* the third game. The Normandy SR-2 gets recolored as such between the games when it comes into the Alliance's possession from Cerberus, as do many of the Alliance variants of ships seen previously used by Cerberus in the second game (such as the Kodiak shuttle). Even the menus switch from blue, to orange, to blue again throughout to the trilogy to represent whatever faction Shepard is working for at the time.
* the third game, this is pretty much Wrex's reaction if his brother Wreav meets an untimely end.
* The third game, who has a surprising amount of knowledge about the killing game and ends up as the first murder victim.
* The third generation eyecatches feature a chibi Lum as a magician pulling Ataru out of a hat (commercial intro) or simply extending a hand in greeting to the viewer (commercial outro) over an excerpt of "Yume wa Love Me More" (with vocals in the intro, instrumental in the outro).
* The third-generation protagonist reaps the benefits as a full-fledged member of society. (The grandson who ends up learning to appreciate their ancestral heritage).
* The third gonk, Kouga, is not NEARLY as sensitive as the previous two; his problem is that, because of his ugly face, he has become delusional that ugliness equals goodness. Because of this, naturally, he is the only one of the three gonks in
* The third-grade student who is in love with and wants to marry her teacher, feelings which are
* The third great wave", have observed that the digital boom could be far more disruptive to labor markets than the two Industrial Revolutions were.
* The Third Hokage actually had a jutsu that played this straight using
* The Third Hokage is an old war veteran who generally comes off as a grandfatherly figure, but in the Chunin Exam Arc, he shows how he earned his title "The God of Shinobi" by fighting against both of his
* The Third Hokage, who despite being a decrepit-looking 70-year-old man, is extremely powerful and skilled, able to go toe-to-toe with the likes of the
* The third Imperial Princess of the Hellas Empire Theodora is always seen with these on. The Twilight Imperial Princess

* The Third Imperium background to the science-fiction role-playing game
* The Third Imperium claims to be this as well and has some merit for the claim. However, much of its economy is too regulated and bureaucratized to give it the true glamour of a
* The Third Imperium even went this one better by changing its capital's name from Sylea to "Capital"
* The Third Imperium officially reserves to itself the right to issue letters of Marque and only occasionally issues them. Member substates and power blocks sometimes hire space mercenaries but these are not supposed to depend on plunder for their upkeep. When exactly that rule is violated is rather blurry. It probably depends on what the local Imperial Noble considers appropriate to the interests of the Imperium and/or himself.
* The Third Imperium used a 365-day year, probably because of tradition: it was based on the Second Imperium, which had been created by Earth humans conquering the First Imperium.
* The third, incorporating Robin, Franky, Iceburg, Zambai and Paulie happens in Chapter 43.
* The third instance occurs during episode 11. Yoshiharu volunteers to
* The third is a wheel that you can spin to increase its damage for 20 seconds at the cost of health drain.
* The third is done by Hana again, during the fic's thirteenth Gaiden chapter
* The Third is even better if you have the Respect upgrades. Specifically, the ones that grant immunity to bullets, fire, explosions, ragdolling from said explosions, and fall damage. You're now immortal. Find the nearest survival mission and have a blast.
* The third issue of the comic tie-in to the Legion cartoon has a bunch of Legionnaires hit by this when their powers are messed with. Legion applicant Infectious Lass accidentally unleashes a virus that causes her and several Legionnaires to swap superpowers.
* The third is the very creepy Endermen, which just stand there... until you look at their faces...
* the third Kai episode, which covers the Garlic Jr. Saga, one of his henchmen, Vinegar, actually leaves when all the other henchmen get killed, saying it's killing his high. This is Garlic Jr.'s reaction.
* The third killer tries to poison Kokichi's tea, but ends up accidentally poisoning an innocent victim instead. Kokichi realizes that the killer could easily have ended up poisoning Shuichi (who also likes honey in his tea) by mistake, and when he asks whether the killer would have a problem with that, the killer says "Not really."
* The third kind is random recolourings which serve no purpose at all, are given little to no context, are not differentiated from the main Digimon at all, and seem to be there for the hell of it. Like in
* The Third Kryptonian, Amalak sends his minions to destroy the Superman Family, expecting an easy victory. Instead, all of his men are defeated.
* The Third Kryptonian, Batman heads towards the Fortress of Solitude right away, knowing instinctively what Superman expects him and wants him to do.
* The Third Kryptonian. He spent centuries tracking down and killing Kryptonian survivors, and he'll not be satisfied until every last one of them is dead.
* The Third Kryptonian, Karsta and many of her friends in the Kryptonian Stellar Navy became pirates and mercenaries after the navy was disbanded. Returning home would have cost them the powers they gained under yellow suns, as well as their cherished lifestyles as soldiers. However, many of them eventually returned to Krypton or retired to more peaceful lives.
* The Third Kryptonian, Karsta Wor-Ul admits she sometimes killed people to survive during her time as a runaway outlaw. She isn't proud of it, and she wonders whether she could have found another way, but she points out she was just trying to keep herself alive.
* The Third Kryptonian, Karsta Wor-Ul grows alien medicinal plants in his yard. She smokes a Bolenthi herb for pain relief, but some human teenagers stole and smoked

her crops. It made them super-strong... and crazy.
* The Third Kryptonian, Karsta Wor-Ul reveals she and her friends joined a pirate band for a while after becoming homeless outlaws.
* The Third Kryptonian, Karsta Wor-Ul's husband Ro-Kul got murdered several centuries ago. She's remained celibate since then.
* The Third Kryptonian, killing any and all Kryptonians he could find, even those who had nothing to do with the genocide of his people. He didn't mind innocents getting caught in the crossfire either.
* The Third Kryptonian's pirates are armed with all kinds of Kryptonite weapons to hunt down Kryptonians: Kryptonite-powered laser beams, Kryptonite flechettes... During the fight, Superman guesses Amalak synthesizes his own artificial substitute.
* The Third Kryptonian... which is because he isn't amused when Superman mentions he is already aware of it.
* The third layer of the Beastlands, Karasuthra, is a wild forest in continual night, lit by a single moon and home to plane's most dangerous beasts. Karasuthra's magic actively enforces its darkness, preventing nonmagical lights and fires from being lit and drastically dimming magical ones. The second layer, Brux, is in eternal dusk instead, with a sunset at one end of the sky and a silver moon at the other, and is home to crepuscular creatures that in most worlds only enjoy brief forays between true day and night. The topmost layer has
* The Third Life of Steve Rogers and give Tony a reason not to want to go with his parents on that night, as they have no contacts in SHIELD of the appropriate age, gender and attractiveness necessary to draw Tony's attention and don't want to outright abduct him as that would compromise the future Steve came from where Tony always assumed their deaths were an accident.
* The Third Life of Steve Rogers a super-soldier should be. Sarah speculates that Schmidt and Blonsky's more monstrous forms were the result of Schmidt envisioning himself as the monstrous form of Ymir, a manifestation of his full potential, while Blonsky wanted to be a more monstrous Hulk, and Steve notes that, based on what Bruce told him about his difficult childhood, he can see how Bruce would want a strong form that could never be hurt by anyone again.
* The Third Life of Steve Rogers because he'd already found evidence that he did that anyway; the name of Peggy's husband is Grant Edward Buchanan (the middle names of Steve, Tony and Bucky), the man's birth and marriage certificates are written in the same handwriting, there is no record that he was ever in military service, and he even finds a rare photograph of Peggy with her husband and children that shows the man looked very like Steve. Over the next few decades, Steve and Peggy often take action to ensure that Steve's history plays out as he remembers, such as discreetly helping to keep Bruce Banner hidden from General Ross until he's ready to 'go public', and their various children take up positions that will help the Avengers be prepared for events such as the fall of S.H.I.E.L.D.
* The Third Lightning, the final stage involves traversing an alien dimension that constantly phases in and out of reality. You must maneuver your ship into a circular dimensional "warp" that drifts through solid walls as they appear. But the warp itself can disappear and reappear elsewhere and if you were inside the walls when the warp fades out it's instantly fatal.
* The Third Man. Baron Kurtz now works as a black marketeer in post-war Vienna.
* The Third Man plays him as just a normal guy you wouldn't look twice at, and takes three seconds in a search-light and a somewhat sheepish 'you caught me' grin to completely upstage Joseph Cotten's excellent performance and steal the film.
* The Third Man was a British movie largely filmed in Austria with David O. Selznick as an uncredited American co-producer.
* The Third Man willingly caused the deaths of countless penicillin recipients by watering it down. Instead... he accidentally shows an educational slide of an elephant intended for the Anglo-Austrian re-education programme.
* The Third Men likewise form three global governments, whose lifespans measure between fifty thousand years for the least-enduring to a quarter million years for the most.

* The third method is when the actor acknowledges the character is "them", but somehow a "different" them. This is the least frequently seen, most subtle version, and the mechanism of this change in personality is not consistent, further making it more difficult to recognize.
* The Third Millennium, written in 1985, has communism (and capitalism) collapsing in the mid 21st century, but the USSR existing as a political entity right up until 3000.
* The third movie culminates with Smith, now unbound by the rules the Machines imposed upon him, copying himself into every human and program in the Matrix.
* The third movie ends with Dark Keroro traveling to another planet, while followed by his former subordinates, and, while infiltrating the planet to start a new invasion, he's found by a couple of siblings very similar to Fuyuki and Natsumi in a similar way to the events of Keroro's first episode, with the implication that a similar story will happen there.
* The third movie features the characters talking to human actors in an animated world.
* The third movie had rebuilt WW2 warbirds playing themselves, with the exception of a
* The third movie has him telling the other toys that Andy really wanted to put them in the attic and not in the garbage.
* The third movie has the U.S. military failing to create a counterattack upon the Decepticon invasion in Chicago due to both air and ground superiority. It's only when the Autobots arrive that the U.S. soldiers actually start gaining an advantage and ultimately play a crucial role in the final battle since by the time Optimus, Bumblebee and the Autobots emerged from having faked their deaths they helped take down the more powerful and larger Decepticons such as the Driller.
* The third movie has villains that can perform a different method that erases entire characters from others' memories. It's surprisingly thorough to the point where a character who trained like mad to get strong enough to save an erased character forgets his training and thinks he's much weaker than he actually is. It can't erase physical evidence, however, and
* The third movie is so polarizing that it caused another split among fans of the previous Rebuild films. Some praise the film for being the darkest and most daring entry in the franchise (it's the first entry not to be based off any existing arc of the original anime), while others criticized the
* The third movie scratch. As for Sam... he looks like he ran into a bus... and a wood chipper... and a wild bear.
* The third movie starts right away with this. The joke in the opening is that we're watching an
* the third movie, the Sulaco is attempting to return home via autopilot (as the few surviving humans are in the freezer and the AP, Bishop, is damaged): thus, nobody is available to kill a facehugger that managed to get aboard and causes more damage.
* The third novel, that was Tabris' debut in the franchise, had him kill
* The third OAV reveals that "Yosho" has ties to the government, possibly going all the way up to the Emperor. In fact, given the relationship between Earth (Japan) and Jurai, it's pretty easy for aliens to establish any long-term identities they like.
* The third occurred a few years after the Imperium Invasion and involved the Thanagarian Empire, of which Hawkgirl was an advanced scout, attempting to create a hyperspace bypass through Earth, the creation of which would have destroyed the planet. Hawkgirl ultimately betrayed her species to help the people of Earth, sparing it from destruction. Afterwards, the Justice League was expanded to its enlarged present state.
* The third official world chess champion, Jose Raul Capablanca, was known to rely on his prodigious natural talent for the game and rarely ever studied or prepared. He could also calculate very deep lines but preferred not to, just playing more practical moves instead quite often, even when they would take longer to win the game. In his 1927 world championship match against the Russian Alexander Alekhine,

he was so confident he would win that he didn't bother preparing for or analyzing any of the games, instead partying and getting drunk every night after each game, while Alekhine studied hard. After Alekhine won the match, he was careful to make sure that Capablanca didn't get the chance for a rematch.
* The Third of May 1808, depicts Spanish rebels being shot by a French firing squad during the early stages of the Peninsular War (hundreds were executed this way).
* The third one also has Sandman, a Master Sergeant. He leads his team with great skill and courage, and his men have undying respect for him. Like Foley above, he also refuses a retreat order and insists on continuing the mission.
* The third one featured the family throwing a Halloween party, with Lisa, Grandpa, and Bart telling all the stories.
* The third one has a man accidentally dropping his chocolate near his dog as the dog gets excited. When he picks up the chocolate to eat it, a girl and her grandmother
* The third one is just a short conversation during which Rose expresses concern that their mother might not let Rose's sister Diana marry Robert because he's from a lower class. Diana just states that if their mother won't give her permission, she will just marry him anyway, and that she's pretty happy that he's from a different class because if she married someone from their own class she would just end up being a decoration at a dinner table, while Robert actually treats her like a person.
* The third one showed the best episodes from the first three seasons and was followed by a documentary about the show.
* The third-party adventure "World's Largest Dungeon" falls into this a lot.
* The third party member is usually recruited via jailbreak. However, if the player selected Charlotte as the third party member, she joins in a predetermined location much earlier. Should this happen, one of the three possible party members not chosen by the player will be in the jail cell instead of Charlotte. The foresight comes from an extra scene where this character gets left behind when the heroes flee the town; if Duran is the character left behind in this manner, he'll berate the heroes for abandoning him when they meet Duran in the Molebear Moors much later.
* The third-Party publisher Dreamscarred Press has released a sourcebook called
* The third-party Tome of Artifacts features a magic item known as the King's Pepper Grinder — so named because it was made by a court wizard for a king who was obsessed with putting too much pepper on his food. Despite being a glutton, the King in question is shown to be a generally nice guy and a pretty capable fighter (though he is incredibly irritating to cook for).
* The third phase of the battle over Ryloth requires the Republic's starfighters to enter the Lucrehulk Battleship's core and shoot it down. It's slightly larger than Fondor Shipyards' generator section, but still hard to stay inside the hull to make repeated passes at the core.
* the third Pokémon movie symbol Pokémon Unown, glowing green and turned 90 degrees, spelling out "ENTEI" over and over.
* The Third Policeman) and after reading you'll probably never look at a bicycle in the same way again.
* The Third Policeman at best (highlights include his claim that night is actually caused by black air, and the urge to sleep comes from being asphyxiated by said air). Despite this, the footnotes and narration are full of discussions arguing about what de Selby really meant, with different philosophers eager to show off their intellect and analytical skills as they piece together the truth... which ends up making them all look like pretentious idiots wasting their time instead.
* The Third Policeman by Flann O'Brien has been retro-actively called the first real "classic" of the genre, even though it was written in the 1930s.
* The Third Policeman features a spear so sharp that if you were to prick yourself with it, your finger would begin to bleed about two inches before the point appeared to reach your finger. In fact, when your finger starts to bleed, the spear point had penetrated your skin two inches ago, but was so thin it slipped between the atoms of your finger without causing any damage.

* The Third Policeman, one of the policemen occupies his time making boxes which contain perfect smaller replicas of themselves. The protagonist is highly disturbed by this.
* The Third Punic War even more so, from the Carthaginian perspective. Imagine the situation: your once proud civilization, which used to have a great empire stretching across your known world, has been reduced to a single city and the land immediately around it. You've been beaten,
* The Third Punic War in 146 BC. Since the Carthaginian state was destroyed, the war only officially ended when the mayors of Rome and Carthage (Tunis, nowadays) signed a ritual peace treaty in 1985, over twenty-one centuries later.
* The third quarter of season 3 had one episode for each character sharing this trope with Zuko. Toph even
* The third question is actually a trick question if you stop to think about it. Earlier in the episode, Mr. Krabs said to "never discuss the
* The Third Raikage has superhuman resilience from training alone. His lightning armor is its own brand of absolute defense, but with
* The Third Rail in Fallout 4. People there behave for many reasons; such as extortion means getting shanked. By the mayor.
* The Third Reich still happened, so did the Holocaust, and despite the Fuhrer dying roughly ten months early, the circumstances behind this development would not have disrupted the postwar order very much, as Yalta had already happened. Furthermore, Roosevelt was still alive and disinclined to screw Stalin geopolitically any more than Stalin would have been OTL.
* The third season added Desmond and a few of the Others to the main cast.
* The third season also had an episode (written, appropriately enough, by D.C. Fontana) that was a homage not only to classic
* The third season episode "It's Not The Fall That Kills You" opens with Walter falling through the air, plummeting to almost-certain death, then cuts to six hours earlier to show how he wound up there.
* The third season episode "Let's Get Dangerous" is a double-length episode focusing primarily on Darkwing Duck, as well as establishing Gosalyn and Launchpad McQuack as his crime-fighting partners. The episode was promoted heavily by Disney, even being released for free on YouTube. It was later confirmed they would be rebooting Darkwing for streaming on
* The third-season finale, "The Wedding," is built around Mike's brother Rusty's wedding at the Hecks' house.
* The third season finale was one huge HFA. The mayor is giving the commencement address at Buffy's graduation, which is also where
* The third season had an episode where Archer and several of the main cast were being converted into a different species by a virus, a last-ditch attempt by that species to preserve themselves. They manage to cure it by the end, though Archer keeps a sample so something of that species will remain.
* The third season has a wildly inept internal affairs officer who is investigating a very mildly corrupt cop, but goes about it in a terrible way. She approaches his partner and asks for her help, gives no reasoning, and assumes she has the partner's assistance and continues harassing the partner. It also turns out she may have an ulterior motive for pursuing the cop (they used to be partners, with another cop who got killed due to a drug addiction which may have been preventable).
* The third season has lead actor Mark Feuerstein begin a heart disease PSA with "I'm not a doctor, but I—" before co-star Reshma Shetty cuts him off with "You're not really going to say it, are you?". He settles for "Take it from a guy who
* The third season kicks off with the Misfits having to dispose of yet more bodies: this time, it's the villain of the week and her victim, both of whom are buried in some decently forested territory.
* The third season opener had a small Drazi ship racing past Centauri blockade mines to give Marcus a chance to escape and reach Babyon 5. Notably, the Drazi ship
* The third season opening reuses this trope. Jim accidentally shoots a security

guard, blames his Sentinel senses and loses his abilities due to his guilt. He then has to go through with another vision to get them back and save the day.
* The third season saw the debut of the "Take The Lead + One Spin" space. A second or third place player hitting this space would have their score bumped up to that of the first place player plus $1.
* The third season sees some of this going on between the NYPD and the FBI, since the FBI are in Wilson Fisk's pocket and corrupt, and the NYPD are not (anymore). Foggy is quick to note that Fisk's "deal" only applies to his federal case, and that he can still be prosecuted for his crimes at state level irregardless of the outcome of his federal case. District Attorney Blake Tower is reluctant to pursue a case against Fisk, citing jurisdictional matters. Foggy sees this as Tower not wanting to jeopardize his reelection chances, though Tower could have other motives (like not wanting Fisk to get a chance to expose the fact that Tower knew all about Reyes ordering a DNR on Frank Castle, covering up the massacre of Frank's family, and later using Grotto as bait to capture the Punisher).
* The third season's plot line of Dean being condemned to Hell was originally planned to be resolved by Sam learning how to use his demonic powers to rescue him. However, the 2007-08 WGA strike occurred during the third season's production, forcing the season to be cut short with no time to properly build up Sam's powers beforehand. The showrunners thus had to come up with an alternative way to get Dean out of Hell. Their solution? Have Dean be rescued by an angel named Castiel and start introducing angel mythology during the fourth season to plausibly explain why an angel would be interested in Dean's fate. That's right; the series'
* The third season was produced between 2005 and 2006, but didn't air in the United States until three years later (from 2008 to 2009).
* The Third Secret and by subsequent popes, wasn't made public until 2000. In the novel, John can't read Lucia's old-fashioned Portuguese, so he gets a translator to write it in modern Portuguese and in Italian. The translator has a very heavy hand and his writing is impressed on the page below; moved by an interior impulse, he later shades out the impressions and keeps them. This is the "facsimile" that he later sends to Pope Clement VIII, and this is where the story really starts.
* The third serie, Gintama°, only use each opening for a dozens of episodes, which mean they can make them closer to whatever arc take place at the moment. They still use the upbeat song "Beautiful days" for the
* The third series finale has Martha with a mostly (but not entirely) off-screen Fugitive Arc while she prepares for the final confrontation with
* The third series' Mrs. Miggins is a pretty straightforward Columbina, given her quasi-romantic relationship to Blackadder, middle-class social status (she owns and operates an inn/pie shop), and her collaborative role in many of Blackadder's plots. This also applies to Kate/Bob of the second and fourth series.
* The third series' protagonist is Tang Wulin. Raised by a working-class family, he's down-to-earth, cheerful, and something of a
* The third series used a much lighter 'fairground' setup, and the child's danger of being gunged was removed entirely (it was replaced very briefly by the Forfeit Furnace, in which the host would 'burn' a forfeit that the child had taken with them if they were on the losing team - thankfully this was dropped very quickly after complaints from viewers, though the host reassured in an interview that no possessions were really destroyed). Instead, the losing adult had to answer three multiple choice questions, where answering wrongly would allow their nominator to pull a lever and cover them in one of three colors of gunge. All this was naturally irrelevant, because in the end they always got to send them into the vat below anyway. Again.
* The third series, who turn out to be a rogue splinter group of the Utrom themselves mind-controlled by Kraang Prime and commanded by Kraang Sub-Prime.
* The third sibling is Urara, which means "bright" and "beauty". It is also a pun on Uranai (fortune telling), which is her special talent as a magician.
* The third singer also did the songs for Jasmine, Nala, Pocahontas and Megara.
* The third, smaller one came in 2010 with their playing Lollapalooza, which actually drew Western metal fans and, had the band not petered out for the most

part after 2011 with not much activity and constant delays and rumors of breakup (which don't do much to sustain active fandom), might have been their major comeback.
* The third starts with Emily in a wedding dress being shot by an unknown assailant and falling off a yacht.
* The third style of tank was more conveyor-like, with the victim being carried on a chair through a set of carwash-style brushes to the center before they were covered by the main tank.
* The Third: The Girl with the Blue Eye fast enough to get out without damage, but do survive nonetheless.
* The Third: The Girl with the Blue Eye has Gravestone who/which was presumed destroyed long ago but turned out to be fully operational and both ready and willing to fulfill its purpose.
* The Third: The Girl with the Blue Eye has the "Technos Taboo". Enforced by the ruling elite known as the Third to prevent the most advanced of technology from being used outside of their control.
* The Third: The Girl with the Blue Eye is an old (but still fully operational) Kill Sat capable of creating Black Holes on top of the targeted area (which means that depending on the power used in such attack it can most likely destroy anything up to the entire planet)
* The Third: The Girl with the Blue Eye than you can shake a stick at.
* The Third: The Girl with the Blue Eye uses this periodically to dodge gunfire and destroy mecha with a single cut.
* The third theme park in Universal Orlando Resort. It was first thought of during the expansion of the resort in 1998, and they even bought the land to build the park. But the economic fallout of the September 11th attacks along with the initial financial failure of Islands of Adventure made the project less viable and the land was sold off a few years later. Eventually, with the success of the
* The third: The soundboard guy sucks, and therefore everyone's playing does. This is often the one that is an exception to starting over being seen as unprofessional, and has occasionally led to bands
* The third time a case such as this happens, is in the Dressrosa Arc, where Momonosuke rests his head in Nami's lap since they were playing "Samurai". This causes Brook to put his head onto Nami's lap since he thought they were having a "head-in-crotch" party. Nami's reacts to this by comically punching Brook.
* The third time is after Spence backstabs the group and traps them in the lab, he tries to get on the train. He stops to inject himself with the anti-virus, and is attacked by the
* The third time is during the sea voyage to Africa. The captain agrees to allow Riff to build one on his ship, after he learns that all the carrot cakes have been stolen. Of course, Riff adds explosives, which go off when a seagull lands on the plank, damaging the ship. The captain quickly creates a plank out of a folding deck chair and makes Riff walk it.
* The third time it's also giving out facelifts, and tells its customer, Statler, it can "rearrange your looks";
* The third time Leon Tao's number comes up who intend to kill him. When he realizes they intend to kill him, he goes from panicked and upset to confident because he knows Reese will be coming to save him. Again.
* the third timeline in episode 10 of the main series after Sayaka turns into a witch. Mami becomes so terrified of the Awful Truth
* The third time occurs when Hook spots Smee leaving his quarters to set a course for the Spanish Main (which he claims is their hiding place) and stops him:
* The third time, she eats a piece of a mushroom and grows as tall as the trees.
* The third time the boys won, the girls had to wash the boys' dirty laundry at the creek.
* the third time. This likewise goes for the rest of the Marines during the Buster Call when they see that Lucci was defeated.
* The third time was in late 2015 and it was a smaller thing: rather than create a new character, fans had to vote to choose who was going to be the fourth Titan

class figure in the
* The third type of subject empire available to player empires, the Tributary, is the exception to this trope as overlords aren't obliged to defend tributaries. Though it's usually recommended to add an Independence Guarantee to reduce the opinion penalty of forcing someone to hand over a quarter of their income.
* The third variation is where there's nothing there... nothing there... nothing there... and then you realize there
* The third video has noticeably fewer art shifts, but it shifts during the clouds scene and the scene telling the story of Michael.
* The third video's new characters and creepy hijinks turn out to be a dream in the Yellow Guy's heads. The Red Guy and Duck Guy's subplot is real, though it is
* The third war god (yes, the Empire is the kind of place that needs three separate war gods), Myrmidia, is more worshipped in Tilea and Estalia, and her worship has only recently spread to the Empire. Still, she is popular enough with officers and
* The third was the direct result of the second, when the newly sentient Undead decided to make their own nation and founded Trik'na Island, where they can live in peace without fear of being killed on sight. It's actually very successful economically since its residents neither need to eat or sleep, but the living world is reluctant to deal with them.
* The third was when Spoony gave his D&D rant to the Cloaks. The Critic wrote a very basic rant but admitted that he knew nothing of the details of LARPing and asked that Spoony improvise to make it more authentic.
* The "third wave" coffee movement in the West has drawn a lot of inspiration from Japanese
* The Third Wave who is stalking his target through an anti-globalization riot kills a riot policeman and steals his gun, uniform, and face-concealing helmet. This enables the hitman to get close to the protagonist and execute him with a shot to the head — unfortunately it turns out the gun he stole is loaded with plastic bullets.
* The Third Witch. Gilly has vowed to avenge her loss by killing Macbeth whenever she gets the opportunity.
* The third world chess champion, Jose Raul Capablanca, was such a prodigy that, during the beginning of his career, he never bothered to study any opening theory or do any serious preparation for any of his games, yet he kept winning just by his natural talent. Subverted later on when he actually did study and improve his opening knowledge, although he still had a reputation as a lazy player - in fact, many people think the reason that he eventually lost the championship to Alexander Alekhine was because the latter took the match much more seriously: Alekhine prepared intensely for each game, whereas Capablanca spent each night at the bar drinking and partying, confident that he didn't need to study.
* The Third World War (a four-game series done in the 1980's by GDW covering the then-real possibility of full-scale conflict between NATO and the Warsaw Pact; as of 2021, Compass Games is preparing to release a completely updated and redesigned version taking advantage of new information that has been declassified or otherwise come to light since the end of the Cold War)
* The Third World War and Eugenic Wars, all taking place on Earth and concerning only humanity. It was actually one war in the Original Series, but was later
* The Third World War. As the crew don't wish to feel the wrath of their superiors for losing the documents, they don't report the theft and NATO is able to render the "Cooker" ineffective.
* The Third World War, Birmingham, UK and Minsk get nuked. Both cities are hardly mentioned outside the relevant chapters on their destruction, though there really isn't much time for them to be mentioned as the war the book is supposed to be a historical account of grinds to a halt within a couple of in-universe months at most.
* The Third World War had the Soviet Union abruptly collapse after the nuking of Minsk (in response to the Soviet nuking of Birmingham, England), with the 1982 sequel/expansion detailing how it happened.

* The Third World War, it is stated in the description of the first TV footage of Soviet and US forces clashing in Slovenia (smuggled out from the battlefield by a reporter) that a military observer would note the Soviets were performing a textbook withdrawal under fire. It also notes that this looked to the layperson as a defeat for them and bolstered Western morale.
* The Third World War successfully delays Soviet forces long enough for reinforcements to arrive, then launches a decisive strike and turns the Soviets back around Krefeld.
* The Third World War to the story to reflect RL developments (especially in Iran, where the Shah's regime had fallen in 1979).
* The Third World War, two of the emergency of communities involved in the war have this. The first ends mid-sentence, when the building is bombed, picking up with the backup journal noting the deaths. The second one cuts off mid-word, as Birmingham is nuked. It is stated it is found in the remains of the centre.
* The Thirteen are considered old even by the standards of their species, including
* The Thirteen Generals of Dawn's Gate figure out quickly what Barid Bel Medar is proposing when he suggests using balefire on Paaren Disen, but he still has to say he has a plan "to have won" the War of Power in "Lost Violent Souls", a
* The thirteen maidens with stars above their heads represent the first United States, which is why they hold up the nation's motto "E pluribus unum."
* The thirteen original Primes aren't the powerful and mystical progenitors of Cybertron, they were just normal Transformers who led Cybertron in its early years.
* The thirteen pirate admirals of Pavia have no love for one another, with the majority wanting nothing more than to kill the others. The only thing keeping them in line is fear of their "leader", the Dark Eldar Sliscus. When Operation Caribbean starts, the admirals don't cooperate at all which means the Imperial fleet can massacred them one by one instead of engaging in a more risky mass battle. At the same time, two of the admirals surrender rather than die while a third pays a king's ransom for safe passage out of system.
* The Thirteenth Chair by Bayard Veiller uses this as a murder mystery setup.
* The Thirteenth Doctor actually displays many true-to-life signs of ASD; she is socially awkward, can barely complete a thought without going off on tangents, expresses childlike excitement about basically everything, and often becomes overwhelmed when there is too much that needs to be done in a short space of time or too many variables in a situation. When this happens, she has to stop and verbally reassure herself that she can handle it; she just needs to slow down and think through the problem one piece at a time. This is a
* The Thirteenth Doctor also does this, but she skips the fingertips and straight-up
* The Thirteenth Doctor and O Master play it straight again, although only very slightly. Both are very young and attractive and charming, but the difference is that this version of the Master has such a
* The Thirteenth Doctor and Yaz have had many moments that could be interpretated as this, fans often make comparisons between them and the Tenth Doctor/Rose; the subtext
* The Thirteenth Doctor is capable of delivering some pretty evil smiles when fighting her enemies, as seen
* The Thirteenth Doctor is incredibly forgetful and scatterbrained. A
* The Thirteenth Doctor is shown to be very respectful of religions, even participating in a few minor but important prayers. The Doctor is mentioned in something called "the Book of Celebrants," and she apologizes for her ignorance when she mistook some time-traveling priests for murderers (they show up whenever someone dies alone to pray with them).
* The Thirteenth Doctor's first episode puts her in a Sheffield garage gleefully cobbling together a new sonic screwdriver.
* The Thirteenth Doctor wears a pale blue hooded longcoat with deep blue inner lining. It's also got a rainbow strip where the two colours meet, and a blue strip at the bottom.

* The Thirteenth Floor involves a simulation of the early 20th century city that only extends to the city limits.
* The Thirteenth Floor, the boundary of the simulation is located at the end of a long road, where the rendering of the simulation just fades via a wire-frame into nothing.
* The Thirteenth Floor the world has no physical wall around it but it does have an edge where the simulated nature is visible to the naked eye. People within the simulated world are just programmed to never think about going anywhere near that edge (of course there are exceptions...)
* The Thirteenth Floor Which of the two tropes to apply is left as an exercise to the reader.
* The Thirteenth Hat. Delirious grabbed the Eye, ran off and smashed it, yelling "I REMEMBER EVERYTHING!"
* the thirteenth movie, Kyurem is about to experience this trope before wisely jumping off before plowing into the mountainside.
* The Thirteenth Tale go mad after the death of their loved ones, and enter into a sort of self-inflicted imprisonment where they lock themselves in their rooms for extended periods of time.
* The Thirteenth Tale if they'd lived in a different time, but she was older and social conventions got in the way.
* The Thirteenth Tale intends to make a victim of his much younger sister. This doesn't work as planned, and they instead become more like partners in crime.
* The Thirteenth Tale is its own story as she goes through her own discovery and development, the business of writing a biography is mainly to tell the story of Vida's past.
* The Thirteenth Tale, it's implied that George Angelfield at least had a sexual interest in his daughter. Certainly when she ran off, his reaction was more like a spurned lover than a father.
* The Thirteenth Tale, very much so. She never allows anyone into her home, and whenever she speaks to reporters, she concocts elaborate lies about her childhood. No one knows anything about her, despite her outselling every book except for the Bible.
* The Thirteenth Year, the main character, an electricity-generating merman, revives a friend after he almost drowns by shocking him.
* The Thirty-Nine Steps (1915) by John Buchan, in which the hero blows his way out of a store cupboard using his powers of mining-engineering and a fictional explosive.
* The Thirty-Nine Steps) are set in the same continuity, and many of his series shared supporting characters.
* The Thirty-Nine Steps becomes almost inevitable, and the rest of the plot is Hannay working with the British Military to prevent the Germans obtaining vital military secrets.
* The Thirty-Nine Steps. Eventually discovers his life's calling as an elderly RAF air ace.
* The Thirty-Nine Steps, has a bit where he thinks he's going to have another relapse but it turns out to just be nervous stress, but it gives him the idea to pretend he has had a relapse and sneak around uncovering part of the villain's plan while the villain thinks he's safely tucked up in bed.
* The Thirty-Nine Steps, in which Richard Hannay at one point reflects that while he's not the murderer everyone thinks he is, he has at that point among other things lied to almost everyone he's come across, impersonated a political candidate and a road-worker, and has hijacked at least two expensive cars.
* The Thirty-Nine Steps) or just an innocent bystander. He's almost convinced the man is just an innocent bystander when the man makes a finger-tapping gesture that Hannay recognises from when he was a captive of the spy ring earlier in the book.
* The Thirty-Nine Steps, Richard Hannay meets a secret agent who passes on a warning about a foreign spy ring and then gets murdered by the spies in a way that makes Hannay the obvious suspect. Hannay spends most of the novel on the run from the police, who think he did the murder, and the spies, who want him dead before he

can tell anybody the truth.
* The Thirty-Nine Steps starts off with the ringing of heavy, ominous church bells as Richard Hannay, a murder suspect on the run from the police and enemy secret agents, is trying to catch a train.
* The Thirty-Nine Steps, the hero loses parts of a thumb and two fingers when the villain shoots his gun out of his hand.
* The Thirty-Six Stratagems" also have this trope as one of them, and the name for it is "Let the Enemy's own spy sow discord in the Enemy camp".
* The Thirty-Six Stratagems encourages this if needed. A battle can be lost if the army that fought it is saved, so that said army can go on to potentially win battles in the future.
* The Thirty-Six Stratagems is "Borrow a Corpse to Resurrect the Soul", meaning to revive something from the past by giving it a new purpose, or reinterpret it to your advantage.
* The Thirty-Six Stratagems, usually attributed to Sūn Zǐ or Zhuge Liang, although only firmly recorded in the Book of Qi, written after 502 CE (slightly after the end of this period); that being said, the events used as examples almost universally date from the Warring States period (c. 475 BCE-221 BCE), the Chu-Han Contention (206 BCE-202 BCE) or the Three Kingdoms era (220 CE-280 CE).
* The Thirty Sixth Chamber Of Shaolin spends an entire year at the Shaolin temple doing menial chores and waiting for his Kung-Fu training to begin. When he brings it up with the abbot, he informs him all he had to do was ask to be trained. After all, they didn't know he came specifically to seek it out.
* The thirty-year-old Shuu's attraction to the 18-year-old Tsukimi can be this depending on your interpretation. Kuranosuke lampshades this.
* the this actually started off as a joke in-universe (the first king referred to his chief supporter as his "strong right hand" and the latter took the symbol as a reference), but by the "modern" setting it's treated very seriously.
* The". (This appears to be based on the custom of referring to certain Scottish clan chiefs as "The [Name of Clan]", e.g. "The Cameron" for the chief of Clan Cameron.)
* The Thistle & Shamrock (NPR Celtic-music program, airing since 1981)
* The Tholians (seen in TOS and Enterprise, and referenced in the other series) were hermaphroditic, insect-like humanoids who lived in an environment of around 480 Kelvin. Presumably their homeworld was very much unlike Earth.
* "The Tholian Web": an area of space only partly in phase with our universe drives people insane, and later swallows a starship (with Captain Kirk still aboard).
* The Tholian Web drove the crew of one starship to kill each other, and then begins to drive the Enterprise crew to outbursts of anger.
* The Thomas Crown Affair (1968) directs a bank robbery, keeping his identity hidden from the people he hires to carry it out.
* The Thomas Crown Affair (1968), Thomas deposits a large pile of small bills in Switzerland after the bank heist in Boston. Investigator Vicky observes that the Swiss are "notoriously casual about certain formalities," like searching airline baggage.
* The Thomas Crown Affair (1999) After she surprises him at a ball, Catherine goes home with Thomas and they spend the night together. The next morning, his butler brings in her customary health drink, suggesting that he'd researched her preferences and having her over wasn't entirely unexpected.
* The Thomas Crown Affair (1999) casually spoils the ending of both the remake and the original while discussing the ways in which the two films differ.
* The Thomas Crown Affair (1999): Catherine is working on behalf of the insurance agency responsible for the stolen painting, essentially a property bounty hunter. However, she behaves as if she's a sworn police officer, being allowed to interrogate suspects, but also performs actions that range from the stupid (informing Thomas Crown that he's the primary suspect, then later sleeping with him), to the outright illegal (copying Crown's keys so she can break into his mansion). She does get called out on some of her actions by Detective McCann, but

nothing really comes of it.
* The Thomas Crown Affair (1999) has Thomas Crown, inspired by the painting The Son of Man, dressed in suit and Bowler hat escaping by arranging several other men in the same outfit appearing.
* The Thomas Crown Affair (1999). She comments on the air conditioning being turned back on in the chilly museum. Naturally, he gives her his jacket, allowing her to steal his keys.
* The Thomas Crown Affair (1999), thieves sneak into a museum inside a Greek statue of a horse (though, it isn't wooden). It's delivered as an upcoming exhibit. For bonus points, it was actually a Greco-Roman horse.
* The Thomas Crown Affair (1999), Thomas deliberately makes it appear as though he's having a relationship on the side in order to try to find out if Catherine is just after the painting or not.
* The Thomas Crown Affair. A debonair, adventuresome bank executive believes he has pulled off the perfect multi-million dollar heist, only to match wits with a sexy insurance investigator who will do anything to get her man.
* The Thomas Crown Affair remake, as well as used as the theme song for the XTC cell phone.
* The Thorian saw the rise and fall of the the Protheans more than 50,000 years ago, and is thought to be more than 100,000 years old.
* The Thorn Birds: As noted in the Literature folder, mother Fiona dotes on her oldest son Frank and completely ignores her other children. Her daughter Meggie angrily vows she will never do that to her own children... but twenty-odd years later she does, favoring her son Dane over her daughter Justine.
* The Thorn Birds, as there are few scenes where either of them get to demonstrate this.
* The Thorn Birds, Australians Justine and Dane are respectively played by Americans Mare Winningham and Philip Anglim. Other Americans and Brits play Fee and most of the Clearly children, who are from New Zealand.
* The Thorn Birds, but to a large extent, she ignores them. Only daughter Meggie actually thinks she's dying when she starts her period because her mother never bothered to tell her anything about it. Twenty-something years later, Meggie repeats this mistake with her own children, favoring her son Dane (her illegitimate child with the priest she has loved since childhood) over her daughter Justine (her child by her neglectful husband Luke).
* The Thorn Birds, Father Ralph deBricassart befriends wealthy widow Mary Carson even though he dislikes her in the hopes that her wealth and influence can help advance his career. When she dies, she does make a huge donation on his behalf and even though by now he's fallen in love with Meggie Cleary, the prospect of advancement is too tempting for him and he leaves her—and continues to leave her in order to continue rising in the ranks of the church. By the end of the book, he admits that deep down, he always knew that he was the father of Meggie's son Dane, but taunts himself by referring to himself as "Cardinal deBricassart", because he is also forced to admit that rising in the church ranks was more important to him than being with the woman he loved and building a life with her.
* The Thorn Birds, Father Ralph DeBricassart has this reaction upon seeing Meggie Cleary enter Mary Carson's birthday party.
* The Thorn Birds he had known her from childhood onward that he developed feelings for her.
* The Thorn Birds is a vague example of this, as mentioned in the Literature example above.
* The Thorn Birds, knowing he can no longer hide his feelings for her or pretend that they're innocent.
* The Thorn Birds, Luke hits Meggie so hard during an argument that she falls down and miscarries. Afterwards, he apologizes, but almost immediately undercuts it with "You made me angry."
* The Thorn Birds—what with her desire to be a doctor, as McCullough wanted to be before realizing that she was allergic to the chemicals used in the OR.
* The Thorn Birds personality (she's cruel and so manipulative that she seeks to

control his destiny from beyond the grave—willing the bulk of her fortune to him so that he'll advance in his career, but be permanently separated from the woman he loves). The night before she dies, she begs him to "kiss me as if we were lovers". He refuses, citing his priestly vows, but she knows—she can see it in his face—that he's repulsed by her old age.
* The Thorn Birds, possibly explaining why Meggie has such a difficult life.
* The Thorn Birds (Ralph, Paddy, Mary) are played by Americans and Brits. Adding insult to injury, as is par for the course with this trope, only one of them even bothers to try sounding like an Irishman, and he does it badly.
* The Thorn Birds Years later, their mother, who doted on Frank, happens to find a newspaper in which an article announces his conviction for a terrible crime. Frank's only comment to the press was "Don't tell my mother."
* The "thornies" and most of Faction 3 would be classed as monstrous.
* The Thorny Rose one starts at Sirius' wedding after Ginny throws a swan-shaped pastry at the bride's obnoxious sister.
* The Thorny Rose Remus, while roasting the groom at Sirius' wedding, unrolls a four-yard-long list which he states is "volume one" of the embarrassing stories he has to tell.
* the thought elevators; a set of cyberspace portal nodes that can be used to access a digital afterlife linked to the central AI that governs Earth. Only the immediate Britannian royal family and their trusted lackeys know the true value of these stone doors and how they can be used to utterly mind-control humanity. Japan has two of these for some reason.
* The, though their good counterparts the Spirits can be less annoying and more useful.
* The thought of there being other mirrors that lead to different worlds other than a human world. Even as is, there's now an
* The Thousand and One Nights doesn't menace the hero of the story, but she is big enough to carry off an elephant.
* The Thousand Autumnsof Jacob De Zoet has Dutch trader Jacob DeZoet traveling to Japan to earn money to propose to a wealthy girl in Holland. Instead in Nagasaki he falls for Orito, a disfigured midwife, who is spirited away by a cult in the mountains.
* "The Thousand Blades" and "Legendary Hero" among those who actually know him.
* The Thousand-Forged Dragons also count, being weapons of mass destruction that can utterly destroy local geomancy. Since
* The Thousand Master had a home-made Spell Book, as he was atrocious at remembering spells and would wade into battle with
* The Thousand Master himself, and a bit of a sore point. When a threat level of Ala Rubra was placed, with Zect and Eishun listed as the most dangerous... then Nagi was mentioned as, "oh, and this kid is pretty good too," complete with his own picture, which is suddenly scowling. Oh, and Zect looks like an eight-year-old while Nagi was fifteen or so.
* The Thousand Orcs furthers the growing desire for peace within Obould I. This, of course, is only strengthened by the story of the prologue, which obviously shows Obould's vision of the future as an inevitability.
* The Thousand Sons invasion of Fenris is mentioned as one of the things that pass by the Chancellor's desk without him being able to respond.
* The Thousand Sunny, the Straw Hats' second ship, has the "Gaon Cannon" technique, which concentrates three barrels' worth of cola into a massive, badass and powerful energy beam. Luffy was brought to
* The Thousand was made of an army of spiders that jumped from body to body.
* The Thousand-Year Door Needless to say, many players relish the chance to put the jerk in his place.
* the thousand-year-old body of the Buddhist master Liuquan was found inside a statue of Buddha.
* The Thousand Year Rose: Three sassy witches hunt for the legendary treasure in Ireland sealed by a rose that will only bloom for somebody with a pure heart.
* The Thousand Year Rose, with many of the principal characters sharing a Character

Archetype with Mario's party members.
* The thousand-year war between Sol Ciel and Sol Cluster that peaked with the
* The Thran race "won" the Thran-Phyrexian war, but their civilization had been damaged too greatly to recover, and soon collapsed.
* The Thrawn Trilogy. A clone that is aged too quickly succumbs to what gets termed "clone madness," leaving them insane, and which proved to be a major problem during the Clone Wars. Thrawn eventually discovers that this is caused by some strange interaction with the Force as the clone matures, and growing the clones in an environment completely devoid of the Force such as that created by the salamander-like ysalamiri (or at least, one where the Force is suppressed, it seems to vary widely within the literature how exactly it works) will prevent the deterioration.
* The Thrawn Trilogy a full captain at Endor... it's just that his ship was commanded by an admiral, so he was still second in command until said admiral was killed.
* The Thrawn Trilogy and finds that Yoda's hut has been overwhelmed and pretty much broken down until he barely recognizes it by the life in the swamp. He's surprised, but chastises himself, thinking that Tatooine is so dry that an abandoned structure will last forever, but it's different here. However, when he goes back into the cave he does find a still recognizable beckon call.
* The Thrawn Trilogy, a stormtrooper cut down by Luke Skywalker's lightsaber is mentioned to have squeezed down on the trigger as he died, randomly firing his blaster. Fortunately no one gets hit by it.
* The Thrawn Trilogy between Han Solo and Leia Organa, now husband and wife.
* The Thrawn Trilogy, but the results are too unstable to be particularly useful.
* The Thrawn Trilogy, but why spend them without a need? Pellaeon, back during the Battle of Endor, had found himself to be the highest-ranked survivor and had ordered the retreat.
* The Thrawn Trilogy count as this - they have a mutually beneficial alliance, but each has schemes separate from the other and plans to dispose of the other after he's served his purpose. At the trilogy's climax, they are faced simultaneously by two different sets of heroes. While in the process of carrying out their plans to dispose of each other.
* The Thrawn Trilogy does have an instance of Mara Jade having to land on a planet with her repulsors offline, and it's pretty harrowing.
* The Thrawn Trilogy Duology have Luke, early on, voluntarily entering a trance state to try and receive visions of what's to come. He gets them, but they're fragmented and confusing enough that while they do help, he doesn't do this often.
* The Thrawn Trilogy duology, is one of these. He is very good at hacking and does so for the sheer pleasure of it. He also has blue hair.
* The Thrawn Trilogy, Emperor Palpatine serves as this to Mara Jade, having implanted a subliminal command to KILL LUKE SKYWALKER into her brain as his final act. The command's effects on her, and her attempts to alternately fulfill and defy it, drive her character for the trilogy's second half.
* The Thrawn Trilogy, everyone realizes that Niles was actually responsible, proving Karrde's innocence.
* The Thrawn Trilogy features the planet Caamas, which became this after it was utterly devastated by orbital bombardment. This was something of a charitable endeavour, as the Caamasi were at least paid for the use of their (now mostly useless) planet.
* The Thrawn Trilogy, figuring that even if it doesn't do much, she might as well do what she can. A few pages later, one of the old Katana Fleet dreadnaughts (roughly 1/4 the size of the Star Destroyer, and thousands of times larger than Mara's fighter) is propelled via remote control into a second Star Destroyer, and this works quite well.
* The Thrawn Trilogy fleet after its flagship. However, the Katana Fleet was a dismal failure in the eyes of the Republic, having lost the entire thing.
* The Thrawn Trilogy fleet was a force of two hundred dreadnoughts slaved to its flagship, but when its crew fell victim to a hive virus and went insane, the navigator sent the fleet to a random corner of the galaxy, passing into legend. At

least until some smugglers made a Blind Jump of their own and had the astronomical good fortune to blunder into a bunch of pre-Clone Wars capital ships.
* The Thrawn Trilogy good, yes, but he could be taken off guard, he could lose, he could misread things or miss them altogether.
* The Thrawn Trilogy got him within spitting distance of defeating the New Republic.
* The Thrawn Trilogy: Grand Admiral Thrawn will routinely discuss minor matters with Captain Pellaeon in the middle of major battles, as well as instructing his subordinates to remain calm during battle.
* The Thrawn Trilogy, Han reflects that as much as he hates seeing Leia go into danger without him, her determination to risk her life in the service of a good cause is a big part of why he loves her. And Leia several times thinks something very similar, though she has to suppress a tinge of protectiveness towards Han that's strikingly reminiscent of her father towards her mother.
* The Thrawn Trilogy. He's the last of the Jedi, she's the former personal assassin of the Emperor who wiped out the Jedi (whose final assignment was to assassinate Luke). Then he rebuilds the Jedi and she becomes second in command of one of the largest criminal organizations in the galaxy. Of course, despite the Jedi theoretically being keepers of law and order, said criminal organization ends up being one of their most reliable allies and gets less and less criminal as time goes on.
* The Thrawn Trilogy hiding on an asteroid, watching the Empire take over Myrkr. He only gets caught because Thrawn knows Kaarde is exactly the sort of person to do that, and he only escapes because his Force-sensitive copilot turned everything back on before Thrawn's Interdictor Cruisers finished generating a gravity well trap.
* The Thrawn Trilogy introduces the ysalamiri, a non-sapient species of furry reptiles, with the unique ability to suppress the Force in their personal areas. This ability evolved naturally in conjunction with a local predator species, vornskrs, who evolved with the ability to use the Force for hunting. Thrawn is the first to (re)discover their ability, and puts them to various uses. He keeps one on his person, to protect him from Force attacks. He also uses them to speed-grow clones, since the presence of the Force will warp a mind that ages twenty years in a few weeks. While an ysalamiri might keep a person carrying it safe from direct Force use, it won't protect him or her from a Force-user picking up a huge rock and throwing it from a distance, as, by the time the rock reaches him or her, it's powered by pure physics.
* The Thrawn Trilogy (it's speculated that the reason the Battle of Endor was lost so decisively after the Emperor's death is that he was using it to control the Imperial Fleet, throwing them into confusion when it was removed). Thrawn comes up with an innovative use for it: by stationing a cloaked ship on the inside of a planetary shield and having Joruus C'baoth use battle meditation to coordinate its fire with that of an uncloaked ship on the outside of the shield, he creates the illusion that turbolaser fire is passing right through the shield as though it weren't there.
* The Thrawn Trilogy. Leia and others, looking for the Delta Source that is reporting things to Thrawn, rest for a bit in the room where most of the spying happens, and then Leia looks at a droid tending one of the decorative color-changing trees and notices the red ripples forming and spreading each time the droid clicks.
* The Thrawn Trilogy, Luke gives Mara Jade his father's lightsaber for a multitude of reasons — but mostly because he wants her to have it. She reflects that he's just given her one of the last remaining links to his past, and thinks that this is not a subtle message, and he's wasting his time. But as he's leaving, she tells him to hang on a minute — she's coming with him.
* The Thrawn Trilogy, Luke Skywalker has an impressively long run of "This isn't working, I'll try something else" when he's pulled out of hyperspace by an Imperial Interdictor. Condensed, here's about half of it: "Whoa, it's practically on top of me! I'm in tractor range, I can't go to lightspeed in this gravity well, and

they're hailing me. There's a freighter with it, there are no living things on board. Where's the nearest edge of the gravity well—gun for it. The freighter is between me and them, I'll send a timed proton torp to blow up the freighter, debris should shield us, okay done—damn, they're moving to keep me in the gravity well, I'll go laterally—tractored! They'll pull us in, if I can change speed I can get it to let go, I'll swing to get as close to the edge of the gravity well, then reverse-trigger the inertial compensator at full power—there, dead stop, the tractor's not on me for just a moment, I'll fire proton torpedoes to be caught by the tractor and pulled in. Done, fly! They're finally firing on me, we're far enough away, jump to lightspeed! ...We're out of range, but we've fallen out of lightspeed and now we're stranded in lightyears of empty space. Hyperdrive is dead, subspace radio is broken, we can't leave, aren't likely to be found, and can't call for help. Okay R2, let's try..."
* The Thrawn Trilogy, Luke Skywalker pulls one of the two power sources out of his artificial hand in order to use it to hotwire a locked door. For the rest of the first book, his hand keeps going numb at random times, often making him drop whatever he's holding at the time, and he apologizes and carries on. It's dropped when he gets out of the jungle, presumably with him getting a replacement power source offscreen, or the original power supply (by then in the possession of Lando) being returned.
* The Thrawn Trilogy. Meanwhile Leia and Han take on the roles of Tritagonist and Tetragonist.
* The Thrawn Trilogy Mon Mothma did as she did. Not for personal power, but because so few people could be trusted with the responsibility of billions of lives.
* The Thrawn Trilogy. Once the shooting stops, Mara is able to come in behind the commandos and gun them down without getting herself caught in the crossfire.
* The Thrawn Trilogy series, this rivalry has mostly been transferred to Leia, whom Fey'lya replaces as chief of state. He's never completely irredeemable, however, and the franchise does include a few examples of him setting aside his differences with both Ackbar and Leia to achieve an objective that they agree is in the New Republic's best interests.
* The Thrawn Trilogy she was this to Emperor Palpatine, being his personal right-hand assassin known as "The Emperors' Hand", but Thrawn informs her that she was actually just one of several such "Hands" whose existence was kept secret from one another in order to make them feel more special and thus ensure their loyalty. Thrawn himself has a better claim to being a Co Dragon than she did, the Emperor begrudgingly accepting his criticisms and advice in military matters simply because Thrawn is proved time and again he was better at them than the Emperor was.
* The Thrawn Trilogy, Talon Karrde defeats an enemy's attempt to steal his ship by holding down a switch on the control board and bluffing that it's a dead-man's switch controlling the ship's self-destruct mechanism. (The switch actually just turns on the ship's headlights.)
* The Thrawn Trilogy, that decision paid off and the subordinate was able to successfully counter the maneuver that had beaten him before.
* The Thrawn Trilogy, the eponymous antagonist uses this after dropping a few oblique hints so a smuggler captain he wants to come to a particular conclusion doesn't get suspicious.
* The Thrawn Trilogy them into believing he could do this to them by firing through their shields, at which they immediately surrendered. The trick required cloaking ships, Force-assisted split-second timing, and picking a target prone to panicking when they saw something that's supposed to be impossible.
* The Thrawn Trilogy: The planet of Abregado-Rae (or at least it's main spaceport) had reputation not unlike that of Mos Eisley. Thus it's a big surprise to Han and Lando when they find a nice, clean, peaceful place when they land there, though planetary security forces are plentiful and conspicuous. When Mara Jade visits there later, she notes the subtle but telltale signs that the peace and cleanliness is imposed from above instead of the result of a genuine desire from the citizens.
* The Thrawn Trilogy), the ships didn't lose their pursuers. Pellaeon asks if they should go to red, to which Thrawn remarks "There's time."

