before their penchance for ravaging became apparent.

* Earth Defense Force 2017/Global Defence Force, included a bunch of new missions and weapons, and tied it all together with online cooperative multiplayer and versus.
* Earth Defense Force 2025: The game and the first DLC make extensive use of larger palette swapped elite enemies.
* Earth Defense Force 2025, we have the Wing Divers and Fencers. Wing Divers are women with equipment that allows them to fly around and blasts those bugs to paste. Lancers are more in line with this trope as they wear powerful armor, don massive weaponry and other equipment to protect and/or destroy.
* Earth Defense Force 5 goes out of its way to not describe the aliens as exactly what they look like. That's not a giant ant, that's "Aggressive Alien Species Alpha".
* Earth Defense Force 5: Like in previous titles a number of enemies appear to be a variety of giant mindless bugs rampaging around the area.
* Earth Defense Force 5 starts. Specifically: the Ranger was working security, the Wing Diver was a stuntwoman, the Air Raider was a mechanic and traffic director, and the Fencer was a freight handler.
* Earth Defense Force 5 the 150 foot Baraga, a mech built to function as a construction crane, is utilized as a weapon of war to defeat a large group of Archelus and Erginus.
* Earth Defense Force 5: The aliens have a new trick up their sleeve in this version. They have "drop pylons" that teleport in enemies like they did from the original drop ships in previous titles. The player can even see the pylons coming into lodge into the ground like giant spears riding in on balls of fire presumably from orbit.
* Earth Defense Force 5: The large alien mother ship encountered early on and its smaller laser firing attack drones are all flying saucers.
* Earth Defense Force 5: The player finds themselves fighting giant bipedal alien frogs and Grey aliens in armored suits both armed with energy weapons and accompanied by the hordes of giant bugs.
* Earth Defense Force 5: The Wing Diver or in Japan versions of the game, Pale Wing unit. They are all female units that have energy powered jump packs capable of flight and wield powerful energy weapons. The Wing Divers are also typically considered an elite unit and key to defeating the giant bug invaders.
* Earth Defense Force formula to another genre of game is obvious enough.
* Earth Defense Force games does most of its damage as a spotter for artillery and aircraft stationed off-screen, calling in strikes by throwing out beacons or smoke grenades. They can also equip a laser to paint targets for missiles, either launched off-screen or carried by allies. In fact, certain missiles used by the Fencer class cannot be fired without guidance from an Air Raider.
* Earth Defense Force games lets you carry over your stats and weapons you got from clearing the game, and you might need that if you plan on getting the stronger weapons on the hard difficulty.
* Earth Defense Force, in particular, centers around wiping out massive insectoids.
* Earth Defense Force: Insect Armageddon series, made many improvements to the controls, graphics, and framerate. They also hired top-tier voice talent like Steve Blum and Cam Clarke. Many fans disliked the changes, as they came at the cost of the cheesy B-movie absurdity and shoddy production values that gave the series its cult status.
* Earth Defense Force: In the fifth installment, players fight giant frog men armed with large energy weapons.
* Earth Defense Force: Iron Rain introduces the Kindred Rebellion, who will fight you and the EDF as much as the giant insects are trying to kill and eat the both of you.
* Earth Defense Force: Iron Rain — comes with waist-mounted grappling hooks to propel the player through the air.
* Earth Defense Force: The common theme throughout all the games series is that the alien invaders appear and suddenly attack Earth unprovoked.
* Earth Defense Force: The common theme throughout all the games series is that the

Ravagers appear and suddenly attack earth unprovoked in an attempt to wipe out or destroy humans and their cities.
* Earth Defense Force: The series has giant spiders aplenty that leap around shoot web that entangles and hurts players and their NPC allies.
* Earth Defense Force: Through out the various games in the series the alien invaders use ships to deliver the various enemies to the battlefield.
* Earth Defense Force: Throughout the various titles in the series players have gotten access to personal missile launching weapons, missile armed vehicles, and even mechs armed with missile launchers that shoot out a spray of multiple homing projectiles all in one go.
* Earthdome, the seat of government for the Earth Alliance, gives off this vibe.
* Earth Drift: A setting becomes less similar to real life Earth than it was at the start.
* Earth Drift named Hyperman) being a comic-book character was a key plot point.
* Earth Drift: Story employing real-life concepts starts diverging from those as it progresses.
* Earth Elementalists are the extreme however. They have an armor spell that alone adds more armor than a Warrior has, Ward Against Melee, which causes 50% of enemy melee attacks in an area whiff, Ward Against Elements, which provides a healthy bonus against elemental attacks, and Eruption, which blinds (90% miss chance) enemies in an area for up to 15 seconds. With the addition of other spells, an Earth Elementalist can prevent huge amounts of damage to himself and his party.
* Earth elementals dangerous (simply waking it up causes earthquakes powerful enough to send tsunamis three miles inland on every coast in Creation).
* Earth els directly absorb earth to grow from everyday to combat forms.
* Earthens. Otherwise, humans from Earth go by the Goa'uld name Tau'ri to distinguish from other humans. It is implied that this name was used for the planet as well, but as both names were assigned by the Goa'uld on discovery, this doesn't quite count.
* Earth Eternal — humans have blasted themselves into oblivion with nuclear war, the ruins of our civilizations have long fallen to ruin, the radiation has been cleaned up, and the Beasts have reclaimed the world. But the Eiffel Tower is still intact, somehow.
* Earth Eternal. Sadly, the actual game only has 12 PC races, presumably still with no mechanical distinction.
* Earth Eternal the multitude of races, including demons, yetis, cyclopes, and robots, are different in much the same ways humans are. However, all of them, even those that look like birds or reptiles, are actually mammals created by the gods, and closer related to each other (and humans) than the species they resemble.
* Earth Federation (who can somehow accurately predict possible futures using an advanced form of intuition) requested that no warships be present at negotiations.
* Earth: Final Conflict actually having more advanced weapons technology than Prime!Earth. Despite this, the Taelons are clearly winning. In the Prime universe, the Taelons come to Earth bearing gifts and claiming to seek peacefull cooperation. Their true motives remain hidden. The key point appears to be the arrival of an ancient Taelon named Ma'el to Earth in the Prime universe, which he never did in the alternate one. Ma'el, apparently, encouraged humans to urbanize and form centralized civilizations in order to resist the arrival of Taelons in the future. The alternate humans live in villages with the closest equivalent of cities being trading centers.
* Earth: Final Conflict, a human scientist develops teleportation (something even the Taelons haven't been able to achieve, although they do have interdimentional portals that have a similar effect) and uses it to teleport poisons and bombs into people and Taelons. In the end, he destroys the teleporter and leaves no plans behind.
* Earth: Final Conflict, and ship remains in orbit for duration of the series. Unlike many examples on this page, the Taelons came in peace.
* Earth: Final Conflict are millipede-looking creatures genetically engineered by the Taelons. They burrow into their host's forearm where they feed off the body's

energy. In exchange, the Skrill allows the hosts to fire powerful energy blasts.
* Earth: Final Conflict are piloted using a gesture based system, including a bow-and-arrow like move for firing the weapons. Similarly...
* Earth: Final Conflict. A series of gestures replaces the complex switch flipping of modern fighter craft cockpits, and gives the pilot complete control over every aspect of the ship.
* Earth: Final Conflict called the Kimera came and fixed their genome (as their way of saying thanks, the Taelons exterminated the Kimera). A branch of the original vampiric Atavus lived on Earth hundreds of thousands of years ago and seemed that way to the primitive humans, until a meteor shower forced them into slumber. Prior to that, their leader Howlyn used the DNA of a dead time-traveling monk to "upgrade" the primitive hominids to the more "modern" man.
* Earth: Final Conflict, cannot be harmed by physical objects. As a demonstration, Zo'or lets a woman put a finger through his forehead, although he can obviously be seen reacting to this. This doesn't stop them from interacting with the world and people as a solid being would. The Atavus (ancestors to Taelons and energy vampires) in Season 5 are immune not only to bullets but also low-power energy weapons. It takes Renee a number of shots from her energy pistol to take one down.
* Earth: Final Conflict, cause by the presence of her double Isabel. They are told that they must "merge" into one in order to survive. This world's Lili also discovers that her missing father had another family, and that Isabel is her half-sister. When Isabel and Maiya come close, they merge into one body, but, unfortunately, Isabel's personality is gone, leaving only Maiya.
* Earth: Final Conflict come from Jaridia, although it may not be their original homeworld, given that they used to be the same species as the Taelons. After the split, the Taelons settled another world in the Q'ruu'faa system of the Ma'hu'ra'va galaxy, calling it Taelon. This makes it the reverse case. This was the Taelon homeworld for hundreds of millions of years. According to the final season, the original Atavus homeworld is still out there, while Jaridia was off-handedly mentioned to have imploded, for some reason. Since the Atavus are the progenitors of both Jaridians and Taelons, it can be counted as their homeworld as well.
* Earth: Final Conflict counts, though not all the Taelons were equally benevolent. Also a case of a relatively benevolent alien conqueror trying to protect Earth from a far less benevolent would-be conqueror. According to the Jaridians, they'd have no problem with humans if we kicked the Taelons out before they entrenched themselves in human society. They actually sent a warning message to Earth before the Taelon arrival, but the Taelons intercepted and blocked it.
* Earth: Final Conflict episode "Bliss" introduces the titular drug, which is highly addictive. Though Bliss is delivered into the body through Taelon-engineered orbs, the drug itself is derived from a plant native to Earth and not created by Taelon technology.
* Earth: Final Conflict episode "Motherlode", a criminal attempts to steal 3 trillion dollars in gold from the Taelon mothership.
* Earth: Final Conflict episode "Motherlode" two characters used this type of mask to impersonates two Taelons as part of a heist, with the goal of stealing 3 trillion dollars in gold from the Taelon mothership.
* Earth: Final Conflict has a Global, a cellphone-sized device with an ejectable touchscreen that allows face-to-face video chats. It is also a GPS and has several other functions. Pretty much a modern smartphone.
* Earth: Final Conflict, he sends a message to Sandoval, which confuses the latter to no end, as he knows thanks to the tracking chip that Liam is nowhere near that location. He later questions the real Liam, who has no memories of these events, before dismissing the matter.
* Earth: Final Conflict in almost all major cities allowed global travel in seconds.
* Earth: Final Conflict included a gizmo which somehow turned all the nerves in your body into pain receptors. Just what was going to process these pain signals was not discussed.
* Earth: Final Conflict in this 'verse, Jason (Ronald Sandoval's double) is killed.

However, his girlfriend travels with Liam and Augur back to the prime universe and, eventually, meets her double. However, both start suffering the effects of two of them occupying the same universe. Eventually, they merge, but only the one from the alternate universe survives.
* Earth: Final Conflict introduces a parasitic worm that burrows into the body of its host, making them completely unafraid of everything, up to and including death. However, after an hour, the parasite will kill the host.
* Earth: Final Conflict is a living being which lives on the same energy as the Taelons themselves.
* Earth: Final Conflict, it is possible this was intentional. Liam is also perfectly mature, although certain social facts (such as why women laugh when talking about sex) don't make sense to him.
* Earth: Final Conflict, it's originally stated that the Taelons learned English because their own language is virtually impossible for humans to master. However, this doesn't explain why they continue speaking English among themselves. Later on, they don't even bother explaining how the Jaridians or the Atavus know English and why they speak it among themselves, especially since the Atavus have been in stasis for hundreds of thousands of years.
* Earth: Final Conflict, Liam is capture and confronted by the real Liam Kincaid, whose identity he has taken. Apparently, the real Liam is in black ops, which is why he hasn't been seen. At the end of the episode, he tells his impostor to do right by his name.
* Earth: Final Conflict. Liam Kincaid is the result of three biological parents: two human parents and one alien. Agent Sandoval, Agent Beckett and Ha'Gel, who was possessing Sandoval.
* Earth: Final Conflict loves his son Zo'or, even after his repeated attempts on his life, and has even covered up for him a couple of times.
* Earth: Final Conflict members in this 'verse are killed (including Sandoval's double Jason, who is the leader), but Liam and Augur (along with Jason's girlfriend) manage to escape. Only a few episodes mention the other universe, but it is quickly forgotten.
* Earth: Final Conflict occasionally mentions the SI War that ended just prior to the arrival of the Taelons, where the SI stands for "Sino-Indian", though the US was also involved in some capacity. Not many details are revealed, but no nukes were used, which is amazing, since both China and India have them. The first protagonist fought in the war, and the second one took on the identity of someone else who did. Several other characters were also involved in various capacities. Apparently, the war ended when someone employed a new WMD called the Quantum Vortex (some suggest it was the Taelons), which killed 100,000 people. There are a few flashbacks to the events of the war through the series. There's also the Taelon-Jaridian War, of which barely anything is known, save that it has been going on for milenia and suposedly spans galaxies.
* Earth: Final Conflict of Agents Sandoval and Beckett by Ha'Gel. He knows this, but his mother was mind-wiped to prevent her from exposing the Resistance. Beckett only finds out when she's dying from a CVI breakdown. It's a good question as to whether or not Sandoval figured it out.
* Earth: Final Conflict outfits. Lili is understandably annoyed when she finds out.
* Earth: Final Conflict, produced in the late 20th century and set in the late 2010s/early 2020s, also used bulky CRT monitors in government buildings, corporate offices, and the Taelon Embassy, despite flat screens becoming cheaper and more ubiquitous late in the show's run.
* Earth: Final Conflict, Renee Palmer is given some of Da'an's Taelon life nergy, in essense, making her part Taelon.
* Earth: Final Conflict) screams "Shabra!", being, presumably, a Taelon curse word.
* Earth: Final Conflict season didn't meet with many of the fans' approval.
* Earth: Final Conflict ship is discovered beneath the earth with thousands of Atavus in stasis. The show ends with the stasis pod being taken aboard the Taelon Mothership, which departs to look for the original Atavus homeworld.
* Earth: Final Conflict tech girl is unable to resist the urges after she gets put

through a "joining" (but fortunately a cure is finally developed in the same episode).
* Earth: Final Conflict: The Companions are sterile; Zo'or is the last one to have been born.
* Earth: Final Conflict. Their ships and buildings are all grown out of an organic "bio-slurry". Their weapons, called Skrills, are actually creatures they've "domesticated". They resemble a bug growing out of the host's arm (always a human) and can be used to fire energy weapons. They aren't intelligent but have individual personalities. Taelons also grafted items that enhance senses and reflexes to poorly-trained human soldiers, sending them into combat with their arch-enemies, the Jaridians.
* Earth: Final Conflict. The primary purpose of the Commonality is to keep the Taelons civilized. Without it, they would quickly revert to their atavian ancestors.
* Earth: Final Conflict: the Taelons are dying. As are their "cousins" the Jaridians. Both races are the result of an Atavus cult leader draining most of the race from their "core energy" and infusing his small group of followers with it. This group (augmented with Kimera DNA/energy) became the Taelons, while what's left of the Atavus became the Jaridians. No wonder the Jaridians hate the Taelons. By Season 5, both races are virtually gone. Only a single Taelon is left (another one is resurrected, before being converted into an Atavus and then killed), while the Jaridian homeworld is mentioned to have imploded (for some reason).
* Earth: Final Conflict: The Taelons say they've come to Earth to be our friends, but actually want us to fight their wars for them.
* Earth: Final Conflict, the Taelons utilize organic slurry on their ships. When a wall or door is "closed", flaps of "skin" or slurry appear to grow from the door frame and coalesce at the center like a wound rapidly healing. They also utilize "virtual glass" (basically force fields) on some instances.
* Earth: Final Conflict, this can happen whenever a Companion Protector shows up at a crime scene or at a place of interest and starts to pull rank on the local police. In one case, an American cop clashes with the Protector to the UK Companion, who points out that Companion Protectors have worldwide jurisdiction. In some cases, Protectors keep their rank and authority from their previous job, like Agent Ronald Sandoval still being in the FBI, even though his primary loyalty is now to the Taelons, not the United States.
* Earth: Final Conflict to be from a first-degree relative (parent or child) to work. Furthermore, Sandoval considers Liam his enemy while Liam's feelings for his human father are a little more complicated.
* Earth: Final Conflict we discover he uploaded his consciousness to cyberspace.
* Earth: Final Conflict were a minor subversion, in that they were only minimally evil.
* Earth: Final Conflict were a spot-on prediction of smart phones from back in the mid-nineties. Looking at the way the characters use them (like pocket sized laptops), they could easily be iPhones or Droids. They even have a camera function. The only main difference is the video-call function, which was standard on all Globals and used all the time. While iPhone has FaceTime, and most smartphones have Skype, we're still far from reliable video calling while on the go.
* Earth: Final Conflict were frequently used as dropships for human "volunteers" in service of the aliens, and other human agents of the Taelon.
* Earth: Final Conflict were once part of the same race as the Taelons, but they split into two species some 8 million years ago. The two races have been at war ever since, and the Jaridians often speak of glory in battle, and seek honourable deaths in combat.
* Earth: Final Conflict. What the series captured perfectly, but ignored in later seasons, was that humans had only recently come to terms with an alien race as part of their world.
* Earth: Final Conflict, while Boone and Zo'or were clearly shown disintegrating. Thankfully, Zo'or is finally killed off after resurrection. Unfortunately, so is Boone, albeit off-screen. Liam comes back in the series finale without an

explanation.
* Earth: Final Conflict: William Boone's old flame appears after several years of absence and, in spite of Boone's wife recent death, he's unusually inflamed with passion, something extremely out of character for him. It's later revealed that the Boone's memories of their life together are false and were included in his cyberviral implant as a loyalty test by the Companions, and they had recruited an FBI agent to play the part of the former girlfriend.
* Earth: Final Conflict. With only minutes left, the mothership is too large to be moved out of the way so quickly. The collision would've destroyed both ships, but Liam manages to engage the ship's self-destruct, before getting into the stasis pod with Renee, correctly assuming that Ma'el would've programmed it to eject if the ship was threatened. The Roman is killed in the explosion, and the mothership is saved.
* Earth: Final Conflict, Zo'or schemes his way to become leader of the Taelon Synod, but as time goes by he gets more and more out of control, threatens his subordinates, becomes enraged easily, and is willing to sacrifice all of Earth for his own ends. Characters explicitly compare him to Caligula.
* Earth finally uniting as this is the reason why the Cyrollans extend an invitation for humankind to join the Symbiotry of Peaceful Beings in
* EarthForce is well-equipped but generally low tech, still employing firearms for the main gun of their main tank design (one that is being replaced by a gauss cannon-equipped one), gun artillery and even small arms (to be fair, they are far more powerful than small arms energy weapons of most races, and Earth Alliance only recently acquired the ability of producing portable energy weapons of comparable power). Doesn't maintain a dedicated ocean-going fleet anymore, but has special forces capable of operating underwater;
* Earthforce likewise boards the station in what becomes a very bloody struggle between them and station security.
* EarthForce (Soldiers) vs. Minbari Warrior Caste (Warriors, of course). In the Earth-Minbari War, the Minbari won most battles thanks to their superior technology providing greater firepower and making their ships almost impossible to hit, but EarthForce kept them at bay for two years, and even
* Earth Girl, but they are invented and deployed by humans, not precursor aliens. Another major difference is that they have Drop Portals, where you can bootstrap a new portal connection by portalling a tiny spaceship to a new place without having to get the receiving portal there conventionally. The small ships dropped there then assemble the regular receiving portal. They are restricted to a maximum diameter of 4 meters. By the time of the book, humanity relies so much on them that their spacecraft cannot launch into space or land from there, only portal from orbit to the planetary surface and vice versa. The only aircraft still used are survey planes used for cartography and to look for people gone missing.
* Earth Girl by Janet Edwards, lightbulb jokes are a bit of a rediscovered fad among archaeologists ever since one dug up a book of them in an old city.
* Earth Girl can restore legs, arms, 98% of a person's skin and significantly injured internal organs. As long as your brain did not get squashed, you'd probably survive just fine.
* Earth Girl: Jarra, after getting accepted into an archaeology class run by an offworld university, decides to conceal her status as Handicapped (someone who can only survive on Earth) by posing as the child of a Military family. When she eventually decides to look up her birth parents in the records, lo and behold, they are Military personnel.
* Earth Girl occurs, Jarra is alone in charge of three trainees. After evacuating with them, they find that the rest of the class have been evacuated elsewhere. Jarra therefore remains in charge of the terrified trainees, keeping them safe and calm while terrified herself, and making sure they get their medicine when available.
* Earth Girls Are Easy also learn English from watching TV; it helps that they have an ability to exactly mimic the speech of others, and even noises, to begin with.
* Earth Girls Are Easy: An alien asks Valerie if they're in Finland (just having

seen a sexy travel commercial) — she cheerfully replies "No, you're in the Valley — Finland is the capital of Norway!"
* Earth Girls Are Easy: An unnamed man steps into Deca Dance and sees Zeebo dancing with a pretty black woman. He sneers at Zeebo's moves and tells the girl "why dance with a zero when you can dance with a hero?" The girl is happy to dance with whomever. Zeebo, offended at having been cut in on, attempts to dance with her as well, but the new guy is not having it and challenges him. The new guy pulls out his best moves. Zeebo, who has an incredible mimicry ability because he's an alien, watches for a second, matches him move for move, and then completely mops the floor with him with acrobatic moves the new guy can't match.
* Earth Girls Are Easy had the furry human aliens learning English via television — resulting in them imitating Jerry Lewis and James Dean, and asking questions like "Are we limp and hard to manage?"
* Earth Girls Are Easy have been dyed different shades. (The leader of the aliens is played by a swarthy Jewish-American actor, while the other two are a light-skinned African-American and a pale Anglo-Canadian.)
* Earth Girls Are Easy, "I Like 'Em Big and Stupid" was originally shot as a full onscreen musical number, but subsequently was reduced to background music in the opening stretch of the club sequence.
* Earth Girls Are Easy - Julie Brown, singing "'Cause I'm a Blonde" in a beach movie setting, snatches a tiara off a "Blonde of the Month" beauty contest winner along with her blonde wig, revealing her as a - horrors - brunette.
* Earth Girls Are Easy - manicurist Valerie is willing to patch things up with her cheating fiance, but has to put her foot down:
* Earth Girls Are Easy — the latter confronting her with her romantic dilemma: Should she go with Mac to his home world, since he's leaving as soon as his ship is fixed? She then looks outside to find that the familiar faces of her neighborhood are all aliens of various sorts, and as she runs through her house in a panic there are even more creatures and robots running amok. She tries to turn to her Earthly (and unfaithful) fiance Ted for help, only to see him start attacking pre-makeover Mac as the dream dissolves.
* Earth Girls Are Easy - Valerie throws her doctor fiance out of the house when he catches him cheating on her. Next morning she sits depressed in the kitchen, watching a soap opera of a doctor fooling around with a nurse on top of his comatose fiancee.
* Earth Girls Are Easy varies the trope a little. Valerie (Geena Davis) tosses Ted (Charles Rocket) out of the house clad only in his underwear. And then, while singing a song about how much his cheating has hurt her, Valerie systematically destroys all of Ted's favourite belongings in the fireplace, the microwave, and randomly tossing them. Close enough for horseshoes. Extra points to Valerie for rolling a bowling ball down his skis into the monitor of his computer.
* Earth Girl. They don't get to vote in sector parliament elections, but get a lifelong Unconditional Basic Income as a consolation for being stuck on Earth for life.
* Earth got lucky in that they met the Centauri in their Second Republic, long after they abandoned their ancient expansionistic ways for the most part. Others met them in their First Republic and got invaded, with the Narn being invaded even if they met them around the same time as Earth due a combination of them being contacted by a different Centauri House, the Centauri needing the minerary resources, and the Narn being technologically much more primitive at the time.
* EarthGov is more of a national alliance than the traditional One World Order, but it's the only representative of the entire human race to the other races. Although a large part of the story arc is that it becomes this trope when
* Earth group is Sanguine (self-centered, objective orientated); includes the Tiger, Wolf, Monkey, and Koala.
* Earth has at least one truly disastrous first contact in its back story: The first contact of humans and Minbari happened between two squadrons of warships. Recognizing the strangers as fellow warriors, the Minbari kept their stealth at minimum and

* Earth Humans specifically, commonly referred to as the Tau'ri, are particularly special. In the Milky Way galaxy, almost every planet is hindered in advancement by the Goa'uld except for Earth and a few others, which got a chance to develop freely. Other unhindered worlds are often beyond Earth standards technologically, but the Tau'ri are notable for their determination. The situation with the Wraith in the Pegasus galaxy is similar, where their feeding on humans limits the population growth of most societies. So, in the end it's not so much "humans are special" but "Earthlings are special".
* Earth humor. She occasionally does tell Tamaranian jokes (which the other Titans are polite enough to laugh at).
* Earthican) alien after his middle name is discovered to be "Zaxxar."
* Earth II fame. The plot involved efforts to stop a nuclear weapon launched by the Chinese from reaching the station.
* Earth II, the trope is then played straight (with a bit more thought given to trajectory).
* Earth intelligence agent Kowalski has proven himself to be a ruthless stone-cold killer, but at one point when he says some inconvenient would-be bystanders "
* Earth in the Universal Century may be a more subtle example, as while it doesn't have cyberpunk-esque ruined ecosystems, its been a successful target of
* Earth is about to be invaded by rabbits from the Moon, the men in white coats start to put him in a box marked: TO THE FUNNY FARM - THIS WAY UP.
* Earth is also stated to have one such defensive network. While far less efficient than Xerba's, it
* Earth is arguably an ocean planet, just one with a lot of tectonic activity to create islands and continents (and even so, the average elevation of the Earth's surface is still well below sea level). This was even more true 500 million years ago, when the only life that existed was in the sea, and there was much less land above water than there mountains
* Earth is being invaded by the almost unkillable metal-devouring robot R.E.G.I.S. Mk 5, which had been scheduled to be thrown into a black hole until
* Earth is rarely seen or described in the TV series, but it doesn't appear to be quite as far gone as in the novels. However, it is still said to have a giant artificial "toupee" hanging over it to cover the hole in the ozone layer.
* Earth Is the Center of the Universe: A lot of cosmically significant events or other unusual activity happening on Earth.
* Earth is the densest of the four inner planets (Mercury, Venus, Earth & Mars) of the solar system, so it's a plausible choice of targets if aliens are looking to collect a
* Earth is the domain of the highly destructive Red mages; thus, there are many spells that fall under this, such as
* Earth is too hot or too cold in a few places. But the total area on Plateau where humans can live is only about the size of California, and We Made It was settled because the probe checked during one of the seasons it doesn't have constant three hundred mile per hour winds.
* Earth Is Young: Present-day Earth turns out to be young on a cosmic scale.
* Earth Is Young: The work is set on Earth in the twentieth or twenty-first century or possibly slightly later, but Earth is portrayed as being only thousands of years old, not billions as it really is.
* Earth Is Young: Though events take place on Earth during the recorded period of human history, the age of the planet is merely thousands rather than billions of years.
* Earth itself is also suggested to be the lock on any number of cosmic prisons, including Chthon's.
* Earth itself was like this for some time before the first reboot of the
* Earth itself, which could be loosely described as a burned-out, ecologically wasted hell zone occupied almost exclusively by carnivorous nanobots, death traps, Exsurgent strains, and killing machines that exist solely to rip off heads and upload the ego contained therein for unknown reasons. A few others have been found through the Pandora gates, not counting the many with unbreatheable atmospheres

they include:
* Earth keeps trying to befriend her hostile neighbors no matter how harshly they act towards her, and instead of being wary at the clear signs that there's something
* Earthlight, an Earth passenger ship en-route to Mars is unable to turn around when war breaks out between the two planets. They have only enough fuel to slow down when they get to Mars.
* Earthlight, the lunar observatory's secret weapon fires a bolt of white-hot molten iron at its attackers. Damage is done not from heat, but simply from the force of the impact.
* Earthlike planets cannot support life without liquid water on its surface. If its parent star starts to leave the main-sequence stage, said planet's temperature will exceed that of the boiling point of water, and the results will be self-explanatory. Also, plate tectonics cannot exist without liquid oceans. Guess what happens in about 1 billion years!
* Earthling: A term for non-unicorn and non-pegasus ponies (AKA, "normal" ponies). It's been displaced with "earth pony" since G3.
* Earthling Cinema, in which Garryx Wurmuloid analyzes a piece of ancient Earthling cinema.
* Earthlings are also puny in a literal sense; with the exception of the Grunts (who can grow as short as 4'6"), every other race in the Haloverse are much bigger than humans, with even the lightly-built Jackals averaging well over 6 feet tall, while Elites, Brutes, and Hunters completely dwarf even the 7-foot SPARTANs. And even Grunts have enough strength to disembowel humans.
* "Earthlings" of a metal bar flung at her by the weakest member of the cast.
* Earthlock: Festival of Magic where characters run a similar risk of freezing to death. The planet was not always like this—it's one of the big mysteries of the game as to what happened, though it's been tidally locked for long enough for everyone alive during the events of the game to take it for granted and not even question it.
* Earthlock: Olia Alagbato is darker-skinned than the other human characters, and the -gb- in her name is often found in West African names (e.g. the politician Laurent Gbagbo). On the other hand, she's a very light brown, and her hair is bright red.
* Earthlock Party members generate "Battle Bond" by fighting in pairs. Levelling up the bond unlocks passive benefits, which are different for each pairing of the six characters.
* Earthly demon Sai Taisui wields a similarly-named axe called "Flower-spreading Axe" as his main weapon, though when Sun Wukong pushes him in a corner he uses his magical fire-and-sand-summoning bells.
* Earth Maiden Arjuna is shown to be exactly as harmful and dangerous as would logically be expected.
* Earthman Come Home. In-universe, named after the captain of the colony ship Simon Murphy.
* Earth-Minbari War. After the Minbari's unexpected surrender, many of the surviving personnel enrolled during the war was kept in service, just with additional training.
* Earth Mother: A goddess or female figure associated with fertility, life, nature and the Earth.
* Earth of Corinth, which projects blue skies onto the underside of the dome, the world is covered with a yellow filter to suggest yellow toxic clouds, high radiation levels, and storms of dust.
* (Earth-One) Professor Menace claims to have captured Wonder Woman and dramatically sweeps back a curtain on a stage before his fellow gangsters and waits until they've all tried shooting at her and having their bullets repelled to declare that she's actually a robot which they can use to destroy the real thing. He somehow manages to be even more dramatic than his Golden Age predecessor, possibly because he controls his robots with his mind rather than having to sit at a console like Elektro.

* Earth Orb. Thief is charged with removing the soul from the orb and placing it back into Lich. While Thief is plotting how to do this, he notes that he has stolen non-existent items and the soul is neither nailed down or on fire. Thief successfully returns Lich's soul by suing Lich for polluting public property (The Earth Orb) when Lich placed his soul in it.
* Earth or other stuff). This is the "element" corresponding to the solid state.
* Earth other inhabited planets out there, since God wouldn't go out of their (the trinity) way to plow out a universe this big only to plant a single flower in it, B) That God makes themself known to all of the universe's inhabitants, and C) That God will redeem a given fallen world in some way, shape, or form. Perhaps by doing what they did here, or perhaps by doing something quite different. Whatever is appropriate.
* Earth ponies as a whole embody this. Their innate magic is a connection with nature, along with higher physical strength and stamina than the other two races. Not flashy like a unicorn's magic or a pegasus' flight, but the series has made it very clear that said connection with nature is the most important trait in a world where the
* Earth Ponies being stronger than the other two tribes was a piece of fanon so common that it was near-universally accepted. There had always been things such as
* Earth ponies like the Apples are at least naturally stronger and more resilient than other ponies. Rainbow Dash however is the resident
* Earth-Prime is the corner of the multiverse standing in for the real world, where superheroes are fiction.
* Earthquake and Gen-An Shiranui. Granted, Gen-An has two or three hairs, but he's still an overall baldie.
* Earthquake (Earthquake Warning - EQW, real life - from Japan's EWS for the Tohoku 2011 earthquake)
* Earthquake of the destruction to Los Angeles's outlying areas, leaving nearly all the city's landmarks fundamentally untouched.
* earthquake, severe enough to send the Bank's clients and employees scrambling for the exits. Not a safe bet to say nobody got trampled during the evacuation, especially since the "quake" lasted longer and was more intense than they'd initially intended.
* Earthquake: The Big One attraction first has the riders experiencing a "slight tremor" with a intercom voice telling everyone to remain calm...just before a big earthquake follows.
* Earthquake: The Big One attraction, when a propane truck crashed down and hit a subway column.
* Earthquake: The Big One had its finale involving the guests riding on a subway train when a giant earthquake hits.
* Earthquake: The Big One, had its subway setting purposely designed to evoke a sense of dread long before the earthquake portion comes in.
* Earthquake Weather, the main characters use a pendulum over a calendar to determine the day they should perform a ceremony that will revive a dead king.
* Earthrise, choosing between Needlenose (again), Gnaw, Shrapnel or Runamuck. Runamuck won.
* Earth Rising, with the once-blue planet appearing blood-red in the lunar sky and radiating waves of energy.
* Earth's Alien History, a look at Klingon culture shows that, unless they work directly for the military, Klingon scientists and any others who aren't warriors (farmers, artists, industrial workers, etc.) are marginalized and forced to accept lower standards of living.
* Earth's Alien History and their allies start using them to send misdirecting information to the Reapers.
* Earth's Alien History becomes the hegemon of the Alpha Quadrant after the Mekon War, due to the Citadel Council's members being severely weakened by the war, with the only other potential rivals being the Klingons and Romulans. And TeTO's power only grows over time, with the Council continuing to decline, the Klingons becoming friendly rivals, and the Romulans having to create their own bloc (the Pact of the

Raptor) just to keep up. Following the Reaper War, there's also the formation of the Shield Alliance, which quickly rises in diplomatic prowess to become a significant rival to both TeTO and the Pact.
* Earth's Alien History charter recognizes the right of accused criminals to have this in place of trial by jury, if it's a legally ordained practice in their home member-state.
* Earth's Alien History chronicles these colonists' adventures once they reach their new home.
* Earth's Alien History eye beams, which cause enough nerve damage that it permanently paralyzes her.
* Earth's Alien History for the purpose of making humanity into the perfect soldiers to face them in the Time War.
* Earth's Alien History has numerous examples of the intermingling of a great many different species causing alterations and changes in preexisting religions:
* Earth's Alien History has the Asari's Lightning Army. Formed during the Reaper War, its leadership is composed primarily of more progressive officers who break from the stagnant clinging to traditional tactics displayed by other Asari military leaders. This makes them more fluid and unpredictable, and therefore more effective.
* Earth's Alien History, human philosophies like free capitalism and Marxism become very popular among the working classes of the Klingon Empire as social tensions rise in the 23rd century.
* Earth's Alien History known as the Last-of-all-Cities, who is an utter psychopath who rules with an iron fist and lashes out violently at anyone who disagrees with her. When a rival faction seems close to overthrowing her, she's perfectly willing to use a weapon that might destroy the whole planetoid her people are on to defeat them, seeing it as preferable to letting them win.
* Earth's Alien History sent to Andromeda just to get her out of their hair.
* Earth's Alien History sent to the Andromeda galaxy as continuity of species just in case the Reapers succeed in wiping out all life.
* Earth's Alien History sent to the Andromeda galaxy has begun as well.
* Earth's Alien History: The Cardassians and the Breen become this to the rest of the Pact of the Raptor after their failed invasion of Klingon space during the Praxis War ruins the Romulans' attempt to install a Pact-friendly Klingon government. They just barely avoid being kicked out of the Pact, are forced into debt to the Romulans when they pay off their reparations to the Klingons for them, are made to accept demilitarized zones in their territories, and are made to surrender colonies to the Shield Alliance.
* Earth's Alien History, the reason Drax can't bring himself to act on his newfound feelings for Takara is that he's still mourning his family.
* Earth's Alien History: The reason that the Terra Venture and later the Arks are sent to Andromeda is to ensure continuity of species for all the civilizations of the Milky Way (or at least the Alpha and Beta Quadrants) in case they fail to stop the Reapers.
* Earth's Alien History. They then use it as a staging point to invade and conquer most of Citadel Council space.
* Earth's Alien History to get the two species fighting each other. When this is exposed, however, it just leads to both entering the war on the side of, and later formally joining, TeTO.
* Earth's Alien History War, lasts 75 hours from opening hostilities to the Fithp's official surrender to the Earth forces.
* Earth's Alien History with just two sides (Azetbur's legitimate government and the rebels led by House Duras), only for the Cardassians and Breen to try and take advantage of the situation by invading Klingon space and attacking both sides. And since the rebels are too stubborn to call a truce (unlike the more pragmatic Azetbur), it stays a three-way conflict.
* Earth's been visited by aliens for ages, we just never realized it.
* Earth's Children after she's cursed with death by Broud. As a result, he vows to protect and help raise her son.

* Earth's Children. Also Ayla herself at age 5 wandered the earth not knowing what to do or even what to eat until she was picked up half-dead by the Clan.
* Earth's Children. Although they loved each other, they amicably ended things because they couldn't reconcile their differences. Though it's never explictly mentioned what went wrong, it's implied she found him overbearing, whilst he felt she didn't really need him around. They've since moved on with other partners they are better suited to, although some people still tell stories of their 'tragic love', which Marthona finds embarrassing.
* Earth's Children, Ayla occasionally rides on the back of Baby, her pet cave lion whom she raised from a cub, although she cannot control his movements as she does with her horse.
* Earth's Children: Ayla prefers the look of Neanderthals to the look of humans, having been raised by the former.
* Earth's Children books, Ayla is asked about the leader of the Mamutoi tribe which she tells them she has been adopted into, but she knows the fake name (Lutie) for what it is and gives the correct information ("Tulie").
* Earth's Children franchise, supporting character Joplaya is very much in love with her half-brother, Jondalar, with whom she shares a father. It can be partially forgiven since in her prehistoric society, people are unaware of how paternity works (or even basic conception), people are only considered "siblings" if they share a mother. She abandons her designs on Jondalar because of a cultural taboo on "hearth-mates" (ie: children raised in the family circle of the same man) marrying and because she knows that Jondalar is in love with Ayla.
* Earth's Children has Ayla's chief antagonist defending the Clan against gangs of Others who paint themselves white and kill "flatheads" for kicks. At the climax, the leader of the "chalk-faces" viciously stabs Broud in the abdomen at the same moment Broud breaks his neck. Broud drops to the ground and everything looks like a beautiful death scene. End of chapter. The next chapter opens with a Clan funeral ceremony... turns out it's for Broud's mom Ebra. Broud will take time to recover but is fine.
* Earth's Children in that to the Clan, what Ayla does and is able to do is literally inconceivable.
* Earth's Children. It's all but stated that Ayla dreamt of Jondalar before meeting him; during her time in the Valley of Horses in the second book she dreams of a man of the Others (what Neanderthals call Cro-Magnon), whose features she can't distinguish save for the fact he has "yellow" hair (Jondalar is Cro-Magnon like her and has blond hair).
* Earth's Children jaw was fished out of the North Sea, and dated right to the time setting of the book.
* Earth's Children novels are fairly blase about who's getting it on with whom, mostly because neither society is clear on the concept that sex leads to pregnancy.
* Earth's Children series by Jean M. Auel. The people of the Clan of the Cave Bear (Neanderthals) rely heavily on genetic memory. They don't learn skills by instruction, they literally remember how to do things because their ancestors knew how to do them. As useful as this ability is, the books make it clear that this impressive memory comes at the cost of the Clan being almost incapable of imagination or innovation. Simply put, they can't learn what they don't already know.
* Earth's Children series falls into the category of World Class Beauty, but borders on Divine Level Beauty. However, because she was raised by Neanderthals (who have a very different idea of beauty than modern humans) she tends to see herself as being somewhere between Ugly Cute and Super Ugly.
* Earth's Children series formal introductions are done by providing a person's name and ties, to show their status. Ayla in particular has a very long list of ties since she's a Zelandoni, a Mamut, a Clan member, has the Cave Lion as her totem, and is friend to three horses and a wolf.
* Earth's Children series is a massive exploration of early human civilization, culture clash, survival, and romance. There's also a lot of explicit sex. To its detractors, it's just Ayla and "Dongalar" screwing their way across prehistoric

Europe.
* Earth's Children series, the following naming conventions can be seen:
* Earth's Children series, the protagonist Ayla was solely responsible (with a little help from Jondalar) for many of the most important technological discoveries of her prehistoric era, including domestication of horses and dogs, suturing wounds, starting fires using flint, the travois, and the atlatl.
* Earth's Children (speculative/historical fiction that heavily includes romance from the second book onwards)
* Earth's Children, the Clan believe their totems give them signs, often in the form of unusual objects, to indicate if they're on the right track. They keep these signs inside their amulets (for the Clan, amulets are drawstring pouches worn around their necks, given to infants when they receive their name and totem). Ayla finds an ammonite fossil shortly after picking up a discarded sling and believes it to be a sign her Cave Lion totem wants her to learn to hunt. Later, when she's begging her Cave Lion to give her guidance when her clan's leaders ae debating what to do with her supposedly deformed baby son, she finds a piece of quartz crystal and takes this as a sign Durc will live.
* Earth's Children: The Neanderthals series are, of course, destined for extinction, although it's hinted that at least some of their hybrid offspring may interbreed with modern humans and so have descendants.
* Earth's Children: The story takes place entirely in Europe, and the characters generally have modern European coloration. Two exceptions:
* Earth's Children, thinking after this happens women will just only have girls).
* Earth's Children turned out (partly because she was completely left of the film's production despite previously being promised she'd be consulted). As a result, she never sold the movie rights again, although she stated in a 2011 interview that her children were free to sell the rights after she'd died. She also gave permission for a television series based on the first book to be made in 2014, though it ultimately didn't go ahead.
* Earth's Children, when the lion Ayla raised from a cub comes back to visit her in the human village she has moved to. She manages to stop the hunters before they harm the lion.
* Earth's Defense Family, Seiko was born on July 7, the same day as the Japanese festival Tanabata. She notes the irony of being born on a romantic holiday while she's currently in a failing marriage, and spends the day with her not-quite-lover, Hayakawa.
* Earth's Dragon has his own moment in the same arc. When the heroes wished back everyone killed by Frieza and his men, they saved almost the entire Namekian species — except for the village Vegeta slaughtered to get their Dragon Ball. Since he had gone rogue from Frieza's army by that point, he wasn't one of Frieza's men, thus those deaths were outside the parameters of the wish. Vegeta finds this amusing, everyone else shoots him a
* Earthsea, Duny (who later becomes Sparrowhawk) uses a fog control/illusion spell to confuse invaders and save his village.
* Earthsea, Ged has an otak — a small, rodentlike creature similar in size and disposition to a weasel. He tames it in the wild using the Old Speech, and it follows him around everywhere after that, usually riding on his shoulder or resting in his hood.
* Earthsea he's a minor character, with Alder as the protagonist, Irian as the deuteragonist, and Tenar as the tritagonist.
* Earthsea miniseries has Ged force a dragon, Orm Embar, to submit and give him information by speaking its true name. The dragon first tricks him into giving up one of his three questions by telling him he only gets two and then answers Ged's question about the Amulet of Peace with a riddle.
* Earthsea novels are very popular despite the fact that most of the characters are dark-skinned (black or brown in color) and white people are a minority, however the author acknowledged that, due to this prejudice did not describe the skin color of Ged, the protagonist, until the first novel was well advanced, so that the reader could identify with him.

* Earthsea on the island moves and it's the main dragon... the BBC Audio adaption even gives Ged the line "you are right, my friend, that is no tower..."
* Earthsearch, and the 'Earth' that the protagonists are searching for was just a previous homeworld of humanity with the same name.
* Earthsearch force the humans off the planet Paradise and back onto their spaceship by using its terraforming technology (the spaceship was originally designed to find a new planet for humanity to settle on) to melt the icecaps, causing massive flooding.
* Earthsearch. Instead they cut the tractor beams holding it in orbit.
* Earthsearch makes a musical sound, but this is handwaved as being caused by harmonic resonances created when the beam strikes the ship.
* Earthsearch once they run out of fuel. When they've finished Darv suggests they lie down to preserve oxygen, only to be reminded that they threw out the beds as well.
* Earthsearch. This happens to Kraken when he's cut off from the Angels, causing him to go insane and take control of the ship from the Angels. It would be poetic justice if not for the fact that the human protagonists have to clean up their mess.
* Earthsearch threatening to carve up the entire planet with the asteroid defense lasers unless the captives are returned. Thorden quickly puts the ventilation fans in reserve and rushes in a medical team to revive them. Fortunately the heavier-than-air gas had not yet risen above floor level.
* Earthsearch unless its demands are met. The commander is then killed by a welding android controlled by Solaris.
* Earthsearch, where the crew over the generations broke into two warring societies, with one refusing to believe that the outside universe exists and regarding Earth as their equivalent of Heaven.
* Earthsearch who are shooting at them. Suddenly George goes into reverse, nearly crushing them.
* Earthsea setting was created simply to avert many heroic fantasy tropes, with the aforementioned pale barbarians and darker-skinned advanced races, but in doing so helped cement this trope.
* Earthsea south. In fact, the whole planet is ocean, aside from a dense scattering of islands.
* Earthsea: The dragons are of the deadly Tolkien variety and are obsessed with hoarding treasure.
* Earth serves as the Federation capital, though oddly enough is unprotected in many movies. Mars is best known for the Utopia Planitia Shipyards, though it has a
* Earth's fairies, especially Morgana and the Major Fairies (Diana, Nebula, Aurora, and Sybilla) count as fanfic magnets because they were pretty much set aside by the canon after season four. Similar to Daphne, they can be uses as devices to explain the series' deficient worldbuilding in regards to how Earth lose its magic or when exactly the Fairy Hunters started their genocidal hunt.
* Earth's "Final War" many centuries before the current timeline, where the planet was nearly rendered completely uninhabitable until several colonies sent aid to repair the damage.
* Earth's first contact with aliens was made with the Centauri... Who, seeing that humans looked like them, promptly claimed Earth was a
* "Earth's future in stories by the famous author-scientist who writes of possibilities that might become hair-raising probabilities..." from the
* Earthshaker! In addition, the player character works for the "Earthquake Institute", traveling up and down fault lines in California to gather data—that should be the work of the U.S. Geological Survey.
* Earthshaker Missiles. Exactly what it says on the tin. To distract you from the five homing bomblets it spawns, each as lethal as the first game's Mega Missile.
* Earthshaker! shows a yuppie being ejected out of his car; "YUP E" is written on his tie.
* Earthshaker!: When putting a ball into play, the ball enters a spiral located in the upper left corner of the playfield. The spiral contains exits for 10K, 25K,

50K, and 100K points. A strong shot from the plunger causes an "overpass", which awards 25K points and 1 mile. The overpass directs the ball to the lower left flipper which allows the player a shot at the center ramp before the 50K timer expires.
* Earth-Shattering Kaboom: An explosion so big the entire planet is destroyed.
* Earth-Shattering Kaboom at the end of the movie. Not particularly important if it was scientifically inaccurate; it was freakin' cool, and you know it.
* Earth-Shattering Kaboom: Destroying an entire planet is a major line-crossing.
* Earth-Shattering Kaboom for 100 years) finds out about this, he wonders why humans would be crazy enough to put barely-contained supernovae near their worlds. He's answered by a simple "they let you go faster".
* Earth-Shattering Kaboom for the planet, which was overrun by a Zerg infestation.
* Earth-Shattering Kaboom may well wish nothing less than to destroy the entire universe or multiverse.
* Earth-Shattering Kaboom-scale weaponry used in the wars, which is considered by other races to be extremely tactless of us.
* Earth-Shattering Kaboom thirty seconds later. Perhaps Mr. Weight would be a more likely example.
* Earthshock in particular, the Cyber Leader takes a curiously gloating pleasure in Tegan's pain at the possibility of her planet's entire destruction for a supposedly 'emotionless' being.
* "Earthshock": The expedition base camp has a scanner that shows life-signs moving around in the cave system the expedition is exploring. Over the course of the episode we get dots suddenly disappearing (expedition members being killed), a dot that fades in and out (the thing that's killing them, which is alien enough to confuse the scanner), and dots suddenly appearing (the Doctor and friends arriving, just in time to be accused of the murders).
* Earthshock, the person who finds the Doctor and Adric is an agent of the Cybermen and has been ordered to use them as a scapegoat.
* "Earthshock" when they try to crash a massive transport ship into future Earth to stop an anti-Cybermen conference. They succeed... sort of. Adric inadvertently saves the planet by fiddling with the controls so the thing goes back in time, to become the asteroid that killed the dinosaurs.
* EarthSiege and less maneuverable than teams of power-armored soldiers with built-in jetpacks. Plus, technology had advanced to the point that less complex vehicles, like aircraft and tanks, could be assembled in just a few seconds with a special vehicle pad/assembler. Another benefit is being able to leave behind cheaply made vehicles when they get too damaged, instead of hauling back an expensive HERC for repairs.
* Earthsiege series portrays the Cybrid onslaught as nearly unstoppable, with the heroes' efforts to stop them being as much about luck as anything else.
* Earthsiege/Starsiege pods, drop pods containing one mecha each. Of course, considering the fact that you can only play as a Cybrid in Starsiege, they are mostly just used in the first two games as a way to put enemies on the map from out of nowhere.
* Earth's later surprise is the military of Stahlburg, small but very technologically advanced-
* Earth's moon, Luna, is also colonized in Niven's stories. The people who grow up there, "Lunies," average around eight feet tall and are said to look like fantasy elves.
* Earth's offworld allies the Tok'ra, the Tollan, and the Asgard are somewhat unclear. They're all ruled by some form of a high council and do generally seem to have laws they follow, in contrast to the System Lords' my-word-is-law attitude. However, there's no word on how the leaders of these councils are selected.
* Earthsong all of the planets have spirits, and can sometimes manifest in humanoid, ghostly forms. Many of the planets are said to be "asleep" and rarely venture in their spirit form, but the eponymous planet is an active part of the story.
* Earthsong: a series of diary entries by Willow covering about a month.

* Earthsong before she showed up, but part of the background is that it has been there a good, long time.
* Earthsong has a bit of timey-wimey-ball action, since character are pulled together to one time, and then returned back to the moment they left after an indeterminate amount of time.
* Earthsong has gone on a number of hiatuses in the past. The author getting married and going on honeymoon caused one of them.
* Earthsong justifies this one fairly well - all the aliens encountered are from Earthlike planets for the simple reason that planets must make themselves Earthlike before they are given the secret of supporting life.
* Earthsong, mythical creatures in all worlds are based on the brief memory fragment that people keep of their time on the eponymous planet.
* Earthsong plays with this when Beluosus invades Haven during a ball. Nanashi simply detaches her long skirt to reveal trousers beneath—she had stipulated that in the design, just in case.
* Earthsong provides a psychic translator microbe field which allows anyone on the planet to understand anyone else, speaking or writing. Writing remains in the original language however, and once noone's left who understands the language concerned, it reverts to incomprehensibility until it can be laboriously deciphered.
* Earthsong where it's the people who make up the myths that have been traveling elsewhere, but have only faint memories of their alien companions once they snap back to their own place and time.
* Earthsong: Willow learns that She's is Earthsong's "Eve" - the first example and eventual mother of the native race of Earthsong's planet.
* Earth's original Dragon Balls, created by Kami, had the rule that you could only have a given wish granted once, so anyone who died a second time would be dead for good. Namekian Dragon Balls threw this limitation out the window, and had no such limitation on the number of times one could be brought back.
* Earths Shadow, Earth has long ago been mostly abandoned due to the discovery of interstellar portal technology. Entire cities have been moved to other planets, leaving a planet full of giant holes in the ground. Only the poorest countries couldn't afford to move. The remaining powers in the world are the Central-European Republic of Ukraine and a state in South America, populated mostly by the escaped Russian population of Ukraine. During the final days of the exodus, the warring factions activate a jamming device, blocking portal travel to and from the planet.
* Earth's sky looks pretty normal... until the night falls and instead of the Moon you see only
* Earth's space ships don't have water showers even in the command quarters; when Captain Sheridan was transferred to Babylon 5, he was seriously happy when he learned his quarters included "a real live honest-to-god shower with running water".
* Earth Star Voyager is about teenagers chosen for a twelve-year space journey to the planet where, together, they will restart the human race.
* Earth Star Voyager to find a new home for the human race. Even though the series was never picked up, the miniseries was actually nominated for two primetime Emmys for sound editing and sound mixing.
* Earth Strike), then alert each other with ultrasound when they find some.
* Earth That Used to Be Better: Earth used to be well-regarded, but it is now seen as lesser by those who have left it.
* Earth That Was: Earth has been destroyed or is otherwise uninhabitable, contributing to the plot/setting.
* Earth That Was. The discovery of a fuel from AHEAD allows for further development.
* Earth (The Book). At first, the book goes into the details of how a human male proposes to a human female (usually on a big screen during a major sporting event), then it mentions that, in a rare case of a woman proposing to a man, she pees on a stick and shows it to him.
* Earth (The Book) describes Uranus as "the funniest planet by far," although any

aliens would "have to spend about ten years learning idiomatic English to learn why." Lake Titicaca is also identified as "The 'Uranus' of Lakes."
* Earth (The Book) ends with a survey for the reader to fill out as an "Application for Genetic Reconstitution by Aliens." One of the questions is "How many kilowatts would you say your brain produces hourly?"
* Earth (The Book) includes in the chapter on Science a "Periodic Table of the Synthetic."
* Earth (The Book) mentions Anal Probing in the Foreword as one thing humans who believe aliens have already visited Earth think extra-terrestrials came here to perform. It then refers to the anus as "the orifice least likely to yield useful pedagogical results." Mykonos, Greece is described as the one place that would have been the most receptive to Anal Probing.
* Earth (The Book). The end of each chapter has a scavenger hunt with 5 items in Easy, Medium, and Hard, which are worth 10, 20 and 30 points each, respectively. Below that are the six Super Hard items worth 1,000 points each. The catch, of course, is that it's impossible to obtain any of them; they're either intangible ("the innocence of youth"), no longer existing ("the Colossus at Rhodes"), or completely fictitious ("Soylent Green Eggs and Ham").
* Earth: Three-eyed raven is connected directly to Earth (literally, vines go through his body) and this allows him to see past and future and knowing what happens in any part of Westeros spreading his consciousness through the weirwood.
* Earth to Echo features a tiny mechanical alien who has been blinded and needs assistance to get back home.
* Earth too, it's practically his catchphrase. Considering his Origin is also someone who can't interact with people normally...
* Earth-Two against her, and manages to convince an Officer of the Court to leave her alone and unsupervised to go get her some cigarettes.
* (Earth-Two) Elektro claims to have captured Wonder Woman and dramatically sweeps back a curtain on a stage before his fellow gangsters and waits until they've all tried shooting at her and having their bullets repelled to declare that she's actually a robot which they can use to destroy the real thing.
* Earth Unaware as a purely human invention rather than technology learned from the Buggers.
* Earth Unaware but proving extremely effective against Bugger/Formic ships. It works by firing a focused gravity beam that breaks apart targets into atoms. It's heavily implied that the glaser is the ancestor of the Little Doctor.
* Earth Unaware feature a precursor to the Little Doctor called a "gravity laser" or "glaser", developed as an asteroid mining tool. One of the test shots almost destroys the firing vessel as the field expands kilometers beyond what they had expected, and when used as a weapon against the Formics they mount it on expendable drones.
* Earth Unaware larger, although the Formics are busy cannibalizing it to build an armada while on approach to the Solar System.
* Earth Unaware who first spot the Bugger ship and see the creatures face-to-"face" label them "Hormigas" ("ants" in Spanish). When they transmit the data to a corporate mining ship, the first scientist to see it immediately rejects the name, as it uses a living language. She immediately reclassifies them as "Formics" (the same thing but in Latin).
* Earth universe. A-list characters are relegated to guest star appearances, while C- and D-list heroes, and even more so villains, are given the spotlight.
* Earth vs. the Flying Saucers (1956). Of course it was a lot easier when people just listened to the radio for their news...
* Earth vs. the Flying Saucers... and yet the White House is left standing.
* Earth vs. the Flying Saucers, but dump them from high altitude in retaliation after one of their own has been killed.
* Earth vs. the Flying Saucers, but that's black and white film for you).
* Earth vs. the Flying Saucers is THE flying saucer movie. The saucers, depicted by stop-motion animation, have rotating sections on the tops and bottoms that move in opposite directions, massive ray-guns, force-fields, translator devices inside, and

nearly impenetrable armor.
* Earth vs. the Flying Saucers, the aliens try to intimidate mankind with increasing demonstrations of force.
* Earth vs. the Flying Saucers. The beams emitted from the hands of the invader's armor suits and (sometimes) the devices in the bottom of the invaders' ships.
* Earth vs. the Flying Saucers: The final battle takes place in Washington D.C.
* Earth vs. the Flying Saucers the invading aliens damage the Capitol building and the Supreme Court building.
* Earth vs. the Flying Saucers transmutes a destroyer into an exploding World War 2 battleship.
* Earth vs. The Radiators (as well as the associated concert film) has a flying saucer approaching Earth...sporting a bumper sticker for the band.
* Earth vs. the Spider featured a blown-up tarantula. It lived in a cave and was suggested to be the result of nuclear radiation.
* Earth vs. the Spider, Quentin does this to a burglar he finds in his apartment block after injecting himself with spider DNA. Played (surprisingly) realistically in that the impact involved breaks the neck of the punchee.
* Earth vs. the Spider was about a giant mutant spider that invaded a nearby city.
* (Earth was in an ice age, for frak's sake!), possibly hostile natives, and unknown indigenous flora and fauna.
* Earth was settled over 50,000 years ago after a mutiny rendered a picket starship inoperable and armed mutineers took everything high-tech away from loyalists. The 1st novel,
* Earth was supposed to be this for the Votan fleet. It's not clear if they knew it was inhabited ahead of time, and they may simply have had no other choice.
* Earthweb an arcade game simulating the fight against the planet-bombing Shivas to find new minds fit to lead the real thing.
* Earth, Wind & Fire used a lot of Egyptian themeology in their album covers, stage sets and stage costumes.
* Earth, Wind & Fire was usually indistinguishable from the female backing singers that the band hired when singing in his trademark falsetto.
* Earthworks, or land art, is essentially a form of this concept in an art movement, using modern machinery and other technology to sculpt giant sculptures into the land that not only look primitive but are meant to be temporary and naturally erode away.
* Earthworm Jim 3D had a scene where Jim was walking a dog, only for the dog to pee on his leg.
* Earthworm Jim and changes gameplay three different times (starting with a maze, then a game show, then a game of Simon with pinball bumpers).
* Earthworm Jim, and then outright scolds the audience for their apparent stupidity.
* Earthworm Jim animated series. Jim is helpless against the substance known as Wormtonite (which Peter Puppy claims they found at the back of the fridge, and might once have been cheese). Bizarrely, its effects include turning Jim into a bowl of candied corn.
* Earthworm Jim, as part of Peter Puppy's origin, he tried to stand up against a vacuum cleaner, only to get sucked up and find himself in Planet Heck, home of Evil the Cat.
* Earthworm Jim.) A third idle animation splits the difference — after Jim tosses the gun in the air, it lands on his head, but doesn't go off.
* Earthworm Jim attacks by belching fish at Jim as a rain of projectiles, although it's also possible he's vomiting them up instead.
* Earthworm Jim at the same time. No, really. Her upper half is depicted as wizened and crone-like, but that comprises a miniscule percentage of her overall size. The rest of her is an enormous, obese grub-like thing, and is so huge she can't even move properly under her own power. Somehow, she intended to wear Jim's Super Suit to conquer the galaxy. How she intended to fit inside it is anyone's guess.
* Earthworm Jim at times and is usually more serious and sensitive than Jim.
* Earthworm Jim between levels by winning against Psy-Crow), but that this game

does (which is true).
* Earthworm Jim build another suit, but since the power source literally came from the Gods, and they ain't eager to give him another one, any suit he builds would be pretty weak.
* Earthworm Jim but died victim of an Avalanche before the release of the second game. The credits of the second game was dedicated to him.
* Earthworm Jim by Modest Mussorgsky, but halfway through is suddenly interrupted by a loud needle scratch and switches to what can only be described as elevator music with the occasional blood-curdling scream.
* Earthworm Jim cartoon depicts the birth of Queen Slug-for-a-butt and her twin sister, Princess Whats-her-name. Even though the Princess is obviously the more beautiful of the two, the rest of the royals regard her appearance with horror and shock but praise the hideous Queen's stunning good looks. The narrator quickly explains that the beauty standards of slug creatures are quite different than our own.
* Earthworm Jim cartoon episode "Hyper Psy Crow" the title supervillain, powered by coffee, is theorised to be destroyable by "overloading him with coffee until he explodes in a fantastic explosion of nervous energy!" Instead, he becomes even more powerful as Hyper Hyper Psy Crow.
* Earthworm Jim cartoon, Evil the Cat aspires to destroy the universe.
* Earthworm Jim cartoon for one episode where Jim, attempting to get superpowers to replace the weak super suit copy he was stuck with, used comic book methods. His efforts include getting trapped in a nuclear reactor, which gives him a glow-in-the-dark rash, and being bitten by a radioactive flea, which causes him to gain out-of-control leaping powers and grow flea legs from his head.
* Earthworm Jim cartoon - "Gosh-darn them! Gosh darn them all to heck!".
* Earthworm Jim cartoon had Psy-crow call Jim a "spineless worm." Jim had to stop and think about that for a moment, asking if that was supposed to be an insult.
* Earthworm Jim does this as a gag in one of the animated series episodes.
* Earthworm Jim episode Conqueror Worm, Jim eats an entire cup of frozen yogurt in one gulp, which soon causes 'epic' brain freeze. He runs around shrieking so frantically, the camera skips the intermediate steps and immediately zooms out to planet level to show the entire Earth violently shaking.
* Earthworm Jim episode "Sword of Righteousness", Jim kicks off the episode's plot by bringing Peter some pre-made vending machine sandwiches. Peter notes the expiration date on the sandwiches was 2006 B.C.
* Earthworm Jim. Evil the Cat claims he "existed before the dawn of time and will continue to exist past its end!" Jim and Peter escape from him as he tries to explain the logic.
* Earthworm Jim gets his supersuit cleaned, he comments that it's as clean and fresh as a country road. Peter Puppy replies, "Evidently, you've never been to the country. Does the term "Horse apples" mean anything to you?
* Earthworm Jim gets one after being subject to Professor Monkey-For-A-Head's Fatomic Ray Gun.
* Earthworm Jim graphic novel, Evil the Cat freaks out when Jim starts singing "God Bless America". Not because of the first two words, but the last. Just to drive the point in, a Hammer and Sickle appears behind him.
* Earthworm Jim had a LOT of fun with lawyer jokes. Notably, they're reoccurring enemies in "What the Heck?" in the first game.
* Earthworm Jim has its A.I. interact with the wearer's brain in an entirely symbiotic relationship. When it fell into the planet Earth it landed straight on the humblest of creatures, a common earthworm that like all earthworms spent its life crawling deep in the soil and avoiding birds of prey. As it didn't find much of a brain to begin with, some of its energy waves were passed on to the worm, leading to its body growing larger and it developing human-sized eyes, a mouth and a (basic) brain. Thus Jim the champion of annelids was born.
* Earthworm Jim has the titular Jim protecting Peter Puppy from danger, mostly by whipping him over obstacles. If Peter ever gets hit, it causes him to mutate into a horrifying monster which proceeds to beat the crud out of Jim for his failure and

drag him backwards through the stage.
* Earthworm Jim He may also replace 'dirt' with something else if he's using a weapon other than his standard blaster gun.
* Earthworm Jim: In "Bring Me the Head of Earthworm Jim", after his suit gets swapped with a powerless version, Jim tries different ways to repower himself he found in a pile of "reference materials", which Peter quickly points are his comic books.
* Earthworm Jim: In "Darwin's Nightmare", Jim receives a message (which happens to be the script for the episode) that says that Bob the Killer Goldfish is taking over the galaxy again.
* Earthworm Jim, inflating your head like a balloon while a demonic cat shoots darts at you, and an entire level made out of meat are just the icing on the cake.
* Earthworm Jim in one episode where it's revealed that one of the town's residents used to work for NASA, and spray painted "Hey aliens! I dare you to attack Terlawk!" on a satellite.
* Earthworm Jim in the animated series, with Peter Puppy being unable to stop laughing.
* Earthworm Jim: In the sequel, Jim carries a tiny, elfin Elvis in his back pocket. He produces and discards it in one of the idle animations.
* Earthworm Jim: In the teaser for "Assault and Battery", Jim and Peter Puppy are bound to an enormous boulder by Professor Monkey-For-A-Head, who is about to blast them with an enormous laser cannon. Jim tries to use his super-strength to break free, but instead yanks the rock out of the ground and squashes the Professor with it.
* Earthworm Jim is a foot-tall worm piloting an indestructible supersuit. A few scenes boot Jim out of his suit and he has to chase it down/endure the boss until he can reclaim it.
* Earthworm Jim is Professor Monkeyforahead, a mad scientist who shares his head with an upside-down monkey. The monkey's name is Monkey Professorforahead.
* Earthworm Jim is that one of the cliffhanger questions is about something completely inconsequential, like Peter getting a winning hand in a poker game going on at the same time.
* Earthworm Jim, Jim and his gang successfully enter the Hall of the Gods by giving the gatekeeper a $1 bribe.
* Earthworm Jim. Jim has lost his super suit, and tries to gain super powers in order to fight evil, using ideas from comic books. One of his attempts involves flying into a cosmic storm, but according to Peter Puppy that's actually how the hero met his untimely end. Luckily, Jim and Peter not only survive, but become Wonder Worm and the Dog of Destiny.
* Earthworm Jim, Jim just spent the entire game exploring his four worm brains repairing his sanity, defeating the villains affecting his mind, collecting marbles to rebuild his IQ, and defeat his suppressed feminine side trying to take over his mind and body. Jim's reflection on the whole ordeal:
* Earthworm Jim, Jim must launch a cow into the air in order to make progress. Over the course of the game, the cow will occasionally pass by in the background. Finally, after beating the final boss, Jim meets Princess What's-Her-Name and witnesses the cow come crashing down upon her.
* Earthworm Jim, Jim, Peter Puppy, and their next-door neighbor flew straight through the sun, surviving only by using SPF 1 Million.
* Earthworm Jim," Jim, trying to get reservations at a fancy restaurant, claims to be the king of Spain and says some Spanish as proof.
* Earthworm Jim level "Udderly Abducted", you need to carry cows to a milking facility to open gates. You are hindered in this task by a ship that comes steal your cows as soon as you drop them on the way, which happens every time you have a cliff to scale.
* Earthworm Jim (like banging your shins on table corners and going to the DMV office) upon The Darned.
* Earthworm Jim of the game, Queen Slug-For-A-Butt, is almost equally pathetic. She does have an attack — summoning insects with her scepter to attack Jim

— but the casting animation is long, and attacking her in the middle of it interrupts her. If you shoot the Queen at any time you can, it is not particularly hard to keep her locked down completely, killing her without even letting her fire off one attack.
* Earthworm Jim: Parodied in an episode where, after his super-suit gets stolen, Jim tries various generic ways of gaining super powers (including space radiation and radioactive arachnid bites). One of his attempts is to plead to the audience where he tells the viewer he will get powers if the audience were to "Believe! Believe and clap very hard!" prompting:
* Earthworm Jim: Princess Whatshername is crushed by a cow at the end of the game. And turns into a cow in the sequel.
* Earthworm Jim: Psycrow's fishbowl-like helmet is perfectly transparent.
* Earthworm JimPsy-Crow. To defeat him, Jim uses aromatherapy to become Super Mellow Jim, and the resulting collision between the forces of nervous energy and relaxation energy causes the destruction of the universe.
* Earthworm Jim sword mutters, uncharacteristically quietly, "I dunno, they just... needed to be done, I wasn't going to do it."
* Earthworm Jim that accompanies it. This goes on repeatedly until Evil the Cat gets sick of it and hits the henchman who had been playing the guitar off-screen.
* Earthworm Jim, the action figures wallowed in obscurity and are largely forgotten.
* Earthworm Jim, the ammo will slowly refill, but only up to 100 shots, which translates to about a second or 2 of rapid fire, the only possible firing mode.
* Earthworm Jim, the hideous Queen Pulsating, Bloated, Festering, Sweaty, Pus-Filled, Malformed Slug-For-A-Butt. However, the Princess was born horribly deformed, with a slender body, pink skin, long red hair, and large eyes. Yeah, that's right: Everything that makes her an over-the-top cartoon hottie to humans makes her hideous to Insecticans. The Narrator even lampshades this.
* Earthworm Jim. The Professor explains that while he could, without the first suit's power source, the Battery of the Gods, another suit would be "Pretty weak."
* Earthworm Jim, the universe is inside a giant snow globe, which is owned by a child as a souvenir.
* Earthworm Jim. Unfortunately for him, she has to leave for another universe when she gets offered a star role in her own TV show.
* Earthworm Jim, was already in the cast (and in that very scene no less, voicing Cave Guy!).
* Earthworm Jim whenever Jim accidentally hurts Peter Puppy causing him to hulk out and maul him.
* Earthworm Jim, where at one point when you're hanging from a pully, the only way to move forward is to shoot in the opposite direction.
* Earthworm Jim where every time Jim got into a fight, Peter would grab a bag of popcorn, sit down and watch it, claiming that it was "better than pro wrestling".
* Earthworm Jim, where Jim makes his triumphant return and announces he's "as strong as a...a really big thing." After seizing victory, he says "HORSE! Strong as a HORSE! That's what I should have said!"
* Earthworm Jim, where one of these foils 'The thing that dares not speak its name''s plan to destroy the universe by making it fill out paperwork first. Paperwork so long that it would take a billion years to fill out. And after that, it turns out it was given the wrong paperwork!
* Earthworm Jim, which polished up the visuals, featured the CD-quality music from PC version, along with other additions thrown into the game. The first and second games was also re-released on MS-DOS with updated graphics and redbook audio music.
* Earthworm Jim, which was actually the fourth (and last) game in the series, and the only one to be officially released for the Game Boy.
* Earthworm Jim which would feature Jim's many "adventures" before the suit came about.
* Earthworm Jim) who's bored and is looking for a book to read. Jim is moved to tears by his story.
* Earthworm Jim who seeks to free her people from the tyrannical rule of her

sister, an ugly monster with a giant pus-filled slug for a back side....except by the standards of her species, the queen is the beautiful one while the princess is hideously malformed.
* Earthworm Jim with a pair so bad that their music could, quite literally, destroy the universe if omthey were only a little louder.
* Earth would be called "Sol-3" if we didn't live on it. Officially, we could also call it Sol b since it's the first planet
* Earth X: Bruce Banner (separated from the Hulk) appears to be telling Hulk to be careful with Dr. Strange's walls. But he tells Hulk "We don't need to use a door here", apparently a typo for "We need to use a door" or "We don't need to make a door". Hulk use door anyway.
* Earth X, he screams his loudest scream yet, but does not use it for purposes of destruction...
* Earth X Hyperion makes fun of the Kree soldiers shooting him because not only was he immune to bullets in life, all of them are dead and in an afterlife dimension (where even massive injuries can only briefly incapacitate anyone).
* Earth X in an illusory world in which, among other things, he is married to Gwen Stacy and has a son (rather than his real-world daughter, who is this reality's Venom - and who enters this world and snaps her dad out of it).
* Earth X is transformed into one when he eats one of his own doubles to survive. He doesn't lose his self-duplication powers.
* Earth-X Quentin Lance also appears to be sentimental when he sees Earth-1 Sara, the doppelganger of his late daughter. He asks why someone like her was being held captive, to which Sara explains she likes both men and women. Lance mentions how Sara was just like his daughter and adds that he expunged said filth from his bloodline, having shunned her for being bisexual.
* Earth X revolves around finding a replacement Death, then dealing with the chaos when Jude doesn't restrict himself to people who are supposed to have died.
* Earth X the "Gods" in the Marvel U (the Asgardians, Olympians, Egyptians, etc.) are examples who were shaped into their current forms by humans' beliefs.
* Earth X, they do indeed gain abilities from things that would kill people without it.
* EarthX time is presented as a circle. One day, humanity's mutation will run its course and we will lose our identities to become whatever people think we are or need us to be, then go back in time and become the Asgardians.
* Earth X trilogy (Earth X, Universe X, Paradise X), all the gods are sufficiently advanced aliens (evolution wise), it's a long story.
* Earth X versions of the same — their energy bodies need Humongous Mecha to give them shape.
* Earth X what he wants, though, and in one case he uses Iron Maiden's power to shut her up rather than just willing her to stop. Might just have been his sadism, however. Many fights involved begging for help or admonitions to "Dish it out, I can take it".
* Earth X. When Daredevil drops into the Realm of the Dead, he leaves his judge's cassock on a clothesline and lands in his old yellow-and-red costume.
* Earth X, which eventually resulted in her leaving him. There were probably other factors in their relationship breaking down however, such as the death of Professor X and Jean losing her telepathy which, given Scott’s poor social skills, would have severely hampered their ability to communicate. If you want to be shallow about it, the Phoenix Force takes the form of Jean as a gorgeous, physically perfect twenty-something while the actual Jean is middle aged and has put on a lot of weight.
* Earth X, whose mutations are so freakish they're pariahs even in a world full of their own kind.
* Earthy Barefoot Character: A character wears no shoes to show their connection to nature.
* Earthy Barefoot Character: Character who is close to nature wears no shoes.
* Earth: Year 2066, Jim Sterling posted evidence of the game developer that tried to remove anything negative that was posted about the game, including his own

replies to criticisms, in the Steam community hub. Sterling pointed out that such actions would only cause people to post their impressions of the early access game elsewhere for all to see. Not surprisingly, this sort of thing happens quite often for many games.
* ear while he slept, and resulted in the most agonizing death throes, as well as hideous sores popping out all over his body.
* Earwig and the Witch, Erica was born with the name "Earwig", her mother having named her after her band. When she leaves her at the orphanage, the Foster Mother changes it to "Erica Wigg" under the assumption that she was named after the bug.
* Earwig and the Witch is the studio's first CGI movie (directed by Miyazaki's son Goro) and also their second made-for-TV movie. It was not well received, both for the graphics' quality and a story considered flat and unengaging.
* Earwigs, as well as spiders and other creepy crawlies, actually do prefer small, tube-like spaces, and will occasionally find their way into someone's ear canal. They'll usually just leave as soon as they discover it's coated with slippery and unpalatable earwax.Supposedly this is why your ears and nose are so susceptible to itching.
* Earwigs. They have wings, and they can fly quite well. They spend such little time in the air that most people don't even know this. When threatened they prefer to brandish their pincers or run away, and when getting from point A to point B they prefer to keep close to a flat surface.
* Ear Worm are heard by the protagonist in his mind at several points, and he eventually accepts his damnation to the clock tower on the grounds that he'll get to hear them in person forever.
* Easan the Mad, the Darklord of Vechor, not only has an Evil Laugh, but when he desires to seal the borders of his domain (a power that most darklords have) anyone who tries to leave Vechor against his wishes is struck by hideous, demonic laughter that only the victim that hear, which eventually drives the victim insane (in game terms, it causes Wisdom damage) unless he stops trying to leave Vechor.
* EA's could have the players occasionally get into fights. Since this is a simulation series, though, a fight results in both players being given a five-minute major penalty as it would in real life. Later games in the series allow the player to not "drop the gloves", which means they only get a two-minute minor penalty for roughing (again as it would in real life, although without the baggage for effectively refusing a fight).
* ease of logistics when operating somewhere where delivering supplies would be difficult) and because they came out of their Creation Forges classed as fighter 2. PC classes represent an enormous potential in this setting, so for many jobs they were indeed The Only Ones capable of doing them. After the war, they also were The Only Ones capable of handling jobs like salvaging sunken ships or working in other hazardous conditions.
* easier because Surf can hit both of their mons at once, making it entirely possible to win the battle with one attack.
* easier (it's kind of a thing with him), and messier by the bullet Hank used to put him down: a hollow-point.
* Easier Than Easy (usually old ladies that actually think they're teaching you something useful).
* Easier than it sounds in some parts of the world, Indo-European. Romance languages like French, Spanish and Italian are all descended from Latin, for example. If you're fluent in one language from a particular group of sub-group, achieving a passable familiarity with one or two of the others is relatively easy.
* easier than Tactics Ogre, in that, if a character dies, it's gone for good unless you have a Revivify spell ready for use before the end of the battle (And such a spell isn't available in the original until at least 70% of Chapter 2 in either route) or a Blessing Stone equipped to revive the victim on the spot.
* Easier to list people who got reward for his/her/they/whatever achievements than who isn't. Lord Vetinari, Patrician of Ankh-Morpok is listed in
* easier with the RAPIER hybrid jet/rocket engine (a direct reference to Skylon's SABRE engine); however, subsequent updates made the game's aerodynamic model more

detailed and re-entry heating more realistic, raising the difficulty again...
* Easily applicable to those people on group projects for school or work who don't contribute anything. Sometimes, they might not even know a single thing about the task at hand.
* Easily Condemned: It's easy to convince everyone that the hero who did nothing but help everyone who needed it has now gone bad.
* Easily Conquered World: A world that is very easily taken over by the bad guys.
* easily control flame, never ages, and possesses immortality. Unfortunately, he's been assigned a job that he hates — dealing with dead people all day — while the other gods get to spend their days on the sunny Mount Olympus. Because of the nature of the job (there's always someone new dying), he's stuck in the Underworld and never gets a break.
* easily create the revival fluid that can undo petrification. Flashbacks show that Byakuya spent his last decades gathering anything and everything he could that might be of help to Senku when the time came.
* easily crushes to defeat him, which he had absolutely no way of planning for.
* easily decimate every last one of them but neither Japan nor China would tolerate such a massacre and their village only exists because they're not worth the trouble to conquer.
* Easily Detachable Robot Parts: A robot having parts of its body removed has no negative effect.
* Easily Detachable Robot Parts: Robot parts that easily come off and back on again.
* easily distracted by the gay male activity that keeps happening around her,
* Easily Distracted Referee long enough for a rule-breaking wrestler to use a foreign object to hit his opponent, knock him unconscious and get a win. During tag-team matches, one of the partners of the face team will try to get the referee to notice illegal double-teaming of his partner by the heel team, but the referee is preoccupied with trying to escort him — the non-legal face wrestler — out of the ring.
* Easily Distracted Referee to cheat in order to garner boos and further the drama in a match.
* easily-distracted thought processes, combined with her extreme self-consciousness and social awkwardness, point to some disorder.
* easily escaped. If you fail to him three times, he gives you the option to skip the fight.
* easily farmed (and it requires no boss souls, meaning you still have a shot for the Chaos Ring). The final soul, which is in the Pinnacle, can be farmed almost comically, because the bugbears needed come neatly lined up in a row for you to kill. And once you've forged it, the normal attack hits twice and has a long reach, and the charge attack goes all the way across the screen. That's right, its attack reach is even LONGER than the gun. The only thing stopping it is off-screen damage.
* Easily Forgiven: A character does something bad and others forgive him without any repercussions vs. a character who is reformed, but others refuse to believe it.
* Easily Forgiven by Jon and Sansa after they too are snubbed by most of these lords when Jon and Sansa seek to take back their home, Winterfell, from the Boltons. Jon, aside from housing Stannis and his troops for a time at Castle Black, doesn't show much gratitude to Stannis for saving the Night's Watch from Mance.
* Easily Forgiven. For example, in "Lisa", the girl may have gotten saved and may no longer be suffering abuse, but she also has herpes now and no shortage of trauma associated with this.
* Easily Forgiven: In spite of what the other person did to them, this person has no problem at all in letting bygones be bygones.
* Easily Forgiven: In spite of what this character has done, the people they have wronged are all too eager to let bygones be bygones.
* Easily Forgiven or rewarded rather than punished for the bad things she does, he never does.
* Easily Forgiven: Sometimes, acts that seem unforgivable are shrugged off in-universe.

* Easily Forgiven (specifically the aversion of it) is also brought up regarding Chloe's problem with both her father and Goh. Atticus tells her that forgiveness can be like a precious gem, and it shouldn't be handed out easily without assurance that you can trust the person. This allows Chloe to firmly tell Goh that she has no desire to forgive him for leaving her behind in his pursuit for Mew.
* Easily Forgiven: The character is forgiven for their heinous crimes rather too easily.
* Easily Forgiven: They've made my life a living hell, but I forgive them anyways.
* Easily Impressed (A character who is impressed by anything, no matter how unimpressive it really is)
* Easily Impressed: Stupid, naive characters are impressed by literally anything, no matter how unimpressive it really is.
* Easily possible in any game including romantic subplots that allows you to design your own character's appearance.
* easily superior to Iraq's Soviet-supplied T-55s and indigenous T-72 knock-offs.
* Easily Swayed Population: A group that instantly believes something without bothering to think it over.
* Easily Swayed Population: A large group of people being unable to think for themselves, often because of their own stupidity.
* Easily Swayed Population: These people are stupid enough that you can just tell them something and they'll believe it.
* Easily the most common excuse for filler sequences are manga time skips where characters train and prepare for an upcoming battle. It would be used in
* Easily the most common of all gimmick matches, tag teams are hardly even considered a gimmick any more, and for a while it was common for promotions to establish tag team titles before any other kinds of belts or divisions(such as Super World Of Sports, X-LAW,
* Easily the most famous is the Black House; the charred ruin of a two-story suburban home, demolition crews are too scared to pull it down, and local teenagers regularly dare one another to spend the entire night in the house - and in the last thirty years, nobody's been able to go the distance without chickening out. Anyone attempting to enter by the front door is immediately flung twenty feet in the opposite direction; those who get inside are greeted by ghostly shapes, bleeding walls, tortured wailing, and the house itself trying to kill them.
* easily. Though brunette Peter Quill can also count is a gadget and starship flying genius.
* Easily Thwarted Alien Invasion: Alien invaders are easily defeated by the humans fighting against the invasion.
* Easily Thwarted Alien Invasion: Humans can easily defeat invading aliens.
* Easily Thwarted Alien Invasion, using the "planet takes care of the invaders by itself" variant.
* Easing into the Adventure: A prologue that covers the protagonist's ordinary life before going on the adventure.
* Easing into the AdventureBefore you start the adventure properly, you'll be shown cavorting around your tiny home town.
* Easing into the Adventure where Kenshin is much stronger than all of the early villains. Later, the series becomes more serious and darker with villains that pose much more of a threat. Even so, Kenshin almost never actually loses a fight to any of them.
* EA Sports MMA was banned due to the ring containg ads for energy drinks all over the place, as it's illegal to advertise energy drinks through
* EA Sports' of many jokes amongst comedians, including one such joke, "Three things are certain in life: death, taxes, and Chelsea keeps building up only to disappoint."
* EAS respectively both end with what is presumed to be the same killer going after the protagonists... but while in the latter the narrator states he went unconscious afterwards the former's ending is up in the air.
* East and West Germany, with the most visible part being the Berlin Wall. This was taken to such an extreme that when the Berlin U-Bahn was divided, a couple of

ghost stations existed where the trains passed through on the wrong side of the wall.
* East And West lampshaded this trope by commenting that a disconcertingly large number of critics described his stories as "competent."
* East Asian languages aren't gender-based, but are still guilty of using words for males for humans in general, or female-specific words.
* East Blue Saga: We see Luffy's origin story and him gathering his first crew members, while the first parts of the
* Eastbound & Down insisted on a fourth season, Kenny ended up resurfacing in public, even having to go to jail for tax fraud.
* Eastbound & Down, Kenny Powers moves to Mexico and is in the cockfighting business until his cock "Big Red" dies.
* Eastbound & Down protagonist Kenny Powers is obsessed with the ample breasts of ex-girlfriend April; in her first scene the camera zooms in on her cleavage as Kenny stares. In Season 2 he dates the gorgeous but less bosomy Vida, only to decide that he's "a breast man" and go back to April.
* Eastbound & Down: The ongoing relationship between Kenny and Stevie is a terrific parody of a romantic relationship, Kenny being the (over)dominant personality and Stevie being the emotionally sensitive one.
* East Carolina, 1991. Under future Pro Bowl quarterback Jeff Blake, the Pirates lost their first game but then rattled off 11 consecutive wins, finishing #9 in the final AP poll. No final poll appearances since.
* East coast Rapper Masta Ace was believed to be a Stealth Parody of west coast gangsta rap. His group's (Masta Ace, Inc.) song "Slaughtahouse" is less stealthy, "performed" by MC Negro and Ignant MC.
* EastEnders announced a similar plotline where Kat Slater (who was already established to have been raped by her uncle when she was 13) is asked to come forward in relation to allegations made against him by other victims after his death.
* EastEnders Billy Mitchell was hazed on the day before his wedding and found himself wearing nothing but his boxers. He tries to ask a woman for some spare clothes, but then her dog tears off his boxers and she calls the police (even though she could clearly see the dog did it).
* EastEnders by his wife Pam, and when it gets out, several residents (most notably Billy Mitchell) turn against him. A major part of their story arc was Pam learning to accept Christine, which she eventually did.
* EastEnders chills out at the playground to sulk until they're found.
* Eastenders, complications arose when he needed to get a divorce to marry someone else.
* EastEnders: Dr. May Wright (known to the media as Mad May) develops this desire for her husband Rob's daughter Summer with his mistress Dawn Swann. Unable to have children herself, May goes out of her way to push herself into Dawn's life, claimed to be the infant's mother during the pregnancy, and after threatening to take the child from the womb tried to steal a newborn Summer from the hospital (though Dawn woke up and managed to retrieve her). Things took a turn when May attacked Dawn and her brother Mickey to kidnap Summer yet again, only to fail and die soon after.
* EastEnders, during argument with Stacey, Becca launched Bradley's urn across the room. His ashes, which were going to be scattered soon, landed all over Stacey (who was effectively responsible for his death) and the aftermath of it all is for Stacey to have a bath.
* EastEnders example is Dev Alahan's twin children Aadi and Asha, who were born on-screen in 2006 but at some point had their ages fudged to skip a year, as they turned ten in 2015.
* EastEnders following a group of teenagers outside of the main cast. Some were later promoted to the main series.
* EastEnders has also had a few instances, such as Peggy Mitchell returning for daughter Sam's wedding to Andy, and Pegg's sister "Aunt Sal" usually appears at all Mitchell family occasions.
* EastEnders has made this its main strategy for driving ratings over the past 10

years (or even longer). Examples:
* Eastenders. He's referred to as Barry constantly by the other characters, and he's even called that in the credits.
* Eastenders in which Dot is learning to drive, she turns on the windscreen wipers by mistake while trying to use the indicator.
* EastEnders, is a particularly extreme example. After leaving the soap, she failed to return for her father's funeral, her brother's wedding, her other brother's wedding, the first brother's funeral, her mother's wedding and her mother's funeral. That her mother Pauline kept going on about her "fammm-lee" made this more notable.
* EastEnders, Janine's car stalls as she is going over a level crossing. Of course, the train shows up at that moment, resulting in a very tense, panicky scene.
* EastEnders, Kareena Ferreira dated family friend Tariq, later making the relationship incestuous when it's revealed Tariq is her half-brother; the family's father had an affair with Tariq's mother. Tariq knew the truth, but thought that he could get closer to the family by dating Kareena, taking care to ensure the relationship never became sexual.
* EastEnders leaked a week early, spoiling plot points and character arcs before they had been properly set up in the show.
* EastEnders of, the show's producer) or the Ferreiras in the early 2000s (extremely unpopular and eventually had to be written out).
* EastEnders one night and then spend several months trying to work it into a script.
* EastEnders ran a storyline nicknamed "Sharongate", whereby Sharon confessed to cheating on one of the infamous Mitchell brothers with the other brother.
* EastEnders, Roxy and Syed are not fans of each other at all, much to Christian's dismay.
* EastEnders was an early pioneer of this format and still uses it today.
* EastEnders was perhaps the longest gap between killed and brought back, 14 years passed.
* EastEnders where the credited writer is the fictitious Julia Honour. The name is used whenever a script from an outside writer is deemed to be totally unusable and has to be rewritten from scratch by a member of the show's editorial team. The name is taken from series co-creator Julia Smith, the idea being that they were protecting "Julia's honour" by rewriting the unsalvageable script.
* Easter Bunny is hilariously one-sided with Genghis simply laughing off his first verse.
* Easter Bunny, Kill! Kill! involves a developmentally-challenged teen who's bullied by his stepfather the night before Easter.
* Easter Bunny, Kill! Kill! wears a rather demented-looking Easter Bunny mask.
* E. Aster Bunnymund and the Warrior Eggs at the Earth's Core!, North and E. Aster Bunnymund get into one when North complains that Bunnymund talks too much about eggs. The book describes the child Katherine's opinion that they're both behaving like a pair of brats despite being respectively the oldest and wisest creature on Earth & the greatest warrior-wizard of the age. As the argument continues into the next page, she decides to tune them out.
* Easter Egg (1978) also had a code to display their programmer's last name (Reid-Selth, for Brad Reid-Selth) on the screen.
* Easter Egg. Adequately, four of those were playing Ranger parents, and Billy was a teacher.
* Easter Egg commentary to an episode he wrote. This was in lieu of an appearance on the 'main' commentary.
* Easter Egg. During a cutscene towards the end of the level, Starscream gets thrown into a wall and knocked out by Grimlock before player control switches to Grimlock; if Starscream is still wearing the crown at this point, it gets knocked off by Grimlock's throw and accidentally crushed when Grimlock walks past.
* Easter Egg DVD activated commentaries by Al for the two music videos included ("All About the Pentiums" and "The Saga Begins") — they're more entertaining and informative than some full-length tracks.

* Easter Egg features a "Gaider" (i. e. David Gaider, the lead writer for the series) fleeing from a crew of bratty kids yelling at him about what they want to hear in a story (including "zombie kittens!"). (Oddly, he's not voiced by Gaider, making it sort of a half-cameo.)
* Easter Egg (heh) in the Season 2 DVD shows the tail section survivors struggling to capture a hen, and it's fairly hilarious.
* Easter Egg in "50 emails", Old-Timey Strong Bad receives a telegram from Sir Elsington Hallsdingdingsworth.
* Easter Egg in computer games, as is recounted very neatly in that page.
* Easter Egg, in which Moblins hop in pain crying when you stab them in the butt.
* Easter Egg, in which Nappa (having no hair to speak of) wonders if his goatee would grow if he went Super Saiyan.
* Easter Egg! It literally has no attacks, and can be attacked by the other players.
* Easter Egg on their ship, with various skulls, including a xenomorph's.
* Easter Egg or these, hints to in-game secrets that didn't actually exist. (Two of his conversation topics are legitimate in-game secrets, but you'd be forgiven for dismissing them as more lies given all his other blatant lies.)
* Easter Egg regional office: one of the desks in the interrogation area is smeared with blood and has a skeletal forearm and a pair of handcuffs on it.
* Easter eggs, a krogan's head can be seen in the room of hunting trophies at Halamshiral Palace; apparently a krogan ended up on Thedas at some point and was killed and taxidermied.
* Easter Eggs as all the characters appear with the knowledge that they are animated characters in movies and shows, i.e. like in-universe celebrities.
* Easter Egg shows that it is dedicated to Joe Joos Jr, who made several interesting pinball toys.
* Easter Eggs; in the pilot episode one may spot Nibbler's eye and shadow around the table Fry was sitting on, while Leela's one-eyed parents may be spotted among the sewer mutants in a background shot.
* Easter Eggs of everyone else who's always right (from the producer to "the guy with the green broom"); the fourth is that the writer is always wrong; and the final one is that there's no such thing as net profits, but don't tell the writers that.
* Easter Egg: Some of the work's content can only be revealed by the right real-life circumstance or audience interaction.
* Easter Eggs that can be found by repeatedly doing things that most people would stop doing when nothing happened initially.
* Easter Eggs the Prince was magically cursed into looking like a Beast, which would be hard to reconcile.
* Easter Eggs, they're still at it. Strong Sad asks, "Should we stop?" Strong Mad nixes him: "KEEP IT ROLLING!"
* Easter Egg: "The Cheatcakes: Only liars and thieves eat Grumblecakes, and those people go to prison! Just ask The Cheat!"
* Easter Egg," the fan nickname for Roxy/Jane which is based on their pink and light blue chat colors.
* Easter Egg. (The "prank" in this prank call is half the subversion of the joke, and half the fact that you're a visitor to the Underground and don't own a refrigerator in the first place.)
* Easter Egg: The programmers hid some sort of secret in a video game.
* Easter Egg. These include "The best show you're watching right now."
* Easter Egg: The subject of many video game Creepypastas are about material hidden in the game that has some disturbing secret.
* Easter Egg, the world seed used to generate the world must be 05162020: referencing the date May 16th, 2020- the release date of Terraria's 1.4 update.
* Easter Egg was full of paper airplanes and other bizarrities, and the final boss was a Slot Machine. And then you are stuck flying and shooting at the credits and thus, you must reset the game.
* Easter Egg where Ardus points out it's rude of him to go barging into a room he

doesn't know is his.
* Easter Egg, where forum members familiar to the devs were eulogized.
* Easter Egg where if you press the special attack button during certain parts of the cutscenes, you get an outtake of that part.
* Easter Egg with the Wayland-Yutani logo on the UI for a piece of advanced military artillery
* Easter Egg, you come across three splicers talking about what happened to the protagonist of the first game and two of them suggest that he took either the good ending or the bad ending. The one who states that Jack took the bad ending that "heck, and if anyone messes with him, he's got a nuke".
* Easter Episode was written where Steve goes on an easter egg hunt, by going to the library and hunting down Easter Egg; creator Joseph Scarbrough scrapped the idea on the grounds that it somewhat defeated the purpose of Easter Egg as a character, and figuring that any local library would probably not give him permission to film the entry.
* Easter Fever, the villain Madame Egg was voiced by Jeri Craden, however her singing voice was provided by a man singing in falsetto.
* Easter Lambs and their moulds are marketed to Christian consumers who wish to avoid pagan symbolism and associate the season with the death and resurrection of Jesus Christ. They are a reference to Jesus being known as the Lamb of God.
* Easter mage Ahrimadz once came to Duckburg to unleash a demonic invasion from another dimension in retaliation for the expansion of the Western culture wiping out the culture of his home country and turning him from the respected figure he had been raised to be into a relic of the past. While Paperinik is equipped with far more powerful weapons than usual and supported by an AI commanding a battle drone, Ahrimadz manages to overcome him (partly thanks to having diffused a mist that slowed them down), and is only stopped when the monks of Dhasam-Bul intervene.
* Eastern Bloc or otherwise difficult people back home as diplomat mail.
* Eastern Catholic priests (the one in communion with Rome) are a double subversion—they can be married men, as long as marriage is done prior to ordination. In both Eastern and Western (read: Roman) Rites, once you are ordained, you can no longer marry.
* Eastern Championship Wrestling, so hardcore violence ended up being ECW's legacy.
* Eastern Condors at first seemed like a comic relief villain (mostly due to his weird laugh) but turned out to be an incredibly intense martial artist at the end of the movie.
* Eastern Condors: dropping into the back of an army truck with two grenades in his hands, then pulling both pins out with his teeth and using them to hold the soldiers in the back of the truck hostage.
* Eastern Condors: During one of the fight scenes, a Vietnamese soldier has a live grenade shoved into his mouth and the pin pulled: with predictable results.
* Eastern Condors in a jungle, where he distracts said mook by kicking a coconut at him, and when the mook catches the coconut, Yuen Biao lands a flying kick that knocks out the mook.
* Eastern Condors is dropped behind enemy lines in Vietnam to provide a distraction while an elite special ops team infilrates and destroys a weapons cache. However, the plane carrying the special ops team is shot down: a fact the Condors don't learn until after they jumped. Now their only hope for extraction is to complete the original mission.
* Eastern Condors join up with a band of Cambodian guerillas who are fighting the Vietnamese army. The two groups combine forces to complete the mission of locating and destroying the bunker.
* Eastern Condors: The Vietnam scenes weere shot in the Philippines, while the American scenes were shot in Canada.
* Eastern Condors to effortlessly mow down dozens of enemies in seconds.
* Eastern Condors, two of the team cling to the underside of the army truck, dropping off as it reaches the bridge to take out the machine gun nest.
* Eastern Condors were supposed to act as a distraction while an elite special ops unit went into to destroy the weapons stockpile. However, the plane carrying the

special ops troops is shot down before it reaches the drop zone, leaving Sammo and his team to attempt the main mission.
* Eastern dragons are capable of interbreeding with ponies to create a chimeric species called the long-ma. The draconequi were long-ma who migrated west. The original long-ma followed a different evolutionary path and are still around today, and deny being draconequui at all, but Discord still considers them basically the same species.
* Eastern dragons are sometimes presented as having as many wings as they do legs - pairs of both running all along both sides of their long serpentine bodies.
* Eastern European communist regimes to quite the same extremes as the Stasi).
* Eastern European features are currently highly-coveted in the fashion industry. See, for example,
* Eastern European police procedurals tend to focus more on corruption within the police force. Examples include:
* Eastern Europe has its fair share of gangsters involved in human trafficking and other criminal operations. If you encounter them, you better speak
* Eastern Europe's non-communist undergrounds left over from WWII certainly count. Many of these organizations had been fighting for nearly half a decade or more when WWII ended, and many continued the fight after the Soviets marched in and set up their clients. In many cases they were conducting guerilla warfare until the eighties. The last Polish group of freedom fighters was captured in 1965. Allegedly some of the groups were blowing up support trains for Germans on the Eastern Front. Many of them included former soldiers of the Waffen-SS Legion (often, locals who had joined the SS believing at the time that the Nazis were better than the Soviets).
* Eastern Kingdom of Mikado. He rationalizes his actions as a Samurai as for the betterment of his country and optimistically believes the best of the current rulers while choosing to turn a blind eye to the social problems that threaten to destroy it.
* Eastern Kingdoms: Excluding the Lordaeron sub-continent, you have the Stranglethorn Vale jungle and Blasted Lands desert in the south with the snowy mountains of Dun Morogh in the north.
* Eastern Orthodox version of this trope, aiming to drive out both the Nazis and Communists so they can reunite Russia under God's banner.
* Eastern Promises, a barber asks his nephew to shave a customer. Turns out it's code for slicing his throat open.
* Eastern Promises, Nikolai cuts a corpse's fingertips off quite candidly to prevent identification.
* Eastern Promises Nikolai puts out a cigarette on his own tongue. It doesn't faze him at all, but it was traumatic enough to show up on the Parents Guide on IMDB.
* Eastern Promises. Viggo Mortensen spent some time unaccompanied in the rural region of Russia his character is meant to originate from to not only absorb the dialect, but the regional culture as well. His costars did not however go to such lengths.
* Eastern regions like Kanto tend to have more rigid divides between Pokemon and humans, compared to Alola and even other regions in the east. Kukui repeatedly notes how much Ash defies the Kanto stereotype by being extremely close to his Pokemon. When the issue of Pikachu's Pokeball comes up, Ash notes that he usually has to explain it early on, but the Alolans don't notice anything odd about it.
* Eastern Roman Empire of Christians against pagans in Eastern Europe.
* Eastern RPG cliches never actually existed. But it certainly feels like they did.
* Eastern RPG, demons have taken over the Earth since humanity became extinct.
* Eastern RPG ended becoming the bestselling installment in its franchise and had a direct sequel announced in a Nintendo Direct in 2020.
* Eastern RPG, they're also a battle item that can be used to heal allies or damage enemies.
* "Eastern" Spirituality in so many of its glorious forms is really a Western imagination of something deemed excitingly exotic, peaceful and, well, "spiritual", and most of all, full of opportunities to escape one's dull life.

* Eastern Standard Tribe opens with Art on the roof of a pysch hospital and is split between the present and past storylines.
* Eastern Zodiac: Constellations and personality types are (mainly) determined by what year you were born in.
* Eastern Zodiac, or works that adapt from it, the Cat is sometimes treated as the 13th and additional element to the group generally consisting of its twelve signs.
* Eastern Zodiac used teamwork (and a conveniently placed raft) to sail across the river and head to the finish line together.
* Eastern Zodiac used teamwork to sail across the river and head to the finish line together.
* Eastern Zodiac: Zodiacs from East Asian countries that tie animals into personality types.
* Easter Parade: At least until about a half hour before the end, Hannah loves Don, Don loves Nadine, Nadine loves Johnny (for his money), and Johnny loves Hannah. Then, of course, Don loves Hannah ("Why didn't you tell me I was in love with you?"), Johnny gives his blessing, and everyone forgets about Nadine.
* Easter Parade, Hannah accuses Don of not noticing her as a woman, and to prove it, she closes her eyes and challenges him to tell her what color they are. He answers, "They're brown" and kisses her.
* Easters of the Dead. It's noteworthy as Michael Crichton explicitly noted he required a cultural outsider for audience surrogacy purposes in his retelling of Beowulf. He also subverts it by putting footnotes in to outright explain the differences in both historical context and religious differences Ibn experiences in contrast to the target audience.
* Easter Specials episodes apart, and in the same series to boot! It can be assumed the writers believed none of the kids from 2017 would be watching the anime by 2019.
* Easter Yeggs, After Bugs gets an egg trown on his face and his leg bitten by the little boy, the two end up getting into one of these.
* Easter Yeggs. The other end of the log has somehow been made into a Tunnel of Love, and Bugs and Elmer are in a boat embracing, until Elmer snaps out of it, and the chase resumes.
* East Europeans who immigrated to the West tend to have this reputation because of difference in culture.
* East German bobsled Captain Yushuf Grull, he was very antagonistic towards the Jamaican bobsleders in the Disney movie Cool Running. In reality the Germans were very encouraging of Jamaica. There was no bar fight at Ranchman's, and being antagonistic AFTER athletes have signed the truce wall, and partook of the Olympic truce oath would have caused an international incident.
* East German" joke, although it's been told as a Russian/Soviet "Vovochka" joke, as well.
* East German skier whose mind was swapped with a goldfish in order to prevent "the Reds" from winning the 1986 Winter Olympics.
* East Germany by running a checkpoint in a truck. Loaded with dozens of propane tanks on the bed. As expected, none of the guards shot at the truck or tried anything to make it crash and instead just ran out of its path and let it pass through unchallenged.
* East Germany had the best standard of living... of the entire 2nd world communist bloc and despite being placed right next to its western counterpart that had one of the best standards of living in the 1st world. Still, it has a much better rep in former East Germany than other communist regimes in their nations.
* East Germany (if particularly scary secret police), but what puts them into this trope is the Felix Dzerzhinsky Guards Regiment, a rather large paramilitary force (about 11,000 at its height) used to secure ultra-important government and Party facilities and generally terrorize the people when necessary.
* East Germany. It was originally written as an over the top satire on communist propaganda (the chorus translates to "The party, the party, is always right"). Still, they took it seriously and played it on official occasions.
* East Germany. Post-unification, many people pointed out the new, "liberal"

attitudes were a step backwards for the east, particularly obvious when the pre-war 'Kinder, Kirche, Küche' slogan reappeared to discourage women from continuing to work.
* East Germany. This included diesel, industrial lubricants, kerosene, jet fuel... and margarine.
* East is East is about a Pakistani father struggling to come to terms with his sons being drawn more to British youth culture than his own Islamic values.
* East is East recently, but the underling in question bought the land decades previously, well before Maui oceanfront property values skyrocketed.
* East Lynne: A woman is convinced by a rival of her husband that her husband is having an affair, and so agrees to run off with him. But the rival abandons her, so she returns to her former house in disguise as a governess to her own child. When she reveals herself to him, he dies. Everyone then finds out who she is, but she falls ill and dies shortly thereafter. Her melodramatic cry on her child's death, "Dead! And never called me mother!" is still quite well-known today.
* Eastman Kodak didn't want to allow Simon to release the song as written. Eventually they agreed, but only if it was
* Eastman Kodak, left a note saying "To my friends, My work is done. Why wait?"
* Eastman Kodak's song "Give Me Everything", and is still used in Quebec as a colloquial term for a photo camera.
* East Meg One used a literal Rage Virus as a precursor to invading Mega City One.
* East of Desolation And he'd never in his life seen "his widow" before she turned up along with the investigators.
* East of Eden, Abra incinerates Aron's love letters when it becomes clear Aron cares more about his moral causes than their relationship.
* East of Eden, Adam Trask's wife Cathy walks out and leaves him the parting gift of a bullet in the shoulder. When the sheriff questions him, he says that the gun went off while he was cleaning it. Since Adam is a cavalry officer and a really bad liar, this doesn't really fly.
* East of Eden) and Jo Van Fleet's performance, Kate seems like a far more sympathetic, tragic figure in contrast to the "born without a conscience" villain she was in the book. It's strongly hinted that she regrets leaving her two sons, and she shares a couple of nice moments with Cal.
* East of Eden being partly about the author's family, obviously has him there a few times, mainly in one intercalary chapter explaining one of his Uncles. But it's most notable that he has a scene where Adam Trask shows up to his mother's house to speak with his Grandma, and they meet as John Steinbeck and his sister stand behind their mother.
* East of Eden burn down her family home, killing her parents trapped inside the house, and flees from Boston with what was inside the family safe.
* East of Eden, Charles, Cal, Abra, and especially Cathy are gifted at this, reading and manipulating the people around them to frightening effect.
* East of Eden— one of Cal's favorite hobbies is to tease and taunt his twin brother Aron. But he always makes sure not to take it too far, for if Aron starts crying, he becomes violent and dangerous to deal with.
* East of Eden's acting career was limited to television and extra work.
* East of Eden. Seeing Lee's struggles in trying to fit in, Sam Hamilton suggests perhaps he might go " back" to China. Lee reminds him that he was born in Grass Valley, CA, grew up in California, and went to the University of California, and he DID try going to China, only to find that he fits in less there than he did in the States because things changed so much since his father's time.
* East of Eden, things go the same way with Adam's twin sons, Cal and Aaron.
* East of the Sun and West of the Moon, the heroine wins the hero from the troll bride by washing his shirt clean.
* East of the Sun, West of the Moon", a bear marries a young woman in exchange for making her poor father rich and reveals to his wife that he's a cursed man who must take bear form by day and can only shed it in the dark. It shares several themes with "The Singing, Springing Lark" and the Greek tale of Eros and Psyche, including the betrayal of trust revealed when her candle's wax falls on him, the wife's

search for her husband, and the winds' gifts to her being used to buy the right to be with him for a night.
* East of the Sun, West of the Moon", the stepmother enchants her stepson into a bear out of revenge because he would not marry her daughter.
* East of the Urals, there’s also the Central Siberian Republic, a democratic state founded by prominent Soviet intellectuals with dissident sympathies. It saw some brief success, but also collapsed when its own generals (
* East of West is filed with all types of gunslingers, which is to be expected from a comic book series that draws a heavy amount of inspiration from the Western genre. Just about every major character is expected to be some sort of master gunmen, but the two most notable ones are The Ranger and The Horseman of Death. Both of whom posses superhuman levels of marksmanship, making Trick Shot experts.
* Easton Corbin- "I Can't Love You Back" is about how many different ways the narrator loves his ex, but as much as he loves her, he knows it wont bring her back. The music video actually plays the ex's
* Eastpak backpacks have a lifetime warranty all over the world, but the warranty is limited to "only" 30 years in Germany, the maximum allowed by the civil code since lifetime warranties are illegal.
* Eastshade, a huge moon hangs in a stationary position above the horizon. Every day at noon, the sun passes behind it, causing a short-lived false "nightfall" as the moon eclipses much of its light and warmth.
* East Tennessee State, which left two years after VMI, also came back in 2014.
* East, the main character, Rose, was born to replace her dead older sister Elise, her mother's favorite child. In one of the sections, Rose narrates: "Mother was always telling me about Elise — how good she was, how she always did as she was told, how she stayed close by, and what a great help she was to Mother in the kitchen."
* East (they only reveal it to the POV characters after the engagement).
* East Timor about the local villagers and their impending plight in the face of military aggression.
* East Timor periods, but for Anarchists and (during the Monarchy) Republicans. The Carrascalão family, prominent in East Timor politics, are the descendents of an Anarchist who was deported there and later got rich with a coffee plantation, even becoming Mayor of Dili (the country's capital).
* eastwards off Floyd Bennett Field, stating that the weather would have made it impossible for a more direct take-off route. Upon arrival in Dublin, he claimed to have followed the wrong end of his cockpit compass, and thus had gone east instead of west. Corrigan's safe landing was followed up by his immediate arrest and his plane was thereafter packed into a crate for a long voyage back to New York by cargo ship (the Irish court forbade Corrigan from flying home). While few actually believed Corrigan's story, which he maintained until his death, his daring won him many admirers at a time when the United States was reeling badly from the effects of the Great Depression.
* East West 101 has a Token Polynesian cop. It also has a Muslim Arab-Australian cop, but in that case said cop is the main character, so "token" would be stretching it.
* Eastwick and leaving her in silent awe. She struggles to keep her eyes off his crotch for the rest of the conversation.
* Eastwick — though it's not clear if she still has a drawer for her ex-husband as well.
* Eastwind Airlines Flight 517 had suffered an identical malfunction, with catastrophic results. This time, however, the flight crew was able to regain control and the plane landed safely.
* Eastwood told biographer Richard Schickel that he lost his virginity at age 14. He has fathered at least seven children by five different women and been described as a "serial womanizer". According to biographers Marc Eliot and Patrick McGilligan, Eastwood always had a strong sexual appetite and had many affairs with women through the years, including actresses Catherine Deneuve, Jean Seberg, Peggy Lipton, Kay Lenz, Jamie Rose, Inger Stevens, Jo Ann Harris, Jane Brolin, Jill

Banner, script analyst Megan Rose, and swimming champion Anita Lhoest. Biographers claim he has also fathered at least four children that have been aborted and another who was given up for adoption in 1953. Biographers and friend Paul Lippman have claimed that Eastwood was particularly sexually active and promiscuous in the 1970s and that he used his apartment close to the Hog's Breath Inn which he purchased in Carmel in the early 1970s to meet young ladies for "nooners" and "five in the afternooners". According to Lippman, "Eastwood seemed to get a bang out of this kinkier side to himself and rarely concealed it, often gloated about it".
* Easy A, but she is willing to let her reputation be ruined to rescue a friend from bullying, preserve her favorite teacher's marriage, and otherwise help people.
* Easy A: Flashbacks take place mostly around the middle of the decade.
* Easy A is also based heavily on this trope, with the entire film revolving around Olive attempting to keep her lies concealed, which eventually builds to ridiculous consequences.
* Easy A is repeating his senior year of high school for the fourth time. This becomes a plot point of some note later in the film.
* Easy A lies to her best friend that she has a date to get out of spending the weekend with the latter's nudist parents. The friend immediately assumes sex was involved, and the conversation is overheard by an uber-Christian girl who makes it her mission to turn everyone in school righteous. Instead of stopping the rumors, Olive chooses to perpetuate them, as it makes her insanely popular in school... at first.
* Easy A — sleep with him at a party so he can pass for straight and not get bullied.) It's a surprisingly tender and sweet moment, considering it comes at the tail-end of one of the funniest, most over-the-top scenes in the movie.
* Easy Amnesia: Characters who have lost their memories usually try to recover them, and frequently succeed.
* Easy Amnesia: Developing amnesia through something as simple as being hit on the head.
* Easy A, Olive is usually paid for pretending to have sex with people in gift cards from various stores. The lowest price she ever accepts is soon-to-expire vouchers for the foreign language arthouse cinema.
* Easy A Olive makes up a relatively innocent and tame story of how she lost her virginity over the past weekend, but the rumor mill spreads it so far and blows it so wildly out of proportion that she gains a reputation as a slut almost overnight. When talking to Brandon, a friend dealing with torment and bullying due to his sexuality, she mentions how drastically a person's social status can change after a single juicy story and she agrees to pretend to sleep with him in order to convince the school he is straight. This is amazingly successful (For him, anyway) and soon many other unpopular boys are coming to her for help looking cool.
* Easy A, Olive's grandmother sends her a greeting card that plays the song "Pocketful of Sunshine." Olive hates the song initially, then begins to like it, eventually enough to make it her ringtone. When Olive's phone rings later in the film, other people have the same (bad) reaction to hearing the song for the first time.
* Easy A, paint himself blue, wear devil horns, and kick off each basketball game with a dunk. However, they recently switched to being the Woodchucks, meaning he now has to try and do that same dunk while wearing a full-body woodchuck costume (complete with an oversized head), with often limited success. This has earned him the nickname "Woodchuck Todd." However, while the mascot is seen as a complete joke by the students, Todd himself is still reasonably well-liked.
* Easy A: Rhiannon joins Marianne's Christian group when they protest Olive for being promiscuous because she found out Olive went on a date with a boy she had a crush on. Ironically, Rhiannon proudly declared herself a "super-slut" earlier in the film.
* Easy As KGB segments, featuring Col. Ninotchka (a typical anti-American Russian wrestler) on the phone with her very stupid subordinate, Vladimir.
* Easy A slowly becomes addicted to the song "Pocketful of Sunshine" by Natasha Bedingfield over her weekend, and is shown singing it in the shower as she grows to

like it more and more.
* Easy A: The film is built around this trope: the protagonist pretends to have had sex once, and when the whole school starts to slut-shame her for not being a virgin she decides to make the most of it.
* Easy A. The film makes fun of Oblivious Adoption when Chip (who is a black kid in a white family) casually remarks "I'm adopted" in conversation over breakfast and Dill, the dad, exclaims "What! Oh my God, who told you?!" in mock outrage. Chip's mom and big sister are both amused.
* Easy A, the main antagonists have this mindset and bring it down hard on our poor protagonist.
* Easy A, when Brandon asks Olive to pretend that the two of them had sex, he goes through a list of these:
* Easy A, when Brandon runs away, he leaves his parents a note that says, "I'm gay, bitches!"
* Easy Communication games. Why? Because it's frustrating to command something and have troops not do it simply in the name of realism.
* Easy Company, 506th Parachute Infantry Regiment (pictured above), as described in the book and
* Easy Company were all but cutting cards for who got to inflict this trope on
* Easy enough to do at a fair number of highway interchanges in the US, Especially from an Interstate to a US Highway or one Interstate to another. There will be two different exits, one for each direction the cross-road runs in, usually labelled as <number>A and <same number>B. Within Cities, it can be even worse, with exits for two or more different streets all exiting in quick succession.
* Easy Evangelism: If you're against us, we'll know if you're not a lost cause based on how quickly you realize the error of your ways once we make you aware of it.
* Easy Evangelism: You can instantly convert a person to a different belief just by informing them that this other belief exists.
* Easy Evangelism: You succeed amazingly well at persuading someone to share your worldview.
* Easy Exp: Non-standard way to gain XP (experience/experience points).
* Easy gravity: the first type of artificial gravity. Cheap to generate, but easily overruled by hard gravity, and sufficiently variable to make some people seasick.
* "Easy" has little to do with the song itself, and a lot more to do with bloodstained warped-fairytale imagery. The crows don't help.
* Easy Impersonation — When a hero is impersonated by someone in a not-even-similar costume.
* Easy Impersonation: A hero is impersonated by someone in a not-even-similar costume.
* Easy Impersonation page) so they can get away with anything. The mayor is fine with this as well.
* Easy is tasked with rescuing a number of British soldiers trapped behind enemy lines, though both sides do get along very well after the success of the mission. The British troops are survivors of the disaster at Arnhem, and assemble seemingly out of nowhere in near-total darkness with impeccable discipline when signaled, leaving the men of Easy visibly impressed with their fieldcraft.
* Easy, just look for any time he's paired with Jubilee. He'll go Blue Oni quick enough then.
* Easy Living begins with a mink coat landing on an unsuspecting girl leading to a sustained case of misunderstandings, and ends the same way with another girl getting rained on by a fur coat, suggesting the same thing happening once again.
* Easy Living, everyone thinks Mary Smith is J. B. Ball's mistress, because he gave her a sable coat and bought her a hat to match it.
* Easy Living, there are so many pratfalls that it's hard to count them all. Being a Preston Sturges script gives you an idea why this is the case.
* Easy Logistics here. And when a kinetic weapon runs out of ammo, it stops firing entirely, whereas an energy weapon-armed ship with depleted energy reserves will

keep firing at a reduced rate. Thus, ammo-based weapons are entirely not recommended for OOS combat.
* Easy-Mode Mockery for using a handicap, and beating the high score in each area unlocks some stuff).
* Easy-Mode Mockery: Modern gaming's increased focus on accessibility for disabled gamers along with the desire to appeal to more casual gamers has discouraged game developers from implementing genuine mocking uses. However, serious penalties for using easy modes (such as fewer points gained) in games centered around player skill are not considered objectionable.
* Easy-Mode Mockery: Penalties for playing a game on an easy difficulty level vs. bonuses for playing the same game on a harder difficulty level.
* Easy-Mode Mockery: The game makes fun of you for playing on an easy difficulty.
* Easy-Mode Mockery. The True Final Boss, Lumine, can only be fought on Normal and Hard modes.
* Easy Money having to transport a gigantic wedding cake in their van. After laboriously loading it up, they do some other errands before having to brake suddenly, sending the cake smashing into the windshield. Something of a Lampshade Hanging, as the sequence seems to play on the audience's expectations that the cake will be destroyed, and it takes so long to happen that they may start to doubt the film is going to do it.
* Easy Money, Mrs. Capuletti says this was when she fell in love with Rodney Dangerfield's character, adding that he paid the operator a dollar to stop the ride with them at the top.
* Easy Rider: Billy is shot by a redneck trucker. As Wyatt goes to get help, his bike gets shot and blown up.
* Easy Rider. In more modern times, "outlaw" culture has become embraced in the South, and bikers dressed like them wouldn't be seen as anything particularly noteworthy.
* Easy Rider was a disastrous failure that got him blackballed from Hollywood for years. It would be 14 years before he directed again.
* Easy Rider was made on a shoestring budget, later sold for distribution and became a huge success and the definitive counter culture movie.
* Easy Rider who eventually gets so offended by the car and its carefully-enunciated features that he ends up booking the driver for "sassin' a law officer."
* Easy Road to Hell: A character ends up going to Hell all because of one bad thing they did in life.
* Easy Road to Hell, any transgression you commit will damn you to Hell.
* Easy Road to Hell: Doing any bad thing at all is enough to condemn you to Hell.
* Easy Road to Hell: Doing just one bad deed is heinous enough to condemn you to Hell.
* Easy Road to Hell: Doing one bad deed will instantly condemn you to Hell.
* Easy Road to Hell: Doing one bad thing will instantly condemn you to Hell
* Easy Road to Hell: Don't do that small bad deed or you're going to hell!
* Easy Road to Hell: The path to hell is easy, and decided by factors beyond your control.
* "Easy Street" is another. Guy and Hannigan never really do the sexy dancing, the whole thing is a conversation over dinner, with the song as kind of a punctuation of Guy's plan.
* Easy Street, The Tramp whacks The Bully over head several times with his nightstick while The Bully's back is turned. The Bully doesn't even notice till he turns round.
* Easy Street: While attending the mission service, The Tramp holds his hymnal upside down (and sideways at one point).
* Easy Street, who is the new cop on Easy Street, has to find a way to defeat the bully.
* easy to miss, which shows that she gave the other earring to her older brother for good luck, only for him to die during the Earth-Minbari War.
* Easy Virtue but Larita's presence and John's lifestyle evoke the spirit of the Roaring 20s - and how it clashes heavily with a conservative English countryside

still mourning World War I. Other characters like Sarah seem like they're on their way to embracing the free-spirited lifestyle.
* Easy Virtue meanwhile believes there's some kind of spark between them.
* eat are performed by actors with Hawaiian, Samoan, or Māori ancestry. The only singing done by non-Polynesian performers is Chief Tui's singing (performed by Christopher Jackson), and the English portions of "We Know The Way" (performed by Lin-Manuel Miranda).
* EATATAU!!! has an extreme fetish for guys who are much bigger than she is.
* Eat Brain for Memories: Gaining someone else's memories by consuming their brain.
* Eat Brain for Memories: Memories are transferred through the consumption of brain tissue.
* Eat Bulaga, to the point that it is his most-downloaded song on iTunes.
* Eat Drink Man Woman, after Jia-Jen gets completely frustrated by her neighbor's loud karaoke sessions, she drags two large speakers from the living room, points them towards the neighbors, and begins playing classical music at full blast.
* Eat Drink Man Woman: A master chef has lost his sense of taste, but still tries to connect with his alienated daughters through food.
* Eat Drink Man Woman Considering he's known her since his daughters were kids, that's a pretty big gap.
* Eat Drink Man Woman gets pregnant after sleeping with her boyfriend once.
* Eat Drink Man Woman, Jin-Rong is shown pregnant with Chu's future daughter.
* Eat Drink Man Woman. They get together regularly to chat and to knock heels, but otherwise prefer to see other people.
* Eat Drink Man Woman. When he starts making school lunches for the little girl next door, she soon gets students mobbing her in the cafeteria with orders for the next day's meal.
* "Eat", 'Eat what?', "Eat Self", "auto-cannibalism is not the answer."
* Eaten Alive and revealing that the titular girl inside the painting doesn't like her own world, questioning why Becky would want her life.
* Eaten Alive and Yugopotamia is safe... except one stray Gigglepie inside an Invader O's box has somehow ended up at the Turner house.
* Eaten Alive being run by a crazed war-veteran who keeps feeding people to his pet gator.
* "Eaten Alive" by Diana Ross (covered by Michael Jackson), although probably meant more symbolic. That said, the original
* Eaten Alive by various animals. At the end, the narrator insists we shouldn't be sad for them, since they were made of sweets. Ironically, this reassurance gives the song an even more unsettling feel.
* Eaten Alive. Things become more hopeful following the revelation of Eren's Titan powers and the fact that they recaptured Trost from the titans. There is also an ongoing plan to recapture Wall Maria, lost at the start of the series, from the titans that eventually succeeds.
* Eaten Alive: What you want to avoid in this genre (but often can't).
* eat episode "The Death of the Doctor". She doesn't believe it for a minute.
* Eater of Souls be to blame, even going so far as to remind his son to wear protective amulets while investigating.
* eaters demonstrate that even these rather improbably resilient devices were still quite vulnerable to advanced weapons.
* eat hope... with only five ships. Granted, only one made it to the surface, and it was promptly destroyed, but this is a whole lot more than pretty much anyone else has done in millennia.
* eat humans. When she and Kaladin find one in the chasms, he keeps having to drag her away while she tries to get a better look at it for her sketchbook.
* eating a cage he was trapped in certainly qualifies, especially because he's captured again before he achieves anything. The whole scene serves no purpose but Rule of Funny.
* eating a gun". For example, the infamous "Bjork Stalker", according to the FBI, had intended to cover a sign situated behind his head with blood and gore by shooting himself in the mouth. But the bullet he used was too small a caliber and

didn't exit his head (as a result, the suicide video - and yes, it is online if you really want to see it - is actually bloodless, though he still bled out off-camera).
* eating a lot fights, this lack of speed tends to put him at somewhat of a disadvantage. They compensate for this by teaming up with the Yamanaka and Nara Clans—the former can control their opponent's mind, and the latter can immobilize them physically.
* eating a pile of yogurt after the events of the episode. It's never made clear to the viewers whether he was hallucinating them or really eating.
* Eating a pufferfish gives you the Nausea status effect, which causes the screen to wobble and wave for however long the effect lasts.
* eating a steak, mentioning that the taste was "interesting", while other cows stared in horror.
* Eating a whole cake would make most people sick, so Trunchbull was probably hoping he'd vomit in front of the entire school so she could make him walk around in vomit-covered clothes all day.
* Eating celery makes your character lose weight because, as the flavor text states, it costs more energy to digest celery than it provides. This is an urban legend. Eating celery provides calories.
* Eating Contest: A contest to see who can eat the most of something, or the fastest or whatever.
* Eating dogs or cats is considered normal in parts of East Asia and West Africa (as long as they are dogs and cats you
* eating everything he owns. One attempt to dispose of him fails when the goat eats the half of the screen the farmer was standing on.
* eating her alive and unable to wake her, Jake lured a different colony to her hoping the war would buy enough time for her to wake.
* eating himself and we get this exchange when Flanders invites him over for a barbecue.
* Eating human brain is (or was) a practice of several cultures, either as a funeral rite or just part of eating people. It's usually for the purpose of taking knowledge, gaining immortality, or whatever.
* eating humans, cobras and kraits on the Indian subcontinent do kill them with some frequency. These venomous serpents are also preyed upon by king cobras, which are specialized snake-eaters.
* eating humans once the barrier went up, they just had more restrictions on it. Anyone caught outside designated safe areas at night are fair game, as are any humans from outside the barrier, with youkai going on not-infrequent trips to abduct and eat people. Most of the human characters are friends with youkai without this ever being brought up.
* Eating Lunch Alone: A student eats lunch alone because they are new and haven't made friends yet or a social outcast.
* Eating lunch at 2 AM? That's weird - even though that's what almost everyone calls the meal they eat in the middle of their shift.
* eating objects He also drank large amounts of mineral oil to help wash these things down. He didn't suffer any kind of health problems from his diet, although he did mention bananas and hard-boiled eggs made him sick.
* Eating Optional: They often have urges to feed despite not really needing to.
* Eating Out where a man and woman spot a lesbian couple in a bar and have an argument over whether or not they are lesbians. The woman believes they are and the man stubbornly hangs on to his belief that they're not, even when he sees them making out, because "they don't dress like lesbians" and "a lesbian couple can't both be femmes."
* Eating Pet Food: A character mistakenly eats pet food, thinking it's human food.
* Eating Pet Food: Stupid characters get pet food confused for people's food.
* Eating Raoul, a couple wishes to open a restaurant, but has nothing to offer the potential backer except the title character, whom they have just killed (for unrelated reasons). "This is delicious. Italian?" "No, Mexican."
* Eating Raoul is about a middle-class couple who try to get the money to open

their dream restaurant by killing perverts, or at least "perverts" according to their lights. The trope is only played out completely straight once; most of their victims' bodies go to a dog-food company but the ending implies that it may have become a regular occurrence at the restaurant.
* Eating Raoul later, as one of the swingers at the big party complains vaguely while recounting a half-heard story, "Some Basket Job!"
* Eating Raoul, the main couple, Paul and Mary Bland, are portrayed as this. And the introduction of the sexy thief Raoul puts their situation into turmoil.
* Eating Solves Everything: The best solution to a problem is eating something (like the problem itself).
* eating spaghetti onstage where Phill Jupitus asks for Parmesan and prompts this exchange:
* eating students, the slightest of infractions can get a student sent to detention, which is a death sentence.
* eating the corresponding neutral creep, which also earns him a bit of bonus gold for good measure. This alone lets Doom customize his abilities and items for any situation. Add on some innate tankiness, respectable damage output, and an ultimate which translates to "neuter target hero for an entire teamfight" and you've got a particularly versatile hero.
* Eating the Eye Candy when Gilderoy Lockhart makes an appearance). Their marriage is shown to generally be very happy and loving and, with seven kids, they obviously don't lack for passion.
* eating the Mirror will cause the victim to die if it is not recovered; in addition, breaking the mirror will render the victim comatose, though they can be revived by repairing the mirror. The Star Seed will cause a person to fade away if taken far away or if the person is a Sailor Senshi (due to it doubling as a source of their powers). If it's a normal person and it remains close by it will turn them into a Phage or Fake Sailor Senshi (even men).
* eating the reproductive organs by the nematode going close to a source of water before the parasite leaves its host. Needless to say, the poor spider usually dies just before or after the worm bursts out.
* Eating wild berries then chasing imaginary butterflies and doing something highly illegal.
* Eat Lead: The Return of Matt Hazard complete with pointless animated gifs and one of those Java "lake reflection" headers.
* Eat Lead: The Return of Matt Hazard eats, drinks and breathes this trope. The developers even went as far as adding fake fansites detailing the non-existant Matt Hazard games.
* Eat Lead: The Return of Matt Hazard of enemies you've been fighting throughout the game (again with seemingly no ironic invocation of it).
* Eat Lead: The Return of Matt Hazard, she actually flirted with Matt, and gave nothing but bad advice.
* Eat Lead: The Return of Matt Hazard that the dancers in the nightclub are just robots to save memory, explaining their bad dancing.
* Eat Lead: The Return of Matt Hazard, where Matt says his catchphrase "It's hazard time!" before doing anything. Everyone makes fun of him for it.
* Eat Lead: The Return of Matt Hazard which weapons are considered the Nerf Arm.
* Eatle's design for the events of Five Years Later depicts him with wings and the ability to fly, giving him further divergence from Upchuck.
* Eat Local (2017), a chicken lays an egg after a vampire snarls at it.
* Eat-Man has very little to do with the original story other than Bolt Crank being the main character.
* Eat-Man on, you'd probably never notice most of them if they're standing behind him.
* Eat-Man: The protagonist Bolt Crank has the ability to eat anything and then manifest the consumed objects from his body at will. He especially likes metal, and is often shown snacking on bolts and screws.
* Eat-Man. The protagonist Bolt Crank has the power to eat anything made of metal, and then produce the fully functioning original item at will. Naturally, this

usually translates to a hero who can pull out massive firepower when he needs it most (though, mercifully, he pulls it from his arm rather than his ass).
* Eat-Man who has established a precedent for disposing of adversaries' weapons by devouring them.
* Eat meat. Lots of it. In the event that that they are eating salad, it is because their doctor/wife/girlfriend makes them, and they are very vocal about telling you this. And apparently yogurt is literally invisible.
* Eat Me's description states: "May contain dairy, carnage, puzzles, nuts."
* Eat Me: Someone wants to be swallowed (whole) by a monster, so they can kill the beast from inside their belly.
* eat parts of themselves if they're wounded and there's no other viable option.
* eat people, though, and elven soldiers only carry wooden weapons and armor, they tend to be seen more as annoying than terrifying.
* Eat, Pray, Love is about a woman who realizes she is unhappy in her marriage, divorces her husband, and travels around the world to find herself.
* Eat, Pray, Love is the outright rejection of Western materialism, yet that didn't stop companies from creating as much tie-merchandise as possible - from perfume to tote bags, fashion lines to tour packages, restaurant tie-ins to embroidered pillows, jewelry to lip gloss, even gelato machines and more.
* Eat, Pray, Love sometimes invokes this trope - especially during her contemplations on Indian spirituality.
* Eat, Puke and Be Wary", Scott sets out various snare traps for Fang. Instead of the mutant shark, Cameron activates one and gets swung away. The same happens to Chris, who is thrown into the outhouse's sewage. Later on, Zoey gets into the trapper game too and succeeds in capturing Chef in a net snare trap.
* Eat, Puke and Be Wary", Zoey gets into the trapper game and among others sets up a pit trap. Of all possible victims, it's Fang who falls into it, which saves Scott from being mauled by the mutant shark.
* "Eat recycled food. It's good for the environment, and okay for you!"
* eats an Angel, it is wrapped in bandages with only its eye and a toothy grin being seen.
* eats him, fearing the monster will become truly unstoppable. Luckily, Saitama simply punches his way out without being absorbed.
* eats his opponent whole and "digests" their powers. He swallows Natsu and uses his Dragon Slayer techniques, but Gray comments that they don't really compare to the real thing.
* eats. In fact, "cheese food" is real cheese... kind of. It consists of at least half melted, reconstituted cheese; and no more than half, um, other things.
* eats its sacrifices, to intimidate and eventually slaughter the Tree Dwellers.
* eats lunch over corpses and once even shocked himself by DRAWING on a body.
* Eats, Shoots & Leaves is all about proper grammar, and advocates the creation of what amounts to a guerrilla punctuation-correction squadron.
* eats vampires. The functionality of the Stone Mask was never truly explained though. Jonathan had a hypothesis that it worked by hitting key points inside the brain, but was unaware of the mask's supernatural qualities at the time.
* eat the Androids...so he can attain his perfect form and begin his own reign of terror.
* Eat the Camera: WHY ARE YOU ZOOMING INTO MY MOUTH WHILE I'M SCREAMING??!!
* eat the cherries out of the slot machine earlier that night, which Trapper also doesn't remember.
* Eat the Dog: Characters consider eating their pets when food is scarce.
* Eat the Dog: I'm willing to sacrifice my pet and put them on my dinner plate just to save my own skin!
* Eat the Evidence: Attempting to orally conceal incriminating evidence.
* Eat the Evidence: Eating something that could be evidence so you don't give yourself away.
* Eat the Evidence: If the evidence in question is something made of paper.
* Eat the Evidence: Someone tries to avoid getting in trouble by eating the evidence of what they've done.

* eat the galaxy and multiply, to the point where one of the most effective ways to deal with their ground forces is killing the larger "synapse creatures" that act like psychic radio repeaters in order to strip the swarm of its leadership. During invasions they also pre-prepare the battlefield often decades or centuries ahead of time by infiltrating genestealers into planetary populations, rather like a normal army might use covert operations forces to weaken a target before deploying the main army, and they use fairly sophisticated tactics while they fight.
* eat the kids, and if you were cool with it, we'd go from there. But this is a much better idea!"
* Eat Them Alive, a mentally unbalanced ex-con exacts vengeance upon his former partners in crime with a horde of giant killer praying mantises. The entire book is nothing but page after page of giant mantises rampaging and eating people.
* Eat Them Alive like to wrench people's heads off and smash them against rocks so they can suck out their brains.
* Eat Them Alive, who, despite being castrated and consequently unable to become aroused, is said to be deeply enticed by the sight of his giant praying mantises eating people, to the point of seeing the experience as making up for his lost manhood.
* eat them, as such — as fiends, they do not needs sustenance — but they're just as sadistic as most other fiends, and enjoy hunting demons and chewing on their flesh.
* eat themselves till being reduced to one cell if they don't find food, and then regenerate from that single cell left.
* Eat the Rich) about poor/working class protagonists facing off against wealthy snobs, and all four connected strongly with moviegoers.
* Eat the Rich: Blame is placed on the wealthy upper-class elites for causing all of society's problems, and therefore they all need to be punished.
* Eat The Rich, sacked waiter Alex returns to the restaurant "Bastards" with a gang, massacres the staff and customers, and serves them up as mincemeat to the next lot of customers.
* Eat the Rich, when Jean-Jacques Rousseau reportedly said, "When the people shall have nothing more to eat, they will eat the rich."
* eat the stinking, unnamed mass festering on the windowsill, she passes out in horror.
* Eat the Summoner: A person who frees the imprisoned evil is rewarded by being eaten by the evil being.
* Eat the Summoner: Beware, the evil inside the can might be feeling really hungry, after all those centuries of being trapped.
* Eat The Unfriendly concerns Pinkie Pie feeding Fluttershy bacon made from a stallion who attempted to rape her, then the two of them going on to kill other bad ponies to make their corpses into food.
* eat this place. Vietnam. I want to swallow the whole country - the dirt, the death - I just want to eat it and have it there inside me. That's how I feel."
* Eat To The Beat is an unusually American example of this trope, depicting a robbery on an armored car. The "hardest part" of the title refers to getting past the armed guards inside the truck.
* eat, which makes their dependence on the Combine and loss of humanity particularly symbolic. All the "vehicles" the Combine soldiers use are modified and enslaved alien races, that presumably went through the exact same thing humanity is going through, but lost horribly.
* Eat Your Feelings by Heather Whaley (based on a blog of the same name) is essentially relentless mockery of life under mental illness and other forms of stress. As a cookbook. Sort of "Sarah Silverman cooks" kind of thing.
* Eat Your Kimchi and the 100th Music Monday had an 18 minute "best of" compilation video.
* Eat Your Kimchi: At the end of every video installment there is a verbal request and banner at the bottom of the page.
* Eat Your Kimchi, base pandering is one of the big weaknesses of K-drama. The directors would change the relationships of the characters, based on what they see

the fans demand. This would lead to 180 turns where characters that hated each other, would become lovers the next episode without any logical setup.
* Eat Your Kimchi did an episode in Silent-Era style, particularly notable for a postlude featuring an encore rendition of "Shots" by LMFAO using archaic vocabulary.
* Eat Your Kimchi: This trope is often used when the show switches from Simon and Martina as commentators to Simon and/or Martina as performer in a sketch.
* Eat Your Kimchi: What happens when Simon and Martina get lost in the woods on Halloween?
* eat your memories. The Centauri quarantined its resource-rich after some of these beasts wiped out an entire colony, and news of one of those things having been shipped on the station had Londo barricade inside his quarters in terror until he was told it had been found and killed.
* Eavesdrop on any group of children playing together and you're bound to hear something kind of messed up eventually. Kids swear and play games where they "kill" each other pretty much daily.
* Eavesdropping scenes occur in many of the Shakespeare comedies, with each production choreographing their own unique method of hiding from the person whom they are listening, and this trope is used extensively.
* Eazy-E's "Boyz N Tha Hood." "Little did he know I had a loaded 12 gauge/ One sucka dead, L.A. Times front page."
* Eazy-E's "Imma Break It Down", about writing raps, performing and getting famous.
* Ebaines? spends almost all of its runtime at addressing social themes such as sexual obsession, homophobia, respect for the people with special needs, and bullying, with actual burgers making cameos at the beginning and the end of it.
* Eb. As it stands, they like to rib each other when they have the chance, though it's certainly not good natured.
* Ebaum's World Dot Com targeted at the proprietor of the titular website. It mentions that Eric has a team of Amoral Attorney prostitutes.
* eBay began because the creator's girlfriend had some Pez dispensers she wanted to sell.
* eBay, either because the sellers themselves are ignorant or because they assume the buyers are. More than likely the seller is doing it so that their product shows up in more people's searches.
* eBay. For example, former NFL lineman Robert Gallery admitted that he disliked people who did the former.
* eBay has, perhaps unsurprisingly, banned this practice, prohibiting the sale of items whose existence cannot be verified and deleting such listings as soon as they're discovered.
* eBay, many of them relics are derived from human remains, which cannot be sold on the site.
* eBay references worked into the series may have been an intentional reference to this sort of confusion.
* eBay was a relatively new phenomenon, so it is sort of believable that people would be rhapsodizing over how cool the site was.
* Ebba och Didrik, 12-year-old hopeless romantic Didrik falls hard for 23-year-old Yrla. They become friends, but she's definitely not interested in him that way, and may not even be fully aware of his crush.
* Ebba och Didrik, also a Swedish kids' TV show, 9-year-old Ebba and her best friend and sweetheart Philip love one another devotedly. They are building a house together in the woods and plan on living there, till Ebba meets Martin, a poor little rich boy with lots of flashy toys.
* Ebby once described the afterimage of an explosion in space as being
* Ebeeto, Ebeeto "transforms" into The Angry Video Game Fag whenever he is angered enough. The transformation comes complete with a video-game-inspired cutscene.
* Eben Brooks engages in one of these at the end of his filk "Hey There Cthulhu" as the narrator finally succumbs to madness. It ends with a bloodcurdling scream as he apparently succumbs to something far worse.
* Ebeneezer Scrooge initially didn't marry his girlfriend because he wasn't

established yet in his career. After a few years, though, she became upset by his obsession with having enough money and left him.
* Ebenezer (1998) adaptations to show Scrooge directly killing someone, and his character in general is extremely villainous.
* Ebenezer (1998), Marlowe says the only reason he came to help Scrooge is because at one time they were friends, which he finds hard to believe now.
* Ebenezer (1998) to the Canadian frontier, Ebenezer Scrooge is an expert marksman and quick-draw. His partner Marlowe was also this in life, to the point that when Scrooge shoots at him he draws on him, forgetting he's a ghost and nothing would happen.
* Ebenezer (1998), while Scrooge's name is the same, Jacob Marley becomes Jacob Marlowe, Belle becomes Rebecca, and "Cratchit" is spelled "Cratchitt."
* Ebenezer, as one of Marlowe's reasons for visiting is to scold Scrooge for breaking his promise to take care of Erica.
* Ebenezer itself. Jacob Marley was in a one-sided love with Scrooge's mother, swore vengeance on the family when she died in childbirth, impregnated and killed Scrooge's sister Fran, concocted a plot to make Scrooge think Emily was cheating on him with Bob Cratchit, and foreclosed her orphanage, killing everyone there while breaking Tiny Tim's leg just to be cruel. The characters repeatedly try and fail to warn Scrooge against Marley to no avail, and it's ultimately revealed Scrooge knew about it all from the start and didn't care, even though he himself attacked Emily viciously and ordered Marley to foreclose her orphanage beforehand. Scrooge's speech detailing this revelation hammers it home.
* Ebenezer Jacob Marley is a toxic influence on Scrooge and is directly responsible for heinous crimes. However, Scrooge is just as bad, and him knowing about Marley and not caring makes him even worse in some ways.
* Ebenezer McCoy appears to do this outright to choke a vampire who pissed him off.
* Ebenezer McCoy is a protector of Harry. As Harry's second mentor, after Harry killed his first evil one, he loves Harry deeply and tries to keep him safe when Wizarding politics would result in him either dead or having to work for the evil Fae Queen Mab, Queen of Winter. In the fifth book, after an enemy of Harry's escapes to his home base and Ebenezer knows he is planning some revenge, Ebenezer doesn't give him a chance.
* Ebenezer McCoy is one of the youngest members. He once nearly killed a vampire by just clutching his fist and Force-choking her with no effort on his part. He destroys enemy bases by
* Ebenezer Scrooge: "If they would rather die, they had better do it, and thereby decrease the surplus population." And you'd better believe this comes back to bite him later on.
* Ebenezer uses magic to drop an old Soviet satellite onto the enemy's mansion, killing him and many of his closest retainers.
* Ebenezer with all they'd done, including viciously attacking Emily himself and ordering the foreclosure. This is in contrast to the book, where they're simply a pair of greedy, self-interested businessmen.
* Ebenezum Trilogy think it's a catchy acronym), which seeks equal tapestry representation for all mythical beasts (including the lesser-known ones such as the Bog Wombler.)
* Eberron. 12 moons — plus the 13th dark moon, which disappeared with the sealing of the 13th plane. 12 nations in the Khorvaire continent, plus Cyre... the 13th nation, which is now the D&D equivalent of Fallout. It was made especially blatant in "Faiths of Eberron", which states that the Silver Flame celebrates 13 holidays, including one that seems to have nothing to do with anything and is just about eating pastries, and which is on its way out. The name of the fading holiday? Baker's Night.
* Eberron 3.5 has gone so far as to explicitly discourage the use of the alignment section of a monster's stats, even for those who are "tied" to a certain alignment. The core book also makes clear that "evil" does not equal "kill on sight" — the tavern owner overcharges for draft and cheats on his wife; are you gonna put the sword to his neck like you would with Lord Dark Von Doompants XIII?

* Eberron alignment with his ruthless nature, but at least he's working towards relatively good ends.
* Eberron alive and more like a mechanistic construct (as another philosophical movement advocates).
* Eberron also features inquisitives and chronicles... otherwise known as detectives and newspapers.
* Eberron, and is thus rushing to restart the war as soon as she has an advantageous position.
* Eberron and other weird stuff found in the corrupted corridors of the Realm Below; some holds have enthusiastically embraced things like living breastplates and tentacle whips.
* Eberron and refuse to go anywhere near his tower, for fear of ending up as one of his experiments.
* Eberron, and they're still active and growing stronger over the course of any given campaign.
* Eberron, and unusually added a justification: kalashtar exist from birth in psionic symbiosis with one of 66 good quori (who are kind of smeared around the larger population). You're partly human with the usual genetic randomness, part a specific immortal good creature.
* Eberron appears in Eberron it's almost always composed of warforged.
* Eberron) are also up for contracts. The setting's Gnolls have also decided to position themselves on every side of every conflict under the reasoning that that way they'll grow in power and influence no matter who wins. They refuse to fight each other though.
* Eberron are immortal constructs with souls. They must get their minds periodically wiped so that they do not go insane from an overload of memories. They can, however, vaguely recall their memories in a pinch, such that they can always make an untrained Knowledge roll for the off chance that they dig up information on a subject learned in a "previous life."
* Eberron are rather integrated, at least among the common humanoid races, so several villainous groups (such as the Emerald Claw or some Dragon Below cults) have a nicely varied make-up as well. The Inspired rulers of Riedra are also fairly unbiased in their general oppression, settling for mere dictatorial tyranny over anyone who bows down to them and cold extermination for anyone who doesn't.
* Eberron are the city's only hope against anything, as all but the lowest level of players severely overpower guards (and mid level players can wipe the floor of an entire precinct).
* Eberron a year consists of twelve months (each named after one of the twelve moons) and a week of seven days, seeming like they just came up with with fancy new names for the months and and days to seem exotic, however the months are only 28 days each, making all characters a couple of years younger in real time than they seem. Interestingly (or not, depending) there was originally one more moon, implying before the appropriate cataclysm the year and lunar cycle used to be much closer to Earth's.
* Eberron, being accurately described as land-based Vikings. The actual dwarves of the setting are geographically removed from both races and thus are neutral towards both.
* Eberron being run by an evil lich and is unwittingly aiding a terrorist organization, it really is the best chance most any common person will have to escape the afterlife.
* Eberron be the work of the gods, but that is open to interpretation. In the setting, the actual existence of gods is up to a character's belief, as the gods do not act as proactively as they do in the Forgotten Realms, for example. Fiends are the original occupants of the material plane, and their religious implications are downplayed. Angels and Devils are just Outsiders. There are even some books that suggest the gods are based on the legends of certain Dragons.
* Eberron be this. Nobody really knows for certain, as they're an artificial race that was created only a few years ago. But none of them show any signs of aging so far, and that's a good thing, too, since they can't reproduce due to being

constructs and no new Warforged are being made anymore.
* Eberron breathes this trope: With many subsequent collapsing civilization, you can tell how powerful something is by how old the civilization that invented it is, going from modern to ancient: Modern Day < Dhakaani Empire < Giant Empire < Dragon / Demon War < Progenitor Dragons.
* Eberron calling themselves the Godforged who worship the Becoming God, a construct deity that does not yet exist. The goal of their religion is to collect useful materials and artifacts, find or build a forge powerful enough to combine them, and literally build their own god.
* Eberron campaign setting, ancient giants formed a number of highly advanced civilisations across the continent of Xen'Drik. After a series of major cataclysms the empires lie in ruins. Most giants have regressed to a more primitive state, with some powerful exceptions.
* Eberron Campaign Setting, his posts regarding the world of Eberron are largely taken as "Word of God" for the setting, though he purposefully makes sure that he is ambiguous enough that DMs can make their own choices on how they want their world to run.
* Eberron campaign setting, the Ashbound sect of Druids feels this way about arcane magic (the sort practiced by Wizards and Sorcerers), although they're generally tolerant of divine magic (the sort practiced by Clerics and— unsurprisingly— Druids).
* Eberron Campaign Setting, the Draconic Prophecy tends to give "if A then B" scenarios, with various groups trying to cause or prevent A. It's more of a suggestion than a prophecy, really.
* Eberron Campaign Setting, the example character for the Dragonmarked Heir prestige class was depicted with such a dress, though for her; it had the added benefit of showing off her Dragonmark of Storm.
* Eberron campaign setting. The warforged are a playable race. Their "ancestors" (or more accurately, prototypes) called warforged titans, are not.
* Eberron campaign setting usually have deathtraps that have stood for thousands of years.
* Eberron can be this. It's left deliberately vague so that the DM can give it whatever nature he wants, but what has been confirmed about it fits: It gives people powers (Through Dragonmarks), it's pervasive and covers the material plane (leaving marks on the landscape, construction, etc). It has a will and a purpose, but those are so complex and long terms that no being can fully understand it. Dragons spend their whole lives trying to figure it out, only ever achieving small glimpses of the Prophecy's nature.
* Eberron can change appearance at will, including gender (or become genderless/hermaphrodite). They do tend to have a basic sexual identity developed during childhood, but any changeling can still procreate as either gender.
* Eberron, Cannith Goggles give a bonus to checks involving the creation of magic items if you are a member of House Cannith.
* Eberron, can occupy this role, as can Keeper of the Flame Jaela Daran, King Boranel of Breland and so forth.
* Eberron claims they aren't sure either. Divine magic is powered by faith rather than the gods themselves. (A running joke is the Church of My Left Sock.) There are divine entities at the heart of several religions (such as the evangelical religion of the Silver Flame), as well as other entities who claim to be divine, but there are also several self-motivated religions (such as the dark-themed Blood of Vol) as well as the Path of Inspiration.
* Eberron: Clerics of the Sovereign Host/Dark Six's god of death, the Keeper, have scythes as their favoured weapon.
* Eberron composed entirely of skeletons, and nobody thinks any differently about them because of it.
* Eberron D&D setting, the Mark of Shadow is a dragonmark which, among other things, grants its bearer the power to generate darkness (least Mark), call up semi-real illusory creatures (lesser Mark), or teleport between shadows (greater Mark). The two elvish Houses that are inheritors of the Mark do a lot of spy work,

and at least one of them is very much into assassination also.
* Eberron, due to the orbital movements of the planes, sets the reliability of any spell that brings back the dead by the proximity of the plane of death. When Dolurrh is furthest from Eberron those spells don't work at all, at its closest point the resurrectee has a chance of being brought back with someone else's soul or possessed by a demon, or accompanied by a horde of ghosts.
* Eberron elements hijacked by Erandis d'Vol), the Last War didn't go so hot for them (better than Cyre, at least), and the region was known for a grim and fatalistic temperament even before that.
* Eberron elements in that much of the dogma pre-dates Vol herself, she just manipulated things to repackage the dogma of a few scattered refugees to the mainland in a way that'd allow it to spread and her to exploit it.
* Eberron equivalent to Mega Corps, each with their own specializations (Entertainment & Espionage, Banking, Consummer Goods, Private Security, Animal Breeding, Notary, Prospecting, Magical Detections, Overland Travel & Teleportation, Overseas & Air Travel, Hostelling, Healing). Each house descends from a bloodline blessed with a dragonmark, a unique set of birthmarks that grant them powers and skill bonuses relating to a particular theme. Each family used their advantage to corner the market on a particular good or service, as no non-dragonmarked could really match them.
* Eberron-esque vaults) and two main orcish cultures (the orcs of the Shadow Marches have little in common with the Jhorash'tar orcs of the Mror Holds), and three drow cultures (the tribal Vulkoori and their traditions of spirit worship, the pyromantic Sulatar, and the shadowy, suberranean Umbragen).
* Eberron features a suit of armor that is essentially an armored duster.
* Eberron has a Law and Order chapter which specifies among other things that the use of various forms of mind control magic is considered a form of fraud, witness stands are commonly placed upon diases enchanted to make it harder for a witness to knowingly lie (and witnesses are required to relieve themselves of any items that may help them resist such magic before taking the stand), and Bestow Curse is among the range of punishments in use against repeat offenders.
* Eberron has an interesting variation with the Warforged. They were made to be this, but ended up developing sapience and now have to deal with integrating into a post-war society.
* Eberron has Argonth, a floating fortress, which has docking towers for airships and could potentially launch flying monster cavalry, so it probably counts.
* Eberron has a suggested hook in the "Forge of War" sourcebook that the players could either travel through time or play characters at the beginning of the Last War, and thereby attempt to prevent it.
* Eberron has a timeflow one-seventh that of the Material Plane. However, when a visitor returns to the Material Plane, that time catches up with them...
* Eberron has the Frostfell, a polar continent of ice that serves the exact same purpose.
* Eberron has the threat of one of these in the background with the Lord of Blades, a renegade Warforged leader that is gathering an army of Warforged to him.
* Eberron have these - and, indeed, magic on the battlefield is so prevalent that non-casters with the capacity to use magical items (such as rogues and artificers) are formed into squads of "wands" to provide support with the items they are named after. There are also groups of mercenary wizards, such as the Manifest Legion - a squad of hired summoners, who specialise in things like breaking enemy charges by conjuring a surprise fiendish dire wolf or three directly in the way of the approaching cavalry, with predictably unpleasant results.
* Eberron, House Kundarak fills this role, a Dragonmarked House of dwarven bankers from a mountainous country who will give anyone who can afford it a high-security vault.
* Eberron. However it points out that since magic needs wizards and the like and can't be mass-produced, a lot of magic items are quite expensive. There are "working class" spellcasters such as Magewrights who apply magic to everyday trades, and even a spell called "Magecraft" whose sole purpose is to improve the

quality of mundane goods during their manufacture. House Cannith has also managed to develop magic-powered mass-production of many products. Hence the standardized price for something like a sword anywhere in Khorvaire, since most of them came out of a Cannith factory.
* Eberron inhabits its own unique cosmology, commonly nicknamed "The Orrery" due to its maps, made up of 13 planes (though one has been "removed". Its planes are Daanvi (Plane of Law), Dal Quor (Plane of Dreams), Dolurrh (Plane of the Dead), Fernia (Plane of Fire), Irian (Plane of Day), Kythri (Plane ofe Chaos), Lamannia (Plane of Nature), Mabar (Plane of Night), Risia (Plane of Ice), Shavarth (Plane of War), Syrania (Plane of Air), Thelanis (Plane of Faeries), and Xoriat (Plane of Madness). Despite some debate amongst the fandom, officially, the Orrery is separate to the Great Wheel.
* Eberron. In practice, most DMs tend to use them as handy "guys you can punch in the face without feeling guilty".
* Eberron is a magical version of the Gadgeteer Genius. It returns as a class in the 4th and 5th editions of the game.
* Eberron is one of the few settings that averts this, the gods are so abstract it's even plausible that they don't actually exist and clerics get their magic from faith alone, which is supported by a few cults based around mortal entities or undead such as the Blood of Vol.
* Eberron is that there are multiple Sealed Evils in various Cans, with sealants as strong as the plot demands of them. There are three big ones, as well as a number of more localized ones:
* Eberron. Its towers average at around 2 km tall with some of the tallest having half to a full kilometre more. Above them is a flying district of rich people called the Skyway. The city's three dimensional nature means most of the transit takes place with flying vehicules such as Soarsleds and Skybarges.
* Eberron. Karrnath had been savaged by the war, forced to turn to necromancy and pacts with the Lich Queen Vol to survive at all. In return, Vol turned Kaius into a vampire and heavily infiltrated his government and army with her own agents. For Kaius, his "victory" was the mere survival of his people, but aside from the more traditional costs of this trope, it also took his humanity and left him beholden to one of the most powerful and villainous mages in the world.
* Eberron. Keith Baker indicated his previous response was a joke, and cleared up a few aspects of the daelkyr's appearence, while their basic shape is humanoid, how they look depends on two factors — who is looking at them, and how they want to appear. A human would see the traditional "looks like an angelic human" daelkyr, while a goblin would see an equally appealing goblinoid. It's stated in multiple sources that the daelkyr only have the flaws they want to have, but the symbionts they wear are fitted for a humanoid shape, so they almost always appear humanoid.
* Eberron leveled against the shapeshifting Changeling race, whose members are fully capable of changing not just appearance but gender at will, regardless of the gender of their actual native form. It's a well-known joke in Eberron fan circles to point to any depiction of an attractive male or female character and declare that it's really a changeling of the opposite gender.
* Eberron life and his decision to assist the Lord Of Blades in repairing the Forge so the Becoming God can be given form.
* Eberron long ago to escape the Dreaming Dark. It used to be possible to get there physically, but an ancient race of giants managed to force the dimensions apart with magic. In the aftermath, they descended into savagery.
* Eberron — after all, if your subject can't conceive of any concept more complicated than "follow orders" and "break stuff", then why build it for anything else?
* Eberron mentions that they may have memories of "tasting colors or smelling sounds."
* Eberron, mercenaries and bodyguards are one of the main exports of Darguun, a nation of traditional monster races. (That's one of them in the page image above.)
* Eberron of the couatl bound them so they couldn't wildly ravage the world any more.

* Eberron of the Talenta Plains) it could also be filed under "played straight, with added violence".
* Eberron, or whether the manifestations and abilities of priests and so forth are just a (local) result of their faith. And some of the things that are worshiped as gods (such as the Dreaming Dark) don't really fit any conventional use of the term.
* Eberron physically transform themselves due to doppelganger lineage. The transformation is so complete that females who take on male form can father children, and males who take on female form can become pregnant (but are apparently locked into female gender, if not necessarily the form they became pregnant in, until they give birth).
* Eberron possess Empty Vessels (in the present day they can possess any willing creature).
* Eberron power ended up limited to more or less just ruling their own household.
* Eberron provides an entire race Touched by Vorlons. The Kalashtar started out as human mystics until they merged with extraplanar beings known as Quori.
* Eberron right from it's initial publication. That said, Keith Baker has retained a good relationship with the company, who have yet to bypass him in any major decisions about the setting.
* Eberron sense, at minimum by what they were doing towards the end being part of character's backstory.
* Eberron setting are thought out well enough that basing travel times ... and costs ... on the provided maps yield consistent enough results to allow a GM to estimate ticket price and trip duration between intermediate stops when not those are not explictly given in the text.
* Eberron setting can also be considered an example of this trope, although their powers are psionic rather than magical. Their links to extraplanar entities are what makes them other than human, and such connections, while not genetic, are passed down from father to son or from mother to daughter.
* Eberron setting collect information constantly, just in case some bit of it comes in handy later.
* Eberron setting has docents, a sentient magical device that can be implanted into a warforged, which starts off knowing several languages and can learn new ones by being exposed to them.
* Eberron setting has some of its own. Breland in particular has a couple of them, and then there's the former Karrnathi one, the Emerald Claw ("former" refers to its status as an official government agency; the group itself is still ... I'd say "alive", but "not dead" might be more accurate, given the nature of some of its members). The Breland groups are basically Bond types; the Emerald Claw is more like SPECTRE with real spectres.
* Eberron setting is home to Kalashtar, humans mutated by an ancient pledge that links them to a dream-spirit called a Quori. A sourcebook on the Kalashtar's homeland also introduces the Inspired, a subrace of humans created through breeding programs that mingled human, elven and fiendish blood to produce a species of humans specifically designated to lead an empire (and act as vassals) for the evil counterparts of the Quori who created the Kalashtar.
* Eberron setting, this is the basis for one of the Changeling philosophies. Natural shapeshifters, Changelings of the Passer philosophy do their best to forsake their true nature, creating an identity of another race and adopting that as their 'true being'. While they can still shapeshift, they are very uncomfortable doing so, or even reverting back into their real form, as their 'mask' becomes their true identity. The other two philosophies are similar; Seekers aim to embrace the 'ultimate form', which they believe to be an extension of the Changeling's true form, while Becomers are similar to Passers, but assume myriad different lives and identities, all equally real to the Changeling.
* Eberron setting. What does an Eldtrich Machine do? Anything your plot demands it does, really.
* Eberron setting, where Half-Elves are an established race, stated that with humans their progeny had a fifty-fifty chance of being human or Half-Elf. But if a Half-Elf married a full Elf their kids would always be Half-Elves.

* Eberron's got two! Sharn, the City of Towers, and Stormreach, outpost of Xen'drik. Sharn is the main one, though.
* Eberron: Shifters are an entire race of feral human/lycanthrope hybrids, and can also display minor features.
* Eberron Silver Flame has plenty of evil-aligned worshippers, while a heroic priest of the Fury could stress the positive elements of extreme emotion and downplay the others, and since the power comes from faith rather than the direct gift of the god, these alignment conflicts don't even deny spellcasting.
* Eberron's Karnnath used to be like this. In some places in the current era, the trope is still played straight.
* Eberron so devoted to nationalistic chest-beating that if they were revealed to be quori plants intended to stoke paranoia, xenophobia, jingoism and violence nobody would be that surprised. The Voice of Thrane snippets include claims that any Brelish soldier could secretly worship the god of betrayal and ranting about warforged lacking souls, while the Voice of Breland has a lengthy article of conspiratorial fearmongering about Cyran refugees, as an illustration of how deeply yellow the journalism on display is.
* Eberron, some warforged (sentient soldier-golems) act like this after the end of The Last War has left them without a place in the world. All the sides are technically at peace, but one of the main aspects of the setting is that the peace is so fragile that any kind of major incident (which the player characters will no doubt get involved in) could start another war. The biggest Remnant among warforged is led by the charismatic Lord of Blades.
* Eberron sourcebook definitely falls into this trope, but exaggerates the actual effectiveness of the feat.
* Eberron sourcebook "The Forge of War" suggests this as a basis for a Last War campaign, in particular suggesting an outline where a group of war criminals escape Dreadhold and go time-travelling through a magical portal, resulting in all kinds of chaos which the characters have to set right.
* Eberron spells, and even have souls, so they can be raised or resurrected if destroyed.
* Eberron sub-sub-genre. Elemental binding magic allows for airships, mag-lev trains, and sapient constructs, among other things.
* Eberron that allow warforged to choose diametrically opposite answers to the questions of this trope — the Warforged Juggernaut rejects being like living, breathing people and embraces their construct nature entirely, while the Reforged embraces life and emotion wholeheartedly.
* Eberron: The entire nation of Cyre was destroyed during the Last War by an event known as the Mourning. A thick mist covered the country and killed anyone caught in it. While the particulars of the event itself seem rather un-nukelike, the devastated Mournlands are described in a way reminiscent of an area destroyed by nukes and heavily contaminated by fallout, including a "Glass Plateau" and a rift in the ground that glows with an eerie light and mutates anything that stays too close too long.
* Eberron: The Lords of Dust and the Chamber are conspiracies stretching back to the initial dragon-demon war, one of the earliest significant events after the creation of the world, both of whom mostly work through intermediaries since the greatest fiends are chained and a large number of dragons getting directly involved tends to cause inconvenient side effects such as mass destruction and the growth in power of the rakshasa rajah known as Tiamat. More recently, the Blood of Vol (dating back to the destruction of House Vol and the end of the elf-dragon war) and the Dreaming Dark (originating with the severing of direct Material Plane to Dal Quor connections) are at the very least ancient enough to predate the formation of Galifar by quite some time, although they're very modern compared to the Chamber and the Lords of Dust.
* Eberron: The Mournland used to be the nation of Cyre, until it was destroyed by a magical disaster called the Day of Mourning. One of the side effects of the disaster is that dead bodies don't decompose naturally inside the Mournland- they just lay there still looking like they're less than a day old even if they've been

there for years.
* Eberron), the name of an object, or even words that aren't in common. Some Warforged also retain their numerical designation as they still look for an "ideal" name.
* Eberron. Then there are certain planes of existence (Xoriat, the plane of madness, Shavarrath the Battlefield, Mabar, the plane of death, etc...) and some evocatively named regions of the mortal world: the Shadow Marshes, the Mournland, Frostfell, the jungle continent of Xen'drik and the Demon Wastes.
* Eberron, the plane of the fae, is known as the Moonlit Vale because it's always night there, with the light provided by the moon Rhaan, which is always full.
* Eberron there is Thelanis (The Faerie Court), where an hour spent there equals a week spent on the Material Plane. What's dangerous about it is that the lost time catches up with you when you return to the Material Plane, meaning that at best you'll be ravenous from hunger (since you haven't eaten in weeks) and at worst you'll immediately die of old age.
* Eberron the underworld. Same goes for Eberron, who is the world, and Siberys, who is the Sky, but they are not considered to be evil. It's entirely possible the three progenitor dragons are just myths and metaphors for the surface world, underworld, and the planet's ring, though.
* Eberron, the universe was created by the three progenitor dragons Eberron, Siberys and Khyber. Khyber killed Siberys for reasons varying reasons, and Eberron used her own body to bind Khyber forever in retaliation. Eberron, the Dragon Between, became the world, Siberys, the Dragon Above, became the planetary ring, and Khyber, the Dragon Bellow, became the underdark/setting equivelant to the Lower Planes.
* Eberron, they do this, and they do it fairly well, having developed a few unique tricks like Silver Flame Exorcists and Silver Pyromancers. Aside from evil outsiders, they also hunt undead and lycanthropes (and not all of the latter are really evil, which has earned them a bit of a bad rep among them and their Shifter cousins).
* Eberron. This was followed by an inconclusive war lasting 102 years, during which other lands seceded from the core five.
* Eberron to be offscreen, and there are resources available for playing during the war, but the "present day" of the setting is two years after the war officially ended.
* Eberron to leave such questions regarding the Lady of Pain and various other multiversal engimas deliberately unanswered, to maintain the setting's particular ethos.
* Eberron to themselves - Making, Handling, Passage and Sentinel - plus the Mark of Finding, which they share with half-orcs.
* Eberron Two families of magically enhanced spies going head-to-head. But what makes this rivalry especially bitter is the fact that they used to be one house. The Thuranni family once existed as one of several families making up House Phiarlan as a whole, but within the past few decades of the Last War, they had increasing conflicts with the House leadership until they straight-up left. No one is sure how the situation is going to shake out yet; it could be the focus of a campaign, if a DM so chose.
* Eberron use this to their advantage by spending weeks on their plane to plot their next move while only an hour or two passes on the Material Plane.
* Eberron. Warforged are 'living constructs', mechanical beings that metaphysically and magically are a bit closer to biologicals, and the Reforged goal is to embrace their living side, so they do things like pick a gender identity, wear clothing, try to figure out ways to handle eating food, etc.
* Eberron was a new setting, one of the threads on the official forums discussed running a noir campaign in it. Naturally, it quickly developed into snippets of a half-orc private detective in Sharn following this trope.
* Eberron: When the setting was designed, its writers figured this trope was inevitable and threw most alignment restrictions out the window.
* Eberron, where the recent 5e campaign setting has some things that could only be

spoiled for those who are late arrivals to the setting. For instance, they try to play up the mystery of the city of Ashtakala, a thriving magical, evil city in the middle of the Demon Wastes and how it could still be standing after all this time, when the previous campaign setting book outright stated that it's purely an illusion created so the Lords of Dust can vicariously relive their glory days.
* Eberron, which the titan does not. In fact, because of this intelligence and ability to learn, a warforged can even take class levels, with there being quite a few high-level warforged that could crush a titan relatively easily, despite a titan being about four times their size and ten times their weight.
* Eberron who gets some bonuses for making and wearing bone armor and weapons.
* Eberron who was supposed to bring an end to an ancient war between elves and dragons. It worked, but not the way intended: both races considered her an abomination and joined forces to destroy her family. Vol's mother turned her into a lich, allowing her to survive and seek her revenge.
* Ebert's Bigger Movie Glossary movie is complete without the scene in which Cage's character finally loses his temper and screams at the top of his lungs."
* Ebessan has also done Hansen as well as The Great Kabuki, Miracle Man, Gamma,
* EB Games in Australia actually uses the various prices to sort how items are discounted during sales. If it ends with, for example, 84, then it'll be 25% off.
* Ebin and May, Emperor Houman's strategy for taking over neighboring kingdoms seems to be to marry into the royal family on the pretext of forming an alliance, then invading and using his marriage to legitimize his rule, later killing off the wife when she's no longer useful.
* Ebirah, Horror of the Deep of pre-existing monster battles edited together with footage of some kid dealing with school bullies.
* Ebisu always berates Naruto for using his Sexy no Jutsu technique (calling it indecent) but is nonetheless consistently "defeated" by it. Naruto even refers to him as a "closet perv".
* Ebisu is this to a tee, having a strong understanding of Japan's economy and be empathetic to the needs of humanity while still being incredibly innocent and naive. Being a God of Fortune (specifically merchants) and have his Shinkis at his disposal, this shouldn't be hard for him.
* EBK to the point where almost the entire Earth is a 3rd world country and even the trillionaires supplement their diet with soymeat.
* Eblis. Also, he proves to be a very effective healer and source of military when the players are forced to act in his stead, first by guiding you across the ruins via telepathy, then by healing your wounds in the final boss battle.
* EBM. They carry this to their live acts too, often dressing up to evoke a medical fetish.
* Ebola Syndrome: Kai, the main villain, dies in this manner when the police shoots a propane tank right next to him. He gets a few rounds plugged into his body while burning up.
* Ebola Syndrome: the film's main villain is in the rural outskirts of Johannesburg, where an outbreak of the Ebola disease had occurred in a settlement of tribespeople. Seeing a tribeswoman near the roadside dying of a Ebola with nobody else around, the villain then forces himself on the dying woman just for the thrill of raping a woman, ultimately leading to himself being infected with the titular disease.
* Ebonarm is a god of war worshiped in the Iliac Bay region. He is a
* Ebon Dragon and consider it a victory as long as the other team suffered even more.
* Ebonhawk was the last bastion of Ascalonians against the Charr conquest of their nation. This ended when the threat of the Elder Dragons forced the races to unite. The people of Ebonhawk are bitter about this betrayal with many forming the Separatists, a band of outlaws intent on sowing discord between Charr and human.
* Ebony and Ivory are Dante's trademark handguns, they allow him to shoot two targets at once, as well, as a couple point-blank moves. The shotgun also allows Dante to move it like nunchuks while shooting everything around him. (The Woo)
* Ebony Blade member the Black Knight designed and constructed a laser sword, often

called his photonic or neural sword. The sword resembles a lightsaber in both its appearance and its effects on non-living matter, but it functions differently when used against living beings. Its "laser" blade is actually a neural disruptor; when the Black Knight cuts someone with it, it delivers a massive jolt to the being's central nervous system. This jolt is usually enough to incapacitate someone within just a few hits. Alternately, Whitman can reverse the sword's energy stream so that it encases its hilt and by extension Whitman's fist in a high-energy field. Using the sword in this fashion enables Whitman to punch with some unspecified degree of enhanced strength.
* Ebony Dark'ness Dementia Raven Way, the only way to kill a vampire is with a cross or a "steak". Perhaps vampires are vegetarians.
* Ebony Dark'ness Dementia Raven Way vs. Canon the Internet. She then reveals herself to be a pretty nasty piece of work.
* Ebony Dark'ness Supposedly the only one who can defeat Voldemort (and easily out-matches him in Chapter 9), but would rather shop at Hot Topic and have sex with anything that moves instead.
* Ebony Maw is tasked with grabbing the Time Stone, which is in the possession of Doctor Stephen Strange. After Strange casts a spell on it to prevent Maw from taking it, Maw chokes him into unconsciousness, takes him on board his ship and into space, then tries to torture him into releasing the spell by drilling a number of crystal needles into his flesh. One at a time.
* Ebony Odogaron and Fulgur Anjanath appear in all biomes. They usually thrash the resident apex monster of the region in a Turf War, however, so it's sometimes a relief to see them charging into the fray.
* Ebony's militia were a small group of ex-Locos (chaotic evil post-apunkalyptic teenage street fighters) who were loyal to Ebony and still wore the old team colors. When Ebony left the mall, she took the militia with her.
* Ebott's Wake is a muscled giant who has broken a man's femur with a single punch. However he prefers to downplay his strength and cultivate his appearance more in favor of the Genius side rather than the Bruiser side. Not that this stops him from being able to look appropriately threatening when the situation calls for it.
* E. B. White never got made. The Hanna-Barbera version has never pleased either of us... a travesty..."
* E. B. White was born mute. He uses a slate and chalk to communicate with human beings and a trumpet his father stole from a music store when he's around other trumpeter swans.
* EC3: Made his name first as Derrick Bateman in NXT before moving over to TNA as Ethan Carter III. Became the Grand Champion in 2017. Returned to NXT as EC3 in 2018, made the main WWE roster in 2019.
* EC, are probably the root of zombie ubiquity in pop culture horror, but you'll find the word used only a handful of times in any of them. Like Romero later, these writers associated "zombie" with Caribbean folk magic, and employed it only in stories where voodoo raises the dead. There was no single word for other types of walking corpses at all.
* Eccentric Artist: An artist whose strange quirks are reflected in their works.
* Eccentric Fashion Designer: A fashion designer with a quirky streak.
* Eccentric Fashion Designer: Fashion designers and their styles tend to be weird and quirky.
* eccentric genius detective. The fact that the victims paid so much for their life insurance!
* Eccentric Mentor series of games, has a talking rat as his familiar.
* Eccentric Millionaire Whitmore, who doesn't care much about what people say is 'impossible'.
* eccentric nature and adventurous side. Nineteen episodes later, in the season finale "Gideon Rises", the grappling hook saves Dipper and Mabel from falling to their deaths after a fight with Gideon (and after Mabel had spent the whole episode trying to use the grappling hook).
* eccentric, not that it stopped Chris from promptly filling it back up once the house was renovated.

* eccentric. She very frequently brings up her loving relationship with the protagonist (hint: only she thinks there is one) and insists that weapons be forged with massive amounts of love.
* Eccentric village characters songs: A folk song trope that isn't used much anymore. In the fifties, there were plenty of songs about eccentric but beloved village characters such as the old lamp-lighter or the old umbrella salesman. Those songs are forgotten except by those very familiar with old songs.
* Eccezzziunale Veramente and ends up butting heads with his new neighbor - a Napoli supporter; Donato, after staying in Ibiza for over twenty years, decides to come back home to see his old girlfriend, who surprisingly had a child with the same Inter hooligan he faced off with in the previous film; finally, Franco is blackmailed by a local mafia chapter to kill a person in order to clear the debt of the cafe he frequents with his fellow Inter fans.
* Ecchi has become noted mainly for its heroine wetting herself frequently, usually when scared or struck.
* Ecchi to delay them past the thirty minutes mark. The funniest part is when the clueless (and virgin) rookie is sent to do the delivery, and all his co-workers act as if they were in a war movie and watching him go on a suicide mission, with "Taps" playing in the background as he drives off.
* Ecclesiarch Violeta Roskavler are women. The only gender segregated High Lord rank achievable by mortals is the Abbess Sanctorum of the Adepta Sororitas.
* Ecclesiarchy divine powers, or may just have "regular" psychic powers.
* Ecclesiarchy witch hunters, the Ordo Malleus, who are part of the Inquisition.
* Ecclesiastical History of the English People. Two beautiful youths gave the king a small white book containing a list of good deeds performed. Then, evil spirits came and gave a large black book containing a list of transgressions. The evil spirits asked the youths why they were here, since he clearly belonged to the spirits of evil.
* EC Comics #11) a scientist invents a time machine and plans to test it by sending his assistant, Raymond 25 years to the past for two hours. However, due to an accident, Raymond ends up stranded in the past for two years. During this time, he falls in love with a woman, marries her, and they have a son (named Raymond Jr.). When he's brought back to the present, and meets his mother, he realizes that the child he fathered was himself.
* EC Comics #17), this happens in the end to a man who has been using special transplants to prolong his youth for fifty years.
* EC Comics #18), a woman ties her murderer husband to a four-poster bed, promising she'll help make him a "big man." The bed turns out to be a Procrustean rack.
* EC Comics #21), a man robs the grave of the man whose death he made look like an accident so he could marry his widow in the same tuxedo, and is poisoned to death by the embalming fluid.
* EC Comics #27 doubled up on this trope by depicting a King AND Queen who were equally rotund.
* EC Comics #6), a reporter who witnesses a woman captured and flogged to death by the Black Vigilante Society (who are the KKK in all except name and hood color) finds that he is their next target.
* EC Comics #7) is loosely based on the story of the Cocoanut Grove nightclub fire. The Cocoanut Grove passed a fire safety inspection eight days before it burned down, causing hundreds of deaths; that the nightclub's owners had bribed the inspectors, as in EC's story, was alleged but never proven. The identification of the victims by pictures taken by a club photographer shortly before the fire broke out is another element of the story that actually happened.
* EC Comics #8), a wealthy naturalist with a large collection of rare fish is murdered in typical EC fashion by his buxom wife who falls in love with his younger brother. The latter two then go out for their usual midnight swim, only to encounter in the pool the naturalist's latest acquisition: a shark.
* EC Comics) and awaken rich and famous in a utopian future, where mankind has had perfect health for several generations. Unfortunately, the woman had a cold, which none of the future population has any resistance to, and within a few months

everyone on Earth (except them) is dead.
* EC Comics and tolerate it for three years by opening up his chest...
* EC Comics, an elderly woman that went through a series of young female companions turned out to be a centuries-old creature that was sucking the life force from them.
* EC Comics did a story called "...And All Through the House..." about a woman who kills her husband on Christmas Eve, only to be stalked by a homicidal maniac who's escaped from an asylum and is roaming the countryside dressed as Santa Claus.
* EC Comics has some white-collar criminals in a small plane get caught in a giant web spun between two mountains, deep in the South American jungle. When the denizen of the web shows up, they're dinner. The Vault-Keeper gleefully informs us that a smaller spider will probably curl up and die at the mere mention of the name "Giant Mountain Crawler."
* EC Comics His girlfriend, thinking he was dead, married his best friend, and they're both old now. But their daughter is now a beautiful young woman. The hero falls in love with her and they marry.
* EC Comics. In the first, the husband finds out his best friend is having an affair with his wife and invites the friend up to his forest cabin with murder on his mind. In the second, the husband is ignorant of the affair, and the friend takes advantage of an innocent invitation up to the forest cabin to get the wife for himself once and for all. As predictable in EC comics, neither plot ends well for the perpetrator.
* EC Comics Science-Fiction SuspenStory "Infiltration," a secret U.S. government agency for ferreting out Martian invaders who use hypnotic screens to disguise themselves as human beings discovers that it has been infiltrated by an alien. It turns out the agency is actually controlled by Martians, who are all too glad to rid themselves of the Earth "alien" in their midst.
* EC Comics science fiction tale had an astronaut testing a faster than light spaceship. From his point of view, it works fine. Then he returns home and find that decades have passed. His girlfriend is now an old woman, married to his best friend. He ends up falling in love with their daughter, who is now his age.
* EC Comics Shock SuspenStory "Stumped!" has a trapper setting a bear-trap for a rival trapper and then leaving him there to die. The rival trapper takes his revenge after chewing his leg off.
* EC Comics stories, wherein a king's daughter falls to her death while he is enjoying himself at a party, and her scream keeps ringing in his ears afterwards in every sound he hears, starting with the local church bells (he has them melted down), the movements of the castle inhabitants (he has them wrap their feet in soft cloth), and even the sounds of people working in town (he has them cease working). Unfortunately his quest for absolute silence reaches a head when his ears become so sensitive that he can hear the people breathing. He orders them to stop breathing, and finally he is beset by an angry (and loud) mob. One of them, a clockmaker, sews a clock inside the king's chest that automatically wound itself up at the slightest movement and took hours to run down. The king is left lying on a bed, hardly daring to move, hardly daring to breathe, so as not to trigger the clock. Then a spider comes down on a silk line, heading for his face...
* EC Comics story "Hate!", an all-American everyman who leads a mob to kill his Jewish neighbors by burning their house down finds out that he was adopted and that his real parents were Jewish. He then is victimized by his Jew-hating former friends.
* EC Comics story "The Orphan" (former page image) featured a little girl who kills her abusive father and then frames her neglectful mother and her lover for the murder (resulting in their on-panel execution in the electric chair).
* EC Comics suggests that smoking one joint will result in instant addiction, which, within three months, will lead to heroin addiction and then bashing your father's head in with a lamp for drug money.
* EC Comics text to explain the story. The exception are the stories that Harvey Kurtzman drew, as well as the ones he wrote and storyboarded for other artists.
* EC Comics). Ultimately this led to a backlash from the Moral Guardians in the

1950s, which sought to tone down a lot of the gore and ultimately led to the closure of the publisher.
* EC Comics uses a variant of this trope. A man who carves up his wife's body and stores it in a frozen food locker is forced by a business emergency to leave it all in a friend's hands. When he gets back, he finds his friend is throwing an impromptu dinner party. "The butcher was closed..."
* EC Comics, which followed reporters in their investigations. Needless to say, the new books weren't successful and EC closed down soon after.
* Ecco the Dolphin accidentally set them on the path that leads to modern cetaceans.
* Ecco the Dolphin aliens called the Foe; their time travelling shenanigans actually work to change Earth's future, until Ecco stops them.
* Ecco the Dolphin and its sequel were re-released for the Sega CD, which features higher quality music, new sound effects, FMV sequences, new levels, and new sound effects. The Windows 95 version of the first game later adds redrawn high-resolution graphics, a difficulty system, and a save feature instead of using passwords.
* Ecco the Dolphin and levels that require thinking in two or three dimensions.
* Ecco the Dolphin, being a toothed cetacean, can 'look beyond his eyes with his song' i.e. use echolocation. It's depicted as summoning a map of the area. There's a level in the second game called Sea of Darkness that requires echolocation to navigate, depicted by lightening the area every time Ecco sings.
* Ecco the Dolphin caused Ecco to instead go ever-so-slightly off course, causing him to go through all the rest of the motions of the demo while mashing his face up against a wall.
* Ecco the Dolphin: Defender of the Future, mainly due to completely abandoning the older games' storyline for a story written by someone who'd never played them.
* Ecco the Dolphin ends with a dolphin asking you if you think that the alien race you just defeated is truly destroyed.
* Ecco the Dolphin expy recalls spending time with Ecco while on an expedition.
* Ecco the Dolphin features several levels that require Ecco to jump into and out of floating pools of seawater. The flying future-dolphins say that "the floating islands were born of the great eruptions," which is never followed up on. Later, the Vortex Future levels feature Ecco having to navigate through abandoned alien cities in the sky.
* Ecco the Dolphin franchises, most likely due to the games' infamous difficulty and out-there plots. As a result, the series is perpetually in Stage 1 or 2, with a small but passionate fandom.
* Ecco the Dolphin game, one of the earlier levels introduces Ecco to a beautiful dolphin from millions of years in the future. The first thing this dolphin says is "I am Trellia and you are my ancestor."
* Ecco the Dolphin games, the cetaceans call themselves "Singers" and have different names for other animals in their ocean home: Shelled Ones are clams, Hungry Ones are sharks, giant octopuses are Eight-Arms, and so on.
* Ecco the Dolphin has a level where you run across dolphin shadows that have no dolphins to cast them.
* Ecco the Dolphin has an in-universe example: an NPC spends all his time swimming around trying to catch a certain fish, but if Ecco catches the fish and presents it to him, he will get annoyed and beg you to let it go.
* Ecco the Dolphin has Ecco escape from a giant morey eel. Once Ecco manages to escape, the rocks are shown falling. It isn't clear if they directly killed an eel but even if they didn't, the eel could be presumed to be trapped there and starve.
* Ecco the Dolphin: In the original continuity, the Vortex aliens have lost the ability to make their own food. So, when their planet and Earth are in alignment every 500 Earth years, they shoot a beam to Earth and gobble up as much marine life as they can, and over time the feedings get larger and larger. One of these feedings is what sets Ecco on his quest to find his family.
* Ecco the Dolphin in the third game, "Defender of the Future." While you are exploring the ocean and fighting its denizens, you can come across a football mini-

game known as Dolphin Soccer. You use your adventurous dolphin to try scoring goals against the AI opponent.
* Ecco the Dolphin kicks off with the title character's entire family being swallowed up by a typhoon that sucks everything from the sea and seafloor, including seashells and rocks. Ecco eventually discovers these storms are caused by a nightmarish alien species called the Vortex that uses Ecco's homeplanet as food source every 500 years, since they've lost their own ability to produce food.
* Ecco the Dolphin must persuade dolphins of each caste to work together, which he does by impersonating a pseudo-messianic figure.
* Ecco the Dolphin of said levels shows problems that can occur with this strategy.
* Ecco the Dolphin, one of the boss fights, Mutaclone, contained a number of egg-shaped stones filled with yellow smoke, and the player is required to break them in order to take down the boss's force field and proceed with the fight. Each time you break one of the stones, the smoke is released, which for a few seconds turns the screen dark and cloudy and reverses the player's controls.
* Ecco the Dolphin ran out, he would drown. Surfacing would restore the air meter, but he'd still have to find some fish to replenish any health lost from nearly drowning.
* Ecco the Dolphin segment, 3 bosses in the "Hanging Waters" levels, 3 dominant species on Earth, 3 attacks needed to defeat the Crayfish boss, etc.
* Ecco the Dolphin, the rebuilt Asterite sends you to Lunar Bay to assault the Vortex. Not only are your powers from the end of the first game restored, but you're being backed up by a ton of other dolphins who have been summoned by the Asterite.
* Ecco the Dolphin uses his voice for just about everything: echolocation, defense, activating ancient technology, and initiating conversations. Of course, the player never hears his half of them beyond the original generic sonar cry.
* Ecco the Dolphin visits Atlantis during his journey. In this iteration, Atlantis was at war with aliens stealing lifeforms from Earth to snack on, and the island was sunk by a beam from said aliens. Luckily the Atlanteans were masters of time travel and escaped into the past.
* Ecco the Dolphin). When those qualities are balanced by the rest - Compassion, Wisdom, and Humility - Ambition instead serves as the noble trait that drives dolphins to fulfill their dreams.
* Ecco the Dolphin where evil dolphins are using humpback whales as a living power source.
* Ecco the Dolphin, where Vortex drones explode if they get too close to the surface. Neither Ecco nor any other creature has a similar risk of decompression.
* Ecco the Dolphin, who use Earth as their all-you-can-eat buffet every 500 years until Ecco fights back. The Foe in the reboot timeline seem to exist only to conquer various worlds.
* Echelon has both flying aircraft carriers and the standard watery sort. The flying type is equipped with significant anti-aircraft defenses and is usually defended by flying destroyers as well. Somewhat interesting is that these ships fly at low altitudes, and several missions have them assist in the destruction of ground targets.
* Echidna creates clones of any living creature which she has either touched or swallowed. These clones are all mentally imbalanced, hating the original and wanting to destroy everything they loved, and are often physically deformed.
* Echidna is still human from the waist up, but below that is a bloated monster that is constantly growing. If angered the monster will go on a rampage and has killed dozens in the past. A chapter from
* Echidna's mother, the Graeae sisters (who shared one eye and one tooth between the three of them), the dragon Ladon (sometimes said to be one of Echidna's brood instead), a race of sea monsters called the Cetea (one of which was killed by Perseus) and sometimes the nymph-turned-monster Scylla.
* Echidnas (there's an entire race of these things in that setting) are stated to produce any number of other types of monsters and that many races are believed to have originally been children of the Echidnas. A fanfic with the setting has one

whose daughters consist of a dark elf, a slime, a harpy, and a minotaur.
* Echinacea, commonly used to treat colds and other mild viral infections; is known to react badly with heart and anti-anxiety medications.
* Echo Addressing issues such as mental illness, toxic relationships, personal identity, and freedom, Echo is a story about breaking cycles and overcoming personal demons. Or it can be a story about succumbing to those very same demons depending on your choices.
* Echo after accidentally revealing the truth and in Flynn's route he figured out.
* Echo & the Bunnymen is the name of a creepy, dark post-punk band.
* Echo, a nymph with a bad habit of gossiping, was stripped of her voice by Hera when the goddess realized that Echo was distracting her from searching for her wayward husband, Zeus. Later, after seeing how utterly miserable Echo had become, Hera had a slight change of heart, and returned Echo's voice to her, changing it so that she could only repeat whatever she heard. Things got worse when she fell in love with Narcissus, and Eros tried and failed to make him fall in love with her: Narcissus fell in love with his own reflection, and broke Echo's heart when he proclaimed his love for his own reflection in stereo. Heartbroken, Echo pined away until all that was left of her was her voice, while Narcissus stared at his own reflection until he starved to death, whereupon the first of the eponymous flowers sprang up at the site of his death.
* Echo Chamber features characters named Tom, Zack, and Dana. They are played by Tom Pike, Zack Wallnau, and Dana Shaw.
* Echo Chamber initially calls the final intro "not unimpressive", but then corrects herself to "really good".
* Echo Chamber Shannon is contained in the defeated, terrified way he says her name.
* Echo Chamber storyline diverging from it. It hasn't been done as a trope video though.
* Echo Chamber: "Why doesn't she like me? It's like she couldn't even see my boner!
* Echo Company Series features a group of young soldiers and an Army nurse during the Vietnam War, all of whom spend their tours desperately longing to return home. When they finally do, most are deeply affected by physical and emotional damage, and so they are unable to settle back into their old lives.
* Echo, contacts her superiors and begins to get guidance from her Washington organization on locating and stopping the Phi Project, the military/corporate experiment that might end life on Earth as we know it. However, Julie Martin wonders why they have not received any support or personnel to help deal with the potentially Apocalyptic scenario. This causes Ivy to begin to think about it and she starts to agree with Julie that this might have some unpleasant implications as to the trustworthiness of her superiors
* Echo Creek: A Tale of Two Butterflies, and Marco identifies the mime as new in town.
* Echoed and possibly referenced by Mark Verheiden and Mark A. Nelson's follow-on graphic novel set ten years after
* Echoed in "Captain Hareblower", this time with Sam trying to swing aboard Bugs's ship, only to end up swinging into a cannon. Same words, same results.
* Echoed later by the King of Swamp Castle and the father of the bride in the scene with Sir Launcelot and Prince Herbert.
* Echoes. Dark Aether isn't meant to be safe by any definition, but it's only later with the obtainment of the Dark Suit that taking risks becomes a genuine option, but by then the game is already a third on the way to the end.
* Echoes of Eternity in order to make her fear Shadow. Rei's family was told that he had accidentally ended up in the Biolizard chamber.
* Echoes of Eternity. Maria's described as very pale, scrawny, and underdeveloped for her age (being only 4'3 at 12). It's also mentioned that she's a remarkably average looking child.
* Echoes of Eternity, Shadow was created with the body and mind of a teenager.
* Echoes of Honor, a Haven admiral notices that the prison planet Hades has been taken over because the warden has been playing a game of chess with him (move by

move, by courier ship), and the warden's move doesn't arrive when it should.
* Echoes of Honor are armed with battlecruiser grade grasers, but they're not very survivable should an opponent decide to focus on them. In universe, LACs in general are described as "eggshells armed with hammers".
* Echoes of Honor. A surprise Havenite attack catches the less than competent Rear Admiral Elvis Santino completely flat-footed. His operations officer, Andrea Jaruwalski, tries to get him to fold, surrendering the system they don't need in the face of a vastly superior force. Santino responds by relieving Jaruwalski of her position and sending her away with enough of a black spot on her record to sabotage her career, then calling up his command to meet the Havenite attack. Santino's command is mostly destroyed while Jaruwalski eventually has her career salvaged with the help of Honor Harrington herself.
* Echoes of Honor, Earl White Haven nearly has a heart attack when he thinks Admiral Yanakov ordered no quarter. Fortunately, the latter only called for no mercy. While any ship in range conceivably capable of fighting is blasted to pieces, the escape pods are left alone.
* Echoes of Honor garrison, relying on the years they spent learning the island's hiding places. They feel like they could have had their own book, but only get mentioned over about two pages.
* Echoes of Honor (plus sections of several others) is devoted to the court-martials of State Sec guards on Hades and the efforts the former prisoners are making to keep those court-martials according to the book, instead of a vengeance spree.
* Echoes of Honor, the simulations are arranged to be so unwinnable as to be ridiculous. Alice Truman, the officer in charge of the LACs, was so good at training them that they kept winning, and she picked up on the admiral's plan and insisted that her superiors find a way to fairly evaluate the LACs whatever they did.
* Echoes of Honor troopers have the chance to reach it, much less to suit up.
* Echoes of the Rainbow where years later, Mr. Law, the family patriarch, is revealed to have died of natural causes, with his wife and surviving son visiting his grave where he's buried next to his older son.
* Echoes Of Winter follows two wolves who have recently left their home packs to create their own packs. On their journey, the two meet a group of rival cougars.
* Echoes of Yesterday crossover, Kara wakes up in a dumpster in the back of an alley. She doesn't remember how or why she ended up there, and her only clue are blurred recollections of cities burning and a massive battle.
* Echoes of Yesterday is a real character in another universe, and eve more disturbed after being told she's probably a fictional character in a different universe, because who would want to read about her extraordinarily depressing life?
* Echoes of Yesterday realizes Vicky's a well-meaning but reckless and hot-headed girl -not unlike Kara herself when she was a teenager- whose worst traits are being enabled by her family; hence, she decides to mentor the younger girl so she becomes a proper hero instead of ending up as a cautionary tale.
* Echoes of Yesterday replies she heard someone needed help, so she helped out. Period.
* Echoes of Yesterday resorts to trolling them. After seeing Kara troll Emma in the mall until the redhead leaves out of embarassment, Taylor calls her a "menace".
* Echoes of Yesterday she has landed into, she decides she must do everything in her power to help.
* Echoes of Yesterday, Taylor Hebert finds herself at the receiving end of Kara's blunt honesty when the latter questions if Emma was truly Taylor's friend given how suddenly and completely Emma turned against her so-called bestie.
* Echoes of Yesterday, Victoria Dallon sees what she believes is a dealer peddling drugs and she attacks him right away rather than wait and assess the situation. It's only after crippling the man she finds out he's an undercover cop and she's just busted an operation of the local anti-narcotics brigade.
* Echoes of Yesterday. When she expresses bewilderment at the fact that she's been saved by a comic-book character, Kara replies the Multiverse is infinite and Taylor

life's history is guaranteed to be a fictional tale in other parallel realities, including her own universe.
* Echoes one week prior to Echoes' Japanese release and a month prior to its international release.
* Echoes: Operation Stranglehold are still cybernetically enhanced soldiers programmed to fight.
* Echoes: Operation Stranglehold: Colonel Strickman, 65, is both a capable fighter and the leader of one of the largest guerrilla cells fighting against the Hybrid Pantheon.
* Echo Falls Mysteries book, Ingrid drives a pickup truck, despite being in middle school! Though she doesn't engage in any high-speed chases or anything, the fact that she is able to drive successfully at all is amazing!
* Echoing Silence: When Celestia banished Twilight, she thought that Twilight was on the verge of going Nightmare, and either would, or be returned to normal by guilt, either of which Celestia had plans to deal with. Unfortunately, the changeling invasion prevented Celestia from looking for Twilight when she wanted to.
* Echoing Silence Which makes things quite difficult for the former friends who have come looking for her help...
* Echo is just an amateur photographer who had the misfortune of witnessing, and getting caught up in, the murder of Dr. Allison Porter of the Phi Project. Now she is stuck in the Beta Suit and trying to figure out what is going on, who is doing it, and how she can get out of the entire situation. Fortunately, she has Ivy Raven to help her out.
* Echo is much the same way, as she can mimic any physical feat she sees so long as it is humanly possible to replicate. She once easily went toe-to-toe with
* Echo is that both interstellar travel and colonization is both extremely cheap and extremely slow. This leads to impossibly advanced planet-sized structures like The Palace being built over millennia without anyone noticing it until it is long abandoned.
* Echo Kellum) and Felicity fit this trope, where some BTS pics have EBR up to his chest.
* Echolocation is well-known in bats and toothed cetaceans. Shrews also use this means of sensing, as do cave swiftlets and oilbirds.
* Echo Night and complete various tasks for them so that they can move on.
* Echo Night, forcing you to try and find ways to avoid or clear it out.
* Echopoint: Antarctica is the research outpost that Mei was stationed at before going into
* Echopraxia then set loose to sleepwalk their way through an entire tour of duty. Turns out the human mind is terrifyingly efficient when you get things like "self-awareness" out of the way.
* Echo Rose: After being bullied, fired, and plagued the paranormal, Echo receives what looks to be a present from a fan...which is really an animal skull, and a note demanding she stop her investigation. She doesn't take it too well, having to end the video immediately due to how horrible she was feeling.
* Echo Rose: As Carma says, there's nothing strange going on in Nettlebrook. Zipper Films isn't doing anything subversive or rebellious, and everything is fine. In fact, Carma and Zipper Films are just after likes, not artistic integrity, and certainly not the truth. And in no way was she forced to say all of this on camera.
* Echo Rose: Carma starts "the truth" by informing the viewers that what they are watching is a YouTube video she is filming at that moment.
* Echo Rose: Discussed as backstory, where the disappeared Zoey was reportedly bullied due to rumors that she was having sex with a professor.
* Echo Rose: Echo and Zip become very concerned when Carma stops answering her phone, and even try and get some presents for her, in case she's just too upset to talk for some reason. Then they discover that her mother doesn't actually know where she's gone, either...
* Echo Rose incorporates audience interaction with Echo's vlogs and Instagram, all while telling the story of a paranormal investigation. The code-cracking element

popped up in "bog vlog 1", where the video was interrupted with a few frames of binary, placed by an unknown entity.
* Echo Rose: Nettlebrook may just be a small town, but Echo realizes that something is wrong as soon as she moves there, and decides to start an investigation. She's almost immediately proven right, with the town's rash of bullying and paranormal activity as just the tip of the iceberg.
* Echo Rose: The people of Nettlebrook are...not very welcoming to Echo, to say the least; at best the people stare, and at worst they outright bully her.
* Echo Rose: The woman who appeared in Zipper Film's "Bog Vlog" was believed by Echo to be a murdered ghost, filled with so much pain that she can't move on to the afterlife.
* Echo Rose: This seems to be a common occurrence in Nettlebrook— not only were students being shamed on "Fallen Angels", but Echo herself received a note calling her a "hooker", and the former homecoming queen Zoey was bullied with sexual rumors and the name "Hoey".
* Echo's Children that accompanied the sale of Honor Harrington hardcover books in the 1990s and 2000s.
* Echo Secrets Of The Lost Cavern has a couple of flashbacks at the beginning of the game. They're of Arok and a shaman artist named Klem.
* Echosmith drummer Travis Barker's underage daughter Alabama on Instagram.
* Echosmith, was originally written as a duet despite the fact that the two singers are siblings. When the label decided to make it a single, they understandably wanted it rerecorded as a solo.
* Echo Sonata for Two Unfriendly Groups of Instruments, the second woodwind phrase goes unanswered twice, whereupon the woodwinds move on to the next phrase only to be purposely drowned out by the brass.
* Echo sports them while dressed as Kiki in the episode "Belle Chose", to show how ditsy her persona is meant to be.
* êkimmu or mental subroutine. It takes over human victims in a way virtually indistinguishable from classic demonic possession.
* êl-sakhar, a sport of the high plains played traditionally with the severed heads of one's enemies, though nowadays, it was usually a weighted ball of rags instead.
* Eckhardt; as you can literally dodge most of his attacks by just ducking, and even if you do get hit, it doesn't damage you that much anyway.
* Eckhart features a cast almost entirely composed of theatrical actors from Prince Edward Island
* Eckhart is comprised of furries. The titular character and his friend Bridget appeal to mouse fans.
* Eckhart, who voiced Brigid, were the only cast members who had or went on to have long voice acting careers.
* Eclair Tonnerre, which creates havoc in the club. When that becomes an obvious non-starter for everyone involved, the engagement is broken off, but both Tamaki and Kyouya's fathers show interest in marrying their respective sons to Haruhi, the spunky protagonist.
* Eclectic: Soren. He doesn't fit in any of the four temperaments, seeing that he neither possesses the seriousness of a melancholic, the
* Eclipse and singlehandedly wiped out most of the supporting cast by that point.
* Eclipse, Bella, Edward, and Jacob hide out in the mountains on the same evening that there is a freak snowstorm. There really was a freak snowstorm in that region of the United States in June of 2006.
* Eclipse but armed with a scaled-down superlaser. The superlaser can crack the crust of a planet or instantly disintegrate a starship. Due to the incredible cost and scale of the ship and the chaos caused by Emperor Palpatine's death, only two were ever made; crime lord Tyber Zann stole one, but found that its incredible size and distinctiveness made it impossible for him to hide and abandoned it.
* Eclipse-class battleship, expressly designed as a counter to the Super Star Destroyer and its ilk.
* Eclipse-class planet killers. Estimates put them at 26-36 miles in diameter

(they're circular). And they're definitely visible from planetary surface as one partially eclipses the sun when it briefly arrives over Centauri Prime.
* Eclipse-class Super Star Destroyer had a superlaser that extended the length of the battleship. It had only 1/3 the power of the Death Stars' superlasers, but it was still powerful enough to rip a gap in the crust of a planet. It wasn't nicknamed the "Continent Cracker" for nothing.
* Eclipse comes back into play again (this time in a much stabler way) when it's revealed
* Eclipse could easily take on a large New Republic fleet on its own and win.
* Eclipsed by the Remix: The original version of a song is much, much less popular than its remixed version.
* Eclipse has a red thread that is almost but not entirely frayed in two, representing Bella's desire but inability to break free from her human life.
* Eclipse has Augury, which mixes magic and technology in addition to the elements. One of the more notable devices produced from Augury is a bottle of wine that refills itself once its wave-like engravings flare up.
* Eclipse has this as the Zoans' schtick. Two of the more notable examples include a creature with the head of an ox and spider-like hands. Escou Draldoch, the most prominent Zoan, is a bipedal velociraptor with grasshopper legs and a crocodile snout. Apparently, they seem to be fairly common in the southeastern part of the world.
* Eclipse himself is concerned, she's wrong, because he genuinely had no idea this was going to happen until the Eclipse started.
* Eclipse is able to take the form of any Digimon of Champion level or lower.
* eclipse of the sun, the town is plunged into darkness, and the train comes to a gentle halt. Unfortunately, the eclipse lasts only a few seconds, exactly long enough for the characters to realize that they're safe before the sun returns — and as soon as it does, the train's out of control again.
* Eclipse Phase actually manages to avoid this. There are asteroid fields, but they're exactly as they are in reality.
* Eclipse Phase: AI characters and the occasional transhuman have the Real World Naïveté trait, which causes them to hugely misunderstand ordinary events.
* Eclipse Phase all Active psi-sleights (other than Downtime, that would be counter-intuitive) have at least a chance of inflicting damage to the user.
* Eclipse Phase and easy contraception are, of course, among the basic modifications attached to any biomorph except the completely unfixed.
* Eclipse Phase, and how faiths with reincarnation as a tenet (such as Hinduism and Buddhism) increased in popularity as the technology became widely available.
* Eclipse Phase, and that a fair amount of character types (robots, nano-swarms, etc) probably couldn't feel pain anyway, there is certainly a healthy disregard for the value of individual life, even though the players work for a conspiracy dedicated to preventing the extinction of transhumanity. Within the fiction of the rule books grazing team mates with plasma rifles to hit the bad guys, sacrificing yourself to buy time, straight up murdering a friend and exploding your head with an anti-matter bomb (all for the sake of the mission) shows up. And that's just in the first short story. Everyone is expendable and people dying is an accepted part of the trade and just not a big deal.
* Eclipse Phase and the only current method of reaching planets outside the solar system.
* Eclipse Phase a "plasma blade" looks vaguely like a blunt sword but has plasma nozzles along one edge.
* Eclipse Phase appreciate things that appeal to touch, taste, and smell, giving them a particularly great love of sculpture, and an appreciation for engineering, as well as being connoisseurs in scents, cuisine, and drink. They also have art from other species, including sculptures and bas reliefs that they'll trade to transhumans, but they're still quite short on details of who, where, or how they acquired such goods.
* Eclipse Phase are generally limited to a range of touch. Less powerful sleights

such as minor empathy or detecting other minds can be used over a short distance.
* Eclipse Phase) are immune to aging, immune to all natural diseases including cancer, and can even regenerate lost limbs over time.
* Eclipse Phase are in "dead storage". But most of them are not conscious, simply saved on a hard drive somewhere until some Hypercorporation comes looking for new indentured servants. However, some activists on Mars who want to abolish indenture have suggested creating a massive Simulspace for the dead.
* Eclipse Phase are stored on ice in "Body Banks". Cryonics was also used frequently in the early days of space travel, before Egocasting became common.
* Eclipse Phase are the Jovian Republic (often called the Junta), Lunar-Lagrange Alliance, Morningstar Constellation, Plantetary Consortium, and Titanian Commonwealth. Though Titan and several anarchist habitats of varying memes have formed the Autonomist Alliance.
* Eclipse Phase are trying to become these, and operate by a philosophy based on eugenics, asceticism and discipline. The problem comes when one goes over the edge and modifies himself into a predator exhuman, which could be roughly described as a Super Hunter that views everything else in the universe as targets and possibly food.
* Eclipse Phase as far as many are concerned. Also many Firewall Sentinels still drop hypersonic rocks on TITAN remnants.
* Eclipse Phase assembled from vat-cultured organs and cybernetics as a cheaper alternative to purely biological biomorphs.
* Eclipse Phase as the rest of the planet. Mars also has a space elevator on Olympus Mons.
* Eclipse Phase), but hold a great deal of influence in the Inner System. Mars is run wholesale by the Planetary Consortium, which poses as a republican democracy, but whose power is divided proportionally among the hypercorps who own shares in it. Venus used to be under Consortium rule until the habitats formed the Morningstar Constellation almost by accident.
* Eclipse Phase, but most polities upload the brain to a simulation for rehabilitation or brainwashing.
* Eclipse Phase characters after death and customizing characters for the job at hand, but also for long-distance travel in the form of Egocasting.
* Eclipse Phase creates this effect via ubiquitous AR via Virtual Interface Implants.
* Eclipse Phase damage per shot with an option to double it. More than a thermobaric grenade or minimissile.
* Eclipse Phase don't have "laws" per se, but there are a number of hypercorps such as Gorgon Defenses who provide judicial services to their clients, ranging from physical protection of one's person and property to lawsuits.
* Eclipse Phase "Egocasting" is by far the most common means of interplanetary travel. It's much faster and cheaper to upload your Ego, transmit it, and download into a rental morph in just a couple hours than to spend weeks or months on a spaceship.
* Eclipse Phase Ego Sense is used to detect other sentient biomorphs, while Omni Awareness points out any living creature that is observing the async. The Scramble sleight and Psi Chameleon general trait are designed to defeat those sleights.
* Eclipse Phase favorite methods of dealing with suspected spies is to stick a bunch of them in the same lab or organization, and tell each of them that they suspect one of the others in the group of being a spy. Then sit back and watch the fireworks.
* Eclipse Phase features a number of nootropic drugs, including ones intended for combat. Kick makes one more alert, Phlo enhances reflexes and dexterity, and BringIt causes one to emit pheromones that incite others to attack them.
* Eclipse Phase for both pseudo-immortality and most interplanetary "travel". Though unless they were really rich someone rarely gets downloaded into a clone, rather a "used morph" that happened to be lying around at the body bank. Making more than one active copy of a person is fairly easy and highly illegal, but slightly edited copies are sometimes used for a form of real-time interplanetary

communication.
* Eclipse Phase... from across vaccuum and through the best protection humanity has ever devised. Monstrosities prowl the dark parts of space, just left behind when the TITANs vanished. Of course, the TITANs only started this menagerie of horrors because a cosmic superbeing (superbeings?) of enigmatic origins and goals did something similar to them for similarly ineffable reasons. Transhumanity's only hope lies in the fact that apparently nobody who matters cares enough to take the few months required to finish the job, but they might do it anyway out of carelessness.
* Eclipse Phase from earth, but new faiths arose to fill in the gaps. The most common is Neo-Buddhism, Buddhism combined with Transhumanism, where uploading is seen as a form of reincarnation and the emphasis is on lessening suffering rather than escaping it. Oddly, Islam was able to adapt to uploading, but the other Abrahamic faiths largely couldn't. The Catholic church is also still influential in the Jovian Junta, with its large population that managed to escape Earth in their original bodies.
* Eclipse Phase future. It's so ubiquitous that people without at least some sort of external device for Mesh access (most Morphs come standard with implants) are considered one of the new disadvantaged classes and there's social services to get them connected.
* Eclipse Phase future where bodies are just a shell that can be swapped easily (although expensively), and all bodies come with built-in immunity to sexually transmitted infection and can choose if they become pregnant or not, any and all conventional ideas of gender have pretty much fallen by the wayside. In the game, you have a separate gender for your body and mind and it's up to the players how they deal with that. Unless you do very extensive research, there is no real way to KNOW what gender a person is, whether they want to act male or female. Since not all people are human, or indeed humanoid, the issues presented in the game much more strongly run along species/artificial life prejudice than gender.
* Eclipse Phase had rendered people as software and bodies (referred to as "sleeves") are reasonably considered to be interchangeable hardware. Unlike the Kovacs novels, externally stored "backups" are considerably more common instead of being exclusive to the wealthy.
* Eclipse Phase has a couple of these, most notably Olaf (an apparently deserted Dyson sphere). There's also an apparently abandoned, presumably Titan-built Matryoshka brain in the outer Sol system.
* Eclipse Phase has both "skillsofts" that run on nanites in the brain, and psychosurgery skill imprints.
* Eclipse Phase has checked off each of them, although number 7 was carried out by superintelligent AI's, the TITANs, who proceeded to forcibly upload many humans, reduce Earth to a blasted hellscape, and vanish through hyper-advanced wormhole gates. Most of them are considered routine everywhere except the Jovian Junta, although attempting to create another TITAN-style "seed AI" with unlimited potential is so illegal that if you attempt it you will be killed and all your backups will be wiped, and if your habitat doesn't take you down, Firewall will.
* Eclipse Phase has exhumans, people who modified their bodies and minds too much and became utterly alien to the rest of transhumanity in the process.
* Eclipse Phase has monofilament swords and garrottes, diamond-edged axes, vibroswords, swords made of memory polymer that becomes stiff or flexible with an electric charge and wasp knives among others.
* Eclipse Phase has several terrorist groups including pro-human enhancement, anti-human enhancement, a group of uplifted animals who want to destroy uplifting technology and devolve etc.
* Eclipse Phase has the Enhanced Pheromones biomod that gives the user a bonus to social tests against other creatures that can smell. There's also a number of drugs that cause the user to emit pheromones, Alpha stimulates threat pheromones that make the user seem more threatening (and has other effects that make him a domineering asshole), BringIt calibrates the pheromones so that others want to stab the user instead, while Hither makes you smell sexier of course.

* Eclipse Phase has this, because any object not physically implanted or worn has to be usable by everything from ordinary humans to uplifted squid. As a result, everything is palm-sized, made of smooth cream-coloured plastic, lacks corners or sharp edges, and more than likely doesn't even have buttons since you can operate most things mentally.
* Eclipse Phase: "Hidden Knowledge" psychosurgery conceals information somewhere in a character's mind until released with a trigger word. Or more psychosurgery.
* Eclipse Phase includes a variety of whales that are members of transhumanist society. Suryas, a genetically engineered variety, live in the corona of the sun, with light-up skin. Other uplifted types of whales can be seen in spacesuits in the vacuum of space, others in low-grav environs. The recent splatbook, Panopticon, describes cetaceans' unique 3D sensibility as an advantage for moving around in space.
* Eclipse Phase in storage, while most Synthmorphs can be printed out in a matter of hours.
* Eclipse Phase in the form of "egocasting", transmitting your mind at lightspeed to a given destination before (usually) downloading it into an on-site body. It's possible to ship your own body in cold storage, but depending on the distance it could take quite a while to show up.
* Eclipse Phase: In the Jovian Republic opiates, cocaine, any of the various drugs in the setting that use nanotech, and tobacco are illegal. Though alcohol and cannabis are allowed. In less conservative polities, that is to say, the rest of the solar system, drug laws vary a great deal.
* Eclipse Phase introduces Dvergar (singular: Dvergr), short and stocky morphs meant for exoplanets with significantly higher gravity than old earth.
* Eclipse Phase intro fiction 'Lack' begins and ends with Sava waking up in a new body and asking what the date is.
* Eclipse Phase is a similar situation to Takeshi Kovacs (see literature), except that backups are more common making it even more difficult to kill someone permanently.
* Eclipse Phase is believed to be a Dyson sphere. Who built it, and why, and why the Pandora Gate is on the outside, and why it shoots down any attempt at orbit, and at least a hundred other things about it, are not known.
* Eclipse Phase is the plasma rifle, however it's also the bulkiest, only fires in single-shot mode, and has to cool off for a couple rounds every two shots.
* Eclipse Phase is used for applications as mundane as travel, not just to provide a recovery option to the recently deceased.
* Eclipse Phase; justified as it's apparently quite useful when the majority of transhumanity is crammed into habitats, and since many of those habs are on Mars or spun to Martian gravity some rather impressive stunts are possible.
* Eclipse Phase made contact. Transhumanity is too fragmented for any sort of "empire", though the Planetary Consortium has ambitions towards such, despite the Anarchists attempts to thwart them.
* Eclipse Phase makes a mention of the irreverent news review cast MRGCNN, the Monster Raving Goblin Cock News Network.
* Eclipse Phase.) Many devices have fallback hardware controls. The ubiquity of AR can backfire: 'mist' is the term for inundating quantities of AR popups and advertisements. Whatever device you use to access AR channels is also vulnerable to hacking, allowing an attacker to cut you off from information... or inject AR illusions of their own.
* Eclipse Phase. Many of the most powerful morphs are synthetic, and cheaper (in credits, but not build points) than equally strong biomorphs. But biomorphs are easier for transhuman Egos to adjust to and many polities discriminate against synthmorphs.
* Eclipse Phase many people following the Fall live in space habitats, many of the bigger ones are toruses or O'Neil cylinders. However there's also a number of habitats that don't bother with spinning since basic biomods counter the degeneration from microgravity.
* Eclipse Phase media, characters do still take 10 points of cold damage per minute

the second they enter space without thermal protection. This is especially jarring considering that Eclipse Phase constantly prides itself at being one of the most "hard sci-fi" games out there (except when it comes to alien or post-singularity phenomena, but then it's just Clarke's Third Law at work)
* Eclipse Phase mineral claims in the belt are a constant point of contention between the Planetary Consortium and the Autonomists, and between Autonomist factions (anarcho-capitalists, capital-A Anarchists, Titan...)
* Eclipse Phase most illustrations show people wearing stuff that appears to be covered in neon lights, most likely made of smart materials.
* Eclipse Phase most meat is grown in vats and a lot of food comes out of "makers" (the cheap ones dispensing nutrient pastes). Granted earth is no longer hospitable to transhuman life and most of the survivors live in space habitats, so it's not like there's much room for agriculture.
* Eclipse Phase of an entire Slitheroid entering the genitals of a Pleasure Pod on their new body's right bicep.
* Eclipse Phase. Of course, to the transhuman residents of the setting, it is still abject squalor and so they would rather be rescued.
* Eclipse Phase only has spinning habitats and ships, though since basic biomods provide immunity to the degenerative effects of microgravity many don't bother.
* Eclipse Phase or a "ghostrider" implant, and control them with a "puppet sock".
* Eclipse Phase or uploaded transhumans who temporarily or permanently exist as a virtual brain on someone's server. Of course, since most adventures are designed for embodied characters they often need to "ride along" on another character's peripherals or specially designed "ghostrider" implants.
* Eclipse Phase plays with it. Physical travel from one planet to another takes weeks or months and is expensive, but most people upload to a rental body at their destination which can be just as pricey but only takes a few hours.
* Eclipse Phase Psi-Gamma slights are all telepathy used in different applications.
* Eclipse Phase several national militaries built anthroform war machines, both piloted and remote-operated. During the Fall the TITANs hacked most of them as well as fabricating their own improved Warbots, leaving a lot of people post-Fall rather twitchy around mechs.
* Eclipse Phase. Some gatecrashers say they heard whispering in the darkness, some recount terrifying experiences of encountering monstrous presences, and an unlucky few even come out the other side of the gate as a gibbering heap, their sanity ripped away by the transport.
* Eclipse Phase so that usually doesn't kill them permanently, but so long as the stack is disposed of and their last backup wasn't too recent their next incarnation won't remember the masquerade breach, and might even be recruited later.
* Eclipse Phase that destroyed Earth and 90% of transhumanity. The Planetary Consortium (Mars, mostly) and Lunar-Lagrange Alliance (near-Earth space) tend to treat them almost like property under a lot of restrictions, while the Autonomists (Saturn, Asteroids, etc.) treat them equally. Even so, all but the most extreme Singularitarians are scared of Seed AI, which are capable of unlimited self-improvement and were the primary cause of The Fall.
* Eclipse Phase that employs post-Singularity technology in order to make routers unnecessary for anything less than interplanetary communication.
* Eclipse Phase that they essentially break the laws of physics in this setting, since it's essentially impossible to keep secrets buried this deep without someone exposing them, but Ozma does it anyway. (Firewall, the contrasting Secret Organization, is less concerned about keeping secrets as such and more about simply ensuring that nothing becomes an existential risk to what's left of humankind.)
* Eclipse Phase, the Earth has been ravaged by nuclear weaponry, bio- and nanovirii, and rampaging TITAN technology. The planet is under interdiction by a number of Kill Sats - they shoot down anything attempting to reach or leave the surface. Who put them there? Nobody's quite sure...
* Eclipse Phase. The only "modern" drug featured is orbital hash but post-singularity narcotics range from bananas that decrease radiation damage to nanite-laced flowers that put you in a very trippy virtual reality.

* Eclipse Phase. There are also a few more mundane designer plagues too.
* Eclipse Phase there's a mechanic called "stress points" that can cause psychological disorders or permanent catatonia if the PC lets them accumulate.
* Eclipse Phase. The survivors of the Fall have spread throughout the solar system.
* Eclipse Phase they're known as Ego Hunters, and their job is a bit more difficult since many people change bodies like wardrobes.
* Eclipse Phase they tend to do less damage and are less effective at penetrating armor than kinetics (especially railguns).
* Eclipse Phase to induce states that simple chemicals could never accomplish. For instance "petals" are a variety of nanite-infused flowers whose petals send the user into a very trippy virtual reality when consumed; one popular variety makes the user think his hand has detached itself and is running away.
* Eclipse Phase to place a targeting reticle in their field of vision for a 10 to shooting, are a moderately priced mods.
* Eclipse Phase to seize several Anarchist and Extropian habitats on the grounds that they were havens for software pirates (neither group acknowledges copyrights). However the Titanian Commonwealth decided to side with the anarchists and they formed the Autonomist Alliance.
* Eclipse Phase to Synthetic characters or those with external cyberware.
* Eclipse Phase usually have them stationed around their coverage areas.
* Eclipse Phase "Wait, that was you?" where a character was the subject of an embarrassing viral video or meme sometime in the past and once per session the GM can declare that an NPC recognizes them, invoking a social penalty. Conversely, the positive trait "You're that guy!" reflects good internet fame.
* Eclipse Phase who are more of a threat to their own citizens than anyone else, and is more likely to send humanitarian aid than anything military unless the Jovians are trying to start something with a Titanian ally.
* Eclipse Phase who hire themselves out as mercs while waiting for an opportunity to seize control of the system.
* Eclipse Phase willing to sign anything if it meant eventually having flesh again. The practice is condemned by most Autonomists, excepting the anarcho-capitalist Extropians who also practice debt slavery.
* Eclipse Phase without any overt downside. Nevertheless, these infectees often begin having dreams of alien landscapes, strange urges and feelings, and even a sensation that something else is looking out from behind their eyes...
* Eclipse Phase, with simple programs and predesigned environments but no actually intelligent beings, and no-one is quite sure why.
* Eclipse Phase. Your mind is software and can be "resleeved" into anything from another human form to an uplifted octopus or even a futuristic tank. If for some reason you want to keep your old body, you can still deck out it with an array of cybernetic and biological modifications, without any limitations whatsoever.
* Eclipse. This won't destroy the planet, but the seismic effects will depopulate it quite handily.
* Eclipse Trilogy between NATO and the Warsaw Pact bloc. It was retconned later to a revived Soviet Union.
* Eclipse, we find out that the main reason she became a vampire was that Carlisle had hoped she would be a wife for Edward.
* Eclipse, where his marines pushed back the soldiers and successfully took out one of the enemy barracks.
* Ecliptor's second sword turns up a few times. Darkonda's becomes Villamax's the very next season, completely unaltered, and retaining it's dagger-to-sword transformation ability (not
* "ecnarbmemeR-Remembrance" is a short little chapter establishing how Shining Armor fits in this series. And while it has a few moments of creepy undertones, it's still pretty light hearted. It also happens to be published right smack in the middle of the
* Ecoco, a former Japanese power company mascot, was a young girl in a
* Eco Fighters who intends to strip your planet of all its natural resources and turn it into a lifeless, polluted "Doom Sphere."

* Ecole Spéciale Militaire de Saint-Cyr. Its motto is "Ils s'instruisent pour vaincre": literally "They study to vanquish" or "Training for victory".
* Economically disenfranchised areas of an American city tend to have higher crime rates than the rest. Police look upon residents of said areas as more likely to commit crimes. This creates or exacerbates a distrust of the police in said communities. This leads to a lower chance of any crimes being solved, which lowers the police's opinions of said communities, etc. It is rather tragic to see
* Economics: Investors' fears of a downturn in the stock market are one of the most common reasons for a downturn in the stock market.
* Economic theories' principal ideas are often explored first in literature before being codified:
* Economies develop because of an inversion of this trope; if person A and person B both have lots of something the other needs, but don't want what the other has then they can't just exchange them. Solutions like common trade goods (something they can exchange their goods for something that everyone needs or accepts), currency (when tokens of exchange are produced by some sort of authority), or socialised distribution (a third party takes responsibility for distributing excess goods) ensure they can both get what they need.
* Economist magazine wrote that "it is no exaggeration to call this gendercide", adding that the number of women "missing" in this way is well over a hundred million. This has led to increasing criminalization of selective abortion of females, including banning the use of ultrasound for non-medical reasons, but the laws have had limited effect because it's hard to prove the doctor informed a couple of a child's gender. Yin Yin Nwe, Unicef's representative to China, refers the fact that the one-child policy brings many benefits for girls "but they have to be born first".
* Economist Richard W. Rahn, a senior fellow at the libertarian think tank the Cato Institute,
* Economists have studied how much value is lost by these transactions. For example, if someone buys a brand new item that the gift receiver doesn't like and donates to charity, which then sells the item at 20% of the original price, then 80% of the original value has been lost. Or if you estimate that the receiver values the gift at 80% the cost (a loss of 20%), then that amounts to a loss of $28 billion a year worldwide. Moral: just
* economy cars American cars Americans in the States don't get to buy. Japan is a notable exception, with relatively few European or American high end luxury models but fleets and fleets of practical consumer cars.
* Economy Cast: Using about one actor to fill a role that would usually be used by several in order to save money.
* EcoQuest features a number of ocean creatures that are able to communicate with the human protagonist. The first one he meets is an injured dolphin named Delphineus.
* ECO series in 2014, which consist of power-efficient variants of existing boards from the company. Sure, it does save energy and reduce emissions by allowing users to turn off or suspend parts of the system, but whatever "eco-friendly" sales pitch MSI throws at would be moot considering the environmental impact in manufacturing those boards.
* Ecosystems Unlimited executive Bill Raibert has a regular pizza order of sugar, coffee beans and
* Eco-Terrorist: An individual or organization commits violent acts in the name of protecting nature/the environment.
* Eco-Terrorist: A radical environmental activist who's willing to resort to illegal or even violent methods to try and save Mother Nature.
* ecoterrorist groups but also most scientific institutions, in violent retaliatory attacks.
* Eco-Terrorist in response to witnessing deforestation near his cabin. He then successfully managed to evade the authorities throughout his 18-year bombing campaign, utilizing increasingly sophisticated explosives, until his brother David recognized his writing style and turned him in following the publication of his

manifesto. After his arrest, Ted was diagnosed with paranoid schizophrenia which was likely exacerbated by Murray's experiments.
* Eco-Terrorist: Militant environmentalists whose motivation is to punish people they blame for destroying the natural environment.
* Eco-Terrorist: Saving the planet requires punishing all of humanity for their crimes against nature.
* Eco-Terrorist: The planet is in trouble, and we don't care who we have to kill to save it!
* Eco-Terrorist, to the point that they'll try to punish all of humanity for their crimes against nature.
* Ecotopia. American newspaper reporter William Weston visits the title country, which was formerly part of the U.S.
* Ecotopia details the titular country, composed of the entire West Coast minus Southern California. A forerunner of "Cascadia", discussed elsewhere on this page.
* Ecotopia. When the fledgling title country was invaded by the U.S., its armed forces used missiles that deployed streamers to tangle up the blades of attacking U.S. helicopters. Which would work about as well as a chocolate flamethrower, but hey.
* Ecotopia, where it's used as an outlet for people's aggression and warlike instincts.
* ECOWAS began to deploy forces to support the junta and bring down Ansar Dine in January 2013, the MNLA agreed to work with the French to throw the Islamists out.
* Ecstasy. Eva puts her clothes on the horse. Her untethered horse trots away. Eva had a little adventure, trying to catch her horse.
* Ecstasy: Eva rides her mare to the lake to go swimming. Eva's mare trots away after hearing a stallion nearby. This is a problem for Eva, as she was swimming naked in the lake, and her clothes were on the horse.
* ecstatic. Alya's not the only one, either - a sizable number of Parisians admire Ladybug and Chat Noir, including their teenage peers, and the latter are only too happy to answer when the heroes need their aid.
* Ecthelion of the Fountain : killed Morgoth's general and Captain of Balrogs by impaling it on his helmet crest.
* Ectobiology is somewhat unusual in that it does not require "donors," as it works by
* Ectoplasm: An instrumental excerpt from Nyimbo Yakwatu by Robson Banda and the New Black Eagles (a Zimbabwean group popular since the 1980s).
* Ectoplasm is a thick, slimy substance that is only produced by ghosts that are particularly angry or dangerous; the most common form of it is pitch-black.
* Ecuador abandoned its own currency and uses the U.S. dollar. At the time it did so, one U.S. dollar was worth 25,000 sucres.
* ECW a boy, and then calls himself a god. He continues with "If God was a bully, he'd be me!"
* ECW ammo for his anti-network rants. They even created a character named Cyrus who was supposed to be part of the network and kept screwing them over!
* ECW. Axl likely had no clue what harm would come from his no-showing that night.
* ECW begging for the ref to stop the match, find a way to prevail in the end.
* ECW bladed him at the November 23, 1996 show. Then it turned out he was only 17, and wasn't actually trained by Killer Kowalski as he claimed. Then it went to court. New Jack was later acquitted of all charges due to the kid lying to the promoters.
* ECW brawl, an umbrella turned up among the weapons and Kronus ran around with it open over his head. Indoors.
* ECW), but managed to get the pinfall and win the match, making him even more beloved amongst the fans.
* ECW", but parading around virtually naked aside from "caution" tape reminiscent of Orlando Jordan.
* ECW by Crusher Hogan to help the struggling company attract more fans.
* ECW came along, and with his original return storyline spoiled on the Internet, he and Matt had to take each other's places.

* ECW CDs was so that they could have less expensive cover versions by less well-known bands at their disposal instead.
* ECW could top that! And in good conscience, we didn't want anyone to try."
* ECW dancing machine DJ Gabriel lasted only six months in the WWE, while his valet
* ECW. Despite being only 150 lbs at 5'8, he'd be put in matches with much, much, larger wrestlers such as the 6'9 600 lbs Big Sal E. Graziano and find some way to win pretty much every time.
* ECW - "Extreme Championship Wrestling" (formerly stood for "Eastern Championship Wrestling")
* ECW got thrown from the ring into the crowd. The audience caught him and crowd-surfed him back towards the ring.
* ECW had to ask the audience 5 times in a row to not throw chairs into the ring until they finally ran out.
* ECW his opponent and hit the Acid Drop (running-up-turnbuckles bulldog) and pin the big guy in about 15 seconds or so.
* ECW in the mid-90s: he lost every single match except their last one, but every time he'd come oh-so-close only for Raven to pull some kind of dirty trick and snatch victory from the jaws of defeat.
* ECW in which he continually ended up losing to him. Dreamer finally won on Raven's last night with the company.
* ECW itself was an xception to the rulez, so to speak, by correctly using an E for Extreme. (Other wrestling promotions such as XPW are not so grammatically-minded.) It was founded in 1992, though: you can bet that 10 or so years later there would have been an X in there for sure; their late-period pay-per-view Anarchy Rulz submitted to this trope, for instance. They also started out as Eastern Championship Wrestling.
* ECW. Later came her arch-rival Prodigette, who was similarly built but taller(and bigger boobed).
* ECW main event, Dreamer hit Raven over the head with a VCR, then with the remote to the VCR, which would be much harder to find today.
* ECW New Jack's head. Brain fluid came out of New Jack's nose, but he temporarily went blind in one eye, but he lived and even had more scaffold matches!
* ECW of a woman he outweighed by around 120 lbs. takes it to the necessary levels of outrageousness. The match was shown on ECW TV, so Douglas hooking the leg also sent the message to any newer viewers that Shane Douglas is the biggest jerk in the universe.
* ECW One Night Stand 2005 was originally this for Extreme Championship Wrestling. ECW had closed in 2001, with its assets purchased by WWE sometime after. The original concept of ONS was a one-time WWE-produced ECW reunion show, which made it an example of this trope until ECW was resurrected on a full-time basis the next year.
* ECW One Night Stand. Cena acknowledged and played to the negativity, acting as an effective heel if only for one month (going so far as to proclaim he'd beat Van Dam even if the ECW mutants rioted). Cena's character is still hated by many, but mostly because it is the product of poor booking. Cena himself has a large fanbase that eats up his merchandise at rates surpassed by very few other wrestlers, none of whom have had his longevity in the company.
* ECW played a major role in ECW's decline, yet they are criminally under remembered compared to the "extreme" elements of the show.
* ECW. Sadly, this gambit didn't work, as TNN kept the show on long past the point of no return.
* ECW's Axl Rotten sent this message to his opponents, carrying around a chair which featured the words, "THIS IS GONNA HURT!"
* ECW's constant money problems led to this in spades. Rather hilariously most of the merchandise was designed by wrestler Taz, with other wrestlers like Dreamer and Richards involved in sales.
* ECW stabbed a man several times in a match, threw another man off of a 20-foot balcony and so many other things.

* ECW successful, and are now known as possibly the most prolific tag team in the history of the business. The Blue Meanie couldn't match the Dudley Boys' career achievements, but, the fans did come to love him.
* ECW. The change to Raven was explained by Scotty becoming depressed.
* ECW was an independent wrestling company, they had the website ecwwrestling.com. ECW wrestling. Extreme Championship Wrestling wrestling. That's been a rather common thing with many wrestling companies with the words in their abbreviations. All WWE broadcasts end with the WWE logo and underneath it "WWE Entertainment", which comes out to "World Wrestling Entertainment Entertainment".
* ECW when he took on the "El Puerto Riqueño" gimmick and did end up moving to Puerto Rico and finding success there as a junior heavyweight in WWC. He even used Led Zepplin's "Immigrant Song" as his entrance theme.
* ECW when he went to WWF. That wasn't about being "Xtreme" though, that was so WWF/E could establish a trademark, hence why he went back to being Rhino after they canned his ass.
* ECW where various cameraman were getting knocked out, leading to a "Please Stand By" message appearing on the screen.
* ECW, which flew in their amateurs and generally turned them into all stars by the time they returned to the fifty states. Though when AJW and HUSTLE died, UPW was not far behind them, despite Zero 1 still being willing to prop it up.
* ECW, which were similarly ran by fan photographers roped into the business.
* ECW, who continued to use real songs as entrance themes as part of their image as an "outlaw organization". Even their TNN/SpikeTV theme counted (White Zombie's "More Human Than Human").
* ECW whom Dreamer and Raven had both known at summer camp. Dreamer had made fun of her at the time for her weight, see, and so she fell in with Raven. Beulah grew up not just to be a hottie, but according to many wrestling fans, the most classically beautiful valet of all time. She ended up with Dreamer in both the storyline and real life.
* ECW whose character attempted to tone down the hardcore style ECW was known for.
* ECW with bodies to hit with weapons, but they also often jobbed to face teams in tag matches to set up the faces for a showdown with a more important heel stable.
* ECW World Tag Team Champions, April 13, 1997, Kronus turned to the camera and introduced himself to the PPV audience by randomly saying, "Ass, baby, ass! Hoo hoo!"
* ECW World Television Champion" sign positioned right above and behind Taz's head.
* Eda and her sister Lilith both contrast Severus Snape in different ways. Just like Snape, Eda's main tool of trade is potion-making but clearly possess skills beyond that. But while Snape is enjoying an overall acceptance among the society, despite being a horribly abusive teacher to his students and Harry in particular, any attempts to mend fences between them ultimately failing, and has been
* Eda doesn't appear in "Through the Looking Glass Ruins". King doesn't
* Ed, a judge would decide the punishment of people before him with a Wheel-of-Fortune-style implement. He seemed to have been doing that for a while before the protagonist discussed it with him....
* Ed also doesn't show up in "Blair Waldorf Must Pie!," "Roman Holiday" and "All About My Brother".
* Ed & Oucho has the pair having a conversation. Oucho speaking in his tongue of "dee baa shor baa dee" says something, to which Ed replies he cannot say on television. Oucho continues and Ed starts shouting louder at him to stop.
* Ed and Al discover, to their horror, that five-year-old Nina Tucker's father has performed a transmutation on her and her pet dog to make them into a chimera. Nina's father Shou tells Ed
* Ed and Al obviously do this, too. They have a lot of practice fighting together.
* Ed and Al tried to bring back their mother. Ed was the oldest sibling and thought he could stand on his own, so Truth took his leg. Al wanted to feel his mother's warmth again, so Truth made sure he could never feel
* Ed and David Milliband, respectively Energy and Climate Change Secretary and Foreign Secretary under

* Ed and Envy fight each other plenty in the manga, but this continuity adds a personal enmity in that
* Ed and his teacher Izumi might count as an inversion; on several occasions they transmute doors on walls that didn't already have them, so they can enter through said doors rather than smashing the wall.
* Ed and Lorraine Warren. Somehow, it's even more intimate than their kisses.
* Ed and Winry are very obviously in love in the manga, yet they never kiss and barely even hug. Even after
* Ed and Winry bicker constantly and are obviously going to be a couple from the beginning. Al gets together with Mai in what seems to be a much more peaceful relationship.
* Ed and Winry's children's son has the same style as him as a toddler and looks like a miniature version of him.
* Ed Asner, who is Jewish, played a Nazi who hid as a Holocaust survivor in an episode of
* E. D. Baker, Annie starts her search like this. Once she joins Liam, she readopts a dress.
* E. D. Baker, the fairies are little and fluttery but still try to force the exhausted Annie to dance all night with them.
* E. D. Baker. (Though sometimes she reflects spells — sometimes she doesn't.)
* E. D. Baker, Tomas and Clara were abandoned in the woods by their stepmother because they would eat food she wanted to keep for her pet dogs.
* Ed Bighead instead to create a wall of water to get rid of Bighead Studios.
* Ed Bishop dyed his hair white-blond for the role of Commander Straker in
* Ed Boon, which is generally regarded to be one of the few decent film adaptations of a video game, if not the best.
* Ed Brubaker and threatens "obstruction of justice" if he doesn't identify him. The bartender just smiles and tells him he's more than welcome to try and press charges on a 60 year old man for not recognising a particular face in a dark and crowded building.
* Ed Brubaker has said many times in interviews that the first two comics he bought with his own money were
* Ed Brubaker's unbreakable skin, implying that the process used on Cage was also based on the experiments done on Steele.
* Ed Brubaker there's no Batman to punch him into that vat of chemicals).
* Ed Brubaker was coming in after him and he requested that Matt be in jail to kick off his storyline, thus needing the change.
* Ed, but like some of the examples above, he didn't quite make it on time...
* Ed Byrne also does one in Mock The Week (Season 13 Episode 1, to be precise) when Dara announces "This week's winners are Ed Byrne, Hugh Dennis and Milton Jones!". He takes a sip of what looks like extremely milky tea, the winners are announced, and the camera zooms in to him spitting out the tea.
* Ed Byrne argues that slut-shaming men are self-defeating, as they cause women to feel bad about having sex and fear "getting a reputation," which causes men (including himself) to get turned down by those women.
* Ed Byrne has a routine about his father, a former fabricator in sheet metal works, and now even as a pensioner is much tougher than his son. He explains that they share a sense of humour, but that's about it. Eddie Senior is a big burly chap who is good with his hands. Ed is a scrawny, long-haired 'weakling child' who likes performing. The nadir for Ed comes when he buys something big for his house and his dad tells him not to try installing it because he's scared that Ed will hurt himself. And then turns up with his toolbox, still wearing his pyjama bottoms.
* Ed Byrne, who is a self-professed nerd and generally self-deprecating.
* ED can stand for Eating Disorder (anorexia/bulemia) or Erectile Dysfunction (impotence). Which makes certain ED drug commercials confusing, disturbing, or hilarious.
* Ed "Carols" go from Nick Stanton to Bonnie Hane to Dennis Martino to Frankie Hector.

* Ed Cassidy, drummer for 1960s LA rock group Spirit. The guy was about 20 years older than the others and was the stepfather of guitarist Randy California, yet managed to take a genuine liking to the band's music. Plus, he was no slouch when he came to drumming.
* Ed Cobb was a bandmate of Glen Larson (as mentioned above) in The Four Preps, but he also did work in
* Ed confesses his love to Winry when he's about to depart, and she confesses back.
* Ed consisted of him driving through town. To this Westfield native, it was very odd to see the familiar sights of downtown Westfield, cut and pasted out of sequence.
* Edd also has his moments of this, particularly in the season where they go to school. He was willing to betray his friends through following school regulations, such as hand-delivering his friends' report cards to their parents (sure Eddy deserved it for not doing his work, but Edd failed to take notice on how dim Ed is to function in school and therefore needs counseling since his parents are no help). Of course, it's mostly when he is either
* Eddard "Ned" Stark himself is introduced executing an Oathbreaker (a member of the Night's Watch who deserted their post), a firm believer in the adage "The man who passes the sentence should swing the sword." He also finds no pleasure in doing so, seeing it only for the grim business that it is.
* Eddard Stark (and everyone else with the Stark look) and Stannis Baratheon are considered average.
* Eddard Stark appears to be the show's main protagonist. He's played by the show's most famous actor and the plot centers on him more than any other character. However, he dies at the end of the first season, causing the drama to fracture into a large number of plot lines, each with their own protagonist.
* Eddard Stark earns the title of "Iron Wolf" during the Battle of the Hedgerows, which shows up again and sticks during the wars in Essos.
* Eddard Stark is seen as the model of a liege lord, but he is plagued by feelings of inferiority and fears his family will pay for the things he allowed to happen during the rebellion against the Targaryens.
* Eddard Stark is wise in war and justice but is totally surprised by the amount of intrigue and corruption infecting capital politics.
* Eddard Stark looked older than 35 because of the streaks of white on his beard and the way he carried himself in general.
* Eddard Stark meant to his bannermen that they would gladly march through a devastating blizzard and then fight a battle to honor his memory and save his daughter, even though they could have stayed home and waited for spring.
* Eddard Stark serves as this to his friend, King Robert, who self-admittedly neglects the day-to-day running of his kingdom.
* Eddard tells Catelyn and Jon about the latter's true ancestry (Jon's parents are Rhaegar and Lyanna), and Daenerys learns about the events of Robert's Rebellion.
* Edda van Heemstra, a ballet dancer who supported the Dutch Resistance during
* Edd "Double D" has "It's all fun and games until someone [points out something dangerous about the current situation or activity]."
* Ed destroys Pride's body by crushing his head. Yes, this is the same Pride that's an incorporeal mass of toothed shadows attached to a Creepy Child
* Edd goes insane after failing to find a place to bathe and getting dirtier with every attempt. He snaps out of it, eventually.
* Edd guessed that it may have been because he was pantless at the time.
* Edd had a few moments of this, notably in "The Day The Ed Stood Still" when he scolds Edzilla (who is Ed in a monster costume) for
* Edd has unintentionally gained the affections of pretty much every girl in the series;
* Eddie and Doug Gilbert both entered the GWF upon its inception in 1991. Doug spent his entire tenure competing under a mask as The Dark Patriot, and their relationship was never acknowledged—even when Eddie beat Doug for the promotion's heavyweight title.

* Eddie and Harry, given some of the behavior they exhibit near the end.
* Eddie and his uncle, Dr. Scott are nearly always played by the same actor in
* Eddie and the Cruisers II: Eddie Lives!, in which Cafferty as Eddie Wilson sounds even more like Springsteen than in the first film.
* Eddie and the Cruisers is an in-world example: the eponymous band is hailed as the forerunners of modern rock even though the band disbanded after the sudden death/disappearance of their lead singer/songwriter.
* Eddie and the Cruisers: Mark Holmes, who played bassist Quinn Quinley, and Paul Markle, playing drummer Charlie Tansey, were members of the Canadian metal band Platinum Blond.
* Eddie and the Cruisers, of all places. Diane the artist chick meets the hero, a disguised Eddie Wilson, at a hockey game and becomes so obsessed with painting him that she tracks him down at the bar featured on the matches he had briefly used to light a cigarette.
* Eddie and the Cruisers: Overanguished Jersey rock star Eddie Wilson fakes his death by driving his car off a bridge into the Raritan River. Eddie is seen in the last shot watching TV in a shop window. This becomes a plot driver in the sequel, when the Evil Record Company, which is cashing in on some previously unknown Eddie Wilson tracks, uses the lack of a corpse to build excitement by spreading the rumor that the tracks might have been recorded "after Eddie died." All this while Eddie is actually hiding out in Montreal, startled to be suddenly hearing his old music on the radio (sniff).
* Eddie and the Cruisers. Played with in that the reason their lost recording is so sought after is that it's implied to be way ahead of its time and does sound like 1980s (when the movie is set) Springsteen.
* Eddie and the Cruisers's lead singer, played by Michael Paré, dubbed with John Cafferty.
* Eddie and the Cruisers started out as a serious musician who wouldn't sell out. By the end of the sequel, his only emotional response was to run away from anything that might be critical of his music.
* Eddie and the Cruisers. Unfortunately, the movie was considered pretty bad and the director of the first film wanted nothing to do with the sequel.
* Eddie are actually an aversion of this trope; Vickie didn't become an on-screen personality until after Eddie's death in 2005.
* Eddie attempting a murder-suicide by lifting Bojack into the air and flying straight towards an airplane engine.
* Eddie at The LMV: Eddie reviews whatever he likes, from his favourite adverts to whatever he finds lurking around his house.
* Eddie at The LMV video, in which the lyric "Another shot of whiskey" has a visual of Eddie pointing a pistol at a man (presumably called Whiskey).
* Eddie begins to believe towards the end of season 2 that Patricia is seeing someone else because of how often she disappears without telling him why, and he suspects it might be Alfie. He eventually follows her, Fabian and Alfie when they leave
* Eddie Bloomberg aka Kid Devil had very few friends his age throughout his early history, the closest people being his aunt Marla and the hero Blue Devil. His later efforts to gain super powers and joining the Teen Titans were partly from
* Eddie Brock’s more monstrous moments and overall make him more sympathetic and even heroic.
* Eddie Brock has this opinion of his 'relationship' with Gwen Stacy in
* Eddie Brock, monstrous appearance, and tendency to show up seemingly out of nowhere.
* Eddie Brown's duct tape mannequin torso Quicksilver. Yes, he sees what you're doing, and he tells Nite-stic everything he sees.
* Eddie Bunker lived as a criminal and thief many years before becoming a writer. He was later cast as Mr. Blue in
* Eddie Cantor's "Merrily We Roll Along" is better remembered as the
* Eddie Castile. Described as blonde and one of the nicest guys Rose knows. He is very kind-hearted and protective of his friends, and is even willing to sacrifice

his own career opportunities to help them.
* Eddie Cochran was known for nicknaming. He called his mother "Shrimper" in reference to her height. Musicians Bob Denton and Richard Rae were "the Brew Brothers" (they always had a beer in their hands). The road manager for Eddie's and Gene Vincent's UK tour, Hal Carter, was "Boody" for how Carter pronounced "buddy". Not sure if it was true that he actually called songwriter (and fiancee) Sharon Sheeley "Charlie Brown" or why.
* Eddie Cochran was one of the great pioneers of rock. During his tragically short carreer he had several hits, many of which have been Covered Up by others. Cochran even used to be erroneously described on this very page as a "one-hit wonder".
* Eddie Dennis is the master of this. He's usually smiling when he appears on NXT UK, but with how toothy it is and the fact that it never quite reaches his eyes, it comes off more like an animal about to attack you.
* Eddie does this as well when Fabian suggests he takes Patricia to the movie on Ancient Egypt. Being that the two of them had a fight just before this, he replies that he'd rather take Victor.
* Eddie Drood books by Simon R. Green. He's a human storehouse of magical knowledge — ALL the magical knowledge.
* Eddie expresses his wish to sleep with professional tennis player Serena Williams.
* Eddie Fisher as the stage manager was cut, though he's still credited.
* Eddie Fisher. Started his career crooning with bands in 1946–48.
* Eddie Floyd (remade by Amii Stewart) has the line "It's like thunder! And lightning! The way you love me is frightening!" It is said that it was written during a thunderstorm.
* Eddie Gilbert: Debuted in 1979, became a big name in Memphis and other territories in the 1980s.
* Eddie Gilbert in a parking lot after his brother Doug had been "fired" from the promotion. Nope, just firing Eddie as well wouldn't be enough.
* Eddie Graham. None were related to him, nor were they really named Graham.
* Eddie Grant's hit "Electric Avenue" references this trope indirectly. It's actually about the 1981 Brixton riot, but the
* Eddie Griffin discussed the rumors that one of LeBron James' teammates had an affair with his mother, thus causing him to leave the Cavaliers. According to him, no wonder he left Cleveland, nobody bothered to tell him that his teammate was sleeping with his mama.
* Eddie Guerrero as a world champion and fan favorite before his passing in 2005. His entertaining performances and real-life story, finding salvation in his life before his death, has made him one of the most beloved figures in wrestling history.
* Eddie Guerrero a tainted burrito as revenge for Big Show spitting in Eddie's. Later that night in the middle of a match, Big Show had to flee the ring clutching his butt to find a bathroom backstage, losing the match by a count-out. Making matters worse, while doing "number two", Show finds out Eddie stole all the toilet paper.
* Eddie Guerrero drove several lowriders — often customized mid-1960s Chevrolet Impalas — into various arenas for big pay-per-view shows.
* Eddie Guerrero Eddie grabs a chair, then bangs it on the mat, tosses it to his opponent, and lies down. The ref turns back to see Eddie knocked out and his opponent holding a weapon so the ref disqualifies him.
* Eddie Guerrero. Eddie repeatedly threatened to reveal a dark family secret about Rey's past, which eventually culminated in a pay-per-view match with Rey against Eddie, and if Rey lost, Eddie would reveal the secret. Rey won, but Eddie revealed the secret anyway: That Rey's son Dominik was actually Eddie's from a period of time in which he was separated from his wife.
* Eddie Guerrero, Gino Hernandez, and others have had some heel turns, but the majority of their careers were as faces.
* Eddie Guerrero got away with it and is a notable aversion, possibly because his comedic cheating ways had become so endeared by fans.

* Eddie Guerrero has noted in his book that Eddie was so instrumental in bridging the gap between Mexican and American wrestling that he was regarded as a legend and huge face on both sides.
* Eddie Guerrero, "Hey, we may lie, cheat, and steal — but at least we're honest about it."
* Eddie Guerrero. If the referee was distracted or knocked out, he'd sometimes throw a chair to his opponent and then lie down on the mat just as the referee was about to turn around, making it look like his opponent had just hit him with the chair. It didn't always work, but Eddie gained more than a few DQ wins this way.
* Eddie Guerrero included an angle where Rey's real-life son Dominick was revealed to be the (kayfabe) biological son of Guerrero.
* Eddie Guerrero just got hit, at which point the ref awards him the match by DQ.
* Eddie Guerrero match, Eddie died of an unexpected heart attack at the age of 38, all those years of drug abuse having finally caught up to him.
* Eddie Guerrero - quite justified a lot of the time, since practically everyone he faced was more muscular or at least taller than he was.
* Eddie Guerrero somehow made Eddie beat the hell out of him when the Smackdown feud started.
* Eddie Guerrero the chair shot happen in order to call a DQ, this worked on multiple occasions, including his last match before his death.
* Eddie Guerrero was well known for his "Lie, Cheat, and Steal" lifestyle. But he was so damn charming, he'd usually get away with it, all the while stealing the audience's hearts.
* Eddie Guerrero were teaming, Rey got slammed onto the hood of Eddie's car. Eddie came over to see what happened, cold-cocked Rey, and embraced the car as if it could feel pain.
* Eddie Guerrero. While Eddie would find his way back to sobriety, he never fully recovered from the effects of the drugs he used, which were the direct cause of his death.
* Eddie Guerrero would either dodge a corner charge or hit a spinning headscissor takedown, then follow up with the Three Amigos and the Frog Splash.
* Eddie Guerrero would take up using the frog splash to honor his memory and several more wrestlers would take it up to honor Eddie's.
* Eddie Hall took up Boxing to keep up his health. While he's relatively early, and, thus, relatively unrefined, as of this writing, he's still the
* Eddie in the second season, being a bit more headstrong than Nina was before.
* Eddie is also like this with Urkel and Waldo. He will fight with Laura, but his protectiveness of her is more
* Eddie is also this, attracting both Jessica Rabbit, a crazy psycho woman during his visit to Toon Town, and his own girlfriend.
* Eddie Izzard: "...and tonight, I promise to be 10% funnier — ah, ha! You can't tell, can you?"
* Eddie Izzard cake. Fortunately, the interrogator is the Church of England.
* Eddie Izzard described his playing of the clarinet as sounding like "a foghorn being dragged through... uh, a place where a foghorn should not be dragged."
* Eddie Izzard, English actor and comedian, identifies as genderfluid, uses she/her pronouns, and has described herself as "somewhat boy-ish and somewhat girl-ish."
* Eddie Izzard has a commentary, immediately lampshaded by im referring to it as an "audio commentary for an audio commentary". So.. yeah.
* Eddie Izzard has a joke about Captain Transvestite, an ineffective superhero. He spends so long putting make-up on as part of his outfit change that the person he's supposed to rescue is dead by the time he gets there, but at least he can use his lipstick to draw a line around the body.
* Eddie Izzard has a routine poking fun at this, in which Steve from the accounts department beams down alongside Captain Kirk.
* Eddie Izzard have been a mildly amusing bit about Darth Vader arguing with a cafeteria worker, but it's made into a hilarious piece of absurdist comedy by Izzard making Vader sound like a mildly irate British man, and making the Death Star look like a boring British office building.

* Eddie Izzard? (He may, or may not, make the door-opening noise at this point) We've got them now!"
* Eddie Izzard home video is nonsense, such as this explanation of the famous trolleys:
* Eddie Izzard how Russia's geography repelled both Napoleon's army and the Nazis:
* Eddie Izzard If the cast of horror movies listened to the BGM (or even realised they were being followed around by an orchestra), they'd know they were walking towards their doom.
* Eddie Izzard in "Dressed to Kill" comments, "I'm very positive on the French. My family way back was French. I go with it but they are kind of fucking French at times."
* Eddie Izzard, in response to someone asking why he always wore women's clothes, answered, "They're not women's clothes, I bought them, they're mine!"
* Eddie Izzard: "I was dead at the time! I was on the moon! With Steve!" Turns out, the question was "Did you brush your teeth?" And it hadn't been asked yet when the excuses were given.
* Eddie Izzard routine people is asked if they would like "Cake or death?" Everyone responds "Cake" and eventually the cake runs out. To which the next person replies "So my choices are... or death?? I'll take the chicken."
* Eddie Izzard's American imitation also ends up like this. Americans apparently talk very loudly and swear every other word.
* Eddie Izzard's Dress to Kill tour featured the 'Firework joke' which he repeatedly references throughout his performance then ends the show without telling it. It's lampshaded by several people in the audience who immediately begin asking for it. He doesn't.
* Eddie Izzard's historical material often includes Biblical events. After the audience laughs at the end of one bit, he bursts into a song of "Blas~feh~meeee, blas~feh~youuuuuu, blas~feh~every~body~in~the~roooooom..!"
* Eddie Izzard show includes a bit where a finicky cat dubiously inspects his food and its "new and improved" sales pitch.
* Eddie Izzard's routines, fire was invented by a caveman named Jeff Fire. He insists he's going to become famous for his invention, which he's decided to call "Jeff".
* Eddie Izzard's standup DVDs all contain commentaries, but since he tends to forget his material after he's stopped using it, and doesn't watch the discs before recording them, they consist mostly of him laughing at his own jokes.
* Eddie Izzard's stand-up routines, he would sometimes mime writing on a tablet when a joke falls flat, muttering, "Don't link those two things again..."
* Eddie Izzard's take on horror films: "It's like those people who go camping in millions of films."
* Eddie Izzard the actor playing TJ, it's Captain Kirk! He's beamed down to Earth and got a job as a policeman!"
* Eddie Izzard: This trope is practically a catchphrase of hers, saying "We'll cut that out" usually once per show.
* Eddie Izzard to the perfect, all-powerful God of the Abrahamic relgions, and tells an alternate version of the creation story in which Chaos lives in a caravan in deep space and crated the universe completely by accident when his oven exploded while he was trying to bake a flan.
* Eddie Izzard, which was inspired by the mysterious death of film mogul Thomas H. Ince.
* Eddie Izzard will sometimes criticize herself, especially during her lapses when she forgets where she was going with a joke.
* Eddie Izzard work depending on the food, given a bunch of dishes have their name borrowed from French.
* Eddie Kingston and is getting roundly booed by every crowd. Eddie continues the beatings on Lince, who continues to get up and keep asking for more. Kingston announces that he will never again wrestle Lince because his tenuous grip on sanity gets confused every time Lince gets up for the people that boo him.
* Eddie Kingston, April 7, 2007, as Kingston was repeatedly calling Hero a

"motherfucker," saying, "I fucking dare you," etc.
* Eddie LaCrosse series, Angelina, the proprietor of the inn above which Eddie has his office (and therefore one of the few recurring characters), doesn't talk about her past — enough so that Eddie's shorthand for "mind your own business" is to ask her an innocuous about her own background, reminding her that since he doesn't pry, nor should she. There are hints that something doesn't quite add up about her, but exactly what the deal is isn't explored until the fourth book.
* Eddie LaCrosse series has Callie, a minor but recurring character who works as a barmaid at the inn where Eddie bases himself. She's very attractive and very sweet, but not too smart.
* Eddie LaCrosse setting. In the past, he was a straight-up mercenary, but moved away from that work.
* Eddie LaCrosse. That said, the degree to which individual books fit the hardboiled sub-genre can vary a bit.
* Eddie Lampert was an excellent investor, compared favorably to Warren Buffett in his glory days. This led to him gaining control of the merged Sears and K-Mart, where he proved so hopelessly incompetent that it was commonly theorized he was pulling a
* Eddie Lang and Charlie Christian were both influential in the development of jazz guitar. Lang was the first musician to use the guitar as a solo instrument in jazz, while Christian expanded upon that innovation by using an electric guitar; Christian was also an early influence on bebop. Both men died young; Lang died at 30 after complications from a routine tonsillectomy, while Christian succumbed to tuberculosis at the age of 25.
* Eddie Lomax after returning, which is what kicks off the plot of the film.
* Eddie Mays from "Blood Hungry" ate a body part believed to contain the soul. Of course, so many religions believed the soul existed in a body part and they were all different, so Eddie just wound harvesting a different one from each victim (liver, stomach, and heart).
* Eddie Murphy and was one of the last straws for NBC regarding Silverman, who was fired for nearly killing the network shortly afterward.
* Eddie Murphy as Clarence Walker, the saxophonist who's still bitter about being kicked out of the band.
* Eddie Murphy as he dozes off and has a nightmare where, while doing the scene with Carla Purdy, he unwittingly buries her into the sand because of his enormous weight.
* Eddie Murphy comedy concert had Murphy talking about how some people make fun of accent or appearance of the owners of Chinese restaurants. In the bit the owner retaliates by making a "special Won-ton soup" for the person insulting him.
* Eddie Murphy comedy concert has Murphy talking about how some people make fun of accent or appearance of the owners of Chinese restaurants. In the bit the owner retaliates by making a "special Won-ton soup" for the person insulting him.
* Eddie Murphy due to the misogynist and homophobic jokes throughout the set (as well as other stand-up sets his did during the 80's). He chalked up the misogyny to relationship woes, and he admitted that the homophobia and AIDS jokes were pure ignorance. To his credit, he apologized for those jokes as early as 1996 and has donated to the Elton John AIDS Foundation.
* Eddie Murphy film revolves around saving a forest from a logging company by getting the native female of a species of bear on the verge of extinction to mate with the only male bear of the same species that could be found. When Dolittle earlier argues that having an endangered bear in the forest should be enough to protect it, he is told that since there is only the one, the species would die out anyway. By that rationale, even getting another bear to mate should be useless for protecting the forest, since there is no way a single mating pair would be viable for saving the species.
* Eddie Murphy. Finding that his parents have arranged for him to marry a hopelessly servile young woman who has been trained all her life to mindlessly obey him, Prince Akeem devises a scheme to travel to the United States (under the pretense of "sowing his royal oats") and find a bride who will love him for who he

is and not for his royal status.
* Eddie Murphy. He replied that while an Oscar statuette would look nice in his living room, it wouldn't pay the bills.
* Eddie Murphy in the early '80s. While certainly nobody would question Murphy's right to be there, the fact remains that the show felt no obligation to have another black person in the cast as long as Murphy was there (in fact, Robert Townsend, who was originally hired to be the token black guy, was let go once Murphy showed up).
* Eddie Murphy is a strong example of this, including numerous instances of "face" replacing "ass".
* Eddie Murphy is largely a rather quaint tale of an African prince wanting to experience life in America before being wed off and meets a nice girl while there. However the topless scenes (which are literally only at the start during the bath sequence and never seen again after) and swearing only seem to be there to bump up the rating to R as the plot itself is rather tame.
* Eddie Murphy originally started out as really laid back, and in one scene where she finds out where Marcus cheated on her, she tells him to "Stay the fuck out of her life!"; later on in the movie her cursing habits are Amped Up To Eleven whereas, before that scene, she was relatively mellow.
* Eddie Murphy that starts off with farting in the bath tub and ends with a turd, a cracked skull and his brother with a G.I. Joe up his butt.
* Eddie Murphy, the T-shirt became a huge seller. Indeed, the shirts are sold pre-faded to match the original faded design he wore.
* Eddie Murphy used the trope occasionally in his stand-up, and in some of his movies actually plays white characters with the use of makeup.
* Eddie Murphy was caught picking up a transsexual hooker, and insisted that he was just giving her a ride home.
* Eddie Murphy was referred to as a hot trend when it was already five years old by the time the movie came out, and the protagonist was a wealthy literary agent whose job would not exist in an e-book era. Many critics used the phrase "Unintentional Period Piece" in their reviews.
* Eddie Murphy were followed by three direct-to-video sequels starring the daughter of the title character.
* Eddie Murphy when Jason is trying to snap him out of the Buddy Love mode.
* Eddie performing circus tricks to exploit the Weasels' tendency to
* Eddie Redmayne, even his co-stars had to take a step back and just look at him in awe.
* Eddie Robinson, #2 on the college football wins list, also fits the trope. At age 22, he became the head coach at tiny Louisiana Negro Normal and Industrial Institute in the isolated rural town of Grambling. He'd amassed 408 wins by the time he retired in 1997. But the success he brought his school had big impact beyond just football. It brought attention to the school, which became Grambling College and later Grambling State University, and, as he was chasing the all-time wins record, brought wider recognition of HBCU (historically Black colleges and universities) schools, which as a group were facing an uncertain future after the end of segregation.
* Eddie's answer was that the filmmakers believed people would either ignore it or not be interested if it was only PG.
* Eddie's character knees him in the groin, despite the fact that she's been haranguing the players herself for most of the movie.
* Eddie scolds Roger for dancing for the bar patrons and potentially blowing his cover while "I'm out there risking my neck out for you." It's a fairly generic line, except that the immediate events don't warrant it; Eddie went from leaving Roger in the hidden room at the bar straight to his office, where he meets Jessica, and then back out to find Roger dancing. The line makes more sense when one considers the deleted scene (included in the comic version) that would have followed Roger's drop-off, where Eddie is caught snooping in Jessica's dressing room by Judge Doom and is sent to Toontown, where he is given a "tooneroo", a toon pig painted on top of his head. He goes back to his office to wash it off, which

then segues to his encounter with Jessica.
* Eddie's eventual wife, Susannah Dean. Extra points for the fact that she has
* Eddie's is of this kind. The ka-tet has just beaten tremendous odds and won a great victory unscathed - and then a downed, dying enemy manages to raise his gun and take one last shot.
* Eddie's Million Dollar Cook-Off buddies can mock him for being a cook.
* Eddies Million Dollar Cook Off mildly plays with it. The "manly" hobby is baseball, the "girly" one is cooking, but only his brothers poke fun at Eddie for him. The others are more annoyed regarding the devotion (Eddie being the best player on his baseball team) between the two hobbies.
* "Eddies": Shorthand for Euro Dollars, the primary form of currency in Night City.
* Eddie Stark, Australian Dad works as an archery coach, but he gets fired because he swears too much and drinks too much. In front of children. He uses "fuck" or "shit" and variations in almost every sentence.
* Eddie Thawne in regards to Iris West. The problem isn't that they didn't love each other, it's the fact that Iris clearly loved Barry more and just didn't want to admit it, to others and to herself. The last straw was the revelation that Barry and Iris were married in the future — after that, Eddie realized that no matter how hard he tried, no matter how much he loved Iris, Iris would always love Barry more, even if she had yet to realize it. This led to them briefly breaking up.
* Eddie the Eagle: About the real-life Olympic ski jumper of the same name.
* Eddie the Eagle, Bronson sprays his beer everywhere when Eddie announces, live on TV, that he'll be competing in the 90 meter jump.
* Eddie "The Eagle" Edwards, largely to prevent another such case from happening.
* Eddie the Shipboard Computer is annoyingly upbeat and cheerful. At one point they try to use the 'backup personality', but it's even worse.
* Eddie the Wet-Nosed Newspup is often shown selling papers like this in
* Eddie, though uncle and nephew, were only three years apart in age and say they were raised as brothers.
* Eddie uses a lumberjack-like axe during his fight with the Beast in
* Eddie Valiant's reaction to Jessica Rabbit being married to Roger in
* Eddie Valiant takes pictures of Jessica Rabbit and Marvin Acme literally
* Eddie Van Halen's "Beat It" (which Van Halen performed the famous guitar parts for) was playing. Some kids were snarking over the song, and when it came time for the solo, one of the kids stated "Listen to this guy trying to sound like Eddie Van Halen." Van Halen then tapped the child on the shoulder and rebutted with "That is me!"
* Eddie Walker is a notoriously corrupt patrol officer in the Western District, feared on the streets because of his willingness to inflict police brutality on anyone from Omar to little kids and to engage in acts such as robbing suspects before they are arrested. For instance, he breaks a sixth grader's fingers because the kid stole a car and went on a joyride simply for that fact it meant that Walker would have to fill out extra paperwork. Some cops see his brutal, no-holds-barred methods of policing as the only way to keep street kids in line, while others (most prominently McNulty) see Walker as an asshole who shouldn't be on the force.
* Eddie Walker is a Western District patrolman and is incredibly relentless in use of
* Eddings plays this on both sides of the coin, really, as all of Cyrgon's priests were warriors as well. Even the evil god Azash tried this as well, as a counter to the Church Knights, but neither Azash nor his high priest Otha could really comprehend the realities of it; the former was too elemental-minded and the latter was... well, to put it bluntly, too stupid.
* Eddington lampshades this when Sisko is promoted. People don't join Starfleet to be admirals or
* Edd is a sweet young man and the most endearing, but he is your classic nebbish and orderly intellectual. He can come as condescending at times, he's a neat freak and quite by the rules. So much so he can be lost in what the other kids like, even

with Ed and Eddy.
* Edd n' Eddy" fame) briefly does this in the episode "Little Ed Blue" in response to a distraction.
* Edd suffers a similar gag in "Laugh, Ed, Laugh", getting smacked into a street lamp while trying to subdue a scam-deprived Eddy. When Ed picks him up off the ground, he's scrunched flat and has a hilarious dazed look on his face.
* Eddsworld’s WTFUTURE scene with a guy commanding SuperGuy to help save him from Future Edd’s laser.
* Eddsworld: A joke in "Spares" has the four main characters' clones reaching into Edd's fridge to grab every single can of Cola in there...from the living room.
* Eddsworld although several people took this affirmation unironically.
* Eddsworld are named and modeled after creator Edd Gould and his friends who also work/worked on the show and comic.
* Eddsworld both Matt and Edd, but her powers doesn't work on Tom, who is able to kick her out of the house, and thus making Edd and Matt go back to normal. It turns out Tom was immune from the girl's psychic powers because he was already possessed.
* Eddsworld called Punch'd, when they are trying to find out stuff about Peter Andre Matt says "Right, so what we know about Peter is that he enjoys walks on the beach and meals for two— hey wait a minute! Oh right that's his dating advert. So what we know about Peter is that he is a socially retarded solo artist who tried to revive his career with a crappy song"
* Eddsworld can be a black hole of morality at times, not his eyes, but sometimes Tom can be totally evil.
* Eddsworld, Edd is left visibly shocked after navigating the Internet. We don't see what he's found, and whatever he saw is left to the reader's imagination.
* Eddsworld: Edd, Matt, Tom and Tord (until 2008) had almost an Eddsworld Christmas Special or a Zanta Claws every year. Also the short "Xmas Day" and "Snowgre".
* Eddsworld, Edd whips out a diagram of his plan to "Take Over the World Using Bacon", which is laid out as follows: 1) Bacon 2) Earth 3) ????? 4) WORLD DOMINASHUN!!! Earns a well-deserved smack on the head from Tord for his troubles.
* Eddsworld episode, Fun Dead, Edd brings up a commercial for an amusement park. He responds to each of the commercials statements with lack of enthusiasm until it angrily tells him to stop interrupting it right to his face.
* Eddsworld except with a normal eye and an eyepatch covering the other. Said ancestor, Sheriff Thompson, appears to be entirely human.
* Eddsworld had Laurel, a one-time character in the "Movie Makers" episode.
* Eddsworld happens when Edd, Tom, and Matt flee into a diner. The waitress asks if they'd like anything to drink; Edd looks around at his friends before ordering.
* Eddsworld has two large holes where his eyes should be. Somehow he can still see. His mother was a bowling ball and his father was a pineapple, justifying his lack of eyes.
* Eddsworld: In one of the early Christmas specials Edd is saved form death when he finds the Grim Reaper's one weakness: Gravy.
* Eddsworld: In the episode "Space Face (Part 2)", Matt claims to be allergic to explosions.
* Eddsworld. It was rumored he was scheduled to return in Fun Dead and an upcoming Wild West-themed episode should feature him as a main character.
* Eddsworld's Tom and Tord are usually this as well as being the most harmful of the cast.
* Eddsworld. Then this continues and when the car gets there, several planes are now below them (each having doubted their flying capability).
* Eddsworld, this is said almost word for word by Tom, who in Hammer and Fail 2 states "Aaaaaaand the last horse finishes the crossing line."
* Eddsworld Tom in Hello Hellhole has one of these. His Hell is a black man. "Ahh, a black man!" "Wait a minute, I'm not racist." Then the black guy says he's from "OUTER SPACE!!"
* Eddsworld with his entire body covered up and his face hidden by a mask.
* Edd versus one of the Kanker sisters, players who lose are scolded for being "trashed by a girl".

* Eddy after a particularly cruel quicksand prank pulled by him and Ed on Double-D enrages the latter to the point of preferring to be beaten within an inch of his life by the Cul-de-sac kids than hang around with Ed and Eddy any longer.
* Eddy and Ed. Eddy calls him names, picks on him and bosses him around constantly, and Ed cheerfully obeys his commands. Eddy is
* Eddy brings most of his predicaments upon himself, making it his own fault, but there are episodes where he doesn't do anything wrong and still ends up on the receiving end of slapstick, such as "Button Yer Ed".
* Eddy could certainly qualify as well, given his attitude when he doesn't have things his way.
* Eddy especially. The closest he got to avoiding karma was in "A Fistful of Ed", by avoiding a
* Eddy gets one in "Fool on the Ed", after a stink-bomb the Eds all created accidentally blows up prematurely in their faces:
* Eddy Grant in 1984, which faded into obscurity afterward. However, he had more hits internationally.
* Eddy has a turntable in his bedroom and is frequently seen playing records. His knowledge of everything is a bit... off.
* Eddy has nicknames for everyone based on their appearances. Examples include: Ed — "Lumpy" /
* Eddy is easily the biggest backstabber of the three, as more often than not he is willing to succeed at the expense of his friends (with "Pick an Ed" being the most egregious example of them all).
* Eddy Merckx is still considered unsurpassed as the most succesful cyclist of all time, with a track record that a single individual will probably never be able to match. In his homeland Belgium he is considered to be a national hero, one of the few both Flemish and Walloon people can agree on, especially since he is literally bi-lingual. In Italy, Fausto Coppi, Gino Bartali and Marco Pantani are seen in a similar light too.
* Eddy's impulsiveness is also a recurring issue for him - when he wants something, he wants it
* Eddy's the most straight-up example of the titular trio—almost everyone on the show hates him with a passion and not even Ed and Double-D
* Eddy tends to do this a lot, too, more or less as a side-effect of his
* Edebits: Four members of the Edebits, Com, Net, Org and Gov, are named after major top-level domains. The only member not named after one is Arts, although there is an "art" domain name.
* ED-E), but will typically do the right thing if ED-E bugs him about it.
* Ed, Edd, and Eddy fight off Kevin with ice cream in the "Water Week" episode of
* Ed, Edd n Eddy: 65 episodes over six seasons, not including the four specials and the TV film.
* Ed, Edd n Eddy, after he's force-fed anchovies, belches loudly in Ed's face. Ed then waves a hand in front of his nose before saying, "Low tide!"
* Ed, Edd n Eddy", after his mind is warped by a monster movie marathon, Ed hallucinates that he is "Lothar the Barbarian" and everyone in the Cul-de-sac is a monster sent by a trio of witches to attack the Eds. He then spends the entire episode bashing the brains out of all the innocent bystanders (except for Johnny the spider creature) he encounters.
* Ed, Edd n Eddy after learning there are no kids for him to scam is cured after he finds a pile of money. His zeal, of course, dissipates when he finds that it's really all fake dollar bills with Ed's face drawn on them.
* Ed, Edd n Eddy: After the Eds accientally knock down Johnny's house in "Rent-A-Ed", Jimmy emerges from the rubble muttering "Rubber baby buggy bumpers..."
* Ed, Edd n Eddy. All three are social outcasts who have difficulty mingling with the other kids.
* Ed, Edd n Eddy: All three of The Eds are this to each other in some degree.
* Ed, Edd n Eddy, and every time he (or anyone else!) picks up the receiver, something bad happens to him.
* Ed, Edd n Eddy and suburban farmer Rolf, chickens appear in many episodes.