* The Thrawn Trilogy, the Star Destroyer that Grand Admiral Thrawn picked as his flagship. It's this massive thronelike thing made out of slabs.
* The Thrawn Trilogy the trope is almost reversed at the end of the first book, in which Thrawn is described as 'not merely a soldier, but a true warrior', by which Pellaeon means he can see beyond the immediate objective to the bigger picture.
* The Thrawn Trilogy, though that's easily handwaved by saying that Spaarti and Kaminoan cloning use different methods with different side effects. Another major plot point is that it's been about 40-odd years since the Clone Wars (based on backstory given by Lucas at the time), while the prequels later established it as 20-something instead.
* The Thrawn Trilogy, Thrawn quietly lampshades this after C'baoth contacts him using "the Emperor's private hologram setting." Pelleon himself notices one of the flaws in the technique, namely that C'boath doesn't have the immaculate self control and confidence needed to pull this off, so the giant head setting means that little signs of uncertainty, surprise, and/or hesitations are amplified for everyone watching to see.
* The Thrawn Trilogy to Han and started following him around. In fact, Han had been a criminal prior to joining the Empire and then was forced into it again since he was blacklisted from legal piloting with his dishonorable discharge.
* The Thrawn Trilogy when he's stabbed through the back by his own Noghri bodyguard Rukh, who had learned of Thrawn's treachery against his people.
* The Thrawn Trilogy when the Empire crumbles after Endor, when he returns from the Unknown Regions and nearly crushes the New Republic single-handedly. The same trilogy also has the very good strategist Garm Bel Iblis, who left the official Rebellion to fight the Empire with his own group after Bail Organa died and Mon Mothma seemed like she was gathering too much power. Eventually, thanks to Han and Leia's efforts, he joined the New Republic.
* The Thrawn Trilogy, with the ability to find a species's weakness just by looking at their artwork. And, for that matter, figure out their general biological traits (dominantly left- or right-handed, number of fingers or limbs used, perceptual or biorhythmic flaws) as well as traits of those who created or even just favor a particular piece. Notably, another character who was supposed to have his tactical insight couldn't do a number of things Thrawn could, and never so much as looked at a painting.
* The Thread of Aging, which is normally found rolled up in a ball. The person holding it immediately ages one year for each inch of the thread they unroll from the ball. The aging and its effects can only be neutralized by a Remove Curse or Wish spell.
* The threat in the two-parter "Princess Twilight Sparkle" turns out to be a
* The threat is successful in stopping Typhon from eating an entire building of people. The people were lawyers and would give Typhon gas.
* The threat of such is used as motivation for Team Hokage to win in
* The threat of the Grimm has been reduced to comedy fodder. Ruby drags around a beowolf that is clinging to her cape by its teeth and Nora terrifies a few while using them in hare-brained schemes to get Ren to rescue her; when successful, she hugs one so hard its arm breaks. Cinder walks puppy beowolves and Zwei can intimidate beowolves, which submit like dogs. A skit in Season 2 has two particular Beowolves, Mike and Marty, feel that they're doomed by Cinder's
* The threat of this ended up causing an issue between Leonard and Penny at the start of Season 9.
* The threat of this is often used by the protagonist Empire of Charis when an enemy is either already defeated or clearly outmatched to try and force a surrender. This tends to be effective, more often than not, because the enemy commanders eventually realize that the Charisian making the offer
* The threat of this was one of the things that led to the formation of the U.S. Constitution. Under the Articles of Confederation, the states were feuding with each other so badly that one or two of them were considering military action against a neighbor. Technically the Constitution itself does not outright forbid individual states from going to war without the rest of the country, but it

requires permission from Washington. So far it hasn't happened yet.
* The threat of Tony Soprano's New Jersey mob family breaking out into open civil war or becoming embroiled with one of the New York families hangs overhead in several seasons of
* The "threat to Britain from France or Germany" idea did make it into at least one post-Cold War techno-thriller, Larry Bond's
* The Three Apples. Basic setup; a crime occurs and Ja'far ibn Yahya has three days to solve it. However, it differs in that, not only does Ja'far not care about solving the case, he doesn't. The case is solved when the killer reveals himself. And during another case, Ja'far only solves the case at the very last second thanks to some blind luck.
* The Three Aunts: Fully averted. The heroine makes a promise to her benefactors, keeps the promise, and lives happily ever after.
* The Three Aunts, the queen demands that the girl working for her produce an impossible amount of work because other servants claimed she said she could do it.
* The Three Aunts, the queen mother retroactively declares that the tasks were proof enough of her domestic skills, and lets her marry the king. Whereupon the three aunts show up again to scuttle the need for her to try the work again.
* The Three Bears say, "Who's/somebody's been [doing something with]
* "The Three Bells" (aka "Jimmy Brown") is this in the US, where The Browns' cover overshadowed Edith Piaf's French original ("Les Trois Cloches") in fame if not in quality. Then again, Piaf,
* The three big video game companies generally have a hefty respect for each other and will rarely criticize each other beyond the occasional joke. When
* The Three-Body Problem as a result. When it orbits any one sun, it goes into a Stable Era, during which conditions are actually pretty mild. However, the rest of the time it's being kicked around like a football during Chaotic Eras, where it alternates between broiling heat and freezing cold with absolutely no rhyme or reason at all. On particularly close or distant passes, temperatures may melt rock or drop to near absolute zero. Sometimes, the three suns align in a straight line with Trisolaris at one end, causing everything on the surface to literally fall into the nearest sun. Due to the eponymous three-body problem, all of this happens completely at random, and cannot be predicted at all. The only reason anything lives there at all is that native life adapted to dehydrate indefinitely and then come back when conditions got better.
* The Three-Body Problem: because it's so hard to understand other species, it's essentially impossible to establish trust, civilisations have to assume everything Out There is hostile, and as such, the objectively correct response to first contact is to schedule extermination.
* The Three-Body Problem because their own planet is doomed to fall into a star and Earth is the only habitable planet they have found.
* The Three-Body Problem includes a rare example of a heroic political officer who actually accomplishes things by being good at being a political officer.
* The Three-Body Problem Since their planet is caught between celestial bodies, tricks of gravity mean that periods of stability, sweltering heat, and freezing cold all come without warning.
* The Three-Body Problem. The speed of light? Used to be infinite. Three dimensions? Used to be twelve. The only hope anyone has for the damage to be undone is the Big Crunch, which will cause an entirely new universe, hopefully better, to spring from the ruins of the old.
* The Three-Body Problem, the Trisolarian aliens can voluntarily expel their bodily fluids, go into suspended animation, and reawaken when they're exposed to liquid. Their society even has storage facilities for the dehydrated bodies.
* The Three-Body Problem trilogy that this is the default state of the universe, due to the Dark Forest phenomenon. When one alien civilization discovers another alien civilization, neither can be certain that the other is not a threat. Even if the language barrier gets crossed, a friendly appearance can be used to conceal hostile intentions, and furthermore they are, by simply existing, competing for vital resources. Given this uncertainty, the safest thing for any given

Civilization A to do if it discovers any given Civilization B is to immediately destroy them before the reverse happens. To quote the book:
* The Three-Body Problem, we are introduced to the photoid: the simplest way to kill a solar system. It takes a lot of energy, but other than that, it's very straightforward: it's just a large projectile converted into a relativistic kill vehicle and shot at really high speed into a star. It's basically a bullet that can destroy a sun.
* The Three Caballeros: After Donald is shrunken down by Joe Carioca, Joe shows him how to inflate back to normal by blowing on his index finger. Donald blows on his thumb instead, causing him to inflate in all sorts of crazy shapes.
* The Three Caballeros), and Donald in a bull costume studded with fireworks. The filmmakers later claimed that the section (referred to as "Donald's Surreal Reverie") was intended to represent the idea that "love is a drug".
* The Three Caballeros because he wasn't given any real direction for the title song so he just did whatever he wanted. He thought for sure he'd get fired but to his surprise, Walt approved of it and it got to stay.
* The Three Caballeros capacity between its 1942 premiere and its 1995 limited-run Laserdisc release. Even after a much wider DVD release in 2000, it's still relatively unknown.
* The Three Caballeros contains a short where a narrator tells the story of how, when he was a young boy, he found a winged donkey that he enters in a race with its wings hidden, so he can cheat. After winning, he's about to accept the prize money when the donkey reveals its secret and flies off with the boy still tied to him. The narrator concludes with “Neither he nor I were ever seen again in our lives”, and since the voice telling the story as an adult, he's presumably still flying.
* The Three Caballeros, Donald is chasing after bathers in Acapulco when he is yanked right out of his bathing suit, which continues the chase on its own.
* The Three Caballeros, Donald is watching a film about birds; when it ends, he finds the film has unspooled off the projector and is now wrapped around his feet.
* The Three Caballeros has a segment, The Cold-Blooded Penguin, where a penguin freezes solid at the top of the hill and rolls down it, crashing through his farewell party.
* The Three Caballeros has led to accusations that Disney is forsaking the original vision of the park in favor of IPs.
* The Three Caballeros has Panchito singing the last note of the title song to the annoyance of Donald and José, who precede to do everything in their power to stop him. Nothing works, until a blue sheet is pulled over him and he seems to disappear under his sombrero.
* The Three Caballeros misses a chance at kissing Ya-Ya because she was distracted by a guy selling oranges. Donald gets jealous and is about to go beat him up, but Jose pulls him away telling him to take it easy, and then... he gives Donald a mallet! (Which Donald could use to smash the oranges the guy is carrying overhead.)
* The Three Caballeros, Panchito's gift to Donald is a piñata. Donald says, "Oh boy, oh boy! A piñata!... What's a piñata?"
* The Three Caballeros, several men (including Donald Duck and Jose Carioca) vie for the affections of singer Aurora Miranda (Carmen's sister). At one point, two men stage a stylized dance-fight, with the animation morphing them briefly into roosters.
* The Three Caballeros's Wacky Peyote Trip!") is the best representation of a drug-induced hallucination ever seen.
* The Three Caballeros: "The Cold-Blooded Penguin" segment ends with Pablo staring wistfully at a poster for the South Pole, apparently considering making a trip back to Anarctica.
* The Three Caballeros, the entire city, even the moon as well, is bouncing to the music.
* The Three Caballeros, the predecessor also qualifies for being in the same franchise.
* The Three Caballeros when Panchito stakes Donald and Jose's hands, causing stuff

to fall from their shirts.
* The Three Caballeros: When singing the title song, Panchito hits an incredibly long note at the end, with Donald and José Carioca trying everything they can think of to shut him up.
* The three Caliph's brothers that Iznogoud made disappear. While Troiround wasn't really developed enough to say if he was evil or not, Dheround was truly a bully that kept playing deadly pranks on Iznogoud and mocking him for his small size and big nose. Katround was even worse, being a crazy man obsessed with making people disappear and attempting to literally erase Baghdad (including his well-intentioned older brother).
* The Three Certainties in Life: Something funny is considered as certain as death and birth (or taxes).
* The Three Christs of Ypsilanti, a patient said, "Jesus Christ, stop that snoring," when a man was snoring in his dorm. The patient who thought he was Jesus replied, "That wasn't me who was snoring, it was him!"
* The Three Christs of Ypsilanti: a psychologist took three schizophrenia patients who believed that they were Jesus and
* The Three Citrons", after a slave murders the heroine with a hairpin, she returns as a dove; when the slave has her killed and cooked, she returns again in human form.
* The "three-day-only" challenge: you can only play the Song of Time once, when you first get the Ocarina of Time from the Skull Kid. This prevents you from going back in time, which leaves you with barely enough to get to the final boss — and that's if you skip the
* "The Three Days of the Hunter Job" has the team target a tabloid TV reporter and make her think she's stumbled upon a conspiracy theory involving terrorists and when that isn't enough, ups the ante without much effort. The episode gets extra points when the team convinces the reporter that there's a chemical in the water supply, and give her pills to counteract it — pills that turn out to be anti-psychotic meds. Guess what happens when she interrupts a broadcast for "breaking news" and her producers tackle her...
* The Three Days of the Hunter Job, when poking fun at Parker, Eliot says he's seen the moon landing sets, and that the reason they haven't been destroyed is that the government plans to paint them red and reuse them for Mars landings.
* The three divers are sent into Chernobyl's basement to drain the water tanks and prevent a steam explosion, but it's so radioactive that they would probably die in a week. Legasov even tells Gorbachev that he's asking permission "
* The Three Doctors", a green blob teleports the Doctor and part of the building he's in through a black hole, and later the rest of the building. The two parts of the building arrive in different locations. At the end, when everything is sent back to "where it came from", the two parts of the building are re-assembled, apparently without any permanent damage.
* The Three Doctors", the Doctors discuss their plan in front of everybody... with a psychic link. Of course it works perfectly.
* "The Three Doctors": Time Lord Omega is essentially the god of an antimatter world he's imprisoned in within a black hole. Despite having been destroyed by the singularity's energy, he still exists because of his belief and desire for himself to still be alive.
* The Three Doctors", where action takes place on present day and/or near future Earth and also on Gallifrey. However, since it's never really been clear where Gallifrey's "present" is in relation to Earth's, it cannot be sure.
* "The Three Doctors", where, despite a massive attack on UNIT HQ, Captain Yates is nowhere to be seen (and a guest character, Corporal Palmer, takes charge when the Brigadier and Benton are indisposed).
* "The Three Dogs," the king made the same promise; the hero killed the dragon and promised to return within a year to marry her, but a coachman made her promise to say that he had killed the dragon. The hero proved himself with his dogs and the teeth of the dragon.
* the three elders who had given the order in the first place and decided that

everyone who wasn't an Uchiha must have been in some way responsible for it and therefore needed to die.
* The Three Emperors of Yliaster always manage to pull their Core monsters on their first turn, as well as the trap cards they need to trigger its effect and summon their Machine Emperor monster by the next turn.
* The Three Emperors of Yliaster introduce themselves in that manner to the protagonists, looking down on them during the entire conversation.
* The three-episode ferry boat arc in Season 3 takes place over less than a day.
* The Three-Eyed One, Hosuke Sharaku, is a tiny, wimpy, Charlie Brown-esque boy who turns into an immensely powerful, larger, psychic supervillain when the bandage on his forehead is removed, revealing his third eye.
* The Three Faces of Adam: Three male characters roughly representing adventure, authority, and wisdom.
* The Three Faces of Eve: Eve White seems to be completely dependent on her husband to make decisions and is a very meek woman. Eve Black on the other hand is the complete opposite.
* The Three Faces of Eve: Three female characters representing the child, the wife, and the seductress.
* The three fairies are named Flittle, Knotgrass, and Thistletwit instead of Fauna, Flora, and Merryweather. (Though since they're also
* The Three Fiends, aka the Directors, from form a triumvirate. The three seem to be equal in every respect, which makes sense, since their goal is to bring an end to the fighting between their three races. They also might turn out to be the overall Big Bads, though they haven't got much screen time yet.
* The Three Fiends also have a TV that lets them watch whatever they're interested in, complete with a mode to see invisible things.
* The three finger salute has transcended into reality, as people in Thailand are now using it
* The three finger salute (thumb and little finger held down by each other, middle three fingers raised together) first used as a symbol of defiance in
* The three French manufacturers: Citroen's double chevrons, Peugeout's lion, and Renault's rhombus.
* The Three Friends... and Jerry. Lampshaded in a short segment where Jerry asks "Why can't it be 'The Four Friends'? I'm a friend!" Only for Thomas to reply, "Just be glad your name is in the title!" To which Jerry protests, "But why single me out like that?"
* The three "Gamesters of Triskelion" are the only remnants of their kind.
* The Three Godfathers is on the ropes trying to save the newborn, he pleads to God for help, and a donkey appears. (Complete with biblical verse lampshading it).
* The three great Creator Races — the saurian sarrukh, amphibious batrachi and avians aearee — ruled Abeir-Toril in the days when the world was warm, and created many of the modern-day sapient races as servants, soldiers and experiments. Their empires fell and most went extinct, although their ruins and creations endure into the modern day. Other races, including dragons, humans and the fey, are sometimes counted among the creator races. The exact listing is sometimes discussed, but the rule seem to be "Precursor, and native to Abeir-Toril". This makes humans a Creator Race (because at least
* the three gurus are named Gaspar, Melchior and Balthasar... inserted in the English version. In the original Japanese, they are named the much less impressive Gash, Mash, and Bash.
* The three heads on House Targaryen's dragon sigil symbolize Aegon the Conqueror and his sister-wives.
* The Three Hostages) takes the opportunity to impersonate him and get an in with the villain. The substitution happens offscreen and the first the audience learns of it is at the same time as the protagonist and the villain, when Sandy dramatically unmasks near the end of the novel.
* The Three Hostages, when the villain learns that the heroes have discovered and captured the secret location where the third hostage was being held, overseen by the villain's mother, his first reaction is fear for his mother's safety, and only

then concern for the failure of his plot and the security of his global criminal conspiracy.
* The Three Hostages, which resumes his Richard Hannay series after a break of several years, is prefaced with a dedication to a young fan who had written asking for more about Hannay, in which Buchan claims that he recently met Hannay socially and was told by him the story that follows.
* The Three Investigators crown was almost as weak (his father having been a usurper).
* The Three Investigators, had California be played by South Africa. This trope was partially averted in the first movie, however, most of which is indeed set in or off the coast of South Africa.
* The Three Investigators have one of his men dress up as a police officer. When the cops show up and try to use that as a charge, he points out the fake cop is in fact wearing a New York Police uniform (the series is set in California), and as such cannot be accused of impersonating the local police.
* The Three Investigators rode around in a gold Rolls-Royce, complete with a cool chauffeur, Worthington.
* The Three Investigators the clues, and can be easily coaxed to repeat them.
* The Three Investigators, the title characters are a group of school kids who solve mysteries they encountered. While they would all help each other and work together, Jupiter was responsible for solving most of the cases.
* The Three Js (Joey, Jeffy and Jamie) who hung on Quinn Morgendorfer's every word in
* The three kids cracked on their father all the time, but one such wisecrack was met not with canned laughter, but instead Tim pushing Randy's head back so that he could meet his father's stony, unamused glare:
* The Three Kings: Hunt, Bakura returns to being alive after more than 5000 years being dead
* The Three Kings: Hunt but that eventually they're going to be in charge of the mages.
* The Three Kings: Hunt. These days the mage population is probably in the hundreds of thousands, with the wizard population in the low millions and the non-magicals outnumbering both by a lot.
* The Three Kings: Hunt the Thief King comes back from the dead despite the Department's attempts to prevent this from happening.
* The three Knights of the Cross each carry a sword with them that has a nail from the Crucifixion of Christ in the hilt. While some knights retire after a mission, when the need for them to carry the blade has past, others take on a life long mission.
* The Three Laws work pretty much perfectly most of the time for keeping robots obedient and safe. It's just that less sophisticated models don't understand nuance of instructions or human tone, and more advanced robots are often stated to work by differentials between the laws, so when a low priority law (such as self-preservation) is in strong effect but a higher priority one is invoked to override it, the "stress" can cause unexpected behaviors. The predictable, safe, everyday functionings just don't make for interesting stories.
* "The Three Little Birds", two brothers tell a fishing woman that she won't catch fish where she is, and end up failing their quests; then, their sister tells her "May God help you with your fishing," and receives a magic wand and advice.
* The Three Little Bops" in particular brings this practice to its natural conclusion. In fact, it does recycle a lot of stock footage within itself, mostly of the Three Pigs playing their instruments and the Wolf playing his trumpet.
* The Three Little Dwarfs (Hardrock, Coco, and Joe)). The cartoons are completely unknown to most of the world, while anyone who grew up in Chicago can't imagine Christmas without them.
* The Three Little Men in the Wood, sharing her food and acceding to their requests, and the daughter is not.
* The Three Little Men in the Wood", the stepmother sends her stepdaughter into the woods on an impossible task to kill her. When she returns, having won magical

rewards with her good manners, she sends her daughter after and is furious when her ill-tempered daughter is justly punished. When the stepdaughter marries the king, she tries to murder her and replace her with her own daughter.
* The Three Little Men in the Wood, the stepsister's pride causes her to try to duplicate the results of seeking strawberries in the winter woods.
* The Three Little Pigs" are all individual characters and that none of them get eaten by the Big Bad Wolf. In the original story they have no individual personalities and the first two are eaten by the wolf. Many people will also automatically start singing "Who's Afraid of the Big Bad Wolf?" whenever the story is mentioned.
* The Three Little Pigs" blows away the house of straw and the house of sticks that belong to the first two pigs. He fails with the house of stone of the third pig.
* The Three Little Pigs" cartoon has the Big Bad Wolf dress up as a stereotypical Jewish peddler and try to con his way into the pigs' house. Later airings of the cartoon re-dub the Wolf's voice to remove the Yiddish accent that he affects.
* The Three Little Pigs made it standard that the two pigs just run to the third pigs' house and survive from the wolf's hungry stomach.
* The Three Little Pigs, the Big Bad Wolf, after realizing that he cannot blow down the house of bricks, actually decides to climb down the chimney as a last-minute attempt to kill and eat the pigs, only to end up landing inside a pot of boiling water and jumping out and running away.
* The Three Little Pigs: The words "not three little pigs" are not actually said. The last line is just straight instrumental. In later cartoons, the pigs did elaborate the lyrics a bit, once ending with a humorously drawn-out "He's a great big sissy!"
* The Three Little Pigs' variant the pig actually eats him. In some versions, the wolf may instead survive his break in and flee, or just give up after failing to blow the brick house down.
* The Three Little Pigs, when the Big Bad Wolf starts to huff and puff, he pops the buttons on his suspenders, causing his pants to fall down.
* The Three Little Pigs when, while punishing his brothers, he proclaims "This hurts me more than it hurts you!"
* The Three Little Pigs where the big bad wolf attempts to get into the third pig's house via the chimney (after failing to blow it down). What he doesn't know is that the third pig has a boiling pot over the fire, and the wolf gets cooked in it.
* The Three Little Pigs (with one kid comparing the wolf's huffing and puffing to blow the pigs' houses down to the grandpa's breathing issues) for every new ad they create.
* The Three Lives of Thomasina. The source novel was written and set in the 1950s, but Disney moved the setting to 1912.
* The Three Lives Of Thomasina, veterinarian Andrew MacDhuie's defining feature is his great bitterness with his profession and not being able to use his skills to help people.
* The three major gangs that Cole encounters during the course of events in
* The three mercenary gangs in the same game also had these. Blue Suns had the relatively weak Legionnaries and Centurions, who were tough but were equipped with slow-firing Vindicators. Eclipse had far more dangerous Engineers and biotic Vanguards, which were able to deploy drones and AoE attacks. These had more elite
* The three Merman Princes; Ryuboshi, Manboshi, and Fukaboshi from Mermaid island are strong and won't take
* The Three Minute Universe, only to be heartwarmingly played straight when a young Sacker who looked up to Scotty learned to speak English on its own in just a few days by listening to him talk. Scotty was equal parts honored and impressed by this accomplishment.
* The Three Minute Universe. They kept the name because the race as a whole considers nicknames an honor, especially if they come from an alien race. Near the end of the book the species name for themselves is revealed: Vinithi.
* The three modern Hunters are also briefly seen using their own variety of Powered Armour.

* The three most common ways of showing dues to the dead are the moment of silence (such as the one All Pro Wrestling had in 2011 for Gulf Coast Wrestling.com's Bob Liddil), the "final ten count" (ten rings of the bell adopted from boxing, used for example to open
* The Three Musketeers (1973), Athos orders d'Artagnan to keep going while he stays and keeps the opponent busy.
* The Three Musketeers (1973). D'Artagnan has been separated from the other three Musketeers through attacks by the Cardinal's agents. As he's trying to return the diamonds to the Queen, he's accosted by several sets of Cardinal's guards. Finally, when he's outmatched by three of them, he's rescued twice: first by his servant Planchet in a polar bear costume, and then by the rest of the Musketeers whom Planchet lets in through a gate.
* The Three Musketeers (1973) during one of their fights that he wasn't really trying to kill him. It didn't help that the swords they used weren't foils.
* The Three Musketeers (1973), during the opening encounter with the Cardinal's guards, Porthos's hat gets sliced in half while he isn't wearing it, leading to a scene in which Porthos, jubilant at the Musketeers' victory, puts his hat on, it falls off to either side of his head, and he throws a tantrum and takes four times the cost of the hat out of the guards' purses as a fine.
* The Three Musketeers (1973), famous of the realism of its sword fights, has many characters fighting with both sword and dagger.
* The Three Musketeers (1973) had d'Artagnan try this in a horse trough. Rochefort gets frustrated that he's 'lost' d'Artagnan and kicks the tap off the trough...causing it to empty and leave d'Artagnan exposed.
* The Three Musketeers (1973). The Duke of Buckingham slams open a secret door, hitting Planchet who's standing behind it.
* The Three Musketeers (1973) version. Although the novel depicts them as more or less equal to the king's musketeers in training and prestige—and in the first fight sequence the musketeers hesitate before taking them on at 1-2 odds—by the final fight sequences, the heroes are dispatching them by the dozen.
* The Three Musketeers (1973) when he ransacks his enemy's purse after his hat gets ruined in a fight:
* The Three Musketeers 1987 anime adaptation — Milady invites a captured Constance to hang around.
* The Three Musketeers (1993). Arthos has a bit of a story about love. It doesn't end well.
* The Three Musketeers (1993) as D'Artagnan's introduction showed him being chased by Girard and his men.
* The Three Musketeers (1993) features numerous sword slashes, stab wounds, a full-scale battle with gunfire, and a character getting kicked into the spikes of an iron maiden, all without a single drop of blood.
* The Three Musketeers (1993) in imperial Austrian buildings, or neo-gothic profane buildings being used as gothic cathedral stand-ins.
* The Three Musketeers (1993); Porthos claims to have been given gifts from various royals who don't exist, including the Queen of America and the Czarina of Tokyo. He smirks whenever he says one, waiting to see if anyone catches onto his bullshit.
* The Three Musketeers (1993) that have been pursuing D'Artagnan throughout the movie. Suddenly the goons' leader screams like a girl and the goons turn and run away. The heroes think they scared the goons away when suddenly the entire Musketeer Corps appears from behind the heroes, chasing after the goons. The goons could see them coming but the heroes couldn't.
* The Three Musketeers (1993): The Cardinal offers a bounty for the each of the Musketeers after they free D'Artagnan.
* The Three Musketeers (1993), when Captain Rochefort skewers a hapless thief in the Bastille's dungeons.
* The Three Musketeers (2011) between two flying ships over Notre Dame. At least one of those flying ships also had a flamethrower and a machine gun, and let's not get started on the ending when an entire fleet of these flying ships is preparing to invade England.

* The Three Musketeers (2011) contains perhaps the earliest version of this trope as far as the period goes. The villains were trying to start a war among the empires of Europe. While the dialogue focuses on the continent, the idea is still the same, not to mention that a war of the European powers at the time would have likely included colonies in Asia, Africa, and the Americas.
* The Three Musketeers (2011), during the King's first on-screen meeting with the Three Plus One Musketeers, ostensibly to scold them for dueling in the street and with fighting Richelieu's guards, he tells them:
* The Three Musketeers (2011); preferring to leap from the airship into the English Channel rather than be shot.
* The Three Musketeers (2011) the end of the movie shows the Duke of Buckingham with a massive fleet of ships and airships headed for France.
* The Three Musketeers (2011) to have others do the fighting and killing for her, because she, as a woman, was simply incapable of being physically violent.
* The Three Musketeers (2011) very calmly accepts that he's been beaten (even if it is only a minor inconvenience rather than a disaster for him), and invites the Musketeers to work for him instead.
* The Three Musketeers (2011) was in charge of the film didn't help either.
* The Three Musketeers (and none of them were even filmed in France!).
* The Three Musketeers and the characters being animals, they were straight retellings of the plots from the books.
* The Three Musketeers, Aramis is a woman who disguised herself as a man to join the Musketeers. In the original novel, all the musketeers are men.
* The Three Musketeers are more gentlemen than rankers by the nature of their unit. However, Athos, who is really the Count de la Fère, is nonetheless serving well below his station as an actual aristocrat.
* The Three Musketeers, Athos forces his servant Grimaud to eat an incriminating letter, to make sure the Cardinal won't ever find it.
* The Three Musketeers, Athos suspect that Manson and Iron Mask are working together. However, news come that Manson has been robbed by Iron Mask, so the musketeers abandon this lead. The robbery was a part of the Iron Mask's plan as he and Manson really are working together.
* The Three Musketeers (Cardinal Richelieu), Right or Wrong", as both he and the musketeers are loyal to France.
* The Three Musketeers, d'Artagnan dates Milady for a while. And really, he is the one who lies to her. This is nothing to Athos, however, as he is still legally married to Milady by the time the book takes place.
* The Three Musketeers, D'Artagnan meets Aramis while the latter has his foot on a handkerchief. D'Artagnan picks it up and hands it to Aramis, accidentally revealing Aramis's relationship with a lady and creating an opportunity for a duel.
* The Three Musketeers, D'Artagnan tries to woo a bar wench using words Athos had previous used. When he messed up twice in the first few lines, he abandons all attempts and favors Porthos's approach
* The Three Musketeers do this in a 2004 ad for the 3 Musketeers candy bar.
* The Three Musketeers do this, though they're better known for using swords. Since swords were the standard sidearm of the day, most of the book isn't spent in line combat, and guns of the day were single-shot weapons, it's quite understandable.
* The Three Musketeers has a list of various adaptations of those books.
* The Three Musketeers: If Buckingham just stayed in England instead of going to see the Queen he was madly in love with, many diplomatic incidents, drama, and his death could have been avoided.
* The Three Musketeers is one of the earliest examples. Her beauty and cunning turn many men to work for her, such is the case of how she escaped from her imprisonment, seducing her jailor, John Felton, to help her escape and convinced him to murder the Duke of Buckingham.
* The Three Musketeers is the most sacred thing in the lives of all the heroes, and for that matter of many of their opponents in the Cardinal's Guard.
* The Three Musketeers — the reason Milady is so dangerous in-universe is because she keeps a low profile and doesn't play by the rules.

* The Three Musketeers mentions that he has written a poem with each line consisting of only one syllable.
* The Three Musketeers. Milady de Winter is sent to England to kill the Duke of Buckingham. The Duke imprisons her and assigns his servant Felton to guard her. Milady convinces Felton to free her and kill the Duke for her, which he does.
* The Three Musketeers, named after the chocolate, were respectively white, black and
* The Three Musketeers: One of the guards/torturers in the dungeon is a hulking misfit with a very creepy face, disfigured by many severe burns and dermal neurofibromas.
* The Three Musketeers on Milady. She discovers it while they're cuddling and gets murderous. He's forced to barricade himself in her maid's room, borrow a dress, and flee in drag.
* The Three Musketeers show) episode "The Haunted Castle". After being trapped in a well, Athos, Porthos and Aramis form one to escape.
* The Three Musketeers stakes horses, a diamond that does not belong to him, and his servant Grimaud. After several losses, he retrieves the diamond, Grimaud, and the horse's harness— but not the horse.
* The Three Musketeers. Temporarily embarrassed for funds and very much in need of food and drink, the Musketeers and D'Artagnan's servant Planchet cause chaos in an inn with a long, furious and faked fight...which is a pretext for numerous tricks to purloin said food and drink for later consumption at their leisure.
* The Three Musketeers tend to feature this trope in their various incarnation.
* The Three Musketeers, the Duke of Buckingham was willing to go to war with France if diplomatic relations broke down... because it would keep him away from the Queen of France that he was in love with.
* The Three Musketeers: The musketeers and their servants peel off to hold off pursuers, deal with ambushes or tend to their wounds as the eight travel to London, with only D'Artagnan and Planchet reaching their destination. However, everybody survive in one piece, and they are reunited as D'Artagnan travels home.
* The Three Musketeers: Used by the Musketeers during the siege of La Rochelle to escape from a (previously damaged and deserted) minor fort in which they had gathered to eat, drink and plot: they and their valets set the corpses around the fort, so as to be visible to the advancing enemy party; while their enemies were shooting, they slink away at leisurely pace. In the scene, Athos is particularly badass.
* The Three Musketeers was historical fiction partly based on people who actually lived at the courts of Louis XIII and Louis XIV. Among other examples, it inserts Milady De Winter into the 1628 assassination of the Duke of Buckingham, all four musketeers into the execution of Charles I and the eventual restoration of Charles II, Athos' son Raoul into the story of Louis XIV's mistress Louise de la Valliere, and D'Artagnan into nearly every military campaign of any significance in the 17th century.
* The Three Musketeers we nowadays see him as a scheming villain in the French royal court, which is a very demonized version of the actual man, though again, not by much.
* The Three Musketeers when her son Mordaunt comes looking for revenge.
* The Three Musketeers where horses regularly keel over, get shot, and get ridden to death, with the careful planning of replacement horses at regularly-placed intervals being an integral part of any high-speed chase. Of course, the novels were written when horses were the only form of personal transportation.
* The Three Musketeers where the author reflects that even "cleaning up" still needs something to work with:
* The Three Musketeers: While he had just seen them in their commander's office, D'Artagnan first speaks to Athos and Porthos after running into them. This being seventeenth century France, they immediately challenge him to duels.
* The Three Musketeers) While his scheme is defeated, at best it is a minor inconvenience to the Cardinal who is far too powerful for anything that the Musketeers do to actually harm or seriously affect him and his position. That he

offers D'Artagnan a job still counts as this trope, however, because he could have crushed the young Musketeer without effort.
* The Three Musketeers who killed him. Athos (and presumably Porthos, Aramis, and maybe the other Musketeers) knows, or at least suspects, who did it but never gets the chance to tell him. d'Artagnan himself learns in the final battle:
* The Three Musketeers, who really did have facial hair like that, giving a lot of good character actors a perfect excuse to rock a sinister goatee. Though such beards were in vogue in that period, and often the Musketeers will have similar beards, albeit perhaps a touch bushier.
* The Three O'Clock originally formed under the name The Salvation Army, and released a self-titled album before legal issues with the actual Salvation Army forced them to change their name — they got their new name from the time they usually scheduled their rehearsals. They would later reissue the
* the three of the seven Excaliburs he stole are retrieved and sent back to Rome; Kokabiel's plot to kill the Gremory family have been foiled; and on top of that, he ends up being overpowered by Vali and captured by Azazel to be frozen in Cocytus.
* The three Osaka kids that Conan meets in the OVA, "Conan and Heiji and the Vanished Boy" strongly resemble the Detective Boys. Even their names sound very alike:
* The three-parter, "Imaginationland", in which the land of good thoughts is being slaughtered by the land of bad thoughts.
* The three-part story "Brainwashed" deals with an Ear Worm that's spread to the whole world and is dumbing it down (it's strikingly similar to the "Macarena", which can't be coincidental). In a rare occasion of not trying to take over the world, Pinky and the Brain have to save the world.
* The three Pegasus sisters are a rare trio example. Quiet, serious Fiora butts heads with boisterous Farina, who in turn gets a kick out of teasing both her and shy, sensitive Florina.
* The Threepenny Opera, and Peachum is a corrupt thief-taker (he works both sides of the law- he conspires with criminals, but also turns those criminals in for a reward when they're outlived their usefulness to him). In Brecht's version, Peachum, while still corrupt, is the head of a beggar's guild, and Macheath is a much more unpleasant gangster. This version of Macheath is a "grass" and he gets the lines of the original Peachum when he treacherously plots to turn the loyal members of his gang to save his own skin.
* The Threepenny Opera ends with Macheath ("Mack the Knife") about to be hanged for his many crimes. As he mounts the gallows, Peachum, who has orchestrated his execution because Macheath has married his daughter against her parents' will, suddenly shouts "Stop!" and addresses the audience. In order that the audience not have to face a sad ending, a happy one has been arranged. The chorus breaks into the song "The Mounted Messenger", as police commissioner Tiger Brown (Macheath's old army buddy and his OTHER father-in-law), in full uniform, comes in riding a stick horse, and reads a proclamation from Queen Victoria, in honor of her coronation, ordering Macheath freed, awarded membership in the Order of the Garter, a castle (at "Mucking on the Creek, Sussex") and an annual income for life... and extending "her royal felicitations" to all "the lovely wedding couples here assembled" (the thieves, beggars and whores)
* The Threepenny Opera has a refrain about soldiers turning people into beefsteak tartare.
* The Threepenny Opera, in "Die Ballade von der sexuellen Hörigkeit" ("The Ballad Of Sexual Serfdom"):
* The Threepenny Opera, Lucy and Polly try to out-do each other in the Jealousy Duet, while fighting over Macheath.
* The Threepenny Opera. The lyrics were completely rewritten, at least.
* The Threepenny Opera: "What keeps mankind alive? The fact that millions are daily tortured, stifled, punished, silenced and oppressed. Mankind can keep alive thanks to its brilliance, in keeping its humanity repressed. And for once you must try not to shriek the facts: mankind is kept alive by bestial acts."
* The Threepenny Opera, where the playwright actually goes to the length of having

his characters explain that the play really ends differently... but, for the sake of a happy ending, a royal official enters on horseback to make everything better. The play ends with a comment saying how unlike real life this is.
* The Threepenny Opera with the famous character of Mackie "Mack the Knife"/"Macheath" Messer.
* The Three Pigs, enabling the pig to save the other two pigs and the three of them to enter other stories.
* The three point rule for kicks/knees to the head has become a loophole abused by a controlled fighter to avoid being pummeled, putting down
* The "Three Precious Children" — Amaterasu, the sun goddess; Tsukuyomi, the moon god; and Susanoo, the storm god — were born when Izanagi purified himself following a visit to the Underworld. Amaterasu was born from his left eye, Tsukuyomi from his right eye, and Susanoo from his nose.
* The Three Princes and their Beasts, the three princes separate at a crossroad, leaving marks so the others can known their fates if they retrn.
* "The Three Princes and their Beasts,", where the prince had gotten tokens from the princess.
* "The Three Princesses of Whiteland", and only makes his way back to the heroine in time to stop her wedding.
* The "three Rs" of Education: Reading, wRiting and aRithmetic. While 'writing' has the excuse of sounding like it starts with an 'R' and the first syllable of 'arithmetic' is how the letter 'r' is pronounced in some dialects, it still counts.
* The Three Sages want to complete the abolition of the male gender, turning humanity into a One-Gender Race
* The three shorts (including "A Day for Eeyore") were originally dubbed into Dutch for TV (NCRV) in 1986. After
* The Three Sillies ends with the young man marrying his girlfriend Liza after he succeeds in finding three people sillier than her.
* The three sisters Odette, Lily, and Violet are the Dragon Priestesses of Fire, Earth, and Water, respectively. There is no Dragon Priestess of Wind, as her lineage died out 200 years ago. This lack of the fourth priestess isn't treated as important to mention until she's needed and, yes,
* "The Three Sisters," the king pledges that any woman who cures his son may marry him; his secret wife cures him. (The prince refuses to marry because he's already married, but the princess reveals herself.)
* The Three Snake Leaves", the eponymous leaves can bring people back to life; they are used to resurrect the main character after he has been murdered by his wife and her lover.
* The Three Snake Leaves", the king sentences his daughter to death when she murders her husband.
* The Three Snake Leaves", the main character leaves his home because his father is too poor to support him. Afterwards, he joins the army, rises quickly in the ranks, earns the king's favor and gets married to the princess.
* The Three Snake Leaves", The main character's mother never mentioned, and it is stated his father barely could support himself and his only son.
* The Three Snake Leaves": The princess' husband-murdering ploy could have worked if it were not for the prince's loyal servant witnessing the murder. Swiftly, he got into a boat, hauled the prince out of the water, used the snake-leaves to bring him back to life, and took him back to the king before the princess had the chance to feed her father one lie.
* The Three Stigmata of Palmer Eldritch, it's an article of faith among many Martian colonists that the drug Can-D does this, rather than merely causing shared hallucinations, as most non-users believe. Things get much more ambiguous when Eldritch brings an alien drug, Chew-Z, back from the Prox system.
* The Three Stigmata of Palmer Eldritch with the side effect of causing the users to think more like he does than they used to — and also causes them to spontaneously develop Palmer's "three stigmata", which are artificial eyes, a metal jaw, and a replacement arm.
* The Three Stooges, a 1930 Fox feature film starring Healy. Shemp was replaced by

Curly in the early 1930s but returned in the mid-1940s after Curly had a stroke. Healy, meanwhile, had died in 1937.
* The Three Stooges, a call is sent out for the royal guard... which turns out to consist of just one man.
* The Three Stooges, a meeting between the Axis powers (1940) goes awry, a Hirohito caricature periodically stops everyone to pose so he could take a picture.
* The Three Stooges and demonstrating how much of the physical humor was done with rubber props (the sound effects make it sound realistic) and with safety being the top priority for the production. This may look completely pointless, seeing as how the movie was primarily targeted toward the adults who grew up on the B&W shorts, and they would easily know that all of the slapstick was faked. But to be on the safe side, they are addressing kids; even though some of the content in the movie was not even suitable for kids at all (the movie had lion testicles, and a guy from Jersey Shore getting his head stuck in a microwave, for starters), they know that some parents will let the kids watch. In the end, they're maintaining a tradition, as the actual Three Stooges would do this during personal appearances as well, to show the kids how they kept from being seriously injured doing their slapstick.
* The Three Stooges (and Flagpole Jitters), Moe (Moses Horwitz, AKA Moe Howard) introduces actor Jimmy Lloyd, who was portraying a magician, as, "Svengarlic: He'll take your breath away!"
* The Three Stooges, Andy Clyde, and others) not only because of his acting ability but because of his willingness to perform his own stunts, which was a valuable skill in the shorts' fast-paced, slapstick style of comedy (the fact that the department saved money on not having a hire a stunt double didn't hurt, either).
* The Three Stooges - another Cinemaware title - is played, only for the Stooges to walk in and for Moe to exclaim, "Hey, this looks like a kid's game, you idiots!", before hitting Curly & Larry. The correct intro to the game then appears, with Moe saying, "Now this is more like it!"
* The Three Stooges appear for seconds as firefighters. And are hilarious. Without even doing anything.
* The Three Stooges: a professor builds a vehicle that's a submarine with tank treads and rotor blades. When it's stolen, the military has problems figuring out who should stop it. It lands: 'Call the Army!' It takes off: 'Call the Air Force!' Eventually, it goes over the ocean, to the relief of the commander: 'Call the Navy!'
* The Three Stooges are a rare live-action example used in a slapstick manner.
* The Three Stooges are pretty much the kings of this trope. One short has them building a dream house for their wives, which ends up being something out of a Picasso painting with a set to stairs leading to nowhere and a door on its side.
* The Three Stooges are proud members of the Amalgamated Association of Morons local 6 7/8.
* The Three Stooges began dyeing his hair black once it started going noticeably gray. He also allegedly dyed it reddish-brown for a period of time in his younger days.
* The Three Stooges, but with a uranium subplot added in, where the Stooges tried to get the ore to pay for their father's surgery.
* The Three Stooges by dressing up as the dictator and playing him as a power-hungry buffoon. One morning they shot some footage on the birthday of Moe's daughter. As soon as the shoot was over he ran out the door without taking off his costume so that he could make it to her party in time. The police received several calls from concerned citizens who claimed to have seen Adolf Hitler running several red lights.
* The Three Stooges can take in the PC/console game is boxing, which functions like the "Punch Drunks" example from above: Larry has to get a radio playing the "Pop Goes the Weasel" tune before the fight ends.
* The Three Stooges, Cole Younger, Wild Bill Hickock, and Belle Starr.
* The Three Stooges comes across as the most sensible of the three in most of the shorts but apparently only goes along with what the others do and puts up with

Moe's abuse because he's just very passive. The fact that Curly and Shemp also put up with Moe's abuse makes them examples of this as well.
* The Three Stooges, Curly goes berserk whenever he hears "Pop Goes the Weasel".
* The Three Stooges", Curly is forced to impersonate a champion wrestler named Bustoff after accidentally incapacitating him.
* The Three Stooges, Curly or Shemp often ended up with one of these while Moe and Larry got attractive women.
* The Three Stooges. Curly would taunt some bad guys who would chase him, either to give Moe and Larry enough time to foil the bad guys plans or lead the bad guys to Moe and Larry, who are waiting to knock them out.
* The Three Stooges did this, but not with bread - with beer! In "Beer Barrel Polecats", the trio were trying to make their own beer. The directions said to use three cakes of yeast, and each stooge, not knowing the others had already done so, put in three cakes. It ends up spilling out of the large crock they're using to brew it in and they eventually fill a bathtub full.
* The Three Stooges) did this. Vera Vague was on the business end of a lot of violent comedy in her shorts. Even the classiest female supporting players were not exempt; Christine McIntyre has been, in different shorts, hit over the head with a guitar, splashed with water, and smacked in the face with a loaded shaving brush.
* The Three Stooges did this whenever they hit each other in the head (which is often), especially Curly.
* The Three Stooges 'em!" after the customer clarifies that he wants the eggs scrambled rather than fried. That customer asked for an hot dog earlier — which Moe called out as "one bow-wow!" — but changed his mind once he saw Curly chase after a dog.
* The Three Stooges" ends with Dictator Hailstone (Moe), Minister Pebble (Larry) and Field Marshall Herring (Curly)’s heads mounted as trophies.
* The Three Stooges ends with the Stooges driving a police van through the wall of the Reform Club.
* The Three Stooges episode "Calling All Curs", the Stooges are following a dog who's supposed to be leading them to a criminal. But, the dog leads them to a fire hydrant instead.
* The Three Stooges fake title screen is actually pretty clever, charming, and funny:
* The Three Stooges filmed at least two comedies involving the Stooges as bullfighters:
* The Three Stooges films conformed to a strict two-reel time limit. Rather than cut out funny bits to resolve the plot, many shorts end with a threatening man chasing the Stooges away or something similarly abrupt.
* The Three Stooges flee trouble in an ice cream truck — a couple of hours later Moe and Larry pull Curly from the back, who is frozen solid. They thaw him out over an open fire on a rotating spit.
* The Three Stooges. For example, in one episode Moe throws a feather duster through Shemp's ears and has to help him pull it out.
* The Three Stooges for one, but a number of other Three Stooges shorts featured winner-take-all pie fights.
* The Three Stooges from the 1950s to the present, as well as their distinctively American brand of slapstick humor. They are a Stage 5 in the United States, perhaps Stage 2 at best elsewhere.
* The Three Stooges go, disasters are in the air. Just compare the setting and characters looked like before and after these three showed up. Hell, in real life, they'd be accidental mass murderers and most likely dead a dozen times over.
* The Three Stooges, going so far as to cluck like a chicken after calling everyone else chickens for being afraid of the Ghost of the Red Baron. And a minute later:
* The Three Stooges has several examples of this, including one where Curly grasps the wheel-less shaft and twists it with both hands in a lame attempt to steer the car.
* The Three Stooges has the boys getting themselves into prison to spring an innocent man.

* The Three Stooges has the titular trio counting to three, but this goes like this...
* The Three Stooges has the trio as detectives hunting for a missing archeologist and the lost Tomb of King Rutentuten, and will be paid $5,000 dollars for their commitment to science.
* The Three Stooges have access to anything even remotely explosive and capable of leaving a trail, this will be the result.
* The Three Stooges have had. It may take a while. Granted, during the Great Depression, quite a few of the occupations were "vagrant", "drifter", "bum", and "none".
* The Three Stooges have suffered plenty of injuries that would maim or even kill a normal human being, like having bricks fall on their heads, being shot several times in the buttocks, falling from great heights, having a stick of dynamite go off in their pants, and that's only scratching the surface.
* The Three Stooges. He'd also accidentally step on Moe and Larry's heads on his way up.
* The Three Stooges in Orbit that rather than conquer the Earth, it would be better to wipe it from existence.
* The Three Stooges in the short "An Ache in Every Stake" when an angry chef throws a knife at Curly and pins his bowler hat to the cupboard, at which point a ketchup bottle on the shelf promptly leaks on him.
* The Three Stooges: In "Three Little Pigskins", Moe, Larry and Curly wear the following marks on their football uniforms, in order: H2O2, 1/2 and a question mark. Other Stooge shorts would reproduce this, including 'Half-Wits Holiday' where the boys are part of the 'Amalgamated Association of Morons, Local 6 7/8'.
* The Three Stooges. In true Stooges fashion, the trio wrecks their friend's TV and his new marriage. This trope is zig-zagged because they destroy someone else's gift (which they know is for him) by accident with the recipient learning afterwards what happened.
* The Three Stooges) is knocked out by chloroform almost immediately. In an earlier episode, Monkey Businessmen, a thug the trio tries knocking out with chloroform doesn’t go down and in fact enjoys the smell. So Curly knocks him out with either, either the bottle or the hammer.
* The Three Stooges is looking for a human head for his monster. In one scene Larry pokes his head through the underside of an open-leaf table. Moe enters, sees just Larry's head poking through the hole, and assumes the worst. Cue scream and faint.
* The Three Stooges is one of the earliest and best examples, made at a time when animated cartoons themselves were still relatively new.
* The Three Stooges is the Stooges must earn at least $5,000 to save the orphanage in 30 days, or it will be foreclosed on by the nasty banker: I. Fleecum.
* The Three Stooges makes a pun, you can expect Moe's reaction to be physical.
* The Three Stooges, making sure (not always successfully) to keep his back to the camera.
* The Three Stooges — Probably the longest comedy film franchise in existence, appeared from 1934 until 1965 in 190 theatrical shorts and had appearances in 25 features.
* The Three Stooges met with foul-tempered bears on more than one occasion. They were a little more civilized than the trope usually allows for; one even proved capable of driving a car and signaling for a turn.
* The Three Stooges, Moe and Larry put on shower caps and take out soap when Shemp's bullet holes begin squirting profusely.
* The Three Stooges, Moe, Larry, and Shemp make themselves into a very tall spirit in order to scare a guard into giving them the Rootentooten Diamond.
* The Three Stooges. Moe would wait until Curly or Larry noticed he was standing behind them before slapping them or poking their eyes.
* The Three Stooges, most notably AMC, although the occasional local channel may do it too depending on your area.
* The Three Stooges movie. But then dropped out of the film because he was worried about his health.

* The Three Stooges, naturally, a remake with new actors playing the long-deceased trio.
* The Three Stooges, normally it was something explosive like a grenade or a stick of dynamite.
* The Three Stooges. Of course, at the moment the music starts, a bee flies down the back of her dress. They follow her contortions to get rid of the bee, including all of them jumping out the second floor window into a fountain below.
* The Three Stooges often did an overly-bumbling version of this whenever they wish to attempt to blend in with high society.
* The Three Stooges often did this. In one especially memorable example, a freestanding door the boys were installing fell on top of Moe and got jammed, and Larry and Curly had to saw it to get him out. The saw cut the floor and sent Moe falling 14 feet to the basement. Larry doesn't see why Moe is so miffed. On occasion they'd trap the villain's head in or through a door, and, once certain he couldn't extricate himself, proceed to add to his misery.
* The Three Stooges often rudely bosses Larry and Curly (and Shemp) around for goofing up and considers himself smarter than them but is clearly every bit as dim as they are.
* The Three Stooges of their fight is what made it funny, since they were both dressed in long gowns with petticoats.
* The Three Stooges of them to put the yeast into the wort. Unfortunately, unbeknownst to one another, each of them put in the yeast, and the result was, quite naturally, a massive bubbling up in the wort that caused an explosion.
* The Three Stooges opens with the trio being left at the orphanage, with the three babies already having their recognizable hairdos.
* The Three Stooges poke each other in the eyes so much, it's a wonder they all can still see.
* The Three Stooges pose as plumbers to escape the police and end up destroying the house, getting water in the electrical system, digging up the lawn, etc.
* The Three Stooges shaved his head and his thick moustache specifically for his Stooge character when he joined the act.
* The Three Stooges Shemp is chewing gum and starts blowing a bubble then Moe pops with a pin.
* The Three Stooges short "Calling All Curs" Moe punches Curly through an intercom. Moe's head pokes out of the intercom so he can yell at Curly some more. However, Moe gets stuck there with his face still poking out of the intercom. Cue Curly plucking Moe's eyebrows while saying "She loves me, she loves me not" over and over until the scene ends.
* The Three Stooges' short "Calling All Curs," the boys are forced to beat a hasty retreat when the dinner bell sounds at their dog hospital and a massive clusterfuck of pooches stampedes down the hall... followed after a brief delay by one lone scrawny little pipsqueak of a mutt.
* The Three Stooges short "Disorder in the Court" is repeatedly abused and shot after the boys mistake it for a tarantula.
* The Three Stooges short "From Nurse to Worse", Moe and Larry pry open Curly's money purse (that he keeps around his neck, hidden beneath layers of shirts), and moths fly out. Inside is a single moth-eaten dollar bill.
* The Three Stooges short had them breaking into a bad guys' hideout through the basement - in a scuffle the lights go out and there's a big splash. Curly starts crying "Moe, Larry, I'm drowning!" and keeps saying it as the lights come on and we see he's standing in a washtub in about six inches of water. Moe growls "Hey, porpoise!" and smacks him.
* The Three Stooges short I’ll Never Heil Again, the Tojo parody is prone to taking pictures of the Axels during the fight at the end
* The Three Stooges short "If A Body Meets A Body". It follows the plot for the most part. In fact, the police detective is even played by the same actor, Fred Kelsey.
* The Three Stooges short "Listen Judge" has Shemp stumble into a cabinet, which made the vase that was on top of it fall over and would've broken it if it wasn't

for the quick reflexes of the panicked housewife. This is one of those American works where the owner uses the "vahz" pronounciation, which the Stooges mock:
* The Three Stooges short mentioned above. To get the best score in this scenario, you have to throw all your pies, and avoid getting hit by pies thrown by the opponents. Like all the scenarios, it gets harder each time you redo it, with more pies required and the opponents becoming faster, but the payoff becoming greater.
* The Three Stooges short "Pop Goes the Easel" begins with the stooges walking around begging for work, like many did back in the depression days of the 1930s. Larry's sign reads "Must have a job, will do anything. Position as bridge instructor preferred." Curly's sign reads "I am starving, must have work... if I can't get anything ELSE." Moe's sign reads "Stop, look and listen. Social secretary seeks situation. Wages no objection." All three have no luck in their search, although a random bum to which Moe had handed his sign when asked to spell "chrysanthemum" manages to get picked up shortly afterwards.
* The Three Stooges' shorts are a rare example of this trope not to originate on television itself. When the short Stooges films first appeared as curtain-raisers to full-length features by Columbia, they were regarded as little more than a second-rate slapstick sideshow. However, when these short films began appearing on TV in the late 1950s (after Curly and Shemp's deaths), their popularity took off in a big way. Fortunately, Larry and Moe lived to see the Stooges become firmly established as comedy legends (both died in 1975).
* The Three Stooges shorts has the trio work as photographers. When they botch another job, their boss decides to send them on assignment in a country where taking pictures is punishable by death.
* The Three Stooges shorts, notably in "The Brideless Groom," where Moe and Larry try to use one to break up an all-female brawl. Naturally they're caught in their own trap.
* The Three Stooges' shorts, one of them would swing a heavy pulley at a foe who would duck, then get knocked in the back of the head when it swung back. Would often end up as the "throwers hit variant".
* The Three Stooges short "Squareheads of the Round Table", Larry, Moe, and Shemp noisily dance in full armor to an "ancient" radio playing "Swanee River".
* The Three Stooges shorts used this in a couple of varieties, including the door opening outwards and the villains coming in behind them, sometimes handing them things to put on the barricade.
* The Three Stooges shorts was called "Woman Hater", in which the boys join a club that forsakes women. Famous in that all the dialog was in verse. The club—or a reasonable facsimile thereof—was revisited two decades later in the Shemp era, in "Gypped in the Penthouse" (1955).
* The Three Stooges shorts; whenever someone would refer to the three as 'gentlemen' all three of them would turn around and say "Who came in?"
* The Three Stooges short "Tassels in the Air", the boys are painting a table. The owner offers his help, so Moe, to avoid dealing with a third idiot, sends him off to mix a batch of "spotted paint." He reappears a few times throughout the short, trying to mix the paint — at one point, he tries to create the spots by pouring the paint through a strainer!
* The Three Stooges short, the police are searching for a group of robbers. An officer hears some rustling from a nearby garbage can.
* The Three Stooges" sound made it more convincing and humorous as well, in fact the foley work in general made Moe's attacks seem more harsh than they actually were.
* The Three Stooges start showing up, demanding that Shemp marries one of them. After a long-fought battle amongst the suitors, Shemp finally marries his musical pupil, Fanny Dinkelmeyer.
* The Three Stooges's tooth before Curly can tell him that he's supposed to be the patient.
* The Three Stooges stop...so the driver can snag a sawbuck Curly Joe happens to be standing on. And then he drives off without another word.
* The Three Stooges Style by putting their hand in front of their forehead, which

is when the Von Erichs unleashed the ABDOMINAL CLAW!
* The Three Stooges, television executives are watching a demo reel of a new style of Stooges cartoon on a television, when the building gets crashed into. The TV is knocked around like the other props, but the image doesn't, and keeps running even after one would think the set lost power. This, by the way, was not done in a closeup of the screen.
* The Three Stooges theatrical shorts were full of these, especially when other characters were confounded by the Stooges' antics.
* The Three Stooges, the boys and the romantic lead end up as these. This eventually causes steering issues.
* The Three Stooges (the first short, and part of another lineup of films Columbia was doing; they had character names) and the rare time when they would play actual others (opposite themselves), especially in drag.
* The Three Stooges: The Movie follows this format, with three half-hour shorts in the spirit of the original series.
* The Three Stooges: The Movie has Larry and Curly looking for a lawyer; on the floor of the building they're looking in, they see a variety of punny tenants' names such as "Proba, Keester & Wintz, Proctologists" and "Ditcher, Quick and Hyde, Divorce Lawyers" (pictured above), before arriving at the law offices of "Kickham, Harter & Indagroyne".
* The Three Stooges, then eight shorts later, his voice sounded like the iconic one we know today; reaching the 1943 era, his voice was hoarser and continued until his last short with Moe and Larry.
* The Three Stooges. The rival tribe comes along, sees the Stooges hauling the women away, and hurls spears at them, sticking in the usual rear slapstick target. Since Shemp is the one being dragged, though, it's the woman who's hit.
* The Three Stooges, the Stooges are able to eavesdrop on a pair of Martians because they read the subtitles.
* The Three Stooges (The stooges are hospital doctors, doing surgery.)
* The Three Stooges, the stooges walk into a parking garage and we see a fancy 1930's car roll out. A few seconds later, the stooges emerge with Moe driving a motorized scooter with wagons attached to the back for Larry and Curly.
* The Three Stooges). The Stooges will disguise themselves as members of the press to get access to somewhere. So what do they do? Raid the men's washroom and take some "PRESS" buttons (from some machine) and use those to get in. But Curly, being the nincompoop, would wear a "PULL" button instead and break their ruse.
* The Three Stooges). The three play doctors and are constantly being paged, "Dr. Howard, Dr. Fine, Dr. Howard!" They get frustrated and destroy the paging system but it continues to page them, even as they're shooting it, until it says, "Oh, they got me!"
* The Three Stooges, though normally it'd be something even more sharp and painful than thumbtacks. One instance where thumbtacks were used came when the Stooges infiltrated the office of a high-ranking Nazi officer, and placed a map with thumbtacks in it on his chair.
* The Three Stooges. Though the Marx Brothers' comedy is also very verbal they had a few good foreign dubs at the time, especially in Italy where they have always been very beloved. Harpo was also a link with silent comedy, which crossed all language barriers. And much like Laurel & Hardy, the lesser Marx Brothers movies of the 1940s were never seen by Europeans during the Nazi occupation, thus their reputation also remained intact.
* The Three Stooges used this in a number of shorts, often with one of the Stooges bending over at the edge of the counter and the drink (or perhaps bowl of soup) spilling on his back.
* The Three Stooges videogame has the characters raising money for an orphanage. One dayjob minigame requires serving a large number of pies to three fussy customers, and you need to remain professional by not getting pie in your face.
* The Three Stooges" wall. While facing him. They both point to their own right. This continues AFTER they trade places. And when Larry comes in, facing the two, and points to HIS right.