* Ed, Edd n Eddy. And the crew would always tell the kind of stories they wanted to tell and ended it the way they wanted to.
* Ed, Edd n Eddy, and the Eds desperately try to figure out how to keep up with them.
* Ed, Edd n Eddy and their journey there was actually a journey into Hell.
* Ed, Edd n Eddy: Any time Ed cries turn out like this. In "Who's Minding the Ed?", for example, Ed bawls like this after he realizes Rolf took back his animals.
* Ed, Edd n Eddy: A one-sided example: May (the dumbest of the Kankers) has a crush on Ed (the dumbest of the Eds) and in the Eds/Kankers interactions, she's usually paired with him.
* Ed, Edd n Eddy a peeler out of a hairpin, then building a machine to do the job faster; Rolf's mad enough at that, but he's absolutely livid when he sees Eddy using a tennis racket to julienne the spuds.
* Ed, Edd n Eddy are based on Danny Antonucci himself, his family, and people he knew growing up. The Eds were all aspects of his personality (with their names being based on his own middle name of Edward), Jimmy was based on a cousin, Jonny was based on a loner friend who spent time with a blanket, Rolf was based on his experiences as the son of Italian immigrants, and the Kankers were based on a group of girls he knew during his 7th Grade school year.
* Ed, Edd n Eddy are definitely the easiest to enrapture. In the cases of Rolf and Jonny, this makes them particularly easy to rope into a scam.
* Ed, Edd n Eddy are lampshaded in-universe in an episode where he is grounded and Jimmy is bringing him his favorite dish:
* Ed, Edd n Eddy art style coming off as bizarre to Japanese audiences.
* Ed, Edd n Eddy, at least the characters. Lampshaded in "Smile for the Ed", with Edd's line, "Eddy actually thinks he can pass off a crayon drawing as a school photo? I mean, the lines are all wiggly."
* Ed, Edd n Eddy be able to alter their anatomy to resemble that of spaghetti while using the banisters in Ed's house to sneak past Sarah and Jimmy (who are trying to make sure the grounded Ed stays in his room). This manages to look hilarious and oddly creepy at the same time.
* Ed, Edd n Eddy because Plank was "afraid of getting turned into chopsticks".
* Ed, Edd n Eddy begins with the Eds obtaining a box of Chunky Puffs, which Eddy points out has a prize inside (a giant marshmallow). Ed, being Ed, reads the "Low in Fat" label and assumes the fat is the prize.
* Ed, Edd n Eddy being to lubricate it with soap to slip it off. He also has a fear of wigs and hairpieces as shown in "X Marks the Ed" For context, Eddy had a pimple on his head that he tried to cover up with his dad's toupee.
* Ed, Edd n Eddy breathes into one to cure his hiccups, which Eddy pops with one of his hairs.
* Ed, Edd n Eddy, but in one episode Sarah points out that Double D probably didn't have any part in the Ed's antics, but decides to let him take the fall anyway.
* Ed, Edd n Eddy but rarely gets respect from the Eds and the other kids. However, sometimes his nebbish attitude is impeding, such as when it led to conflict between him and Eddy.
* Ed, Edd n Eddy: "But should your chores be never done, your feeble arms too weak to toil,Yeshmiyek will surely come… and throw you in the pot to boil!"
* Ed, Edd n Eddy by a few of these, particularly when they forget to draw a second eye on Bob the Traffic Cone.
* Ed, Edd n Eddy by the end of an episode, usually because he is a scam artist who attempts to weasel the other kids out of money. However, even if they manage to pull off a relatively legitimate business with rather impressive efforts they will still end up getting screwed over badly.
* Ed, Edd n Eddy Christmas special "Jingle, Jingle, Jangle" when Nazz points out she's standing under the mistletoe she tells Eddy that he has to kiss her, he gets so excited and he happens to be drinking egg nog at the time which causes him to spit it all over her, she then kicks him out for it.
* Ed, Edd n Eddy committed), she later laments that Double D probably didn't have anything to do with it, but "give those cute ones an inch and they take a mile!"

* Ed, Edd n Eddy, complete with a waterbed in it. Naturally, they're soon bouncing on it.
* Ed, Edd n Eddy, despite begging Rolf and Kevin to pick him for their basketball team. Even Plank (who is a plank of wood) got picked before him.
* Ed, Edd n Eddy. Despite the fact he is a megalomaniac con-artist, it's actually just an act (he only pretends to be a jerk), as he thought if he acted like his older brother, people would like him, when it actually has the opposite effect, although he does eventually realise this.
* Ed, Edd n Eddy, does not bode well for his behavior. Especially when it rubs off on others. Cheese-ball movies like these appear to be popular enough in the show's world that stuff like "Robot Rebel Ranch" still plays at the local multiplex.
* Ed, Edd n Eddy does this constantly with almost all the characters at some point.
* Ed, Edd n Eddy does this to Kevin in "A Case of Ed" while Ed gives this gem of a line:
* Ed, Edd n Eddy do this to Johnny 2x4's kitchen sink in "Rent-A-Ed", after Ed breaks it while looking for some dish soap.
* Ed, Edd n Eddy, Edd is looking at Ed's face through a microscope for clues and is rather disturbed by his uncleanliness.
* Ed, Edd n Eddy, Edd walks into Ed's room, and is horrified to discover that Ed had somehow unhinged his own jaw and is actually swallowing his mattress whole.
* Ed, Edd n Eddy', Eddy and Edd go into Ed's room, where Eddy discovers a magazine called 'Chicks Galore' hidden under Ed's pillow, much to his delight. Despite his initial excitement, the two of them are quite disturbed to discover that it's literally about baby chicks; to which Edd comments, "I didn't even know they HAD magazines like that!"
* Ed, Edd n Eddy, Eddy bites a wooden nickel, but it breaks and he gets splinters on his tongue. In another episode, Eddy gets a door closed on his tongue.
* Ed, Edd n Eddy: Eddy does this in the beginning of "Over Your Ed", and accidentally swallows the soap.
* Ed, Edd n Eddy; Eddy finds a metal gear in a burger made by the Kanker Sisters, but it's never explained how it got there in the first place.
* Ed, Edd n Eddy, Eddy gets a (comically) huge envelope of money from a penpal in Korea and immediately tries to buy jawbreakers. Right before he gets tossed out of the store, Edd remarks:
* Ed, Edd n Eddy, Eddy has a habit of not measuring ingredients in cooking and simply using as much of it as he can find:
* Ed, Edd n Eddy, Eddy has petty squabbles with Kevin and Sarah, who seem to hate him the most out of all 3 of the Eds.
* Ed, Edd n Eddy, Eddy is dressed as a jester while forced in entertaining Jimmy and Sarah who are pretending to be a prince and queen respectively. His second attempt at humor ends in this:
* Ed, Edd n Eddy, Eddy is rendered speechless after swallowing a fly, and is given a bell to communicate with. Rolf claims to understand what the bell rings mean, but the things he does for (or rather, to) Eddy are clearly not what Eddy wants.
* Ed, Edd n Eddy Eddy often slaps Ed to make him pay attention or when he makes him angry.
* Ed, Edd n Eddy: Ed is using an opened-up can as a binocular. When he puts it away, a ring where the can once was is on Ed's eye.
* Ed, Edd n Eddy, Ed tells a story in which the Kankers are giant radioactive monsters that attack them with projectile kisses, which leave huge holes in the pavement.
* Ed, Edd n Eddy: Ed, while being the dumbest of the three, is incredibly handful for tasks that require strength. Though Ed can also cause great destruction with his strength of course. Nevertheless, Eddy needs Ed for just about every scam the former can cook up. On the other hand, Double D (Edd) is the smartest and the trio's gadgeteer and inventor but he's the physically weakest.
* Ed, Edd n Eddy either fails spectacularly and causes them to get beaten up during the episode, or the things they build for their schemes cause them to get hurt. The Eds will inflict slapstick on each other a lot too.

* Ed, Edd n Eddy episode "A Case of Ed", Edd becomes convinced he has the rare (and presumably deadly) Lackadaisycathro Disease, and almost immediately becomes pallid and feverish.
* Ed, Edd n Eddy episode "A Case Of Ed", Edd reads a book on rare and obscure diseases and causes himself to believe he has contracted "lackadaisy cathro disease" which Ed and Eddy turn into a source of entertainment for themselves, leading Edd to believe that his symptoms are worsening. The final symptom of "Lackadaisy Cathro Disease" is that others will have the urge to kick the infected individual. Upon reading this Eddy slaps a "kick me" sign to Edd's back
* Ed, Edd n Eddy episode "A Glass of Warm Ed" where Ed sleepwalks into Edd's house and eats Edd's food from his fridge, Ed opens a pickle jar, takes out a pickle, waits for a second, and pours the contents of the pickle jar into his mouth.
* Ed, Edd n Eddy episode "A Glass of Warm Ed", with Sarah banging a lawnmower-toy thing on the floor.
* Ed, Edd n Eddy episode "A Twist Of Ed" while the Eds are practicing reverse psychology on the Kankers Eddy demands that they quit playing hard to get.
* Ed, Edd n Eddy episode "Avast Ye Eds" has Ed look through a telescope to spot the Kanker sisters dressed as pirates. He looks through the wrong end, so Eddy tells him to throw it down to him and he looks to see the Kankers are close to him.
* Ed, Edd n Eddy episode "Dueling Eds". Rolf digs up his own pit and creates his own bridge by lifting a tree from the root so he could duel Eddy on it.
* Ed, Edd n Eddy episode "Eds or Tails", while pulling off a scam offering clowns for rent to kids Eddy crams Ed and Edd disguised as clowns inside a very tiny toy car albeit their heads sticking out of the car.
* Ed, Edd n Eddy episode "Eeny, Meeny, Miney, Ed". Eddy was more concerned with expanding the business, including the addition of a cart rental. Ed was busy playing with sock puppets. Then their scam gets side-tracked when a bored Eddy convinces Ed that their friend is a super-intelligent lizard-man in disguise.
* Ed, Edd n Eddy episode "For The Ed, By The Ed", Ed and Eddy have one of these while emptying bottles of soda to pawn. Eddy urges Edd to join in, but Edd seemed incapable of letting out a single belch, until he lets out a huge one during one of his sentences.
* Ed, Edd n Eddy episode "Gimme Gimme Never Ed". The Eds get dumped in the creek after one of Eddy's thrill rides goes awry, and almost immediately go over a waterfall.
* Ed, Edd n Eddy episode had one of these, where the Eds accidentally break Kevin's window and Eddy blames it on a group of mysterious creatures called "Mucky Boys". Naturally, everyone else decides to investigate, leading to the Eds going to increasing lengths to fabricate evidence the Mucky Boys' existence. In a slight variation, Edd knows that this can only end badly and tries to no avail to convince Eddy to confess the truth.
* Ed, Edd n Eddy episode "If it Smells Like an Ed", where the Eds use a picture of Nazz in a bikini to distract Kevin while measuring his shoe size.
* Ed, Edd n Eddy episode "In like Ed", when Eddy gives Ed items to sort for Garage Sale day, this exchange happens.
* Ed, Edd n Eddy episode "Key to My Ed", the Eds find a mysterious key and spend the entire episode trying to find out what it is. Eddy thinks it to something really expensive like a treasure chest or a vault while Edd just wants to return it to its owner. In the end they find out it's just Ed's house key that he lost.
* Ed, Edd n Eddy episode "Look Before You Ed" was for Paul Boyd (who directed the show's opening sequence).
* Ed, Edd n Eddy episode "Luck of the Ed" has Eddy trying to hide some pin-up magazines he inherited from his big brother... and then having to track them down again after Ed forgets where he put them.
* Ed Eddn Eddy episode "May I Have This Ed?", where a bunch of kids get stuck to Rolf's blow-fish costume.
* Ed, Edd n Eddy episode "Mirror, Mirror on the Ed", the Eds come across the culdesac kids playing a spin-the-bottle game of truth or dare. Just as the Eds decide to join, the other kids leave and the Eds are left to play with each other.

They eventually end up daring to be each other, Ed playing Eddy, Eddy playing Edd and Edd playing Ed.
* Ed, Edd n Eddy episode "One + One = Ed" had a gag where Eddy finds a bra and is squicked out after Ed tells him that it belongs to Ed's mother.
* Ed, Edd n Eddy episode "Pop Goes the Ed", both Ed and Edd try to talk with Sarah and Jimmy about two different topics; Ed talks about a monster movie, while Edd talks about brain surgery footage he saw. The two conversations blend together in odd ways:
* Ed, Edd n Eddy episode "Rock A Bye Ed" is centered around this trope.
* Ed, Edd n Eddy episode "Stop, Look, and Ed", Eddy torments Edd by ripping the tag off a mattress. This results in Edd reaching his breaking point, where he feigns compliance with Eddy's chaotic romp of disobedience to be set free, then uses the opportunity to snitch on all the neighborhood kids.
* Ed, Edd n Eddy episode "Stop, Look Ed", Eddy shows his contempt and disregard for rules by casually walking into wet cement despite the caution signs (and Edd) telling him to stay off. As he gives his sermon on "rules being meant to be broken" to the other kids, Eddy walks out of the cement, his feet encased in two rectangular blocks of solid concrete.
* Ed, Edd n Eddy episode "Tag, Yer Ed", after Lee Kanker slammed him head first into a wrestling mat. She then starts playing him like an actual accordion.
* Ed, Edd n Eddy episode "Tag Yer Ed", the Eds prepare to pour milk on their bowl of Chunky Puffs cereal. The milk has evidently expired and comes out as a thick, solid slab.
* Ed, Edd n Eddy episode, "Take This Ed and Shove It", while attempting to extract three jawbreakers from Nazz's desk drawer when Nazz attempts to become a dentist under the Eds' advice, Eddy gets knocked out and has a dream where he and all the other Cul-de-sac Kids have aged by 90 years. When Eddy finally gets his hands on the desk drawer and the jawbreakers inside, it disintegrates into a pile of dust, which Edd points out has happened because it aged for 90 years.
* Ed, Edd n Eddy episode "The Day The Ed Stood Still" after Nazz kisses Edd for offering to sacrifice himself to Ed who thought he really was a monster after putting on a costume, his three hairs straighten out and curl up.
* Ed, Edd n Eddy episode, the Eds (read: Double D) are trying to figure out how to get the especially amorous Kankers off their backs. After watching Rolf using a smaller rock to break down bigger rocks, he comes up with the analogy that "only a rock can break a rock" (annoying Eddy) and notes that to win, they'll use reverse psychology. Of course, when Double D pulled out the textbook on the subject, Eddy assumed they were going to hit the Kankers with it.
* Ed, Edd n Eddy episode "Tinker Ed", after Eddy's scam causes Jimmy into believing imaginary tales don't exist, Jimmy gets gloomy with a cloud over his head. Later, Eddy gets the cloud on his head after Jimmy gets back at him by pretending to have found a golden horseshoe which turns out to be gold-colored nail-polished dentures.
* Ed, Edd n Eddy episode "Truth or Ed" has Eddy take over the school newspaper and use it to publish outrageous stories, like Atlantis being found in Johnny 2x4's nostrils.
* Ed, Edd n Eddy episode "Virt-Ed-Go", Ed is asked to climb a tree so they can build their new clubhouse on it. Ed struggles for a bit and asks for help, and the next shot shows he'd only made it a few feet up the tree.
* Ed, Edd n Eddy episode where the Eds "break" physics, Eddy uses this to get rid of Sarah by running in place, hopping out of the "foot wheel" and sticking her into it, which forces her to run away at high speeds.
* Ed, Edd n Eddy episode "Who Let the Ed In?" has this happen to Ed when Eddy hits him with an imaginary potato. "Don't blink."
* Ed, Edd n Eddy even has Edd noting that it took "130 episodes, 4 specials, and a movie" for them to finally be respected by the other kids. The best example is probably the episode "One + One = Ed" where the Eds play around with cartoon physics and the nature of their universe (including having Jimmy turn into a puddle of talking color when they remove his outline).
* Ed, Edd n Eddy features the occasional Big Ball of Violence. Amusingly enough,

one in "Home Cooked Eds" has the (three) Kanker Sisters reaching out to grab Johnny 2x4 and Plank, but four pairs of arms come out.
* Ed, Edd n Eddy fits this trope superbly in several episodes, right down to the leisure suit and the gold medallion. Even though, Nazz doesn't have any interest in him whatsoever, much to his frustration.
* Ed, Edd n Eddy for his school supplies. Rolf even describes him as "He who laments at the drop of a hat".
* Ed, Edd n Eddy for the titular characters (ex. "Over Your Ed," "Look Into My Eds").
* Ed, Edd n Eddy frames the Eds for ruining Friendship Day; he frames Edd by wiping off Plank's mouth with a rag and placing it in his back pocket.
* Ed, Edd n Eddy had an episode where the Eds played hide-n-seek against the Cul-de-Sac kids (particularly Jimmy, who is the champion hider and seeker of the Kids) with a tree on a wagon as Home Base. They win the seeking part, but when it's their turn to hide they carelessly ruin their hiding spot and rush to the tree wagon which they swing rapidly into a bunch of other trees. Ed declares they've won, but all three Eds are seriously injured from the collision.
* Ed, Edd n Eddy handle her "boyfriend's" new relationship well at all, drawing hateful pictures of her sister and violently restraining May whenever she gets a chance.
* Ed, Edd n Eddy has Edd and Eddy in a tight hug practically every episode. ("HUG ME!")
* Ed, Edd n Eddy has it along with its wobbling animation which makes it unique.
* Ed, Edd n Eddy has serious problems speaking to girls, which becomes a key plot point in "May I Have This Ed?", as he tries to avoid going to the prom at all costs.
* Ed, Edd n Eddy has some of Ed's toys, including an action figure of a small monster that acted as a flamethrower when its string was pulled, to the surprise of both Edd and Eddy when Ed was in a bad mood and they were using it in a puppet show.
* Ed, Edd n Eddy has the Kanker Sisters extreme romantic pursuit of the Eds.
* Ed, Edd n Eddy has the three searching for a television to watch a monster movie marathon on after Sarah kicks them out of Ed's place. At one point, Edd asks why they don't just watch it at his or Eddy's house.
* Ed, Edd n Eddy have, among many others, a Lard Bringing Badge and a Microwave Burrito Badge, as well as a Bringing Me My Badge Badge.
* Ed, Edd n Eddy have created several of these as part of Eddy's scams, including "Barnacle Ed's" from "Floss Your Ed". Smile Town in "Here's Mud In Your Ed" is literally just an empty, trash-strewn alleyway behind a cardboard facade to which Eddy tricks Jimmy into paying for entrance. Averted with the Chimp World park the Ed's built in "See No Ed", which is both fun and well-made...until a freak accident accidentally makes the various ramps and catwalks fall apart and traps the other kids.
* Ed, Edd n Eddy have done this. One time they huddled without anything happening because Eddy couldn't think of a scam.
* Ed, Edd n Eddy have virtually no muscles but are incredibly strong, but Rolf does when he flexes or becomes enraged.
* Ed, Edd n Eddy. He makes an industrial-grade excavator out of junk he found around his neighborhood.
* Ed, Edd n Eddy. He says the line earlier in the episode, and only references it in the 4th wall scene, where he says "Hello Ed Boys. Many doors, yes?"
* Ed, Edd n Eddy, he seems more upset about the toy eating his breakfast than the hole in his stomach.
* Ed, Edd n Eddy). He then makes obsessive yet futile attempts to protect his bike from danger throughout the movie "Big Picture Show".
* Ed, Edd n Eddy, his family was in a bloody conflict with a family of sheep rustlers who associated themselves with wolves.
* Ed, Edd n Eddy, his room is pretty much nearly uninhabitable for human life, including a bathtub filled with gravy.

* Ed, Edd n Eddy, "If It Smells Like An Ed": The Eds are framed for wrecking the other kids' "Friendship Day" celebration, and try to find out who set them up.
* Ed, Edd n Eddy: In "A Case of Ed", Ed and Eddy lock themselves in the latter's house to avoid a vengeful Kevin, but Edd, looking to get back at them for tricking him into thinking he was terminally ill, produces Eddy's spare house key in front of Kevin and "carelessly" drops it.
* Ed, Edd n Eddy. In "A Glass of Warm Ed", Ed starts sleep-eating and consumes just about everything in the refrigerator of almost every house in the cul-de-sac; one running gag throughout the episode is one of the things Ed keeps eating is chains of weenies, and in fact, Double D and Eddy, at one point, use this to their advantage to help track him down by following wherever a chain of weenies leads them.
* Ed, Edd n Eddy: In an episode where the Eds attempt to use reverse psychology to scare the Kanker Sisters away, Double D is seen pulling apart a flower saying "She loves me, she loves me also."
* Ed, Edd n Eddy: In "Brother, Can You Spare An Ed?", after Edd goes on a dramatic, guilt-ridden monologue about Eddy convincing Ed to buy jawbreakers with Sarah's money (instead of fudge, like she asked), Eddy responds with "Who writes this guy's stuff?"
* Ed, Edd n Eddy: In comic book story "An Ed for an Ed", Edd says "This is a mockery! A sham! A mockery of a sham!"
* Ed, Edd n Eddy In "Every Which Way, but Ed", Ed accidentally flashes himself, Eddy and Double D back to the time one of Eddy's scams ruined Jimmy's teeth. Ed remembers what happens next.
* Ed, Edd n Eddy: In "Fool On The Ed", Eddy uses one of these on Edd as a prank as one of the pranks he pulls on him and Ed after they unsuccessfully try to prank Eddy.
* Ed, Edd n Eddy: In "For Your Ed Only", Edd develops a formula for "inordinate bubblegum" that Ed blows on and whisks him into the air (with Eddy, Johnny, and Plank in tow) until Kevin pops it with a baseball. Later, when Sarah is chasing the Eds for stealing her diary and has them cornered, Edd tries to use his gum to carry them away, but because he can't chew it fast enough, Ed blows into his mouth and causes his hat to inflate.
* Ed, Edd n Eddy: In "From Here to Ed", after Kevin wrecks Eddy's latest scam, the Ed declares war on him.
* Ed, Edd n Eddy: In "From Here to Ed", the Eds lay a trap for Kevin to get stuck and be at Ed's mercy. However, Jimmy gets caught instead, leading to this:
* Ed, Edd n Eddy: In "Here's Mud In Your Ed", Rolf helps Jimmy get back at Eddy for scamming him by selling Eddy a seed for a bogus "money tree".
* Ed, Edd n Eddy, in "High Heeled Ed", towards the end of the episode, Ed makes a comment along the lines of "Spending an extended period of time in the presence of females can be mentally disorienting and physically confusing." After Double-D and Eddy stop for a second to register this, Ed then proceeds to shout "HUG ME!" for no particular reason. In short, he grabbed the Smart Ball and held it for all of 2 seconds before smashing it on the ground.
* Ed, Edd n Eddy: In "Home-Cooked Eds", Eddy struggles to get the Kanker Sisters' trailer off his front law, and asks Ed to "give me a hand". Ed can't resist making the obvious joke as he shoves Edd's hand in Eddy's face.
* Ed, Edd n Eddy: In "Keeping Up With the Eds", Ed tries to search through a field of tall grass for his little sister Sarah, and runs into a tree. "Ow... That wasn't you!"
* Ed, Edd n Eddy. In later seasons that showed the Eds and their friends at school, the crowds at any event (like the spelling bee from "Too Smart For His Own Ed" or the football game from "Tight End Ed") were just silhouettes.
* Ed, Edd n Eddy: In one episode, you can see Sarah and Jimmy when they are much older: they are still best friends, but there's no romantic relationship between them, even after all this time.
* Ed, Edd n Eddy: In "Run Ed Run", the Eds are trying to catch up to a bus while riding a land-based windsurfer. In an act of desperation, Eddy starts biting his

own arm to stretch it, after which he uses it like a lasso to grab onto the bus' back door.
* Ed, Edd n Eddy: In "Shoo Ed", one of the ways Eddy trains Johnny 2x4 to be more annoying is to suggest he say "Why?" all the time.
* Ed, Edd n Eddy instead of just being a short, chubby boy with a tan. Edd and Ed also look odd due to their art-styles.
* Ed, Edd n Eddy: In "Stop, Look, and Ed", Rolf is reluctant in joining the other kids in their rule breaking, fearing he might be "banished to the cupboard" if his chores aren't done on time.
* Ed, Edd n Eddy in the episode "Ed, Ed and Away", when at the beginning of the episode the Eds are selling bikes. They manage to catch Kevin's eye with an impressive-looking 3-wheeler, which he takes out for a spin, only for it to quickly fall apart because it's made from hand-me-down kitchenware.
* Ed, Edd n Eddy: In the episode "For the Ed, By the Ed", where Eddy tries to sabotage Plank in the race for the "King of the Cul de Sac", Eddy tells Ed to find ways to "put some dirt" on Plank. In the next scene Eddy walks into a rut, implying that it took a while for Ed to put some dirt, both literally with dirt, and figuratively with a photograph.
* Ed, Edd n Eddy: In the episode "Hanky Panky Hullabaloo", May Kanker jumps on Marie's face, grotesquely caving it in and leaving her tongue, which is now about three feet long, hanging out onto the floor.
* Ed, Edd n Eddy In the episode "If It Smells Like An Ed", the Eds see a silhouette in an old shed that seems to look like Rolf. When Eddy starts yelling at "Rolf" for apparently framing them, "Rolf" breaks apart into three separate figures, revealing it to have actually been the Kanker Sisters standing in-front of each other.
* Ed, Edd n Eddy in the episode "Pop Goes the Ed" when they're trapped in a kiddie pool at a party after their bathing suits fly off and they spend the whole day hiding in an inflatable pool missing out on cake and party games. It happens again in "See No Ed" when Eddy rips off his, Ed's and Edd's clothes off to look for their hand-drawn monkey mask.
* Ed, Edd n Eddy: In the episode "Will Work For Ed", Rolf says this verbatim when he discovers that the Eds cut up his potatoes into French fries.
* Ed, Edd n Eddy: In "This Won't Hurt An Ed", after Eddy's plan to scare Kevin with shots fails, he himself gets dragged by Ed into the nurse's office to have a shot which he's afraid of. Oh the irony!
* Ed, Edd n Eddy: In "Three Squares and an Ed", Edd's response to finding out Ed's parents completely removed the basement stairs solely for the purpose of keeping Ed grounded is "That's... disturbing."
* Ed, Edd n Eddy into character and go on a rampage. Ed's monster costume isn't seen in full until about two-thirds of the way into the cartoon.
* Ed Eddn Eddy: Inverted in one episode where Eddy attempts to hide a diary in a lawn chair. It keeps snapping open.
* Ed, Edd n Eddy is a preteen who is highly intelligent and even has the ability to make complex inventions out of simple junk.
* Ed, Edd n Eddy is either a board with a face drawn on it that Johnny goes through extreme lengths to support his imaginary friend, or an actual separate entity that really can talk only to Johnny.
* Ed, Edd n' Eddy is notably the last Western animated series to use traditional cel animation, with the show only switching to digital ink-and-paint after its fourth season.
* Ed, Edd n Eddy is somewhere between a mastermind and a headstrong leader.
* Ed, Edd n Eddy is that Ed mistakes a test of the Emergency Broadcast System for a warning that the world will end.
* Ed, Edd n Eddy is used to measure resistance. Resistors have power handling specifications too, but the unit for those is the watt, so that doesn't help.
* Ed, Edd n Eddy is very greedy when it comes to money and jawbreakers. Rolf & Jimmy even exploit this in "Here's Mud In Your Ed" by tricking Eddy into giving away all his personal possessions for an exchange for a fraudulent money tree seed.
* Ed, Edd n Eddy) it referred to the school as Peach Creek High. That was probably

an animation error, though.
* Ed, Edd n Eddy), it's apparently a cultural mishmash of Western and Eastern European, with a little West Asia and a sprinkle of Romani on top.
* Ed, Edd n Eddy, Jimmy of all people stages this to Edd, to challenge him to a fake fight at "The Pit". Because the sockhead had been hit with a scarlet letter, this was done intentionally.
* Ed, Edd n Eddy Johnny 2x4. It's so bad that even the music notes come flying out and smack Eddy in the face. Ed's fully aware of just how bad he is at the violin—the only reason he keeps practicing is under the threat of punishment from his sister, Sarah, or his mom for not doing otherwise.
* Ed, Edd n Eddy, Johnny gets his head stuck in tree simply due to its massive size and a forked branch. Initially the title heroes attempt to save him for rescue payment, but soon become distracted by a more profitable scam. He is stuck offscreen until the end of the episode when he frees himself in order to exact revenge — and now the tree fork his head was stuck in represents horns.
* Ed, Edd n Eddy, Kevin, acting as hall monitor, gives Edd detention just for standing up for Eddy, and all this over his hatred for the Eds.
* Ed, Edd n Eddy Kevin dares Eddy to go investigate a supposedly haunted house:
* Ed, Edd n Eddy later, and the Ed's have latched themselves to a sprinkler.
* Ed, Edd n Eddy: Lee Kanker (tallest female character) has a massive crush on Eddy (shortest male character next to Jimmy). This relationship is one-sided, by the way.
* Ed, Edd n Eddy living in the trash mound under his bed, although it's unclear if they evolved there or just moved in.
* Ed, Edd n Eddy, making it clear they are trying to force the Ed’s into a relationship with them whether they want it or not.
* Ed, Edd n Eddy). Many foreign dubs give him a more masculine sounding voice.
* Ed, Edd n Eddy. Nazz invites Ed and Edd to a barbecue; Edd accepts the invite first, and he and Nazz try to persuade Ed, who thinks Edd is experimenting on the kids, to join them by saying "Join us, Ed" over and over again.
* Ed, Edd n Eddy: Near the end of "Little Ed Blue", a grumpy Ed gets pushed too far and yells "BIG TROUBLLLLLLLLLLLLLLLEEEEEE!!!!!!"
* Ed, Edd n Eddy nicer than his little sister. It's implied that their mother wanted to have a firstborn daughter, not a firstborn son, as it's made clear through Ed's statments that his mom favors girls over boys to the point where his mom forbids him to fight girls, such as the Kanker Sisters during a wrestling match.
* Ed, Edd n Eddy, (not to mention that he's likely the direct cause of Eddy's jerkassery in the first place) even conspiring with the Eds to give him a much-deserved comeuppance.
* Ed, Edd n Eddy of how he, Double-D and Eddy ended up inside Johnny's wall featured gigantic versions of the Kanker sisters rampaging the cul-de-sac looking for the trio, who took up refuge inside the wall.
* Ed, Edd n Eddy often likes to insult and humiliate the Eds. The creators confirm he is 15-years-old.
* Ed Eddn Eddy once looked excitedly at the centerfold of a magazine, that he found in Eddy's basement. But it turns out that it was a picture of an insect!
* Ed, Edd n Eddy: One episode was almost entirely from the viewpoint of a camera. First there was a scene to set it up, then the rest of the episode is all the camera's view.
* Ed, Edd n Eddy only aired in foreign countries at that point, and had smaller marathons aired to lead up to their premieres.
* Ed, Edd n Eddy on one occasion: after beating up the Eds, Sarah admits that Edd didn't deserve the beating but then she adds "Give those cute ones an inch, and they'll take a mile!"
* Ed, Edd n Eddy on one occasion Eddy sticks his hand clean through one of Ed's ears and out the other, and in another Eddy squirts a turkey baster at the kids the water passes through Sarah, Jimmy, and Johnny's ears.
* Ed, Edd n Eddy), or any other person, female or male. He was also the only one

not affected by the cupids in the Valentine's Day special, and being the one who saved the day to boot.
* Ed, Edd n Eddy, orders his "baby" to shield his eyes when Double D, under the influence of the same boomerang to go naturalist, strips off his underwear.
* Ed, Edd n Eddy other Eds facing the consequences of another's actions.
* Ed, Edd n Eddy over a hunk of rotting cheese Ed keeps in his jacket. But Ed's only insult he made was "STINKY HAT!"
* Ed, Edd n Eddy promising a premiere in November 1998. Post-production delays ended up pushing the premiere to January 1999.
* Ed, Edd n Eddy prowess — and ruthlessness — to rival Machiavelli.
* Ed, Edd n Eddy puts a crimp in his plans. Furthermore, by the next day, the school is literally flooded by copies of Eddy's photo.
* Ed, Edd n Eddy results in the trio getting sunburns. Edd was quite distressed earlier in the episode about forgetting the sunscreen, even more so when Ed wasted all of Jonny's. Ed makes the best of the situation by likening himself to a chameleon.
* Ed, Edd n Eddy (said incident is theorized to have inflicted a head injury so horrendous, he covers it up being wearing his trademark hat 24/7) and collapses into a fetal position.
* Ed, Edd n Eddy, Sarah wears a pink tank top while her friend Jimmy wears a light blue sweater.
* Ed, Edd n Eddy's Big Picture Show and made him admit their troubles was all his fault.
* Ed, Edd n Eddy's Big Picture Show and seemingly sink to their deaths in front of Double D... but it turns out that they were just pulling a prank on him. Double D is understandably pissed at them for it, furiously chews them out, and even gets in a fist fight with Eddy before deciding to return home and face the kids' wrath, declaring he'd rather accept the consequences of his actions than wander aimlessly with a "so-called friend" like Eddy.
* Ed, Edd n Eddy's Big Picture Show brand. While the network had stopped using the branding for its original productions several years prior, it was the last show to end that had premiered under that label.
* Ed Eddn Eddys Big Picture Show, Edd and Eddy fight in silhouette as Ed looks on sadly.
* Ed, Edd n Eddy's Big Picture Show Ed is bitten on the leg by Rolf, who then attempts to drag him out of the car the Eds are escaping in. Ed tells his friends to go on without him and remember him. Right as Ed finally loses his grip and is pulled out, Double D and Eddy reach out and grab him by both arms and pull him out of Rolf's grip back into the car.
* Ed, Edd n Eddy's Big Picture Show has a dramatic example when Edd and Eddy have a falling-out after one cruel joke too many.
* Ed, Edd n Eddy's Big Picture Show has an inversion of this. At the beginning of the movie, the Eds' latest scam caused massive damage and severely hurt the children, resulting in them being hunted down. After the encounter with Eddy's brother, everyone got over it, except Johnny who didn't arrive until afterwards. Therefore, when he attacked the Eds, the children beat him up.
* Ed, Edd n Eddy's Big Picture Show Once the illusion falls off, he's finally accepted and forgiven by the other kids.
* Ed, Edd n Eddy's Big Picture Show resorts to clawing through the muck to save them.
* Ed, Edd n Eddy's Big Picture Show. Rolf, in particular, has a huge bite taken off the side of his torso.
* Ed, Edd n Eddy's Big Picture Show, so fans had to wait until the American airing to figure out what was going on.
* Ed, Edd n Eddy's Big Picture Show, when Edd has enough of the travel and wants to leave. Eddy admits his mistakes for the first time, and this is enough to make Edd stay.
* Ed, Edd n Eddy's Big Picture Show) where the Eds fall asleep together in a pile.
* Ed, Edd, 'n' Eddy's Boo Haw Haw", Ed goes around beating up people, thanks to

getting hallucinations from watching several monster movies. However, it's Edd and Eddy who get beaten up instead and Ed is unharmed.
* Ed, Edd n Eddy's Boo Haw Haw when he receives a map from his brother that supposedly leads to a town called "Spook-E-Ville" where candy is given out in bucketloads. However, the map merely leads the Eds in a circle back to the Cul-de-Sac.
* Ed, Edd n Eddy seems to be this, judging from the odd customs glimpsed from time to time.
* Ed, Edd n Eddy She always threatens Ed to do her bidding or she'll "tell mom." It doesn't help that their mother just goes along with Sarah.
* Ed, Edd n Eddy since all other characters retained their original names.
* Ed, Edd n Eddy's longest running series in terms of years on-air as a singular series)
* Ed, Edd n Eddy smacks him with a fish in their duel in "Dueling Eds".
* Ed, Edd n Eddy, so her kindness may be a factor in how attractive she's perceived to be.
* Ed, Edd n Eddy sometimes behaves this way towards the other two- for instance in one episode when Ed and Double D are arguing, Eddy's first response is to seperate them with a, "SHUT UP! Both of you!"
* Ed, Edd n Eddy. Sometimes it comes off and the other characters stare at it in horror and shock, although what is being seen is never shown to the audience.
* Ed, Edd n Eddy stubbornly insists that it's all a coincidence despite statistically impossible things happening to Eddy such as having a tree topple on top of him, getting crushed by a sandbox falling from the sky, getting trampled by wild hippos (in the middle of the United States), getting struck by lightning, and having a house fall on him all in the span of about 30 seconds.
* Ed Eddn Eddys Valentine's Day special, Ed and Eddy and Lee and Marie start a food fight over Edd and May.
* Ed, Edd n Eddy". Taking refuge in Eddy's Brother's room, the Eds try to get out the window. It's bricked in, as shown in a previous episode. ("My brother's a whiz at laying bricks.") While Edd tries to find another way out, he trips over a rug, revealing a heating duct. Eddy quickly pries open the grate, jumps in, and... more bricks. Then Ed finds the "In Case Of Movie Break Glass" case.
* Ed, Edd n Eddy, thanks to a sleepwalking Ed. The two groups finally meet up... but only after the entire cul-de-sac is in ruins.
* Ed, Edd n Eddy that he no longer needs any baby material sent to him. Towards the end, Eddy is shown in his bedroom giving his autograph to the cardboard cutouts of the children (walked around by Rolf's chickens), and when Edd, the cameraman, warns Eddy that Rolf is right behind him, Eddy nonchalantly signs his name on Rolf's face.
* Ed, Edd n Eddy the Eds are playing with one of Ed's robot toys. It accidentally collides with Eddy and chews a huge hole in his stomach.
* Ed, Edd n Eddy, the Eds need to dig something up from underneath the Kanker's trailer. Edd and Eddy take one look at how disgusting it is before deciding to make Ed dig.
* Ed, Edd n Eddy: The Kanker Sisters attempted to win over the Eds with three extremely greasy and unhealthy burgers, topped with pure lard. As Lee Kanker said, "The way to a man's heart is through his arteries."
* Ed, Edd n Eddy: the Kanker Sisters view the Eds (and men in general) as weak and more fit for housework. It's implied that this view comes from their mother, who is implied to have several bad romances.
* Ed, Edd n Eddy, the kids do this to poor, sleep-deprived Edd: the other Eds pull at his legs, Kevin pulls at his left arm, and Sarah and Jimmy pull at his right arm.
* Ed, Edd n Eddy: The Mis-Edventures, but with less frames and more limited animation.
* Ed, Edd n Eddy: The Mis-Edventures Edd explains the Tower of Eddy maneuver. After a beat, Ed exclaims, "HUH?!" causing Eddy to face fault.
* Ed, Edd n Eddy, the neighborhood is flooded, and after having gone without food

for a while, Rolf imagines Jonny's head as a turkey. Even though there was a cow, goat, pig, and several chickens on board the raft with them.
* Ed, Edd n Eddy: the played-for-laughs romantic pursuit of the eponymous Eds by the Kanker sisters is incredibly violent and completely unrequited, even in the context of a cartoon, and would be considered far less funny in today's society if the genders were reversed.
* Ed, Edd n Eddy, the titular key having been flicked into the gap in his front teeth. His rant, about how he perceived Eddy prefer whoever the key belonged to would suffer, went through a change in scenes.
* Ed, Edd n Eddy, the trio make pizza. Eddy, ignoring Edd's instructions for the proper amount, dumps in the whole container of yeast for the dough. The dough rises so much that Eddy's fist gets stuck in the dough when he tries to punch it down, and Ed has to bellyflop on it to do the job.
* Ed, Edd n Eddy. The trolling this guy manages to get done despite being unseen for the entire series is insane. He left a (fake) treasure map in his old bedroom on the offchance Eddy might find it (which just leads to the Kanker trailer), sends a crate with baby toys to Eddy in "An Ed Is Born", sends Eddy another fake map to Spookyville in the Halloween special... yet despite this, Eddy keeps falling for it.
* Ed, Edd n Eddy, they eventually manage to throw it into the distance. It comes right back with enough force to pin them all to a tree branch. Interestingly, it is the first point in the episode where the boomerang actually returns to the thrower at all.
* Ed, Edd n Eddy. This doesn't seem to apply to pretty, girl-next-door Nazz.
* Ed, Edd n Eddy: This is how Ed manages to destroy the Eds' cardboard city in "Urban Ed".
* Ed, Edd n Eddy this is the way Eddy "trains" Jimmy when trying to make a Sumo wrestler out of him.
* Ed, Edd n Eddy use one in the form of a giant, fake pull-string doll to sneak back into Ed's house after being kicked out by Sarah and Jimmy. Not surprisingly, it's not convincing enough to fool Sarah and instead of going back into the house, the Eds end up at the top of a lamppost.
* Ed, Edd n Eddy. Usually the goal is a variation on getting jawbreakers/money/respect. Never works out due to wacky hijinks, and the few times they manage to get one of the three they lose it in the end of the episode.
* Ed, Edd n Eddy Valentine's Day episode, Kevin gives Edd detention because Edd stood up for Eddy.
* Ed, Edd n Eddy Valentine's Day special, two cupids who resemble Sarah and Jimmy make Edd and May Kanker fall in love, and at one point defuse a food fight by making everyone in the room fall in love. This was finally counteracted by Rolf with dirty mop water: "The harsh realities of your miserable lives have been restored! Thank you."
* Ed, Edd n Eddy was Cartoon Network's longest running series and was notably the last of the Cartoon Cartoons to end.
* Ed, Edd n Eddy when a huge splash of water snaps him out of it, courtesy of a bucket held by Eddy:
* Ed, Edd n Eddy when Double D reads off the "Lackadaisycathro Disease," which includes symptoms such as "the rationalization of mundane circumstances, habitual cleanliness, and an abnormal fixation to headwear."
* Ed, Edd n Eddy. When Rolf asks Kevin (who had been watching the duel) to join in:
* Ed, Edd n Eddy when the Eds are around Nazz. Most noticeable in "Boys will be Eds":
* Ed, Edd n Eddy, when the Ed's tried to fool the Kanker Sisters, Eddy said "We're doing a survey," instead of "I'm doing a survey."
* Ed, Edd n Eddy when the former carries the latter in the episode "Urban Ed."
* Ed, Edd n Eddy when the Kanker Sisters kidnap the Eds to participate in a joint wedding in an elaborate scheme involving a supposedly haunted house. Not only are they trapped in the house (and their genuine cries of horror are ignored by the other Cul-de-Sac kids due to fooling them earlier), but they end up somehow

stripped out of their clothes on the "ride" for more tradition formal wear (which was painted on their vehicles theirselves), but also had pretend "rings" jammed onto their fingers (in the forms of a nut screw, a pull tab from a can of soda and an escutcheon plate from a broken door handle).
* Ed, Edd n Eddy when they suspect him of stealing possessions from the children of the cul-de-sac.
* Ed, Edd n Eddy, where Eddy and Kevin pretend to be nice to each other, shaking hands... and flipping each other onto his back in sequence ("After you!" *SLAM!* "No, I insist!" *SLAM!*).
* Ed, Edd n Eddy, where Ed presses down on Edd's head, causing Edd to rewind his statement about fruitcake and Christmas, especially the Christmas part.
* Ed, Edd n Eddy", where it is revealed that Ed keeps a block of cheese in his pocket (named Sheldon) for 59 days for good luck. The smell is so unbearable, Edd is unable to focus on their scam until Eddy helps him get rid of it. When Edd finally manages to dispose of the cheese by throwing it into the pond, various fish float to the surface.
* Ed, Edd n Eddy, where Kevin and Eddy do this routine while going somewhere, but they say "after you" while slamming the other into the ground in front of them.
* Ed, Edd n Eddy, which Eddy claimed to have learned from his older brother.
* Ed, Edd n Eddy, while Eddy is searching the closet in the beginning, there is a box labelled "exploding cigars".
* Ed, Edd n Eddy", while going through Eddy's stuff, Marie finds a pair of leopard skin underwear. All the Kankers and Ed laugh, while Edd states "That's quite a statement Eddy". Eddy tries to pass them off as his brother's, but Marie states that his name is on the tag.
* Ed, Edd n Eddy. While he is aware of the crushes Marie and Sarah have on him, he remains clueless that he attracts so many girls, both in- and outside their universe.
* Ed, Edd n Eddy, who comes up with odd traditions (many of which involve fish) and sayings ("Do not burn the candle at both ends, as it leads to the life of a hairdresser") from his home country in nearly every episode.
* Ed, Edd n Eddy who constantly abused Eddy before he went away, and Eddy lied about it in an attempt to gain admiration and social acceptance.
* Ed, Edd n Eddy, who has gone so far as to wipe crumbs from Ed's face and scold Eddy for poor behavior.
* Ed, Edd n Eddy, whose grip on reality has been severely weakened by a near-constant diet of horror comics and B-movies. His idea for a scam in "It Came From Outer Ed" involves dressing his friends as skeletons and astronauts, making them pass each other pancakes, shouting "Evil Tim has beckoned you all, for you all will pay with your brains!", and then ripping up a stuffed bunny with his teeth. Yet he still considers this a piece of light-hearted fun, even when the curse kicks in and he and his friends are mobbed by angry crows.
* Ed, Edd n Eddy, "Wish You Were Ed": The neighborhood kids all participate in an impromptu race. Rolf's method of racing has him riding in a basket atop his pig Wilfred, guiding him forward with a carrot on a stick. When he needs Wilfred to "go with the speed of cabbage", Rolf replaces the carrot with a photograph of Wilfred's mother.
* Ed, Edd n Eddy, with "The Prankmaster", whose calling card was a Joker with the word "PRANK-MASTER" written over it.
* Ed, Edd n Eddy would use sound effects like a cat screeching or an elephant toot when someone gets injured and falls to the ground.
* Edelgard, and finally her just taking in the sound of his heartbeat considering it did not use to beat before.
* Edelgard ascends the throne of Adrestia. Some Adrestian nobles are executed, including Hubert's father, by Hubert's own hands no less
* Edelgard forced her father to relinquish power and assumed power in a bloodless coup.
* Edelgard has "losing control" listed in her bio as one of her dislikes
* Edelgard is Dimitri's stepsister). Dimitri exasperatedly tells Sylvain to save

those foolish remarks for another time.
* Edelgard primarily stands for the Enlightenment ideals, pushing for dismantlement of Crest-powered
* Edelgard's transformation into Hegemon Edelgard, but she thinks of the pain as nothing compared to the torture she suffered in her past.
* Edelgard was actually planning on declaring war against the Church and other nations all along, and Dimitri's hesitation goes out the window once he erroneously concludes Edelgard is responsible for the Tragedy of Duscur.
* Edelweiss has succumbed to a joint Nazi-Imperial Japanese occupation.
* Edelweiss on which it is based, but they're just normal people who happen to follow them, not their sentient personifications per se.
* Edemm is a Spanish organization of female bodyguards meant to protect women from abusive partners.
* Eden, after being revealed as a mole, spends a lot of time wearing black leather.
* Eden and speak in this type of accent. Despite the fact that she speaks perfect English normally.
* Edenborn and its treatment leaves women incapable of carrying a child to term.
* Edenborn. Despite the fact that both of them are completely wrapped up in the experience of First Love, they're disastrously wrong for each other.
* Edenborn, Deuce uses his mastery of virtual reality to create a number of half-talismans to send to the object of his affection so that he can later present her with the missing halves. He also completely opens her ability to program her own domain and unlocks her parents' logs, all in an effort to liberate her from what he sees as intolerable confinement.
* Edenborn: Dr. Hyoguchi theorizes that it is possible to overwrite a mind with another one from brain scans if the two bodies are genetically identical. He leaves a message to the Ten asking them to clone him and then overwrite the clone's mind with Hyoguchi's so that he can live again. The morality is nebulous; the clone's mind will cease to exist, but the process is painless and gradual and Hyoguchi recognizes the incredible sacrifice and asks for it as a gift. Both the member of the Ten who receives the message and the clone in question take the proposal seriously.
* Edenborn has Penny and Deuce, both of whom have been raised more on literary tropes than human interaction. He expresses his affection by leaving mysterious gifts before making contact to plan abducting her from her family; she sees his actions as romantic and enthusiastically agrees.
* Edenborn in his long-distance romance of Penny. He succeeds, but later realizes she's massively unstable and manipulative.
* Edenborn to keep track of the separate camps and eventually to find the cure for Black Ep.
* Eden, Days younger brother, is a straighter example. In one particular instance, Day reminices about asking him for help fixing an old radio. Eden was four at the time.
* Eden Eternal has four healing classes that do this,but Sage class outshines them all. Sages melee enemies like most classes do, except their skills also have bonus buffs when used, such as healing allies' HP or MP when striking an enemy with said skills.
* Eden Eternal has two parallel worlds, one of which is the dark world.
* Eden Eternal, they are limited to up to one-three times per specific hour (1, 2, 6, 12, 24).
* Eden Green, an amateur biologist studying the alien needle symbiote that has infected her best friend, creates an in-universe document of 'important information', of which snippets are shown.
* Eden Green and hopes that destroying him will save the world from his parasite.
* Eden Green, a novel in which the main character's best friend is infected with an alien needle parasite and their city is overrun by horrifying monsters, takes a break for a few pages so the title character can 'set her affairs in order' (translation: clean her apartment).

* Eden Green are all infected with an alien needle symbiote that can resurrect them from any wound, even complete destruction of their heads. Whenever they have a disagreement, the resolution is sometimes horrifyingly violent, even between friends.
* Eden Green are immortal thanks to their alien needle symbiote. When one, the villain Tedrin, has his arm blown off, he picks it up and fits it against his shoulder to allow it to heal back into place.
* Eden Green are infected with an alien needle parasite that renders them immortal by taking over any sections of their bodies that become injured. The main character agonizes over whether, once her head is replaced with needles, she will still be human or have a soul. It doesn't help that Tedrin, the first infectee and first to have his original head destroyed, is a psychopathic monster.
* Eden Green are infected with a needle symbiote that can resurrect them from any death, including complete immolation and being torn down to tiny pieces.
* Eden Green are infected with a needle symbiote that can resurrect them from any death, including having their head destroyed. Having one's brain reconstructed is described (in part) as being steadily pressed down into a hole just large enough for one's constituent atoms.
* Eden Green are not immune to the agony of regrowing destroyed parts of their bodies.
* Eden Green become infected with an alien needle symbiote that makes them immortal and turns at least one of them dangerously insane.
* Eden Green can regenerate from a few cells; the title character's mission is to find a way to permanently die.
* Eden Green, characters ranging from slow to average to genius apply their instincts and skills to the aftermath of the symbiote invasion.
* Eden Green concentrates so hard on aiming her gun into the shadows, she doesn't notice the playful psychopath Tedrin sneaking up on her until he whispers, "Having fun yet?" This gets him shot.
* Eden Green contains several glitches, such as a Zalgo-ed 'scratch' when the main character is infected with the alien needle symbiote.
* Eden Green. Each infectee can eventually reach milestones at which their brain and even entire body is made up of needles, with horrible mutations possible along the way.
* Eden Green, enjoys lengthening his fingers into sharp points to creep out Eden.
* Eden Green follows a rationalist attempting to cure her best friend of an alien needle parasite. As she begins to realize the seriousness of the situation, she resolves to do whatever is necessary to make sure the parasite doesn't spread.
* Eden Green follows the spread of an alien needle symbiote that renders its hosts immortal; the title character is on a mission to learn how to destroy it and prevent further infection.
* Eden Green gradually loses her rationality to an alien needle parasite. The narrative is increasingly interrupted by incoherent visions, nightmares, paranoid fantasies, and babbling.
* Eden Green graphically depicts most varieties of transformation horror; the central theme of the book is Horrifying Metamorphosis. In addition, the rationalist main character imagines many possible scenarios in which the needle symbiote can ruin a person forever.
* Eden Green has a long neck ending in a lamprey mouth, which they use to pick up and shred humans.
* Eden Green has her teeth and nose broken in a violent murder; when an alien needle symbiote awakens her, she carefully describes the sensations of her face being repaired with microscopic needles.
* Eden Green has human characters become infected with an alien needle symbiote; they go through various Stages of Monster Grief at various speeds.
* Eden Green has the parasite-enhanced main characters sneak around abandoned parts of their city to fight invading needle monsters, all while trying to stay under the radar of any government organizations that would love to capture them.
* Eden Green has the title character explore an abandoned alien world, including

the mountain fortress of an extinct but advanced race, in search of the origin of an alien needle parasite currently threatening her home city. Her nightmares before and after hint that she (like Earth) is a tiny speck in the larger picture.
* Eden Green has the title character explore an abandoned planet from which horrifying needle monsters are spreading onto Earth.
* Eden Green infects two young women with his alien needle symbiote and attempts to recruit them into his battle against the horrifying monsters invading their city, with mixed results.
* Eden Green is a former cop with martial arts training, but other characters are forced to ad-lib in dangerous situations.
* Eden Green is a rationalist young woman infected with an alien needle symbiote that gradually takes over her body. Her intelligence is her main weapon, and her greatest fear is losing it to the symbiote's survival-obsessed instincts.
* Eden Green is a self-described rationalist and scientist, but her narrative goes further and further off the rails as the book goes on, implying that she's losing her mind to her needle-symbiote.
* Eden Green is a self-styled rationalist who always takes time to figure out the most logical action. This is momentarily abandoned as soon as she learns that the needle monsters invading her town can take the form of a nineteen-legged spider the size of a basketball.
* Eden Green is deviously insane due to the alien needle symbiote that has taken over his brain and body. The main character never fully trusts him, while her best friend (his girlfriend) believes he can be redeemed.
* Eden Green is going through a decade-long recession, leaving many businesses and warehouses boarded up — perfect hunting grounds for giant alien needle monsters.
* Eden Green is infected with an immortal alien needle symbiote, and makes it her mission in life to destroy the manipulative bastard who forced it on her.
* Eden Green is mutualist: The needles are able to spread to new life forms, and the hosts gain nigh-immortality.
* Eden Green is spent exploring the biology and various species of alien needle creature invading a Southern city.
* Eden Green mainly focuses on the main characters becoming infected with immortal needle symbiotes, a good portion of the plot's drama focuses on Veronica's promiscuity and the chaos it brings into Eden's life.
* Eden Green makes it her mission to destroy every human infected with an alien needle symbiote, including her best friend.
* Eden Green, many areas of Eden's city have been abandoned due to a decades-long recession, giving needle monsters many dark places in which to nest.
* Eden Green portrays alien needle monsters invading an expy of the author's home city of Fayetteville, Arkansas.
* Eden Green prefers to have a detailed plan ready for everything, the alien needle monsters invading her city often force her to come up with ideas on the fly just to stay alive.
* Eden Green spends the entire ride inside the title character's head as she discovers, researches, and deals with an alien needle symbiote and invasion of monsters.
* Eden Green take strange, absurd shapes, and the title character nicknames them things like 'herbivore' and 'giraffe'.
* Eden Green, Tedrin has horrifying injuries to his torso, and Eden notices that she can see right through in one spot.
* Eden Green: The alternate dimension features a striped blue sky due to an atmosphere similar to that of Jupiter.
* Eden Green, the main character is intelligent enough to contemplate controlled experiments with her best friend's new immortal needle symbiote, but works an office job and avoids the topic of college.
* Eden Green, the story (about a rational young woman drawn into danger by her trouble-seeking best friend) is based loosely on a true story. The alien needle symbiote is presumably an embellishment.

* Eden Green, the title character explores an abandoned church in search of a harmless, herbivorous alien monster, and finds something terrifying. Then, while backing away from it down a dark hallway, she bumps into something even worse.
* Eden Green, the title character is infected with an alien needle symbiote that renders her immortal. She immediately makes it her mission to destroy herself and all other infected humans.
* Eden Green to fight the monsters invading their city. But more than one species, especially the nausea-inspiring Exes, cause them to turn tail and run screaming in the other direction.
* Eden Green. When their brain grows back, they may be docile and amnesiac for a time, but once they learn what was done to them, they won't be happy.
* Eden, is an exception; the differences prove insignificant to an extent.
* Eden is covered in forests of red-leaved trees, some of them simply recolored dragon's blood trees, interspersed with plants somewhat resembling large jellyfish on stalks.
* Edenist voidhawks, however, are far superior to Adamist ships in every way — including FTL travel — due to the fact that they are made of "bitek" (a biological material). Voidhawks are lenticular in shape rather than spherical. Blackhawks — bitek starships with Adamist commanders — on the other hand can be pretty much any shape.
* Eden: It's an Endless World!: Eden is set in the near future, following a pandemic called closure virus which killed 15 percent of the world's population, crippled or disfigured many more, and upset the world's political balance greatly.
* Eden: It's an Endless World! features quite a few cities populated only by crystaline human statues.
* Eden: It's an Endless World!. It's nicely justified by the recent body drying plague that crippled half of the world's population and triggered a technological revolution.
* Eden Log. After not even knowing his own name throughout most of the film, the man discovers that he is actually Tolbiac, the chief of security of Eden Log.
* Eden Log. We are shown what is happening from his warped perspective, interspersed with shots of him violently attacking and about to rape the woman.
* Eden Log when he hallucinates that they are making love. He pulls back when he realizes what is actually happening.
* Eden McCain (Angela flatly states she called her down solely so Sylar could kill her), and doesn't even get a line — we only ever hear her scream.
* Eden of the East, Akira Takizawa and Saki Morimi meet in front of the White House in Washington, D.C., with the former carrying a cell phone, a gun...and completely naked.
* Eden of the East almost always has its characters refer to penises as "Johnnies."
* Eden of the East for its opening theme. Due to copyright reasons, The Dub uses Falling Down for the first episode and generic J-pop for the rest.
* Eden of the East got his nickname of "Panties" due to him becoming a total recluse who walks around only in a shirt and underwear after losing his only pair of pants.
* Eden of the East if he's the kind of person who could make the Prime Minister cry uncle. She responds by having him do just that. On national TV. And it only cost 60 yen. It's clear, though, that she was just being a smartass, as she's not as literal with other requests.
* Eden of the East is over a hundred years old but still has enough fight left in him to wrestle a fit twenty-something out of his car.
* Eden of the East is to stare at the man's groin for about ten seconds.
* Eden of the East, Osugi (Betty) and Takizawa (Scoundrel) to Saki's Archie.
* Eden of the East part an intrinsically bad idea—he just wants to create the same effect but without having to kill anyone.
* Eden of the East. We get to see a lot of slice of life, romance and occasional comedy all while knowing that the story has a much more complex and mysterious plot, setting and back story. We'll only get to see that piece by piece.
* Eden's other residents constantly cross his boundaries. When he complains to Ms.

Eom she tells him it's just a misunderstanding.
* EDENS ZERO, and is noticeably disappointed when she returns to her tiny bot body in the real world.
* EDENS ZERO: Illega is a frog-like alien who kidnaps and trafficks young women.
* EDENS ZERO in the anime, prompting them both to agree that they liked the manga better anyway.
* EDENS ZERO is set in a region of space called the Sakura Cosmos that's separated from the rest of the universe by spaceship eating dragons
* EDENS ZERO. It's also present in the atmosphere of planets, with many Ether-abundant worlds having unique planetary phenomena depending on its type (Blue Garden's Water Ether creates a river that floats through the sky, Norma's Earth Ether creates huge pillars of crystal in its clouds that regularly bombard the surface, etc.).
* EDENS ZERO own alchemy Ether Gear. Eventually, Sister Ivry uses her powers to restore the petrified girls.
* EDENS ZERO, right down to its name just being Tokyo's medieval name. The planet itself hardly deviates from real-life Edo one bit; it's just that the rest of the known cosmos has already entered the space age, and thus the planet is seen as "primitive" by comparison.
* EDENS ZERO rival, Labilia, who spends almost every moment they're in the same scene putting Rebecca down and bragging about how much more popular her own videos are. As much as they hate each other, Rebecca has to admit that Labilia is a very talented B-cuber who puts a lot of work into her videos.
* EDENS ZERO, which also destroys her glasses. She keeps trying to adjust her glasses afterwards, which just leads to her awkwardly groping air.
* EDF, and are smart enough to use cover, but are not nearly as efficient as the enemy, who will swarm you with loads of soldiers and gun your ass down before you can even blink.
* Ed featured a judge who used one of these to decide the punishment for anyone he found guilty. Notably, Carol had to sing "Bad, Bad Leroy Brown" as part of her sentence.
* Ed, filed both by Ed and his opponents, which would be dismissed without trial in real life.
* Ed filmed exteriors of its fictional location Stuckeyville in Upper Middle Class Westfield, NJ. Many local residents were used as "Stuckyville Extras".
* Edgar Allan Poe actually explains that this is the reason he can outwit the police and get his man. The police know who stole the document; the thief knows the police know. The difference between Dupin and the police is that Dupin knows the suspect knows the police know, and the police don't know that.
* Edgar Allan Poe always left three roses and a note, before making a toast with cognac and leaving the bottle behind. He made his first visit no later than 1949; the 1999 note indicated that the original toaster had died and the tradition had been taken up by a son. The second toaster made his final visit in 2009, on Poe's 200th birthday. The identities of the toasters have never been revealed.
* Edgar Allan Poe," a man bricks his wife's corpse into the wall of their cellar. Unfortunately, he didn't realize the cat had jumped in with her. The cat's howling eventually alerts the police.
* Edgar Allan Poe) and a long philosophical-scientific treatise. He was a pretty versatile guy
* Edgar Allan Poe and, more recently, Noble Prize winner Alice Munro, the format in general is often regard as "inferior" in literary circles and is much harder to be picked by publishers due to the public in general prefering novels to short story collections.
* Edgar Allan Poe a sherry. He also guzzles an expensive fine wine like cheap swill, holds plonk brands in high regard, and samples wine while already heavily drunk, something no real wine connoisseur would do; all actions that do little to refute Montresor's opinion that he is really a boorish idiot.
* Edgar Allan Poe at his phobias with the comedy "The Premature Burial", in which the main character gets worked up into a tizzy overhearing it happen to other

people, then awakes to find that it's happened to him... and then realizes he's fallen asleep in a crowded bunkroom aboard a ship.
* Edgar Allan Poe bear a strong resemblance to his young wife Virginia, who died of tuberculosis.
* Edgar Allan Poe, but a crow steals his underpants, so he gives chase before he can think of killing himself. He just ends up nearly falling to his death anyway.
* Edgar Allan Poe came from a wealthy family, although he had been reduced to a more humble lifestyle. Holds the rank of Chevalier (Knight) in the Légion d'honneur. Likes hieroglyphs. Can spell ratiocination.
* Edgar Allan Poe (creator of Sherlock Holmes) once said "Each [of Poe's detective stories] is a root from which a whole literature has developed.... Where was the detective story until Poe breathed the breath of life into it?" Although Poe's detective uses several early forensic techniques, this aspect of the genre didn't fully kick off until...
* Edgar Allan Poe, diminishing Poe's chances at lifetime success as an author.
* Edgar Allan Poe early on from the witness testimony (hearing a "shrill voice" that speaks in no identifiable language, and the extreme strength needed to mangle the victims' corpses.)
* Edgar Allan Poe ends in the middle of things, allegedly because Pym died before he could recount the end of his tale.
* Edgar Allan Poe finds the titular item because he's the only person clever enough to try to think like the thief does.
* Edgar Allan Poe has one of the main characters going through a pretty extensive analysis of crypto-graphical methods in order to break the encoded message that came with the titular device and hopefully solve the story's mystery.
* Edgar Allan Poe. In the story Dupin is walking silently with his friend who is also silent, and then says something apropos to what the friend is thinking. Dupin explains that he followed his friend's thoughts based on body and eye cues, and jumped in at an appropriate time.
* Edgar Allan Poe is able to deduce his friend's chain of thought, which works somewhat like this.
* Edgar Allan Poe is a master of this, especially in "The Tell-Tale Heart". *shudder*
* Edgar Allan Poe — Poe is known to have incurred large gambling debts while attending the University of Virginia.)
* Edgar Allan Poe on 'mason'. Later on, we find he had it on him for a reason.
* Edgar Allan Poe's genre-creating detective stories featured a subtle version of this, with the end of one being withheld until the completion of the criminal's trial.
* Edgar Allan Poe's in its final chapters, where the titular Arthur Gordon Pym and two other men sail through the surreal Antarctic waters.
* Edgar Allan Poe's main subject as well. He was writing about mental disorders that hadn't even been named or studied yet.
* Edgar Allan Poe's Murder Mystery Dinner Party has this as its primary plot. Edgar Allan Poe invites fellow famous writers to his home, offering them with a fake murder mystery that soon turns all to real. The guests even include Agatha Christie, who runs suspiciously late and misses the first murder.
* Edgar Allan Poe's Murder Mystery Dinner Party taking anything seriously, no matter how trivial.
* Edgar Allan Poe's Murder Mystery Dinner Party This is part of the reason why many quickly jumped on the Lenore/Fyodor ship. Also, the humor of the situation is not lost on him.
* Edgar Allan Poe's poem "The Bells", which was not even published until after his death in 1849.
* Edgar Allan Poe's short story "The Man of the Crowd," the people-watching narrator mentions the "Jew peddlers" he sees on the street, who have flashing "hawk eyes" that betray the humble facade they affect.
* Edgar Allan Poe's "Some Words With A Mummy" mocks ideas at the time claiming the Egyptians could not have built the Pyramids. When a group of scientists use

electricity to revive a mummy, he not confirms they did indeed build the Pyramids but had technology far more advanced that was available in the 1800s, along with living much longer due to having far better medical knowledge.
* Edgar Allan Poe's stories and poems. Poe himself wrote: "The death then of a beautiful woman is unquestionably the most poetical topic in the world"-"The Philosophy of Composition" (published 1846).
* Edgar Allan Poe that if you do, he might eventually come to collect.
* Edgar Allan Poe", the costume is completely empty and falls to the ground, because the stranger was actually the personification of the plague.
* Edgar Allan Poe, the narrator and his fellow treasure hunters succeed in finding the treasure of Captain Kidd. They dig up two human skeletons immediately above the treasure chest, and infer that the dead men were Kidd's companions who helped him bury the chest, and that Kidd murdered them so he would be the only one to know the location of the treasure.
* Edgar Allan Poe", the protagonist is saved in the nick of time by General Lasalle's army after all of his own attempts to escape have failed.
* Edgar Allan Poe. The titular raven speaks to the narrator, saying "nevermore".
* Edgar Allan Poe was an uninitiated Other whose works were influenced by the Twilight. It's speculated that his death was the result of him accidentally stepping into the Twilight and staying there too long, resulting in hypoglycemia (which humans attributed to alcoholism).
* Edgar Allan Poe, which led to them doing the same to his own works. One of them even tried to blatantly ruin his reputation immediately after his death. As time passed by (and despite the efforts of the man who tried to ruin his reputation), his works have become classics.
* Edgar Allan Poe", would appear at Poe's graveside and sip a glass of cognac, leaving three roses in a distinctive pattern. Fans and locals would also gather at the grave to commemorate the author and observe the Toaster. The yearly visits continued for 75 years until 2009, the 200th anniversary of Poe's birth. The Toaster's identity was never confirmed.
* "Edgar Allen Poen" is an even more fundamental change: it turns the episode "Owl's Well That Ends Well" into a pastiche of "
* Edgar & Ellen big enough to cram a small child inside, but is stated to be incapable of digesting humans.
* Edgar & Ellen book series features the town of Nod's Limbs. An incident regarding the statue erected to the town's founder is the reason the town (originally called Nod's Lands) bears its current name.
* Edgar & Ellen by Ellen), who causes disasters just by walking by.
* Edgar & Ellen In the end, Ellen is punished for her actions... and so is Edgar, by virtue of being her twin brother.
* Edgar & Ellen inventions so that she can sell them and become rich.
* Edgar & Ellen series has a constant slasher smile. During the TV adaptation, it is shown that he has had this smile since he was a child.
* Edgar & Ellen the books were steadily building up, it doesn't; it quickly diverges from that plot to become an episodic comedy.
* Edgar & Ellen: The titular twins enjoy playing sadistic pranks on each other, but neither of them will let anyone else hurt the other one.
* Edgar Bergen likewise also inspired the dimwitted voice of many cartoon characters.
* Edgar Cayce, Atlantis was destroyed when they discovered machines that were essentially ancient ideas of the Disintegrator Ray.
* Edgar Markov for immortality and became the first vampire on the plane of Innistrad as a result — all of the plane's other vampires descend from him
* Edgar Rice Burroughs’ Mars: Shadows of a Dying World for use with the OGL system.
* Edgar Rice Burroughs). A cliff-dwelling warrior of 100,000 years ago, Nu, is magically transported to the present, falls in love with Victoria Custer of Beatrice, Nebraska, the reincarnation of his lost lover Nat-ul, and the two are transported back to the Stone Age.

* Edgar Rice Burroughs, after Dejah Thoris believed John Carter died and promised to marry a foreign prince, she explains that they have laws to prevent this trope: she can not marry the man who killed her fiance. He carefully arranges that someone else kill him in their attack.
* Edgar Rice Burroughs and he got better.) His love, Kara, fled as soon as her father was assassinated and returned to be reunited with him.
* Edgar Rice Burroughs and promises his assistant that he can marry her if he rescues; as the assistant is lying and one of the villains of the piece, he does not succeed in the end, where the scientist agrees that the man who has rescued her can certainly court her.
* Edgar Rice Burroughs and that he is only repeating what others are saying.
* Edgar Rice Burroughs are threatened with great apes, and another prisoner leaps to join him, shouting they should all come, and they do.
* Edgar Rice Burroughs - are very common among the cities of the Red Martians. The Black Martians also have a formidable aerial navy, which features prominently in ''The Gods of Mars'.
* Edgar Rice Burroughs as a mercenary in plain clothing to win her favor.
* Edgar Rice Burroughs, Barney Custer of Beatrice, Nebraska, U.S.A, is taken for the title king. Played more realistically than usual; it's explicitly stated that they are not truly identical in appearance, only sufficiently similar that the description of one matches the other, and the people who make the mistake have only the description to go on, as the king has been sequestered out of the public eye since he was a boy. However, the sequel serial (which became the second half of the novel) slips into a more standard identical-stranger plot, with even those close to the king or to Barney not being able to spot the deception when Barney is dressed as the king.
* Edgar Rice Burroughs, Bulan collapses after days of sleeplessness and hunger, and Virginia must nurse him through the fever.
* Edgar Rice Burroughs, Carthoris and Thuvia witness a battle between auburn-haired, white skinned men, green men, and banths. But when it ends, they see only the bodies of the last two. Shortly thereafter, they learn that the city uses such illusions to protect itself—and are accused of being illusions themselves.
* Edgar Rice Burroughs, Dejah Thoris agrees to marry another prince, believing John Carter to be dead. He appears and leads an attack on the city to free her — carefully assuring that someone else kills the prince since she would be forbidden to marry the man who killed her fiance.
* Edgar Rice Burroughs, distance units were as follows, from shortest to longest: sofad (11.68 inches), ad (10 sofads, 9.75 feet), haad (100 sofads, 10 ads, 32.44 yards), and karad (1,000 sofads, 100 ads, 10 haads, 36.92 miles). The difference is that the karad is based on the length of an arc-degree on the Barsoomian equator, whereas the real-life meter/metre was originally based on a ten-millionth of the length of the Earth's circumference from the Equator to the poles as measured through the Paris meridian.
* Edgar Rice Burroughs, features an unfrozen caveman with politically incorrect views.
* Edgar Rice Burroughs first to make sure the reader doesn't feel sorry for him).
* Edgar Rice Burroughs flight. Sadly, he doesn't have his vessel throughout most of the story, having been thrown overboard by a mutineer in the first chapter.
* Edgar Rice Burroughs generally covers it. This results in these situations:
* Edgar Rice Burroughs, Gor Hajus is a respected assassin, and part of the reason is that he will not attack from behind.
* Edgar Rice Burroughs had one of these: only one of the room's multiple doors led to safety; all the others were deathtraps. (Once the jailers brought you in and left, the lights went out and the floor spun for a while so you'd lose track of which was the safe door.) Food and drink were provided — most of it poisoned. Oh, and to discourage hesitation, after a while dangerous snakes started slithering in.
* Edgar Rice Burroughs, having captured Dejah Thoris, the Jeddak of Zodanga insists on her marrying his son as the price of peace with Helium. Her grandfather rejects

it.
* Edgar Rice Burroughs, he comments that the women of Mars have effectively prevented these:
* Edgar Rice Burroughs, he feels guilty that he might have given her some reason to believe he might reciprocate. He tells her of Dejah Thoris.
* Edgar Rice Burroughs himself used the Direct Line to the Author approach for Tarzan, the Barsoom novels, and much of his other work. This makes Farmer's approach of representing literary agent material as a different literary agent. In the Barsoom novels, Burroughs went so far as to claim that John Carter was his beloved uncle.
* Edgar Rice Burroughs. In the Martian city of Phundahl, the idol of the god Tur has a system of controls that allow the operator inside to control the idol's eyes and speak through its mouth. The protagonists use this to their advantage by pretending to be Tur and giving the Phundahlians instructions.
* Edgar Rice Burroughs, John Carter is condemned to a public tournament to the death.
* Edgar Rice Burroughs, John Carter listens to Dejah Thoris call him "my chieftain" with what he admits (with hindsight) was total cluelessness, and then calls her "my princess," inspiring much mirth on her part.
* Edgar Rice Burroughs, John Carter, trying to escape, attacks the approaching jailor — only to realize that it wasn't the jailor, it was his own son. Briefly, he even thought he had killed him.
* Edgar Rice Burroughs novels are confirmed nudists, despite the harsh conditions on Barsoom. Dejah Thoris, in her first appearance, is described in these immortal words: "She was as destitute of clothes as the green Martians who accompanied her; indeed, save for her highly wrought ornaments she was entirely naked, nor could any apparel have enhanced the beauty of her perfect and symmetrical figure."
* Edgar Rice Burroughs, Number One abducts Virginia. To be sure, they were attempts to create actual men.
* Edgar Rice Burroughs. Number Thirteen rescues her and, knowing no better, carries her in the same manner.
* Edgar Rice Burroughs observes that Green Martians consider hitting a helpless prisoner the height of jests.
* Edgar Rice Burroughs only started writing in his thirties during a period of low employment. He had been reading pulp magazines and thought that he could write at least as well as this garbage and get paid for it, despite never having written anything before. After his stories became successful he made all the money he could, in particular marketing Tarzan, his most successful character, in every way possible. This was against advice that doing so would overexpose the character. Burroughs was right though, the public couldn't get enough of Tarzan.
* Edgar Rice Burroughs, Professor Maxon to the men he created. (He also wants to create a perfect one to marry to his own daughter.)
* Edgar Rice Burroughs Ras Thavas sells this. When Ulysses Paxton gets two victims restored to their own bodies, they briefly pretend to those who usurped them so as to abdicate; then Ulysses makes it appear to be a miraculous reversal.
* Edgar Rice Burroughs, section "John Carter and the Giant of Mars". John Carter fights a swarm of ulsios (six legged Martian rats) and is captured by them.
* Edgar Rice Burroughs, seeing all concerns of the body as beneath them. They keep things called rykors — which resemble perfect humanoid bodies, but without heads - as both vehicles and, when they have exhausted their use, food.
* Edgar Rice Burroughs series depicts Venus ("Amtor" to its inhabitants) as an oceanic world with a tropical climate.
* Edgar Rice Burroughs series has, by his own admission, been soldiering for literally longer than he can remember, but for some never-explained reason still has the appearance, strength, and stamina of a man in his prime. The combination of peak physical form and decades of sword=fighting experience makes him rather formidable even on Earth, and when translated to Barsoom where the lower gravity allows him to leap moderately-sized buildings with a single bound, he's essentially a one-man army.

* Edgar Rice Burroughs series; the Kaldanes are head-sized insectile beings who symbiotically live atop the bodies of Rykors, which resemble headless humans, connecting themselves to the Rykors' spinal columns to "drive" them.
* Edgar Rice Burroughs, Sing shoots at ships he takes for pirates, though he knows they might not be, because being taken by pirates is too horrible to risk.
* Edgar Rice Burroughs stories, John Carter often carried (and used) both his long sword and a radium pistol (the bullets of which had explosive warheads).
* Edgar Rice Burroughs stories. Martian civilization used the following time units: 1 Xat = 200 tals, 50 xats = 1 zode, and 10 zodes = 1 Martian day. Mars has a day almost identical to Earth (24 hours 39.6 minutes), so 1 zode = 2 hours 28 minutes, 1 xat = 3 minutes and 1 tal = .9 second.
* Edgar Rice Burroughs, Tan Hadron has this twice: the first time, he convinces himself that the woman is just dispirited from her captivity, but the second time, he realizes the truth and repulses her.
* Edgar Rice Burroughs tends the wound, confusing her, because he had ignored (actually, not recognised) a signal for help earlier.
* Edgar Rice Burroughs that extended their lifespan and allowed them to live indefinitely. Half their women are also infertile, and the other half is allowed to breed a limited number of children to avoid overpopulation.
* Edgar Rice Burroughs (the franchise is actually in the public domain given it started in 1912, rendering any claims of exclusivity on the part of the Burroughs estate moot).
* Edgar Rice Burroughs, the hero obtains invisible items from the villain for some effect. However, they lose them. You see, the invisibility was always in effect.
* Edgar Rice Burroughs, they tortured her mother in an attempt to learn who her father had been.
* Edgar Rice Burroughs, though he and Virginia can marry without it, von Horn knows he must either get Professor Maxon's consent, or have him murdered to prevent his changing his will.
* Edgar Rice Burroughs, Thuvia can tame with her words the banths that seriously threatened the combined forces of John Carter and Tars Tarkas.
* Edgar Rice Burroughs, Thuvia falls in love with John Carter. In the end, when he is reunited with his wife, they get to watch as Thuvia and their son are flirting (though they get a book of their own before they actually get to marry).
* Edgar Rice Burroughs, Thuvia has accepted an offer at the opening, though he doesn't actually appear. Then she's abducted, Carthoris chases after her, and the fiancé only reappears at the end — where Carthoris heroically saves his life and intends to leave Thuvia with him. Thuvia begs him to stay, though she admits it's dishonorable on her part, and her fiancé frees her.
* Edgar Rice Burroughs. To be sure, he's from Southeast Asia and would have had little practice speaking English.
* Edgar Rice Burroughs, von Horn has not set foot on a place under American jurisdiction in seven years.
* Edgar Rice Burroughs, was completed by Disney in 2012 and promptly bombed in a rather spectacular way.
* Edgar Rice Burroughs, when Gahal's ship is caught in a storm, one of his men is knocked overboard and barely manages to grab hold. On seeing it, Gahal instantly goes to the rescue — which results in his own fall.
* Edgar Rice Burroughs, when John Carter and Tars Tarkus enter a chamber, the door closed behind them and "And then, from unseen lips, a cruel and mocking peal of laughter rang through the desolate place."
* Edgar Rice Burroughs, when Virginia studies the man who rescued her, he looks at her. She blushes.
* Edgar Rice Burroughs who captured her while trying to convince them to join forces to save their dying world:
* Edgar Rice Burroughs) who tells them the main story of the novel. Oddly, while the framing character does seem to be Edgar Rice Burroughs (he lives in Tarzana and sometime characters allude to previous books he has published) some of his biographical details are slightly different, he grew up in the antebellum South

rather than Chicago and he has been on giant hunting safaris and other huge adventures the real Burroughs rarely had.
* Edgar Roni Figaro. Technically, he wasn't old (he was 27 during the events of the game), but he was implied to have an attraction to Relm Arowny at one point (specifically, before leaving the town to track down Kefka and Gestahl for their betrayal, he mentions that
* Edgar Ross and his army kill him. That's pretty much inspired by Arthur when he urges John to take Abigail and Jack and leave the gang while they had a chance.
* Edgar Ross is prone to snarky remarks but his humor is so dark and snide that he is the only one who finds them amusing. Best demonstrated when John is done with his mission, Ross "jokes" that John's wife Abigail was killed in a prison riot a week earlier, barely avoiding getting a bullet in his head as a result.
* Edgars Industries, "the biggest biochemical conglomerate on Mars." William Edgars specifically enlightens Garibaldi about the real power in the Alliance. One of the major reasons Clark is giving the Psi Corps extraordinary powers is because he is worried of the amount of control exerted by the Mega corps and want to return the power to the politicians... well, specifically to him.
* Edgar suffers from Obsessive-Compulsive Disorder, which is represented by a bull that keeps running through the mindscape's town in a tightly-defined route, causing its inhabitants to do the same things constantly as they try to do their own things in spite of the bull. Getting in its way will knock you back to the start of the level, causing you to repeat parts of the world over and over again.
* Edgar Winter has always lived deep in the shadow of his legendary brother Johnny, but he was able to do one thing Johnny couldn't: have a hit single. The instrumental "Frankenstein" went to #1 and follow-up "Free Ride" hit #14 shortly afterwards. That is all he is known for today, even though another song made it into the 30s a year later.
* Edgar Wright are chock full of them. Lines that were funny earlier on in the story become rather morose and depressing later, or alternatively everything that wasn't a joke comes back as a joke, and a lot early jokes come back as funnier jokes.
* Edge—they were born within a few months of one another, and raised in the same Ontario town).
* Edge1993 takes place in a futuristic city after most of the world was devastated by a gigantic magnetic wave.
* Edge and Christian once brought out two senior citizens dressed as the Hardys to mock them, claiming that they were the Hardy Boyz from the future. Christian asked them if, in the future, people still spell things with Z's instead of S's.
* Edge, an unlikeable, abrasive, selfish jerk of a robot... who hates robots and wouldn't mind seeing every robot except himself destroyed. The only reason he
* Edge as he uses her as a human shield. Edge was such a coward as a heel that it wasn't unusual for him on house shows to spend up to ten minutes stalling outside of the ring before eventually locking up with his opponent.
* Edge. At this point, Edge had been away from wrestling for nine years, and it was looking highly unlikely he'd ever make another appearance inside the squared circle. You can tell how sorely he was missed (and, going by the look on his face, how sorely he'd missed wrestling).
* Edge banned Edge's finisher, The Spear, telling him that if he ever used it in a match, he would be stripped of his title. Immediately after this, Edge hit Ziggler with The Spear four times in a row, since they weren't in a match.
* Edge became a team, dubbed Jeri-Show, and gained a mashup of their songs by Maylene and the Sons of Disaster.
* Edge being portrayed as brothers, then later as childhood friends. As close as they are, even a single line acknowledging the "brother" thing as either earned/chosen ties or an in-joke between the two would suffice, yet this has never come up.
* Edge: Came out of retirement in 2020 at the Royal Rumble, and won the 2021 Royal Rumble match, becoming the first wrestler to do so after entering the WWE Hall of Fame.

* Edgedancer, and the place she has to reach in a hurry is down a mild slope, so in theory, she should be simply able to slick herself and slide down. However, she can't get her balance right and keeps on falling flat on her face, so she ends up simply running there.
* Edgedancer): An in-universe variety with the various member states of the Azish Empire. Technically, the Prime Aqasix is the ruler of all nine states. In practice they only really have control over Azir, and the various other member states only honor their rule with some traditional practices and vaguely following their lead on international issues.
* Edgedancer breeds to fulfill a specific purpose, like storing memories or seeing, so that they might masquerade as a human. While it takes a great deal of effort for them to effect even a basic human shape, the fact that most of the Dysians are hundreds of years old means that they have a lot of practice, and they're scarily good at it.
* Edgedancer has found her funny, so he's going to endanger his boss' plan and let her live.
* Edgedancer): It's implied that this is how Nale feels about his acolytes. At one point, Lift overhears him giving a dressing-down to his acolytes, noting that he's managed to learn more about their target during a morning stroll than they did for the past week.
* Edgedancer, Lift pulls him in a hug and he cries hysterically with his head pressed into her chest.
* Edgedancer): Nale punishes every crime with killing the criminal under the assumption that milder punishment leads to recidivism.
* Edgedancer): Nigh-everyone in Yeddaw buys and sells information, as in their country, knowledge is a currency as good as - and sometimes better than - physical money.
* Edgedancer suggests that the Knights Radiant of old — or, at least, the Skybreakers order — used to have their own ranking system, based on the number of Oaths sworn. Going from one to five, it was initiate, novice, Shardbearer, an unknown one and Radiant. Nale still uses the system for his acolytes.
* Edgedancer that ultimately returns him to some form of sanity and calm.
* Edgedancer to "stay the same while the world changes around her", expecting this trope. Her first period proves that whatever Nightwatcher did to her, it wasn't making her unaging.
* Edged by Karkat, who is (like Kankri) apparently cute-looking and is a good guy, albeit a
* Edge, from this game. Any CDs that included his music or any releases/publications that included Gangrel always included a mention in the liner notes/credits that Gangrel was a trademark of White Wolf, Inc.
* Edge GravityWhen game mechanics prevent characters from falling off the edge of cliffs or platforms.
* Edge had long hair well past his shoulders, but cut it all off as soon as he was granted his release.
* Ed Gein could be considered an example of this. Decorating his home with parts from graves he dug up, and eventually two victims.
* Ed Gein has had several movies purporting to tell his story, as well as probably dozens that were "Inspired By" it; he was something of a
* Ed Gein, of all people. He was proven to be behind some truly disgusting acts (and suspected of worse), but when it came to kids? Before he was found out and arrested, his neighbors would hire him as a babysitter. He was consistently described as caring and benevolent to the children placed in his care.
* Ed Gein picks up a chainsaw and uses it to drive off the Zodiac Killer in
* Edge is a first ballot Hall of Famer living a mostly quiet life and loving every minute. Lita has people begging for her return after just showing up at Axxess and later joined the HOF herself in 2014. Matt Hardy is widely derided as an
* Edge is also Canadian (and Sean Morley's ex-brother-in-law, for that matter), but always tried to do an American accent when playing a heel. As a face, he generally

spoke in his native accent.
* Edge is later shot down in a similar situation (the missile that took out Bartlett had been fired at her, but he
* Edge of Battle, drug smuggler Ernesto Fuerza plays on Mexican ultranationalistic sentiment in his "Comandante Veracruz" guise.
* Edge Of Chaos has this in spades. The asteroids will blow up like bombs if you shoot at them a few times. There was even a mod that turned this up to 11 by making the asteroids fly around at ridiculous speeds, pelting everything like a space hail storm.
* Edge of Darkness: At the end, it's implied that the Earth's eco-system is deliberately acting to increase the greenhouse effect in order to rid itself of human civilisation.
* Edge of Darkness has probably the most realistic depiction of a criticality event in any fictional work not directly based on a real one. It's outside a reactor, though.
* Edge of Darkness: Parodied when the infiltrators stop in the middle of the raid to enjoy a three course meal, with fine wine, cigars and classical music.
* Edge of Darkness Quisling, having gone over to the Germans in 1940 when they invaded Norway. He regrets it.
* Edge of Sanity's "Crimson II" is about a demonic child born to a nun who read a cursed book. The child can read minds and kill victims by projecting "images too hideous for human minds to bear".
* Edge of Sanity, who eventually is overthrown and cryogenically trapped in a tank of crimson fluid.
* Edge of Sanity with the awakening of the tyrannical queen from the first album.
* Edge of the Empire includes Doctors as one of the three subtypes of the Colonist Archetype. As the name implies their skill trees focus a great deal on healing but can also buff party members through the usage of Stims and even their knowledge of anatomy can come in useful when knowing where to hit an opponent.
* Edge of Tomorrow ability to try to find a survivable path to it. After numerous setbacks and failures, he finally reaches the location on his own only to discover that the visions were a trap, and that the Omega was never really there.
* Edge of Tomorrow, adapting until the Mimics win. Killing the Omega, however, stops all the Mimics.
* Edge of Tomorrow. After it's done, he compliments it with "Terrific presentation!" (he used to be in Public Relations).
* Edge of Tomorrow as her preferred weapon, whereas Cage uses machine guns for most of the film.
* Edge of Tomorrow as when the movie starts he's a shallow and insincere PR officer who tries to blackmail a general into keeping him off the frontline and gets sent there as a grunt instead.
* Edge of Tomorrow: Dr. Carter tried to explain the whole situation with the Mimics, and even came up with a weapon to defeat them. Not only did they not believe him, but they fired him on the spot. General Brigham kept his invention, though, so it's possible there's more to his disgrace.
* Edge of Tomorrow dropping down on a cable which releases just before they hit the ground.
* Edge of Tomorrow: During the scene in which Cage trains with Rita in the target range for the first time: If you look closely in the background, you will see soldiers reacting to Cage's gunfire when it ricochets off the floor after he attempts to take down one of the spinning targets.
* Edge of Tomorrow escapes the aliens at the German Dam by sliding underneath a contraption that is too low for the aliens to fit under.
* Edge of Tomorrow features an amphibious assault on the alien-controlled Normandy beaches. The humans invade with helicopter dropships, hovercraft, and even landing boats.
* Edge of Tomorrow is an interesting example. It's actually unclear how competent he is, because the enemy's time-travel abilities mean that they can retroactively turn any decision he makes into the worst possible one. The overall effect is of a

particularly spectacular General Failure, but only because he's unaware of his outlandish situation and has understandably serious difficulty wrapping his brain around it once he is informed.
* Edge of Tomorrow is a typical example of an alien invasion with the aliens having extremely advanced technology, and human militaries are barely holding on.
* Edge of Tomorrow is intercut with shots of a line map of Europe, in which areas turn red where the Mimics are fighting humans, then pitch black where they've exterminated them. The red battle-zone's rim spreads outward from Germany to engulf nearly all of the continent.
* Edge of Tomorrow is revealed to have done this, sending the his pay to his fallen friend's family.
* Edge of Tomorrow) know that this death will be the final one. Up till then Rita had avoided getting close to Cage or any other soldier, having experienced the pain of watching her friends die over and over again.
* Edge of Tomorrow, Major Cage attempts to extort General Brigham rather than fight the aliens. It nets him a bust to private and put right on the front lines.
* Edge of Tomorrow more or less single-handedly beats them at their own game.
* Edge of Tomorrow move in a manner that involves whirling their body in a corkscrew-like motion while whipping limbs in every direction.
* Edge of Tomorrow powers. But when Cage gains their powers, he slowly but surely learns how to use his foreknowledge of the day's events to his advantage and learns more about how to fight in his suit.
* Edge of Tomorrow. She wasn't far along so they didn't have to do much to hide it, but she couldn't do as many stunts or wear the heavy armor for too long.
* Edge of Tomorrow, so when they need to make use of an abandoned car quickly (knowing that the enemy is waiting in ambush) they just rip the doors off, which also gives them room to dive inside wearing said armor.
* Edge of Tomorrow, the aliens greatest ability (to reset time) is also their greatest weakness, as it can be passed on to its enemy.
* Edge of Tomorrow, the Eiffel Tower, the Louvre, and other Paris landmarks have been seriously damaged by the aliens.
* Edge of Tomorrow. The film ends there, before we see what becomes of them now that the war is won and the loop is broken.
* Edge of Tomorrow, there is deserted trailer park including an Abandoned Playground behind the enemy lines.
* Edge of Tomorrow to escape falling debris, Rita ending on top of William. She kisses him shortly after, the only sign of affection towards him she's allowed herself to show throughout the movie.
* Edge of Tomorrow, where the primary object traveling back in time is information in the hero's mind, while everybody else' memory is reset.
* "Edge of Tomorty: Rick, Die, Repeat" features an alternate-universes variant; when Rick dies, his memories are transferred to a clone in another universe, which turns out to be a fascist dystopia. He dies again, waking up as a shrimp creature. "At least this time it's shrimps instead of fascists," he says before discovering that they're fascist also. This turns into a running gag. "When did this shit become the default?!?"
* Edge of Twilight game, was first revealed in 2007, but thought to be cancelled when developer Fuzzyeyes laid off many of its employees and ceased development of all projects in 2009. In late 2012, they announced it had not been cancelled, and gave a projected release date of summer 2013. Nothing has been heard since.
* Edge of Victory: Conquest averts this as Anakin's unspoken plan to escape Yavin 4 with Master Ikirt (size of a small dog) in his X-wing fails when other Jedi apprentices stay behind to rescue him.
* Edge of Victory: Conquest get the students out alive, inflicting heavy damage in the process, and inadvertently spark the Jedi Heresy among the Vong's worker caste to boot.
* Edge once mentioned in an interview that the reason he didn't like to be called his real name by fans is that the fans only know Edge, the wrestling character. They aren't familiar with Adam Copeland, the person who portrays said character. He

has since changed his attitude after retiring from wrestling, preferring his real name when it comes to things not directly involving wrestling, such as his acting career.
* Edge out from under the ring and proceeds to kick the everloving hell out of them.
* Edge picked up on this and implicated that Bradshaw might have raped some wrestlers.
* Edger Allen Poe the episode's staff note that the house bursts into flames long before there's any reason for it to do so.
* Edge refused to be among the returnees for that night's show because they saw it coming.
* Edge's boss, Blunt, is another example of the trope. He's a robot who considers intelligent machines the greatest danger to humanity and is very much in favor of wiping out the robots, with himself as the last one to go. After his disappointment at the above spoiler, he starts openly campaigning his cause and gains a fair-sized following.
* Edge states in his autobiography that he and Christian would do this
* Edge stint is the first time in their lives they weren't around each other constantly. The second being Edge's retirement.
* Edge. The last one is particularly notable because it happened on an episode of Raw and anyone who looked at the clock after Orton beat Barrett would have guessed that something like this would happen.
* Edgewalkers of the three monster races. It's what happens when a Sasquatch (A ghoul with lycanthropy) is infected by vampirism. Fear of becoming a Wendigo is the reason that Sasquatch's stay away from urban areas with a high vampire population.
* Edge was forced to retire at 37 due to a serious neck injury, but he returned at 46 in the 2020 Royal Rumble match, and won the 2021 Royal Rumble match.
* Edge (who'd himself been seen as a monster quite often) and torture and torment him and Kane. Just so happens to follow Kane being an even bigger monster than normal, it's almost as if the WWE wanted to make sure Kane had it coming.
* "Edgewise, that desk is the greatest desk in the Academy. It's made of real wood."
* Edge with a broken arm and winning. As a heel, his gimmick is that he's a sneaky cowardly bastard who wins most of his matches by being "the ultimate opportunist".
* Edgeworth also dismisses spirit mediums in general, despite the fact that Maya and Pearl have channeled Mia's spirit in court before his very eyes. It's implied that he doesn't see her because he doesn't
* Edgeworth begins to go through this process during the final case of the first game when he realizes
* Edgeworth definitely qualifies in the first game, a little bit in the second game, and his coldness is completely gone by Investigations, but no less snarky.
* Edgeworth himself does this if you present wrong evidence in at a few parts in
* Edgeworth himself is this to Phoenix Wright, who remembers when he used to be an idealistic child who wanted to be a defense attorney. After some
* Edgeworth himself, who has been praised by many people in game, got roughly the same treatment when he played for the Defense (he even wondered if there was a
* Edgeworth instead, followed by "I probably shouldn't say that out loud though. Thank god for inner monologue."
* Edgeworth is a by-the-book prosecutor (which is almost the same thing as a cop in this universe) in
* Edgeworth is the most important main character to undergo this, starting with the first game. For Edgeworth
* Edgeworth lampshades his own Arbitrary Skepticism when he scoffs at the impossibility of spiritual power, then finds himself
* Edgeworth was in his class, and stood up for him in a class trial after Edgeworth's pocket money was stolen, and it was thought Phoenix had been the culprit. It later turned out that Larry had been the culprit all along, but the event is ultimately no less important to Phoenix for that.
* Edgeworth, while harsh in his methods, always follows the rules, and while he

didn't mean to display forged evidence in the SL-9 case, someone else set him up to it, which started the rumors that followed him to the present..
* Edge would commonly both swing steel chairs into an opponent's skull simultaneously, known as the "con-chair-to."
* Edgey does this occasionally in the main series too, and since he's
* Ed Grimley: The police refused to search for a man's stolen car in favor of searching for Ed's fish. Ed commented to the man that, if that were not a cartoon, they'd be looking for the car.
* Edguy has "Sands Of Time" (1995 version), "When A Hero Cries", and most of all the extremely sad "Standing In The Rain".
* Edguy has vocalist Tobias Sammet and bassist Tobias Exxel. Exxel goes by the nickname "Eggi" though, so there's no confusion.
* Edguy is a symphonic metal act that uses metaphorical lyrics that allude to metaphysical and social themes, often expressed using esoteric or hermetic expressions that tend to give their songs a kind of classical epic feel that is very much in line with power metal. "Vain Glory Opera" is perhaps their best known album, but they've done a lot of other songs.
* Edguy's "Do Me Like a Caveman" is a hilarious song about trying to sleep at a hotel while a couple in the next room are banging each other's brains out.
* Edguy - "Trinidad", effectively "you don't give me respect because you're taller than me, so I moved to Trinidad without telling you".
* Edgy Backwards Chair-Sitting: A character sits on a chair backwards to show his rebellious or untraditional behavior.
* Ed had an in-universe example. A band sued their founder, lead singer, and songwriter, on the grounds that she plagiarized her lyrics. It was all a pretense because the record label didn't like her. They had already scouted a potential replacement, but the trial took so long, the replacement joined another band. They tried to take back their leader, in vain. The episode ended with the band performing in front of a not so impressed talent scout.
* Ed had this with Mike and Ed constantly betting each other $10 to do random stupid acts. This includes having to make an order at a diner in rhyme and only being allowed to say burger me to order.
* Ed Harris plays a CIA agent in the 1960's involved in many missions in Southeast Asia. In
* Ed has also been known invert this trope as he also goes to the hospital for the fights he gets into, which is reasonable enough since he often engages with immortal monsters.
* Ed has a nightmare that his mother is... Johnny 2x4. At some point, Johnny tells Ed to "wipe that smile off of his face," which causes Ed's mouth to disappear. If that weren't horrifying enough, Johnny then sentences Ed to be tossed into a pit of shark-like versions of the Kanker sisters, which causes Ed to
* Ed has another scar on his forehead, gained from a small injury early on in the story. It's usually covered by his hair and it's only purpose is to leak blood comically whenever he gets whacked. It eventually heals over time.
* Ed has been known to wind up in very large fights which almost inevitably result in his arm getting destroyed. Winry is
* Ed himself has one during his time in Briggs. While Winry is preparing his new cold-resistant Automail, Ed tries to warn her not to trust
* Edible Bludgeon: When the Improbable Weapon is a solid mass of (often frozen) food.
* edible to humans and vortigaunts. It's unknown exactly what Combine soldiers and Elites are fed but it's likely they get the same saline solution used by Stalkers.
* Edict Zero Fis is a borderline case; the holder can summon and control creatures using the device. Whether this is good or bad depends on the holder of the artifact.
* Edict Zero Fis is assumed to be an ocean world with only five islands.
* Edict Zero Fis, the Remote Mission Oversight System (RMOS) includes implants to track the location, status, and vitals of agents in the field. A similar system is used with patients in Harlan Hills Sanitarium.

* Edie assumes he's a gay gigolo that Pam hired because she didn't want to show up without a date.
* Edie Ernst, USO Singer - Allied Spy, a comic only available directly from the author.
* Edie Falco, nearly two decades after her original character's final appearance.
* Edie in Orbit (which has only seen the light of day as a Sunday special feature), Edie's robot buddy is a human mind scanned into a floating robot head.
* Edie is. Small inconsistencies in the situation trigger Jack's radar, making him suspicious throughout until he's able to confirm the truth while confronting Jane.
* Edie McClurg is seen as a weird casting choice for Helen, given that she was in her thirties already and doesn't fit in with the
* Edie throws Mrs. Huber's ashes in Susan's face when Susan confesses that she actually burned Edie's house down. Susan then decides to get hosed down on her own front lawn.
* EDI has the largest chest of any female in the series, which is saying quite a bit. Her body was designed as an infiltration unit that passes itself off as a human, but after the artificial skin was burned off, it just looked silly.
* EDI in the second game inverts this in that she projects herself as a sphere of blue lights, but is a genuine self-aware AI.
* Edika's short comics tells the story of a kindly well-meaning dentist who's not the least bit worried by his constant massive nervous spasms, and the horrors he inflicts with his drill.
* EDI, maniacally, for thirty seconds. That is not the only reference to Shepard's lack of dancing skills.
* Edinburgh, a 12-year-old boy joins the Pine State Boys' Choir as a first soprano. Turns out that the choir director sexually mistreats the boys, going so far as to drug them in order to do so.
* Edinburgh has the local story of how at every hanging of criminals, there would be three groups watching: onlookers, the family of the criminal, and medical students. Once the criminal was dead, a struggle would always erupt on who got the corpse down first.
* Edinburgh relationship with a somewhat younger man, whom he's married in a commitment ceremony. He then meets a blond 17-year-old boy, hitherto straight, who, in a subversion of the Lover/Beloved trope, falls in love with Fee and pursues him. Fee is attracted to the boy and they eventually meet for clandestine sex.
* Edinburgh Zoo once held a similar exhibition, using performance artists in an enclosure that used to have ducks in it.
* Edin Dan is known for his speed specifically. No numbers are given, but an example was shown in a test where his team was pitted against another in a contest where each team tried to reach the other's base. The opposing team seemed to have the advantage because they had members capable of tunnelling underground, but when one of the tunnellers popped out near Dan, the game was already over because he immediately ran down the tunnel and pressed the winning button at the other team's base before anyone could react.
* Ed in retaliation for Ed having shot his father in the earlier incident.
* Ed is a girl, which the rest of the cast doesn't realize until the very end of the episode in which she's introduced. Given that she's young enough to be prepubescent and her personality is halfway between
* Ed is implied to have neglectful parents. His mother treats him as
* Ed is more downplayed, as episodes have shown him joining the other kids to laugh at either Edd or Eddy's humiliation, and more often than not has he helped Eddy play cruel pranks on Edd ("My Fair Ed" being the most blatant example as the two deliberately got Edd in trouble with the other kids while
* Ed isn't exactly a stowaway on the Bebop (blackmailing the crew by taking
* Edisonades was created partially from a desire to fight the attitudes presented in the Edisonades (despite the genre being dead for several generations).
* Edison also paid gangs of minions with clubs to smash up early movie theaters and beat the projectionists because they weren't using Edison Brand Projectors.
* Edison Miranda hilariously showed why, unless you're Mayorga, you shouldn't try

to do this.
* Edison, recognized and redirected near the end by the target of his crush.
* EDI starts out as the ship's artificial intelligence system and is only present as a voice and a holographic ball. She is super helpful and everyone takes a liking to her. However, in the sequel she transfers her conscious to a
* EDI takes control over Dr. Eva's body She explains that it is not "hair" in the strict sense but a memory-shape metamaterial used to simulate hair. She just prefers to gather it into a protective bob shape when not using it for anything else.
* edit and re-edit each other's pages until someone smacks them both over the head with something.
* Edited for Syndication - Changes made when a network show or motion picture is placed in syndicated distribution
* Edited for Syndication: Most of the bowdlerization does occur after a TV show is put into syndication or makes its rounds on the international market.
* Edited for Syndication: Reruns of a show have scenes cut from the episodes' original broadcasts.
* Edited for Syndication: Reruns of a television show have scenes missing from the episodes' original broadcasts.
* Edited for Syndication versions with a whole ten minutes removed from each episode.
* Edited for Syndication: When a TV episode gets dubbed or rerun, a scene is edited out.
* Edited for Syndication who fakes her injuries so she can make her male fighters feel guilty about beating up a woman — and uses that moment of weakness to strike back.
* Editha," by William Dean Howells. The title character returns her engagement ring, along with every other gift he ever gave her, to her fiance before he goes off to war. Her intentions are good, if overdramatic; she tells him she wants him to love their country first, even before herself. He's killed in action, and she finds out from his mother that her act basically stripped him of the will to live.
* Edith Garrud began her career as a martial artist as a bodyguard and close-combat instructor for the more militant wings of the suffragist movement. After the movement succeeded in its goals and disbanded, she was headhunted by her old nemesis, the London Metropolitan Police, who, somewhat embarrassed over their finest having had their asses kicked by Garrud on a routine basis, asked her to spearhead their close-combat training program.
* Edith Piaf (of "Non, Je ne Regrette Rien" fame) always wore a black dress when she was on stage.
* Edith's eyes start to glow red whenever she uses her powers extensively.
* Edith stands out as one of the few people who didn't go to the Phanty U with friends they've known since childhood. She does apparently have siblings working at the Uni, though.
* Edith Surreal: Debuted in 2018 as Still Life with Apricots and Pears.
* Edith Surreal has red on her mask, Ursa Minor in the Night Sky had blue on his.
* Edith Surreal, she was previously the first openly non-binary champion in wrestling history.
* Edith Wilson) and helped lead to the 25th Amendment several decades later.
* Editing and post-production on the film was done in a studio whose address was...
* Editing any type of Wiki, including this one. There's no profit, and it's usually done anonymously or under a pseudonym.
* editing for U.S. television. Mainly, the Mazon-aliens in said show were always naked, and there was even a live childbirth on the show (which Macek left intact), and nobody ever said anything. Even people who watched the show never minded it!
* Editing pre-recorded sessions to produce the resulting work, such as re-recording scenes or removing side commentary unrelated to the game.
* Edition 3.5 contains the "Shield Other" spell, which shunts half of the damage the target takes onto the caster.

* Edition 3.5 had its 3 core rulebooks released in an expensive, black leather bound edition. The books included an official foreword, a red ribbon booklayer and the sides of the pages were colored golden.
* Edition 3.5 had the Mindsight feat, which allowed telepathic characters to passively detect any intelligent creature in range of their telepathy. The
* Edition 3.5 has a selection of poisons that deal a random amount of ability damage to one and only one ability score over two "doses". These damage doses happen exactly one minute apart regardless of the type of poison used. Terms such as dosage, dilution, or long-term exposure never enter into it. Poison-users
* Editions Lug, editor Jean-Marc Lofficier set out to link over 2000 largely unrelated characters from just about every comic book genre into a single continuity. Some characters had to be revamped fairly drastically to fit in, and a few had to be revamped to avoid duplication.
* Editor Christopher Knights voices the Three Blind Mice and Thelonious.
* Editor, director, and solo animator Ladd Ehlinger Jr. also voices the lead character "A Square" in the 2007 animated adaption of
* editorial edict supplement, completely denied that supernatural powers had any part in causing the Holocaust in the WoD, that it really was the product of Nazi racial supremacist theory and genocidal impulse. (Supernaturals did take advantage of the Holocaust, but the responsibility for it rests entirely with the humans who did it.)
* editorially mandated stories that no one else wants to do. He has explained in interviews that he's comfortable with this because the characters ultimately belong to DC and not to him.
* Editorial SynaesthesiaNon-visual senses like smell and pain have to have some form of visual representation.
* Editor-in-chief Frimand Pløsen's newspaper is failing because he keeps making incorrect predictions that it'll start snowing soon. His solution? Pressuring the inventor Theodore Rimspoke to make a snow machine. It gets worse as Pløsen undergoes
* Editor-In-Chief' output, has subsequently become standard operating procedure for all comics companies, and it also provided better pay for people occupying those posts, if not actual creative rights.
* editors, the fact is that the comic remains fresh in infamy over a decade later as one of the all-time worst Spider-Man stories.
* edits them for content to come out in a clipped, impersonal monotone (even the screams), is probably a lampshading of this trope.
* Edit Wars are often built off of relatively minor differences in wording, phrasing, or detail.
* EditZP (who is slightly memetic for making large quantities of workbenches then abandoning them), accidentally slipped up during his
* EDI vows to do this if they can't defeat the Reapers. "I would rather become nonfunctional than help them. I want you to know I will never be a part of the Reaper forces."
* Ed, Izumi, and Al don't have to draw the circle, but the series explains that they are still forming an array: their clapped hands form a circle out of the body/arms with a simple triangle on one end. The rest of the details of the array are held in the alchemist's mind. You need immense knowledge of alchemy to pull this off; this is why the only people who can do it are ones who have opened the Gate. Consider it
* Ed Kowalczyk, and Hawkman (the singers on the track) peel their faces off when the singer changes.
* Ed Kowalczyk has a three-part story about a man who's hanged, and wanders around as a ghost in the videos for "Seven", "Angels on a Razor" and "The One".
* Ed Kowalczyk, usually shed his shirt around the third or fourth song of most concerts. He also shows up shirtless in the videos for "I, Alone" and "Operation Spirit". In his older years, he's let go of this habit.
* Ed Lane, the lead sniper, will kill when he has to, but in something of a departure from this trope, he

* Ed Lauter, who played the guards' team captain in the original, has a more traditional cameo role as one of the warden's golf buddies.
* Ed Love, an animator at Hanna-Barbera at the time, animated some Wing Dings segments of
* EDM artist Robert DeLong always wears black jeans and a black T-shirt with his orange "X" logo.
* Ed may be a bit of a Deconstruction. As children, he and Al practiced alchemy and were prodigies at it, (probably because of their dad). When their mother died, they sought to do the unthinkable and try and bring her back. They paid
* Ed McBain novels. He may be the most casually racist man alive, but if he assigned to find your killer, he will find your killer, regardless of who or what you were.
* Ed McGivern set several records on standard Smith & Wesson revolvers. His most famous is to fire five shots into a playing card-sized group in two-fifths of a second. He also shot marbles midair, fired targets that live helpers hung onto, shot targets from vehicles moving at over thirty miles per hour, fired without having a line of vision, shot from the hip and basically got crowds to see him because of his skill. And, to top it off he set several records
* Ed McMahon position (and laugh), and for putting an APPLAUSE sign on the TitanTron when Abe gets introduced.
* Ed Mercer resolves several crises and manages to defeat a number of powerful warships in one-to-one fights.
* Ed merrily cries out: "EVIL TIM HAS BECKONED THEM!" This statement is never proven true or false as the episode ends there.
* Edmond: Edmond is married, with children, and sees the girl (Jeanne) as his muse and refuses to take the relationship any further once he's discovered (Edmond's friend is interested in Jeanne, but only for casual sex as he's a Casanova). Unlike the play, it all works out for the best in the end.
* Edmond Hamilton about a man who woke up in his family crypt, after being considered dead. He walked around the city, listened to what people really thought of him - and decided to go back into his coffin.
* Edmond Hamilton about the last man on Earth (an immortal) who tries to bring humanity back. He tries to resurrect the dead, and they, while alive (and sentient) are devoid of any human emotion, even the children they bear. Then he tries to bring people from the past - and the travel makes them raving mad.
* Edmond Hamilton: Has big love stories, epic space battles, oversized heroes and villains, awe-inspiring places, gorgeous women, and they usually rule the universe - or at least a star kingdom to boot.
* Edmond Hamilton, it is evidently assumed that crewing space ships would be a job primarily reserved for men, much like sailing was when the story was written.
* Edmond Hamilton, John Gordon, is somewhat disappointed to discover the far future is monarchical until reassured that they are constitutional monarchies.
* Edmond Hamilton revolves around the discovery that humanity is descended from the vast interstellar empire. A true homeworld of humanity was Ryn, the third planet of Altair. That empire was destroyed by unknown powerful alien enemies.
* Edmond Hamilton. Unfortunately, another thing the Angel seems to have inherited is a tendency toward tragic biography.
* Edmond has a sick subversion. During his mid-life crisis, Edmond breaks up with his wife and goes on a nightlong quest for redemption. He picks up a waitress at a bar and sleeps with her. Earlier in the night, he purchased a knife from a pawn shop, for protection, and uses the knife to stab a pimp who tried to rob him. Edmond is in the waitress' apartment, raving and ranting about... whatever. All the while, he's waving the knife around to emphasize his point. To make a long story short, he ends up brutally stabbing her to death in a fit of rage.
* Edmond Honda and M. Bison), though that only applies to that particular continuity.
* Edmondson actually played a psychotic ex-talk show host called Eddie Monsoon in
* Edmund attempts to explain to Baldrick how chickens are made ("A mummy bird, and a daddy bird, who love each other very much, get certain urges...") before Baldrick

interrupts with a cunning plan.
* Edmund believes that Mary Crawford's selfish behavior and glib attitude are merely the result of bad influences, and if she's just away from her high society friends long enough (by being with him instead) then she'll lose those traits which trouble him. It takes her wishing his brother dead so that Edmund will inherit for him to realize that as much as she does love him, she's perfectly comfortable being a
* Edmund Blackadder himself is always some variant on the Brighella figure, defined by his greed, cowardice (particularly in the first series), and the fact that he is never the highest-status person around - even when he's the son of the king, he's only the second son, and as the series progresses, his rank in the world gradually drops.
* Edmund Blackadder in the first season, but in series 2 he became the
* Edmund Burke, supporting freedom but not complete systemic overhauls based strictly on ideas).
* Edmund died to a viking stabbing him in the arse in 1016. The English got their revenge in 1066 when a Viking held off the English at Stamford Bridge... Until an Englishman hopped in a barrel with a spear, floated downriver, and paid back the debt. Then again, some historians say that the Viking was stabbed in the testicles.....
* Edmund Finney's Quest argument and was neither a fake bomb threat nor a real one.)
* Edmund Gettier was a philosopher looking for tenure at Wayne State University. To help with this he was encouraged to publish any ideas he had. He published a 3-page paper called
* Edmund is clearly a despicable person, but he is right to criticize the way that society treats bastard children. He also points out the foolishness of Gloucester's astrological beliefs and how they
* Edmund Kemper, might well be the Trope Codifier for the real-life decline of hitchhiking. He specifically targeted female hitchhikers in the '70s in California, typifying the psychopathic killer targeting young, innocent girls in the public mind.
* Edmund McMillen is becoming an official part of the game. You can't get much more approval from God than that.
* Edmund McMillen often reblogs fanart of his work on Tumblr, and this includes the porn. Of course, his games are as unsexy as can be, so Rule 34 of them is always made for its own sake.
* Edmund Pevensie, liked to bully and torment his younger sister, Lucy.
* Edmund Spenser is an allegory of virtues. It also has an interwoven political allegory.
* Edmund, the younger, illegitimate son of Gloucester, uses a forged letter to discredit his older half-brother Edgar and seize control of his father's estate and position.
* Edmure, backed by forces from the Riverlands, Vale, and North, kills every member of House Frey who was involved in the Red Wedding (which was most of them).
* Edmure Tully has a good eye for individual battles but fails to grasp larger strategies, such as when he defeats Gregor Clegane but in the process drives him out of a trap Robb was preparing.
* Edmure Tully is a minor example, being defeated in almost every battle. The one time he manages to win one it ends up screwing up his side's longer term strategy (though granted he wasn't
* Edmure Tully is not treated well in-universe by his uncle Brynden Tully and nephew Robb Stark for messing up their military plan by holding back Tywin Lannister at the Fords. His sister Catelyn sees him as young and foolish, and doesn't like the way he lets smallfolk into Riverrun for protection. However he is very well-liked among the fandom, many people thinking it was unfair to blame him for the strategic failures as he hadn't been informed of the plan and understandably misunderstood the order hold Riverrun. He also seems to be one of the few Lords who actually takes his duty of protecting his people seriously and

would make a great ruler in peacetime.
* Edna & Harvey: Harvey’s New Eyes, and tells everyone to shut up and leave her alone — including the game's narrator.
* Edna & Harvey: Harvey’s New Eyes had one of the restriction demons become a genie as well. However, instead of granting wishes, Genie Harvey only restricts the player from touching alcohol.
* Edna & Harvey: Harvey’s New Eyes in one part of the game is a Wendigo, despite it looking nothing like it.
* Edna & Harvey: Harvey’s New Eyes is shown to be wearing a hooded robe to cover his face and hide his identity from the players in Hoth Motigor during the game.
* Edna & Harvey: Harvey’s New Eyes one character is described by the narrator as "the most depressed looking man in a bee suit" the main character had ever seen.
* Edna & Harvey: Harvey’s New Eyes takes this to its logical conclusion: playing a tabletop video game is equivalent to, and has the same mechanics as, entering a hypnotic trance. Lilli even encounters a personified hypnotic suggestion in the game (much to the confusion of the DM, who finds himself describing a character he didn't create.)
* Edna & Harvey: The Breakout: Bobo, who gets stored in a shelf in a psychiatric clinic.
* Edna & Harvey: The Breakout: You can use everything with everything and even talk to inanimate objects (besides Harvey), which will give you unique responses. The only way to do something that doesn't result in a custom response is finding a bug that allows you to do something that wasn’t meant to be possible. The default responses aren’t even voiced because they weren’t meant to be triggered.
* Edna And Harvey Her father pinned himself as the murderer and was executed.
* Edna and Ned Flanders try to keep their relationship a secret too. Or at least, until Edna unintentionally reveals that she and Ned eloped some time ago.
* Edna, a witch who lives in the Haunted Woods. All of her potions are called things like "Potion of [species] [participle]", such as Potion of Lenny Shrinking, and she occasionally talks about wanting a "jubjub sandwich". However, she's also an
* Edna can increase defense with her arte and she gets an area healing arte that also cures slow.
* Edna catches fire before she topples off the top of the tower during the climax of
* Edna Fry's is frequently plugged on Twitter with the hashtag #HowToHaveAnAlmostPerfectMarriage. She has occasionally "accidentally" rendered this as #HowToHaveAnalMostPerfectMarriage.
* Edna joins in on the act too, even noting at one point that he can see why she has so much fun winding up Mikleo.
* Edna Mode. She appears three times, all in the first half of the film. She's the one who alerts Helen to her husband's moonlighting hero work, and convinces Helen to go track Bob down.
* Ed! Nobody finds out she's a girl until Faye tickles her! Everyone else can be forgiven since she's a pre-pubescent
* Edo. But only as long as he is in the car, outside he is an extreme wimp. This is in contrast to the other Natsu, who is very badass normally, but suffers from extreme motion sickness.
* Edo-era Japanese village set, which is part of a theme park owned by Toei. When it shows up, it usually requires some excuse to get the characters there; whether it's a dream sequence, time travel, or whatever.
* Ed of Meryl's Rat Patrol 1 group, after the SOP system was locked down due to it refusing Liquid's DNA, went Laughing Mad.
* Edogawa Rampo was born Hirai Tarō. He chose his pen name because it sounded like Edgar Allan Poe (
* Edolas) back through the subsequently-closed Anima, while staying behind to

assume his rightful place as the ruler of the now-magicless Edolas.
* Edolas set up two Animas at once to identify multiple agents in their way. One of those Animas was over Galuna Island, which not only led to the heroes helping the demons regaining their memory, but also led to Lyon to use two-handed Maker Magic and allowed Levy to find the stone tablets that grants her Holy Scripture.
* Ed O'Neill's character suggests that a man who got fired do it to his boss. The man replies that he'd rather file a grievance with his union.
* Edo period In a less obvious way, he also tends to assume social rules that no longer exist, particularly when it comes to the 'masters' he swears loyalty to, making him quite prone to exploitation, which unfortunately happened the previous year.
* Ed O'Ross, who hails from Pittsburgh, PA, has played Russians several times in both TV and film.
* Edo's second duel with Judai involved using Elemental Heroes, but he switches midway to using Destiny Heroes. Both archetypes had little to no common support at the time, and it looks like he's switched decks completely mid-duel. When the match is replicated in the
* Edo Tensei!Hiashi meets his brother Hizashi. His natural course of action would be to try and use the Caged Bird Seal, which by then had already been removed from him and the rest of the Branch House Hyugas.
* Ed owns Stucky Bowl, and vandals regularly steal the T. In the episode that dealt with it, they weld the T down, so the vandals change the sign to "Stucky Bowel".
* EDP445. Pretty much 98% of his dialogue is nothing but profanity. In fact, a huge chunk of his videos ended up being age-restricted due to how profane he is.
* Ed. Part of the premise of the show was the unresolved romantic tension between main characters Ed (played by Tom Cavanagh) and Carol Vessey (played by Julie Bowen). They got together, ratings dropped, show cancelled.
* Ed played this straight. The titular character's behavior would have gotten him a restraining order within the first episode in real life.
* Ed Reardon's Week. Milvane's fame as a film director really took off when he made a film out of Ed Reardon's first (and only) successful novel, without giving him any of the credit, and Ed still resents him deeply for this. They never pass up a chance to snipe at each other professionally and personally, but they've known each other for ages and play weekly music gigs together, and the only being Ed is on closer terms with is perhaps his cat.
* Ed Reardon's Week, one of Ed's (several) problems is that he's so ensconced in antiquated linguistics that he can't ape the speech patterns of his peers.
* Ed Reardon's Week: The main character's friend is a director whose latest blockbuster films are a trilogy about a dolphin named Dermot, who is in love with his human trainer. The clips the audience hears are all melodramatic twaddle. The trainer goes blind at one point ... and then Dermot donates his corneas to her.
* Ed Riche and manic depressive with what looks like a touch of autism at worst. Most of the play revolves around the protagonist reminiscing about what a chore it was for the family to put up with him and his own anxieties about the possibility of inheriting the man's mental frailties.
* Edriss 562 (Visser One) started out with a Hork-Bajir when she came to Earth, where she took over an Iraqi soldier for a few minutes after landing in the middle of
* Ed Robertson gives a blurred one following a thumbs-up to some customers in
* Ed's automail arm is only designed to be used as a limb, but his alchemy makes it a versatile
* Ed's defeat of the two brothers in Lab 5 fits this. Specifically, his line just before blasting their
* Edsel didn't bode well with most drivers due to the shift buttons being located where the horn is traditionally placed, i.e. the steering hub, resulting in drivers ending up shifting gears instead of sounding the horn.
* Ed Sheeran appears with a group of Lannister soldiers who befriend Arya.
* Ed Sheeran as "Eddie" in the premiere of Season 7. Though the character was never intended to return, the Fandom's reaction was so negative that his fate is

mentioned offhandedly by prostitutes in Season 8: His face melted off by dragon fire.
* Ed Sheeran" looks a lot like adult Ed Sheeran, a similarity very apparent in the transition cut near the end of the video.
* Ed Sheeran number, but is actually Nathaniel singing about how he looks down on Rebecca and really doesn't want to be attracted to her, but since he is, they might as well have sex and get it over with.
* Ed Sheeran's "Shape of You" at high volume for 30 minutes, which was considered "disturbing the peace".
* Ed Sheeran - "Sunburn", primarily about the narrator's regret that an old relationship didn't work out: "We never even tried / We never even talked / We never even thought in the long run". The new-girlfriend-who-reminds-him-of-the-old is a secondary aspect of the song.
* Ed Sheeran, the couple goes to a buffet on their first date. Because they want to save money, the woman fills up her bag. (The man merely fills up his plate.)
* Ed's limbs are a frequent victim of this trope, especially in "Breakneck", where his neck is stretched to about a mile long. This idea gets revisited in "Stretch Ed" and "Bendy Bird".
* Ed's room. It's a filthy pigsty and it's where Ed commonly acts out certain scenes from his favorite horror movies and comic books.
* Ed's stupidity is his flaw, since he's very gullible, prone to making mistakes and often doesn't understand what's going on, often meaning that more short-tempered characters like Eddy or Sarah take their anger out on him or him getting manipulated easily.
* Ed Stories college student who does everything from teleporting the Sun to sending the entire Earth backwards in time.
* Ed stories, Ed decides that true artificial gravity is impossible. However, the Andromedans are able to create quite a good facsimile of gravity through very precise use of their Momentum Cannon, by repeatedly applying a downward thrust to all objects on board the ship, so as to simulate gravitational acceleration.
* Ed "Strangler" Lewis didn't actually have a reputation for using any strangleholds and gave himself the name because he was a fanboy of 1890s wrestler Evan "Strangler" Lewis. This was fairly obvious to crowds in the US but utterly confused the fans and promoters in France, who mistakenly called his sleeper hold a "strangle hold" despite it being a much safer blood choke that does not actually restrain the airway.
* Ed Sullivan Show sketch as one of the evil monsters who wants to steal Santa Claus' toys.
* Ed that has the ability to melt and reform himself. Edd and Eddy, while in typical MeatCanyon style, show no such abilities.
* Ed the hyena (and to a much lesser extent, Shenzi, Banzai, and all of the other hyenas) actually gains this type of smile when
* EDtv, several scenes are shown from the view of a professional video camera, complete with internal indicators and battery life, and filmed by main character Ed Pekurny and his cameraman.
* Edtv would have been too long if it had kept all, or even most, of the 45 minutes of deleted scenes. Still, they tend to mourn the deleted subplots that flesh out Ed's family and introduce a rival TV personality.
* Eduard Limonovs "The Other Russia" also depict an utopic future russia with free love aspects.
* Eduardo Garza (Cartman), and Carlos Águila (Mr. Garrison) voiced their characters in both dubs.
* Eduardo Garza, remembers that strange things happened to him during the production. He had two popped tires. The door to his home was banging by itself. He found himself locked in a cabin. There were strange noises in the dub's audio that he couldn't remove. His lights went out, and his VCR turned on by itself.
* educated enlisted servicemembers method by which one can become an officer, essentially forcing all officers to come up through the ranks.
* Educating Alex" is an early original slash webfiction about openly gay college

student Ryan crushing on the athletic Alex who turns out to like him back.
* Educating Archie) was the UK equivalent. Of course, the main thing about ventriloquism is that the vent's lips don't appear to move when the dummy is supposed to be talking. Peter Brough's years on radio meant that he'd forgotten that, and when the show moved to TV ...
* Educating Rita: Pygmalion is a literary professor; Galatea is a hairdresser...and she eventually surpasses him.
* Educational institutions (primary schooling, college, etc.) have a few, because instructors that aren't
* Educational toys are now part of the fray thanks to the lucrative market for them. Check out a second rate toy store in a second or third world country and you'll find pretty blatant knockoffs of
* Education for Death. All things considered, it did show that not all Germans accepted National Socialism of free will, but rather were forced and indoctrinated into it from a young age. It further portrays Hans' mother to be deeply afraid of it all.
* Education for Death avoids portraying Germans as fanatically evil. Rather, it portrays the Germans themselves as victims of the Nazi regime. The main character, Hans, starts out as a decent kid, but a mixture of peer pressure and propaganda turn him into a merciless tool for the state.
* Education for Death character, from an evil witch that supposedly represents Germany's enemies.
* Education for Death gets a taste of Princess Germany's Marshmallow Hell.
* Education for Death which implies Hans is drafted to Nazi army, "marching and heiling, heiling and marching", when he comes to age.
* ''Education for Obedience'' is however a big reason why animation is taken as a serious medium by historians, especially because there is a decent flood of it because it was an easy source for those who could not read.
* Education Mama): A parent who obsessively pushes and pressures their child into succeeding academically and would resort to emotional and physical abuse if said child fails at meeting their academic expectations.
* Education Mama: A parent will get angry at their kid for not taking their studies seriously.
* Education Mama: Education is important! Forcing our children to dedicate their lives in going to school instead of focusing on their silly dreams of becoming musicians, athletes, or of the like is the best way to ensure their future as well as enriching society! God help them if they receive anything less than a A+!
* Education Mama: Stop wasting your time with your silly, childish dreams! If I don't see you score As consistently, I will make you study harder, even if it breaks you!
* Education Mama. Thankfully, she realizes the errors of her ways in the end and becomes less overprotective of Timmy, just as long as he doesn't allow contests to interfere with his studies.
* Education Mama which turn up her negative attributes to the point that she hates her husband and doesn't care if he gets killed and abuses Gohan. This may be intentional, as even the Funi dub and Super tend to play up her worst traits while ignoring her good ones.
* Education of Cyfranius bodies; spiritstove — a device to torture to death a recorded consciousness of a living or fictional person; exterrier — a former dog; piter — a person erased from global information network by mistake and hiding from civilization in a pit (people enjoying sex with anonymous piters employed packs of trained exterriers to search for them).
* Educator Howard Spicker believed child geniuses, what he called "bright" children, were actually relatively common, but went unrecognized because they don't fit the profile of what people think a child prodigy should be like.
* Educomix, Dave and Jessica's first kiss was actually dreamed by Jessica.
* Educomix has software to collect information from everyone's computers, like the real-life NSA scandal.
* Educomix, it's an established rule (from the very first strip) that that urine is

better for the "ecos" than water, so naturally, this trope is commonly shown.
* Educomix was fought between Ireland and the South Pole, and one of the combatants was Jesus.
* Educomix: When Jessica is in the Garden of Edam, she and Adam are the only humans in existence.
* Educomix, who has the power to speak and understand any language, needs a magnet to communicate with them.
* Edutainment Game had "Irrational Eddie" during the fake commercial breaks, trying to peddle irrational numbers and other mathematical peculiarities.
* Edutainment Game has one activity where the player is given a basket of fruit and a list of (different) fruits s/he is supposed to get, and must trade with the various people at the market for them, leading to this trope. (For example, you have an apple and need to get an orange. However, the person who has an orange only wants a banana, so first you have to trade with the person who has a banana, who wants two lemons, so first you have to trade with the person who has lemons...)
* Edutainment Game is a G-rated Zombie Apocalypse, with people turning into walking balls of TV static and infecting others.
* Edutainment Game; it uses digitized electro-mechanical pinball chimes to replace the original game's sound effects.
* Edutainment Game, one of the ways for your fish to die was by being caught and eaten by an osprey if you failed to dive to deep water quickly enough.
* Edutainment Game they say untrustworthy, you usually find other physical evidence too. Not so in one case, where a suspected Moon rock theft hinges almost entirely on the thief calling said object a sedimentary rock, despite the player researching in-game that it is physically impossible for a Moon rock to be sedimentary. No other evidence is found to implicate the suspect. (Because if you don't know your basic geology terms, you are clearly a thief.)
* Edutainment generally featured one or more of Janet Ellis, Sylvester McCoy, Mark Speight, Julia Binstead, Phillip Fox and Wilf Lunn.
* Edutainment involves protagonist Miles Woodman using time travel to bring a teenage Martin Luther King Jr. to the present to avoid his assassination. This results in an alternate timeline where MLK's civil rights work never occurred, where Miles' school is named after Robert E. Lee instead, his best friend Randy is now a racist bully, and his classmate Maria and his mother are both impoverished and work as maids. Miles is reluctantly forced to send Martin back to his time to restore the future.
* Edutainment left by his window. The rest of the intro is Alf chasing them down to get his sausages back.
* edu-tainment, one of the hosts gives this as the signal when testing the makraka, a sickle-like weapon used by the Zande tribe of Central Africa on a ballistic gel torso dummy. It does its job.
* edutainment premise, and then an innocent teenager and close relative of the Doctor was added so children could imagine themselves aboard the TARDIS.
* Edutainment Show (assumed it's the same girl from previous version, even when the design is completely different) and friend of the other animals. And in one song, there's Martin, another child as Lila, that only appears in that song.
* Edutainment Shows? A research study conducted by Disney back when they were about to rebrand their Playhouse Disney block into Disney Junior in 2010 showed that most kids learn important preschool topics via computer games and smartphone and tablet applications, and usually watch television for entertainment. Disney used this research to create the shows on the block, and it was successful, leading to a number of children's networks adding non-educational or morals-based preschool programming to their lineups. When Disney conducted the same survey in 2005 and 2000, parents wanted their kids to be educated by TV since computers weren't exactly a common commodity back then, although they were starting to become popular.
* Edutainment Show, which limited advertisements on kids shows, this decade focused on shows about teaching kids and teens on topics ranging from science to literature to morals to the environment to dinosaurs while also not losing the zaniness.

* Edutainment still shows up as late as Troughton, although sporadically - "The Moonbase", written by an actual scientist, contains a scene where Ben lectures Polly (and the audience) in how the design of spray bottles works, and a scene where Polly explains some basic organic chemistry to Ben concerning solvents, plastic and nail varnish.
* Edutainment were deleted when the show was recut and released in home video, Boganda now remains unidentified.
* Edvard Löwenström, one of the villains, is a very creepy example of this trope. It's not bad enough for him to be a grown man still acting like a
* Edvard Munch. He was mentally unstable to begin with. Thus, he became more and more reclusive as time passed, and when he got himself a rather big mansion, he rarely left it. He died almost isolated in 1944.
* Edvard Munch to match Munch's expressionist style for a few seconds.
* , Edward and Alphonse give one of Van Hohenheim’s journals to the Chang clan and since it was written by someone who’s ancient and revered in Xing, many of the clans attempt to steal it and it’s highly coveted. To the Elric’s themselves, though, it’s one of dozens they own and their father can always just write more.
* Edward Bulwer-Lytton (1871), combining elements of occultism, gothic horror, and science fiction.
* Edward "Butch" O'Hare, the namesake for O'Hare International Airport in Chicago (they even have an F4F Wildcat in front in his honor). He became the American navy's first ace of World War II by shooting down five enemy bombers in a single day (a feat which also earned him the Medal of Honor), and he was the one who proved that the F6F Hellcat marked the end of Japanese fighter superiority at Marcus Island, for which he received the Distinguished Flying Cross. He also helped the navy develop its night defense tactics, and according to a former wingman, always taught his pilots little tips and tricks to improve their flying. Unfortunately, though, he was lost in the navy's first night defense flight — he was caught in the crossfire between a Japanese G4M
* Edward Butler still considers himself the legitimate government of the United States, even after being driven off the mainland and into being holed-up in a fortified Guantanamo.
* Edward by chucking a heavy leather-bound copy of the Constitution at the shooter.
* Edward can use four of them (Understandably as he is a pirate) combined with two swords of different kinds.
* Edward Clariss/The Rival was an enemy of Jay Garrick who despite his best efforts, could not match the latter's speed.
* Edward comes to Mrs Jennings' house to leave his farewell card when he leaves London.
* Edward Cowley, a drag queen and fa'afafine (the third gender in Samoa).
* Edward Cullen, despite having lived for over 100 years as a teenage vampire at the age when males should be at their most sexually curious, has never been interested in any girls. Then he meets Bella, gets a whiff of the delicious scent of her blood, and becomes a committed Bella-sexual.
* Edward Cullen is wooing teenage girls everywhere with his Rape Face expression. Face aside, it doesn't help when you're probably over a hundred years old and pick up chicks from a high school cafeteria. And watch them in their sleep. A 117-year-old man dating a teenage girl.
* Edward Cullen's "mancarrot" (which may actually be a less horrible term than "throbbing lavender man-fruit thing", another description from the same fic) from
* Edward Current, an atheist vlogger and humorist who plays a rather extreme Christian character.
* Edward Diego. This is roughly two weeks after he boasted that he completely controlled SHODAN.
* Edward D. Wood's in hopes of using the profits to produce a religious film. One wonders how that worked out.
* Edward Eager actually acknowledges this trope when the children are hiding from pirates. "Katharine, like so many heroines in other stories, chose this time to

sneeze".
* Edward Eager a young girl gets really annoyed at Lancelot so she wishes that she was his match in strength and skill, then conjures a suit of armor and challenges him to a duel. She wins and the crowd cheers her. When the king asks her to remove her helmet she does so, having forgotten she still looks the same underneath. As the mood of the crowd shifts from shock to anger, she's called names and Lancelot is jeered for being beaten by a girl, for all of five minutes before Merlin erases everyone's memories.
* Edward Eager books he himself had loved as a child were too old-fashioned. So he wrote some original novels in the Nesbit style, but set in contemporary times with more savvy, snarky modern children.
* Edward Eager has a variation: the protagonists, four children, have been shrunk to a tiny size and the world of their toy knight figurines has come alive. They win the day in the end by bringing in one child's collection of toy soldiers, which includes soldiers from several different historical wars.
* Edward Eager, the children find a magic book that not only lets them wish themselves into other books, but also records everything that happens to them as it happens. And whenever anyone else picks it up, it appears as whatever book they would most like to read.
* Edward Eisen usually goes by "Ed", which helps differentiate him from the
* Edward Elgar is also a standard snippet, but it's open to question how many people actually recognise it as his.
* Edward Elgar's Op. 36 "Enigma" Variations on an Original Theme, the slow variation IX (Nimrod), which contains the most intense melodic and harmonic development of the theme, is followed by Intermezzo (Dorabella), a lightly scored and melodically understated Allegretto that does not use the theme at all.
* Edward Elric has amber-colored eyes that match his blond hair. Alphonse and Hohenheim also share this trait, since this is a trait of all people from
* Edward Elric is fairly broken up about what happened to Nina, but doesn't resign.
* Edward Elric is never shown to have any romantic interest in anyone except his
* Edward Elric is smug, rude, and claims to be motivated only by a desire to regain his and his brother's bodies, and yet he suffers from a really bad case of
* Edward Elric looks almost exactly the same as the younger version of his father, Van Hohenheim, as shown in the flashbacks. Later,
* Edward Elric to Alfons Heiderich. Edward majorly shook up Alfons' dull life with his determination, devil-may-care attitude and refusal to believe anything without proof and helped Alfons' rocket program take off. In fact Edward shakes up Alfons' life so much that when given the choice to go to Amestris with him, Alfons jumps at the chance without a second thought. Although the dark side of the trope is lampshaded when Alter!Hughes warns Alfons how dangerous Edward could be, so focused on his own goals that he ignores the possible fatal consequences.
* Edward Fox. The actor in question has a face which is instantly recognizable to most Brits, especially the age-group likely to enjoy Agatha Christie adaptations.
* Edward Furlong was approached by casting agent Mali Finn at a boys and girls' club.
* Edward getting stabbed in the eye. Tris goes to Four afterwards and he pretends to not care, but changes his tune as soon as he knows Eric isn't listening. This emphasises that the Dauntless rules are changing.
* Edward Gorey (1925-2000)'s work evokes Edwardian England through its visual style and peculiar linguistic flair, though the author himself was born and lived out his life in Massachusetts.
* Edward Gorey, a book where twenty-six children die in alphabetized ways.
* Edward Gorey. Don't try it at home, unless you have those peculiarities too.
* Edward Gorey frequently used anagrams or translations of his name (Ogdred Weary, Dogear Wryde, Mrs. Regera Dowdy, Eduard Blutig) as pseudonyms, though given his distinctive artistic style these were probably more for Gorey's amusement than actual disguise.
* Edward Gorey's death left his last work, "The Izzard Book" (a collection of words

beginning with Z, with pictures), poignantly unfinished: The illustrations become increasingly (and randomly) rough and sketchy until there's nothing left. He also died before doing the illustrations to The Admonitory Hippopotamus.
* Edward Gorey, writer and illustrator, was asexual and said that his orientation also informed his works.
* Edward Grey was broken by his experience in Akuze, and while he came back still heroic, he's quick to opt for the
* Edward G. Robinson features the humorous subversion described above, with the luggage-store front turning a brisk business.
* Edward G. Robinson. His character has an extended death scene in the film, and it was the last scene that Robinson shot; he passed on just a few days later.
* Edward G. Robinson. Nowadays most people have no clue that these characters and their speech mannerisms were based on anybody.
* Edward G. Robinson), purportedly on the first run-through without having to do a second take.
* Edward G. Robinson so they can drill a hole through a wall in the basement into the bank's vault. But, the luggage shop actually starts turning a big profit and becomes successful, and later, the bank offers them thousands of dollars for the use of their basement so they can expand the vault, making the criminals wonder if it'd be better to just go straight.
* Edward G. Robinson used. When characters in Looney Tunes use it, it's usually in a police or gangster context.
* Edward has relatively little angst given that at age 11 he lost two limbs and was exposed to
* Edward himself proves to also be very wise and have a great understanding of the world, which in the end
* Edwardian artist Louis Wain said that his favorite drink was Bovril and soda.
* Edward II, a character recites a list of famous male/male couples, justifying homosexual relationships by saying that "The mightiest kings have had their minions...And not kings only, but the wisest men." Most of these are lover/beloved couples: Hercules and Hylas, Tully and Octavius, Socrates and Alcibiades, Achilles and Patroclus — Achilles and Patroclus are not said to be lovers in the Iliad, but were seen as erastes and eromenos by later Greeks, although in the Iliad Patroclus is the elder. Alexander and Hephaestion, who were coevals, are also mentioned in the list. The historical Edward and his boyfriend Gaveston were actually the same age, but lover/beloved was the predominant homosexual trope in Marlowe's day: people learned the trope from the Greek and Roman classics they read at school, as the list shows. Marlowe himself is supposed to have said "All they that love not tobacco and boys are fools."
* Edward III is Edward the Black Prince's relationship with Audley, an elderly and loyal knight of his entourage. The friendship's crowning moment is Edward's impassioned speeches to the wounded Audley:
* Edward II's younger brother, the Earl of Kent, attempted to gather a rebellion to rescue him from captivity and put him back on the throne - over two years after his funeral. He got a surprising amount of support, considering, and was beheaded for his trouble. This plays into the
* Edward II where the titular king is murdered with a red-hot poker demonstrates how effectively horrifying this trope can be.
* Edward, in episode 29, is forced to remain a state alchemist even after he announces his resignation due to the homunculi threatening to harm Winry if he doesn't. This is used in a similar fashion against Mustang, who has the well-being of his whole team (Hawkeye most of all) resting on his willingness to comply, although he never threatens resignation. (They both find their own ways around it.)
* Edward IV defies the custom that a king should marry a princess by making Elizabeth Woodville, a penniless Lancastrian commoner with whom he's besotted, his Queen consort.
* Edward IV married Elizabeth Woodville because of love instead of political reasons. This got him a lot of enemies within his own court, as she was not only completely inappropriate (was the widow of a Lancastrian soldier with two

children), but she also did things like securing all the best jobs and marriages for her relatives. This helped cause the powerful Earl of Warwick, otherwise known as
* Edward James Olmos ended had him explained that he added several aspects of his character:
* Edward Jenner: Inventor of the smallpox vaccine and pioneer of vaccination, a major medical breakthrough for which he is still revered to this day.
* Edward just doesn't see how dazzling he is. Bella is happy to tell him.
* Edward Ka-Spel, lead singer of the Legendary Pink Dots, doesn't seem to enjoy wearing shoes onstage.
* Edward Kelly himself is one to some extent. To many, he's a noble principal who wants to help his students, and to the
* Edward Kenway, though. Which makes it amusing when his animation still has him pulling up a hood that isn't there.
* Edward knows Bella as a person and not prey for maybe a month before he wants to spend the rest of his (non)-life protecting her from every other vampire in the world.
* Edward Lear and 'runcible'... whose definition he never hinted at. 'Runcible spoon' from "The Owl and the Pussycat" has been adopted as a phrase, but no one can agree on whether a runcible spoon is any spork, or specifically a spork with wide, outward-curving tines, or a spork with a knife edge on the handle, or some other kind of cool spoon. None of these can be right anyway, since he used 'runcible' to modify other nouns, so whatever it meant isn't spoon-exclusive.
* Edward Lear invented the adjective "runcible" to provide extra syllables in his poetic writings. "Runcible spoon" (from "The Owl and the Pussycat") is now defined in dictionaries. It resembles an extremely large silver spork.
* Edward Lear, the title characters "sailed away for a year and a day / to the land where the bong tree grows".
* Edward likes sci-fi, fantasy, and video games, as they offer him some escape when he's hospitalised for the surgeries meant to treat his cerebral palsy.
* Edward Malus (Nicolas Cage) steals a bike from a woman after threatening her with a gun in
* Edward. Most of the guys at school have either tried to court Bella or had secret crushes that were never revealed. Mike Newton especially is a sensitive guy who tried for about two books to win her over. Poor guy.
* Edward, Mustang yells at him to the point of snarling before giving him the cold shoulder.
* Edward Norris, a former Baltimore Police Commissioner who had a somewhat controversial career that ended in an indictment and a felony conviction, plays
* Edward Norton - about an actor who's always stuck in supporting roles).
* Edward Norton. As it turned out, it was Brando's final onscreen role.
* Edward Norton. Given the relative unpopularity of the film with fans (most casual observers won't even realize it was a part of the MCU to begin with, despite multiple characters crossing between them), Ruffalo is generally seen as the superior Hulk.
* Edward Norton plays an actor who is brilliant, yet a pain in the ass to work with.
* Edward Norton throughout it, and when the producer handed out gifts to the cast over the movie's surprisingly strong box office performance, Norton returned the gift with a note stating "Give this to someone you actually like—or someone who actually likes you." He also wasn't happy at how the conditions of the deal meant that he was paid a fraction of what he'd have earned on any other film at that time in his career.
* Edward Norton when he spends the first act living in Brazil and speaks the local language (Portuguese) — poorly, and when he finds himself in Guatemala he barely knows a few basic words.
* Edward Norton, where Norton's character has his best friend hit him so that he won't look too attractive in prison, where he is going.
* Edward Nygma. He was in love with Kringle and demanded her abusive boyfriend's

face to leave her alone. He responded by assaulting him, and in the ensuing conflict he ended up stabbing him to death in an extreme move of self-defense.
* Edward of Woodstock, Prince of Wales, son of Edward III of England is known as
* Edward of York of noblemen who represented the worst of feudalism. His main benefactor, the Earl of Warwick, was alienated by the King's refusal to marry one of his daughters, rather than the Lancastrian widow who became his queen, and raised a rebellion with the help of his transparently treacherous younger brother George, which briefly put Henry VI back on the throne. Edward got the throne back, in battle, but he could never quite achieve enough political control to ensure a smooth succession.
* Edward Scheinerman, a writer of college math textbooks, has a tendency to go for the subtly
* Edward Scissorhands created the titular character as a robotic son, but died before he could replace Edward's hands with non-lethal prosthetics.
* Edward Scissorhands derives a contrast from the gothic castle Edward is from and the friendly, pastel mid-century suburb at the foot of the town. The townsfolk are friendly, if a little insensitive to his condition, at least until Edward's situation begins deteriorating.
* Edward Scissorhands, Edward is unfinished at the time of his creator's death, leaving him with, well, scissorhands, but also seemingly permanent black leather clothing that is always somewhat visible beneath the normal clothes that are given to him to wear.
* Edward Scissorhands, for example) depict worlds that are neither wholly good nor wholly bad.
* Edward Scissorhands has a mob of suburbanites lighting their flashlights and roaming the neighborhood with sports equipment and gardening tools.
* Edward Scissorhands has quite a bit of difficulty with his new waterbed after moving to the suburbs. He jiggles around on it hopelessly for a while, and then, to make matters worse, his sharp hand-blades actually puncture the bed, sending streams of water everywhere.
* Edward Scissorhands is divided into two "acts" precisely because of this trope - it starts out rather sunnily, but begins to move down a darker path as Edward falls in love with Kim (and rejects Joyce's advances). Once Edward participates in the house robbery, the comedy gradually drains from the film altogether.
* Edward Scissorhands, Joyce tries to seduce a plumber early in the film (to establish a basis for her attempted seduction of Edward later on).
* Edward Scissorhands. Justified because he is a creation by the Inventor.
* Edward Scissorhands might just be the kindliest Mad Scientist ever. His second-most-impressive creation (after Edward) is a giant cookie-making machine. And he creates Edward with the expressed desire to see if it's possible to make an artificial being with human love. And then amuses both of them with silly poetry later. Aw!
* Edward Scissorhands. She's first seen in a family photo where Peg describes her as her pride and joy. When we meet Kim, however, she seems like a bratty teenager. But as the film goes on and she warms to Edward, she is really kind and caring, thus fitting the trope.
* Edward Scissorhands: The inventor created Edward from scratch in his castle and treated him like a son. He dies of a sudden heart attack right after showing Edward his supposed model hands, leaving him alone in the castle with and with well... with his Scissorhands. Edward stays there for sometime until he is discovered by an Avon lady, Pegg Boggs kicking off the story's main plot.
* Edward Scissorhands: The Inventor who created Edward. He was an incredibly gifted scientist, a kindly eccentric old man, and a very good surrogate father to Edward. He lived alone in his mansion where he created impressive devices for making cookies and chopping up vegetables, until his loneliness drove him to create an artificial son for himself. He took care of Edward and taught him poetry and manners. Sadly, he died of a heart attack before he could give Edward his new hands.
* Edward Scissorhands there is a highly-stylized contraption used to prepare and

bake cookies by the Inventor early in the film.
* Edward Scissorhands was exactly like an ordinary human, but his Inventor died before he could furnish him with proper hands; thus he is virtually unable to touch others. It's suggested in the film that there's the possibility he could still be made "complete" in that way, but that never comes to pass. Perhaps more importantly, when he falls for Kim, he does whatever he can to make her aware of his love for her in hopes she will reciprocate it, despite what he is.
* Edward Scissorhands was marketed under the Fox family label on VHS despite being a PG-13.
* Edward Scissorhands would sometimes stop to stare at smoke alarms, walls, hairdryers, and other everyday objects, seemingly entranced by them.
* Edward Stratemeyer, he of the Stratemeyer Syndicate, could be seen in modern times as being a little chauvinistic (of course, remember,
* Edward Teach, A.K.A Blackbeard. The rest of his crew put up a fight even after the fact, but were outnumbered by the Sailors and ultimately surrendered.
* Edward Teach/Blackbeard after he is tricked to give his life for the immortality of the another.
* Edward Teach/Blackbeard wants to use the Holy Grail to wish for a harem, and he likes spending time with little girls.
* Edward Teller, the inventor of the hydrogen bomb, who pushed like crazy to get the U.S. government to build it and openly advocated nuking the U.S.S.R. Also advocated using a nuke to excavate a harbor in Alaska, and building a tunnel across America using nukes to do the mining. Once used a nuclear test to light his cigar (a man could get cancer doing a thing like that.
* Edward the Black Prince (see the page pic) fought in several battles during the Hundred Years War.
* Edward the Confessor was the last Saxon King of England because he was believed to have had one of these with his Queen Edith. He may have had religious motives or maybe it was because he despised Edith's father Godwin of Wessex. Whatever his reasons Edith seems to have been okay with it and they are credited with having an affectionate father/daughter-like relationship.
* Edward, the Duke of Windsor, was effectively exiled twice during his life. During World War II, he was sent to become the Governor of the Bahamas because Winston Churchill didn't want him undermining the Crown and the Government by running his mouth off about his fascist sympathies to the press. After the war, he spent most of his time outside of Britain after being ostracized by his family once and for all (
* Edward The King). Of course for most of his life, therefore most of the series, Edward didn't get to be king due to his mother's longevity.
* Edward The Seventh The three attempt a shortcut home, get lost, and seek assistance from a peasant driving a cart. The peasant is understandably sceptical when they attempt to explain who they are.
* Edward turns Bella into a vampire after she nearly dies during childbirth. The baby came out wrong, of course, because it's their baby and male vampires aren't suppose to interbreed with humans...
* Edward VIII of England was on the verge of causing this. Subverted in that his abdication got rid of a King with fascist sympathies, and put on the throne King George VI, who — with the help of his wife, Lady Elizabeth Bowes-Lyon —
* Edward VIII, the exterior footage was shot on more expensive but better quality 35mm.
* Edward Woods was originally hired for the lead role of Tom Powers in
* Edward Woodward for help that he started carrying leaflets for various organizations that could assist them. He would also top off about to expire parking meters and leave a "Courtesy of The Equalizer" calling card on the car's windshield.
* Edward Zwick, best known for Oscar-baiting historical epics such as
* Ed was bitten painfully across the neck, and Shaun bravely shouts "You leave him alone!" and charges to his defence.
* Ed Wasser appeared in the pilot movie as a crewman on the Babylon 5 command

deck, before being cast in a regular role as Shadow minion Morden.
* Ed wears a red duster, but has yet to be dismembered while wearing it (his missing limbs were before the coat). Unless you count the number of times his automail has broken, but otherwise, he's good. He makes a point of wearing a red coat anywhere for various reasons (the biggest being to cover up his automail). In one chapter, as his group is
* Ed, who got away with the loss of just an arm and a leg while Al lost his whole body.
* Edwin also references the trope at one point by claiming that if you really believe the Cowled Wizards are good for their word, he has a bridge in Thesk to sell you.
* Edwin Alva could restore his son from statue-form, which was the result of an earlier Superpower Meltdown
* Edwin Alva is the leader of an international criminal organization but is viewed by the public as a wealthy and influential philanthropist.
* Edwin Eugene Bagley, probably the most famous American march not written by John Philip Sousa.
* Edwin McCain Hot 100 in the late 1990s; "I'll Be", which peaked at #5 and remains his only Top 10 hit, and the Diane Warren-penned "I Could Not Ask for More", which only reached #37, but did better on the Adult Contemporary charts at #3 compared to #6 for "I'll Be".
* Edwinna Elbert, Stewardess of the Ald-Ruhn Mages Guild, studies Dwemer creations. If one brings her a copy of a certain rare book, she'll mention how she wants to be one of these, believing
* Edwin Odesseiron to such an extent that he can effortlessly outperform player-made mages.
* Edwin, perhaps the most powerful recruitable mage in the game, surely the less humble. He will constantly remember how amazing and superior he is, compared to the main character, while insulting everyone thinking nobody's listening;
* Edwin Starr had several R&B hits, but only two notable pop crossovers, 1969's "Twenty-Five Miles", and of course, the iconic anti-Vietnam anthem "War". His career fizzled out on both formats afterwards, although he had two disco hits in the UK later in the 1970s.
* Edwin the Boy Scout keeps getting behind on his "good deed a day" schedule and then causing trouble for his intended recipients by rushing to make up for it.
* Ed Wood. After Bela Lugosi dies, Ed spends the day re-watching cuts of the last footage he shot with Bela over and over.
* Ed Wood, as it was designed to cash in on a sex change operation that had just made the news.
* Ed Wood: Ed is shown to be a heterosexual who happens to find women's clothing more attractive and comfortable. This is probably because he was based on an actual person.
* Ed Wood features a car chase at about 20 MPH, possibly because Wood couldn't afford stunt drivers or insurance.
* Ed Wood near the end; he appears to be facing the exact same problems Edward has been facing throughout the actual film, but he appears in only one scene.
* Ed Wood's career and reduced him to filming pornography at the end isn't dramatized (brief text epilogues do reveal his and his colleagues' ultimate fates).
* Ed Wood's Ed Wood makes a statement about how he could make a whole film from Stock Footage. Ed Wood himself used a lot of stock footage, which led to amusing continuity errors.
* Ed Wood's most acclaimed films, even giving one of his stars an Oscar...and is the director's biggest box office failure with a mere $5.8 million domestically.
* Ed Wood's movies were because of his own incompetence, it was usually the most blatant ones that were caused by his refusal to do a retake. Even when his producers requested one, he'd make the flimsy excuse that audiences wouldn't pay attention to such things in regards to the overall story. This attitude may have stemmed from the tight budgets and deadlines he was given to finish each film.
* Ed Wood's trope in cinema after he was named "The Worst Director of All Time" by

the Golden Turkey Awards in 1980.
* Ed Wood, The Amazing Criswell, Bunny Breckinridge, Conrad Brooks, etc.
* Ed Wood; while Wood shows a blatant disregard for things like visual continuity and set quality, and justifies this by saying that no-one really pays attention to the smaller details, he does so because he's projecting his own way of watching films onto the audiences, rather than considering them to be... well, morons.
* Ed Wuncler III and Gin Rummy, both of whom served in the US Army during
* Ed Wuncler III and Gin Rummy from the same show. Both are white and come from affluent families (Ed in particular being the grandson of the wealthiest man in Woodcrest.) Both speak in
* Ed Wuncler III claims in the first episode that, after shitting himself over a dozen times in Iraq, and running out of toilet paper and having to use his thumb after the second time, he was nicknamed "Stinkbomb" and no longer taken on patrol for fear of the stench alerting enemies.
* Ed Wuncler III, whose grandfather owns everything in town and will never be arrested or prosecuted for anything. Riley even said "you're lucky your granddad owns the police" after a badly botched bank robbery. Ed's partner Gin Rummy denied it works that way and claimed they got away with it "because I am a criminal mastermind"... right before a cop comes by
* Ed Zwick, best known for historical war epics and the like (including
* E. E. “Doc” Smith can be used to read dead minds, as long as they're relatively intact and haven't been dead for more than a few hours.
* E. E. “Doc” Smith for this — "Driving Jets Are Weapons". (For those who want to know the details: the ship dives headlong towards the enemy base, then flips over and decelerates at full blast. This maneuver kills both its velocity and the target's shields, followed by the target. Twice.)
* E. E. “Doc” Smith (from the 1930s). Twice the arch-enemy gets in so far over his head that he's forced to call on the hero to rescue him, and incidentally wipe out a threat to human civilization.
* E. E. “Doc” Smith got around this problem by making his ships very, VERY fast (ninety parsecs, or about 300 light years, per hour). He lampshades this trope on one occasion when the hero's ship (stolen from the enemy) has a dodgy FTL drive. His engineer urges him to find the nearest base capable of effecting repairs, since "...you don't want to be fifty years away from the nearest repair shop instead of fifty miles." The conveniently close planet turns out to be infamous for the lethality of its environment, which routinely kills entities from both sides.
* E. E. “Doc” Smith, in the Atlantis section, Phryges is held at gun-point by a woman while he is undercover — and he realizes it's his childhood friend Kinnexa. She insists on his turning around so she can check for a scar to be sure it's him.
* E. E. “Doc” Smith is apparently still illegal. In many ways, Smith was a visionary (much of his military technology puts both Death Stars firmly in the shade). In some others, he was very definitely a product of his time and it shows in the writing. Thionite was one of his more lethal contrivances, in that unlike all the others, continued use of this drug would ALWAYS lead eventually to a fatal overdose.
* E. E. “Doc” Smith is the Lensman Corps, top to bottom. They even have a member named Arisia, after the planet where the Lensmen went (their Oa) to undergo training to use their Cosmic Lenses (GL rings).
* E. E. “Doc” Smith. Its size was needed to house the sensors required to travel at its full velocity. Later, their rival Dr. DuQuesne builds an even bigger ship.
* E. E. “Doc” Smith know what is right, to know what it takes to get it done, and to keep going until it's done.
* E. E. “Doc” Smith novels had boarding parties in space combat. With nifty zero-G axes. Yeah!
* E. E. “Doc” Smith novels, when they were fighting the space fleet of Boskone.

* E. E. “Doc” Smith, or maybe he was being flippant in his attempt to make it clear to her that these undying servants of evil are not actually human beings (at least, not any more).
* E. E. “Doc” Smith outgrowth of the series's earlier armor suits.
* E. E. “Doc” Smith, Part One ends with Kinnison watching as Madam Desplaines dies, with "END PART ONE".
* E. E. “Doc” Smith probably did more to popularize ray guns than any other single author back in the Golden Age of Science Fiction.
* E. E. “Doc” Smith rather quickly - a second dose taken immediately after the first dream WILL kill you, and thionite sniffers make sure they lock their stash up before taking a hit (so that the effort will bring them to their senses). Eventually the dose you take in order to keep having the expected effect will do the same. Thionite sniffers do not have long lives. Kim Kinnison turns an enemy base into the embodiment of this trope by dumping a massive dose into the air purifiers.
* E. E. “Doc” Smith series, after the Bergenholm inertialess drive was created. Some ships could go up to 90 parsecs (294.4 light years) per hour. Later books add the hyperspatial tube, which doesn't cut the travel time much (if at all) but does let you traverse the distance unseen (except at the point of emergence).
* E. E. “Doc” Smith series. Earth is always referred to as "Tellus" and humans as "Tellurians" in just the same way that all of the other species are named after their planets of origin.
* E. E. “Doc” Smith series had multiple examples, everything from one-on-one battles to huge space fleets fighting each other.
* E. E. “Doc” Smith series refers to himself as "the historian" in later books, and mentions that he was the first person to read the declassified accounts of the characters' adventures.
* E. E. “Doc” Smith series, the title Lens enhances the Lensmen's telepathic abilities, thus allowing instantaneous communication between them. There are also a variety of "waves" and "rays" that can be used for FTL communication and sensors by people who aren't Lensmen.
* E. E. “Doc” Smith series), the ultimate unrepeatable expletive on Tominga (where the language metaphors all revolve around plants) is "srizonified". Sentient telepaths, just like the Lens, leave this untranslated, but we are told that it is loosely rendered as "descended from countless generations of dwellers in stinking and unflowering mud."
* E. E. “Doc” Smith setting which allowed the heroes to direct the movements of thousands of starships all across the galaxy in a manner that was comprehensible for a single commander to understand what was happening and coordinate. A US Navy Admiral informed Smith after the war that the command and information control centers (ops rooms) the US Navy ultimately placed in their warships to manage and coordinate ship and fleet actions, now used by warships worldwide, was directly inspired by and based on Smith's creation.
* E. E. “Doc” Smith. Somehow, his version was even able to see inside of buildings.
* E. E. “Doc” Smith so that the book could then be used as part of the Lensman series.
* E. E. “Doc” Smith's stories referred to our planet as both Earth and Terra. He also used the alternate name Tellus.
* E. E. “Doc” Smith. The heroes are being dragged by savage other-wordly beasts to a cave in which they will meet their doom when Worsel, a thirty-foot-long sentient flying reptile, drops from the sky and scatters the beasts in a shower of body parts.
* E. E. “Doc” Smith, the last significant attempt to save Roman civilization was a Gladiator Revolt — and failed utterly.
* E. E. “Doc” Smith. To the human protagonists, meanwhile, it's basically a midsummer's day.
* E. E. “Doc” Smith. Twice he gets into serious trouble and calls on the hero, Dick Seaton, to team up to handle the situation.

* E. E. “Doc” Smith two layers of shields, PLUS a further layer more or less integral with the outer skin of the ship ("wall-shield"), which is tougher than the others. There is also a separate meteorite screen, which is basically a globular tractor beam with polarity reversed, but its usefulness against deliberate attack is essentially zero. (Actually Star Trek has all of those as well, primary and secondary shielding, structural integrity fields, navigational deflectors, which also protect against lasers.)
* E. E. “Doc” Smith universes, both with human (or humanoid) extraterrestrials and with definite non-humans (including flying lizards and even more grotesque forms). Whole planets were basically giant nudist colonies in space, with the inhabitants giving no more thought to their unclothed status than to the food they ate. Some races invert the trope.
* E. E. “Doc” Smith was a sphere over 1000km in radius and has a crew of four, it needed to be that big to contain the navigational instruments necessary to cross intergalactic space.
* E. E. “Doc” Smith, when the Osnomian King is much relieved by his son's adequate performance in a critical test. Had the younger man failed, the king would have had him executed for it and then would commit suicide for failure himself "...as only an incompetent would delegate an important task to another incompetent."
* E. E. “Doc” Smith: while the eponymous vessel was a sphere over 1000km in radius and has a crew of four, it needed to be that big to contain the navigational instruments necessary to cross intergalactic space.
* E. E. “Doc” Smith with the inertia-negating "Bergenholm" device. At the time of writing, the negation of inertial mass, though hideously energy-intensive, was believed theoretically possible. Advances in relativity and quantum mechanics have since destroyed the concept's viability.
* E. E. “Doc” Smith years) after the same human protagonists discovered space travel!
* E. E. Cummings although it doesn't say logic is wrong per se, simply that it's less important than love.
* E.E. "Doc" Smith flipped back and forth between hard and very soft sci-fi at times. In
* E E Doc Smith with the Kondalian civilization, which is slightly more advanced than Earth, but will still has a state-sanctioned religion, though it has a mythologized take on evolutionary theory. The idea is supposed to be that Kondal has been a technologically advanced society for so long that its religion has come to incorporate scientific facts, which is still a unique approach even today. However, this is ultimately not very important and the sequels written after SF pulp magazines came into being have no other religious aliens.
* eeeee-vil refused to meet Lincoln Hawk (or was it Hawks?) halfway by hiding all the letters Linc sent to his estranged son.
* "Eegah" has Dr. Forrester remove TV's Frank's blood and replace it with radiator fluid for the Invention Exchange. At the end of the episode, Dr. Forrester has to give Frank a tune-up because the coolant ran out.
* Eegah!, the titular caveman keeps the mummified bodies of his long-dead family in his cave because he can't accept they are dead (or perhaps is semi-oblivious, like Norman Bates in 'Psycho'. Same concept). He talks to them and even introduces them (in caveman grunt-talk, 'Ugh! Schtemlo! OOgh! Eshtablio!' etc.) to the heroine, Roxy (for whom Eegah has the major hots) and her dad, both whom he has captive.
* Eegah!, writer/director Arch Hall Sr. cast his son Arch Hall Jr. as the boyfriend of his character's daughter. There were probably some awkward moments on that set.
* Eek, a Mouse!!: A fairly common reaction towards small rodents, particularly mice.
* Eek, a Mouse!!. But playing this straight anymore is out of the question.
* Eek-A-Mouse's song Rude Boy is about people having a problem with him being so much taller than his girlfriend. With the lyrics
* Eek, An Urchin!", a sea urchin invades the Krusty Crab's kitchen much like a mouse would, and the crew trying to find a way to get it out of the restaurant.

* eek-kah-loo-eet) — including in one case in a press release by the office of the Prime Minister — which unfortunately means "unclean buttocks."
* Eek! The Cat and causes a lot of damages in the house. Eek's owners think it was him doing it and punish him several times.
* Eek! The Cat: Eek is an optimistic, well-meaning feline that tries to help others, only to often run into trouble because he gave a helping hand.
* Eek! The Cat episode, Eek has a very long scream after his dream ended with his head exploding.
* Eek! The Cat episode "Eve" where one of the little murderous clones watched the animation.
* Eek! The Cat from Eek), accidentally putting him into a pot of boiling water (instead of a chicken) and scrubbing butter on him.
* Eek! The Cat got dragged away by a carnivorous plant. Then one said, "But we don't have to hurry," and they smiled and moseyed.
* Eek! The Cat: In the episode "Honey I Shrunk The Cat", Elvis is alive, if overweight... but this is offset by him being of microscopic size and battling germs mano-a-mano.
* Eek! The Cat is a spy film parody and features a villain named The Brain, made of a brain, eyes, teeth and an ear in different jars.
* Eek! The Cat is behind it uttering "Won't you be my neighbor?", which also scares him.
* Eek! The Cat is often shown repeating absurd phrases from language learning tapes.
* Eek! The Cat lead the Thunder Lizards away from the command center... into a bathroom.
* Eek! The Cat slips on a banana peel and gets severely injured after he complains about the mob of angry reindeer.
* Eek! The Cat, the dinosaurs became extinct because of giant robot clown the dinosaurs unleashed. In another episode, they become extinct because a sitcom was keeping them too distracted to do anything about the Ice Age.
* Eek! The Cat, the Thunderlizards react with repulsion at the sight of Babs, a beautiful cavewoman genetically created to lure Bill and Scooter. Lampshaded when General Galapagos explains that Babs looks hideous to dinosaurs, but attractive to human males.
* Eek! The Cat. They go over a waterfall (much to Eek's cowardice) and the pig somehow disappears. Then Eek gets trapped inside a sewer and fortunately swims out of it.
* Eek! The Cat welcoming her to her new home when she's let out of her cat carrier). In fact, a running gag is others telling him that his girlfriend is fat, but he doesn't see it; to him, she's a beautiful goddess.
* Eek! The Cat) were former military special forces, who were allowed their freedom on the condition that they hunted down the humans, Bill and Scooter. Their origins though play with this trope in that they were imprisoned after being falsely accused of treason. (Their backstory had the Thunder Lizards working with an enemy Thugasaur to survive behind enemy lines. They were accused of treason, which they didn't do, and were incarcerated until the start of the series.)
* Eels about his sister who committed suicide in a mental institution.
* Eels about someone whose life has been unlucky from the start, but tries to marvel at the thought of having one lucky day in his awful life. As the title indicates this doesn't provide much fun to look forward to.
* Eels, and in context the phrase "angry little whore" was clearly being taken entirely too literally.
* Eels. "Flyswatter" also has a similar feel to it - both have verse sections that juxtapose a creepy minor key toy piano riff with surprisingly aggressive drumming.
* Eels. It starts with the singer apologizing for having no money, and then the rest of it is just him and his dog singing along to the song.
* Eenadu (As of Today) - A Telugu-language service operating in Andhra Pradesh and Telangana.
* Eena Meena Deeka episode "Baseball" starts off with the birds playing baseball

outside. When they hit the baseball in the air, it comes down and hits Bhukkad, and the main conflict begins.
* Eenie, Meenie, Miny Moai — Moai statues automatically make a setting cooler and more exotic.
* Eenie, Meenie, Mommy, Daddy, together. When he was developing the series' first Season 1 scripts, Sherwood recalled the incident and gave the problem to Cindy.
* Eerie #1 was a hastily assembled digest of horror comic stories with a print run of a few hundred copies, created by publisher James Warren to deny the title to rival publishers Myron Fass and Robert W. Farrell, whose company was named Eerie Publications.
* Eerie Anatomy Model: The inherent creepiness of anatomy models is used in a work.
* Eerie Arctic Research Station: An isolated research station in one of the Poles where horrifying things happen.
* Eerie Arctic Research Station: A remote lab in an icy cold location as a tension-filled setting.
* Eerie Cuties: At one point, Nina switches bodies with her older sister Layla, but doesn't want Layla to wake up and realize what has happened, so right before she makes the switch, she consumes a heavy dose of the most powerful sedative she can imagine:
* Eerie Cutiesboyfriend tries coaxing her into a make-out session in the janitor's closet.
* Eerie Cuties, but loses the glasses in the process (because her supernatural beauty would melt them).
* Eerie Cuties for her friend Ace. It doesn't do any good though, because while Nina is trying to figure out what just happened to her, Blair doubles back and hits Ace anyway.
* Eerie Cuties from her own... fond memories. Brooke covers Nina's ears.
* Eerie Cuties; implying a deeper connection between the three of them.
* Eerie Cuties: In a throwaway gag, a victim of the gender-shifting orb is in gathering signatures on a petition to save the "spotted chupacabra".
* Eerie Cuties is easily distracted by butterflies and her unfortunate werewolf classmate Ace, calling out "Puppy!" whenever she spots him and chasing after him.
* Eerie Cuties It's hardly any surprise that she was eventually killed.
* Eerie Cuties, Jacqui jumps on the Melissa's hands, hugs her and closes eyes.
* Eerie Cuties, just as he does - hinting at a deeper connection between them.
* Eerie Cuties — even hints on which make Chloe's face a little off.
* Eerie Cuties: Melissa regularly makes appearances in both comics, so which side of "the door" she's on depends entirely on which comic she's in at the time:
* Eerie Cuties, Melissa's "Daddy", Dakota, does this to Ace, offering to show off "his" sword collection. (Slightly subverted in that Dakota actually has a far better reason to be "showing Ace the sword collection" and is using this trope as an excuse.)
* Eerie Cuties of her new good friend as a bonus in bonus. Yes, "she leads a charmed life".
* Eerie Cuties, one vampire was born on Easter and as a consequence doesn't drink blood (but eat chocolate).
* Eerie Cuties orb, which he uses to transform people into Valley Girls, his "ideal woman".
* Eerie Cuties (presumably, not the first time) during an attempt to stake Layla. By her own count, it was 13-th time only in that park, so it's not like Tiffany would not find one more excuse to cancel the attack anyway, obviously. But she was running, and the distraction caused her to stumble and fall.
* Eerie Cuties ravening, murderous beasts. Granted, when someone like a succubus loses control, things get very dangerous very quickly.
* Eerie Cuties right as Cess is about to say Layla's name. Cess and Laura hastily pretend to be singing.
* Eerie Cuties she's busted her nose and been knocked senseless by a miss aimed spell.
* Eerie Cuties that sometimes has difficulty controlling his cat-like impulses.

* Eerie Cuties - the cast in the former are all listed by species, and the witches are "witch," as opposed to Tiffany, who practices the supernatural arts but is still listed as "human."
* Eerie Cuties, this is Nina's first action after borrowing Layla's body.
* Eerie Cuties, was born on Easter and consequently feeds on chocolate the way the rest of her family feeds on blood.
* Eerie, Indiana: A boy who could hear the thoughts of the neighborhood dogs through his headgear.
* Eerie, Indiana, after being told that Indiana doesn't observe Daylight Savings Time, Marshall sets his watch back an hour anyway, wanting to get the extra time. He wakes up in an extra hour inhabited by lost children and milkmen.
* Eerie, Indiana (and the book series based upon it) had the Bureau of Lost whose job was to make sure that certain items are "lost" so that people would buy new items and support the economy.
* Eerie, Indiana. As Marshall and Simon had hooked a video camera up to the television, Harley switches place with the film's star Sir Boris von Orloff. Harley becomes trapped in the film while Sir Boris enters the real world.
* Eerie, Indiana, a werewolf is shot with a silver bullet — in the foot. It instantly cures him of his lycanthropy, but he must then be rushed to the hospital to treat his gunshot wound.
* Eerie, Indiana: Dash X has a tendency to collaborate for the right price, though he never works out as he would like:
* Eerie, Indiana each play an exaggerated (if not outright deranged) version of their real life selves.
* Eerie, Indiana. Grungy Bill determines this to be a successful bank robbery and can finally rest in peace.
* Eerie, Indiana had a woman who was keeping herself and her children young forever by sealing them in bed-sized tupperware containers every night. When she was stopped, the three of them aged 30 years overnight.
* Eerie, Indiana: In both "Mr. Chaney" and "Zombies in P.J.s", Dash X can be seen at the World O' Stuff shoplifting a trench coat's worth.
* Eerie, Indiana: In "The Lost Hour", the Tellers see Janet Donner's face on a milk carton and realize that she has been missing for exactly a year, since the last time that the clocks went back an hour. Marshall later enters a parallel dimension as a result of setting his watch back an hour even though Eerie does not observe daylight savings time. While there, he discovers that he can communicate with Simon in the regular Eerie through the face on the milk carton.
* Eerie, Indiana: In "The Loyal Order of Corn", Ned tells Marshall, Simon and Dash X that he is an alien explorer who arrived in Siberia in 1908 through a tachyon portal.
* Eerie, Indiana: In "The Loyal Order of Corn", the alien Ned encouraged the development of radio and television.
* Eerie, Indiana: In "The Retainer", Marshall and Simon discover that Eerie's town borders create the exact same geometric shape as the Bermuda Triangle.
* Eerie, Indiana: In "Tornado Days", footage of numerous tornadoes is used to represent Old Bob devastating Eerie.
* Eerie, Indiana: In "Tornado Days", the tornado chasing NOAA meteorologist Howard Raymer has determined that the tornado Old Bob is alive, sentient, malevolent and has a very big ego. It sees Marshall and Simon refusing to attend the Tornado Day festivities as a sign of disrespect and brings the full force of its wrath down on Eerie in an attempt to kill them.
* Eerie, Indiana", in which Stanley gets splashed with special soap from the Eerie laundry mat and starts shrinking.
* Eerie, Indiana: Marshall Teller, a recent transplant from New Jersey whose family has just moved to the desolate town of Eerie, and Simon Holmes, an Eerie native, investigate the weirdness that inhabits the titular town.
* Eerie, Indiana most astoundingly effective tupperware in the history of mankind. She has been using Foreverware to keep both herself and her twin sons Bert and Ernie young since 1964.

* Eerie, Indiana Mr. Radford is the nominal leader of the Order but its true leader is its long serving bartender Ned, who turns out to be an alien explorer stranded on Earth. He founded the Lodge in order to unknowingly enlist the humans' help in building a tachyon portal so that he could return to his own planet.
* Eerie, Indiana: The Land of Lost Objects is located at the center of the Earth and is run by the US government that steals objects to promote consumerism.
* Eerie, Indiana. The portal broke down immediately afterwards. He founded the Loyal Order of Corn and encouraged the development of radio and television so that human technology would be advanced enough to build another tachyon portal so that he could return home. While investigating the portal, Marshall and Dash X accidentally send Simon to an ice planet.
* Eerie, Indiana there was a entire episode about Marshall's life suddenly becoming a television show, and finding out that he isn't even Marshall Teller at all, but somebody they keep calling 'Omri Katz' (which is, of course, the real name of the actor playing Marshall). Dash X is still a villain in the tv-show world rather than his actor, but acknowledges that the only reason he is one is because he's a fictional character.
* Eerie, Indiana: The titular town is said to attract all kinds of weirdness. A few examples are a family who sleep inside tupperware boxes to stop themselves from aging, a haunted house and Elvis living in the main character's neighborhood.
* Eerie, Indiana. This is not a plot in the series itself, it's mentioned by the main character in the opening and the pilot episode to showcase how weird the town is.
* Eerie, Indiana to pretend to be an IRS agent and get back all the townfolks' souls which had been swindled away by a demonic businessman.
* Eerie, Indiana version of Justin Shenkarow is a rude, bratty child actor who touches his co-star Julie Condra inappropriately, tries to get his history teacher fired when she gives him a D, and verbally abuses his mother when she doesn't sell stocks as he told her to do.
* Eerie, Indiana writer José Schaefer that they intend to kill him off. When he asks what they mean when they say dead, he receives the following explanation:
* Eerie Pale-Skinned Brunette: A love interest with ghastly skin and brown or black hair.
* Eerie Queerie. In the omake afterwards the two characters decide that they can finally call each other by their given names, only for Hasanuma's name to be *bleeped* out. And thus he remains with only one name.
* eerily cerebral". This one was more about the psychological horror rather than the blood and guts.
* Eerily Out-of-Place ObjectAn otherwise ordinary object made unsettling by being found somewhere impossible.
* eerily predicted a suicide bombing taking place somewhere. He claimed it was a joke.
* Eero is also the smartest of the lot, though his quick tongue often puts him at odds with his brothers.
* Eevee and its Eeveelutions take aspects from foxes, dogs, cats, possibly rabbits, and in the case of Flareon, a lion, Jolteon, a coyote and a cheetah, and Vaporeon, a mermaid. The fandom generally, but not universally, believes that they are supposed to be seen more as foxes or dogs more so than the other animals they borrow traits from. Atsuko Nishida, designer of Eevee and everything that evolves from it, stated that she wanted Eevee to look like a mammal but
* EEVIL GEN-EE-OUS alien with a faux Russian accent. He's not as evil as he claims, though.
* ef - a fairy tale of the two. for her parents' actual daughter, who drowned as a little girl. Mizuki herself underwent several traumatic experiences previously. Despite all this, she adores her parents, they adore her, and Mizuki says late into the story that she wasn't born to her real parents—she only came to be with them later.
* ef - a fairy tale of the two. has this in one if its first scenes. Miyako chases a thief who's on a motorcycle. Upon finding the arc's hero, she promptly takes his

bike and attempts to give chase to the thief.
* ef - a fairy tale of the two. parodies this phenomenon by having childishly drawn pink blossoms begin to cascade all over the game screen when Mizuki starts to go on a lovestruck ramble about Kei (and later, Chihiro).
* ef - a fairy tale of the two. starts with the ending, and jumps to two different points in the middle, before starting at the beginning.
* ef - a fairy tale of the two. tried to isolate herself due to her amnesia, until she met Renji. Though she is actually one year older than him, her mental age will always be 13 years old, which is the time when the amnesia-inducing accident hit her.
* ef - a fairy tale of the two. was released by Mangagamer in December 2014.
* ef - a fairy tale of the two. will not help along this road and Chihiro will never recover.
* ef: A Tale of Melodies, Kuze's heart machine beeps and then the Heartwrenchingly sad ending theme plays. At the end, his machine beeps again and he comes back to life.
* ef: a tale of memories and its sequel are rated TV-MA on DVD, but TV-14 on Anime Network.
* ef: A Tale of Memories: Chihiro's memory only lasts for around 12 hours, so every night before she goes to bed she writes in a diary what she did that day, and every day when she wakes up she reads all the diary entries she's written to remind herself of her life.
* ef: A Tale of Memories may not technically be the first girl Hiro meets, but she is the first girl introduced to him in the anime.
* E. F. Benson's "The Room in the Tower" features a dog who is very suspicious of Julia Stone's grave.
* "Effect and Cause": An aging hippie with a broken leg and her boyfriend witness the world's chaotic nature coming to a head, with things spontaneously happening, appearing and disappearing at random. They're both amazed, but she is really excited to be seeing the nature of the very universe. So...what does the universe do? Spontaneously change around the furniture as she walks around, causing her to fall and land on her broken leg, spontaneously cause some events that make the cops come to her house, spontaneously turn on the gas on the stove, and cause the broken doorbell to cause a spark and blow up the house while she can't do anything but watch it all unfold. Pretty vindictive for random chaos.
* effective at scaring off bears, and scaring off a cougar involves opening one's jacket and/or standing on someone else's shoulders to look big enough to scare it out of attacking. Examples could fill this entire page.
* Effective Knockoff (when an obvious knockoff still works as good as the original, if somewhat inferior)
* effectively an example of this: although having HIV doesn't directly incapacitate a person's ability to reproduce, hetrosexual survivors who refrain from unprotected sex to ensure their partners won't become infected are, in effect, removing themselves from the human gene pool.
* Effectively, a sufficiently-sized nuclear arsenal can be seen as the concept of Grand Strategy imposed, overwhelmingly and instantly: no matter its battlefield or strategic losses, a nuclear power retains the option of nullifying these results, declaring all players losers, and ending the game (and incidentally, all human life). There is a very good reason why no nuclear power has ever gone to war against another one.
* effectively ruin the gun's accuracy), leaving him open to summary beatdown shortly afterwards.
* Effectively subverted on the recent episode "Emancipation." The patient, an emancipated minor and orphan, vehemently rejects any pity from the other characters. She maintains this stance
* Effectively what Kazuichi's crush on Sonia amounts to. He's convinced she's a
* Effects of the quantum vacuum on magnetoelectric materials exhibit this, but again, it is unclear whether technological applications will ever be possible.
* effect that puts them into the Jurassic period. They return to the effect and

instead end up 30 years before their own time. The episode ends with them low on fuel and heading for the effect once more.
* effect (There is also an adjective "affective," meaning "related to affect or emotion," as in "seasonal affective disorder.")
* Effeminate Heterosexual, in which Carvey plays a garden variety, married suburban dad everyone that assumes is gay because he behaves in a stereotypical Camp Gay manner. When asked if he's gay, his reply is a heavily-lisping "That's insaaaaaane!"
* Effeminate Misogynistic Guy: A man who has a low opinion of women yet ironically is very effeminate.
* Effeminate Misogynistic Guy: A misogynistic man who ironically acts very feminine.
* Effeminate or Non-Masculine Appearance associated with introversion and lack of interest in physical activities.
* Effeminate Tomboy tends to be fairly masculine, but not overly masculine, nor overly feminine either, although she does not necessarily hate traditionally "girly" things. Although most of her qualities and interests are masculine, she may also have a few "feminine" qualities and interests as well.
* Effeminate Voice: A feminine male character with a soft and high-pitched voice.
* Effi Briest. Effie Briest, a 17-year-old girl, is married off to a 40-year-old guy who was once romantically interested in her mother, Baron von Instetten. She feels neglected by her constantly busy husband and frowned upon by the local gentry; and worse, the unsettling house where they live is allegedly haunted by the ghost of a Chinese Man, and not even the birth of a daughter improves her spirit. Her husband is never downright abusive and feels in his own way fond of her. She starts having an affair with Major Crampas, but she can't stand that she has to lie. She's relieved when her husband is transferred to Berlin, giving her a chance to break off the affair. Six years later she seems to be finally happy with her family but her affair with Crampas is discovered by Instetten who, despite still loving her and not being angry with Crampas, feels obliged to respect the codes of society: he divorces her and prevents her from seeing their daughter and kills Crampas in a duel. Effi lives her final years alone and gravely ill until her death.
* Effie's defining trait is her strength; her personal skill lets her deal more damage if her strength stat is higher than her enemy's.
* Effigy Nights famous for its art and literature. The wardens of the planet free legendary heroes from their books to fight the invaders, but the magic gets out of control and destroys their culture as the contents of books are turned into soldiers. Having run out of books, the magic then starts on people...
* effing!" He'd decided these words should be bleeped for release, to get people wondering exactly what profanities had been censored.
* Effortless Amazonian Lift: A man carrying someone is considered omnipresent, since men are expected to excel in the physical department.
* Effortless Amazonian Lift: An attempt to show a woman's unexpected physical strength or her dominance in a relationship.
* Effortless Amazonian Lift: A woman can lift a person off the ground without breaking a sweat.
* Effortlessly. After that, the mercenary was fleeing in terror. Ordinary opponents generally don't realize what the "friendly neighborhood" Spider-Man is capable of.
* Effort Post: On the forums, this type of post is used to propose a candidate for a trope or an action to be taken on an article. The poster is expected to do the work ("effort") to make a detailed and unambiguous case for the proposal.
* Efforts to identify and capture Hanssen were complicated by the fact that he and Aldrich Ames (below), a Russian mole in the CIA, were operating at the same time and in some cases leaked the same information.
* Efforts to preserve critically-endangered species persist, and even become
* Effulgence, anyone with the ability to torch will simply reset to a healthy state when they would otherwise die (accompanied by being momentarily engulfed in illusionary fire, hence the term "torching") Also, their physical age sticks around

twentysomething.
* Effulgence her boyfriend and producing wishcoins. Eventually the use of same becomes standard throughout the peal of Bells. Also, Brilliance had one installed for use on him, for less friendly purposes, although it eventually gets used for friendly purposes.
* Effulgence, the world of Chronicle has a cave inhabited entirely by ridiculously cute, and friendly critters. Most notably the poofs, which are cuddly colorful balls of fluff that go "whmmm" and exude a healing aura.
* Effulgence, worlds are time synced as long as information transfer is going on between them, but when there isn't they can get massively desynced, sometimes with hours passing in one world and years or even decades passing on another. Entering Milliways through a normal door pauses time in a person's origin world until they return, unless they go to another world and are never planning to return to the original.
* E for Effort to find out exactly what people are saying. Initially they use it to make films about the past.
* Efreets were not particularly distinct from djinn in older sets, and consequently don't appear there much. Modern efreets are closely tied to Red mana and to the element of fire, and have a clearer
* Efron, too, has had troubles with this. He became known as a party animal after the
* Efrosians tend to use a "Ra-" prefix on the surname (Ra-Yalix, Ra-Havreii, Ra-Ghoratreii), but not always.
* Efrosians tend to use a "Ra-" prefix on the surname (Ra-Yalix, Xin Ra-Havreii, Ra-Ghoratreii, Satlin Ra-Graveness), but not always. Ni- and Hu' prefixes have been see as well (e.g. Ni-Jalikreii, Fellen Ni-Yaleii, Hu'Ghrovlatrei).
* Efteling: The Italy section of the Carnaval Festival ride features a model of the tower of Pisa wobbling back and forth a bit as someone pushes against it to keep it from falling over.
* Eftepedia, the theme park in the Netherlands; it's one of the most-visited of Europe, and is older than the orignal Disneyland.
* ef. The Chief's very first interaction with Undercover Brother is a relentless browbeating typical of this trope despite the fact that they'd never even met.
* e.g. “the AFLAC Trivia Question” or “the Jeep Drive of the Game”). Commentators are also frequently made to plug other programs on the same network (perhaps as a way of making use of time already dedicated to station identification). Similarly in the Philippines, boxing matches are filled to the brim with enforced plugs for various products, some of them niche goods such as construction supplies and household chemicals thinly disguised as statistics for the boxers' performances or a highlight from the match.
* (e.g., a fear of prime-numbered Tuesdays... in March... during Leap Years)
* Egalia's Daughters: A Satire of the Sexes takes place in a gender-flipped version of the 1960s, where the "wim" have always been in power and "menwim" are currently at a stage where they're patronised, and treated as household stationary and sex objects.
* Egalitarians don't like the idea of using eugenics or "capacity boosters" to improve the empire's leadership, but they don't have a problem with genetic modification of the whole population.
* e.g. an old lady happened to be under the window and incompetent guildmates don't mix well.
* Egarus is a fungus from Abyss which was accidentally introduced on a Prime world, and after discovering that it grows everywhere and that they can't kill it the natives kick it out to the Quasiplane of Vacuum... and it survives
* e.g.. "Creme soda" has a slightly different origin, as it's named after the ice cream traditionally added to the original drink.
* e.g. Führerschein = driver's license), "Führer" still is commonly used.
* Egg also felt the effects of this trope in her youth once her village found out she was
* Egg as well. She was an insignificant yes-woman when she first arrived, a

cowardly background worker of AJCO. She gained a little more time in the spotlight after the creation of the Castle Crew, but rocketed into main character position following
* Egg Belly has Book Sharks. They're kind of like bookworms, only they're sharks.
* Egg Dragon. The Egg Ring grants whomever equips it with maximum stats and will pretty much guarantee that person will NEVER die and always do max damage.
* Eggerland for Windows 95, updated to run on Windows 98 and Windows ME.
* Egghead cartoon "Johnny Smith and Poker Huntas" is interrupted when the Indians stop their cars and the chief says "Hey, guys...isn't this fun?" The others chime in "Yeah! Let's do it some more!" And the chase resumes.
* Egghead Jr., a character that Foghorn Leghorn would occasionally be saddled with. A mute chicken lad with a spherical head, beady eyes, and huge glasses, he would quickly jot down some very technical-looking mumbo-jumbo and succeed at whatever he was attempting at the time... like throwing a 90 MPH fastball or winning a game of croquet with
* Eggies were designed to eliminate the difficult and time-consuming task of peeling hard-boiled eggs. It's true that pouring raw eggs into individual plastic molds and boiling those does eliminate peeling, but oiling and assembling each Eggie by hand (each is made up of four fiddly little pieces), getting the raw eggs through the small holes on the top of the Eggies, and cleaning them afterwards takes twice the time that peeling the eggs would have. Reviewers also found that the Eggies aren't really nonstick (you have to wipe each individual piece with an oil-soaked paper towel before assembling them), plus they leak egg white into the water, meaning the user has to scrub out the pot. Dang, if only eggs
* Egging: A prank involving eggs being thrown at somebody's house or car, or the person themself.
* Egg is also a shade of brown, lighter than Vinnie but much darker than the white characters such as Kaja or Lorelei.
* Eggman also does this regularly in the same show outside of that arc. Apparently his grandfather's talents rubbed off...
* Eggman and Wily also plan to take out each other first and then the others.
* Eggman does this quite a few times, pleading that he'll reform provided Sonic doesn't beat him to a bloody pulp, just before activating a new machine.
* Eggman Generations, as usual, Eggman's goal is to establish the Eggman Empire. His alternate selves want empires for themselves.
* Eggman Generations, with three versions of Eggman gathering a group of their alternates, so that they can come up with a clan to beat Sonic.
* Eggman has always showed spades of this, but in more recent games (especially in
* Eggman has another reason for encouraging his Grandmasters to plot against him, he actually finds it fun to have enemies to defeat, seeing it as just a game to him. But he wants them to be aware of the consequences if they lose.
* Eggman launched another attack on the city, but was repelled by the efforts of Team Freedom (with some anonymous aid from the Secret Freedom Fighters) and the fact that the Death Egg was running low on power.
* Eggman saves Sonic's life, then he betrays Sonic, then he teams up with and betrays Sonic
* Eggman's orbital station known as the Death Egg. The original was central to
* Eggman then shouts "What?! I cannot believe this is happening!" after you beat Hedgehog Hammer with Amy.
* Eggman with him. Most of his friends have shown signs of this at least once too. Justified somewhat as they're animals themselves.
* Egg of the Phoenix go back in time several hundred million years to the time of the dinosaurs. Magic was much more potent then, so spells have double normal effect.
* Egg of the Phoenix. The ki-rin Da-weng allowed himself to be changed to stone so that at a future time he could be returned to normal and fight against Evil. If released, he gives the party an amulet that will allow them to summon him to aid them.
* Eggo Waffle commercials have dumped their live-action gimmicks in favor of

crudely-drawn cartoon shorts featuring a bumbling dad trying to steal his daughter's waffles.
* Eggo Waffles and Google got free commercials during the war of words between Ring Warriors challenger Amber Rodriguez and champion
* Eggs How strange is this GOD? Well, it has three mouths all of which speak in an incoherent dialect which switches from English to Japanese to incomprehensible gibberish in seconds.
* Eggs in a clutch typically hatch in the same order they were laid, such that the smallest chick in the brood will be from the last egg laid. Being smaller, that youngest chick is often pushed to the edge of the nest by its older siblings, is fed last by the parents, and is most likely to starve if food isn't extra-abundant that season.
* Egg Sitting: Children or teenagers are tasked with looking after eggs, bags of flour, or robots to determine whether they'd make responsible parents.
* Egg Sitting: Students are tasked with looking after eggs, bags of flour, or robots to determine whether they'd make responsible parents.
* "Eggs, Tea, Bread, Rich Tea biscuits.. Are you sure this is the right list Mr. Schindler?"
* Eggsy is underestimated by his stepdad and accompanying thugs, none of whom realise that Eggsy is fresh from Kingsman training and
* Eggsy's reaction when he — having just fought his way out of Valentine's compound — is told by Merlin that he now has to fight his way back
* Eggsy's stepdad's thugs to Eggsy, when they find him (and Galahad) having a drink in the same pub in which Eggsy stole a car belonging to one of them.
* Eggsy. To the extent that finally donning the suit was how he prepared to infiltrate the supervillain's lair, illustrating the end of his training and the beginning of his life as a Kingsman. The suit itself helps him be more badass, being bullet-proof.
* "Egg War". During the California Gold Rush food prices in the San Francisco area led some enterprising suppliers to the nearby Farallon Islands, home to major nesting colonies of murre, which laid eggs the size of softballs. Shortly after, the Pacific Egg Company was formed to establish a monopoly on eggs from the islands, who got into gunfights more than once with rival "eggers" ranging from Italian fishermen to government lighthouse-keepers.
* Egil, from Icelandic "Egil's Saga". Modern interpretation of it see his description as a clear sign of Paget's disease. It leads to many, many disadvantages but to one thing that is extremely useful for a Viking: a head that can even take the blow of an axe.
* Egil's Saga: At age three, Egil is "as big and strong as other boys of six and seven" and already "clever with words". When his father Skallagrim does not want to take him to a feast at Egil's maternal grandfather Yngvar's, Egil rides to the feast all alone. At the same feast he recites his first poems.
* Egil's Saga: For two years in succession, the tax-collectors of King Hakon have been ambushed and killed on the forest-road returning from the outlying province of Varmland. The third year, Hakon forces Egil's friend Thorstein to choose between collecting the taxes from Varmland or being outlawed. Egil offers to go in Thorstein's place, and since the king's messengers know Hakon is ill-disposed towards Egil too, they accept, calculating that any possible outcome will please Hakon. The journey is undertaken in winter, the king's men desert Egil and his companions, and the Varmlanders ambush them with superior numbers twice; yet Egil succeeds in the mission.
* Egil's Saga: In his poem "Arinbjarnarkviða" ("Praise of Arinbjorn"), Egil recalls his last meeting with his deadly enemy Eirik Bloodaxe, when Egil, as a castaway, delivered himself to Eirik's mercy in Eirik's royal hall:
* Egil's Saga: Living out his life in the house of Grim, the aged Egil rides out at evening, accompanied by two slaves and carrying his two chests of silver with him. He does not return for a whole night, and in the morning returns without the silver and without the slaves, revealing that he has hidden the treasure and that he has killed the slaves to keep the secret.

* Egil's Saga: There are many hints that Kveld-Ulf's family line is part giant. All of them are exceptionally big and strong, and Skallagrim and Egil are moreover monstrously ugly, having abnormally thick and bulging skulls. All of them show occasional berserking behavior — as is typical for trolls — and Kveld-Ulf is rumored to be a shapeshifter. When Skallagrim goes to King Harald, the doorguard who announces the arrivals is not sure "if they can be called men" because "they are more like giants in size and looks", and when Egil seeks out Arinbjorn at York, the messenger describes him to Arinbjorn as "big as a troll". Kveld-Ulf's genealogy also suggestively mentions that he had a maternal uncle called Hallbjorn Halftroll.
* Egil's Saga: When Egil's father Skallagrim is in a fit of 'shape-strength', he is even stronger than usual but also an incontrollable madman who kills indiscriminately. When Egil is twelve and playing at a ball-game against his father and it looks like Skallagrim is going to lose, he suddenly becomes 'shape-strong' and kills Egil's best friend Thord, his nanny Thorgerd, and very nearly Egil himself.
* Egil's Saga: When King Herlaug of Namdal hears that Harald Finehair is preparing to conquer Namdal, he, together with eleven of his men, enters a newly-built gravemound, and "[t]he mound was closed after them." The End.
* egirl persona, explained that "she" sounds like that due to a past incident where "she" was punched in the throat while playing soccer.
* Egle, belle et poete, a deux petits travers: elle fait son visage et ne fait pas ses vers, but in the 18th century both were seen as equally dishonest.
* EGMi, EGM's digital magazine, the writer of the article said, "I'd like to be the first to welcome our new computer overlords as that's how a lot of apocalyptic science-fiction novels start."
* EGM previewer widely considered one of the worst games of all time), embarrassing him for many years.
* EGM where kids of the new millennium were asked to play games from before their time and interviewed on their opinions. The results were precious.
* e.g. in 1946. CBS and NBC's "no recordings" rules were abolished by 1949.
* ego cause him, Nale is at least smart enough to realize when a scheme has gone south and make his retreat — or tries to, anyway.
* Egocentrically Religious: A person is religious in a self-serving way.
* Egocentrically Religious: A religious character who expects special treatment from their deity.
* Egocentrically Religious: Someone whose religious beliefs are very fanatical and self-serving.
* Egomaniac Hunter Colonel Rimfire tries to pull the pin out of a grenade with his teeth, but ends up pulling out his dentures and hurling the unarmed grenade at Cool Cat.
* Egomaniac Hunter: Hunts the rarest, most exotic, most dangerous game, just to prove that they can.
* Egomaniac Hunter. Mule was the typical, cute robot, resembling a miniature train, and was able to analyze whatever quarry Joe wanted to go after, and was loyal, despite Joe treating him like dirt. however, when Lion-O defeated the villain, the heroes let him go on the condition he promise never to hunt again, and Panthro reprogrammed Mule so he'd make sure Joe kept his promise - and Mule seemed quite happy with his new programming.
* Egon Spengler is a master of this, almost to the point where he sounds bored even when he's supposedly being emotional in the
* Egopolis: Such as several Alexandrias founded by Alexander the Great.
* Egoraptor, catches a good bit of flak from fans anytime he mentions he doesn't think very highly of certain well-liked video games:
* Egoraptor combined them it wasn't a surprise that they had over a dozen memes literally just two weeks into the show.
* Egoraptor playthrough that it's weirder to write porn of them than fictional characters as they're "real people with their own lives," and Danny admitted that he's uncomfortable with it (especially since he has young relatives who can Google him), even though he also doesn't want to "ruin anyone's fun." They have a good

sense of humor about shipping, though.
* Egoraptor (which depicted Jon and Arin as bowling-pin people with never-changing faces). Since then, plenty of fan-made ones have been created, some of which even appeared on the official Game Grumps channel!
* Ego the Living Planet is the size of Earth's moon with Earthlike air and gravity.
* egotistical of everything about Matt, at least prior to him getting his life back together.
* Ego Trip: Dexter uses a time machine to go into the future, only to discover that his house is very different in the future, and runs into random rooms trying to find the front door. Unable to find it and frustrated, he uses a secret escape hatch underneath a lamp, which apparently was never changed.
* Ego Trip special plays with this trope and references the above episode. Dexter meets three older versions of himself. The oldest version is quite forgetful, but while he remembers the other two's names, he keeps calling his young adult counterpart "Billy."
* È già ieri, though as there is no Italian Groundhog Day, the loop is set during an ordinary day (August 13, in this case). The main character is still a jerkass, the location is still (to him) a backwater, and pretty much the same issues are covered, almost scene for scene.
* egregious ad in which the satellite company's picture for a hockey game is shown as blurry and distorted. In reality, the two services are quite similar for HD content.
* egregious, an attack helicopter is set onto a flatbed truck with its rotors locked for transport. The truck crashes and the chopper falls off a dam. The three characters are able to dive off the dam, catch the helicopter, unlock the rotors, spin up the engine, and fly away before it hits the ground.
* egregious and the use of the N-word to be "edgy" also seem to have only increased since the 1960s.
* egregious. As Mark runs out into the street to find his wife shot, he drops his own gun only to paw the dropped murder weapon for a second.
* egregious) but actually kicking them without holding back, sometimes even after being shouted by your coach/team captain/team partners to "break his leg". In real life, that would not only get you a red card, but it'd get you kicked from your soccer league, and probably get your team punished as well.
* egregious case, as the originally black and silver-colored creature became striking red, purple, yellow and bright blue for his movie appearance.
* egregious example is Apu and Manjula's octuplets, who they decide to have after seeing Maggie, and were conceived, born, and are now toddlers that have shown to be able to stand and talk, while Maggie is still the same crawling, teething, silent infant.
* egregious example is Nero, a very minor character who had just enough screentime to get his butt kicked by Franky. He was thrown off a speeding train. Into the ocean. In the middle of one of the biggest, most powerful storms in the world. And he was unconscious at the time. And also horribly wounded. Fans assume he survived. They're probably right.
* egregious example was when the rabbit legitimately purchased some Trix with his own money, only for the kids to take it away when he left the store, essentially mugging him. Nobody points out the sadistic glee the kids seem to take in excluding and denying the rabbit over and over.
* egregious handled it better: it explained battles are generally fought in two dimensions because that's as much as most starship captains can psychologically cope with. Apparently it would be too psychologically disturbing to have a Star Destroyer hanging upside-down above your vessel blasting the hell out of it. The RPG goes on to muse that a species psychologically comfortable with, and able to grasp, the intricacies of three-dimensional starship combat, would certainly stomp pretty much every other starfaring species in the galaxy. Which is how the Mon Calamari can survive against the Empire.
* egregious in its final seasons: the opening seconds of the episode showed previews of what was going to happen later in the episode. These previews were

included before and after every commercial break by the end of the run, with the opening section pretty much showing the whole reaction of each guest and what they were reacting to, which made actually watching the show a moot point.
* egregious into Billy, they just ran the footage backwards. That wouldn't have been so bad, except in both directions the sequence starts with a lightning bolt called by the magic word "Shazam", and they didn't bother to edit out the bolt "un-hitting" Billy at the end of the reversed footage.
* egregious is the Tender Turkey Tuscany In A Savory Sauce With Long Grain Rice And Garden Greens. Many cats eat better than their owners do.
* egregious language has been heard and seen written down all across the span of the previous series. Especially noticeable with the characters of Teyla and Ronon Dex, as while both are "human", they both come from other planets in other galaxies and yet apparently can speak and understand English without any problem.
* egregious, leaving not so much as a guard to notice when Bond inevitably escapes.
* egregiously, where the same clips of animation would be used over and over with the only difference being the characters' clothes... and sometimes, not even that!
* egregious Needless to say, Eddie obliges immediately and delivers a resounding smack to Crash's head.
* egregious offender is a particular trend in men's designer t-shirts, to cram as much random stuff on a square yard of fabric as possible. On one particularly offending sample: a skull with a rose between its teeth, five ravens, a statue of Justice, the innards of a cassette tape, a Shinto shrine, some more roses, a wreath of thorns, and what looks like a map of the coast of Norway. This is all on the same shirt.
* egregious since the ship was far, far away from support facilities and starbases. Outside of a few special episodes, the ship spent most of the series looking fresh out of drydock. Glad to know they're using their replicator rations for paint.
* egregious still hinted to be capable of birthing a viable human/Eldar hybrid, the sole example of which is one of the Ultramarines. This has since been retconned out of existence. The fact that female Eldar may have ample chests even though Eldar have literally not a single gramm fat in their bodies is almost tame in comparison.
* egregious the next year with the exact same story (save for the genders switched) with the "original" ending.
* egregious, the song "Goodnight, Sweetheart"). This effect was achieved by a small piece of plastic placed over the lens.
* egregious, though it still has its share of monologues. The amount of pointless chattering removed is truly amazing.
* egregious (timestamp 13m15s to skip to the relevant part, the specific example is about a minute further in, text of that part below).
* egregious to "find her true love". The ads for the season all but say this, saying that the engagement was broken off when "reality set in".
* egregious to give her any sort of versatility or credibility afterwards.
* egregious, well before Ian Fleming served. The agency now has to use the title in its recruitment advert. Still, no apparent hard feelings as SIS has allowed its real-life headquarters building to be featured in the Pierce Brosnan and Daniel Craig films as the home of MI6 and its 00 Section.
* egregious, where even the real life location of Manhattan is rendered into a more rectangular shape by shaving off the entire portion north of 129th Street.
* egregious, yet every contestant talks about the experience as if they're going to meet their one and only and live happily ever after.
* egress window to assist folks in their escape in the event of a house fire or emergency, but many folks often leave it open to get some air circulation going. Furthermore, many people are too large to make proper use of them.
* EGS: NP consideration for the polite expert and dismissal of the rude average person.
* EGS: NP who is specifically told he can't go on adventures; his fellow hobbits are Tedd and Susan.
* E.g. they bake Christmas cookies, they get flour everywhere, they burn the cookies to crisps, but realise these super-hard sweets can be used as tiles in

their pavement.
* e.g. thing — the negotiation is between the respective countries' foreign offices, and the courts are only there to ensure that the treaty is not violated and there's enough that the defendant can just stand trial in his or her home country.
* Egwene al'Vere also becomes a Guile Hero, as the Amyrlin Seat. The Aes Sedai thought she'd become a puppet… hoo boy, did they turn out to be mistaken when Egwene owned them all, just like that.
* Egypt. Famous for having Stasi-level infiltration/mass surveillance in a country five times the size of East Germany. Officially dissolved after the Revolution of 2011, but not really.
* Egypt has a similar loophole for buildings that haven't been finished, leading to many buildings with an unfinished top floor which appears in the original plans, but which the builders had no intention of ever finishing, and in many cases isn't even accessible from the floors below it.
* Egypt has only talked on one occasion, and that was because France asked him outright if he was capable of talking.
* Egyptian American actor Ahmed Ahmed has played a few roles as Ahmed, and many others as himself.
* Egyptian cotton, famously soft, light, fine, and breathable thanks to the long fibers and other factors.
* Egyptian - "Fade". The first verse has the male sing to the female about how while she has a pure heart, society seems to forbid their love. The second verse has the female sing to the male about how he seems shady to others, including her, by leaving her alone at night. The chorus has him ask her to maintain positive memories of their romance, even after it ends.
* Egyptian goddess, although in this case her attempt to restore him to life was actually successful rather than just play-acting.
* Egyptian goddess Anput is largely a female aspect of her husband Anubis.
* Egyptian god Horus was conceived by Isis hovering in the air over Osiris and beating her wings. At the time, Osiris was A: dead, and B: neutered, his penis being the one piece of his body Isis couldn't recover due to its being eaten by a fish.
* Egyptian gods (except Sobek) are usually called by the Ancient Greek versions of their names, not the actual Egyptian. For instance, the far more popular Greek translation of "Anubis", compared to the original Egyptian name "Anupev".
* Egyptian gods have at least a couple names. Re and Amun both have tons. Osiris has 100 in the Book of the Dead. Their true names, however, are supposedly unknown to mere mortals. To some extent, this is at least partially due to conflation. To emphasize that their particular regional deity was a Big Deal, local priests would combine him with one of the core figures, which is why there are so many Egyptian gods with names like Ptepshut-Re.
* Egyptian gods have winged humanoid forms, they usually have the wings fused with their arms. But occasionally a deity will have two wings fused to their arms and one or more pairs sprouting from their back.
* Egyptian inspired furniture and clothing can be obtained in most of the games of the series.
* Egyptian mythology actually had each god and goddess being partnered up with a deity compatible to them. You don't find many single gods in Egypt.
* Egyptian Mythology: Ancient Egyptians worshipped quite a few deities.
* Egyptian Mythology and a protector of the home rather than the nation, with some added associations with fertility, pregnancy and childbirth.
* Egyptian Mythology and Horus smearing Set's lettuces with semen when he found out about it.
* Egyptian Mythology and Isis are also sometimes depicted helping in this as well.
* Egyptian Mythology and the parts of his corpse were scattered all over the world. Then Osiris's wife Isis gathered the parts of her husband and resurrected him.
* Egyptian Mythology evil god of Egyptian religion, Apep. His demonization came about because Set was the god of foreigners (as an extension of his domain of

desert, since foreigners traditionally invaded Egypt through that terrain), and the aftermath of the Bronze Age collapse saw Egypt being ruled by foreigners for large stretches of time. While the Osiris myth far predated the event (it was probably the side effect of the unification of Egypt, as the cult of Set was displaced by the cult of Horus), Set was regarded as a mercurial god before the collapse, after which he was uniformly seen as evil.
* Egyptian Mythology; for example, Amun-Min gaining the epithet Kamutef, meaning "Bull of his mother".
* Egyptian Mythology has an earth god, Geb, married to a sky goddess, Nut, while most mythologies have it the other way around.
* Egyptian Mythology (he's only mentioned twice in the Book of Dead), is said to be able to shoot rays of light from his eye.
* Egyptian Mythology, Horus wants Set taken down for murdering Osiris.
* Egyptian Mythology: Human souls were said to manifest as white birds with human heads.
* Egyptian Mythology includes names and sometimes images of deities which represented, or at least whose names mean, such things as joy and plenty. Several objects used, perhaps ritually, by the Pharaoh were personified and deified, such as his beard.
* Egyptian Mythology. In some cases, like Sekhmet, it was described as basically them beating the crap out of the demons that supposedly caused sickness, which is why many of these deities are violent and war-like.
* Egyptian Mythology instead, and was only stopped and turned back into Hathor when Ra tricked her into getting drunk on beer dyed to look like blood.
* Egyptian Mythology is dead and his penis has been eaten by a crocodile. This doesn't stop him from being one of the strongest gods, or from siring a son.
* Egyptian Mythology), Osiris is murdered because he accidentally sleeps with his wife's twin, Nephthys, who also is his brother Set's wife.
* Egyptian Mythology: Osiris was a just, compassionate, and wise ruler, while Set was hard-hearted, self-centered, and violent, killing his brother for the throne of the Earth.
* Egyptian Mythology rather than any semblance of heroism. He fell into decline as the trio of Osiris, Isis, and Horus rose in prominence. Different cult centers always had different opinions on everyone, of course. He was also associated with the desert, which seems to have gotten less awe and more resentment over time.
* Egyptian Mythology seems to be the standard for Egyptian gods, who can age and die but are always reborn. However, with some of them it isn't clear if they actually have to pass through childhood when returning.
* Egyptian Mythology. She also was given titles such as the "(One) Before Whom Evil Trembles", "Mistress of Dread", "Lady of Slaughter" and "She Who Mauls". In a myth about the end of Ra's rule on the earth, Ra sends Sekhmet to destroy mortals who conspired against him. Sekhmet's blood-lust was not quelled at the end of battle and led to her destroying almost all of humanity, so Ra poured out beer dyed with red ochre or hematite so that it resembled blood. Mistaking the beer for blood, she became so drunk that she gave up the slaughter and returned peacefully to Ra.
* Egyptian Mythology that followed didn't help one bit. The most famous version in the modern day (the Heliopolitan myths) are the result of priests and scribes trying to sort all of this out in a way that legitimized the then-Pharaoh and his dynasty, and even then elements of the rest can slip in.
* Egyptian Mythology. The oldest son of the primordial gods Geb and Nut, he came down to earth to live as the first Pharaoh who taught Humanity agriculture and civilization. However, he was betrayed by his jealous brother Seth, who mutilated and scattered his body to rule as a tyrant. After his son Horus took revenge upon Seth, Osiris was pieced back together by his wife Isis (except his penis, which got eaten by a fish), and assumed the role of judge of the dead.
* Egyptian Mythology there was Neith, Sekhmet, Set, Horus, and a slew of lesser-known gods associated with war, due to different gods being worshiped from town to town.
* Egyptian Mythology, the serpent always comes back good as new. Should Apep win,

all light and life will be annihilated.
* Egyptian Mythology understood that the various forms ascribed to their various gods weren't supposed to be how the gods actually were. Those forms were supposed to be symbolic of concepts and traits found in the gods, with the actual gods themselves being thought to exist as abstract forces.
* Egyptian Mythology. When standard freezing spells didn't work, Nefrekeptah went for the direct approach and cut off the serpent's head, and threw it far into the river. However, the head came back almost instantly and blocked his path again. Nefrekeptah again cut off its head, threw it into the river, and this time put sand on the neck before the head could come back. The head couldn't reattach, and though the serpent couldn't die, it just lay there, helpless.
* Egyptian Mythology. When standard freezing spells didn't work, Nefrekeptah went for the direct approach and cut of the serpent's head, and threw it far into the river. However, the head came back almost instantly and blocked his path again. Nefrekeptah again cut off its head, threw it into the river, and this time put sand on the neck before the head could come back. The head couldn't reattach, and though the serpent couldn't die, it just lay there, helpless.
* Egyptian Mythology whether the world's first female was Atum's hand or his mouth.
* Egyptian Mythology, which was believed to be simultaneously below the earth, behind both the west and east horizons, and above/inside the sky.
* Egyptian Mythology, whom the Egyptians credited with protecting them from venomous animals. But get on her bad side, and they could expect a deadly scorpion sting.
* Egyptian myth, Osiris' coffin is built into a pillar in a noblewoman's house. To get close to him, Isis takes human form and gets a job as a nursemaid to the noblewoman's son, who she becomes fond of. One day, the noblewoman walks in on her son on top of a fire, surrounded by Isis' scorpions. Naturally, she yanks him off... but the fire was actually part of a rite to make him immortal, and as a result, he would now age and die like any other human.
* Egyptian president Anwar Sadat needed to make peace with Israel in order to gain Western support for economic reforms and figured that the only way to make it possible was if he could score a military victory, no matter how small. To accomplish this, he deliberately started the 1973 Yom Kippur war, sacrificing thousands of his own soldiers in a war that he knew was unwinnable. On top of that, he tricked his nominal allies (Syria) into joining the war with the full intent of leaving them to fight the Israelis on their own once he had accomplished what he wanted. It worked.
* Egyptian pyramids were essentially designed to look like sunlight (imagine the top as the sun, and go down from there), and originally had incredibly bright, reflective surfaces. They are rather poetically described as "resurrection machines" in
* Egyptian tombs were also deliberate attempts at Ragnarök Proofing, as the ancient Egyptians believed the body had to remain intact forever for their afterlife to work properly. They didn't have all that much success, at least in the case of the Pharaohs, as the conspicuous and treasure-filled tombs tended to draw robbers. That being said, the mummies themselves, while they aren't exactly full-fleshed, still have some meat on their bones, which is almost achievement enough for any sort of organic material that old.
* Egyptian wrestling (dating back to 2300 B.C.) is the oldest recorded martial art. However, it should be noted that there is no single grandfather of martial arts; while some historians claim that Egyptian wrestling is the root of Eastern martial arts, that wrestling was developed by the Egyptians, later adopted by the Greeks (as pankration) and eventually spread to Asia by
* Egypt Is Still Ancient: Egypt is the same in modern times as it was thousands of years ago.
* Egypt Is Still Ancient: Media portrays modern day Egypt as if it's still the New Kingdom period, with nary a hint of Islamic influence.
* Egypt itself was seized by Alexander and became Greek as time went on. It remained one of the bastions of Hellenism for centuries and its capital (one of the

numerous Alexandrias, the only one that really endured under the name
* Egypt) moved into a totally different social circle, with special clubs, dedicated hospitals, and even entire residential compounds and vacation resorts dedicated to them. After the Revolution of 2011, the SSIS was disbanded...only to reappear under the name of "Homeland Security" and back to its old tricks within only a few years. The Central Security Forces never went away at all.
* Egypt of the New Kingdom era, more precisely the beginning of the 18th Dynasty, is constantly referred to in the Bronze Age series
* Egypt to shill...Romero processed cheese. Add that Egypt is kind of a conservative country, and...
* Egyxos originally lived in Ancient Egypt, before finding a new home on a new planet.
* Egyxos the Golden and Dark armies duke it out often... and no one is ever shown dying, or even suffering visible injury.
* Egyxos, the ruler of Egyxos, Kefer lives in a golden palace built like a pyramid.
* Egyxos who is seeking to thwart Exaton from subjugating the people of Egyxos.
* E! has bugs running pretty much constantly. This makes sense during their normal shows, where a celebrity gossip newsreel would fit right in. It does not make sense, however, when this pops up during a movie screening.
* Ehfts. Although a running gag shows one habit common to *every* species, even Ehfts — when they ask for Kin's autograph on a copy of her book, they'll say it's for (the closest equivalent of) their nephew.
* Eh, he's not particularly big or strong either. Just vaguely menacing looking in a shamanic witch-doctor sort of way. Perhaps it's best to just stick with
* Ehlers-Danlos Syndrome is another disorder that can cause this. People with this disorder bruise easily and vividly as well as being prone to joint dislocations, which means they can end up with injuries that, without the context of the disorder, would seem suspicious. Exacerbating the issue, Ehlers-Danlos can also cause difficulties with balance and spatial accuity, so the true explanations of their injuries can end up coming off as excuses (so,for instance, a person with Ehlers-Danlos is more likely than the general population to
* Eh, not quite. If the Dude's bowling skills were being talked up the whole movie, then it would be
* Ehon Hyaku Monogatari is probably the oldest description of a shark ambushing people like in modern media.
* Ehren, too. He barely has any crafting powers, but still becomes a skilled liar and spy for the Crown. He also is guilty of something few can claim to have done. He
* EHUD Prelude To Apocalypse has his 'Plan', an elaborate scheme to to achieve his goals. Said goals haven't been made clear yet, but he did sic a pack of supersoldiers on the former president, and then spin the resulting public panic to get his underling made president... so there's something there.
* EI-15 (GGG Spare Parts Robo) got through too, and at a time when the Final Fusion program was disabled, forcing GGG members to pilot the GaoMachines. Big Volfogg grappled the Zonder to get it off.
* EI-15 parts, including some that let it mimic and counter GaoGaiGar's moves.
* Eibon is knowledge, Asura is fear, and Lord Death (and by extension Kid) is order, Excalibur is rage, and the unnamed one in the Book of Eibon is power. The other three have not been revealed as of yet.
* Eichhornia spp.) quickly crowd waterways, choke out other plant life, and may even deoxygenate the water enough to suffocate fish and other aquatic animals.
* Eichler homes of the 1950s. These were seen as outdated, inefficient relics for over forty years before becoming the holy grail of the mid-2000s house-flipping craze. They've since come to be viewed much like classic hot-rods, often receiving ultra-high-tech, million-dollar upgrades.
* Eichmann) has a bizarre scene where Eichmann has sex with a Hungarian noblewoman who is turned on by his boasts of the amount of Jews he's ordered to be gassed.
* EIC Roy Thomas. Thomas said that Gwen's death was the only logical way her relationship with Peter Parker could go would be to get married, and that would age

him more than than they wanted. The reality was that editors killed off Gwen because they, and a majority of readers, thought she was a bland disposable character.
* Eid Al Fitr celebrations. In Malaysia, the firing of such home-made "bamboo cannons" during the holiday is a tradition, even if it’s illegal. Some daredevil bloke in some random hamlet will try to make one and set it off anyway. Usually, there's at least one report of some unfortunate bloke getting some random body part blown off every year, and probably set a random house on fire while at it.
* Eidetic Memory, while the Teidar and Mizol are more psychically gifted than other Loroi.
* Eidolic Fringe day jobs taking more of their time, they stop updating the comic before the story got more exciting.
* Eidolon II, the ending text scrawl mentions millions of people around the planet celebrating.
* Eidolon of Madness is indestructible. They still have attack and death lines respectively.
* Eidolons are depicted as huge mechanical beasts that emerge to challenge whooever they're bonded with at their moments of
* Eidos (1996-2003) used to be this as well, but fell off by the wayside.
* Eidos Interactive, even after their acquisition by Square Enix in 2009.
* E-I-E-I-(Annoyed Grunt). Despite the taste, both of them ended up getting addicted to ToMacco almost immediately.
* "E-I-E-I-(Annoyed Grunt)" had a clearly male Asian elephant (complete with visible tusks) referred to as female.
* E-I-E-I-(Annoyed Grunt) in the course of slapping a long line of people.
* Eientei where Akyuu thinks she may have "a deep connection to the Lunar Capital."
* Eifelheim who crash-land near their small German village. He cites theologians such as Augustine saying mythic creatures like dog-headed men, if they existed, would have souls and be capable of receiving baptism to argue it wouldn't be something they couldn't handle. After determining that the aliens are rational, the priest engages in debate with them about religion and other things. Some of the aliens end up converting.
* Eiffel 65": It's another race / From outer space / We can't communicate, with their one-way brains / No matter how you try, you just can't understand them.
* Eiffel 65's hit "Blue (Da Ba Dee)" is about depression, of all things.
* Eiffel Tower Effect is an obvious natural landmark and easily betrays the apparently foreign (or at least non-Seoul) setting of a series.
* Eiffel Tower, even if the designer of the statue was the sculptor Frederic-Auguste Bartholdi. Eiffel is a genius and innovator in his field of course, but the people who created the look of his famous works end up being overshadowed by him.
* Eiffel Tower has indeed served as a militarized landmark during its existence, though it didn't become anything as wacky or awesome as the page image. During
* Eiga Sentai Scanranger and making multiple bad situations much worse.
* Eiga Sentai Scanranger armed with poison that dehydrates anyone who touches it/drinks it, but only if they're over 25. It's unclear why that was brought up when what wasn't brought up was what the villains hoped to accomplish. The poison would only work on one of the six rangers, for crying out loud.
* Eiga Sentai Scanranger: Lampshaded in "Scanranger vs. Jetman", although it mainly serves to call attention to how neither story bothered until the characters had to interact with people from their own planet who speak a different language.
* Eiga Sentai Scanranger seems to want his audience to like the comic relief team member and other characters constantly praise his sense of humor. Even though he tells jokes like this:
* Eiga Sentai Scanranger, since most of the members are cyborgs or aliens.
* Eiga Sentai Scanranger (whereupon she quotes the line). This isn't that big a deal to begin with, but it's even dumber because not only is the one who notices a Japanese guy who also speaks Japanese and English, the mentor knowing a second language doesn't even come in handy because a friendly alien uses her powers to

enable everyone to understand each other.
* Eiga Tamagotchi: Himitsu no Otodoke Dai Sakusen!) are dancing on a stage. However, some even dance while in the crowd.
* Eiga Tamagotchi: Himitsu no Otodoke Dai Sakusen!. However, Himespetchi, the space princess character who is known for her crush on main character Mametchi, doesn't even appear as one of the background cameos, which seems strange as she's a notable character in the modern incarnations of the franchise and serves a major role in several episodes of the TV show.
* Eigengrau Zwei: Die Welt Ist Grau Geworden: Blackbird Coffyn is the daughter of a hippogriff -half-pony, half-griffon- and a pony.
* Eigengrau Zwei: Die Welt Ist Grau Geworden gladly exploits this when indulging her Warrior Therapist tendencies, fucking the inhibitions away before letting them lay their souls bare.
* Eigengrau Zwei: Die Welt Ist Grau Geworden, one of the first things that Istanbull's new management did after ousting King Majid. They've now turned their sights to eliminating slavery in the neighbouring kingdoms.
* Eight Ball, even as "the Fonz" playing pool with his girl, a waitress in the background is hungrily eyeing him.
* Eight Ball one of the playfield images is a woman in tight jeans with her back to the viewer, leaning over the pool table...
* Eight Below features an American team of eight sled dogs, six of whom survive for six months in 1993. It was "inspired by" a Japanese team of fifteen dogs, two of whom survived for one year in 1958.
* Eight Below is about an American expedition in 1993 where almost all the dogs live. It was based on the true story of a Japanese expedition in 1958 in which almost all the dogs died.
* Eight Below) were based on the 1958 ill-fated Japanese expedition in the South Pole.
* Eight Cicadas to Annette. As a hybrid, she is immune to human painkillers and couldn't be anesthetized for delivering her daughter. It ends with her punching out a nurse and spending time in therapy.
* Eight Count's rookie year in a somewhat exaggerated and legally dubious pro boxing league.
* Eight Cousins, a woman named Rose was courted by the brothers George and Alec Campbell. She chose George and married him, but at the cost of the distancement between George and and Alec. Sadly, Rose died early in her life, and some years later George perished as well; in George's deathbed, the brothers were reconciled, and Alec promised the dying George to take care of his and Rose's daughter, Rose Jr. aka the female lead of the story.
* Eight Cousins because he's talking to himself, and no one else is around to hear it.)
* Eight Cousins — They've known each other for years, but it's her singing the night after her return from Europe that makes him instantly fall in love with her. Archie even notes the exact time when he feels it happen.
* Eight Cousins, Rose Campbell attempts to punish her cousin Jamie's playmate Pokey for petty theft (just some chestnuts and a rolled bandage), making the little girl cry. Jamie gets pissed off and reveals that Rose had her ears pierced by her friend Annabelle without permission of her guardian Uncle Alec, which upset Alec quite a bit.
* Eight Cousins, Rose Campbell goes to live with her Uncle Alec, and becomes the target of affection to her seven handsome male cousins.
* Eight Crazy Nights after Davey shoves Whitey into a port-a-potty then kicks him down a hill, he comes out covered in feces and Davey sprays him off and he freezes into a block of ice, Davey comments:
* Eight Crazy Nights), and at the end, they bring their secret weapon: a giant man named Hammer, who is knocked unconscious by a basketball to the face.
* Eight Crazy Nights and each of his heinous deeds have been completely ignored by the end of the movie.
* Eight Crazy Nights and — not being up to date on modern technology —

thinks Benjamin's Game Boy is an Etch-a-Sketch.
* Eight Crazy Nights ends with Davey discovering his home on fire after he and Jennifer sing about their childhoods.
* Eight Crazy Nights has the scene where Davey sends Whitey down the hill in a port-a-potty, and emerges covered in shit. Davey then sprays him with a hose, causing him to freeze, and he is un-thawed by deer that lick the ice (they even get shit all over their teeth). "Smell ya later Poopsicle!"
* Eight Crazy Nights provides an image of Hitler roasting on a menorah.
* Eight Crazy Nights's long history of blatant product placement, the use of company mascots in a song was actually not paid for by the companies. Sandler apparently does this whether he's paid or not.
* Eight Crazy Nights then saying it fell into the former category for not making sense.
* Eight Crazy Nights: When going to apologize to Whitey and running into Whitey's deer friends, Davey gives himself a wedgie to prove to them he's really sorry.
* Eight Crazy Nights when the crowd disapproves of his officiating at a youth basketball game.
* Eight Crazy Nights: Whitey furiously stops his car when Davey reveals that he (Davey) stole peanut brittle from the mall.
* Eight Crazy Nights, Whitey mentions the only time he had sex was through a hotline, the number being 1-555-BOOBIES.
* eight-day-old collard greens I ate couldn't pass through my stomach; I threw up shortly thereafter.
* Eight Days a Week boyfriend. He helps but also takes the opportunity to invoke this trope, falling down with her on top of him in a different position each time.
* Eight Deadly Words: Characters are so unlikable/underdeveloped that it's impossible to care about them and/or the story.
* Eight Deadly Words: "I don't care what happens to these people," i.e. the audience isn't emotionally invested in the characters.
* Eight Deadly Words: The characters in a work are written poorly enough that the audience doesn't care about what happens to the characters.
* Eight Deadly Words: You fail to get people to be invested in your story.
* Eight Dharma Protectors are Buddhist wrathful deities of which only one is female.
* Eighteen Days To Graduation: Miranda is 17 when she starts dating 30-something Jeff. This disgusts many of her friends.
* Eighteenth-century housebreaker (thief) Jack Sheppard (who stood around 162 cm) and his longtime girlfriend Elizabeth Lyon.
* Eight episodes into season 7 and Tony Beets's dredge has been sunk not just once, but twice.
* eight-foot-tall killing machines) may possibly still be alive and masquerading as an ordinary Alpha Legionaire.
* eighth book, where it happens onscreen, but is still in play for the main series.
* Eighth Doctor Adventures catches bullets in their teeth, but Foreman simply muses that this explains why it took him so long to learn it.
* Eighth Doctor Adventures describe them as "puffy". It's never explained what they were actually meant to be.
* Eighth Doctor Adventures features a device that can trap people in paintings; if they remain there too long, they're trapped permanently.
* Eighth Doctor Adventures, Fitz doesn't seem to be doing a good job tying a tie when he's forced to pass as a respectable businessman, so Anji helps.
* Eighth Doctor Adventures; having lost his memory and with the TARDIS reduced to a small box, he spends the entire twentieth century wandering Earth until his ship repairs itself (the novels set during this time take place in Britain, but the Doctor's dialogue suggests that he travelled to other parts of the world).
* Eighth Doctor Adventures in almost every book, it's believable his language would only be as vulgar as the situation warrants.
* Eighth Doctor Adventures is in danger and the Doctor is in his lab sorting it out. He leaves for a couple minutes and accidentally smacks one of his companions,

Fitz, in the face with a door, giving him a nosebleed, and doesn't seem to notice. Four days later, the Doctor gives him a soiled handkerchief and apologizes, apparently unaware that four days have passed. As Fitz said in a much-earlier book, "Ladies and gentlemen, the mind of a Time Lord."
* Eighth Doctor Adventures, is partly set at an arms fair where Sarah Jane Smith is undercover writing an expose.
* Eighth Doctor Adventures is set on the titular planet inhabited by expires of famous cartoon characters.
* Eighth Doctor Adventures maintains a continuous narrative crossing between three time periods, with four separate means of time travel, and only one point at which one of the characters is "out of sync" with the others.
* Eighth Doctor Adventures novels called the Eighth Doctor Life's Champion, but whether there's a Life amongst the Eternals or it just means life in general is unclear.
* Eighth Doctor Adventures novel "The Fall of Yquantine", the Eighth Doctor installs a Randomiser in his companion, Compassion, after she mutates into a sentient TARDIS, to try and keep her away from the Time Lords who want to use her as breeding stock to create a new generation of TARDISes.
* Eighth Doctor Adventures novel "The Taking of Planet 5"; most Time Lords take direct control of their TARDISes through a telepathic link, but the Doctor avoided forming such a link with his ship as it would have made it easier for the Time Lords to track him, instead relying on his own controls and leaving the ship with a greater degree of freedom than it would have possessed otherwise.
* Eighth Doctor Adventures of the writers liked the series' first companion Sam Jones. So much that they were always trying to kill her off. (Or, in Kate Orman and Jonathan Blum's case, make her a fully rounded character.)
* Eighth Doctor Adventures, Pandak, Aperion and Eutenoyar) in the six corners of the Panopticon. Until people start screwing around with time, so there are four statues (one of which is the Doctor) and eventually just one.
* Eighth Doctor Adventures reference — "Well, to tell you the truth I think I’ve lost count, sorry about that. So you’ve got to ask yourself one question. Do you feel lucky... sir?"). While said antagonist boggled at his antics, Sam would steal said antagonist's gun.
* Eighth Doctor Adventures seriously malfunctions, crashlands in a horrible spooky place, and spits out everything inside her, including the Doctor and his companion Fitz, who admits to farting with terror:
* Eighth Doctor Adventures situations with the Doctor, bookended by attempts on the Doctor's life, until he decides he's actually "more than a little fond of" the Doctor.
* Eighth Doctor Adventures survives the vacuum of space just fine — he does, however, have temperature, cosmic radiation, and the bends to worry about.
* Eighth Doctor Adventures taunts the Doctor with this parody of a Gallifreyan nursery rhyme:
* Eighth Doctor Adventures tend to be a bit less overt about it, mainly because they were generally a bit more niche and didn't try to chase the zeitgeist quite as much as the New Adventures did.
* Eighth Doctor Adventures, the Council of Eight, to prevent them affecting history, then rescued by the Doctor and adopted by a 21st century archeologist.
* Eighth Doctor Adventures, the main role of the Crooked World Electric Company is producing idea bulbs. When our heroes bring free will to the world, the resultant "Plague of Questions" results in the company being unable to keep up with demand.
* Eighth Doctor Adventures. There are a number of men there who wear dark suits despite the heat, and dark glasses despite the fashion in the 2060s being for light-reactive contacts.
* Eighth Doctor Adventures, the scientifically-minded leader of the vampires has performed experiments which show the "V-factor" can be added to any animal. Rather worryingly, she's not sure where the cats are, but she had a snail for a while (until one of the other vampires stood on it, and they decided the kindest thing to do would be to stake it with a toothpick) and undead ameobas that consume red blood

cells.
* Eighth Doctor Adventures. The writers seem to love leaving little hints about his backstory all over the books, and the Fandom extrapolates accordingly.
* Eighth Doctor Adventures will ultimately become a single gestalt race, the Ixtricite, with another crystalline race called the Rhotons and some other race whose name the Doctor can't recall.
* Eighth Doctor novel so that the Daleks could do their thing elsewhere without impediment. Unfortunately (or fortunately, depending on your point of view of this whole mess), Peel's novel was not particularly well-received or well-regarded, thus making it much easier for later writers to quietly ignore or overrule pretty much everything in the story.
* Eight, he can go toe-to-toe with Magitek Armors that tower over him with fisticuffs and magic skills.
* Eighth Grade offered a free, unrated screening in each U.S. state for a day.
* eighth person to know, he remarks that at that point it's not really a keepable secret anymore and will soon be common knowledge.
* eighth when she was called up to take over the second American spot in the AA final — something considered highly unlikely given that she was considered one of the weakest all-arounders on the American squad.
* eighties cartoon for the first time (brought over through a dimensional portal) Raphael points out, "He's not only from an alternate dimension, but also ancient Japan. So naturally, he speaks English."
* Eighties rock singer Huey Lewis, who sung the theme song "The Power of Love", shows up in the first
* 'eighties version of a modern Formula One design; but inside, there's a plain fiberglass and steel honeycomb, analogue dials, a H-pattern gearshift — no headrests or safety padding, no computers or telemetry, no tiny on-board TV cameras, and much less aerodynamic detail in general. Then there's the dated tobacco branding...
* Eighties was created, and it was decided that nationalism, tribalism and familial loyalty were the root causes of war and violence, to be eliminated through drastic social engineering.
* Eight Immortals, which represent people from different walks of life, contain one female member in the form of He Xian Gu, though the gender of Lan Cai He is usually ambiguous.
* Eight is a lucky number in China, associated with prosperity and confidence, so the
* Eight is Enough. Actress Diana Hyland appeared only in four episodes before being diagnosed with breast cancer. Joan was written out of the rest of the season and Hyland died twelve days after the first episode aired. When season two aired, it was revealed that Joan had died.
* Eight is Enough does it in the opening credits sequence, as the family plays touch football.
* Eight is Enough - he thinks it's the Disney version, but it's actually an X rated version. Tom hustles Nicholas out quickly with his hand over his eyes.
* Eight is Enough, this exchange between a newspaper reporter writing an article, and her father:
* Eight is Enough, Tommy drills a hole in his locker, which is against the girls' locker room. He gets caught peeping by the principal.
* Eight is Enough which shows the father slapping his daughter eight times and another one of the daughters stops him and tells them that "eight is enough" and they all laugh. Cut to the whole family (except Stewie, who has a big smile on his face)looking at the TV with their jaws dropped.
* Eight Legged Freaks, as do several other people. One scene has a character come across a number of cocoons that are still writhing and have their voices muffled, before one of them is impaled on the fangs of the biggest spider.
* Eight Legged Freaks attempts to jump through a shop window, only to smack "face"-first and spread-eagled into the glass, make a groggy noise and slide down slowly with an audible squeal while the people inside stare in disbelief.

* Eight Legged Freaks, but it plays the whole thing for laughs with the spiders' silly voices and antics.
* Eight Legged Freaks by repeatedly taking off his glasses, even when on the run from giant spiders. Eventually, he blindly walks up to one and is killed.
* Eight Legged Freaks, had a potentially very scary premise: realistic-looking giant spiders are pretty horrifying by themselves, but the decision to give the spiders all sorts of "wacky" jabbering noises as they run amok utterly wrecks the terror for the most part. There are some scenes that aren't played for laughs that manage to be genuinely frightening, but they are rare. There is a memorable scene where a spider jumps on the stuffed head of a moose, only to take a bite and look visibly annoyed at the taste. Though the shot of a truly gigantic tarantula moseying through a parking lot to a sinister, minor-key riff of "The Incey Wincey Spider" can be rather effective.
* Eight Legged Freaks has a brief, humorous scene where the heroine yells at the townsfolk to get ready. One of them has a chainsaw and hockey mask. Funnily enough, there's a second guy with a chainsaw right next to him — but he has a catcher's mask, instead.
* Eight Legged Freaks has Chris and Gladys escaping the mine on Bret's motorcycle as the methane in the mine was set off towards the end of the movie. Chris and Gladys are on a motorbike and trying to escape the ensuing blast. While they fail at completely outrunning the fireball and are temporarily engulfed they still manage to get out with only minor burns.
* Eight Legged Freaks one of the Characters is a Conspiracy Theorist with his own radio station, which he uses to rant about aliens and the government.
* Eight Legged Freaks released a very similar faux-Spider-Man commercial that summer.
* Eight Legged Freaks. The conspiracy-believing radio host is unwilling to believe the others' tales of giant killer spiders. This may have been as much him suspecting they were making fun of him, as him actually finding the idea itself unbelievable.
* Eight Legged Freaks, the state police arrive, expecting to find aliens, rather than giant spiders. However, the spiders have already been defeated by that point.
* Eight Legged Freaks was advertised as "the biggest, nastiest mutant spider movie of all time."
* Eight Legged Freaks where Harlan goes on a tirade about aliens and this very subject. "...I mean, what do they expect to find there? It's just wrong!"
* Eight Legged Freaks, with critters varying in size from large dogs to a tank (the "Queen" spider at the end).
* Eight members of the secret government organization Cipher Pol #9, were trained from young ages the martial arts known as Rokushiki (Japanese for "six powers"), pushing their bodies to superhuman levels for the purpose of carrying out covert assassinations in the name of the
* Eight Million Gods. This is clearly not a condition that puts herself or anyone else in danger. In fact, it's arguably beneficial, since she's been making a living off of the royalties of the books her compulsion creates. It's implied that her mother gets away with this because she's a wealthy politician with lots of influence.
* eight million years. After the bailiff whispers something to him, he revises this to four years.
* eight minutes on Earth. When he returns to Earth, he reverts to his pre-Neverzone body, meaning he's fourteen years old again.
* eight of her infant children over a nearly two-decade period from 1949 to 1968, and got away with it until the late 1990s. She ultimately pleaded guilty to second-degree murder and was given 20 years probation.
* eight of the 10 annual World League (now known as Nations League). Olympics results starting with 1992? 5th, Silver (losing to the Netherlands, who they beat in the World Cup and Championship finals), Bronze, Silver (losing to Brazil, who had taken over as the strongest volleyball team), 4th, Bronze, Silver (after winning the semifinal on an heroic comeback, only to again lose to hosts Brazil -

who had lost to Italy in the group stage, but rolled over in the finals with a 3-0) and another quarterfinals exit.
* Eight of the thirteen original Joes wore green uniforms with round helmets. The five standing out were Scarlett (blue outfit with tan torso), Snake-Eyes (all black with face mask), Stalker (green camouflage with a beret), Flash, and Grand Slam (both with red padding on top of their green uniforms).
* "Eight oh oh, three two five, three five, three five" — a popular Sheraton Hotels number.
* eight separate languages being multilingual is sometimes necessary to enjoy his work, particularly when he gets creative and composes a song made up of more than one language. One particularly delightful example is the song "For me Formidable" which alternates between French and English and uses a lot of clever wordplay between the two.
* Eight Simple Rules for Buying My Teenage Daughter", Meg's female gym teacher makes the girls strip down, get in the shower, and bounce around for her.
* "Eight Six Six, Sixty Six FASTER, You've got the Green Light!" (Green Light Financial)
* Eight Skilled Gentlemen is a very slight variation (and a massive elaboration) on this.
* Eight Skilled Gentlemen, Master Li Kao has apparently learned his lesson; after shooting through yet another series of water-filling tunnels, Master Li simply looks at them wistfully and comments that the man who could re-create that experience would make a fortune.
* Eight Skilled Gentlemen (so the lord of the castle won't start asking questions to the kitchen staff), and we get a really good description of how to cook a man.
* eight songs about the Trojan war... of which only two remain. The rest were lost even in antiquity, but everyone knew the general gist of the story (if not the specific verses).
* Eight's skill, Sacrificial Slug, deals high damage while reducing his HP to 1.
* Eight Tentacles of the Apocalypse. It had a tentative 2010 release date, but Absurdus got as a far as a trailer before the project went dormant.
* Eight warring clans used to inhabit the Flatlands, before uniting against an opposing army and founding the city-state of Atlasdam.
* Eight Worlds a race of aliens kick humanity off Earth to protect dolphins and whales. They plan on forcing humanity to live between star systems has they have to many other alien races.
* Eight Worlds future where humanity has colonised much of the Solar System… and then one day aliens came and evicted humans from Earth, with no (visible) rhyme, reason, nor response when contact was attempted.
* Eight Worlds (who tend to discard things like legs and feet that are not very useful in zero gravity), most people are so cyberized the lunar central computer admits to tapping the unused portions of their brains for additional processing power.
* Eight-year-old Arya Stark tries to warn her father that she overheard men discussing a plot to kill him. Eddard did actually stop and listen to his daughter, but she was so flustered her explanation came out as complete gibberish about monsters. The fact that the two men used so many code words only made it harder, even she barely understood what it meant.
* eight years, but Edgar managed to upset the champ with a set gameplan; mixing up his offense, and pushing the pace with his speed.
* eight years earlier, an all-European conflict that began when Prussia invaded Austrian Silesia in 1740. To further highlight the pointlessness of the conflict, there's even considerable doubt about whether or not some guy named Jenkins really lost an ear that way in the first place.
* eight years prior to his "death", he manages to repeatedly pull off ridiculous trick shots. He finally just goes with it.
* eighty when he became prime minister for the last time, and was generally referred to as the Grand Old Man. (He's sometimes referred to just as "the GOM" in the same way that the Republican Party is the GOP.)

* Eighty years before the start of the series came the bloody conflict between kingdoms known simply as the Great War, which pitted an expansionist alliance of Mantle and Mistral against Vale, which was later joined by Vacuo. The conflict was touched off by settlers from both sides clashing during the Mantle/Mistral expansion, though nobody knows who shot first. The aftermath of the War had profound societal consequences for all of Remnant. The
* Eiichiro Oda being God. Known for his wacky and imaginative character designs and use of clever plot twists.
* Eiichiro Oda chapter is astounding. With all the little details in both the art and storytelling, it's easy to see that he loves writing manga.
* Eiichiro Oda had Usopp talking in a heavy Arabic accent, plus he was renamed as Usuf. However, Usopp's mother Banchina was very pale, and had an Italian name, whereas his father has similar features including drawn lips. Also, while he now has blond dreadlocks, he was shown when Shanks first recruited him to have curly black hair, so it's likely he dyed/bleached it. This might point to Usopp being biracial.
* Eiichiro Oda, he plans on doing only short stories until he retires or dies and will never attempt another long series again.
* Eiichiro Oda may have some characters who are in love, but Oda's never going to write romance into the story because it would ruin the mood it's established. According to Oda, if you want that kind of thing you should probably read a girl's manga. Parodied in one letter written to Mr. Oda.
* Eiichiro Oda regarding what hairstyles he doesn't want Franky to have. Guess which character inexplicably got a new hairstyle every chapter.
* Eiichiro Oda, these explanations (as ridiculous as they may be) are also literally true. At least sometimes.
* Eiichiro Oda world, it's sometimes hard to tell when his answers are serious and when they're just jokes.
* Eiji Akaso, who plays Ryūga Banjō and was previously in Season 2 of
* Eijiro Kirishima as this, with a set of balanced stats ranging between power, speed, technique, intelligence and cooperativeness. This is also invoked with Manual, a minor character, who intentionally builds himself as a "normal" hero.
* Eiken Instead, it throws massive tits on most of them. Hell, they go so far as to change boob size mid-scene in the name of fanservice. And this is actually one of the tamer works by its author; his other stuff tend to make this series' busty characters look small.
* Eiken series of all time and has been bashed for its dumb plot/characters and ugly art. Both the manga and anime however allegedly sold very well, and fanart of the franchise is not uncommon.
* Eiki and Komachi, respectively as judge of the dead and ferrywoman of the equivalent of the River Styx, never really seem to complain about "outliving" everyone they know, but then, being
* Eiko in Makoto's Confidant. In the game, she gets angry with Makoto after Makoto tries to convince her to break up with Tsukasa, mistakenly believing that Makoto wants to steal Tsukasa from her, and is cold toward Makoto the next time they meet. In the anime, she simply asks Makoto for money and repeats her request when Makoto finds her in Shinjuku. While in the game, Eiko's last heard from when Makoto mentions that they made up at the start of the Rank 10 event,
* Eiko Masuyama, continued as the franchise's default Fujiko voice until 2010.
* Eiko Takao, a friend of Makoto's from the Priestess Confidant. Unlike Makoto, who's one of the top students in her grade, Eiko has poor grades, but is knowledgeable about fashion, has a boyfriend and seems to have a vision for how she wants her life to go. Unfortunately, it turns out that Eiko is also somewhat gullible, and her boyfriend turns out to be manipulating her in order to get her into debt and sell her to the sex trade.
* Eikou no Napoleon - Eroica Napoleon has to attack Acre without his siege artillery, that was on ships the British captured, forcing him to wait until replacements arrive. The guns are then able to utterly demolish the city's recently repaired medieval walls... But not the much newer ones Antoine de

Phélippeaux had built just inside, as those ones were built with more modern criteria to resist siege artillery and are defended by the same siege guns previously captured.
* Eikou no Napoleon — Eroica is the one attacking the city. Acre resists.
* Eileen: Eileen at the time of the events of the book had no friends, and had had none almost her entire life. This makes her very vulnerable to Rebecca's manipulation via overtures of friendship.
* Eileen, Eileen watches her crush Randy through the windows of his house for hours, while imagining and hoping to catch him with a woman. She also watches (and is aroused by) Leonard Polk masturbating, though she didn't intentionaly seek it out.
* Eileen from the recent Love Charm RIG plays the trope more straight, though —
* Eileen is basically storyboard artist Minty Lewis in mole form, with her biggest roles generally being episodes she works on.
* Eileen is set in the small, run-down New England town of X-ville. Downplayed in that the town isn't actually supernatural, but there's a creepy, disturbing feeling to everything there. The town, and particularly the police force, is full of corrupt hicks who are apathetic to actual crime and only care about protecting their own, and disturbing secrets lurk everywhere. The general landscape is one of abandoned buildings and empty snowdrifts that give everything an eerie vibe.
* Eileen the Crow, a very old woman who's tasked with hunting down Hunters who've gone mad or become infected with the scourge of beasts. In her case though, the trope is deconstructed: Her stubborn refusal to accept that she's passed her prime and is in no shape to hunt down her marks any longer ends up with her own death if you do not come to her rescue.
* Eileen They even put his son in jail without bothering to find out why he killed his own father.
* Eileen was a flop, though it was Victor Herbert's personal favorite of his works.
* Eilonwy. Their ages are rather vague, but they seem to be around 14 years old at most.
* Eina-afa, in particular, is a space station just barely small enough for people to comprehend how incredibly
* Eina-Afa, or "Synthetic Wind", is the mind of a space station with enough open air inside to house planets. After spending a few million years alone, she renamed herself T'kkkuts-Afa ("Broken Wind") and created storms in her otherwise paradisiacal sky in order to create evolutionary pressure for intelligent life to develop. Yes, she's old (and lonely) enough that she was willing to wait for animals to achieve sentience just so she would have someone to talk to.
* Einar Gerhardsen: Prime Minister from 1945 to 1965 (with a brief two-week vacation in 1963).
* Einarinn series features the city of Hadrumal, which is inhabited only by wizards. It is a kind of magic Athenian democracy, with a vote on an important issue decided not by the number of votes, but by the total magic power of those voting on each side.
* Ein Dalton becomes worse than Mikazuki ever since Crank's death, he has been plotting to retrieve
* Eine Billion Dollar (that's a trillion dollars in English), by Andreas Eschbach, has this trope as a premise: John Fontanelli inherits the fortune, originally just 300 florins, which his ancestor in the 16th century left for him, along with the prophecy that the heir will give mankind its lost future back.
* Eine Woche Voller Samstage", the Sams can grant a limited numbers of wishes. However, they are granted literal and any detail not specified is assigned randomly. (For example, wishing yourself into your room might end you up on the floor if you are lucky, but you also have good chances to stand on your bed or inside your locked wardrobe.) Wishing that another person does something for you leaves all unspecified detail to that persons interpretation. (If you wish that a person brings you some hamburgers, he might as well return with some inhabitants of the German town Hamburg.) In the later novel, characters learn from their mistakes

and try wording their wishes as carefully as possible, but still tend to leave out some important detail that leads to everything going wrong.
* Ein feste Burg ist unser Gott, a hymn by Martin Luther that is way too famous to be eclipsed by anything, even Bach's equally amazing chorale cantata based on that hymn.
* Einhänder, aside from small-fighter type cannon fodder, were usually segmented. Shooting the main body of the ship would destroy it eventually, but simply destroying the cockpit and (in some ships) the engines would cause the ship to crash and explode.
* Einhänder, as seen in a short cutscene of your intact ship after the end credits.
* Einhänder. Elsewhere in the game, the booster rockets for the satellite can kill you if you fly behind them.
* Einhänder has a laser blade weapon pod. The Einhander is a space fighter with a grappling arm specifically built to use enemies guns as it finds them. Enemies using a laser blade do not have a grappling arm. They just have a laser sword sticking out of a hardpoint in their front that may be pointed at you. It is the most beautifully nonsensical thing in the game, especially since doing a fireball motion while activating it will cause it to lance forward about three times its original length for a moment.
* Einhänder involves a battle against a series of armored trains.
* Einhänder is actually a reporting name used by the (German-speaking) Earth forces. The fighter's actual name is either "Astraea" or "Endymion", depending on the specific model you choose to fly.
* Einhänder name is either "Astraea" or "Endymion", depending on the specific model you're flying.
* Einhänder's Gummi-Ship sections (very much a Shoot-em-up) was their first introduction to the game via the secret boss of "Schwarzgeist", same with the ship "Endymion".
* Einhänder, Stage 6: Fail to destroy the space shuttle's thrusters in time and your craft plummets to earth, where it is immediately set upon by German forces. The game ends here even if you have extra lives remaining.
* Ein himself is the most extreme example: Mikazuki kills his commanding officer Lt. Crank in Episode 3, and he spends the rest of the season hunting Tekkadan for payback; he even gets pissed off when he realizes they've salvaged Crank's mecha for their own use, and resolves to take it back in his honor. After getting mangled while
* Ein Käfig voller Helden Hogan by everybody... thus playing the trope completely straight.
* Ein kleines bisschen Horrorshow (A little bit horrorshow) by german band Die Toten Hosen follows the plot of
* Einsatzgruppen. They were intentionally geared towards being an elite society within but apart-from the rest of Nazi Germany, one that would need as little contact as possible with outsiders. If a member of your family was in the SS, then you basically moved into a completely different social circle. One of Himmler's post-war goals was to turn Schleswig-Holstein — or according to some other sources, a recreated "Burgundy" between Germany and France — into an SS nationstate.
* Einstein Anderson, Science Detective series, the titular character loves cracking jokes and puns every chance he gets. His family usually reacts to them by groaning or pinching their noses.
* Einstein (as a synonym for ‘genius’, as it owns the copyright to his name) on an ad for their mobile internet service saying, ‘Suddenly everyone’s an Einstein.’
* "Einstein Express: When it absolutely, positively has to be there the day before yesterday."
* Einstein Hair. In personality and abilities, however, Agatha is much more similar to her father, which Lucrezia finds annoying beyond words.
* Einstein Hair: Nothing says "mad scientist" quite like having hair like Albert

Einstein.
* Einstein Hair she's been kidnapped by Nyssa Al-Ghul, who has her hung up by the heels from the rafters of an abandoned factory.
* Einsteinian Roulette count as this, ranging from mercenaries, petty criminals and discarded experience subjects to farm boys, spoiled brats and crazy doctors.
* Einsteinian Roulette. Fiery and incredibly beautiful, she is capable of impressing feats of crafting and combat, going unscathed through several high-risk missions without having so much as a scar to show. Before being put under the service of the HMRC, she worked in a bakery. She was good at that too.
* Einstein on the Fritz, an opera by Philip Glass and Robert Wilson, which is notorious for lasting four and a half hours without plot. Summarized thusly:
* Einstein on the Fritz before reaching the final chord of J.S. Bach's original piece.
* Einsteins Bridge, The Hive have taken over several worlds by making tiny robots by light though tiny wormholes that builds into new Hive on that world.
* Einstein's Mind. If you could set up a book so that it would have all of the correct responses for any query, would the book be sentient or not?
* Einstein Sue: Albert Einstein may have had a lot of knowledge, but he was an actual scientist, so it's not implausible.
* Einstein would do something similar when people stopped him on the street.
* Einstürzende Neubauten in exchange for increasingly quiet conventional styles while maintaining the usage of custom musical instruments built out of found objects. Nonetheless, they still showcase a wide range of textures.
* Einstürzende Neubauten" is made entirely out of springs, pneumatic pistons and air horns.
* Eion Bailey characters. In interviews, he's far less of a wisecracker than the characters he plays.
* Eion Bailey had auditioned for August knowing only what was in the script for his first episode (one scene as he arrives into town). According to him, the writers tried to hide his character's true identity from him for as long as they could.
* E/I programming had secured itself in the Guinness Book of World Records in 2009 as the most successful trading card game worldwide, and the fact that a theatrical film was released during this time period.
* Eira's name in itself is winter or ice-related, which has something do with where she's from or, rather, presumably, how she died, which was stated to be in "one of the coldest parts of the world".
* Eirick and Freyja and they were lovers prior to the movie's start. After Eirick fell in combat, Freyja restored him to back to life and made him immortal on the condition they can never be together again.
* Eirika, too. Despite her naivete and seeing her kingdom and others go down, she keeps going on.
* Eirin's shady new drug, generally considered canon, uses this explanation.
* Eirin's sidekick, Reisen Udongein Inaba, has the ability to manipulate waves.
* Eirin Yagokoro, as a super genius once known as "The Brain of the Moon", basically has the superpower of making
* Eisenhorn, all through his utter refusal to compromise or stop fighting.
* Eisenhorn books display Alizebeth Bequin discovering her limits as a blank.
* Eisenhorn books. He has a shaved head, and he’s a former bounty hunter who can singlehandedly take out a roomful of thugs in seconds.
* Eisenhorn brings us Inquisitor Gregor Eisenhorn, a moderately powered Psyker who falls for one Alizebeth Bequin. Alizebeth is a "Blank" who not only cancels out his powers, but is difficult for him to be around as it causes him pain. Never the less they fall in love.
* Eisenhorn by recording himself reciting one of the (many) Imperial declarations of faith and continually transmitting the recording into the stone.
* Eisenhorn: Daemonhost Cheruabael demonstrates some shades of noble behavior, especially towards the end of the story.
* Eisenhorn has Eisenhorn investigate the death of a nobleman who had had his picture taken at a traveling fair two days before. He discovers that the

photographer’s camera is tainted by Chaos, killing anyone whose picture it takes.
* Eisenhorn, the heretical House Glaw tries to dispose of Eisenhorn and his associates by forcing them to fight to the death against two carnodons. This backfires when Eisenhorn’s team kills one of the beasts and breaks the chains restraining the other, allowing it to leap up into the stands and rampage through the audience.
* Eisenhorn the Thousand Sons, locking them out of the webway and preventing them ever reaching the Black Library, and supposedly Commorragh got sealed off into a pocket universe for good. Games Workshop then decided to retcon the whole thing to right before the campaign started for whatever reason out there. The forces of Disorder being a lot more organised certainly helped their cause.
* Eisenhorn this state of affairs. In the new Rogue Trader rulebook it is shown that unobtrusive bionics do exist, but are frowned upon by the Adeptus Mechanicus who view overt and baroque augmentation as a mark of honour.
* Eisenhorn trilogies both use a combat language called Glossia, which is an elaborate and often invented-on-the-spot system of attack patterns and generally useful code.
* Eisenhower And Lutz. In the final episode, an enemy of Bud's vowed to make his life miserable. He did so by sending both women engagement rings in Bud's name!
* Eisenhower - from "Eisenhauer" (iron-hewer) is a German version of this.
* Eisenhower late in 1944 found a note in his jacket pocket which was the speech he had written regarding the failure of Operation Overlord (i.e. the Normandy Invasion).
* Eisenstein, Starr was able to corner Eisenstein in a building in San Francisco and successfully threw the little man off the rooftop.
* Eisner also did one in "The Appeal" (a short story that can be found in
* Eis Shenron pulled this off when defeated by Nova Shenron and Goku, successfully blinding Goku as well. Unfortunately, he didn't dull Goku's other senses.
* Either an inability to survive in Earth-like conditions, or the ability to survive nearly anywhere.
* Either a songwriter, singer or someone closely associated with the band
* Either averted or downplayed with most non-artificial aliens. The Fobott'r are
* Either averted or played straight (depending on how you look at it) in the anime/manga series
* Either because Elena is in the country illegally, and also because her conservative aunt and other relatives would not approve of her living in a polyamorous relationship,
* either end of the field. This resulted in Barbados defending both ends of the field and they succeeded in bringing the game to extra time and then scored a winning golden goal, winning the match 4-2 (despite only scoring 3 goals), and then qualifying in first place.
* either God or Satan to test the faith of the less committed Christians.
* Either Huey, Dewey, or Louie will be the Savvy Guy to Webby's Energetic Girl whenever she pairs up with one of the triplets. Although Dewey is more energetic than both Huey and Louie.
* Either incarnation of Melchett - and, indeed, any character played by
* either irredeemably evil. On the other hand, some support conversations and several gameplay features in the later games tend to shift more towards the silly end.
* Either Java, Python or C and some of its successors (C++ and C#) are considered some of the main gateways to learning programming in general due to their accessibility and versatility in different fields. On older computers, BASIC served this purpose since it was included on so many personal computers.
* either Mayumi Kamijou or Yumi Matsumiya (who can't be romanced if at least a good part of Mayumi's path isn't unlocked first).
* Either Moraine or Siuan did it as well using Air, to demonstrate how stupid doing it was. While she was going for a gender thing, it's still accurate: at least Rand knows how to

* either of the Bardock backstory, this appears to be a trait among Saiyan men. Goku's mother, Gine, notes that it's very unusual for a Saiyan male to care at all about his offspring or mate. In either version, having sex is implied to be purely for procreation and lineage alone.
* either of them in trying to recover from their younger brother Damian Wayne's death.
* Either of these can be said of something that's technically work-safe but completely insane.
* Either one of the World Wars could easily eat up all the time allotted to history secondary education. Each nation participating in said conflict tend to focus or emphasize their part in the conflict over a broadly global perspective, mostly for nationalistic reasons. American students as well as international students on account of
* Either/Or Offspring: When two species breed, you always get one or the other, never a hybrid.
* Either parallel to or shortly after the Forulkan War, the war against the Jhelarkan happened, but even less is shown of that even though it must have happened recently enough that the Jhelarkan are still licking their wounds and have yet to deliver the promised hostages as of the start of the first volume.
* Either played straight or averted in wrestling. For example, a cowardly heel will often strike his enemy from behind rather than spin them around and punch them; if they do spin them around, it'll be to do their finisher. Faces (good guys) aren't above attacking from behind either, but a lot of faces will spin their opponent around to attack them when they can. For a comedic effect or just to look awesome, a face will wait for the opponent to turn around before destroying them.
* Either played straight or subverted by legendary airline hijacker D.B. Cooper, depending on who you ask. On the one hand, he's the only person who ever successfully hijacked an airplane and escaped custody. On the other hand, many experts believe that this is because he died after jumping out of the plane in the dark over a remote stretch of Washington wilderness while wearing shoes and clothing that weren't suitable for the terrain or weather, which indicates a lack of skydiving and wilderness survival experience.
* Either reminiscent of or the inspiration for Rorscharch's Dynamic Fridge on poor Moloch, Kato (having been instructed films ago to keep ambushing Clouseau at any opportunity as training) managed to get the drop on the Sellers character by attacking from the icebox. Being rather cold by then, he was a lot more savage than usual..
* Either spouse has the one true pairing with someone else, but he's too much of a good guy to divorce or kill. The plot comes to the rescue, and the
* Either subverted or deconstructed with San, the eponymous Mononoke-Hime of
* Either subverted or played absolutely dead straight, depending on your
* Either that or the film takes place in a Verse where — to better facilitate this trope — all three of these events can and do happen
* Either the bubble or flower version, or possibly a combination, occurs in
* Either the family gets famous ("A Simpson on a tee-shirt? I never thought I'd see the day") or the Simpsons is symbolized by
* Either there is no such thing as fate or there is no way to find out what is "fated," no way to see into the future and no prophecies, two effectively indistinguishable states. If the prophecy exists then it is little more than a portentous guess with no actual power or fate behind it.
* Either the song "A Furchester Never Gives Up" or "A Furchester Catastrophe". (Season 2 adds "We Can Solve Any Problem".)
* Either they are teenaged themselves when they first become stars, or they are in their twenties and can pass for teenage with
* Either TV Land or Nick-at-Nite once ran a commercial that lampshaded the entire TV-birth process, including this trope. It went something like this:
* Either under special circumstances never revealed or just randomly,
* Either way, against large numbers of highly maneuverable opponents,
* Either way, he burns him, along with every other remaining animatronic, down in

the next game.
* either wind up badly beaten or dead at the hands of the instigator.)
* Either "World Domination", or Something About Bananas: A character translates another character as having said either a logical phrase or a silly one.
* Either "World Domination", or Something About Bananas: A character translates something as either something serious or something silly.
* Either "World Domination", or Something About Bananas: Someone tries to translate someone else and narrows it down to two completely different options.
* Either "World Domination", or Something About Bananas: When an idiot translates another language, they'll come up with an absurd translation of it.
* Eitri uses an axe to fight in the campaign, though he can use it to cut wood. His brother Brokk has a hammer instead.
* Eiyuden Chronicle Hundred Heroes, it became so popular that the site suffered a 20-30 minute outage due to the sheer number of people pledging to the campaign at once.
* Eiyuu*Senki. A few characters are based on actual female figures, such as Himiko, Joan of Arc and Cleopatra.
* Eiyuu Senki: The World Conquest as the player takes control of the Zipang/Japan army before embarking on the titular world conquest.
* Eiyuu Senki: The World Conquest has Oda Nobunaga constantly ordering supplies from Amasson, though in that universe it's based in South America and not the USA.
* Eiyuu Senki: The World Conquest—given it's even in the title—but for the purposes of having a united world against a common foe that's powerful enough to destroy them all.
* Eiyuu Senki: The World Conquest: Nero's outfit screams this, and she can cast spells as well.
* Eiyuu Senki: The World Conquest, the Illuminati are the main antagonist faction, creating strife and discord in nations all over the world to keep everyone in a state of perpetual war.
* Eizan Etsuya is 17, and not only the holder of the ninth seat on the
* "Ejaculate" is from a Latin root meaning "throw" or "release", and has commonly been used as
* ejection seats that killed the entire crew. One of the pilots for the Gemini 6 mission (which aborted after an unexpected primary engine failure 1.5 seconds after ignition) later remarked on this:
* Ejector pin mark / Knock-out mark: Usually shallow depression on a kit where a metal pin is used to punch a sprue out of a mould. The bane of the Rivet Counter.
* Ejector Seat. Contestants, if they get a question wrong, will be slowly slid backwards in their seats towards the "Danger Zone", and must answer a question correctly to stop themselves. Taking too long will have them be "ejected", which means "eliminated". The contestant's seat tips back and drops them out of the game (literally).
* eject the core from the ship when it's about to explode. These also always fail.
* Ejen Ali: Dos and Trez spy on the M.A.T.A. base with a hidden camera in a robotic cockroach.
* Ejen Ali is titled "Misi: [subject of episode]" ("Mission: [subject of episode]").
* Ejen Ali, which Rudy objected as nonsense and that Djin appeared that way due to his speed. The smokescreens were used to mask his movements, and this is implied to be a technique taught to INVISO agents of M.A.T.A..
* Ejiofor is offered an outrageous sum of money for a debuting, unknown fighter on the undercard. The sum is also not divided into show/win purses. It's apparently a flat fee, whether or not he wins. Only on rare occasions do
* Ekaterina Demina (nee Mikhailova). While being the only Russian nurse awarded with Order of Florence Nightingale and saving more than 300 soldiers during WWII, as a medical officer of the Marine corps she fought on par with her comrades. For example, during the recapture of Bilhorod-Dnistrovskyi, not only she rescued 17 wounded from the battlefield but single-handedly assaulted a fortified German position, taking 14 prisoners and killing 10 enemies in the process.