* The Three Stooges was for all 3 of them to try to go through the same door all at once, and them getting stuck as a result.
* The Three Stooges was mostly this. However, it's easy to justify because the Stooges got royally screwed over on the shorts that made them famous.
* The Three Stooges went through a similar process to their animated cousins.
* The Three Stooges were busy throughout the decade making comedy shorts.
* The Three Stooges when Curly goes down first, but fails to notice that the lift's floorboard gave out and broke off under his weight while he was sending it back up.
* The Three Stooges when Larry Fine injured his foot just before shooting and had to walk with a noticeable limp. Fortunately, this was perfect for his role as a parody of Josef Goebbels, who himself walked with a limp due to a clubfoot.
* The Three Stooges where Larry, Curly, and Moe take turns dope-slapping each other, escalating into bigger and bigger acts of violence.
* The Three Stooges, where Moe accidentally swallows a harmonica and Larry and Curly respond by making him play "Ach Du Lieber Augustine" by pumping his arm and squeezing his stomach.
* The Three Stooges with Moe getiing his butt stuck to a chair, and then his feet stuck to the floor, as he sits in a puddle of spilt bookbinder's glue. This later gives them the brainwave of using the glue to stick the outlaws' gins into their holsters.
* The Three Stooges would be canceled later that year (though a sequel series later premiered in 2018 and is ongoing as of 2021).
* The "Three-Switch Rule", a standard on pinball machines from post-World War II and onward, will let you keep playing without penalty if the ball has tripped 3 or fewer switches before you lose it.
* The Three-Tailed Beast is a cross between a turtle and a prawn (most noticeably its tails), while the Eight-Tailed is a giant bull with octopus tentacles for "tails" and large humanoid arms. We see in an artbook that the Five-Tails is a dolphin-horse.
* The three teams in are the three primary colors of light. The Squashy Grapes are green, the Squishy Cherries are red, and Another Name is blue.
* The three tiers of Lynel weaponry are color-coded to mark their increasing strength. Basic Lynel gear has bronze or copper bindings and details, which become silver in Mighty Lynel gear and golden in Savage Lynel gear.
* The three times Cosmo does it, he spits his coffee all over Wanda (and Timmy the third time). And the third time was
* The Three Tools of Death as well features no actual antagonist. The only death occurs from suicide and the behaviours of all the other characters stem from them either trying to protect each other or misunderstanding the situation.
* The Three Treasures is a troublemaker, but he's shown to have loved his late mother Izanami.
* The three Ultimate Madan Keys give Lady Gold, Bloody and Rock Crimson the ability to revive every time. Until they're taken out by force.
* The three Village Lasses (a.k.a. Silly Girls, a.k.a. Bimbettes... Gaston's fangirls) are brunettes instead of the original
* The "Three Virtues" symbol crops up everywhere. Every faction uses it, both in and outside of the Matoran Universe. There is a species of burrowing animal that dig all their tunnels in this shape, and even the fragments of the planet Spherus Magna took up this shape when it exploded.
* The three virtues, Unity, Duty and Destiny, were introduced in the third year, even though later material explained that they have been the most fundamental parts of the universe all along. They've been retroactively written into the "Legend of Mata Nui" backstory after that.
* The three wars that Prussia fought before becoming the German Empire were relatively short for their time: The Austro-Prussian War lasted for around two months (June to August). The war between Prussia and Denmark over Schleswig and Holstein lasted seven months (from February to October), and the Franco-Prussian War lasted nine months and three weeks (July to May) - and it was basically decided in one of its first battles (Sedan) when the French Emperor was captured by

Prussian troops - everything after that was mop up operations against the French Third Republic refusing to accept defeat.
* The three were even having a personal contest in that scene to see who could look the most ripped.
* The three white fantails, a fancy breed, in the game are all stuck-up and narcissistic to varying degrees - Sakuya is a racist aristocrat, Yuuya is an overconfident
* The Three Worlds Cycle has sorcerers who can tap into a supernatural power. It also has human-like races from other dimensions crossing over, amazing engineering feats, and otherdimensional alien monsters.
* The Three Worlds Cycle, the second series is set in the part of the world where the majority of the Old Humans are asiatic in appearance, including main protagonist Tiaan.
* The threshold also oftentimes serves as a makeshift test against possible shapeshifters. In
* The Thrice album "The Alchemy Index" was released in 2 parts of 2 volumes, and relates the 4 elements to music. Fire is the heavy album, water has a more electronic sound, air is light and the songs flow seamlessly, and earth is acoustic and bluesy.
* The Thrifty Pig, editing them to have Practical Pig building his house with war savings and dressing the Big Bad Wolf in Nazi attire.
* The Thriller Bark arc has a mansion filled with Zombies that do double duty as
* The Thrilling Adventure Hour, a creature who feeds off human energy. To do this, he lulls them off their guard by telling them stories.
* The Thrilling Adventure Hour Amelia Earhart, when Amelia realizes the Nazis are gunning for her by preventing her parents from being together. She and her handler Abby Adams mention they can't do the same to Hitler because his nursery is heavily guarded.
* The Thrilling Adventure Hour are brilliant monster hunters and occult investigators, but only if they become interested enough that it overrides their utter lack of concern for anything that is not either each other or liquor.
* The Thrilling Adventure Hour as being pure (and unscientific) fiction.
* The Thrilling Adventure Hour Batman in the decidedly Silver Age world of "The Adventures of Captain Laserbeam." Everything he says is spoken with serious intensity and in what other cast members describe as "screaming a hoarse whisper," even when all he's doing is getting ice cream.
* The Thrilling Adventure Hour because although Frank was initially frightened, Sadie finds all clowns hilarious, and it's very hard to generate the fear he feeds upon when someone is constantly giggling and asking him to do clown routines and honking his nose.
* The Thrilling Adventure Hour episode "Sarcophagus Now", Frank and Sadie Doyle visit an ancient pyramid where, among the death traps, is a room with hundreds of snakes. It would be quite frightening, were it not for the fact the snakes have been dead a very long time.
* The Thrilling Adventure Hour, Frank & Sadie Doyle's constant drunkenness and general apathy to anything that is not either booze or each other masks a truly masterful knowledge of the occult and an ability to confront supernatural baddies at every turn.
* The Thrilling Adventure Hour Frank and Sadie Doyle. Every episode opens with them clinking their glasses in a toast, they frequently comment themselves on being some level of inebriated, have a walk-in liquor cabinet, and when given three wishes by a djinni, wish only for alcohol and scoff at the idea that the ironic twist to that wish is they've been given more liquor than they can possibly drink.
* The Thrilling Adventure Hour; Frank and Sadie Doyle fear only one thing, and that is the bumblebee that got into their apartment through an open window. Whenever it is spoken of or remembered it is with horror and terror.
* The Thrilling Adventure Hour Frank. In that case, Frank was a fan of the man and could see how she might like him so was able to get over it quickly.
* The Thrilling Adventure Hour has its share of corpsing during shows. The most

famous example would be the episode "The Thing From This Same Planet," a Sparks Nevada episode where faithful Martian companion Croach the Tracker (played by Mark Gagliardi) is being impersonated by Jupiter spy Jib Janeen (voiced by Paul F. Tompkins). Tompkins' comments when Sparks Nevada is singing the theme song causes Sparks' actor Marc Evan Jackson to crack up mid-song.
* The Thrilling Adventure Hour, he and his hobo mentor Gummy encounter situations that Banjo, if he were to access his wealth, could resolve quickly at the cost of sabotaging his chances of finding the Hobo Princess. Since he genuinely wishes to help, this often makes Banjo use his ingenuity to figure out how to solve the situation "The Hobo Way."
* The Thrilling Adventure Hour love the strongest of all, and thwarting a Will o' the Wisp from stealing their souls before it even started by the simple fact that their souls belong to each other.
* The Thrilling Adventure Hour pair of mediums who always work together. Despite that, there are a few episodes where one or the other does not appear. Frank is absent from "She Blinded Me with Seance" and "Rosemary's Baby Shower", having locked himself in their walk-in liquor cabinet in a fit of pique in the former and simply not going along when Sadie visits a friend in the latter. Sadie is absent for "Nuns the Word" and "Molar Express", where respectively she is at a spa and Frank is going to a dentist appointment alone.
* The Thrilling Adventure Hour plays this up for humor in many of its settings:
* The Thrilling Adventure Hour rule and then being stored inside Freud's cigar box. In a later episode, Frank brings out the gun (and the silver bullet loaded within) to defeat an entirely different monster, the Calaca.
* The Thrilling Adventure Hour seriously. When she sees him she excitedly cries "Clown!" and keeps making fun of him. This often stymies the clown, who feeds off fear and bolsters Sadie's husband Frank, who has feared Nightmare since he was a child.
* The Thrilling Adventure Hour that they see ghosts all the time, socially even, and there is nothing in the world that can frighten them; they completely freak out when Sadie notices that a bee has gotten in.
* The Thrilling Adventure Hour whenever he appears. It's immediately followed by Sadie Doyle delightedly shouting "Clown!"
* The Thrilling Adventure Hour wherein a married couple solve supernatural mysteries together:
* The Thrilling Adventure Hour who reminds you to try all the different blends.
* The Thrilling Adventure Hour will occasionally refer to one another as "Frankenstein" and "Sadistic." They also go for "Frank-Darling" and "Sadie-Love."
* The Thrilling Adventure Hour with Jib Janeen, his three kiddos, cool uncle Johnny, and charismatic pal Jeffy. The twist is that Jib Janeen is from Jupiter, and Jovians are natural shapeshifters and spies. In order to be considered for a plum spying account the Janeens are instructed to have the kids impersonate the parents and parents the kids while shapeshifted with red and white stripes.
* The Thrilling Adventures of Lovelace and Babbage! And street music!)
* The Thrilling Adventures of Lovelace and Babbage: Charles Babbage. On more than one occasion, he gets distracted from important stuff by minor details. While chasing a rogue steam-powered economic model that was wreaking havoc on everything in its path, he became obsessed with devising a means to protect it from damage while doing so rather than stopping it from moving.
* The Thrilling Adventures of Lovelace and Babbage increases as it goes on.
* The Thrilling Adventures of Lovelace and Babbage. She immediately returns with a cry of "FOR SCIENCE!!".
* The Thrilling Sword, the prince has to fight 3 immortals, whose weak spots are their armpits, waist, and mouth, in that order. The second immmortal dies when the prince cuts him in half, where his lower half walks off for a few seconds before dying.
* The Thrill Of Combat this is what you do for a living. Using a helicopter, stun beam and a rappelling surgeon to get the sweet, sweet organs and points.
* The Thrintun were a race of carnivorous reptilian aliens who once mind-enslaved

every race in the Milky Way galaxy with their latent telepathy. They were noted for being very stupid by human standards and emotionally immature: most of their technological developments were just stolen from other races, and their society was very primitive philosophically, based around a slave economy and a religion centred around their power and their manifest destiny to conquer the universe with it. Every non-telepath including Thrintun lacking the power for whatever reason, was in their view a slave by definition. One of their slave races eventually rebelled against them by exploiting their arrogance and a flaw in their mind control, and the Thrintun reacted to their impending downfall by building a colossal psionic amplifier and then giving out a single command to every chordate:
* The Throne Defender, one half of the boss fight protecting the Throne of Want, is mostly clad in dark armour, to contrast him with the Throne Watcher's mostly white ensemble.
* The Throne Of Bones, ghouls' tendency to assume the appearance and identities of those they devour — even to the point of forgetting that they're ghouls — is pivotal to most of the stories.
* The Throne of Bones is an eccentric horror writer who pokes fun at his own profession.
* The Throne of Chaos presents the Chaos Dwarves in this manner in terms of artillery and firearms. Chaos Dwarf cannons are extraordinarily powerful, more so than anything the Empire can access, and are entirely capable of smashing city walls and devastating entire formations with a few shots, but their war engines are meant for prolonged siege warfare and slow to reload and bring to bear. Imperial cannon can strafe its Chaos Dwarf equivalent multiple times between the latter's volleys, and Imperial mounted pistoleers are described as firing off their salvos faster than anything the Chaos Dwarfs had ever seen.
* The Throne of Fire, at least the "pretty" part. When Carter Kane does it on Zia, she immediately tries to punch him upon being revived.
* The Throne of Fire, Carter Kane says that his sister Sadie called Apophis some names that if their grandmother heard them would cause her to wash Sadie's mouth out with soap for a year.
* The Throne of Fire, in which Percy and Annabeth meet the Kane siblings, is set after this.
* the Throne of Heroes and the Counter Force are existences outside of time, so it is possible that a Heroic Spirit can be summoned that Will Be There, Will Shape the Future, such as the Archer from stay night.
* The throne of the Asian-themed Azure City is threatened by an evil scheming aristocrat with the title of Daimyo, named Kubota who makes a deal with a (minor) devil in exchange for aid in assassinating the rightful heir Hinjo after he's ascended to the throne just in time to have a war to defend the city fall into his lap and makes several attempts while the battered fleet that evacuated the city seeks to find a safe harbor.
* The "thrones" occupied by mall Santas tend to be fairly impressive to look at, at least to the small children who come to sit on his lap.
* The throwback jerseys worn by the NBA's Golden State Warriors and Philadelphia 76ers were such a hit with fans that the two teams changed their logos permanently.
* The thuggish, cowardly hobgoblin Lord Toede, a mid-ranking minion of the Dragon Overlords. Though never a serious threat, he proved popular enough to get his own spin-off novel.
* The thugs who put Jaune in the hospital and trash his business criminal underground, that love Jaune and/or his diner.
* The Thule Society's, is based on and named after real life (and male) Thule Society member Dietrich Eckart.
* The Thumbs-Up gesture is generally accepted to have generally positive connotations in America, Asia, and Europe. But in much of the Middle East, it can be considered very rude.
* The Thunderbolt Fist: The main villain, Takashi, is killed in this way... by a kick!
* The ThunderCats were the elite warriors/nobility of the Thunderian people on

their home planet of, surprise, surprise, Thundera. It doesn't stop there; the word "thunder" shows up
* The Thundermans: A family of superheroes trying to settle down so three kids can have a normal childhood.
* The Thundermans episode "A Hero is Born" starts with Max trying to save Dr Colosso with his telekinesis, but fails. The voice over, in Dr Colosso's voice, then transitions the episode to when it all began. The scene that started the episode comes at the very end.
* The Thundermans episode "Phoebe vs. Max: The Sequel", the family's recent child, Chloe, has three possible choices to what will be her permanent superpower: super strength, teleportation, or sonic screaming. The crew filmed three different endings to the episode pertaining to which power Chloe ends up with. The teleportation ending is what made the final cut.
* The Thundermans episode "Weekend Guest" this happens after Max and Phoebe feed Max's mutated Venus Fly Trap a formula that will de-mutate it. As its head shrinks down the music dies down with it.
* The Thundermans gives his sister's Venus Fly Trap growth serum that makes it grow huge, super strong and very hungry.
* The Thundermans has main characters Max and Phoebe. This is their most commonly used power.
* The Thundermans has Max & Phoebe doing this with pizzas in the kitchen of a local pizza shop. The round plain crusts come out and they have to put on the sauce and cheese. They get fired by the heavily Asian owner when they jam the machine with a lot of dough and it explodes.
* The Thundermans: In "Exit Stage Theft," Billy tells Nora he is going to his friend's house after she and Chloe forgot about him during their hide and seek game. Nora doesn't believe him and asks which friend. Billy sees a jar of Luigi's pasta sauce and announces "Luigi. Luigi Marinara."
* The Thundermans: In "On the Straight and Arrow", Billy and Nora dress up as the family's gardener to keep their parents from finding out that they are skipping school with Billy on top and Nora on the bottom. Things go well until they try to take down a hornets' nest, causing their costume to fall apart; their parents witness this and think the gardener split in half.
* The Thundermans. It has gotten so bad that Kira Kosarin, Phoebe's actress, has spoken out against it.
* The Thundermans, King Crab is very easily distracted, even in a battle, by bubbles.
* The Thundermans: Link gives Matt a wedgie in the episode "Doubles Trouble", with Matt giving him one in return later in the episode.
* The Thundermans Max performs an experiment on the class pet, a venus flytrap, and it mutates into an intelligent plant that tries to take over the whole house.
* The Thundermans, Phoebe and Max have this power, with the ability to breathe cold breath to freeze someone else. No one is permanently harmed, in fact, they've done it to family and friends who annoyed them.
* The Thundermans reveals that superhero pregnancies are very quick in the episode "A Hero is Born" , about a day. In one scene, a normal Barb discovers she is pregnant, goes to the kitchen and comes back out about a minute later looking nine months pregnant.
* The Thundermans room. They push the button... and Pluto explodes. Of course, this happening so far away, the kids conclude that the gizmo isn't working.
* The Thundermans states multiple times that around 43-year-old Dr. Colosso is his best friend. Colosso calls him the "evil son he never had"
* The Thundermans. The end of this episode directly led to the finale.
* The Thundermans This happens at the end of the episode "Thundersense" when Phoebe tries to warn her best friend Cherry about a flying meatball. When she shouts "Cherry! Duck!" Cherry replies "Where?!" looking around only to be hit by the meatball and knocked to the ground. When Phoebe asks if she is OK she replies "I'm okay but what about the duck?"
* The Thundermans. This meant that thwarting his plan to kill their family with a

meteorite crashing into their house was not counted as a save as they let him go earlier. In the end, the save that made their 100th was saving Chloe's ice cream after it fell from her spoon.
* The Thundermans: When a shallow girl he is crushing on takes a high school senior to the dance as her date, Max's confrontational attitude causes the senior to challenge Max to a dance off to prove who is the better man.
* The Thunder's era as contenders ended during the 2019 offseason. First, PG requested a trade to the Clippers to join his fellow L.A.-area native Kawhi Leonard; the Thunder obliged, getting two players and a record
* The "thunderstorm" from "Unusual EAS" doesn't seem to be a thunderstorm, based on the odd orders from the emergency broadcast.
* The Thunder Warriors are specifically stated to be cruder, more poorly armored versions of the process that creates modern
* The Thunder Warriors, the Space Marines' predecessors, were augmented using a far less refined process with the details unknown. The Thunder Warriors were even stronger than the Space Marines and Custodes, but were also physically and psychologically unstable and had shortened lifespans, making them unsuitable for the Emperor's long-term goals of galactic conquest.
* The Thurb Revolution, hero Anthony Villiers' old friend Fred Fritz confesses to Tony that he's become oddly attracted to young David Clodfelter. Villiers, more perceptive, or at least more consciously perceptive, realizes that David is not only a girl, but Gillian U, the girl Fred's father (the Emperor) has been trying to fix him up with. A snatch of conversation in the next book indicates the engagement has been made formal.
* The Thurb Revolution. On an outback planet, one of the natives announces that he is God, having just been elected by the other Plonks (Don't ask). Anthony Villiers and his friends respond by engaging Him in an oh-so-respectful and reasonable discussion of what constitutes proof since surely He would not wish to encourage the worship of false gods. Reviving the dead is "a modern commonplace". Transubstantiation "can be accomplished by mechanical means". And revealing a secret as proof of his omniscience fails because one of the other characters has already found out.
* The Thursday Murder Club is about a group of retirees who have a club in their retirement home where they discuss "cold cases", until an actual murder happens on their doorstep. The main investigator, Elizabeth, is a former intelligence operative, the others also have relevent skills.
* The Thwaites Brewery in northern England has a large and impressive neon sign on the roof of the building that's clearly visible from some miles away. One whose breaker panel can apparently shut off individual letters. Apparently the senior management didn't realise this, because they were unwise enough to announce a large number of lay-offs without doing anything to secure the panel, leading to an unidentified soon-to-be-terminated employee expressing their opinion of their bosses
* The THX logo has quite a few variations, but the funniest is probably
* The Thyme of the Season, on Halloween Night, when the fairies must sacrifice a human soul to hell.
* The Tiamat Sacrament: Az'uar can evolve after inhaling a certain number of runes, up to three times. His next dragon class is determined by the most inhaled rune at the time of evolution, and there are many classes based on the combinations of elements. The evolutions don't change his appearance, but they do increase his stats and give him additional skills.
* The Tiamat Sacrament: Due to being a dragon, Az'uar is a strong physical fighter, but he can also learn healing and support spells from the Great Sevens' soul gems or from class changes.
* The Tiamat Sacrament: If Az'uar lacks runes, he can spend his own HP as "dragon essence" to substitute the missing runes. However, doing so is dangerous without the Essence Filter relic, which reduces the HP consumed.
* The Tiamat Sacrament of Ry'jin, personally killed King Khytiel and Ilisrei, the father and mother of Xandra and Az'uar respectively. He gloats about his murders in

front of the two, giving them motivation to gain enough power to kill him.
* The Tiamat Sacrament, where the Blue Mage can learn a skill after seeing it once, it takes Xandra several observations to learn a skill.
* The Tiamat Sacrament: Xandra has low physical attack and defense and doesn't even have a basic attack command. However, she can learn a large variety of spells and has the best Mystic and Agility growth.
* The Tibbles. Their grandmother is a soft touch and no matter what they do, she never punishes them, except in the most serious of moments.
* The Tiberium War (or to the more pedantic people on the streets of
* The Tiber Wars were a series of wars fought in the late 2nd Era as part of Tiber Septim's campaign to conquer all of Tamriel. Septim had conquered all but Morrowind (protected by their
* The Tibetan Dog dies at the end, but his legacy lives on with his revealed offspring.
* The Tick 14-B, has this relationship with his (perfectly normal human) room-mate.
* The Tick (2001). A group of diehard Russian commandos (or something) unearth it as part of a poorly-explained plan to destroy the U.S. Postal System, but the robot goes haywire (at the exact same time as Jimmy Carter arrives in town for a book signing).
* The Tick (2001)); and Metcalf. Metcalf deserves special mention: like Arthur, he was a DIY superhero, who bought himself a suit and a jetpack. He then got himself curbstomped (literally, according to the pilot), and now needs a machine to poop. Also, arguably Batmanuel.
* The Tick (2001) and takes over as guard. She is then so enthusiastic about discussing every aspect of her personal life that the villain gives up in disgust.
* The Tick (2001) but not the original comic book, with Bat Manuel and Captain Liberty.
* The Tick (2001), Captain Liberty and another female superhero discuss the difficulties of finding a boyfriend while picking up their dry-cleaning. Seriously subverted in this episode.
* The Tick (2001) episode "The Tick Versus Justice." Destroyo, acting as his own attorney, asks witness Arthur a loaded question, which Arthur answers in such a way as to provoke a Villainous Breakdown and confession from Destroyo.
* The Tick (2001) features a dolphin show where the dolphin jumps through a ring and such, following which the announcers say "But can he do it... ON FIRE?" Soon the dolphin gains human intelligence and some henchmen and turns the tables on them.
* The Tick (2001) involved the eponymous character having a nuclear weapon excluded as evidence against Destroyo because he took it without a warrant.
* The Tick (2001) is about the daily lives of superheroes (rather than their exciting adventures).
* The Tick (2001) usually played the eponymous character's nigh-invulnerability for laughs. He even lampshades it in the opening moments of the first episode of the TV series by trying to blow himself up as a demonstration.
* The Tick (2001) was more of a sitcom-type than a soap-type, it rarely showed the superheroes fighting, instead throwing them in plots like "meeting new heroes in an abusive relationship" or "suing the magazine that displayed naked pictures of Captain Liberty".
* The Tick (2001), when the The Tick walks up to a stranger, hands him a hub cap and tells him "Remember, it was not a magic hub cap. The magic was within you all along."
* The Tick (2001), where Janet and Batmanuel try to explain sex to The Tick.
* The Tick (2016) stealing an ice cream cone from a kid), which is where the humor of the show comes from.
* The Tick (2016), the Tunguska event was an alien object exploding just above Earth's surface, which created all the superheroes, including the first one, Superion, who emerged from the explosion's center.
* The Tick, after trying to fairly complete a death maze, makes a clever mythical allusion to the Gordian knot, and starts busting down walls.

* The Tick and Arthur are in the lair of the otherwise unassuming Sewer Urchin, they watch as the underground superhero undergoes one of these, strapping up with such objects as lemons, guns that shoot melted butter, large claw-crackers, and soap. All of these items prove indispensable.
* The Tick and Arthur were stuck millions of years ago for quite a while and got mixed up with time-travellers from the future who were exploiting the Australopithecines as resort help.
* The Tick and its various spin-offs used this one repeatedly, but most notably so when Heather, girlfriend of "Crime Cannibal" (a.k.a. Keith), was kidnapped and tortured.
* The Tick and locked in a cage. Leonardo escapes largely by using the mattresses and flatware to make a flying machine. When the rest discuss inventing their own escape method, Ben Franklin says bitterly, "How? Da Vinci used all the best stuff!" George Washington Carver laments, "If I could just reach those peanuts...!" Then Wheel the caveman takes the sheets and invents a rope, which they use to climb out and turn the stuff outside the cell into an A-Team style war machine.
* The Tick and pretending to be a crossword writer for a newspaper, despite having neither a job or wearing any other clothing beyond his body (and identity)-covering blue spandex. Averted in the cartoon and live-action incarnations, in which almost none of the superheroes are shown to have secret identities, and most don't even bother covering up their faces.
* The Tick animated series had a Christmas episode in which the Tick and Arthur first tangle with a bank robber disguised as Santa (which he got by mugging a street Santa), and accidentally knock him into a neon sigh in the process — but instead of killing him, the electricity CLONES him. The real Santa shows up to help the Tick stop the clones from reaching the local hydroelectric plant, where they can get enough juice to make unlimited clones and take over the world. The episode contains one glorious pun, when the Tick sees the growing mass of Santa clones and exclaims, "It's a Yule TIDE!"
* The Tick arms an explosive dinner roll by taking a bite out of the roll before tossing it.
* The Tick. Arthur delivered a lengthy anecdote about a personal incident they had once, which convinced the Tick... while the clone said "I Arthur", which ALSO convinced the Tick, since he couldn't find any fault in the statement.
* The Tick. Arthur goes undercover as shady character "the accountant" to get information on the a gang of bank robbers the Donnelley Brothers, even ending up playing poker with their leader. The entire operation is shut down by Ms. Lint, posing as a hero called Joan of Arc so she can take out her rivals with immunity.
* The Tick, Arthur, is a pudgy accountant in a moth-suit that he barely knows how to work. His battle cry is "Not in the face! Not in the face!"
* The Tick, as he can't move or speak on his own, and when he attempts to use the Desirovac in "Grandpa Wore Tights", it doesn't work for him, implying that he doesn't have a mind of his own.
* The Tick briefly gets a job writing (terrible) crosswords for The City's newspaper.
* The Tick, but after taking serious blows to the head, he can get even worse. "Fudge! Would anyone like some fudge?"
* The Tick, but also used several characters exclusive to the comics, such as the Running Man, the Red Scare and Clark Oppenheimer.
* The Tick cartoon, the alien Thrakkorzog has a little face on his tongue that talks about eating brains.
* The Tick clown would be even funnier, and his creation is now terrorizing The City.
* The Tick comic, the art-themed villain The Impressionist is called crazy by his roommate. (At the time, the Impressionist was trying to eat a paint omelet.) Impressionist's retort?
* The Tick determined for some odd reason to jog from the Atlantic Ocean to the Pacific, and wasn't going to let anything stop him until he made it.
* The Tick, dresses sharply, eats fine food, and is prone to sophisticated

dialogue, despite having a chair for a head.
* The Tick entitled "Tick vs. Science," Chairface Chippendale uses the mind transfer device created by J.J. Vatos to hijack The Tick's body.
* The Tick episode, his own brain explains "I'm easily distracted by shiny objects." Later on, Tick sees something shiny in the distance and runs off to check it out.
* The Tick episode, it turns out that Sewer Urchin, likewise, has his own heroic and successful struggles in the sewers.
* The Tick episode "The Tick Loves Santa" involves a department-store Santa who turns evil and gets superpowers... one of which is that electricity causes him to produce clones. This is such a ridiculously specific series of events that it could only have been done deliberately to set up a joke during the final fight... which takes place in a power plant.
* The Tick episode "The Tick vs. the Mole People", supermodel Mindy Moleford has one suspiciously close to where Cindy Crawford's is located.
* The Tick escaped mental patient, the other's a nervous accountant with glider wings. They Fight Crime.
* The Ticket Master" features this prominently, with each of Twilight's friends imagining what they'd do if they could attend the Grand Galloping Gala: Applejack hopes to set up a stand and drum up business for her family's apple farm, Rainbow Dash wants to show off for the Wonderbolts, Rarity hopes to meet the stallion of her dreams, Fluttershy wants to see the royal gardens, and Pinkie Pie just wants to enjoy the festivities.
* "The Ticket Master": Twilight's friends all start arguing at once over who gets the extra ticket to the Gala, and eventually Twilight
* The Ticket Master", when accosted by a crowd of ponies who want her ticket to the Grand Galloping Gala, Twilight unexpectedly teleports herself and Spike away to the library. Twilight is merely surprised, but Spike ends up shocked... rather literally.
* The ticket sales for Harry Styles' first tour in 2020 were so high in demand that it caused Ticketmaster and Facebook to go down, the latter of which happened because fans stormed to complain about the former.
* The tickets for the Championship Play-off Final in 2015 referred to one of the teams as "Middlesb
* The Tick except for Tick, American Maid and Sewer Urchin (And him only when in the sewers).
* The Tick featured a bunch of supervillains known as "The Swiss". Who were dressed in uniforms bearing the Swiss flag and wielded giant Swiss Army Knives:
* The Tick featured a villain who called himself the Evil Midnight Bomber What Bombs at Midnight (yeah, baby!).
* The Tick features several major historical figures transported through time to the present. When the historical figures are all captured and tied up by the bad guys, George Washington Carver (who is among them) utters the immortal words, "If only I could get my hands on those peanuts!" He eventually does, and turns them into weapons of mass destruction.
* The Tick fights one Uncle Creamy, a man mutated into a big walking ice cream cone, who hurls a big ball of ice cream into The Tick's mouth - "AAAAHHH, ice cream headache!!!"
* The Tick, first as bread bombs that can encase entire buildings when activated, and finally, as a giant souffle that will devour the whole city. Luckily, Tick manages to destroy it by generating a sonic boom while getting shot out of the Human Bullet's cannon.
* The Tick for a laugh, such as when he auditions for his superhero locale by surviving an absurd deathtrap during the pilot. Even when in an actual scrap that has some dramatic weight behind it, the Tick will often suffer a comic pratfall that turns on his being nearly indestructible.
* The Tick. For one, he takes half the elevator due to sheer size. He also hums along with the elevator music.
* The Tick had an ultimate goal of creating an army of super-strong animated

plants.
* The Tick had a talking sunflower, soldiers that resemble army toys, and Chairface, a guy whose head is a chair.
* The Tick had a very bizarre take on this: two alien races, each with a language consisting of one word: the Heys and the Whats. The Heys, incidentally, all looked exactly like Arthur, which led to him being captured and interrogated by a What who had learned to speak Hey:
* The Tick had a villain called the Red Scare that made a heavily modified appearance in the Live Action series.
* The Tick had a villain named Chairface Chippendale. Since this villain was not in any way similar to, nor made any references to, the Rescue Rangers, any particularly insightful kids who saw both cartoons might have guessed that both names were a reference to something from an earlier time.
* The Tick had The Deadly Bulb attack in darkness, where we only saw several freeze-framed images when his lightbulb-head flashed in the darkness.
* The Tick had the Tick, going undercover, blurt out his name as "Nick Soapdish". He is immediately called out on this.
* The Tick had villainous sunflowerman El Seed raise an army out of an evil cornfield maze.
* The Tick has an homage to this painting in the form of the diner frequented by the heroes.
* The Tick has his head momentarily teleported, minus his body, onto a golf tee in the 1950s. He loudly declares "Men in plaid!!!" at the sight of the golfers.
* The Tick has never been distributed digitally, and likely never will be, as publisher New England Comics is in the brick-and-mortar comic-store business, and thus would not allow a digital alternative.
* The Tick has to stop an oversized bomb from destroying The Renaissance. He finds a huge mass of wires inside, but after considering the wire problem, he finds an incredibly obvious On/Off switch instead.
* The Tick. Hence his ridiculous-sounding battle-cry "I'm full of tinier men!"
* The Tick!" He never actually uses it because it's the only one he's got.
* The Tick. His ability to clone himself comes from electricity, leading the Tick to believe he killed him when he first gains his power. Worse, he keeps believing he's the real Santa until the actual Santa Claus (complete with elves) shows up. This has the side effect of restoring Arthur's faith on Christmas. At the end, since the Tick can't bring himself to fight even a villain who resembles Santa, he shakes him, which causes all his copies to disappear. Giving the Santas noogies makes them disappear.
* The Tick: "I, Arthur! I, Arthur! I, Arthur! I, Arthur! I, Arthur! I, Arthur! I, Arthur!"
* The Tick in issue four, but is visible flying around in background shots before then.
* The Tick. Instead of a bomb, it's a loaf of bread which is designed to swell to enormous sizes and destroy the building it's placed inside. Tick eats it, then has to keep punching it (i.e. himself) as it tries to expand out of his body until he can digest it. It gives him indigestion.
* The Tick involves a shoddy green clone of Arthur who says nothing but "I Arthur". Naturally, the Tick can't tell them apart.
* The Tick involves the mystery of a mobile mustache super-weapon. When asked by Arthur why the government brought such a horror into the world, the only response he got was:
* The Tick is a G-rated example, played for comedy. She can channel her "feminine wiles" into a form of actual mind control.
* The Tick is a popular Saturday morning cartoon adapted from a character that was first featured in Ben Edlund's comic books.
* The Tick is ineffectual, annoying, and smelly, but when The Tick and Arthur need his help to do crimefighting in the sewers, he proves to be the "apotheosis of cool".
* The Tick is often seen firing off his guns wildly while shedding tears. Sadly,

future appearances concerned his psychiatric treatment and eventual pacifism.
* The Tickler, one of Gregor Clegane's merry band of psychopaths. He's first seen torturing civilians for information. Outside of this task, he appears to be a perfectly unexceptional soldier.
* The Tick: "Let us not forget the lesson that we can learn from this, Arthur, that man was not meant to tamper with the four basic food groups."
* The Tick makes a Patrick Stewart Speech to dissuade Omnipotus from eating Earth. He quickly rifles through his apartment to find objects to use as evidence of Earth's right to exist, including a bowling trophy and a half-eaten cheese basket.
* The Tick — a rather dim-witted planet eater who is talked out of destroying the earth and into taking a bite out of the moon instead.
* The Tick, naturally, has such a heroic chin. Even more heroic a chin is possessed by his ally Paul the Samurai, who actually cites his chin to convince a guard that he is a hero and should be allowed in. The guard accepts this argument.
* The Tick once created his own Companion Cube sidekick, Little Wooden Boy. And unfortunately was forced to burn him in order to escape the belly of a whale.
* The Tick: Parodied in an episode in which the Tick suddenly needs to make up an assumed name when checking into a hotel. In desperation, he picks "Nick Soapdish" as his alias when he sees a soap dish.
* The Tick parodied this trope with a villain-for-hire actually called the Red Scare, who would take jobs dressing up in supervillain attire themed around communist Russian symbology, pretend to menace some major public place, and then get defeated by his customers in a staged fight. The whole affair went hilariously awry when the Red Scare's customer was late to arrive, and the Tick, mistaking him for a real supervillain, attempted seriously to thwart him.
* The Tick. Played with the usual tongue-in-cheekness of the series, but their motivations are purely omnicidal.
* The Tick's animated series is the older son in a nuclear family. His parents are very progressive and hope he'll eventually grow out of the "supervillain" phase.
* The Tick seems to have a few screws loose, but The Tick himself is most definitely Brawn=Good.
* The Tick series, the hero first encounters a colony of angry ants when they steal stuff when using composite human form.
* The Tick shows time-travellers from the future building a resort in the prehistoric past, exploiting the australopithecines as help - one of whom gets transported to Arthur's apartment, causing the Tick to shout "Arthur! MONKEY OUT OF NOWHERE!!!"
* The Tick's past is that he escaped from an insane asylum and that he has an ex-wife. Everything else—where he comes from, how he got his powers—is never revealed.
* The Tick special agent because he still has both eyes-the eyepatch is just there to make him look cool.
* The Tick speeches concerning the villain which seldom make any sense.
* The Tick-style black-and-white shot of a town filled with identical Rays saying "Hi, I'm Ray!" to each other over and over. Captain Decency then begins to reminisce about a similar adventure involving a "Tommy Gun" before being cut off.
* The Tick teaches a superheroing class full of these; Baby Boomerangutan (a guy in a monkey costume, sans head, who uses baby dolls as boomerang projectiles); The Flying Squirrel (a shy and sheepish woman in a squirrel costume who can talk to squirrels — basically a grown-up and lamer version of
* The Tick (the animated version), this happens between Die Fledermaus and American Maid: "Jerk!" "Jingoist!"
* The Tick, the Tick and Arthur take a road trip; the Tick insists that he knows how to fold up their (standard US-style) road map, but every time he tries, he produces an even larger wad of paper, until he's filled up the entire backseat of the car with it.
* The Tick. The Tick initially had the power to swell his muscles to twice their size by flexing (this was quickly forgotten). In the first encounter against Chairface Chip'nDale, the Tick attempted to use this to break free of his ropes,

but had to stop because he would have killed Arthur and American Maid in the process. Instead he saved the day with his "Good Dental Hygiene".
* The Tick, The Tick once notably said, "I don't want to stop evil. I just want to fight it!"
* The Tick: "The Tick vs Nevada" featured a dolphin who, like Blowhole, wanted to conquer mankind rather than amuse it.
* The Tick: "The Tick vs. Science" had a lot of fun with this, with human characters suddenly saddled with the vocalizations of a giant sentient tongue and so forth.
* The Tick, Tick accidentally drops the Thorn of Oblivion (whose destruction is prophesied to bring about the end of the Ninja) off the roof of a hospital. The evil ninja master Sagin attempts one of these, and fails. Both Thorn and Ninja shatter on the pavement below.
* The Tick, Tick and Arthur go adventuring in a fictional African nation called Van Buria (founded by US President Martin Van Buren) and come back with a briefcase full of local currency. It turns out to be worth $8 US.
* The Tick tried to get Arthur to play along with specialty attack naming. One special move was supposed to be Arthur catching the Tick in mid-air... too bad the 7-foot galoot was too heavy for Arthur to lift!
* The Tick tries to feed the heroes to his pit of man-eating alligators. According to The Tick, this is standard villain procedure.
* The Tick up as the ship's fuel source, the thing reaches speeds the aliens didn't even realize were possible with their system.
* The Tick, up to and including trying to imitate the Tick's speech patterns.
* The Tick vs... MY HERO ACADEMIA!, Inko decides to talk to the Tick about his relationship to Izuku, which the Tick tries to deny by acting ignorant. Unfortunately for him, while trying to do so, he calls Inko by her name, something he couldn't possibly know if he didn't know Izuku.
* The Tick vs... MY HERO ACADEMIA! is in Japan on his own initiative, but to the Americans this is the trope they want to be in play. When Endeavor requested his return, the American response was a paper with "NO GIVE BACKSIES" printed on it.
* The Tick wanted Niel to put on some pants. So he made a giant pair of pants and planned to have the army lure Neil to the pants so he could put them on. The pants caught on fire before anything could be done with them.
* The Tick was at one point allowed to ask one question of his deepest subconscious, which could answer any mystery in life. He asked, "How's it going?". He got a thumbs up. His spiritual guide is not amused.
* The Tick when the Moon smashes it, or he simply doesn't care, because it's the most evil thing he can think of.
* The Tick, when the villainous Human Ton attempts to eat the Tick's head, his puppet companion Handy starts to brag to the viewers about how he's still able to talk. This ends abruptly when Arthur yanks him off Human Ton's hand. Human Ton then stops to look for Handy and is horrified to see Arthur viciously stomping him on the ground.
* The Tick when Tick throws out names like "Three Yaks and a Log" and "Susan."
* The Tick, where in the first couple episodes, Arthur, who always wanted to be a superhero, and has had a history of paranoia and hallucinations, keeps seeing a super-hero named The Tick — but conveniently, silent and invisible whenever anyone but Arthur is around. Thus, we, the genre-audience, start to believe that Arthur has invented The Tick and we're seeing another of Arthur's hallucinations — and by the second episode, Arthur comes to that realization himself, too... incorrectly. It was just a hilarious coincidence that nobody saw or heard him.
* The Tick. Which is faster than light, because it's one of the first things you find in your pockets after you do your laundry.
* The Tick, who has been shot an absurd number of times over the decades.
* The Tick with the overweight grotesque Venus and her wimpy inventor husband Milo.
* The tics of the first four Doctors are imitated by the Fifth Doctor in his state of confusion after having regenerated. Particularly amusing is when he goes to bury his hand into his curls Four-style, realises he has shorter, straight hair now, and

* The TicTocs, ticking parrots with metal beaks, aren't revealed to be robots until one of them gets autopsied.
* The tide began to turn in the early '00s when Whitmire appeared as Ernie in a number of street stories, but seeing as Oz was still the primary performer of Bert, Grover, and Cookie Monster and his successors (Eric Jacobson for Bert and Grover, David Rudman for Cookie Monster) were still getting acclimated to the characters, they still seldom appeared. It wasn't until around 2002 that Oz passed the reigns more or less fully on to his successors, save for a few guest appearances, and from that point on all three characters made much more frequent appearances...only for
* The Tidings Brought To Mary, Violaine kisses a leper and gives him her engagement ring to sell for money. Her fiance, upset that she's given away his ring and contracted leprosy, marries her sister instead.
* The "tied up right now" variant comes up when the eponymous character had bound himself to a chair
* The tie-in background comics which introduce Maevaris Tilani show that her engagement to Thorold Tethras, Varric's cousin, was this along with being an
* The tie-in comic book for the series described (but did not show) one for Arnold Wesker, a.k.a. The Ventriloquist. The Ventriloquist tells Batman that he was actually born into a mob family and was encouraged by his mother not to allow himself to drift into a life of crime like the rest of the family had done. Arnold promised her he'd do this... but then his mother was killed one night by a bullet meant for his father, and Arnold felt that he had to avenge her. Even after becoming a gangster, he still kept a framed photo of his mother on his person at all times—until Scarface, in a fit of jealousy (because the Ventriloquist had been keeping company with other puppets in an attempt to distance himself from Scarface), tore up the photo, causing Arnold Wesker's mind to snap for good.
* The tie-in comic book series played with this; see the Comic Books section.
* The tie-in comic revealed that the Wayne Powers enforcer who killed Warren McGinnis was Jake Chill, great-nephew of Joe.
* The tie-in comics had a story about a suspiciously young man claiming to be John Lawrence, one of the pilots from the famous Flight 19.
* The Tie-in comics inform us that the surest way to get the Demoman "drunk" and useless is to feed him solid food and water. His body has been spending so much time "wrestling nutrients out of grain alcohol and aspirin tablets" that it starts acting funny because it thinks it's been poisoned.
* The tie-in comics set after the show ends ties up a lot of loose ends regarding what happened to
* The tie-in comic story "Unseen, Unheard" shows Visas Marr without the veil that she never takes off in the game. She has no eyes, just skin over the sockets.
* The tie-in game to does this to Dr. Farley Stillwell, making him female.
* The tie-in game to has Spider-Man note how much of a bad idea of the name "Shocker" is.
* The tie-in RPG mentions that even traditionalist thaumaturges rarely work magic without computers these days. Who wants to spend 48 hours chanting and start over every time your tongue slips, when you can get a speech synthesizer to do it for you?
* The Ties That Bind by Rob J. Hayes. It is a bleak setting of cynical mercenaries with a ruthless Inquisitor out to save the lands from a demonic invasion.
* The Ties That Bind: Laika qualifies if she took corporal punishment for 20 years without complaint and willingly became a slave in BDSM.
* The Ties That Bind Part I and its sequels give us Red Impulse as an agent of Galactor, passed over for leadership by Leader X. Yet it does so without stretching what's on screen out of recognition.
* The Ties That Bind setting starring a bunch of thieves and sellswords.
* The Ties That Bind: This book is supposedly an autobiography, but there's no evidence that it did happen as it's being described.
* The Tiger isn't a tiger. It's a wolf. And even then, it's not even a normal wolf — it has blue fur, a fluffy mane, and horns. Cue much confusion for the players. For the record, the name is a translation error. The original name

* The tiger-like Rakshasa in are demonic shapeshifters (derived from Indian folklore) who can disguise themselves as any humanoid creature, with the caveat that their hands are always facing the wrong way on their wrists. This has varied over the years from the hands being upside down to the palms facing outward. Another version from the spinoff parody
* The Tiger Lillies. The majority of lyrics boils down to "beat me till I [verb]" followed by "I will, I WILL love you".
* The Tiger Makes Out's character, preparing his campaign to disrupt the indifferent, sheeplike world around him, picks up a trenchcoat and fedora at a pawn shop. As the owner anxiously watches him suiting up, he points out that he has a sawed-off shotgun for sale.
* The Tiger Makes Out's mad-at-the-world character goes to the housing authority with a grievance on his lunch hour, and gets number 110 when they're only up to 15. He pretends to be #15, but the representative won't talk with him until he's produced the number. He's then busted and booed out of the office for being a line-breaker.
* The Tiger Makes Out - the antihero protagonist is scheming to strike out at an indifferent world by abducting and dominating a beautiful woman. He's mesmerized by a sultry cabaret singer, who he follows to the dressing room, never noticing the lobby sign advertising a female impersonator performance.
* The Tiger Prince Once Pinky and the Brain take over the grasslands, the Brain happily immerses himself in the minutiae and paperwork of government (and does a fine job of it), while Pinky, of course, can amuse himself for hours with a ball of lint.
* The "Tiger Rag" isn't the only existing song that LSU uses. It also obtained the rights to the Broadway tune "Hey, Look Me Over", gave it new lyrics, and calls its version "Hey, Fightin' Tigers". As in the case of "Rocky Top" and Tennessee, it's not the official fight song,
* The Tigers had all videotapes of a 1968 concert for NHK destroyed after fangirls went wild and caused several injuries and damage to the arena.
* The Tigers, Human Renascence, and was entirely based on the concept of the Tigers dressing regally, so composers Koichi Sugiyama and Kunihiko Murai decided to make an entire album based on their image as royalty, complete with rather large orchestral arrangements, which made most of the songs notoriously difficult for the band to perform live.
* The Tigers of Mompracem and slicing its throat. It's implied he would have stabbed it from the start if he didn't have to push it aside to save Rosenthal.
* The Tigers of Mompracem are this on a larger scale, being pirates from many ethnic groups (mostly Malays and Dayaks) that would normally kill each other on sight (Truth in Television: Malays and Dayaks went out of their way to attack each other, with James Brooke actually using Malay forces to take down the main Dayak pirate band and Dayak forces to destroy the main Malay pirate group).
* The Tiger's Wife, by Téa Obreht, the narrator's grandfather tells of his encounters with the "deathless man," who angered Death — his uncle — by saving a woman who was meant to die, and was punished with immortality.
* The Tiger's Wife refuses point-blank to admit that she knew in advance that her grandfather was terminally ill, even though her grandmother knows perfectly well that Natalia knew, and is begging her to admit it.
* The Tigger Movie, after Tigger attempted to leave the Hundred Acre Wood to pursue his family.
* The Tigger Movie ends this way, with the photo having been placed in a locket that then closes up.
* The Tigger Movie: In the opening scene, Tigger is upset at the title of the book usually used in the other Pooh Bear Adventures. The Narrator asks, "Well, what would you call it then?", to which Tigger rearranges the print on the page to form his own title.
* The Tigger Movie Rabbit takes off his jacket and gives it to Piglet when they walk through a snowstorm, which makes sense since Piglet is a lot smaller and not covered in fur.