* Ekaterina, when Catherine's carriage is knocked over and Prince Saltykov opens the door to check if she is okay, Princess is sure that the handsome man is her bethroted, Pyotr Fedorovitch, and tries her best eyelash batting. She is very disappointed to learn that the actual Pyotr is nothing like Saltykov.
* Ekaterin doesn't like to give offence. After falling down four metres into a muddy pond while wearing her best clothes (and a VIP falling in after her while trying to save her):
* Ekimu being an exposition-delivering but suspiciously secretive mentor also makes him similar to Turaga Vakama (who was likewise a mask maker), though Ekimu shares this role with Narmoto, the Protector of Fire.
* Ekipazh cargo (of the human variety) during an extreme mid-air emergency.
* ekklesia who asked him for help in writing Aristides' name (he was illiterate and also didn't know what Aristides looked like); Aristides (being just) wrote the name for him and asked him why he wanted to ostracize Aristides, and the man replied, "I'm just so tired of hearing people call him 'the Just'!"
* Ek Main Aur Ekk Tu, an uptight architect accidentally marries a free-spirited hairstylist after a night of debauchery. They mutually decide to annul the marriage as soon as possible, but he starts to fall in love with her.
* Eko Eko Azarak Japanese film, where students are magically trapped inside a school and being killed off one by one.
* Ekons, as they prefer, can go centuries feeding very lightly if at all.
* Ekundu Cyclops depicts a female figure riding what appears to be a giant phallus (with the twin moons in the background as testicles).
* Ekundu Cyclops features a cyclops jumping on a tree branch that looks like an erect, circumcised penis. A female is straddling the branch, with several mushrooms aimed at her butt.
* elaborated in hilarious detail by Voltaire's filk "U.S.S. Make Shit Up".
* Elaborate Equals Effective: Items and weapons will have a better look as they grow stronger.
* elaborate in which Nathaniel Hawthorne explains that he did not write the story of Hester Prynne; he only found it.
* Elaborate toppling-domino shows often incorporate elements of this trope, such as mousetraps, weight-triggered hanging baskets, or pivoting rods.
* Elaborate Underground Base: A base that has a hangar, silo and laboratory.
* Elaborate Underground Base has quite a few: an egg storage room marked "Storage Room", an arena for creating Frerp eggs labeled "Frerp Arena", an entrance control panel marked "Entrance Control", and an obvious elevator with an "Elevator" label. At the end a number of buildings are created that are labeled "City Hall", "Barber Shop", "Library" and "City Jail".
* Elaborate Underground Base. However, if being forced to leave their old life is the main cause of angst, it's this. At times it can be both.
* Elaborate Underground Base in order to save the rest of the SHIELD higher-ups.
* Elaborate Underground Base it's accessed through what looks like just another section of wall paneling in his loft which leads to a compact lift.
* Elaborate Underground Base strands Bond in a large pond full of crocodiles and/or alligators.
* Elaborate Underground Base: Villains often set up shop in complex and high-tech bases hidden underground.
* Elaborate University High instead. Though they have a reputation for devouring souls if they want to, which is why the protagonist isn't exactly happy about discovering his heritage (plus, his clan has an affinity for pain and his mother is widely considered to have been a remorseless monster).
* Elaborating, Leonard told Penny he couldn't go to a performance of hers because he had a work-related seminar to be at, which Penny accepted as a valid reason. Sheldon noted afterwards that this lie could easily be found out by the simple method of tracking down the event in question and discovering that neither Leonard nor Sheldon were scheduled to attend. Never mind that Penny would not investigate this lie so thoroughly, even if she could. In response, Sheldon told Penny that they weren't going to a seminar, they were in fact going to a drug intervention for

Sheldon's fake cousin, with blog and Facebook page detailing a descent into addiction and despair.
* Elaborating on that, there was only one Viera in the game who seemed to outright like Humes and the world outside her village, but she was a bit... weird (her "liking" could be argued to be a fetish). There is a young Viera who was unsure what to think of the outside world, but at least she liked to be around Hume children. There are two traveling Viera who were very disappointed by what the world had to offer and only were impressed after watching the sea, of all things. One Viera looked down on humans initially, but after learning that a human sacrificed his life in an attempt to defeat dangerous dragon, changes her mind and begins sharing her knowledge with Humes. Fran, one of the main characters and a Viera who has led a pretty interesting life and is best friends (and possibly more) with a Hume, seemed quite regretful of leaving the village and cutting her connection with the supernatural woods, calling it a life of solitude.
* Elaena Targaryen was a pretty young girl when she was in her early teens, but when she grew up she became the
* Elain attacks Lechuck this way with the cursed cutlass of Kaflu in
* Elaine and her boyfriend of the week get into a heated argument leading to their breakup about when it's appropriate to use exclamation points.
* Elaine dates a med student who has repeatedly failed his licensing exam to officially become a doctor. She insists on calling him "doctor" anyway so she can say she's dating a doctor, and helps him study for his exam so he'll pass it. When he finally does, he dumps her immediately.
* Elaine falls in love sight unseen with a video store employee named Vincent after he begins calling her up when she repeatedly rents his staff picks. Entranced by his taste in movies and his enigmatic, moody personality (he's never at the store because he sets his own hours), she figures out where he lives and ends up arriving to surprise him at the same time as his mother, who's horrified to find a grown woman carrying a gift of vodka and cigarettes to her 15-year-old son.
* Elaine has Sue Ellen, "The Bra-less Wonder," who provokes Elaine's
* Elaine hires Newman to kidnap a dog that has been barking loudly all night every night and keeping her awake. When she finally sees it in person, she is surprised to discover how small it is.
* Elaine, his teenage girlfriend. Harry killed their adoptive father Justin DuMorne in self-defense, and Elaine disappeared in the property damage. Note - they were both adopted and fairly late in life at that, so there shouldn't be any
* Elaine is offended when her friend thinks she's not responsible enough to babysit for her and asks
* Elaine Mallory, who starts up a similar Wizard for Hire business in Los Angeles.
* Elaine May (which May co-wrote and has since disowned) was given a G rating, in spite of the fact that "damn" was used several times, "son of a bitch" twice, and there was a scene of one of Matthau's suitors about to take off her bikini top.
* Elaine's boss Mr. Pitt raises his hand in a... familiar way... to indicate to his shareholders that their stock will rise "high". The fact that his upper lip is smeared with ink in the middle doesn't help. And wears a riding suit. And says "We WILL annex Poland by the Spring, at any cost!" (
* Elaine's typical out is to yell "Hello?" very loudly and then pretend she heard someone in the next room calling her.
* Elaine, too: she told Crazy Joe Davola to his face that he has a terrible singing voice. Granted, she was not aware of the "Crazy" part at the time.
* Elaine (who shows up later in the books than Susan, but whom Harry has known longer): She and Harry fall in love when they teenagers both apprenticed to a dark wizard; when Harry turns against the dark wizard, Elaine betrays and nearly kills him (we later find out she was under a geas); and now they've run into each other occasionally but are in no kind of relationship.
* Elain The Bounty Hunter crashes through the window of an office building and fall several stories, splattering on the pavement. She recovers immediately afterwards, and takes more punishment as the series ges on.
* Elain The Bounty Hunter includes characters named Elain and Dennis alongside

characters named Dento, Gop Donsterly and Love Nugget the Heart Eater.
* Elaith Craulnober and Arilyn "Moonblade" < Amnestria Moonflower + Bran Skorlskun. "
* El Alamein: The Line of Fire features the Italian Army and German Afrika Korps fighting in Egypt during the titular battle against the British 8th Army.
* El Alamein: The Line of Fire have avoided the draft but volunteered who gets advised to remove the "Volontario Universitario" (College Volunteer) patch before the veteran soldiers can see it and get mad at the idiot who had actually a good reason to stay away from combat and wasted it.
* El Alamein: The Line of Fire logistic situation of the Italians in North Africa: a few of the old 91s are alongside the standard issue 91/38 because simply there weren't enough of the latter (notably, Serra first arrives from Italy with the original model but is later seen with the 91/38) and they used the same ammunition, while the latter were simply "liberated" from their German allies, if not directly supplied by them (it helped that the mortar used the same ammunition as the Italian one).
* El-Alamein was the turning point for the Commonwealth, putting the Germans on the defensive for virtually the rest of the war.
* El Alma del Diablo, a Mexican, is played by Puetro Rican actor David Zayas.
* El Al security guards ask similar questions of the airline's passengers. For example, they might ask if the passenger saw a sporting event that didn't actually happen. If they say "yes" it's a good sign they're hiding something.
* El amor brujo: Cockfighting seemingly was no big deal in 1967 Spain, as it's merely a background detail when Antonio is at a cockfight, quizzing a guy about Diego's mysterious death.
* Elan, after being stabbed by Nale and healed by Belkar from the brink of death, mumbles "Mommy... I don't wanna go to school today..."
* Elan and Banjo. Banjo even gets a "Brother," Giggles, who leaves to be the god of an orc tribe. *sniff*
* Elan and Hailey from the Order are a general teamwork couple during their adventurer raids. After Elan literally
* Elan and Haley go back to their room to give their pet orangutan a bath for bonus points.
* Elan and Haley leave to speak with Durkon in secret, and they use the excuse "give their pet orangutan a bath", which, according to Elan, is more believable than saying that they went back to their room to rest.
* Elan and Nale's father only considers him one of his "B-list villains".
* Elan and the Beanstalk": Falling damage can't kill a giant – and the giant is reasonable once people actually try talking to him.
* Elan and Therkla, though it was incompletely requited (Elan is mostly devoted to Haley).
* elan are used. The surname Inviere is said to be "Old Gemenese" for "resurrection" (in reality, it's Romanian).
* Elan continuously spouts innuendo and treats women like sex objects, and even Durkon had a fling with an evil female dwarf. Haley isn't off the hook either, blatantly ogling or fondling Elan even before they're an item.
* Elan does end up seeing Julio again, when he desperately needs something that can blindside his very Genre Savvy
* Elan does this all the time, much to the other party members' chagrin. Well, this is Elan's designated role as the party's bard.
* Elanee in the official campaign is very reserved. It takes the foundations of her world being ripped from under her and the only person she has left being set to duel a really nasty giant evil guy to force her to admit she cares about him.
* Elan found out the hard way. Bards can already be surprisingly dangerous, and ever since Elan took a prestige class that gives him special abilities and bonuses based on swashbuckler novel-esque narrative conventions he's become a very competent battler. He will crack a terrible pun with every thrust of his rapier, and the pun will make it strike true and hard.
* Elan gets a bit of this when the half-orc Therkla is killed trying to protect

him. She's poisoned, and Elan lacked the Bard spell that would have cured her. It affects Elan enough that when he reunites with Haley, he reveals that he took "Neutralize Poison" at his next level up.
* Elan has one after Roy suggests not to focus on Tarquin and Nale as part of his family and that he should focus on his figurative family instead. He decides to send a message to
* Elan in particular is extremely well versed in tropes due to being a bard, and is the fastest and most clever in exploiting them. When he
* Elan is also not the brightest bulb in the chandelier, and will do things like insisting on
* Elan is apparently extremely attractive, although it's hard to tell from the stick-figure art. He is the sweetest and most innocent major character in the comic.
* Elan is trying to mend the airship wondering what flavour clouds are.
* Elan learns that the more armor you have, the more it counts against Hide checks. This leads him to the conclusion that wearing absolutely zero armor will make him perfect at hiding, in other words, that going naked will make him invisible.
* Elans are arguably the prime example of this here. They can sustain themselves indefinitely without food or water, and are incapable of dying of old age. However, they're actually humans that have been altered through a "mysterious psionic ritual."
* Elans are psionically upgraded humans who have no limit to their lifespan - although they accrue the aging bonuses and penalties, after that they just keep on going until they are killed by other means. They also don't need to sleep, can forsake food and water by spending an insignificant amount of psionic energy, and cannot breed (they need to convert humans). Outside of becoming a god or an undead, they are the only canonical way of truly living forever.
* Elan's "Dashing Swordsman" prestige class gives him actual combat boosts based on puns. To the annoyance of those around him, they don't need to be
* Elan's enthusiastic attempts to help his friends with his music are sometimes... less than useful.
* Elan's entire family is susceptible to this. Elan, Nale, and their father Tarquin are drawn
* Elan's father later gives one to Elan. He explains every detail of how his plan is going to go, including his own death (that is, the father's death, not Elan's). Explaining
* Elan's father Tarquin inverts this. Elan is the only one he will allow to defeat him — a fair chance anyway — since that would make an epic story. Tarquin is pretty savvy otherwise and takes precautions against letting anyone else get close enough to even try to kill him — especially not
* Elan's father Tarquin is full of this, as he acknowledges that it's in his best interest to help the heroes save the world, so he can keep running his empire, and in the best interest of the heroes to
* Elan's father Tarquin, so why not be the one running it? He uses his trope-awareness to secretly control most of a continent and keep it firmly under his boot with an aim to keep expanding his influence. He even gloats about how his eventual and inevitable defeat will be meaningless because he gets to live the good life for years if not decades until that happens and then his story will live on forever, inspiring generations of new villains.
* Elan's speech in the book and actually builds to a pretty good heartening crescendo, until Elan makes one offhand observation that just deflates the whole thing at the speed of sound.
* Elan suggests that Therkla might be able to get one if she switches sides.
* Elan tells Haley he would like to see her come back from a dangerous fight "in one big Haley-shaped piece."
* Elan the bard. Once he's separated from the party (and stuck in a prison cell, no less), he
* Elan thinks only in terms of narrative tropes which leads to him being
* El Anticristo, two Hispanic dudes from Youtube who say the most aggressive things

about anything via a by-definition-monotonous speech synthesizer, are famous for doing that.
* Elan, to the point where Elan dresses as a wizard to try to be like them. However, after Therkla, a ninja who had a crush on Elan, dies, Elan is extremely upset and Vaarsuvius is simply unconcerned about it, caring more about the danger to the world in the quest they are on. V also disintegrates Kubota without knowing what Kubota did, and accuses Elan of cheating on Haley with Therkla when he expresses sympathy for Therkla's unrequited love for him. V's cruelty causes Elan to distance himself from them.
* Elantris: A fairly weak but completely by-the-book version where pre-Reod and post-restoration, pretty much anybody had a random chance of becoming one of the Elantrians, a race of super-powered, magical, semi-immortal pseudo-deities that basically everyone wanted to be. Kinda sucks if you got in after the universe broke down, though.
* Elantris) and fixed it. Although there were multiple other magic systems on the planet that still worked fine during this time.
* Elantris available to the Elantrians, that heals the person it's used on. To work best, it requires a number of modifier Aons targetting a specific body part and ailment, and using it incorrectly can even kill the patient.
* Elantris, but he's nowhere near as physically powerful as a magically-enhanced Dakhor Monk. He's still able to hold his own against them because he's an incredibly skilled swordsman, while their power has made them arrogant and sloppy.
* Elantris, everything in the once-beautiful, now-accursed city of Elantris is covered in a grimy blackish substance, and anyone who lives there rapidly gets covered in it too. Unusually for this trope, it’s turns out that it’s not fundamentally harmful, can be cleaned off with sustained effort, and has a mundane explanation: it’s a type of phosphorescent microbe that made the buildings shine during the city’s glory days and that died when the city, in effect, lost its power source.
* Elantris: Following a tragic series of romantic problems, Sarene is actually queasy at the sight of gooey romantic bliss. Her kindly escort has to guide her away from any couples at the party he's taking her to, though he logically points out that she's going to need to get over this eventually.
* Elantris is set up this way. One chapter follows Raoden, the next shows what Sarene is doing during the same time period, then Hrathen gets a chapter. Then cycle back to Raoden and continue onward with the story. It's not a hundred percent overlap, and the structure breaks down toward the end, but the idea is there.
* Elantris, meaning that any wound they take, from a stubbed toe to a sword through the guts, perpetually hurts exactly as much as it did when it was new. Most of them go mad relatively quickly. Even though they don't need to eat, they still feel hunger, and they have no way of getting food other than stealing the small amount given as part of each new Elantrian's funerary rites. Somewhere between a third and half of them have gone mad just from hunger. They've even tried eating each other, but for some reason Elantrian flesh tastes so horrid that not even they could stomach it.
* Elantris; political positions are awarded according to who earns the most money. Even the king could lose his throne if someone made more than him in a given year (though being able to count the nation's tax revenue as his personal income makes this unlikely).
* Elantris: Sarene taps her cheek with her index finger when she is deep in thought.
* Elantris shorter, and has developed something of a complex about her height (which the cultural height difference only exacerbates).
* Elantris: The Seons perform many of the functions of a personal computer, including preserving documents and long-term communication in the manner of a videophone.
* Elantris was sent to convert a neighboring nation, but failing that the plan is just to storm in and conquer them anyways. Derethi priests wear heavy armor as their vestments and Hrathen, despite technically being a high priest, is perhaps

the most personally dangerous person in the book.
* Elan, when having some life force drained and then restored: "Whoa... I feel super lightheaded. Except I think my head is pretty dark inside, so I guess I feel darkheaded."
* Elan. While Europe has thankfully not seen any large scale war since 1945, some observers say that the war plans and war games drawn up since still suffer from the "fighting the last war" disease.
* El Apóstol, from 1917, was the first feature-length animated film.
* El Apóstol is the Ur-Example of a feature-length animated film.
* Elara Dorne, a romance option for Republic Trooper characters, isn't really supposed to get into a relationship with her commanding officer but is sufficiently
* Elara Dorne has shades of this; she may not be an attorney per se, but she can navigate the bureaucracy of the Republic military like no other.
* El Arca is mostly remembered for the bottom-heavy lioness Kairel and, to a greater extent, the top-heavy pantheress Panty. Not to mention Panthy's dance scene. Wasn't it also based on Noah's Ark?
* El Arca (Noah's Ark), in the English dub at least, Xiro and Dagnino are having their final battle, and this happens-
* El Arca) were repulsed by the sexualization of animal characters. The movie seemed to have no idea who its audience was supposed to be and consequently, it failed and fell into obscurity.
* Elastica's 'Stutter' is from the point of view of a woman having to deal with her boyfriend's failure to rise to the occasion.
* Elastica - Stutter (Unlike most of these, this one isn't about the ex's personality, it's about his
* elasticity to act as armor for Finn. In the episode "Jake Suit", the situation is reversed so Jake can control Finn to see how much he can take.
* Elastigirl can reshape herself into different forms like a makeshift boat or a parachute, thanks to her elastic powers. In the sequel, she takes on a glider shape similar to a flying squirrel to travel quickly through the city.
* Elastigirl's primary power is her elasticity but the first movie shows her using her body to tether an RV Camper to a rocket ship which implies some degree of super strength.
* Elayne forms a squad of these as her bodyguards when she claims the Throne of Andor, led by the
* Elayne has to turn to mercenaries to help secure her claim to the Lion Throne. They are not played with the remotest hint of sympathy. On the other hand, they're not portrayed as avaricious turncoats, like so many other works, either. At one point a mercenary captain tries to ask Elayne for more money after saving her from an unanticipated threat, and she points out that he was acting within the bounds of his contract and must continue to do so. He grumbles, but the group continue to fight on her behalf. She isn't worried about their loyalty, since no one would hire a mercenary band that changed sides in the middle of a campaign.
* Elbaf is based on medieval Scandinavia, particularly Viking culture, as can be seen by the inhabitants' horned helmets, thatch houses, and that they travel via longboats.
* El baile del perrito" ("The dance of the puppy"). Although the song itself didn't describe the steps, the videoclip plenty of showed (and the moves were pretty risqué).
* El Baille de la Muerte arc and Hansel and Grettel in the Vampire Twins arc.
* El Bananero, which prompts him in a semi-permanent Hulk state out of horny frustration.
* Elbonia and given a quick course in Elbonian culture beforehand. According to the instructor, waving one's hand at someone either means "hello" or "I'd like to see your mittens on my bedroom floor, baby."
* Elbonia before the fall of communism: everything is labeled (pig, house, mud farm). The next panel shows it after the country became capitalist: MY pig, MY house, MY mud farm.
* El bosque de Karadima, based on the true story of Fernando Karadima, a priest who

for decades abused male adolescents. The church gave strict orders not to comment on the film, hoping that the lack of controversy would make the film go unnoticed. It did not work, as the film attracted more than 300,000 viewers, making it the most successful Chilean film of 2015.
* Elbow does this with a blast of trumpets and percussion that repeats several times in "Starlings", an otherwise quiet song. It's more of an awestruck sense of surprise than a scare, though.
* Elbow Grease is sometimes used for hapless rookies who are unaware of the term "put some elbow grease on it."
* Elbow's song "Mexican Standoff" uses this trope as a metaphor for two guys who are competing for the attention of a woman, but apparently neither is brave enough to physically fight the other one.
* Elbow Weapon: A variant of arm weapons above, these are attached to the elbow. Likely to make your hands free.
* elbow when Toph (ironically, "The Swamp" was Toph's first early appearance prior to her actual introduction) pulls off an elbow leech that Korra failed to notice.
* El Burlador de Sevilla,, like other retellings of the legend before it, conflates the two incidents and the two women, making Donna Anna the fiancée of Don Ottavio.
* El Buscón lampoons a duel he fought with Luis Pacheco de Narváez, during which he knocked the fencing master's hat off.
* El Caballo de Troia, which allow the time travel that the whole series is based on.
* El Camino, after confronting and killing Neil and Casey over the $1,800 he needed, Jesse covers his tracks by using some propane tanks rigged with a blowtorch to blow up their workshop.
* El Camino). At this point, he has no clear legal source of income, and he wouldn't have been able to afford it in his previous job as a pest exterminator either. Still, it seems he managed to stay under the radar until after his death.
* El Camino de la Muerte), the most dangerous road in the world, with a yearly death toll of 300. It is built into a cliff face, is only 4m wide, has no guard rails at all, and attempting to pass (any time you meet a car traveling in the opposite direction, which is quite often) can easily send your car over the side and down a 600 m plunge.
* El Capitan and Half Dome in Yosemite National Park most definitely qualify.
* El caso del bacalao against the wall behind by the momentum and leaving them KO.
* El Caso does this quite a bit, since this is a newspaper dealing with censorship. For instance, in episode 4, Jesús hands Aparicio an article and tells him to change the front page behind Cabrera's back... just minutes before the paper goes into the rotary.
* El Caso: Jesús Expósito is still convinced that Pepe Garcés didn't kill himself, and tries to compare the letter of the alleged suicide note to his handwriting. He heads to the police station and asks his friend Commissioner Montenegro for Garcés's forced confession of "The Rosary Killer"'s murders:
* El Caso, one of Commissioner Camacho's favorite ways to soften up suspects is clobbering them with a phone book.
* El Caso, with TVE scheduling it on an overly competitive Tuesday night timeslot and refusing to move it despite its poor ratings performance. The series got shut down after one season, with right-wing TVE execs allegedly feeling uncomfortable about the show being set in the 1960s Spain.
* El Cata a one-hit wonder in his homeland. Strangely enough, the song was never released in the UK.
* El Cazador an alliance (possibly conditional on his knowing Latin). While his reply was not actually given, under the circumstances it was almost certainly a "yes".
* El Cazador de la Bruja: Antonio is average looking and a bit portly, though he does have blond hair and blue eyes. Margarita is drop dead gorgeous, sexy, exotic, and always dressed stylishly and made-up impeccably.
* El Cazador de la Bruja explains this trope, before launching into a rather funny

speech about how someone must surely be talking about her beauty and prowess as a bounty hunter.
* El Cazador de la Bruja follows a bounty hunter named Nadie who, instead of killing her assigned target, decides to become the bodyguard of a young witch named Ellie as they both seek their own freedoms. As the two slowly move further south through Mexico, they find themselves being chased by other bounty hunters and getting involved in a sinister conspiracy from an ancient witch coven. The setting never strays too far from desert and cactus environments and small towns.
* El Cazador de la Bruja found it necessary to let the two female leads wear cat ears in one episode.
* El Cazador de la Bruja is a rather nice and personable girl, who is very very skilled with her pistol and will not hesitate to kill you.
* El Cazador de la Bruja is nominally a bounty hunter, but her actual job seems to blur the lines between bodyguard, hired gun, and assassin.
* El Cazador de la Bruja, Nadie uses Ellis's catchphrase "Yes, sir" when Ellis scolds her on telling a lie in episode 8.
* El Cazador de la Bruja "Squenchy". And there is also another matter with the Sniper Cat in the ED video, too...
* El Cazador de la Bruja. The name is brought back several times in later episodes, gaining a logo, official waitress uniform and annoying commercial jingle. Eventually an entire episode is set in an "Amigo Tacos" restaurant.
* El Cazador de la Bruja turns out to be the product of a project to genetically engineer witches, but these witch powers are genuinely supernatural in nature. The main characters also meet a psychic girl and a harvest spirit disguised as a deceased writer along their journey, without any "rational" explanation given.
* El Cazador protagonist Donessa Cinzia Elena Marie Esperanza Diego-Luis Hidalgo is better known as 'Lady Sin'.
* El Cazador ("The Bloodhound"). Had the series run longer, subsequent ships would undoubtedly have followed the same pattern.
* Elcenia and, with no further prompting, retrieves a spare blanket from the linen closet to curl up on the couch that night.
* Elcenia as a result — except in the case of dragons, since dragon genetics override all this.
* Elcenia: Barashi has two suns, one brighter and one dimmer. As such, everything there naturally casts two shadows.
* Elcenia, dragons' colors indicate their magical abilities. In addition to breathing fire of their color, reds gets improved firebreathing and fire resistance, greens get magical empathy, blues are better shapeshifters, violets can breathe underwater, blacks get improved senses, and whites fly better.
* Elcenia, due to spending the first twenty years of their life suffering from constantly-worsening pain from esu. It's not common knowledge, but this functional immunity to pain extends to spicy food. At Rhysel's wedding, Ehail makes a point of not eating spicy troll arrabek too quickly, to avoid anyone possibly catching on that she's a shren.
* Elcenia: Elcenia-native dragons have this as one of the abilities they develop as they reach adulthood, and can transform into animals, though cannot control what they look like within a species.
* Elcenia: Elcenian dragons can do this as a native trait, and there are a number of wizard spells that do the same thing for speech and written language. A sufficiently odd language—for instance, wolfrider, which includes a telepathic part—is not fully translated by standard spells, and poetry and songs translated do not rhyme.
* Elcenia, kyma can learn elemental kamai, which allows them control over all four classical elements — earth, air, water, and fire. This is in contrast to magic native to Elcenia, where a mage can only control one type of elemental magic, and has to "die" by it first. For instance, someone with the ability to become a water mage would have to drown, but would be alive afterwards.
* Elcenia. Kyma can refuel with food and sleep, pretty similarly to if they had physically overexerted themselves, and they can also sense life energy.

* Elcenia, mages have powers over a single element, however, in order for a potential mage to access their powers they have to get into the a situation where they would otherwise die from their element (e.g.. water mages must drown, air mages must fall from a height that would kill them etc). Fortunately, potential mages can be identified before they manifest powers, though not all of them will choose to access their powers.
* Elcenia: Some Elcenian wizards adopt familiars, animals enchanted to help their bonded wizards channel more magic than they could on their own.
* Elcenia, specifically, is half-elf and half-human, she would have the same characteristics were she 1/256th human or elf, hence "halfblood", since "half-elf" would limit the term to genotype rather than phenotype.
* Elcenia: The titular world is a ten mile-thick square. Elcenia is somewhat unusual in that you can walk over the edge, but not fall off: gravity just abruptly changes direction and you can continue walking down the side of the world, or even across the underside.
* Elcenia to another and is stranded there. Despite superficial similarities the two worlds are at least as different from each other as either is from Earth.
* Elcenia to be possible via magic, though a male-male pair requires a surrogate to carry their child.
* El Chapulín Colorado; a character has a problem, call for Chapulin's help and he tells a story (normally a comedic version of some historical event and/or literary work) with the characters of the present taking the roles of protagonists or antagonists accordingly.
* El Chapulín Colorado (a Mexican TV Superhero spoof); he would fall and then say one of his catch phrases: "Lo hice intencionalmente, todos mis movimientos estan friamente calculados." ("I did that intentionally, all my movements are coldly calculated.") He would also add silly reasons to the fall or otherwise klutz action, such as "testing the ground's stability" or "checking the balance of the walls".
* El Chapulín Colorado. And then when he opened the door to get inside, he tripped with the plank.
* El Chapulín Colorado, but the show is so popular in Latin America and has been in reruns for so many decades that most people would probably associate Ultraman with Chapulin than vice versa.
* El Chapulín Colorado by the same creator, as the episode is a mash of fairy tales.
* El Chapulín Colorado, Chapulin says the kid might end up like the boy from "Peter and the Wolf". After the boy says he doesn't know the story, Chapulin, who doesn't know it either, makes up one on the spot about a wolf that liked to tell lies to the point that, when he met the three little pigs, he claimed to be Little Red Riding Hood. In the end, he forgets to include Peter in his version and, when called out for this, he says Peter wrote the tale.
* El Chapulín Colorado deals with the discovery and education of an unfrozen caveman played by Ramón Valdez and named Chimpandolfo. At the end Chapulin does manage to turn Chimpandolfo into a perfectly civilized gentleman... at the price of him getting crazy and acting like a caveman instead.
* El Chapulín Colorado, Doña Florinda, Don Ramón and Doña Nieves are respectively played by Florinda Meza, Ramón Valdés and Maria Antonieta de las Nieves.
* El Chapulín Colorado. El Chapulín would often exploit this to make his opponents hurt themselves or one another (most of the paralyzing horn episodes involve two bad guys).
* El Chapulín Colorado features several examples of this trope:
* El Chapulín Colorado guessing about the secret passages of an old house. Cue this gag:
* El Chapulín Colorado has a twin sister that is also played by the same person (Florinda Meza).
* El Chapulín Colorado has to help somebody in a museum, this eventually happens, more often pulled by El Chapulín himself.

* El Chapulín Colorado: He doesn't even have a civilian identity, his name really is Chapulín Colorado and he is never seen without his superhero clothes.
* El Chapulín Colorado instead. During the second half of the episode, Chapulin, (who is in small size) tries to carry the bomb to the window to dispose of it. He manages to reach the window but with only 5 seconds left, and he's ready for the explosion... only for a small "PUM" flag to pop out of it, and the episode ends.
* El Chapulín Colorado. Its resounding success allowed for all kinds of Mexican shows to get screen time in foreign channels.
* El Chapulín Colorado most often uses his "Chipote Chillón" ("Squeaky Mallet") as his main weapon. Silly-looking, but pretty damn effective most of the time.
* El Chapulín Colorado of a man to work, but he refuses. El Chapulín hits him with his Chipote Chillón sending him upwards and getting his head stuck on the upper floor. He spends the rest of the episode trying to get him out.
* El Chapulín Colorado (of which there are lots) in quick succession.
* El Chapulín Colorado: "Oh, ¿y ahora, quien podrá defenderme?" [Aw, and now, who could defend me?]. These problems often include supernatural creatures or aliens.
* El Chapulín Colorado once helped a western town to post wanted posters with the criminal's face and the inscription "Lo Queremos Vivo o Muerto - Mucho Cuidado". (Roughly "Wanted Dead or Alive - Caution") When confronted by the criminal Chapulin tried to appease him by ripping a piece of the poster so it's red "Lo Queremos Mucho" (Very Wanted)
* El Chapulín Colorado. One of the mobsters was angry that he cut an ace, which he knew due to a little mark behind it, while the other said that's no problem since he had another one under his sleeve.
* El Chapulín Colorado paralyze people with a bicycle horn, shrink to about 4 inches tall, and show up at Venus, ancient Japan or Nazi Germany.
* El Chapulín Colorado portrays the King in said story as always making a bunch of ridiculous royal decrees, such as "Rain on Saturdays is forbidden" so he can go hiking.
* El Chapulín Colorado recursively reference each other at different points, and they eventually got a crossover where the El Chavo characters believe Chapulín is only a fictional superhero and are surprised he really exists, there's also jokes about how Chavo and Chapulín are played by the same actor.
* El Chapulín Colorado said he learned English thanks to records and proceded to repeat the record, even the part where it broke.
* El Chapulín Colorado show the different villains like El Cuajinais, Chory, Rascabuches and Pocastrancas playing pool.
* El Chapulín Colorado, so probably will be more accurate to say always Villain of the Week.
* El Chapulín Colorado the hero occasionally had a gadget that allowed him to do this. He mostly used it to arrange embarrassing accidents for the bad guys.
* El Chapulín Colorado. Whenever somebody gets a hankerchief drenched in chloroform near their face, they'll invariably fall unconscious a few seconds later.
* El Chapulín Colorado, whenever the titular hero is invoked, he'll be told by the person who called him that another person is causing problems, Chapulin will say he's detecting an enemy with his vinyl antennae, Chapulin would knock out the other person, and proudly proclaim he's subdued the villain. The person who called hikmin would then inform him he knocked out an ally. Other episodes has him ignoring, or even aiding the actual villain while continually attacking an ally until very late on he'll be told of his mistake.
* El Chapulín Colorado when his wife started making more money then he did) showed up needing help, Chapulin encouraged him, stating he needed to show men could work.

* El Chapulín Colorado when Juleo starts botching the lines, even repeating Chapulín's "You screwed it up, you beast!" to her, not realizing it was meant for him.
* El Chapulín Colorado (where they played regular characters.) They consisted of some combination of himself, Carlos Villagrán, Ramón Valdez, Florinda Meza, María Antonieta de las Nieves, Edgar Vivar, Ruben Aguirre, and (occasionally) his younger brother Horacio Gomez Bolaños.
* El Chapulín Colorado, while visiting a museum Doctor Chapatín mistakes a grumpy-looking guy for an idol and tries to take a photo of him. There's another involving a wax statue exhibit, and a guy mistakes the museum's curator for a statue, getting startled when he talks
* El Chapulín Colorado, with a coconut dropping on his head every single time (bar the last one, which El Chapulín catches before it hits him).
* El Chavo del ocho: A few episodes hint that Don Ramón has a collection of naughty magazines (which apparently el Chavo himself knows of, go figure).
* El Chavo del ocho: After one of the times Doña Florinda unjustly punishes Don Ramón, his daughter tried to exact revenge by stealing her towel and covering it with dirt. It backfired because the towel belonged to Don Ramón (He, Doña Florinda and Doña Clotilde share the same clothesline). While usually not approving revenge, he actually tried a hand on it by dirtying a piece of clothing belonging to Doña Florinda, but he mistakenly picked one belonging to Doña Clotilde.
* El Chavo del ocho always called Don Ramón "Ron Damón". The latter didn't seem to mind, though.
* El Chavo del ocho and other series by Chespirito have gained some detractors that consider that the series glorifies violence and paints Mexico in a bad light.
* El Chavo del ocho because, as a poor kid with no money, Chavo doesn't have an easy access to food and drink as other people in the Vecindad.
* El Chavo del ocho, causing them to walk around with a limp. At the end, La Chilindrina runs into Chavo, who is also walking like them, and asks if he hurt his feet too. He says no, and when Chilindrina asks why he's walking around like that, he explains he ate a whole cake by himself, and later he couldn't make it to the restroom.
* El Chavo del ocho chastised Don Ramón for threatening El Chavo.
* El Chavo del ocho chastising Don Ramón for hiding to avoid paying rent.
* El Chavo del ocho deceived people, Don Ramon laughed at how the trick was turned on Chavo.
* El Chavo del ocho did it when spying on Doña Clotilde's house. Somewhat justified given that they all vary in heights, so it works for them.
* El Chavo del ocho did not have a laugh track and it was explicitly mentioned that it was for respect of the audience. However, it is worth noticing that it actually used certain music tracks that played after each joke.
* El Chavo del ocho died during the several dubs the series' had since 1984;
* El Chavo del ocho, Don Ramón invites el Chavo to watch a football match at his home, and then when they try to turn the TV it doesn't work. Don Ramón spends the next minutes trying to turn the thing on, until he ends up angrily throwing it to the ground and stomping on it. Then la Chilindrina comes up to tell him there's a power outage in the neighborhood.
* El Chavo del ocho: Don Ramon invoked the trope while selecting a cast for a play held at the neighborhood when Dona Florinda complained about her son playing a villain instead of a hero. She bought the excuse.
* El Chavo del ocho Doña Florinda. Señor Barriga and his son Ñoño to some extent could be counted too but Señor Barriga as the owner of the building collecting the rent has a reason to be there.
* El Chavo del ocho: Doña Florinda usually slaps Don Ramón for things that weren't his fault. There were occasions he doesn't even know what she's faulting him for.
* El Chavo del ocho: During one of the several occasions where Doña Florinda decides to slap Don Ramón for something she thinks he did to her son, he

manages to defend himself by placing a bucket on his head. Professor Jirafales is so outraged he punches Don Ramón for it.
* El Chavo del ocho during this exchange between the title character and Quico:
* El Chavo del ocho, each time the title character gets scared he immediately paralyzes — after adopting an awkward pose nicknamed "la garrotera". The only way to snap off from this is by splashing water on him. Normally a small splash in his face works, but meaner-spirited characters often empty whole buckets on the poor kid.
* El Chavo del ocho, especially when she teams up with Chavo and Kiko for mischief and/or she’s trying to trick them. Chilindrina shows a normal intelligence, if not higher than usual for a little girl: she’s not only very astute but also quite clever in the school episodes (her bad grades probable being a consequence of laziness instead). Of course, considering that stupidity is one of the main characteristics of both Chavo and Kiko, it isn’t hard to be portrayed as smarter.
* El Chavo del ocho, features characters made in Flash in CGI backgrounds.
* El Chavo del ocho happy that he missed it, let alone when Chavo tells him it was an overhead kick goal, to top it off.
* El Chavo del ocho has an American Football episode, a Ping Pong episode and a Baseball episode too.
* El Chavo del ocho has a whole bunch of them, sometimes occurring one after the other:
* El Chavo del ocho has been dubbed into Brazilian Portuguese many times (most memorably at the Maga studio). The only consistent voice was Martha Volpiani as Florinda.
* El Chavo del ocho has Chespirito with a bandaged hand (due to broken fingers). In-universe, Don Ramón mentions that El Chavo broke his fingers last week from playing with his hammer.
* El Chavo del ocho hit him with it (not to mention the lollipop actually belonged to Quico and she'd stolen it).
* El Chavo del ocho). In one script, el Chavo sells "aguas frescas" (soda). In the 1974 version, the prices for a glass of water were 50 cents, one peso, or two pesos. In the 1989 version the prices were 100, 200, and 300 pesos.
* El Chavo del ocho in Spanish). In both cases, they had to hide the dogs because Dona Florinda doesn't like animals in general and put the "No Pets Allowed" sign in the Vecindad with the warning of throwing them to the streets if she finds one of them.
* El Chavo del ocho is a comedic portrayal of life among the quirky residents of a poor neighborhood, especially El Chavo, a homeless boy living in a barrel.
* El Chavo del ocho is perhaps the most famous example in Latin America. Invariably, whenever he shows up to collect the rent at the neighborhood, he gets hit by El Chavo.
* El Chavo del ocho is prone to this, mostly when someone insults him.
* El Chavo del ocho is Quico calling out for "¡MAMÁ!" whenever Don Ramón hurts him (or even not) in some way. This usually, but not always leads into the gag where Doña Florinda slaps Don Ramón, etc.
* El Chavo del ocho is that, whenever somebody says "stupid", "fool" or similar words and Quico is walking nearby, he immediately asks "Were you talking to me?"
* El Chavo del ocho: La Chilindrina sometimes pulls this on El Chavo or Quico when they make her mad. It's also been inverted: when El Chavo is kicking around the ground in anger, La Chilindrina walks by and she gets kicked in the shin.
* El Chavo del ocho. "La Chillindrina? Sick? Of course..." Then he noticed his landlord appearing and, to avoid blowing up his own lie, resumed his crying act. "...she is, she is!"
* El Chavo del ocho Ñoño is very similar to his father Señor Barriga (both played by Edgar Vivar), and we also learn in a flashback that Quico is also identical to his father (again, played both by Carlos Villagrán). Of course, if we consider that also Doña Florinda is identical to her niece Popis and Doña Nieves to her great-granddaughter Chilindrina (again same

actresses respectively), this seems to be not uncommon in El Chavo’s Universe.
* El Chavo del ocho of course complies, but hides them in so many places that Doña Florinda and others accidentally find and activate them several times.
* El Chavo del ocho: Often, El Chavo is about to punch Quico out in anger for something, and then la Chilindrina chastises him for it, before giving him a brick or another object so he can hit Quico harder.
* El Chavo del ocho on the neighborhood floor. El Chavo finds it but thinks they are just collectible stamps, he even gets angry at seeing all of them are the same.
* El Chavo del ocho plays this straight, and just plays with this in the same Paty episode. When Paty kissed Kiko, he fainted, prompting Chavo to wake him with bucket-full of water. When Chavo and Chilndrina asked about why he fainted, he told them what happened, and Chilindrina tried it with Chavo, which produced this exchange:
* El Chavo del ocho, Professor Jirafales comes at night to give Doña Florinda a serenade with a mariachi, but with Mr. Barriga lurking around pretending to be a ghost, she pulls out a shotgun and fires at the air, scaring them away. After the misunderstanding is clear, Professor Jirafales says he'll sing "Acapella", and Doña Florinda first assumes he's going to sing for someone named "Capella", before he explains "Acapella" means without music.
* El Chavo del ocho, Professor Jirafales enters the classroom to find that someone drew a cartoon of him as a longsausage and labeled "Maestro Longanisa". He immediately proceeds to correct it as "Maestro Longaniza" and sit down before realizing what he saw.
* El Chavo del ocho, Quico and El Chavo play pretending they're dogs, but El Chavo takes it a bit too far and bites Quico in the leg. Later, Mr. Barriga arrives and El Chavo knocks him to the floor and Quico, thinking he's playing dog too, bites him in the rear.
* El Chavo del ocho, Quico is often prone to these, especially when someone makes a remark about his lack of intelligence.
* El Chavo del ocho, Quiko is this full stop. Whenever he sees Chavo playing with a simple handmade toy, he runs into his apartment, takes out a flashy store-bought one, and brags about it. If Chavo asks if he can play with it, Quiko will tell him no. He rarely shares his snacks with Chavo either.
* El Chavo del ocho, Ramón Valdés is cast as Don Ramón, who was (as described by other actors in the series as well as Ramón's children) essentially himself, but without a stable income. Allegedly, when Chespirito had him cast as Don Ramón, the only instructions he gave Ramón was "be yourself".
* El Chavo del ocho), she was surprised at her landlord's order because she thought he was on a diet. His response for her comment was asking for one of the chickens to come earless.
* El Chavo del ocho: Since the cast of the show is composed entirely by adults, this hairdo serves as one of the visual clues to identify characters as young and immature.
* El Chavo del ocho, sometimes when Quico gets angered at something, he starts talking normally, gradually raising his voice until he says the last words shouting at the top of his lungs (often directly in the ear of his listener).
* El Chavo del ocho (starting at approximately 2:23). The confusion in this case comes especially when Don Ramón mentions the "pinos", which in Spanish can mean either "pine trees" or "bowling pins", and el Chavo obviously thought he meant the former.
* El Chavo del ocho The "Him" in question is Jesus; it reminds the viewers/listeners to look for Jesus.
* El Chavo del ocho theme playing on the background. Then she sees one with two assistants carrying Don Ramón after he got knocked out, cue the music dropping.
* El Chavo del ocho: There's an episode where el Chavo leaves the neighborhood because he couldn't sell a lottery ticket. Quico and la Chilindrina ask him how he's gonna get by.

* El Chavo del ocho: There's one instance when Quico mocks el Chavo for playing tennis without a racket or a ball. Then he sees la Chilindrina rope-skipping without a rope. When laughs at her, she uses the "imaginary" rope to strangle him.
* El Chavo del ocho "The Witch of Apartment 71", start to make sounds and move things that the adults believe are being done by the ghosts, and frighten them in return.
* El Chavo del ocho, this is how Quico rats out El Chavo about accidentally throwing a gum in a hat (that belonged to Don Ramón's boss). Unusually for this trope, it's intentional on his part to get El Chavo into trouble:
* El Chavo del ocho to find Quico for her and Doña Clotilde asked Quico to find El Chavo. The two boys kept missing each other until they gave up searching.
* El Chavo del ocho used Jean Jacques Perrey's "The Elephant Never Forgets" as its theme tune, which in turn is an arrangement of Beethoven's Turkish March (aka Marcia Alla Turca)
* El Chavo del ocho, was practically his actor, Ramón Valdez, just without a stable income. Other actors and his relatives stated that Don Ramón's mannerisms and clothing were the same Ramón Valdez used in real life. Chespirito, the director, allegedly only gave Ramón Valdez one instruction on how to be Don Ramón - being himself.
* El Chavo del ocho, when Don Ramón accuses Doña Florinda's cat of eating his goldfish, he pulls out his old matador sword, and cape, and goes offscreen to kill the cat. We hear the cat mewing, and Don Ramón screaming, and after a brief time, the cat meows a mariachi send off, and Don Ramón comes into frame, victorious.
* El Chavo del ocho when the fly flees and El Chavo destroys the restaurant and scare away the other customers while trying to recapture it.
* El Chavo del ocho, with El Chavo playing El Chapulín. At one point, el Chavo is called to come on stage with the typical "Oh, and now who could defend me?", but doesn't appear. La Popis then has to come and explain that El Chavo went to the bathroom and will come shortly.
* El Chavo del ocho would often come into frame and ask if someone is calling him.
* El Chavo del ocho would sometimes have a musical number near the end of the episode. In "Oyelo, Escuchalo", at one point Quico says "Eso, eso, eso, eso", one of El Chavo's catchphrases.
* El Chigüire Bipolar is told around a man who encarnates that trait.
* El Chombo. El Chombo never had another UK hit, but he became a one hit wonder in the US with the more straightforward "Dame Tu Cosita" in 2018.
* El Cid and a scar that runs diagonally from beneath his right eye to his jawline.
* El Cid, and threatens both Christians and Muslims by conquering them through force.
* El Cid authority on El Cid back in the day, was famously hired as the production's historical advisor, something that was boasted in the Spanish print's credits... just to have about each and every of his notes completely ignored in favor of telling a story that's mostly fictional.
* El Cid between Rodrigo Diaz de Vivar and Jimena's father. The latter ends up killed in it.
* El Cid campaign is narrated by a woman in the city of Valentia. In the second scenario, she reveals herself as Jimena, El Cid's wife, who tells the player about her husband's accomplishments.
* El Cid is a knight on a quest to regain his honor by saving his home from an invading army.
* El Cid Ploy: A deception where people are convinced that a dead person is still alive, commonly by having someone else impersonate the deceased.
* El Cid's harem, something which never even remotely happened in real life.
* El Cid She escapes him by offering him some wine and then whacking him in the head with the jar.
* El Cid: The titular character starts out as a clean-shaven youth who grows a beard during his exile.
* El Cid to publicly swear his lack of involvement in the assassination of his

brother. And his story just gets even more heroic and legendary from there.
* El Conquistador) behaves that way. It's only expected that the bravest and boldest of all people survives the school.
* El Conquistador. He is an explorer so bold and clever that he even discovers Europe several years before Colombus even ships. He even recognizes that he isn't where he expected to be, and recognizes the threat that the Europeans impose on his people and culture.
* El Conquistador. He is both captain of soldiers and a sea captain, so clever than he even discovers Europe several years before Colombus even ships the three Caravels.
* El Conquistador. He saves Quetza from being sacrificed in the Temple, and he is a wise and intellectual teacher, a sage who achieved his position in the Elders Council by his own sapience, not by his age or connections. He is a tutor of the Golden Age, as he misses the Toltec wisdom over the Aztec warmongering.
* El Conquistador named Quetza sailing East to discover the legendary origins of his people. He first encounters Europe, though.
* El Conquistador, so they have an advantage over the traditional japanese ninjas.
* El corazón nunca se equivoca: Ari becomes this to Carlota after finding out about her relationship with Ubaldo. Later on, they tell Temo, so the three of them are keeping the secret, mostly from Diego (Ubaldo's son).
* El corazón nunca se equivoca call each other "tahi", an acronym of the phrase "I love you to infinity" in Spanish.
* El corazón nunca se equivoca: Diego and Temo are still pretty good friends, even though Temo is dating Ari and Diego is still in love with Temo.
* El corazón nunca se equivoca: Diego and Temo dated briefly before the start of the series, and broke up because Temo was still in love with Ari.
* El corazón nunca se equivoca focusing on the romance between its two male leads, Ari and Temo, and their new lives in Mexico City.
* El corazón nunca se equivoca: One of Ari's birthday surprises for his boyfriend, Temo, is a lovely sunflower.
* El Crimen del Cacaro Gumaro", one of the main characters attempts to revive his father's old movie theatre by holding a film festival and we get to see a brief part of one of the films: a European family sitting on a couch watching a wall with nothing on it but a cuckoo clock. After a brief moment the clock falls and the father laments that they have nothing else to watch.
* El Crimen del Padre Amaro is described in the promotional material as beautiful, there's one scene in which she takes the lead character, Amaro, to the construction site of a new hospital and while being there the construction workers constantly ogle and whistle at her, Amaro even makes a comment on this. Also, Amaro is described as "very young and handsome", with several women on the town sighting over him.
* El Crimen del Padre Amaro when questioned if his Diocese had received money from drug traffickers.
* Eldar always go into battle with spirit stones, which are small gems that are made to capture the souls of the Eldar when they are killed so they can be retrieved later. Otherwise their souls will end up in the warp where it will be devoured by daemons, especially Slaanesh.
* Eldar and caused a Chaos god to come into existence through their own hubris and hedonism (The Craftworld Eldar are the descendants of the Eldar who tried to stop the out-of-control hedonism before leaving, and the Exodites left long before then).
* Eldar and Dark Eldar also have no gender restrictions in their societies. Males rarely become Howling Banshees or Wyches, but only for symbolism reasons, and some still choose to be.
* Eldar and Dark Eldar of a long-fallen empire - so they have both the ability and the incentive to make every troop count.
* Eldar and Space Marine pilots wear the same sort of armor as the ground troops, Imperial Guard pilots wear heavier armor and breath masks in the style of the Stormtroopers, and Chaos pilots are typically

* Eldar. An undisciplined Eldar mind is capable of terrifying extremes — the species spawned a Chaos God during the depravity of the Eldar golden age — so they develop different personae for wartime and peacetime to ensure that they don't lose themselves in bloodlust. They don't always succeed, and Eldar who become trapped on the Path of the Warrior will lose their old identities and take up the name and armor of an Exarch who came before them.
* Eldar are described as World-Class beauties physically, but when they move they are so graceful and swift that it looks unnatural, dipping straight into
* Eldar are extremely good in this in general, since their vehicles can skim across long distances and over obstacles, and their builder units can teleport across half the map and then build Webway portals that you can teleport your whole infantry army (and
* Eldar are fast and fragile, but more specialized than weak, their unit are extremely effective in the right place. This trope applies more to their basic troops and vehicles; while HQ and Elite units, especially
* Eldar are fond of ostentatious color schemes, and the Void Dragon Phoenix, a special variant of the Phoenix ground-attack craft, is depicted with a full-body paintjob reminescent of a dragon's scaled hide. Their craftworld cousins are also known to embellish their vehicles - a motif from Biel-Tan is a long coil of thorned vines, while the Wild Rider clans from Saim-Hann are even more individualized.
* Eldar are mostly relatively restrained, just going for functional bling like magic gems that increase their magic power, but Eldrad goes a bit over the top.
* Eldar Aspect Shrines also arguably qualify-they are where an Eldar embarks on the path of the Aspect Warrior, and trains in the mentality and combat style of the chosen Aspect.
* Eldar aspect warriors practice some sort of battle trance seemingly to avoid this (and also for efficiency, of course). At one point some of them fail to properly exit from this
* Eldar Aspect Warriors put their weapons where it fits the theme of the aspect. Striking Scorpions have helmet-mounted guns that resemble an arachnid's mandibles, on a Swooping Hawk you can see leg-mounted downward-firing grenade launchers... so on and so forth.
* Eldar Aspect Warriors will usually have their Aspect rune painted on their helmets, and then have it molded or painted onto their armor in several places.
* Eldar Autarchs, many of whom having mastered the Swooping Hawk Aspect, use the same mechanical wings to enter battle, even using them to leave battle for a short while and return after dropping a number of grenades.
* Eldar averts this trope, as they prefer to bring other species into their sphere of influence through diplomacy and other nonviolent means before resorting to a military conquest. However, there are sometimes aggressive or embittered commanders who will push for a population to be wiped out, or a species is deemed unfit for peaceful coexistence, in which case this trope is used.
* Eldar Bonesingers, their equivalent of engineers and artisans. They literally sing to bring
* Eldar can go either way largely because each of their Aspect Warrior castes have specific uniforms. This ranges from the dark and intimidating
* Eldar Craftworlds are also this, as souls of dead Eldar are placed within the Craftworld's infinity circuit to protect them from being devoured by Slaanesh. There's an in-universe quote describing the Craftworld as "a living being, with a hundred thousand minds".
* Eldar due to the hundreds upon thousands of Eldar minds inhabiting the circuit and the souls often provide advice and information to the living Eldar.
* Eldar empire, the aliens started long-term alteration projects to make some worlds on the galactic fringe inhabitable. Ten thousand years later these Maiden Worlds have developed into pristine paradises that unfortunately are very attractive to human colonists. Often the first sign that humans have settled a Maiden World is an Eldar warhost bent on exterminating the vermin infesting what they consider part of their ancestral empire.
* Eldar Farseers. They have absolutely no understanding of military matters and

guide their brethren relying only on future precognition. Whenever said prophecies are incorrect, interpreted incorrectly or simply based on chance
* Eldar gear is a unique blend of highly-advanced technology and psychic "sorcery" — their robots, for example, are well-crafted frames animated by the spirit of a fallen warrior held in a crystal. Their core construction material is Wraithbone, which is basically concentrated, solidified psychic energy. It can apparently assume a lot of properties, from being hard as metal to as flexible as soft plastic, with conductivity being easily manipulated.
* Eldar half use this trope. They carry soulstones to capture their souls when they die. Although they don't get new Eldar bodies they can be used to control equipment, effectively giving them new robot bodies instead. One craftworld is known for using many more vehicles than normal. This is not because they're any better at it, it's just that they were nearly wiped out at one point and are forced to rely on their dead to form the bulk of their army.
* Eldar Harlequin Death Jesters make their macabre motley costumes from the bones of their predecessor(s) as a sign of respect and honour. They know full well that their own bones are probably destined for the same fate.
* Eldar Harlequins are also masters of fragile speedster combat, relying heavily on speed, agility, and stealth to compensate for their almost complete lack of armor. They even have the unique ability to vault over terrain and screening troops.
* Eldar Harlequins provide a straight example from the same universe. Being
* Eldar Harlequins wear a variety of carnivalesque, abstract, horrifying, blank, and uncanny masks to express their characters in the great masque that is their calling. Of particular note is the Shadowseer, playing Fate, whose mask is featureless, mirror-like, and reflects the destiny of whoever looks into it.
* Eldar. In dire emergencies an Eldar's soul may be recovered from the Infinity Circuit and used to pilot a Wraithguard or Wraithlord construct in battle, but the Eldar view this practice as akin to necromancy, since it's irreversible and means that the pilot's soul is lost if its Wraith-construct is destroyed.
* Eldar in general. They're willing to do whatever it takes to preserve their
* Eldar into existence entirely through our own bloodthirst and depravity.
* Eldar, of course, have the aforementioned 'cleaner robots'(like the small 'warp spiders' that maintain each ship's Infinity Circuit-the aspect warriors were actually called after those, apparently), and goodness knows what else keeping their psychically alive spacecraft made out of a self-regenerating material clean. And tau? Well, this is the race with the caste system that makes them consider the guy that cleans out the latrines to be on par with a bureaucrat.
* Eldar of Saim-hann and Biel-tan. The Eldar of Saim-Hann are proud, boisterous barbarians who live in tribal clans, ride jetbikes and settle their differences with duels. The Eldar of Biel-tan are mostly disciplined and merciless Aspect Warriors, and their craftworld is run not by seers but autarchs and exarchs. The two craft worlds seek to reassert the Eldar as the masters of the galaxy and travel around attacking the upstarts squatting on their planets. Even Eldar in civilian occupations often take to battle as Guardians, and unlike most citizen militia who are fielded out of desperation, the vast majority of Guardians have experience from a warrior path and can hold their own against the trained armies of other races. Anyone who believes that Eldar are all clairvoyant pussies who manipulate other races into doing all the hard work for them should tell that to the Swordwind.
* Eldar of the dead to field armies of Wraithguard to supplement their forces. To quote Yriel, "We may have won the battle, but our ancestors have lost their souls."
* Eldar Phoenix Lords wear armor and wield weapons forged probably more than 20,000 years ago, all of which are at least as good as their modern counterparts. It should be noted that Eldar armor is psychically bonded to the wearer's spirit stone, and can presumably deform or expand (to an extent) to accommodate to new wearer.
* Eldar play this completely straight, right down to crystal spires and toga-like clothing. They used to play it even straighter before the Fall.
* Eldar pretty much marched humanity through a second Renaissance, uniting them

under a single banner to became the single most powerful race in the galaxy, on the cusp of entering a new golden age, reconciling the power of science and technology with a rational humanist agenda. Then along came the Horus Heresy and several millennia later, you have the tabletop Imperium that we all know and love.
* Eldar sentiment about humanity as a whole, at its worst, is that we are little better than vermin infesting their former territories, fit only for extermination. The more militant Craftworlds, especially Biel-tan, would happily make this happen.
* Eldar Spiritseers are explicitly compared in-universe to necromancers. Although they don't animate corpses, Spiritseers are psykers able to commune with the spirits in the Infinity Circuit, and guide the departed souls as they take to the battlefield as Wraithguard or Wraithlords. The Eldar still regard the practice as abhorrent, but
* Eldar's to avert the trope in contrast to its near-ubiquity among humans.
* Eldar Swooping Hawks and Dark Eldar Scourges do this by use of actual
* Eldar take pains to avert this since they're a race on the verge of extinction. They use a combination of psychic foresight and a swift, highly-mobile army to strike without warning, achieve their objectives, and withdraw, ideally without taking a single casualty.
* Eldar tanks are also commonly known by their imperial type names. For some vehicles, the Eldars' own name for them is also known, for example the Falcon is properly called Enfaolchu and is named after a bird in the Eldar mythology.
* Eldar technology is similarly unable to improve a lot because they are, as a species, essentially all refugees and mostly unable to sustain their population, never mind their technological infrastructure. They do innovate though, but not often and only in terms of re-applying existing knowledge and not making new discoveries.
* Eldar. The Eldar do know how to repair the Webway, but due to their rather dire circumstances, lack the resources needed for such an undertaking. The Cicatrix Maledictum's birth did damage to it too, leaving some sections of it inaccessible. The Necrons can also use the Webway through their Dolmen Gates. However, they only work one way and the Webway itself doesn't like unauthorized entrances to it.
* Eldar The Eldar were also created by the Old Ones to fight in the War in Heaven.
* Eldar them - as Eldar they are already inhumanly fast and agile, and on top of that all Harlequins fight with anti-grav "flip belts" allowing them to cross the battlefield in great leaps and bounds, as well as holo-fields that turn them into swirls of brilliant colors.
* Eldar. This may not sound like much, but considering what kind of stuff the Dark Eldar do, it's a really big improvement.
* Eldar to take a pool of untried applicants and kill off the incapable, so they use psychic training to produce the same result with just as much pain and suffering, but no casualties.
* Eldar trusted allies: "Make no mistake, human. We do not fight for your Emperor. We fight against Horus."
* Eldar turned High Admiral of Iyanden whose Eye of Wrath can blast everything around him once per game.
* Eldar. Unsurprising, since they were created to be weapons, not people.
* Eldar Warp Spider Exarches have access to Power Blades, described as fitting onto the forearm, allowing their wielder to use other weapons in addition to the blades.
* Eldar Wraith constructs are robots piloted by the souls of their dead. They use the a few souls in some vehicles too, though the
* Eldar Wraith technology is somewhat similar to the Necron example in that once-living souls are grafted into completely artificial bodies.
* El Deforma specifically so they are not confused with its actual humor content.
* EL-DE-Haus to lobby for the city to turn the place into a museum and a memorial.
* Elden Henson's brothers. His hairstyle also clearly evokes Foggy's hairstyle from seasons 1 and 2.
* Elder Abuse: I don't respect those old farts, and I'll treat them however the hell I want!

* Elder and older grey dragons exude a petrifying essence that can cause immobilized foes to become stone. Ancient grey dragons can petrify living beings with a swipe of their claws. This power overtakes grey dragons at the end of their lives, petrifying their bodies in turn.
* Elder Crone Magatha Grimtotem, chieftain of the Tauren's Grimtotem tribe and is one of the highest-ranking Horde officials in the game below the racial leaders. Her husband, the original chieftain, died in a "climbing accident." Her kinsmen are evil and stopping their schemes is the object of many quests for Alliance and Horde players alike. She has ties with the Undead and her ultimate goal is to make the Grimtotems the Tauren's ruling clan. This led to her murdering Cairne Bloodhoof and staging a bloody coup in Thunder Bloof before being brought down by Garrosh Hellscream (who was still "good" at the time despite his questionable tactics) and Cairne's son Baine.
* Elder Daughters of Kali do double damage to anyone attacking her children.
* Elder Dragons cannot be captured and thus are completely immune to traps. Even if the Elder Dragon is weak to electricity and can be paralyzed, it will walk right through a shock trap like it doesn't exist.
* Elder Dragons, who are the progenitors of various types of monsters, including but not limited to Dragonbrand, Destroyers, the Risen (Undead), and various other monstrosities.
* Elder Evils, a sourcebook on world-ending cosmic horrors, has two examples.
* Elder Evils described has the night sky grow more and more alien as the Evil's influence grows. At first, the stars appear in different locations and glow in strange and unsettling colors, while constellations warp, shift and move around the heavens. As the sign strengthens, arcane energies burn across the sky in strange auroras, alongside constant meteor showers.
* Elder Evils is about Zargon the Returner, one of the ancient Baatorians who ruled Baator before the arrival of Asmodeus and the other baatezu devils.
* Elder Evils. Many were Big Dumb Objects, particularly Atropus, an undead disembodied head the size of the moon that slowly wandered the universe destroying worlds.
* Elder Evils's claim that even the gods can't stand up to a certain monster described in that book seems questionable when the statistics are compared.
* Elder Evils) that was a being from the positive energy plane. Her arrival to a world brings about large amounts of life and good health until it grows to the point of cancerous effects, rabid, mutated monsters that she gives birth to, and all sorts of delightful events of chaos.
* Elder Evils, the idea was to give players the option of wiping out/changing their old campaign worlds to make one more compatible to the new system.
* Elder Evils. The only way to keep him down for good is to destroy his horn, and good luck with that.
* Elder Evils, there's the World Born Dead, Atropus, whose coming is marked by the undead rising from their graves in a zombie apocalypse. His coming may cause anyone who dies by any means (not just killed by a zombie) to rise as a zombie (or skeleton if there's not enough flesh for a zombie). When Atropus gets close enough to the planet, anyone who's dead will reanimated as a skeleton or zombie by tearing out of their graves even if they were killed years ago.
* Elder Evils to rise and brings one of these upon the world. Initially, it's just an additional degree of hostility to every interaction, but as it moves on, everything on the planet that is alive and thinking must make a daily Will save or start attacking everyone in sight until someone dies. Once they're fully awake, those that fall to this wrath will become superhumanly strong, but eventually pass out from sheer exhaustion in trying to kill things.
* Elder Evils with rage. When the moon is completely blood-red, the Hulks are active again.
* Elder God K'rul makes himself at home in the dreams of the mortal mage Kruppe. Since Kruppe knows so much and is a gifted storyteller, though
* Elder God of Wisdom and Logic. (An unsubscribed event occurred sometime in the 4th Era which caused all of the Elder Scrolls to vanish from the library. They are

now found scattered throughout Tamriel, and the Moth Priests have been working to recover them.)
* Elder Gods are rumored to be elemental forces that used to be worshipped in times gone by. Their areas of competence are kept nebulous with some exceptions like Mael (Elder God of the Seas) or Mother Dark (Elder Goddess of Darkness, duh) and their worship is said to have involved various amounts of blood sacrifice.
* Elder Kevin Price truly believes that spreading the word of Christ (specifically of Latter-Day Saints theology) is as simple as
* Elderly actor Byron Orlock suffers through an interview with one of these in the horror film
* Elderly Future Fantasy: A character has a dream or fantasy, where they and others are elderly and having their present-day conflicts continue into old age.
* Elderly Future Fantasy: Character has a dream where they and other characters are elderly in the future, often with having a current conflict in the story that's still going into old age.
* Elderly Immortal: An immortal being who was already elderly when they gained immortality.
* elderly mother completely nude and making love to her equally elderly and equally nude boyfriend—with wrinkled flesh galore.
* Elderly, politically seasoned Midwesterner Joe Biden chose the middle-aged, up-and-coming Californian Kamala Harris.
* Elderly retired soldiers are rejuvenated with tech from more friendly alien allies to fight as young soldiers again. The "rejuv" treatment become a major part of the plot, especially when they run out before the enlisted men are called into action, leaving the U.S. military top-heavy with officers. In
* Elderly, wheelchair-bound industrialist Derek Lloyd Peter Digby is pushed down a hill by his son, who wishes to inherit his fortune early.
* Elder Maxson's Final Judgement Gatling Laser, which has a 50% faster rate of fire, and deals twice as much damage. However,
* Elder Powers of them took up this habit, which did away with the benefits of having an avatar to begin with.
* Elder Powers that drives the series, and so the Powers need a very good reason to promote someone, lest they render one of their most effective game pieces ineffective in pursuing their main goal.
* Elder Princess Shroob impressive strength would seem to suggest a naturally stocky build rather than obesity.
* Elders being careless or lazy facilities the populace was never meant to see.
* Elder Scrolls) also have invisible borders surrounding the edges of the playable game area, which will simply block the player from progressing telling you "You cannot go this way". The post-apocalyptic settings also lend well to piles of rubble, dilapidated buildings, and damaged-but-still-locked doors to be plentiful in blocking progress.
* Elder Scrolls Anthology. The games themselves were contained in a nice-looking bookbox, where the discs were surrounded with artwork of the region each game is set in, screenshots of the game, and blurbs describing each game's premise.
* Elder Scrolls lore also includes a plot device called a "Dragon Break," which is a cosmic event with no specific cause or explanation that can merge several timelines, erase historical events, or justify any other incontinuity. Although the series's in-universe history does include several purposeful, intentional, and plot-relevant "Dragon Breaks," the idea was originally conceived as a handwave to allow all the conflicting endings of Daggerfall to be canon simultaneously.
* Elder Scrolls — written in a complex, mind-searing form. Also, while each Scroll is a definite object, any scroll that a sentient mind isn't keeping track of may or may not exist.
* Elder Scrolls Online's three factions are based on some areas of Europe along with groups they associate with. The Ebonheart Pact is based on the Northern portion with some touch of First Nation and Inuit (since the Norse founded Greenland before anyone else and Greenland is technically part of the North American Continent). The Daggerfall Covenant is based on areas of Spain, Portugal,

and France since they have history with the Moors (What the Redguards is partially based on) and had some history with persecution with the Jewish population (an arguable similarity to the Orcs). The Aldmeri Dominion is based on what is now the United Kingdom due to a mixed relationship with England and Ireland (similar to the Altmer and Bosmer) and having some trading relationship with East Asia (Moon Sugar is similar to poppy seeds).
* Elder Scrolls the scrolls, never actually using or even handling them, are driven to complete madness with alarming regularity.
* Elder Scrolls, those in power prefer they use the Scrolls to predict the future rather than looking into the past. (And in some cases, those in power may have good reason to want to keep the past buried...)
* Elder Scrolls V, Skyrim has a similar scenario. The visiting princess can be killed while giving speech on a parapet, either by falling stone gargoyle, arrow, or spell.
* Elder Scrolls whenever you take the evil option in a quest. You can't get away with being good either, as the Talon Company mercs will be hired to hunt you.
* Elder Sign is a fast-paced, cooperative dice game of supernatural intrigue for one to eight players by Richard Launius and Kevin Wilson, the designers of Arkham Horror. Players take the roles of investigators racing against time to stave off the imminent return of the Ancient Ones. Armed with cards for tools, allies, and occult knowledge, investigators must put their sanity and stamina to the test as they adventure to locate Elder Signs, the eldritch symbols used to seal away the Ancient Ones and win the game.
* Elder Sign may result in insanity, death, the End of the World, or all three.
* Elders of the Universe who literally embodies this trope and has even bested the Surfer when it comes to speed of several occasions. The Runner even makes a habit of challenging Marvel's other speedsters to races.
* Elders (of which the above are two of) spend the intervening time setting the foundations for the next universe Entropy made room for.
* Elder sphinxes are generally older than most mortal civilizations — most of the ones alive on Golarion predate the Age of Darkness, which began nearly ten thousand years before the setting's present day, and recall the days when the
* Elder sphinxes can voluntarily petrify themselves, spending the majority of their lives as motionless statues while ruminating philosophical matters or casting their minds beyond the material plane.
* Elders them. This also applies to all Concepts and their realms to a lesser extent.
* "Elder technology is antiquated and inferior to our own, and they are frail and not meant for battle."
* Eldervale: Part of a hand-print can be seen on one of the plexiglass windows in the visitor's section.
* Elder vampires can transform themselves into bats, though they usually only do so in dire emergencies, usually in order to escape being staked by the players. Naturally, the key goal is to catch up and kill them before they can recover their health.
* Elder Wars, she was murdered and devoured whole, providing Elder War protagonist Meridian with a dead little sister.
* Eldest, a messenger arrives from The Empire's troops and orders the members of the Varden to surrender or "suffer the doom of your herald," then presents the severed head of the Varden's messenger. Eragon asks Nasuada if he should kill him, but Nasuada replies that she will not violate the sanctity of envoys, even if the Empire has. Shortly after, Eragon's dragon Saphira lets loose a mighty roar and the Empire's messenger is knocked off his steed, then roasted in a burst of flame that erupts forth from the Burning Plains.
* Eldest, Eragon has a seizure caused by a cursed injury to his back. He's feeling terrible already because of the seizure and because it was in front of his teacher, but then he becomes especially embarrassed when he realizes that rolling around on the ground caused him to get his clothes (which were new and a gift from the elves) covered in dirt/mud.

* Eldest when he spins his hand-and-a-half sword at his hip, much like he did when the two of them trained together.
* Eldest Whistler is described as tall, lean, broad-shouldered, and iron-jawed.
* El Diablo (1990). Naive cowpoke Billy Ray (Anthony Edwards) has this exchange with grizzled gunslinger Van Leek (Louis Gossett, Jr.)
* El Diablo, Anthony Edwards' character is searching for legendary "Kid Durango" with the help of a man named Van Leek only to later discover that the exploits of Kid Durango are based on the adventures of Van Leek.
* El Diablo (Chato Santana) has gained some popularity among Latin American fans, because of his amazing powers, his tragic past (which has turned him into
* El Día de la Bestia, by director Alex de la Iglesia, the birth of the Antichrist will take place on Christmas Day in Madrid, capital of Spain
* Eldie Porter is revealed to be the child of people who are genetically full cousins, but socially considered to be siblings, and a man marries every sister in a family; the sisters themselves are born of several different mothers.
* Eldigan of Nordion, best friends with Sigurd and Quan, and the brother of Princess Lachesis, who fought because Agustrian usurper King Chagall threatened to smear mud on his name. And if you don't fight him and, instead, get Lachesis the Earth Sword, Eldigan will still be executed by Chagall and the Cross Knights will continue to battle you.
* El Dinámico, wrestling in the main event of Italian Wrestling Superstar at 50.
* Eldon, better known as DOM even by his adventuring companions, from
* Eldon Perry frames people for crimes, shoots suspects, and behaves like an all-around
* El Dorado campaign in the HD version was narrated by a conquistador who accompanied Francesco de Orellana's expedition in finding the lost city of gold deep within the Amazon rainforest.
* El Dorado concerning the other character's opinions of Mississippi's choice of headwear:
* El Dorado could be seen as this, as they were all essentially the same game with minor changes.
* Eldorado, involves a man who travels to the titular city in a dream.
* Eldorado opened with a 50-something main character having recently married a 17-year-old girl. Public controversy over this storyline was later cited as a possible reason for the show's failure.
* Eldrad's destruction of Abaddon's Planet Killer broke the back of the Thirteenth Black Crusade, but the Farseer locked himself in eternal conflict with the daemonic spirits controlling the warship and was hurled into the depths of the Warp.
* Eldrad Ulthuan is one of if not the most powerful Eldar Farseer in the game.
* Eldraeverse, a habitat established by smart guns that achieved sapience, acquired some remote bodies, and rebelled.
* Eldraeverse are seven-foot-tall humanoids who don't naturally age and have pointy ears and a bit of arrogance, especially citizen-shareholders of the Empire of the Star. Mind, they're one of two species in the Associated Worlds to develop wormhole technology, they've achieved a near-post-scarcity economy, uplifted multiple species, become as close to immortal as physically possible, created a collective consciousness that manifests as gods...
* Eldraeverse do flip you instantly from star system to star system via wormhole, in-system travel (including between stargates on long trips) has to take place at low accelerations, which is where most of the journey time is used up, and to get the stargates in place in the first place requires long sublight voyages.
* Eldraeverse. Lampshaded as necessarily generic to let otherwise disagreeable polities agree on it, and that everyone disagrees on what exactly the "Associated" means.
* Eldraeverse - one to accelerate out of orbit, and one to brake hard on landing. The latter doubles as a nuclear daisy-cutter to clear the landing zone.
* Eldraeverse polities consider this sort of thing a to-do list. Or, in many cases, a have-done list.

* Eldraeverse, rather more common than natural intelligence, and readily recognizable by their 32-bit surnames.
* Eldraeverse rather than a planet — is one. There's not much indication of what happened to them, and some eldrae are a bit disturbed that they're apparently the oldest of the extant young sophont species.
* Eldraeverse somehow traveled back in time to inspire her "visions" and nuke her executioners from orbit.
* Eldraeverse ("soul-shard") running in his head alongside his own mind. And since minds are software, this can scale up a long way.
* Eldraeverse that can act as AI-guided kinetic missiles), but they're intended for independent operations such as anti-piracy patrols. For engagements that warrant multiple ships the Empire of the Star prefers fleets comprised of several types of specialist ship, heavily armored ships of the plane guarding carriers with tens of thousands of AKVs.
* Eldraeverse: The Empire of the Star is the largest polity in the Accord by roughly a factor of two and sits at the forefront of technology in the known universe. While the Voniensa Republic has eight thousand star systems, in contrast to the mere hundreds of the largest Accord polities - the Accord as a whole is ten thousand systems - but their technology is stifled by their anti-transhumanist laws.
* Eldraeverse the Precursors genetically engineered organic radio transmitters into the eldrae's ancestors and inserted self-replicating "Vector control effecuators" into their bloodstreams. Giving them both telepathy and telekinesis.
* Eldraeverse, until its possessors developed enough science to reveal it as organic Wi-Fi.
* Eldraeverse" was told by a foolish couple that all they wanted was to live happily ever after and love forever, so he fired them into a stable orbit around the event horizon of a black hole.
* El Dragón's ISIC in a wrestling match, the luchador's lost limbs were replaced with giant robot arms.
* Eldran - plays this very straight, and with justification (kinda) in that if the heroes reveal their identities, they'll be turned into dogs.
* Eldrazi are a race of three (known) titanic beings who are born of the Multiverse, who feed off of entire planes of existence. Currently trapped on the plane of Zendikar, they are known to cause swaths of destruction miles wide wherever they roam.
* Eldrazi. He also created the most powerful force for human survival on Innistrad, admittedly to prevent the other vampires (and the zombies, and the werewolves...) from wiping out the food supply.
* Eldrazi ravaged the plane and nearly ended it in the process, before being sealed away. Millenia later, they are only remembered as the Kor and Merfolk pantheon of gods and are, ironically, worshiped as lifegivers of the plane.
* Eldrazi Titans and a character who hadn't appeared on a card in eight years, most of which had seen the player base expand and sales go up; to establish his credibility with the people who hadn't been playing in 2009 and remind people who had that he was a ridiculous powerhouse, Bolas took down the entire Gatewatch, making sure to hit each one in their own specialty for bonus showoff points.
* Eldritch Abomination: A bizarre entity that defies the laws of reality and is incomprehensible to others
* Eldritch Abomination adaptation at least had a somewhat cute and rabbity face at the beginning of the movie, but becomes increasingly decrepid and distorted as the movie progresses.
* Eldritch Abomination against it is about to begin.) The True Death ability is available for DMs who want to create their own Elder Evils, but Leviathan is the only example presented in the book who has it.
* Eldritch Abomination: A horrifying, otherworldly creature that is beyond human understanding.
* Eldritch Abomination: An ancient and powerful being of unknown origins.
* Eldritch Abomination, and are trying to keep it locked away. This is both to

prevent its escape, and to ensure the gods don't tear down their old prison to replace it with a stronger one.
* Eldritch Abomination: An extremely weird, otherworldly being of unfathomable power.
* Eldritch Abomination: An incomprehensible, reality-defying (and likely inconhrehensibly big) entity.
* Eldritch Abomination awoke and leveled the cemetery when the zone was revamped to serve as a new level 50 hub. Still fits this trope, however.
* Eldritch Abomination) being mortally wounded and declared still-born. Xavier's parents then kept him from ever knowing about his sister until she came back into his life and swapped bodies with him decades later.
* Eldritch Abomination being obvious, but also Scatha the Wyrm, and other cold drakes.
* Eldritch Abomination, but their creator The Last would be the even bigger threat if they hadn't died millennia ago.
* Eldritch Abomination, but they are probably not actual entities, instead being symbolic of countries.
* Eldritch Abomination, but was trapped in a human body. This substantially decreased her power. Then her power had to be artifically reduced further, as it was eating through her physical form.
* Eldritch Abomination by Sailor Venus both in the Silver Millennium and the modern-day.
* Eldritch Abomination crawled out of them. Oh, and the centipedes have eyes on their backs.
* Eldritch Abomination despite not needing to breath like the other conscripts (who'll lose their oxygen the moment the villain hear their treachery), implying they are just fine with a demon ruling the world.
* Eldritch Abomination Doomsday Device, with the potential to slay gods.
* Eldritch Abomination, encompassing everything from Time Lords/Gallifreyans as cosmic horrors in human form to the Doctor as the current universe's incarnation of Nyarlathotep.
* Eldritch Abomination for the purpose of killing as many sentient species as possible (and they think it's a game).
* Eldritch Abomination from her husband Apsu's body. Apep/Apophis of Egyptian myth was a living embodiment of the formless primordial chaos and darkness outside of the shaped universe, typically painted as a giant snake/serpent. Hittite myth had the dragon-like Illuynka, enemy of Teshub.
* Eldritch Abomination, has a strange proboscis-like mouth inside of his already gaping maw. He uses it to turn his mouth into a biochemical artillery cannon.
* Eldritch Abomination, has been shipped with several of his enemies, including Dipper, Mabel, or even Stanford "Ford" Pines.
* Eldritch Abomination has completely black eyes. However, he's not so much evil as simply a disinterested entity who enjoys observing humanity and the chaos they can create, occasionally granting powers to rare individuals that gain his interest.
* Eldritch Abomination, he was the one who had Aldrich moved to Anor Londo when he revived, and fed Gwyndolin to the monster.
* Eldritch Abomination hijacks the Doctor's TARDIS and tries to escape into our dimension and wreak havoc.
* Eldritch Abomination made of rainbow-colored light, and a "Cutie Mark" depicting a flock of butterflies in the shape of a heart with some flying away. Despite his eldritch appearance, however, he's a benevolent god devoted to spreading Love and giving mortals their happy endings.
* Eldritch Abomination (major spoilers ahoy) that this might not be the case.
* Eldritch Abomination nature makes it hard to tell for sure, she seems to generally enjoy her eternal un-life, especially when it comes to teasing her overly-earnest subordinate, Youmu.
* Eldritch Abomination of a main villain, and managed to help foil the plot of Foundation X.
* Eldritch Abomination of Lovecraftian proportion destroy the planet, than help the

neutral faction battling it because they also asked the Horde to help too. (Of course, the fact that Garrosh Hellscream had picked a fight with him moments earlier probably didn't help.)
* Eldritch Abomination of the Dungeon Dimensions, known as "Tshup Aklathep, the Infernal Star Toad with a Million Young". It kills its victims by forcing them to look at pictures of its children until their brains implode. "I suppose after you've said 'Yes, he's got your eyes' for the thousandth time you're about ready to commit suicide in any case."
* Eldritch Abomination of this story, but still. There was great potential in the guy.
* Eldritch Abomination (or equivalent). It is effectively the source of much or all evil among humans, either by tempting or leading them astray, or through some sort of mental corruption.
* Eldritch Abomination, powerful enough to terrify Morgoth and require an army of Balrogs to chase off), and latterly Morgoth's prison guard, is also up there.
* Eldritch Abomination. Quite a few Sith from those games have part or all of their faces obscured, actually.
* Eldritch Abominations among them (ironically the very same lord who brokered the original deal with the C'tan) has made it his life's goal to give the Necrontyr flesh and blood bodies again.
* Eldritch Abominations and advanced civilizations, only occasionally interacting with the backwards world of the setting by means of a visiting horror or crashing starship.
* Eldritch Abominations and needs the protagonist's help to get back to Hell.
* Eldritch Abominations, and super-powered government agents. Though a few of those don't show up in the first book.
* Eldritch Abominations are credited with likewise somewhat accidentally being responsible for organic life on Earth) can truly claim "precursor" status.
* Eldritch Abominations are Obliviously Evil. Many of them are not deliberately evil. They just don't care or don't even notice humans.
* Eldritch Abominations around them to strike utter terror in their prey. As if they needed to...
* Eldritch Abominations around to keep everything from being destroyed.
* Eldritch Abominations. As far as we can tell, a layer is a page of Awful Hospital, no matter how long or how quick it takes to read it.
* Eldritch Abominations a unique group of arthropods that somehow got labeled with the names of more common arachnids.
* Eldritch Abominations, before later races' creation myths and even the advent of deities, to a time when the Aboleths reigned over an antediluvian world of boiling seas and cloud-choked skies.
* EldritchAbominations bent on finding a way into our universe and destroying it.
* Eldritch Abominations, but it still counts. Each new revelation about his backstory shows how Sburb (and its variations) bent over backwards to make him the villain he is today.
* Eldritch Abominations dangerous, as they tend to ignore anything past immediate feeding. And if a lesser predatory spirit is bound to a human, its host must periodically kill to feed it.
* Eldritch Abominations; for his troops, the first step in combat is to secure the local star so that it can't be used against them.
* Eldritch Abominations had reincarnated to stop him—despite the fact that he had just won the fight.
* Eldritch Abomination. She owns shelves full of these books and considers them ideal casual reading material. As long as she can remind them not to eat her friends.
* Eldritch Abominations, is Azathoth, the ONLY God with a an OFFICIAL Divine Rank of 21.
* Eldritch Abominations, is only killable by this method. There's a weird looking spiked sphere that flies around the boss room and deposits the player wherever it happens to be when you go into the teleporter, and at one point, the pod goes into

Shub's body. If you go into the teleporter at that point, the result is a VERY messy demise for the Hell-Mother.
* Eldritch Abominations — that doesn't generally happen to real-world spies. Ergo, generic bar beer spiked with a liberal helping of LSD.
* Eldritch Abominations of fear. Simon Pietrovich had a death curse powerful enough to wipe out several Red Court nobility and their allies. With few exceptions, being on the Senior council generally means you are both very old, and a badass.
* Eldritch Abomination, something that would look at Cthulhu and think "ooh, an appetizer!"
* Eldritch Abominations on their own or entire goblin sieges, but your blacksmiths are generally pretty manly because they don't even need a hammer to work, they just hammer the metal with their fists.
* Eldritch Abominations possess Combat Tentacles. Not only do they pack a punch, but, given the right circumstances, they can morph virtually anyone in their grasps into fellow eldritches.
* Eldritch Abominations, sentient seed-monsters, sentient alien trees, etc.
* EldritchAbominations. Some monsters will banish the players there and it is possible to spend a very long time to find an exit in the extremely chaotic always-changing layout.
* Eldritch Abominations that are bound to a single planet. Eventually, it was revealed that they're essentially giant-sized parasites working for an even greater evil beyond the physical realm. While actual worship of them is generally consigned to the insane or extremely evil, they're one of the few beings to actually be referred to as gods.
* Eldritch Abominations that come from some other plane of existence entirely.
* Eldritch Abominations, the Eldrazi; in particular, a combination of solitude and proximity to the Eye of Ugin, which sealed the Eldrazi within the plane Zendikar, cost the planeswalker Sarkhan Vol his sanity for a time, and it wasn't until several months after leaving that he had fully recovered.
* Eldritch Abominations). The mer gods Cosi and Ula are based on the Eldrazi monstrosities Kozilek and Ulamog.
* Eldritch Abominations. The Wolf-In-Sheep's-Clothing, which originally looked like a stump with an unconvincing rabbit-puppet sitting on it, is now a tentacled monster that uses the corpse of its last meal as a lure to draw in more victims.
* Eldritch Abominations. They're all real and haven't been scientifically explained away.
* Eldritch Abomination-style plane of Innistrad, they were always drawn in bright daylight. This served to show their bright, coral-inspired colors and to make it clear even daylight could not protect you.
* eldritch abominations who are at war with the gods. The war's mostly cooled off, but could flare again at any moment. Because of this, the good gods and evil gods are loath to battle each other; the evil gods know that if they were to slay their good counterparts and take over the cosmos, they'd rule for about five minutes before the primordials swarmed them. Likewise, the good gods know the villain they slay today could be the ally that would have saved them from a primordial tomorrow. Not all the gods play by these rules, and some are even likely to come down on the side of the primordials when the fight starts up again, but for the most part the looming threat keeps the peace between them.
* Eldritch Abominations who would very much like to destroy the world/worlds/universe/multiverse. In fact, the book suggests that the terms "Elder Evil" and "Omnicidal Maniac" are more-or-less synonymous with each other. Most - but not all - mortal beings that serve these entities qualify as well.
* Eldritch Abominations will rise, the so-called 'Children' who existed before God created light and who will surely destroy all of mankind should they ever wake up. To prevent this, the Ba'ali commit as many utterly depraved acts as possible in the name of the Children, in an attempt to ensure they don't realise how relatively nice the World of Darkness is and come to remake things in their image.
* Eldritch Abomination. Talking to him or being around him is unsettling because he looks human but he doesn't act or talk like one, and he blatantly says that life,

death, space, time... are meaningless concepts to him.
* Eldritch Abomination that created the kaorti from human or elf mages in the first place.
* Eldritch Abomination that for the first Endbringer appearance he rolled dice for every single character involved in the battle to see whether they'd live or die (yes, including the protagonist; he had a backup protagonist in mind in case she died).
* Eldritch Abomination. The blade shatters on her skin and she doesn't even notice the blow. Bullets have no effect either, thanks to her ability to slow down time.
* Eldritch Abomination the forum reacted with near universal DO NOT WANT.
* Eldritch Abomination to boot, and it serves as a central point of the cultists of the Lovecraftian entities of the Dark Tapestry (this is meant in the most literal manner possible. The presence of the Outer Gods and Great Old Ones is canon).
* Eldritch Abomination to protect her son. This all takes place about one hour after she gave birth and then had the Kyuubi forcefully dragged out of her, something that was previously always fatal.
* Eldritch Abomination trapped in a human corpse, her only non-human attributes (physically, at least) are blue lines on her face and blue streaks in her hair.
* Eldritch Abomination" variants on this trope. He eats everything in sight (especially shiny things) because he likes to eat shiny things and once he gets big enough, covers the entire gala in his indestructible slime. All the while, he does not seem to realize that he is doing anything wrong.
* Eldritch Abomination. When Shinji and Asuka go back to the past and meet her again, they're unsettled because she always seemed strange, but they never doubted that she was human.
* Eldritch Abomination which is known as the "Flying Spaghetti Monster" and has a habit of ending games the second it appears.
* Eldritch Abomination who can easily stun lock you while he chomps on you, literally. Needless to say, trying to invoke this trope on Cho is a terrible idea.
* Eldritch Abomination who destroys everything in his path, no one minds.
* Eldritch Abomination, with a face that cannot be described, and constantly drags a sack behind him. If a hunter kills the Qamulek, he will be warned not to look into the sack, with good reason: great hunters who look into this bag will become quiet, humble men until the day they die. They will retell the story of their encounter with the Qamulek, but never describe what they saw within the bag.
* Eldritch Abomination with phasing powers who loves to hunt its prey for amusement. You must always avoid letting him see you, otherwise he'll pursue you until he catches you. Unlike the other two examples, he can be deterred and recaptured but it's very difficult to do so.
* Eldritch Abomination, with the latter even being able to warp reality around itself (and destroy it in the process).
* Eldritch creations are representative democracies though there are some (like the Hinichi) that chose other forms of government.
* eldritch deity following the 'Cosmic Prophet Debacle', Moon Ray turns into a cyclic god who by nature shifts through three cycles: The Alpine cycle, the Equus cycle, and the Silicon cycle. Depending on the condition of certain planes, each cycle turns him into something living, dead, or something in-between for a certain amount of time. This represents his realization and acceptance of the cyclic nature of all things.
* Eldritch. Erik Mahren was kicked out of his home as a teen, so he enlisted in the Marine Corps and ended up in a
* Eldritch Horror has its own version of the Seed of Azathoth adventure. It's also one of the wilderness sites for expeditions.
* Eldritch Location, and they work for a set of gods who want to kill, rape, mutate and infect everything, things which they are more than willing to perform in their name. Yet they're just so... METAL!
* Eldritch Location: An otherworldly location that is strange and off in all the wrong ways.
* Eldritch Location going at full blast. It only gets creepier from there.

* Eldritch Location in worlds that the White Frost has already destroyed conveys the slowly-dawning horror that comes with realizing that it's never going to stop snowing or growing colder, and colder...
* Eldritch Location isn't human, who they simultaneously hate and fear, around whom increasingly weird things happen, and then who is eventually claimed by his people from their secret magical land.
* Eldritch Location, since the party is venturing into the unknown in a place crawling with metaphysical manifestations of the human psyche. The effect goes away as they climb more floors and more and more instruments are added to the piece, and by the time they reach block 6 it's a complete composition.
* Eldritch Lore. They allow one to glimpse the very fabric of reality and decipher knowledge. They come with some rather nasty side effects, however, including blindness and madness.
* Eldritch Moon introduced a mechanic called "meld", which involves flipping two cards over and combining them into a new creature.
* Eldritch Ocean Abyss: The deep sea is full of eerie and/or terrifying creatures.
* Eldritch Starship can easily be an Eldritch Location with a hyperdrive.
* Eldritch takes this one further, by turning her brain into a minefield of bad memories. And she's got plenty of them.
* Eldritch... while stabbing, shooting, or stoning all the cultists, Deep Ones, and various monsters which are standing in the way. Also, praying in front of Old Ones statues grant magical powers.
* Eleanor & Park begin like this, developing their romance just by sitting next to each other on the bus, not even speaking.
* Eleanor & Park (made in 2013, set between the fall of 1986 to the spring of 1987)
* Eleanor & Park, Park makes Eleanor mix tapes of bands such as The Smiths and Joy Division upon learning her interest in them. She in turn makes him a mixtape of Beatles songs. Their mutual of love of music leads to them falling in love with each other.
* Eleanor & Park: Richie Trout and Sabrina Douglas, Eleanor’s stepfather and mother. She’s a stunning woman in her late thirties married to a younger man who’s described as “the human version of a rat.”
* Eleanor & Park was stationed in Korea during the Vietnam War (his brother died there, too) and met Park and Josh’s mother there.
* Eleanor and Eizen are the more physically oriented of the magic users while also being the ones who have access to the revival spells Life and Resurrection respectively.
* Eleanor Arneson and Ruth Berman gave this line to a cop in "The Face on the Barroom Floor", a
* Eleanor Cameron, the heroine dreams of a room, and seeing children in it; one says she wants to show her something. Later, she sees the room and tells the dream, resulting in the X-raying of a picture and a discovery about it.
* Eleanor Estes illustration) frustratedly mashing orange food coloring from a tiny little gelatin football into a pound of "oleomargarine", which was supposed to make it look like butter. All she gets is orange streaks.
* Eleanor exploited this with a bitchy roommate who sued a dry cleaner and drove his business into bankruptcy for breaking the zipper on her favorite dress (which was actually Eleanor's fault), which earned her roommate the unflattering nickname "Dress Bitch".
* Eleanor Franklin and her cats are always around and happy to welcome visitors - and explain some of the mysteries about the mansion's history.
* Eleanor Hibbert used a variety of pseudonyms, including Victoria Holt for romance novels, Jean Plaidy for historical fiction, and Philippa Carr.
* Eleanor of Aquitaine, who spent most of his reign on crusades and other conflicts. Toward the end of her life, Eleanor arranged the marriage of her granddaughter, Blanca of Castile, to the Dauphin of France. Blanca (known as Blanche to the French) would rule France as regent for her own crusading son, Louis IX (aka St. Louis).

* Eleanor Oliphant Is Completely Fine, we find out in the second-to-last chapter of the book that Mummy, who Eleanor has kept up her phone calls with despite her horribly abusive nature, in fact died in the same house fire she set to kill her own daughters. All of their conversations have been in Eleanor's head.
* Eleanor, played by reasonably attractive Margaret Colin, gets married to a guy played by
* Eleanor Roosevelt presidency and after his death. She was an activist for civil rights, worked to enhance the status of working women (notably chairing the groundbreaking Presidential Commission on the Status of Women), traveled heavily and was one of the people who drafted the UN Declaration of Human Rights. As you can see, Eleanor now has her own page.
* Eleanor Sleath (1770-1847). Married name of Eleanor Carter. Better known for her novel
* Eleanor's mother, and the rest of her godawful family, in Shirley Jackson's
* Eleanor's parents were self-absorbed louts who blew her college fund, regularly forgot her birthday, and were generally so inept at taking care of her that Eleanor legally emancipated herself sometime in her early teens. She eventually owns up to using their poor parenting to justify her selfish
* Eleanor was bending down to pick up a bottle of Lonely Gal Margarita Mix for One when a wayward column of shopping carts rammed into her and swept her into the path of a truck with a billboard advertising an erectile dysfunction pill.
* Elebits have replaced all forms of energy in their world. A history book evens depicts prehistoric humans using them in place of fire for light and cooking.
* elected dogcatcher in the US. It's never been contested, so there has yet to be a documented case of someone losing an election for dogcatcher.
* elected to his post. Later, New York was revised to just part of Mega City One, and Judges were presented as having passed through an intense years-long training program before being graduated to duty with no election necessary.
* electing. Historically, this has included such things as removing the roof.
* Election campaigns usually feature messages from a wide range of organizations supporting a favored candidate. This can be counterproductive if the outside messages come across as
* Election Day Episode: Two or more characters run for an elective office.
* Election Day Episode, who did in fact become one of Ontatio's first two female MPPs and later Canada's first MP.
* Election Night (incidentally, the last one before his planned retirement) in a one-on-one interview with President Clinton.
* election of Thomas Jefferson over Aaron Burr because for all he despises about Jefferson, he appreciates that at least Jefferson has things he believes in, unlike Burr.
* Election Paul Metzler into running for Student Body President just to fuck with Tracy Flick, who is running unopposed, as Jim hates Tracy and blames her for a teacher-student affair that ruined his best friend's career. Shortly after, Paul's brother Tammy decides to run for Student Body President - on a platform of abolishing the position - just to fuck with Paul, whom she blames for supposedly turning her ex-girlfriend straight.
* election poster that consisted of the phrase "We love you" in a few dozen languages, including Klingon. Unfortunately, it was rendered as "yablIj. maH". Ignoring the period in the middle, that actually means "We are your mind"...
* Elections for a multi-member body (such as a legislature) allow for a third option in the form of
* Elections in the U.S. are always going to dominate the news cycle in every leap year
* Election, Tammy covers up for Tracy by lying and saying that she tore down Paul's campaign posters.
* Election, the three candidates for running for high school student body president are all supposed to speak at an assembly detailing why their school should vote for them. After the staff listens approvingly to the first two formulaic speeches (one of which was actually written by a teacher), they're shocked when the third

candidate begins her speech with an angry "Who cares about this stupid election?", proceeding to excoriate high school elections and vow to dismantle the student government if she's elected. Her classmates greet her speech with thunderous applause.
* Election). The very last scene of the epilogue is Jim asking a question to a group of students visiting the museum he works at and one of the students raising her arm, but having the exact same visible attitude as Flick, Jim ignores her and keeps asking the rest of the group if they know the answer.
* Election), who becomes obsessed with ruining her run for election, and by extension her life.
* Election who votes for his opponent in the titular school election because he thinks it wouldn't be fair if he voted for himself.
* Election won the election and stood up when the winner was announced because she had received confirmation of her win from one of the students who had tallied the votes but her teacher Jim, not wanting her to win, had thrown away some of the votes for her after the votes were tallied so that Paul would be declared the winner instead. When the votes for Tracy that Jim had thrown away are found in the trash, she's recognized as the rightful winner.
* Elective Affinities has the aristocratic couple of Eduard and Charlotte, who like their landscape garden. Eduard invites his impoverished friend, the Captain, to help with the landscaping, and Charlotte her orphaned niece Ottilie to live with them. Soon attractions arise between Eduard and Ottilie and between Charlotte and the Captain. The novel does not have a happy end, but a novella-within-the-novel, which deals with a similar situation, does.
* Elective Monarchy: A system in which monarchs are elected rather than being born into the position.
* Elective Monarchy: A system of government in which kings are voted into power instead of inheriting it by blood relations.
* Elective Mute: A character who is physically capable of speech remains mute by choice.
* Elective Mute: It turns out that a character assumed to be unable to talk actually can speak, they just choose to be silent most of the time.
* Elective Unintelligible: A character who chooses to be impossible to understand.
* Electra and her servants deliver offerings to Agamemnon's grave in the second part of the
* Electra brand holoclothes are exactly what they sound like: they consist entirely of a holographic image of clothes created by a belt-worn generator over the user's naked body. Better hope the batteries don't run down and the device doesn't malfunction (one known flaw is for the clothes to remain in a chair after the wearer gets up and walks away).
* Electra, but Electra persuades Chrysothemis not to take them and so dishonour their father.
* Electra, Clytemnestra actually seems to enjoy provoking Electra in her fallen state.
* Electra Complex affair with her father; when one of the detectives fights to get them arrested for the relationship, she learns...
* Electra, despite the fact that murdering your mother is admittedly bad, if the gods are on your side it's acceptable ("acceptable" here meaning Orestes still spent years pursued by the Furies for his crime). Orestes and Electra feel particularly justified by the fact that Clytemnestra killed their father.
* Electra Glide in Blue, a cop car drives over a crashed motorcycle, causing them both to explode. During the same scene, Zipper shoots a motorcycle, causing it to burst into flame and crash.
* Electra Glide in Blue and crash. It and its rider skid away from each other, both on fire.
* Electra Glide in Blue ends with Wintergreen pulling over a hippie he harassed earlier to apologize and tell him to get a bumper. After the hippie drives away, Wintergreen realizes he forgot his driver's license and drives after him. The hippie's companion shoots him dead.

* Electra Glide in Blue includes drinking two raw eggs during his workout.
* Electra Glide in Blue, this is one of Detective Poole's favorite tactics. When the members of a hippie commune won't tell him where a certain drug dealer is, Poole punches random people until someone starts talking.
* Electra Glide in Blue wears a shirt knotted to show her stomach in most scenes.
* Electra Glide in Blue where the lead character, a motorcycle cop, is almost a foot shorter than his fellow officers. It's underlined in the opening sequence.
* Electra Glide in Blue Wintergreen tries to stop the coroner from touching the body because he has deduced that Frank was murdered, and he doesn't want the coroner messing up the evidence. The two of them get into a fight about whether the officer in charge has more authority than the coroner. When Sgt. Ryker breaks up the fight and then asks the coroner an innocuous question, the coroner is so worked up that he starts screaming at Ryker too, then asks the corpse, "Why did you have to shoot yourself in my jurisdiction?"
* Electra has the poor Chrysothemis, who seems to be blamed for not really taking a side in the terrible family conflict. She is sweet and is well-adjusted, so she probably will have an easy life...
* Electra, obligations to the dead are omnipresent. Electra refuses to stop mourning her father until he is avenged. Clytemnestra sends grave offerings with Chrysothemis in hopes to appease Agamemnon's spirit. Electra stops her because a false offering would be an even worse slight to her father. Chrysothemis takes locks of their hair instead, only to find Orestes had already done the same, despite the news of his death. Electra immediately begins ritual mourning once she hears her beloved brother has died in a chariot race. Clytemnestra and Aegisthus are not shown to get any "due" after Orestes murders them.
* Electra, Orestes enacts vengeance against his mother Chytaimnestra and step-father Aigisthos for their murder of his father Agamemnon. Though Electra doesn't actually wield the blade, she is guilty too.
* Electra, the main character is told by every character but Orestes to give up her mourning, to behave meekly and submit to the will of stronger people because she is only digging a deeper grave for herself. Instead, by the end of the play she becomes determined to kill her step-father herself rather than accept death with no hope of salvation.
* Electra, the title character's unrelenting lust for revenge combined with her nigh-incestuous obsession with her brother, Orestes, and her father, Agamemnon, makes for her fatal flaw.
* Electra to die. Clytemnestra's excuses about Iphigenia ring a little more hollow here.
* electrical-based powers, he accidentally shocked himself after forgetting that he no longer had heat vision and he couldn't be Clark Kent and Superman at the same time.
* ElectricalBeast, Mario loses a life whenever he performs a "telepor'".
* Electrical boxes that just shut down the electricity if you kick them.
* electrically charged armour for tanks, and hopes to deploy it on a new fleet of armoured vehicles sometime in the next ten to twenty years.
* electrical media, expect them to get severed or damaged at some point.
* electrical power to defend himself from the animatronics, so Funtime Foxy probably wouldn't have been able to get the security guard without doing that.
* electrical system fails as soon as Lane tries to use it to asphyxiate himself. He also broke his glasses and uses one half as a monocle when he tries to fix the car. The whole scene is horrific and funny at the same time.
* Electric cars. First discussed, and some designs built decades ago. In fact
* electric cars have been around since the late 19th century, but the internal combustion engine offered superior performance while taking up less space than the early batteries, and thus it was most of a century before serious thought was even given to trying again. Years later, the technology is still largely considered in the early "feasible" state due to the push for eco-friendly Green Tech cars. Note the quotation marks around "feasible". To make an all-electric vehicle requires bulky, and heavy, Lithium Ion battery packs, which in turn often takes five to ten

hours or more to fully charge, often require specialized power outlets or plugs, and have very limited range before needing to recharge compared to traditional gasoline- or diesel-fueled cars. Add on the fact that there is a very likely chance the power being supplied to recharge the batteries comes from a not so eco-friendly power plant or generator source, the batteries themselves currently have a limited life-span (approximately five years) and are incredibly expensive to replace, essentially ruining the whole point of an electric-powered car.
* "Electric Chapel" plays with the idea of sanctuary, asking her lover to commit to her by meeting her in the symbolic "electric chapel".
* Electric City with Tom Hanks, on the advertisement that was on the front page, Yahoo felt the need to also put "(Contains adult themes.)" so no parent would put it on saying "Cartoons!"
* Electric Dreams. Almost literally "just add water", champagne was spilled on the motherboard and CPU during a questionable download, causing sentience. Fluffy but amusing love triangle ensues.
* Electric Dreams, downstairs hottie Madeline walks in on Miles just as he has left the shower; Miles desperately tries to cover both himself and his sentient computer Edgar, who has a crush on Madeline and wants to meet her.
* Electric Dreams involves a computer that is seducing the protagonist's next-door neighbour for him, but with the twist being that this is not an intentional plot, but the computer doing it of its own will.
* Electric Dreams was dedicated to the memory of the Univac I (the first computer designed from the outset with buisness and administrative purposes). This film was made in 1984, the year that personal home computers really started to take off with the general public.
* electric-driven miniguns, or the challenge it would be to lower it enough so they can without making it sound like a kazoo) or won't put it in (because, once again, it is what the audience expects).
* Electric eels aren't even true eels, they are members of a group of electrical fish that includes the knife fish and the ghost fish.
* Electric Girl, Virginia zaps her alarm clock with her electricity powers, and her parents have to warn her not to go through too many clocks.
* Electric guitar players have also stuck with vacuum tubes; even today, 90% of amplifiers aimed at professional guitarists use them, as their sound quality simply cannot be duplicated by transistorized equipment. As for the guitars themselves, the three most popular are the Fender Telecaster (1952), the Gibson Les Paul (1952), and the incomparably younger Fender Stratocaster (1954).
* Electric Instant Gratification: I love electrifying my brain! No, seriously!
* Electricity and lightning cause Shambling Mounds to increase in size and
* Electricity can also be used to power magic, as the magic community is quite fine with
* electricity lets him operate what basically is a mobile version of his aforementioned chainsaw/turbine hybrids.
* Electricity, used for everything from navigation, communication and information storage to food storage and preparation. And then one tree falls...
* electricity, which is easier to conduct in salty sea water, and which has been partially utilized by sea life on Earth. Even fire might not be totally off-limits on ice-covered ocean worlds, since they could presumably carve out water-free chambers in their planet's ice layer (and use flammable materials that can be found in water environments, such as methane hydrates).
* Electric Jellyfish: Jellyfish that shock people with electricity instead of being venomous.
* Electric Jellyfish — All jellyfish in your narrative go "zap-zap" 'cause why not?
* Electric Ladyland showed a group of nude women. This was however done without Hendrix' permission and he was furious when he heard that the studio executives had ignored his idea.
* Electric Light Orchestra album, the metallic percussion in "Mr. Blue Sky" was produced with a fire extinguisher.

* Electric Light Orchestra covered "Do Ya" with his band Utopia, and that might have spurred on the Electric Light Orchestra recording - ELO had just started including the song in their live performances when, according to drummer Bev Bevan, a music journalist asked them about "the original version" by Utopia)
* Electric Light Orchestra. ELO was originally just going to be a side project for The Move, but lead singer Roy Wood left the organization after the first ELO album, so the others just continued on as ELO. While The Move placed several singles in the UK Top Ten, it didn't have any success in America.
* Electric Light Orchestra: "I met someone who looks a lot like you, she does the things you do, but she is an IBM."
* Electric Light Orchestra" is a fourth wall-breaking tribute to pulp serials of the 30s and 40s.
* Electric Light Orchestra, "Mr. Blue Sky" was the last song on side C—so there were still four more songs to hear on the last side.
* Electric Light Orchestra, parodying the practice and the associated hype. It's said that when the band first heard allegations that their music contained "satanic" backmasking, "skcolloB" was one of the politer responses.
* Electric Light Orchestra's "Fire on High" (from their 1975 album "Face the Music"), a backwards voice is heard. Played in the opposite direction, he says "The music is reversible but time is not. Turn back...turn back...turn back...turn back."
* Electric Light Orchestra starts with "After four. FOUR!", then the music immediately begins.
* Electric Light Orchestra. This song was also used for the French telecom company SFR's ads — there is even a version sung by Lily Allen, which appeared in an ad.
* Electric Love" by BØRNS. The music video compliments the song with neon lights.
* Electric Retard in question have a tendency to rape and/or defecate on their victims. Plus it would be difficult to find clothes that would fit Giant Naked Hitler.
* Electric Six song "Gay Bar" seem to have a fairly outrageous place in mind: most of the activities there described—being a superstar, physical penetration, starting a nuclear war—tend to be frowned upon in more sedate establishments, though these do *not* frown on spending all your money there.
* Electric Six will occasionally declare "Solo!" before the band plays, well, a solo.
* Electric Torture and seems aroused by it. These same episodes were rerated G for the complete collection release.
* Electric Torture, he may really believe this is helpful information.)
* Electric Torture, he starts calling her "Miss Thyrus." (He also calls himself "Triple Z" at one point.)
* Electric Torture: Torture done by zapping or electrifying the victim—bloodless, but effective.
* electric type constructs a device that's integral to his Island Trial.
* Electric versus accoustic guitars. Barré chords are bread and water for electric guitar: getting a decent sound of a barré chord on accoustic guitar is extremely difficult.
* Electric Wizard in particular are what cemented the genre as a force in the metal community.
* Electric Wonderland. After Trawn and NJ read a comic from Shroomy, Trawn tells Shroomy that it was a nice try, but not what she was looking for. NJ, who had already scolded Shroomy for not having a clever enough joke, adds, "Also, it wasn't a nice try!"
* Electric Wonderland after Trawn tells her to supervise everyone in her absence. Shroomy gets wet, and disgustedly exclaims that Aerynn wasn't drinking anything.
* Electric Wonderland, and the laws of physics no longer limit occurrences and abilities.
* Electric Wonderland has one in "Inevitable Christmas Adventure," as NJ, Shroomy,

Aerynn, and Beatrice all head to the Cyber Middle East to rescue Trawn, and two in "LuLo," as the entire NFP staff rushes to investigate the bombing of the mall and later reports on the discovered suspect.
* Electric Wonderland has these on her traditional outfit, befitting her nickname, Trawn.
* Electric Wonderland home page could find out about her tail beforehand. The bios also spoil the fact that Natasha Wing, the seemingly random police girl who appeared at the end of the sixth comic, is actually friends with protagonist Trawn.
* Electric Wonderland. In order to keep it a surprise, he kept foreshadowing to a minimum.
* Electric Wonderland in which a random man walks into the protagonists' workplace, and unwittingly becomes an object of attention for Trawn, Shroomy, and Aerynn.
* Electric Wonderland mermaid. At the inquiry of the ninja, the redhead reporter admitted at the end of the first issue that she doesn't have any hiring standards.
* Electric Wonderland never find out about her performing illegal witchcraft.
* Electric Wonderland news outlets placing decreased emphasis on presenting harsh truths to citizens.
* Electric Wonderland of her newspaper staff. She says the other members must be "humming along", but unbeknownst to her, they're engaging in a recreational battle.
* Electric Wonderland searches in vain for someone to make comics for their paper.
* Electric Wonderland" She doesn't actually shoot anyone in that comic.
* Electric Wonderland use technology that feels dated even for the year of the respective comic's release. The cartoonist reportedly hopes that this will prevent references that will date in the future from sticking out.
* Electric Wonderland with unlimited gag potential and a mysterious origin.
* Electric Youth's "Faces" (2009) is a remake of a little-known Italo-disco gem by Clio (1985). Similarly, "Flame" by Tiziana Rivale is a remake of another nearly-unknown song by Luna & Black Connection.
* Electrified Bathtub: Killing someone by dropping active electronics into a bathtub filled with water.
* Electrified Bathtub: Killing someone by dropping active electronics into the bathtub while they are bathing.
* Electrified Bathtub: Someone is killed when they get immersed in water that is then electrified.
* Electrified: Pulse weapons and the alien blaster cause the target to light up in an electric blast and vaporize into thin air. (This usually isn't as good, as it causes lootable items to fall on the ground, so that they must be picked up one by one.)
* Electro also had a controlling mother who demeaned his intelligence, preventing him from following his dreams to become something like a scientist or an engineer, in order to keep him home with her and convinced him to get a rather lowly job at the local power company.
* Electroclan ranging into the millions and they are considered a legitimate threat to the aforementioned corporation which has entire countries under its control.
* Electroconvulsive Therapy Is Torture: Electroconvulsion Therapy depicted in a negative light.
* Electrode along with Gengar and its relatives, Haunter and Gastly, too.
* Electrodynamic Tether also achieves transfer of momentum without using any propellent, it's basically a simple form of magnetic sail.
* Electroid, makes his home in the high mountains to gather electricity from the highest storms. He's also afraid of heights, while also being completely unaware that the other Electroids know this.
* Electro is described like this in his character bio (which is written by Spider-Man himself). Spidey notes that he only won their first fight because Electro was still getting used to his powers and shorted himself out. Spidey fears that if he ever taps into his true potential, not even the Avengers would be able to stop him.
* electrolaser On the other hand, the world of nonlinear optics brings up the phenomenon of 'light filamentation', a high intensity pulse of light that generates a long, thin trail of plasma. Possible applications suggested by the discoverers

include triggering lightning discharges.
* Electrolux's slogan for their vacuum cleaners, "Nothing sucks like an Electrolux," took on a rather negative connotation in America.
* Electromagnetic Ghosts - Interferes with electronics with just their presence.
* Electromagnetic Ghosts: The presence of the paranormal causes electromagnetic oddities.
* Electromagnetic Pulse temporarily zaps the player's interface, even more so in the latter where the whole display goes corrupt for a few seconds.
* electromagnetism. He then makes an appearance in the show's penultimate episode "Stench and Stenchibility" with no explanation whatsoever.
* Electromechanical arcade games are sometimes called "EleMecha" in Japan.
* Electronica group Death In Vegas were originally billed as Dead Elvis, but it turned out there was already a record label called that
* Electronica musician Eric Lawrence Chamberlain has released material under at least six aliases, including Airwreck, Coconaut, Skylash, Index, Pixagon, and Telepheriq Chamberlain.
* Electronic Arts Alister Fiend does this in the opening cinematic, waking up his sleeping neighborhood with his music.
* Electronic Arts games have the double-lined circle "EA Games" logo done in the style of the game in question.
* Electronic Arts is never mentioned, it's implied that a large demographic would be willing to spend sixty dollars just to shock their aged mothers.
* Electronic Arts license ever since Disney's acquisition of the brand.
* Electronic Arts, one of the antagonists you have to avoid is an OSHA inspector.
* Electronic Arts's sports games, you can make teams take to the field in old uniforms, including those of the clubs' previous incarnations (e.g. The New Jersey Devils playing in the colors of the Colorado Rockies).
* Electronic Arts that forbade for 20 years anyone except EA from using the Porsche trademark.
* Electronic Arts was also founded for similar reasons not too long afterward. Now look at what they've become, although in hindsight, Activision is no different.
* Electronic freeway signs in Illinois sometimes display a running count of drunk driving deaths in the state for the current year. The number is updated daily, so commuters can see how many people have died since the day before.
* Electronic Game Information: Alan and Robby's fighting in Season 2 is entirely scripted, as evidenced by the sheer fact that Alan had an entire post-credit scene talking to "Birdo" about it; but that doesn't make it feel any less real. With the entire show being portrayed as a live-streamed discussion about video games and video game conventions, having the co-hosts break into a major, on-screen argument seemed too genuine, especially with it being portrayed as a serious falling out. This genuine portrayal made the scenes a bit uncomfortable to watch.
* Electronic Gaming Monthly; Sonic made it, but we're still waiting on Tails.
* Electronic Gaming Monthly tennis game which would display his proposal upon winning, and gave it to his girlfriend for Christmas.
* Electronic Gaming Monthly video game were made originally, as it was a lottery prize. Nissin received so many entries that it became a full retail release.
* Electronic musical instruments can have lots of features, they can have a user interface that's easy to use, and they can be cheap. But they cannot be all three at once.
* Electronic music artist Nils Jørgen «Jøgge» Kaalstad for the Norwegian dub.
* Electronic Music. Sometimes, producers use different artist names/stage names for their different genres/niches.
* Electronic novelty items that speak or sing while moving a part of them, such as singing fish. The fact that a fish on a plaque is flapping its tail to the music and lipsyncing is funny enough as it is to many people, but let the batteries get low and they get slowed and off-keyed when they try to move themselves. The effect can be
* Electronics Adventures also wishes to become human, which is especially funny

given that his human double Syroezhkin envies him.
* Electronics and the stores that sell them are rich veins of Fan Nicknames. For instance, the Blackberry series of mobile phones (many other functions) have been nicknamed Crackberries: like the concentrated form of cocaine known as "crack", the things are very expensive and either massively addictive or something you need rehab to get away from.
* Electronic Speech Impediment: Computers that are malfunctioning in some way stutter or develop other speech impediments while speaking.
* Electronic Speech Impediment: Subtrope of Computer Voice: when the talking computer isn't working correctly, something goes wrong with its voice.
* Electronic tagging such as ankle bracelets used to track prisoners. Developed by a judge in 1979 based on a
* Electronic Telepathy: Mentally communicating with other people through cybernetic means.
* Electronic toll collection systems, which either communicate with a wireless transponder mounted on passing vehicles or photograph the license plates of vehicles that are not equipped with the device, are a Trope Breaker for
* Electronic Video Games Which Can Be Played Via Digital Apparatuses (Video Games)
* electron, with good reason, and the world itself is now human-held and known as "Canyon" after its most distinctive feature.
* Electroplankton are designed to be adorable: bright, colourful, simplistic, small and smiling.
* Electroplankton where the player makes music by manipulating plankton in different ways.
* electrostatic detection devices which are able to do a considerably better job than the pencil-rubbing method.
* Electrostatic headphones and loudspeakers, compared to conventional dynamic driver-based offerings. It doesn't help that they're only produced by a few manufacturers for the most part (Stax for headphones, Acoustat, Quad and Martin Logan for speakers), and the headphones need specialized amplifiers that are just as expensive, unless they come with transformer boxes meant to be used with conventional loudspeaker amplifiers (which do not perform as well as the direct-drive amps). The loudspeakers are also very demanding on amplification, but most of them have built-in transformers, so you can at least use any power amp that can meet their demands. Even vintage equipment will still command a fairly high price.
* Electro Swing captures the essence of dieselpunk through remixing vintage jazz-style music and swing with modern technology and house beats.
* Electro Swing with swing instrumentation laid the groundwork for electro swing, while the latter's novel fusion of scat-based jazz and eurodance earned him massive popularity.
* Electro. This is notable, as the other heroes aren't particularly beautiful either.
* Electro was renamed because the producers did not want to interfere with the continuity of
* elects to play this trope even straighter than the source material did. Due to the requirement of scalding water, Ranma comes to the decision that it would be much easier to just live as a female instead of trying to go back to being a male.
* Eleenin has some light-based powers, but rarely uses them for combat.
* Elefun and Friends short "A Tangled Tale" features a panda trying to do this with bamboo to get over a river.
* Elefun and Friends. The bamboo gets stuck halfway, leaving her dangling and leading to this conversation:
* Elegant Chaos gaps between issues and the plot-heavy nature of the arc meant that nothing could be skipped.
* Elegant Classical Musician: Characters who play music are very desirable.
* Elegant Classical Musician: People who like to play instruments are portrayed as attractive.
* Elegant Gothic Lolita (being run over by a vehicle is a very common cause of death).

* Elegant Gothic Lolita from Katai, who keeps mistaking him for a girl.
* Elegant Gothic Lolita plays with this trope in episode 10 when she puts Shusei in a permanent sleep and whispers in his ear "I knew you'd make a beautiful corpse. You're part of my collection now. You'll never wake up again..." while caressing his face and chest.
* Elegant Gothic Lolita, who engage in outright childish fights over the attention of the former's older brother, Kodaka.
* Elegant Yokai Apartment Life delicious. The other two are somewhat taken aback, but then all three of them act like nothing happened.
* Elegy Of The Captured. It plays during the more sad, serious visits to the detention centre.
* Elegy": One of the astronauts from the ship explains that they went through a meteor storm, which caused them to run low on fuel. The only way they could experience a meteor storm is if the asteroid field they passed through was unusually thick and dangerous.
* Elegy", Professor Kurt Meyers tells Jeremy Wickwire that Earth was devastated by a nuclear war in 1985 and it has taken 200 years for humanity to rebuild.
* Elegy", Professor Kurt Meyers tells Jeremy Wickwire that Earth was devastated by a nuclear war in 1985 and it has taken 200 years for humanity to rebuild. It is also mentioned that the cemetery asteroid Happy Glades was established in 1973.
* Elegy", the cemetery asteroid Happy Glades' star system has two suns.
* Eleint Soletaken still have the ability to transform into the massive beasts. It is noted that the Soletaken often rely on sorcery to remain airborne, especially if their wings are damaged.
* Elektel Delusion. Shunpei reads a pornographic magazine, with a naked-apron wearing model and discusses what's so good about the trope. Fumi then proceeds to imagine an entire scene with Shunpei wearing one.
* Elektra Abby is told to do this while on the run from The Hand. She dyes her hair brown and cuts a fringe to resemble Elektra. Oddly enough Mark and Elektra don't do this - and they're still found pretty soon too.
* Elektra and Stick are aware of it, though this is a minor example in that they're minimally involved in Matt's day-to-day life.
* Elektra arc she was magically resurrected in rather sinister circumstances).
* Elektra crossover was dodging bullets. Mostly. Corrupt government agents were plinking at her. The commanding officer figures out the best BLAM! Don't go on about it too much and she can be hit.
* Elektra, dual-wields sais, though, as mentioned above, they are traditionally dual-wielded.
* Elektra, Elektra treats her brother Orestes as a stranger until he asks why his sister doesn't recognize him.
* Elektra figure. They even gave her Psylocke's trademark psi-blade, even though Elektra doesn't have any superpowers in the comics.
* Elektra gets shades of this in season 2, since a lot of her characterization is built around her relationships with the male figures in her life, namely her ex-boyfriend (Matt) and her surrogate father/sensei (Stick), and those are the two people she primarily interacts with. This meant other character traits, like the whole matter of her being the Black Sky, never got the focus they needed.
* Elektra gives this as the reason for being an assassin when Abby asks.
* Elektra Luxx, Holly invokes this trope as she declares her love for Bambi.
* Elektra Natchios is as graceful on the battle field as she is deadly.
* Elektra's father, Hugo Kostas Natchios, is renamed Nicholas Natchios.
* Elektra, the title character, in the midst of rejoicing over the deaths of her mother and her consort, suddenly drops dead at the end for no reason except to bring down the curtain on a crushing downer note.
* "Elektronik - Supersonik", has Slavic-sounding broken English lyrics.
* Elektro tries to frame Wonder Woman for a series of bank robberies by using a
* El embarcadero, Katia has a long-standing affair with Big Boss. However, unlike most examples of this trope, the power dynamic isn't really an issue, and for the most part their affair doesn't affect their work.

* El embarcadero, Óscar's death is what sets the plot in motion, but he's still a central character and appears frequently in flashbacks, with much of the story revolving around unravelling his lies and piecing together who he really was and what really happened.
* Elemental Assassin between the protagonist Gin and Detective Donovan Caine. While he eventually loosens up on the fact that she killed his partner (Ultimately coming to the conclusion that if he'd known how dirty his partner was, he might have killed him himself), the basic fact that she's an assassin and he's a cop creates a conflict that they're never quite able to get over despite their mutual attraction, and Donovan ultimately removes himself from temptation by transferring to a different city.
* Elemental Assassin (Do not threaten her friends, family, or employees). As of 2016, the series is at thirteen books with no sign of stopping any time soon.
* Elemental Assassin, Gin finds some photographs of Giles Gordon engaged in sex with prostitutes:
* Elemental Assassin, Gin is attempting to escape from the Ashland Opera House when she is cornered by Donovan Caine on the roof. She escapes by jumping off the roof into the Aneirin River.
* Elemental Assassin, Gin is hired to kill a target. Another assassin, the Viper, is hired to kill her immediately after she completes the contract so that the authorities have a convenient scapegoat to hang the murder on.
* Elemental Assassin, he shows up at a formal fundraiser wearing a white suit.
* Elemental Assassin, instead arranging for the child to be returned to his father's custody. When asked if this was a good idea, Gin replies that they'll find out in twenty years or so.
* Elemental Assassin in the story who get worked up over it, as it means that the store had sold two of an allegedly one of a kind designer dress. This inadvertently saves Gin's life - when thieves raid the museum, they make a point of assassinating Gin first so she can't go Die Hard on them, only they accidentally kill the other girl, who bore a superficial resemblance to Gin and was wearing an identical dress.
* Elemental Baggage is a thing in this universe and Kuvira is a metalbender. In addition, Earth Empire soldiers wear actual armor, while generals (including Kuvira) wear uniforms.
* elemental benders have weaknesses and strengths to balance out everyone, making it a matter concerning the skill of the user rather than the actual bending practice that has the advantage. Fire is less effective in cold environments and gone during a solar eclipse. Water can easily be removed from the bender and is gone during a lunar eclipse. Earth only works with direct contact with the earth (although some powerful benders like King Bumi can overcome this weakness). Air has a limitless power supply, but is usually not an aggressive fighting style and does not feature any type of finishing move.
* Elemental Blessings features Alys, the third queen of the Kingdom of Welce. It's gotten to the point where 99% of the people with power, such as the other queens, the Five Primes, and the king's chief advisers don't believe a single word that comes out of her mouth, and actively work to limit her influence.
* Elemental Burst, boosting his damage and jumping skills but draining his health until the effect ends on its own or he leaves the field.
* Elemental Chess Trilogy, after Riza Hawkeye gets married, the men of her old military unit are slightly stumped as to what to call her, since they don't feel it's appropriate to continue calling her Hawkeye. They settle on a name of their own devising - Ladyhawk. She herself has her own Affectionate Nickname for the leader of the country, who happens to be her only living biological relative - "Fuhrer Grandfather, sir." (Yes, the whole thing.)
* Elemental Chess Trilogy are a father and mother pair to the men of both their old unit and their current one.
* Elemental Chess Trilogy, attempt to give them some privacy in a compartment on the train back to Central... except for the members of the Mustang unit, who left communications equipment in there with them and are listening intently to the conversation.

* Elemental Chess Trilogy between the two (though plenty of other people guessed).
* Elemental Chess Trilogy each wear their own two dog tags, but also one belonging to the other; they exchanged them after the war. The official explanation is a practical one - they are each other's next of kin - but the real reason is this trope.
* Elemental Chess Trilogy for the main pairings. Most are married before the end of the first story.
* Elemental Chess Trilogy gives this role to Edward Elric, but in a limited capacity. He only does it to Roy Mustang, for whom he never uses the same nickname twice, calling him things like "General Chess Fiend," "General Skirtchaser," and "the walking cigarette lighter." On the rare occasion he uses the man's real name, it's a pretty serious situation.
* Elemental Chess Trilogy, Riza is formally designated this by the members of her assigned protection detail, who collectively refer to themselves as "the queen's men."
* Elemental Chess Trilogy. She and Mustang are even playfully described at one point as having been "mommy and daddy to four rowdy little boys," and one of the 'rowdy little boys' admits that it's not entirely wrong.
* Elemental Chess Trilogy turns Central City into this when it gets invaded. All entrance and exit points are blocked off.
* Elemental CraftingThe most important aspect of a piece of armor? What material it's made from!
* Elemental Cyclone attack, has him spinning to create a leafy tornado.
* Elemental deities, as indicated by their name, will usually embody a certain element depending on their nature, though non-Elemental deities can possess elemental powers if it relates to their Concept(s) on a symbolic level, such as Prince Written Word having
* elemental effects to their action skill. In later games, Artifacts instead give you a random set of passive buffs.
* Elemental fluorine is one of the most difficult chemicals in the world to handle properly because it reacts quickly and violently to almost everything except some metals and chemicals. It will happily consume even the most invisible quantities of water and eat straight through glass. It is
* Elemental Gearbolt, and creates weapons as a means of self-destruction — the titular Elementals.
* Elemental Gearbolt is all orchestral, all the time and the gameplay is all aerial battles, all the time.
* Elemental Gelade. And what does she use all the space for? Guns, missiles, bombs... anything that explodes.
* Elemental Gelade falls into this. Aside from a single-episode plot, this is mostly ignored.
* Elemental Gelade is armed with tons of artillery, including missile launchers and machine guns, and usually relies on ridiculous rapid-fire to fight.
* Elemental Gelade: Rasati and Lillia's guardian. He broadcasts it from a mile away, but Rasati doesn't seem to notice.
* Elemental Gelade. Ren is an Edel Raid, a special type of human able to turn into a weapon when they form a contract with a Pledger. She chooses Coud to be her Pledger and they fall deeply in love.
* Elemental Goddess states that the latter will be the norm from now on.
* Elemental Hair Colors hair is bright pink to go with his rose / cherry blossom motif.
* Elemental Hair Composition: Hair made from natural elements as a symbol of magical, divine powers
* Elemental is Michael, an Elemental of lightning. Not only can he launch the bolts from his body, he can also summon them from the clouds above, as well as channel the energy into his sword to create a lightsaber like effect.
* Elementalism magic. Which elemental shows up is a bit random, and sometimes they hurt more than they help. Earth Elementals are notoriously stupid and slow.
* Elemental Logic series, Zanja calls the family's daughter Leeba "Little

Hurricane."
* Elemental Logic who is becoming very like the Sainnite invaders she so hates. And Medric, son of a Sainnite man and a Shaftali woman, is trying to make peace between both peoples because he realizes that the alternative is the destruction of both the Sainnites in Shaftal and much of Shaftali culture. Their views suggest the past, present, and future of the country, and the writing and distribution of Medric's book is a major plot in the sequel.
* Elemental Masters, and even more so when under stress. She has to cut it periodically, and by the time she left her home, she had a trunk full of her braids.
* Elemental Masters (a variant where "modern" means the late 19th and early 20th centuries)
* Elemental Masters his wives. With the exception of Kaczor himself, the whole family is visibly deformed even by werewolf standards, which the main characters explain as the normal effects of inbreeding exacerbated by the magic they use to transform.
* Elemental Masters novels are loosely based on the plots of known fairy tales, but usually with a twist that distinguishes them from the source material.
* Elemental Masters) refer to magic being used by spies on both sides of World War I. The second also has a necromantic summoning in No Man's Land, which goes as well as you'd expect with all that raw material around.
* Elemental Masters series like to exploit this, as Edwardian Era men don't think much of women and thus are more willing to turn their back on them or underestimate them in a fight, much to their detriment.
* Elemental Masters series, though a few use their powers more for healing than for combat.
* Elemental Masters summons a disease elemental and sets it loose; it's implied that this caused the 1918 H1N1 pandemic.
* Elemental Masters, then a real ghost appears at the end of the séance.
* Elemental Masters, they can see the effects, among which are crop circles.
* Elemental Master switching the ones for Fire and Wind with the ones on the facing page for Earth and Water.
* Elemental Masters with a corresponding blend of mundane and magical threats.
* Elemental Nations of Ba Sing Se, whose ruthlessness she admires), and even returns to the homeland with a personal contingent of them.
* Elementalors: Asami is put in a tank as a form of being Brainwashed.
* elemental power of shadow that would have killed them all had his fellow Makuta not stopped him.
* Elemental Powers; and the latter's bodyguards Akatsuchi and Kurotsuchi can respectively create stone golems and combine earth with fire to create quicklime.
* Elemental Powers are divvied up among the spheres of magic Mages can learn in
* Elemental Powers. Fire as the 'birth of science' for curious types. Ice (or water) as the cold ivory towers of education and learning for bookish ones. Lightning to go along with machines for techies. Or they could be non-elementals that rely on practical knowledge if they lack the spiritual aptitude for magic.
* Elemental Powers incorporated into their designs. Special mention goes to Takuya, though since all of his Digimon forms except for BurningGreymon have the fire symbol somewhere on their armor.
* Elemental Powers: Several gods have them: Teshub commands the lightning; Enlil and Marduk command the winds; Ishkur and Set control storms; and Sekhmet, Wadjet, and Nergal wield fire.
* Elemental Powers, so being unwilling to use elemental powers is hardly a hindrance to them.
* Elemental Powers to four sisters so that they can help humanity. The Four Maidens actually do exist, each wielding unimaginable power, but their existence is kept secret by their guardians to prevent villains from stealing their power. When one Maiden dies, her power will pass on in a way determined by her dying thoughts. If her last thoughts are of an eligible girl, the power will pass to her; if the dying Maiden's last thoughts are of a male or an ineligible female, the power will pass

to a random eligible female who could be located anywhere in the world. If a Maiden is murdered by an eligible female, and her dying thoughts are of that killer, then the killer themselves can inherit the power. Each new Maiden will interpret and express her powers in a way that is unique to her, so no two Maidens will be ever be alike, even when comparing Maidens of the same Season.
* Elemental Powers Waterbending can subdue opponents nonlethally, do anything Earthbending can using ice, heal, and at high levels attain strong mobility when in water. Outside of combat, Firebending, at least according to Jeong Jeong, is really only useful for keeping warm, cooking food, processing steel, and destruction.
* Elemental Rivalry: Horus the sun god vs. Set, god of storms and murderer of Horus' father Osiris.
* Elemental Rock–Paper–Scissors: Elements having equal strengths and weaknesses over other elements.
* Elemental Rock–Paper–Scissors from the game has been used well beyond its original source.
* Elemental Rock–Paper–Scissors if they do not want to have a hard time.
* Elemental Rock–Paper–Scissors: Where one element is strong towards another and weak towards yet another.
* Elementals, a dark superhero comic about the team of Morningstar, Vortex, Fathom and Monolith.
* elementals and Dragon-Blooded Exalted. The Aspect of a particular Dragon-Blooded determines their favored attributes (such as Craft for Earth, Sail for Water, Thrown for Air, etc.), and one Charm (Elemental Bolt) lets them produce a blast attack of their particular element. Each element also has an Elemental Pole in Creation (Air in the North, a frozen waste; Fire in the South, a vast desert; Wood in the East, a dense mass of forests and jungles; Water in the West, a vast ocean; and Earth in the center, a massive mountain).
* Elementals another system to make up for the lack of buttons to push. Their weapons fire when they put their hands in certain positions, and they turn things on and off by the "glance system," where their viewport has a series of icons above and below it. To activate the icon, the Elemental just looks at it for a moment. They also apparently use modified versions of the neurolinking systems.
* Elementals gotten one of the team, Morningstar, to fall in love with him/her.
* Elementals — usually, but not exclusively, the four classical ones. Earth elementals tend to be strong and sturdy, air elementals are swift and agile, fire elementals are aggressive and destructive, and water elementals are often gentle with healing powers, but all four can be forces to be reckoned with. They are typically neutral and independent, but both good and evil magic-users can tame them and make them do their bidding.
* Elementals of Harmony: In "Sideboard of Harmony", from "Quod Cucurbita": It's possible to time travel to a point where you're still alive, but travelling to a time when your mother is pregnant with you is noted to be a very bad idea.
* Elementals of Harmony, Tezzeret has Ditzy Doo send Jace Beleren a courier capsule with a message. Tezzeret lampshades this before giving his real message (forcing Jace to teach Ditzy blue magic).
* Elementals of Harmony, where Address Unknown uses it to hold letters.
* Elementals. She is far from the typical example, being sentient and normally indistinguishable from human.
* Elemental sulfur is bright yellow when solid, bright red when melted, and blue as a high-temperature gas. It's also a very effective pesticide and quite flammable. Burning it with oxygen gives sulfur dioxide, however, which is highly toxic but colorless.
* Elemental, took place in a future in which magic has been discovered to be a form of physics, and (for example), thamauturges use pentacles to control antimatter.
* elemental wands. However, Huo Haha shows up and uses the magic paper against Happy S. by reverting the other Supermen back into their Mech Stone forms with no way to return them to normal. Then Happy S. wakes up and realizes the whole thing was a nightmare he was having.
* Elemental - War of Magic, it's possible to summon a wide variety of creatures.

* Elemental - War of Magic - The only "official" one is the Fallen, a bunch of half-dragon, half-human gents.
* Element Animation as a UFO runs amok abducting every testificate in sight.
* Element Animation portays Santa (who is a villager) as a criminal who enters house and steals their presents like the Grinch.
* Elementary: A character says to Holmes that she sees he must be a "fellow addict". Holmes is slightly taken aback that his past of drug use would be so apparent to her, until it becomes clear she meant a crossword puzzle addict.
* Elementary adaptations). It wasn't helped by the fact Moriarty once drew a giant portrait of Joan.
* Elementary: After returning from a trip, Watson asks about Sherlock Holmes' pet tortoise, Clyde:
* Elementary: "A Landmark Story" sees Holmes and Watson interrogating the Murderer of the Week about his connection to Moriarty. When Watson starts getting nervous about holding the man in their basement Holmes asks her if she wants some tea to soothe her nerves. Watson replies that she wants a drink, a comment that earns her a disapproving look from Holmes who's a recovering drug addict.
* Elementary a man appears to escape justice because the statute of limitations on a vicious assault expires an hour before the police identify him and are able to get an arrest warrant. However, Sherlock is able to prove that the man left the country for a day to go see a hockey game in Canada. If the perpetrator of a crime leaves the country, the principle of "tolling" can be applied and the statute of limitations is extended by the duration of the absence. This prevents criminals from fleeing the country and waiting out the statute of limitations in another country. In this case, it means that the police have another day to file charges.
* Elementary, a man confesses to Holmes and Bell that he's stolen several cell phones. He didn't have much of a choice, as they could see the phones on a table the moment he answered his door, but it's enough for them to incorrectly dismiss him as a murder suspect on the grounds that's he too stupid to pull it off.
* Elementary a man is murdered and later that day his house is set on fire. Sherlock initially suspects that the fire was set to hide the theft of a valuable collection of silver items made by Paul Revere. However, he then discovers that the theft was committed by a firefighter after the fire has been put out. The arsonist was looking to destroy documents stored in the murder victim's safe but was unable to break into the safe so he set a fire that was hot enough to incinerate the paper inside the safe. The documents contained a land grant from the American Revolution that would have proven that the arsonist was not the rightful owner of a very valuable piece of land.
* Elementary and deduction to learn things, having previously demonstrated it by determining various aspects of Joan Watson's background. Then she asks how he knew her father had had an affair.
* Elementary and started to treat those around him with more grace, largely due to Joan Watson's absolute refusal to tolerate his more insufferable behaviours.
* Elementary as a substitute for the ambulance they're using as a getaway vehicle. When explaining his conclusions to Captain Gregson the next day he swaps the locks for stickers and Clyde for a stapler.
* Elementary as Holmes and Watson find a large bomb set up in their apartment. Joan wants to run to find the bomb squad but Sherlock carefully looks the bomb over, then yanks out a single large cable to defuse it.
* Elementary, as there isn't any real malice in his habit of playing on their eccentricities for his own amusement.
* Elementary, a suspect who died in a holding cell at the PD is examined by Watson, who takes one look at the reddish-black drool around the body's mouth and immediately orders the room quarantined due to possible anthrax contamination. The man, a known drug mule, had swallowed a balloon full of weaponized anthrax powder, apparently having been told it was drugs by the would-be terrorist who'd cultured the biological agent.
* Elementary: At the start of "Up to Heaven and Down to Hell", a driver steals a parking spot from a limo driver who has been waiting for it. Ignoring the honking

traffic building up behind him, the limo driver opens his trunk to extract something, obviously planning to inflict some vengeance on the offending car and/or driver. However, whatever payback he had planned in preempted when the other driver is killed by an elderly woman plunging off the balcony of an apartment building.
* Elementary, a world-shaking result which would (among other things) invalidate most existing cryptography. They're promptly silenced and the results confiscated by the FBI. The fact that the FBI can now blow up the Internet at will goes unmentioned.
* Elementary begins dressing this way as the seasons go by. As she grows more into her own as a detective she switches to wearing suits and ties.
* Elementary - but Sherlock goaded her into it, to give himself time to pick his handcuffs. "I'm about to die, so, now's your chance to share! It's good to share!"
* Elementary, but Sherlock's history of substance abuse, boxing, and other martial arts activities, and accumulated injuries from previous adventures also played a part.
* Elementary but we know that the culprit ended up being the trapper's wife who tried to frame an innocent bear for the crime.
* Elementary: Captain Gregson's first marriage fell apart because his ex-wife couldn't handle his missing family obligations due to work. Gregson points out to her that he'd always been clear about his priorities, Cheryl counters that she never promised that she'd always be able to accept that fact. Rather tellingly his second wife is a former police officer who, presumably, can better understand why Gregson needs to make work a priority.
* Elementary: During the first season Holmes and Watson investigate Sebastian Moran and Daniel Gottlieb who intially appear to be serial killers but eventually turn out to be assassins working for Moriarty. The serial killer trappings are meant to throw off the police and disguise their connections to the criminal mastermind.
* Elementary episode "All My Exes Live in Essex" Holmes and Watson must solve the murder of a woman who was simultaneously married to two different men. And was also in an earlier 6-way group marriage with three other women and two men, before that one.
* Elementary escapes and goes on a killing spree to discredit a criminal profiler who ruined the killer's family because her book claimed his father molested him. It worked.
* Elementary for similar reasons, despite being in totally different genres.
* Elementary frequents a conspiracy theorist BBS as a hobby. The joke, of course, is that the hobby is studying the other forumgoers, up to and including making up conspiracies out of whole cloth.
* Elementary had a pickpocket who ate a bag of white powder he had stolen when the police picked him up. Unfortunately for him, it wasn't cocaine, but anthrax.
* Elementary had one of the victims of the week being killed in a crematorium retort (alongside another who was already dead), although technically unintentionally; the killer simply having been trying to destroy evidence, and unaware that one was only unconscious (as revealed by the disturbing image of a blackened handprint against the door). Sherlock points out how it was ultimately an inefficient way of disposing of evidence, as the bones are left intact (allowing for cause of death to be determined), and even leaves behind identifiable prosthetics.
* Elementary has a vaguely similar premise, although the specifics are very different.
* Elementary has Sherlock Holmes able to spot the one little detail that undoes the entire mystery.
* Elementary has the mysterious 'M' leaving rambling notes for the police, using letters cut out from newspapers of course. As Sherlock correctly guesses this is really a ruse to follow the police into thinking he's something he's not.
* Elementary has Tobias Gregson. Gregson in this version is a captain in the NYPD instead of a Scotland Yard inspector (Gregson does mention his temporary assignment to Scotland Yard post-9/11, where he met Holmes). Gregson tends to trust Holmes, as long as the latter has at least a hint of evidence to back up his claims and will

often trust Holmes over his own detectives. The one time he got pissed off at Holmes was when the latter started questioning Gregson's star-making arrest and accusing him of planting evidence. Gregson is visible straining himself to avoid decking Sherlock. It turns out it was Gregson's then-partner who planted the evidence, but the guy was still guilty.
* Elementary have gold on it but not enough to cover his promises (he'd have to pay out $100 million if he found $10 million). He thus tracked the researcher down to kill him and then arranges for a rival explorer to get the log so he'll get to the wreck first, clean it out and give the hunter an excuse for his investors why there was no gold there. Holmes and Watson actually show the key clip from the movie to cite how he was running the exact same scheme as he's arrested.
* Elementary he's innocent. Apart from this, no one on the show lawyers up, guilty or no. Richer suspects do sometimes arrive with legal representation already in tow, but they tend to get in one or two lines at most before Sherlock explains why their presence is irrelevant.
* Elementary, his health starts taking a turn for the worse. He worries that he'll lose his ability to be a detective, which would subsequently leave him losing his reason for sobriety. The rest of the arc deals with his health issues and his attempts to avoid his illness becoming this trope.
* Elementary-induced stupidity, Sherlock and Joan bickering rather than getting closer like fans wanted, and Mycroft's drawn-out plotline, and a somewhat unbelievable romantic subplot with Joan. Season three, thanks to Kitty's terrific character arc, and a saner dynamic between Joan and Sherlock was a return to form.
* Elementary: In "Terra Pericolosa", the body of a murdered security guard is hidden in the base of a display case at the archives where he worked.
* Elementary: In "The Invisible Hand", a hitman murders two of Morland's employees and plants a bomb in his office by posing as the delivery guy from the bottled water company.
* Elementary involved a murdered senior woman who left her a $12 million inheritance to her Shih Tzu instead of her children.
* Elementary is also suggested in the series, in that Sherlock uses drugs in hopes of dulling his ever-active deductive senses.
* Elementary is another show both set and filmed in New York City, though it's not a complete aversion— for reasons that even Lucy Liu herself found confusing, Harlem is used to represent Brooklyn.
* Elementary is often seen assisting Detective Marcus Bell — and, by extension, Sherlock Holmes and Joan Watson — in the investigating of crime scenes, if not doing the investigations himself. He has also had to chase suspects and often interrogates them too.
* Elementary is seen regularly jogging, enjoys watching baseball games, and is implied to have played soccer when she displays knowledge of the sport.
* Elementary: Marcus Bell secretly starts dating another detective. Watson and Holmes both approve of her...until the former finds out she is Internal Affairs, and the latter finds out she is dating Bell. Watson is naturally worried that Bell doesn't know, and that he may unintentionally get other cops in trouble. Holmes is actually quite supportive of the role of IAB, citing them the only way to check police corruption and that their previous cases with corrupt cops had required their help. Despite this, Bell is upset when he finds out about her IA connections.
* Elementary markets for non-meat substitutes and tried to force him to edit the FDA submission so it wouldn't be approved. When the scientist refused he was murdered and the submission edited anyway.
* Elementary — he kills people, but only "bad people" and he sincerely believes he's saving innocent lives by doing so. Then, when Sherlock tries to show him another way, by rehabilitating one of the potential killers he's identified, he murders innocent people and frames the guy rather than admit he's wrong.
* Elementary: Ms. Hudson is a trans woman, along with her actress Candis Cayne.
* Elementary: Murder of a conspiracy theorist → A member of a group that created a terrorist plot for a government training simulation that worked too well killing/mentally incapacitating the other members of said group to prevent

knowledge of their plot from spreading. It turns out that the two cases are completely unrelated; the conspiracy theorist was killed by another conspiracy theorist over a disagreement about a different theory.
* Elementary, naturally. Like her namesake, she is exceptionally bright in her own right; her main purpose for the audience is to ask the necessary questions to get inside Sherlock's head, since otherwise no-one would have the slightest idea what's going on upstairs with him. Ironically, this Watson begins to avert the trope a little as she increasingly becomes a competent detective under her own steam and needs fewer and fewer explanations from the main man. As of the start of Season 3, she's taken Sherlock's role as a private detective and police consultant, due to his absence. From then on, Detective Bell increasingly gets to play the straight man, and Watson is more likely to finish Holmes' sentences, so to speak.
* Elementary (not shown to have any particular skill at basketball) bets a suspect he can make a basket from a very long distance, and the suspect agrees to be interrogated if it happens. Holmes squats, swings the ball back and forth dramatically, and tosses it behind himself. "He wasn't going to talk anyway," says Holmes.
* Elementary of cops lining the street as he's put in the car, reminding him that he's made a lifelong enemy of every single person in the NYPD.
* Elementary of how it's going to end and waits downstairs. To her annoyance, he's right.
* Elementary on the autism spectrum. She lampshades this by mentioning she can't tell if he's autistic or not.
* Elementary over the relative merits of Arsenal (his team) and Manchester United. Also, when Sherlock finally meets him, he sees M watching Arsenal and tells him that he now has one more reason to hate him.
* Elementary plot to kidnap a member of a royal family from the United Arab Emirates and ramsom him.
* Elementary public knowledge when she wanted to keep the issue private. She believes that people seeing her as a victim will affect her promotion prospects, although she's later promoted to sergeant suggesting it wasn't as big an issue as she feared.
* Elementary season four episode "Ready or Not" Holmes and Watson look into a missing doctor named Vincent, who they determine was a survivalist renting space in a doomsday bunker, run by a former Marine named Ronnie Wright. When they visit the bunker, Holmes determines that the bunker is an ill-prepared fraud, and finds a bloodstain belonging to Vincent. Ronnie Wright admits to disposing of the body but claims he couldn't have killed him because a bad rotator cuff prevents him from swinging a weapon overhead. He admits that he was injured while on his high school swim team and that he was unable to enlist in the marines.
* Elementary. She dies or you do. Your choice. M." Moran bashes his own head in.
* Elementary: Sherlock and Joan regularly break into suspect's homes and other property in order to gain or simply secure evidence for the NYPD. Sherlock even states that little things like the 4th amendment don't apply to them, since they're "only consultants". Except they are on the NYPD payroll, thus bound by all the constitutional requirements that entails.
* Elementary, Sherlock and the police need a file, but the man who has it can't give it to them due to confidentiality. Sherlock takes the man aside, says he knows he's using meth, and if he hands over the file it will remain a secret. He even recommends a rehab center. The man puts the file on his desk, and goes to the bathroom.
* Elementary Sherlock goes to support groups for his heroin addiction.
* Elementary, Sherlock is investigating a missing person and talking to his wife when he realises some of the pictures hanging on her wall have been recently moved. It turns out that when the murderers stashed the body inside the wall, they didn't put them all back in the right places.
* Elementary, Sherlock's father Morland Holmes attempts to expose a potential mole in his company by giving the suspects each a slightly different version of the same contract; since each contract has a unique typo in it to distinguish it from the

others, Morland reasoned that he would be able to identify the mole based on which copy of the contract was given to his business rivals.
* Elementary, Sherlock's identity is stolen and Sherlock tracks down the imposter. The guy turns out to be a poor immigrant who needed Sherlock's identity to get a work permit. Sherlock is rather sympathetic and agrees to not report the immigrant if the guy tells him who sold him the identity in the first place. Before leaving, Sherlock warns the guy to quickly get a new identity since there are quite a number of people with grudges against Sherlock or his family and some might mistake the imposter for the real thing.
* Elementary She was more gracious about it than most entries on this list, though, and ultimately took no for an answer.
* Elementary: "Snow Angels" opens with a group of thieves shooting a security guard in the chest and dragging him behind his post. Before he succumbs to his wounds the guard manages to fire a single shot that injures his attacker. The police to track the attacker down when she checks into a hospital to treat her "stab wound".
* Elementary sometimes goes out of his way to be alone with someone who he knows is the psycho to confront them without the police or anyone else knowing, such as in the episode "The Deductionist".
* Elementary starts with the introduction of Joan's young son Arthur. In season 6, she began thinking of adoption, and she ultimately she did in the three year timeskip.
* Elementary: Subverted when Sherlock is on the trail of a prolific hitman and is frustrated by a witness's useless description. It turns out the description was useless by design, he wasn't a witness, he was the killer.
* Elementary, the Balloon Man would leave behind balloons saying things such as "thank you" and "congratulations" after abducting a child.
* Elementary. The husband is charged with attempted murder while the detectives investigate why the victim was wearing body armor while working in a college biology lab.
* Elementary the tracks when it's snowing two inches an hour, but what kind of vehicle they were driving.
* Elementary. The two of them had met and fallen in love, so unusually for this trope, the citizenship marriage between them is a love match.
* Elementary". This is where a dispatcher makes one final call to the fallen officer before announcing he is no longer on duty.
* Elementary trope, as none of the agents or their handler drop their American accents (makes sense, considering they have lived in the country for decades). In fact, the husband and the wife didn't love each other but were ordered to conceive a child in order to allow him or her to grow up as a native-born American and a second-generation agent. However, the father refused to let his daughter get mixed up in this. One of the clues that led to Holmes discovering this is that the husband quit his job shortly before the company signed a government contract. The only reason someone would do this is to avoid a deep background check all government contractors must go through, which would quickly reveal the truth.
* Elementary trying to make an easy way to get enough money to pay off a loanshark.
* Elementary warns Watson at one point that if she's looking for his softer, inner personality, she'll be disappointed. He is a jerk, through and through, and the only reason he relates so well with her is that, because he finds her "exceptional", he makes a significant attempt to be personable with her.
* Elementary with Moriarty. After being arrested, Sebastian Moran provides occasional assistance to Sherlock in search for his mysterious employer. However, in a later episode, Moriarty tricks Sherlock into delivering a coded message to Moran, threatening Moran's sister if Moran doesn't kill himself. Moran goes back to his cell and smashes his head at the mirror repeatedly until he passes out. He gets a brain hemorrhage and is not expected to wake up. In this case, Moran wasn't afraid for himself, figuring he was tough enough to handle anyone Moriarty might send after him, but he did not expect the mastermind to find out he had loved ones.
* Elementary women, because he's studying the effect of the heat on different brands of bodypaint.

* Element Hunters argue about her not participating in a dangerous dive and she accidentally corners him into admitting his feelings.
* Element Hunters is one. The real only way to tell is her stating herself to be one though.
* Elements of Cringe are captured, Celestia demands Twilight's release and also, whoever the other ones are.
* Elements of Cringe obviously has its moments. Like Twilight trying to blast her way out of a glass box, only for it to ricochet and knock her out.
* Elements of Gotham City from both films (and presumably the third) were also built in the massive disused airship hangars at
* Elements of Harmony" has her jump off a cliff from a violent Hydra, and would have been killed if a bog bubble didn't appear under her to bounce her up to the other side of the cliff.
* Elements of Harmony with her corrupted friends, but Twilight overcomes his mind games with help from her old friendship reports and lifts his spell on her friends to take him down.
* Elements of Justice does this as a change to their multiverse. One and a half years passed in Equestria after the first trial. But eight years have passed in Phoenix's earth.
* Elements of Justice, there are expectedly a lot of the usual interjections like "Hold It!" and "Objection!", but Suri Polomare also regularly shouts "Shut Up!" in large red letters.
* Elena’s birthday is September 8, which is also the premiere date of
* Elena as a vampire. She still retains her compassion and empathy even after she turned.
* Elena dated Matt, then Stefan, then Damon, in that order. Matt dated Caroline, who then dated Tyler, then slept with Klaus, then dated Stefan, then got engaged to Alaric, then dated (and married) Stefan again.
* Elena, especially in regards to Stefan. She got very jealous and suspicious of first Caroline, then Lexi (who only turned out to be Stefan's
* Elena Ferrante is one of Italy's most famous contemporary authors. She's also so reclusive that her name is a pseudonym, and she refuses to say anything outside of letters written to her editor and publisher as she believes that books have no need for their authors once complete and has a fierce desire to maintain her privacy. It was speculated that she is a pseudonym of Domenico Starnone based on samples of their writing, but he
* Elena Gilbert's non-humanity side is also subverted. Not necessarily different in physical strength, but also much more cold, arrogant, ruthless, and even calculating that the Salvatore brothers have to keep a sharp eye one her. They did their best trying to bring her back to her old self again. She also happens to be extremely fearless when she's in this phase.
* Elena is his female counterpart. She is the protector of everyone within the story, opposite Stefan. She is the main female character of the series.
* Elena is pretty competent while trying to defend herself. For example, when a strange vampire is trying to kill her, she stabs him with pencils — repeatedly — and then breaks a mop over her knee to try to stake him, and when a werewolf attacks her, she instantly sticks a knife into his gut. She's also adept at using her surroundings while trying to run away if pursued by a supernatural. This is magnified in Season 4 after she transitions. She goes so far as to kill Connor to protect her brother.
* Elena Kampouris had a small roll in Labor Day and a much larger part in Men, Women, and Children.
* Elena Mukhina was left paralysed from the neck down in 1980 while practising the extremely difficult and hazardous Thomas salto, which led to the move being
* Elena of Avalor, because the titular Lightning Warrior cannot be released by anyone other than malvagos, Elena recruits Victor and Carla and, in exchange for their help, offers to transfer them from the castle's dungeons to Soledad Island.
* Elena of Avalor caused the name of its protagonist to rise 50 places the year after it premiered.

* Elena of Avalor episode "Luna's Big Leap" was meant to air on the Disney Junior channel on April 27, 2019, but an encore of the previous episode , "Not Without My Magic", aired instead. While it did come out on Watch Disney Now and on demand the day of its intended release, it's TV debut would be 2 days later on April 29.
* Elena of Avalor episodes "Sweetheart's Day" and "Dia de Las Madres".
* Elena of Avalor, Estrella (one of Migs' kids) is voiced by Gia Lopez, while her father Mario Lopez voices Cruz.
* Elena of Avalor Griffin voices Dr. Mendoza. In late season 2, she's cast as Ash Delgado, who takes over as the main villain.
* Elena of Avalor if he doesn’t bring him the royal jewels and Queen Lucia’s Carnaval Tiara. After Victor puts Elena in harm to get the tiara, Esteban doesn’t want that and would rather have Victor reveal his secret. It doesn’t work because just as Esteban was about to confirm the revelation, Elena thinks Victor lied to distract her.
* Elena of Avalor: In "Island of Youth", Esteban's birthday is celebrated and a birthday song is played. It's not the famous one.
* Elena of Avalor. In Naomi centered episodes, or ones where they have major interactions, some of their dialogue with each other can sound rather flirty, like the beginning of "Captain Turner Returns". Also, while they're both still best friends with each other, Elena tends to act more like a lover who wants to help her out, like in the aforementioned focus episodes. The fact she's usually the only one in those episodes either going out of her way to help her adds to this. Naomi's behavior in these episodes is like of that of the lover who wants to prove she can be a good partner to her girlfriend.
* Elena of Avalor: In "Party of a Lifetime", it's revealed that Captain Chiloya and his crew saved a sorceress' life 400 years ago and she rewarded them by making them immortal. They still enjoy it.
* Elena of Avalor is to have several episodes moving forth the overarching story involving Shuriki, Victor and Carla, and Elena's scepter, and then follow it up with more lighthearted stories that, though usually continuing from past episodes, are still relatively self contained. For example, the episodes "Class Act", "All Kingdom's Fair", and "A Lava Story" are sandwiched inbetween the five preceding episodes involving Shuriki and the scepter, and the "Song Of The Sirenas" movie, a major wham episode.
* Elena of Avalor. On the other hand, Isabel, Abuelo, and Abuela are eventually released and they're no worse for wear.
* Elena of Avalor series finale, "Coronation Day", takes place on Elena's coronation, which is also her birthday. Team Ash picks this day to attack Avalor.
* Elena of Avalor spin-off. Though the people of Avalor celebrate Navidad (which is just the Spanish name for Christmas), Naomi and her family, who are foreigners from Norberg, call the holiday Christmas in a throwaway line.
* Elena of Avalor stars teenage protagonists who are at least 15-16 years old, and tells a serialized story about its title character one day being queen, among other things. The show airs on Disney Junior, which is aimed at preschoolers.
* Elena of Avalor, the intro is consists of moments derived from the first episode (Elena and co. versus the Noblins, Elena and her abuelo singing and dancing while their family looks on, Elena and co. in the throne room) and a Season 2 short (Elena riding away from the palace with Canela, Elena fighting a thief on a runaway carriage and being rescued by Skylar).
* Elena of Avalor theme song in English as well as many Spanish dubs, including Latin America.
* Elena of Avalor: The titular princess was trapped in the Amulet of Avalor for 41 years after Shuriki attempted to murder her. Once she is free from the Amulet, Elena finds that Avalor City is a prosperous trading center and such. But, she finds her cousin Esteban has aged that amount, and in a later episode she meets her childhood friend, who is now much older than her.
* Elena of Avalor took over Avalor (which forced Alacazar to go on the run and to never return home), Rafa didn't pursue how to learn magic, partly to avoid Shuriki's wrath. Her son, Mateo, sneaks into their basement to learn magic from

Alacazar's notes and he ends up becoming the royal sorcerer for Princess Elena after Shuriki is defeated. Rafa, however, has memorized some of the spells that her father taught her, such as the spell needed to remove the seal on a magical painting spell used to protect the royal family.
* Elena of Avalor, when Elena accuses her cousin Cristobal of betraying their family, he replies, "Betrayed is such a nasty word." But when he thinks about it, he can't think of a better word and he concedes "no, you're right, betrayed works."
* Elena of Avalor), where the Galonians are Latino Jewish and observe both Ashkenazi and Sephardic traditions.
* Elena of Avalor which is why she must stay away from them. When the potion begins to wear off two episodes later, her identity begins to unravel before Naomi, and this is soon no longer needed.
* Elena of Avalor while also delivering the consequences of Esteban's mistakes.
* Elena of Avalor, who was also a Latino boy in a red jacket named Marco.
* Elena of Avalor, with the little romance that's shown being either for side characters or parents, or played for quick gags if involving main characters .
* Elena of Avalor with the suspicious tendency to have his butt on camera at least once everytime he's onscreen, at least in the pilot (he gets a new, more modest outfit afterward).
* Elena's younger brother Jeremy is seemingly stalked by Anna, as they constantly bump into each other. Jeremy jokes about this ("Well, I kinda miss my daily dose of cute stalker chick.") but ultimately seems charmed by it. It later turns out that Anna was only using Jeremy to save her mother, but later ends up
* Elena was the one giving Sofia all those blessings and curses; once she's free, now the bearer is in control of what powers they get.
* Elena watches Stefan (the vampire) while he sleeps. He calls it creepy, while she defends it as being romantic. Almost certainly a
* Elena, who doesn't want to have a child with her soon-to-be husband until after she has written a second book, and even goes with Lila to a gynecologist to obtain birth control pills for both of them. She falls pregnant immediately after the wedding.
* Elena "Yo-Yo" Rodriguez has her arms cut off at the elbows by Ruby Hale
* Elend is one to Vin. Although this is a setting where having such powers is relatively common, but her being a pint-sized super powered assassin never bothers him in the least, even when she head-butts a guy so hard
* Elend's powers were far greater than the average Mistborn, but Vin's greater experience meant that she was often still more effective with hers.
* Elenium and he didn't want to do that to her. But since he can't bear to hurt her either, he goes through with the marriage and they're very happy together.
* Elenium can't see either; the narrative even notes that Flute seems very curious.
* Elenium: Played with. Sparhawk told a young knight to guard Sephrenia, but agreed to let him take part in the battle (his first) when Sephrenia said she didn't need a guard. The knight was then killed by Adus.
* Elenium, serves this role for literally hundreds of Pandion Knights — and has done so for generations. They don't call her "little mother" for nothing.
* Elenium tell them apart, and delightedly assumes that he's proposing marriage — and accepts eagerly.
* Elenore. Characteristically, it also involves a boundless flower field.
* Eleonora, even though her husband has previously vowed never to remarry after her death. Her spirit appears to him in a vision soon after his second wedding and tells him he is absolved of the sin of breaking his word.
* Eleonore Prohaska (1785-1813), who served as private August Renz in the Lützow Free Corps and only revealed her real identity when she was mortally wounded in the battle of the Goehrde (1813).
* Elephant & Piggie, and most of the books' back cover summaries using no pronouns for the characters, and be subsequently taken aback when you read the book where she puts on a dress for a party.
* Elephant & Piggie book "Elephants Cannot Dance", Gerald's frustrated tantrum at his failure to learn how to dance is interpreted by a pair of passing squirrels

as a hot new dance move, "The Elephant."
* Elephant & Piggie book, Piggie plays the trumpet for Gerald but the sounds she makes on it are so horrifically screechy and discordant that they can in no way be described as "music". When she asks Gerald what he thought, he tactfully says that her trumpet is loud and shiny and that she holds it very well.
* Elephant & Piggie book "Pigs Make Me Sneeze", Gerald thinks he's allergic to pigs.
* Elephant & Piggie is very active and cheerful, and, well, hammy. She often bounces onto the scene asking Gerald what they're going to do.
* Elephant & Piggie, Piggie gets one when she and Gerald are trying to figure out how their new friend, a snake, wants to play catch. Naturally, since this is a hip, modern series, it's a CFL.
* Elephant Graveyard: A place that large animals (not necessarily elephants) naturally go to when they die, often containing their skeletons.
* Elephant Graveyard: A place where very large animals (usually elephants, hence the name) go to die.
* Elephant (in Japanese things) - also eggplant (traditional phallic symbol) and turtle's heads (pun on a slang term for foreskin).
* Elephant in the Living Room: An obvious issue that everyone present is going out of their way to avoid addressing.
* Elephant in the Living Room: An obvious problem that everyone is going out of their way to avoid acknowledging.
* Elephant in the Living Room, with some dire but unstated consequences for acknowledging them. Twilight and Rarity both panic briefly, then agree to just pretend that the entire conversation never happened.
* Elephant in the Room" by towering over all else around her with her increased size. When she walks, she typically also becomes a lumbering hulk, lurching and teetering around on the heels like Frankenstein's Monster due to her increased height and decreased balance.
* Elephant in the Room, except the elephant calf put Chris on top of Martin after stealing their blankets. Didn't stop them from falling asleep, though...
* Elephant is a tale about two students going on a killing rampage in their school. The film features a lot of pristine stillness, extremely long static shots (which continue rolling even after everyone has left sight), and no score.
* Elephant jokes are nonsensical variants on "why did [x]? because [pun on x]." jokes, named so because a lot of them feature elephants in the setup. They can be standalone, or daisy-chained together to make an increasingly nonsensical story. Here are a handful of examples...
* Elephantmen, and Brandon Graham, creator of Multiple Warheadz and King City. They will sometimes make covers and backup material for each other's comics.
* Elephantmen in the form of Elephantmen only seating and one abusive customer.
* Elephantmen. She's a tall, slim, curvy African goddess, and he's a rhino-human hybrid.
* Elephantmens of hippos, elephants, and various other African megafauna.
* Elephantmen tells it story from multiple character perspectives and sometimes out of sequence.
* Elephantmen, Tusk saves an old woman from drowning and holds her in front of his face. Although she thanks him for saving her, she mentions how he has terrible bad breath as well.
* Elephant, perhaps the most famous of these films, Alex and Eric are heavily based on the Columbine gunmen.
* elephants actually do fear, or at least avoid, mice; they explain it as, due to elephants' terrible eyesight, a blur moving around on the ground could be a venomous snake as easily as it could be a harmless mouse, and they're better safe than sorry.
* Elephants and dolphins share many behaviours with us that may be signs of sapience, but without a way to effectively communicate with them, there's no way to positively confirm this. Elephants have been shown to mourn, and appear to have a concept of revenge and grudges (as unfortunate humans in areas where elephant-

hunting is common have experienced firsthand). Dolphins not only recognise themselves, but
* Elephants are also entertained by humans, and have been recorded doing things like mimicking humans waving and even taking people's hats to put on their own heads.
* Elephants Are Scared of Mice: Elephants are irrationally afraid of small rodents.
* Elephants Are Scared of Mice, elephants leaping into the arms of either another animal or a human at the sight of a mouse was a standby.
* Elephants Are Scared of Mice tested it and found it confirmed: elephants will actively avoid mice if at all possible. Though it's not specifically mice so much as it is wariness at something smaller than an elephant's poor eyesight can reliably identify, to them it could be a snake or something else potentially threatening-the Mythbusters test was done by suddenly revealing white domestic mice to wild elephants, who would have only ever experienced a sidden flash of white color low to the ground as the warning signal of a disturbed cobra. They could also simply be aware of their surroundings and give the small quick moving creature a wide berth to avoid stepping on it.
* Elephants Can Remember. Eventually, the husband couldn't keep up the charade anymore and killed both the sister and himself.
* Elephant's Dream, is a representation of an idea that only the main character, Proog, believes in or understands, which is why the deutoragonist, Emo, doesn't seem to notice many of the things going on around him.
* Elephant's Dream is filled with such creations, mostly in the form of various birds.
* Elephant's Dream. The sheer level of detail that was put into the machine is simply astounding.
* Elephants. Even with a proper elephant gun, which is much more powerful than an ordinary "gun" proper, you're supposed to fire into their mouths or ears since their hides are very difficult to penetrate even with weapons
* Elephant's Foot of the Foot reportedly died shortly afterwards) and it killed the first robotic vehicle sent in to inspect it. Although its radioactivity has decreased substantially since 1986, standing next to it for five minutes will still kill you.
* Elephants; males leave their birth herd when they reach maturity, going on to become lone bulls if strong enough or form bachelor herds.
* Elephants Never Forget: Elephants are often depicted as having prodigiously strong and accurate memories.
* Elephants, rhinos and other large mammals (usually pachyderm types) regularly roll in mud to protect their skin from sun and insects. Pigs will roll in it, but aren't as filthy as people always think they are. Pigs lack sebaceous glands, and thus the mud serves the same purpose as sweat—as the water evaporates, it carries the heat away with it. The dirt merely serves as an adhesive to hold the water to their skin.
* Elephants To Catch Eels, smuggler Tamsyn Trelawney and customs officer Captain Marriot have swapped places for a charity event. Upon apprehending Marriot, Tamsyn informs him that "Anything you do say will be drowned out by the sound of us laughing"
* Elephants' trunks are a good example of a functional "arm" that evolved non-homologously to primates' arms.
* Elephants were among the first animals to pass the "mirror test". They've also been observed to have some kind of rudimentary society, including weird greetings and the
* Elesa was made into a Genki Girl for the anime... which is ironic, considering she's
* El espejo de Lida sal by Miguel Ángel Asturias asks for romantic advice to a blind old man that fits squarely on this trope, being that he gropes her a couple of times.
* El Eternauta to carry out their bidding. Essentially, all we get on them is that they are the "cosmic hatred".

* Eleutherophobia, but both times he stops himself because being infested by Yeerks has been a traumatic experience for his entire immediate family.
* Eleutherophobia, Eva and Tom bond over being former involuntary hosts and run a support group together. She's old enough to be his mom.
* Eleutherophobia is from Cassie's perspective, and gives insight on her home life by contrasting it with the Berensons'.
* Eleutherophobia is set the earliest of all, years before the point of divergence from canon.
* Eleutherophobia series, many ex-hosts stim to remind themselves that they're still in control of their bodies. For example, Tom clenches his right hand when he's feeling upset, and Eva fiddles with her bracelets.
* Eleutherophobia's great-grandmother, even though most of the Berenson family were personally involved.
* Eleutherophobia, takes this in stride. "Yeerk-head" is an even nastier term.
* Eleutherophobia, Tom can't bear to listen to "O Come Emmanuel" because his Yeerk snapped a child's neck for singing it. Jake, meanwhile, panicks at the sight of housefiles because he's had several near-death experiences while morphed as one.
* Eleutherophobia, Tom is a 6 foot 4 jock who spent his late teens possessed by a murderous alien, but his biggest priorities in life are watching out for his little brother and helping anyone else who was hurt by the Yeerks.
* Eleutherophobia with lasting mental scars. There's also Vicky Austin, a cooking show (and Yeerk) host whose suicide is mentioned a couple of times.
* Elevated had a guy come into an elevator screaming about a monster that killed everyone on his floor, and tells them they need to get out of the building.
* Elevated: When it seems like the madness is over and Hank was just insane, a mass of people from outside the parking lot rush to get into the elevator, the same way that Hank rushed to get inside at the start.
* Elevation has a very large effect on common magic, summoning, and ranged attacks. Crossbows, while having higher damage than bows, have a range limit. Bows receive better range the higher you are, but fire in an arc. A limit to the height difference between where one is standing and their target is a given with most spells. The game has
* Elevation has marked effects on battles. Units will move faster when charging downhill, and will slow to a crawl when marching uphill - telling a unit to run up a steep slope will rapidly deplete their stamina. Height advantage allows archers to shoot farther, and more importantly shoot over intervening units to deal direct damage rather than
* Elevation X. This was slightly better, though no less dangerous, than a plain scaffold match by giving the wrestlers more directions to move in.
* Elevator Action desire to "Crash the Old Order", according to their graffiti, but they don't say what they want to make instead. Their leader mentions a New Society, but that's all.
* Elevator Action in Japan), if you run out of time near the end of the final stage (the nuclear missile silo), the missile will be launched and a picture of an erupting mushroom cloud is shown, followed by a message on the computer screen that says "YOUR MISSION IS OVER".
* Elevator Action Sequence in S.H.I.E.L.D. HQ, Cap jumps through the glass of the elevator all the way to the lobby using his shield.
* Elevator Action, the player can control his elevator to squash enemy agents passing underneath. The player can also fall victim to this.
* "Elevator Trip of the Damned", two characters engaging in painfully awkward conversation on a (sometimes literally) endless elevator journey, is a regular feature of Ruben Bolling's
* Eleven also has his moments: "There's something here that doesn't make sense.
* Eleven bodies were found in Anthony Sowell's house, including several buried in the cellar. People thought the horrific smell in the neighborhood was a broken sewer pipeline or the sausage factory next door.
* Eleven-Day Empire, like something was forever burning, just beyond the horizon...
* eleven him, actively choosing missions/jobs that would put him in a position to

see his "precious boy."
* Eleven Mafia figures, including the bosses of New York's "Five Families," were indicted under the Racketeer Influenced and Corrupt Organizations Act (RICO) on extortion and racketeering charges. Eight of them received 100-year sentences, the maximum sentence allowed by RICO. Two of them died before they could be sentenced: Neil Dellacroce (Gambino family underboss; died of cancer in 1985), and Paul Castellano (Gambino family boss; gunned down by capo John Gotti a few weeks after Dellacroce's death). Philip "Rusty" Rastelli, the boss of the Bonanno crime family, was removed from the Commission Trial as he was later indicted on separate labor racketeering charges; due to this, the Bonannos suffered less exposure in the case.
* eleven million years ago. Yes, all the murderers are still alive, but the axe has been buried, the hole subducted, and half the continent became magma.
* Eleven minutes of paint drying.. Yes, the proverbial most boring thing ever. As of this entry, it has almost a hundred thousand likes.
* Eleven's final lines, right before he regenerates could easily be interpreted as Matt Smith saying the lines in regards to his tenure as The Doctor:
* Eleven shows something of a girls-are-icky kissing-is-gross reaction to physical affection between Amy and Rory, even on their honeymoon, but that doesn't stop him from kissing River Song, a character who later confirms a sexual relationship existed (justified by the fact the two eventually marry).
* Eleven's main role for the first two Seasons was to steal the show away from the main kids, teenagers and adult characters with her powerful
* Eleventh Division is pretty much the poster child for this. They manage to be completely devastated multiple times, and in fact the motto they live by is "Die in battle, and fight forever." Not exact wording but close enough.
* Eleventh Doctor, in 1966. It's likely an in-joke too. As River Song is examining transmitters in that same episode, the radio traffic of the Cybermen, which is audible in the background, sounds very much like the Borg Collective.
* Eleventh Doctor is not very merciful, but he strongly prefers intimidating his enemies with the sheer force of personality rather than even being so aggressive as to outwit them, readily forgives enemies, and is noted to have a special affinity for children in distress.
* Eleventh Doctor", when he's reaching for his sonic screwdriver to protect someone from a perceived threat, and instead manages to grab an electric toothbrush.
* Eleventh Hour: Agent Young has a pair of glasses that appear whenever she and Hood are looking at computer screens.
* Eleventh Hour, a show about a scientist using science to combat pseudoscientific practices, said scientist brings a person back to life using CPR, heart monitor spiking and all.
* Eleventh Hour feature a scientist teamed with a law enforcement officer/bodyguard (from Special Branch in the UK and the FBI in the US).
* Eleventh Hour generally runs on this trope, as should be expected of a show about a duo that takes down people who apply new technology unethically. However, it does at times depict the potential good that can be done with stem cells, genetic engineering and the like.
* Eleventh Hour? Though in this case, they are Islamic converts after the pattern of Lindh, mentioned above.
* Eleventy Zillion: Exaggerating large amounts by using made-up numbers like "bazillion".
* Eleventy Zillion: Made-up numbers are often used to describe net worths and other money-related amounts.
* ELEX inspired faction and have modern day weapons and equipment. Then you have the Berserkers who are a group of warriors who have renounced modern technology, embraced a medieval life-style and purify Elex into Mana to wield magic and restore life to nature on one side.
* ELEX. It takes place on a world similar to modern day Earth that was devastated by a meteor strike. Said meteor brought with a new element, Elex, that can grant people magical powers.
* ELEX, mechs and the power of industry. They are currently locked in a war with

three other factions over control of the rare element Elex.
* Eleya's Starfleet Academy roommate, Jasmine Velasquez, apparently has had family in uniform going all the way back to
* Elf & Warrior their homeland after they caused a magical cataclysm that rendered it uninhabitable; the "monsters" are the descendants of various people and animals who couldn't leave, and were mutated as a result. Now that the magical side effects have dissipated enough for the elves to move back in, they showed up and told the monsters to get out. When the monsters refused, the elves started killing them.
* Elf & Warrior: The Pugglies, being dogs, mostly punish crimes by calling criminals "bad dog!" Some of the worst crimes get them whacked with a rolled-up newspaper, which they consider horrifying and disproportionate.
* Elf & Warrior: When Basri becomes famous for his singing, he quickly turns into a spoiled jerk. At the talent competition, he realizes he's gone too far and performs his terrible magic instead, giving up on singing entirely.
* Elf and his elves his whole life, he assumes Miles is an elf and addresses him as one, asking how things are back at Santa's workshop. Miles is enraged, thinking Buddy is doing short jokes. Throughout the whole scene, Buddy doesn't understand his mistake, even after Miles beats him up.
* Elf, and the latter drunkenly laments the state of his life now that he's "26-years-old." In fact, the actor was in his mid-forties, and it shows. According to Favreau, this was meant to get a laugh.
* Elf and Zwolf appear more as comedy characters, but they're still pretty capable fighters, albeit outshadowed by the
* Elfangor's Prince promotion in The Andalite Chronicles probably also counts.
* Elfangor's Secret at the end, there was no reason for them to travel through time in the first place and Jake pops back, alive. In addition, because Jake died and the Ellimist said only one Animorph would have to die, the rest of the Animorphs are invincible for the rest of the book, even when they should by all means be dead.
* Elf Blood appear to live in an abandoned warehouse to prying eyes, thanks to judicious application of Pixie Glamour. Inside, however, it's reasonably homely and they live there quite comfortably. It's still a warehouse, though.
* Elf Blood has Carlita Delacroix, who is a half-French half-Cuban half-Human half-Spirit Incarnum.
* Elf Blood has Shanna, who was constantly depicted drinking alcohol in the earlier sections of the comic. She doesn't appear to suffer any deleterious effects from her condition though, or at least none that have been shown yet.
* Elf Blood, King, the leader of the secretive paramilitary government-sanctioned magitek-wielding unethically-experimenting Council, naturally favours a dark grey suit and a dark burgundy tie.
* Elf Blood, mercenary information saleswoman Carlita Delacroix sells to both sides of the central conflict and is very open about this. She even requests a down payment on information that would ultimately be used to help save a dying client's life.
* Elf Blood, one of TKO's more complex spells involved killing a goat and bathing in its blood.
* Elf Blood: To be fair, the architects for the temple defenses designed their extra-fortified mastercraft-warded doors around solid bedrock. Problem is, none of the architects knew about dynamite.
* Elf Blood was once a ghost town, abandoned by the humans and taken over by the homeless magical races. It is extremely dilapidated and contains many areas devoid of life.
* Elf Blood where one of the lead characters, Mara, shares her name with (and indeed was probably named after) the Elves' Mother Goddess.
* Elf Bowling game was played over 7 million times, making it a hit (especially by 1990s freeware standards), but it doesn't get talked about much aside from the film.
* Elf, Buddy gets arrested and put in jail for fighting a mall Santa ("He's not

Santa! He's a fake!"). His dad bails him out not long after, and Buddy is pretty much free after that. Pretty much.
* Elf, Buddy hears Josie singing in the shower and enters the women’s changing room to sing along; since he's grown up solely alongside elves as opposed to humans, he doesn’t understand what changing rooms are. This leads to a rather awkward encounter.
* Elf: Buddy is sent to test toys, including a particularly annoying set of "Jack-in-the-Box"s. The last one takes a little extra to pop up, just long enough for Buddy to drop his guard.
* Elf, Buddy is the jack-in-the-box tester and every time one "pops", it freaks him out. Later in the film, he has a nightmare about the cackling jack-in-a-box.
* Elf: Buddy's Musical Christmas animated in stop-motion, condensing the plot of the movie into 45 minutes and adding some of the songs from the broadway musical.
* Elf, Buddy's real name is William, and he is played by Will Ferrell.
* Elf. Buddy the Elf goes to the Empire State Building to meet his birth father, Walter Hobbs, who never knew Buddy was born to his late wife. Because Buddy is in his elf suit, Walter initially assumes Buddy is there to sing for him, calling it a "Christmas-gram."
* Elf: December 18th is "Answer The Telephone Like Buddy the Elf Day." On this day, pick up the telephone and say, "[Your name] the Elf, what's your favorite color."
* Elf, doesn't really know what lingerie is, but sees it advertised as "the perfect gift". He buys it as a present for his dad, who, needless to say, isn't thrilled about it.
* Elfego Baca episode "Four Down and Five Lives to Go", Walt, decked in cowboy attire, tries to cue a nearby chorus to sing the series' theme song.
* elfeminate or they'll be murdered for being a threat to the rigid gender roles of drow society.
* Elfeminate". The fact they are voiced by Cam Clarke, who is openly gay, only helped.
* Elfen Lied. After that it's sort of understandable why she stopped trying.
* Elfen Lied, although this has less to do with chills and more to do with preserving her modesty.
* Elfen Lied and befriended her throughout the series, and because he has PTSD from a traumatic past — namely, the moment when Young Lucy killed his father and sister right in front of him.
* Elfen Lied and is now on the run from a shadowy organisation which is using other ability users to hunt her down, some of which eventually join the group of protagonists and form a harem. Like Elfen Lied it is also filled with tons of gore and gratuitous nudity.
* Elfen Lied, and that she is trying to convince Mayu that she is the one who is in the wrong.
* Elfen Lied and the girl really didn't know the boys were gonna do that to the puppy.
* Elfen Lied an encounter with Lucy, even if they're not in one piece afterward, but common grunts seem quite willing to stand their ground and continue firing, even when bullets visibly have no effect, despite the fact that people around them are being literally ripped to pieces by invisible hands. There is only one Nameless non important grunt to attempt to subvert this, the guard who grabs a high power sniper rifle, and, on Kurama's orders, tries to blow Lucy's head off from the safety of his office. It fails of course, but the blow does give her amnesia.
* Elfen Lied Appropriately enough, the comedy portion of the manga is left in the omakes, which is not canon.
* Elfen Lied are practically immune to bullets (they won't even slow them down) thanks to a large number of invisible hands that block them. They are not invincible when fighting each other however.
* Elfen Lied, as his final words to his sister were not only that that he'd hate her forever, but he called her a liar when she was telling the truth.
* Elfen Lied at the orphanage, but within a few chapters, they've become so close that Kaede asks Alex to be her brother, and he happily agrees.

* Elfen Lied. At the very start of the scene, Lucy is seen tickling Nana.
* Elfen Lied because she's jealous of her. Mayu gets another in the manga when she's about to get raped by The Unknown Man, which is directly related to the aforementioned abuse.
* Elfen Lied because the director of the anime hated her, even going as far as to say that it wouldn't make any difference whether or not she was present.
* Elfen Lied begin with an ominous bell tolling. This is reflected at the end of the series when the broken grandfather clock chimes for the first time in years, signifying...?
* Elfen Lied gets cybernetic eyes and a cybernetic arm. The arm can stand anything short of a Desert Eagle's recoil.
* Elfen Lied got her arms and legs torn off by Lucy, but her Papa gave her fake ones she can control with her vectors and she will sometimes shoot them at people for a long range attack.
* Elfen Lied harder to find people who have both the read the manga and watched the anime.
* Elfen Lied has a much deeper voice than her "good" personality, Nyu.
* Elfen Lied has a music box playing the theme song "Lillium" that causes Nyu to shift to her virulently murderous side Lucy.
* Elfen Lied has this with its entire cast, with the three exceptions of Mariko Kurama, Yuu Kakuzawa and Anna Kakuzawa.
* Elfen Lied has tunes like "Neji", "Yureai", and "Uso Sora", among others. Some of which are played during the flashbacks of Lucy's terrible childhood.
* Elfen Lied have an insane genocidal hatred towards all humans, considering them a waste of life.
* Elfen Lied. Her body count continues to rack up throughout the series.
* Elfen Lied holding the cleaver pops off, and it barely misses Yuka, who has the front of her skirt cut.
* Elfen Lied in episode 12 by Kouta when Lucy says they're friends so that's why she didn't kill him. Kouta's also crying as he tackles Lucy after she murdered his father and sister and he bangs her body repeatedly into the ground. Lucy gets so upset by seeing Kouta's tear-streaked face that she starts crying too. And Kanae does this as she's lying dead on the ground from when Lucy cut her in half and she had been upset at her brother Kohta for saying that he hates her.
* Elfen Lied In fact, there's even a physical music box as part of the plot.
* Elfen Lied in the anime, where she's sometimes referred to as the "mother" of the group. Even more when she and Kouta are given custody of Mayu, making her the girl's adoptive mother.
* Elfen Lied in this series, and humans who want to help them aren't really treated kindly either.
* Elfen Lied is an innocent girl raised in a lab. She knows absolutely nothing about the world outside the complex where she used to live, to the point of burning a "bunch of papers" that turned out to be money. And being gullible enough to believe that the money when kept together would attack her in her sleep.
* Elfen Lied, killing twenty three guards in the process. Since she is so dangerous, the search party is instructed to kill her on sight.
* Elfen Lied kills Lucy's only friend, and captures her, so she maims his adopted daughter and kills his biological one. He accidentally shoots Kouta, and she rips his arm off.
* Elfen Lied, Kouta does this after he sees his sister get killed in front of him by Lucy.
* Elfen Lied, Lucy, after having escaped from an underground vault where she was kept in a full-body straitjacket chained to a steel cage, spends her first scene wearing nothing but a helmet, killing people left and right very messily.
* Elfen Lied: Lucy killed Kouta's father and sister. Kouta's shocked expression when he saw her for the first time in the series and the mention of his dead family put two and two together for the audience.
* Elfen Lied: Lucy tries to suppress her instinctive desire to kill all humans so she can live happily with Kouta until she finds out he lied about the sex of the

cousin he was going to a festival with and she saw them hugging, at which point she stops trying to be nice. She then proceeds to slaughter some people at the festival and kills Kouta's father and sister, and starts to go after Kouta's cousin Yuka, voicing her intent to kill her... but only stops once Kohta tackles her and she sees his tear-streaked face. She also isn't above acts of jealousy, once using her vectors to shove Yuka down when she saw her holding hands with him. Yes, she's VERY broken, but how broken she is is absolutely NOT an excuse for her killing or trying to kill innocent people just because Kouta pays more attention to them.
* Elfen Lied: Lucy was bullied by children and when they killed her dog, she killed them all with her unseen (until then) power of invisible vector arms.
* Elfen Lied, Mayu is raped by her stepfather until she eventually runs away.
* Elfen Lied, Mayu's mother and stepfather are relatively mundane people who appear only briefly, but are two of the most hated characters due to the damage they inflict on her. Her stepfather sexually abuses her, while her mother shows her no sympathy and blames Mayu for the abuse. Part of what makes them so disturbing is that people like them exist in real life, and children like Mayu do indeed suffer from their actions.
* Elfen Lied, Nana burns thousands of yen on the beach for warmth on a cold night due to never having experienced the world outside the laboratory where she was used as a test subject. She then has nightmares of being crucified while naked at the hands of vengeful money-people, thanks to Mayu.
* Elfen Lied, Nana gets past the police barricade to reach Mariko's position. She simply arrives there — no explanation given, the barricade not seen in her travels. Kouta and Lucy-as-Nyu arrive to the barricade and find every soldier and policeman knocked out/dead—this is never made clear. Bando is nearby with Kurama, but does not arrive until well after this in the next episode, so Bando's not responsible. Lucy is still Nyu, and remains this again until well after the discovery that the barricade is down. Mariko is by definition at the far opposite end of this barricade, and pulling anything like that would get her blown up real good. This leaves Nana as the knockout/killer. Except a huge plot point is that Nana does not kill, and with the exception of disabling the vectors (invisible arms) of other Diclonii, she has never shown talent for quietly knocking people out, in either anime or manga. Therefore, no one knocked out or killed the knocked-out/dead force at the barricade.
* Elfen Lied, Number Three (The Silpelit who infected Kurama, causing Mariko to be born a Diclonius) is often given the name Sanban by fans, even though that is simply the Number Three's Japanese translation, unlike Number Seven Nana, which is both a name and number. Further, a listing that only says it is from an official site states that Three is Nana's older sister. Nothing said in the manga or anime supports this.
* Elfen Lied; Nyu only molests her once and stops doing that to her, but only to her.
* Elfen Lied Nyuu, in control. The times when her 'true' self resurfaces fit this trope to a tee.
* Elfen Lied of its own. Overall it probably doesn't take itself too seriously.
* Elfen Lied of the facility laughing hysterically and the fate of the other diclonius isn't made clear. However, Kouta, Yuka, Mayu, and Nana all survive to the end and there is a chance that Lucy may have survived also.
* Elfen Lied on a regular basis, leading to her running away. When the Unknown Man attacks Maple House and tries to rape her, Mayu flashes back to her stepfather doing so and flips out.
* Elfen Lied psychopath whose only goal in life is to find and kill Lucy/Nyu. But when the Hunter assaults Mayu, Bando comes to the rescue.
* Elfen Lied released by ADV Films in 2009 carries an 18A Canadian rating. Despite being almost identical (the only difference is the artwork on the new version), the DVD/Blu-Ray rerelease from ADV in 2013 carries only a 14A Canadian rating. On a minor note, the American rating goes from TV-MA for explicit language (L), graphic sexual content (S), and extreme violence (V) to TV-MA for graphic sexual content (S) and extreme violence (V), despite both collections having the same amount of

bad language.
* Elfen Lied's first episode puts a pretty original spin on this. Naked girl killing everyone in sight — ROLL OPENING — Guy moving into house. And then they put it all together!
* Elfen Lied She crouches down in front of him as he cowers in a corner, shitting his pants in fear...
* Elfen Lied). Shortly afterwards, they also have a child or more children. This would give these kids a human father and a non-human mother.
* Elfen Lied that it was unable to sell and be adored by fans despite being partially fueled by this.
* Elfen Lied that you can't help but want to give her a hug even when she's in the middle of eviscerating some innocent or not-so-innocent soul.
* Elfen Lied: The bit during Lucy's fight with Nana where Lucy slices off not only Nana's fingers but her arms and legs as well.
* Elfen Lied: The Diclonii look like humans but also possess a number of invisible (to anyone but themselves and the audience) "hands" called "vectors" that can extend for several meters and slice human flesh with ease. They are not exactly aliens but their origins are never quite elaborated upon.
* Elfen Lied. Their vectors can pick off a person's head like picking fruit off a tree or crush them like nothing.
* Elfen Lied. The manga on the other hand quite clearly shows her melting while fending off multiple battleships with her vectors.
* Elfen Lied: the protagonist has supernatural powers that grant her the ability to kill people like with telekinesis without effort and get rid of everyone who abuses or tries to make her suffers. Obviously, everybody out there seems to be part of the evil side of mankind, while also getting what they "deserve" by the hand of the protagonist. She even first unleashed her power as a child victim of an incredibly cruel bullying, avenging what she passed by making a bloodbath of her bullies when they decided to beat and kill an innocent puppy she had found previously. Her false friend who betrayed her by telling the bullies about the puppy (and who is also seen faking crying while maliciously smiling) is obviously killed too in the furious instant telekinetic revenge.
* Elfen Lied, the result of mutant ovaries. They have neko ear-like bone horns and enlarged pituitary glands; besides that, they're a cross between humans (most of what they are), social insects (for Silpelits in how they age), viruses (how they reproduce, for the most part) and gods (the vectors).
* Elfen Lied turns back into Lucy she sports this appearance, despite having pink hair.
* Elfen Lied uses her vectors to the same effect, and wakes up one morning with the walls of her room absolutely covered in these.
* Elfen Lied uses this one, but most of the time it's a simple decapitation that sends the head flying on a jet of high-pressure blood.
* Elfen Lied visualizes her telekinetic powers and those of other mutants in the form of long translucent arms. To normal people they are completely invisible, simply causing everyone who gets to close to her to seemingly randomly explode in a fountain of blood.
* Elfen Lied wants to destroy the human race and produce more Diclonii using Lucy, the only fertile female Diclonus, to replace them. He doesn't want to do this for any moral reason, though, but only so that in 100 or 200 years, he can be worshiped as the god of the new species.
* Elfen Lied was actually spread almost completely by word of mouth. Not intentionally, but what happened was pretty much the same.
* Elfen Lied, which can intentionally infect normal humans so their children will inherit the mutation.
* Elfen Lied. While she's treated as horribly as any other Diclonius, Chief Kurama, one of the scientists in charge of her, sees her as something of a surrogate daughter and treats her at least slightly more humanely than the other subjects. In return, Nana genuinely loves him and seems to just accept her treatment as "the way things are".

* Elfen Lied (who are otherwise sterile, with one exception) 'reproduce' by infecting humans they encounter with a virus containing the genomic information of diclonii. Although it has no overt effect on its victim, the virus alters its reproductive cells, resulting in that every child born of an infected parent, regardless of whether the infected was male or female, will be a diclonius.
* Elfen Lied worshipper and prays that Kira will take care of her problem for her.
* Elfen Lied, Yuka and Kouta can't tell what is wrong when Nyuu starts showing signs of pain and moving desperately, until she ends up peeing on the floor.
* Elfen Lied, Yuuka does this to her cousin Kohta to check if he's feverish. Unusually for this trope, Yuuka actually has a secret crush on Kohta, and although she acts nonchalant about touching foreheads together, it's clear to the audience that she's deliberately using the semi-intimate contact to try to cultivate romantic feelings for her. Kouta does this to Nyu/Lucy as well. He's completely oblivious to Nyu/Lucys reaction, apart from noting that her temperature has gone up.
* Elfes et Nains: Alyana reaches adulthood in the span of a few days after her birth.
* Elfes et Nains features Arran, a world inspiring itself like most fantasy stories from Europe, and the map is dominated by the eastern sea with various archipelagoes scattered in the middle of it, with a supercontinent to the East and what appears to be a smaller one to the South.
* Elfes et Nains: Lah'Saa is an ancient evil sorcerer who was defeated millennias ago but has returned to conquer the world.
* Elfes et Nains of the series and leads an army of ghouls to lay waste to the world of Arran.
* Elfes et Nains: Ora, or Sybil daughter of Azewën, mistakenly thinks that Eliseii killed her father in cold blood and seeks Eliseii to kill her. However, Eliseii explains the exact circumstances of Azewën's death and then gets bitten by a ghoul, robbing Ora of her revenge.
* Elfes et Nains, the kingdom of Eysine has been invaded by an alliance of rival kingdoms and all that remains of it are a handful of citizens and soldiers led by their aging king.
* Elfes et Nains where the winner is declared Runelord, Rom has Redwin stabbed in the belly not long before the games, nearly killing him but still heavily crippling him too because he fears Redwin.
* Elfes, the White Elves are presented as better in every way to humans, having a peaceful civilization yet accomplished soldiers, being wiser as they do not exploit the world of Arran only for their own profit and do not kill each other for petty material gains. The third volumes notably portrays Fall, a White Elf, trusting a human and bringing him to the Isles of the White Elves as a tragic mistake leading to a massacre of the Elves.
* Elf has a large love of sweets and according to him, all elves are the same (given that they raised him and all). His favorite dish is spaghetti with syrup and candy on top. He can't stand the taste of coffee.
* Elf has her legs blown off at the knees and replaced with mech legs. She's actually fairly happy with the replacements, as they add significantly to her previously short stature. Said legs are even used at one point as a blast barrier by Capt. Taggon.
* Elf has Santa needing to be rescued by the main characters at the climax, due to his sleigh failing from lack of holiday spirit in New York.
* Elf has the scene where Buddy mistakes a little person, Miles Finch, for an elf. Miles takes so much offense that he beats the crap out of Buddy for it.
* Elf: Having been raised by elves, Buddy's idea of a well-balanced diet consists of the four main food groups: candy, candy canes, candy corns, and syrup, as elves love sugar. In fact, Buddy adds syrup to almost anything he eats, such as spaghetti; later still, when Buddy fixes himself breakfast, he cooks a plate of spaghetti and tops it with maple syrup, chocolate syrup, M&Ms, marshmallows, and chocolate Pop-Tarts.
* Elf is another example, although a level lower (she did the same thing in high

school). After spending a lot more time with Kevyn, she starts to show that she's really extremely bright. (And while Kevyn thinks she could have become weapons designer, Tagon points out the logical flaw: the chance of those weapons being used against
* Elf: Leon the snowman tells Buddy the human raised by elves that New York is full of "wondrous creatures— except dogs", then tells him not to eat the yellow snow. Although, dogs aren't the only creatures who make yellow snow.
* Elf Life, Filis is gushing to Airek about how she and Baughb spent the previous day "frolicking". When Airek mentions that she didn't need to use euphemisms around him, she explodes:
* Elf Life "frolicking" and if she meant to say "f*** ing" (censored in panel), she'd have said "f*** ing".
* Elfman of Fairy Tail Team A vs. Bacchus of Quatro Cerberus: If the latter wins, Bacchus
* Elfman's usually talking about things that are "Manly", or what a Man should do, and all of his emotions are Manly as well. It goes so far that in later episodes in both manga and anime other characters question whether Elfman himself understands what he is saying.
* Elfman, whose catchphrase includes the word 'Man', believes everything should be settled with fists.
* elf, Merrill refuses to believe Hawke feels romantic affection towards her until Hawke specifically tells her s/he does. Even after they've just had sex.
* Elf: movie (2003) → stage musical (2010) → animated TV special (2014).
* Elf Only Inn Duke tells the girls to not dress scantily and flirt around them as a ploy. The girls agree to it, much to Duke's chagrin.
* Elf Only Inn has taken lengthy breaks from production of his webcomic, up to several years on one occasion.
* Elf Only Inn hilariously when Megan, after receiving her settlement payout of $0.30, does the math to prove that she was short-changed, then writes a letter to McDonald's accusing them of the fact - to which they reply that as she is obviously not stupid, she must return her settlement payout or face legal actions for fraud.
* Elf Only Inn when Lord Elf is trying to prove that Nimoy (a vulcan) is not actually an elf, and Nimoy tries to calm him down with a Vulcan Neck Pinch. When it has no effect and Lord Elf asks if it is a Jedi mind trick, Nimoy responds with the Vulcan Dope Slap.
* Elf Princess Rane has several examples of the blue-haired guy speaking very quickly in gibberish (once humorously translated by the subbers as "How much wood could a woodchuck chuck..." Backward).
* Elf Princess Rane is a two-episode OAV that ends with trailers for the completely nonexistent third and fourth episodes.
* Elf Princess Rane only lasted two episodes before the creators "ran out of budget". This is highlighted by a close-up of one of the characters begging the viewing audience for more money so they can continue the series.
* Elf Princess Rane takes the cake, being a full parody of anime hair. It's sky blue, has two tendrils down the front (the one on his right is thick and goes down to his feet, ending in a curl, while the one on his left is straight, thin, and goes to around his belt), and is styled into an epic curled horn on his left. Said horn is so massive that he regularly has to prop it up with his hands.
* ElfQuest) after crash-landing on the magic-poor World of Two Moons. A few, such as Timmain and Haken, were able to painfully force their shapeshifting abilities despite the planet's lack of magic. Most notably, Timmain often shapeshifted into a wolf (becoming the wolf-mother of the story's main tribe) and, many generations later, taught Kimo how to do so as well. Winnowill was able to shapeshift into human form, as was Jink centuries after that. When Winnowill's spirit was absorbed by Rayek, she sometimes succeeded in taking control of his body and reshaping it into her own form.
* ElfQuest, a Little No of horrified denial is Treestump's immediate reaction to seeing his daughter Dewshine lying unconscious in Leetah's arms. Redlance's pained "High ones no" when he finds the rock shaper who had over the centuries been

deprived of her limbs and her mind by the trolls.
* ElfQuest always seems to crop up where he's least expected, even after being seriously wounded by one of his victims.
* ElfQuest are quick to blame just about anything unpleasant on "evil elf spirits", even if the elves have been suffering the same misfortunes all along (e.g. Madcoil's attacks) and even acted to stop them.
* ElfQuest became almost entirely run by fans after the first few storylines, and the original creators (Wendy and Richard Pini) never seemed to particularly care about the quality of the new art or writing - but still declared all of it canon. Some of the fan-made comics are seriously great. Most of them are not. Examples:
* ElfQuest: Being canonically the kind of series where everyone has sex with everyone else, it has a similarly open-minded fandom.
* ElfQuest but is also prone to battle-fury, such that he might tear into a group of enemies only to heal them once the battle is over. He actually gets a kick out of his contradicting natures.
* ElfQuest, but the bond is implied to be one and only soulmates. This is stated to be the source of most of the great romantic and tragic literature of Sharona, due to recognition ignoring if one of the soul mates is already married.
* ElfQuest by Tyldak and Kahvi in regards to her past relationship with Rayek. He thinks their differences in background (she's "ice", he's "fire") were the problem. Kahvi disagrees though, saying that differences make good sparks. It was his arrogance which she hated.
* ElfQuest can't be described as uptight by any stretch, but she does keep her long brown hair under a headscarf except in her most intimate moments.
* ElfQuest characters all have distinct personalities and appearances, and varying, unique, pretty outfits.
* ElfQuest characters have only one name, justified in that they live in small tribal groups. Last names really only crop up with humans later in the timeline.
* ElfQuest: Cutter and Skywise, plus some other male elves, wear nothing more than vests most of the time, which bare their abs.
* ElfQuest Cutter is an avatar of artist/co-writer Wendy Pini (at least her male side) and Skywise is her husband and the other co-writer, Richard. Also the humans Nonna and Adar, although being mortal they're not around as long.
* ElfQuest Dewshine/Tyldak display this trope. Other couples do as well, due to major height disparities between different generations of elf.
* ElfQuest) don't invade the World of Two Moons/Abode deliberately, but it's implied that tens of thousands of years after their arrival their influence has had subtle but highly beneficial effects on the planet's human society (carefully-controlled population, environmental management, acceptance of alternate beliefs and sexual orientations, female equality…)
* ElfQuest elf-troll war arc the Wolfriders free Greymung's trolls so they can help fight against Guttlekraw's trolls who enslaved them. (This dismays Two-Edge, who never dreamed that trolls would fight with elves against trolls.)
* ElfQuest, elves gain new powers or have their existing powers enhanced by proximity to the Palace of the High Ones.
* ElfQuest features a couple of human boys who decide to play a prank on the "spirits" (elves). It all goes disastrously wrong, with two elves dying and one of the boys being executed by the human tribe's elders.
* ElfQuest, forcing them to go on... well, the entire rest of the story, basically, rather than just staying home.
* ElfQuest: Forevergreen arc (by the notorious Barry Blair) where the villain Door sees one of his scantily-clad slave boys sleeping on the floor and puts a cloak over him. Definitely a capricious gesture since Door has killed other slaves on a whim.
* ElfQuest Furthermore all elves have immortal spirits. Trolls and Preservers are also extremely long-lived, but humans and wolves have normal lifespans.
* ElfQuest gets a large crossbow arrow through his throat. Cutter, who happens to be right behind him when it exits, is only saved from a similar fate by his gold torc.

* ElfQuest graphic novels have the ability to communicate telepathically via a process known as "sending". Wolfriders can also communicate this way with their wolf-friends although this requires eye contact and is more difficult than between elves.
* ElfQuest has a great number of complementary traits with his buddy and heroic leader Cutter. A drinker and womanizer, he is more lively and easygoing than Cutter, who naturally bears a keen sense of responsibility for the tribe. Skywise is a studious, curious dreamer, while Cutter prefers to live in the here and now.
* ElfQuest has a variation: the exterior "door" to Blue Mountain is solid rock until the elf named Door is commanded to make an opening in it telekinetically.
* ElfQuest has "dreamberries". In the Russian version they're called "Drunkberries".
* ElfQuest has Gotara early on. (Much) later other humans in another land swear by Threksh't. (Later shortened to 'Threk'.)
* ElfQuest has had one or two scenes where the elves swim and sunbathe in various states of undress, including total of course.
* ElfQuest has his feet trapped in solid stone by the rock-shaper Ekuar, whom he's kidnapped. He somehow gets free, leaving the empty, foot-shaped gaps drenched in his blood, but precisely how much of his feet he'd also left behind isn't clear.
* ElfQuest has the concept of Recognition. "Soul meets soul when eyes meet eyes, stands your lover recognized." At times a male elf and a female elf see each other, immediately recognize each others' soul, and are compelled by a biological imperative to have sex. A life-long romance is not guaranteed (Dewshine and Tyldak), but does tend to follow more often than not (Cutter and Leetah).
* ElfQuest has this power. It makes her extremely useful in battle... against other elves, anyway.
* ElfQuest has Tyldak, who may be a bit of a subversion in that his whole body was (painfully) reshaped via magic so he could fly where most of his fellow Gliders would simply use their powers of levitation to float; for example, his batlike wings are clearly his former arms.
* ElfQuest has Wavelet, who was raised by humans from infancy. Being an elf, the "adopted" part was rather obvious, though her being one of the few treeshapers, she became very respected by the tribe that raised her as "good spirit of plenty".
* ElfQuest have a habit of doing this with Elves. The very first episode starts with a torture scene. If a human helped an elf escape, they took their place on the sacrificial pillar. The Forevergreen arc also has the Hungtsho make these on Door and Windkin's behalf, whom they view as gods.
* ElfQuest. He hated it so badly it almost made him lose his mind too.
* ElfQuest (hey, rhyming alliteration!) - and equally unsurprisingly there are major upheavals ahead. Again, something of a no-brainer, because if there weren't there'd be no plot. The comet was thrown in because Richard Pini loves astronomy (he's designed planaterium shows), and was WAY disappointed with that appearance of Halley's, so they put a cool one in the book for his Avatar (Skywise).
* ElfQuest hot and just gets more and more deadly. Also the warlord Grohmul Djun, who's a massive hunk, and Door in the "Forevergreen" arc, who's a psychotic pretty boy.
* ElfQuest humans to be far too spindly and fine-featured to be attractive, and prefer their own heavy builds and bulbous features.
* ElfQuest. If it weren't for sympathetic parents and an understanding mentor, he could have literally turned out an insanely evil being instead of godlike good.
* ElfQuest included one reference to "Elfis" at some point in a parody version of itself.
* ElfQuest!" In later years and later stories, however, Cam becomes much more fluent. Cam was apparently the first human of his continent to speak the elfin language, but by that time (in the series "New Blood"), another, transplanted human tribe that worshiped elves as deities had adopted the elf-tongue as its own language.
* ElfQuest in sight, fix what can be immediately fixed (even if it's a terrible idea to do so) and have a proper emotional breakdown later.

* ElfQuest in this context), and an implied acceptance of him as her "lifemate".
* ElfQuest in which she complained about that comic's supposed use of this trope. The two of them corresponded for a while before finally meeting and marrying, and the rest is history.
* ElfQuest is covered in sticky webbing. Turns out it's not made by spiders, though.
* ElfQuest is determined to keep fighting even after being speared through the gut. Not surprisingly this puts his continued survival in doubt.
* ElfQuest is this. Telepathy is almost universal among them, and other powers crop up. It's implied early on that humans have the potential, too, and stories later in the timeline confirm this.
* ElfQuest: Leetah and Rayek's relationship in the early issues could easily be interpreted this way.
* Elfquest, Leetah's offer to mend One-Eye's lost eye is declined, as a Wolfrider healer, less skilled than her, had treated his injury long ago by sealing the socket completely.
* ElfQuest like to wrap living beings in suspended animation cocoons. The cocoons don't give a clue as to their occupants' shape, though in the case of humans or elves the size is usually a giveaway.
* ElfQuest love to sing. Nobody else loves hearing them. Cutter once asked Petalwing to sing for Rayek, just to torment him.
* ElfQuest. Many of the elves end up "lifemating" with two others, and their relationships are generally loving and long-lasting (and in at least three cases, explicitly mentioned as a sane alternative to jealousy and rivalry). Problems tend to arise only with Recognition, a form of "love"/lust based entirely on involuntary instinct. Examples: Leetah/Cutter/Skywise, Skot/Krim/Pike, and Dewshine/Scouter/Tyleet.
* ElfQuest movie has been "coming soon" since the mid eighties. Though much of the (albeit scarce) pre-production art looks great, it's still never gotten further than that and will likely never be produced.
* ElfQuest. Nothing breeds sympathy like watching a competitor being unfairly mocked because he had the audacity to follow the rules while his opponent was ruled the winner for being ignorant.
* ElfQuest novelisation: The Sun Folk want to welcome the Wolfriders with a feast. The Wolfriders are horrified at the cooking. They prefer eating meat raw.
* ElfQuest of sorts for the supernatural version of the trope). "Soul meets soul when eyes meet eyes"; which is a powerful biological urge to mate that pretty much guarantees healthy, gifted children.
* ElfQuest of years old; plenty of time to grow her hair any length she likes.
* ElfQuest Palace war, Dodia after the Forevergreen quest, Moonshade after The Searcher And The Sword, and Brill after Discovery.
* ElfQuest practice this, in a rare positive example. It makes communication within the tribes very effective.
* ElfQuest, probably due to it being written by a happily married couple.
* ElfQuest problematic at that particular moment, and keeps making things worse when Ember gets captured and Teir has to be prevented from suicidally charging after her. Even once they rescue her, Ember's not ready to become a mother and has the magic-users "turn off" their recognition for the time being.
* ElfQuest said that you can't have a calm guy and a tomboyish girl, and this is one of the reasons the author quickly abandoned that studio.
* ElfQuest series after the Wolfriders defeat Winnowil's and Leetah is at work using her healing power to revive Lord Voll after being rendered unconscious by the villainness, one of the Gliders protests that the "savage" mustn't touch him. At that insult after all that has happened, One-Eye roars "Shut your beak!"
* ElfQuest shapeshifters but, in most cases, find the very idea unnatural and disturbing at first. Exceptions appear more and more often as the story progresses: Tyldak asks Winnowill to shape him into a bird-elf, Mender chooses not to grow a beard as he gets older, Skywise asks Leetah to make him into a pure elf instead of a wolf-elf (when he thinks all the other elves have died), and Suntop asks Leetah

to shape him into a mer-elf temporarily so that he can spend time underwater with his lifemate.
* ElfQuest "Shards" storyline, the elves follow Two-Edge's secret tunnels under the Citadel. Two-Edge (being the half-crazy engineer he is) has booby traps to supplement the obvious barriers he's planted.
* ElfQuest short "The Heart's Way" one of Skywise's three girlfriends (yeah!) is upset with him because she wants commitment rather than just fun. Another character suggests she take her time. The ending shows her standing outside the hut where Skywise and the other two girls are making out, but the ending lampshades the ambiguity of whether she joins them or walks away.
* ElfQuest Skywise is falling for Aroree anyway, but their romance is strengthened when Aroree takes him for a ride on her giant bird.
* ElfQuest: Skywise nudges Cutter to shut him up when he's about to drunkenly blurt out the location of Sorrow's End to Picknose the troll.
* ElfQuest's main protagonist Cutter's everyday outfit does not include a shirt.
* ElfQuest's Nightfall has perfectly normal (though voluminous) hair, but always keeps it under a headscarf except when she's literally letting her hair down.
* ElfQuest so that he has to be lonely for a couple hundred years!), Cutter and Rayek decide to settle their differences by beating the crap out of each other. Once the fight is over, they don't exactly become friends, but they're at least willing to cooperate with each other.
* ElfQuest Space travel. Skywise even refers to the invention of Palace pods with Reference to "seed pods", used by certain plants to spread their seeds.
* ElfQuest's Rillfisher went deaf, but that may have been after she and Treestump became an item. (Her deafness contributed to her death because she couldn't hear the breaking branch that fell on her.)
* ElfQuest stories, a small family of trolls find themselves stranded in a country where there are no other trolls. Flash forward a few thousand years and there are lots of trolls running around. Incest is hinted at but never stated outright.
* ElfQuest story arc, when the Wolfriders are surrounded by hostile trolls they attempt to escape by riding their wolves underbelly. The wolves then attempt to leap over the trolls, which seems slightly implausible with the elves lowering their centers of gravity.
* Elf Quest story has a variation. One of Skywise's three girlfriends(!) wants commitment and not just meaningless sex. At the end of the story she's considering whether to join in with the other three anyway, but the ending doesn't tell us what she decides.
* ElfQuest storyline Rayek walks the World of Two Moons accompanied by Ekuar and tormented by Winnowill's vengeful spirit.
* ElfQuest storylines, some of humans are "tweaked" for telepathy because the now-hidden elves allegedly possessed it. It's later revealed in the 'present day' storyline that the human Shuna can send to other humans after decades in proximity to the elves and their Palace.
* ElfQuest storyline Two-Edge builds a particularly nasty execution device for the human tyrant Grohmul Djun. It consists of two large urns in the shape of birds with upraised beaks, between which the prisoner is strapped. The urns are slowly filled with water, the weight causing them to tip outward, putting greater and greater force on the prisoner's limbs until he is eventually torn in two.
* ElfQuest story "Moonshade". Moonshade and Strongbow are lifemates, by the fandom sometimes labelled "the only remotely monogamous couple". In this story, Ahnshen falls in love with Moonshade. Strongbow gets pretty ticked off, to the point of tackling Ahnshen and taking him to task — for beating around the bush rather than getting to the point already.
* ElfQuest surely qualify (even though they have known descendants), because none of the protagonist elves know much about them, and their powers and origins are a great mystery when the series begins.
* ElfQuest's warrior troll king Guttlekraw likes to punish disobedient elf slaves "one finger, then one limb at a time". Case in point: Ekuar, who lost half a leg, one arm, and one finger of the remaining hand that way. He was the luckiest.

* ElfQuest, that Cutter and Skywise have had sexual relationships. It is also mentioned in the comic that they are "brothers in all but blood." Of course, the elves are said to not have the same concept of relationship as (modern Western) humans do, even though nearly all of them are paired in "life bonds" (i.e. marriages).
* ElfQuest the bug-like Preservers can freeze time for living beings by encasing them in cocoons made out of "wrapstuff", and a bunch of the characters use this method for waiting out ten thousand years when they need to catch up with a group of time travelers.
* ElfQuest. The elves, magical immortal creatures, are the descendants of alien shapeshifters. After crash-landing on the planet with two moons, the aliens tried to survive: some by living as primitive humans, one by killing everything else, and one by turning into a wolf and becoming the ur-mother of a tribe of half-elf-half-wolf babies (a lot of which... didn't survive).
* ElfQuest: The future arc has Cauldron City on the Mercury-like planet Cauldron; it runs on rails that go around the polar region of the planet, and the main characters have to save it from sabotage.
* ElfQuest: The future stories show planet Abode as being run by a human matriarchy, which seems to be a cross between this type and Enlightened — Abode seems to be a pretty decent place to live, but it's implied that the matriarchy is by no means free from corruption.
* ElfQuest, the Guider of the High Ones' Palace-ship, was in stasis inside Preserver webbing when it crash-landed on the World of Two Moons. When his sole surviving crewmate Timmain returns to the Palace 10,000 years later she discovers that the webbing was torn during the crash and Orolin never woke up.
* ElfQuest: The mighty Djun in the "Hidden Years" and "Shards" storylines wears lots of purple.
* ElfQuest them with new ones and dancers were pleased that she did. In any case, the elves probably wouldn't be very embarrassed by nudity anyway, at least among their friends.
* ElfQuest, the Neverending have strict class borders, and intermarriage between them is explicitly forbidden. The God-Emperor tells Jink and Kullyn a story of a warrior from a noble clan that "twined" with a woman from a lower class. When they're found out, the warrior suicides, followed by his beloved once she bears their child. Her last words are to beg the father's clan to take the infant in, and they do. The child grows to be a mighty warrior and excellent scholar, far surpassing all others. Kullyn (correctly) interprets the story as ostensibly upholding cultural mores, but in reality invoking an alternate Aesop and undermining those mores, planting the seed that cross-class children are extraordinary -and resulting in a wider gene pool for the Neverending.
* ElfQuestThere are only two others, Egg and Trof, making telekinesis one of the rarer powers.
* ElfQuest: The series' setting has two moons and is called the World of Two Moons, in honor of the fact.
* ElfQuest, the trolls are identical in every way (except being green) to stereotypical Dwarves. However Two-Edge, a half-troll half-elf looks identical to a typical dwarf but is bat-shit insane.
* Elfquest, the villainous rock-shaper Door seems impossible to defeat until the jackwolf-rider Dodia beats his brains out with a club. As Door and Dodia had just recently Recognized one another, Door took it for granted that she wouldn't be able to hurt him; because they'd already had sex and conceived a Recognition-sired child, however, she was no longer biologically compelled to be his mate and could fight back against his evil.
* ElfQuest. The volcano near Sorrow's End doesn't blow its top, it just rumbles very loudly. The rumbling triggers a stampede that the Wolfriders have to deal with. And then played straight in a much later storyline when the first major eruption in centuries coincides with an invasion.
* ElfQuest, the Wolfriders and the trolls who live nearby get along fairly well as elf and troll tribes go — which is to say that they aren't trying to genocide

each other and even engage in some trade. As it stands, they still have total contempt for each other's way of life, and no small amount of personal enmity. However, when one elf and his wolf-friend contract "the foaming sickness" (rabies), the elves (lacking a magical healer) take him to the trolls' tribal elder/herbalist to be treated. The treatment is arduous and likely to fail, and the troll herbalist believes that the elves' efforts "make no sense". When told it's not about sense, she responds: "Anything for family, eh? I can fault you elves in all ways but that."
* ElfQuest, this is effectively the fate of One-Eye's body when he is killed in the prelude to The Palace War. After Leetah tries to heal him and only manages to heal his empty, soulless body, it is kept in Preserver webbing for many years until his lifemate, Clearbrook, accepts that he's not coming back and so cuts the webbing and allows his body to die.
* ElfQuest, this is the first part of The Trial of Hand, Head and Heart which Rayek challenges Cutter to. The trial of Hand combines dexterity and strength and the outcome is intentionally non-lethal for both participants.
* ElfQuest together for all eternity. Rayek is moved, but tells her she has no place in his new life. His mentor Ekuar follows him instead. It's also somewhat implied that Rayek trapping Winnowill inside him is not just to save the world, but also because he doesn't want to live without her — even as her living prison, he loves her, and would rather suffer a living hell for all eternity than be without her.
* ElfQuest to hold either aloft since they can fly by their levitation magic. The wings do however help them to direct their flight, and Tyldak can fly much faster and longer than his non-winged tribemates.
* ElfQuest to make sure she doesn't go insane with grief. When it turns out One-Eye is in a kind of magical coma, Treestump makes sure his friend's soul gets all the closure it needs, and he and Clearbrook gradually become lifemates after One-Eye is put to rest. A second, less conventional example happens when Cutter's family is kidnapped 10000 years into the future (far beyond his own natural lifespan) and he decides to at least keep on living normally for as long as he can. His childhood friends Nightfall and Redlance ask him to become their lovemate and live with them for as long as he wants, because the loneliness would otherwise consume him completely. (Interestingly, Nightfall is the best friend of Cutter's kidnapped lifemate Leetah, and it was thought by the entire tribe that she would end up with Cutter because they were born around the same time. Also interestingly, Nightfall's daughter Tyleet ends up becoming the lifemate of both Treestump's daughter Dewshine and Clearbrook's son Scouter.)
* ElfQuest took the forms of elves and meant to land on an Earthlike planet during a time when such spirits were respected. Due to a bit of sabotage they landed in prehistoric times surrounded by superstitious, violent cavemen, and had no idea how to deal with the planet.
* ElfQuest Trial of Head, Hand and Heart arc. Slightly subverted in that whoever wins, Leetah has the final say. Then re-subverted in that she's Recognized Cutter and ultimately can't fight it.
* ElfQuest, two major characters Cutter and Rayek are in a physical duel where they share banter that quickly degenerates from bragging about their skills, to calling each other "Bone Polisher!" and "Bead Rattler!" to "Dog!" and "Snake!" respectively.
* ElfQuest, ugly, superstitious and xenophobic, and they've been like this as long as any Wolfrider can readily remember. This is later qualified when greater exposure introduces them to the concept that some humans can be friendly (and the Gliders have basically a tribe of 'tame' humans living at the foot of their mountain), but by and large the elven policy remains to keep avoiding human attention where possible.
* ElfQuest) variety ever since. It helps that the elves' birthrate is low.
* ElfQuest was at one point collected into a single limited-edition volume containing the original 20-part series - a mere 652 pages. (Strictly speaking a compilation of compilations, collecting 4 volumes containing 5 parts each.)

* ElfQuest was created by mixing some human genes with genetic material extracted from a preserver corpse. She seems to retain the preserver memories.
* ElfQuest was dark, sexual and violent from the beginning. She clearly was not paying much attention to what her kid was reading...
* ElfQuest was put online for fans to read/re-read/discover/share. Which makes it quite easy to binge on the series.
* ElfQuest. We got to see exactly how and why both ended up such raging twisties.
* ElfQuest well with their human neighbors right away tend to get quickly labeled 'tricksters' and 'evil spirits'.
* ElfQuest Wendy Pini drew one panel with deliberately Escheresque geometry, showing a spiral staircase from the side with the characters at the top appearing much bigger than those at the bottom.
* ElfQuest whenever possible in order to present a more formidable face to their enemies, who'd just have been encouraged by the notion that their weapons could actually leave marks on the 'forest spirits'.
* ElfQuest when Kahvi sneers at the trolls for their ancestor's mutiny causing the High Ones to crash on the World of two Moons Picknose's reply is "Slaves have a right to rebel!" In fact this seems to be the default attitude of trolls in general.
* ElfQuest when Skywise gets magically trapped in a small air pocket inside solid rock, and doesn't know why it's getting hard to breathe. Fortunately Cutter is aware of his plight and working to get him out.
* ElfQuest, where Cutter's parents are among several elves killed by a monster. Since his father was chief of the Wolfriders, Cutter inherits the title, and the first thing he does to prove himself worthy of it is to devise a strategy to kill the monster. However, whatever desire for revenge he has is mixed with the necessity of stopping the menace that threatens all life in the Holt. In addition, unlike his father, who wanted to kill the monster all on his own, Cutter relies on the whole tribe working together to trap it. (He both acts as bait and deals the lethal blow, though.)
* ElfQuest, where elves like the Wolfriders take advantage of what tribe members with magical healing abilities they have to present themselves as this to their magic-less human adversaries as a subtle intimidation tactic.
* ElfQuest, which goes a long way toward explaining the current events which we return to following the flashback.
* ElfQuest (which has a similar atmosphere). Notably, the spires and togas are an invention by an advanced alien race, but become the future when everyone is sent back 20,000 years in time; the last stages of this are shown in the opening narration.
* ElfQuest, who ends up helping Scorch out in multiple ways because he wants more than a mere race: He wants to beat the very best name in the sport.
* ElfQuest, whom they alone must worship. After this and some other outrages, it's not long until they rebel.
* ElfQuest Winnowill keeps them this way to prevent them from revealing things they have learned about her. One of them, Door (the male one) in the New Blood series became the tyrant of a people of humans. One way of killing servants that displeased him was making stone from the floor flow up over their skin until they were completely encased in it, effectively creating a statue with a corpse inside.
* ElfQuest Winnowill, who spends some time in human form, Mender (who has the same fleshshaping/shapeshifting powers as Winnowill - though none of her experience) decides to try it out for a while too. He doesn't do very well.
* ElfQuest Yes, there are dead trees growing from the sheer cliff face. This was originally meant to be Skywise's big death scene but Richard Pini vetoed Wendy killing him off, so he lives to this day.
* ElfQuest, Zhantee's shielding power first manifests when he saves Skot and Krim from being struck by a falling branch. Justified in that this is the first opportunity he'd had to invoke it after being exposed to the Palace, which enhances elves' powers.
* Elf, Santa's sleigh won't fly without the proper amount of Christmas spirit from

people believing in him. Or engines, which he's used since the 70s to keep his sleigh aloft as Christmas spirit has gone down.
* Elf scouts of all kinds — High Elf Shadow Warriors, Dark Elf Shades and Dark Riders and Wood Elf Waywatchers — tend to favour the lower-face cloth mask, occasionally tending towards full ninja-mask territory.
* Elf shows Buddy adapting his experiences into a bestselling children's book.
* Elf sings "Baby, It's Cold Outside" in the shower. Buddy listens and tries to join in, freaking her out.
* Elf's Lament is from the point of view of one of Santa's elves, who complains about terrible working conditions and ends up forming a union and drafting a labour agreement.
* Elfslayer Chronicles of getting away with sabotaging the party's mission via murdering the guy who they were supposed to escort back home to stop a war.
* Elf steals the Silmarils Fëanor and his sons swear the Oath of Fëanor, to get the jewels back no matter what. This leads to Elves killing each other and many of the troubles over the next 600 years, even though Fëanor died soon after reaching Middle-Earth. His actions mean he will not reincarnate from the Halls of Mandos until the end of the world.
* Elfstones of Shannara series, it was revealed to be a Dark World of the Four Lands.
* Elfstones of Shannara The old king, relieved, is able to die peacefully.
* Elf, the humans have normal names like Walter and Susan, while the elves are called things like Ming-Mang.
* Elf: The Musical, Walter's boss Mr. Greenway is a combination of Mr. Greenway and Miles Finch from the movie.
* Elfuda is obsessed with french fries and wonders how people in our world can refer to them as junk food. This is because in her world seasonings of any kind can only be afforded by the very rich so even something like french fries tastes a lot better than anything she's ever eaten.
* Elf was going in oversized, armored "Odin Boots" when her legs got blown off before eventually getting them regrown.
* Elf was treated the same way - even after its run ended. It also played on cable networks like TBS and FX.
* Elfwood). And this isn't even the first time that Kissy's old man tried to kill one of her boyfriends.
* El Generico, being a luchador parody. In an inversion to Fray Tormenta, he left pro wrestling to take care of orphans in Mexico, even though the cartel wanted him dead.
* El Generico) in January of 2005. 69 didn't want to be in the ring with Steen either, which in turn let Generico outmaneuver Steen.
* El Generico parody. His catchphrase is "Olé!" This did not stop him from getting massively over with Mexican audiences in L.A. based indy promotions.
* El Generico speaks at least three languages, English, French and Arabic.
* El Gigante must be killed by shooting at him for a while, then climbing onto his back and slashing at the parasite controlling the beast as it emerges. Of course, the player can also just shoot the parasite as well, but that doesn't look nearly as cool.
* El Goonish Shive, Aberrations do this upon death and are quickly reduced to ash.
* El Goonish Shive acknowledges many readers already guessed Chaos was the same Immortal that appeared to Mr. Verres and his agents two years previously.
* El Goonish Shive act — to alert her super-powered boyfriend to come and handle the monster, which she knows he's capable of.
* El Goonish Shive), a former human who achieved immortality by jumping from host to host.
* El Goonish Shive, after a monster attacked Susan in Paris, two Immortals empowered her and Nanase, and instructed how to kill it. Later, in the Hammerchlorians storyline, it was revealed that these Immortals could have very easily gone to an experienced local magic-user instead. Susan... didn't take it well.

* El Goonish Shive after being told that his belly button is functioning as an actual button as a result of merging with his phone.
* El Goonish Shive after Elliot even though she's no longer interested in being Elliot's girlfriend anymore.
* El Goonish Shive, after hearing Tedd interpret an almost illegible note from his dad as advice not to be thinking of proposing to Grace at his age.
* El Goonish Shive: After Nanase saves Ellen's life with a sacrificial spell, she's hospitalized, and Nanase's not-so-oblivious mom walks into the hospital room while the two are kissing.
* El Goonish Shive against Damien after the latter threatens her friends one too many times.
* El Goonish Shive a long winded remorseful speech to Ellen about why he has to kill her because he really doesn't want to go through with it.
* El Goonish Shive also has a badass crew who are a very tightly knit group of teens... and they became so in about 2 or so months.
* El Goonish Shive. Although in her defense, she did originally want to call herself "Box", but no one got the reference.
* El Goonish Shive. (Although the last one isn't technically the same Tedd...)
* El Goonish Shive among various works. The next page has Ashley explain herself and Ellen explicitly identifying herself as bisexual homoromantic.
* El Goonish Shive. An ancient vampire nearly kills one of the most powerful wizards in the world with a perfectly ordinary gun.
* El Goonish Shive) and always changes out of any women's clothing he has on before reverting to male.
* El Goonish Shive and attend to personal issues. And takes several more on a regular basis due to deciding he doesn't like his buffer anymore and redoing it
* El Goonish Shive and causing the signal to gradually cut to static over a couple seconds.
* El Goonish Shive and doesn't like too many humans to know about it. If magical knowledge became widespread, it'd simply reset all the rules so know one could use it the way they learned how.
* El Goonish Shive and even if they pick one, it's often not fixed making them inherently agender and often genderfluid.
* El Goonish Shive. And even then, he is briefly awed by the notion of high schools, mandatory education, and public libraries, and wishes he could take time out from his mission to study.
* El Goonish Shive, and even then you are more likely to see journalists than cops.
* El Goonish Shive, and her teeth become sharp and with pronounced canines.
* El Goonish Shive and in a moment of emotional vulnerability, so unusual hormones probably had something to do with it. Afterwards the two of them laugh it off and both agree it didn't mean anything, and nothing more is made of it.
* El Goonish Shive") and is disappointed by not being able to work the latter into the dialogue as "wiggle your fingers".
* El Goonish Shive, and is stated to have done this several times in the past.
* El Goonish Shive and is the superior to the head of the office of Paranormal Affairs.
* El Goonish Shive and later he ditches it and goes with a comb over instead.
* El Goonish Shive, and leaving them alive only gives them opportunity to kill again.
* El Goonish Shive and reacts to it by informing her of the consequences of it with only mild annoyance.
* El Goonish Shive androgynous and would quite like to look more manly. But he keeps long hair anyway. If he cut his hair, he would look very slightly more manly but it would be obvious that the thing that makes him look so feminine is his actual face itself. If he keeps his hair in a really girly long hairstyle, then everyone at school with him assumes that he would look manly if not for his hair.
* El Goonish Shive and suchlike being used in anime. Not that it got nothing in common with a classical story of enlightenment after fasting and sleep deprivation, of course.

* El Goonish Shive, and Tara is forced to admit that this makes perfect sense.
* El Goonish Shive, and thanks to Dan Shive's bitter refusal to ever tie things up, some of the pieces just collect dust.
* El Goonish Shive, and the nature of her emotional distress isn't so much embarrassment as it is a feeling that she's different from everyone else and doesn't belong.
* El Goonish Shive and they certainly live up to the old stories. The ones the audience has seen have done things like arranging an attack on a school, or trying to have an innocent killed, and even some of the nicer ones have manipulated children into killing a monster when there were better options available. They are voluntarily held in check by rules allowing them to "only guide and empower mortals," which mostly just means that they have to be subtle about their mischief.
* El Goonish Shive (and thus the one they're looking for) and promptly jog away.
* El Goonish Shive and unknowingly used it on the boar while in a state of panic.
* El Goonish Shive and uses martial arts styled after anime and manga.
* El Goonish Shive, an example that manages to be as insulting as it is complimentary.
* El Goonish Shive angelic guardian form, etc) none of them are actually aerodynamically functional. The flight is all magical and the wings, at best, provide some help with maneuverability.
* El Goonish Shive Anime Martial Arts wear what they want, because "no-one dares tell them otherwise".
* El Goonish Shive anything Tedd makes... or gets his hands on... or breathes on...
* El Goonish Shive arc, where three female characters are put into brightly-colored catsuits for an infiltration / rescue mission. This is only clear in the colored strips, though, not the standard black-and-white artwork.
* El Goonish Shive are based on the criticism of the "creation of Ellen" arc, more than 15 years ago.
* El Goonish Shive) are briefly shocked before Mr. Alephnull cheerfully admits he was just messing with them.
* El Goonish Shive are government agents would have. They are a stay-at-home mom and possibly an accountant. Word of God is that there is absolutely no intention to explain this.
* El Goonish Shive are much easier to make, what with mind-control, fungal spores, and so on.
* El Goonish Shive are only sort of this. Despite the name, they actually have to periodically reset which is a form of death. To be done right, it takes preparation. They gather their power and prepare their memories for their next incarnation. The memories are more in the form of a diary the previous incarnation leaves, so there's no emotional connection to them. They are inexperienced with their powers. They are bound by promises their previous incarnation made, however. If an Immortal fails to prepare properly, they may lack information and power.
* El Goonish Shive are very dull and wordy. They seem to take on average 20 to 30 pages to describe a spell, and it's not like they spend all that time describing every possible interaction with other spells. It's just a simple description that rambles on and on. According to the author, we'll never see an excerpt longer than two or three words because he simply cannot write something so unreadable.
* El Goonish Shive. Around Halloween, she decides to give out a transformation-based power and determines that the person with the most desire for it is Ashley—except that Ashley is so inherently good that she could never be given a power that could be used selfishly, and is only eligible for spells based around healing or empathy.
* El Goonish Shive as a good example of how to do it) and his comic occasionally features one.
* El Goonish Shive". As far as is known, it remains purely theoretical.
* El Goonish Shive as foreshadowing of the second half of the story arc; the exposition itself is also lampshaded in the dialogue as well.
* El Goonish Shive as he really looks, while his squirrel avatar is showing up less often.

* El Goonish Shive, Ashley and Tom are interested in Elliot and Susan respectively, and their differing approaches earn them very different rewards. Tom attempts to manipulate Susan into dating him, knowing full well that she would turn him down if he asked her out through conventional means. This leads to him getting exposed as a manipulative asshole in front of a large number of women. Ashley, on the other hand, does her best to warn Susan about Tom's less than honest nature despite the fact that, to the best of her knowledge, this would hurt her chances with Elliot (she believed that Elliot and Susan were likely to get together). This action impressed Elliot enough that he asked her on a date.
* El Goonish Shive, Ashley didn't have to date Elliot for long before she had her awakening. Justified via villainous plan derailing their second date and exposing her to various macguffins.
* El Goonish Shive as if they have this ability if they can be seen at all.
* El Goonish Shive: As the artwork began to improve, the outlines became thicker.
* El Goonish Shive" as the punchline, spoken by two different characters.
* El Goonish Shive as though it was a tabloid of this style. However, its strange stories of goo monsters attacking local schools and the like are all completely true. It's just that no one believes them.
* El Goonish Shive a story of "evil monkey" rampaging in a public school, her boss, Ed, shot the idea down:
* El Goonish Shive, a swarm of conspiracy theorists came to Moperville after a supernatural being spontaneously appeared on a news broadcast. Unusually, the conspiracy theorists are portrayed as crazy even though there really is a conspiracy.
* El Goonish Shive at a time, but doesn't need to kill anyone outright, although this is more about trying to avoid attracting the attention of aberration hunters rather than any moral justification.
* El Goonish Shive at least partially because it has become part of her identity.
* El Goonish Shive at the place he can't remember visiting and in a rather strange company he found himself in a "familiar" environment:
* El Goonish Shive beam, but she resisted it and zapped Tedd instead before passing out from the effort of resisting the impulse.
* El Goonish Shive. Beautiful enough that he looks feminine without his glasses.
* El Goonish Shive because he knows she'll probably try to use her most powerful spell which is mostly useless against him and guarantees she'll be depowered in the medium term.
* El Goonish Shive before realizing Nanase just mentioned Tedd having a girlfriend.
* El Goonish Shive bits between stories and a renewed effort to keep the strip updating 6 times a week (his 2012 average is probably 3.5 a week, which is pretty good, all things considered), so we'll have to see how he does.
* El Goonish Shive), body snatchers, chimeras, talking animals, and multiple species of aliens.
* El Goonish Shive, but... guess what? Tedd still exists. And still has self-esteem issues. Dan said, at some point, that every possible dimension has a Tedd.
* El Goonish Shive, but the idealism is very real, as seen during the boar hunt.
* El Goonish Shive by aliens. The last of these four is the page image above.
* El Goonish Shive by a quest giver NPC results in her in-game fame and requests to participate in side quests to go up.
* El Goonish Shive. By contrast those who do have access to their own spells are said to be dreaming or to have awakened depending on the degree of magical attainment.
* El Goonish Shive by the creator but still used within the fanbase and on the forums.
* El Goonish Shive. Catalina, who is a lesbian, remarks that it works.
* El Goonish Shive character. Later arcs revealed she was putting up a bubbly front to cover some serious inner conflicts.
* El Goonish Shive counterpart of another magic clone she never met, that of the sorceress who did this for them both.
* El Goonish Shive. Currently it's kind of a mix of the lot. And weird.

* El Goonish Shive Currently only in a sketchbook, but time will tell.
* El Goonish Shive. Damien was created to be this individual but he didn't fulfill the prophecy and became evil instead.
* El Goonish Shive, Dan explains that Tedd and Grace also fall into this category and that he wishes he had made the start of their romance more gradual. He explains that he had always hated "Will they or won't they?" plots and that he was going to be different, but that he may have ended up going too far in the other direction.
* El Goonish Shive derives much of its dialogue from the characters pointing out the flaws in the author's own logic.
* El Goonish Shive, despite providing the page quote, averts this in the end. The party discussed turns out to be one big heartwarming scene in the end.
* El Goonish Shive: Despite the protests of all involved, a good chunk of the peripheral cast believe in a Susan/Elliot/Sarah triangle. Elliot and Sarah are dating, Susan and Sarah are close friends, and Elliot and Susan get along well with each other (they have good on-screen chemistry on their web-video series where they review movies). However, Susan has issues with physical intimacy and Elliot knows this, so even after he and Sarah break up amicably, neither Elliot nor Susan try to become more than friends.
* El Goonish Shive destroys every doll, yet Nanase has no choice but to keep coming back.
* El Goonish Shive Dex gets rather attached to his semi-autonomous fairy companion, despite knowing exactly what she is.
* El Goonish Shive doesn't appear to have any hair on his head, though it's covered up by a hat.
* El Goonish Shive does one of these. Not because he's just done something evil, or because our heroes are falling into his diabolical trap, but because he thinks it's genuinely hilarious that Grace could ever be a threat to him.
* El Goonish Shive does this, splitting up the characters into pairs and telling their stories one at a time.
* El Goonish Shive) do this sort of thing a lot on the forum. The most common seems to be calling Susan "Sarah" or Sarah "Susan".
* El Goonish Shive duel with Tensaided by drawing Unstompable Stompede, allowing him to do enough damage to take Tensaided from 20 life down to zero in one turn. Lampshaded.
* El Goonish Shive, due to the existence of alternate universes, Elliot's counterpart in the Beta Universe is a female version of himself named Ellen (who is not Main Universe Ellen's counterpart), and Grace has a counterpart in the Alpha Universe named General Shade Tail. In the non-canon universes of the side strips, Tedd has a counterpart in Tess.
* El Goonish Shive: During the non-canon "Goonmanji 2" arc, Hanma the immortal greets Ashley and Liz by pointing out that you aren't allowed to spoil canon events in a non-canon story, "and therefore no acknowledgement should be made as to whether you've seen me at an anime convention before." Nobody in-story points out her mistake.
* El Goonish Shive, during the period in which Ellen was trying to be evil, she wore a suit to school.
* El Goonish Shive, during the Sister arc, who turns into a were-cat to return to Moperville.
* El Goonish Shive: Ellen exists, and she doesn't stay a villain; Grace can shapeshift, and Tedd doesn't need glasses.
* El Goonish Shive, Ellen, Grace, and Nanase form a temporary Amazon Brigade during the Painted Black arc.
* El Goonish Shive, Ellen, Nanase, & Justin go to a video store to rent a movie. They meet Susan there, who invites them to watch it at her place.
* El Goonish Shive. Elliot also suffered from this in Nanase's introduction, where her badass cred is established as being the only person able to defeat Elliot in combat.
* El Goonish Shive. Elliot completely fails at fantasizing about women, which his girlfriend Sarah and her friend Susan discuss at length. Susan thinks he should be

praised for his restraint, while Sarah thinks it isn't healthy.
* El Goonish Shive Elliot has attracted the affections Sarah, Nanase (albeit non-sexually, being at the time a closeted lesbian), Susan, Diane, and Ashley.
* El Goonish Shive. Elliot is also somewhat of this trope having recently developed superpowers particularly with respect to his reaction to being able to fly.
* El Goonish Shive, Elliot realizes that a net is probably not the best item for catching sentient goo. Tedd's answer...
* El Goonish Shive, especially for Justin, Susan, and Nanase, while others felt a year-long arc with few wacky antics and no action sequences was not what they signed up for.
* El Goonish Shive, etc. Unlike some other examples he's being sincere, despite the silliness of the situation.
* El Goonish Shive even if he's not trying to be. However, he's actually more of a geeky otaku type at heart.
* El Goonish Shive, even though Blaike kept saying it wasn't her fault that he didn't listen.
* El Goonish Shive (eventually both sides come to the conclusion that she should go).
* El Goonish Shive, even using the title "Not Quite BFFs", but no one actually expected it in the first place.
* El Goonish Shive: Every main character is frequently shipped with every other main character, and the fandom is bullish on the idea of a full-cast polyamorous puppy pile.
* El Goonish Shive, everyone in the main cast has access to at least one spell of their own except Ashley who nonetheless is a wizard and thus has the ability to learn other people's spells. Also, everyone possesses a basic capacity to use magic and the potential to gain at least one spell of their own regardless of any awareness of it.
* El Goonish Shive. Everything else is merely a shell for the nuclei and thus replaceable.
* El Goonish Shive experience what is perhaps one of the most literal forms of this possible; to the extent that Elliot is instructed to use his transformation powers in the privacy of a bathroom at every opportunity so as to prevent "accidents." In fact, anyone who gains their magical powers "improperly" will have some form of Power Incontinence until their magic power stabilizes.
* El Goonish Shive expy. The other scientists ended up providing their bosses with something that supposedly worked, but... didn't.
* El Goonish Shive expy within the comic is portrayed as wielding a book.
* El Goonish Shive, extended psychic conversations with the "whale" is implied to result in this given one that lasts less than 1 second results in a nasty headache.
* El Goonish Shive features everything from interdimensional space whales to superheroes, but being urban fantasy, everything is in the "real" world, not to mention the fact that magic and supernatural nonsense is kept more or less hidden to the general public. As a result, life is pretty normal most of the time: characters have regular romantic relationships, they go to normal schools, and several even have jobs.
* El Goonish Shive features Mr. Verres successfully negotiating with some manner of alien proud warrior race leader who agrees to take his "deathless army of rage" and "rampage in search of enlightenment" elsewhere.
* El Goonish Shive features two different high schools - Moperville North and Moperville South. Half the cast attends North, while the other half attends South. Moperville North's mascot is "The Frenzied Turkeys". Even though it's a webcomic most of the action takes place in the corridors and cafeterias, just like a TV show.
* El Goonish Shive feels like The Load during the Painted Black Arc because everyone assumes he's not strong enough to help rescue Elliot. (All of the other candidates for the team had magic and/or super powers.) In fact, his dream that night casts him as a helpless hobbit who's forced to stay behind while the girls who saved Elliot are cast as the Fellowship.

* El Goonish Shive); female-to-male sex changes, even of someone trapped by pregnancy (for whom it's only even possible afterwards), cannot exceed a 30 day time limit.
* El Goonish Shive figure it out himself, he'll just fight it whether it's true or not.
* El Goonish Shive for a while, with a side effect of temporary hair color change.
* El Goonish Shive for risking lives in order to teach Raven an unnecessary lesson.
* El Goonish Shive, from another captive. Prior to that, she didn't even know how old she was.
* El Goonish Shive, from Rhoda's point of view. She's normally scared of people bigger than her (and his 6' to her 5' is quite a difference), but also knows that he's friends with Nanase, and that Nanase wouldn't be friends with anyone bad.
* El Goonish Shive further down, they didn't start as true companions. The transition was a bit smoother, though, with the friend of friends having your back when the deadly stuff starts even if you were bickering only hours before.
* El Goonish Shive give Sarah's name, it was a casual toss-out (the principal was yelling at her).
* El Goonish Shive got hers via the internet. As in the internet took the fact that her skirt was vaguely cheerleader-like and ran with it.
* El Goonish Shive, Grace and Greg (even though it would kill him too).
* El Goonish Shive, Grace encounters some skeleton NPCs during the "Fantasy Wasteland" storyline.
* El Goonish Shive, Grace frequently has these problems, although she's progressing.
* El Goonish Shive, Grace has previously asked the local squirrels for directions to Damien's hideout (Grace being a half-squirrel hybrid, it's halfway plausible). Nanase has to catch up to the group in her miniature winged fairy form and flies up to a tree branch and asks a squirrel for directions. The squirrel looks at her, looks at his acorn, and then chucks it over his shoulder.
* El Goonish Shive, Grace suspects Tony is trying to hide "his obvious attraction to [Tedd]".
* El Goonish Shive: Grace while in her full squirrel form has 2 pairs of rectangular buck teeth.
* El Goonish Shive Granted he only existed so that Dan could kill someone off without feeling guilty, but that is an impressively stupid evil plan.
* El Goonish Shive Gun and only used her abilities to transform back to human when she was told it was the only way to do so and even then she only used them reluctantly.
* El Goonish Shive had a non-canon side story that took place at San Diego Comic Con.
* El Goonish Shive handwriting". It's not exactly illegible, but everyone who reads it thinks it says something different. On the next page, Justin offers another potential interpretation.
* El Goonish Shive happened. He's also expressed a fondness for Grace.
* El Goonish Shive has a bunch of examples, most of which are subverted to some degree.
* El Goonish Shive has a side character who exists only to fill this role.
* El Goonish Shive has given a number of characters ridiculously long hair. It's usually the result of a temporary transformation, helpfully sidestepping most of the logistical issues.
* El Goonish Shive has Grace's Birthday Party arc, part-masquerade where the various characters deliberately chose stereotypical outfits for each other in keeping with the 'walk a mile in my shoes' theme of the occasion.
* El Goonish Shive has Grace Sciuridae who is a Tulougol Seyunolu (Greater Chimera).
* El Goonish Shive, has "insanely potent" magic, and is trilingual in Japanese, English, and French.
* El Goonish Shive has one at the end of "New And Old Flames" arc and a more smooth but deep one at the end of "One Way Road" arc.

* El Goonish Shive has the Bulldog Dragon, a creature summoned at one point against the heroes. It's basically what you'd get if you combined a bulldog, a bat, and a goat while making it the size of a small car and reptilian.
* El Goonish Shive has the demonic duck who looks very similar to a major character in Goats, the comic strip by Jonathan Rosenberg.
* El Goonish Shive has used every possible permutation of the hammer and the demonic duck, and yet they just won't go away, even despite the author explicitly saying they will.
* El Goonish Shive have listed this among the reasons that they aren't likely to become a couple any time soon. Beyond worrying about their own friendship though, they are also worried about the general dynamics of their social group, particularly concerning Sarah, who is both Elliot's ex and Susan's best friend.
* El Goonish Shive have meddled with the "main" one. Most of them are Alternate Universes, each with its own version of Tedd or other main characters.
* El Goonish Shive. He accounts for the higher voice he has as a girl and deliberately picks a song that has notes slightly higher than he would normally sing.
* El Goonish Shive). He and Sarah both came to the conclusion, independently of each other, that they were better off as good friends, and the only potential drama involving their breakup was that they didn't think anyone else would believe it went so smoothly.
* El Goonish Shive he can make magic watches, he replies "Because science, whatever. I'm done expositing. You've taken the joy out of it."
* El Goonish Shive He even stole someone's newspaper for his performance.
* El Goonish Shive, he has taken to providing relevant comic reference links at the bottom of the strip just above the commentary for anyone who hasn't gone through the ten plus years of continuity recently.
* El Goonish Shive. He is, however, fully aware of how absurd this is. (The gender bending part, not congruent memory as a whole.) This doesn't stop him in the slightest.
* El Goonish Shive. He is later informed that the glove is mostly ornamental—while the glove allows him to store data and create wands with more precision than would normally be possible, he's doing the vast majority of the heavy lifting himself, and the glove won't work for anyone else. He's very disappointed, since he was proud of his invention.
* El Goonish Shive: he isn't the least bit manipulative, his extracurricular school activities all benefit society and raise awareness in some way, he's rescued at least three puppies from various situations, he will never judge you, he will always listen, and he's just an all-around good guy.
* El Goonish Shive he often uses, "Title pending", the permanent official title of a storyline. He finally does so with the "magic party'" storyline, which is a trilogy (thus far) comprising "Title Pending" (establishing the party), "Title Pending 2: Even More Pending" (getting ready for the party) and "Title Pending 3: Untitled Party". Ultimately subverted when the last page of the storyline retroactively titled it "Reflections".
* El Goonish Shive. He promises Justin that "If you come, I'll get Tedd to design me a female form with really long hair, and I'll let you style it however you want."
* El Goonish Shive. He returned in 2010, although it's unknown if he'll be sticking around.
* El Goonish Shive her "'hands off, jacka' — er, Jack' whistle".
* El Goonish Shive her sweater's sleeves reverting to normal from being oversized yet he dismisses it as a neat trick.
* El Goonish Shive, he's brave, naturally drawn to defending people that need it, and acts a balance for his more eccentric friends.
* El Goonish Shive he sees what Nanase was talking about and stands up to him when he antagonizes Nanase.
* El Goonish Shive him to play with her and her friends, he tells her he is "no good".

* El Goonish Shive. How can this happen? Because one of the teachers is a wizard.
* El Goonish Shive if he continues down the same path before ending on an exhortation to be better.
* El Goonish Shive, Immortals are capable of having children, at least to some degree. Most do not seem to do so, though. "Half-Immortals" (called "elves" in the series jargon), the offspring of an Immortal and an ordinary human, are confirmed to be sterile. No word on what happens if two Immortals attempt procreation.
* El Goonish Shive, Immortals can imbue a person with subtle magical abilities and start them down the road to more magic if they have a strong yearning for something or if they have an affinity for something specific. They can also unlock a person's natural latent magical abilities to be able to start getting access to and using explicit spells.
* El Goonish Shive in early strips, admit that the parts that are problematic, and making a serious effort after that to be respectful about how gender identity and sexual orientation got treated.
* El Goonish Shive (in her defense, she had only recently learned about her Omega Form).
* El Goonish Shive: In his first appearance. He's a very wise, jolly, and calm guy who takes some time out of his death ritual to offer some wisdom to three girls he's never met before. Upon learning of Susan's previous encounter with immortals, he even swears to try and pay off the debt that the immortals owe her (despite not being personally involved). As he puts it:
* El Goonish Shive in order that there be no negative space around it.
* El Goonish Shive in order to exact his revenge on Damien before Raven dissuaded him.
* El Goonish Shive in order to get out of trouble. Raven sees through the act but lets her go anyway and expresses appreciation that neither Grace nor Ellen try that routine on him.
* El Goonish Shive), in practice, Uryuoms have no legal standing whatsoever because their very existence is kept secret from the public.
* El Goonish Shive in response to Elliot's summation of Tedd's argument.
* El Goonish Shive. Instead of holding him captive though she merely stranded him (along with Tedd) in an isolated facility with no quick and easy way to get back home.
* El Goonish Shive, in that he really doesn't want to go through with it.
* El Goonish Shive: In the Fantasy Wasteland NP storyline, Grace quietly critiques a giant roach she comes upon as a staple of post-apocalyptic fiction, but not really fantasy-flavored... until a second later when the roach unfurls dragon wings and breathes fire.
* El Goonish Shive In their native culture, pretty much the only clothes Uryuoms wear are stretchy skintight bodysuits (they're shapeshifters and can morph away awkward anatomy when it's not in use, so they only wear clothing for protection against hazards and need clothes that can accommodate sudden changes in size and shape).
* El Goonish Shive. In the middle of an aerial chase, the bad guy starts boasting and making threats.
* El Goonish Shive in the only combat arc he is involved in, and he can be rather cowardly at times. Then again, he is a scientist-type character surrounded by shapeshifters and supernatural martial artists, so it is to be expected.
* El Goonish Shive. In this case, though, it's less that the dream is prophetic, and more that it reflects a desire on his part which is also reflected in the spell.
* El Goonish Shive into engaging in this while Diane goes to get help.
* El Goonish Shive involving Grace shapeshifted into Elliot while Elliot is Cheerleadra. He gets talked out of it, though.
* El Goonish Shive, in which Mr. Verres expresses his feelings after the kids get back from defeating Damien.
* El Goonish Shive is a decoy secret government warehouse. It's a collection of useless and inert magic items designed to look painfully underfunded and under-

secured. It serves to distract would-be thieves from another facility containing actually useful artifacts, and it also serves as a trap for said would-be thieves. The security systems don't even kick in until you try to remove an artifact from the premises.
* El Goonish Shive is a fearless adventurer who willingly marched blind into the unknown, and he's shown wearing a full beard.
* El Goonish Shive is a male version of this trope. Grace, the squirrel-girl girlfriend of Tedd, has her moments as well.
* El Goonish Shive, is an annoying example... except that it's been revealed that her motives are a bit more complex than that. Not to mention that she is fully aware that her attempts to win over Justin are pointless and do nothing but make her come off as annoying and quite possibly psychotic, but can't seem to stop herself.
* El Goonish Shive, is based on a friend's guinea pig, due to a lack of ideas.
* El Goonish Shive is human and also part squirrel, with alien DNA from an Uryuom and a Lespuko (sort of like an Uryuom, long story).
* El Goonish Shive is less "complete nonsense" than "an exaggeration of the truth".
* El Goonish Shive is mostly Level 1 with a few storylines having level 3 continuity with the main comic and one (the Playing With Dolls storyline) having Level 5 continuity.
* El Goonish Shive, is ostensibly a video shown to Sarah made by Tedd and Grace.
* El Goonish Shive is rather fond of this; he initially intended all the relationships to be like this, although it didn't work out that way:
* El Goonish Shive is the smartest and most cunning of the aberration mercenaries and displays his intelligence by avoiding easily countered brute force or pure magic attacks in favour of a magic augmented sneak attack. He's the one who set up the plan to kill Raven.
* El Goonish Shive is this to the main characters and is the father of one of them.
* El Goonish Shive is, to her regret, the only member of her group of friends who isn't a shapeshifter, magic user, mad scientist, or martial artist of some kind.
* El Goonish Shive is to marry a kind, compassionate, rich guy who will obey her every whim.
* El Goonish Shive is typically a bit more professional than this trope implies, she does occasionally deliver a proper silly news broadcast. Some examples:
* El Goonish Shive it clear that while she does want to be friends, she doesn't at all share that sentiment.
* El Goonish Shive it seems Tedd may have been experimenting with flashbang grenades or something that yielded similar effects and blew up his basement lab.
* El Goonish Shive. It's hinted that she's in love with and is trying (unsuccessfully) to seduce her human boss.
* El Goonish Shive, it's implied he's had to put down many actual monstrous creatures over the centuries.
* El Goonish Shive just as Abraham is swinging the axe to kill Ellen and manages to deflect it a fraction of a second later.
* El Goonish Shive. Just before they "die", they can also "record" important memories and knowledge that their next incarnation will be able to access at will, but this is compared to recalling information read from a book rather than remembering something they had personally experienced.
* El Goonish Shive, Justin, Elliot, Ellen, and Nanase can change their appearance through magical illusions.
* El Goonish Shive. Justin tells her that the sequels don't make sense of this inconsistency and further that time travel is not allowed to make sense.
* El Goonish Shive just led to a situation that was overwhelmingly embarrassing for Ellen instead.
* El Goonish Shive just strong enough to "arm-wrestle". But when someone makes her explode (figuratively), something may explode (literally).
* El Goonish Shive, Kitty doesn't so much speak her lines as shout them, and while her character shows an initial reluctance to eat pizza, her appetite for scenery more than makes up for it.

* El Goonish Shive later, Tedd admits that it started out as simple attraction, since he was the first male her age she wasn't related to, and she was a hot girl in his house. It definitely evolved into love relatively quickly, though.
* El Goonish Shive liberally about El Goonish Shive, often using the hashtag #EGS and more recently #EGScomics.
* El Goonish Shive like her, this is quite significant even though neither of them seem to realize it. The fact that she goes to wash her hands immediately afterward only slightly negates the moment.
* El Goonish Shive likes doing this to Nanase when her body's unconscious during the use of her Fairy Doll spell. He limits himself to the hairdo, however.
* El Goonish Shive, Liz is made to wear a mouse costume as part of Dan's 20th birthday celebrations.
* El Goonish Shive madness is driven by the loss of her husband and her attempts to care for her son.
* El Goonish Shive Magic is noted to have "a flair for the dramatic". This perhaps reaches its peak in the "Family Tree" arc, where both an ally and an antagonist know that Nanase will regain access to her magic at the most dramatically appropriate moment, and explicitly base their strategies on that fact.
* El Goonish Shive "Magus" Ellen has a girl's name because he was born female, choosing to shift to male permanently for the increased physical power. His world has high enough magic levels that this is actually reasonably common and socially acceptable, so he didn't feel any particular need to change his name.
* El Goonish Shive, Magus is not quite dead while he is stuck in the spirtual plane but he is effectively a ghost. Therefore his goal is to gain a body and effectively come back to life before returning to his home universe.
* El Goonish Shive, Magus kills Sirleck as soon as he regains a body as he was working with Sirleck only to that end.
* El Goonish Shive main character, Elliot, but that is perhaps beside the point.
* El Goonish Shive making out with another woman while her mother is out of town.
* El Goonish Shive (many characters, both main characters and secondary characters, are confirmed to be LGBT+ and are in committed relationships. Early in the series this was limited to gay, lesbian and bisexual characters. But later on, characters were confirmed to be genderfluid, trans, or strongly implied to be asexual)
* El Goonish Shive — and he tones down his gadfly qualities quite a bit. They still tease each other, though.
* El Goonish Shive — especially for comics, who get a free pass for some things like this.
* El Goonish Shive — unless they happen to grow on a hairless part of the head, but that's a rare anomaly.
* El Goonish Shive — with different forms programmed on Tedd's computer and replaceable parts — it definitely uses magic to operate. However, there's not very much magitek in the setting. (Unless you consider the Uryuom-human hybrids as biomagitek.)
* El Goonish Shive merged a background character unofficially called Shy Girl with a minor character named Rhoda who then became more of a supporting character.
* El Goonish Shive. ("Moms have to be intelligent, knowledgeable, and capable of utterly destroying anything that dares to threaten their children.")
* El Goonish Shive, Mr. Raven cuts through Abraham's hat during their duel.
* El Goonish Shive, Mr. Raven watches over Moperville South high school and its students, especially those he considers his favorites (those with high magic potential).
* El Goonish Shive, Mr Verres's reaction is "half-overjoyed that nobody he cared about was seriously injured, half-enraged over their recklessness, half-exhausted after a long night, and half-relieved that the Damian threat was over."
* El Goonish Shive much of a breather from the main plot; in fact, you may have to think for a good five minutes to recall that there was a larger plot beyond people being turned into things.
* El Goonish Shive Nanase angrily grabbed the phone to object, only to discover that Susan had been "talking" to a time service.

* El Goonish Shive." Naturally, since they're in a car, Susan hears her and calls her out on it.
* El Goonish Shive, never accept a soda from Dr. Germahn. Odds are it'll shrink you but not your clothes. Granted, all he'll probably do is leer, so it's less "evil" and more "creepy", but still not a very pleasant experience.
* El Goonish Shive never really goes into adult territory, but it has a ton of this. Multiple characters express interest in shrinking (particularly through a magical soda), Tedd has a furry fetish, Susan gets aroused when her lesbian friend kisses a guy she has a crush on, and Ashley "likes" transformation stuff.
* El Goonish Shive (Note that just about all of the 'aliens' seen in EGS are Earth-born Uryuoms, and the technology exists to give them completely human forms.)
* El Goonish Shive noticing the victim's suspicious behavior. "Should've been a red flag."
* El Goonish Shive not normally capable of causing any real harm becomes a useful weapon against them.
* El Goonish Shive (obviously just to advertise "completeness"). The result: surprise, they have to pay for repairs of a car damaged in fire monster's attack (and on camera at that).
* El Goonish Shive of alien shape-shifters. Since they can change their external shape at will, they form relationships based primarily on concepts and mental connections. Grace, being 1/4th Uryuom (or so), has inherited this disposition. However, in one non-canon story where reality becomes altered so that Tedd is (and always was) female, Grace hooks up with a different character instead (way to go Sarah!). Although this might be explained by the way, like in every alternate universe where the two are of different genders, the female Tedd and Elliot are in a relationship.
* El Goonish Shive. Of course, from this point, the situation is bound to get more and more awkward.
* El Goonish Shive (of Elliot), so he was, in fact, unsettlingly close.
* El Goonish Shive of her former boyfriend shows up, which forces her to confront her feelings. Justin had already guessed, while Sarah finds out while she and Grace are hiding behind the couch at the birthday party, intending to surprise Susan and Nanase. Grace was unsurprised, saying that she thought it was obvious that Nanase and Ellen had feelings for each other. Also, Susan had started to pick up on these feelings before Nanase had, working it out when Nanase mentions Ellen's V5 pheromones which Ellen didn't have anymore. A flashback reveals that she'd suspected her of being gay since sophomore year.
* El Goonish Shive of himself and his friends. Through a chain of events, it ended up contributing to the creation of a bisexual female duplicate of Tedd's best friend and caused her to be endowed with the ability to emulate one of the its female transformation settings by shooting a beam from her hand.
* El Goonish Shive of himself. They're just ticked he didn't tell them where he was.
* El Goonish Shive, of the Abberations that attack Adrian Raven, the Abberation known as Gullet is shown to be big, strong and dumb.
* El Goonish Shive of what a gender swapped date with Elliot would look like is this according to her.
* El Goonish Shive one of the clues that Hedge is not actually evil and doesn't actually have malicious intentions toward Elliot.
* El Goonish Shive, only that it was during the anime boom in the nineties. The fact that she looks 14 doesn't help it either.
* El Goonish Shive, on multiple occasions, Dan has named storylines provisionally as "Title pending" before replacing them with appropriate titles part way through. In the past, Dan managed to think of a good title before he needed to split storylines into multiple parts but then came "Title Pending 2 - Even More Pending" during the storyline with "party" in its URL.
* El Goonish Shive on the facility where Grace and her brothers were created. One of them is killed mid-scream.
* El Goonish Shive outside of TV Tropes, it's probably in connection with the

continued debate over whether or not its creator Dan Shive is biphobic.
* El Goonish Shive over the new dress code. He eventually asks her out, but she turns him down. It's implied that this is more due to her intimacy issues rather than any particular problem with Matt himself.
* El Goonish Shive pairing Susan and Justin after finishing pairing the other main characters.
* El Goonish Shive party because it will let her act on her attraction to women without outing herself. Just before the transformation actually happens, she suddenly realizes that this doesn't make a whole lot of sense.
* El Goonish Shive Pay attention to the picture underneath Wolf's FBI card. It's a picture of Cranium.
* El Goonish Shive, perhaps? When he comes to, he's worried about concussions, brain damage, etc. Tedd brushes him off and gets on with some exposition.
* El Goonish Shive, Principal Verrückt pushes in all the wrong directions, but doesn't mind when he's repelled. At least if it's not about murals.
* El Goonish Shive probably wished that Justin only kicked him across a room.
* El Goonish Shive rather than something one is born with, so their views on sexism and gender roles are... different. It's noted that there is no stigma against transgender individuals or non-heterosexual romances in his world due to this magic being available. However, they fully embrace the idea that certain occupations are more suited for one sex over the other, and Magus looks down on a friend of his because she chose to pursue a career as a warrior while remaining female, saying that it's utterly absurd to make such a choice. Magus himself was born female, but changed his sex (and gender identity) upon choosing the path of a warrior, because "men make better fighters". This is rather sharply at odds with the modern Western ideal of no discrimination between the sexes regarding occupation and, despite them having no stigma against transgenderism as such, also at odds with the principle that your real gender is the one that you feel you are inside, since they think your gender should be the one that fits your job. Notably, Magus is convinced that Ellen shouldn't be a fighter and a woman, but thinks that means she shouldn't be a woman, rather than that she shouldn't be a fighter.
* El Goonish Shive, Raven fights Abraham when the latter invades Moperville South and refuses to surrender. Unbeknownst to both of them Nanase witnesses them.
* El Goonish Shive, Raven has Abraham at his mercy after their sword fight and asks him to surrender so he doesn't have to kill him.
* El Goonish Shive religion which like many real major world religions has a significant impact on the laws that get passed where it is widely practiced.
* El Goonish Shive, respectively. Ellen, Nanase, Charlotte and Diane also dabble in this.
* El Goonish Shive. (Said cousin is, of course, scorchingly hot actually, as Tedd admits much later.)
* El Goonish Shive. Sarah, having been thinking about meeting to talk about the same thing, recognizes the intention behind it based on the wording and the places suggested but jumps to the wrong conclusion as to the reason for doing so and so arrives at the agreed upon place with preconceived ideas.
* El Goonish Shive, Sarah realizes that "Box" is Adrian Raven's mother only right before falling asleep for the night despite thinking about them throughout her bedtime routine.
* El Goonish Shive, Sarah talks Grace out of "playing Cupid" for Nananse and Ellen, then does so herself.
* El Goonish Shive says it's exaggerated in this scene for comic effect.)
* El Goonish Shive section under almost every page. Many of them have links to earlier strips to help explain the callbacks for those who have missed them, while others (particularly the earlier ones) were added at a later date as a thank-you to those who have supported the comic through Patreon.
* El Goonish Shive seemed to be doing this with "sexy awesome," but the phrased hasn't been used in the comic in years (fans on the board still use it, though).
* El Goonish Shive seems to imply that it was more of a jab at tourists in general than just American ones.

* El Goonish Shive sending aberration mercenaries to attack Moperville as a distraction. The aberrations would exist and kill regardless of what Magus did, and Moperville is chock-full of powerful mages, superheroes, and other people capable of killing them.
* El Goonish Shive settings), Grace is the more effective and flexible of the main cast.
* El Goonish Shive sexist remarks towards women, it's the final straw. This unleashed years of repressed trauma and accidentally turned her homicidal; luckily, the immortal who accidentally flipped the straw had a Calming Spell made of doe-eyed critters.
* El Goonish Shive: Shapeshifter Grace's default form is actually slightly taller than Tedd, and no-one (least of all Tedd) has suggested that she adjust it. Played straight when Grace and Tedd are in their gender-swapped forms, Played straight with Elliot, first with Sarah and later with Ashley, then subverted when Elliot deliberately makes himself smaller than Ashley while demonstrating his transformation powers. Played straight when Nanase, Susan and Justin's genders were reversed, but averted with Rhoda and Catalina, who are both quite petite.
* El Goonish Shive. She genuinely tells him that, while she's curious about magic, if he isn't sure what he's allowed to tell her, he probably shouldn't tell her anything.
* El Goonish Shive, "She's about to do an amazing super-move she's never going to use again, isn't she."
* El Goonish Shive. She's recently been shown getting better and has even been seen to smile.
* El Goonish Shive, she starts to rectify the "Broken" part, ironically as part and parcel of temporarily losing access to her magical powers.
* El Goonish Shive. She was created specifically to kill Damien (she has fireproof fur that makes her immune from his fire-based attacks, and special claws that reduce his healing factor), but is naïve, "bubbly", and hates violence.
* El Goonish Shive, she would've wound up fitting her name just perfectly.)
* El Goonish Shive, Shive references it directly mentioning if the scene comes to pass he will "come up with [his] own horrible lyrics".
* El Goonish Shive situation and allowing him to fall to his death, then replies "I wouldn't be too sure about that."
* El Goonish Shive skipped ahead six months in one panel, which is rather impressive considering that the entire ten-year long run of the comic had only encompassed about 5 months (not including brief flashbacks), starting on January 25th. The skip runs from June 30th to December 23rd.
* El Goonish Shive so its possible Grace doesn't have a male gene-parent technically.
* El Goonish Shive .... so of course his aberration form is a giant koala.
* El Goonish Shive, so that all the characters were cross-dressed into whatever their partners wanted. It's not as bad as it sounds, but surely as crazy.
* El Goonish Shive specifically out of fear that she might endanger someone else's relationship, to the point of asexuality.
* El Goonish Shive states that it "is a comic about a group of teenagers who face both real life and bizarre, supernatural situations. It is a comedy mixed with drama and is recommended for audiences thirteen and older."
* El Goonish Shive story arc toned down her psychotic tendencies and revealed a surprisingly compelling backstory, even giving her a few genuinely badass moments.
* El Goonish Shive. Story-wise, when Nanase and Susan ran into trouble in France, two Immortals arrived the same evening and gave the girls as much magic as they could.
* El Goonish Shive strips involves several of these between Susan and the deity creator of the game.
* El Goonish Shive strips often serve this purpose. Sometimes forms short arcs. They are "not canon unless referred from it later".
* El Goonish Shive: Summoned creatures are of the instant ally variety. They are dismissed if "killed" (the same critter can be re-summoned and give a report) or

the summoner is knocked out.
* El Goonish Shive, Susan initially mistakes Grace for one of these thinking Tedd couldn't have possibly have a real girlfriend and must have made one instead.
* El Goonish Shive Susan, meanwhile, has a number of mental and emotional issues that keep her from being able to have a real relationship, and she doesn't want to make Elliot wait while she resolves those issues. Combine that with the fact that Elliot has started dating someone else, and this ship is unlikely to go anywhere in the foreseeable future.
* El Goonish Shive taking the vampire aspect of this to its logical conclusion.
* El Goonish Shive, Tara has had it with Voltaire once it becomes evident he's been manipulating her so she drops the respectful demeanour she had toward him and threatens him into leaving.
* El Goonish Shive, Tara is manipulated into attempting to kill Elliot by the Immortal named Voltaire who she believes is forbidden from lying like the Ancients of her world.
* El Goonish Shive tease him because he counts on it to help him through the craziness that has taken over his life (as in "It can't be that bad if we're joking about it.")
* El Goonish Shive, Tedd decides to forgo the "obligatory gay hobbits joke" on the grounds that he really needs a hug.
* El Goonish Shive Tedd's dad broke his magic detector after learning how it had failed on Tedd.
* El Goonish Shive, Tedd's dad leaves his son a note on their refrigerator, but his handwriting is so inscrutable that only he can read the original message. To everyone else, the note opens, "Dear Tedd," and then imparts a message the reader needed to hear. This is never explained.
* El Goonish Shive, Tedd's glasses have a variety of functions, and they also make him look less girly.
* El Goonish Shive that big dramatic moments are all it really understands of us.
* El Goonish Shive that it prefers to think of itself as being more like a whale.
* El Goonish Shive that she told Raven that she knows about him being an elf but doesn't tell him the that other people know about his nature as well. She also believes that he doesn't know about Ellen knowing about his knowledge that Ellen is a magical being.
* El Goonish Shive that shrinking/enlargement is harmless (even if you enlarge, eat food, then shrink due to the effect wearing out rather than a second hit).
* El Goonish Shive that this is one of the motivations behind Diane's behavior toward Nanase - she just did a really bad job of going about it.
* El Goonish Shive that this outfit is essentially the modern-day equivalent of a wizard's cloak.
* El Goonish Shive, the Abberation known as Gullet has eyes in his torso.
* El Goonish Shive, the aberration known as Gullet is utterly baffled that Raven could defend against his fire magic, providing some comedic irony as Raven is expecting him to throw out much more.
* El Goonish Shive. The agent says (a little exasperated) that they're not under arrest or even in trouble, he just wants to figure out what happened. Ellen clarifies that she wants to call her super-powerful girlfriend to let her know she's okay, to keep her from tearing the state in half looking for her. The agent quickly agrees.
* El Goonish Shive the author claims in the commentary that he isn't entirely sure whether the spectral flames surrounding Elliot are merely an artistic convention, or something that is actually happening.
* El Goonish Shive, the author Dan Shive has mentioned in commentaries instances where fans have have messaged him accurate predictions regarding certain plot points. Also in commentaries, he likes to tell readers to "give yourself a cookie," if you correctly predicted a plot point. A commonly-predicted reveal might get a line like, "And so it was that cookies rained from the heavens."
* El Goonish Shive; The author decided to concede and call his not-exactly-a-vampire thing a "vampire" because he knew the readers would accuse him of trying to

pawn a vampire off as something else. A character in the story was telling her friends about a monster conceded to her listener's suggestion that it is a vampire because no matter what she says that is what they are going to hear.
* El Goonish Shive the author had intended for a minor character (the principal of a school specifically) to have a massive scar and eyepatch. Due to this law he chose not to since he had no intention of spending the time necessary to make them relevant.
* El Goonish Shive, the Bringing Silly Back arc seems to be his for secondary character Noah. Also, Justin gets a lot more attention in this arc than previous ones.
* El Goonish Shive, the build-up of one particular relationship mess. The fans had diagrams. To quote a recap:
* El Goonish Shive, the Demonic Duck (being a professional distraction) is also a self-proclaimed master of illusion.
* El Goonish Shive, the Dewitchery Diamond awakened Elliot's magical potential and created Ellen whose potential was awakened from the start.
* El Goonish Shive: the facility is a trap for thieves filled with useless or very niche magical artifacts. Getting in is easy. Getting out with any magical artifacts is another matter. Ellen got out with no trouble, and Elliot and Tedd with only moderate trouble, simply because they did not attempt to take any magical artifacts with them.
* El Goonish Shive, the fire-summon mooks have a weakness to water, despite not actually being on fire. Trying to make flaming creatures with a summon spell that can't allow it (the creatures would incinerate themselves) causes the effect.
* El Goonish Shive (the government may be covering up the existence of magic and aliens, but faking a moon landing is just silly). However, the comic has made a few jokes about it.
* El Goonish Shive, the host Sirleck possesses for most of the comic was a very elderly man who is implied to have been quite corrupt even before he became an abberation's host.
* El Goonish Shive the human form of attraction and others with a combination of both.
* El Goonish Shive the idea of asking Diane out specifically because he finds dating someone so similar to Susan to be creepy.
* El Goonish Shive: The ki-based fighting style that Greg teaches Nanase, Elliot and Justin is called Anime-style Martial Arts and it is said to be inspired by several anime series.
* El Goonish Shive. The main cast know it must have been an immortal due to the circumstances, but only the reader and maybe a couple of other characters know it was Pandora.
* El Goonish Shive the most powerful character in the comic at the time. Fortunately, she's usually a pacifist who prefers not to fight unless she has to, and many fights either find a way to take her out of it or put her in a situation where she can't fight at full power.
* El Goonish Shive, "The Nest" is the facility Grace and her brothers were born. After Damien's attack, the above ground floors were destroyed leaving the basement levels abandoned but intact.
* El Goonish Shive then wakes up disappointed that it was a dream but still hopeful the experience would be close.
* El Goonish Shive. The other characters have had their own opportunities to take him out when the situation called for it.
* El Goonish Shive, the process of becoming an aberration, and thus a being that feeds off of humans in an attempt to cheat death, is explicitly said to destroy any capacity for empathy.
* El Goonish Shive, the readers get enraged by the extremely low quality and throw fruits and vegetables at him. Ironically, this ends up providing him with the nutrition to recover but also some ends up going up his nose resulting in going on sick leave for 6 months.
* El Goonish Shive the reasons behind Nanase's actions in the previous strips. In

the last panel, Elliot lampshades the posing and eating while talking.
* El Goonish Shive the reasons not to go through the isolated dark alley while unarmed but still decides to do it.
* El Goonish Shive there is a branch of the FBI dedicated to dealing with supernatural threats. However, many dangerous situations occur when communication is difficult for one reason or another, so they often fail to show up until after the main cast has resolved things.
* El Goonish Shive. There's also Catalina added as a Sixth Ranger. She's a buddy of Susan's from the feminist club whose main purpose was to have an unrequited love for Susan.
* El Goonish Shive. These days, it's hard to imagine Sarah giving more than an annoyed glare to Tedd's suggestion to strip, and it's hard to imagine Elliot going along with it.
* El Goonish Shive these rules (within certain limits), and does so whenever magic becomes too widespread or too well understood (Magic wants to be used and understood, but only by a select few).
* El Goonish Shive, the teenage main cast has gone from landline phone extensions in bedrooms to flip phones to smartphones.
* El Goonish Shive the utility of this trope the hard way in drawing a bird cage intended as a prison for a tiny person.
* El Goonish Shive, the Wii and its balance board make appearances but never by name.
* El Goonish Shive they shift from the latter to suppressing the knowledge of the accessibility of magic from the public.
* El Goonish Shive. They were childhood friends, but when they were old enough to finally date, Justin realized he felt no physical attraction to her. Melissa is also inadvertently responsible for outing him in the more traditional sense since afterwards she was devastated by his realization and needed someone to talk to about it and settled for her sister, the town's biggest gossip.
* El Goonish Shive, this happens quite a lot when someone's stepped out of their normal gender. Somewhat unusually, it often gets milked for some drama in the process.
* El Goonish Shive this has happened... in another universe. By an alternate counterpart of Tedd.
* El Goonish Shive, this is apparently Nanase's mother's view of Nanase's relationship with Ellen.
* El Goonish Shive This is brought up when Justin's friend Grace is applying for a job there. The owner points out she's guaranteed the job if she wants it, states he's not going to interview her, and asks if - as a friend Justin recommended for the job - she wants it. (She takes the point and the job.)
* El Goonish Shive, this is the author's stated reason for just why transforming is ridiculously, absurdly safe.
* El Goonish Shive. This method was chosen, as Immortals are forbidden from acting directly.
* El Goonish Shive. This particular instance is also a bit less effective than most cases of dream communication considering that it is no more likely to be remembered than any ordinary dream. After three attempts, Grace only remembers bits and pieces.
* El Goonish Shive. This was dropped during all subsequent transformations.
* El Goonish Shive. This was eventually resolved with everyone finding alternative partners except Susan who decided she wasn't ready for a relationship anyway.
* El Goonish Shive though her creation was entirely unintentional and they live as brother and sister.
* El Goonish Shive, though it has spent the past few years lurking in the background.
* El Goonish Shive, Tiffany Susan Pompoms ONLY goes by her middle name... she really, REALLY doesn't like her first name, mostly because it's a bit too "happy" for her image.
* El Goonish Shive tips Susan off that his intentions are not what they seem to be

on the surface. He never asked whether or not she'd been online with that messenger service that night before apologizing for "missing" her online...and the messenger service has an "invisible" mode.
* El Goonish Shive to Elliot only to realize that the camera they had set up to film a movie review was still recording and she hadn't intended to include that part in the review.
* El Goonish Shive to fill panel space in lieu of showing discussion of a topic Dan is uncomfortable about.
* El Goonish Shive to get around a crowd of people and return a dropped cell phone to its owner.
* El Goonish Shive to have been an attack by an interdimensional rival instead.
* El Goonish Shive to indicate his anger at his opponent's insult at the beginning of the match.
* El Goonish Shive to keep their connections to their previous life intact before.
* El Goonish Shive to most the guests at the party Nanase and Ellen go to.
* El Goonish Shive to no longer be his own, edging him out of this trope, but he's still the smartest member of the cast.
* El Goonish Shive, Tony picks on Tedd a lot because of how girly he looks.
* El Goonish Shive" to put up force fields sealing off all the doors and some of the hallways when his school is under a magical threat. Not that it stops Abraham, however.
* El Goonish Shive to Sensei Greg telling him to always listen to random intuition.
* El Goonish Shive to the point that she decides to try obtaining alcohol despite being underage in order to forget her epiphany.
* El Goonish Shive, to the point where Tedd can fool Will and Gill without even meaning it — they call him an impostor when they see him without his glasses.
* El Goonish Shive to treat whatever it does to them as something more than fan service at best and petty annoyance at worst.
* El Goonish Shive, touching the Dewitchery Diamond while under a "curse" (broadly defined) results in two almost identical individuals: one without the curse and one under the curse's effects as if it's a part of their default form. "Curse" in this case includes any spell that changes one's appearance, abilities or behavior.
* El Goonish Shive to warn Susan about Tom's less than honest nature despite the fact that, to the best of her knowledge, this would hurt her chances with Elliot (she believed that Elliot and Susan were likely to get together).
* El Goonish Shive: transformations and gender-bending are constants throughout and drive the majority of the plots. Once the characters start hooking up, well...
* El Goonish Shive try to do with Tedd making an effort "not to treat her as eye candy". As the series progresses when they're seen cuddling together in bed and physical developments in their relationship are implied more than once. Whether they've gone all the way is unknown, but even Tedd's dad gave up on trying to keep things as stated in the trope.
* El Goonish Shive turned it into an attempt by Lord Tedd to kill this universe's Tedd.
* El Goonish Shive uncharacteristic to those who didn't know her very well; Sarah, who was more familiar with her, said it was just Susan being Susan, it's just that she usually keeps a tighter leash on herself in public.
* El Goonish Shive until the exact time of her birth (ten to midnight), Diane says she's going on the computer. Rhea replies "Stay out of the folder named 'Gender Studies' until eleven fifty!"
* El Goonish Shive, Uryuoms have the ability to learn (or teach) any language by rubbing their antennae on a person's forehead (or presumably anywhere close to their brain) for about three seconds. They can only do this kind of thing with languages though.
* El Goonish Shive used to beat up Grace and her "brothers" to inspire fear in them when they were under him.
* El Goonish Shive very rarely uses contractions and just comes across as awkward in the flow of his speech.
* El Goonish Shive wanting to break up before realizing the hypocrisy.