* The Tigger Movie's "Round my Family Tree" counts as this, at least its end, complete with synchronized Tigger swimmers that dive in a pool and make a circle.
* The Tigger Movie takes this a step further, when Tigger comes to realize the ramifications of being the only one of his kind in the Hundred Acre Wood, and starts longing to find out where his family might be.
* The Tigger Movie: Tigger braves a blizzard when he runs away to look for his "family tree," with his friends making their way through to find him.
* The Tightrope Men features a punt gun: an extremely large shotgun generally 4 gauge and bigger, which were mounted to the sides of river barges and used to fire into large flocks of waterfowl to harvest many birds with a single discharge. One of the protagonists recognises it for what it is, and they actually use it in the appropriate way, blasting a mook with birdshot. One character remarks, "What weapon did you have on that punt? A bloody flamethrower?"
* The Tightrope Men have a hostage for his good behavior; then he attacked and used the link connecting the cuffs to choke the interrogator.
* The Tightrope Walker, the manuscript of an author's last novel, lost at her death and subsequently rediscovered, turns out to contain characters based on her relatives, and so keenly observed that their fates in the novel foreshadow events that occurred after the novel was completed.
* The Tightrope Walker, the plot starts when the owner of a second-hand store finds a "Please help" message hidden in one of the objects in her store.
* The Tikbalang from Philippine mythology has the body of a man, but with the head and feet of a horse. Its legs are so long that when it sits down, its knees are above its head. Some legends also give it a mane of spikes. They are known for messing with travelers by shapeshifting into someone's relative, but if you find the right one, you can control it and ride it through the sky.
* The Tikhvin Offensive, the German Army's October 1941 attempts to tighten the Siege of Leningrad and besiege (or capture) Moscow. Despite initial success in encircling Soviet forces deployed without a sufficient 'depth' of defence, neither came close to its objectives in anything but a highly superficial sense. Both critically overextended German forces for the Soviet Winter Counter-Offensive of December 1941. German losses in December-January 1941 made a near-future (sooner than 1943) German victory over the Soviet Union impossible, and rendered eventual German defeat likely.
* The Tik-Tok Man of Oz, Queen Ann's army has a number of officers but only one enlisted man, Private Files. After Files resigns to avoid being commanded to perform an illegal order, Ann enlists Tik-Tok to replace him.
* The Tilean city of Verezzo is built on the only high ground in an area of flat land and surrounded by a system of very strong walls and bastions. The Verezzans are very reluctant to expand the borders of their cities, as this would mean weakening the strength of the fortifications by extending piecemeal into the plains, and as a result the city is filled with very narrow streets and very tall houses, some of which have become so high that they've become additional towers and have been incorporated into the defenses.
* The Tillerman Family Series by Cynthia Voigt, is practically angelic by description, both in personality and appearance.
* The tilt sensor is a device that detects when the machine has been jostled or lifted too much by the player, giving the player the now famous TILT penalty. In the form of a metal pendulum surrounded by a metal ring (when the pendulum touches the ring, they complete an electrical circuit), the tilt sensor has remained unchanged for 90 years. Why do pinball companies continue to use this mechanism when accelerometers can do the job, but more accurately, with greater customizability, and arguably for less cost? Because accelerometer-based tilt sensors were patented by a troll, and the industry-wide agreement is to continue to use the pendulum mechanism and let this patent expire than to pay money to the troll and encourage more of this behavior.
* The Timber Wars between Erathia and AvLee over the Contested Lands. Some hero descriptions mentions them, they're a key part of the backstory for
* The Tim Burton film is clearly based more on the Disney version than the original

story. Though Crane has a cowardly personality, he is ultimately the hero of the story. The villagers, on the other hand, are mostly turned into corrupt villains, and the prankster Brom Bones is a bully. The scene where Ichabod rides across the covered bridge is a direct reference to the Disney adaptation, complete with the frogs seeming to croak "Ichabod". The shot where he ends up on his horse backwards is also borrowed from that version.
* The Time are today best remembered for the #20 hit "Jungle Love." Many forget they actually had a Top 10 hit a while afterwards with "Jerk-Out."
* "The Time Bandit!", a story from the 14th issue, has Bart go back in time to when Homer and Marge were children. At one point, Bart gets a laugh out of Homer's class (the teacher included) by mooning them.
* The Time Bender, when O'Leary first appears in the kingdom of Artesia, he uses his newfound powers to create what he thinks is an appropriate set of clothing for what seems to be a rather medieval setting. Unfortunately, the result looks exactly like the legendary figure known as the Phantom Highwayman, and ends up terrifying people.
* "The Time Earth Glitched" states that griffinflies quit the game at the end of the Carboniferous expansion when they actually went extinct at the end of the Permian. Also, TierZoo suggests that if they were still playable today, they'd be able to hunt domestic dogs and cats, which is unlikely given they were actually smaller than modern-day crows.
* The Time... Guys: Doc assassinated Julius Caesar, and it's heavily implied that he was the one who convinced John Wilkes Booth to kill Abraham Lincoln.
* The Time... Guys, Dr. Chronos is very bad at Spanish, as seen in "Dinner... TIME".
* The Time... Guys fame talk like this, but Caveman's prodigious cave-telligence imply this done more for style.
* The Time... Guys made their three-person cast a joke. One actor plays every single historical character the gang meets.
* The Time... Guys thinks he's a scientific genius, but it's obvious that he has no idea what he's talking about.
* The Time... Guys: Time-travelling scientist, his plucky young ward, and his Neanderthal intern.
* The Time... Guys uses this often. In Episode II, for example, almost every other line is a joke.
* The Time... Guys visit is full of people and things that didn't exist in that time period IRL.
* The time he executed the Coca-Cola board of directors for illegally using his image.
* The time he had an existential crisis over discovering the world runs on
* The time he persuaded a journalist that he lived in the windowless building in the centre of the Elephant and Castle roundabout in London (it's actually an electrical substation for the London Underground).
* The time he titled a number of tracks after malware programs to troll anyone who tried to find them on filesharing services.
* The time he took out a Japanese machine-gun nest by hiding in a barrel of sake, holding his breath until the guards got drunk, then leaping out and 'hibachi-ing' the entire group by blowing sake out over his zippo.
* The Time In Between and the novel on which it's based: Bathtub Gin, as it revolves around a seamstress whose closeness to the elite gets her drawn in as a spy for the British in pre-World War II Spain.
* The Time In Between, Marcus and Sira often come close to a kiss but keep getting interrupted by other characters or by time constraints.
* The Time In Between, nearly all of the espionage agents are impeccably dressed gentlemen who are also perfectly capable of taking action - physical or diplomatic - if necessary.
* the time Invel forces them to fight each other to death, and they choose to commit suicide rather than killing the other. When Juvia saves him, he begs her not to die, promising to take her feelings more seriously.

* The Time It Never Rained by Elmer Kelton, every character is a real person with a false name that was in or near San Angelo at the time.
* "The Timekeeper would love to take the time to take you on a trip through TIME!" —
* The Timeless Children, and promptly sparked the biggest split within the fandom for decades.
* The Timeless Children": On Graham's suggestion, Ravio and Yedlarmi empty out and deactivate four Cybermen suits for them and Yaz to wear so they can hide. This later allows them to save Ethan's life when he's cornered by actual Cybermen.
* The Timeless Narrative of his contributions to be decanonized; the remaining creators refused, as the "rules" established by the storyline were in play throughout the verse and removing them would have created more plot holes.
* the timeline had been changed so that the Nazis won. They were forcing Seth, the power dealer to take powers from other people and put them into soldiers from their ranks. Curtis, Kelly, and the two Rudys save Seth by ambushing the jeep that was transporting Seth by wearing Hitler masks and shooting while unseen from the trees. When Seth gets recaptured and Curtis and Rudy captured along with him, Kelly goes to save them by herself. She takes Shaun, a Nazi officer hostage and runs into Alisha and Simon. Their reaction? "You need a hand?" Granted, it didn't go as smoothly as planned, but hey... they still did pretty well considering who they were up against and technically they still managed to save the day.
* The Timeline Wars trilogy is about two groups of time and dimensional traveling groups waging a proxy war by giving improved technology to different groups or leaders throughout history:
* The Time Lord character Romana, like the Doctor, has been regenerated over time, and
* The Time Lord Drax has a Cockney accent so thick that even the (Fourth) Doctor comments on it. He explains he picked it up in Brixton.
* The Time Lord homeworld Gallifrey is perhaps the most well-known example with its fabled "burnt orange sky", although the Doctor never arrives there at random (and it isn't shown on-screen much at all).
* The Time Lord Matrix was a supercomputer that contained the recorded
* the Time Lords, a man with near godlike technology at his disposal.
* The Time Lords are generally considered the most powerful civilization in the universe (though the Daleks are a close second). The critical bit there is the phrase "in the universe" — there are beings from outside our universe like the Guardians, the Eternals, and the Chronovores who aren't impressed with the Time Lords at all.
* The Time Lords are increasingly characterised over the series as a powerful race who reached a certain peak of advancement and then spent the next few millions of years comfortably resting on their laurels, becoming increasingly stagnant and corrupt in the process. This came to bite them in the ass during their war against the
* The Time Lords are this as a culture. While merely long-lived as individuals, the sheer scope of their civilisation's history is staggering. We learn during the course of the series that they are "the oldest civilisation", have had "ten million years of absolute power", and "a billion years of history". They "practically invented" black holes and mastered teleportation "when the universe was less than half its present size". Their history is so long and filled with so many dubious events that even most modern Time Lords are not aware of much of it, and genuine historical events and artifacts are considered mere myths and legends even amongst themselves.
* The Time Lords, as well as the Doctor himself, waver back and forth on this. They are said to be "immortal, barring accidents" and can survive even fatal damage at least twelve times, but while individual Time Lords are generally good people the civilisation as a whole is immensely arrogant and indifferent to the rest of the universe, and they have an alarming tendency to produce power mad renegades that use their immortality and knowledge to lord over and cause immense damage to "lesser races" (a category in which many include the Doctor). At the very least, in

"The Ultimate Foe" the Doctor states they are "decadent, degenerate, and rotten to the core" due to eons of such power, and
* The Time Lords have the Seal of Rassilon, which the TV Movie took to
* The Time Lords' high-collared robes and ornate headpieces that appeared in any Gallifrey story from "
* The Time Lords (including the Doctor) are implied to be somewhat Lovecraftian themselves. The new series will occasionally touch on this, such as the Tenth Doctor episode
* The Time Lords of Gallifrey (currently personified in one remaining member) are able to see the bend and flow of space-time to the point that they know when an event inevitably MUST happen in the grand cosmic scheme, and when certain things are permissibly malleable. The latter fact results in Donna convincing the Doctor to save a Roman family that they've befriended in
* The Time Lords of Gallifrey (the Doctor's own people), who are introduced in "The War Games" and recur now and then throughout the Third Doctor's era. (In later stories, as entire stories are set on Gallifrey, they become less mysterious and godlike, more human, in terms of their politics and motivations.) They sometimes take the Third Doctor's TARDIS to other planets (with him and his companion in it), so he can carry out a mission (with some reluctance). Also the Fourth Doctor in "Genesis of the Daleks."
* The Time Lords represent a civilization of this type. Hobbies include creating
* The Time Lords send an Epic Hail to the Master, first with a four-beat rhythm transmitted through the Time Vortex into his mind, and then by hurling a White-Point Star diamond to Earth, where it plummets from the sky in a trail of fire.
* The Time Lords, the Doctor's people, established as beings who never ever ever interfered with other planets, had the Doctor doing errands for them within two years of real time. This later got
* The Time Lords themselves are a race of supposed non-interventionists, but they are really a controlling, elitist, and somewhat stagnant race of
* The Time Lords themselves — the new series states that the TARDIS is alive. "It's not built: It's grown." Like a coral. And the
* The Time Lords themselves, who possess technology allowing them to travel anywhere in time and space, created insanely powerful weapons like the star-killing Hand of Omega and sentient "galaxy eater" the Moment... and not to mention their
* The Time Lords. The Time Lords are the upper rung of society, divided even further into rank and ability with politicians at the top. Then there's the ordinary Gallifreyans, and all the way at the bottom there's the Outsiders, who choose to live outside of Gallifrey's modern society. Time Lords consider them to be as good as savage. Canon is inconsistent as to whether the "Shabogans" are just another name for the Outsiders, or whether they're political dissenters and protesters (the only reference to them in the Classic series is a line suggesting they like to take
* The Time Lords were sometimes shown carrying staffs as part of their extremely ornate ceremonial regalia.
* the Time Lords wiped the Doctor's mind, the ungrateful so-and-sos still merely gave him his memory back and allowed him use of the TARDIS — when he went back to Gallifrey, he was still made prime suspect number one in the assassination of the President of the Time Lords... And that's not even counting the later time when he was put on trial for his life...
* The Time Lord themselves may be a transGallifreyan race, augmented by regeneration and time senses.
* The Time Lord Victorious and the Valeyard both qualify as this to the Doctor.
* The Time Machine (1960), George fights against this and resolves to change their ways for the better.
* The Time Machine (1960): In the future, all Eloi (one offshoot of modern humanity) are uniformly white and mostly blond. This might seem plausible as it's set in the former London (yet even then the blondness isn't) but they also are living in what looks like a pretty hot climate to judge from the lush jungle that sprung up. So you would expect the Eloi to have darker skin and hair eventually as

a result (granted, it isn't clear how long the climate's been that way).
* The Time Machine (1960): In-Universe. The protagonist from 1899 traveled a couple of decades into the future. One of his friends' sons mentions "the front" of "the war". It's obvious it's the First World War, but being a time-traveler, he was unaware.
* The Time Machine (1960) on August 19, 1966 immediately before the city is struck by a nuclear bomb. He later learns from one of the Talking Rings that this marked the beginning of the war between the East and West which lasted for 326 years. After the last remaining factory for the production of oxygen was destroyed, the survivors split into two factions with one living underground and the other taking their chances on the surface. This eventually gave rise to the world of the Eloi and the Morlocks.
* The Time Machine (2002) also has a justified example, because the AI in question has been sitting around for many years — long enough that the heroes were lucky it played at all.
* The Time Machine (2002) also uses metal bars spinning at high speeds.
* The Time Machine (2002) and that the hero sees a future in which the Morlocks have conquered the Eloi and the only logical conclusion is that the other Morlocks will eventually kill him and all his friends.
* The Time Machine (2002): Dr. Alexander Hartdegen created a time machine to try to save his fiancée Emma from her death, but in each try, she dies again in a different way. Distraught, he travels to the far future to try to find out why he can't change the past. There, he falls in with a people called the Eloi and bonds with a woman called Mara. After learning why he can't save Emma, he accepts it and sacrifices the time machine to destroy the Eloi's enemies, the Morlocks, then builds a new life with Mara.
* The Time Machine (2002), English is NOT the main language. It is a dead language taught to some people akin to Latin. Teachers and well-educated people are the only ones who know it.
* The Time Machine (2002) follow the time traveler around when he tried to change time to save his fiancée.
* The Time Machine (2002), human colonists decide to use nukes to produce caves inside the Moon for future habitation. But the explosions instead split the Moon apart and cause it to rain down in chunks on the Earth, making the planet nearly uninhabitable.
* The Time Machine (2002) in which case its preservation is somewhat understandable)
* The Time Machine (2002) moved the location of the story from London to New York because...no reason.
* The Time Machine (2002) (much to his discomfort) but we recognise as cycling clothes.
* The Time Machine (2002), Philby mentions that Alex is corresponding with a Swiss patent clerk named Einstein.
* The Time Machine (2002) played the AI interface for a computer system containing the remaining human knowledge. After the time traveler jumps forward several centuries, the AI still recognizes him from his last encounter, mere minutes ago from the traveler's perspective.
* The Time Machine (2002) repeatedly punches the Morlok leader in the face, only to have him laugh it off.
* The Time Machine (2002), the Morlocks have not only evolved to live underground and prey on the surface-dwelling Eloi, but also into at least two different castes, one of them the more muscular drones/warriors, and another one possessing greater cognitive abilities and psychic powers to control the other.
* The Time Machine (2002) the protagonist invents the machine so he could save his fiancée's life. So, since if not for her death he wouldn't have invented it, she has to die in every timeline in which he and his machine appear. Consequently, his successive failures to save her life put him in a quest to the future in search of answers, ending with him both saving the Eloi from his enslavement at the hands of the Morloks and finding a new place where he belongs.

* The Time Machine, a holographic AI librarian/computer called Vox works at the New York Public Library. Vox looks like a human and can answer any question you ask it.
* The Time Machine around when Wells wrote his story, though. Incidentally, that part of relativity — the use of 4 dimensional non-euclidean geometries to explain General Relativity — was co-developed by Bernhard Riemann.
* The Time Machine, as a result of lunar mining gone awry, the Moon shattered and ultimately formed an asteroid belt.
* The Time Machine as well. The Time Traveler theorizes that morlocks are the descendants of the working class, who over millennia of servitude and life tending to underground machinery have evolved into pale troglodytes who still keep the machines going out of instinct and habit, while the eloi are the descendants of the upper class, having been tuned into dull-minded and child-like organisms by millennia of indolence and lifestyles that required neither strength nor intelligence. An interesting result of this arrangement is that the workers ended up being the ones in control, with the brutish and bestial morlocks farming the otherwise helpless eloi like cattle. A brief visit even farther into the future (omitted in some editions of the text and restored in others) sees humans evolved into gray rabbit-like animals, preyed on by giant insects.
* "The Time Machine". At the end Blip the monkey tries to use the machine to go back 3 million years. Jace says that everyone was living in trees then and Jan suggests Blip was trying to find a girlfriend. Jan and Jace then laugh at Blip.
* The Time Machine, because a few authors had time machines before Wells.
* The Time Machine, books are so ancient by 802701 AD that they easily collapse into dust.
* The Time Machine Both the Eloi and Morlocks descend from humans. The Morlocks spend their lives underground, operating the machinery that lets the Eloi live lives of leisure. What do they get out of it? Cattle.
* The Time Machine gets partially thrown out of the time machine, hanging from Alex's neck. Alex then sends the machine forward, rapidly aging him to dust, similar to the Indiana Jones example above. This is even more strange, as this means he was basically hanging for centuries without trying to do anything about it. If anything, his hands should've been cut off the moment the machine began moving through time.
* The Time Machine has a cracked moon and debris field circling the Earth, the product of the man-made disaster that prompted the Morlock/Eloi Earth in this version.
* The Time Machine has the Eloi and Morlocks, two species descended from modern humanity as a result of society becoming heavily split between the workers and the elite. The elites, who spent their lives idling and enjoying themselves and did not lead lifestyles that required any physical or mental effort of them, eventually evolved into the Eloi, a species of child-sized, simple and unintelligent beings who spend their lives eating, resting and not doing anything much, and lack the mental capacity to strive for anything more. The working classes, who spent their lives tending to the underground machinery that kept civilization running for the benefit of the rich, became the apelike, cave-dwelling Morlocks, who instinctively still keep the machines running and provide for the descendants of their old masters, whom they now raise and eat like cattle.
* The Time Machine in the form of the talking rings that explain how a nuclear conflict created two separate species of humanoids.
* The Time Machine into the future to a point where Earth is implied to be dying and humanity is heavily implied to be gone completely.
* The Time Machine is told through a guest at the Time Traveller's party, who for all but the first two chapters and the final chapter is taking dictation from the Time Traveller.
* The Time Machine is triggered when humanity starts excavating more living space into the moon with nuclear weapons. When the hero uses the titular machine to go forward a few years, he finds himself in a dystopia and the fragments of the moon in the sky are getting bigger and bigger...
* The Time Machine-science and technology, focusing more on how humanity must

mature socially in step with its scientific progress.
* The Time Machine, the extinction of most of humanity, leading to the Eloi and Morlocks evolving, is caused by lunar colony construction causing the moon to break apart.
* The Time Machine, the hero saves and bonds with Weena, a member of the obviously quite promiscuous and beautiful Eloi race, and she follows him around. He finds her attractive and charming, but, as he says when narrating his story, "I didn't come here to find a wife" and that's it. He sleeps with her, completely innocently. He is not even sure if she is male or female.
* The Time Machine, the Time Traveler has encountered a race of people who are essentially humans that stop developing physically and mentally at age six. He has fallen in like with one of the womenfolk. "Weena I had resolved to bring with me to our own time." (Ch. 7)
* The Time Machine, the Time Traveller's description of the demeanor of the Eloi matches the DSM's criteria for inattentive ADHD.
* The Time Machine. This is partly because he's lost everything he values in his original time, and partly because he had to blow up the Time Machine to destroy the Morlocks.
* The Time Machine when he picks up one of the books and it crumbles to dust in his hands. He proceeds to get very upset that all of the knowledge of his day has been lost to time.
* The Time Meddler (offscreen). Her next actions are to lead the other villagers in fighting the Vikings in revenge for it.
* "The Time Meddler" reused the set of the Doctor's TARDIS for the Meddling Monk's. During the Pertwee era and again in the eighties, the Master's TARDIS used the Doctor's TARDIS set as well.
* The Time Meddler, the eponymous meddler claims to have done this. Though given what had already been shown in previous serials, he would have had to withdraw his money in a year when Earth was a post-apocalyptic wasteland ruled by the Daleks.
* "The Time Meddler": The Meddling Monk is not actually a monk, but a time traveller bent on altering Earth's history.
* The Time Meddler": The Meddling Monk was planning this, talking about how Shakespeare would get to write for the TV.
* The Time Meddler", the Monk is a Time Lord with a TARDIS of his own, whose plan is to blow up a fleet of invading Vikings with a nuclear bazooka. The Doctor sabotages the Monk's TARDIS, but the Monk still has the bazooka and its ammunition, so there's no reason why he can't still blow up the Vikings as he planned. In the novelisation a scene is added to fix the hole: The Doctor and his companions put the ammunition in the Monk's TARDIS before sabotaging it, rendering it inaccessible.
* "The Time Meddler": This how the Monk in sees his own actions: that by reversing the outcome of the Battle of Hastings, he would ensure that England gets a better king — Harold — than the one it actually got — William. The Doctor, however, is outraged by the sheer recklessness of this action.
* "The Time Meddler" when renegade Time Lord the Monk has his evil plan written out in a list on a poster on the wall.
* The Time Meddler") which doesn't make much sense if you haven't seen that too.
* "The Time Monster" and "Logopolis" demonstrate that when two TARDISes try to materialize in the same space, they somehow
* "The Time Monster") for detecting the Master's TARDIS which was calibrated in feet and miles... only they were Venusian feet and miles.
* The Time Monster") had people aging and de-aging without any negative side affects (besides being older).
* The Time Monster," is "Who isn't? The only difference is that I'm just a little more honest than the rest."
* "The Time Monster", researcher Stuart Hyde is aged to eighty when he is caught in the time dilation field of the Master's experiment. He is restored to his correct age when the field reverses itself.
* The Time Monster, we get to meet that hermit in person, and he helps the Doctor

again through a tricky regeneration.
* "The Time of Angels" adds something like this to the abilities of the Weeping Angels. "That which holds the image of an Angel becomes itself an Angel."
* The Time of Angels" also use P90s, although these have phony suppressors dummied on to increase their length. Interestingly, the suppressors resemble Dalek extermination beam projectors.
* "The Time of Angels": Amy believes her hand is stone thanks to the Angels getting inside her head, so it is stone. The Doctor bites her hand to snap her out of it.
* "The Time of Angels" and landing shortly." According to the Doctor, "It's the 51st Century. The Church has moved on."
* The Time of Angels" begins with River Song on a spaceship, then jumps ahead 12,000 years to when the Doctor finds her message for help.
* "The Time of Angels". Don't worry, the TARDIS has the capability to create an "air corridor".
* "The Time of Angels": Everybody but the Doctor, Amy, and River Song are dead by the end of it. Several of the clerics are even erased from time, remembered only by the TARDIS veterans.
* "The Time of Angels", in order to survive. This has the side effect of deactivating the ship's artificial gravity, causing the unprepared Angels to fall into the crack in time and be erased from existence.
* "The Time of Angels" inverts the trope, where the Doctor shoots out a gravity globe to give everyone the boost to be able to jump up and out of the Weeping Angels' clutches.
* "The Time of Angels", lay traps and steal voices as bait. And that's just the beginning...
* The Time of Angels", likely to avoid villain decay (since that's easy to undo with a TARDIS). The Doctor tried to explain this as an exception since they needed the body or soul to talk, but they go on doing it after creating "Angel Bob". Of course, sending people to the past is a way to feed, and they already get enough power from draining the ship's engines.
* "The Time of Angels" opens with a guard stumbling about in a daze thanks to being kissed with hallucinogenic lipstick.
* "The Time of Angels", she uses the term "spacey wacey" for one of the Doctor's technobabble explanations, although it isn't clear whether the phrase was originally hers or the Doctor's.
* "The Time of Angels", the Doctor likes to visit museums to keep score with their historians, and he is shown doing so by looking at museum displays saying "Wrong... wrong... wrong..."
* "The Time of Angels", the Doctor uses a pistol in order to shoot out a gravity globe to escape a horde of Weeping Angels bearing down on him and his allies from all directions.
* "The Time of Angels" they're in were from a culture where the population had two heads, but nobody notices for a while that all the "statues" have only one head each.
* "The Time of Angels": This happens to the Eleventh Doctor and River Song when he pulls her onto the TARDIS.
* "The Time of Angels", watch carefully when Eleven catches River Song: the Russell T. Davies-era TARDIS makes a brief cameo!
* "The Time of Angels": When River demonstrates she can pilot the TARDIS better than the Doctor can, and shows off some features he didn't know about, he insists that his method of piloting is better because it's more interesting.
* the time of Homer most of the Gospels and Epistles were composed in. For a speaker of Modern Greek, reading the late-Hellenistic Greek of the New Testament is more akin to a speaker of Modern English reading Chaucer than a speaker of Modern French reading Latin—it's archaic and difficult, but it can be done with liberal use of a dictionary. At that point, however, it's so difficult it's worth translating into the modern form.
* The Time of Myths: Ancient Myths (Bronze Age Greek, what-have-you) are not only real, they are mashed together into one time period.

* The Time of Myths: The often-vague period in the ancient past when gods, heroes and monsters walked, often with little emphasis on hard chronology.
* The Time of the Daleks": General Learman fears humanity is turning into this in the future.
* "The Time of the Doctor", as Smith had hurt his leg in real life just prior to the start of filming.
* "The Time of the Doctor", Clara gets the Doctor to pretend to be her boyfriend for Christmas dinner with her family.
* "The Time of the Doctor": Clara tries her best to stay composed while the Eleventh's reaching his very end, but when he begins regenerating, she breaks down into tears and begs him in a hushed voice to not change.
* "The Time of the Doctor" features a wooden Cyberman, created due to the Papal Mainframe constantly scanning for any technology that penetrated their shield around the planet.
* "The Time of the Doctor", giving him enough energy to destroy the attacking Daleks, thus saving the day.
* The Time of the Doctor hams it up against every Dalek attacking Trenzalore.
* The Time of the Doctor instead of the Doctor when it tries to kill him. The Doctor then admits to the burning wreckage that his screwdriver doesn't affect wood.
* The Time of the Doctor of the TARDIS, arriving 300 years after she left.
* "The Time of the Doctor", on the planet Trenzalore where he is destined to die, he tells some to Clara.
* "The Time of the Doctor", repeating the same gambit the Ninth Doctor did with Rose — tricking her into entering the TARDIS and sending her home and out of harm's way. She is heartbroken as a result, but fortunately an ally of the Doctor's is able to reunite them.
* "The Time of the Doctor": Tasha Lem wears stylized makeup, most prominently including a raccoon-like stripe across her eyes, that emphasizes how detached she seems.
* "The Time of the Doctor" that explains why the Kovarian sect of the Silence couldn't stop the Doctor. In particular, they mention the attempt to steal the TARDIS and blow it up, which actually opened the very crack in the universe that the Time Lords are using to relay their distress call, leading the Doctor to Trenzalore and causing the war to occur in the first place.
* The Time of the Doctor", the Doctor convinces the wooden Cyberman that he has converted its weapon into one of these. When the Cyberman reverses his gun, it winds up shooting itself in the chest.
* The Time of the Doctor", the Doctor tricks a wooden Cyberman to turn its flamethrower onto itself and fire. Torso hole happens.
* The Time of the Doctor", the Eleventh Doctor appears before Clara completely naked for a fun exchange.
* "The Time of the Doctor", when the Doctor complains about it — "How do you do that with your eyes? It's like they inflate."
* "The Time of the Doctor", where Tasha Lem berates the Doctor, telling him "I died screaming your name!" only to then realize that oh yeah, she died...
* the time of the episode, most of the bees have been wiped out by a colony collapse disorder, forcing humanity to rely on robotic replacements called Automated Drone Insects to do the bees' ecosystem services. The plot is about someone hacking these ADIs to great consequence.
* The Time of the Ghost has a scene where the Ghost tries to get through to her sisters while they're messing around with a Ouija board. She has trouble making the board say what she wants, partly because one of the living participants is surreptitiously steering it to say something else.
* The Time of The Great Giving (The kids are left for themselves to travel to the Mysterious Beyond to find a cure for a gravely-ill Grandpa Longneck).
* The Time Of The Transference from an alternate universe is found trussed up and gagged by some homeless winos, who mistake him for a chicken and eat him.
* The Time of Troubles were caused by some foolish gods that also were mortals

before (or so some in-universe people claim), Bane, Myrkul and Bhaal, at the time gods of Tyranny, Death and Murder, they became gods by first slaying some random god (or titan, this is unclear), then deciding they wanted more they sought to kill Jergal, until then god of a ton of things related to Death, Jergal was bored and tired and offered to become their assistant in return of the three splitting their duties, Bane took Tyranny hoping that he would lead the trio, Myrkul took Death because everybody (even gods) could die, so he would rule over all himself, and Bhaal decided then to take Murder because he would decide WHEN people die, so he would be above the other two. Eventually Bane and Myrkul caused the Times of Trouble by attempting to steal power from the AO, the "Overgod", that is maybe the only real god in the Forgotten Realms (AO was never mortal, can't be killed, is the creator of the universe or of the crystal sphere, depending if the Game Master is using only the Forgotten Realms canon or one where Planescape+Multiverse is also valid).
* The Time Of Yore" by Michail Uspensky the main hero, a slapdash bloke named Jihar, runs up to his neck in debts and finally pawns his very fame to a greedy merchant. Due to interference of dark magic, the due-bill has this power: nobody in the whole world recognises him anymore, all his heroic achievements are attributed to the merchant, and even the books written about Jihar are changed.
* The Time of Your Life, Blick, a bully with a badge, tends to beat up anybody who gets angry with him for intimidating other people.
* The Time of Your Life: Slice of life gathering at a San Francisco dive.
* The Time of Your Life wants to be a great comedian, but nobody laughs at his comic monologues.
* The Time Paradox: The theft of an endangered lemur → a conspiracy to achieve ultimate power.
* The Time Prophet's own age is unknown, but her memory stretches into the endless cycles of the universe, and she has personally lived from before Brunnis 1 was abandoned to at least the fall of Brunnis-2. It's hinted Vlad, being played by the same actress, is the Time Prophet herself still alive to the present day being tens of thousands of years old.
* The Time Raider of the "Twistaplot" series: "Oh, no! You're stuck in a time warp! (turn to page -number-, quick!)" *flip* "Nothing warps the human brain faster than a time warp. (turn to page -number-)" *flip back* "Oh, no! You're stuck in a time warp! ..."
* The timer has safeguards to ensure that our heroes always slide into open air over solid ground. When malfunctioning, it's been known to send them into a broom closet or in the middle of the ocean.
* The Time Ships about how he'd expected history to be like a room he could move through while it remained basically unchanged.
* The Time Ships, after leaving a colony of humans in the Palaeocene era and returning to his own time the Time Traveller finds that not only is the Earth abandoned but there are very few stars in the sky. Nebogipfel concludes that the descendants of the people they left behind have spread across the galaxy and built Dyson spheres around the majority of stars.
* The Time Ships, a soldier who mentions that he briefly played professional football before the war put an end to the league.
* The Time Ships by Stephen Baxter features an extreme singularity. A Victorian inventor of a time machine changes history, thereby giving rise to a hyperintelligent race that travel back in time to the big bang. They edit the big bang to give rise to an infinity of universes containing ever grander versions of themselves.
* The Time Ships, the Time Traveler is referred to as "George". However, the time machine's date indicator plate clearly reads "Manufactured by H. George Wells" meaning the Time Traveller's name is... H. G. Wells.''
* The Time Ships: The Time Traveler's second trip into the future sends him into a history where the Morlocks built an immense sphere around the sun, living in the near limitless — and, importantly for them, almost entirely dark — space within its thickness, while ancestral-type humans live within the sunlit

interior.
* The Time Ships, was published to coincide with the 100th anniversary of the first book (1895/1995).
* The Times of Harvey Milk: This documentary recounts among other things the fight against the Briggs Initiative, a 1978 effort in California to ban homosexuals from jobs as public schoolteachers. As one of Harvey's friends points out in an interview, it was cleverly designed to play on nebulous fears of child molesters attacking schoolchildren, in order to deprive gays of their civil rights.
* The Times of London website has a UK News tab, containing such topics as Media News, Crime, Law, and Scotland.
* The "Time Spiral" crisis was an attempt to keep the entire plane from folding in on itself in the wake of these and various other huge magical events — an apocalypse caused by having too many apocalypses, and this doesn't count near-apocalypses like the end of the Thran War. It's a wonder the old rock's still holding together.
* The Times Square bomber would later state "I've been doing comedy for 25 years and I have NEVER been that funny!"
* the Times Square Jumbotron, the Statue of Liberty ("The small one, from Las Vegas"), and the Eiffel Tower ("Also from Vegas").
* The Times They Are a Changeling", Spike harbors a defector changeling named Thorax while the Crystal Empire is looking for him. When confronted, Spike gives Thorax, using the guise of a random crystal pony, the identity of his new friend by the name of... Crystal Hoof. Everyone buys it. So much so that, when Thorax's identity is revealed, everyone believes that the changeling disguised himself as Crystal Hoof and a search for the missing, fictional pony is called.
* The Times They Are A-Changin': "With God On Our Side" criticizes the American government and army for their genocide on the Native American during the 19th century and the bloodshed during the American Civil War and Spanish-American War. It also criticizes the Red Scare and the nuclear arms race. From the same album "Only A Pawn In Their Game" and "The Lonesome Death Of Hattie Carroll" are both inspired by real-life injustices in the USA, namely a hotel barmaid getting struck down by a wealthy white man in a hotel in Maryland and the murder of black civil rights activist Medgar Evers.
* The "Time Stop" spell stops time within a limited area. When it ends, the creatures inside have no idea any time has passed and continue acting as they were before.
* The time taken for messages to reach to the other recipient is practically the entire point of
* The time that Joey and Rachel live together also qualifies, although
* The time the Go siblings walk into Electronique's trap, it comes across more as simple obliviousness:
* The time the group has to travel back to WWII to stop Vandal Savage from
* The Time: They had two top 20 hits: the #20 "Jungle Love" from 1984 and their 1990 reunion single "Jerk-Out", which hit #9. Ironically, the former is today by far the better-remembered of the two despite peaking much lower on the charts.
* The time they set the record speed for a car indoors also counts. To their own surprise, it wasn't all that high in the first place.
* The Time Traders — if, for instance, you used up your fuel — is another matter.
* The Time Traders, Ross Murdock fell into one (in a crashed alien ship) while dying of exposure to Arctic conditions. The lifeboat's automatic systems recognized him as an injured intelligent lifeform and tucked him into a bunk full of some sort of healing goo; he came out some hours later feeling fine.
* The Time Traders series, there's speculation that the alien "Baldies" are this — at one point, the heroes wonder whether a video they found is the record of an actual case or the equivalent of a television "cop show."
* The Time Traders, the prehistoric tribe is set to cremate their chief with great honor. Too great: they intend to kill Ross Murdock on it as a sacrifice.
* The time travel accident that strands the player in the future was just another

one of Dexter's experiments ruined by Dee Dee in the original.
* The time travelers also whistle Beatles tunes as a way to recognize each other.
* The Time Travelers being reshown in blipvert mode, repeating over and over and getting faster each time...
* "The Time Traveler's Pig" after the twins set him free and got him his job back out of remorse for inadvertently ruining his life in the first place.
* The Time Traveler's Pig"; the events of which explain why he was in the previous episodes.
* The Time Travelers points out that the four time travelers cannot be brought on to the rocket to Alpha Centauri because the number of passengers has been precisely established. Adding four extra people would require extra air and provisions, which would reduce the amount fuel they could carry, which would cause them to miss their rendezvous with the planet. The time travelers will have to remain on Earth and either find a way to survive in the caves or attempt to rebuild their time portal.
* The Time Traveler's Wife, because when you end up being dropped naked into unexpected situations, odds are you're going to have to steal clothes and beat up on anyone who decides to come after you when you're in a vulnerable state.
* The Time Traveler's Wife compressed a 300-page book into a movie a little over an hour and a half long, removing some of the characters' stories and dropping others altogether.
* The Time Traveler's Wife: Girl meets boy for the first time when she's a small child and he's middle-aged. Boy meets girl for the first time when they're both in their twenties.
* The Time Traveler's Wife given a scientific (if somewhat unusual) explanation without resorting to the supernatural, but best-case scenario is for it to occasionally be labelled as fantasy.
* The Time Traveler's Wife: Henry believes this is one of the reasons his father dislikes him, as he survived the car crash that killed his mother.
* The Time Traveler's Wife, Henry, Claire, Charisse and Gomez play a game called "Modern Capitalist Mind-Fuck", which seems to have rules based more closely on a stock exchange than Monopoly, despite the fact it use a regular Monopoly board and properties. Watching them play is one of the funniest scenes in the novel.
* The Time Traveler's Wife, Henry's time travel works like this. Under stress or seemingly just randomly he'll teleport to a random place in time and space, though the range is normally within his, his wife's, and his daughter's lifetimes. It does eventually go very badly wrong.
* The Time Traveler's Wife main character who suffers from spontaneous time travel. His daughter does indeed inherit the trait, but she also has a good deal of control over the ability.
* The Time Traveler's Wife over 50 times without being able to prevent it. The story doesn't delve into what would happen if any of the characters ever did try to change their fate - they simply accepted the fact that they couldn't.
* The Time Traveler's Wife, reluctant time-traveler Henry keeps running into versions of himself in the past, present, and future. Can be shocking, funny, sexy, or tragic, depending entirely on the circumstances.
* The Time Traveler's Wife. The time travel is involuntary, and resulted in the couple first meeting when said wife was a child.
* The Time Traveler's Wife; this is how Clare discovers Henry's intention to get a vasectomy.
* The Time Traveler's Wife time travel out of the womb on several occasions. This is extremely messy and disturbing.
* The Time Travelers Wife version of him is officially married as well.
* The Time Traveler's Wife was when he was involved in a car accident. If he hadn't time traveled, he would have been killed.
* The Time Traveler's Wife, when a fellow librarian tells Henry that his boss wants to see him, and that the boss "looks like he wants to rebind The Chronicles of Nawat Wuzeer Hyderabed."
* The Time Traveler's Wife when he (involuntarily) time travels, including clothes, this happens to him on a regular basis.

* The time traveler who tried to sell them 4 (fake) high tech gems on the 4th of July.
* The time-traveling Nah'kul also had these weapons, having provided them to the Nazis in an alternate timeline. The German military mounted these weapons on their fighter planes.
* The time-traveling villain Eobard Thawne a.k.a. Professor Zoom/Reverse Flash has learned to weaponize this, frequently erasing people from both history either for his own benefit or to make Barry Allen suffer.
* The Time Traveller's Dilemma: Changing the past raises moral dilemmas.
* The Time Travellers, the eponymous characters are known only by their nicknames, "Professor" and "Ace". Toward the end of the series, Ace decides to start going by her real name, which is revealed to be Alice.
* The time travel plots start with the future automatically assuming that Kyon will help. Of course, they're from the future,
* The time Troy married Selma to resurrect his career in light of rumors of his fish-related "sexual abnormality".
* The Time Tunnel episode "End of the World". After a Time Tunnel technician suffers a heart attack, Ann uses some ripped out electrical cables to shock his heart into beating again.
* The Time Tunnel episode "Visitors from Beyond the Stars". Space aliens come to the Earth in 1885 to steal all food supplies. When the aliens enter a town, they order the human inhabitants to gather all livestock within 10 Earth miles of the town.
* the Time Tunnelers extract him from the Take-Five Bomb field... and then all express disappointment at Gil's issuance of Othar's turtleneck.
* The Time Tunnel had aliens trying to steal all the oxygen from Earth for their own world.
* The Time Tunnel had an underground, multistory complex, manned by two scientists and a general.
* The Time Tunnel has a special particle accelerator erupting to create "time quakes" that affect history and a team has to go into the past to correct them. One agent wants to save a young soldier in World War I, arguing "how much difference does saving one kid make?" His scientist partner snaps that she knows it can because she was by the device when it blew so she was protected from any time alterations. However, when she got back to the surface and went home, she discovered that instead of being from a family of six siblings, she was now an only child. She notes that it's much worse than if her brothers and sisters (not to mention their various kids) had all died because at least then, she'd have photos and videos of them to remember. Instead, she's the only person who knows they existed and her own parents have no concept of the great large family they lost.
* The Time Tunnel has its heroes being randomly transported to various points in the past and, on occasion, the future.
* The Time Tunnel. In addition to sending items and living beings through time, the scientists controlling the eponymous device could also use it as a time viewer to see the past and the future.
* The Time Tunnel the second one, a few years later, didn't even get that far.
* The Time Tunnel, Tony falls in love with Sarit, who is administering medical care to him when recovering from an experience on the rack.
* The Time Tunnel was used to explain why they were wearing the same clothes every time.
* the time vortex, the Doctor remembers the omnicidal Shakri from a kid's tale and Amy calls them a "seriously weird bedtime story."
* The Time War appears to work in a fashion like this, although it's never properly explained; at the beginning of
* The Time Warp Eight is a heroic Subversion. Although it's a combination of Team AHO and the Idol Chojin, the gang splits up into tag teams and goes their separate ways almost immediately on going to the past.
* The Time Warrior", Linx the Sontaran plans to give a medieval warlord firearms.
* "The Time Warrior". So, the kitchen staff got out of Irongron's castle before it

exploded...right?
* The Time War was not a positive influence on the Time Lords' disposition. They became so unpleasant and genocidal that the Doctor had to basically turn all of Gallifrey into a
* The Time War was secret because the species fighting it were so far advanced that the rest of the universe couldn't perceive it.
* the time we see his neural connection severed to something she doesn't. Averted with the manual controls on the command deck, which feature a conventional joystick and displays for use by humanoid crew.
* The time when he took on the entire roomful of Sapphire Guard makes this even more apparent. He starts out by tossing a super bouncy ball at them, which was inscribed with a Symbol of Insanity that made them kill each other. Xykon got a whole lot less funny all of a sudden. He even commented that he could've just kept to the air and blast all of them. The only reason he had the Sapphire Guard kill each other was because he thought it would be "going the extra mile".
* The time when Lois found out that Peter had just brutally beaten up Chris' bully.
* the time when Piro's conscience comments on his attempts to explain Ping's behavior.
* The time where all of Human life on Earth was rendered unable to move for several days. Part of the initial problem was shown, where Octus walks down a street and passes a few crashed planes and helicopters.
* The Timid Soul. His name went into the dictionary as a word for this trope.
* The timing windows for slide notes are a little wider than for tap notes.
* The timing windows in both games in general are fairly harsh by typical
* The "Timmy" demographic, who is so powerful she can't even be summoned by normal means.
* The Tim Tang Test, the hardest puzzle in the world (no-one has ever solved it!) has a chat box at the bottom of each level that lets you talk to anyone else taking the test. Almost every single day, Tim himself is on the chat box and is available to talk about anything.
* The Tim Tebow CFL Chronicles already). It's boring to already know everything, so they've all become sports fans—because athletic competitions are the only remaining unknowns.
* The Tim Tebow CFL Chronicles, and they've been secretly sharing their knowledge with the outside world, bit by bit.
* The Tim Tebow CFL Chronicles Canadian Football is this. Scoring a touchdown triggers bound-for-street play, where everything is inbounds and there's no end zone, and the only goal is to drive forward as far as possible (or for the defense to get the ball back into the stadium). Other teams can intervene in bound-for-street games. The football itself has a telescoping tail, and in "jav-out" configuration it can be used as a weapon, even during normal stadium play. (It doesn't help that the viewpoint character has zero prep time, and is learning the rules of Canadian football as he plays.)
* The Tim Tebow CFL Chronicles is narrated by Tim Tebow. So if he doesn't know the name of an opponent, then his narrative just refers to them by their team's name: "REDBLACK" or "Other REDBLACK" or "Schooner".
* The Tim Tebow CFL Chronicles—the romantic comedy with a twist, starring Will Smith! Now available on DVD!
* The Tim Tebow CFL Chronicles—while every other team can't do anything but wait.
* The Tim Tebow CFL Chronicles: Surreal web novel in which an alternate-history version of Tim Tebow joins the CFL, breaks records, and breaks the game itself.
* The Tim Tebow CFL Chronicles, Tebow dreams about Troy Smith, leading a massive army of Montreal Alouettes to hunt him, several months before Troy appears in person. He also dreams about Greenland City before eventually seeing it.
* The Tim Tebow CFL Chronicles, Tebow outright calls the Atlantic Schooners "worthy opponents" since they came closer than any other team to stopping the Argonauts' drive.

* The Tim Tebow CFL Chronicles. Tebow reads a Bible story to his teammates, and they're surprised when taking a dump turns out to be a major plot point.
* The Tim Tebow CFL Chronicles. When the Argonauts trick the REDBLACKS into getting stranded inside Manicougan Crater, the REDBLACKS unknowingly give their opponents a several-day lead before they realize what happened. At that point, the REDBLACKS decide enough is enough, forfeit the game, and go home.
* The Timurid Liberation Front, a rebel army in the Soviets' Central Asian territories who rise up during WWIII in reaction to repression and being used as
* the Timurids, well, winning in open battles is possible, but it requires locking down their archers. And cavalry. Lots and lots of cavalry.
* The Tinder Box: The Queen attaches a leaking bag of flour to the Princess, to catch the soldier who sends for her in the night.
* The Tinder Box, the Queen finds out how the Princess has been leaving the palace each night by tying a bag of flour to her that has a hole in it. They follow the trail to the soldier's house.
* The Tin Drum was banned in Ontario due to their film board deeming it child pornography.
* The Tin Drum who remained a child out of his own free will. Once he had enough, he underwent the same process to reverse it. His years caught up to him immediately, although he was in his twenties at the time so it wasn't as dramatic as other examples here.
* The Tinkerer, who was likewise decrepitly old, though in his first appearance, this was a (later retconned) disguise to hide the fact that he was an alien.
* The Tinker's ultimate transforms him into a robot with the Demolish ability, which gives him triple damage against buildings.
* The Tin Man lost all his body parts one by one. They were replaced by metal so he could survive long enough to see his love again. By the time he was whole, she had already fallen in love with a man made out of the Tin Man's lost body parts.
* The Tin Man's books have featured the eponymous armours. They are noted as being resistant to bullets and eventually having limited jumpjet capability and railguns, but vulnerable to knives and missiles.
* The Tin Princess is a Ruritanian romance that takes place in the fictitious little kingdom of Razkavia (near Germany).
* The tiny alien humanoids of the worldship Rheton in the early '60s B-Movie
* The tiny, arrogant and insane Helmacrons, with their shrink ray. It surprises everyone everyone just how competent they are - they manage to track down the Animorphs in a few hours, something the Yeerks don't manage in the entire series.
* The tiny Spider-Ham who may be strongest character in the movie with his
* The Tiny Tina DLC has a sidequest where you must defeat Prince Jeffrey, a very thinly-veiled parody of
* The tiny unseen Western nation of Brac is mostly known for its soldiers and mercenaries, consisting of phalanxes and peltasts (although peltasts tend to be women). As a society, they value knowledge and quest for the cosmic truth. Ancient Athens springs to mind.
* The Tippyverse is a hypothetical setting that came into being when the implications of the large-scale, long-distance teleportation was considered. The premise is based on the use of the 9th level spell "Teleportation Circle" which allows for quick and efficient trade between cities, safe travel that does not risk being attacked by monsters, and devastating military strikes. This leads to the centralisation of population in major cities, and the all but abandonment of other areas (as it was deemed impossible to effectively defend settlements against mass strikes from enemy nations using Teleportation magic). To solve the problems of providing the necessary food and water, magical "Create Food and Water" traps were created to feed the populations of these cities. Other magical traps (such as "Wish" traps that create 25,000gp every time they are activated) are created to smooth the running of these cities. High-level Wizards have control, as they're the ones with the capability to create these items, and have enough power to ensure they stay at the top.
* The "Tips for Traitors" section, when discussing how to manipulate the marching

order for tactical advantage, includes a warning to
* the tire marks on the pavement behind Beat. What do those look like?
* The tirin in Baravada, except that they're almost as mean and annoying as the skahs, and occasionally nearly as dangerous, as George can attest during his quickie with Ma'ar. They're also happier and far more content with their lot. One of the minor advantages the four have is that they are classified as outworlder tirin and are expected to behave as such, when they actually fit into neither category and thus do unexpected things. The best Grunnel can describe them is “They're not skahs, but they're not tirin either.”
* The titan Atlas. After getting Heracles to take over holding up the sky (heavens) for him while Atlas did him a favor, Atlas decides not to take it back as he likes his freedom. Heracles admits defeat then asks for Atlas to take the sky back long enough for Heracles to put his lion skin on his shoulders as a pad. Atlas agrees, and Heracles walks away. This was the guy the other Titans picked to lead them against the Olympians after Cronus fell out of favor with the rest of them. No wonder they lost. Averted in an alternate version of the myth, in which Heracles and Atlas simply came to a mutually beneficial arrangement in which Atlas did the favor and Heracles built the
* The titan beetle is present in the game even though it cannot yet be bred in captivity.
* The titaness Tethys is often confused with Thetis, the mother of Achilles, who is her granddaughter.
* the Titanic? At least when the Titanic went down, the lights were on."
* The Titan of Death, Thanos, was once defeated by Squirrel Girl... or, at least, a copy of him as he claims. After it's pointed out that beating a perfect, exacting copy of him is no different than beating him for real, Thanos visibly pales and leaves.
* The Titans added the Atlantean civilization, which worships the pre-Olympian Greek Titans Kronos, Oranos and Gaia.
* The Titans are a pantheon of extremely powerful cosmic beings that were formed at the dawn of the universe. While they're not responsible for all life in the universe, they've created or guided their fair share, including ultimately being responsible for most of the playable races. However, they're generally depicted as metallic giants and they create mechanical servants and futuristic tech. They're referred to with god-like titles, such as creators or makers, on top of the term titan, but rarely the actual word god.
* The Titan's Curse in time for her to attend the annual conference of the gods (held on the winter solstice), so she can push for the gods to prepare for war against the Titans.
* The Titan's Curse to whatever the viewer finds most beautiful; to Percy, she looks like a mix between Annabeth and a TV actress whom he used to have a crush on.
* The titans deserve special mention. Near the beginning of the second game:
* The Titans East manage to produce some hammerspace popcorn for Control Freak's rant in
* The titan set Axonn had an unmodified canister set body and individual fingers made from Matoran limbs. His short body, which looked like a Toa with more ornate armor, cartoonishly huge feet, and equally big
* The TITANs had their own projects along these lines, which gave us the Ny'knikiin, captured and mutilated "pod" morphs (essentially a synthmorph/biomorph mix) inhabited by the minds of uplifted mantis shrimp. Unlike uplifted animals that are part of transhumanity, Ny'knikiin are
* The Titans Strike Back) to turn his sword into a holy vacuum cleaner, which sucks her up and kills her.
* The Titans. Swinging around, slicing their limbs off one by one until they're on the ground and helpless before finishing them off feels so good...
* The Titans were locked inside Tartarus, a dank, gloomy prison "as far beneath Hades as heaven is high above the Earth", where they were guarded by their siblings the Hecatonchires.
* the Titan wouldn't have been recoverable, and the guy who could find and

activate it would never have gone looking for it in the first place.
* The Titfield Thunderbolt happen offscreen. This is due in no small part to the locos in question being actual operating engines that were borrowed for the production, so no risk of actual damage could be permitted.
* The Titfield Thunderbolt is based around this trope. In order to run a private railway line, the villagers have to demonstrate their service to an inspector. On the day of the inspection, their only working engine is out of commission, so they have to get the antique locomotive of the title literally out of the museum to haul the train. It should be noted that the Lion, the engine that played the part of the Titfield Thunderbolt for the film was over 100 years old at the time the film was produced. A literal museum piece. There are also problems with the museum piece replacement, and they end up pushing the train with a team of volunteers for a while. This all turns out for the best when the inspector reveals that if the train had been any faster, it would have been failed for being too fast for the classification they need.
* The Titfield Thunderbolt of the trope when two separate scenes (the antagonists punching holes in the water cistern for the train and a local poacher-turned-engine driver bagging a pheasant) are cut to make it look like one of these is going on.
* , the title actually refers to the alien character in the book (which involves Earth becoming a backwater world between two empires who are at war), since the book is set within Earth's gravity well. That is, it is Earth's sky that is alien.
* The title aliens have near-infrared vision. This is depicted onscreen by coloring what they see based on the temperature of objects: black = cold, white = hot, and other colors in between. The first movie shows that their helmet visor filters some of the ambient heat to better focus on warm preys.
* The title character (a 16 year old in a 7 years old body) with a lot of characters: all the police officers, several FBI members (mostly Akai and Jodie), the detective children, Dr Agasa... In universe, several characters think he has this kind of relationship with Heiji Hattori (who is really of his same age).
* The title character accuses Cameron of pitying rather than loving, and it's implied that it was the reason for her attraction to her husband (who was dying of cancer) and to House himself.
* The title character and Voldemort. Their souls are connected, they share each other's dreams, memories and thoughts, Voldemort sometimes gets into Harry's head as a whispering voice of temptation, Voldemort's described as a very charismatic and seductive figure (who used to be physically dashing, before
* The title character. At first glance, it's understandable—after being arrested on a trumped-up charge and sent to a prison/labor camp in Australia for fifteen years, Todd (a.k.a. Benjamin Barker) finally escapes and only desires to get revenge on Judge Turpin and Beadle Bamford, the two men who organized his destruction so they could help themselves to his wife (who they raped and drove to suicide
* The title character begins dating his college sweetheart, Jill, who walks in on him and Sarah showering (they were trying to get a "poisonous" powder off of their bodies. It turned out to be Hi-C mix). He explains the situation and she is all-too-willing to believe him. This might have had something to do with the fact that
* the title character, but justified in the fact that there actually is a cameraman for the Joker to Aside Glance at, and that the Joker already has Medium Awareness and regularly breaks the fourth wall in the comics. One of the funnier uses:
* The title character can't pull off Sage Mode without risking transforming into a frog; requiring frog oil from a mountain a month away from home; a reverse summoning to send his clones home to help in a timely manner; and he only prepared a limited number of clones to refill his powers with, for reasons probably related to lack of infinite summoning; he also needs to be motionless to get natural energy (clone)
* the title character covering her face but showing everything else has a few instances:
* The title character does this to a sleazy stalker in the opening scene of
* The title character, Duncan MacLeod, being 400 years old has plenty of history

to get involved in, but he goes out of his way to involve himself in events relating to Scottish nationalism. He was a soldier in
* The title character, frequently. She has a habit of going up against
* The title character has done so many weird heists that when someone
* The Title character has only the best of intentions when he buys Sunny Funny's birthday cake, so his self-important rival loses no time in tripping him while he carries it home. To add insult to injury, Parappa somehow manages to drop the cake safely face-up...and then land face-down in it.
* The title character has three attacks that are basically a magical Wave Motion Gun, the first being "Divine Buster", the second being "Excelion Buster", and the third being the
* The title character has trouble activating, and controlling, his powers. He is a child as well as being part human, though, and controlling his powers is suggested to be something he can learn.
* The title character has Yanda, whom she instantly hates with a hatey five-year-old hate, but other characters merely find annoying. It doesn't help that Yanda takes a
* The title character himself could also count. Once intended to be just another skit for Daneboe's channel, the video became a viral hit. He eventually got popular enough to get sequel videos and gain his own channel,
* The title character himself counts, considering he spends much of the series as a
* The title character himself. If there are buildings to be broken into or criminals to be confronted, expect Maddie/Carla/Joey to do it. Jonathan hangs back, watching what's going on and deducing the truth from what happens.
* The title character in "James Baxter the Horse" moves more fluidly than the other characters. He was animated by the real James Baxter, a former Disney animator (see
* The title character in Robert F. Young's "Peeping Tommy" was a time-traveler who happened to be
* The title character in the episode "Deathwalker" was yet another case of this. Her species, the Dilgar, invaded multiple other races in a war a few decades ago, during which she was apparently the alien equivalent of Dr. Mengele. However, the Dilgar were defeated and driven back to their own planet. Their star went supernova, wiping out the Dilgar on their home planet. She claims that the other races earned the
* The title character in the Irish ballad "The Highwayman" is described carrying a rapier and a couple of pistols.
* The title character in "The Merchant of Forgetfulness", Mumbaijumbo, sells Iznogoud a perfume which, when sniffed, causes instant and total amnesia in the victim. Iznogoud sprinkles it on the Caliph's flowers and food and finally puts it in an atomiser, but they are all sniffed by other people before the Caliph can get to them, and inevitably, the final victim is Iznogoud himself, who is left an empty shell.
* the title character. (In this case, "to prevent an overload" doesn't cut it)
* The title character in "Valerie 23" was a fembot who was specifically designed and created to be a companion for disabled shut-ins or people working in isolated conditions. So why was it built with lethal superhuman strength and a severe lack of impulse control? Worse, after the episode in which this gynoid went dangerously wrong, the series did several other episodes about other androids from the same company going dangerously awry in other ways.
* The title character in W.S. Gilbert's 1866 poem "King Borria Bungalee Boo".
* The title character is a greatly wronged, yet scheming and vengeful
* The title character is an avalanche of Genki Girlness who drags everyone nearby along with her. This is expressly stated in the audio drama's main song "First Goodbye", which is, in-canon, written by Haruhi herself (and just as autobiographical as "Lost My Music") with the line "Igai to genki!"
* The title character is an orphan because his parents were killed by an evil wizard with a magical curse. To make matters worse, he gets sent to live with