* El Goonish Shive want to hurt people by using her full powers against them.
* El Goonish Shive was broken into 8 parts, coming together to tell the story of a board game - "Open the Box", "Read the Rules", "Set up the Pieces", "Play the Game", "Knock the Board Over", "Scattered Pieces", "Fist Fight", "Clean Up".
* El Goonish Shive was created, magically, as a 17-year-old due to being a clone of Elliot. She inherited all of Elliot's skills and life experience as a teenage boy but not those of a teenage girl. Fortunately, she acquired that skill set and life experience a few months later.
* El Goonish Shive was the snitch who gave out the Project Lycanthrope to Mr. Verres after he grew attached to Grace.
* El Goonish Shive wears a lampshade after some not-remembered hijinks.
* El Goonish Shive. We see the phone ringing in the back of the car. As soon as it stops, the door opens, Elliot reaches in, and grabs a water bottle. As soon as he closes the door again, the phone resumes ringing.
* El Goonish Shive. What she says and does is more creepy that way. Also played straight later as she takes the form of Fox, Nanase's summon, to wake her up and get Nanase to listen to her so Nanase will do what Chaos asks with out freaking out too much. Nanase eventually catches on that she's not Fox but by that time she doesn't care and is willing to do what Chaos asked anyway.
* El Goonish Shive when Ellen uses her copy spell on Nanase while the latter is in her guardian form.
* El Goonish Shive, when Elliot accidentally creates a female version of himself, dubbed Ellen. Ellen realizes that the effect that led to her creation was only intended to last a month, and decides to become Elliot's greatest rival and villain. Shortly after this completely fails, she learns that she won't die after a month, and is offered a life as Elliot's twin sister, which she gladly accepts. She's been a part of the main cast ever since.
* El Goonish Shive, when Grace and Ellen start attending Moperville South High School, Nanase, who's a bit edgy about all the secrets she has to keep, starts insisting they're supposed to be meeting for the first time, something no-one had suggested up til then.
* El Goonish Shive when he is informed what he was actually reading was the author's sketchbook.
* El Goonish Shive when she deduces George's extra grumpy mood is caused by him seeing that Justin has managed to find another gay guy to hook up with and therefore that George is gay and is attracted to Justin.
* El Goonish Shive when she tells Nanase of her intention to break up with Elliot.
* El Goonish Shive when the jinn lists countless races to choose from to play as.
* El Goonish Shive, where he's carrying an unconscious Elliot while talking to Melissa, where it's obvious that a mysterious person is Noah:
* El Goonish Shive where he wears one two days in a row explaining he has a closet full of them.
* El Goonish Shive where one of Ellen's multiversal counterparts lives.
* El Goonish Shive" which is "Rated 'R' for Language, Violence and Frequent and Gratuitous Loincloth Removal."
* El Goonish Shive which makes her see him in a new light and they eventually become good friends.
* El Goonish Shive, which was then retconned to be full-on magic only possible due to the intervention of immortal beings in the area. "Take THAT Science Fiction!".
* El Goonish Shive. While building a deck for the card tournament at the comic shop, Tedd mentally declares one of the cards to be "not efficient, but pretty damn cool".
* El Goonish Shive. While magic is an accepted and integral part of that universe, Tedd's transformation technology (which was given to him by aliens) as well as Grace's own transformation abilities are said to be more scientific in nature (although they do rely on an alternate form of magic energy to function, to the point where they give a false positive to any magic sensing devices). The way it works is so complicated that it took an arc to explain.
* El Goonish Shive while possessing Elliot despite being from a different universe

and Elliot having entirely different magic of his own.
* El Goonish Shive who can fly and talk but can't manipulate anything unless it's an effect of one of the spells stored in him and he is used to cast it.
* El Goonish Shive, whoever touches the Dewitchery Diamond while under a "curse" (for a very loose definition of a curse) will be split into their normal state and a duplicate who not only is the embodiment of the "curse" as applied to the original person but who can spread it to others no matter what the nature of the curse is. Fortunately, if the "curse" is easily reversed, the people the duplicate transforms can have the transformation reversed just as easily.
* El Goonish Shive who for all intents and purposes came out of thin air. Played straight with the principal of Moperville North High School, who even the kids note should have been fired for incompetence long ago.
* El Goonish Shive who have a lot of trouble voicing what they're actually feeling.
* El Goonish Shive wholesale out of certain areas, it's no wonder even a little kid on Earth can help them with their technical problems.
* El Goonish Shive, who seems to have lost all faith in men as a result of the affair.
* El Goonish Shive with 2 guys liking her: one really nice and the other a cool jerk but both hot.
* El Goonish Shive, with added coolness from making her duplicate (or original?) throw her at the window. The coolness factor is negated when the window lacks any glass. And is a story up. THUMP.
* El Goonish Shive with an angry jab at her introversion and thoughtlessly asks whether she's ever dated, Charlotte shows her hurt feelings so visibly, if silently, that Diane realizes she's gone too far.
* El Goonish Shive with her imaginary inner child. She states her intention of ending the argument by no longer imagining it. Her inner child demonstrates how pointless this is by telling her not to imagine an elephant.
* El Goonish Shive with him, which made Tedd incredibly uncomfortable. Larry did not stop even when Tedd was being obvious about his discomfort.
* El Goonish Shive within a dream to help her to remember upon waking a message she receives within the dream.
* El Goonish Shive with the claims that Grace would be Neutral Good, Ellen would be Chaotic Good, and Elliot would be Lawful Good.
* El Goonish Shive, yet Sarah's personality is one that is eager to help Justin as he adjusts to being temporarily in a female body for Grace's birthday party.
* El Goonish Shive. You know who the hell this is. Sorry for thinking 'hell'."
* El Gran Armando used a whip he carried in his teeth as his signature weapon in WWC.
* El gran juego de la oca ate through the layers of Styrofoam and reached him. (The "acid" was more than likely a harmless substance such as nail polish remover — acetone readily melts Styrofoam.)
* El gran juego de la oca involved either setting something on fire or putting a fire out.
* El Greco was not appreciated in his lifetime (the 16th century) because his art didn't conform to the norm of realism. Only in the 20th century has his work been reappreciated for exactly this reason. Nowadays it's worth far more.
* El Greco was seen as an incompetent painter during his lifetime. Only in the 20th century did the modern art movement embrace his work as a visionary and personal style.
* El Hazard isn't even in the broadcasting club, but she accompanies them in order to humiliate her older brother Katsuhiko on live TV with (truthful) accusations of rigging the student council election.
* El-Hazard: The Magnificent World actually (unknowingly) quotes Stephen Stills' "Love The One You're With", although in her case it's arguably as much a case of gleeful acceptance of her lustful urges as it is an emotional condition.
* El-Hazard: The Magnificent World and communicate with it, allowing him to control everything from simple gadgets to the most devastating weapons in that world.
* El-Hazard: The Magnificent World and scrambles for both a cigarette and a nip

from his handy flask:
* El-Hazard: The Magnificent World, and they are effectively co-rulers from that point on, though Jinnai is by far the more active of the two.
* El-Hazard: The Magnificent World, an intelligent nonhuman species whom account for a dominant civilization.
* El-Hazard: The Magnificent World - even better/worse, it's a gender-swapped identical stranger.
* El-Hazard: The Magnificent World gets to stop dressing up as Princess Fatora once the real princess returns.
* El-Hazard: The Magnificent World, given the number of times that Makoto has coincidentally gotten in his way and/or pissed him off.
* El-Hazard: The Magnificent World had everyone living under the Eye of God, an ancient super weapon in atmosphere level orbit that's creation was lost to legend and its operations steeped in mysticism and tradition, the damn thing had to be unlocked by three priestesses and operated by two princess.
* El-Hazard: The Magnificent World has Ifurita, an ancient clockwork powered woman and super weapon combi.
* El-Hazard: The Magnificent World. He is even sad that he can have his fantastic strength only if he doesn't drink.
* El-Hazard: The Magnificent World in the series that mankind would have been better off not creating. Although the El- prefix is actually Spanish, as in El Cid, the noted Spanish general.
* El-Hazard: The Magnificent World, Jinnai does this deliberately during a meeting between Queen Diva and Princess Rune Venus. Having acquired the same immigrant superpower as her brother, Nanami eventually starts doing it too.
* El-Hazard: The Magnificent World: Londs and Princess Rune invoke this, by deciding to use Makoto's likeness to Princess Fatora to their advantage by having him impersonate her, during the time of her abduction. When he refuses, they imprison him and Fujisawa in the castle tower until he finally agrees to do it.
* El-Hazard: The Magnificent World, Makoto collects the interest of nearly every girl in the series.
* El-Hazard: The Magnificent World: Makoto finds that science doesn't work quite the same on El Hazard as it did on Earth.
* El-Hazard: The Magnificent World, Masumichi Fujisawa, where he comes to her rescue at Arlamann. But when he hammertosses the mech-sized Buggorm in episode 7, Miz was sold.
* El-Hazard: The Magnificent World mostly resembled giant neon cockroaches, with the exception of their queen, who resembled a normal attractive human female with antennae.
* El-Hazard: The Magnificent World: Mr. Fujisawa is an avid mountain climber. During the final "Magnificent World' story arc, He tries to climb a maountain in the middle of a desert and falls in, finding a garden oasis inside instead.
* El-Hazard: The Magnificent World: Played straight by Jinnai with a feather duster on Ifurita.
* El-Hazard: The Magnificent World posing as the missing Princess Fatora, and Yakumo crossdressed for his night job.
* El-Hazard: The Magnificent World. Priestess Miz Mishtal blows one of these to her beloved Fujisawa.
* El-Hazard: The Magnificent World series, she has her very own library!
* El-Hazard: The Magnificent World set in a land rife with magic and supernatural wonder. Yet, there are remnants of ancient technology as well, such as the Stairway to the Sky, the Eye of God, and the demon dolls.
* El-Hazard: The Magnificent World she has little choice until Makoto frees her.
* El-Hazard: The Magnificent World: Subverted that while Jinnai sabotages a sign to get the heroes going onto a dangerous path, Mr. Fujisawa knows all along they are taking the tough path, but takes it anyway because he relishes the challenge.
* El-Hazard: The Magnificent World, that he can literally pass for her fraternal twin. The resemblance was strong enough to cause Fatora's lesbian lover, Alliel, to mistake him for her at first sight and become sexually aroused. In a later episode,

Alliel openly admits that Makoto is the only male who can turn her on, simply because he looks like Fatora.
* El-Hazard: The Magnificent World that he's one of the more popular characters outside of the show.
* El-Hazard: The Magnificent World: The entire Bugrum Empire is absolutely crawling with car-sized beetle-like creatures.
* El-Hazard: The Magnificent World, the Kingdom of Roshstaria's Eye of God superweapon requires its two sovereigns to activate: first and second princesses Rune and Fatora Venus. The absence of the later drives much of the plot following the main character's arrival in El Hazard.
* El-Hazard: The Magnificent World uncovers the location of the Forbidden Isle, which was known to only the three priestesses of Mt. Moldune. Solution: get them to show him where it was.
* El-Hazard: The Magnificent World until she blurts out something that tips them off.
* El-Hazard: The Magnificent World used to showcase the ancient destructive power of the demoness Ifurita.
* El-Hazard: The Magnificent World who sexually harass the others girls for fanservice.
* El-Hazard, which she goes about efficiently and brutally. Fortunately this is an unimportant city, and throughout the continuity said villain never faces any consequences for ordering this destruction. The main cast even confronts him in the sequel OVA and nobody even brings up the subject. This also holds true for the living weapon herself, although she technically had no choice in the matter.
* El hijo de El Ahuizote. During Porfirio Díaz's administration, in the middle of a harsh dictatorship, their presses were constantly confiscated, some of its journalists were even murdered, and both were promoted to national heroes for being among the instigators of the Mexican Revolution.
* El Hijo Del Santo, who had previously hung up his boots after getting discouraging results from his doctor's physical, returned to competing in the ring for his Todo X el Todo promotion in 2015. The next year the reason why became obvious. He was preparing to guide the career of his son, El Santo Jr, who debuted as his
* "El hombre muerto" by Horacio Quiroga plays this trope as straight as possible: the entire story is nothing but one man dying of a machete wound.
* Elia, named after Oberyn's deceased sister, is a skilled jouster and favors a lance as her primary weapon.
* Elianto" before literally splitting in three pieces for the tension.
* Elias Bouchard. He peers into people's minds to find what would disturb and hurt them the most, then tortures them by speaking of it as cruelly as possible before directly planting feelings and images in their heads. His victims are often to the point of breaking before he ever plants anything in their mind.
* Elias for choking, but it's doubtful given that most of Melbourne doesn't particularly care about Rugby. Moral of the story: Research the local sporting culture before you try this (or, if you asked local-born Buddy Murphy for advice, make sure he wasn't ribbing you!)
* Elias Howe once dreamed that cannibals were preparing to cook him. When he watched their spears, he noticed that each head had a small hole through the shaft. This inspired him to the technique he would eventually use to invent the sewing machine.
* Elias Tyrell is an incredibly gifted fighter and he makes sure that everyone knows about it. He at least tries to appear like a true knight and usually manages to fool others to fall for this trick, but upon closer examination, his arrogance and lack of discipline become obvious.
* Elias Tyrell is one of the most famed knights in the Reach. At a rather young age, he is incredibly gifted in combat and openly embodies the virtues of a knight,
* Eli Ayase from μ's is part Russian from her grandmother. Her catchphrase is "Harasho!", meaning "good" in Russian, and her character symbol is the Cyrillic character "ya".

* Eli (before becoming Hawk) outright states to Johnny that he could be on the autism spectrum. While it's never fully confirmed, he does show traits of the disorder, such as intense interests (he embraces the Cobra Kai creed the most, at least prior to his defection), poor emotional control (for example, attempting to beat up Demetri over a Yelp review), and insecurity (he'll be
* Elicia and Donato, a pair of young siblings, go by the more casual diminutives Elly and Don.
* , Elicia asks Roy how babies get in mother's stomachs after she sees a pregnant Riza. Roy tells her that it involves a special alchemy that all dads know.
* Elidibus also mocks the naivety of expecting him to just detail his plans, just because Alphinaud confronted him. His biggest advantage is that the heroes legitimately have no idea what his next move is, why would he give that up?
* Elidibus claiming the people of The First must rise up and become Warriors of Light, because the player character and their companions won't be in that world forever. They all came from a different world, and have to return to their own world. Every word of that is true. In fact, every day spent in The First jeopardizes your companions' safety, as they've been separated from their bodies long enough their souls are wearing through at the seams. And seeing as it's a whole separate WORLD,if it needs saving you probably won't hear about it in time. The First really DOES need a crop of heroes.
* Eliding entire verb clauses ("With no ticket, you can't get your laundry" becomes "No tickee, no laundry.");
* Elie Wiesel waited ten years before writing about his experiences during the holocaust, as he felt he was was too close to it emotionally 'to see clearly'. The first manuscript for what would become
* Eliezer Yudkowsky sometimes utilizes this trope in his short stories.
* Eliezer Yudkowsky, which contains very little philosophical speculation.
* Eligos, a blue emaciated humanoid who flickers like a malfunctioning TV.
* Elihu spends a few chapters ranting at the eponymous character of the
* Elijah And Azuu has Legion, which repairs damage done to their possessed host simply by tying wounds closed with the host's own veins and sinew.
* Elijah And Azuu has two of these: Izza will occasionally ask "Why" repeatedly in response to various questions or requests (whether or not it makes sense), though she seems to use the response simply on autopilot and doesn't particularly care if the conversation is abruptly cut off. Fish, on the other hand, is very curious about the world, but since he kind of struggles with short-term memory, he tends to repeat himself.
* Elijah and Ulysses also want to wipe out the three main factions competing in the Mojave. And they fully have the means to do it.
* Elijah Baley constantly tries to "solve" his cases by fixating on a new piece of evidence, until something happens that makes him revise his understanding of the evidence he already has.
* Elijah Baley. In the second and third books, his abilities gained him respect even among the spacers (who do not like the Earth people much in the first place), and by the time of Robots and Imperium, he was so famous that even they named one of the new colonized planets after him.
* Elijah challenges the priests of Baal to one in 1 Kings. Both call upon their god to light an altar as proof. He mocks them when Baal fails to answer. Yahweh lights the altar, of course, even after Elijah stacked the deck against himself by soaking his altar with water, and the Israelites praise him, then slaughter the priests after this.
* Elijah is killed, his body is moved into a house he hadn't been invited into, and comes back to life. In apparent pain he mutters "I can't be here" and runs outside.
* Elijah Mikaelson, over 1000 years old, has only ever fallen in love with three women, Tatia, Celeste
* Elijah of Buxton: Emma Collins' doll is made from a sock that had rope tied around the neck to form a head. It also has two big brown buttons for eyes, and six little buttons for teeth. Elijah thinks it's scary.
* Elijah once encountered a widow and her son during a famine who were down to

their last meal, but after they prepared a cake for him from what little they had, he promised them that their flour and oil would not run out until the drought and famine were over, and God fulfilled that promise so that even though they didn't get any more flour and oil, what little they had never ran out.
* Elijah's brother, Klaus, has his turn in the season four finale. He arrives at graduation in a suit and literally his first action is to decapitate a witch by throwing a graduation cap.
* Elijah Valentine could, theoretically, save the starving by magical means, but the world is made of connections - change one thing, you break another. So he mostly avoids using his powers, citing responsibility, and helps people in mundane ways.
* Elijah wants all the technology in the Sierra Madre Vault to rebuild and rule the wasteland. (You have the option of granting his wish - by
* Elijah was another example, within the Mojave Brotherhood of Steel. He was by all accounts, an exemplary scribe and brilliant engineer who could deconstruct and understand the implications of technology far better than any other scribe, and he could jury rig some really innovative powerful weapons. Problem was that he was horrible at inspirational leadership and sucked at organization and tactics too. This resulted in the Brotherhood suffering a humiliating defeat and rout at the hands of the NCR at Helios One with the survivors never knowing why he wanted them to fight for that place. His poor track record also bites him at the Sierra Madre casino, where in spite of having bomb collars installed on them to ensure compliance, the
* Elijah Wood Apparently what makes it so "unbelievably creepy" is the quality of the artwork.
* Elijah Wood, for crying out loud), so it's not like typecasting was ever a problem for him.
* Elijah Wood (Sam), Sean Astin completely takes over the conversation several times to rattle on about how great the story and production values are to the point that you can hear Wood and Serkis shifting uncomfortably in the background. This is easily the weakest of the assorted commentaries. While the others are a mix of good humour and fascinating information, Wood, Serkis and Astin spend most of their time praising each others performances.
* Elijah Wood's character's comment remarking on the Nintendo Zapper being "like a babies toy" for using his hands). The prediction rang false however, as while such technology does exist (Xbox Kinect), it has a slim following among the industry at large at best and is ridiculed at worst, resulting in people still using their hands.
* Elijah Wood young due to possessing the One Ring, he's considerably more mature and educated than the other hobbits.
* Eli Manning won his way to his second Super Bowl appearance in the 2011-12 playoffs. In the NFC Championship game between Eli's New York Giants and the San Francisco 49ers, he took a big hit on almost every play and even took 6 sacks during the game, and each time he got up and kept playing like nothing had happened. Despite throwing the ball over 50 times in rainy and windy conditions, he did not throw a single interception.
* Elimidate claimed that she'd win the man because she has "the Big Dogs".
* Eliminate Dangerous Doctors with the unlucky only good doctor protagonist thrown into the situation).
* Eliminate Down - both you and it are falling through the Earth's atmosphere, and if it's not beaten within 100 seconds, you burn up and lose a life.
* eliminate higher-ranked ones, they can move up in the ranks. Most of the top ranks are Devil Fruit users.
* Eliminate Pro used a shorter version of Amon Tobin's "Mighty Micro People" as the game's main menu music.
* Eliminating contestants for undercooking meat on a reality show about cooking, however, is understandable and justified. Ever get so sick from food poisoning that you puked interesting colors? More often than not, it was because the cook wasn't carefully watching the meat he was supposed to be dutifully cooking, so of course

Ramsay is going to come down hard on contestants for undercooked meat. Potentially poisoning your customers is a much bigger problem than serving them food that simply tastes bad.
* Eliminating the baggage:. In both cases, to avoid the responsibility of parenthood, and in the mistress's case, to keep the affair from being discovered.
* Elimination-based children's games like Musical Chairs play out this trope in miniature.
* Elimination Catchphrase: A phrase that is said whenever a person on a reality show is eliminated.
* Elimination Chamber 2010, when Undertaker made his way down to the ring, an accident occurred during his entrance when his pyrotechnics were mistimed, resulting in him being momentarily engulfed in flames. He was cleared by a ringside doctor to wrestle, however, and was able to compete in the match.
* Elimination Chamber: The PPV debuted in 2010. Took a hiatus in 2016 until the next year.
* Elimination Chamber, with the other two men start outside the Plexiglas like a regular match. Every two or three minutes, another is released. It is, as the name indicated, an elimination match: five competitors must be defeated for there to be a victor. Tends to get bloody, as the chamber has much less give than most types of cage.
* Elimination Houdini Chloe & Kelly. To a lesser extent, Greek twins Helena & Vikki were more favoured to win the second semi-finals than the proud mums Bree & Jessica.
* Elimination Houdini: "Kami & Karli are safe again, is this the 6th time?"
* Elimination Houdini Lauren Gottleib. This was only the last of Lauren's antics with the season. Early favorite Jessi was eliminated to raucous response after not being able to dance the previous night over Lauren,who the judges even called out on actually dancing for only half the time she was given to dance for her life.
* Elimination tags were popular in the WWF for them to build a Pay Per View event around them called
* Elimination variable added to such a match means that every wrestler except one (or every member of every team except one) must be pinned, forced to submit, counted out, or disqualified for there to be a victor. For example, in a four-man man match, there must be three eliminations for there to be a victor—and not all of them need be by the same wrestler. Three-man elimination matches were an ECW staple, with such a contest called a "Three-Way Dance".
* Eliminator mode in the various games is almost universally imbalanced, requiring mostly luck to get the right weapons and not so much player skill. The weapons were balanced for regular racing, so many didn't even do damage or very little, and some were grossly overpowered in a game mode where you didn't have to bother with speed.
* Eliminators has SPOT ("Search, Patrol and Operational Tactician"), a little R2-D2-ish robot that can turn into a ball of energy and fly around and scout the area.
* Eliminators, Mandroid is a laser-toting, war robot (well...near full-body cyborg) mounted on tank treads, who has a gadget for all occasions .
* Elincia's inner circle comprised of her personal retainers and native Crimean Royal Knights.
* Elinor also provides another example, when her calm demeanor finally breaks after Marianne observes that she (Elinor)
* Elinor is shown in the opening meal scene receiving letters of many sorts, thus implying she is the one handling matters of state. Elinor seems to be tougher than even Fergus, as she completely keeps him in line (even when he tries to express male dominance), and can stop a massive brawl of tons of badass warriors simply by her intimidating presence alone. That's
* Elinor — the sense — and Marianne — the sensibility, an archaic word for romanticism, in
* Elinor Powell and Frederick Albert quickly fell for each other when they met at a prisoner of war camp during
* Elinor's father tweets in his sleep in "Bird Song" after falling asleep at the table during breakfast because he was woken up early by a bird singing outside the

window.
* Elinor Wonders Why: A general focus on exploring nature, the outdoors and community.
* Elinor Wonders Why, Ari's father tells him that he could have used padding when he was younger to keep him from falling down. He poo-poos the idea, saying that he never falls down, then immediately trips over a stick.
* Elinor Wonders Why, Bibi calls Elinor's father her favorite son upon his, Ranger Rabbit and Elinor's arrival. He points out he's her only son.
* Elinor Wonders Why has segments where Senor Tapir sings about a famous scientist.
* Elinor Wonders Why: In the episode "Olive's Library", this is averted. The characters actually sing "Happy Birthday" to Olive because it was her birthday. Interestingly, though, they only sing one line of the song since the episode starts where they sing it.
* Elinor Wonders Why, "Ms. Mole's Glasses" ends with everyone laughing over Ms. Mole's comment about not needing use her senses to know that Ari is always hungry.
* Elinor Wonders Why pretty much gives it away. Elinor is very curious about the world around her and wants to learn as much about it as possible.
* Elinor Wonders Why short "That's So Interesting - How Do Cheetahs Run So Fast" Ari declares "We need more observations!" saying that it's what Elinor would say.
* Elin will end up being a huge inspiration for her grand-niece Saga. She's also there to help and support Nina, another grand-niece. And she's tough enough to still live at her homestead until she's 100 years old.
* Elio e le Storie Tese, among other stuff). He's also an avid baseball player, which in the soccer-obsessed Italy is quite a feat in itself. Meanwhile, his fellow band member Mangoni is an architect who also enjoyed a brief political career.
* Elio e le Storie Tese, died of a brain hemorrhage while performing on stage in December 1998.
* Elio e le Storie Tese had the song "Al mercato di Bonn" removed from their 2003 album "Cicciput", because it was about the discovery that Beethoven wrote the melody for "Happy Birthday to You", and thus contained a sample of the song, lyrics and all. Luckily for the fans, they managed to "accidentally" broadcast the song during a popular radio show.
* Elio e le Storie Tese is titled "Elio samaga hukapan kariyana turu", which means "Let's all merrily fart and cum with Elio" in Tamil. The title of their later album "Italyan, rum casusu čikti" was taken from the headlines of a newspaper from Cyprus and means "It turned out that the 'Italian' was a Greek spy".
* Elio e le Storie Tese was entirely based on this kind of humour. First of all, the jokes were more than deadpan, since they were told by a vocal synthesizer. Then, among the "normal" jokes, it featured gems such as: "An Englishman, a Frenchman and a German are on a plane. The plane crashes and they die".
* Eliot Chang is a stand-up comedian who was once heckled by a drunk bride-to-be. He assured the audience that he had the situation under control since he began his career in Harlem, NY and knew that he wasn't in trouble unless he heard someone say, "Fuck you!
* Eliot doesn't like guns, but explains it's only because they're too
* Eliot does this on a plane to subdue a security employee who is tailing an accountant that has a hit on her.
* Eliot drugs the drinks of his inner circle to find out who's responsible for turning half of the castle's inhabitants into rats.
* Eliot is on a date (as part of a con) with Nate's ex-wife Maggie, and the rest of the team is watching via video surveillance. Sophie even has popcorn. Maggie makes a series of disparaging comments about Nate, then reveals that she knew he was watching all along.
* Eliot Kid: Eliot and his friends are this in most episodes, fighting off threats that only exist in their imagination.
* Eliot Ness: He and his men were not called "the Untouchables" for nothing. He was an US Treasury agent who kept
* Eliott Reed (who is fluent in German) makes an intentional and dirty mistranslation to get revenge on Dr. Cox. Instead of telling his burly German

speaking patient that "You have fluid on your lungs" — he says "Your wife has nice boobs." While making a gesture that
* Eliphas the Inheritor, and working for a different side. Apparently his new patron got the gods to resurrect him for the job.
* Eli Roth dons a clown outfit for his son's birthday, and then learns he can no longer remove it and it is transforming him.
* Eli Roth is more bloody, gorier and more barbarically gruesome, not to mention even more controversial.
* Eli Roth's pool. He was inspired by a Thai "murder vacation" website he came across on the dark web.
* Eli Roth to give them an idea of what they were being asked to do. They all loved it, thinking it was a comedy, and instantly signed on to play cannibals. Roth chalked it up to a strong culture of storytelling among the indigenous peoples of the Amazon.
* Eli Roth was remade with the new director utilizing the exact same script.
* Eli Roth while working in Iceland on a horse farm. He got such a bad skin infection from the rotting hay in the barn that his face broke out in sores, bled and peeled off when he shaved.
* Elisabeth and real life, Crown Prince Rudolf writes articles anonymously against his father's rule because Rudolf has no real influence at court. The Japanese productions take it even further, inventing a fictional subplot where Rudolf actually participates in revolutionary activities and gets arrested at a demonstration.
* Elisabeth anyway. In other productions he's more obviously a real character.
* Elisabeth Clara Sladen for just under four decades. After she passed away in 2011, the next companion was named Clara, after her middle name.
* Elisabeth Death by her assassination. Rudolf may be this, too, depending on the production/actors.
* Elisabeth Delmas, a.k.a. Sissi (yes, that is indeed her nickname) from
* Elisabeth. For example, here are some people who have been in all three shows named above: Mark Seibert (Death - Count von Krolock - Colloredo), Thomas Borchert (Death - von Krolock - Leopold Mozart), Gernot Romic (Rudolf - Alfred/White Vampire - Wolfgang Mozart), et cetera.
* Elisabeth: Franz Joseph called his mother Sophie out - a little too late - for meddling in his marriage in the name of the throne.
* Elisabeth, has only been performed in Japan and there's no word of it ever coming to Europe.
* Elisabeth have Lucheni adlib at the start of act 2, before "Kitsch".
* Elisabeth He also usually does it in order to get Rudolf to bend back so he can be kissed as well.
* Elisabeth. He has a handful of silent accompanying angels to carry away those he reaps. He definitely is meant to be creepy/frightening, but nevertheless attractive - physically and/or in the charismatic sense, especially to people like Elisabeth who courts death and Rudolf who commits suicide - and, originally, a bit androgynous.
* Elisabeth in braids that fall to her waist, and pallor because she was royalty.
* Elisabeth indulges in these a lot, mostly of the triumphant gloating variety. Tamaki Ryou utilizes a contemptuous, mocking, utterly fake one at the end of Elisabeth's wedding.
* Elisabeth. In most versions, most characters are unaware of his narration, with the Judge, Death, and Madame Wolf being the only ones directly interacting with Lucheni-as-narrator. The Japanese versions have Lucheni playing various additional roles, such as a servant at Bad Ischl (fanning Sisi), a waiter in a Viennese cafe, a photographer, etc., in addition to leveling him up as one of Death's henchpeople.
* Elisabeth is the most successful German-language musical ever written. It's been performed in Germany, Austria, Hungary, the Netherlands, Sweden, Finland, Belgium, Russia, South Korea, Japan and China, and has multiple English fan translations. In spite of its popularity most English-speakers have never heard of it.
* Elisabeth Moss had as a teenager. Season 7B had her repeat the feat—but

this time, it involved her in roller skates with no helmet!
* Elisabeth of Austria(-Hungary) got her way alright, traveling the world and doing whatever she damn well wanted, unburdened by the rigmaroles of court and a loving (the feeling quickly became non-mutual for her) but ineffectual husband. It, however, came at the cost of/resulted in:
* Elisabeth: References to Heinrich Heine's poems pop up in the libretto, mostly via Death's lines. This isn't surprising, because Lucheni stated in the first song that Elisabeth loved Heinrich Heine (she did, in real life). The original casting call for Death specifically stated that he should be "young, attractive, androgynous" and close to an idealistic representation of a young Heine. The German poet also contemplated death extensively.
* Elisabeth Shue. Her character in the movie quit acting to become a nurse in a sperm bank, and it's implied that she's a nymphomaniac.
* Elisabeth Shue replacing her as Jennifer Parker for the first movie's sequels. Wells reprised her role for Jennifer's appearance in this game, however.
* Elisabeth Sladen during "School Reunion," but he got to be the one to give her the heart-melting "Goodbye, my Sarah Jane," that Sarah Jane waited decades for.
* Elisabeth Sladen" into her ear. That actor's name was Brian Miller, and she married him three years later.
* Elisabeth Sladen. The last episode of the series ends with the words "And the story goes on... forever."
* Elisabeth: Sophie Blümel and Marjan Shaki played Hélène von Wittelsbach in the same production as their real-life husbands, Thomas Hohler and Lukas Perman. Duchess Hélène is aunt to Crown Prince Rudolf - Hohler and Perman's character.
* Elisabeth: The Princess Bride where Emperor Franz Joseph I was able to win over Elisabeth because she considered him to be playful, considerate and charming.
* Elisabeth? There's Mark Seibert and the rest of the new Deaths in the German/Austrian productions. Somewhere in between? Hello, Máté Kamarás. The show is very often marketed as a love story between Elisabeth and Death, and/or a triangle if you add Franz Joseph.
* Elisabeth to the earlier tune of "Mama, where are you?". During "On the Deck of the Sinking World/All Questions Have Been Asked (Reprise)", some Rudolfs try to reach out to Sisi in between his struggle to stay on the sinking ship.
* Elisabeth, Tsukishiro Kanato (2018, Takarazuka)'s Lucheni asks the audience if they've noticed a camera today, says he too has noticed a camera, and then asks the cameraperson to come closer and make sure he looks handsome.
* Elisabeth, who was confused as to why a man would be in the cast of an all-female theatre troupe. Additionally, she was barked at by Kouju Tatsuki's dog, which usually only reacts aggressively towards men.
* Elisabetta Barbados, the (13-year-old) Child Empress as is known, in
* Elisa Hansen is an author and video essayist best known for her Vampire Reviews, many of which discuss feminist and queer issues. She is a biromantic asexual.
* Elisa Lam: Was she killed by malevolent spirits residing in her hotel? Or was it a
* Elisa Lynch abroad specially in Brazil. Nevertheless, she was the subject of several literary works.
* Elisa's characters Dr. Tease and The Makeover Fairy both enjoy torturing people through science and makeovers
* Elise is an interesting case in that, while naturally an upbeat and outgoing person, there are times when it's implied that she's deliberately exaggerating these traits in order to be a soothing presence for her more jaded siblings. The trope is played a little bit straighter in
* Elise is shown to have a very high intelligence, given that she is a secret government agent; however, she also has traits of a
* Elise — if you fail, Elise bites Jack's neck and drains his health, restoring her own.
* Elisha, considering the manner in which he manages to persuade the king to cut down on feasting…

* Elisha has to qualify. After God took his mentor, Elijah, to Heaven (which He later revealed was a way to keep Elijah alive until the End Times, so he could prophesy again), God gave the power He had previously vested in Elijah to Elisha. Elisha proceeded to work many miracles in the Name of the Lord, and the power God bestowed on him was so great that his decaying bones revived a dead man.
* Elisha in 2 Kings 2:23-24, while walking up to Bethel, was insulted by some
* Elissa Knight recorded the lines for Eve just to give the directors something to work with until a more famous voice actress was contracted, but they liked her performance so much that they kept it in.
* Eli Stone a first season divorce case of Taylor's was initiated after both spouses found out they'd been flirting online after meeting in person. Taylor, having personal reasons to look for proof of real love, pointed out that maybe they shouldn't ignore the fact that out of all the people in the world and all the people on the internet they'd managed to find each other and fall in love twice; she refused to do any more work on the case for 72 hours until they had tried to have an honest and civil conversation.
* Eli Stone, Eli kept insisting that Maggie had a new haircut, rather than a shiny new ring.
* Eli Stone: Eli would get visions and try to prevent them from happening - like, his vision said a building was going to get bombed with his boss in it, so he tried to get his boss to leave the building before that happened. Sometimes it worked out in his favor, sometimes not.
* Eli Stone involves a Pakistani woman fighting not to be deported because she married a gay man in order to obtain a green card.
* , Elita's servant, kidnaps the sparkling of Starscream's servant Nightwish in order to force Nightwish to poison Starscream.
* Elite 2: Frontier) averts this and reintroduces the Thargoids (they first appeared in the first game as a random encounter), an actual alien race which inhabits the systems of Polaris, Pleione and Miackce. The player's experiences with the Thargoids are the "first encounters" referred in the subtitle.
* Elite Agents Above the Law: Government agents who operate without the normal oversight structures, answering only to the state's leader, or possibly to no one but themselves.
* Elite Agents Above the Law: Law enforcement officers or intelligence agents who answer to nobody except their government's top leaders (or themselves).
* Elite Agents Above the Law), the Cardinal's Guards (answering to Cardinal Richelieu), and the Cardinal's collection of what would be called NOC agents in modern times, such as Milady deWinter.
* Elite, also both using a Newtonian flight model, have "stellar particles" which can be turned off, which is highly recommended for manual maneuvering.
* Elite and allow players to buy real estate and hire NPC ships and pilots.
* Elite, and by the time the manufacturer had fixed all its issues the result was basically a third design iteration anyway, so it was marketed and sold as a Mk. III.
* Elite and its sequel have this as a purchasable option for your ship. It's fairly worthless for its primary use, because cheap fuel is available at every space station, so the only reason to scoop it would be to jump through a particular system without docking there. It takes forever to fly close to the star and get fueled up, and you can still get attacked by pirates while heading there. However, the scoops also let you pick up goods and prisoners from ships you destroy, which can be much more valuable than fuel.
* Elite are able to destroy pirate ships and to get bounties for this.
* Elite Armies The saying goes that if you pit five Space Marines against five different Eldar Aspect Warriors, four of the Eldar will die while the survivor single-handedly kills the Space Marines, because that what she trained for.
* Elite Army mines, as their own space was scarce in that resource and it showed in the Centauri's superiority in numbers and quality of their jump drives) to bridge the gap, completely integrate it, and then repeat it until the Centauri were finally weak enough to be fully conquered.

* Elite, as a deniable asset. You'll be awarded with money, ranks, titles and military decorations.
* Elite as-necessary to adjust for this rotation for you... though if you're feeling adventurous (or want to show off) you can easily disable this option and touch down on pads the hard way. Or you can just use an autodocking computer which will do everything for you from start to finish.
* Elite, a trip into hyperspace (or witch-space, as the game calls it) puts you at risk from ambush from Thargoids, who have a technology which allows them to lurk there. In some versions of the game you can force a hyperdrive failure by holding full pitch and roll while jumping, but you'd have to be either suicidal or very well armed to attempt it.
* Elite Beat Agents 300s. This has the side effect of missing a note in mid-song much, much more detrimental to your score than missing at the beginning or the end.
* Elite Beat Agents' Agent J uses to get his hair super-curly in front. It just seems to leap out like a tongue.
* Elite Beat Agents" as one of the featured songs, but the song doesn't appear in-game at all. The uneven number of levels (19) and a blank spot on the multiplayer song menu both suggest the song was cut for some reason.
* Elite Beat Agents at them. The sisters seem to consider their stranded status an impromptu vacation (and given Commander Kahn's wearing a Hawaiian shirt when he calls the Agents out, he doesn't take it too seriously either); at level's end, they get off the island by flashing a diamond credit card at a passing jet. The level's song? "Material Girl", by Madonna.
* Elite Beat Agents frequently tend towards this. One mission has a teenage quarterback helping his girlfriend babysit by treating every issue with the kids like it was a football. Another has an impoverished oil tycoon regaining his fortune by employing his skills at digging. And of course, the agents themselves can assist with absolutely any problem whatsoever by dancing at it.
* Elite Beat Agents giving you a thumbs up while screaming "YEAAAAHHHHHHHHHHHHHHHHHH" everytime you got through an entire mission without failing a single section.
* Elite Beat Agents has a sitter trying to control a terrible trio of uncooperative children.
* Elite Beat Agents has this trope as its very goal, as you must help a younger Leonardo da Vinci win the heart of a certain beautiful but emotionless young woman. Win, and she does give a beautiful smile, which inspires Leo to draw a certain famous painting.
* Elite Beat Agents is the lead character in the hard difficulty, being impressively tall and everything.
* Elite Beat Agents made specifically for American audiences by the same development team.
* Elite Beat Agents) stage, the main character takes the freight elevator to the top of the peanut warehouse where the evil alien queen is.
* Elite Beat Agents: The ABCD sporting goods company ranges from footballs to Olympic athlete's track suits.
* Elite Beat Agents" The Agents/Ouendan then arrive to help the helpless... help themselves... with music and dance moves. The helpers in this case are part of a semi-governmental agency, making them the third type.
* Elite Beat Agents, the Bonus Level using "ABC" by the Jackson 5 where the Agents have to help a cat keep its owners' baby from getting into trouble as it wanders through a construction site.
* Elite Beat Agents the character goes to get singing lessons. This is represented by her being in a studio while a piano player coaches her along. Do poorly and she lets off such a horrific trio of 'LAs' that the plant on the piano dies, the windows to the studio shatter, the wall cracks and the poor piano player is covering his ears!
* Elite Beat Agents. The Divas and Khan have some pretty nice shades too, although the Divas' are transparent.
* Elite Beat Agents). This has, unfortunately, effectively quashed any hopes of an

official sequel ever being released in the West.
* Elite Beat Agents to help their targets succeed in their goals. Clad in sharp black suits, they seem to be vaguely part of some secret government organization and are lead by a guy named Commander Kahn.
* Elite Beat Agents. Upon completion, the victory text reads "Merry Christmas" in festive red and green.
* Elite Beat Agents: WE-ARE-THE-RHOMBULANS. YOUR-PATHETIC-PLANET-IS-NOW-OURS.
* Elite Beat Agents, you are trying to get a runner with a cold back to health in order to win the big race. Depending on how well you do, he reacts with roughly equal enthusiasm to winning Gold or Silver but is very distraught to have only won 3rd, even if that is pretty good for someone who just got over a cold.
* Elite Beat Agents, you cheer on a pirate who has been left with practically nothing but his trusty bird, and he struggles to find lots and lots of treasures. If you succeed, the bird drops the trope title. In another mission, you cheer on an ex-oil tycoon who gets thrown out by his gold-digging wife after his oil wells run dry and is determined to dig his way back back to riches.
* Elite by Frontier Developments it's avoided, along with other space tropes. Ships that run out of fuel will continue to drift forever through a solar system. You can even stay on an elliptic orbit (evident only with time acceleration, of course)
* Elite can help make this more convenient by giving players a purchasable augmentation for their in-system travel device.
* Elite choices vary between specialized units tailored for a specific purpose, to simply better armed and more expensive versions of the army's
* Elite Dangerous aesthetic. Their Orca and Beluga Liner have massive viewing decks along their roofs that are larger than a tennis court. Their extravagance is pretty telling when the Beluga Liner is almost the size of an Oasis-class cruise ship yet the Oasis holds 30 times more people.
* Elite Dangerous, all but a handful of the billions of stars are numbered (either randomly generated, or pulled from a astronomical catalog), giving us beautiful names like "Eol Prou RS-T D3-94". Planets share the name of the star they orbit, and are assigned an alphanumeric code based on their orbit. Only a handful of planets or stars have an actual name; some are from previous games or are actually named in real life (such as "Sirius"), and a handful were named by kickstarter backers such as the infamous "Stapled Peacock Flesh", a terraformed Earth-like world.
* Elite Dangerous also bombards its citizens relentlessly with advertising on a daily basis.
* Elite: Dangerous, and if the flight-assist computer is on, it's played straight.
* Elite Dangerous are all about shiny spacecraft. Everything they fly is painted a brilliant, shiny white.
* Elite Dangerous - crosshair, ETA, target position, etc - invisible as the holograms have nothing to project against.
* Elite Dangerous had intergalactic travel, but was dropped in the sequels.
* Elite Dangerous has examples at some starports as a way to sell off illegal or stolen goods that can't be sold at the normal market. From pirated goods, to weapons and narcotics, to slaves, if you've got it, the black market will buy it. The influx of illegal goods can also lower the security of the system you sell them to, or have other effects, such as the infamous Unknown Artifact bombing disrupting several stations soon after their discovery.
* EliteDangerous has sensor technology based on heat, and it is possible to mask your heat signature in 2 ways: 1. By shutting down all heat generating systems and allowing the ship to cool down to the surrounding temperature of space, and 2. By closing off the ship's radiators in "Silent running" mode. This will make your ship very hard to target, but has the downside of causing your ship to overheat, with eventual catastrophic consequences. You can stave off this possibility for a time by launching a heat sink unit into space, which will use a coolant purge to dump all your waste heat into a launchable block (with the added benefit of the heat sink being hot enough to be considered a valid target as well).
* Elite Dangerous. If too many ships attempt to enter or leave the mailslot at

once, they'll start grinding against each other, bouncing back and forth until the station murders them all.
* Elite Dangerous is a space game that does not hold your hands and has a steep learning curve, but it has certain features to make it more fair:
* Elite Dangerous of distance between their respective stars, and typically have a whole host of planets, moons, and stations orbiting each one. Unfortunately, this can make traveling through such a system a royal pain in the ass, if the stars are far enough apart.
* Elite Dangerous of flight controls where one's hands never leave the stick and throttle.
* Elite Dangerous of the first few games by adding more ships that can be seen in various star systems.)
* Elite Dangerous opens with a letter from the same firm, informing them that they have been gifted a spaceship by an anonymous benefactor.
* Elite Dangerous reduce your radar signature, though enemies within 300 meters can still pick you up. Smugglers often take the most extreme measures to remain hidden from police when docking, such as flying through the station airlock at max speed with every single system on their ship shut down in order to evade detection.
* Elite Dangerous several foods that can be bought and sold in trade are this trope. The cheapest ones are food cartridges intended to manufacture cheap but nutritious meals in specialized 3D printers. There's also synthetic meat, which is grown in labs without the rest of the animal. Real meat is among the most expensive food items but is also illegal in some systems.
* Elite: Dangerous, similar limits are in place, though with a much larger range, up to roughly 45 light-years. This allows for dynamic remapping of lanes between stars, but fuel consumption increases non-linearly as range increases, with the weight of the ship, cargo, and even the remaining fuel changing the jump range. This can result in the hilarious scenario in which you can only achieve a longer-than-normal jump range by expending too much fuel to make the jump.
* Elite Dangerous suffered a malfunction that prevented it from slowing down at its destination. The chief engineer and captain hatched a plan to stuff all their shuttles and escape pods with the passengers and supplies, then released them during a close flyby of the planet. The engineer stays behind to coordinate the launch as the ship plows on into the void.
* Elite Dangerous) systems have System Authority vessels that respond to danger and patrol around nav beacons and space stations. SA vessels are very dangerous and piloted by aces, but their response time outside of usual patrol routes can give pirates enough time to swoop in and harass traders. Each of the major Powers has their own city guard (i.e. Zachary Hudson's Federal Agents) that patrol their owned systems to keep out criminals and foreign powers.
* Elite Dangerous tend to have a lot of wear on them, especially inside the cockpit, where, if you look around, you can see obvious signs of wear and tear such as chipped and worn pain on the control panel and edges of the seat to obvious signs of wear on the edges of the floor and small cracks and scuffs on maintenance panels on the walls. It goes very well with the very utilitarian aesthetic that said cockpits evoke anyway.
* Elite Dangerous: the in-game calendar is synced up with real-world time, but with 2014 corresponding to 3300 in-game, and as a result the leap years don't match up. This was referenced with a special quest for the leap year day in 2016 (3302 in-game).
* Elite Dangerous, they just bolted into the ship for even greater range.
* Elite Dangerous to commanders going outside human-occupied space as they are the only way to refuel.
* Elite Dangerous uses telepresence; rather than physically entering another player's ship, you are holographically represented. Aside from the first few seconds as the ship renders the hologram with steadily increasing complexity, they are perfect and almost totally indiscernible from the flesh-and-blood pilot.
* Elite Dangerous where people under debt sell themselves for a set period to a buyer, who manages their expenses, health, and gives them an agreed-upon workload;

this is generally considered to be a spartan, but livable arrangement. However, at the borders of Imperial space the slaves may be traded to shady Commanders who fly off to Federal and Independent space to sell them on the totally unregulated black market, and there are several instances of the Empire invading systems and taking the citizens as Imperial Slaves.
* Elite Dangerous, you have to cut off all heat emissions, and store all your heat in silent running mode or turn off all your systems including engines and life support. Also, doing things lie firing your weapons and flying too close to a star increases your heat levels, and if your ship gets too hot, it stars taking damage.
* Elite Dungeons included items that can be used to upgrade Sirenic and Tectonic armour to tier 92 Elite versions.
* Elite fanfic, an assassin manages to smuggle a disassembled shotgun onto the space station, despite its strict anti-weapon laws, and successfully kills his target. Kinetic weapons became so rare in the galaxy that nobody thought to check for them.
* Elite Four also qualifies. Although not a butler, he is a famous chef.
* Elite Four, as well as one on each of his arm extremities (can't really call them "hands" if they're spheres with mouths).
* Elite franchise buy machines and luxuries and produce food and textiles. Notably the player starts in orbit of an agricultural dictatorship called Lave.
* Elite franchise; only planets that are explicitly in a state of total anarchy allow you to buy and sell them the old-fashioned way. Some planets also ban alcoholic beverages as well, usually for religious reasons.
* Elite games avert this, however, as they apparently have vast ranges. The downside is, rather logically, the further away the target the harder it is to hit, though interestingly if you can gauge radar distances right, it is possible to hit out-of-visual-range targets (though it requires quite high skills and more than enough luck).
* Elite games, shields are a necessity. Generators are stackable, not segmented and absorb even collision damage.
* Elite Guard are the personal bodyguard/elite troops for Colonel Helga von Bulow of the SS Paranormal Division.
* Elite gymnast Nastia Liukin, the US national champion on uneven bars who would go on to win Olympic gold two years later, had a small role in
* Elite, if your legal status drops to Fugitive or you shoot anything in the vicinity of a space station, you will be attacked by Viper police ships, which are very powerful.
* Elite increase the charge-up time on FSD jumps, with larger ships causing a larger charge-up delay up to a factor of 24x.
* Elite in your cargo, leading to the infamous quote when carrying 30 metric tons of human biowaste:
* Elite is to outrun the fireball of the sun in your current system going nova.
* Elite justified the noise of laser impacts and enemy ship explosions as the sound of the hits/explosion broadcast from the target's radios.
* Elite, like would happen with "live animals" under similar circumstances.)
* Elite Man–Courtesan Romance: a person of high rank falls in love with a sex worker.
* Elite Man–Courtesan Romance: Romance between a sex worker and a person of high class.
* Elite — Credited as being the first truly open-ended video game, as well as being the first truly 3D game for home computers.
* Elite Mecha-Mooks based on Cyborg, which are quite tough, especially when there's a lot of them.
* Elite Mook (Although there's no evidence suggesting they don't have this ability).
* Elite Mook before the game even starts, and that's without tailoring. Before these rules came with an additional rule that benefitted Daemons, to balance out the power. It's gone now.
* Elite Mook for the Yellow Martians, receives this honor because of John Carter

stating (in narration) that Solan was still his better with the sword.
* Elite Mook), in which case someone who is mainly a stunt performer will be cast in the role.
* Elite Mook is an article of clothing of theirs that is red. They can take and dish out more damage than their regular peers.
* Elite Mook mummies, Eve tries to close the door on them. Rick answers with this:
* Elite Mooks are distinguished first and foremost visually by their long dark coats.
* Elite Mooks, but she's hardly anything that would be banned from the game.
* Elite Mooks compared to the Orcish forces, Saruman, for his part, recruits Dunlendings to pillage Rohan.
* Elite Mooks dress like angels based on a combination of Old Testament writings, the apocryphal book of Enoch and the writings of Robert Kelley. Their features include multiple sets of wings, animal masks and their leader The Seraphim has a strong association with fire. Cassandra Cain, who operates as The Angel of The Bat, also doesn't have a whole lot angelic to her costume, mostly just its use of white and a cross through the middle of her Bat symbol.
* Elite Mooks, especially if the enemy commander is Chosokabe Motochika.
* Elite Mooks explicitly notes (after easily dispatching a whole PSICOM squadron in the first chapter) that PSICOM's only real advantage is their superior equipment, and that the majority of PSICOM is made up of inexperienced recruits limited to training simulations. As the game progresses, though, you fight more experienced troops until you're eventually fighting the equally ineffective Home Guard: they're only last line of defense because they're hardly ever needed, and spend all their time doing combat drills and training that was meant to prepare them for a Pulsian invasion of Eden... without actually having experienced one.
* Elite Mooks had truly epicly sized shoulderpads. Those actually served a purpose, making the wearers immune to instakill decapitation attacks. Incidentally, they were the only enemies to carry weapons capable of decapitation...
* Elite Mooks. Here, if anything, they are weaker than the other captains such as Moblins.
* Elite Mooks is a spider-centaur with a massive arachnid body, implying that giant spiders exist in the world of One Piece.
* Elite Mooks of the game in one or two. And if you gather the right books, won't break until after 2160 hits, meaning you can essentially use nothing but the small chainsaw for the entire game (except for the sniper rifle for early bosses, and the Assault Rifle or "Machinegun" for Special Forces / later bosses).
* Elite Mooks (puts up a much better fight than the others, but still a Mook.)
* Elite Mooks: Stronger than the average Mook, which isn't saying much.
* Elite Mooks, take a number of drugs that raise their awareness, build muscles and remove the need for sleep, but as a side effect, few can survive past the age of 30.
* Elite Mooks. (The Four Horsemen in MG2, the four stealth-camouflaged soldiers in MGS1)
* Elite Mooks. Their armor is made of Plastoid and can protect the wears from blaster shots.
* Elite Mooks, who managed to hold their own against the Freelancers just as well as their male counterparts.
* Elite Mook, the League of Assassins. His goal was to destroy the Glades of Star(ling) City in retaliation for his wife's death twenty years prior.
* Elites brains are the only organic human components they have left of their constructed bodies. They look and sound human, exhibit very little human emotion and look down on humans.
* elite Seekers, who are basically silver and grey versions of the regular Jet Vehicons (in-universe, their colouring is in homage to their commander Starscream).
* Elite series of space-exploration games, there's a small colony in the van Maanen's star system, not far from Earth, which is home to an extremist cult of religious types. Rather than the usual pastoral approach, they live in underground caverns and mine for gemstones by hand, exporting the gems to buy the bare

necessities for survival on the hostile planet. A very popular stop, both due to the gemstone exports (albeit at very low ammounts) and the HUUUGE ammount of 'Illegal Goods' you can smuggle in there from nearby star-systems at a healthy profit.
* Elite series, the Empire is an interstellar power that bases itself upon the Roman Empire, with patrician-like Senators that have almost unlimited legal freedom, a regulated slave trade, and a heredity ruler. The decadent Empire is the rival of the corporate Federation and the free Alliance. Solar systems can be aligned to one of the three powers or Independent, and can have any government type regardless of affiliation, such as a Federation-aligned Feudal system or an Empire-aligned Communist system.
* Elite, since these aren't multiple independently developing cultures - all of those worlds are human worlds, coming from the same high-tech background; they just don't have the infrastructure and capital to reach the higher levels of development. The lowest tech levels still use the high-tech mining hardware, robots and computers - they just need it shipped in, rather than producing it themselves.
* Elite soldier (soldiers proven on the battlefield, act as commandos or unofficial sergeants)
* Elites/Supersoldiers: The Space Marines, Eldar Aspect Warriors, and several Imperial Guard Units.
* elite supersoldiers with monstrously-powerful beasts, give Chaos Daemons a try. In short, some force will fit you no matter how strategic or aggressive you want to play.
* Elite, there was a maximum range of 7 light years for interstellar jumps. You could also purchase one-shot hyperspace jumps to travel to a new galaxy. However, since the galaxies were procedurally generated, it was possible for a star to be more than 7 light years from any other, so if you were unlucky you could end up corralled in a single system after travelling to a new galaxy.
* Elite, the tonnage of the ship that is attacking you is shown by different colours on the scanner. The ships you don't want to meet in combat? Imperial Courier (White), Asp (Yellow), Cobra III (Orange), and Viper (Red).
* EliteThis also resulted in resurgent demand for joysticks, to the point that new high-end HOTAS and dual flight stick setups were released to market just to cater to the relaunched space sim market. When you need precise analog control over all six degrees of freedom, keyboards, mice and gamepads just don't cut it any more.
* Elite to charge, FTL requires target alignment, and the ship must be moving near top speed - and gives other players a "POWER SURGE DETECTED" warning. If the enemy lacks a Frameshift Wake Scanner, they won't be able to follow the fleeing player.
* EliteWhat makes an Elite force, well, elite varies. Sometimes the unit is the first to use newly developed weapons - for example, the British Rifle Regiments were the first to get rifled weapons, when everyone else was using muskets. Or it just means the unit has a longer battle history than others. Another reason is that the unit is created is to employ newly developed combat doctrines, or they are specially trained for specific environments. Or for those showing enough skill and bravery, being transferred to the Elite as a reward. The last reason has drawbacks, namely it can create discipline and morale problems for the other regular forces.
* Elite where the graphics are much prettier. Casual explorers can go from system to system and just find new things to record. Light traders could do simple ferrying jobs across the space lanes. Weekend warriors can always find some wussy NPC bandits to take out their frustrations on.
* Elite will automatically detonate if they run out of fuel before hitting a target. This is explained in the manual as a safety precaution; they don't want armed weapons flying about in space since that time a missile, after drifting for two years, obliterated a planetary settlement.
* Elite, with everything of interest lying roughly on a line connecting a solar system's jumpgate with its space station (asteroid fields, stars, moons, and some space stations excepted). Most of the objects of interest are manmade, and were placed there because it's the route most traders take from the jump-in point to the planet.

* Elite Zombie zombies, stronger than regular ones and often sporting enhanced abilities or unusual mutations to make them harder to take out.
* Eli Wallach after almost getting decapitated. Thankfully, it only required one.
* Eli Wallach guest starred in a season 4 episode, "A Very Good Year for Murder".
* Eli Wallach made a career out of playing all kinds of darker white characters and people of color, usually pulling it off very well. He has played:
* Eli Wallach. Wallach seemed to play every ethnicity except his actual Jewish-American background.
* Eliwood of Pherae and doesn't know Eliwood played a part in her rescue until their C support brings that up and she's able to say thanks.
* Elixir of Immortality, literally bottled life, though somewhat stale and not particularly palatable.
* Elixir of Life — a magical liquid or potion that restores lifeforce, health or even youth.
* Elixir of Life: Qin Shi Huang is said to have died from drinking elixirs full of mercury in a quest for immortality.
* Elix Skipper) and an inaugural WCW World Cruiserweight Tag Team Champion with Kid Romeo.
* Elix Skipper, his ego and heel attributes that came from it remained.
* Elix Skipper is ridiculously fast and agile with incredible athleticism. His light frame, however, assured that he was at a disadvantage against most power wrestlers.
* Elix Skipper started with hearty yet malevolent chuckle that will trail off.
* Eli Young Band's "When It Rains" spent 30 weeks just under the top 40 before Universal Nashville acquired the single and the band.
* Eliza also feels this way about hers. They believe she's only with Javed to shock them, mention that Eliza once brought home a "colored fellow" before (which she tells him is a term no one uses anymore) and her dad offers him wine even though as a Muslim it's forbidden. As they're Conservatives and she's a leftist activist, it's clear she finds that an embarrassment as well.
* Eliza and Isabella, actually revealed near the very end of the game. However, this can be spotted in paying attention to the parts they use.
* Elizabello II has a signature attack that he calls the "King Punch", which is strong enough to supposedly take down a fortress. However, the downside is that he needs to warm up for one hour before he can use it, requiring his subordinates to protect him during this time.
* Elizabeth". Also, in the "extra" episode, she calls her pair of gloves "Tebukuro-chan".
* Elizabeth and Jessica both had multiple stalkers for this reason, the most notable being William White in the
* Elizabeth and Will's relationship troubles drag on into the sequels. Their characters' necessity to the story largely ended with their romance's resolution in
* Elizabeth Ann Scarborough's novel "The Goldcamp Vampire Or The Sanguinary Sourdough" has this variety of vampire, here named Count Vasily Vladovitch Bledinoff, trying to profit from the 1897 Klondike gold rush.
* Elizabethan Theatre series by Edward Marston, featuring Nicholas Bracewell, stage manager (and amateur detective) for one of Elizabethan London leading theatrical companies.
* Elizabeth Báthory bathing in the blood of the slain dragon to become invulnerable predate Bathory's ties to the trope by at least 500 years.
* Elizabeth Báthory, thinking it would make her immortal. Obviously it didn't work, as she died anyway.
* Elizabeth Banks angered fans, with some comparing it to Marvel villainess Viper and not resembling her costume from the source material.
* Elizabeth Bathory befriends Ruby Rose and helps her shop for new clothes because Ruby called her cool. No one had ever called her cool before.
* Elizabeth Bear, and Bear enjoys playing with legends and genre tropes.)
* Elizabeth Bear (readers are advised to bring several days' worth of food supplies), the bookshelves form a mobile labirynth, and it is said to contain every

book ever written.
* Elizabeth Bear. The three of them along with others contend with the Promethean Society, a secret society of sorcerers whose ranks include the Earls of Essex, Southampton and Oxford (The latter of whom is one of the popular candidates for the role of the man who "really" wrote Shakespeare's plays. In here he does cowrite some of Shakespeare's earlier works but his "help" is more of a hindrance.)
* Elizabeth Berkley, she and her partner Val had some fun before they had to do a jive routine by recreating one of the 90's series most iconic (and infamous) moments that has reached meme status: Jessie's caffeine-pill fueled breakdown while singing "I'M SO EXCITED!" The Internet rejoiced.
* Elizabeth Berkley, they liked Elizabeth's audition so much they created Jessie just to have her on the show.
* Elizabeth "Beth" March evolves into Proper Lady in the second part of the book,
* Elizabeth "Black Dahlia" Short suffered this at the hands of her demented, unknown Serial Killer.
* Elizabeth Bowes-Lyon". Her awesomeness continued well into the time her daughter (below) began her reign: in one prominent example, when she was the guest of honour at an official luncheon in Ottawa hosted by the wife of then-Prime Minister of Canada Joe Clark, Maureen McTeer — a feminist lawyer (a new thing in the 1970s) who had kept her maiden name — several of the other ladies in attendance made jokes at the hostess' expense and pointedly called her "Mrs. Clark"; but the Queen Mother didn't engage in that behaviour, told the (by that point very frazzled) McTeer "don't be bothered by criticism" on the way to the car, and parted by saying, "Good Luck...Ms. McTeer". And throughout her time, the Queen Mum was famous for her good humour about everything.
* Elizabeth Carson), and is also a part-time superheroine, capable of taking on one of the world's top-ranked supervillains in a fight, and the headmistress of a school for mutants.
* Elizabeth, daughter of the Rich Bellamys, from the 1970s BBC series
* Elizabeth Debicki (in the latter one, her height is particularly noticeable given she towers over the other widows).
* Elizabeth doesn't treat Caroline and Justine any better, and both claim to see her as an enemy rather than as a sister. The twins are also afraid of Margaret and are grateful to Theo for taking their sisters' attention away from them.
* Elizabeth eyes a guy who resembles her departed boyfriend Todd, but dumps him when she realizes he's a jerk.
* Elizabeth for Indira Gandhi and her struggles to defuse religious tension, which might explain the... casual attitude to history.
* Elizabeth generally loves to glomp Ciel, being his future wife and all.
* Elizabeth Gillies also gets numerous chances to show off her talents as a
* Elizabeth "gracefully" distributes the cards "Miss Elliot at home" as invitations to her evening party.
* Elizabeth Hartman (her final role, and considered one of her best). In fact, Mrs. Brisby's first name isn't revealed in the film, but this trope has led to fans naming her Elizabeth after the actress.
* Elizabeth has a sequence where the queen is sent a dress as a gift, and one of her handmaidens wears it instead. She seems to wear the dress only for a couple of hours while having a tryst with Lord Robert - during which she starts to become aware of what's happening and starts screaming.
* Elizabeth Haverford is quite overjoyed when her husband is murdered since she recently discovered that the man was a pedophile and child murderer.
* Elizabeth herself counts too. She mainly just appears in the background, has maybe 5 lines, and is only really featured in the beginning and at the end. And she was practically the main character in the first movie!
* Elizabeth herself has moments of this, particularly when turning down Darcy's first proposal. Downplayed, however, since she has significantly more tact and wit than the first two examples, and tends to be blunt only when speaking truth to foolishness or when other niceties have failed.
* Elizabeth herself vetoed Prince Charles' potential marriage to Camilla Shand

because of her somewhat scandalous dating history and the belief that Charles needed to marry a young English virgin. Camilla married Andrew Parker-Bowles, Charles married Lady Diana Spencer, and the rest, as they say, is history.
* Elizabeth Hurley is on record as referring to people who don't live her sort of glamorous celebrity lifestyle as 'civilians'.
* Elizabeth I after Japan entered the war: Britain's geographically-extensive assets then became liabilities, especially as the Imperial Japanese Navy was more than a match for its British counterpart.
* Elizabeth I filled the role in a similar fashion. Electing to remain unmarried throughout her life, Elizabeth characterized herself as being married to England itself, and more than once referred to its people as her children.
* Elizabeth I in face and in body. Neither of them aged as well, but what can you expect in the 16th century?
* Elizabeth Inchbald, a 18th century novelist, actress and playwright, known for both her beauty (which surrounded her with admirers) and her severe stutter.
* Elizabeth I of England (1533-1603) and Robert Dudley. He was universally hated and was generally supposed to have murdered his wife; the Queen's intimate relationship with him scandalized Europe and damaged her reputation. If she had married him, Elizabeth might have had a hard time holding on to her crown. Eventually, she decided to become the "Virgin Queen" and renounce marriage, but she kept her "sweet Robin" close by until he died in 1588.
* Elizabeth I of England. Did she have an active love life? Yes. Did she play up her public image of celibacy? Yes.
* Elizabeth I of England is justly famous for her spectacular state wardrobe (though she dressed less ornately in private). James I & VI was an aversion of the trope to the extreme displeasure of his English subjects accustomed to a monarch who knew how to make a show.
* Elizabeth is a secret boss (the player's max health was capped at 999).
* Elizabeth is imprisoned in. It's only goal is to return Elizabeth to her gilded cage, meaning it's possible to appease Songbird by simply handing her over. It takes the entire game to finally turn Songbird to scrap metal.
* Elizabeth I's ladies-in-waiting. The relationship had to be carried out in secret because Elizabeth was incredibly jealous and possessive of her ladies-in-waiting. They then secretly married when Bess became pregnant. As you can guess, Elizabeth did find out about the affair, and had them thrown in the Tower of London. She only released Raleigh when one of his expeditions returned with the spoils of a captured Spanish ship and the crew threatened to mutiny, and Bess out of guilt after her child died of plague while in the Tower.
* Elizabeth I's major strategy for keeping her court of restless, power-hungry men well under her thumb. It worked quite well for her.
* Elizabeth Ito, creator of "City of Ghosts" created the series as a counterpoint to most media’s portrayal of Los Angeles as a predominantly white and famous city, instead focusing on a realistic and diverse view of the city.
* Elizabeth Knox cried for days after watching the film adaptation of
* Elizabeth, Lady Raleigh carried her husband Sir Walter's embalmed head around with her until her death.
* Elizabeth", Lisa's headless body plays an electric keyboard while a scientist keeps her head alive on a tray.
* Elizabeth Lochley steps into the figurative Captain's chair (B5 doesn't have a
* Elizabeth Marvel played four different one-off characters across the three main series before becoming recurring defence attorney Rita Calhoun in SVU.
* Elizabeth McCord is shown to speak Arabic in one episode. She's not fluent, but she's good enough to be able to use it for dramatic effect when brokering a deal with the President of Iraq.
* Elizabeth McGovern is American with no recent British relations while Michelle Dockery is English (although her father is Irish).
* Elizabeth Montgomery. It was first broadcast almost four months after she died.
* Elizabeth Moon: Esmay Suiza takes command of a small spaceship, despite being a junior-grade lieutenant who's about twelfth in the chain of command, because

everyone ahead of her is either in the pay of the enemy or killed by those who are.
* Elizabeth Moon: get the hell away and wait for his weapons to rearm. His commander (the series' hero, naturally) is confounded by this.
* Elizabeth Moon has a thieves' guild; the guild, and one particular member of it, play significant roles in the climactic plot sequence.
* Elizabeth Moon — although the author was apparently unable to suspend her own disbelief, as the sequel reveals that the feudalism is mostly societal set-dressing over democratic underpinnings, and deconstructs, sometimes unpleasantly, several of the tropes that were used straight in book one.
* Elizabeth Moon of this trope, looking at the effects that immortality can actually have on a society.
* Elizabeth Moon series is a cadre of senior military officers who abuse their positions to hunt people.
* Elizabeth Moon series it is mentioned that despite the soundlessness of space, the computer systems on warships are programmed to generate sound effects appropriate to ongoing events to provide audio cues for the crew. This allows them to take advantage of the considerable unused information bandwidth, without overloading visual readouts. At least one ship captain is said to have edited his sound effects to mimic that of an orchestra playing.
* Elizabeth Moon where the chain of command is not enforced. The captain who is supposed to be the commanding officer must deal with constant demands and shouting matches from the admirals who lead the individual departments. The heroine comments on this terrible arrangement, later it becomes a problem when pirates attempt to capture the ship.
* Elizabeth Moon. With humanity scattered across space, the puppy Jim the stowaway finds is a mysterious novelty to most of the crew, though Jim, coming from a backwater world that relies on animal labor, knows what it is. Real food can be had but won't keep for long trips in space so it is a special treat supplemented by nutrition bars and MREs. When the main character's ship takes on refugees from other ships after a war breaks out, a snotty-ass captain makes a big deal about his personal stock of expensive raspberries being divvied out as rations.
* Elizabeth. Not surprising since she would grow up to become Elizabeth I.
* Elizabeth of York and Henry Tudor are betrothed by their mothers, and Elizabeth hates it.
* Elizabeth Olsen (Wanda Maximoff / Scarlet Witch) claimed that the cast of the Battle for Wakanda scene were only told about the ending on the van ride over to shoot said ending.
* Elizabeth opens with the burning of heretics at the stake during the reign of "Bloody" Mary Tudor.
* Elizabeth Peters", an ancient Egyptian reports that his family's crypt has been desecrated and robbed a year after his mother's lavish burial. A search reveals no evident means of egress, and the door's seal was unbroken when he and a friend came to check on the tomb. The sleuth who investigates the crime concludes that the woman's son had left a linen wrap on the tomb floor as a "mummy" during the funeral, then later brought his very nearsighted companion along to glimpse it lying there. While his friend was fetching the police, he robbed the tomb himself.
* Elizabeth responds very excitedly to seeing the intimate scene between Ran Mao and Meirin and takes pictures.
* Elizabeth "Shadow" Norwood is Blair's only friend for the years after he was accused of allowing the
* Elizabeth. She throws it at you for Strike attacks but conjures cards from the pages for Slash and Pierce attacks.
* Elizabeths in the ending is the beta model used in the early gameplay demos. content like Saltonstall and the incidents like saving the mailman from the Vox Populi could be a sort of quasi-canon, taking place in alternate versions of Columbia with alternate Bookers.
* Elizabeth's mace, also given to her by her Uncle Charlie the year before, comes in handy at the end as well.
* Elizabeth Smart was abducted from her home in the middle of the night and held

hostage in an encampment. Her captor held her hostage for nine months, during which time he raped her on a daily basis and chained her to a tree to keep her from escaping.
* Elizabeth Taylor and Larry Fortensky in the early 1990s, only to be subverted in the subsequent divorce.
* Elizabeth Taylor dies in a car accident at the relatively young age of 33.
* Elizabeth Taylor film has Kate give the speech seriously... but then has her sneak out of the party while Petruchio is taking his bows, humiliating him exactly how he humiliated her at their wedding.
* Elizabeth Taylor. Most of their fights stemmed from his practice of demanding multiple takes without explaining why or offering additional direction to the actors.
* Elizabeth Taylor needed one as a child, resulting in her distinctive scar.
* Elizabeth Taylor. She recalled that in her teens, the studio wanted her to remove it, but she resisted.
* Elizabeth Taylor, so in 1981, she called the executive producer and asked for a cameo role. She got the role of Helena Cassadine.
* Elizabeth Taylor's White Diamonds ad-parody sketch featuring Sally Field behind about four layers of gauze.
* Elizabeth Taylor's "White Diamonds" perfume. The commercials were made while she was still alive, but have continued to get airplay long after her death (typically at year-end to drive Christmas sales).
* Elizabeth Taylor (Veronica). After Liz was widowed suddenly, Reynolds' husband Edwin "Eddie" Fisher (father to Carrie, and the best friend of Taylor's dead husband) left his family to be with Liz. The nation sided against Eddie and Liz, until Liz came down with a near fatal case of pneumonia.
* Elizabeth Taylor) were Jewish, but she converted out of personal beliefs that had nothing to do with them (according to biographer Alexander Walker, her decision came about because of her godfather, who was an avid Zionist).
* Elizabeth: The Jesuits in the film are portrayed as brutal assassins sent to murder Elizabeth.
* Elizabeth Vaughan tells of turning in a manuscript in which an infant died midway through. Her publisher sternly counseled her that "In romance,
* Elizabeth Warren, a longtime bankruptcy and contract lawyer and Harvard professor, started predicting the 2008 market crash
* Elizabeth was watching John as he did taxes. John moaned that even with deductions, he ended up paying through the nose. Elizabeth looked industriously at his face to see it happen until he said it was a figure of speech.
* Elizabeth, when Elizabeth is taken to the Tower of London one of her inquisitors gives her his cloak because it is cold. Elizabeth replies "I will not forget this kindness". Years later when the man is one of many who has plotted against her, she has an audience with him and says "all your many kindnesses are remembered".
* Eliza Dushku had a contract with Fox, and so she brought Joss Whedon back to Fox (after the latter claimed he wouldn't produce anything for the network again) for
* Eliza Dushku mental patient they're grilling doesn't buy it for a second.
* Eliza Dushku who was only credited during the closing credits so Faith's appearance in the final scene would remain a surprise.
* ELIZA effect social engineering rather than actual intelligence may cause a program to be perceived as human thus "passing" the Turing Test but not being any sort of general intelligence. Hence various chatterbot programs may convince unknowing humans they aren't speaking to an AI because they are geared towards impersonating a human.
* Eliza is the host of a symbiote named Sekhmet, who is different from the previous examples in that she has
* Eliza looks creepy with her dead-fish stare and big dark eye circles, and her behavior makes it seem like she's off her rocker. She's a bit weird, but she's really just as much of a loving mother as Lorem, and they hit it off really well as fellow single mothers. Her creepy eyes are just results of reading too many parenting books.

* Eliza Maza and, later, Matt Bluestone work to conceal the existence of Goliath and his clan from humanity, as does David Xanatos when he's not trying to kill them.
* Eliza Maza pulls this off to take out one of Xanatos's special forces team in
* Eliza suffers this in "One If By Clam, Two If By Sea" whilst at her birthday party.
* ELIZA, the parser program designed to fool a Turing Test by rephrasing anything that is said to it as a question, was presented to testers as being a live woman. Its designer was later appalled when some people started hailing this bit of transparent stage trickery as true artificial intelligence.
* Elizaveta Tuktamysheva (2019-2020). There are already strong juniors who will turn seniors in the 2021-2022 season who are expected to challenge them.
* El Juego de Rol del Capitán Alatriste series of swashbuckling novels.
* El Jueves where a girl, Emilia, pretended to a boy to do the mandatory conscription in the Army and be with her boyfriend.
* Elko Tract, Virginia, built to resemble nearby Richmond and protect the actual city from Nazi bombers. The site is now private property closed to the public, but still contains remnants of the decoy city including a water tower, building foundations, and park benches.
* Elks and gazelles are both depicted having a nose horn, and they share traits with each other despite deer and antelopes being from separate families. Concept art suggests they were originally going to be
* Elk's Run qualifies as an emergency to those who participated in said execution, no matter how much the rest of the cast wants to get out of town.
* Ella and Kit having a longer conversation at the ball about their childhoods.
* Ella, a songbird dressed as a princess with a personality as angelic as her singing voice. One of the nicest, if not the nicest, character in the whole series.
* Ella believes everyone is good at heart, even when they physically abuse her on a regular basis. Chris seems to be the only exception.
* Ella cannot bring herself to do anything even remotely violent or cruel and is thus mortified when she's tasked with delivering a mild electric shock to the opposite team for a challenge.
* Ella Cinders, director Alfred Green appears onscreen as...a motion picture director.
* Ella Cinders" set in the modern day, with Ella and her wicked stepmother and mean stepsisters—but Prince Charming is the local ice man, and the fancy ball is in fact a beauty contest to win a Hollywood movie contract.
* Ella Cinders version of "Cinderella", has the mandatory wicked stepmother who treats Ella like crap and uses her as a slave.
* Ella Enchanted, after Ella talks back to her teacher Sewing Mistress, the lady punishes Ella by making her skip both dinner that night and breakfast the next morning. Made even worse by the fact that Hattie, who is traveling with Ella in the coach to finishing school, commands Ella to not eat; by the time they actually get to the school, Ella hasn't eaten for days. Areida smuggles her a bit of bread, thus cementing their friendship.
* Ella Enchanted and make her remove the curse. In this version, she meets the Prince long before the ball, but breaks off their budding relationship to prevent her curse being used against him; the ball is instead the impetus for them getting back together properly (and Ella learning how to break the curse).
* Ella Enchanted. Being magical, it can even provide detailed information about events as they occur.
* Ella Enchanted: Char takes Ella to the castle's hall of mirrors in order to propose to her, just as his father had done to his mother. Although indoors, it's covered in plant life, making the room look like a garden. The moment is subverted, however: during the scene Ella struggles to not stab him as she was ordered to, and cannot agree to the proposal despite being in love with him.
* Ella Enchanted contains a scene in which the heroine is captured by a family of ogres, who argue over how to divide up her parts. (The neck is the best part, apparently.)

* Ella Enchanted counterpart, who designs her gifts to help children develop into proper adults, only to realize the error of her ways when she experiences her gifts first-hand.
* Ella Enchanted: Ella attends one which she eventually escapes. It wouldn't have been so bad if it weren't for Hattie ordering her about and the punishment of meals being taken away if you talked back to a teacher.
* Ella Enchanted, Ella is frozen mid-leap, and when she's unfrozen she falls and crushes the barrel beneath her, drenched in wine.
* Ella Enchanted, Ella is learning Ayorthaian, the language of the kingdom next to the one in which she lives, from her roommate at boarding school. She calls a bully an "ibwi unju" for mocking her roommate's accent.
* Ella Enchanted, Ella's father and new step mother walk in on her and the prince enjoying themselves sliding down the giant banister in the castle in which the wedding has just taken place. Her new family members are not amused.
* Ella Enchanted equivalent, constantly popping up and singing to the protagonists at unwelcome times. In their defense, elves are forbidden from engaging in legitimate work, and are limited to either singing, dancing, or tomfoolery, so they have to make a living somehow.
* Ella Enchanted has Sir Peter, Ella's greedy and selfish father. He tries to use his clever ways to gain riches. He gains much of his wealth through trickery and deceit and loses it the same way. Sir Peter takes pride in Ella for being a brave, sassy child. Once he gets to know his daughter, he notes their resemblance, laughs at her attitude, and seems to grow somewhat fond of her. Yet, he deals little with his daughter and is more concerned for his business than her well-being. They have a distant relationship, as Ella acknowledges his corrupt, greedy nature and finds it unpleasant—especially during his attempts to force her to marry. He marries Dame Olga because of her wealth and cares little when Dame Olga forces Ella to work as a servant.
* Ella Enchanted has Slannen the elf (who's slightly smaller than a human man) falling in love with Brumhilda the giantess.
* Ella Enchanted is a concrete-metaphor version of this, where the protagonist has been magically compelled to be a pushover.
* Ella Enchanted is cursed to be this by a fairy who cast a spell forcing her to obey anyone who tells her to do something.
* Ella Enchanted is depicted as being very clumsy at the beginning, stating that "curtsies often make me fall over". Her father wishes for her to become less clumsy and more ladylike and sends her to finishing school. Ella rebels against the stern teachers at the school but eventually gives in to their teachings until she runs away. The next time her father sees her she's much more graceful and able to do a perfect curtsy.
* Ella Enchanted Prince Charmont gallantly saves Ella's life exactly three times, first from a speeding carriage, second from an ogre's boiling pot and then despite himself he has her back in the court battle.
* Ella Enchanted so that Hattie and Mum Olga won't be able to take advantage of the marriage. Of course, once she breaks the curse she un-breaks his heart by proposing to him instead.
* Ella Enchanted, the ball at the end is a masked affair, which is convenient for Ella since in this Cinderella retelling the prince already knows her well enough to recognise her unmasked (not to mention her stepfamily). In this case, most of the guests don't wait until the end of the night to unmask, since the event is about introducing the prince to eligible young ladies, and said young ladies want the prince to be able to see how beautiful they are.
* Ella Enchanted ("the charming king"). He prefers to be called Char, though.
* Ella Enchanted there is Brumhilda the Giantess and Slannen's love interest (played by Heidi Klum).
* Ella Enchanted. This is lampshaded when Ella uses her magic book to read one of the prince's diary entries. He writes about how he enjoyed dancing with the mysterious girl at the ball, and accidentally writes the girl's name as "Ella", having no idea why he did so.

* Ella Enchanted. Worse still, the leader of all the Groupie Brigades was essentially a stalker who had spent her spare time spying on him and is convinced she'll marry him eventually.
* Ella Fitzgerald (Sorry Ella). She was the singer in Chick Webb's orchestra and took over as leader after his death. After the swing era came to a close she remained popular and pioneered singing in a bop style.
* Ella Fitzgerald was performing "Mack the Knife" for her live Berlin album, but forgot all the words after the first verse. She quickly improvised new lines and a scat solo, keeping up perfectly with the rhythm section. The final cut was so good that she got a Grammy for it. This is, incidentally, why most performances of "Mack the Knife" are now largely incomprehensible: the song's origins as a murder ballad from
* Ella has the fatal flaws of naïveté and lack of social awareness. She fails to recognize Sugar’s hatred of her, and annoys her into setting her up for elimination.
* Ella Minnow Pea is about a fictional nation where the founder's statue has the phrase "The quick brown fox jumps over the lazy dog". As a storm keeps damaging the letters, it's taken as a sign that they should be forbidden, and the text accordingly stops using each letter as it's banned.
* Ellaria Sand and the Sand Snakes get away with poisoning Myrcella Baratheon in the Season 5 finale despite that they had been told several times that
* Ellaria Sand chastises any attempt by others to avoid mentioning she is a bastard, as she's unashamed of it (they aren't stigmatized in Dorne).
* Ellaria Sand tried to move on after her lover Prince Oberyn Martell brutally died in a
* Ella the Elephant: Belinda sometimes mutters "No more autographs, please" in her sleep.
* Ella the Elephant, Ella can use her magic hat to help others, but it will start acting funny and not work properly if she tries to use it do something like getting out of doing work.
* Ella the Elephant, one of these kicks off the problem described in the title. An unwitting seagull reverses a sign, causing a delivery van with frozen bananas to go the wrong way.
* Ella the Elephant. She constantly mentions her father to the other characters, dotes on him, and is also fond of reminding the other characters that he's the mayor.
* Ella the Elephant the hat. Belinda has her wearing a different hat with feathers to try to make her look "stylish."
* Ella the Elephant, the twins Ida and Ada do this as their Halloween costumes in "Frankie's Perfect Pumpkin."
* Ella the Elephant uses 3D characters and objects against hand-drawn environments.
* Ella tries contacting Kit with a letter after the ball, but the Duke finds it first.
* Elle actually being from a fractured dimension. Nothing in the world of
* Elle a fait un bébé toute seule: "I'm like her big brother... a little incestuous when she wants to."
* Elle Fanning was released, pretty much any discourse about her career (which mostly consisted of relatively family friendly roles up to that point) was given a backseat to the film’s shocking content itself. That film’s darkly satirical treatment of this trope might have helped.
* Elle has a staticky robot voice. Robecca just has a British accent.
* Elle is closest to The Woo, with her weapon of choice being a shotgun. She excels on fast movements and getting in close before blowing enemies away, and has the ability to perform an
* Elle, is dogged by a haunting photograph of her taken as a child, just after her father killed 27 of their neighbors after they objected to something he did related to Christmas, in which she is half-naked and covered with ash, staring vacantly toward the camera, that became the signature image related to her father's crime.
* Elle is Ludger's daughter from the future. Within the first hour of the two

meeting in the beginning of the game, multiple hints are dropped over and over and not leaving much of a potential surprise for the player. The revelation being given to Ludger and Elle themselves? The last third of the game.
* Ellen: After a break-in, Ellen is given a gun by Audrey and tries to learn self-defense. She also has bars installed in her windows, and takes to sleeping cuddled up with a life-sized mannequin meant to give intruders the illusion that she lives with a man.
* Ellen aired a disclaimer before every episode warning for "adult content" as well, regardless of any actual subject matter. This certainly did not help the show's ratings and it was canceled after one more season. Within a few years, syndicated repeats of the series were rated TV-G.
* Ellen also used to wear a longcoat. Dan comments in retrospect that he ought to bring it back, because "it's long and it's cool."
* Ellen and giving Ellen the advice of "you know, you should really get a new name, 'uy The Boo' doesn't tell you what (the store) is".
* Ellen and Nanase are this to each other, as Vlad and Abraham can attest. Grace probably counts for Tedd as well.
* Ellen and Nanase can veer here pretty often. They get most of the more eventful plots, and while other characters
* Ellen and Nanase claim to "think about baseball" frequently. Here's just
* Ellen and Nanase initially concealed their relationship from most people out of a desire to keep Nanase's sexuality a secret from her homophobic mother. While the remaining six main cast members were aware of their relationship, no one beyond them knew. However, after a near-death experience, Nanase finally came out to her mother, at which point they stopped hiding that they were together.
* Ellen and Otis, Ellen's plan to bring in a biennial beet to class results in her making her clothes filthy from digging the beet up, and ruining her dress by getting it stained with beet juice. Plus she almost gets in a lot of trouble for taking the beet without permission, and does get written up for arriving to school late.
* Ellen and Otis: Ellen Tebbits and Otis Spofford, to each other. Otis got started antagonizing Ellen because his mother is Ellen's ballet teacher (and he likes to see Ellen get mad), and he's usually (but not always) the instigator.
* Ellen and Otis; however, when Ellen calls his bluff, pride prevents him from backing down and he does it.
* Ellen and Otis: Otis Spofford has a tendency to get in trouble during class because he finishes his schoolwork ahead of time.
* Ellen and Otis trouble. Otis's class puts on a fake bullfight as part of a school performance, and Otis (as the front half of the bull) goes off script and causes the bull to win the fight. As the teacher is preparing to chew him out, several parents approach and tell her how hilarious the fight was and what a good idea it was to have the bull win. Otis doesn't get in trouble from the teacher, and outruns the two boys who played the toreador and the back half of the bull.
* Ellen, an old friend of Neal's, is revealed to be in witness protection in the season three finale of
* Ellen apologizing and claiming, "This has never happened to me before". (Her lack of response is because despite genuinely liking him, she's not sexually attracted to him—she's just beginning to realize that she's a lesbian).
* Ellena Terys, the youngest of the Point-of-View characters, is barely a teenager and accordingly not equipped to take care of herself. She goes through great hardships, being resourceful, cunning, and sometimes plain lucky. All the while, her main goal is to actually find a peaceful place to stay and live.
* Ellen attempts to get Elliot in trouble. She is told to choose a topic to discuss for two minutes in Elliot's speech class. Her first choice? PMS. The teacher approves, and Ellen freezes up, not expecting that result. Not to mention she didn't know a single thing about PMS due to being an
* Ellen Bernfeld also did backing vocals for The Holograms and The Misfits, and was the singing voice of Roxy in her only solo song. Roxy's speaking voice actress was Bobbie Block.

* Ellen Brandt, Tony Stark jumps through a store glass window. His expression afterwards implies that it was painful at least.
* Ellen Brock is a YouTuber with lots of helpful advice for aspiring authors in how to edit their work themselves, what to put in an email to agents and publishers and what mistakes to avoid.
* Ellen Burstyn herself is a convinced believer that this film was cursed. She lists nine people close to the production who she feels died in suspicious circumstances. Some can probably be discounted, like the ninety year old mother of a supporting actress with a very small part who died some years later. Others, like the carpenter who died in an on-stage accident building the set, or another carpenter who lost all the fingers on one hand in a freak accident with a power saw, seem more plausible "curse victims".
* Ellen Burstyn suffered a lifelong, crippling, spinal injury when a special effects stunt went inexplicably wrong - the wire she was on to simulate her possessed daughter throwing her across a room pulled with ten times the expected force, badly injuring her back.
* Ellen comes out of the closet, her friends ask her if she's sure about it, and, when she says yes, Joe pays Audrey, who then pays Ellen's cousin.
* Ellen cuts her hair shorter just as she is starting to find her place in the world.
* Ellen DeGeneres allegedly attended a look-a-like show or two in Vegas to fake being one of the performers. She apparently had received comments to the extent of her being "too pretty" to be the real Ellen. (Naturally, the best of these made her talk show.)
* Ellen DeGeneres behind the scenes, her fanbase revolted and the ratings for her show crashed. DeGeneres herself admitted as much in a televised apology.
* Ellen DeGeneres, early on, she talks about procrastination, and, quite appropriately, gets sidetracked. About an hour later, she returns to the topic out of the blue.
* Ellen DeGeneres. Ellen took responsibility for allowing said situation set in, expressing regret for what seems to have been the product of allowing herself to become distanced from the operations of her show, and taking steps to clean house and create a culture more in line with her message.
* Ellen Degeneres has been known to use the formulation "Am I right, ladies?"
* Ellen Degeneres: "I've always said I like my coffee like I like my men. I don't drink coffee."
* Ellen Degeneres. Many fans took this as confirmation that the chemistry between Poe and Finn was intentional. John Boyega has also said that he was playing Finn's scenes with Poe as romance, so the only thing left was for a director to openly say that Finn and Poe were in a relationship. Which never happened.
* Ellen Degeneres mentioned it in one of her stand-ups, talking about the news: "It could be most deadly thing on earth and you may be having it for dinner. We tell you what it is, tonight at eleven." She then mimes a person about to eat something with a spoon and says "Is it peas?"
* Ellen Degeneres police station. Her recollections make up the bulk of the film.
* Ellen DeGeneres said that his girlfriend teases him for reciting the lines from the Old Spice ads in his sleep.
* Ellen DeGeneres' "The Beginning", telling the audience an (admittedly fictional) story about how she met God. The crowd's reaction to this line says it all.
* Ellen DeGeneres, where she, along with the main character, came out as gay in 1997.
* Ellen episode "Three Strikes" revolves around her being arrested for participating in an animal rights protest and ultimately remanded to the custody of her parents.
* Ellen episode. When Ellen's lesbian friend, Susan, casually comments on how she thought Ellen was gay, the (still-closeted) Ellen hilariously freaks out and accuses Susan of trying to "recruit" her.
* Ellen Foster, there is the friendship between the titular Ellen and Starletta; during the last chapter, Ellen takes great pains to have her new home look nice for

Starletta's visit, muses about how nice it feels to have Starletta sleeping next to her, and wonders if they could take a bath together.
* Ellen Hamilton Latzen is cut in the syndicated version - and she's the main guest star of the episode!
* Ellen has this especially bad. She claims that her first time playing
* Ellen, her character Ellen Richmond was openly lesbian from the start.
* Ellen Hopkins, Pattyn is knocked out cold and wakes up in the hospital some time later.
* Ellen: In "Go Girlz," during the slumber party, Ellen mistakes a cop for a stripper, who in turn enjoys the mix-up and plays along.
* Ellen invokes this trope intentionally to differentiate herself from the rather-straitlaced Elliot. Non romantic example, as she is his
* Ellen) in which said boy band hosted a spelling bee where that word came up. When asked to use it in a sentence, they produced: "Hey, man: check out that sussurrus."
* Ellen is almost always thought of as "that show where the lead character came out". If you were very young or not yet born in the '90s, you might be forgiven for assuming it was, from beginning to end, a show about a woman coming to terms with her sexuality, when in fact for three seasons it was a somewhat run-of-the-mill Seinfeldian "comedian gets a sitcom"-type show, and it wasn't until the end of the third season that she came out, then spent exactly one season focusing on her being an out lesbian before being canceled.
* Ellen is a magical clone of Elliot who was 17-years-old and female at the time. This becomes a plot point, as a magic-user from another dimension has a religious belief that if the soul is younger than the body, it will cause problems. So she gives Ellen dreams of a second life to age up her soul to match, with the side benefit that it gives her own duplicate a friend in that second life.
* . Ellen is quiet and in control, exercises logic, is virtually emotionless, and seen as a defensive bulwark in battle. Her brother Elk is loud and chaotic for chaos' sake, peppers his random speech with non sequiturs and shout-outs, is very outgoing, and highly aggressive in a fight. In spite of their vastly differing personalities, they're in tune enough with each other that they're able to hold their own against opponents outside their weight class.
* Ellen. Later subverted as WBMA allowed a rerun to air later that same season.
* Ellen, one episode involved the filming of a talk show, which ended with the host shaking hands with the guests — once the cameras and music stopped, so did he.
* Ellen recently got a form of this. She can zap someone (animals included) with an invisible beam and turn into a perfect replica of it. Elliot also has voluntary
* Ellen Ripley", a role that was... not quite what you'd expect to see Beryl Reid playing.
* Ellen slept with Cavil and stole resistance plans to keep Saul safe and then drank what she knew to be poison when Saul offered it to her.
* Ellen states she doesn't suffer gender dysphoria and wouldn't want to be male (though there are hints that the
* Ellen (the main character famously came out as a lesbian during the show)
* Ellen was a woman Jon regularly phoned to get a date, and always failed. We never heard her actual answers, only his reactions to them. She eventually appeared in a storyline where she has amnesia, and therefore agreed to a date with Jon. Also, Jon's neighbor Mrs. Feeny, often the target of Garfield's pranks, was never seen in the comic.
* Ellen when Ellen's co-worker, Joe, talks about how bad it is for Ellen to be lying to her mother.
* Elle Riley has to keep her girlfriend secret to maintain the interest of her show's viewers, who are mostly straight men attracted to her.
* Elle Robinson did this to Max Hoyland in revenge for his role in her brother's death (a case of mistaken identity, due to said brother having an
* Ellery Queen actually does commit suicide, but the two people who find the body make it look like murder so they can claim the victim's life insurance.
* Ellery Queen but it turns out to be a poisoning disguised as an accidental death.

* Ellery Queen collection), it is made to appear that the victim's body has been placed in his trunk, covered in quicklime, and shipped off to his summer cabin.
* Ellery Queen contains some now extremely outdated psychological ideas regarding homosexuality, and which would have been on the way out at the time the novel was written. Unfortunately, some of these ideas are integral to the solution of the mystery.
* Ellery Queen, created by Frederic Dannay and Manfred B. Lee under the pseudonym "Ellery Queen," is a mystery writer who assists his police chief father on tough cases.
* Ellery Queen, Ellery is a certified genius. He is also constantly misplacing his glasses, hat, keys. etc. and accidentally leaving things in the fridge.
* Ellery Queen: Ellery must clear his own name in "The Adventure of the Comic Book Crusader".
* Ellery Queen episode "The Adventure of the Sinister Scenario" had the Queens, father and son, witness this for themselves when they go on the set of an adaptation of one of Ellery's books. This being an Ellery Queen mystery, this trope's horrible aspects culminate in murder.
* Ellery Queen in 1929, have framing sequences which establish that the stories actually took place in the previous decade, i.e., the 1910s, and that all of the names have been changed. In other words, "Ellery Queen" was a pseudonym not only in real life, but in the novels as well.
* Ellery Queen: In "The Adventure of Caesar's Last Sleep", Sgt. Veelie is accused of the murder and Inspector Queen and Ellery have to clear his name.
* Ellery Queen: In "The Adventure of Caesar's Last Sleep", the killer provides the police the location of a hitman who had bungled an earlier attempt on the victim, knowing that the hitman will shoot it out with the police rather than being taken alive. The killer does this because the hitman can identify them as the successful murderer.
* Ellery Queen: In "The Adventure of the Disappearing Dagger," an elderly amateur criminologist finally figures out how a five-year-old "locked-room" murder was committed, and is murdered by the killer before he can alert Inspector Queen. Ellery takes up the challenge himself. The criminologist had first implicated an airline pilot, because he was flying the plane where the murder was committed and had the opportunity to toss the murder weapon out the window. Nobody else seems to have been able to get rid of the weapon, but Ellery finds that the murder victim had stolen someone else's invention, and that the murderer may have invented the weapon as well.
* Ellery Queen: In "The Adventure of the Disappearing Dagger", Ellery must solve a locked-room mystery that occurred five years earlier in order to solve the current murder.
* Ellery Queen: In "The Adventure of the Disappearing Dagger", Ellery uses a trick spoon designed to dissolve in hot water to explain how the crime was committed.
* Ellery Queen: In "The Adventure of the Hard-Hearted Huckster", Flannigan complains about the taste of cigar:
* Ellery Queen: In "The Adventure of the Sinister Scenario", Inspector Queen and Ellery go to Hollywood to watch the filming of movie based on one of Elley's novels that features both of them as characters. Neither is impressed with the casting.
* Ellery Queen It's not fair play either since Ellery only shares his evidence with the reader at the same time he's disclosing it to a judge, prosecutor, and defense attorney in the final chapter.
* Ellery Queen. Just about everyone who knew the victim would have a reason for wanting them dead.
* Ellery Queen, over a sudden close-up of a pair of glasses with broken lenses. The theme then does a calming little piano trill, picks up its walking bass again, and continues panning across various clue-like objects, as it had been doing before the scare.
* Ellery Queen police detectives when Ellery can (and does) solve all the cases.
* Ellery Queen's "Half a Clue" has the victim mention that the person who was defrauding the family business was "Al-". Unfortunately, the other family members

are named Alice, Alvin, and Albert.
* Ellery Queen short story "No Place to Live", one suspect is found standing over the body holding a pistol. It is later revealed that she picked the gun up because she recognised it as her husband's.
* Ellery Queen short story where a child faked his own kidnapping to get his estranged parents back together. It worked.
* Ellery Queen's secretary Nicky Porter was originally created for the radio show, but later appeared in two of the novels and a dozen short stories.
* Ellery Queen story where three Civil War veterans have a tontine to decide ownership of a fortune they discovered during the war. The grandchild of one of the men finds out and plots to murder the other two, not realizing that the "fortune" is in Confederate money.
* Ellery Queen: "The Adventure of the Sunday Punch". During a practice bout, a lucky shot knocks champion boxer Kid Hogan unconscious. He revives enough to sip some water from his manager's "swill bottle," then falls comatose and is soon pronounced dead. An autopsy reveals he was poisoned, and the "swill bottle" was loaded with poison.
* Ellery Queen the body is hidden in a Murphy Bed that was part of a department store window display. When the demonstrator got to "see how easy this is to open?", the corpse popped out.
* Ellery Queen, the Queens search a dead man's man coffin for a missing will, and find two bodies inside instead of one.
* Ellery Queen". This was one of the only episodes where the killer was not one of the suspects named in the opening monologue.
* Ellery Queen) try to establish that the Ellery of the present day was the same Ellery as that of the 1920s, with mixed results.
* Ellery Queen TV series begins with an announcement that "one of these people is going to die...", facilitating the game.
* Ellery Queen TV series. It is very prominent in the pilot episode "Too Many Suspects" but also used in other episodes. Undoubtedly a deliberate choice to help invoke the feeling of the 1940s when the series is set.
* Ellery Queen" ultimately turns out to be a case of insurance fraud, with two suspects making a suicide look like murder so they can still claim the insurance.
* Ellery Queen; while the deaths are plotted on the map, the pattern is irrelevant. (There turns out to be a far more sinister link between the victims.)
* Ellery Queen who frequently assists his father who is a police inspector.
* Ellery Queen), with his late mother having been the daughter of a New York society family. However, as the series went on, his character developed and he lost most of his snobbishness (except on intellectual matters) and developed an interest in some decidedly blue collar pastimes such as boxing and baseball.
* Ellery Queen you that you now had enough clues to prove who the murderer was. After that, Ellery Queen would do the big 'one of you is the murderer' speech and solve the murder.
* Elle shows Sylar how to use his new lightning powers in this manner in
* Elle's replacement, Emily Prentiss, is the daughter of diplomats and spent her childhood moving around Europe. Throughout her tenure, she demonstrated familiarity with Russian, Spanish, French, and enough Arabic to identify its accent (Egyptian, though she was not shown to actually speak it, she was brought on as a translator in case the terrorist they were interviewing switched to his native language).
* elles "they, those women", are only allowed when talking about an all-female group of individuals. If the sex of the group is unknown, or there is at least one male member, then the masculine pronouns are used instead.
* Elleston Trevor, Mr. Bishop," and take his orders without much question.
* Elleston Trevor. The hero became aware of a series of mysterious deaths of people who'd been sentenced to execution but simply fell dead before the government could kill them. The weapon was hand-held, with a range "limited only by the curvature of the earth," and made no noise or flash.
* Elle, the dinner party Michèle hosts for her friends and family goes south when her mother announces she's engaged again, to Michèle's displeasure.

* Elle, when Michèle thinks the rapist is coming back in the middle of the night.
* Ellie also had greenish hair early on, but it was darkened to black by Season 2.
* Ellie. Although she is one of the most obese characters in the game, speaking to other characters and listening to audiologs reveals that there are some people on Pandora who like it that way.
* Ellie girlfriend during high school to throw off suspicion, until they started developing a co-dependent relationship because of it.
* Ellie Goulding, but was dropped to make the album more ballad-focused.
* Ellie Goulding from "Outside" music video are prominently shipped together because their other major collaboration "I Need Your Love" featured the two characters (also played by them) as an adorable couple as well as Goulding and Harris's real life friendship.
* Ellie Goulding soundtrack, which peaked one rung lower. This is averted in most other countries, where "Love Me Like You Do" was easily her biggest hit.
* Ellie Goulding "Starry Eyed" made her into a household name in 2010. However, North America didn't join in until 2012 when "Lights" became hit over a year after its release.
* Ellie Goulding's "Your Song" was used in a John Lewis-esque commercial for Kraft peanut butter.
* Ellie Goulding, which certainly explain the fantastical elements in the video.
* Ellie has an unbreakable switchblade so she can always defend herself from clickers which stops you from worrying about keeping shivs on you at all times like you did in the first game. Although, you do have to worry about it when playing as Abby.
* Ellie is the ultimate Cool Big Sis. She practically raised her younger brother Chuck by herself after their parents left their lives, is willing to lend an understanding ear to his problems, and is just generally an awesome person.
* Ellie Kemper (briefly played college field hockey before going into comedy and acting)
* Ellie Kendrick in the "New Characters" featurette for Season 3, Jojen Reed is sometimes called "the Little Grandfather" because of his solemn wisdom.
* Ellie May's engagement to a "Naval Frogman" and Granny's belief that this means he turns into a frog from the bellybutton down when he gets wet. Lasted most of a season.
* Ellie Nesler shot and killed her son's accused molester in the courtroom in 1993.
* Ellie On Planet X: Ellie is the first link between Earth and the planet's adorable aliens.
* Ellie Rose is an even bigger example than Henry himself, as her morality completely depends on Henry's actions in
* Ellie Sattler in the original Jurassic Park novel. In the film she wears a top that covers her midriff under her pink knot-up shirt.
* Ellie seems quite capable of taking care of herself. They also butt heads more on Ellie dismissing Moxxi's demands that she lose weight and gussy up. Ellie, however, seems to have no problems with her body image and claims to have plenty of male admirers.
* Ellie's funeral is shown in a single scene toward the beginning of
* Ellie, shaken from witnessing her father's murder and Chuck's abduction, getting Awesome and Morgan to help her run a Pincer movement on the van holding Team Bartowski captive and succeeding.
* Ellie's stealth playing style carries over to the second game. She's able to sneak past entire encounters and her segments have plenty of hiding spots. She can also find lots of crafting elements to make things like smoke bombs, Molotov cocktails, and exploding traps instead of ammunition to encourage stealth over action. Once you play as the secondary player character Abby at about the 40% mark of the story, the gameplay becomes more similar to Joel's in the first game. She's more of a brawler than Ellie and almost strong as Joel, bringing the melee element back. Fighting stealthily as her is a lot harder than it is as Ellie since the game

takes away most hiding spots. You're also more likely to find ammunition than crafting elements, encouraging a more guns blazing style.
* Ellie was a search-and-rescue dog. During one rescue, she got acid on her nose which killed her sense of smell. She couldn't smell more than a few feet in front of her and thus she was retired.
* Elli is named after "Ellios" the Greek word for "sun" as stated in the first chapter.
* Ellimist Chronicles disaster on Earth back when Mars still had life, but he intentionally did not interfere with the progress of an asteroid towards the planet because he saw more potential in those tiny mammals.
* Ellimist created one between two warring planets soon after constructing his ship body.
* Ellimist, who was already millions of years old when Earth was just beginning to form.
* Elliot also discovers the joy of masturbating in one of the earlier episodes (thanks to Carla's advice about washing machines).
* Elliot and Ashley and served as a turning point in the arc, as they transitioned from two characters on a date to an actual couple.
* Elliot and Ashley linger in front of the book store. to let him know that there's a strange creature a the mall.
* Elliot and Ellen started out being almost exactly the same apart from their genders, but that is
* Elliot and Marvin needing Claire/Leon to find a way out of the station seems rather jarring, given that neither the front doors nor the main gates are in any way locked, allowing just anyone to stroll in as they please. In fact, that's exactly how the scenario A character entered the precinct. But after exploring the East Wing and returning, the front doors are magically barricaded, though this can be easily handwaved that Marvin and the first run protagonist were able to barricade the doors after saving their life. Given the
* Elliot and the Musical Journey: Tristan is locked in a cage when you see him.
* Elliot blowing hair out of her face, which emphasizes her neuroticism.
* Elliot Carver has his mooks do this on purpose at the beginning of the
* Elliot Carver just to get broadcasting rights in China and jack up his news network's ratings.
* Elliot convulsing while driving and singing along to "Bye Bye Love" by
* Elliot himself instead, while Tedd assumes the role in most other cases.
* Elliot initially had no interest in remaining female for long and considered his gender-bending
* Elliot is also not on the government's (or most immortals') radar, for much the same reason. As Mr. Verres puts it,
* Elliot is pretty prone to this. "Maybe we can do something a little less girly, like bowling or paint ball or
* Elliot is said to be considered attractive by his male schoolmates and no girls have shown attraction to him.
* Elliot lost his memories of killing his own family with Humpty Dumpty's help.
* Elliot Moose, the show would only have 4 segments, with half being animation and half live-action. In addition, PBS, Amazon and Treehouse shortened the theme song to only the "Elliot Moose is on the loose" sections, while Qubo aired the full theme.
* Elliot Ness Dean effortlessly slips into the bad cop role while Ness plays good cop.
* Elliot Ness had a major case of this. In a famous example, while having dinner with his wife, he heard police sirens and jumped to his feet to join the chase. Since he now happened to have a nice selection of police with him, he decided to keep on going and lead them to bust a drug operation he knew of. His wife was simply left to wait at the restaurant.
* Elliot Ness was a member of the taskforce that Cade led in destroying
* Elliot Page as well as most of the other characters he's portrayed in films turned out to be lesbians.

* Elliot Page (a transgender man) and his ex-wife Emma Portner (a lesbian); they amicably divorced shortly after Page came out as trans, causing many to believe it was due to this trope.
* Elliot Page character Hayley to be a survivor of child molestation, and based his performance around it.
* Elliot Page DVD shows his audition, and his face is so gaunt it's no wonder he had to gain back the weight in order to play a pregnant girl!
* Elliot Page in her neighbor's basement. When asked if he was eating normally, he said: "No, because Sylvia wasn't being fed."
* Elliot Page in real life. Sadly, these same people haven't seemed watch any of his other movies or seen him in real life.
* Elliot Page together, both times playing fucked up people on good terms with one another. In the former, McCabe-Lokos helps Page's character, and in the latter, it's the opposite.
* Elliot realizes he loves Sarah like a sister and decides to downgrade their relationship to close friends. Sarah is fine with it for her own unrelated reasons. However, this opens this trope back up, as longtime friend Susan.
* Elliot Reid was for the most part of the first few seasons highly enthusiastic and quick-talking, tempered with bouts of self doubt
* Elliot Rodger, the 2014 Isla Vista shooter. He wanted to kill his own half-brother as part of his
* Elliot's boyfriend Keith, whom Dr Cox dubbed 'the Dude Meister' actually turned out to be called Dudemeister.
* Elliot S! Maggin (a time traveler who uses his era's tech to be a superhero).
* Elliot S! Maggin, Lex Luthor is being held by a group of aliens and they call him an "Earthling". He comments that he prefers the term "Terran" and the aliens explain that their translator returns the best word to the being hearing the translation, based on his/hers/its own perceptions. Thereafter, he hears the word "Terran".
* Elliot S! Maggin once wrote that Krypton's gravity was so great that every explorer from another planet who had landed on, or even approached Krypton was unable to ever return. Krypton gained an ominous reputation as a "black hole planet", whose gravity was inescapably strong.
* Elliot S! Maggin to cause a localized earthquake, which knocks Lex out until the gizmo's effects have worn off, and Superman then flies around at super speed, repairing the damage he caused with the earthquake.
* Elliot spent much of one episode sick as a dog because he's on anti-AIDS medication (after being exposed
* Elliot spent the party in a female form with knee-length hair. His in-universe justification was that it was a ploy to get Justin to go (Justin enjoys playing with hair), but it also served to visually-distinguish him from Ellen and to highlight his increased comfort with taking on a more stereotypically feminine appearance.
* Elliot Stabler. While he faces some in-show consequences, said consequences do nothing to stop him, his conduct crosses the line into
* Elliot/Susan. The latter's issues with intimacy and physical contact are probably the biggest obstacle to this ship setting sail.
* Elliott also dyes her naturally dark blonde hair to a bleached blonde in season 3 and keeps it that way for the remainder of the series.
* Elliott from Earth features an alien snack called Kretzels. According to various characters they taste like earwax and feet. Their slogan on the bag is "Now banned in 4 galaxies!"
* Elliott from Earth has an alien junkfood called "Kretzels". The slogan on the bag is "Now banned in 4 galaxies!"
* Elliott from Earth. In the second episode, when Frankie holds her son's hand, Elliott protests that he is an 11-year-old boy, saying "we don't need to hold hands in public." Frankie replies that she is a 36-year-old woman on an alien planet, this is for her benefit.
* Elliot thinks that Turk not choosing the only female in the group of candidates

to be his assistant is sexist, and has Carla
* Elliott Roosevelt after working hours. The murderer uses a simple trick to lock the door behind him in a failed attempt to make it look like suicide.
* Elliot within the first three episodes gets off on the wrong foot with Carla, J.D. makes her apologize and then she always adds "you know I'm right" or "But (excuse)". There is added dream sequences of her digging her own grave to prove the point!
* Elliot worries that he's "a bad guy" because he gets angry sometimes and he used to be a
* Ell is a holy mage that not only uses defensive magics like heals and shields, but can also whip out a wicked attack if necessary.
* Ellis also discussed this phenomenon in "Woke Disney", where she talks about how Disney's live-action remakes of its animated films (in particular,
* Ellis attempts to locate other survivors with "Ca-caw! Ca-caw!" if he's sufficiently far away from the others... Or if he's the last man standing.
* Ellisberg, NY was turned into the personal fiefdom of the supervillain Nilbog following his trigger event, with his creations attacking any and all outsiders.
* Ellis Peters. A man and his pregnant wife are passengers on a ship. The ship catches on fire and the passengers must evacuate. After she gets her life jacket on, a ship's officer drops her over the side into the water, where she sinks like a stone. The man jumps in after her. The story ends with a line about how they'll never know if he jumped in to save the girl or to save the 30 pounds of gold being smuggled in her fake maternity bulge.
* Ellis Peters detectives, so anyone qualified to do the job would be an amateur.
* Ellis Peters feature police detective George Felse and his son Dominic; some of the novels focus on George's official investigations, while some have Dominic acting as an amateur sleuth with George as his friend on the force.
* Ellis Peters feature police detective George Felse, with his wife Bunty and son Dominic in supporting roles. Dominic gets three novels in the limelight, in which he stumbles into mysteries while on holiday, and Bunty gets one, in which she discovers a murder while George is out of town and has to solve it herself before it's too late for the prime suspect.
* Ellis Peters has two people, who had never seen each other but are primary-importance characters, do this in one of the
* Ellis Peters novels have this as an element of their romantic B-plots, reasonably enough, considering they're set in a time and place when arranged marriages were closer to the norm than the exception for anyone in the merchant class or higher.
* Ellis Peters she wrote under that name, but her real name was Edith Pargeter and she wrote many other books under her real name.
* Ellis Peters was really Edith Pargeter. She also published less-famous mystery novels as Peter Benedict, Jolyon Carr, and John Redfern.
* Ellis Peters were published from 1951 to 1978. The first novel is explicitly set in 1949; after that, they're not specific, but the background setting details keep pace with passing time, while the recurring characters age a year or two from book to book, even when the gap between books is larger. This is particularly noticeable with the second book, which was published a decade after the first, and has a plot point depending on a law enacted in 1957, but George and Dominic have aged only two years.
* El Llano en Llamas by Mexican writer Juan Rulfo mentions that warm beer tastes like donkey piss (which prompts the question if cold donkey piss tastes like beer...)
* Elln is an immortal witch who loses her memories blocks at a time, and so she acts as childish as she looks.
* Elly really is Fei's first love, as they have been lovers for 10000 years via reincarnation.
* Ellyse Perry has represented Australia at both cricket and soccer, being declared the Australian women's cricketer of the year three times and the international women's cricketer of the year twice; she has been dubbed Australia's most marketable sportsperson.

* Elly. She'll also very cheerfully converse with demons simply for the sake of doing so, as opposed to the other party members, who only do it out of necessity.
* Elly/Sophia also fits the archetype of selfless love and self-sacrifice, like her
* El Mago de los sueños, an animated movie first released in Spain in 1966.
* El Mariachi apparently realized that his microscopic budget wasn't going to afford any supermodels, so he'd better not go overboard.
* El Mariachi as the star of the film. Carlos got a cameo to make up for it.
* El Mariachi, he also edited the film himself (using the same awkward videotape editing method he grew up using as a kid) and did all of the sound recording and dubbing. After he got a distribution deal and full Hollywood resources, he balked at spending $3000 for professionals to take 3 weeks subtitling the film and did it himself over a weekend.
* El Mariachi. Here, the title character falls in love with Domino, the girlfriend of druglord Moco. The Mariachi survives, but Domino isn't so lucky.
* El Mariachi plays this straight, which is what kicks off the plot as there's two men "dressed in black, carrying a guitar case" walking around town. Apart from that, neither of them look anything like each other.
* El Mariachi pointing out all the goofy tricks he was forced to use to fit into his $7,000 budget.
* El Mariachi. Rodriguez said they weren't making that kind of movie, but if he could find the women then Azul could have a couple of female bodyguards instead. The women are shown in bed with Azul, but after he leaves a minion creeps into the bedroom hoping to get some action only to find himself facing several guns.
* El Mariachi, the main antagonist shoots the mariachi's hand, preventing him from playing guitar.
* El Mariachi, which has the title character, a musician, mistaken for an assassin who carries a guitar case full of weapons who is out to kill the local drug lord.
* El Marvo: Knuckle Duster uses one of these in the first issue to descend an elevator shaft.
* El Marvo wore an eye patch, and is presumably a respected member of Sokrates' organization, as he was first seen in the comic performing executions in the name of him.
* Elma, she ends up getting banned after eating more than 100 plates of food in the two-hour time limit.
* Elma's Office Lady Diary has Elma and Kobayashi end up in the middle of the Australian wilderness after going barhopping.
* Elma's OL Diary, Elma, who is seeing a movie in a theater in the first time, is informed by one of her co-workers of this practice and, assuming that it's mandatory, attempts to do this to those that she's sitting next to, resulting in her kissing Kanna on the cheek and having an awkward moment when she tries to hold Fafnir's hand.
* Elma's OL Diary, Kanna and Saikawa hold hands while watching a film together after Kanna assumes that the film is scaring Saikawa (when in reality, she saw Elma kissing Kanna on the cheek due to the harmony dragon assuming that making out in theaters is mandatory and thus doing Type B to those she's sitting next to).
* Elma's OL Diary when Elma "protects" her during a mixer by preventing any of the guys from interacting with her directly.
* Elmer, about what happens when chickens achieve sentience and fight for their rights.
* Elmer Fudd — or his prototype, Egghead — was originally voiced by Danny Webb, and later recast with Arthur Q. Bryan around the same time the character evolved to his definitive version.
* Elmer Fudd ran away from the Sheriff after seeing Weetabix on his table. The Wooden Horse of Troy came to life and made a run for it after seeing the Trojans eat Weetabix. Delilah cuts off Samson's hair, but flees when she sees he is about to eat some Weetabix. Only poor old Ned Kelly failed to use Weetabix-induced superpowers; he couldn't get the spoon through the slot in his helmet.
* Elmer Fudd short, an ant says this after Elmer harassed some ants with

firecrackers.
* Elmer Fudd's" weather control powers. But as he was carrying off Bugs's body Bugs looked back at the audience and said "What did you expect in an opera, a happy ending?"
* Elmer Fudd were created so they could more properly provoke Bugs and rightfully earn his vengeance.
* Elmer Fudd, whom Bugs almost always tricks effortlessly. In Bugs’s very first cartoon, he breaks down crying because he thinks he killed Bugs... the very same rabbit he set out to kill in the first place.
* Elmer Fudd, who was convinced that Bugs looked too much of a 'bully' when pitted against him and thus made him into a more pro-active hero against the meaner-spirited outlaw, Yosemite Sam.
* Elmer Gantry and its adaptations. She cultivates the outward appearance of a successful, articulate preacher, but Elmer discovers that she is deeply disturbed. In private, she toggles different personalities, including a petulant child-like persona and a pseudo-pagan priestess.
* Elmer Gantry is a self-absorbed sociopath and a religious huckster, who nevertheless speaks warmly of his mother. Part of the reason he became a minister at first is that he genuinely wanted to make her proud. Elmer admits to Sharon that she and his mother are the only women he's ever respected.
* Elmer Rice's second wife, Betty Field, played the leading role in three of his plays.
* Elmer's been through a lot and is a crowning example of this trope.
* Elmer's equally messed up buddy, Huey, is known to do or say tremendously disturbing things such as setting his hand on fire while still maintaining a polite smile.
* Elmer the Boil Kid. His boil (Bob) has a mind of its own and wants to take over the world.
* Elmer uses the trap a third time in "Pests for Guests", this time on the Goofy Gophers Mac and Tosh. As soon as the trap falls, the sounds of a car driving are heard from inside, followed by a loud car crash. An alarmed Elmer lifts the box to see what happened, accidentally letting the gophers out.
* El miedo no anda en burro) starring la India María as María Nicolasa Cruz. To go into greater detail:
* Elminister has a pretty decent beard, and he's the biggest badass in the
* El Ministerio del Tiempo (Portugal), with remake rights also sold to China, France, Germany and Italy.
* El Ministerio del Tiempo: The eponymous Ministry's ongoing job is to find the gates that open between different time periods and prevent history from changing - or restore it if someone manages to cause the change.
* Elminster in Myth Drannor, Cormanthor's greatest elven high mage sacrifices his life to create the city's mythal, his life's work.
* Elminster in Myth Drannor features fish-feeding, but with separate mincing (elves are tidy):
* Elminster in the novels is one of the most powerful wizards in the world, had an affair with the
* Elminster is very killable, but it's EXTREMELY difficult since he has -30 AC (only a 5% chance of hitting him since only a natural 20 will work), 1800 hp, and will despawn if he can talk to you which he constantly tries to do. An attempt requires boots of speed and the throwing axe +2, and managing to avoid him at his first encounter so you can come back later. It takes about 3 hours of running a circle chucking the returning axe at him. He awards 26000 xp.
* Elminster refuses to reveal the big secret behind the protagonist's past he's been hinting at, declaring that "self-discovery is best left to the self."
* Elminster's Daughter. "It had taken two years of retching weakness to build up a resistance to killing doses of staeradder", but being able to use a fast-acting poison freely was worth it since his most dangerous foes were other wizards whom he couldn't expect to quickly defeat by magic.
* Elminster: The Making of a Mage, no less. "Well met. Call me Elmara, please!"

* Elminster: The Making of a Mage of himself named Elmara) on how elves live in tune with nature, while humans destroy everything which they can't control.
* Elminster the Sage once had a romantic relationship with Mystra, the goddess of magic (chronicled in the first three books of
* Elmo & Patsy chart was a mere #48 on Hot Country Songs in 1999. In Canada, the higher-charting version was a #20-peaking release by the Irish Rovers in 1982.
* Elmo became less than popular to a large number of the show's longtime fans, mainly because the show's focus somehow shifted onto him and less on the other Muppets and characters, and because of his immense popularity from the mid-1990s to the 2000s. Made worse by Sesame Workshop deciding to assign a fifteen-minute segment of
* Elmore James (one of the first great electric slide guitarists, popularised Robert Johnson's "Dust My Broom")
* Elmore Leonard has written several prominent Marshal characters, many of whom have appeared in other media, including Raylan Givens, Karen Sisco and her father Marshall (retired, and yes, he was "Marshal Marshall Sisco.")
* Elmore Leonard seems glaringly out of place as a supernatural thriller compared with the rest of his collection of crime novels.
* Elmore Leonard sidekick for most of the book, quickly realizes that Raylan is extremely deadly and should not be antagonized or threatened.
* Elmos Adventure In Grouchland, Oscar berates his fellow Grouches for letting Huxley constantly take their stuff, and rallies them to defeat the villain.
* Elmo Saves Christmas has Maya Angelou telling the special's story to Telly and Zoe after they wish it was Christmas every day.
* Elmo Saves Christmas. In this bad future, The Count is so sick of celebrating an entire year's worth of Christmases, that he is even sick of counting them! Naturally, this sparks a shocked reaction from Elmo.
* Elmo Saves Christmas. Oscar the Grouch is the only one who loves it being Christmas every day, not just because of everyone else's misery, but also because he is getting tons of garbage in the form of wrapping paper and used Christmas trees. In fact, when Elmo announces that he is going to use his last wish to turn everything back to normal, Oscar protests and tells Elmo to use his last wish to get some new roller skates, since that was what Elmo's original plan was.
* Elmo Saves Christmas, Santa gets stuck in Elmo's chimney and Elmo rescues him. Santa rewards Elmo by giving him a snow globe which can grant him three wishes. Elmo uses his first wish to wish for a glass of water. When Santa and Lightning the Reindeer call him out on it, Elmo defensively replies that "Elmo was thirsty!" Lightning and Santa name off a few things he could have wished for, like a real fire engine, a castle, or a kingdom. As they leave, Santa tells Elmo not to waste his last two wishes.
* Elmo's Christmas Countdown has Stiller the Elf telling his snowball friend Stan the special's story.
* Elmo's Potty Book: A scene has Elmo doing this while at the playground.
* Elmo's Wash and Dry bath book that shows Elmo doing this at a laundromat.
* Elmo's World from the Books episode, Elmo is cast as a knight. When he explains to the dragon that he is a monster, the dragon runs away in fear.
* Elmo's World is shown at the tail end. Starting in Season 38 and lasting until Season 45, Murray opened each show by talking to real people who demonstrated "the Word on the Street" and would announce the sponsors at the end.
* Elmo's World plays up the "quack doctor" metaphor; a duck dressed as a doctor shows up a few times.
* Elmo's World" segments has Elmo determine today's topic by opening one of these.
* Elmo will sing a song about having an accident if you don't put him on his potty.
* Elm Street got a three-issue adaptation by Innovation Publishing, which also made two prequel series' to the film.
* Elm Street is a partial subversion. Jesse is the only male protagonist of the series, and the one Freddy targets throughout the movie, making Lisa's role as Final Girl very limited. Lisa doesn't so much kill Freddy as drive him out of his possessed victim Jessie, who also survives in a rare case of Final Boy.