unloving relatives because they're his closest living family and it's the only way to maintain the protective spell created by his mother's
* The title character is a parody of Wernher von Braun, the ex-Nazi scientist who worked for NASA. Ex-Nazi scientists were also a stock character in the 50s.
* The title character is excruciatingly conspicuous in his absence from the main plot. Until...
* The title character is frozen into a block of ice by Cumulus. A few seconds later he uses his solar power to melt himself out, none the worse for wear.
* The title character is one, a serial killer whose homicidal tendency was channeled by an adoptive father so he only kills
* The title character is the legitimate Rajah of Lake Kini Balu, who lost his throne, his father and entire family due a British-supported rebellion. After barely surviving he assembled a pirate crew and brought it to Mompracem, quickly becoming
* the title character. Its small size and big blue eyes definitely make it the cutest thing in the movie.
* The title character kills every human being on Earth It's still pretty gloomy, though.
* The title character Kirby himself. It isn't difficult to capture his imagination: he's a
* . The title character, Magic McAllister, doesn't like living in a fantasy world. Naturally, everyone else thinks it's cool.
* The title character managed to combine two of her chief preoccupations in this threat:
* The title character manages one on Master Shifu at one point, after being told
* The title character may be a criminal mastermind, but he'll do anything — including giving up half of his loot or traveling to the past to save an extinct species — to make his mother Angeline healthy and happy again.
* The title character mentions this by name at the tail (sorry) end of
* The title character, most of his fights are won through pure observation and intelligence.
* The title character of "My Name Is Eugene" by Crazy Joe & the Variable Speed Band.
* The title character of "Ocean Gypsy" by Renaissance, after being dumped.
* The title character of "Plankton!" introduces SpongeBob to "my lab". Cut to live-action footage of a labrador retriever.
* The title character often gives commentary on the church ladies' more and more extravagant (and silly) hats.
* The title character of "Thatta Boy", who gets the short end of the stick when his
* The title character of "The Tantrum", who uses crime-fighting as an outlet for his frustration at not getting what he wants.
* The title character once (May 9, 1980) declared his intention to go into the business of "black-market kittens", complete with a trenchcoat with Nermal hanging inside.
* The title character once witnessed a man attempting this by crashing his car and faking a back injury. However, Encyclopedia notices that the tires on the man's "brand new" car are worn out, indicating he sold them before doing the deed.
* The title character out for revenge on Thulsa Doom for... well, let's just let
* The title characters are all young girls who have psychological issues, and were trained to be ruthless assassins. They are all paired with a male "handler", who is responsible for the girls' training and well-being, and is free to use whatever method he likes.
* The title characters are driving cattle through a mall, and everyone (including every last bovine) stops at the food court to eat something before resuming. Yes, this even interrupts a musical number.
* The title characters, as well as their friends, were originally supposed to be nine years (as mentioned in the pilot), but when the creators saw how well various age groups responded to them they decided they were simply "less than fifteen" (in

other words, younger than Candace). It's hard to get any clearer an example from how they act: Phineas is a
* The title character's attempt to exorcise Mammon from Angela Dodson. It doesn't work.
* The title character's code name is the less-than-manly "Duchess". His spy-boss mother claims it was randomly generated, and the fact it was also the name of her beloved dog is
* The title characters have been racking their brains trying to figure out where the "Galaxy" is. Their only hint is that they were told it's "on Orion's Belt" by a dying alien
* The title character shows her parents her school picture, which depicts her looking as dour and unsmiling as usual. Her father comments "Wow, that's... sharp focus!"
* The title characters in the Julia Donaldson and Axel Schiffer picture book
* The title character's metal hand is more recognizable today than that of Rotwang in
* The title character's name plays with this trope. Donkey Kong is an ape, not a donkey. The Japanese creator
* The title characters occasionally find themselves in this position, but being a pair of
* The title characters spent an episode taking care of an eagle chick named Baby Earl. Baby Earl's mama had decided to nest right on the edge of a cliff, and Baby Earl himself decided he wanted to try "flying the coop"...literally. This was not helped by the fact that the only reason Timon and Pumbaa were stuck looking after the kid was because
* The title character started out using this for interrogation. He currently uses realistic
* The title character starts as a rather pitiable wizard trying to work his way out of professional disgrace. Several books and a pile of supernatural bodies later, he suddenly finds his opponents backing down or outright fleeing rather than face him, and is several times rather abruptly reminded of what he looks like from his enemies' point of view. The books are narrated in the first person so we never get to see it, but it's discussed several times.
* The title characters use Candace's cell phone in prehistoric times and on Mars. Candace lampshades this in "Unfair Science Fair Redux" by asking "How is it we have bars here?" on
* The title character, though she may be something of an inversion — it's pretty well established that Daria is naturally attractive and dresses down to avoid attention, so it's not too clear if the glasses work for her or against her. For her - in that they keep male attention off her. This is such a truism to the character that on the show's Wiki,
* The title character towards Roxanne since before the events of the film, as confirmed by the filmmakers' commentary. Neither of them realize until he
* The title character was revealed to be the infamous "Person from Porlock" who disrupted "Kubla Khan", because if completed the poem would've caused the end of the world.
* The title character was told he was much too short and his costume could never be confused for the "real Darkwing Duck" when attending a costume party with his neighbors. It's always been established that they aren't too bright.
* the title character, who passes away shortly after the film's climax and is welcomed in the afterlife by the dead family members.
* The title character writes a poem, and Dogbert says something along the lines of "You know, an infinite number of monkeys in an infinite amount of time could type out the complete works of Shakespeare. Your poem? Three monkeys, ten minutes."
* The title character Zorgat does this in "Ruler of the Rock Robots".
* The title comes from "to send someone to Coventry", a British idiom meaning to ostracize someone, usually by not talking to them. To be sent to Coventry is to be regarded as absent.
* The title event is a 12-hour period with all laws suspended, and the intent

behind it is to both get rid of the undesirable parts of society and
* The title for the "Unused Content" series, which is jokingly referred to as "creatively named", is stating the obvious: a series about unused content in games.
* The title hit this again in the mid-'00s after the disaster of his unmasking in
* The title is Latin for "From/out of the machine." It is also from the phrase "
* The title itself is an example. It is possible to predict the ending. Word for word, it translates to "New Beginning Gospel", or it can be re-arranged slightly to become "Gospel of the New Beginning".
* The title made more sense for the early version of the characters that appear in the
* The title magician is amusingly enough brought up one more time after its introduction, a character that doesn't know any better refers to Archchancellor Mustrum Ridcully as one. For his part Ridcully can barely contain his disgust at being referred to as such.
* The title object in "The Magic Calendar" transports Iznogoud forward through time when he tears off pages; he tears off too many and ends up in Tabary's studio in the 20th century.
* The title of Al Franken's book, "Lies (And the Lying Liars Who Tell Them)"
* The title of "All I Want for Christmas is You" turned into "All I Want for Christmas is Your Baby". Does the singer (who's a duck, we might add) want to kidnap someone's baby, or have kids with them?
* The title of a Professor Frink-centric Valentines Day episode is one of these. "
* The title of a song by the Awkward Romance: "Judas Called, He Wants His Sense of Loyalty Back".
* The title of largest military machine even suggested, seems to be awarded to the "Oboy" - the "fortress-destroying machine", suggested by (very patriotic, but not exactly very practical) Russian engineer Smishin during First World War. The "Oboy" was essentially an enormous metal egg, about 650 meters (2000 ft) in height, and almost a kilometer wide, made of thick armor plates and driven by internal eccentric flywheel, rotated by equally enormous steam engines. The whole contraption was supposed to crush the enemy troops and fortresses by just running them over. The project was dismissed by military as being completely fantastical.
* The title of PDQ Bach's "Grand Serenade for an Awful Lot of Winds and Percussion".
* the [title of show] show, the cast ask Mindy why she didn't tell them Cheyenne Jackson shot her (they had been trying to catch her killer in front of her the whole episode). She replies with this.
* The title of The Devil Makes Three's "Old Number 7" refers to Jack Daniel's whiskey. The song is about an alcoholic who drinks a lot of it.
* the title of the show was the first series to be cut down to 32 episodes instead of 40, so the fact that they chose to devote time to extraneous characters and not the rangers stands out all the more.
* The title of "Would You Prefer to be Suddenly 30 or 17'd again?" used
* The title panel of the August 1, 1993 strip shows Garfield's fur put on a clothes hanger as if it were a suit.
* The title panel of the June 22, 1986 strip has Garfield open the fridge to find a green blob with eyes and ask if the creature is the bologna or the pimento loaf.
* The title panel of the November 7, 2004 strip shows the door to Garfield's dressing room opening to show Garfield powdering his face and wearing a corset, boxer shorts and socks while his fur is hanging behind him on a clothes hanger.
* The title protagonist tends to get this a lot, especially in the original show, because he is 1) a human in a universe where his species is considered primitive and 2) a kid who happened to end up accidentally in charge of the most powerful weapon in the universe which he barely understands. However, he turns out to be quite good at using it and only gets better with time. Eventually, the villains who already clashed with him before are smart enough to warn their minions about not underestimating him (Ghostfreak once beat up his
* The title restaurant is across the street from Jimmy Pesto's Pizzeria, and the two managers have a mutual obsessive hatred as a result.

* the title screens of all the major arcade versions have characters, a feature dropped from arcade versions on DDRMAX, but backported into the home versions)
* The title sequence during the Second Doctor era utilised Eurostile for the captions.
* The title sequence for season 6 shows Keroro getting this reaction from an entire Keronian battalion.
* the title song involve Christine vocalising a series of very high and long notes, demonstrating (a) what the Phantom has taught her and (b) how he puts her in a near-hypnotised state. Being able to hold a clear and steady note at the proper pitch for so long means that Christine's part is only for the best sopranos.
* The title song subverts it; she isn't waterproof when a water tower explodes... but she merely rusts over and her electronics are fine.
* The title story of John Bennett's collection of Charleston, South Carolina folklore
* the title suggests, it can also rewind if someone hits the wrong button.
* The title track "Hide Your Heart" was originally recorded by her, but covered by FOUR other artists the very next year - Ace Frehley, Robin Beck, Molly Hatchet, and (most famously) KISS.
* The title tux always sends someone flying if they tap on its shoulder.
* the title villain originates from Ancient Egypt (at least 6 thousand years!), only in the movie they imply he had been alive quite a while before it.
* The Tito Amato series by Beverle Graves Myers about a Venetian castrato singer in eighteenth-century Italy.
* The titular 7 Wonders. In the original game, each player can build one Wonder. In the
* The titular A.I who has clairvoyance knows Lister will (accidentally) kill her so she tries to manipulate events so that Rimmer will sleep with Kochanski and Lister will find them and shoot Rimmer in the back of the head with a harpoon gun in a fit of jealousy, which would in turn make Krissie hate him. Lister catches on to it and even when he finds Rimmer about to kiss Kochanski he doesn’t kill the former, much to Kochanski‘s disappointment.
* The titular alien in "The Brother from Another Planet", although he is pursued by two men in black who definitely are not innocent.
* , the titular assassin is known for 2 things: Inexplicably popping out from boxes to kill people and having a silenced pistol in each hand while doing so.
* The titular ass-breath from The Coup's song "Ass Breath Killers" is a breath condition that one gets from kissing too much ass.
* The titular Batman is said to have a second major in this, as he is very very much a detective and criminologist when his preplanning everything didn't succeed immediately. An example of this trope in action comes in
* The titular Battle School of Oscar Mike's DLC Story Operation from
* The titular Big Paw is voiced by Tony Longo when he speaks, with Mark Vieha voicing him for his musical number "I'm a Puppy, Too".
* The titular Black General is capable of surviving huge amounts of damage (not her clothes though) but is obsessed with getting the hero Braveman to sleep with her, with every scheme she tries backfiring.
* The titular Board of Education in "Foxxy Love vs. the Board of Education" had a rather racist scheme of preventing black people from succeeding at their SATs to keep them from completing their education and ending up stupid enough to continue wasting their money on tacky merchandise, which he intended to do by giving them grape-flavored mentholated pencils that they'd end up eating before they could complete the tests.
* The titular canine's usual reaction to getting injured is to let out a weak, wheezy laugh.
* The titular carnelian cube in The Carnelian Cube sends one into a parallel world based on their desires at the time one sleeps with it beneath their pillow. In order to leave to another world one must find its counterpart in that particular world.
* The titular character always yells something akin to "Hello,

friends/buddies/pals!" while entering the scene in extravagant ways like floating down from the sky with an umbrella, crashing a kick-scooter into the couch or suddenly popping out of a conveniently placed box.
* The titular character can use a hurricane attack known as Wind Scar.
* The titular character does this repeatedly during the "what's under Kakashi's mask" episode. Sakura is unamused.
* The titular character fears she's too old to conceive when she realizes that, despite she and Sully being
* The titular character gets, in his own words, everything he ever wanted: respect as a villain, entrance into the elite Evil League of Evil, and the defeat of his nemesis. However, it costs him
* The titular character has suffered this three times by the first season finale. When he was a child during the Clone Wars the Separatists attacked his home village, and he was rescued and adopted by Mandalorian commandoes. Then Mandalore was purged by the Empire. And finally the Imperial Remnants wiped out his covert enclave.
* The titular character has trouble reading emotions and social situations, doesn't understand common sayings/metaphors, infodumps/rambles constantly, is incredibly impulsive, and is constantly moving (stimming), especially when he's excited about something.
* The titular character. He lives in the house with a master who has a crush on him and daily interacts with her circle of female friends who all also have crushes on him and never notices. He also completely misinterprets all attempts to explain otherwise to him.
* The titular character. He loves anything and everything chocolate (especially
* The titular character herself goes through this. First, she fights against the leader and
* The titular character herself Zelda's particular weakness is prolonged attack or highly effecient attack as this is usually the way she gets into trouble that Link has to bail her out of. This is even reflected loosely in the
* The titular character initially used no weapon at all, but had to learn to use a shortsword to have a chance win a
* The titular character in the classic short "Mike the Masquerader" (from Famous Studios / Paramount, responsible for the Casper the Friendly Ghost shorts). His attempts to deal with an elephant that witnessed his bank heist formed the meat of the cartoon.
* The titular character in the episode "S.W.A.K", after he learns that the person he thought was his crush's boyfriend is actually her brother.
* The titular character is a bear from Peru. The only bears native to that region are spectacled bears, but Paddington looks more like a brown bear. Around 2016, a wildlife photographer discovered a spectacled bear with a golden-brown fur color, different from the normal dark brown or black fur color of common spectacled bears. The photographer even noted the similarity between the golden spectacled bear and Paddington Bear.
* The titular character is actually a man of relatively few words for most of the series. He is somewhat talkative when he is with only one person (like Ron, Hermione or Dumbledore), but in large assemblies, he doesn't say much unless he really feels the need. It is, however, a trait often overlooked by readers because Harry is also the (third person) narrator and thus, you "hear" him all the time even when he doesn't talk. It seems be a mixture of a bit of shyness (mostly in the first book) and that he simply often prefers to listen and observe rather than speak. In situations when he has to take up the leadership mantle, he becomes more talkative, and thus he has mostly gotten over his quietness when the last book rolls around.
* The titular character is a male hedgehog with blue fur, while Amy Rose is a female hedgehog with pink fur. Since the
* The titular character is an interesting variant of this trope. On one hand, she's a
* The titular character is been beaten, decapitated (Ten times on the same page in

one issue), burned, frozen, digested, crushed, skewered, turned into a goldfish, disintegrated... If it's painful and/or lethal, it's probably happened to him, and every time he's always duct-taped back together by the team's cleric, Piffany. Plus, it's explicitly stated that (to the irritation of his guardian angel, who has no idea what to do with him) he's actually not allowed to stay dead, due to the rules of the Henchmen's Union (and the fact that his absence would completely screw up the universe).
* The titular character is, in contrast to his fellow game characters, large, in poor control of his powers, and temperamental. Unfortunately for him, he's just a
* The titular character. Its true form is never seen, and it looks human normally. The key words there are "looks" and "normally".
* the titular character making a mess in the kitchen while serving as a substitute for Chef Pee Pee. However, Bowser's mother, Margaret ends the episode by asking if anyone wants to take her clothes off, and the mess hasn't been cleaned up yet.
* The titular character manages to escape imprisonment at the end of
* The titular character never actually said "Gotta go fast!". It's just the title of the American theme song of
* The titular character of Doña Barbara was inspired by a woman named Pancha Vásquez, who Gallegos never met personally. He heard about her from his friend Juancho Rodriguez, who told him about a woman, "who rode like a man. Greedy, superstitious, without fear of taking out anyone who annoyed her". While Doña Barbara is described as beautiful, Andres Eloy Blanco, a politician and poet who met Doña Pancha personally in 1920, said "she was pretty ugly, dark, almost black. Maybe she was beautiful when young, but now is not the case", and said she was prone to obtaining lovers.
* The titular character of the Argentinian play (later released as a film and a book)
* The titular character of the "Luke Jensen, Bounty Hunter" series is a positive version, fighting outlaws in fair fights (and often with the odd against him), being willing to take some in alive, and caring about the guilt or innocence of the peoples he goes after.
* The titular character of Tom Thumb is a tiny human, if you can really call him human. Sure he has all the features of one, but he's two inches tall. And depending on the version, he may or may not be a
* The titular character, Phoenix Wright, has shown visible attraction to women, and had a girlfriend while in college, but his relationship with Miles Edgeworth can easily be read as romantic. Their interactions and banter remind one of
* The titular character Plop serves as the narrator for each episode of
* , the titular character request Rin (who she knows to already have feelings for her brother Shirou) to take him as her fiancee, in hopes that a relationship would prevent him from taking the path of a Counter Guardian like Archer. Though she also extends the offer to Luvia and Sakura when they reveal they have feelings for Shirou.
* The titular character rival he is subsequently fired from his cushy Vegas show and has to invent a new trick to land a prestigious gig at a flashy new mega hotel. After rediscovering his passion and relearning the art of magic from his childhood hero, he rekindles his partnership with his best friend and designs a new trick to win the gig.
* the titular character's, and the episode promptly ends without any resolution to either the mess being cleaned up or Junior being punished.
* The titular character's father is 192 cm (6'3" and a half), and her mother is third-grader size at "barely over" 125 cm (4'1" and a half).
* The titular character shows signs of chronic depression and is a confirmed
* The titular character shrinking due to the Chiquitolina pills is shown through
* The titular character's many, many shirtless and near naked scenes in
* The titular city is inhabited only by terrestrial mammals. Lots of fans have had fun coming up with other cities in the same world to accommodate birds, reptiles, amphibians, and marine mammals.
* The titular couple. Bob is fifty, and while Abishola's age is never stated, she

appears to be in her thirties (Abishola's actress, Folake Olowofoyeku, was 36 during the first season). While the age gap is briefly mentioned a time or two, it tends to be overlooked in favor of them being an
* The titular creatures are considered to be a dangerous threat to whatever environment (barring cold temperatures) they appear in, being near-unstoppable while consuming the life force of all organisms in their path. Despite this, Metroids are extremely desired by both the Space Pirates and the Galactic Federation for their potential applications, even if it means risking the lives of many to get their hands on even a single one. It is because of these factors that Samus is ordered to wipe out all Metroids from existence lest they fall into the wrong hands and become an invasive species throughout the galaxy.
* The titular creature takes many overtly supernatural forms but its "Pennywise" persona, which is meant to pass as a normal man in a clown suit, has subtle flaws which reveal its true nature. Many characters note that Pennywise
* The titular "Cubtron Z" and an unnamed tentacle monster seen destroying the city.
* The titular curse can be broken only by someone who would lay down his life three times for the royal family. When Cazaril breaks the curse, there turn out to be two distinct twists involved. More obviously, he doesn't have to
* The titular Darkest Dungeon also accomplishes this a little more directly. Anyone who's gotten powerful enough to even brave it has survived all the above and more and remained stalwart. But every single one of them, no matter how determined and badass, will refuse to ever go in again. Anything else is fair game, but the experience is so traumatizing they'll never come back to
* The titular "Dirty Pair" have accidentally blown up at least ten planets, though it's only ever an indirect result of their actions.
* The titular Dragon Balls have their own rules that govern how often they can be used and what wishes they can grant. Earth's dragon, Shenron, notably cannot affect people whose power exceeds his creator, cannot revive the same person twice, and can be used to bring back multiple people under one wish as long as they died within the last year. Porunga is similar, but offers three wishes, can revive the same person any number of times, and originally cannot revive multiple people with a single wish. Later, both sets of Dragon Balls are upgraded to be similar in power.
* The titular dragons are highly intelligent, with terrific Hit Dice and top-notch spellcasters. One must guess the only reason they haven't taken over the world is that they just prefer to pile up a nice hoard and take a nap on it. One
* The titular dragons are this, to the point of actually gaining automatic levels in player-equivalent caster classes as they age and mature, in addition to being able to take levels in character classes the normal way.
* The titular dream-dimension-thing from "Vastarien" is a particularly surreal example, seeing as it is, essentially, the protagonist's vision of paradise.
* The titular duo look directly towards the viewer twice during their dance at Mrs. Hasagawa's fruit stand.
* the titular Eldritch Abomination, Chzo itself, which is so big that Trilby even says it's as much a place as a creature.
* The titular Endless originated from the planet Tor but they were forced to depart after over-exploitation destabilized its core. As with Augria, the planet is now a barren ice planet.
* The titular EVAs need an external power source to operate for more than a minute at full capacity or five minutes in a weakened state, and an early episode even has Shinji do a power cord transfer at one point to move into an area that his current cord doesn't reach. An attempt was made to copy the S
* The titular Ex-Aid can also be an example of this at times, putting blame on himself as a medical intern for any deaths caused by game disease, despite the fact that he really isn’t at fault for his patients being murdered by bioterrorists.
* The titular Eyeshield 21 vs. just about anyone he goes head to head with, especially Shin and Agon. In reality, however, neither Agon or Shin are especially

tall, Sena's just
* The titular family is also a great example. They love each other, but they drive each other crazy.
* The titular fat cat himself can't sing, but he enjoys doing so. He likes to go on fences at the dead of night and sing which results in him getting pelted with stuff by audiences or humans who are sleeping (their success rate of getting Garfield varies per strip). Garfield's dancing hasn't found much acclaim either.
* The titular Fire and her childhood friend Archer from Kristin Cashore's
* The titular Flatland is not merely flat but two-dimensional, and inhabited by squares, triangles, circles, and the like. There is air and rain but no mention of any actual ground...
* The titular Foundation's mission is to capture and contain anomalies, or "SCPs", both to study them and keep them from
* The titular guild has Laxus, who, after his attempted coup, becomes somewhat sane again... but is kicked out by Makarov and wanders the earth. He still shows up to grudgingly help them when they need him. He gets it from his dad, who went evil and started a dark guild with intentions to destroy Fairy Tail.
* The titular Halo Array: 7 (originally 12) Ringworlds that act as fortresses and weapons of a kill-all-life-in-the-Galaxy-bigger-than-a-microbe scale. Had the original 12 been activated all at once, the kill-effect would have gone
* The titular Henry Stickmin. While the first three games show him as a selfish criminal,
* The titular hero displays this behavior in the Rance h-game series. Rance will bully his slave girl Sill Plain from dawn 'till dusk and
* The titular hero has his cell phone wired through his armor. Maybe the armor is Bluetooth compatible.
* The titular heroine is a Themysciran warrior. Amazons can vary from any level of pacifist to fighting at any provocation, but all of them (Queen Hippolyta,
* The titular heroine is quite willing to make peace with the people she's fought for most of her career in a sometimes very vicious and brutal war that has cost her many friends, because they were only doing exactly what
* The titular heroine's love of the water and hobby of canoeing originally came from a plot point where she received advice from a river spirit called Old Man River. The actor they planned to voice this character - Gregory Peck - said Pocahontas needed a motherly figure instead. Thus they created Grandmother Willow. In the film the canoeing is justified by having Grandmother Willow's tree be near the water, and Pocahontas has to row there to visit her.
* The titular hero is a headstrong and charismatic leader. At his best, he is also levelheaded and even a mastermind.
* The titular Jack's Chronic Hero Syndrome is so bad that he repeatedly sacrifices one-time chances to complete his primary goal in order to save some random schmuck he's never met before. Said goal is to return to the past and
* The titular Kaburin in the mobile game of the same name, which is now defunct. They are creatures wearing an bag or bucket over their heads. In gameplay, the player throws them to attack enemies.
* The titular main character of "The Misadventures of Max Crumbly" states that he has bladder issues that flare up when he gets scared or anxious.
* the titular manga sprout wings upon "mucas membrane" contact with their Ashikabi.
* The titular Mitchells are a dysfunctional family on a road trip who manage to go from barely surviving a
* The titular Mobile Suits are the natural progression of space colony maintenance mecha, at least one of which — the Ball — shows up.
* The titular monster from "Clammadon Rising", who’s basically a
* The titular monster has one in all of its forms, and it uses it to fire lasers in its first/titan form.
* The titular monstrosities of the short story "Eumenides in the Fourth Floor Lavatory", from
* The titular Mysterons. If you intend to wipe out "all life on Earth," whether in a "slow, but nonetheless effective" manner or in a single strike, you

* The titular Naruto Uzumaki smiles like this a few times, usually when thinking of a prank. Some of those times (notably in the 101 episode) his Cheshire Cat Grin overlaps with
* The titular Nausicaä is one of the classic examples of this trope. She's a kind person whose compassion extends to people of all nations and to animals as well She takes it much further than most others; she not only befriends cute wild animals but also horrifying battleship-sized insects, slavering-jawed giant dragonflies and so forth, so she really is a friend to
* The titular Orb of Storms was created by sufficiently advanced humans. It has been used for generations to judge the growing and planting seasons and its holders have a huge advantage in managing their food supply. It's apparently
* The titular organization is an international specialist force responsible for defending the planet against alien threats and suppressing information about them, by retrieving downed UFOs, securing abductees for debriefing and processing, deleting vital intelligence before someone else can get to it, and silencing suspected collaborators. X-Com soldiers wear proper armor in combat, but the strategic notification pop-ups in
* The titular Phoenix Wright is essentially the video game world's avatar of this trope. Both he and his successor Apollo Justice, along with Miles Edgeworth in his
* The titular pirates in "The Pirates" make it no secret that they all intend to rape the woman they find adrift in the ocean. In-response, the woman (revealed to be a Sazae-oni) steals all of their testicles and swims off with them.
* The titular Princess Zelda has progressively become more active in the games as the series went on. Originally just a classic
* The titular protagonist has the ability to read psychic imprints left on objects by their owners, generally images of significant events from the owners' recent past. He also likes to party hard. This combination is put to use in several
* The titular protagonist is equipped with a Black Box rocket launcher in the right hand and a large six-barrelled gatling gun in his left hand.
* The titular protagonist mentions once intercepting a message sent out from one world about a scientist claiming to have proven
* The titular protagonist's life is this before he came to America: He was a bastard, his father left at ten, his mother died of disease and he almost did as well, became an orphan, moved in with a cousin, who then committed suicide, then a hurricane destroyed everything on his island, and he was booked passage on a New York-bound ship ...
* The titular puppet in "Howdy Rudy" was voiced by storyboard artist John Fountain.
* The titular ship, as well as, pretty much, any High Guard ship from the tiny but sleek slipfighters to the massive
* The titular ship has the Vanguard Cannon, a beam so powerful that it can obliterate almost any enemy caught in its path and can destroy multiple targets in a single shot. A special cutscene plays whenever you give the order to fire it.
* The titular ship is the only vessel of the Cera Space Force to escape from the PACT invasion, with the rest being sunk by the
* The titular Soldier does it after flying off a braking car. Sparks are flying when he brakes with his metal arm.
* The titular song was originally conceived as a more up-tempo rock song; it was eventually retooled into a romantic ballad to better fit the scene.
* The titular space station Deep Space Nine was like this early on, as the Cardassians had stripped and/or sabotaged everything of value and importance and then some. A running flavour detail in the first couple seasons was O'Brien's constant efforts to make the station
* The titular Stargate itself being an example: an ancient stone, actually nigh-indestructible
* The titular Street Fighter tournaments are no holds barred, and even though outright death of the opponent is not allowed, participating in the tournaments is essentially going into an underworld style martial arts competition with a good amount of positive publicity on a world scale- Survival of the fittest and no mercy

on the weak definitely comes to mind, and whatever happens in each fight is essentially the outcome, no more, no less. While there are plenty of good-natured and honorable fighters who participate, there are just as many morally dubious and even villainous and bloodthirsty fighters who enter in seeking the title of World's Strongest as well, and this does not even count the martial art or discipline they will wield, be it styles rooted back in assassination or even raw merciless pragmatism. It also doesn't help that the tournaments and events of the series are also an opening for meeting grounds with those of rivalries rooted in bad blood, and to where the hosts of these tournaments are criminal organizations and probably have something more sinister in store with these events, making them truly a death-defying competition where only the best of the best can thrive in its intensity.
* The titular Sunrider is a heavily-armed prototype assault carrier, specifically designed to combine the firepower of a battleship with the carrying capacity of a carrier. Its armaments include banks of laser cannons, smaller pulse lasers, numerous anti-
* The titular symbiote-augmented supervillain-turned-antihero was originally drawn with these before quickly transitioning into fangs, and some artists go back to this look for the sheer creepiness factor.
* The titular Tamamo is a fox spirit who goes to a human school to learn more about things. Occasionally she is visited by her sisters. Their glamours' failing is dependent on what one sees them through. Tamamo, her sisters, and the goddess they serve are ignorant to the frequent failures of the glamour. When seen through normal human eyes, Tamamo's disguise of appearing as a normal human girl, albeit one who is stunningly beautiful, works on every adult or adult-minded person like the girl in the Public Morals Committee. Those who are students, or young at heart like a resident
* The titular tank flies a Confederate flag instead of an American one, because it has the ghost of a Confederate general haunting it.
* The titular team fight the Mole Man in the first issue before encountering their
* The titular theme song. It sounds like it's sung by a 10 year old girl and has plenty of slow creepy music.
* The titular town of Gravity Falls, which is wrought with the strangest beings west of weird and north of normal. Some of the residents of this town include
* The titular Tragedy Girls, Sadie and McKayla have the closest and truest friendship you could ask for, share everything, are extremely physically affectionate, and would do anything to help one another. This is because they're both violent psychopaths who are drawn together by their mutual
* The titular Ur-Quan are divided into two factions: Kohr-Ah and Kzer-Za. The Kohr-Ah want to wipe out all other sentient life in the universe. The Kzer-Za will settle for enslaving or confining all other sentient life in the universe. Similar to the Ryall, it comes down to a species-wide
* the titular Villain Protagonist and the occasional tentacle from their true form, which has driven everyone who's seen it insane (unless they were already insane).
* The titular White Mare's gradually shrinking crown of ice and slow metamorphosis from a deer into a horse invokes the snowdrop flower shedding its petals as Spring nears, the real-world shift of ancient nomads abandoning deer and taking up horse breeding as they moved to warmer climates, and an old nomad tradition of dedicating masks with antlers to sacred dead horses.
* The titular Yotsuba and Koiwai have shades of this as well, with some
* The Tivolians, natives of the planet Tivoli, are very infamous for this behavior in-universe. They basically allow their planet to be conquered and enslaved by whatever hostile species lands on it and their entire culture revolves around them appeasing whoever took over their planet. Because of this, the planet Tivoli is known as "the most conquered planet of the universe". The Doctor considers this to be an aggressive form of cowardice, as the meek behavior of the Tivolians causes them to be
* The TK Barrier talent works like this. It's basically a force field.
* The TK Gunslinger talent allows you to hold, fire, and reload extra guns with telekinesis. If you have both, you can wield up to four guns at once.

* The T'lan Imass, an extremely important race in the world's history, have each lived for over 300,000 years. They have passed this time hunting down and exterminating all remnants of the Jaghut, who had oppressed them in that distant past. Their racial history goes back into unknowable distances, until 300,000 years before the main story, when nearly all those who still survived took part in a necromantic ritual that made them all undead.
* The T'lan Imass are an undead Neanderthal-type race who are dedicated to destroying the Jaghut to prevent any more Tyrants from arising. They don't have much to do with modern humans (except for the Logros T'lan Imass, who got recruited by
* The Tlingit people of the Pacific Northwest have a monster with an Achilles Heel: Once there was a giant that ate people. A man decided to kill the giant, so he played dead where the giant walked every day. The giant found him, brought him home and left to get firewood. The man jumped up, threatened the giant's son with a skinning knife to make him tell where his father's heart was. It was in.... The left heel! The giant returns, and the man stabs his heel. The giant screams, "I will eat your people forever!" But the man chops him into pieces and burns him. The ashes become mosquitoes, which form into a cloud and laugh, saying "I told you: I will eat your people forever!" Then the man looks on his arm, which has a mosquito on it...
* The T-Mobile cellphone company had a series of ads in the late 1990s/early 2000s featuring well-known-for-hotness actress
* The T-Mobile parody commercials weren't much better... though T-Mobile was lampooning Apple iPhone, which was at the time an AT&T exclusive.
* The "TNA Front Line vs. Main Event Mafia" angle is a redux of WCW's "New Blood vs. The Millionaire's Club" arc (young up-and-comers vs. veterans).
* "The Toadman": The narrator is an elderly man who recalls an event in his past involving a being called the Toadman. It's left ambiguous whether or not the Toadman is supernatural.
* The Toads and Yoshis are always helpful. The RPGs have introduced exceptions, though never quite to the same level of outright villainy as the Koopa Troop.
* The Toads, in most games when they're voiced. Early Nintendo 64 games like
* The Toa Hordika inadvertently freeing Makuta from the Toa Seal after combining their powers to defeat Roodaka.
* The Toa Inika possessed a benevolent version of these - unlike normal Toa, their
* The Toa Mata upgraded into Toa Nuva 2/3 of the way through the first umbrella-arc. This happened, by the way, directly
* The Toa Metru and Toa Hagah both managed to defeat the Makuta as well. Unlike his later defeats by the Toa Mata and Takanuva, Makuta's
* The Toa Metru gained bright chest and shoulder armor and lots of color variation in their muscles, replacing the dull dark hues of the toys. Their Hordika forms also have subtle changes, mainly replacing their grey or silver with individual colors.
* The Toa Metru sacrificing their Toa Power for the Matoran, becoming Turaga in the process.
* The Toa Nuva returned after a 4 year-long break (in real life), when they received their
* The Toba Catastrophe Theory holds that 70,000 years ago, a supervolcano in Toba erupted and did this to the human species. The population was reduced to as little as 10,000 people, possibly split up between Africa and India. To give some perspective, that means the entire human race could get good seating at Wrigley Field.
* The Toba catastrophe theory, which not only reduced humanity to a few thousand individuals (fortunately, that wasn't enough back then), but may also have been the true cause of the last ice age, or at least hastened its arrival, which it was coincidentally followed by. In fact
* The tobacco lobby produced an "anti teen smoking ad" that basically consisted of a boy talking to his father about how he can't wait to turn 18 so he can smoke just like his dear old dad.

* The to be female and have Red Alert's name, but the final version of the show changed Ratchet back into a male, and made Red Alert a separate character.
* The Toclafane, withered human heads in cybernetic spheres, are the result of humanity trying to survive the end of the universe. In doing so, they turned into
* The Today Show realizing it was her, Banks pulled her hair back, straightened her posture, took the glasses off and suddenly ''became" Tyra Banks, Supermodel. The crowd loved it.
* The Todd comes out of the closet. Not as gay, nor even bisexual. He comes out as The Todd. He becomes aroused at anything, even the
* The Todd has been known to wait in hiding for hours until someone unwittingly sets up a
* The Todd has even turned the word "innuendo" into a double entendre by saying it as "inYOURendo".
* The To Do List boss starts making fun of her, and the kids in the pool steal her top to join in on the mockery. After that, she has no recourse but to just walk away from the situation, completely topless while shouting at children and horrified mothers in impotent rage.
* "...the toe bone's connected to the heel bone..." [Nope, there's metatarsals and other tarsals in between.]
* The Tofus and subject him to exotic "alternative medicine" treatments, like having his feet licked by goats.
* The Tofus called "The Great Escape" when Mr. Tofu performs a magic trick that ends up resulting in her head being teleported to a nearby box via magic while her now headless body is clearly seen still standing in the larger box.
* the to get there. This is a core principle of the chaos alignment - survival of the strongest.
* The Toilet Paper Tigers, which follows a summer baseball team for middle-school-aged kids. Though in this case, the coach is completely clueless about the game; it's his granddaughter who actually whips the team into shape. And she has to blackmail the team to do it.
* The Tojo Virus of IBM and in doing so dominate the American economy and get revenge for the Japanese loss in World War II.
* The Tokaido Road trope, Cat's love interest sees her as an attractive male monk and considers taking "him" to bed. Once the love interest discovers Cat's true identity, he's impressed and has no problem transferring his attraction onto the true female version.
* The TokHaar are living constructs made of stone and magma. As long as they are able to melt back into the "sacred lava" from which they came, they will always reform as good as new. Consequently, they love combat-based sports and
* The Tok'ra (a rebel faction of Goa'uld) defy this trope by sharing control with their human host rather than forcibly taking it from them.
* The Tok'ra are the same species as the Goa'uld, so they can turn it off if they want to as well — however, they rarely do, in order to make it clear
* The Tok'ra cannot reproduce. Their only symbiont queen has been killed so she cannot create a new symbiont. However, from time to time, some Goa'uld have joined the Tok'ra, perhaps one day a new queen will be among them.
* The Tok'ra have to evacuate anytime the Goa'uld discover their base of operations. Though that's not exactly a "homeworld".
* The Tokujo-ka Key (lit. "Special Investigation Unit Key") is designed after the Tridoron Key and, if used in the Mach Driver Production Model, transforms the user into the production model of Kamen Rider Mach. However, technical difficulties in the suit prevented it from being mass-produced, and the remaining Roidmudes were all dealt with before it could be perfected, making it redundant.
* The Toledo War was an armed conflict in the 1830s, lasting one and a half years, between the state of Ohio and the then-territory of Michigan, over a piece of territory known as the Toledo Strip. The war caused a total of one serious injury, on Michigan's side, which was not life-threatening.
* The Toledo War, where the state of Ohio and the territory of Michigan went to war over a strip of land both claimed to be theirs. The US government tried to

intervene politically but did little to actually keep them from fighting each other. In the end though, the war ended without any casualties when Congress offered Michigan statehood and the Upper Peninsula in exchange for abandoning their claim on the Toledo strip.
* The Tolkien Reader was originally conceived by publishers as a way of broadening interest in Tokien's non-fiction essays by mixing abridged versions of them with some of his shorter fiction.
* The Tollan are beating Earth humans by a few centuries (and they don't like to share their tech - suggested to be on the grounds that the last time they
* The Tollan deliberately invoke this with "primitive" societies that haven't reached their technological level. They once gifted their technology to another species to help them, and as a result the species wiped itself out
* The Tollan on the other hand got their comeuppance — after demonstrating the shallowness of
* The Tollans and Asgard refuse to share technology with Earth, for the same reason, although the Asgard do share shield and beam technology later, but no weapons (until very, very much later).
* The Toll of the Sea - which is set in early 1900s Japan. The film moves it to the 1920s, and relocates it to China.
* The Tolnedrans are also a merchant nation, to the point where most of the commandments of their god couch things in economic terms. For example, instead of saying "Thou shalt not kill", it says "Kill not. Dead men cannot buy from you."
* The Tol'vir are feline centaurs are yet another NPC race based on ancient Egypt; they have pyramids and obelisks, statues depicting humanoids with various animal heads, and they live in a desert with a large river in the middle of it.
* The Tom and Jerry Show (1975) episode "No Bones About It". A dinosaur's toe bone is missing from the museum in which Tom and Jerry work; they see Spike carrying what they think is the missing bone, so they try to get it away from him.
* The Tom and Jerry Show of the whole episode right up to the end, when the Merry Men break out of this habit and have a truly joyous laugh at Robin Hood's expense.
* The Tomb after a while and their wearers will rapidly age if separated from them.
* The Tomb after Kolabati loses her anti-aging necklace, age starts catching up very quickly. Donning it again, however, return the wearer to youth.
* The Tomb Kings are nearly as bad when it comes to graverobbers. It doesn't matter how trivial the value actually held by an item stolen from their crypt, it's the insult inherent to the act that will make them chase the perpetrator to the ends of the earth with their undead armies. In fact they've been locked in a back-and-forth with the Dwarfs for some time over a Dawrfen pickaxe with a single Khemrian coin embedded in it. The Tomb Kings want the coin back, the Dwarfs declare a grudge every time the pickaxe is stolen, and a
* The Tomb Kings are nice for undead, since they mostly stay put in their pyramids. Several city states have large living populations ruled by mummies (part of their motivation is a desire to bring life back to the desert, after all). They mostly fight with each other, because each one is technically the rightful ruler of Khemri out to destroy the usurpers, even though their respective reigns are long done.
* The Tomb Kings of Khemri use bronze spears, wooden bows and bronze Kopesh swords of various sizes and ride chariots, in keeping with their Bronze Age aesthetic. They also use sinister trebuchet catapults lashed together from bones, because when you're undead it's just something you have to do...
* The Tomb Kings, similar to the Lizardmen, value gold because most of the surviving artefacts of their realms and dynasties are made of it. Tomb Kings will launch full-scale invasions on anyone who so much as takes a single gold coin from them, but it's because they dared
* The tomb of 14th Century Mongol warlord Timur the Lame is also subject of an alleged curse. During World War II, Soviet archaeologists exhumed him and it was said one of the inscriptions in his casket was "Whoever opens this tomb shall unleash a worse invader than I". Two days afterwards, Hitler invaded the USSR and when Timur was re-buried with a full Islamic ritual, the Soviets won the Battle of

Stalingrad. Since then, a few superstitious people attribute Timur's curse for changing the course of World War II.
* The Tomb of Dracula band of vampire hunters working occasionally alongside Blade.
* The Tomb of Dracula, but since his head is never removed afterwards to make his death permanent, he always manages to return.
* The Tomb of Dracula comics started as a result of Count Dracula appearing before a Satanic cult preparing a sacrifice to give to their dark master. Afterwards, Dracula says that he is in fact the Devil, and that the cult should serve him.
* The Tomb of Dracula dad, to boot) given everything he did to her when she was a mortal, and the curse that transformed her into a vampire means that she cannot die until Dracula is irrevocably destroyed.
* The Tomb of Dracula, Drac is clockwork predictable with this trope. Virtually no one outside the 'Bridge Crew' was taken prisoner without being turned.
* The Tomb of Dracula featured a underground pool of blood that made any mortal contacting it immortal.
* The Tomb of Dracula. His only minor departure from the trope is his mustache.
* The Tomb of Dracula, is your typical sanest member of the group. But that's because he's a cardboard Ghostbuster clone without the comedy part and had no personality of any kind. Fans naturally preferred the earlier version.
* The Tomb of Draculare. From the context, they're apparently analogous to the real life vampire subculture, except they hobnob with actual vampires and are really obnoxious about it.
* The Tomb of Dracula. So you get to be the protagonist in an issue of a series named after the villain? Yeah, good luck trying to kill him.
* The Tomb of Dracula that plays video games all day long. Quite the step down from the guy that ruled his own nation.
* The Tomb of Dracula the immense strength the killer must have possessed to accomplish this.
* The Tomb of Dracula to ward him off that way. Best seen when Wolverine made a cross with his claws and did nothing. However, Nightcrawler, a devout Christian, drives The Prince Of Darkness back with two sticks formed into the shape of a cross. Then when Dracula tried to attack Kitty, he was repelled by her Star of David.
* The tomb of Qin Shi Huangdi is still mostly unexplored; the site is contaminated with mercury (and according to legend it includes a massive model of his empire with the waterways made of liquid mercury). The most famous excavated part is the Terracotta Army, which was protected by still-functioning traps. According to the stories, it was built by 700,000 men, which would make the work camp the biggest city in the world at the time.
* The Tomb of the Cybermen, but they start getting killed off very early and it’s not long before only a few characters remain in the tombs with the Doctor and his companions.
* "The Tomb of the Cybermen" ends with the Cybermen being sealed back in their Tombs. However, as the Doctor and his companions move away, a Cybermat is seen outside the Tombs.
* "The Tomb of the Cybermen" has a dimmed reputation today, for two reasons. First, when it was only known from the audio and a few telesnaps it was widely regarded as a classic; its 1991 rediscovery, revealing cheap seats, poor pacing, inconsistent props, and troubling plot logic, was disillusioning. The unearthing of the story also exposed just how racist it was with regard to the servant character Toberman, a brutish, mostly mute black strongman.
* "The Tomb of the Cybermen" is a clear example. It cuts to a studio shot as soon as they reach the entrance.
* "The Tomb of the Cybermen", Klieg and the rest of the Brotherhood of Logicians intended to take over the world with the aid of the Cybermen. Bit of a logical fallacy there … Of course, the Doctor eventually manages to goad Klieg into revealing that, for him, at least, logic and utopia are just excuses; at the end of it all, he's just a power-mad nutcase.
* "The Tomb of the Cybermen" offers up a science-fiction version of the Mummy's

Curse.
* The Tomb of the Cybermen", somewhat improved by the addition of vicious, jagged, organic piranhalike teeth.
* The Tomb of the Cybermen": The Second Doctor has faked out Klieg and gotten him to blab the entire plan.
* "The Tomb of the Cybermen", Tobias Vaughn, also helping the Cybermen, would make almost word-for-word the same rant.
* "The Tomb of the Cybermen," Victoria is offered chicken in pill-form by an archaeologist in the distant future. She is rather more reluctant to try it.
* "The Tomb of the Cybermen", when the Doctor is discussing grief and how life goes on with Victoria.
* The Tomb of the Cybermen", where the Doctor and Jamie hold hands on several occasions.
* The Tomb of the TaskMaker, the Eyearrass dungeon (say it out loud) is filled with evil Taxmen who, instead of attacking you, will deplete your money.
* The Tomb of the Unknowns, the United States' monument to service members killed in action whose remains were never found or identified. Whereas most countries with similar monuments inter a single soldier, usually from World War 1, to represent all their Unknowns, the American monument has Unknowns from both World Wars, Korea, and Vietnam. But by the 90's, advances in DNA testing made it theoretically possible to identify all unknown remains from the Vietnam War, and sure enough, the Vietnam Unknown was revealed to be Air Force pilot Michael Blassie. Blassie's remains were reinterred in his hometown of St. Louis, and the tomb previously representing the Vietnam Unknown was replaced with a plaque that reads, "Honoring and Keeping Faith with America's Missing Servicemen".
* the Tom Brady-led New England Patriots injured his groin in the Wild Card Round and aggravated it in the AFC Title contest; the latter would wind up benched in the first quarter of that game. Bryant was also suspended for this season, and with Roethlisberger's injury and a cobbled-together collection of second-tier wideouts opposite Brown, his numbers dropped by over 30% from the year before, which led to the team basically going back to a run-first scheme after two years of pass-heavy playcalling.
* The tombstone of Swedish author Fritiof Nilsson "The Pirate" famously reads:
* The Tom Clancy novels that feature Jack Ryan Jr. involve him and "The Campus" in halting terror attacks being orchestrated by "Umayyad Revolutionary Council". Most of its members are based in Europe. In the Ryanverse, the URC was the mastermind behind the 9/11 attacks instead of Al-Qaeda.
* The tome called The Darkhold was written by the elder (and evil) god Chthon as one of the —if not
* The Tome of Bill. He was Sally's boyfriend when she was still human and she accidentally killed him when she first became a vampire, and didn't know how to feed without turning the victim. He carries a chip on his shoulder for the next fifty odd years.
* The Tom Green Show full of meth and let him and a cameraman loose into the streets, you might wind up with something as grotesque as Tom Green's style of comedy.
* The Tom Green Show lesbians on the hood of his dad's car, and hiding an elaborate contraption under his lab coat while claiming that he was converting grape juice to pee...on a public bench.
* The Tommyknockers: After Gardener visits the shed, he realizes, just as the "Shed People" are returning, that he forget to put the padlock back on the door. As he runs out to put it back, he drops it and the key falls out.
* The Tommyknockers, although they're rather different from the legends.
* The Tommyknockers into a hostile atmosphere to get more rather than rely on the electric grid. It simply never occurs to any of them to just buy a goddamn AC/DC converter. Their violent tempers don't help either: when their stupidity regarding the batteries is pointed out, they explode because they never thought of it.
* The Tommyknockers is killed when her doll collection animates and attacks her.
* The Tommyknockers. It starts off as a normal town, but becomes this trope when

the alien spaceship is first unearthed and slowly makes everyone crazy and obsessed with it.
* The Tommyknockers. Said story features a group of people who find a deadly object which grants them great amounts of energy and a superficial kind of creativity, and then kills them with a slow wasting disease. Nose bleeds feature prominently. In perhaps the most on-the-nose example, the first invention created under the influence of the alien object is a psychic typewriter that effortlessly translates broad story ideas into beautifully written manuscripts.
* The Tommyknockers, since the aliens aren't actually in control, the humans just start to think like, act like, and eventually become aliens themselves.
* The Tommyknockers, some guy tries to retrieve a soda can from a vending machine, which is possessed or powered by the alien technology and has a greenish glow. His hand gets stuck in there and the whole thing blows up, killing him.
* The Tommyknockers, there are myriad Killer Whatevers, which are ordinary devices adapted into death-dealers by the residents of Haven, in order to protect themselves from the outside world. These include a brush-trimmer, smoke detectors that fly like Frisbees and emit deadly ultrasonic sound, televisions that shoot fire, and a lumbering 600-lb. Coke machine which crushes a man's skull and breaks his back.
* The Tommyknockers: The titular aliens (and the people who are transformed into them) create devices that have incredible power, but which they have no philosophical or ethical insight into. As the main protagonist puts it, they're "Thomas Edisons rather than Albert Einsteins".
* The Tommyknockers, where the alien-touched become capable of incredible feats of technological jury-rigging and improvisation, yet are such bumbling incompetents at taking practical advantage of their skills that the benefit of such talent is negligible.
* The Tommyknockers. While the title aliens have a natural skill for adapting human technology into all kinds of weird sci-fi devices, they also prove to be much more short-sighted and psychotic than humans. They also can't really seem to think of any constructive purpose for their technology, whereas humanity's scientific advances have often improved quality of life.
* The Tommyknockers with similarities to their creator (he's an alcoholic, she's a successful writer of genre fiction).
* The Tomorrow Code immune system, and they go around killing off humans in order to keep them from hurting the Earth anymore.
* The Tomorrow File renames the government departments. The Department of Defense is called the Department of Peace. The Department of Health, Education and Welfare becomes the Department of Bliss. Other departments are also renamed. These names are determined by "The Office of Linguistic Truth".
* The Tomorrow People (1973) audios comments extensively on how unusual this is.
* The Tomorrow People (1973) briefly mentioned a planet called QX5 that orbited two suns.
* The Tomorrow People (1973) by the writers — the scene was indeed filmed in a wood in the British county of Surrey.
* The Tomorrow People (1973) Elizabeth was played by Elizabeth Adare and Mike by Michael Holloway.
* The Tomorrow People (1973) has the Galactic Federation who seem to be roughly along these lines, especially in the last story "War of the Empires": They have a council made up of members of different races and accord developing worlds protected planet status that officially bars advanced aliens from interfering with them, but in practise they have no real way of enforcing their laws and their attempt to broker peace between the Thargons and Sorsons ends in failure (although they promise to reform and get rid of the bureaucracy they are mired in after the Tomorrow People narrowly prevent Earth being caught in the crossfire of the war).
* The Tomorrow People (1973), homo sapiens are frequently called "Saps". In Britain, the use of "sap" as an insult is rare, and "homo sapiens" is pronounced "homo SAP-iens" rather than homo SAPE-iens." In consequence, hardly anyone let in on this secret takes offense at the term.

* The Tomorrow People (1973): In "The Revenge of Jedekiah", John and Elizabeth are gunned down by soldiers with fully automatic assault rifles. Not only do they (barely) manage to survive their injuries, but when we see them sprawled on the floor, there isn't a trace of blood.
* The Tomorrow People (1973) manages a few, notably when the Tomorrow People debate the values of their version of history with the representatives of a 20th century Roman Empire:
* The Tomorrow People (1973): One of the protagonists has begun to demonstrate a limited but effective form of telekinesis - he can open any lock. A gang of criminals kidnaps him and some of his family for leverage on the superhuman lockpick. At one point, the boss asks one of his mooks if the telekinetic and his family are safe. The mook's response - "Sure. Got 'em under lock and key."
* The Tomorrow People (1973) planet because there weren't any black people on that world. A native asked her if she was from the same planet as the other Tomorrow People, then commented that there must be "an interesting variety of skin color" on Earth when she said yes.
* The Tomorrow People (1973) series, one of the villains is the insane, disembodied consciousness of a Tomorrow Person who had become stuck in hyperspace.
* The Tomorrow People (1973) style, when they speculate on how old his (physically elderly) grandfather is, the best guess they can come up with is "older".
* The Tomorrow People (1973): The entire premise revolved around "the next step in human evolution".
* The Tomorrow People (1973) through hyperspace. If they jaunted into hyperspace without protective gear, their bodies would be annihilated. Additionally, hyperspace was seen as a place where time had no meaning, but you'd return to your own time upon leaving. That is, unless some major temporal screw-up had occurred, which ran the possibility of freezing time temporarily.
* The Tomorrow People (1973) to provide the necessary psychic energy to the aliens in a comparatively harmless way.
* The Tomorrow People (1973) use their telepathy to translate what aliens are saying into English. In one spin-off novel, they ask a lost alien the name of his home planet ... and discover that with no other context to base it on, the telepathic translation renders the word meaning "my home planet" into the English word meaning "my home planet" — Earth.
* The Tomorrow People (1973). What makes it worse in this case is the fact that the show had a scientific advisor listed in the credits!
* The Tomorrow People (1973), where the main characters' telepathy makes them incapable of killing.
* The Tomorrow People (2013) as characters with highly developed telekinetic powers are able to stop bullets à la Neo in The Matrix.
* The Tomorrow People (2013), the titular group uses their abilities this way. They can't use it to kill, but they can and do use it quite effectively in combat.
* The Tomorrow People, Jade spends much of her series hanging out with Adam and Megabyte and wishing she could be a Tomorrow Person. Her powers are revealed when she saves herself (and her crush Megabyte) from an exploding boiler room.
* The Tomorrow People, Kevin disguises himself as Megabyte's little sister so he can use her passport to get into the United States. When he needs to go to the restroom at the airport, he first starts to go into the men's restroom, but a man comes out just as he is about to go in. He turns and starts to go into the women's room, but the man's girlfriend/wife steps out. Once they've left, Kevin takes one last look around and quickly ducks into the women's restroom.
* The Tomorrow People series, Megabyte is the only one of the characters without powers, but then (surprise!) he gets them in the last episode of the first season.
* The Tomorrow People the revival, depending on how you interpret them.
* The Tomorrow People - while both series were created by Roger Damon Price and had the same basic premise, the 90s remake of the 70s children's TV series shared no continuity.
* The Tomorrow Series, and goes out unrepentant, unblindfolded, and defiant to the end.

* The Tomorrow Series, each time followed by Lee (or Ellie) pointing out that it's a very commonly used movie line.
* The Tomorrow Series, Ellie and her friends are considered terrorists by the enemy… and in a lot of ways, like not wearing uniforms or having a clear chain-of-command, they do fit the bill remarkably well.
* The Tomorrow Series Ellie Linton calls herself "Amber Spaulding" after being captured, taking the name from things she sees around her in the hospital she is being treated in.
* The Tomorrow Series—Lee is telling Ellie about the first time they danced together, which she doesn't even remember; they were at a school dance and he asked her to dance during a slow song, hoping that they could be close and intimate and romantic, but because of the time it takes for him to ask her, they end up dancing to "Convicted Of Love", which isn't especially intimate and romantic.
* The Tomorrow Series, the protagonists are almost always operating behind enemy lines.
* The Tomorrow Series they were doing hiding in a bush all through lunch.
* The Tomorrow Series when it was a novelty. In another mention nearer the end of the series (and decade) the concept is quietly updated to "email".
* The Tomorrow Testament where peace negotiations were conducted, but was informed that a strike fleet was sent to bombard his homeworld and the only one officer in position to countermand the last given order in time is on board.
* The Tomorrow War drive is effectively limited (the cost becomes prohibitive), so big ships have to use several. When some malfunction causes them to jump ever so slightly out of sync, this can't end well.
* The Tomorrow War get even greater advantage over a crew of recruits not even used to zero-gravity recoil.
* The Tomorrow War, the time travel technology works by creating a stable connection 30 years into the past, but the device itself and the connection point contuine to move forward through time, so the two time periods run concurrently.
* The Tom Petty music video for "Don't Come Around Here No More" ends with Tom (as the Mad Hatter) and the rest of the Mad Tea Party guests eating Alice, who has been turned into a cake.
* the tone of Exiles and the series would go on to have a high fatality rate among characters, whether they'd been just introduced or were longtime team members.
* The tone of the insults between the Gullwings and the Leblanc Syndicate in
* The Tone Rebellion appears and spreads throughout the land. The war with it results in the continent being split into dozens of smaller islands, all orbiting a central one - the heart of the corruption. Four of these islands have the remains of the Floater race. Over the next millennia, the four tribes evolve into distinct subspecies, each in alignment with one of the four elements (Natural, Supernatural, Physical, and Ethereal). After activating all the ancient bridges between the islands and defeating the corruption, the player witnesses the islands drifting towards each other and re-merging into the original continent.
* The tones have another purpose besides an audible alert. Each department in an area will have distinct two-tone alerts that are used to un-squelch pagers and radios, so as to not hear the radio all day unless a call comes in. Firefighters and EMS workers can tell who is being dispatched just by recognizing the tones.
* The Tonga Kid/Islander Tama/The Samoan Savage (Samuel "Sam" Larry Anoa'i Fatu)
* The Tong of the Black Madonna, an apparent mystical cult opposing the Tao and making trouble for its current Handmaid a.k.a. Bladedancer, including a concerted attempt to attack her in her dreams via a spell powered by human mass sacrifice.
* The Tongue-Cut Sparrow features the wicked wife of a kindly old man cutting off a sparrow's tongue.
* The tongue-in-cheek idea of building an anti-gravity or perpetual motion device by attaching a piece of buttered toast to a cat's back and dropping them from a height. According to the
* The tongue-tied Moses, whose direct contact with the God of Israel has shown him the inadequacy of human words to describe Him,
* The Tonight Show, a clip of Dom DeLuise's trick with raw eggs was shown. The

trick, while successful, led to Johnny going a little wacky and tossing eggs at everyone and cracking eggs on Dom's head, in Dom's pants, and finally his own pants. It had presumably settled down as Johnny introduced the next guest, Burt Reynolds. Johnny, in voiceover, said "Here we go again," as Burt had brought out a can of whipped cream, starting up another slapstick episode, this time with him and Burt.
* The Tonight Show as Mitt Romney performs a webcast that's supposed to win the votes of the younger demographic. The bit ends with Romney insulting his target audience not knowing that the webcam is still on, a spoof of his infamous "47 percent" quote.
* The Tonight Show by preventing Uri's "powers" from working, which resulted in endless lawsuits. He also called out Sylvia Browne, who initially refused the "Million Dollar Challenge," stating she didn't need the money. Randi backed her into a corner by suggesting if she really believed in her powers, that million dollars would be an amazing charitable donation, so she accepted the challenge only to keep ducking out because the "money wasn't put in escrow for her." She refused to sign a notarized document that showed it indeed had been put in escrow.
* The Tonight Show: During the early 1980s, Johnny Carson and the show's comedy troupe did a parody of the E.F. Hutton commercials (tagline: "When E.F. Hutton talks, people listen"). The parody ad was set at a funeral visitation, where a young stockbroker is talking with one of the deceased's brothers; as soon as the stockbroker says "E.F. Hutton," all conversation and mourning immediately stops and everyone turns their attention to the gent ... including the deceased guy (Carson), who sits up in his casket to hear what the guy has to say!
* The Tonight Show: Especially during the Jack Parr and to a somewhat lesser extent the first 15-20 years of the Johnny Carson era, a large number of the guests smoked on-camera, without restriction. Even Parr, Carson and — to a lesser extent — Ed McMahon, smoked on-camera, although by 1980 or so, Carson and McMahon eventually stopped lighting up on the set.
* The Tonight Show et al) are generally broadcast live-to-tape; i.e., the show is recorded earlier in the day than its actual air time, but is brought to air without subsequent editing.
* The Tonight Show: In one episode, Johnny Carson freaks and jumps into Ed McMahon's arms after a cheetah cub hisses at him.
* The Tonight Show It was enough to make an intern infamously quit the company (with an equally silly method: an interpretative dance explaining why she left).
* The Tonight Show Johnny Carson had an effects technician as a guest. The tech had built a guillotine that supposedly looked more realistic than former effects, and Carson demonstrated it. After the gag, Carson remained unresponsive for some time; the other people on set appeared visibly worried that something had gone wrong until they got the hood off and Carson grinned at them.
* The Tonight Show, Johnny Carson made a joke about the President connecting the nuclear button to the clapper. "Clap-on... all gone"
* The Tonight Show look like Edward R. Murrow. If they couldn't get the host to the site...they flew the anchors to an O&O station so they could still do the kiss-up interview.
* The Tonight Show looks kind of familiar..." Chappelle said his internal reaction was "I'm about to go to jail because I've been on TELEVISION!"
* The Tonight Show on-air to protest the censoring of a joke. He said,
* The Tonight Show, said that a man once drove up beside him and demanded to know why "he" was always so mean to his brother and why didn't he pick on someone his own size?
* The Tonight Show spoofing it. The final mock colour alert was "White with a black dot," which meant "Terrorists are impersonating Jay Leno."
* The Tonight Show Starring Jimmy Fallon in 2015, Fallon shared a story about Wichita Falls Texas, which was having to recycle toilet water because of just how bad the 2011-2015 drought in the area had gotten. He followed it up with "Dogs everywhere have reacted to the news by asking 'You guys are just figuring this out now!?'"

* The Tonight Show Starring Jimmy Fallon songs. Sometimes, they even have more than four people singing.
* The Tonight Show Starring Johnny Carson, as with the Matinee Lady in the "Art Fern Tea Time Movie" routines. Even on those occasions when she chatted with Johnny "as herself", she affected this persona.
* The Tonight Show Starring Johnny Carson featured Johnny anouncing the death of Baby, a rooster who had appeared on the show in 1978. He then proceed to deliver a eulogy, during which he is joined onstage by a comically large number of hens, ostensibly the rooster's many "widows." Afterward, he notes to cohost Ed McMahon that the birds used in the skit are in fact legitimately "showbiz chickens" with a list of impressive credits.
* The Tonight Show Starring Johnny Carson had a tendency to hold grudges and take perceived slights very personally:
* The Tonight Show Starring Johnny Carson, Johnny himself would do a popular variation: instead of swinging it by its cord, he held onto the mic handle and would swing it like a golf club.
* The Tonight Show Starring Johnny Carson's run. Ed Ames was trying to show Johnny how to throw a tomahawk at a cardboard target. On his first throw, Ed's ax landed just right below the groin area much to Johnny, the audience and Ed's amusement, the latter who was even surprised that happened.
* The Tonight Show Starring Johnny Carson. (This wouldn't be the last time that Bakker did this; his theme park Heritage USA is described in more detail below.)
* The Tonight Show: The Mighty Carson Art Players send up the E.F. Hutton brokerage firm spots which depict two people talking with one saying "Well, E.F. Hutton says..." followed by everyone else going all quiet and listening to the conversation. This spoof takes place at a funeral home visitation, and when the quote is delivered, everyone puts hand to ear — including the dead man in the coffin.
* The Tonight Show wanted it gone when he guest-starred on May 2nd, 2011. Then grew it back that fall, and shaved it off again in spring of 2012.
* The Tonight Show was particularly known for delivering bewildered aside glances to the audience whenever the guest did something particularly humorous or surprising. Most other talk show hosts do the same.
* The Tonight Show was talking to Manny Ramirez c. 2003. He mentioned that the Red Sox hadn't won a World Series in 85 years. "But you know what the good news is? I just saved a bunch of money on my car insurance."
* The Tonight Show were sampling an array of the candies, and Adam went straight for the booger flavor. He responded, "Doesn't taste like my boogers."
* The Tonight Show With Jay Leno featured a fake advert for something called For Men Only (a parody of men's haircare products) which was a liquid that turns men into women. There are several male to female morphs in it including Jay himself using the product. Another episode had Jay in drag (a supermodel with his voice). And on the episode where Pam Anderson was the guest- Jay asked several questions about implants and then asked her... "If you could be a man, who would it be?" Pam responds "I could be you!" Jay then exclaims "That's perfect. Why?" Pam's answer is "So I could sit there, torturing you, asking about your implants."
* The Tonight Show with Jay Leno First Lady Laura Bush said that her personal trainer has a nice butt.
* The Tonight Show With Jay Leno-girlfriend, and the man still hasn't gotten all of the porn back from her father.
* The Tonight Show with Jay Leno of a woman approaching her in a gym locker room who remarked that she resembled a young Joan Allen. Which she took as a compliment.
* The Tonight Show With Jay Leno was the musical guest. Bandleader Branford Marsalis said that he bet Motorhead leader/singer/bassist Lemmy Kilminster $5 he could get them on the show. After they performed, Lemmy took $5 out of his pocket and gave it to Branford before heading to the couch to talk to Jay.
* The Tonight Show with members of the show's comedy troupe as the interviewees.
* The Tonsillitis Episode: An episode centred on a character getting tonsillitis.
* The Tontatta Tribe found in Dressrosa. Consisting entirely of dwarfs and one

renegade
* The Tonties are cyclops with horns. They live underground in colonies like ants, their colors and number of horns indicate their roles, and their queen is a big white Tontie-head with no body. One way for a white Tontie to become a queen is to have a crown fall on it. Its body is crushed under the weight of the crown and its own head (which also somehow gets bigger as the body is squished). Also, a different creature may turn into a white Tontie simply by falling into a spike. A big eye then appears on the creature whose original face somehow disappear and the spike become the newly-created Tontie's horn.
* The Tontine follows the lives of three young people entered in a Victorian tontine.
* The Tony Randall Show wasn't particularly interested in the movie, but every other man who entered his office was entranced.
* The "too happy" was actually true, he had to tell his girlfriend not to stand too close to him because then the nuke would start beeping faster as his heartbeat sped up.
* The Toolbox Murders and its remake both feature characters getting stabbed and brained with a claw hammer.
* The Toolbox Murders is stabbed in the arm and spine with a handheld drill that looked kind of like an egg beater.
* The Toolbox Murders — Slasher series. 1 film and a 2-film remake series since 1978.
* The Tooniverse Emissary, cartoon characters are melted into puddles of lifeless paints, which are then scooped up into vials to prevent anybody from reviving them.
* The "toothbrushes up their bums" UL was the basis of the joke at the end of one episode of
* The Tooth Fairy (2006): The Tooth Fairy is burned and her victims all go to Heaven. Everybody moves away from the house, due to the traumatic memories. Then the witch appears in the window...
* The Tooth Fairy and has dentists as minions. The 2017 update of the attraction replaced her with a male version who aesthetically fits this trope better.
* The Tooth Fairy: When Derek tries to get out from the house, he ran into an angry growling cat. The cat goes after Derek while trying to get out of the house. When Derek gets close to the door flap, he uses an airhorn, and the cat jumps up like crazy, then goes off.
* The Toothpaste Genie. Her first wish is to be "neat," and her hair gets cemented into place. She then wishes for her nails to grow back when she bites them, but each time, her nails grow back longer and thicker until they're ridiculous. The kicker here is that the Genie can't create anything out of thin air: if she wishes for something (in this case a horse and a baby sister), it has to come from somewhere else.
* The Toothpaste Genie is about an unskilled young genie bound to a tube of toothpaste. He explains to the protagonist that the more successful and esteemed a genie is, the better the container they're assigned to by their superiors. Toothpaste tubes and boxes of laundry detergent are apparently the bottom of the totem pole, with fancy bottles being near the top.
* The Toothpaste Millionaire Rufus Mayflower responds to the high cost of store-bought toothpaste by starting his own toothpaste company with the help of his best friend.
* The tooth was in a tricky position; to perform the root canal, the dentist had to find another route for his drill to follow.
* The "Top 10 Hottest Animated Guys," which were chosen by the fanbase, mostly consisted of various types of "
* the Top at the end of the Rogue War, he does so by freezing him first and then smashing the ice.
* The top brass are devious, biased, prejudiced and so full of personal vendettas that it prevents them from doing any actual police work.
* The top brass, under pressure from City Hall to decrease crime by any means necessary, begin juking the stats, putting quantity of arrests over quality.

Valchek is the most blatant about admitting to his fellow Majors that he'll resort to juking.
* The top European Soccer teams rely heavily on imported talent. France, who most recently won the 2018 World Cup, has a team almost entirely consisting of African players, who are ironically subjected to horrific racism when they're NOT playing for the National Team.
* The top figures in the Barksdale drug empire are Avon Barksdale and his friend since childhood, Russel "Stringer" Bell. At the end of Season 1 Avon is arrested on possession charges and goes to jail, leaving Stringer as the acting head of the group. During that time Stringer, who has always been the more intellectual of the two and more interested in the legit world, comes to realize that the Barksdales cannot survive by continuing Avon's style of constant warring with other gangs and attempting to seize control of the streets, so he makes peace with the various rivals of the Barksdale group and pushes the gang both towards legitimate investments and becoming the supplier for drugs to all the gangs in the city, rather than just another gang peddling drugs on the corners. By the time Avon gets out of prison Stringer seems tantalizingly close to the legitimate business world he's been dreaming of, but Avon is dead set on still being an old school gangster and has no use for Stringer's ambitions. That disagreement, combined with a powerful new gang that challenges the Barksdales to a
* The TOPGUN instructors fly A-4 Skyhawks in order to simulate the performance of Soviet fighters. This makes for something of a zigzagged trope on a meta level: the Skyhawks are portraying Skyhawks... Skyhawks whose role is to portray MiGs.
* The Top Gun trophy is an admitted artistic license by the writers. As their technical consultant says on the special features documentary that if there really was a Top Gun trophy nobody would graduate because they'd all die trying to get it.
* the top had been sheared off, and the wheels were starting to fall off.
* The Top Hat Job security systems and ex-military security officers on the lookout for thieves and spies everywhere.
* The topic has mostly been avoided by the students who are in similar circumstances; while some of them are
* The topic is likely to come up in any of the human/youkai pairings, as well as any immortal/youkai or immortal/human pairings, such as Keine x Mokou, since the immortals are
* The topic of young love is discussed in episode 7. Ririka's father believes ten year olds are too young for crushes and should spend time playing instead. One of Ririka's classmates tells him that he's old fashioned and asks him if he had crushes at that age. She convinces him that ten year olds are old enough to be infatuated.
* The Top is an incredible genius who is, among other things, a wine connoisseur. This has made him a pariah among the other, more blue-collar Rogues.
* The Topman Tribe in the Battlerock and Dreadnaught galaxies. Bowser would also get his own version of the Star Spin to use against you from the second time you encounter him.
* The top of his head is just one massive scab with several old scars...from drills, screws, and other implements used on him. He didn't break and escaped.
* The top of the page contains a necessary simplification. Modern weapons are so accurate and fire so quickly that the old standbys like lines and squares simply don't work. However, that doesn't mean that modern soldiers run about willy-nilly. A modern squad or platoon of soldiers has a very complex shape designed such that when maneuvering, the unit's weapons provide it with excellent security in each direction and the unit can reform when it must "react to contact." When approaching an objective, facing obstacles, crossing dangerously open ground, or otherwise encountering anything suspicious, a well-trained unit has a pre-planned response. Since these formations are complex, evolve slowly, and generally would be boring to watch, don't expect them to show up on camera, aside from some close-quarters battle drills like room-clearing.
* The topper is an ordinary horse being ridden by a creature that is a cross between a rainbow and a unicorn. (Who is usually herself ridden.)

* "The top science fiction authors choose the best stories they ever wrote" — 1954
* The Top Secret Adventures Of Buttons Mc Ginty", so he writes it on a "Wanted" poster, causing Lily to think he's changed his name and call him "Buttocks" herself.
* The top-selling Japanese CD single of all time, "Dango San Kyoudai", was originally from an animated segment aired on this show. This also happened to a lesser extent with "AIUE Ohayo", a song from the show that teaches the Japanese alphabet.
* The top-tier members of the antagonist group, Cosmo Entelechia, are nigh invulnerable, thanks to their possession of "multi-layer mandala-style barriers" that are almost completely impenetrable to any form of physical and magical attack.
* The Torchic family. Although they are based on the badass blood-sport chickens from Thailand, rather than the silly aspects of chickens.
* The torchlight system is mostly just a straightforward way to manage risk / reward: you're safer in the light, but can get better rewards in the dark. Some of the ways in which it's implemented make sense, like getting better scouting events in the light or being at a bigger risk of an ambush in the dark; some really don't, for example finding more loot in the dark (as if it's easier to find stuff when you can't see it) or having a higher chance of ambushing enemies in the light (somehow it's harder to notice you approaching if you carry a bright torch).
* The Torchmen, the primary air defense system for Mechanicsburg, comprises a
* The Torchwood Institute, a secret organization founded by Queen Victoria to operate outside of the British government, fighting aliens and confiscating their technology by force for the good of the British Empire (with the implication of starting a new one when it dissolves). Though its sinister façade of mystery fades prior to the debut of the
* The Torchwood Institute was formed specifically to police the Doctor's activities, even though every time he comes to Earth, he saves the planet from alien destruction.
* The Torgue corporation doesn't even have an army. They throw guns to their workers - who themselves are little more than bandits - and watch the ensuing carnage as half their workforce kills itself.
* The Torment, and presumably other Children Of The Spider, from the book series
* The Toronto Maple Leafs are quite possibly the league's most infamous example. The Leafs are the only Original Six team to have never won a Cup since the NHL first expanded in 1967 (despite being the winners of the final Stanley Cup awarded in the Original Six era), and have never even returned to the Cup Finals since (the longest Cup Finals drought in NHL history, with a 12-year lead over the Arizona Coyotes who also have an active drought). With the Blues quenching their Cup drought in 2019 (the last of the original expansion teams to win the championship, meaning that until they won, they were tied with the Leafs), the Leafs now have the longest active drought in the League, and, as of 2019, are only two years behind the longest drought in League history, that belonging to the New York Rangers (see below).
* The Toronto Maple Leafs are technically the second-most-successful team in the NHL's history in terms of the number of Stanley Cups won, but they have not even made the final since their last win in 1967, and the seeming inability of even good Leafs teams to advance in the playoffs has made them a punchline in the NHL. Most recently seen in 2021, where they entered the playoffs as the #1 team in their division only to lose in the first round to their hated rivals, the Montreal Canadiens, who were the lowest-ranked team from any division to make the playoffs. Even worse as the Leafs had a 3-1 lead in a best-of-seven series, only to lose the next three games straight.
* The Torpedo Bay is an important set piece but has unusual architecture for Starfleet. The set originated as the Klingon Bridge from
* The torpedo ram HMS Thunder Child destroys two tripods and possibly a third before being destroyed itself. The crew's
* The torpedo ram (with a "spar torpedo") was a common tactic during the American

Civil War — The CSS
* The Tortoise and the Hare, bear this moral out pretty well. In some versions, the Tortoise outright cheats - there are multiple tortoises or the tortoise rides on the hare. In these cases the moral is "Brains over Brawn" (or "It's OK to cheat").
* The Tortoise and The Hare. Despite being greatly athletic, the hare loses the race due to his laziness.
* The Tortuga bomb is a twisted variant of this trope: Tortuga's severed head is placed on a tortoise stuffed with explosives.
* (The Torture of Hope) by Villiers de l'Isle-Adam is that yanking the dog's chain is the most sadistic form of torture.
* The torture room gets equipped with a chainsaw, ladder, rusty tools, and a hidden Claymore.
* "The tortures and debauchery engaged by vacationing devils are best described in vague terms to players."
* The TOS episode "The Ultimate Computer" is a great example of this trope, combined with a little
* The TOS Writer's Guide acknowledged this trope right from the start: the formal orders to the captain of the
* The total cost of the raw material used to construct the first American flag was $405.90.
* the total destruction of the Red Court, the deaths of two Kemmlerites, and Harry sort-of allying.
* The total lack of the Royal Guards when The Storm Kings' Army invades Canterlot, as
* The Totally Amazing Spider-Man: Clover's complaint in Chapter 6 about being assigned to bring Spider-Man in.
* The Totally Amazing Spider-Man in for questioning, the spies attempt to lure him in by staging a mugging, but quickly find themselves out of their element. Clover screams for her life and ends up in Spidey's web, to her disgust, and Alex runs for her life when she sees Spider-Man approach. Afterwards, Clover is far more cautious in trying to capture Spider-Man.
* The Totally Amazing Spider-Man: Sam is able to pick up on Spider-Man's spider-sense by noticing how he was able to shoot his web- or from her perspective, "fire his cable", without even looking where he was firing.
* The Totally Amazing Spider-Man, shouts at Peter, but regrets it after deciding he's cute. Peter, who has just begun his superhero career and is still timid, is scared off by Clover.
* The totally deadpan "I'm hit, I'm going in." from the Helicopter attack scene in
* The total number of roles across the five games and bonus packs is eighty-six as of 2019. While it's highly unlikely that someone would have that many friends to play such a big session, it is possible to select them all. If so...
* The Total Zeroes, a villainous sibling duo debuting in Season 2, are shown to have a lair in "
* The Totenkopf Hussars which serve as the household guard of the Andermani Emperor and his family.
* the to The Breakers, a competing Palm Beach resort, while right-wing activist groups began to book their own events at Mar-a-Lago out of support for Trump.
* The Totto Land arc starts out as Luffy and half of the Straw Hats trying to sneak into Big Mom's territory to rescue Sanji, and while they're in the area steal a key clue to the location of One Piece. Since the Straw Hats trying to be sneaky goes
* The Touch, a woman murders the man who raped the mentally challenged girl she has cared for since birth. She's executed after refusing all attempts at a defense, feeling completely justified in her actions. Afterwards, the family of the girl has her body cremated and her ashes spread over the grave of her victim, ensuring that even in death, she'll be able to torment him.
* The touchiness of racial issues is dealt with on several other occasions as well. For example, when the President is considering making Charlie Young his personal aide, he briefly has reservations that it may look bad to hire a young

Black man as what amounts to a valet. At one point, Leo asks Admiral Fitzwallace, the Chairman of the Joint Chiefs of Staff, about this:
* The Touch of Green Fire or its two sequels. It's only hinted that it begins with an "s" but isn't "Shannon".
* The Touch of Green Fire The maturity differences due to their age gap is trouble enough, but the fact Kim is a hero and Shego is a criminal means that their relationship could lead to more problems.
* The Touch of Green Fire went on is explained as being due to this. Kim thought she liked him because she figured she was supposed to, not because of genuine attraction. She moved on when he began dating someone else on the cheer squad.
* The touch of the Lying Darkness also qualifies. Its effects can be incredibly powerful, allowing you to hide more effectively in the shadows and perform increasingly powerful darkness-related feats. However, in exchange, you lose your identity bit by bit, until you're
* The Touch, the male protagonist's wife Elizabeth and mistress Ruby meet at an event and instantly hit it off. Despite initially resenting each other, the two end up feeling sorry for each other—Elizabeth for having left everyone she knows and loves to move halfway around the world to marry a man she's never met and doesn't love, and Ruby for having to watch the man she loves with another woman while their relationship must be conducted in secret because she's a madam.
* The toughest enemies in Senpou Temple are by far the monks wearing straw raincoats and wickerwork hats, whose acrobatic agility and immense skill with their double-bladed naginatas make them a challenge to face even just one-on-one.
* The Tough Guide to Fantasyland (1997). Jones was probably not referring to any published books when she wrote this.
* The Tough Guide to Fantasyland: After going into how (under Domestic Animals) very few livestock seem to exist, although many cats and dogs do, there's a suggestion that this should make Tourists wonder at just what the meat in Stew is.
* The Tough Guide to Fantasyland, alongside other fantasy staples, and named "Magelight" or "Magefire". It's an extremely common skill among wizards that allows one to create a small ball of blue or white light hovering above their hand, in the air or at the end of their staff. It serves two purposes: lighting dark places and showing that a character can, indeed, do magic.
* The Tough Guide to Fantasyland" and "Thomas the Rhymer" in this way.
* The Tough Guide to Fantasyland: A number of bad guys will take pleasure in raping, torturing and murdering the people in their clutches.
* The Tough Guide to Fantasyland: Armageddon, the world-ending battle between Good and Evil at a place set out by a Prophecy early on.
* The Tough Guide to Fantasyland: A translation spell may be provided in some tours, so the Tourists can easily understand the natives of Fantasyland.
* The Tough Guide to Fantasyland, but most are slim and beautiful. They're all quite strong and definitely not to be insulted. Even so, they're possible to befriend. Though the rumor is they're all lesbians, often the women end up having sex with Tourists, whether male or female (it's apparently quite good).
* The Tough Guide to Fantasyland: Discussed at length, where most of the embellishments noted on this page are also pointed out. Jones also notes that, since these galleys only ever seem to contain rows of chained-up slaves and nothing in the way of merchandise or soldiers (and for that matter often lack a clear reason for their voyage) it's a bit difficult to understand why people keep building them.
* The Tough Guide to Fantasyland: Every castle, palace and temple us riddled with these. They're variously used for adultery, escapes or spying. While inside these places, no room can be deemed safe from people spying through holes in the walls.
* The Tough Guide to Fantasyland. Groups of them will wait in cemeteries. Single ones will desire vengeance over whatever matter is keeping them around in the world. Regardless, it's best for Tourists to be wary of ghosts generally, because they can still harm the living. Being deceased, living people will also have a hard time killing them.
* The Tough Guide to Fantasyland in the royal court. The peasants may well revolt

during the Tour because of this oppression.
* The Tough Guide to Fantasyland: It's stated the Rules of Magic rarely change, but some secrets often will be reserved to have a nasty surprise later on a "Tour". Additionally, usually at least three different kinds of magic will exist, all with their distinct Rules.
* The Tough Guide to Fantasyland: Long ago, there was a Wizard War that left large tracts of Fantasyland as Waste Areas, devastated by magical pollution that persists into the present. Few details are given of what exactly happened. However, this is one of just two historical periods which ever get referenced.
* The Tough Guide to Fantasyland: Many Tours will feature a vast number of gods. However, oddly enough the adherents of polytheist religions will generally be devoted to just one (henotheism).
* The Tough Guide to Fantasyland most often though other people too. The sacrifice being disemboweled, raped and or mutilated in some other way precedes this quite often.
* The Tough Guide to Fantasyland: Natural plague is unknown (possibly due to a lack of bacteria or viruses). Magical plagues though are common tools of the Dark Lord and his minions. Due to this, it isn't caught by those not specifically targeted (like the protagonists).
* The Tough Guide to Fantasyland notes that if you see a map at the start of a novel, you can expect to "go to every damn place on it." The book itself has a map which is very obviously Europe upside-down, with all the countries given anagrammatic names.
* The Tough Guide to Fantasyland: One feature of the monotheist religions if they are fanatical is suppressing all other sects.
* The Tough Guide to Fantasyland: One Tour Companion, the Slender Youth, is very often a girl in disguise as a boy (usually a Princess).
* The Tough Guide to Fantasyland: Only the bad guys are allowed to have an army starting out. The good guys will only raise one as a last retort when it has grown almost too late, strongly implying they are at best a necessary evil. Bad armies will also completely devastate the countryside while marching and foraging.
* The Tough Guide to Fantasyland, she uses this as a key pieces of evidence for the theory that fantasy worlds' ecosystems have been recently ravaged (another is the way piles of refuse around oppressed peasants' huts don't just rot away.) She comes to the conclusion that the systems are re-establishing themselves with humans at the bottom, and everything will be fine.
* The Tough Guide to Fantasyland, so care is needed in asking questions.
* The Tough Guide to Fantasyland spells. Many seem to be alive, invariably made of black leather or human skin. They may smoke somewhat when touched. Some may try to entice the curious into reading them, but others stubbornly keep their pages blank. Those really wishing needing to consult them will need a lot of spells for protection. All Tourists are advised to leave this for a Wizard and or Tour Mentor.
* The Tough Guide to Fantasyland: The center piece of most Tours. Usually a magical object is sought to use in defeating the Dark Lord and or saving the world. Many clues will have to be followed, with numerous barriers and does which are overcome while doing so.
* The Tough Guide to Fantasyland: The Enchantress. The Guide outright says "Enchantress" is "another word for seductress, only with more punch". They use magic to make themselves look more beautiful and thus be appealing for seducing a captured male hero.
* The Tough Guide to Fantasyland: The entire book is one of cliched fantasy settings, all encapsulated into "Fantasyland", with the "Management" being their collective authors who stage "Tours" from our world. Many entries poke fun at the ignorance or laziness that causes frequent problems with how all this "Fantasyland" gets depicted. Lots of "Original Management Terms (OMTs)" (i.e. hackneyed, overused phrases) are listed as well.
* The Tough Guide to Fantasyland: The Female Mercenary character's fear of sex is explained due to her being sexually abused in childhood sometimes.
* The Tough Guide to Fantasyland, the first thing your callow apprentice-magic user

learns to do is light a candle through sheer concentration (and they are considered weak if this is the only thing they can do). The author sardonically notes that it's a good thing no one in the real world has this "minor" power. No character is ever shown honing the ability so that they can ignite buildings and other people at will.
* The Tough Guide to Fantasyland: The King's Men, elite soldiers who surround and guard kings, who come in three types:
* The Tough Guide to Fantasyland: This law, applied clumsily, is responsible for many of the book's entries.
* The Tough Guide to Fantasyland: Tourists will feel sorry if Fellow Travelers who have names are killed-otherwise they won't.
* The Tough Guide to Fantasyland (unsurprisingly). It's stated they've evolved to their size because of insects, their former prey, having gone extinct.
* The Tough Guide to Fantasyland: Very likely to show up. Most Councilors will be evil and giving the King bad advice or generally ruining their kingdom, as secret minions of the Dark Lord. Generally they will soon try to have all of the heroes imprisoned.
* The Tough Guide to Fantasyland: Walled Cities are guaranteed to be besieged at least once. The enemy always tries to storm the walls, instead of simply starving the defenders out, which is the more realistic and safer way. Even so, they'll succeed eventually and loot the city. Inhabitants will suffer much murder, rape and theft. Tourists however will always be able to escape with Secret Passages.
* The Tough Guide to Fantasyland: When it talks about "Slaves, Female" of the Royal Harem type:
* The Tough Guide to Fantasyland, with apprentices, journeymen, masters and a Guildmaster with a name like The Faceless Man or The Gentleman. Heroes will at some point meet with the Guildmaster after being led blindfolded to his lair. His face will be hidden, and he'll have them look after a young thief they've met in return for the Guild's aid. This thief will be a great member of the Tour, with suggestions that he is the Guildmaster's son.
* The Tough Mudder race has an obstacle called the Warrior's Carry, where you have to walk a certain distance with someone else on your shoulders in a fireman's carry position. Should you be unable to carry someone or be carried for whatever reason, you can just run through Warrior's Carry's designated path with no one on your shoulders, and it will still count.
* The Toughs acquire their own miniature version of LOTA's cannon from the Neoafa. It's mounted on a corvette-sized ship and can fire through (or rather,
* The Toughs as a whole, given that they have a standing payment for killing attorney drones.
* the Toughs' instead. Various methods of preventing Teraport usage were developed later.
* The Toughs' Reverend also wears a pair of snazzy shades. He and Kevyn even get into a small argument over whose are cooler;
* The Toughs' "Terapedoes", Teraport-equipped warheads, would take this
* The tough-to-read, secretive, and sometimes infighting crew of the lighthugger
* The To'ul'h civilization has been agricultural for over 100,000 years and the Muuh civilization has been spacefaring for
* The To'ul'h greatly enjoy something called "polmusic", which is apparently political debate mixed with opera. Most Terragens (Earth-origin beings) don't really understand how that can even be a thing.
* The To'uls at least had the excuse of evolving on a planet with no fossil fuels and chaotic weather that made air travel impractical. Once the terragens bootstrapped them they proved as prolific as their patrons.
* The Tour Championship/CME Group Tour Championship (season-ending events, both with limited fields, on the PGA Tour and LPGA Tour)
* The Tour de France, the most challenging and most prestigious bicycle race, has a long and storied history of cheating. Most people have heard of the decades worth of scandals involving performance-enhancing drugs (PEDs), but the early years of the race involved much more overt methods of cheating. The second Tour de France

(in 1904) had so much cheating that it almost resulted in permanent cancellation. Multiple cyclists were disqualified for cheating, and the 5th place finisher was declared the winner since everybody ahead of him was disqualified. And he had
* The Tour de Nesle affair ended with the flaying of the lovers of the daughters-in-law of King Phillip IV.
* The Tourettes Guy, full stop. A normal tone of voice for him would be shouting for other people, and he can (and often does) get louder.
* The Tourettes Guy is entirely based around this. The primary offenders are Danny (the titular Tourettes Guy) and his father. Danny's ex-wife Shirlena also has quite the foul mouth at times.
* The Tourettes Guy (The videos appeared as early as 2000, series celebrated it's 20th anniversary on December 25, 2020)
* The Tour has since chosen to play this trope straight starting with the 2018-2019 season. The 30 players who make it to the Tour Championship will now be given a stroke handicap ranging from -10 for the points leader, down to even par for the final five qualifying players. The Tour Championship and FedEx Cup champion will be the player with the lowest net score after factoring in their starting handicap. (In an unusual case of
* the tour helicopters crash, this time into the Mosasaur's lagoon. Curious, the mosasaur approaches it and seeing people inside, tries to reach them. To do so, she brings the helicopter to the nearest barrier reef but in the process, she scrapes the aircraft against one of the bay windows and ends up creating a breach. The tunnel is flooded and the emergency system isolate it with doors, trapping some unlucky visitors in it and those drowns.
* The tournament announcer is never seen without his shades. It also protects him from the Taiyōken, allowing him to observe the fights even everyone else is blinded by the intensity of the light. This inspires Son Goku to "borrow" the Muten Rōshi's shades to counter the Taiyōken. He also does the peace sign on top of the successful counter.
* The tournament between the top soccer clubs of Latin America is the CONMEBOL Libertadores Bridgestone,
* The Tournament itself has shades of this. While it does have codified rules,
* The Tournament, Lai Lai and Father MacAvoy commandeer a bus at gunpoint to escape from Joshua.
* The Tournament, Miles Slade cuts a finger off each of his victims as a souvenir.
* The tournament montage when Team Shaolin defeats all of their opponents in
* The Tournament of Power has this as its main rule — aside from disqualifications, ring-outs are the only way to win, and whichever team has the most members remaining at the end of time limit wins. And unlike the other tournaments in the franchise, ki-based flight is explicitly against the rules (natural flight is allowed, which lead to some teams specifically recruiting
* The Tournament. One of the characters, "The Frenchman" used Parkour to good effect.
* The Tournament, Petrov enters the church by leaping through the window; immediately scattering a spray of grenades around him.
* The tournament ranking boards in Olympus Coliseum in (at least some of) the
* The Tournament, the service station attendant has his earbuds in and is looking away from the monitors, and so somehow fails to a notice a fight to death going on behind him between Lai Lai and Miles, despite them crashing through the glass door into the shop.
* The Tournament: When Father MacAvoy is in the alley attempting to throw up the tracker, a police car pulls up and a uniformed officer steps out. Father MacAvoy starts towards him before he pulls out a submachine gun as Lai Lai yells out that he's a player.
* The Tournament: When tied to a pole inside the strip club, Joshua is able to undo one of the screws enough to cut through his bonds.
* The Touryst. Before you get him something actually appropriate for making an ice cream flavor, his specialties include such incongruous items as salami salmon and vanilla onion. He himself laments those flavors tend to drive away the crowds

looking for something to beat the heat.
* The towering Ceaseless Discharge can be taunted into falling off a cliff, with only a few hits from your sword necessary to serve as 'encouragement'.
* The Towering Inferno, a man staggers out of one of the elevators in flames after it stops on the floor the fire is on. There are many other scenes throughout the dramatic portion of the film that depict people on fire and dying of their injuries.
* The Towering Inferno, as the fire rages out of control, Chief O'Halloran is told the only way to stop it is to blow the water tanks on top of the building. There's only two people in the department who have the training to do it and the other one just taken to the hospital. When O'Halloran asks his commanders how he gets down, their stares have him groaning. Lampshaded when he tells Bigelow the plan.
* The Towering Inferno, Dan Bigelow and his secretary/mistress die almost immediately following a tryst in his apartment.
* The Towering Inferno movies, all featured a random group of people who would be trapped together in the disaster, which usually didn't happen until past the mid-point of the movie.
* The Towering Inferno (one person's name top right, the other's lower left) was invented. In fact, at McQueen's insistence, both men were paid exactly the same and had the same number of lines.
* The Towering Inferno, right as Roberts reports the fire to Duncan on the phone.
* The Towering Inferno. The conflict revolves around trying to save people from a burning skyscraper.
* The Towering Inferno. There is enough material left out to make at least another whole story.
* The Towering Inferno, which is set aflame by faulty wiring, is treated as one of these, even though it's only about half the necessary 1000+ meters. It's "the tallest building in the world" at 138 stories and 1673 feet (505 meters) tall, which, as of July 2014, would only put it at #5.
* The tower is actually part of GAIA's subordinate function MINERVA, used to shut down the Faro Robots that had destroyed the world.
* The tower is now a national monument. Also the rebels weren't just defeated, they blew themselves and many of the Turks up.
* The Tower King, was set on an Earth that had collapsed into anarchy when a malfunctioning solar-powered satellite somehow bathed the Earth in radiation that made the production of electricity in any form impossible. A cult worshiping electricity set itself inside a power station, carefully maintaining the generators and pretending that electricity still existed.
* The Tower of Babel was built because its builders feared being scattered across the Earth. As part of His punishment, God did just that.
* The Tower of Druaga: Ahmey's lance has a drill bit at the tip, which she can activate using a ripcord.
* The Tower of Druaga. As Kai said about her hero king husband who slew a god and united two warring nations under one rule: "Even Gil was just a ordinary boy in love."
* The Tower of Druaga both do this with classical dungeon-crawling enemies. Minotaurs are "Kusarakks" and Dragons are "Quokks", for example.
* The Tower of Druaga, complete with retro graphics, and where gravity can be manipulated by tipping the scales of a giant balance located in the center.
* The Tower of Druaga disguises herself as the goddess Ishtar to distract Gil from retrieving the Blue Crystal Rod. Gil uncovers the fake and is able to convince Succubus to relinquish the Blue Crystal Rod.
* The Tower of Druaga game) until they can manage to maneuver him through all 40 floors.
* The Tower of Druaga had a regular axe that he exchanged for a beam axe in the second season.
* The Tower of Druaga has elements of this depending that fluctuate from episode to episode.
* The Tower of Druaga has the Army of Uruk and some miscellaneous Climber parties

perform a bit better than the rest of the examples of this page, but they're still not as good as the heroes. Season 2 introduces the Golden Knights, who are completely worthless against anyone with a modicum of fighting experience.
* The Tower of Druaga is said to grant a single wish to whoever claims it.
* The Tower of Druaga, little kid character Ki fights soldiers and people that annoy her by employing this technique with a spoon.
* The Tower of Druaga. Major bonus points for being able to climb up a tower, kill every monster in said tower, destroy the evil demon Druaga, save his lover Ki, and then go back down the tower!
* The Tower of Druaga moments. There's also episode 5, where various characters try to navigate a part of the title tower that's covered in magical booby traps, some of them changing the victims into video game sprites, and the background into the background from the original game.
* The Tower of Druaga, the best and most important items are blue (exception: the Ruby Mace is superior to the Sapphire Mace).
* The Tower of Druaga, the group is eating at a diner on the street when the sound of a rampaging monster comes from the distance. While Ahmey does hurry up, she still has to finish her bowl before they can run to the rescue.
* The Tower of Druaga, the original game remains well-known in gaming communities (it had been released internationally on Namco Museum Volume 3 over a decade before the anime was created), and in Japan the game remains popular.
* The Tower of Druaga. Therefore it lives and breaths the trope to the T. Adventures challenge the titular tower in search of treasure and glory. Should anyone ever manage to reach the top and face Druaga it would be a feat not accomplished since the king (the character from the game).
* The Tower of Druaga, Utu proposes that his group of Climbers tell scary stories to entertain themselves. He proceeds to tell a story about a curse doll. He continues to suggest "Let's tell scary stories!" during tense or dangerous moments throughout in the series, and in the second season, the Curse Doll itself makes a brief appearance in the "House of Eternal Spring."
* "The Tower of Dr. Zalost" has the title antagonist yell "Stupid dog!" after his tower has been demolished by Courage.
* The Tower of London is even more haunted for obvious reasons. The murdered princes Edward V and Richard Duke of York are seen playing around the White Tower, the headless ghost of Anne Boleyn stalks the halls terrifying the Yeoman Warders and so on.
* The Tower of London was historically used as one of these. Originally, the Tower was a royal residence, so it was also used as a polite prison (the pretense being that the prisoners or hostages were "guests of the king"). After the kings stopped living there in the Tudor period, conditions got worse.
* The Tower of Pimps, a stack of four gold blocks on an obsidian block pedestal, in
* The Tower of the Elephant", Conan the Barbarian encountered a spider as big as a pig, which struck down Taurus of Nemedia, a prince of thieves, with one bite. It suffered an unfortunate death via treasure chest to the face.
* The Tower of the Elephant". The final draft of "The Phoenix on the Sword" contains the phrase "Zamora with its... towers of spider-haunted mystery," mirroring a scene that would appear in "The Tower of the Elephant".
* The Tower of the Elephant" Yog tells Conan that he is the hand of fate.
* The Towers Of Februari: In the alternate world Tim winds up in, the months have the same names as in our world, but they all are 30 days long, and there are 5 unnamed days at the end of the year. The first clue he gets that he's in a strange place, is that when he asks someone "What day is it today?", they answer "30 February".
* The Towers of High Sorcery actually enforce this trope, as each of the three Orders worships and draws power from one of the three gods of magic which are represented in Krynn's sky by three different-colored moons. Good-aligned mages are associated with Solinari, the white moon; neutral mages with Lunitari, the red moon; and evil mages with the hidden black moon, Nuitari. Mages traditionally wear

white, red, or black robes to display their alignment. When Raistlin transitions from neutral to evil in
* The Towers of Trebizond is generally a light comedy of manners/travelogue, featuring, for example, an old woman riding a deranged camel to church and gentle mockery of attempts to convert Turkish people to Anglicanism. Although the book sometimes discusses faith in more serious tones, it generally maintains its breezy air right up until about five pages from the end, when the protagonist's poor judgment in driving kills her adulterous lover. She then spends the remainder of the book musing about the relationship of love and faith and ultimately seems to decide that she is destined to die outside of the church, which she believes to be the path of salvation.
* The tower tilts because of a too-small foundation laid in sandy soil that is not well suited for supporting a tower (there are, in fact, a couple other leaning bell towers in the city of Pisa). It has continued to very slowly tilt over the centuries and by 1960 had tilted to 6 degrees. The tower was closed for
* The Town: Agent Adam Frawley claims this to be true when Claire Keesey (who doesn't know her new boyfriend is a high-profile robber) asks him whether or not she should have a lawyer present. Though he prefaces it by saying "it isn't a very civil libertarian thing" for him to say, as he's a cop. When Claire is later implicated in Doug's crimes, he says that this time she really will need a lawyer.
* The Town, but he is ultimately an FBI agent trying to shut down a ruthless and dangerous gang of bank robbers.
* The Town - Doug is forced to flee Boston and can likely never return due to the FBI manhunt.
* The town from the episode "Avatar Day" has a statue of Chin the Great/the Conquerer, although that also doubles as a memorial, as it's on the spot he died.
* The Town has a pair of bank robbing brothers as its primary characters. Their heists and the police pursuit that follows form the central plot of the film.
* The town immediately brings out their weapons, and the giant (who doesn't look much more than annoyed by the catapults) just steps out of the way and lets the boulder flatten the town.
* The town inhabitants are actually Worgen who act friendly towards you, in hopes of turning you into one too, but you get better, and they get hostile. After this every trapper settlement is hostile to player.
* The Town, is disgusted by his colleagues beating people or taking hostages, and cares a lot about his community to the point of donating his stolen money to local charities. It's not hard to see how a woman could fall for him even after finding out that he was involved in robbing her bank and taking her hostage, leaving her with PTSD.
* The town is practically bustling at the moment, as a new radiation shield is being built to replace the old one in the infamous power plant. It is, however,
* The Town is the only surviving bank robber of his gang in his final robbery job.
* The town of Barovia has its own permanent version of its domain's closed border; only the Vistani know how to make a secret antidote that allows safe passage.
* The town of Forks, Washington has seen a 600% increase in tourism in the last few years, nearly all of it due to it being the main setting of the series. There have even been a pair of
* The town of Hartlepool, UK, is famous (probably apocryphally) for hanging a monkey they believed to be a French spy during the Napoleonic Wars. The story goes that a French ship was wrecked off-shore, and when its monkey mascot was the only survivor to come ashore the locals (having never seen either a monkey or a Frenchman before) questioned him, then hanged him when he refused to answer. There's a darker version of the story - it wasn't a real monkey they hanged, but a powder monkey, i.e. a young boy employed on warships to prime the cannon with gunpowder.
* The town of Hialeah, Florida had no laws against ritual sacrifice of animals... until some members of the Santeria religion (a small Christian sect with elements of African religious practices, including sacrifices) moved in, at which point they hastily made one.

* The town of Marietta, Ohio is known as the first settlement founded by American pioneers outside the original 13 states, founded in 1788. Some settlements already existed in Kentucky and Tennessee by then, but they were parts of Virginia and North Carolina at that time, so they don’t count. Vermont, Maine and West Virginia had yet to break off of their original states too, but they’re east of the Appalachians (or, in the case of West Virginia,
* The Town Of Nowhere because any chat member can submit for a majority vote what they want said character to say or do.
* The town of Punxsutawney, Pennsylvania had become a major tourist spot since the film came out.
* The town of Pyrewood is home to Alliance-friendly NPCs during the day,
* The town of Speedwall from the novel, is renamed Scuttlebug for the film.
* The town of Springfield is named after founder Jebediah Springfield. Nothing unusual about that. However, nearby Shelbyville is named after its founder, Shelbyville Manhattan.
* The town of Takehara's popularity has risen quite a bit since it has been featured in
* The town of Umdera is periodically disassembled and hauled to a new location where it is rebuilt. The longest the elders recall the village ever staying in one place is ten years and the briefest just a few months.
* The town of Washimiya, Saitama, Japan experienced a massive surge in tourism thanks to
* The townsfolk don't actually know what is going on, exactly. Nor did any of them instigate this state of affairs: it's perhaps one of the creepiest "bubbles of evil" on record. They know they all seem to black out at the same time every night, then experience horrific nightmares, then wake up in their beds. When going out their doors, they then have to fix whatever damage has been done to the town (although not all of it sticks, so it's very weird). This happens regardless of whether they leave the town, commit suicide or die by accident trying to e.g. fix a roof or whatever. They always,
* the townsfolk laughed so hard they fell into a coma for the rest of their lives.
* The town's lone black male, Robert E., was surprisingly exempt from this, probably because he was
* The townspeople of Xenotime in the anime's two-parter "The Other Brothers Elric." In the original Light Novel
* The Town. Surrounded by a firing squad of cops, he announces that he's giving himself up, then leaps from cover with guns cocked. Only after the police gun him down does anyone notice that the guns were empty.
* The Town That Dreaded Sundown has a particularly infamous kill which involves the Phantom stabbing a woman to death using a bayonet attached to a trombone. He plays it to make the blade go in and out of her.
* The Town That Dreaded Sundown — Horror series. 2 films since 1976.
* The Town That Dreaded Sundown, the Phantom escapes from Captain Morales and Deputy Ramsey by dashing across the railroad tracks ahead of an oncoming train.
* The Town That Dreaded Sundown wears a potato sack with holes for eyes.
* The Town That Dreaded Sundown with the real life suspect being described as wearing a white mask with eyeholes cut into it.
* The Town: The film centers on a working-class Boston Irish crew of bank robbers who execute several daring heists throughout the film.
* The Town: When the Atlantic armoured car driver attempts to escape from Fenway Park, Doug jams his automatic rifle through the gun port and blazes away. The driver is killed and the armoured car keeps driving and crashes into the police lines.
* The town where the ponies were almost sold by Capper is called Kludgetown.
* The town where the Twentieth Century Motor Company used to exist in
* The Town with No Name are simply annoyed by getting shot in the chest. They still fall over and die, however.
* The Town with No Name, one can order a drink which must be caught before it slides off.

* The Town with No Name, the Man with No Name grabs a book out of nowhere and flips through its pages before keeling over
* The Town with No Name, the Man with No Name receives a series of telegrams from his duel adversaries.
* The Town with No Name, when you beat Wildcard McVee at cards, he'll start to say he wants to duel outside, but then shoot you through the table while he's speaking. There's no clue about this on screen; the only way to survive this is to know in advance that it's going to happen and shoot Wildcard during the speech. This means that in the story, your character beats Wildcard at cards, then kills him for no reason.
* The Toxic Avenger after Toxie murders the criminal Cigar Face's associates Knuckles and Nipples to save the life of a policeman they were terrorizing. Mayor Belgoody and his cronies are trying to figure out who would kill Knuckles and Nipples, one of the men bringing up that the two crooks were hated by everyone.
* The Toxic Avenger: Bozo and his gang run children over with their cars for fun. One even masturbates to pictures of the bodies.
* The Toxic Avenger does this sort of thing with various body parts. However, the first and arguably funniest instance occurs in the first movie, in which he grabs a man's arm and rips it off with such ease that the man has time to break out of a grapple and shout a threat to the titular monster before he even realizes his arm is still in Toxie's hand. As soon as he notices, Toxie smacks him to the ground with the disembodied limb.
* The Toxic Avenger during a cruel prank, and mutates into the hideously disfigured, but hulking, superhumanly strong Toxic Avenger.
* The Toxic Avenger has a scene where a criminal named Cigar Face tries to get even with the Toxic Avenger by shooting him alongside five other thugs. Toxie jumps out of the way quickly enough that the crooks instead shoot themselves down and he then gives them the bird.
* The Toxic Avenger hired an amputee so Toxie could rip his arm off. Of course, the SFX team still had to make a fake stump to put over the man's actual stump, to compensate for the difference between a freshly ripped-off arm and a healed stump.
* The Toxic Avenger is particularly gleeful in its bashing of New Jersey. The villain song is called "Jersey Girl", and it describes the mayor of Tromaville to be evil and slutty. Then there's the opening song that establishes the setting.
* The Toxic Avenger jumps on the roof of the bully's car. They attempt to swerve to shake him off.
* The Toxic Avenger — Superhero comedy series. 4 films since 1984.
* The Toxic Avenger). Melvin runs afoul of a local gang of hoodlums, he ends up falling out of a second-story window at the gym - straight into a vat of toxic waste. The resulting mutation transforms Melvin into the Toxic Avenger, a deformed creature. he proceeds to beat up baddies (and boy, are they bad!) in the most gory ways possible.
* The Toxic Avenger musical makes bleach the only thing that can kill Toxie. Luckily filthy Hudson water can resurrect him.
* The Toxic Avenger, one actress plays the mother of main character Toxie, as well as the main antagonist, Mayor Belgoody. Throughout most of the play, she just has offstage costume changes. But, in the one scene the two characters share, she wears a costume with one character on each side of her body and, by turning alternately in profile, "duets" with herself to sing "Bitch/Slut/Liar/Whore," in which the two women call each other these names.
* The Toxic Avenger Part III: The Last Temptation of Toxie, Toxie refers to his penis as "John Henry" just before urinating on Satan to put out the flames projecting from his body.
* The Toxic Avenger Part II, where a woman is shown speaking in a high-pitched voice after getting hit in the crotch.
* The Toxic Avenger, said superhero fighting crime through graphic dismemberment and bloodshed, and generally all of the schlockiest special effects one could possibly stomach. This film went on to spawn a franchise that spanned four movies, a short-lived animated series (!), a musical (!!), and a beat-em-up video game.