* Elmuh Fudd Syndwome: A speech impediment where Ls and Rs are pronounced as if they were Ws.
* Elmuh Fudd Syndwome), the rabbit angrily responds "You share!", kills them and runs off with the Trix. So satisfying to watch...
* El Mundo Gira" reveals that the Chupacabras are actually illegal immigrants who have been infected by an alien fungus.
* El Mundo Today fun of them and their attempts to censor free speech.
* Elmwood Park, Illinois - a seemingly boring Chicago suburb that was actually built as a colony for mafia members (like the notoriously violent Jack Cerone) eager to leave the inner city. The community was founded and run by the Chicago outfit and to this day serves as the base for the mob's white collar crime faction.
* Elmyra-centered episode, her mother and sister do this while trying to catch her baby brother.
* Elmyra does this to Brain every time she thinks he is swearing (when he is actually just indulging in
* Elmyra enjoys seeing someone other than himself taking all the pain for a change.
* El Nino Mariposa: The Ferrotophagous are big metalic insectoid iron-eaters.
* El Niño, a regular reversal of weather patterns, which can lead to crop failures and famines in certain parts of the world. Dynastic changes and rebellions in China have a tendency to happen during El Niño years.
* El Niño, a weather phenomenon which causes severe conditions worldwide, gets its name from the shortened form of
* El Niño de Navidad – a Spanish allusion to the newborn Christ – because it tends to be strongest around Christmastime.
* El Niño is one of many reasons agriculture never developed in Australia.
* El niño mariposa are big metalic insectoid iron-eaters that destroy civilizations.
* Elnor as a boy is so incredibly endearing that Jean-Luc Picard — who is notoriously uncomfortable around kids (even the Qowat Milat nuns are aware of this fact) — not only likes Elnor very much (those are his own words), but they even develop a surrogate father-son relationship. Elnor is quite possibly the cutest child in the Beta and Alpha Quadrants for Picard to overcome his innate discomfort and connect with the boy on such a personal level, and their bonding is one of the sweetest moments on the series. Even as a young adult, Elnor retains a boyish quality (e.g. he longs to see a cat in person) because he had a sheltered existence while living among the nuns, so he's still naïve (e.g. the concept of lying is foreign to him), and he's also fairly ignorant about the rest of the galaxy because he had never left Vashti before. Showrunner
* Elnor carries a tan qalanq, a Romulan sword, instead of any kind of energy weapon, thanks to his training by the Qowat Milat warrior nuns. "
* Elnor fulfills three of the five main criteria. He has an Open, Emotional Personality (being a disciple of the Way of Absolute Candor means that he always expresses what he's feeling, and he's very good at reading the emotional state of his crewmates as demonstrated in "The Impossible Box"), Typically Feminine Interests (by Romulan standards, he's considered to be effeminate because he was cared for and trained by the Qowat Milat nuns; he dresses and behaves like they do, so he's perceived to be doing "women's work"), and Effeminate or Non-Masculine Appearance (he's a
* Elnor's crewmates don't always appreciate him pointing out what they're feeling, especially when they're emotionally vulnerable.
* El Norte es una quimera and along that, the language barrier, and the cultural shock between the cosmopolitan city and the very quaint (at the time) Caracas, the poor dude was so shocked that back in the country he complained on his perceived slights of N.Y., and how most to the returnees came back with a swollen head. Still, too many people sing the thing straight.
* El Norte is a very dark take on this, focusing on the suffering and despair of two Guatemalans who enter the United States illegally after facing persecution in their home country.
* Eloise Hawking lecture by her about how the Island was found, why it's so hard to

find the Island, what they need to do to return...followed by a shorter scene where she tells Jack even more detail about why he has to return...
* Eloise Pritchart is called "Ellie" by both her closest friend Kevin Usher and by Javier Giscard, who is the love of her life. Interestingly, her
* Eloise: Stage 2. It has a cult following, especially with those who read the books as kids or watched the 2000s animated series and live-action TV movies.
* Eloise takes place in an abandoned hospital, where the protagonist and three other characters invade an abandoned part (thanks to a fire) of a psychiatric hospital. Later everyone begins to be affected by the ghosts of doctors and hospital patients.
* Eloïse's Lover: After getting caught in the rain together, Àsia and Eloïse kiss before they have sex.
* Eloïse's Lover: Àsia and Eloïse finally kiss after much obvious attraction when they're caught in the rain.
* Eloïse's Lover: Àsia becomes attracted to another woman, Eloïse, then begins a secret romance with her.
* Eloïse's Lover: Àsia keeps her relationship with Eloïse secret due to homophobia from her loved ones.
* Eloïse's Lover: Àsia shows no sign of ever finding women attractive before meeting Eloïse, who stirs desire in her.
* Eloïse's Lover: Eloïse is shunned as a weirdo and "dyke" by other students. Initially it doesn't seem to affect her, though after Àsia comments about it she says of course it does, as she'd have to be inhuman otherwise. Eloïse simply keeps her pain about it hidden.
* Eloïse's Lover: Eloïse leads Àsia to swim around naked in a hotel pool after hours with her.
* Eloïse's Lover: It's left vague as to whether Àsia is attracted by her boyfriend, or indeed men generally. She cares about him, but their relationship (from her at least) is not much different than friends (aside from a few kisses that he initiates, they aren't intimate onscreen).
* Eloïse's Lover (queer female main character, lesbian supporting character; subject matter includes queer female romance, LGBT youth, LGBT awakening, homophobia)
* Elona allows you to marry any character you can recruit, regardless of gender (or species, for that matter). And you can recruit almost every single character in the game.
* Elona, and it's often a way to find hidden passages. If you have a really high digging skill, you can even break out of jail by just digging through the walls.
* Elona: any NPC related to a quest which is identical across all games will have the exact same name in all games. Shopkeepers, NPC adventures and townsfolk will have randomly selected names which vary from game to game.
* Elona as of the later patches of Elona+, glaringly being rather technologically simplistic compared to most of the human factions (using plate mail and tonfas when everyone else has for the most part moved onto machine guns and fighter jets), in spite of possessing the trademark dwarven craftsmanship.
* Elona can go negative, which causes damage each time you go deeper into the negative, and causes more damage the further it goes negative. The Magic Capacity skill reduces how much damage is caused, a skill which can be learned from mage's guild, or you can start out with if your character class is mage or war mage. Additionally, the Elea character race has a racial perk which further reduces the damage in half.
* Elona. However there is a point in doing so repeatedly, as it may give you the cannibalism trait, which lets you eat human flesh without penalty.
* Elona includes working in farms, exploring dungeons, paying bills, slaughtering a whole town's worth of children...
* Elona shouts from soldiers trying (and likely failing) to stop the rampaging giant.
* Elona, though, since each item you inherit requires buying an "heirship deed".
* Elona to denote their difficulty and abilities. This leads to oddities such as

Juere swordsmen and robbers with purple and red skin, among other things.
* Elona will wander about the continent, clearing dungeons, finding treasures, and visiting towns on their own. Every time you bump into them, you can challenge them, barter for their equipment, hire them as bodyguards or romance them.
* Elona" with anybody you've married, regardless of gender or species.
* Elona, you can be granted a wish if you're really lucky. On top of wishing for an easy-to-find item, among the things you can type into the textbox are:
* Elongated Man, and he spends the rest of his rather short life mourning her.
* Elongated Man as well. But he got a measure of victory by the end of 52 — he trapped Felix Faust and the demon Neron in Dr. Fate's tower, while they thought they were tricking him. It cost him his life, but he was reunited with Sue — and it seemed they were going to spend the afterlife as Topper, instead of Nick and Nora.
* Elongated Man. He's just as good as Batman, if not better, but is often overlooked because he's not a gritty, mean, tragic origin guy, nor has he had several movies and TV shows about him.
* Elongated Man to have around to counteract how serious the other heroes are most of the time. Also, this leads to him using his powers in much more inventive ways than EM would.
* Elongated Man was Central City's premier hero and got most of the town's adulation, when Sue met them both for the first time when Flash and Ralph both appeared together at a society function, she was clearly enamored of the more gangly Ralph.
* Elongated Man, was often referred to as the 'Ductile Detective', especially during his stories from the 1960s and 70s.
* Elongating Arm Gag: Character's body part extends a ridiculous distance for the purpose of a joke.
* Elon Musk becomes a guerrilla resistance leader in Entebbe Pact-occupied parts of South Africa during the Great Southern War.
* Elon Musk cites this as his reason for releasing the patents on Tesla Motor Company's battery-technology into the public domain.
* Elon Musk is on the case: having landed a Falcon 9R stage as God and Heinlein intended, he's now
* Elon Musk's attempt to use a submarine to save the children trapped in a cave in Thailand was waved off by professionals who had the situation handled, and was largely seen as him trying to capitalize on the trapped kids as part of a publicity stunt for his company. His meltdown on Twitter afterward certainly didn't help.
* Elon Musk's SpaceX is deliberately designing their vehicles and space suits with this in mind. Compare their
* Elopement: A couple runs away to get married because that's the only way they can.
* Eloquently explained by Jane's best friend Casey that night, after the rehearsal dinner in which Jane revealed all of the lies Tess had told George.
* E.L.O.'s cover of "Do Ya." The album it came from was reissued, after being out of print for years, a month or so after the commercials started running. Coincidence?
* Elouai.com is a dollmaker website directed at girls ages 4 to 14. However, due to the high quality of the art and the vast range of available "parts", it has become subject to this.
* El País, among other newspapers produced in other Spanish cities. Many newspapers have also Catalan-language sections for Barcelona.
* El Paso" by Marty Robbins, both the male love interests end up dead.
* El Patron Alberto and Sucio Dutch Mantel in WWC, given both men had been open in their disdain for each other's first language before they started working together and what exactly they had in common, besides disliking Puerto Rico, was a mystery.
* El perro y el gato. The two protagonists seem like adults but in one episode the dog asks the cat what he wants to be when he grows up, and the dog says he wants to be a veterinarian.
* Elphaba also sees herself as this towards Fiyero, as reflected by the page

quote. When Fiyero and Elphaba do get together near the end of the play, Glinda finds herself in this position, singing a reprise of Elphaba's earlier song.
* Elphaba and Glinda's exact relationship is vague. There are signs of an attraction between the two but it never goes anywhere onscreen and the two eventually part ways halfway through the first book, with Elphaba dying a few years later.
* Elphaba) as Elsa, with her singing and speaking for the Dutch dub and only singing in the German dub.
* Elphaba makes a hammy entrance in "No Good Deed", in which she is raised up through the stage scream-singing "FIIIEEEROOO!!!!!!!!!!!!!!!"
* Elphaba (said Wicked Witch) has a mind-blowing breakdown in the song
* Elphaba's real father, her mother's mysterious lover we only saw in shadow at the beginning, is in fact the Wizard of Oz himself. Elphaba being the product of two different worlds—Oz (via her mother) and our world (via her father)—is the reason her powers are so potent.
* El-P invokes this trope at the end of the song "Stepfather Factory". There's the line towards the end of the song that says:
* El Presidente: Co-production with Colombia, based on the FIFA corruption case, and featuring former Chilean football federation president Sergio Jadue as his main character.
* El Profe kicks Disiple and Lady Demonique out of New Wrestling Stars and WWC's Starr Wrestling Club on account of their losses to TNT and
* El Profe went ballistic after losing to Monster Ripper at WWC's 18th Aniversario show. While it's true he was tripped up by her manager before getting pinned, his had tripped her up first to give Profe that advantage.
* El que merodea en la lluvia, who is now roaming the Chilean countryside.
* El Rey Network was shut down on December 31, 2020, a month after Univision sold its minority stake in the network, and in the wake of its losing distribution throughout the past year, having been dropped by AT&T and Spectrum, among other cable companies.
* Elric, and ultimately survives the destruction and re-creation of the universe to spread its evil anew.
* Elric of Melniboné, Elric is entertained by his court musician torturing a tuned array of slaves, each of which has been surgically altered to scream one perfect note.
* Elric of Melnibone stories referred to Elric as a nigromancer, evidently meaning someone who uses black magic.
* Elric of Melnibone story has Elric teaming up with other incarnations of the Eternal Champion to take down alien wizards that had come to his world from beyond his reality. It's even more awesome than that summary makes it sound.
* Elric of Melnibone summons Arioch several times for help and information. In return... well, his typical battle cry is "Arioch! Arioch! Blood and souls for my lord Arioch!"
* Elric stories features a crossover in which several incarnations (including Elric himself) are pulled together by fate to fight alien wizards. It managed to be even more epic than it sounds.
* Elrik's Spell of Magik Metal Disintegration creates a cone of rippling red energy that destroys all magikal items it hits.
* Elro, going up against Lawrence. Lawrence can shoot Elro, throw knives, punch him if he gets too close, but unless he runs out of HP, Elro keeps. On. Coming. Good thing you're playing Elro, and your job is just to No-Sell Lawrence's attacks while you keep marching up and stabbing him.
* Elrond has outlived every nation in the world, but he's still a kid compared to Glorfindel (well,
* Elrond is the son of Eärendil, who's currently flying a ship with a Silmaril in the prow as the morning star, having played a starring role in the War of Wrath by slaying Ancalagon the Black, a literally mountain-sized dragon. He's also the paternal grandson of the chosen herald of Ulmo and the Princess of Gondolin, the maternal great-grandson of Beren and Luthien themselves, descendant

of the Kings of Gondolin and Doriath... really, it would be quicker to list which First Age heroes he's
* Elrond says at one point that they must determine the fate of the Ring: "That is the doom that we must deem." (This comes in handy for those of us who did not know the active tense of dooming something.)
* Elsa and Anna. Fanfiction tends to morph her into a tortured soul who managed to bottle up her grief during the events of the film, and, once everything is back to normal, quickly breaks down and pours her heart out to whatever soul will listen, usually Elsa. The wimpiness of Anna in fanfiction is usually proportional to the strength of Elsa; the more resilient Elsa is in any particular fic, the more chickified Anna becomes. Generally, Anna's sudden chickification is explained by the shock of having her sister back, and the years of loneliness she endured during the film's prologue.
* Elsa and her sister Anna, were born on the winter and summer solstices, respectively, according to
* Elsa. As shown in supplementary material, her little sister Anna views her as
* Elsa, as well as learning to properly control her growing powers. Meanwhile, Rumpelstiltskin falls back into evil, and tries to free his power from its limitations by use of the Sorcerer's Hat.
* Elsabeth Soesten and Brother Hieronymus have no permanent residence and constantly move from place to place seeing what work can be had. Justified for Hieronymus; as a friar, he is tasked to travel and tend to the souls of people wherever he goes, though Elsabeth's reasons for wandering have not been revealed.
* Elsabeth Soesten: The title character sports a long brown leather coat over her shirt, doublet and hose.
* Elsabeth Soesten, who is no slouch with a sword and buckler, and studied with a master named Leonardus in his youth, whom he holds in high esteem.
* Elsa Bloodstone, especially her original costume (since it was based off her father's, but since his bared his chest, and being a Marvel Comic they couldn't really bare hers anymore than they already were, the midriff was left more open seemingly to compensate.).
* Elsa ends up shooting Lauro in a murder/suicide because she realizes he'll never love her, and Henrietta and Jose fulfill a Suicide Pact
* Elsa goes through one throughout the film. She nearly freezes her little sister to death by accident while playing, receives a vision of her possible future where she is seemingly attacked by an angry mob due to her powers, grows up in isolation fearing both that and how her steadily growing powers could harm her loved ones again, loses her parents who were the only ones helping her with her powers and can't even go to their funeral without exposing her secret
* Elsa has a personal secret which isolates her from her family, and is never seen eating. This did not go unnoticed by anorexics. It especially stands out in "
* Elsa has impeccable makeup despite spending most of the film surrounded by water and ice. Even when crying, it doesn't smear. Maybe it's a
* Elsa herself can also qualify; although she is far more emotionally vulnerable than Anna and breaks down several times during the film, her tendencies tend to be exaggerated in fanfic, making her a wreck incapable of human contact as a result of isolation (despite it being
* Elsa herself falls victim to this, insisting she's not too sick to help Anna celebrate her birthday even as Elsa becomes increasingly delirious with fever.
* Elsa herself qualifies, as the Duke of Weselton's concerns with securing his trade interests in her kingdom make this one of the only Disney Princess movies (the other being
* Elsa isn't convinced that Anna can handle the journey to Ahtohallan, since she lacks ice powers. Anna counters by reminding Elsa about her deeds in the first movie:
* Elsa, meanwhile, claims to have sided with the Nazis simply to get the Grail. Although as Indy bluntly chews her out on, she's already been corrupted into a Nazi.
* Elsa meets, where it briefly looks like they are going to be hit by something..

only for nothing to happen.
* Elsanna – Bram Stoker's Dracula, as Elsa stalks Anna before revealing herself.
* Elsanna says “And I like my coffee the way I like my women: bitter, and keeping me up at night.”
* El Santo close to a paragon numerous people wanted to hang out with.
* El Santo didn't have a successor, he had three. Los Tres Fantasticos taking over his feud with Los Misioneros De La Muerte cemented
* El Santo, El Enmascarado de Plata (Saint, The Silver-Masked Man). In these, El Santo has to rescue his love interest du jour from some fantastic threat, such as zombies, vampires, or mad scientists. While the movies are pretty crude, many Mexicans from the time, to current college students to even a few children still consider these movies an important part of Mexico's film history and actually pretty entertaining.
* El Santo is accurate, he continues to wear it in the afterlife as well.
* El Santo — Film series built around the iconic Mexican wrestler. It started in 1958, but the first movies didn't make much of an impression. Only from his third film on, in 1961, did sequelmania start to blossom. Since then 52 films were made starring the original wrestler.
* El Santo reached his status by connecting with the audience in ways he did not even fully understand, The Blue Demon rose to the top through sheer force of talent, being the best-regarded among Santo's many rivals, and Mil Mascaras became a legend pretty much by not losing, ever. In Lucha Libre Internacional and The Universal Wrestling Association, the aforementioned Thesz was succeeded by El Canek, but not even he could beat Mil Mascaras.
* El Santo starred as himself in a series of movies where he was pledged to fight vampires and werewolves and all the various forces of evil, plus alien invaders and assorted mundane organized crime. It's anyone's guess why a professional wrestler should handle these matters, but damned if he doesn't get spectacular results.
* El Santo, the lightweight division title belts tend to be more prestigious in Mexico than the heavyweight division title belts.
* El Santo through and through. Santo's grandsons Axxel and Santo Jr seem to be similar in this regard, but his son, El Hijo del Santo, did become a rudo in CMLL. Even then Hijo del Santo was only bought as a rudo in CMLL and cheered at all of his independent appearances.
* El Santo trio as Los Tres Fantasticos, since Los Missioneros de La Muerte prior fued had really been more about Santo, with his partners their to make things even than being a unit in their own right.
* El Santo (was 64 at his last match (47 year run), dying 2 years later)
* El Santo wasn't the only prominent luchador film star. Other prominent series stars (some of whom would team up with each other and El Santo on occasion) included:
* Elsa Schiaparelli: a latecomer throughout the decade, her early collections included knitwear with fake bows and sailor collars knitted in the sweater.
* Elsa Schneider finds herself dangling from a cliff created by the earthquake she caused when trying to leave a temple with the Holy Grail. In a pure
* Elsa's powers are revealed to the world only during her coronation, while they have been central to the plot since the beginning.
* Elsa's promotional material, to the point where a raised eyebrow and smirk is typically dubbed "the Dreamworks face" online.
* Elsa's reaction when she shoots the first of a horde of what look like clay golems and it explodes spectacularly:
* Elsa's "Show Yourself" outfit and Anna's queen dress, officially called the "epilogue dresses", until two months after the movie came out.
* Elsa's signature snowflake, as it symbolizes the beauty and danger of Elsa's power. They
* El Satánico Dr. No is one of the least popular luchadors of
* Elsa the ghost angelfish from the "Monster Tail" segments of "Wake, Rattle, and Roll" she has a very sweet and soft voice but she shouts at the end of most of her

sentences.
* Elsa wraps her arms around herself whenever she's feeling stressed.
* else calls them names or tries to pick on them, he takes it as his duty to kick the offender's ass in retaliation.
* else. Death occasionally abuses the same principle (along with some temporal trickery) to walk through walls without effort.
* else do you think we were gonna get him in this movie?" Makes sense when one considers that the obvious job for him - chef on the ship - was filled by Long John Silver.
* Else Heart Break powerful and bypass many obstacles, but the Lodge will never acknowledge this and will send you on simple missions and even make plot points of hazards you have already disabled. No matter how well you do, it's always implied that the Lodge are better hackers than you, even though if that's the case they should literally be able to do anything they want utterly unopposed — because you can.
* else it wants after receiving an order from Mom to rebel against humans.
* El Señor Tormenta, which featured a luchador and Catholic priest who did just that.
* else. She wound up taking the First, which protects freedom of assembly, including friendship, and is four better than the Fifth! The judge was not impressed.
* else wanted to, a good headline for them to use might be "Shawskank Redemption".
* Elsewhere averted when Princess Abigail helps Charming escape the kingdom - she's wearing practical travel clothes. Also Snow White wears a more practical outfit in the war against Regina.
* Elsewhere by Gabrielle Zevin — Liz is hit by a car at the beginning. She wakes up on a boat not knowing where she is. She is going to Elsewhere (a.k.a. Heaven), where you age backwards until you are a baby and then you are reincarnated.
* Elsewhere Fic: A fanfic that takes place in the universe of the original work, but uses a fan's original creations as the main characters rather than any canon characters, with the latter sometimes never making an appearance or even gaining mention.
* Elsewhere Fic: A fan fiction set somewhere that is not where the main characters are.
* Elsewhere Fic: A fanfic which focuses on Original Characters rather than the canon cast.
* Elsewhere Fic can also be considered Canon Defilement, again, be careful with throwing this around.
* Elsewhere in Pessimal's work, witches taking pillion passengers on broomsticks or
* Elsewhere in the Core, Doctor Heinfroth is the progenitor of the cerebral vampire strain of undead, and Harkon Lukas is the progenitor of the greater wolfweres.
* Elsewhere in the game, during one of the romance paths, Marcus has the choice to reveal her true gender to her
* Elsewhere in the Pessimal Discworld, the Assassins' Guild School makes it
* Elsewhere in the same book, when talking dog Gaspode was reluctant to help Carrot locate Angua, Carrot threatened to "turn the matter over to Corporal Nobbs," a fellow officer with little in the way of moral objections whose own humanity has been repeatedly questioned. Gaspode's bitter reply: "That's what I like—
* Elsewhere in the same game, you meet several krogan scientists and a krogan mechanic. While the scientists' opinion of their lots in life vary (one is enthusiastic, another simply laments that he's not able spend his time researching better ways to destroy things), the mechanic has a
* Elsewhere in the same trilogy, we see Tran metalworkers douse themselves with water so it'll freeze into a coating of ice on their fur. This grants these cold-adapted aliens a few moments' protection against the ambient heat in their foundry.
* Elsewhere in the Ultimate Marvel universe, Hulk frequently ends up nude when he

transforms. In one case he was witnessed stealing the pants from a fat guy.
* Elsewhere in the world, Blipped people are being prioritized by the Global Repatriation Commission (the international body set up to handle the crises caused by half the world's population coming back to life at once) at the expense of the un-Blipped: among other things, the Blipped getting their prior property, jobs, and finances returned to them by the GRC has led to displaced un-Blipped people ending up in refugee camps. This has motivated
* elsewhere, large Pterosaurs fill this role in damn near every movie they appear in:
* Elsewhere, Meta Knight's side-B turns his sword into a drill with which he flies horizontally across the stage, and neutral-B spins him in place like a tornado (mashing the B button will allow him to take flight). Likewise, Donkey Kong's up-B spins him up into the air like a helicopter. Falco gets in on the spin act, too, with his chain-A. Finally, taking a cue from
* Elsewhere... Mikuru and Kanae describe their training session with Kyon leaving out enough information to make Haruhi think something is going on that really isn't.
* Elsewhere, the Ankh-Morpork City Air Watch is an Air Force that runs almost completely on Magitek. Its commanding officers, Witches who have helped push the concept of broomstick flight way
* Elsewhere, the Cult of the Aten created a very specific kind of mummification that bound the souls of the departed to their mortal remains, allowing them to serve as soldiers following their deaths. Unfortunately, the process often left the victims deranged, either because of the process used to operate on their souls, or because they remained conscious in their tombs; the resulting mummies are barely-sentient killers.
* Elsewhere, the Glass Walkers tribe of werewolves, urban-oriented tribe that they are, deal extensively with technology spirits. Meanwhile, the magical abilities of the Bone Gnawers, who typically live among the urban underclass, generally make use of what the Gnawers have available to them on the streets.
* Elsewhere, we're told that cartographers sometimes got so carried away with drawing sea monsters that they forgot to put the boring countries and so on in at all.
* Elsewhere, when a disgruntled prisoner made the error of saying to Tanty prison governor Peter Bellamy "I know where you live", Peter Bellamy merely confirmed the well-connected con had got his address correct, then mentioned it to his wife over dinner the same night. Mrs Bellamy - a trained Assassin - then dealt with the threat to her husband and family.
* else witness too, and so on, and so on, until he had five kills under his belt.
* Elseworld — Famous characters are placed into a situation which is potentially wildly different from the norm.
* Elseworld: Already-established characters are put into a different continuity.
* Elseworld: A non-canon episode shows a reimagining or "What if" story of the regular continuity.
* Elseworld, before Simon & Shuster, the Swift trademark holders, abandoned their plans to enter the comics market.
* Elseworld by that point, having given into vampirsim). In fact, Bruce's death is the last death shown.
* Elseworld is an expert swordfighter and an ace gunman, but depending on the situation he will only use one weapon, his rifle or his katana.
* Elseworlds (2018): A change in reality leads to Oliver Queen and Barry Allen switching lives, so Oliver has the Flash's powers and costume. When fighting some thugs, Oliver instinctively reaches for his nonexistent bow and arrows.
* Elseworlds (2018) quickly becomes this for Batwoman. She uses her x-ray vision to look under her mask, but promises not to tell the boys. It's also implied that Kara already knew Bruce Wayne was Batman, since she's from a different universe where he's still active. She spends too much time pointing out the suspicious parallels between Bruce Wayne and Batman for it to be anything but intentional.
* Elseworlds after being captured by the American Government wakes up floating in

one and surrounded by dozens of similar jars containing the murdered victims of others from infants to adults that the government had captured and experimented on.
* Elseworlds. Almost every one of these ends with a bucketload of corpses, or maybe the entire universe getting destroyed. It's not our Wolverine, we don't care if this one dies.
* Elseworlds: Barry Allen and Oliver Queen swap lives, so Oliver has Flash's powers. Due to his inexperience, Oliver runs past a building he was going to, crashes into a wall when he tries to fight some robbers, and during an argument with Barry, he tries to charge at Barry at super speed, only for Barry to trip him.
* Elseworlds comics from DC suffer from this problem. Most commonly, they will rehash the origin of Batman with minor variations, but there will almost always be a Joker, a Catwoman, etc, etc, regardless of how illogical they might be in this setting.
* Elseworlds crossover, the minor villain Nora Fries is played by Cassandra Jean Amell, Stephen Amell's wife.
* Elseworlds'' ends with every named character in the Batman world, except Dr. Jeremiah Arkham and, apparently, a female expert in the supernatural, killed off.
* Elseworlds episode set in ancient China, where this discussion occurs about "Master Perry".
* Elseworld's Finest: Supergirl & Batgirl, a flashback showed how Kara lost her planet... and then her hometown.
* Elseworld's Finest: Supergirl & Batgirl and Bruce Wayne, and after discovering his true colors, Kara turned on Luthor at once.
* Elseworld's Finest: Supergirl & Batgirl and Bruce Wayne have this kind of relationship. The Wayne family took her in after she was orphaned, and although she changes clothes around Bruce, there doesn't seem to be sexual tension between them.
* Elseworld's Finest: Supergirl & Batgirl, and she knows Batgirl deduced hers. And Batgirl knows Supergirl knows this.
* Elseworld's Finest: Supergirl & Batgirl are just friends, and the rumors claiming otherwise are only that: rumors.
* Elseworld's Finest: Supergirl & Batgirl are proud of calling him their friend and benefactor. When the truth comes out, Supergirl fears that no one would believe her due to the power of his reputation.
* Elseworld's Finest: Supergirl & Batgirl asks Hamilton who he is, Joker threatens him in a... not quite veiled way.
* Elseworld's Finest: Supergirl & Batgirl backs — and manipulates — the Society.
* Elseworld's Finest: Supergirl & Batgirl into a battery for clean energy machines.
* Elseworld's Finest: Supergirl & Batgirl, Joe Chill shoots Commissioner Gordon and his wife instead of the Wayne family. Before he can run away, though, Barbara Gordon grabs her father's gun and makes him stand still until the cops arrive. This tragedy leads to Barbara becoming a vigilante.
* Elseworld's Finest: Supergirl & Batgirl, joins a super-team and makes friends with Barbara, just like in the mainstream universe.
* Elseworld's Finest: Supergirl & Batgirl: Kara fights The Joker, who had pumped a Kryptonite-based serum into his blood to increase his muscle mass. Supergirl had to resist the K-poisoning until Joker dropped his guard, and then she mustered her strength and decked him.
* Elseworld's Finest: Supergirl & Batgirl manages to befriend her as they work together, and for the end of the story Barbara looks happier and less cold.
* Elseworld's Finest: Supergirl & Batgirl's costumes played it straight (Kara wore skirt and boots; Barbara wore high-heeled boots and her cowl let her long hair flow) but her adult selves' costumes avert it.
* Elseworld's Finest: Supergirl & Batgirl showed up and diverted his attention. Then Supergirl wrenched herself from his grip and knocked him out.
* Elseworld's Finest: Supergirl & Batgirl steals it from him and takes it to a lead-lined vault, saying "I see it as insurance... which I hope I never need to use."

* Elseworld's Finest: Supergirl & Batgirl, Supergirl and Batgirl -Barbara Gordon- figured out each other's identities.
* Elseworld's Finest: Supergirl & Batgirl, Supergirl and the whole Justice Society were Lex Luthor's pawns, who was using them to increase his power, popularity and fortune.
* Elseworld's Finest: Supergirl & Batgirl Supergirl breaks through several ceilings when she goes after Luthor.
* Elseworld's Finest: Supergirl & Batgirl, Supergirl feels weak and sick without knowing why… until Lex Luthor reveals what Kryptonite is and does to Kryptonians.
* Elseworld's Finest: Supergirl & Batgirl, Supergirl's eyes glow red when she decides that she is going to kill Lex Luthor.
* Elseworld's Finest: Supergirl & Batgirl, the latter points to a TV set and says his words are being broadcast everywhere right now.
* Elseworld's Finest: Supergirl & Batgirl, the Man of Steel and his family always manage to wreck his plans.
* Elseworld's Finest: Supergirl & Batgirl tries to warn her against being impulsive:
* Elseworld's Finest: Supergirl & Batgirl will be seduced by his muscular physique. It turns out that she still despises him.
* Elseworlds full of women, children, and the elderly, saying "In this country there's no such THING as 'non-combatants'!"
* Elseworlds has an 1890s version of Batman fighting a villain called the Phantom who is terrorising the ballet. The Phantom is Harvey Dent, once a proud and accomplished dancer, who was horribly scarred on stage when his costume caught fire from one of the stage lights. He is now obsessed with up and coming ballerina Laura Avian and will do anything to make her happy. Even commit murder.
* Elseworlds hero (his power comes from a belt with a fragment of a white dwarf sun.)
* Elseworlds is an avatar for author Doug Moench. He rants about how the heroes "deserved" to lose their powers, even himself (despite technically not having powers at all since his abilities are natural functions of his race), then raves about the coolness of Batman.
* Elseworlds is Superman's Worthy Opponent, impressive for a man with no superpowers. Their rivalry is much more personal than the international politics they are embroiled in, and though they are constantly seeking to destroy one another, Superman, at one pivotal moment, refers to Lex as "old friend". Lex, the irony lost on him, at one point muses that he and Superman could have been close allies had Superman been raised in America.
* Elseworlds, it was revealed that the yellow vulnerability was just a hoax made up by the Guardians to keep the Green Lanterns from getting too cocky. Alan Scott's wood weakness, however, was psychosomatic and imposed by himself; during his early adventures, while fighting some ruffians, one snuck up behind him and hit him with a wooden club. While the truth was that he just didn't pay attention and thus allowed the foe to get in a cheap shot, he instead convinced himself that he had a weakness to the wood and thus couldn't defend himself. Guess he had a bit of an ego going...
* Elseworlds power ring, allowing Scott Free the ability to manifest himself as a green energy construct.
* Elseworlds, shows a world where Kal-El arrived on Earth before 1920 and became a hero during World War II. His presence led to the Nazis escalating their weapons programs to the point where they beat the Allies in the A-Bomb race, and nuked Metropolis, resulting in an uneasy truce between the US and Germany. It also had the nasty side-effect that the Nazis were able to quickly hide the Holocaust from the world - Superman learns of it in the 60's, and by then thanks to complex peace treaties, there's nothing Superman can do about it.
* Elseworlds's powerless son Joel Kent becomes this sort of officer and is shot by his own men in Vietnam.
* Elseworlds stories that have Bruce Wayne becoming a different hero (or a

different hero becoming Batman) will generally have the other hero's
* Elseworlds taking the bullet for JFK, an act that causes him to be paralyzed from the neck down. This, of course, ends his career as the Scarlet Speedster.
* Elseworlds to fight and defeat Jimmy, Kal-El subsequently becoming Superman and moving in with the Kents (who had been offering superpowered individuals shelter).
* Elseworld story called "Batman/Etrigan: A Tragedy", Bruce Wayne is (unknowingly) the host of Etrigan the Demon, who emerges every night to violently battle criminals in Gotham. However, Etrigan is only as restrained as he is because of Bruce's virtue, and in reality, Bruce has been trapped with Etrigan for over a thousand years, pretending to be his own descendant unknown to himself because his servant Alfred (in reality Merlin the wizard), has kept watch over him and constantly changed his identity for all this time out of guilt of dooming him to an eternity as a prison for Etrigan. Bruce attempts to exorcise Etrigan, but the results are disastrous, resulting in the deaths of Catwoman, Killer Croc, Commissioner Gordon and several police officers, as well as Bruce's fiancee Glenda. Bruce consigns himself to repeating the cycle once more as Etrigan's jailer.
* Elseworlds Victor Zsasz, Abattoir, and Cornelius Stirk. While naturally, the aforementioned trio didn't get action figures, it was still a toyline marketed to kids and included mentioning the events like Bane giving the Riddler Venom and making three figures based on Azrael's time as Batman.
* Elseworlds) walk the plank as part of their plan to trap Leatherwing (Batman).
* Elseworld, Ted Kord has State Secretary Felix Faust open up the Smithsonian to break out a crude nuke.
* Elseworld, "Worlds Without End", featured an alternate reality where the Joes were defeated years ago and COBRA now rules the United States. That reality's Destro concealed a weapon called the Parasite Matrix that captures and crushes hostile aircraft in a web of energy in the top of the Washington Monument.
* El Shaddai: Ascension of the Metatron, a few minutes in Heaven is literally years in earth time. Explains why the angels are so old-fashioned.
* El Shaddai: Ascension of the Metatron, a human who wields the weapons of God to punish and purify the Watchers, a group of angels bent on corrupting mankind.
* El Shaddai: Ascension of the Metatron in the middle of an Action-Platformer game. Then it goes back to normal for the whole game.
* El Shaddai: Ascension of the Metatron only says two sentences in the entire game, which are "No problem. Everything's fine.". He repeats those sentences whenever he recovers from a deadly attack, but he never says anything else, leaving most of the talking to Lucifel.
* El Shaddoll Construct is the most powerful Shaddoll, and the orchestrator of
* Elsie and Artie are a succubus and an incubus, respectively, and as different as night and day. Elsie, who has some control over her
* Elsie and Artie are the children of Jane Price, a human, and Ted Harrington, an incubus.
* Elsie, a three-hundred-year-old demon from Hell, is absolutely obsessed with firetrucks. No reason is given, she just thinks they're cool.
* Elsie Dinsmore series, Elsie's aunt Enna, who is younger than her, is very coddled and spoiled. She actively throws tantrums when she doesn't get her way, bullies Elsie every day, constantly steals Elsie's things even when she's not entitled to them just so she can have them herself, and always has her parents scold anyone who dares call her out on her behavior. In fact, she's so spoiled that she continues to act this way even as an adult, after marrying and having children of her own. It doesn't help that her parents are jackasses who condone her behavior because they themselves hate Elsie and her father, Horace.
* Elsie Inglis and her friends were British women who volunteered for medical duty in WWI. A Russian observer said: "No wonder England is a great country if all the women are like that!"
* Elsie the Cow for Borden (And Elmer the Bull, the mascot of Elmer's Glue, which is manufactured by a different part of the same conglomerate).
* Elsie the Cow was a popular mascot for Borden-brand dairy products in the 20th century. In at least one of her incarnations, she was speaking, living in a house,

and wearing clothes, and her son was riding a bicycle.
* Elsinore which casts the player as Ophelia, who's in a time loop trying to change the events of the play.
* El Spanish "-o": Pretending to speak a language by adding stereotypical linguistic markers to words in your own.
* Elspeth often had to be forcibly conscripted, otherwise she wouldn't do it out of fear. A better example is Gideon Jura, who has been suffering from this since he was a young troublemaker. Between the RTR block and the BFZ block, he spent all his time planeswalking between Zendikar and Ravnica, trying his hardest to save everyone: from small villages under Eldrazi attack to random citizens of Ravnica being bombed by a pair of goblins. At one time he spends three days awake and fighting without rest until his body collapsed at the last minute.
* Elspeth Tirel, who actually bears the title of Knight-Errant. Elspeth's defining trait is that she doesn't want to planeswalk; she just wants to find paradise and stay there. Of course,
* El Sulfato Atómico, the title agents have to recover a sulfate that makes insects grow to gigantic size.
* Elsweyr is a massive desert with some tropical jungles at the borders, home to the
* Elsword, a Nasod (a race of robots) found him and offered him a chance to live in servitude as its exchange. He was then healed and given a robotic arm for his missing left, that gives him periodical insanity and urges to hurt people. For a long time after that he's used as the Nasod's human weapon and leads a new group called the Black Crows, until our heroes beat him into submission and free him from his mind control device. He's thoroughly regretful for what he had done while under the influence and grateful for the heroes to free him, so he joined them to atone for his sins.
* Elsword, Field Boss Bater (a stronger variant of Zombie Glitters) has an attack where he pukes out poisonous gas at you that will hurt continuously.
* Elsword. He's not a one-level wonder boss and his theft of the El Shard actually kicks the whole plot into motion. The heroes encounter him three times before he's finally dispatched and other, more dangerous recurring villains take his place.
* Elsword, its spiritual successor, plays this straight. There are currently eight different characters and each character has up to 3 different classes that all play differently.
* Elsword this is prevalent among the characters. It isn't uncommon to see two or even all three versions of one character being paired together in fanworks.
* El Sword to do a hovering dash by placing them around his feet. He can also use them to dash in midair.
* El Tigre can be seen in a crowd scene towards the beginning of the film.
* El Tigre gets into. She does have her heroic moments, though, and helps him win in whatever he attempts, good or evil.
* El Tigre had Frida defeat a skeleton by pointing out there was nothing holding it up, causing it to collapse.
* El Tigre had to battle Sartana of the Dead's grandson; Django of The Dead. El Tigre managed to get Django to drop into a lava pit in the final battle, but came back using the lava around his hands and arms to blast himself back onto the platform and use said lava to retaliate. Until he accidentally touched his own guitar with his lava hands and destroyed himself.
* El Tigre. In one episode, after her goggles fall off and break, Frida shrieks, "Those are prescription!" However, she rarely, if ever, wears them over her eyes.
* El Tigre. In one episode, when his father asks what he's up to, Manny replies "Nothing! Uh, helping the poor!", which satisfies his dad until he actually talks to "the poor," who haven't seen Manny today.
* El Tigre, Manny and Frida start one of these. They subsequently sent to detention.
* El Tigre Manny keeps trying to impress a bunch of reoccurring girls. He usually fails.
* El Tigre offer with a jetpack for incentive. (Which Manny really, really wants)

As Cuervo flies off, Manny tries to console himself by talking about this trope.
* El Tigre. One of the sessions is the fall-catch trust-builder, but it fails when the faller, El Oso, is MUCH bigger than the catcher, El Cucharone, and squashes him flat. ("Hey, I trusted you, man!")
* El Tigre, only for him to set the chain on fire, leaving Manny no other option than to cut it off. Good thing he has a spare at home...
* El Tigre, Puma Loco (in his younger days) ran away with a woman named Dora, leaving Lady Gobbler at the altar. The real kicker was, he and Lady Gobbler were both supervillains, and Dora was the chief of police at the time. Decades later, and Lady Gobbler still holds a grudge.
* El Tigre. Rather than finding his weakness in a book, she just grabbed the biggest book she could find and threw it at Mal Verde... where it bounces off harmlessly.
* El Tigre: Series creator Jorge Gutiérrez based the series' fundamental conflict of Manny having to choose between following in the footsteps of his superhero father and supervillain grandfather on his own childhood in Mexico City as the son of an artist and the grandson of a military man. Also, Manny and Frida's personalities are based on those of himself and his wife Sandra.
* El Tigre: The Adventures of Manny Rivera, and the episode ends as the clash begins.
* El Tigre: The Adventures of Manny Rivera: A played with example. Rodolfo, laying eyes on Maria as Plata Peligrosa for the first time in a while sees her with Holy Backlight and sparkles surrounding her. He has never stopped loving Maria, but this is her heroic crime-fighting alter-ego.
* El Tigre: The Adventures of Manny Rivera: Black Cuervo's mother and grandmother (Voltura and Lady Gobbler) both had failed relationships with El Tigre's father and grandfather (White Pantera and Puma Loco) in the past, with the women still somewhat pining after them.
* El Tigre: The Adventures of Manny Rivera can transform into a flying suit of armor, which he uses to commit various robberies with his spare time.
* El Tigre: The Adventures of Manny Rivera: El Mal Verde's mountain lair is littered with the bones of his victims. The closer you get to his cave, the more skulls there are compared to the rest of the bones.
* El Tigre: The Adventures of Manny Rivera episode "The Good, the Bad, and the Tigre":
* El Tigre: The Adventures of Manny Rivera giant with a taste for human flesh, who has heroes and villains alike terrified of his inevitable rampages. However, his awful dental hygiene ends up being his downfall. Manny finds the artifacts of the superheroes who died fighting him inbetween his teeth, and uses them to rattle him from inside, while Django later reveals that El Mal Verde's cavities are weakpoints that cause him immense pain.
* El Tigre: The Adventures of Manny Rivera; his inability to decide whether to become a hero or a villain is even seen in the opening sequence. However, when push comes to shove, he'll do what's best for his family.
* El Tigre: The Adventures of Manny Rivera in Japan before its superhero the Seventh Samurai turned it into one of the most crime-free towns in the world by defeating the Ninja Monster Clan that ruled it.
* El Tigre: The Adventures of Manny Rivera: In one episode, Manny adopts a baby chupacabra as a pet.
* El Tigre: The Adventures of Manny Rivera: In the alternate ending of "The Good, The Bad, and El Tigre", after having helped Sartana take over the world, Manny double-crosses her and Jango by sending them to the moon. Afterwards, he frees Frida and 'promise' to release his dad and grandpappy after they've had some more time with their conquest status. Which after sixty years they end up completely forgetting to do.
* El Tigre: The Adventures of Manny Rivera is a short, balding, old man with yellow teeth, while Mrs. Rodriguez is a lovely young woman. She also gets way more milage out of the "bachelor charity auctions" he sets up, something he's aware of but can't seem to do anything about.

* El Tigre: The Adventures of Manny Rivera, Manny slams face first at high speed into a clock. When Frida tells him what a good job he's done, but there's still one problem, he touches his back and asks, "...my shattered spine?"
* El Tigre: The Adventures of Manny Rivera: None of the Rivera men bother keeping a secret identity. Everyone in Miracle City, heroes, villains, and civilians alike, know that Manny is El Tigre, Rodolfo is White Pantera, and Grandpapi is Puma Loco. It sometimes poses a problem, as their enemies know where to look for them, but they're usually wily enough to get away with it.
* El Tigre: The Adventures of Manny Rivera plays with this. In the "The End" screen, the Narrator questions "Or...does it?" adding a question mark, then clarifying "Yes, it does", thus removing the question mark.
* El Tigre: The Adventures of Manny Rivera prevents this from permanently defeating her.
* El Tigre: The Adventures of Manny Rivera puts his family in first place than his criminal schemes most of the time, and is often seen helping his grandson Manny and his son White Pantera in beating up the other criminals of Miracle City.
* El Tigre: The Adventures of Manny Rivera: The Aves women are a family of this trope, all with a Rivera man as the ex they’re insane over, fueling their vendetta towards the family.
* El Tigre: The Adventures of Manny Rivera. Their teacher doesn't buy it.
* El Tigre: The Adventures of Manny Rivera: The primary weapons granted by El Tigre's mystic belt are retractable metal claws capable of cutting building-sized robots into scrap.
* El Tigre: The Adventures of Manny Rivera: Trying to get out of doing chores, Manny tricked wannabe hero Albino Burrito into doing them thinking it was hero training. Then all he learned during the chores was indeed useful to defeat a rampaging robot built by Puma Loco.
* El Tigre: The Adventures of Manny Rivera was a villain with the power to manipulate spoons. Mocked for his supposedly useless power, he became a super villain. However, with counseling from Manny's mother Maria, El Cucharon becomes reformed and uses his spoon-based powers to save the day.
* El Tigre: The Adventures of Manny Rivera, "We got you a present, for you to have."
* El Tigre: The Adventures of Manny Rivera, when Manny's soccer team is underperforming he decides to use his Tigre powers to give them a boost up.
* El Tigre: The Riveras. In this family, being a super hero/villain is literally in the genes. Nearly every Rivera male known has been one.
* El Tigre, though he also does it when she is aware of it. He's got it bad.
* El Tigre: White Pantera and Puma Loco turn into monsters after eating fake Guacamole De Los Angeles and we only see their shadows deforming. It's a couple shots later when Manny and Frida return when we see what they've turned into.
* Elton also performed a record-breaking sixty-plus shows in his career in New York City's Madison Square Garden, and an honorary jersey was hung up with Elton's name on it in honor of the feat. The sixtieth concert, deliberately held on Elton's 60th birthday (March 25, 2007) was filmed and recorded for his
* Elton John – Though his father was an RAF officer, he doesn't quite qualify as a barracks rat because he was mostly raised by his maternal grandparents.
* Elton John (39 years), even becoming the godmother of his adoptive kids.
* Elton John, an album filled with dark, introspective, despairing songs about failed relationships and dark character studies, with bits of bitter irony scattered around. Oddly enough, it would later be cited as one of Elton's favorite albums that he made.
* Elton John and his lyricist Bernie Taupin have written many songs about, set in or namechecking New York City, including "Mona Lisas And Mad Hatters" (and "Mona Lisas And Mad Hatters Part II", written in 1988), "Wouldn't Have You Any Other Way (NYC)", "Ticking", "Levon", "You're So Static", and of course, "Empty Garden".
* Elton John) and resigned after failing to qualify for the 1994 World Cup. Following this, he went back to club management and achieved more success during a second spell as manager of Watford.

* Elton John, as it has a very nasal, high-pitched quality to it. Dudgeon assured them that that was how Elton chose to sing it (he was known to experiment with his vocals at the time).
* Elton John, a solid, critically and commercially successful effort which reunited Elton with the classic lineup of his "Elton John Band" (Davey Johnstone: guitar; Dee Murray: bass; Nigel Olsson: drums) and saw Bernie Taupin back as full-time lyricist. Two tracks from the album, "I'm Still Standing" and "I Guess That's Why They Call It the Blues", were Top 10 hits and had popular music videos.
* Elton John, at least by the time he started wearing silly glasses and costumes, had a very extroverted onstage persona, the antithesis of his shy, awkward private personality. Elton also claimed his "Elton John" image was/is the opposite of everything his strict biological father wanted him to be: conservatively-clothed, with a sedate job like a banker or lawyer. Unfortunately, at the heart of his substance abuse problems (cocaine in particular) was a desire to open up more and be more sociable.
* Elton John (best known as a musician, but is a longtime shareholder in English football (soccer) club Watford, serving twice as club chairman)
* Elton John collects his B-sides from 1968 through 1975 along with a few soundtrack recordings and other rarities.
* Elton John cover. It is a lot more piano based than her other songs, which are basically electro-pop with folk elements.
* Elton John, did not do as well critically or commercially as the first one, though it did get some favorable reviews.
* Elton John. Elton saw the performance and was spooked by how dead on it was.
* Elton John features Elton standing full frontal, even with his name on the back of his sweater.
* Elton John Furnish-John. It's unknown if anyone was suggesting that the name be the first one.
* Elton John had good eyesight, but started wearing glasses in homage to his childhood hero Buddy Holly. After more than 40 years, his eyesight has deteriorated to the point that he really needs those glasses.
* Elton John has been going bald since at least the mid-seventies, and has employed all manner of methods to conceal as much. Some of his rugs have looked as real as a three-dollar bill, while others have been shockingly successful.
* Elton John impersonator, much to Geldof's outrage. Basically it's this expanded out to a thirty-minute show.
* Elton John in hospital, whose death prompted him to start the Elton John AIDS Foundation. So the company made an animated video instead.
* Elton John, is intended to be his swan song before he retires to spend more time with his family.
* Elton John. It was released in September 2013, and peaked at #4 on the Billboard 200.
* Elton John, lyricist Bernie Taupin, his backing band of Davey Johnstone (guitar), the late Dee Murray (bass), Nigel Olsson (drums) and sometimes Ray Cooper (percussion), with production by the late Gus Dudgeon and Paul Buckmaster or Del Newman conducting orchestral parts, was arguably collectively responsible for the classic Elton John sound of 1972-1975, and has partially if not fully been involved with Elton ever since. Davey and Nigel have stayed as part of Elton's backing band since 2001, while Bernie has stayed (with few exceptions) as Elton's full-time lyricist since 1983.
* Elton John, often they were led by equal levels of backlash as his profile increased.
* Elton John once said Robert Palmer's video for "Addicted to Love" was a gender-flip of Elton's song "Bennie and the Jets", as Bennie was a girl singer and the Jets were her all-male, homogenous-looking backing band.
* Elton John, prior to his hair weave operation in 1992, was known for dying his hair in different colors, preferably a bright orange. He has said that his premature baldness had partly to do with having an accident with the dye.
* Elton John, prolific gay English singer/songwriter of pop and soul who is also an

LGBT activist and humanitarian.
* Elton John's 1986 "Tour De Force" concert tour promoting Leather Jackets, one in which Elton and his band would be accompanied for part of the set list by a symphony orchestra, Elton would suffer increasing vocal problems due to frequent marijuana and alcohol abuse, bulimic binging and purging and drug-fueled vocal oversinging and misuse, culminating in the recording of the concert film and live album Live in Australia, where he very clearly is struggling throughout the concert from vocal strain and laryngitis. Doctors would soon discover non-cancerous, though career-threatening, nodules in his throat. Surgery done in 1987 would prove successful, but would vocally put Elton out of commission for several months. When he returned by late 1987 at a Prince's Trust concert special, his tenor vocal range would be lowered to a baritone.
* Elton John "Sasson (Says So Much)". Worse yet, the video for the song and the commercial were all but identical except for length and that one line.
* Elton John's ballad, "Don't Let The Sun Go Down On Me", contains the phrase.
* Elton John's depicts prostitutes "getting paid for being laid" by sailors on leave, whom never even care or think of their conquests once they go back to sea.
* Elton John's "Elton's Song", well ahead of his own coming out and indeed the song's time overall.
* Elton John's eyebrows seems to move so oddly whenever he sings. (He and David Furnish even brought it up in the commentary for "Tantrums and Tiaras".) Even he doesn't know why this happens, but he does know that it drives him crazy.
* Elton John's frequent duet partner Kiki Dee, in his music video for "Wrap Her Up" (1985).
* Elton John's "Indian Sunset". The Iroquois had no dealings with the Sioux, and lived in longhouses, as opposed to tipis. The word "Squaw" was not used as a term for women among them. Geronimo died in the hospital as a prisoner, and was not killed while surrendering.
* Elton John's "Levon", to the extent that anyone can make sense of the lyrics, is apparently one of these stories; Levon's father, Alvin Tostig, is a poor man with high expectations for his son, Levon himself has apparently made a fortune selling party supplies (especially cartoon balloons), and his son Jesus has ambitions far beyond the party store that Levon can't quite accept.
* Elton John - "Slow Down Georgie (She's Poison)" and "Don't Trust That Woman".
* Elton John's "Nikita" depicts a romance between the singer and a female East German border guard, which ends up being unrealised because the singer is turned away at the checkpoint.
* Elton John song "Sad Songs (Say So Much)" is about...well, sad songs
* Elton John's "Ticking" has an initially unassuming protagonist going on to kill 14 people in a mass shooting before being gunned down by police.
* Elton John's "Your Sister Can't Twist (But She Can Rock 'n' Roll)," in which he brags about having had sex with a friend's sixteen-year-old sister.
* Elton John (the #4 "Can You Feel The Love Tonight" and the #18 "Circle of Life").
* Elton John the song was about Bernie having difficulty in relating to upper-crust city life (and in particular, Elton's pre-fame pickle-heiress girlfriend immortalized in "Someone Saved My Life Tonight") and Bernie's desire to revert to the simplicity of small-town life.
* Elton John tours of 1986 (just before he gave up on the crazy costumes altogether).
* Elton John tribute "Candle in the Wind 1997"; in America, it was "Candle" whose name usually appeared first during its reign atop the Hot 100.
* Elton John video listed before this, including reused character designs and early 90's digital editing techniques. Elton himself (or rather, his animated counterpart from his video for "Club") appears as well. Hey, at least he fares better than Michael Jackson...
* Elton John, which he preformed at her funeral. The version about Diana is far more famous than the original about Marylin Monroe.
* Elton performed a free concert on the Great Lawn of New York's Central Park in 1980, playing to a record-breaking 450,000 people. The show was later broadcast on

* El Topo are played by real amputees and people with actual deformities. Of particular note is a legless man who rides on the shoulders of his armless companion.
* El Toro quits lucha libre, and is recruited by Ramirez and his associates in the Mexican magical community to fight
* El Toxico, El Toxico fires a shot into the wound, causing its head to explode.
* El Toxico is set in a world where insects have grown to the size of people, and have destroyed society attacking them.
* El Toxico: The title character has one. It's visible when he isn't wearing a mask or bandannd over his face.
* El Toxico: When battling a giant ant, El Toxico cracks open its exoskeleton with a hammer.
* El Tyrano Magnifico, lucha lawyer of the firm of Magnifico, Gomez, and El Terror.
* : Elune is the ancient patron goddess of the Night Elves, but she finds it absolutely hilarious that Harry and Luna used to use her likeness (and Tyrande's, Jaina's, Alexstrasza's, and more) for kinky sex games. Any time the topic comes up, Luna, who's one of Elune's priestesses, comments that the goddess is laughing again.
* Elune, the moon goddess of the night elves, has been referred to as the only true goddess in the Warcraft universe. The tauren worship her as one of the eyes of their deity, the Earthmother, but don't consider Elune a distinct entity. However, despite elaborations on the cosmology of the Warcraft universe, Elune's true nature has not been revealed. She was responsible for creating the night elves from dark trolls, has performed the occasional miracle, and has an artifact related to the titans, but she has never been seen in person and her relation to the other cosmic beings is unknown.
* Eluréd and Elurín were abandoned in the forest. Maedhros tried to find them but couldn't. No one knows what happened to them, but since they were only about six years old
* Elva, however, was cursed with the ability to sense the pain of everyone around her. Her 'range' so to speak, is several dozen miles, and the effects of it nearly drive her insane. And she's been enduring this since she was a baby (which wasn't that long ago, as she matured rapidly).
* Elven armies which have healthy doses of both male and female units.
* Elvenbane series as well, along with mammalian shape shifting superintendent "dragons".
* Elvenquest, frequently ends up unintentionally saving the protagonists from the consequences of their own mistakes.
* ElvenQuest In series 3, episode 4, Lord Darkness, Kreach and Penthesilea have been locked up in a dungeon and are playing the game. Problem is, the only thing they can see is manacles. And Lord Darkness manages to zone out on that one.
* Elvenquest suggestible. The perils of your chosen one being a dog turned into a human.
* ElvenQuest whenever he temporarily forgets that he's evil incarnate, but is always this trope.
* ElvenQuest who openly champions the Forces of Evil against the Forces of Good.
* elven tropes and stereotypes are much more functional and successful than their parent people.
* Elven wannabes/Elf posers find elves 'glamorous' and want to become elves, some
* Elven Ways has the demonically-infused warhammer, Rakka. Wielded by that world's equivalent of a Tolkien High Man warlord, Rakka can cause a massive shockwave in its first strike, though subsequent attacks grow weaker as the demon inside gets tired.
* Elven Ways series, House Andreion is the ruling house of the Vaelinar a.k.a elves. They were not the original ruling house. The previous ruling house had its king die in battle without issue, and his second in command took over. This new king had a daughter that he married off, but displeased that his grandson lacked the scrying powers typical of House Andreion, the king got his daughter pregnant himself. The resulting daughter/grand-daughter had the scrying ability and was

declared the true heir over her older half-brother.
* Elven Ways series, the dwarf-like Dwellers are a stand-in for both Tolkien's dwarves and hobbits. They are the first race of the particular world and while they have some affinity for underground, their earthly link is more towards forests and fields. They have a Dwarf's usual inhuman toughness, but they have the Hobbits love for home, comfort and good food.
* Elveon, a third person fantasy game by 10Tacle Studios, was to be released on PC, PS3 and Xbox 360 on Unreal Engine 3. Development may have moved to Unreal Engine 4, or the project may be cancelled.
* elves actually have them beat in terms of subraces, although the majority of subraces are so overwhelmingly alike that an outsider would be hard-pressed to tell the difference, such as the traditional hill dwarf/mountain dwarf split.
* Elves and half-elves. (Not all of the latter have pointed ears, somewhat oddly.)
* elves and the dwarfs" to the dwarfs, who do not take kindly to use of the more common elven term, "the War of the Beard".
* Elves are another species related to humans, and also natural steppers. They seem to see the Long Earth as a massive hunting ground, taking joy in hunting and killing anything they come across using stone tools and stepping. They don't fight as a cohesive unit, instead engaging their victims in a series of duels.
* Elves are called "keebs" or "dandelion eaters" as a slur. Dwarves likewise get called "halfers."
* Elves are extremely long-lived but only have enough population to fill a single
* Elves are referred to as 'welkins', which, despite showing up mostly in fantasy boardgames and books in the story where this trope may be in effect, is the commonly understood term (e.g. Jean refers to Harry's ex-girlfriend as 'welkin-like'.)
* Elves are similarly stuck in their own dimension(s), although there are weak points where travel is possible - lots of them in the Ramtop mountains.
* Elves are telepathic, but they can form an even closer bond where they undergo "Recognition" of each others soul and body's capability to mate and a need to mate. This leads to the affected pair mating like bunnies, so possibly the body is involved as well as the soul. This can also happen even if the couple don't like each other, or one is already in a relationship, which can lead to awkwardness. Or more often, threesomes.
* Elves as a whole also bear a more obvious resemblance to Native Americans, as they share the same narrative of being the original inhabitants of their land who were colonized and subjugated by imperialistic invaders and forcibly corralled into crowded and impoverished "alienages" (reservations), their population small and much of their original history now since lost. Much like the many different Native American societies before American colonization, the original Elvhen were an advanced civilization with a polytheistic religion of various gods mostly tied to different forces of nature. Although some revelations late in the third game do dilute the parallels a little bit (the elves, although a severely oppressed class in modern Thedas, met their most crippling downfall through the actions of
* Elves can live for thousands of years, but produce so few children that they are slowly declining and dying out. Warhammer's Dwarfs live for hundreds of years, and seem to breed at far below replacement levels as well. Meanwhile short-lived humans breed at human-normal rates and the rat-like Skaven, the vast majority of whom never live past twenty, breed in huge numbers like the swarms of vermin they are.
* Elves, dark elf society is virtually lawless, except that it's prohibited to kill a female dark elf before she's produced at least two offspring. Backstabbing and feuding would probably wipe out their population if not for this rule.
* Elves do not die of age either - the elves living in the Golden Bloom are still the same racist pricks who slaughtered the former inhabitants some centuries ago (which is good for them, since they have been cursed
* Elves dress fancily, sing elaborate songs, write poetic literature in flowing script, and strive (or, in some cases, don't
* elves from another universe — by the time they hit thirty, they'll have eaten some three to four hundred slaves, depending on how old they were when they

were vampirized and how often they see combat.
* Elves. Graceful people who often live in forests but can just as easily be seen in cities as well. They have great knowledge of nature and its remedies.
* Elves has killer elf demon connected to Nazi war criminals going on a spree during Christmas.
* Elves. High Dexterity, meaning they move faster and dodge more easily, is countered by reduced Constitution, which renders them far less resilient than a human of the same class and level.
* Elves in general are fastest beings in Middle Earth since they don’t have any perceptible weight e.g Legolas can run (or more like fly) up
* elves means nothing if the elf does not lay claim to his freedom within a year and a day.
* elves next to, much less rebel against, something so perfect as an elf. The Auditors also fight like this when incorporeal, making people think that fighting them is pointless because there's nothing really there to fight.
* elves nonetheless have traits similar to this. Elves are immortal and magical creatures and though they're mostly good guys it's outright stated that they are haughty, arrogant, twist the truth around and are constantly plotting.
* Elves of Alfheim campaign. Elven romantic relationships are not expected to be "for life" and it is rare that an elven couple doesn't drift apart anyway after at most a century. Elves with human spouses don't like when they die, of course, but don't see this trope as a big problem.
* Elves often fit this role in those world where they're portrayed less as another mortal race and more as amoral, reclusive wardens of the forests.
* Elves refer to humans as "d'hoine". While it is the word in Elder Speech that literally means "human", it is almost solely used in derogatory manner.
* Elves take epithet names that are often in this form, but are disappointed that Jamie Bowman, a quarter-elf raised in human society, does not have any archery skill.
* Elves that inspired Tolkien, the elves clearly aren't lawful good either. There are next to no evil elves with it being noted only one ever sided with Morgoth, which was fueled by his creepy lust for his cousin.
* Elves, they are brick-built, albeit with custom head pieces allowing for more expression.
* Elves. They base their entire worldview and value system on physical beauty, and how beautiful you are determines your place in society and which of their four social classes you become part of. Faultless elves make up the bottom, "commoner" tier, followed by Immaculate dignitaries and functionaries, Exquisite hunt masters and nobles, and finally the rare Perfects, who rule elven civilization and to whom only Exquisites are allowed to speak. Other races and disfigured eleven are labelled Eyeblights and can be slaughtered with impunity.
* Elves, trolls and preservers come to be thought of this way by the humans of the medieval and futuristic eras.
* Elves vastly prefer to live above-ground, but oddly enough a few groups also built/excavated underground fortress-cities.
* Elves vs. Dwarves came up. They pointed out that there are many different depictions of elves, but dwarves tend to all be the same.
* Elves vs. Dwarves — Elves live in harmony with nature; dwarves seek to tame and utilize its resources.
* Elves' weakness to iron, in that Elves seem to have some sort of sixth sense based on magnetism and contact with iron (especially magnetic iron) basically amounts to sensory deprivation.
* Elves were formerly slaves and are still heavily discriminated against. The trope is basically inverted, since Elves are treated as the "low men" and humans as the "high men" of the setting. Playing an elf gives you numerous dialogue options on the lines of "Screw You, Human!"
* Elves will focus on magic and spirituality and evince disdain for material things, or to be
* El Viaje Misterioso de Nuestro Homer:" Homer meets his spirit guide, and later

remembers his words.
* El Viaje Misterioso De Nuestro Jomer insisted on animating this sequence in-house instead of normally outsourcing it to Korea to ensure it came out exactly how he wanted.
* El Viaje Misterioso De Nuestro Jomer — due to the effects of eating Guatemalan insanity peppers and candle wax — provides many opportunities for surreal animated sequences. It starts off as a nightmare, but after a while Homer gets more used to it and it becomes a dream.
* El Viaje Misterioso de Nuestro Jomer (The Mysterious Voyage of Homer)", Marge (a nonsmoker) claims she "just felt like filling the house with the rich, satisfying smell of tobacco." She's trying to overwhelm the smell of the chili cook-off so Homer won't go to it. Later we get this exchange:
* "El Viaje Misterioso de Nuestro Jomer (The Mysterious Voyage of Homer)", where this trope is parodied. Homer's visit to the spirit world is actually a hallucination induced by excesive ingestion of chili peppers, and he recognizes the objects around as the real inspiration of those he met in the spirit world.
* ""El Viaje Misterioso de Nuestro Jomer, when Homer fears that Marge may not be his soulmate, he is reassured when she manages to track him down using everything she knows about him:
* El Viento outfit across America in the 1920s. Annet is also a dark-skinned South American, but no prejudice shows up, including any against her (alleged) interracial relationship with the white Earnest Evans.
* Elvin Bishop is in the Rock and Roll Hall of Fame as a member of the Paul Butterfield Blues Band, but as a solo artist, he is known almost entirely for his 1976 hit "Fooled Around and Fell in Love", which reached #3 on the Hot 100. While Bishop wrote the lyrics and played lead guitar on the recording, he believed his gritty voice wasn't a good match for the song. Instead, the lead vocals were handled by future Jefferson Starship singer Mickey Thomas.
* Elvira 2: The Jaws of Cerberus It's Game Over for you, unless you cast the Courage spell before entering the room.
* Elvira 2 - The Jaws of Cerberus, there are three places where Elvira may be hidden. No matter in what order you reach them, the first two Elviras will be fake and transform into monsters.
* Elvira and the Party Monsters features "Gravestone Pizza", likely a refernce to Tombstone Pizza.
* Elvira and the Party Monsters goes a step further and features newly-recorded footage of her introducing each mode, a first in any pinball game.
* Elvira and the Party Monsters, if you score poorly on the first two balls, the Extra Ball light will be activated at the start of the third ball.
* Elvira and the Party Monsters is centered around one of these, in the form of a barbecue party.
* Elvira and the Party Monsters, the player can make Elvira and Dracula pop out of their coffins.
* Elvira: A wizard can turn you into a frog, which is one of the few goreless "deaths".
* Elvira II: The Jaws of Cerburus when you defeat a witch. (One of her eyes survives, and it can be used as an ingredient for a spell.)
* Elvira, Mistress of the Dark, a school faculty makes the decision to expel any student caught associating with Elvira.
* Elvira, Mistress of the Dark, but one of the most memorable is after the titular character has hit her head on a movie marquee:
* Elvira, Mistress of the Dark dabbles in this for the motion simulator ride "Elvira's Superstition". It starts with Elvira announcing plans to create a "scream park" containing ghoulish treats and rides, before visitors experience a simulation of her favorite ride in the park — The House of Superstition.
* Elvira, Mistress of the Dark does, it's a wonder her boobs never fell out of her dress. That's because she's a master (mistress?) of suspense.
* Elvira, Mistress of the Dark: Elvira checks into a motel and meets the cranky old motel owner. The owner's granddaughter then comes downstairs, only to be confronted

by her grandmother and told that she will not wear makeup. Later in the scene, Elvira reassures the girl that she used to have the same problem with the nuns at the orphanage. Of course, she was only 8.
* Elvira, Mistress of the Dark, her mother is shown dropping the infant Elvira off at a convent to protect her from the convoluted magical politics in their family.
* Elvira, Mistress of the Dark lets it down! You wouldn't expect such a small beehive to have so much hair in it.
* Elvira, Mistress of the Dark. SOMEONE had to be able to tell witch-burning is unconstitutional.
* Elvira often did this intentionally in her routines. (Which was the whole point, and played for laughs.)
* Elvira's Haunted Hills has a literal example: A bumpy carriage ride results in a guy being catapulted into Elvira's chest!
* Elviras Haunted Hills shows Elvira herself beneath a swinging blade, though oddly positioned to be severed lengthwise, not crosswise. Mustn't harm the boobs, after all.
* Elviras Haunted Hills, the title character is a guest in a castle, and stops a servant to taste the contents of the tureen they are carrying. She comments that the cook went a little hard on the Tabasco sauce, before being informed that it's her host's chamber pot.
* Elvira's House of Horrors awards 250,000 points for making it into the top two lanes, while plunging a bit harder lets you enter the titular mansion's Back Door for 1 million points (and also immediately starts a mode).
* Elvira's House of Horrors before selling it, and you must help her return them to their original films.
* Elvira's House of Horrors centers on various old B-movie characters somehow coming out of their films and haunting Elvira's home; the player's goal is to send them back.
* Elvira's House of Horrors had low-resolution screenshots of the overall playfield leaked prior to its official announcement, which Stern quickly began taking down.
* Elvira's House of Horrors. Its stated ability to open any door translates into gameplay as unlocking various bonus modes (relating to the titular house).
* Elvira's House of Horrors" wheel, which is activated by losing the ball to the left outlane (when it's lit, of course). The roulette has six potential rewards, one of which is a ball saver; thus, by timing it right, the player can instantly send their ball back into play.
* Elvira's Movie Macabre Lisa, the French exchange student and love interest of the hero, is given this treatment.
* Elvira: The first game on three to five disks depending on the system. Same thing with the sequel.
* "Elvis Ain't Dead" by Scouting For Girls uses the trope in more of a symbolic way: "Elvis isn't dead 'cause I heard him on the radio!"
* Elvis as a couple. Unfortunately, this has led to the comic's cancellation on account of their separation in real life (which also became a story arc).
* Elvis Christmas Album want to record the song, and told his background singers to mess up the take so it wouldn't be released. This lead to the soprano "woo eee wooo" lines in the background that the song became especially known for.
* Elvis Costello, being celebrated as one of the people who brought American New Wave music to the mainstream.
* Elvis Costello. But his audacity was celebrated; he returned to the show in 1987, and he later took part in the show's 25th anniversary celebration by recreating his song switch.
* Elvis Costello by putting Costello's upbeat single "Radio Radio" immediately afterwards.
* Elvis Costello has said that his song "Oliver's Army" was based on the premise that 'they always get a working class boy to do the killing'.
* Elvis Costello in six days. He joked that "the record was made so quickly that I didn't even tell myself about it for a couple weeks."
* Elvis Costello is also like this, preferring to be called his birth name (Declan

McManus) by family or in a non-performance context.
* Elvis Costello is considered one of his best, but all of its singles flopped.
* Elvis Costello) is from the perspective of a man who no longer feels anything for his girlfriend—mentioning several times how, every time they talk on the phone, all he wants to do is hang up.
* Elvis Costello on the 25th anniversary special so they could all do the song together.
* Elvis Costello panicked when his glasses came off in the episode "How I Spent My Strummer Vacation", not because of impaired vision, but because of...
* Elvis Costello's "Are You Straight or Are You Blind" was inspired by a dream he had of a doll being pulled apart. ("She's the kind of doll that you'd like to pull to pieces.")
* Elvis Costello's "Beyond Belief" is very clearly being narrated by someone on the verge of a drunken stupor: "So in this almost empty gin palace / In a two-way looking glass, you see your Alice." The singer himself once got into serious trouble because of remarks he made while inebriated. The lyrics to "Man out of Time" are also noticeably booze-sodden: "You drink yourself insensitive and hate yourself in the morning.
* Elvis Costello's biggest hits, but he's said he's not that big a fan of the song, admitting he deliberately wrote it to be very poppy.
* Elvis Costello's "Mystery Dance" is a 50s-type rock and roll number about a pair of virgins who want to have sex but don't know how to satisfy each other.
* Elvis Costello's "Tokyo Storm Warning" mentions a KKK group "stranded at the bar", but being out of their element they're pretty harmless.
* Elvis Costello's "(What's So Funny 'Bout) Peace, Love, and Understanding?" was written and first performed by Costello's producer, Nick Lowe, while part of the band Brinsley Schwarz.
* Elvis Costello. This was a collection of songs based on letters written to Juliet (who's considered to be a help to the lovelorn). The album was done as a collaboration with the Brodsky String Quartet who had much more collaboration into the writing process than was usual on an Elvis Costello album.
* Elvis Costello to onetime British fascist leader Oswald Mosley and makes this suggestion.
* Elvises trying to say "Elves". Gentleman Johnny Marcone is more than slightly bemused and confused after hearing this particular tangent.
* Elvis Found Alive is that Elvis's death was faked so he could become an agent for the government.
* Elvish. However, the fall of Eregion and a general decrease in the ties between all the races in the following millennia would once sunder the relationship between the two races, to the point where it would not be until near the end of the Third Age that an Elf (Legolas) and a Dwarf (Gimli) could once again call each other friend.
* Elvis in his white glitter suit during his Las Vegas period. Obligatory to that image are the phrases: "Thank you, thank you very much" and the phrase: "Elvis has left the building".
* Elvis is alive and well as the ruler of a "secret underground rock 'n roll beach kingdom" in
* Elvis is described as a "terraphile", which would explain why he speaks English, how he chose his name and why he wears a vest with an American flag pattern.
* Elvis is elected President on the United States in an alternate timeline.
* "Elvis Isn't Dead" by Scouting For Girls. 'Cos they heard him on the radio.
* Elvis Lives didn't actually die in 1977, claiming that the King of Rock and Roll actually faked his death and is just hiding out somewhere!
* Elvis Lives didn't actually die of a heart attack in 1977, he just faked his death and is hiding out somewhere.
* Elvis of the records he released, always credited him by his full name.
* Elvis Presley, and he resented the fact that he was more popular than Domino just because he was white.
* Elvis Presley and other styles of African-American music over the race barrier

and into the mainstream.
* Elvis Presley) are covers — for example, "Blue Suede Shoes" was originally by Carl Perkins.
* Elvis Presley. At first, the girl being described is an angel, but Elvis sees through it.
* Elvis Presley covers), funk (If You Talk In Your Sleep), blues and many other genres. Many, many of Elvis' first singles would have Country on one side and R&B on the other, partially as a way to get white folks to listen to 'black' music.
* Elvis Presley drifts into "don't want you back" with hilarious results).
* Elvis Presley Each sandwich has 8000 calories, so it's little surprise how Elvis's health went.
* Elvis Presley Enterprises not only has his name trademarked, but they also hold a trademark over his likeness. In other words, even if you don't have the clearances to use Elvis' music catalog in your work, you would still have to clear the use of Elvis or a look-alike as a distinct character.
* Elvis Presley famously died in the bathroom. Commonly it's said he died on the toilet. Actually he had a heart attack while on the toilet, exacerbated by heavy drug use, pitched forward, and died with his ass in the air on the bathroom floor and was discovered in this position, which is even worse.
* Elvis Presley' "Goodbye Earl", was a known recluse. He never attended awards shows, even when he won, and rarely gave interviews.
* Elvis Presley had to meet him by their being invited to Graceland in 1965.
* Elvis Presley has been shamelessly Flanderized after his death by Elvis impersonators. In his youth Elvis actually was slim with boyish good looks and a pleasant smooth tenor voice with only a little shaking in it. If he was anything like most of his impersonators he would not be nearly as popular as he was in the late 1950s.
* Elvis Presley has debunked that claim, with its source turning out to be an acquintance of Berlin interviewed several years after the fact.
* Elvis Presley, implies this, when the baby born at the beginning of the song dies as an angry young man while another baby is born, implied to be doomed to the same fate.
* Elvis Presley it about? The writers (and by their account Elvis himself) knew this was a gay line and thought it would be funny to put it in and see what happened. They said they put in lots of stuff like that because they knew Elvis wouldn't have a problem with it.
* Elvis Presley like chicken fried steak, biscuits and gravy, and peanut butter and banana sandwiches, which sometimes included bacon.
* Elvis Presley magazine called it at the time), the country, and the rhythm and blues charts. Incidentally, the song's designation as a double-A single didn't come until 1960.
* Elvis Presley of sorts. And then, there were Moral Guardians who also hated his sound in general … and the fact that he swiveled his hips during his performances.
* Elvis Presley. One colleague said, "I'm straight as an arrow and I got to tell you, you stop, whether you're male or female, to look at him. He was that good looking."
* Elvis Presley owns a copyright on the name; his general appearance and the name "the King" fall under fair use. This was also the reason why none of Presley's songs appeared on the radio.
* Elvis Presley producer Chips Moman got blackballed for daring to go against Parker's wishes. Parker even meddled in Elvis' personal life if he thought it was affecting their financial bottom line (though he was conspicuously silent about the drug abuse that ultimate killed Elvis).
* Elvis Presley received a polio vaccination on television, causing the percentage of people getting vaccinated to skyrocket.
* Elvis Presley, released in 2002 (25 years after the King died). This remix was a #1 hit in much of Europe.

* Elvis Presley rolling his hips had as many parents and preachers up and howling and sending for the exorcism unit as ragtime did. After all, not too many kids have hips like Elvis's, but anyone who could play "Chopsticks" or whistle "The Star-Spangled Banner" could syncopate (everybody owned pianos back then).
* Elvis Presley's 1959 cover was a big pop hit in the US and UK. And on top of that, there's another cover by Baillie & the Boys in 1990 that got almost as high on the country charts as did Hank Snow's version.
* Elvis Presley's cover: "He said that the Elvis version was like Romeo at the bottom of the Post Office Tower singing up to Juliet. And the other versions, he thought, were travesties: bludgeoning, histrionic, and lacking in grace."
* Elvis Presley's greasy quiff has been elongated to such absurd lengths in caricatures that people may actually be surprised to learn it was actually not five feet long in reality.
* Elvis Presley, share a birthday — January 8th (1935 and 1947, respectively). Bowie has joked about his birthday getting stuck in the shadow of Presley's.
* Elvis Presley's "If You Talk in Your Sleep" takes a somewhat different approach to the trope of sleep-talking revealing infidelity, as the narrator of the song, who is having an affair with a married woman, warns his lover not to talk in her sleep and make her husband suspicious.
* Elvis Presley song, "Elvis is Everywhere," which sounds like an over-the-top Baptist sermon that replaces each instance of "Jesus" with "Elvis" before claiming Elvis is the source behind many conspiracy theories (the pyramids, Stonehenge, the Bermuda Triangle, etc.)
* Elvis Presley song "Return to Sender" (1961) has a lyric in which the singer gets the letter returned to him stamped "no such number/no such zone". The "zone" is a reference to postal zones, a way of routing letters in large cities that was introduced in 1943 and retired in the 1960s in favor of modern-day ZIP codes.
* Elvis Presley spent his life wracked with guilt over his stillborn twin brother Jesse. He confided to his friend Larry Gellar about it, wondering if maybe he'd absorbed more nutrients when they were in their mother's womb and led to his brother starving to death. Elvis's mother tried to comfort her son and told him they would all be reunited in heaven.
* Elvis Presley's song "Kissing Cousins" from the movie of the same name.
* Elvis Presley's "Trouble" ("If you're looking for truffles, you've come to the wrong place") and Peggy Lee's "I'm A Woman" ("Because we're British, B.R.I.T.I.S.H./So don't push it, mate").
* Elvis Presley. The next morning she was at the table... sitting on a pillow.
* Elvis Presley: The song is about a baby being born in the Chicago ghetto, then growing up in poverty and turning to crime to survive, before breaking away, and dying, as another baby is born, implying that if we ignore the issue of poverty, he will suffer the same fate of the young man who just died.
* Elvis Presley try to shoot someone in a blind rage. There's at least one recorded instance where this habit kept him from killing a man in a public restroom.
* Elvis Presley - was actually a blond. No, seriously. A family member even had to blacken his roots with mascara before his funeral.
* Elvis Presley was just a generic mummy in the original stage musical, with the mummy's servant Dr. Abdul Nasser reinterpreted as Elvis' fictional manager Hathaway.
* Elvis Presley was "the real King of Rock & Roll" and that he himself only got the title because he was white.
* Elvis Presley was uncomfortable with the nickname "The King" for this reason ("Jesus Christ is the King. I’m just an entertainer.")
* Elvis Presley, who ended up on the wrong side of the US segregation laws because of his black grandmother, and is mentioned as being an invaluable asset to Mr. King because he is one of the few members of his movement who can pass for white.
* Elvis Presley wife, as Blue Suede would end up courting both male and female partners after becoming an Alicorn god.
* Elvis Presley with advancing the feminist movement because his concerts were

places that female fans could go crazy and it was totally okay.
* Elvis Presley would cover the King, this was one of only two verses they sang.
* Elvis's "Can't Help Falling In Love With You" received a very popular cover by
* Elvis Shrugged, Elvis develops a new style of music, which he calls "Elvisia".
* Elvis Shrugged, reveals that the Elvis who everyone thought had died in 1977 was a clone created by Col. Tom Parker and that the real Elvis is living in "Blue Hawaii," having convinced many musicians to disappear from the scene.
* Elvis would have turned 85 in January 2020, which is well beyond the average life expectancy of an American male born in 1935, especially one with his health problems. So even if Elvis
* Elwood J. Blues. It takes a lot of gusto to turn a car around at the end of an unfinished bridge like Elwood did. He can even speed through the dark of the night and outrun dozens of police cars with his sunglasses on.
* Elwood's voice in the House of Blues Radio Hour. He does sound maybe a bit higher-pitched than he did in the movies.
* Elyas Machera to Perrin Aybara. He even has the "hermit" characteristic, seeing as how he freaking lives and speaks with wolves. He mentors Aybara in coming to terms with being a Wolfbrother and in using his abilities.
* Elyesa Bazna) was the Valet to the British Ambassador. And naturally valets would never give their master's secrets to the Germans...
* Elyon blasts off one of Ludmoore's hands as he's in the middle of teleporting to flee his attacked manor.
* Elysia, and can sustain itself on photosynthesis long enough for its body to regenerate in a few weeks.
* Elysion has Akihiko, Junpei, and Aigis break into the Kirijo Estate at the same time as the Investigation team. Bonus points to Souji and Yosuke for storming said castle armed with only two knives and a golf club while everyone else already had their Personas by that point
* ELYSION: "Made of Lies" is a song about a relationship bordering on breakup due to trust issues.
* Elysium, a few wealthy people live in luxury on a space station, while everyone else lives in poverty on Earth. While those on Elysium are less moustache-twirlingly evil than most of those with villainous lairs, the film certainly portrays them as the bad guys for refusing to help despite having the technology and resources to do so.
* Elysium: After his accident, Max says that he has so much radiation in his body that he is probably irradiating people in close proximity. Carlyle makes a similar claim when he worries about having to replace the sheets in the factory medbay, due to Max's skin falling off (which doesn't happen from radiation poisoning, either in reality nor in the movie itself). Both are wrong because radiation can only be emitted by radioactive material; human tissue does not qualify. There are excuses for both, though; Max was trying to intimidate someone and may not even know better, and Carlyle is just a jackass.
* Elysium, a gangster hands Max an AK-47. Max asks whether it is a family heirloom, being that it is the mid 22nd century, and AK-47's have likely been out of production for a hundred years. The gangster replies that it has been upgraded with air-burst munitions and a simple point-and-shoot interface.
* Elysium: Aside from being able to rip off the heads from droids and throw people around like dolls, the Exosuits increase the user's physical performance dramatically. They move more quickly then the average combatant. Earlier, we have Max running away from the botched heist, on foot, at high sustained speeds. Considering the amount of distance that was put between him and Kruger, he had to be moving at least 35 mph.
* Elysium. But the encryption software kills whoever holds the item after transfer, and once it's modified at the end, Max dies.
* Elysium, citizens of the titular space station (and people from Earth trying to get in) have these burned into their skin, which allow them to use their Med Bay units to heal any disease. They only work if someone has a bar code.
* Elysium. He is hit by radiation in a factory accident and is expected to die

within five days. Only treatment he receives from his company is some free pills, which would not prolong his life, but allow him to stay sound till death. It turns out to be just enough to get him into an adventure.
* Elysium: In the far future, Rich People live in the titular space station, while the poor lives in an overpopulated Earth.
* Elysium is a man-made installation orbiting Earth, where the privileged of humanity live apart from the destitute masses.
* Elysium: It doesn't need to be said that in 2013, wealth disparity and societal division in spite of constantly emerging technologies that have the potential to improve everyone's lives is a hotly debated issue.
* Elysium: Manufactured by Armadyne, these security bots take care of neutralizing any and all threats that arrive down on Earth and in Elysium. Max holds a grudge against these security robots, especially since they end up breaking his left arm when he was resisting their attempts to find out what was in the bag he was carrying.
* Elysium Max agrees to die so that information in his head can save the rest of the people.
* Elysium, Max and Kruger are fighting in what appears to be a factory with random cherry trees dancing everywhere. Fittingly, Kruger uses throwing stars and a katana.
* Elysium: Max DaCosta has a completely shaved head. Justified, since he just got out of prison.
* Elysium Max gives some back to his "parole officer" after it (a robot) extends his parole for sassing some robot officers.
* Elysium. Max has been exposed to lethal levels of radiation because of his employer's negligence, and his girlfriend's daughter is dying of cancer. He agrees to commit a dangerous robbery in order to pay for his ticket to the titular space station, where magical machines that can heal anything are freely available.
* Elysium, Max wonders why he's being given an antique AK to use and is promptly shown the futuristic explosive rounds that allow it to remain viable.
* Elysium (Neutral Good) is the opposite number to Hades, but still flat.
* Elysium of poverty and squalor kept oppressed with robot police and cyber-enhanced thugs.
* Elysium, on top of a man with a live grenade being in close proximity. Worse, it's a song of a married man and woman going about their life after spending a night together.
* Elysium shots of an AKM slow-motion exploding a robot, the two varieties of Elysian assault rifle fire at a minigun-like buzz, along with one of the gang members' chainsaw-gripped machine gun and a door-mounted gauss heavy machine gun.
* Elysium stores program code in his brain that will reboot Elysium's system. It also comes with a defense mechanism that kills anyone who attempts to execute the code without authorization.
* Elysium that is Earth (with its immense levels of overpopulated poor) to rot.
* Elysium: The Elysium station rotates to provide this. The station notably has its inner rim open to space, since the air is held in by its gravity as well.
* Elysium the ground beneath him with no apparent difficulty. Even with super-strength, we're talking about hard-packed earth.
* Elysium, the main villain is Kruger, a cyborg for hire who carries a katana.
* Elysium: The plot to open up Elysium to everybody on Earth is only possible because of Delacourt's desire to overthrow the current government, requiring a virus that can reboot the system. Then Max gets a hold of it...
* Elysium, there are a few glorious instances of people exploding (as well as one droid turned into scrap metal in a similar fashion). The main villain is dispatched by being thrown off a gantry with a live grenade attached to him; he's blasted into several large chunks.
* Elysium, the titular space station is always in the sky above Los Angeles when needed and clearly visible. Geosynchronous orbit is 35,786 kilometers above the Earth's surface, almost three times Earth's diameter, also only technically possible at the equator but the distance between that and L.A. is trivial compared

to geosync orbit.
* Elysium, though she's a crafty enough operator that she has no problem invoking emotion to make a point. But the slightly-robotic way she does it (and everything else, for that matter) indicates that she probably doesn't actually feel it, but is simply just that bigoted.
* Elysium trying to enter Elysium. This is also her rationale for trying to take over Elysium.
* Elysium, which makes everything from security robots to the all-cure machines known as the Med-Pod 300s.
* Elysium: While more subdued than space opera style explosions, the missiles that explode in space can still be heard.
* Elysium. You know it's time to run whenever you see him or his squadmates enter the picture.
* Elyssa Davalos appears as a (presumably) Baltic love interest of MacGyver in the two-part S3 opener. Less than a month later, she appears again as Nikki Carpenter and appears in four further episodes.
* Elza, after she slips a disc trying to pick up a heavy box without using strength magic.
* Elzam von Branstein, a genius pilot always hits, never misses and whose theme overrides all;
* Elzar, the four-armed Neptunian cooking show host, makes something called "Human Broth" during the 3007 economic depression to feed impoverished citizens. (It doesn't take a genius to figure out what it was made of, and both alien
* EM-50 "Urban Assault Vehicle" (disguised as a late 70s GMC motorhome) in
* Ema also has this reaction when her sister admits to forging evidence, although it later turns out that she was blackmailed into doing so by Gant, who had arranged evidence to make it seem as though Ema accidentally killed Neil Marshall.
* e-Magic in some markets. Notably tho, they filled the niche in markets where Konami won't export the official Jubeat machines.
* Ema imitates Kristoph Gavin, and the appropriate sprite appears for a moment.
* Emanation is able to set his own history and time to zero, preventing any change from occurring on him. He has to constantly maintain this however since if he stops, his time will start to move again and thus allow for change to occur. But while it is active, the only thing that can hurt him is if someone else has also Emanated and the strength of their law is either equal or superior to his.
* Emanations" when Harry Kim objects to an order from Chakotay. Contrary to what usually happens with this trope, respect is shown afterwards, with Harry thanking Chakotay for letting him voice his opinion.
* Emancipated Child: A child legally disowns themselves from their own parents.
* Emancipated Child: A minor who is no longer under the legal custody of their parents or guardians.
* Emancipated Child be granted custody of younger siblings at the same time, unless circumstances are well and truly bizarre.
* Emancipation", Carter speaks to a man on a Mongol-influenced planet and is immediately sentenced to death. Fortunately, she has just saved a man's life, though, so she is spared.
* E-Man. She defeated the villains by force-feeding them so many Tweakies that they could barely move.
* E-Man was a millionaire who was having homeless people kidnapped to use as power sources to run his mansion off of, as it was set during the height of the energy crisis back in the 70s.
* Emasculated Cuckold: A man whose wife cheats on him and is unmanly or insecure about his manliness as a result.
* Emasculated Cuckold Ares. In order to regain his honor, Hephaestus gets his revenge by creating an inescable net that he uses to catch them in bed together and humiliate him.
* Emasculated Cuckold: Having an unfaithful wife is a blow to a man's power, masculinity, and status.
* Ema Skye constantly eats from a bottomless bag of chocolate Snackoos in

* Ema Skye turns up sporting some pretty cool-looking red-tinted shades that she'll
* Ema Skye uses the phrase directly in the 4th game, regarding Phoenix's loss of his badge.
* Ema Skye was this in her first appearance in the first game, being very enthusiastic about everything (though especially scientific things). She's less so in her reappearance in
* Ema Skye, who, throughout the games, both averts and plays straight this trope, with her
* Embarrassed by a Child: A child blurts out information people knew, but didn't want to admit, or admit publicly
* embarrassed by their constant, over the top encouragement to the point of being rude to other parents. Scootaloo makes her see this is unfair and she would've LOVED to have people who care enough about her to encourage her all the time. Scootaloo's family was not mentioned until the final season, in which her parents were depicted as living far enough away from Ponyville to prevent them regularly visiting her.
* embarrassing, are supportive of their daughter and try their best to be understanding when she reveals to them that she has superpowers.
* Embarrassing Browser History: Started with the move away from text-based Internet browsers in the early- to mid-1990s.
* Embarrassing Cover Up: A cover story so embarrassing/disgusting no one wants to know any details.
* Embarrassing Cover Up: Turning away eavesdroppers and people trying to stop you by using an embarrassing excuse.
* Embarrassing Cover Up: Where the cover story goes into territory that makes the questioner regret asking.
* Embarrassing Damp Sheets, a wet dream, or leaking menstrual blood in one's sleep.
* embarrassing, goof-prone father. He's also got an inferiority complex about Qrow's edgy coolness factor, and therefore is obsessed with trying to prove he's worthy and cool.
* Embarrassing Hobby: A character has a hobby that, for whatever reason, they don't want to admit to.
* Embarrassing Initials, or H.U.G. Small wonder he changed his name to U.S. Grant once in military school.
* Embarrassing Initials: Someone's initials spell out something that embarrasses the person with the initials.
* Embarrassingly Painful Sunburn when he makes the mistake of sunbathing under twin suns without sunscreen.
* Embarrassing Nickname: A character is embarrassed by their nickname.
* Embarrassing Nickname. Probably flips the switch from embarrassing to affectionate in Episode 13:
* Embarrassing Nickname: Someone is given a nickname which they find embarrassing.
* Embarrassing Nickname to prove it). She hasn't known Kanon quite as long, but they still consider each other childhood friends.
* Embarrassing Old Photo: Someone has a humiliating photo of themselves when they were younger.
* Embarrassing Old Photo: Someone has an embarrassing photograph of when they were younger.
* Embarrassing Password: Someone uses a password that reveals an embarrassing secret about them.
* Embarrassing Pyjamas: Someone is embarrassed by or teased for their pyjamas.
* Embarrassing Relative Teacher: A relative becomes staff at a child's school, and humiliates them.
* Embarrassing Ringtone: A character uses an embarrassing song as their ringtone.
* embarrassing situations Chiri, she demands that he follows through by marrying her.
* Embarrassing Slide: A slide show somehow has an embarrassing photograph of the presenter included with the other images.

* Embarrassing Slide: A slideshow somehow has an embarrassing picture of the presenter included among the other slides.
* Embarrassing sports" have fans who commit the mistake of branding themselves with the team's logo and a year of a possible title that never comes.
* Embarrassing Tattoo, nor would they serve minors without a parent present and in many locales it’s also flat out illegal to tattoo a minor regardless of parental permission (except for medical tattoos).
* Embarrassing Tattoo: Someone has a tattoo that's undignified, whether due to the location of the tattoo or what the tattoo depicts.
* Embarrassing Tattoo. The thing was, a few episodes prior "The Platinum Rule" actually showed the beginning of that story and Ted's first attempt to take Stella on a date. So it can be assumed the episodes in between also happened during this time.
* Embassy, a terrorist tries to kill the Australian ambassador by putting a grenade (minus pin, with the lever held down with tape) in the fuel tank of his official car. When the petrol dissolves the glue on the tape, the safety lever flies free and sets off the grenade. It's effective for random terrorism but not assassination, as shown when the car explodes while it's parked on the embassy grounds, not while the ambassador is in it.
* Embassy Suites hotel chain life," followed by a shot of Garfield sitting at a table holding a knife and fork and thinking, "I resemble that remark."
* Embassytown are bisexual, and either polyamorous or accepting as a matter of course that people will have several different monogamous relationships over their lifetimes.
* Embassytown have a cycle that's skimmed over, but there is an initial aquatic phase of life, where the young Hosts are referred to a "elvers", a terrestrial phase where young play and fight, middle age and sapience, and their final phase, lumbering and nonsentient. They evolved to reach that phase and wander mindlessly after younger Hosts who at the time would eat them, but modern civilized Hosts, with no need of that, abhor the idea and treat elders kindly until they drop.
* Embassytown have two mouths, and speak different streams of language out of both at once—every word consists of two sounds overlapping. On top of this, if the words do not have a conscious intent behind them, the Ariekei perceive them as meaningless noise, so they are unable to understand computer-generated speech or recordings. The only way humans can successfully communicate with them is via pairs of psychically linked clones, each speaking one of the two layers of dialogue at the same time.
* Embassytown identical twins show up who nevertheless seem to be able to communicate, the result begins to drive the aliens mad.
* Embassytown where, given the number of planets colonized, time is mostly given in Kilohours. When the narrator does talk about years, they turn out to be about 3.5 earth years long.
* Embedded has a Cold War ongoing between the NATO-style United Status and the Warsaw Pact-style Central Bloc. It's mostly identical to the original Cold War, except that the two powers are more opposed politically instead of ideologically. Also, thanks to the vast room available on the hundreds of colony worlds, the two factions aren't brought into conflict very much.
* Ember also apparently likes girls, while her canon counterpart was dating Skulker.
* Ember For The Sun: A pregnant Neanderthal woman is unfrozen. Instead of thawing her, the scientist frees the embryo and implants it into a modern woman. In an interesting use of the trope, the surrogate mother then gives birth to Ember Ozette, a born and raised modern-day Neanderthal.
* Ember herself is considered to be very attractive both as a human and as a ghost and her own alignment shifts from bad to neutral to good
* Ember is a banshee, which is an agent of the Fates (who have numerous identities in different cultures) in this universe.
* Ember McLain got power from the adulation of fans she never got in life.
* Ember McLain reveals she has a thing for Danny Phantom, taking advantage of when

she brainwashes him by ordering him to kiss her.
* Embers... and arguably, this is one of the major reasons this story was written. A full chapter was dedicated to what the four elemental nations each mean when they say "truce", each of which was different, and had different cultural reasons behind it.
* Embers and horribly painful deaths in the works for anyone unlucky enough to survive the various genocidal wars they've stirred up over the millennia.
* Embers as a result of there now no longer being any characters considered worth rooting for.
* Embers has decided to set up a colony in a supervolcano that only he can prevent from erupting. (It has killed the last two Avatars who tried to stop it, and will take out the Northern Air Temple, various actual Fire-Lord-Approved Fire Nation colonies, and half the Earth Kingdom if it blows.)
* Embers his father (whom he never met), the Fire Nation, and everything associated with it.
* Embers In The Dusk. A blademaster slicing through Warp effects and cutting down anything smaller than an Emperor Titan on a crit, a commander sending out a force that turns out to be whatever is needed against the foes encountered once they are, a warrior you can never hit with a crit...
* Embers In The Dusk. A twenty-thousand-years old superpowered genetic experiment who literally claimed that archetype to become stronger. The omakes where she behaves accordingly are... quite the reading.
* Embers In The Dusk describes the various types of Avernus-made booze. It includes a wine which, under certain conditions, make one's arms melt off. Some people do it deliberately, because the resulting liquid can be processed into an even better wine, a black market good fetching more that enough to buy replacement limbs.
* Embers In The Dusk forum posts as of January 2020. In April, the second part was started.
* Embers In The Dusk, fought between the Necrons under the Silent King and the main Tyranid hive fleet. We don't see much of it due to it taking place outside the galaxy, but the Necrons made use of their most destructive superweapons that they don't dare use inside the galaxy for fear of wrecking the place, against a foe a few dozen times vaster than the galaxy at its height.
* Embers In The Dusk has the so called Negaverse Omakes, samples of what a quest would have looked like in the current situation when ran by another faction. It started with the POV of a nearby Chaos polity which broke its teeth trying to take the heroes out and was now facing a lethal counterattack.
* Embers In The Dusk is, it would have been a serious opponent for the entire Old Imperium.
* Embers In The Dusk, Justicar Alarion's existence as a Grey Knight. While his squad visits Avernus to check for Chaotic corruption, they come across a young orphan, Markus Haanoc, who exorcises a daemon from his sister, displaying strong psychic abilities and somehow being able to recite the Grey Knights' litany. Alarion has him sent to Titan as a potential recruit. A few centuries earlier, the Grey Knights at Titan find a ship with a burnt out Navigator and a young boy in stasis. The boy withstands the trials, and is eventually renamed Alarion.
* Embers In The Dusk, one of the technologies brought from the Roskilde expedition (and the only one immediately usable) is one-shot torpedo launchers which can be attached to any ship for a massive alpha strike.
* Embers In The Dusk, Seamus Lin, the Last Saint of the Emperor, spent as much time as possible in orphanages, and even his tomb had been placed in a psyker city to allow children a relatively safe haven where they can have a relative reprieve from the risks of Chaos.
* Embers In The Dusk sidestory has a captured Jotunheim rebel who only joined the rebellion because the old Governor's regime sent his wife to a concentration camp, and the new one didn't return her home. The Avernite questioning him explains that his wife died in the camp, but gave birth to the rebel's daughter a month before that. While the rebel will be shot in any case, it is up to him to determine whether the child will be growing up in the overcrowded and understaffed (thanks to

the rebellion) facilities of Jotunheim, or the comparable paradise of an Avernus orphanage.
* Embers In The Dusk. Since they only get their position after proving they're competent, and almost all psykers have some kind of quirk, Primaris Psykers tend to have various oddities that get tolerated because their usefulness is more than enough to compensate for it. For example, Tamia can be ditzy or absent-minded, while Aria is a bit OCD. Perfectly normal individuals like Xavier are the exception.
* Embers In The Dusk the Black Irons are primarily composed of soldiers with death wishes. Their commander, Lieutenant-General Viktor Mineyev, stands out in particular. Despite all the crazy shit he has been throwing himself into, he has yet to die. He did have to get large chunks of his body replaced with cybernetics though.
* Embers In The Dusk, while Rotbart never grows insignificant by any measure with his commanding skills, Ridcully, with his near-godlike divination, eventually becomes a far more significant figure on a galactic scale.
* Embers In The Dusk with Saar Handerson, a particularly tall Astartes, who isn't actually in charge, but is often used as bait for Ork Warbosses who believe he must be.
* Embers shows many cultural clashes between the Earth Kingdom, Water Tribes, Fire Nation, and Air Nomads. For one example the peaceful Air Nomads were so good and kind due to being brainwashed, and would exile those who disagreed from the temples. Chapter 28 offers this gem:
* Embers, Zuko is the embodiment of this. Actually a lot of a characters run into this problem in this story simply because of how the world is set up.
* Ember, the new Dragon Lord, eventually treats us to two superhero landings in episode "Triple Threat".
* Emberverse and the survivors reverting to agrarian communities. Although a few can be heard pining for modern conveniences (most commonly deodorant and birth control), more often than not you'll hear them say how much happier they are and that this was the way humans were meant to live. Of course, it must be pointed out that those who survived tended to be Renn Faire patrons, ranchers, history professors, survivalists, and the Society for Creative Anachronism. There's also the fact that pining miserably for the lost world is not good for one's mental health.
* Emberverse applies, considering that Great Britain survives with its monarchy intact.
* Emberverse are beards for one another in the neo-medieval (and extremely homophobic) Portland Protective Association. She even refers to him as "my dear beard" in a letter. Thanks to a turkey baster, they have several children together. Meanwhile, Delia is in a monogamous relationship with Lady Tiphaine d'Ath.
* Emberverse books, with Rudi Mackenzie and his band trekking across America while the Church Universal and Triumphant is trying to conquer or subjugate everything west of the Rockies.
* Emberverse, characters do take equipment literally from a museum, or, rather, a living history exhibit, which justifies why it's been kept in working order.
* Emberverse features The United States of Boise, founded by U.S. Army Martin Thurston, which is the only major faction trying to preserve the old system of government. Thurston considers Boise to the the "provisional Capitol" of the country, but none of his neighbors acknowledge Boise's authority and, to their credit, Thurston and his government don't try to force it on them.
* Emberverse has several of these. Most of the cannibal bands that arose after the end of the world keep live prisoners in them as well (best way to keep the meat fresh).
* Emberverse. He is ruthless, imaginative, and a powerful warrior; she is cool, brilliant and manipulative. Together they form and control the Portland Protective Association, a medieval recreation/protection racket that seizes control of a huge chunk of the Pacific Northwest after the Change destroys most modern technology.
* Emberverse, Norman Arminger recruits motorcycle gang members into his army to act

as enforcers, and become part of his aristocracy, while establishing the Portland Protective Association.
* Emberverse novels when Norman Arminger tried to have a proper old fashioned "Dungeon" and realized that the terrible hygiene brought about by old straw and rats had this nasty habit of spreading disease outside the dungeon, and so now uses bare concrete rooms with large drains for easy cleanup after.
* Emberverse, Queen Hallgerda manipulated her husband Mad King Charles, placed her stepsons Princes William and Harry in harm's way in the hope that they would be killed, and finally murdered Charles when he refused to disinherit Wills and Harry in favor of her own children by him. She also murdered or imprisoned anyone she perceived as a threat to her power.
* Emberverse Sandra Arminger remains one of the few atheists. She admits that the evidence in favor of religion and magic in her universe makes this an illogical position, and says that she has attempted to pray. Her prayers have been ineffective, however, because in her heart she does not believe.
* Emberverse-series, Mike and Signe visit a local inn/trading post. They ask if a number of rugs are for sale and the proprietor answers that the only things in his trading post that aren't for sale are his employees, their personal weapons and the land the trading post is on.
* Emberverse: The Dúnedain Rangers have a quasi-religious reverence for the works of J.R.R. Tolkien. Just how serious they take this reverence varies from individual to individual. The older members, with the extreme exception of Astrid, tend to take it less seriously while the younger members consider them actual histories and swear by the Valar. Given that they pal around with a bunch of Wiccans who consider any god or god figure from classical religion or mythology to be aspects of the same multifaceted divinity or divinities and have a fairly laissez-faire attitude toward worship, it's reasonably justified.
* Emberverse, the "magic" is our modern high-energy technology. Following an unexplained event known as the Change, electricity, gunpowder, explosives, internal combustion, and steam power either cease to function or become so inefficient that no work can be performed. This leads to a swift and disastrous collapse of civilization, as most social structures become no longer able to keep themselves running or six billion people fed, and forces the survivors to rebuild in a world eternally stuck at a medieval level of technology.
* Emberverse, Tiphaine d'Ath, who as a leading knight of the Portland Protective Association favors short hair and masculine-style clothing, is partnered with the exceedingly feminine style-setter and noted beauty Delia.
* Emberverse-wannabe Norman Arminger ignores pointed warnings from his subordinates and, instead of picking off the various factions opposing him one at a time, launches a massive three-pronged attack that instantly unites everyone against him and ends in general retreat.
* "Embiggen" has entered the lexicon as a synonym for "enlarge", mostly on the Internet, after the same scene from
* "Embiggen" is occasionally seen, such as below an image linked to the full file: "Click to embiggen".
* Embittered by the defeat at Stalingrad - the needless suffering, Hitler's inept standards of leadership and a sense of grievance at being abandoned - Field Marshal Friedrich Wilhelm Ernst Paulus changed sides and willingly worked for the Russians after going into captivity under the National Committee for a Free Germany. His motivations were revenge against Hitler, and a more ethically defensible desire to get the war ended as soon as possible.
* Emblem 3, Midnight Red, and IM5 are looking to achieve success, but it's unlikely that any boy band — or Bieber-esque solo singer, for that matter — will overtake One Direction any time soon.
* Embodiment but is single-minded enough to bargain for pocket change as long as it's the person's last penny.
* Embodiment of Scarlet Devil due to her loyalty and ferocity. Unusual here in that Sakuya is a human.
* Embodiment of Scarlet Devil has "only ever seen humans in the form of a drink"

and is suspicious of Reimu's claim to be one — granted those last two are vampires, so they're likely just talking about blood... There are scattered examples in other games too.
* Embodiment of Scarlet Devil is the battle butler for the undead princess Yuyuko, although Youmu is Yuyuko's gardener, rather than her butler.
* Embodiment of Scarlet Devil) — Flandre's formerly simplistic non-spell patterns turn into nigh-unavoidable death traps, and her final card is nightmarishly fast.
* Embodiment of Scarlet Devil, prevents the last stage from being played on Easy difficulty and sends you to the bad ending. If you play on Normal or higher, you can still reach the last stage even if you continue (and can continue on the last stage), but you still get the bad ending.
* Embodiment of Vice: A character with a negative quality assigned to them as a trait
* Embodiment of Vice: Exemplifies a certain moral deficiency to such an extent as to become a symbol of it.
* Embodiment of Virtue: A character is driven by the desire to achieve perfection in a certain moral virtue.
* embodying something didn't dare provoke. Oddly, for their power, none of them took a terribly active role.
* Embraced by the Dutch law firm that adopted the vultures in Artis, the zoo of Amsterdam.
* Embraced, however, in typical dwarven fashion by the game's community, who regularly refer to it as "Dwarf TheRapist".
* Embrace of the Serpent. Whether he actually did attain any enlightenment is still uncertain.
* Embrace of the Vampire, the title character finds a woman who has the soul of a woman he loved centuries earlier and tries to turn her into a vampire. He also fails.
* Embrace, the 13-year-old protagonist has two simultaneous homosexual love affairs: one with his best friend, a boy the same age, the other with his 30-something choirmaster.
* embrace the terms, and created his gang of outcasts specifically because he thought that society had given them no other option besides being evil.
* "Embracing the Future" by BT and "Neo (The One)" by Slyder also have orca/whale song type sounds.
* embracing warfare at its most hellish) from birth in atonement for the planet having a rebellion take place on it centuries ago.
* Embric of Wulfhammer's Castle and thus has many female/female options, there is still one ending where the Duchess can end up with Embric.
* Embric of Wulfhammer's Castle , but this is easy to miss and most of the time it's just creepy, creepy subtext.
* Embric of Wulfhammer's Castle even has the Duchess becoming the centrepiece of one of these rituals.
* Embric of Wulfhammer's Castle , even willing to milk a cow as part of relieving the fears of the peasants. Her uncle, meanwhile, Bad King Greyghast the Terrible, well, managed to get himself called Bad King Greyghast the Terrible. And Duke Theremin is basically a bit of an entitled snot.
* Embric of Wulfhammer's Castle persona, while another ending has her get most of the ladies in a Duchess-centric orgy.
* Embric of Wulfhammer's Castle . There is a very humorous optional scene during one side quest to explore a supposedly-cursed inn. Should you bring Louni as your bodyguard, there is a brief exchange between her and the Duchess regarding how Louni's lifestyle (as an adventurer *cough*) has made her something of an expert on the innards of closets.
* embroidered. It goes from rather simple patterns for junior officers to the ornate tapestries just short of the flak vest for admirals. You see, the Empire really dug that ceremony thing.
* Embry. Even though Embry liked blondes before, the imprint forces him to see this

as beautiful.
* Embryo allows Sylvia to whip Liza as payback for capturing her and mind-controlling her traumatized, unstable self.
* Embryo has a certain form of immortality that causes him to respawn anywhere he wishes as long as his Ragna-Mail, Hysterica, is intact. He uses this to his advantage by offing himself when Tusk has his hand grappled by killing himself, and also to troll Ange when the latter tries in vain to off him before he attempts to force himself on her.
* Embryon has the "Flipsave", a small flipper next to the right outlane. When activated, the player can use a well-timed button press to knock a drained ball through a gate and back to the playfield.
* Embryon wears a red and blue jumpsuit with a tight-fitting silver helmet.
* E = MC Hammer: Incorrect or nonsensical equations that look like real math.
* E = MC Hammer: Nonsensical equations; plain old gibberish resembling math.
* Em City is a cell block-wide version of this, with perks like bright lights, pods with see-through doors, and civilian clothing instead of fatigues. Of course, this comes at the price of almost constant surveillance.
* EM Drive who report having built a functional prototype, and also being examined by NASA to determine whether it's legit. It remains to be seen whether the effect has commercial applications, but if a sufficiently powerful device is developed using the principle, implications could be staggering. Allegedly it would make it possible to travel from Earth to Mars in a matter of weeks and even making it feasible to do a fly-by of Alpha Centauri and return to Earth without the astronauts spending most of their lifetimes on the trip. More recent experiments by German scientists seem to suggest a more mundane explanation: the test chamber wasn't properly shielding the drive against Earth's magnetic field. The only way to be sure is to build a properly-shielded chamber and try again.
* EM Embalming, this is implied. (Please note that until very recently, embalming the dead was an almost unknown practice in Japan, where it's customary for bodies to be cremated, so many Japanese would see something quite creepy about the practice of preserving corpses.)
* emerald ash borer species of insect - several species of parasitic wasps to be specific.
* Emerald City", after Tip turns into a girl, Jack finds it hard to stop staring at her cleavage. A waitress advises Tip to cover them up.
* Emerald City and the language became what is was during the show's run.
* Emerald City, as the clash between the Wizard's technology and the Witches' magic moves towards an inevitable confrontation.
* Emerald City At a tavern, he doesn't understand why people keep staring at him, before the waitress tells him to cover up his breasts unless he's advertising himself.
* Emerald City by Tip when she's asked to choose between going with Glinda and going with West.
* Emerald City Confidential, calls Petra out after the match for using parlor tricks rather than just magic to win.
* Emerald City Confidential, magic is banned for everyone except those who are licensed users working for Queen Ozma.
* Emerald City Confidential monologues occasionally when narrating background information or when considering characters' motives.
* Emerald City Confidential Petra is tracking down, when he is chained up in the Phanfasm prison.
* Emerald City Confidential, Petra, the resident private detective, is hired by Trot to investigate a ship explosion at the city docks. Though the authorities are convinced that the ship's captain caused the explosion, Trot is convinced that he is innocent and asks Petra to find who the real perpetrator is.
* Emerald City Confidential, seen through the eyes of Raymond Chandler."
* Emerald City Confidential, the knowledge pills at the university allow students to acquire knowledge on virtually any topic automatically, from elocution lessons to public records.

* Emerald City Confidential though once Dee offers more money for Petra to get involved in obtaining illegal magical items. Petra refuses.
* Emerald City Confidential tone, Emerald City is filled with criminals, corrupt authority figures, and cynical city dwellers.
* Emerald City Confidential uses poppy dust to quickly sedate and capture her.
* Emerald City decalogy, Corine, who was a powerful player in the first half, is depowerde and turned into a mouse , until she is rescued in the final book.
* Emerald City disappointing ending to a series that began so very promising.
* Emerald City episode "Mistress - New - Mistress" that West had Anna's mother work for her in the brothel she ran, following it up with the fact that she slept with her a few times.
* Emerald City, Jane sends Dorothy back to Kansas against her will, but later Lucas comes to take her back to Oz because Jane has been taken prisoner by the Beast Forever.
* Emerald City much of the architecture of the eponymous city is lifted directly from Barcelona. Anyone casually familiar with the city will notice Gaudi's work, most notably scenes taking place inside Park Güell.
* Emerald City the car flipped a couple times. There's a little trickle of blood, but that's all.
* Emerald City, the Ozians have languages of their own, but some of them also speak English, which also seems to be the official language spoken in the Wizard's domain. This is how the dog gets its name. "Toto" is the Tribes' word for "dog", and Dorothy decides it's as good a name as any, since she hasn't had a chance to find out the dog's real name from the cop.
* Emerald City, the Wizard forces a local rebel to denounce magic by threatening his pregnant daughter with death.
* Emerald City, while some characters explicitly refer to what the Wizard does as science and technology, some keep referring to it as magic, different from the magic of witches.
* Emerald: Crystal, looking back at the photographs from the battle, recalls Archie's last words when she confronted him about the origins of his suit of armor. She asks him who gave it to him, but he can only get out the beginning of the word before dying, as his last word is: "Galac..."
* Emerald Dragon added in some story details and extra sections that weren't in the PC version. These changed mostly carried over to the SNES version.
* Emerald Dragon is partially kicked off by one of these. When Tamryn decides to return to the land of humans at the game's start, the dragon Atrushan rips off one of his horns to give to her, telling her to use it as a flute and sound it if she's in danger. Him hearing the sound of it years later causes him to come to human world to find Tamryn, starting the plot.
* Emerald Eyes, was the first in a series of telepaths created by Project Superman by gene manipulation. Played straight because at the time he was created, the scientists admitted that the technology to create him didn't work yet, and only the inexplicable (at least to the scientists working on him) radiation at the moment of his conception, made the fetus viable. Averted because the source of the radiation was the time traveller Named Storyteller deliberately showing up at that moment to perform the gene manipulation that the scientists were incapable of performing, in order to make sure that Carl (his distant ancestor) existed at all.
* Emerald Hill Zone the drill at you, in case you weren't paying attention. Also, the boss of the Mystic Cave Zone in the same game.
* Emerald is Cinder's underling and a stealthy thief and assassin who isn't above using
* emerald jewel wasp goes the extra mile. It poisons a cockroach with a neurotoxin that turns it into an honest-to-god zombie roach and leads it by its own antennae to a secure location and hides it there, where it is slowly eaten alive by the larva inside it.
* Emerald Prince and has to impersonate the prince, but then finds himself in the middle of a murder investigation.
* Emerald Prince is like this. The people there have powerful magic, but in order

to use it, they must learn to calm their emotions, and in doing so, they learn that there is really no point to violence. If they were attacked, they could defend with magic, but the countries around them are like this as well. That doesn't mean that there aren't interpersonal conflicts and disagreements. They are just mature enough to settle them with words, not weapons.
* Emerald Prince. They are shown positively and have a range of personality traits, since the story takes place there.
* Emeralds are meant to represent love, peace, and luck, something which the character Emerald
* Emerald summon an illusion of a defenseless Ruby on the floor begging for mercy, before she burns it with her Fall Maiden powers in a manner more concentrated than when she was testing her powers on some Grimm.
* Emerald Sustrai has a knack for masking a cold personality under a polite façade. She acts very sweet to the old shop owner while trying to find the location of someone she's looking to murder in cold blood, stealing his wallet in the process. During the tournament, she is very friendly and cheerful in conversation with the show's eponymous heroines, but when they part ways, Emerald immediately begins telling her partner Mercury about how much she despises them;
* Emerald Sustrai has this happen twice. The first one's cause is unknown and hovers between 15 and 20 feet long, while the second debuts with hair at least 56 feet long (the second one is the spell's creator) and with a backstory for it. This second one chose to keep it after meeting not only the first one, but also her mate Jayden Omega (who himself had 15+-foot hair).
* Emerald's weapons, Thief's Respite, are two green revolvers capable of becoming sickles and chain scythes.
* Emerald the elders who have the orbs that are said to control Kyogre and Groudon don't ever specifically call those two or even Rayquaza by name, only claiming them to be super-ancient Pokemon, which is putting it lightly.
* Emerald Twilight present. There is also a somewhat vocal minority of Green Lantern fans that later (primarily following Hal Jordan's resurrection) started to agree with DC's reasoning for making the story (Hal was boring and needed to be replaced). There readers view Hal Jordan's time as Parallax as the only time his character had something going for him.
* Emerald Twilight, the final fight between Hal and Sinestro ends with the two just slugging it out with their fists.
* Emerald Weapon and Ruby Weapon, meaning you can only use physical attacks;
* emerged from stasis. In the meantime, the world recovered and became a lush paradise. Predictably, it did not stay this way.
* Emergence are so tough that ordinary bullets at most sting them. The military is advised to resort to anti-tank weapons if they go berserk.
* Emergence because with her short hair, she can pass for a boy at a distance with the help of baggy clothes.
* Emergence, by David R. Palmer, the character referred to by the narrator as "Teacher" or "Master" (depending on context. Name is given as Soo Kim McDivott) plays this role for the narrator and several other characters.
* Emergence, Candy's first venture outside her shelter features a pack of former pet dogs (now feral) trying to attack her. She kills three of her attackers, which apparently convinces the remaining three to be somewhere else quickly.
* Emergence, Candy Smith-Foster (an eleven-year-old girl) kills an enemy agent by pretending to cry, then snapping his neck when he hugs her. (She is a black belt with the ability to access greater-than-normal strength, and they're in free-fall in an orbiting spacecraft at the time.)
* Emergence, hominems are immune to any infectious disease that humans can contract. However, they are not immune to food poisoning, as one hominem learns while also learning he's actually a hominem (he'd always thought he was human).
* Emergence. It's theorized by characters that the flu somehow mutated genes in women whose grandchildren would wind up as "hominems" (as the subspecies is referred to). One hominem character who's too old for that theory to apply thinks that said virus might have caused this mutation in more isolated cases before the

epidemic. Hominems are stronger and faster than humans, with total immunity to human disease and much quicker reflexes. They also have much more acute senses, including seeing in the infrared range (the narrator, herself a hominem, comments that finding out her vision extends into infrared explains a lot about why human acquaintances couldn't see in conditions that weren't a problem for her). They're theorized to have a longer lifespan than humans, all depicted hominems exceed human intelligence, and they breed true (a mating between h. sapiens and h. post hominem always produces a hominem offspring).
* Emergence: Jo and her ex-husband Alex have a very friendly relationship, so much that it makes you wonder why they got divorced.
* Emergence (RWBY), and ties in another fic by the same author in which an amnesiac Summer Rose played this role.
* Emergence, to prepare to retrieve Yang in Syria, Joe takes Sam and Ruby to a military obstacle course and firing range. While Ruby clears the course with ease, Sam has a really tough time, especially since the course gets peppered with non-lethal but painful rounds to simulate an actual battle. He does a bit better on the firing range.
* Emergence who calls himself "Adam" turns out to be this, among other skills unlikely for the son of wealth and privilege. Granted that he's a mutant super-genius, it's still odd, and protagonist/narrator Candy (also an eleven-year-old mutant super-genius) comments on it, that Adam chose to include world-class cooking among his skills. Susceptible readers may gain five pounds just from the description given of the "work of sheerest culinary artistry" he prepares for Candy in the course of one day.
* Emergence will always be a hominem. There are humans who are aware of this and really don't like it. Unfortunately, they have access to some really nasty ways to try to wipe out the hominem population.
* Emergence, Yang beats Darryl in arm wrestling. He gets so pissed that he attacks her. He didn't know she's a superpowered warrior, and she would have killed him if she hadn't been drunk and if their friends hadn't separated them.
* Emergence: Yang is so strong compared to ordinary humans that her punches tear through people and make them explode.
* Emergence, Yang Xiao Long wakes up in the middle of the Syrian war zone. She grabs an ISIS terrorist and demands to know where she is and what is going on. The man refuses to stop cursing her and calling her a whore, even when she breaks his ribs.
* Emergency 4 features pseudo-Palestinian activists abducting a plane and forcing it to land on the airport of a pseudo-Arabian country, only for the player to storm it with German special forces. Then there are also deluxe missions involving an earthquake in pseudo-Afghanistan, a level 7 nuclear accident in pseudo-Ukraine, and a humanitarian escort operation in pseudo-Sierra Leone.
* Emergency + 4 (voiced by their live-action actors Kevin Tighe and Randolph Mantooth) get extra help in the form of a four-kid ambulance crew, accompanied by a dog, a monkey, and a mynah bird.
* Emergency Action Notification (EAN) is a nationwide activation of the Emergency Alert System which would serve this purpose. It can only be initiated by either the President or the Vice President.
* Emergency Alert System in the US. According to That Other Wiki, "in addition to alerting the public of local weather emergencies such as tornadoes and flash floods, the official EAS is designed to enable the President of the United States to speak to the United States within 10 minutes".
* Emergency Alert System in the US. Once, the system in Montana was hijacked by a prankster saying that the bodies of the dead were rising from their graves and attacking. The officials naturally weren't amused.
* Emergency Alert System that the dead were rising from their graves. Ultimately, this was blamed on hackers and the stations' still using the default passwords on their EAS equipment.
* Emergency!, and wrestles with this type of guilt until he finds out the jerk lied to him to torment him more.

* Emergency! an LA County firefighter at the time of filming (he retired in 1996), because the fire department wanted the engine on the show to be operated by a certified driver rather than risk an actor damaging it. They thought Marco's name just sounded like a firefighter's.
* Emergency! as a foreign diplomat tries to torture him into revealing where his daughter has gone. As is common in these fics, John has a negative reaction to the high dose and is only saved because Roy and the cavalry arrive to free him.
* Emergency! as the previously promised football game tickets she promised them and they were eagerly anticipating were switched out for opera show ones by her on the assumption that they would prefer them.
* Emergency Authority: A public official is given more power than they normally have in order to deal with an emergency situation, which often ends badly.
* Emergency!", a woman with a history of such claims does this to John Gage. They are seen fighting, but it is realized he was trying to push her away as she nearly raped him in a sense. her previous victims resigned, went to jail or committed suicide, but she gets so obsessed with John that she kidnaps him and he later finds the courage to testify so she'll go to jail.
* Emergency Broadcast: An official government warning of an impending threat, broadcast to the population.
* emergency broadcast. Even if they weren't bitten in the process, chances are still likely they'd be infected anyway.
* Emergency Broadcast - means of providing serious warnings to the public
* Emergency Broadcast Network's "Comply" states: "The CIA is ordering the White House to conduct broadcast TV radiation LSD experiments on Americans."
* emergency broadcasts used to get home defense in a higher state of alert when it was only supposed to be used if a German invasion were actually underway, led to the ringing of church bells all over the country as Britain's armed forces manned their stations to repel the Germans.
* Emergency!, but he still had a lot of screen time. Kevin Tighe directed several episodes, writing another, and Michael Norell wrote 4.
* Emergency!. Captain Hochrader was a character of,the week, and Gage and Desoto become captains in one of the films. Various other captains pop up when other stations are assisting on fires, and they are identified by the white stripe on the helmet.
* Emergency Cargo Dump encounters a very rough storm, and one of the measures the crew takes to try to survive is to dump the cargo overboard.
* Emergency Cargo Dump: Throwing cargo out to avoid crashing, or to outrace the bad guys.
* Emergency! cartoon spinoff ''Emergency+4", despite the live-action show normally not having a firepole.
* Emergency Couple, Chang-min and Jin Hee have to do this to a patient with esophageal cancer after they get stuck in an elevator.
* Emergency! destroys or endangers the Cologne Cathedral, Tower Bridge, the Eiffel Tower, Brandenburg Gate, the Matterhorn, Red Square, the Kremlin, and the Acropolis of Athens.
* Emergency! didn't have one. (The one appearing on-screen was actually Station 127 in Carson.) In 1994, the County fire station at Universal City — site of Universal Studios Hollywood — was changed from 60 to 51 in honor of the show.
* Emergency! emphasis on realism. However, the producer did manage to get a more dramatic style to it with a different version that created a rising tonal sound as it charged up for a shock.
* Emergency! episode "Cook's Tour," Johnny removes a boy's handcuffs using a "stetso-hydraulic activator," aka pliers.
* Emergency! episode had the surgery done in a outdoor area because the guy had a live mortar embedded in him and the ride to the hospital could have made it explode. Another episode narrowly averted it, with Roy managing to save the patient’s leg and extract him from a work site collapse just before Brackett arrived to amputate the leg.
* Emergency! example, had a trained doctor doing one in the emergency room on a guy

whose trachea had collapsed. He had to have one to keep him alive until surgery could fix it.
* Emergency Exit believes the chickens are evil and eventually fights a giant chicken.
* Emergency Exit despite the fact he was unaware of the plan while it was in progress.
* Emergency Exit: In terms of power, Nefarious stands head and shoulders above the apartment kids. His defining features are huge size, a 'crown' of horns, ... and giant purple wings.
* Emergency Exit setting is "an Earth not quite like our own" according to the narrator.
* Emergency Exit the main cast was assigned to collect "artifacts" in order to save someone's world from destruction, but it turns out to be a flat out lie and now nobody seems to know what they are for. It is shown that each artifact has a minor power, but implied that they do something far more spectacular when put together (hence an alternative collective name for them, "The Puzzle").
* Emergency Exit, the main characters have a portal which transports them to random dimensions. Frequently used to start crossovers by having them transport to that comic's dimension.
* Emergency! firefighter who played him. Historically, stokers kept fires burning in places like metal foundries and steamships. Mike, however, put them out.
* emergency food supply. She knows this, and always fears for her life when her rescuer/master gets those "hungry eyes".
* Emergency! from 1972-79. Furthermore, he was trained in the profession for verisimilitude up to the point where he could have taken the professional certification exam if he wanted to. He still speaks at firefighting and EMS conferences promoting safety in the fire service.
* Emergency!, Gage and DeSoto were not yet allowed to set up IVs or do many other normal tasks. Then Dixie ends up one of the casualties, and there's no one else to give her treatment ....
* Emergency! gets teased for being this by Fireman Chet Kelly who doesn't seem to do any better with women.
* emergency government appointed by the Roman Senate when things got out of hand enough that they viewed themselves as in some incapable to deal with it. After Sulla then Ceasar made themselves perpetual dictators, it started the current connotation.
* Emergency! had a couple. John Gage didn't make it in one case, and was injured in the explosion.
* Emergency! had a variation with the fire chief coming. This usually means the station is going to be inspected, and Captain Stanley drove the crew nuts with his paranoia and wanting everything in tip-top shape before the chief got there.
* Emergency! had one who was training to become a paramedic. Unfortunately, he kept trying to fall back on the combat medicine he'd learned in the army, and kept arguing with Gage and DeSoto over how to treat the patients and wanting to start treatment before the doctor could advise what to do. He really learned a hard lesson when the guys treated a man whom the medic kept insisting was an acid tripper, and then the hospital relayed he was actually a diabetic, and the medic's course of action (there's nothing you can do but transport and let it wear off) would have killed him.
* Emergency! had the distinctive Quick Call system where each station has its own series of tones to indicate it is being called up and a klaxon that sounds to confirm the Station 51 is being deployed. The dispatcher would then, along with destination info, specify "Squad" for the medics or "Engine" for the fire engine, or "Station" for both. Once, a very tired John Gage mixed them up when awakened and climbed on the engine rear by mistake, with DeSoto yelling behind him "IT'S NOT FOR US!"
* Emergency! had two bank robbers call in the paramedics when one of their hostages had a heart attack. Probably to prevent these charges from being filed.
* Emergency! has a more believable variant with the paramedics responding to a call

about a woman who fell into a forgotten well barely covered by soil. When the paramedics take a careful look, they see the woman waist deep in really thick mud at the bottom and sinking into it. Fortunately, the crew of Station 51 is able to quickly set up some ladders and ropes to pull her out.
* Emergency! has an episode where the paramedic truck breaks down and the Paramedics decide to fix it themselves, much to the annoyance of the regular mechanic who doesn't appreciate them doing his job. Sure enough, the truck keeps breaking down which forces them to abort dispatches. The mechanic eventually solves the problem and the Station Captain bluntly tells the paramedics to leave future mechanical problems to him.
* Emergency! has Mike Stoker kidnapped by a guy who was injured in a fire and blames the department for not rescuing him in time. By the time Mike is finally rescued, he's been beaten, burnt and cut up pretty badly.
* Emergency! has this happen occasionally in some episode... sometimes following an explosion.
* Emergency!. He isn't happy with his ancestor because although the book was written as fiction, Mike feels it made people too aware of vampires. He ends up having to stop a female vampire from turning Johnny, and does so by blasting her with water from the Ward LaFrance's tank, which he had blessed earlier in the day, turning it into a high powered blast of holy water.
* Emergency!. He keeps rigging things like water bombs in cabinets and saying it’s “The Phantom” doing it. To his credit, though, he does warn Johnny off a rigged cabinet after a child dies during a rescue when he sees how down Johnny is.
* Emergency!. He's held captive for 18 months and appears to have been strung up in handcuffs and "punished" this way quite often. By the time he snaps, kills the scumbag, and is found wandering, his back is covered in scars. One of his flashbacks describes a cat o'nine tails-type whip. And as if that weren't horrific enough, he mentions to Roy that sometimes his captor would rape him as well while he hung there.
* Emergency! He's so reviled he nearly throws up upon finding it (though smelling a dead body a few rooms down doesn't help).
* Emergency Impersonation: A character who recently died or has been incapacitated is needed for something, so some other character has to impersonate and fill in for them.
* Emergency Impersonation, when the latter refused to fight. Unlike in later impersonation stories, Achilles is the protagonist while Patroclus is a side character.
* Emergency!, in one of the last episodes, two different conversations cut on two words:
* Emergency! In "The Promotion", Roy and Dixie discuss 'Rule Number One': Don't get emotionally involved with the patients. The ep showed how hard it can be to keep to this rule, given what first responders see in their work.
* Emergency! involved a car driving through the front wall of a restaurant.
* Emergency!, John calls Roy 'Pally' (a form of 'Pal'), and Roy calls Johnny 'Junior' on occasion.
* Emergency!, Johnny and Roy got called to a woman's house. She put on a new girdle that was so tight she could barely breathe and spoke in little more than a whisper. John cut the girdle off her and it smacked him in the face.
* Emergency!, just do what paramedics would really do in that situation.
* Emergency medical responders have the basic rule "Life over limb." While this doesn't usually involve amputation, it does mean that given the choice between risk of death by not moving them because they have an unsecured spinal injury as opposed to moving them out of the immediate life-threatening situation and risking spinal damage, well, they might end up in a wheelchair but they'll be alive to do so.
* Emergency! Movie "The Most Deadly Passage" aka "Seattle Medic One", but without any luck that time.
* Emergency Multifaith Prayer: When their life is in danger, someone starts pleading with multiple deities of different religions to save them.

* Emergency! nature of the show. Most of the struggles were against accidents, injuries and natural forces. Only a few eps had true antagonists.
* emergency), or in the case of transplant surgeons, the organ has to be transplanted while still viable.
* Emergency Presidential Address: An emergency has become so dire that the leader of the nation makes a televised address to the citizens.
* Emergency!, provoking a fight. Captain Stanley threatens suspension but makes it clear he won't tolerate any more of it. That guy becomes nicer later, but then one of Roy's neighbors says in front of Roy's son that John stayed because he liked it and called him a gay slur. Roy has to explain the word, but even the boy is smart enough to realize the guy's a jerk and John doesn't deserve it.
* Emergency!, Randy Mantooth and Kevin Tighe, went through the paramedic training of the Los Angeles County Fire Department at the time in order to accurately portray their roles. Had they not skipped the final exam, they would've been fully-certified paramedics.
* Emergency Refuelling: A character is forced to stop their vehicle in order to refuel the gas tank.
* Emergency! responded to a small fire in a house's toilet, and got a horrible surprise when their hoses actually fed the flames! While using dry foam and tarps to combat the fires, the Fire Chief and the paramedics traced the hydrant lines back to a street worksite, where natural gas monkeys were using municipal water lines to flush a gas line.
* Emergency Room by Caroline B. Cooney, the police bring an extremely drunk homeless woman into the Emergency Room and the nurse greets her with, "Hi, Norma." Then she turns to Diana (a new hospital volunteer) and explains that the police bring Norma in about once a week and that Diana will soon be able to recognize the regulars too.
* Emergency!: Roy Desoto is one, but never had any problems from it. And there was an episode with a vet who seemed to be having a PTSD episode, thinking he was back in the war. But the doctors aren't immediately sure it's psychiatric, and the tests and exams show he actually had a brain tumor causing it. He was doing better after surgery.
* emergency scenario wherein your car is in the path of an oncoming train
* Emergency! series are notable because anything that poses a contamination risk—including chemical, biological, and radiological contaminants—can be visible as a green cloud.
* Emergency! series, Chet Kelly changes his mind after falling for Sandi, a pretty nurse trainee.
* Emergency! series, contaminants are of the (effectively identical) chemical, biological, and radiological sorts. Contaminated people—alive, injured, or dead, and sometimes including your own emergency personnel—must be decontaminated in a special fire apparatus.
* Emergency! series: Doctors have these, and use them on patients on the brink of death. There is a very narrow window in which they can be used successfully, however; if a doctor is not on-site, the patient will probably die.
* Emergency! series of PC games, as you are the one who has to clean up the mess.
* Emergency service operators are trained to advise callers over the phone, keeping them calm if possible, and directing them to avoid hazards, apply first aid, etc.
* Emergency Skin" follows a man who goes to Earth to get skin cells for de-aging and skin replacement procedures, and is surprised by "Tellus'" diversity and acceptance.
* Emergency Stash: How our hero manages to get money, IDs, and weapons while on the run.
* Emergency! supporting stars. Making things interesting, series creator/producer Jack Webb was London's ex-husband. Also, Randolph Mantooth's brother appeared as a guest actor and a firefighter in the background a few times.
* Emergency! talking about her philandering husband and inferiority complex towards her mother, while the psychologist accuses her of being hostile towards various

people. Throughout the episode, the psychologist moves his chair closer and closer to her couch, and her position on it becomes more alluring. The last segment ends with the two of them about to start an affair. Johnny becomes hooked on the show despite thinking it's garbage, and after Roy and Lopez get injured, they become fans of the show.
* Emergency Temporal Shift: A character evades danger via time travel.
* Emergency!" that his girlfriend had his child while he was being held captive and gave her to Roy and Joanne. They begin raising her as theirs, and when John is found alive and brought home, Roy has such a hard time figuring out how to tell John that he figures it out himself when he sees his mementos and pictures in the baby's room.
* Emergency!. The crew arrives before his captors can burn him but has to remove his clothes and douse his skin to wash off the stuff so he won’t have irritation from it while he’s taken to the hospital.
* Emergency!: The producers had to abide by a "no blood" rule to get the series greenlighted, so even injuries where you'd expect some level of blood had very little to none.
* Emergency!", there's a variation on this, not a challenge of the suitor per se, but of the engagement itself. Dr.Brackett, Johnny, and Chet are cat shifters, and after Chet is infected, he is told he must take a mate because of the People's dangerously intense sex drive. Chet had already been flirting with Brackett's sister and they pledge themselves. But, Brackett doesn't like the idea of Chet, a 'brought in', marrying her because they are members of an old, well-respected family. Brackett demands the Right of Combat and ends up battling her champion, Johnny, to first pin. Johnny wins and Kel must accept the pairing.
* Emergency!: The show is popularly thought to have been the best advertisement about the merits of the paramedic program ever, and lots of cities and counties started setting up their own in the 1970s. While the series' influence on public policy might never be confirmed, the series definitely inspired many people to become paramedics and/or firefighters.
* Emergency!. To the point where he has a major panic attack in the locker room when Roy, who's a bit angry at him about something, quickly pulls his belt off as he's changing. Roy has to reassure John he isn't going to hit him with it.
* Emergency Transformation: When saving the world, time is of essence.
* Emergency Ward Ten Dr. Mahler was, for the time, an extremely strong central role for a black actress. But British audience reactions to her having a relationship with a white co-star were hostile and she was written out of the show.
* Emergency Weapon, and rogues might want to grab a club to break that skeleton's bones. Even if a character lacks proficiency, having any backup weapon is better than relying upon their fists alone, unless they are a monk, have an inborn unarmed attack, picked up the Tavern Brawler feat, or took on the Unarmed Fighting Style.
* Emergency Weapon start showing up with assault rifles and better body armour.
* Emergency Weapon: The weapon you can resort to when you used up all of your precious ammo (usually a knife).
* Emergency! where units other than Engine/Squad 51 appear, the other firefighters are actually firefighters. Similarly, Engine 51's driver Mike Stoker was played by Los Angeles County firefighter Mike Stoker, the captain in the first season was an LACoFD captain, and the uncredited dispatcher was really a county dispatcher.
* Emergency! with LACFD Station 51 being a one storey building, but occasionally the paramedics pull duty in older multi-floor stations which have firepoles.
* Emergency!, you may have noticed that although the uniforms may be similar or identical, you'll be hard pressed to find two hats the same. In that time period, nurses wore the hats they wore for their respective schools.
* Emergent Human: A character is new to sentience, sapience, or being human, and has to adapt to it.
* Emerging for the real life National Institute for Infectious Diseases located in Kanto, Japan.
* Emerging from the Shadows: Someone's face or body is completely masked in shadow until they dramatically reveal themselves.

* Emerging manga, it is clear to the reader that he is almost exactly twice her height.
* Emeric, an ageing Templar and one of the few in Kirkwall still concerned about actually protecting people. Hawke meets him while he's investigating a spate of 'disappearances' he believes are linked.
* Emerican Johnson (a.k.a. NonCompete), who makes videos discussing anarchism, voice acted in
* Emerich Juettner got away with counterfeiting for a decade (from 1937 to 1947) despite the poor quality of his fakes (printed on ordinary paper, with badly reproduced graphics and Washington's name misspelled) because he printed only modest amounts of fake money, because he never used the fakes at the same place twice (out of an odd personal sense of honor), and because people rarely pay much attention to one-dollar bills. (Even when people did notice, they often preferred to keep the bogus bill as a souvenir rather than report it.) His odd pattern of passing bills (much different from the M.O. of most counterfeiters) baffled the U.S. Secret Service for years. He finally got caught when there was a fire in his apartment and his equipment got tossed into the street by the firemen; he was sentenced to a year and a day of jail (of which he served four months) and, ironically, was fined $1.
* Emer Prevost's version of this when movies are inconsistent is "Fuck you, that's why".
* Emerson, Chuck and Ned disguise themselves as "Vatican investigators" to look into the murder of a nun in the
* Emerson, Lake & Palmer. Even a good chunk of their fanbase seems to agree that the quality of their work after their peak period took a nosedive.
* Emerson, Lake & Palmer. It was reputedly a reference to a blow job.
* Emerson, Lake & Palmer remixed the album he couldn't recreate the effect digitally, so it can only be heard on the original mix.)
* Emerson, Lake & Palmer sampled the song in his single "Power", stating that it made the song sound fresh to modern audiences. In the last few years of his life, he always opened his solo shows with a version of "Schizoid Man" that incorporated almost two minutes of West's song.
* Emerson Lake & Palmer's "Karn Evil 9" ends with the AI surviving the war meant to destroy it, and declaring, "I'm perfect, are you?"
* Emerson, Lake & Palmer's "Karn Evil 9: First Impression Parts 1 and 2" depicts modern life as a funhouse museum of the strange and grotesque.
* Emerson, Lake & Palmer's "Lucky Man". ELP's first album did not have enough material to meet contract obligations, and thus Greg Lake decided to record a song he had written when he was twelve. It is very atypical of the band in that it focused mainly on acoustic guitar and singing instead of keyboards and instrumentals. A song meant to be a filler turned out to be a successful hit, reaching number 48 in the Billboard Hot 100. As a result, Lake would write and play acoustic guitar ballads on later albums, such as "From The Beginning", "Still... You Turn Me On" and "C'est La Vie", some of which were Black Sheep Hits in their own right.
* Emerson, Lake & Palmer to entirely new audiences who otherwise would probably never have heard them. Each of their albums contains at least one example of this trope. Keith Emerson's previous band, The Nice, also did this a lot.
* Emerson, Lake and Palmer, making the band itself an example of this trope.
* Emery Schaub, a.k.a. Butterball, could be counted as one. Much like Frog-Man, he's fat, clumsy, untrained (not for lack of trying; Taskmaster does try, but declares him hopeless), and has no idea what he's doing (
* Emet-Selch/Hades, your Warrior still returns to the light, needing to embrace both it and darkness to win. I am shadow, I am the light, indeed.
* EMF invasion struck the public consciousness and killed all other forms of alternative rock in the mainstream for a couple years, undermining further success. They are more commonly regarded as a one-hit wonder than a two-hit wonder.
* E. M. Forster could not be published until after his death due to its gay subject matter.

* E. M. Forster" features an underground city. There the inhabitants have forgotten what the surface world is like to the point of believing it is a lifeless, barren world. Believing their artificial environment is the only solace from a dead world, the protagonist of the story ends up finding otherwise with disastrous results.
* E. M. Forster wrote a science fiction short story called "The Machine Stops" (1909) about a future civilization that has grown dependent upon automation. (When the titular machine deteriorates and dies, so does the civilization.)
* EMI America Records there prompted them to finally issue those albums stateside.
* Emi and Takeshi who've known each other ever since they started competing in piano competitions as children.
* Emigrate compares a toxic relationship to an addiction, expressing a desire to “drain you from my veins.”
* Emil and the Detectives is arrested for stealing a few bills off a kid, a further search reveals him to carry the cash from a recent bank robbery.
* Emil asks about the possibility of having a bath, well within hearing range of anyone inside the building.
* Emil Blonsky sports these after he transforms into the Abomination in
* Emile-A239 is another Spartan-III example whose life is defined by the pleasure he takes killing Covenant. His superiors specifically mention that it's best for everyone that he be fielded solely against Covenant targets; his brutality is ill-suited against human Insurrectionists who could very well garner sympathy from the public if his methods were showcased.
* Emile Danko of Volume 4. Especially in the online comics and mini-series, where he's shown pushing his men to the brink and also sending them into potentially hazardous situations blind with poor intel. Plus it's implied that he's fed two of his men to Sylar so Sylar could assume their identities, as well as setting things up so that one of the personnel would end up killed by Tracey Strauss in an escape orchestrated by him to prevent an implied shutdown of the division by the government.
* Emile Zola novels explain he saw his work as a "social experiment" with him only writing down what the characters would do in that situation.
* Emil fits this pretty well. He's generally pretty detached and awkward, but he does care about his team and sometimes shows it. (Such as the end of "Kent" when he gently tells Tess that maybe she is a better person than she thinks she is.)
* Emil has trouble hitting a middle ground between overthinking things and letting the self-centered
* Emilia and Karuna both replace their Clanche Customs with customized Impulse Gundams, the Impulse Arc and Impulse Lancier.
* Emilia Clarke have an uncanny similarity. It's partially the wigs though. The white hair masks the differences in complexion between them that would normally be more apparent. The difference in height between them is also more dramatic in real life than it appears on camera. Still, even without the wigs they could pass for siblings.