* The Toxic Avenger's schtick of making absurdly-violent fight scenes and deaths cross over from being disgusting to hilarious.
* The Toxic Avenger subverts it optimistically, Melvin's transformation into a hideously deformed creature of superhuman size and strength has improved his social life, his standing in the community, and is generally beloved and worshipped as the first superhero from New Jersey.
* The Toxic Avenger, the crook Cigar Face curses Toxie in a high voice after suffering a blow to the nads.
* The Toxic Avenger when the title hero starts making name for himself by helping the populace of Tromaville.
* The Toxic Avenger, where Satan tries to get to Toxie by forcing him to give up lest he kill a busload of children.
* The Toxin symbiote, when bonded to Patrick Mulligan, had a relationship similar to that of a father and a naughty little child.
* The Toy and bratty kid Eric are trying to break into Eric's father's printing press, when Eric casually mentions that he has the key. Jack asks Eric why he never told him he had the key and gets the stock answer, which Jack doesn't find particularly amusing.
* The Toy Biz Arachniphobia toyline includes the Lizard/Man-Spider hybrid Man-Lizard, Hobgoblin/Spider-Man hybrid Spider-Goblin, and Morbius/Venom hybrid Vampider.
* The Toy by the kid who buys him. Near the end of the movie he does it right back to the kid.
* The toy company handling the merchandising wants to make all the best weapons glow in the dark, so the producers have that incorporated into the strongest weapons on the show.
* The Toy Dolls song and album, "Bare Faced Cheek", the cover of which is shown above.
* The toyline also had the Crimson Guard Immortals, the elite of the Crimson Guard. Possibly a
* The toyline-only character Sonar from Beast Wars is considered female by some fans due to the lack of gender-specific pronouns on the toy's bio.
* The toyline originally spun off from the National Highway Traffic Safety Administration's Crash Dummy PSAs, starring dummies Vince and Larry. They were licensed to Tyco for the toyline, which was initially known as "Vince & Larry, the Crash Dummies", and the packaging included a U.S. Department of Transportation trademark for their names (as well as the PSA slogan, "You could learn a lot from a dummy; buckle your safety belt!"). However, the PSAs ended up getting pulled for fear of being misconstrued as toy commercials (even though neither the toyline nor Tyco were mentioned). At that time, Tyco rebranded the line as "The Incredible Crash Dummies," and Vince and Larry were replaced with
* The Toyminator (not misspelled), the previous book, began. This is only its first problem.
* The Toyol of Malaysian folklore is a fetus that died after being born or was stillborn. It can be summoned by those who want to use the Toyol
* The Toyota concept car (not intended for mass production yet) known as
* The Toyota Highlander commercials circa 2008 featuring the little blond kid. He talks about how his parents used to be lame before they got the "cool" Highlander. The way he brags about it and the way he looks down on the kid whose parents drive an older car really give off the Spoiled Brat vibe.
* The Toyota MR2 performance car was renamed to simply the Toyota MR in France. The reason is that MR2 is pronounced "em-air-deux" in French, or "est merdeux". Although the word isn't considered too scandalous to say in French, nobody would want a car called "Toyota is Shitty".
* The Toyota Prius has most of the gears on a gearstick attached to the dashboard. "Park", however, is a button. People driving Priuses for the first time may try to shift the gearstick into a "park" position that isn't there.
* The Toyota Prius hybrid, for all intents and purposes, invented the 'green' car as we know it today. Many automakers had experimented with alternatives to the

internal combustion engine before it; the
* The toy piano music playing over the opening and closing credits in the
* The toys also changed noticeably back then (it was part of a general shift at Lego due to bankruptcy).
* the toy's resistance to damage on the way down, so on top of weighing ten thousand times less than the competition, it also didn't have any time to build up velocity. (Admittedly, there were a fair number of Tonka ads that showed that Tonka trucks really were pretty survivable, this just wasn't one of them.)
* The toys seem to fall into either "imaginary friend" or "I've got no Strings" on the
* The toy version of Kazi uses an all-purpose connector piece for a head, so he has no face. Krika, Bitil and Gorast also lack faces, because their masks weren't designed to fit on any head-piece — however unlike Kazi, they probably had no faces in the story either, due to being Makuta.
* The "Trường Sơn trail", also known as the Ho Chi Minh Trail, was considered one of the deciding factors of
* The Trưng Sisters, military leaders who ruled for three years after rebelling in AD 40 against the first Chinese domination of Vietnam and worshipped widely as folk heroes. Their leadership also has many female local leaders, who are venerated local folk heroes on their own right.
* The Trưng Sisters were known for successfully rebelling against the Han Dynasty's occupation of Vietnam by assembling an army composed mostly of women. According to legend, the Chinese were able to disperse the army by
* The Trịnh and Nguyễn lords divided Vietnam into two because of this, with a helping of courtly intrigue. At first they both claimed to be vassals of the Later Lê dynasty intent on defeating the Mạc usurpers, but utilized this to increase their influence and land.
* The Tracey Ullman Show after he had said he was satiated following sex.
* The Tracey Ullman Show have mentioned that this was intentionally done to make real products different from bootlegs - however, that is untrue and it's simply a mistake caused by early concept art.
* The Tracey Ullman Show "shorts" era, there was "The Funeral," where Bart is (well) himself at his elderly Uncle Hubert's funeral. (Presumably this is Abe's brother or cousin.) First, Bart clenches his hands in sadistic anticipation of viewing Hubert's corpse at the visitation, only to collapse when he actually sees Hubert's body. Later, he helps "direct" the pallbearers to the gravesite, in preparation for the casket being lowered into the ground; a disgusted Homer grabs Bart before he can pull any other hijinks.
* The Tracey Ullman Show, the kids are each being put to bed with something said that keeps them awake and freaked out - Marge sings "Rock-a-bye Baby" to Maggie, who visualizes herself falling out of a tall tree on a windy day.
* The Trachiniae as she talks to the chorus about the "strange sight" that is the bubbling, disintegrating piece of cloth she used to smear a love potion onto a shirt she just gave her husband.
* The Tracker Jacker wasps. Their name is pretty self-explanatory, as they were bred to A) track down their prey and B) (hi)jack their victim's nervous system with their Grade A hallucinogenic venom. They home in on the first person they see and don't stop until said person is stung.
* The Tractate Middoth, the ghost is implied to be a human spirit possessing a horde of spiders and shaping a human form out of them and their webs.
* The Trade Federation in the prequel trilogy is wealthy and influential enough to maintain its own navy (albeit one composed of converted cargo ships) and blockade entire planets at a whim, as well as have its own seat in the Galactic Senate. Yeah, they were rich enough to explicitly buy political power — and they were only the largest one. The whole Separatist Army during the Clone Wars was led by factions like this, such as the Banking Clan, the Techno Union, Geonosian Industries, and the Commerce Guild, which as a baseline completely control the planets they're based on — many are powerful enough to make bids on additional planetary takeovers, at least in the frontier. The entire reason the

conflict started seemed to be a dispute over new trade tariffs, which
* The Trader of Stories has husks, oxen of another colour (they look like a dinosaur crossed with an armadillo).
* The Trader of Stories - she has amnesia and wants to discover what she's forgotten and why.
* The Traders as a planet within the Foundation's sphere of trading/mail, where Les Gorm was given the job of delivering a message to Ponyets. The Greek word glyptos means carving or engraving, as in writing.
* The Traders because the Greek word glyptos means carving or engraving, as in writing.
* The Traders": Planet Askone associates all high tech with the First Empire (except for the few starships and such they managed to take when the Empire withdrew from their planet). To avoid the vices of the Empire, they shun science and the trade of sacrilegious technology.
* The Traders": This story starts going into detail about the sort of atom-powered devices that the Foundation has been building since Mayor Hardin proved that Terminus ruled the Four Kingdoms, rather than the other way around. They've made knives that generate a force-field blade, mechanical garbage disposers, and even transmutation machines (actually a modified food irradiation chamber, like a microwave oven).
* The Trading Post, one of whose writers is also behind Transplanted Life.
* The trading sequence from the future is more traditional in terms of gameplay. It starts with a Chicken Egg used to wake up a long-dormant Talon once it hatches, and continues through most of Hyrule by trading items one after another. Some of the deliveries are timed (for example, the Odd Mushroom must be given away in three minutes or else it will spoil), and in particular, the penultimate one is impossible to do without Epona (even with her, it's very difficult if you forgot to plant a Magic Bean near the entrance to Dodongo's Cavern in the past). The final reward is the powerful Biggoron's Sword.
* The traditional-architecture form of this is one of the more fascinating examples, in part because of its political overtones: do you ever wonder why the US Capitol and White House or the French Palais Bourbon (seat of the National Assembly), look like Greek and Roman temples while the British Houses of Parliament and Canadian Parliament Hill look like medieval cathedrals? Because in the first half of the 19th century, the Neoclassical style was associated with Enlightenment republicanism, while the Gothic Revival style was, being Romanticist, associated with monarchism. Indeed, Neoclassical designs were seriously considered for both Westminster and Ottawa, but then dismissed on the grounds that they were too republican. (Everybody quietly ignored the fact that the seat of the actual monarch, Buckingham Palace, is emphatically Neoclassical.)
* The traditional case is a character chased up a tree and out onto a limb, as above. It is reasonable for them to trust their weight to a branch while the chaser is cutting through it, because sawing the branch off will make the
* The traditional drinking song "Good Ship Venus" is about a ship whose crew consists
* The traditional dynastic model for much of the Muslim world is that formulated by the fourteenth-century North African historiographer Ibn Khaldun, which assumes that dynasties are formed generally by the leader of some powerful nomadic people conquering a settled region and replacing the current rulers while leaving everything in place. It holds that the first generation is still savage, but very strong, the second generation is adapted to civilized living, and inherits his father's connections and vision, the third generation begins to be soft, arrogant, and insufficiently political, and from the fourth generation it's all downhill until the new conquerors come.
* the traditional enmity between knights and dragons, usually skewed in the dragons' favor: one strip, for instance, features a dragon handling the scalding hot armor of a freshly roasted knight and calling for his wife to hurry up with the hot pads; another features an irritated dragoness scolding her husband for eating in bed and leaving leftovers (i.e., knights' armor) all over the sheets.

* The traditional folk-punishment for suspected wifebeaters in the South was "the rough music" meaning to gather around his house and clang pots and pans or other noisy implements until he became so exasperated as to leave town.
* The traditional folk song "Maggie May" has the chorus refer to her eventual fate:
* The traditional folk song "The Butcher's Boy" (also known as "The Railroad Boy").
* The traditional Irish folk song "Finnegan's Wake" has a variation: Tim Finnegan, known as
* The traditional Irish song "The Two Sisters" (covered by several musicians over the years, including
* The traditional Jewish equivalent of "The House That Jack Built" ends with the ANGEL OF DEATH coming to kill the butcher who killed the ox who drank the water that quenched the fire that burned the stick that hit the dog that bit the cat that ate the goat that Daddy bought for two zuzim... (There may be another verse after that about the Angel of Death himself dying in the End of Days, but that just makes it weirder).
* The traditional Jewish song "One Little Goat" starts with the goat (that Father bought for two
* The traditional lullaby from the Southern United States, "All The Pretty Horses" (or "Hush-a-bye"), was sung by black slaves during the pre-Civil War period. The line "wee little lamby...cried for her mammy" refers to slaves forcibly separated from their own families in order to serve their owners.
* The traditional magician act declined during the 1990s as audiences became increasingly cynical about numerous popular tricks. While jokes about how easy some of these were had been common for decades, the
* The traditional 'Mech flamer draws superheated plasma from the 'Mech's fusion engine, and is not subject to this trope (destroying the flamer just ruins the compressor that fires out the plasma). On the other hand, vehicle flamers
* The traditional Okinawan weapon Kama (single handed short sickles) have forms with one in each hand. Both weapons are used for both striking and trapping the opponents weapon (the expectation was a kama weilder would be facing an opponent with a more traditional weapon such as a katana or bo).
* The traditional pagan religion of Oz is Lurlinism. Lurline is a fairy goddess and the world's creator is a dragon who lives underground.
* The traditional professional wrestling tribute to deceased wrestlers is the ringing of the bell ten times at the beginning of an event.
* The traditional role of the opening batsmen is to play defensively and hang around and blunt the initial barrage of the opposition's fast bowlers in order to set up the team's innings, often scoring quite slowly. (In)famous "Stonewallers" include Bill Lawry for Australia and Geoffrey Boycott for England. However, in recent years, ODI and Twenty20 cricket especially have featured more aggressive openers, as the strategy has been to exploit the fielding restrictions that are in place early in the innings. Making
* The traditional Russian name for this trope is "grand piano in the bushes". It comes from an old Soviet stage comedy sketch "Completely coincidentally" by Arkady Arkanov and Grigory Gorin, which parodied obviously staged Soviet news reports that were made to look live and improvised. In the sketch a TV reporter interviews a retired heroic factory worker, with objects and people that help illustrate some parts of his story just "completely coincidentally" happening to be nearby. The sketch concludes with the interviewer asking the worker what he does in his spare time, to which he replies that he is a skilled musician, and wouldn't you know, there just happens to be a grand piano hidden in the nearby bushes for him to demonstrate his musical skills.
* The traditional Scottish folksong "The Royal Forester" is a pretty horrible one. The girl was
* The traditional soft landing method for high stunt falls in film and TV was (very deeply stacked) piles of empty cardboard boxes, which progressively collapse and absorb the impact, allowing a landing without injury.

* The traditional song "Froggy Went a Courtin'", recorded by hundreds of people including
* The traditional Sunni interpretation of Islamic law typically invert this: Muslim men are allowed to marry non-Muslim "People of the Book" (Abrahamic religions, i.e. Christians and Jews, though occasionally expanded to include Zoroastrians), but do not permit Muslim women to marry non-Muslim men. If they want to marry, the men must convert. This is based on two verses in the Quran:
* The traditional (though likely false) account of the death of King Edward II of England is that he was murdered with a red hot poker up the back passage. He is not the only person supposed to have been killed this way, either.
* The traditional tune "The Night that Paddy Murphy Died", with one of the more famous versions by
* The traditional Victorian vampire has a range of supernatural abilities.
* The traditional way to kill vampires in western literature involves staking, beheading, then burying at a crossroad at midnight with garlic in their mouths. They can still come back. Usually, the only way to truly kill them is to burn the body and scatter the ashes to prevent them from reforming, usually into moving water.
* The traditional "When I Was Single." Despite his stated sentiment, the widowed narrator who supposedly rejoiced at his wife's death remarries several times.
* The tradition amongst European noble families is that the eldest son will inherit the estate and the younger sons will select a career, either in military, clergy, academia, or as civil servants. The name
* The tradition carried over to aviation, often invoked in situations where the plane has to land on water and has basically become a sinking ship anyway:
* The tradition continues today; Western warships at least have A LOT of passive sensors that will enable them to determine where their enemies are (or at least in what direction) and sometimes WHAT they are (depending on the specific nature of the emissions). Radiate too long and you will tell that NATO frigate in what direction you lie and how many missiles it will likely take to sink you.
* The tradition continues with bread sellers vending snacks to the Turks watching the Kurds battling with ISIS in Kobane.
* The tradition is particularly common in Japan, who had picked it up from the British. However, they didn't realize
* The tradition. On the other side of the coin, you have Sofie Liv, who makes a concerted effort to find positives in anything.
* The tradition remains alive to this day, as shown by the many intervention of the Italian Army whenever a natural disaster hit. And in the past they've done things worth of the Romans: for example, in
* The tradition was unfortunately broken with the "Viltrumite War" trade.
* The traffic police in the Republic of Georgia were notoriously corrupt. The president's solution?
* The Trafford Centre takes this from another angle: The main character did order presents for his family from Amazon, but they haven't been delivered on time so he has to participate in this at the last minute.
* The Tragedian, who wants their character to suffer, and to play that suffering out.
* The tragedy of all this is that the only reason to use the psychic children to power the computer was to make it more realistic. If they settled for worse graphics they could have won!
* The Tragedy of Greenhilt, Prince of Denmark and goes to the Plane of Air to look for her birth parents rather than kill herself.
* The Tragedy of Loki of Asgard, and Loki-as-Odin mutters under his breath, "'Twas indeed hilarious!"
* The Tragedy of Man, by the same director, is a rather uneven mishmash of fluid animation and one frame per second dissolves, due to most of its ~20 year production time having been spent on raising funds. Often, the animation style and quality changes midway through a shot. Certain scenes, however, stand out not only for their superb details but also their high animation quality with expressive,

lively movements.
* The Tragedy of Man" were the core mantras that kept him going and not giving up on the project.
* The Tragedy of Mariam ends with the death of the title character at the hands of her impulsive and jealous husband.
* The Tragedy Of Mcdeath, a man born by C-section, the aforementioned treemen, a knight's female squire, and a few dwarves, none of which are subject to the prophecy.
* The Tragical History of Romeus and Juliet didn't go this far, and they receive no punishment.
* The Tragicall History of the Life and Death of Doctor Faustus could possibly be persuaded to wear something that requires that little dignity.
* The Tragically Hip are hockey fans. Their song "Fifty Mission Cap" is about a hockey player who disappeared after a plane crash. One of their more popular shirts is designed to look like a hockey sweater.
* The Tragically Hip, preferring to let him languish in prison rather than admitting a mistake. He sued on release. The settlement was ten million.
* The Tragically Hip's "Bobcaygeon" garnered interest in increased tourism of the eastern Ontario town of the same name. The largest community events in Bobcaygeon's history included a viewing of the Hip's last tour, and a candlelight vigil for their late frontman Gord Downie. Despite this, the song is not about the town but the name was included to complete a rhyme.
* The Tragically Hip song "Fireworks" zigzags this trope, first describing how "everyone remembers" the climactic moments of the 1972 Summit Series against the USSR ("we all squeezed the stick, and we all pulled the trigger"), before the
* The tragic conclusion of the David Geddes song "Run Joey Run" has Julie taking a bullet from her enraged father meant for her boyfriend Joey.
* The tragic part turned out to be that Wally didn't have much memory or knowledge of the (well-written and positive for both of them) relationship she had had with Green Lantern Kyle Rayner before her latest Ret Gone - and so of course she came back with only the vaguest memories of her time with him. Then again, that could just be the writers playing with the readers.
* The tragic passing of Kobe Bryant and his daughter Gianna in a helicopter crash caused those names to trend in 2020. Kobe's name had previously spiked in the late '90s and early '00s when he first started playing for the Los Angeles Lakers.
* The trailer. After going on about how the movie is rather silly instead of serious fare, it then segues into a commercial for a Chinese restaurant for no particular reason.
* The trailer features a very creepy nursery rhyme, "Drunken Whaler", a modified version of the classic song "Drunken Sailor", sung by a childrens' chorus:
* The trailer for anyone who was watching the movie for the first time.
* The trailer for ''Comedian'' starts with the voice-over actor being exposed to a pipy feedback when lifting his headphones up too close to the microphone.
* The trailer for starts off with sad music and a ponderous announcer talking about how it won the Cannes Film Festival Palme d'Or... before the screen promptly gets riddled with bullets and the real trailer starts.
* The trailer for the Christmas dark comedy Fatman has the Saban Films logo colored Christmas red (or alternately blood red).
* The trailer for the last installment, there is a character that deems herself a scientist and says "I choose not to believe in ghosts." Yep.
* The trailer for the Vaccination Special included two scenes that didn't make it to the final episode: Red yelling "Better watch your back at school tomorrow!" at the boys and a scene in the school bathroom where Cartman tells several other students that they need to bring life back into the school. The latter scene presumably became the scene in the school bathroom where Cartman tells Stan and Kyle about his and Kenny's idea to prank their teacher.
* the trailer for were not seen in the final version of the episode or were altered, like the glances we see of Michiru and Nino in their civilian identities.
* The trailer has a haunting version of "Ring-a-Ring-of-Roses" over the last few

seconds.
* The trailer opens on a pan to a character standing before a view of New York, giving an impression of a different kind of film. Only for the character to turn around to reveal himself as Jason Voorhees, and murder will ensue soon in a theater near you!
* The trailers and marketing contained nods to the fact that the character is often considered a complete joke by many people, with one
* The trailers for the game put a special emphasis on this trope, with one showing U.S. forces getting into position for battle in a nighttime suburb as Soviet paratroopers drop down in front of them. Another shows said Soviet paratroopers jumping out of a plane revealing massive anti-aircraft fire, with raining planes to go along with those raining men.
* The trailers have been known to highlight the dissonance on occasion. The
* The trailer shows Elisha Cuthbert playing a version of this. However, instead of simply being "quirky," she is portrayed as being
* The trailers in general show each member of team RWBY wearing their 'public mask', i.e. what they want others to see themselves as at the time, instead of behaving as they actually are. The Red Trailer was explicitly more of a combat portfolio than an insight into Ruby's character, but the other three are also rather different from what they'd become.
* The Trail Of Anguish can't say exactly where they're from, from the museum exhibit suggests they're from a lost era.
* The Trail Of Anguish chase the gang of nerds, forcing you to travel underground.
* The Trail Of Anguish, Chris is just a cute boy to you, but he claims to be on some unrevealed adventure of his own.
* The Trail Of Anguish informs you, "You don't need to use the bathroom right now. It's an adventure game, after all."
* The Trail to Oregon! and that they should probably go see a broadway musical instead.
* The Trail to Oregon!': Grandpa (Tittymitty) fought his own personal war against the lobsters in 1812. The leader of the lobsters, Cornwallis, was in love with his wife, so the two fought. That war is the reason Grandpa's face is on the million dollar bill. The rest of the characters chalk this up to a story Grandpa made up, but at the end Cornwallis returns to pay back his debt to Grandpa and saves the family from a waterfall.
* The Trail to Oregon!: The family all believe in God, being pioneers in the 1800s, but they don't always have a great opinion of Him, thanks to their various misfortunes, leading to such immortal lines as, "God is a vicious, two-faced prick" and "Our farm burned down. God did it, damn Him to Hell!". That said, it's made clear that the Father is using "acts of God" to excuse/downplay his own mistakes, and the Mother does pray for guidance and help on occasion.
* The "Train documentary" shorts have a few details that become important in Book 2, such as the Movie Theatre Car having black spray paint all over some areas because
* The trainees in the Dark Forest are subjected to brutal combat training in their dreams each night, and their injuries carry over into the waking world. And if you die in your dream, you die in real life.
* The Trainer Dressphere for Rikku provides her with a monkey named Ghiki for a battle companion.
* The trainer for a Mage Inquisitor in Rift Magic is literally the only person to not die and/or disappear out of 20 mages experimenting with the rifts. And even then it's quite clear that not all of her made it back. The lore of the Specialization in the Codex has an account about how the writer's master found that the rules had changed, which led to her drawing far more magic than she could control. Both Cole and Solas recognize it, however, since they're both attuned to the Fade, and know that a Rift mage is using spirits themselves as a source of energy.
* The Trainer from a Far-Away Land although it's due to the fact Kantonese has the same language limitations as Japanese, meaning he can't make the "N" sound. It

happens so often that N gives up trying to correct Satoshi. Satoshi would pronounce N's name as Een-neh, Een-ne, Ennu or Enne.
* The Trainers aren't trying to harm you or your Pokémon aside from making them faint (aside from a few
* The trainers probably keep their Pokéballs in a specific order so they don't have to look. After all, they are in a straight line and there are only six of them. Also implied by the games.
* The training camp attack ends this way for the League of Villains in
* The train in this fic was created to literally travel outside the bounds of creation to explore infinity. Meanwhile, the show's train is revealed at the end of the first season to be
* The Train, is shot in the leg. This was added because Lancaster had injured his knee playing golf, but it serves to make the final scenes of the film even more tense and exciting.
* The train itself. Since it already has the mysterious ability to travel through dimensions, fans like to imagine that humans from the show's Earth aren't the only passengers on the train, and that it can be host to beings (both human and non-human) from various different timelines and dimensions. Cue half of the fics for the fandom consisting of
* The Train Job", Captain Mal Reynolds and his second in command Zoe are on a shady job, stealing goods from The Alliance. They are questioned by a local sheriff, and Mal decides on the spot that a married couple looking for a job will be the best cover-up story.
* "The Train Kept A-Rollin'" was originally a jump blues song by Tiny Bradshaw that has been covered numerous times, with the most famous being by
* The Train live in the script but die in the film due to their actors being too busy to film all of their planned scenes.
* The Train Man escapes from Seraph, Morpheus and Trinity this way in
* The Train's character was shot and injured while crossing a bridge because the actor had injured his knee playing golf and could only walk with a limp.
* The Train's efforts to hijack a train containing priceless works of art stolen by the Nazis.
* The trainspotting episode has Satoru and Takeshi consult the I.N.S. to look up train schedules and maps to plan out their day trip—when a severe earthquake hits the area Satoru's hotel is situated in, Satoru's parents use the I.N.S. to get up-to-the-minute information on the extent of the damage.
* The Train the liberation of Paris is expected any day, so the resistance fighters figure that protecting the art train will be their last job of the war.
* The trait is there for Asia, but characters like Lisa and Julie keep her from fully becoming this.
* The Traitor Baru Cormorant to overcome the flaws of their race, as opposed to having those flaws eugenically bred out, Falcrest's preferred technique). Falcrest is also totally intolerant of non-Falcresti practices regarding gender, sexuality, and religion, and its vaunted meritocracy won’t matter at all if Baru, a lesbian, ever gets outed.
* The Traitor committed many atrocities, affecting a good portion of the Phantom Thieves, for the sake of
* The Traitor Game has spent their friendship laughing about their games with his friends. The consequences are nothing short of disastrous.
* The Traitor Game, was bullied at his old school and had no friends until he met Francis.
* The Traitor Legions and their griffon co-conspirators take advantage of this trope as well they send a "pony" assassin after the Griffon King and a griffon assassin after Celestia, in order to start a war between Equestria and the griffons that the Traitor Legions can take advantage of.
* The Traitor Manual. Part of the ceremonial garb worn by Frankenstein Destroyers when they hunt and destroy a luckless bot.
* The Traitor's Hand, and who proceed to slaughter their way through the cultists with abandon, leaving Cain to only follow the trail of destruction to reach their

goal.
* The Traitor's Hand be breveted to captain until they see if she's worthy (better than a full promotion, as if she'd screwed up the demotion would have showed up on her record). It certainly seems to have worked, as she ends up becoming the first Lady General, the highest rank in the Imperial Guard.
* The Traitor's Hand. He and an Arbite are tag-team interrogating a smuggler who hadn't realized he was working for a Chaos cult. Once this gets explained to the smuggler, Cain comments that he now understands why the interrogation chamber has a floor drain.
* The Traitor's Hand shows up, breaking the spell and revealing her as a homely middle-aged woman.
* The Traitor's Hand takes place on a planet that is tidally locked to its star. It's noted that this makes it almost unique in the Imperium in using the same time everywhere on the planet.
* The Traitor's Hand teleport into the facility ahead of them. They had just teleported from ships orbiting on one side of the planet to literally the complete opposite side, and Cain wonders to himself how many World Eaters are now entombed thousands of kilometers underground.
* The Traitor's Hand when a Chaos dropship lands in headquarters, and acquit themselves well, all things considered. Jenit Sulla, a quartermaster, ended up becoming the first Lady General, the highest military rank in the Guard.
* The Traitor Son Cycle) and allying with dark powers. Hartmut is an amazing warrior who in Book 2 defeats Bad Tom, the best warrior in the Red Knight's company, and then almost kills an intervening Ranald Lachlan who's one of the King of Alba's elite bodyguard.
* The Traitor Son Cycle and try to have the "witch" Queen burned at stake. The kicker being, of course, that the Patriarch of Rhum and his lackey, the archbishop of Alba, are (independently) making deals with two of this world's most Satan-like figures.
* The Traitor Son Cycle) are golden bears, which are giant, intelligent, capable of speech and absolutely capable of wielding weapons.
* The Traitor Son Cycle are not exactly very approachable in their natural form, so they shapeshift whenever they want to chat.
* The Traitor Son Cycle as a pawns in their "great game". An example of this are the ancestors of the Outwallers being brought to fight the Ondine race.
* The Traitor Son Cycle at the end of the first book, and it becomes his main weapon for the rest of the series.
* The Traitor Son Cycle between Irene and Walks on Clouds, as the two are far more affectionate with each other than people tend to be after two weeks of knowing one another, but with Walks on Clouds, one never knows what he/she's thinking, and Irene's feeling are in enough non-romantic turmoil that she doesn't even begin to think about this.
* The Traitor Son Cycle body after the former dies. While he's usually little more than a voice in his host's head, he sometimes takes over, whenever a difficult spell has to be cast, his host loses consciousness, or something catches the "demon's" (as one of the doctors calls him) fancy.
* The Traitor Son Cycle), but animalistic in behaviour, and any powerful magic user can easily control them.
* The Traitor Son Cycle centers around two sieges - first, of the city of Albinkirk and, after Albinkirk falls, of the Lissen Carak convent.
* The Traitor Son Cycle crafts a curse that spreads and behaves like a deadly disease. It manages to scour two countries before a cure (also magical) is found.
* The Traitor Son Cycle doesn't hide his interest in any pretty woman who happens to pass by. He never forces himself on them and is extremely nice and caring for his (many, many) lovers.
* The Traitor Son Cycle: dragons have some form of magic-based sense that works akin to echolocation - their roars resonate through the ethereal, letting them detect their prey.
* The Traitor Son Cycle has an almost superhuman ability to make friends and

command loyalty from people - it takes him less than six months for Morean soldiers to demand that he be placed on the throne, and at one point, Gavin notes that despite having only served alongside him a year, he already feels like he's been in their mercenary company since its inception.
* The Traitor Son Cycle has Jean de Vrailly, who believes himself to be the greatest knight in the world and has decided that this gives him the right to do whatever he pleases.
* The Traitor Son Cycle has Orley's warband, who used to be humans before they became giant and misshapen, grew horns and had their skin covered in some oily, icky substance that acts as an extra protection.
* The Traitor Son Cycle. He's a giant of a man and an excellent swordsman, who's introduced to the story when he comes out of nowhere and slaughters four men who have cornered Blanche. The people of Alba, most of whom have never seen a black man in their lives, initially think he's a demon she's summoned.
* The Traitor Son Cycle: In the end of the fourth book, Amicia — who's been balancing on the edge of "too magical to be able to exist in the material world" line for a while now — overexerts herself and Ascends, vanishing where she stands, although it's uncertain whether she becomes some sort of a ghost or is simply absorbed into the athereal.
* The Traitor Son Cycle is an extremely powerful and experienced magician, but he has a very short fuse and flies into a rage whenever provoked, leading to rash decisions - something that the heroes exploit to win against him in the first book. By his next appearance, he realizes that this is a flaw of his and gets better at controlling his emotions.
* The Traitor Son Cycle is in high demand among the heroes whenever they fight them.
* The Traitor Son Cycle is to destroy human civillization and twist what little's left into savage monstrosities.
* The Traitor Son Cycle is very deserving of his nickname - he's a scoundrel and a man you definitely don't want to meet in a dark alley - but he's unflinchingly loyal to the Red Knight and saves the day more than once.
* The Traitor Son Cycle loses an arm, the Wyrm has a replacement made of metal. It's magic, so it look, feels and acts like a normal hand, but it has all the toughness of its original material.
* The Traitor Son Cycle manifests as a cloud of thick black fog stalking the underground of the Harndon palace.
* The Traitor Son Cycle, on the other hand, is convinced that every human is secretly just waiting for an opportunity to give in to his darkest urges, and it takes only a little push to turn anyone into a monster.
* The Traitor Son Cycle raised to fight against the Wild. They're extremely well-trained and so silent, even the Wild can't detect them.
* The Traitor Son Cycle, Red Knight and Amicia finally agree that this isn't going anywhere and they're better off as friends.
* The Traitor Son Cycle's forces, which are pretty much forced into battle because they're running out of supplies.
* The Traitor Son Cycle: Tapio Haltija is an Irk — a cross between an elf and an orc gifted with extraordinary magic powers that can compel people to do his bidding. Nevertheless, he's still a trained knight and participates in physical battles and tourneys.
* The Traitor Son Cycle that Aneas' band is tracking down are very huge and well-armoured, but slow enough that when a fight breaks out, Aneas is almost running circles around them.
* The Traitor Son Cycle, the Church tries to hide the fact that the Lissen Carak abbey is composed solely of sorceresses. After they help rescue the city from the Wild invaders, however, pretty much everybody knows that, and it becomes less of a secret and more of something that's impolite to mention in public.
* The Traitor Son Cycle, the first arc of the story ends with a giant battle that spans almost a fifth of the third book, with the alliance of Men and Wild battling against Thorn's forces.

* The Traitor Son Cycle: The name "Gabriel" means "God is my strongman". Gabriel in the story believes that God hates him, and reciprocates the feeling.
* The Traitor Son Cycle: The Red Knight's favourite saying is "God doesn't give a f***"; hence why he doesn't worship Him unless he has to show up in a church for PR.
* The Traitor Son Cycle, the Red Knight was supposed to be one — his mother was raising him from birth to become a champion of the Wild and destroy the King of Alba. Fortunately for everyone, the Knight ran away from home before the plan came to fruition.
* The Traitor Son Cycle, the Wild creatures often eat humans they fight — and when boglins are involved, the feast begins even before the battle is over.
* The Traitor Son Cycle. They live in the woods, wield pretty powerful magic, and have among them everything from talking animals and demons to trolls and faries. Their morality is also very different from that of humans.
* The Traitor Son Cycle to some extent to make it more useful for combat.
* The Traitor Son Cycle, when it's said that the current Abbess of Lissen Carak used to be fairly... prominent at the royal court before one of her lovers almost destroyed the kingdom and she left to take her vows.
* The Traitor Son Cycle: When the "visiting" Gallish knights - who, for the past year, have been raping, robbing and generally mistreating the Alban populace - manage to arrest the Queen on charges of adultery and intend to have her burned at stake, the people finally have enough and a war erupts between the Gallish faction and Queen's loyalists.
* The Traitor Son Cycle. While some members of the Red Company are crass and unpleasant to be around, he's an outright misogynist, and at one point threatens to rape Blanche before Wilful Murder and Cully show up to make sure he doesn't do anything irreversible.
* The Traitor's Sword or Sword of Straw, in Amanda Hemingway's book. It's been passed down from King to King, but can be safely wielded only by the one destined. The problem is that
* The "Trampa" doormats. "Trampa" means "crap" in Portuguese. "Trampa" also means "trap" in spanish.
* The Tramp: A romanticized vagrant who is usually homeless and lives hand-to-mouth, but is generally honorable.
* The Tramp isn't pale grey anymore. He's now more of a greyish-black and off-white instead.
* The trance group Kaycee remixed Binary Finary's "1998", then made "Sunshine", which is a
* The Tranquilizer hopelessly blurs your screen, rendering you more or less completely helpless, for a good 30 seconds and
* the Transfer Pak for when certain minigames are completed in the Game Boy Color version.)
* The Transfer Point network is, by and large, the preferred means of travel in David Brin's
* The transformation caused by mana mutation is always painful because it reshapes the victim's body at random. All the while the brain is receiving signals of what's happening, including ones that it doesn't know how to interpret.
* The transformation continues to progress in the third and fourth books and by the final one the Captain has enough control over the interior to destroy a group of hostile boarders in increasingly gruesome ways.
* The transformation for dwarf planets is very rapid and makes them look outright monstrous (among other things, growing distorted extra limbs can happen), with their minds either subsumed or controlled by Black Hole once the transformation is done.
* The Transformation of Kadon, a basic spell within the Lore of Beasts and thus available to several different factions, allows the summoning of a
* The transformation of Sardinia in the Kingdom of Italy came after another successful round from Cavour, this time by presenting Garibaldi's conquest of the Kingdom of Two Sicilies as the common threat to both Sardinia and most of Italy to

get Britain and Austria to let him conquer the dukedoms of the North, most of the Papal States and the Two Sicilies
* The transformation of something from wholesome to perverse. Things that were once considered fun and entertaining are found to have a mysterious, dark underbelly. For example,
* The transformation scheme and overall design for Optimus Prime was dramatically changed in the film, as the toy for the film quite accurately reflected the original model. The general look of Optimus was similar enough to not be a big deal (all variations on the window chests, smokestacks on the shoulders and the grill for abs), but he got a significantly more accurate toy for the sequels.
* The Transformation series, teenagers' strange behavior turns out to be caused not by the candy fad or the hypnosis fad, but by subliminal messages in the television show everyone's watching.
* The transformations produced due to crossing the portal between the Pony and Human worlds are barely noticeable. In fact, in
* The transformation to her more powerful form may have enabled her to speed up even further to catch up with Chibi Moon. And then once she caught Chibi Moon, the flowing dress helped slow down their fall so that she would have more time to get Chibi Moon to wake up before they both went splat.
* The Transformers after achieving self-awareness. The heroic Autobots were the consumer goods, the evil Decepticons were the military hardware. Both race's culture and mentality remained in those two mindsets - peaceful Autobots, power-hungry Decepticons.
* The Transformers alien species of robots would frequently appear, often without any explicit Cybertronian origins.
* The Transformers: All Hail Megatron, Frenzy constantly emits a signal that drives everyone who hears it, including himself, into a mindless berserk fury. Only Soundwave is somehow immune. This was subsequently ignored in every appearance he's had since.
* The Transformers: All Hail Megatron, the Decepticon have in fact managed to build their own Combiner, Devestator, who requires the aforementioned Omega Supreme to stop. In the follow-up series, Swindle's creation of Menasor is treated as the equivalent to an illegal nuclear weapon.
* The Transformers: All Hail Megatron to Kup, but Hasbro rejected the idea. To make things more egregious, later issues contradicted the line by showing Scourge as part of the non-Decepticon aligned Dead Universe faction.
* The Transformers also have scalie fans, while G1!Ravage has feline furry fans.
* The Transformers among other things, the Autobot High Council was pretty much right on the money to not listen to him.
* The Transformers and naturally makes references to other Marvel characters and events. Once the comic underwent Continuity Drift it caused Spidey to look utterly delusional, as he keeps referring to people that don't exist and events that never happened.
* The Transformers and pulled the buildings out of the ground before carrying them off (Trypticon is rather a large Transformer).
* The Transformers and thawed out on Earth years later. He defects to the Autobots after realizing how evil the Decepticons have become in war, proving that Decepticons aren't inherently evil or at least that there's a few good ones out there.
* The Transformers, and the result is the normally entirely stoic Decepticon goes spare.
* The Transformers angle was not nearly as dominant as often claimed, at least not at this point in the series.
* The Transformers, anyway), and (B) the show is itself a 30-minute commercial.
* The Transformers, a place that doesn't get seen often in Western media. When the Insecticons are sighted there eating crops, both the Autobots and Decepticons go to investigate.
* The Transformers). Apparently giant 5obots can do that. In other continuities they were created by Primus, their god, meaning that even Transfomers can argue

about creationism vs. evolution...
* The Transformers are based on Peter's brother, who served in the US Marine Corps and the Vietnam War.
* The Transformers arrives and takes out what few Autobots were still standing with one shot.
* The Transformers as Devastator, Bruticus, or Menasor, that are far more muscle than brain.
* The Transformers as the Decepticons capture a bunch of humans and treat them like toys before the Autobots arrive to save the day. Then, both sides end up on a planet where the inhabitants are so huge that Transformers are like toys to them.
* The Transformers: At the end of the initial 4-issue intro, Shockwave arrived and killed all the Autobots, except for Ratchet who happened to be delivering Sparkplug to the hospital at the time. For several issues thereafter, Ratchet was entirely responsible for resisting the Decepticons, and even when he resurrected some of the other Autobots, he still served as leader until they could regain Optimus Prime's head.
* The Transformers: At the end of the season 3 episode "Ghost in the Machine", Starscream, in his new body, is catapulted through space by the explosion that gets Unicron's head away from Cybertron, which Unicron wanted for his own new body. He passes by the Decepticons, and Galvatron immediately starts firing at him.
* The Transformers: Autocracy. The trilogy goes into detail about Optimus Prime's early experiences as a Prime and the Autobots' first clashes with the Decepticons before their war ended up bringing them to Earth.
* The Transformers averted it with Megatron and Starscream both having very high, whiny voices (Starscream's being much higher than Megatron's). In fact, there were a number of Decepticons with high-pitched voices, while others had particularly deep voices, such as Thundercracker (deep but somewhat "normal" otherwise), Dirge (very deep and droning, befitting his name), and Motormaster (gravelly with an undercurrent of rage).
* The Transformers backdrop to explain the origin of the Dinobots). Material written for the UK version of the comic kept occasionally referencing the Marvel Universe for another year, with the last reference there being the appearance of Roxxon in issue 46.
* The Transformers, becoming immensely intelligent but finding it hard to fit in with the other Dinobots. He eventually transfers his intelligence to the Technobots (after building them in about five minutes) and returns to his normal idiot self. Strangely, this is probably the all-round smartest action on this page as a result of this trope.
* The Transformers: Being published by booth Marvel US and Marvel UK simultaneously. The fact that the UK version was not only longer, but on a (mostly) weekly schedule meant that a lot of original material had to be made. Most of which the writers tried to fit in between the US stories, with varying degrees of success.
* The Transformers). Both versions of Blurr are voiced by John Moschitta, mentioned above.
* The Transformers Brawn is one of the Autobots present and, upon seeing the locked exit, he promptly declares that "he'll get the door" and barges right through it without so much as a moment of hesitation or any indication that it slowed him down in the slightest.
* The Transformers, but when the series returned it was back to the same old rules for the most part. (There's the case of a space battle where ships known to be piloted were destroyed, though.)
* The Transformers by an Autobot while the latter tries to switch off a Transformer zombie signal. After it's off, the Decepticon shoots—a zombie that evidently didn't need the signal and had gotten really close to the Autobot.
* The Transformers came out). Hasbro has since started using it themselves.
* The Transformers can completely stop time within a certain radius of herself, however using the ability is very draining and prolonged use is fatal.
* The Transformers centered around his unconscious body. When the Decepticons came

after him, they were hailed as sky gods and promptly took advantage of it.
* The Transformers. Characters range from the psychotic war criminal Sandstorm who turns into a serial killer to the hilariously dysfunctional Scavengers who'd just like it if they could be left alone (except for one, who thinks maybe it'd be a good idea to start up a support group, which the others mock him for).
* The Transformers: Combiner Wars, Devastator had been established as a brutal force of nature not to be reckoned with lest he smash anything in his way. Here Devastator goes up against Superion, a Combiner fine-tuned to be in-sync with all sorts of different upgrades to his body and mind. Superion fights very creatively, shifting his body to avoid blows, activating the jets in an arm that Devastator tore off him, so it flies back and starts beating on him, and converting his leg into another arm for a sneak attack. Devastator just pummels Superion into submission and drags his unconscious body away. It takes two Combiners to finally bring him down, and even then Devastator didn't go quietly.
* The Transformers: Combiner Wars introduced The Torchbearers, who became the first all-female combiner, Victorion.
* The Transformers: Combiner Wars: Maxima is created by the Machinima team to be an original entity in their series who wasn't present in the comics the show adapts from.
* The Transformers: Combiner Wars: Nosecone is a drill tank, and he forms the leg of Computron. When Computron engages Menasor, he uses the drill to do extra damage when he knees his opponent in the torso.
* The Transformers: Combiner Wars Scattershot, who used the limb characters from Optimus Maximus to form Betatron. Hasbro eventually confirmed that Betatron's name was a reference to him being a "beta" version of the original G1 Combiner that Scattershot formed, Computron, and both they and Takara each released full Computron gift sets featuring all of the Technobots that were much better received.
* The Transformers: Combiner Wars she switched over to using a gun quickly.
* The Transformers: Combiner Wars tends to fall into this trap in more than a few places. While the characters are capable of showing facial emotion when silent, they are usually restricted to mouth flaps when talking. This results in things like Windblade having a blank expression while talking to Optimus, sneering between setences, and then going back to blank mouth flaps once she starts talking again while still sounding angry.
* The Transformers: Combiner Wars: The miniseries opens up with Menasor and Computron fighting. In the comics the series loosely adapts, Nosecone, Lightspeed and Afterburner were all killed during Galvatron's attack on the Kimia facility. With three of the Technobots gone Computron never got a chance to form in the IDW comics.
* The Transformers: Combiner Wars: The Mistress of Flame has a staff that resembles a large hammer. It honors the Forge of Solus Prime, the weapon of choice for the very first female prime, and the central figure in their religion.
* The Transformers: Combiner Wars: When Optimus Prime opens his chest to unveil the Matrix, it shines out through his chest panels and looks like a cross. At this point the Matrix was basically empty and incapable of shining (which was later retconned), and the Transformer mythology had changed to make it resemble Christianity less in this continuity; but the message of Optimus being a Messiah-like figure and the Matrix as a holy object come across easily.
* The Transformers: Combiner Wars with Superion easily trouncing him and when the other Combiners show up, Menasor is defeated easily and subdued by a trio of regular-sized bots. Coincidently Menasor's toy from the line that the comic is supposed to promote, is considered one of the most poorly designed.
* The Transformers comic, due to a quirk of publishing, ended up with over four times as many issues as the US comic. Issues 100 (1987), 200 (1989), and 300 (1990) all featured wraparound covers and double-length stories.
* The Transformers comics feature New York increasingly predominantly throughout their run, even though the crashed Autobot spaceship is located at Mt. St. Hilary in the Cascades in Oregon and the early comics tended to head over to Portland if they needed a metropolitan area to trash with giant robots. The switch to New York

came after the anti-robot task force known as RAAT set up shop there, and several later Decepticon bases were set up in the region. In a nihilistic alternate future the shattered corpse of Rodimus Prime is even displayed as hanging between the partially collapsed Twin Towers.
* The Transformers comics sway in this direction, as head writer Simon Furman didn't see why robots should or could think about such things. Cybertronians are typically portrayed as not having any relationships beyond friendships, and other works for Transformers that Simon is behind the pen on tend to follow suit.
* The Transformers comics, The Wreckers for Autobots and the Mayhem Attack Squad for Decepticons.
* The Transformers comics, this is how Titan Masters work. Unlike the G1 Headmasters, which worked either as two partners or (in the Japanese Headmaster cartoons) robots that piloted larger, non sentient bodies, Titan Masters take over the body of a larger Cybertronian who's head they've replaced.
* The Transformers creates clouds of smoke that he uses to disorient opponents or help himself and his fellow Autobots escape pursuers.
* The Transformers: Cybertronians can use any energy, Energon is just much better for them. The Decepticons, however, see this as "just oil." Makes sense, since all their Earth-based alt-modes run on oil-based fuels. Too bad their main base is made out of a nuclear power plant, which would have powered them better than oil, and yes the humans do point this out.
* The Transformers, Daniel Witwicky experiences this in the Autobot crypt when he's running away from an undead Optimus Prime.
* The Transformers: Dark Cybertron. Bludgeon mocks him, pointing out that there's a huge difference between actually learning a skill and just miming someone else; Bludgeon spent his entire life learning that fighting style (including how to counter it), while Skids was just copying the superficial details.
* The Transformers: Dark Cybertron, Nova Prime forcefully tries to convince Orion Pax (whom he insists on calling Optimus Prime even after he renounced the title) that they are the rightful masters of all existence because they are Primes.
* The Transformers: Dark Cybertron: Prowl smirks at the death of Chromedome's significant other, Rewind, as Chromedome's actions, under Prowl's direction, got Rewind killed. Chromedome throws him off a cliff for that.
* The Transformers: Dark Cybertron that just created a huge wait between seasons 1 and 2 of MTMTE. By the end, the only things the crossover accomplished for MTMTE was the introduction of several important characters, only two of whom couldn't have just been introduced in a normal MTMTE arc.
* The Transformers: Dark Cybertron they'd find this isn't an exaggeration; he has had worse, having been sliced shoulder to crotch (missing his spark, and thus a fatal blow, by inches) and one time being consumed by living explosions.
* The Transformers: Despite ironically writing over half of the episodes featuring him, David Wise disliked Omega Supreme, dismissing him as a "stupid character" based on a "completely illogical" toy.
* The Transformers did any Transformer actually DIE from a laser blast. Interestingly, the bio cards that came with the Transformers toys often revealed decidedly non-lethal weaponry - that thirty-foot steel warmachine's fifteen-foot-long 'laser cannon'? Yeah... more often than not, they were listed as being something like an EMP pulse cannon, that would disable robot targets but not, for some reason, blow them up. (This is the older toys, from 25 years ago, I don't know what the current toys say about their guns.)
* The Transformers did this, with Optimus Prime's head held captive and his body under the Decepticons' remote control.
* The Transformers dies. That's the equivalent of a biblical story ending with God getting shot in the face.
* The Transformers: Drift: Turmoil's appearance in the present all fall under type 1, but his flashback form has his cannon arm mounted rather than in place of his arm.
* The Transformers: Drift. Wing is a non-aligned bot who goes on missions to help people, no matter what species they are in distress. Takes an injured Decepticon

under his care, and argues with his superiors that it should their duty to help those who are suffering.
* The Transformers, during the episode "The Revenge of Bruticus" when Onslaught attempts to fling the Earth into the Sun. Is it getting hot in here, or is it just me?
* The Transformers during the Starscream Triumphant story, Scorponok and the Dinobots go to Tokyo to fight Starscream. They're immediately mistaken for props for a new monster movie, much to Grimlock's irritation.
* The Transformers' DVD case, which transformed into a feeble Optimus Prime.
* The Transformers: Elita-1 can stop time with in a fifty foot radius of her position. Unfortunately this drains all her life energy and is, in most circumstances, fatal.
* The Transformers ended up doing this to Jetfire for legal reasons (long story short, his original toy was made by a rival company to both Hasbro and Takara, and they altered his appearance in the show so he didn't look like the toy). As such, he went to being called "Skyfire", but most series have used his original name.
* The Transformers episode "A Plague of Insecticons" where the episode-namer Insecticons used lightning to down the Autobots, they found the lightning-based attacks are nulled with the rubber on the tires of their vehicle mode. Optimus Prime and Wheeljack (team's tech-head) both rode a pair of teammates in vehicle form whilst firing their weapons. It's probably simpler to coordinate this stunt when everyone involved is a robot.
* The Transformers episode "Auto Berserk", Inferno carries his friend Red Alert out of a burning building in this manner.
* The Transformers episode "Call of the Primitives", Autobots and Decepticons are united against a common foe. During the battle, the massive Trypticon lands on Grimlock and he is presumed dead. Much later, after the battlefield was abandoned, Grimlock, still alive, manages to blast his way out from under him. Upon freeing himself, he quips, "Good thing me Grimlock have hard head. Otherwise would now be Dino-splatter!"
* The Transformers episode "Cosmic Rust", the Autobots look up footage from the planet Antilla to learn more about the titular disease they have recently contracted, seeing Cybertronians literally crumble to dust from the infection.
* The Transformers episode "Fire in the Sky" when he rips off his Decepticon insignia before proclaiming himself an Autobot.
* The Transformers episode "Kremzeek!" involved a highly specialized electricity eating spark creature, splitting into new copies of itself as it ate more and more current.
* The Transformers episode "Megatron's Master Plan" has Megatron frame the Autobots for crimes via faked video footage. In a bit of a subversion, he didn't fake the footage digitally; he actually disguised some of the Decepticons as Autobots and got a human stooge to videotape them in action.
* The Transformers episode "The Golden Lagoon". The Autobots cling to a prison cell ceiling, dropping down on the Decepticons who enter the cell.
* The Transformers fandom actually differentiates between recolors (which are the same figure with different colours, often to represent a brand-new character) like Starscream, Thundercracker and Skywarp and retools (the figure is slightly modified, such as new wings, arms and so on) such as the Coneheads (Starscream molds with new heads and wings), or Bumblebee and Cliffjumper in many toylines
* The Transformers features an iconic duel sequence between Optimus Prime and Megatron in part two of the "More Than Meets The Eye" pilot mini-series. The two leaders fight atop Sherman Dam as the dam's waters churn below, substituting their normal firearms with wrist-mounted Energon melee weapons - Optimus wields an Energon axe, Megatron an Energon mace/flail. The duel ends when Optimus Prime is distracted by Spike's jeopardy, enabling Megatron to strike a blow that sends Optimus off the dam and into the rapids below.
* The Transformers features the two factions of the titular characters hastily rushing to battle with each other. Other seasons' intros still showed some action, but not as badly as the first season's opening.

* The Transformers. Featuring highlights such as the Autobots having to melt the masonry of the Washington Monument back together (somehow), and Megatron ripping the Abe Lincoln part of the Lincoln Memorial off the chair so that he can use the chair as a throne.
* The Transformers for issues with disloyal members, Scorponok promptly blasted Ratbat into scrap metal.
* The Transformers franchise suffers from this as a whole. Despite numerous reboots the 1984 series is considered the definitive version. Any new version is compared to it and rarely passes. Even
* The Transformers from the colony world Caminus worship the Primes — including Optimus Prime — as deities. This causes some problems when a group of them tries to proselytize about Optimus in a Decepticon ghetto.
* The Transformers G1 cartoon has a few examples. Season 3 twice contrives a way to have Optimus Prime and Rodimus Prime fight (once when Optimus has been brainwashed by the Quintessons, once when Rodimus has been infected with the Hate Plague). Before that "War of the Dinobots" saw Megatron manipulate the three original Dinobots into attacking Optimus Prime. Then the two new Dinobots turn up and...clue's in the title.
* The Transformers G1's 1987 toyline. Each one was a robot that was made up of two vehicles- Battletrap had a helicopter for his upper body and arms and an SUV for his lower body and legs, while Flywheels had a jet and a tank, respectively. Transforming the robots involved splitting their bodies in half, then folding them into the vehicles (this was easy due to both having very simple transformation mechanics with almost no articulation in either mode).
* The Transformers (Generation One). One episode saw Optimus Prime forcibly detached, his parts spread across New York City when the Decepticons attempted to convert Manhattan into their new base. His right hand (armed with his weapon) was used by the Decepticons as a turret.
* The Transformers gets in on this. Unicron (at this point a "dark god", not yet his robotic self) destroyed the entire universe, even "the stuff of space itself", and then went to sleep in the void. But he hadn't been thorough enough, and the tiny leftovers coalesced and another universe (the current one) was off and running.
* The Transformers: Goo seems to be specifically purposed to catching floating garbage in space. That its full name is Goo 8739B suggests there may be a lot more like it.
* The Transformers had the scraplets — a mechanical parasite that transforms between a humanoid form and nuts and bolts. Enough of them together can transform into a giant humanoid form.
* The Transformers, has admitted to disliking the series, and said that he did it strictly for the money:
* The Transformers has the Autobot Blast Bar from Hershey's Ice Cream. It is based off the Autobot insignia and has strawberry, lemon, and "fruity blue moon" flavors.
* The Transformers has the episode "Masquerade" which features the Autobots replacing the captured Stunticons to uncover and sabotage Megatron's latest plan.
* The Transformers have a distressing tendency to revert to this at the drop of a hat, and happen to be incredibly well-built and well-armed. Even worse, they seem to be the exclusive property of the Autobots.
* The Transformers have also been incapacitated by fire-retardant foam for varying lengths of time. This includes the foam from a traditional human-sized fire extinguisher, in the case of Sideways.
* The Transformers, he grew to twice his original height and even picked up a trailer in the exchange.
* The Transformers, he waits until Megatron is heavily damaged and has him jettisoned into space while declaring himself Decepticon leader. He even holds a bombastic coronation only to see it crashed by a revived Megatron who shoots him dead on the spot.
* The Transformers. How a bunch of cars got to the middle of Africa in an hour is anyone's guess.

* The Transformers, however, the Nebulans were indistinguishable from humans.
* The Transformers (IDW) and is resurrected by Alpha Trion a short time later. However there's a catch, Alpha Trion started building this version of Ironhide before the original died so he lacks his predecessor's memories and knowledge of current events.
* The Transformers (IDW) and other atrocities they committed against both many alien races and their own kind.
* The Transformers (IDW), and these goals have been forgotten completely.
* The Transformers (IDW). As robots, they should be able to remember everything they experience, but the further back a memory goes, the unimportant background items or bystanders 'lose resolution' and become this trope. Cybertronians focus only on the important parts of a memory, and things such as incidental crowds or bystanders eventually blend into faceless, uniformly colored masses.
* The Transformers (IDW) continuity has a few that happened either before or sometime during the onscreen war between the Autobots and Decepticons, which has recently ended:
* The Transformers (IDW) continuity has one for each faction, Styx for the Decepticons and Garrus-9 for the Autobots. Both are targeted by the opposing sides for prison breaks.
* The Transformers (IDW): Daniel Klonowski from the Bumblebee miniseries. The Autobots are controlled by a rogue group of Skywatch agents under Colonel Gordon Horiuchi. After the whole operation fails due to Autobot ingenuity and Decepticon interference, Klonowski steps in to save Bumblebee and one of their scientists. Afterwards, he mentions that he took the fall for all the staff who went rogue and was dishonorably discharged. He's perfectly happy with this, though, as Horiuchi and the other unidentified commanders were quite grateful and he was suitably compensated.
* The Transformers (IDW) deals with their return to Cybertron and attempts to form a functioning civil society with the combatants who drove them offworld.
* The Transformers (IDW) features some who attempt to use Rodimus and the Autobot Matrix of Leadership as a battery to power their ship. While the pirates offer the young Autobot a lift offworld, conflict arises when they reveal that they are not sure if Rodimus will survive the process. He winds up escaping and rallies some other castaways to help steal the ship stranding the captain. Ironically, Rodimus winds up using himself as a battery anyway, though he does survive the process.
* The Transformers (IDW) has a few flashbacks that take place during the time skip.
* The Transformers (IDW): Has Megatron try to convince Optimus, again, that the humans are all violently destructive evil species. He also considers them a threat worthy to get himself rebuilt and come back to exterminate himself. Humans are Xenophobic and actively are trying to kill the Autobots, even before the Decepticons revealed themselves. Groups like the Machination, captured and dissected Sunstreaker, kept him in perpetual agony and tried to control all the Cybertronians. Ultimately, Megatron is in the wrong, as the current attacks are caused by him manipulating the public subconsciously, and groups like the Machination were formed by Decepticons. Megatron has killed thousands and burned numerous worlds, as later books in the series attest to, he's far worse. The series ends with the Autobots abandoning earth, disappointed in the lengths some humans would go to, but still having befriended others.
* The Transformers (IDW) has Prowl mention that a dog whizzed on him while he was spying on Spike Witwicky in police car mode.
* The Transformers (IDW) have Megatron as a rebellious miner whose vengeance twisted back on him and turned him into the mirror image of the corrupt Cybertronian system he fought to overthrow, for example.
* The Transformers (IDW) is that the Autobots decided the superpowered but brainless Thunderwing was too dangerous to keep around (since Galvatron had used him as a remote-controlled weapon) and so the Autobots just unceremoniously chucked him into the nearest black hole.
* The Transformers (IDW). It eventually worked, and Deadlock became Drift.
* The Transformers (IDW): Many scenes featuring Decepticons have them blasting

humans left and right with glee.
* The Transformers (IDW), Megatron allows himself to be taken prisoner in hopes that the Autobots would take him to Cybertron where he could use space bridge technology within himself to ambush them with the sudden appearance of his entire army. Galvatron and the Deceptigod completely ruin this plan.
* The Transformers (IDW) Megatron and Orion Pax join forces against Zeta Primes oppressive rule, after Zeta Prime was shot by Megatron, he soon shoots Orion Pax, stating he has served his purpose.
* The Transformers (IDW): Megatron has three main Dragons, Soundwave, most loyal, communications officer and espionage expert. Starscream, air-commander, and most active of the three. Shockwave: chief science officer. The role is mostly shared by Starscream and Soundwave, seeing as Shockwave went missing for four million years. Razorclaw was also revealed to be a co-dragon as well, being a high ranking general on par with Starscream.
* The Transformers (IDW) series, the planet Gorlam Prime has an underground lake that leads to the Dead Universe (which is about as pleasant as it sounds).
* The Transformers (IDW) stable. Quite a few times intact optics are seen flying away from fatal (or implied fatal) damage to a Cybertronian's head, such as when when Flywheels runs afoul of Tesarus.
* The Transformers (IDW) that he doesn't fear Starscream's treachery but rather his incompetence.
* The Transformers (IDW): The weapons sold by Earth's Children, based on Megatron's alt mode. They contain the Decepticon leader's consciousness which can control humans who buy the guns.
* The Transformers (IDW). Veterans mention centuries long armistice periods where both sides simply planned for battles that only lasted a few hours.
* The Transformers (IDW) was once marooned on a planet with radioactive crystals. The crystals caused him to view other Autobots as vicious zombies, leading him to brutally slaughter several rescue parties. He was ultimately saved, but had to be constantly be fed modified doses of the crystals to keep the hallucinations at bay. Everyone aware of what happened was sworn to secrecy to avoid burdening the ancient bot with guilt of having killed his own comrades.
* The Transformers (IDW): where he's with the Autobots and very closed off, even his threats are delivered quietly and with a straight face. His interactions with Tailgate have caused him anger, and even violence, though he softens eventually, and shows him a kinder side.
* The Transformers (IDW), where the protagonists left in order to embark on a quest to find the legendary Knights of Cybertron. In both series, the characters don't have a clear idea of what to do now, especially the Decepticons.
* The Transformers: In Issue #13 ("Shooting Star"), a damaged, mindless Megatron is found by Joey Slick, a small-time crook, who uses him in gun mode to go on a crime spree. When Joey robs a bank, he orders Megatron to take out the security cameras first.
* The Transformers: In "The Burden Hardest to Bear", Scourge takes on the Matrix of Leadership, which makes him extremely powerful, but warps his body, which looks extremely painful and even makes him cry.
* The Transformers: In "The Core", the Decepticons build a drill to tap into the Earth's core and obtain geothermal energy, which Megatron claims is the richest source of energy in the galaxy. Starscream informs Megatron that breaching the core might cause the Earth to explode, but Megatron brushes this off by setting up a space bridge next to the digging site in case the planet really does become unstable and the Decepticons need a quick getaway. Naturally, the Autobots spend the episode trying to destroy Megatron's drill.
* The Transformers: In the episode "Countdown to Extinction", Megatron lures the Autobots into quicksand, expecting them to at least be stuck forever, and also expecting them to be completely submerged by it.
* The Transformers into Menasor, figuring that the Autobot fakes won't be able to do the same. The real Stunticons immediately comply, while the Autobots...merge to form their own Menasor, much to everyone's confusion. The writers were being clever

here, as the team of Autobots disguised as the Stunticons includes Mirage, an expert with holograms, and Windcharger, whose special power is his ability to control magnetism. Windcharger therefore 'links' the Autobots together in the rough shape of Menasor, at which point Mirage disguises them as a copy of the real thing. It works, up until Soundwave reminds Megatron that the real Menasor will be able to access the Stunticon's own special powers and weapons.
* The Transformers into the Transformers having actually been created by a deity figure; the levers and pulleys thing turned out to be a theory they themselves had developed about their origins after having forgotten their true origin.
* The Transformers is an example of the big bad teaming up with his past/future self. Predictably a lot of other characters don't survive the story.
* The Transformers is damaged and becomes stuck in gun mode with no free will. A petty criminal picks up the super-powerful gun and uses it to become a highly successful criminal, but the experience ends up pretty much ruining his life anyway. To cap it all off, after screwing up the crook's life beyond repair, the gun wakes up, turns into a giant robot, insults him, and leaves.
* The Transformers is going off and infecting most of the world including both Autobots and Decepticons, Rodimus Prime is currently shutting off Metroplex to make sure he won't be infected, only to look up at the monitor screen and see that an infected Ultra Magnus is coming up right behind him. Cue commercial break.
* The Transformers is rated G, but a few episodes manage to subvert the restrictions.
* The Transformers is said to have orbited Alpha Centuari before being knocked out of its orbit, placing it in a binary star system, but said stars are never actually seen at once.
* The Transformers issue #59, Blurr once laments that he is too young to die, as he is "only" 4 million years old. While it sounds like it was intended for comedy, given the ridiculous length of time that is to a human, it actually isn't. Cybertronians are so ridiculously long-lived that a million years is very close to their age equivalent of a human decade. As such, Blurr is reasonably dismayed at the prospect of being blown up by Decepticons in what would be his early 40s.
* The Transformers), it meant that many of their characters would either be absent or have no lines. This is somewhat conspicuous in the movie; Michael Bell provides the voices for Scrapper, Swoop, and Junkion, but Bombshell and Prowl have no lines. In addition, another one of his characters (Sideswipe) is absent. Frank Welker has 9 roles (Megatron, Soundwave, Wheelie, Junkion, and Soundwave's five cassettes), and three of his other characters appear without a single word (Skywarp, Sludge, and Mixmaster), two (Mirage and Trailbreaker) are nowhere to be seen. Another one, which is not related to his voice actor being unavailable (since he also voices Shrapnel, who speaks in the movie), is Snarl, who does not appear for most of the movie, only showing up for a few short scenes.
* The Transformers, it probably wouldn't be the first time he'd forgotten to take into account something as simple as recoil.
* The Transformers. It's particularly bad when your fellow robots, all of whom would likely have the whole of a given language in their databanks, ask you to say something "in [language], please". It probably doesn't help that he has a habit of going into details WHILE using complex words, to the point where Optimus tires of it in seconds.
* The Transformers laser that works this way, vaporizing anything it hits.
* The Transformers: Last Stand of the Wreckers. “HAHAHAHAHA *blam*”
* The Transformers: Last Stand of the Wreckers actually laughs at Rotorstorm's "combiner" joke... then he shoots Rotorstorm at point-blank range. Made worse by Rotorstorm's last words.
* The Transformers: Last Stand of the Wreckers" as a member of Megatron's gladiator group. Seems he wasn't in it to fight corruption with superior firepower like Megatron's original mission statement said - he was just in it for the fun.
* The Transformers: Last Stand of the Wreckers, cue fandom yelling the page quote.
* The Transformers: Last Stand of the Wreckers: Has a two issue arc where 6 of the lowest ranking Decepticons scour a battlefield, lamenting on the death and

destruction everywhere. One even mentions how the battle took place, Megatron and Optimus both locked themselves in pods feeding them information from all combatants on their side, he mentions how an entire army was reduced to a set of statistics.
* The Transformers: Last Stand of the Wreckers. He also tells his troops to "please attend carefully".
* The Transformers: Last Stand of the Wreckers) makes it pretty explicit.
* The Transformers: Last Stand of the Wreckers: Plays with it with Overlord. Overlord lives to fight and to kill, he has no ambitions, just a desire to kill more people "To upgrade from Homocide to Genocide." He joined the Decepticons to do just that. Megatron tries to put a leash on Overlord, but in doing so, Overlord chafes and abandons the cause. He's his own bot now, he doesn't want to hire himself out to anyone, just kill as many people as possible in all the painful ways he can come up with. Overlord is also obsessed with fighting Megatron — he had a catatonic breakdown when he heard Megatron was dead, and immediately recovered when he found out this wasn't the case.
* The Transformers: Last Stand of the Wreckers, sitting in the front row of his ceremony, applauding and cheering the loudest.
* The Transformers: Last Stand of the Wreckers. Springer, tired of all the death believed them and Impactor was jailed alone. Much later in life Roadbuster confessed to a comatose Springer that they did nothing because they agreed with Impactor and were unwilling to stop him, afterward they just wanted to avoid prison time.
* The Transformers: Last Stand of the Wreckers story told from the viewpoint of a bunch of Red Shirt second stringers. In fact a large part of the characters' portrayals are built around the fact that this trope applies. Pyro fears that he'll die a meaningless death so he's spent most of his life trying to plan the perfect death. Ironfist is basically in complete denial about his role as a Red Shirt until later in the story where he seems to almost quietly accept his perceived unavoidable death. It helps to mention the writers openly referenced the story as "Last Stand of the Wreckers is a story about redshirts." on one of the opening pages of the Hardback copy.
* The Transformers: Last Stand of the Wreckers. These are just the main characters that die; many of the supporting cast and extras get even worse.
* The Transformers: Last Stand of the Wreckers: The Wreckers Declassified Data logs created by Ironfist were both a heroic and unintentional example. Ironfist idealized the Wreckers as the Autobots Strike Force that did the dirty jobs, and created the logs to pay tribute to them in his own fanboy way. The logs were faithful if dramatized and idealized, there were some blatant lies that covered up their more questionable actions but those were because high command covered up the incidents and not the author's fault. The logs became so popular that the Wreckers gained quite a bit of fame and respect and made them symbols of the elite rather than the dysfunctional gun thugs they were (one leader was a traitor, another went insane, the previous one executed prisoners, and one member may have started the entire war). Roadbuster came to regret the image they had, and how much was kept from the public eye.
* The Transformers: Last Stand of the Wreckers to the Wreckers, he was told that the world they fought on was in fact neutral territory and that the Wreckers had to release the Squadron or the Autobots would face diplomatic problems. Impactor's solution was to execute all of the restrained prisoners on the spot and convince most of the Wreckers to lie and cover for him, claiming the Squadron had attempted to escape. Only Springer had the conviction to testify against Impactor and reveal the unpleasant truth.
* The Transformers: Last Stand of the Wreckers was a major fanboy of the Wreckers team, writing extensively about them under the name "Fisitron". Then he got to join them for their mission to Garrus-9. This did not go well.
* The Transformers: Last Stand of the Wreckers when Kup tells a story about how Prowl once spent two and a half straight days lecturing to a captured Decepticon every single chapter and verse of the Tyrest Accord that the 'Con had violated, until the 'Con finally committed suicide out of sheer intolerable boredom.

* The Transformers: Last Stand of the Wreckers, with his handsome (for a giant robot) looks and campy, charismatic, and theatrical mannerisms. One defining trait of Overlord has been his luscious lips. Possibly lampshaded by IDW themselves with the alternate cover for issue 15 which is basically a close-up of Overlord's lips.
* The Transformers like this — his mouth does not have clear animation frames because they overlap several consecutive animation frames, which causes his mouth shapes to be nothing but a series of afterimages when he says anything.
* The Transformers makes the jump from 1984 to 2006, where the Autobots are common knowledge to humanity. Though the masquerade lasted until the end of first episode when Megatron attacked an oil rig and the Autobots stepped in to stop him. Shortly after governments of Earth throw their support behind the Autobots.
* The Transformers, many of the various characters have been seen withdrawing their hands into their forearms and extending new tools. Ironhide uses this especially often.
* The Transformers (Marvel)-laden fusion of Megatron and Ratchet — which happened in issue 69, with Linkara commenting "this is not nice!"
* The Transformers Marvel UK comics said that was his name back in Cybertron. Some time later, when Hasbro coincidentally made a Decepticon named Divebomb as part of the Predacons, the comics explained that Swoop lost his name to him after a defeat.
* The Transformers — Silverbolt, leader of the Aerialbots, is terrified of heights. In the cartoon, the Aerialbots were built on Cybertron out of the remains of old craft, with Silverbolt being built from a low-altitude shuttle, whose limitations were apparently carried over by Vector Sigma into Silverbolt's personality. Optimus Prime named him leader of the group to help keep his mind off of his weakness (though it may also be due to Silverbolt having the most level-headed personality among the Aerialbots, and being the only one of them to inherently respect other, weaker lifeforms such as humans).
* The Transformers—voice of Cliffjumper, Bluestreak, and the Teletraan-1 computer and of Lebanese descent—from the show.
* The Transformers Megaseries arc, Runamuck survives being decapitated by one of the Reapers, only for another Reaper to kill him by crushing his head with a boulder.
* The Transformers Megaseries are decommissioned once they’ve fulfilled their intended purpose. The Facsimiles themselves don’t seem to mind, and will go to great lengths to "self-decommission" if ordered to do so.
* The Transformers Megaseries border troops in the guise of a Russian tank.
* The Transformers Megaseries doesn't mean you also have no gender; some Transformers just look like that and use female pronouns", and Arcee was given a retcon to make things a bit more palatable (she actually took part in the experiment willingly; it's just that he tortured her after he was done because he was a jackass).
* The Transformers Megaseries Energon which is much more pleasing to their palette.
* The Transformers Megaseries, Facsimiles are vat-grown cybernetic clones which the Decepticons use to infiltrate and undermine a civilization. There are several human Facsimiles running around on Earth, naturally.
* The Transformers Megaseries has the Decepticon scientist Thunderwing, whose warnings about Cybertron’s impending environmental collapse were ignored by his peers and whose experimental "polydermal grafting" technology was rejected by Megatron on the grounds of being "unnatural", "misguided" and "ill-conceived". This didn’t stop him from carrying out his experiments, which had dire consequences for all of Cybertron.
* The Transformers Megaseries Just because he wanted to accelerate Cybertronian evolution.
* The Transformers Megaseries Monstructor, Jhiaxus' first attempt at building a combiner. Six minds forcibly mushed into one resulted in a super-strong and completely insane monster, who went on a rampage and had to be sealed away. Later on in IDW's Transformers stories, other combiners are created, and none of them are as unhinged as Monstructor. Of course, Jhiaxus being Jhiaxus, he doesn't see the problem with his creation being mad.

* The Transformers Megaseries, most of their leaders under watch or simply gone, and the Autobots firmly in control of Cybertron. But the Autobots themselves had also lost almost all their outlying territories, and millennia of war had made them pariahs among the rest of the galaxy and even much of the non-aligned population. Much of the series deals with the fact that, while they did manage to take Cybertron, they don't have the manpower to hold it, and they end up handing control of it to a civilian government while moving operations to Earth.
* The Transformers Megaseries that the man flies out of the room, breaking the door on his way out, and crashes into a wall with enough force to crack it.
* The Transformers Megaseries, the Decepticons take a combined approach to invading planets. They follow a six-phase infiltration protocol that gradually softens up the local population in preparation for Phase Six, an all-out assault that annihilates the locals and strips the planet bare of its resources.
* The Transformers Megaseries, the Machination captures Sunstreaker and uses him as the template for an army of mass-produced Transformers operated by human cyborgs called Headmasters.
* The Transformers Megaseries. The Transformers’ existence is promptly revealed to the world as Sixshot shoots down the Autobot Ark over Tennessee and chases Ratchet across Alabama, with multiple news networks covering the destruction.
* The Transformers Megaseries. They awaken him and set him loose to destroy other planets, believing that doing so will somehow undo the damage that the Transformers' war has done to their home planet Cybertron.
* The Transformers Megaseries to shut down if he hears the command "Reset: Pi-Orion-Actual-Orbit. Engage." Starscream uses this command to disable Sixshot after the latter defects to the Reapers.
* The Transformers Megaseries, when Rodimus finally breaks him out of it.
* The Transformers Megaseries: When the Decepticons infiltrate a civilization, they identify individuals which could be useful to their long-term plans, capture them, and replace them with obedient cyborg clones called Facsimiles. The original person is kept alive in case the Decepticons need to clone them again.
* The Transformers Megatron creates a clone of Optimus Prime (which he controls by remote control) and tries to use it to infiltrate the Autobot base, this nearly gives him away. He calls the other Autobots by the wrong names (like addressing Ironhide as "Bumblebee") and acts like he barely knows them, causing them to quickly become suspicious.
* The Transformers: Megatron has taunted Optimus Prime more than once about this, particularly when Optimus Prime is concerned for the safety of innocent humans.
* The Transformers: Monstrosity: Focuses on the bleakness of war. The Autobots realize that they're going to be in this for the long run, and the entire planet has to pick a side, and many want to leave, not wanting to die or trust anyone. The Autobots and Decepticons also realize that ideals, ruthlessness and compassion will not win the war, resources will, and that they may have damned themselves with what little is left on the planet.
* The Transformers: Monstrosity has Scorponok blow up an Oil Refinery, which puts a hole in the planet and kills thousands, after that, the Decepticons lose all sympathy and the masses start evacuating.
* The Transformers: Monstrosity, Scorponok is presented this way. At one point he rhapsodises about Cybertron's energon crisis, which he has worsened, because it will apparently turn Cybertron into a "vast, savage arena" where the strong survive and the weak are killed.
* The Transformers: Monstrosity three of them go against Windblade's posse and come out victorious, Rippersnapper takes down Slug (a veteran Dinobot, which was one of the most powerful Autobot groups), Sinnertwin takes down both Blurr (another Autobot veteran) and Waspinator, and Cuthroat keeps Tankor (veteran Decepticon) and Windblade (above average fencer) on their toes, even with an impaled wing he's still fighting.
* The Transformers: More Than Meets the Eye, a flashback arc set in the Pre-War era has the corrupt Senator Proteus get away with all the terrible things he's done...

but only because the comic's chronology states that Proteus gets brutally murdered for his crimes a couple months afterwards.
* The Transformers: More Than Meets the Eye: After Rodimus explains his plan to have some of the crew stay on Necroworld while the rest make contact with Cybertron, Whirl pipes up and asks to start a petition to leave Swerve behind.
* The Transformers: More Than Meets the Eye, and having an existential crisis is considered a rite of passage.
* The Transformers: More Than Meets the Eye, and one of them murmurs prayers when nearing death.
* The Transformers: More Than Meets the Eye, and opts out of the fighting, leaving the rest of the cast to fight without him afraid that if he started fighting, he'd never stop. Then Ravage gets killed, and the Heroes are on their last legs. And suddenly, there's a massive explosion and Megatron comes out of the dust, Fusion Cannon in hand, ready to save the day.
* The Transformers: More Than Meets the Eye and Rodimus's poor leadership.
* The Transformers: More Than Meets the Eye are the secondary protagonists and travel in a spaceship called the Weak Anthropic Principle.
* The Transformers: More Than Meets the Eye (a suicide bomber failing to detonate the bomb inside of him because of a mechanical malfunction).
* The Transformers: More Than Meets the Eye bartender, who turns out to be so lonely and isolated that a thirty-second conversation convinced him that Blurr was going to be his lifelong friend. At one point, it turns out that he was running his bar with a holomatter avatar for some time while essentially comatose in his room, having created an entire holomatter Earth based on sitcom tropes because he found them more comforting than actually experiencing his life.
* The Transformers: More Than Meets the Eye, begins to redeem himself, and eventually admits that he's actually the happiest he's ever been.
* The Transformers: More Than Meets the Eye: Chief Justice Tyrest has a massive scepter that he carries about. Within it is a suggestion weapon that can knock everyone down with a thought.
* The Transformers: More Than Meets the Eye, cranks it from slightly to exceedingly disturbing.
* The Transformers: More Than Meets the Eye, "damn" and "hell" are now considered as passable curses. However "frag" and "scrap" are also thrown in for variety. Most notably though, there is the occasional use of the word "frikking" — it translates to "freaking" which is itself a potential replacement for "fucking". So far Whirl is the only one to have used it to imply that he is particularly foul-mouthed.
* The Transformers: More Than Meets the Eye Decepticon into line with Megatron's promised utopia, it's worth it. As the series goes on, it becomes increasingly clear Tarn's just using this as justification for his acts.
* The Transformers: More Than Meets the Eye despite being critically injured with the words, "Even... ...Team... ...Whirl."
* The Transformers: More Than Meets the Eye: Due to their incredibly long life spans, many Cybertronians believe that Cybertronians never die of natural causes, only trauma, and with a cure for the only thing that really challenged this- cybercosis- now being found, this indeed seems to very much be the case. Religion claims this is because the Transformer god of death, Mortilus, was destroyed in ancient times. They definitely fit this trope as this is something that cybertronians do like to openly brag about and seem quite proud off.
* The Transformers: More Than Meets the Eye During a meeting with an extremely unfriendly organic captain, who refuses to let the crew go down to investigate an abandoned settlement, Ultra Magnus manages to use the rules (which he knows every word of) to make the captain let them go down.
* The Transformers: More Than Meets the Eye energy around the Scavengers is just that strong.
* The Transformers: More Than Meets the Eye (even Megatron), decide to try recreating the quantum accident from the beginning of the comic, only this time they send one version of themselves to another universe so that both versions can

exist without disappearing. Unfortunately, the version of the ship that stayed in the original universe does end up returning home.
* The Transformers: More Than Meets the Eye forcibly switches the FIM chip on with a blow to his head to ensure permanent sobriety.
* The Transformers: More Than Meets the Eye for two separate reasons unique to each book's storyline.
* The Transformers: More Than Meets the Eye has Cyclonus, who had not been on the friendliest terms with fellow Lost Light member Whirl, be given a deal by the latter to settle all scores if they made it off Luna 1 alive together. Later, when Whirl asked Cyclonus if their deal was still good, he accepts after he imagines shoving Whirl into a nearby smelting pool.
* The Transformers: More Than Meets the Eye has Drift giving Rodimus sword lessons complete with this.
* The Transformers: More Than Meets the Eye has had brushes with this on a few occasions:
* The Transformers: More Than Meets the Eye has one, showing how meaningless they are.
* The Transformers: More Than Meets the Eye. He dislikes being called "irritable"; in fact, it really irritates him.
* The Transformers: More Than Meets the Eye, he goes so far as to conclude that every Cybertronian who was constructed cold, a "birthing" procedure he himself invented, is predisposed to sin and therefore must be preemptively executed in a genocidal bid for his own absolution. He also uses the bodies of criminals to build robots to enforce the law, which he rewrites based on his personal whim.
* The Transformers: More Than Meets the Eye, he likes to force his victims to wear it.
* The Transformers: More Than Meets the Eye, he only stays onboard to be with them. He never gives even the slightest indication that he cares about completing the quest.
* The Transformers: More Than Meets the Eye. He spent six million years in a hole in the ground moving in and out of consciousness (mostly out) because none of his co-workers actually noticed that he was missing.
* The Transformers: More Than Meets the Eye, hurling insult after insult at Fortress Maximus. Except this is a real life hostage negotiation technique: Whirl's keeping Max from shooting anybody by making conversation with him and getting Max to identify with him by voicing the most probable thoughts in his head.
* The Transformers: More Than Meets the Eye: In issue 12 the crew discovers that Snap Trap and his troops on Temptoria have been doing this with the native Temptorians. Unlike most examples, this involves Snap Trap using a process called Pink Alchemy because they have to process the Temptorians into a form that's edible for themselves.
* The Transformers: More Than Meets the Eye into a chase and tricking him into flying straight into his blade, Cyclonus delivers one that perfectly highlights the difference between the two bots' faith.
* The Transformers: More Than Meets the Eye is a bit bigger than Brooklyn) to emphasise the volume of his resultant shout of "SIX MILLION YEARS?!"
* The Transformers: More Than Meets the Eye is being allowed to screen crewmembers at all. Also, the crudely drawn sign saying "crewditions".
* The Transformers: More Than Meets the Eye, is physically incapable of keeping any secret for more than a few seconds, even his own. Mockingly pointed out by Chromedome in a conversation with Skids.
* The Transformers: More Than Meets the Eye later introduces "pink alchemy": a process that turns the lifeblood of organics into a reasonable facsimile of Energon. It's such an inefficient process that it apparently needs the blood of thousands of organics to make enough Energon to fuel a small group of Transformers. Unsurprisingly, it was a Decepticon innovation.
* The Transformers: More Than Meets the Eye, making their gloating feel pretty empty.
* The Transformers: More Than Meets the Eye marathon. Even some of the Decepticons

start to enjoy some Earth media.
* The Transformers: More Than Meets the Eye medic Ratchet dies of age-related Spark burnout.
* The Transformers: More Than Meets the Eye. Megatron brought him into the Decepticons to hurt Optimus, but by the time they meet up again, even Megatron thinks Tarn has gone way overboard. Tarn takes that... about as well as could be expected.
* The Transformers: More Than Meets the Eye. Megatron's attempts to defend himself end up steering him right into this trope.
* The Transformers: More Than Meets the Eye mentions that Brainstorm used to do this at the Autobot research outpost he worked at by coming up with absurdly over-the-top weapons simply to piss off the ethics committee. He retains a very inappropriate sense of humour and a willingness to get on people's nerves into the series proper.
* The Transformers: More Than Meets the Eye Misfire barges in riding an out-of-control Grimlock. Krok is knocked into the wall so hard that he sticks in it.
* The Transformers: More Than Meets the Eye. Nearly everyone thinks Megatron chose to stay behind in the Functionist Universe, either to lead a rebellion or to avoid his trial, but he actually intended to go back and was tricked into going to the wrong teleporter. He decides to make the best of it, at least.
* The Transformers: More Than Meets the Eye of being a flashback. The villains are trying to make the Decepticon Registration Act mandatory, via a circuitous scheme involving murdering the current Prime and putting a massive bomb in his corpse. Orion Pax and his allies foil this plot, though at the cost of one of the few truly good members of the Senate, and Pax's friend. Then, some years later said friend's student Zeta will become Prime and make the Act mandatory anyway, pushing Cybertron right over the edge into full-scale war.
* The Transformers: More Than Meets the Eye of psychotically fanatic super soldiers, are sent after them.
* The Transformers: More Than Meets the Eye once called 'the biggest idiot of the universe', or a genius surgeon.
* The Transformers: More Than Meets the Eye or character detail is going to come up in a big way later or is just there to add a little worldbuilding and flavor.
* The Transformers: More Than Meets the Eye, Pipes is killed by Overlord by being stomped on. It's not at all comical, but a future issue makes a grim joke about it when a flashback has another character scold Pipes with "Don't make me put my foot down".
* The Transformers: More Than Meets the Eye rejects anything religious or spiritual: Primus, Spectralism, the afterlife, magic and so on. The IDW Hasbroverse includes plenty of magic, a Dead Universe that resurrects Transformers as zombies, and so on.
* The Transformers: More Than Meets the Eye, Skullcruncher - a former Decepticon who's made a career in comedy out of making jokes about his previous profession - jokes that the Infiltration Protocol is one of these.
* The Transformers: More Than Meets the Eye, so this is presumably a holdover from that time despite continuing to be used into the present.
* The Transformers: More Than Meets the Eye (such as unjust imprisonment) being pressed.
* The Transformers: More Than Meets the Eye, Swerve asks if the data discs Red Alert found in Rewind's quarters contained confidential information, Autobot secrets or confidential Autobot secrets.
* The Transformers: More Than Meets the Eye. (Tailgate has been presented to date as having 'holoavatars' - human-appearing holograms that reflect the psyches of the users - resembling an ambiguously gendered baby and later a young child, so his 'gender' is still ambiguous.)
* The Transformers: More Than Meets the Eye takes some time to demonstrate the many cultural differences that a race of biomechanical beings may have:
* The Transformers: More Than Meets the Eye that they've started to rust in place.
* The Transformers: More Than Meets the Eye the best means of achieving social

change.
* The Transformers: More Than Meets the Eye - the only person Cyclonus could rely on for help and assistance, weirdly enough - to come and live with them when he gets out of prison.
* The Transformers: More Than Meets the Eye; the real Rewind was not only still dead, but his killer later turned up again just to confirm his death.
* The Transformers: More Than Meets the Eye. There are also transgender characters, explained as Cybertronians who came into contact with alien races that had female genders and realized that was the best fit for them.
* The Transformers: More Than Meets the Eye), there would be some way to stop him. The phrase triggers Overlord's intense fear of failure, briefly rendering him helpless and unable to fight.
* The Transformers: More Than Meets the Eye, this gets him imprisoned by the Council and branded as "The Useless One". Just before he escapes Vector Sigma with the crew, Rung takes the time to stick it to the Council (whose collective alt-mode is the key to Vector Sigma) oh so satisfyingly.
* The Transformers: More Than Meets the Eye to craft the image of an immortal lawman, the current holder of the title is called Minimus Ambus.
* The Transformers: More Than Meets the Eye to finish the planet off. Sadly, the Decepticons are not the first Cybertronians to treat organic life as pests to be exterminated. The notion that "Freedom is the right of all sentient beings" was pretty much all Optimus Prime's influence. Past Primes like Nova Prime had no qualms with "purifying" the galaxy of organics. Cybertronians in general are not liked by other races because of this.
* The Transformers: More Than Meets the Eye, too. Despite these limitations, under Alex Milne's pen, use of body language and careful posing still manages to make him one of the most expressive characters in the comic.
* The Transformers: More Than Meets the Eye to such an extent that he once threw someone in the brig for typographical errors on a sign.
* The Transformers: More Than Meets the Eye: Trailbreaker (quite rightly) has this reaction to Ore's corpse.
* The Transformers: More Than Meets the Eye tries to cheer him up by finding out if he's ticklish.
* The Transformers: More Than Meets the Eye turns out to be a cute, pig-tailed pre-teen girl — outfitted with dual semis and an eyepatch, of course.
* The Transformers: More Than Meets the Eye upgrade — another piece of faux-shadowing.)
* The Transformers: More Than Meets the Eye via smaller Transformers wearing the Magnus Armor to create the idea of an immortal law enforcer. Ambus is the latest and longest lasting individual to wear the armor and, according to Ratchet, who knew the original, should be considered the "real" Ultra Magnus. Ambus himself goes one level deeper, being a tiny Transformer wearing a regular-sized Transformer body to get around (which then wears the Magnus Armor).
* The Transformers: More Than Meets the Eye, when he fights Nautilator, and pins him down, Nautilator surrenders and begs for his life, but Whirl is more interested in the fact that the con's voice sounds like Megatron. Whirl tries to make his voice sound like Optimus Prime's to make the confrontation more epic, but gives up, and just executes him.
* The Transformers: More Than Meets the Eye, when Rewind approaches his husband Chromedome's good friend Brainstorm asking him where Chromedome is, and mentions that Chromedome has been saying Brainstorm's name in his sleep. Brainstorm completely misses the point, and assumes Rewind thinks that he and Chromedome are working on a super-secret project together. (Rewind's response: "Er, I didn't until you said that.") As it turns out, that's exactly what they've been doing, although Chromedome keeping the very grave nature of the project a secret ends up having repercussions on his and Rewind's relationship regardless.
* The Transformers: More Than Meets the Eye: Whirl, twice voted the most likely autobot to defect, and when a party is held to dress up as one's most hated person, most of the crew dresses as Whirl. Out of universe, this is his first grand role in

fiction and is liked for being a hilariously crazy badass.
* The Transformers: More Than Meets the Eye, who for all his faults at least has a functioning sense of responsibility.
* The Transformers: More Than Meets the Eye who is initially kept around because his skill and willingness in combat makes him useful to the crew. However this causes some problems as Rodimus learns the hard way that Whirl isn't easy to control. For instance, waiting until the crew's backs are turned than chasing down and torturing info out of a mook against orders.
* The Transformers: More Than Meets the Eye, with scientist Rossum as the doctor and Megatron as the expectant parent. When the process ends and Overlord crushes Rossum's head, Megatron beams.
* The Transformers: More Than Meets the Eye, with the blood leaking into critical systems and tainting the fuel supply, causing the ship to crash.
* The Transformers: More Than Meets the Eye: With the disbanding of the Decepticons by their leader, their forces are thoroughly shattered. Several just shrugged and moved on with their lives, while others tried for a resurgence of their once mighty empire. Tarn and the Justice Division seek out what might be the largest remnant, a band of Mercurial Decepticons 500 strong, and ally with them to bring forth a new order of Decepticons with their first act of business to hunt down the very one who disbanded the original regime, Megatron.
* The Transformers: More Than Meets the Eye work better in his native English accent than in an American accent (unless one speaks an r-dropping American accent). For example, the Duobot twins are named Shock and Ore, which only becomes a pun if "ore" is pronounced the same as "awe."
* The Transformers notably had some difficulty with this when word came down that the new faction leaders were Scorponok and Fortress Maximus, both of whom turn into entire fortress playsets that are regularly referred to as cities and should therefore be dozens of times bigger than their subordinates (and Fort Max's toy is double the size of Scorponok's on top of that). Consequently, the two of them had their city modes never appear in the comics, and Fort Max was shrunk down considerably, though he was still about twice the height of his troops.
* The Transformers of them, he did state most of his criticisms were out of line and reconciled with Burr.
* The Transformers. One notable example comes in the Christmas story "Cold Comfort and Joy". The Autobot Powermasters track down a group of robots who spoiled a town's Christmas festivities, assuming they're Decepticons, and it isn't until Joyride notices the Autobot symbol on the chest he's pounding that they realise their mistake. (The Autobots were just trying to join in the fun but the townspeople all went "Aargh! Giant robots!" anyway.)
* The Transformers: One of the many tricks used to help characters stand out is to give them unique talking styles or quirks. For example:
* The Transformers Ongoing, the Decepticons and Sweeps were forcibly combined into the massive "Deceptigod" creature. Only Megatron and Shockwave were successful at resisting the merger, the former due to his considerable willpower and the latter due to his emotionless nature.
* The Transformers, Optimus Prime was able to retract his fist and replace it with a glowing energy axe. Despite his figure having removable fists that could easily have accomidated such an accessory, it wouldn't be until 2003 that an action figure was released that had the axe.
* The Transformers, Prowl sets up one with the mad scientist Mesothulas. The two bomb a neutral city in order to drive up Autobot recruitment efforts.
* The Transformers - Punch, in his disguise as the Decepticon Counterpunch, did this once.
* The Transformers: Punishment: Sandstorm's infernus bullet overloads the target's neurosystems and immolates the target from the inside.
* The Transformers. Rather fittingly he dies in the arms of Rodimus who, thanks to Prime's teachings, will go on to become the new hero. However, the same issue shows Rodimus himself dying of old age eons later.
* The Transformers: Robots in Disguise, and the final issue of the series, Post,

focuses on him reflecting upon his life during his last moments.
* The Transformers: Robots in Disguise: As the political situation in New Iacon is getting more tense than ever, with Decepticons protesting in the streets and the Autobots stocking up on weaponry, Wheeljack ruminates nervously on how the slightest spark could cause everything to explode into a full-scale riot that would tear the city apart. Later that night, as he is rushing to deliver some important information, Wheeljack accidentally stumbles right into the aforementioned crowd of protesters, who promptly begin screaming obscenities at him and tossing stuff around. Wheeljack realizes, to his horror, exactly what the Last Straw is gonna be:
* The Transformers: Robots in Disguise, Ayana Jones gets annoyed when Thundercracker's pet dog Buster pees on the floor.
* The Transformers: Robots in Disguise even says that the fans are just as tired of that quote as Optimus is.
* The Transformers: Robots in Disguise Garrison Blackrock states that human civilisation developed thanks to Nexus Prime's Enigma of Combination crash-landing on Earth.
* The Transformers: Robots in Disguise. He manages to get his public opinion up, the only problem is his actions have also led to the Autobots getting recognition and the publicity bringing them almost up to his level. He can sway a crowd, but he has to constantly be on the move to keep the goodwill coming.
* The Transformers: Robots in Disguise. He's extremely old even by Cybertronian standards and his appearance is more outwardly savage and barbaric to fit with his ancient and uncivilized personality.
* The Transformers: Robots in Disguise is coming off as the coherent one. As time goes by, Rum-Maj's statements become more grammatically correct.
* The Transformers: Robots in Disguise, noting that he is "the best leader in the history of Cybertron." In a vacuum, this would be pretty high praise, and seem rather gracious to his reign (which was seriously corrupt, marked by constant disasters and scandals, and ended with him being given a life sentence), but everyone else was a warmonger, an imperialist, a segregationist, or a downright supervillain, so "best" is more like "least awful" — and all he had to do to earn that was to not try and kill everyone at any point.
* The Transformers: Robots in Disguise Originally the male-coded victim of a forceful, traumatic sex change, it's made abundantly clear how thoroughly life ruining this was, yet the possibility of reversing the procedure never comes up. It's soft retconned near the end of the series' run and hard retconned in the final issue into a consensual sex change.
* The Transformers: Robots in Disguise Orion was the one to claim it. When Nova Prime then knocks Rodimus out, the leader of the Autobots steps back up to the plate:
* The Transformers: Robots in Disguise: Presents a more conventional example with Soundwave gathering up many of the A-lister cons, including the remaining members of the Earth Infiltration team, throwing their lot in with Galvatron, and heading to earth to ally with the humans and get in the Autobot's way. They claim to be the Decepticons, following their principles in the absence of their founder, even if their ranks only have a few dozen members.
* The Transformers: Robots in Disguise remaining, as he never gave up on the cause: if the ideals of the cause require him to work with Autobots, so be it.
* The Transformers: Robots in Disguise: Shockwave blows a hole in Dreadwing at the start of issue 17, killing him. At the end of the issue, Dreadwing comes back to life through the use of Shockwave's experiments. His reaction is a small "ow," asking for some warning next time, and then wondering what they're going to do next as the hole in his chest closes up.
* The Transformers: Robots in Disguise the case, by killing Nexus Prime with ease. The remaining Primes fled the planet before he decided to demonstrate that this wasn't a fluke.
* The Transformers: Robots in Disguise, things look hopeless for the Autobots after Megatron takes the capital, until Ironhide and the Dinobots (who were all presumed dead) show up to turn the tide.

* The Transformers: Robots in Disguise: Thundercracker during his prime was a Seeker, high ranking in the Decepticon Hierarchy, having bested Bumblebee (who was smart enough to defeat Thundercracker's wing mate, Skywarp), and nearly killed Hot Rod in a joint attack with Skywarp. Nowadays he's abandoned the Decepticons and lives on Earth, keeping out of the conflict and writing truly awful television screenplays.
* The Transformers: Robots in Disguise to be a total wad, and he is. But he never acts like it gives him (much of) a moral high ground.
* The Transformers: Robots in Disguise where an attempt to seize control of the defeated Decepticon army and restart the war ends in his murder.
* The Transformers: Robots in Disguise, which is a critical darling beloved by fans and professionals alike. The main problem is that while MTMTE dedicated itself to reinventing the wheel and doing things no other TF series had dared do before, RID just quietly stuck to the typical plotlines that other TF books had explored before, often with far more success and depth.
* The Transformers: Robots in Disguise. While the former delves into the political fallout, one issue of the latter shows a group of ragtag Decepticon scavengers utterly baffled by the idea. The war has gone on for as long as they can remember, and they can't really grasp the reality of it ending. They also have absolutely no clue what to do about it. Eventually they decide to just say screw it, head back to Cybertron, and hope for the best when they get there.
* The Transformers: Robots in Disguise who were turned on, given a very brief education (basically, here's how to walk, talk, and hold a gun, took about fifteen minutes) and thrust immediately into combat. Many of the characters have serious psychological issues caused by the violence they've endured.
* The Transformers: Robots in Disguise: Yes, that Jet that suddenly turned into a tank in mid-air is a human made and driven invention and not one of the genocidal aliens that invaded the planet years ago. He demands your surrender in the name of the United Steaks of America, or whatever it's called.
* The Transformers run (pictured above) with the bad guys victorious and the good guys reduced to one pacifistic medic and a bunch of scrap.
* The Transformers season 3 (The Return of Optimus Prime, Part 2), Galvatron's madness is cured and he becomes this. Of course, in the next (truncated) season, he comes back crazier than ever.
* The Transformers series had the infamous "astroseconds," "astrominutes," "astrolitres," "a Cybertronic mili-inch," etc. The first episode mentioned a unit of time called a "quartex," but it was never mentioned again.
* The Transformers series the Autobots leave Cybertron in a spacecraft with the Decepticons in pursuit. The Autobots are boarded and as the battle rages the spaceship plunges inexplicably down to Earth without going through any hyperdrive or seemly traveling far at all.
* The Transformers: Sins of the Wreckers: The animals harassing the Wreckers turn out to be the Mayhems in their alternate modes, disguised to get close to Verity and the Aequitas slug.
* The Transformers, Sky Lynx for the Autobots and Astrotrain for the Decepticons both filled this role, as both of them had alt-modes that were space shuttles.
* The Transformers's mission was to destroy a bunch of asteroids so that Cybertron could pass safely through.
* The Transformers Smokescreen has a built-in wire that overrides non-sentient machinery. He manipulates a slot machine to his benefit and lets it all ride on one last bet. But one of the casino workers notices his wire and pulls it loose.
* The Transformers some time"." This is the sort of thing that warrants a TV-PG rating, rather than the TV-Y7 it got.
* The Transformers'': Soundwave, Laserbeak, and Ravage would often be revealed to have been listening in on important conversations, either amongst humans or the Autobots, by having the camera pan over to some nook or cranny they'd been placed in while in their alt-modes.
* The Transformers, Spike uses his diary at the end of each episode as a framing device, but this was never used again. The Transformers Ladybird Books however,

borrowed this from the show and used it occasionally.
* The Transformers: Spotlight Wheelie only worked if the phrase was rhyming. Eventually, he became so used to doing so that he lost the ability to speak normally.
* The Transformers Spotlight: Wheelie, this isn't surprising in the least.
* The Transformers. Starscream and the other Seekers are the most obvious ones, with the wings from their jet modes, but others include Prowl (wings formed from his car doors), Omega Supreme (wings formed from the rails of his base mode), or Kickback (his grasshopper wings). In no cases do these wings have any influence on whether or not the character can fly- all Decepticons were able to fly in robot mode, including those who had vehicle modes that couldn't like Soundwave and Megatron, while the winged Prowl couldn't fly.
* The Transformers, Starscream gains control of the Combaticons by adjusting them so that only Starscream can recharge them. Thus, if they betray or abandon him, they will doom themselves. Eventually, they manage to disable that feature, gaining their freedom.
* The Transformers: Swoop is the smallest and fastest of the Dinobots and the only one capable of flight in every version. While the rest of them are heavily armored and mostly invulnerable in their dinosaur modes, Swoop is still very vulnerable to enemy fire when transformed in his Pteranodon form.
* The Transformers, technomatter made with the Key to Vector Sigma had much the same effect - when the Maximals were zapped with the Key, they became both contagious and mentally unstable, and tried to infect each other.
* The Transformers. Thanks to some unwanted time travel shenanigans, he's actually older than the universe itself!
* The Transformers than not. The end result is an absurd and often stupid cartoon that many remember fondly. Many works that try to pull directly from the cartoon in the modern day like the Dreamwave comics, Deviations, and Wings of Honor tend to get fairly lukewarm responses, as they usually end up bland instead of hilariously-corny.
* The Transformers that spread quickly enough to fill an entire valley in a matter of hours, in "Quest For Survival". The Autobots ship them all off to a planet infested with robotic insects, after the Morphobots eat all the Insecticons' clones.
* The Transformers that turn into spaceships: Cosmos, Sky Lynx, Omega Supreme, Blast Off, Astrotrain, Cyclonus, Scourge...
* The Transformers, the Autobots and Decepticons are seen fighting from across the river by some New Yorkers. One wonders if the military will get called out over it, to which another responds with "Why? It's only Jersey."
* The Transformers, the cure for Scraplet infection is an extremely rare substance that turns out to be water.
* The Transformers. The Decepticons damaged the Washington Monument to the point where it would have toppled had the Autobots not intervened, and Megatron himself strode into the Lincoln Memorial and ripped the Abraham Lincoln part of the statue off to claim its chair as his throne. Impossible (hence why the movie version shot the statue), but the symbolism is still effective.
* The Transformers, the entire universe decides that the time-travelling Galvatron and his minions need to go back to where they came from and creates a vortex. Galvatron ends up just yelling at the vortex, trying to defy it even as he's ripped to shreds.
* The Transformers, the human military are unable to fight off the Decepticons. The episode "Megatron's Master Plan, Part 2" has a direct fight where only Decepticons remained on earth after the Autobots were expelled to space. Starscream and the Seekers wipe out the U.S. Air Force within seconds and Megatron gloats to the Witwicky family that the U.S. Armed Forces were the best warriors Earth had to offer.
* The Transformers the humans. Her hatred did not distinguish between Autobot and Decepticon, and she often wound up doing more harm than good, especially as the Autobots refused to harm her.

* The Transformers: The humans repeatedly try to use conventional weapons (bullets) against the Decepticons, to no avail. The shots just bounce right off, every time. In the two-part Season 2 episode "The Key To Vector Sigma", the Centurion Droids are completely unfazed by any attacks at all. The Decepticons keep shooting at them despite the blasts having no effect whatsoever. Megatron eventually manages to gain control of them using the Key, and the Autobots manage to trick them into diving off a high cliff after some reanimated zombie-bot corpses, but since they are programmed to guard Vector Sigma it's probable that it would take extraordinary means to destroy them.
* The Transformers. The latter was finally dubbed in 2014, using the same cast as the Season 3 redub two years before.
* The Transformers: The Movie, and of which was directed by a North Korean living in South Korea.
* The Transformers: The Movie and post-movie episodes, Cyclonus and Scourge have deep voices as well.
* The Transformers: The Movie, Arcee is a pink girl next to blue Ultra Magnus.
* The Transformers: The Movie, as shown when he coldly executes a mortally-wounded Ironhide still trying to fight him even in his death throes.
* The Transformers: The Movie begins with a focus on the '84 cast. Then Optimus, Megatron, and many others are destroyed in the Battle of Autobot City. The rest of the movie and following season then follows the characters introduced in the movie.
* The Transformers: The Movie between the end of Season 2 of the cartoon and the movie.
* The Transformers: The Movie, canon sorts itself out and the original endings happen.
* The Transformers: The Movie coronation. Then he opens his mouth and smugly demeans the Decepticon's new leader before easily killing him.
* The Transformers: The Movie didn't do or age nearly so well with audiences.
* The Transformers: The Movie does as well, after Galvatron incinerates him with a blast from his plasma cannon mode.
* The Transformers: The Movie: During Starscream's coronation, a trumpet fanfare plays in the background each time the 'con is about to be crowned, interrupting the ceremony. Eventually, Starscream chides someone offscreen to "Get on with the ceremony..." ...and we cut to the Constructicons, holding trumpets, looking confused as to what they did wrong. Immediately afterward, Starscream's crowning gets interrupted by the fanfare again, and he decides to quell it by shooting the trumpets clean out of the Constructicons' hands in mid-song.
* The Transformers: The Movie from time to time in the third season of the old show.
* The Transformers: The Movie gives us this short but dramatic exchange.
* The Transformers: The Movie has Optimus Prime and Megatron fighting their ultimate battle to the death, from firing lasers and swinging energy blades to throwing rubble to flat-out just pummeling each other with their fists and feet. As it goes on, they're both clearly exhausted and taking heavy damage with dented armor and destroyed weaponry, and after knocking Megatron off the battlements Optimus can't even stand due to his (fatal) wounds, while Megatron is forced to beg Soundwave to get him to safety.
* The Transformers: The Movie. Here, Wreckgar is implied to be working for the Decepticons.
* The Transformers: The Movie, Hot Rod asks if this reminds him of yet another one of his war stories. Kup's only response is a quiet, "Nope... Never seen anything like this before."
* The Transformers: The Movie: Hot Rod shines his headlights into Galvatron's optics during their battle (in a dark room), and Galvatron's flinch gives Hot Rod a couple free shots at him.
* The Transformers: The Movie. However, when Season 3 started, very few Autobots from the pre-movie seasons appeared and most that didn't appear were assumed to be this.
* The Transformers: The Movie included Ultra Magnus's "Open, dammit, open!", but

lacked Spike's "Oh shit".
* The Transformers: The Movie, Jazz is stationed on Moonbase One and yells out "Where'd that come from?!" when Unicron attacks. Unicron is the size of a huge freaking planet. How could Jazz have missed that even if he wasn't monitoring the sensors? This is apparently a specialty of Unicron's since he pulled it at the beginning of the movie- he wasn't noticed by the first planet he attacked until he was practically within chomping distance, and he also pulled it off in the Marvel Transformers comic run (see above).
* The Transformers: The Movie powerful that it dissolves a transformer in a few seconds.
* The Transformers: The Movie reformatting Megatron and the other dying Decepticons into Galvatron and his minions, who swiftly attack the city again, forcing the surviving Autobots to flee.
* The Transformers: The Movie, serving only to keep the name in circulation.
* The Transformers: The Movie, Starscream's foot gets caught in a closing gate during the Autobot City attack. He blasts his foot to get free (although what we see damaged is his lower shin). He's intact later in the movie — being a robot, and everything.
* The Transformers: The Movie, the Autobots are devastated by the death of Ultra Magnus and theft of the matrix.. But it doesn't dampen the mood at all when they start a dance party with the Junkions just a few minutes later.
* The Transformers: The Movie. Their demise is accompanied by the usual splashing, struggling, then turning cherry red and sinking out of sight.
* The Transformers: The Movie. The look on his face goes a long way towards selling the moment as well.
* The Transformers: The Movie. The most obvious sign of this is that while most Cybertronians transform the same way every time, Hot Rod/Rodimus and Galvatron, the hero and villain of this movie respectively, transform in different ways depending on the scene — in Hot Rod's case, he never transforms the same way twice.
* The Transformers: The Movie: they fall to pieces when hit, but they can simply pull themselves back together and keep fighting. Fortunately for the Autobots, they turn out to be pretty friendly and only attacked due to a misunderstanding.
* The Transformers: The Movie, this didn't work in the UK, where it got a U rating (though the line is missing from some DVD versions).
* The Transformers: The Movie (though not for the title itself, only for the cast credits).
* The Transformers: The Movie to a Quintesson. The Dinobots knock the door to the execution room down on top of him. And then as Slag (the Triceratops) and Sludge (the Apatosaurus) walk across the door, they stop for Slag to say, "Excuse me."
* The Transformers: The Movie to stop Megatron getting to it. Megatron simply overpowers Hot Rod, gets the gun, and mortally wounds Optimus Prime.
* The Transformers: The Movie traits being much more appealing to work with, while Scourge is just kind of a jerk.
* The Transformers: The Movie transforms into one when the Decepticons launch a surprise attack on it. Unfortunately, due to having the element of surprise the Decepticons successfully trap and/or kill a number of Autobots before the conversion is even complete. The defenses hold long enough for the survivors to receive reinforcements.
* The Transformers: The Movie TV show. This is also the reason why the film doesn't really feature any of the characters who had become important in the second season—most significantly, Omega Supreme.
* The Transformers: The Movie, Unicron, spends the first half of the movie as a Big Dumb Object swallowing planets. He shows he is otherwise after transforming into a moon-sized, humanoid robot.
* The Transformers: The Movie was rerated as PG by the BBFC in 2017 when Manga Entertainment resubmitted it, despite a release as of 2007 from Metrodome Distribution carrying a U rating.
* The Transformers: The Movie. When fighting the Autobots, Wreck-Gar has the memorable line of "Steady as she goes, Bob! Snoopy visitors get mud in the eye, by

and by! Film At Eleven!"
* The Transformers themselves are perhaps the limit of how humanoid mainstream aliens can be -
* The Transformers themselves fall into this. The Great War and the destruction of Cybertron are portrayed as especially catastrophic in this continuity, with number of remaining Cybertronians numbering around ten thousand. Then, Cybertron is healed and the neutrals come home dramatically increasing the population and then after that colony worlds from before the war are introduced which swell the ranks further.
* The Transformers (the Nightbird from the title) who was successfully attacking the Autobots. His motivation: Megatron demoted him and placed her in his place, so he was obviously jealous. And when he protested, the other Deceptions imprisioned him. No surprise he got really pissed off at them.
* The Transformers. Then it turns out the Autobots and Decepticons were created by Primus, who was built by Primacon, and the Quintessons just want to punish or destroy the Autobots and Decepticons. Or the Quintessons and Primacon have nothing to do with their origin, and their origin story is "Primus created the Autobots and Decepticons."
* The Transformers the opportunity to use this as a defense when they are betrayed by the Triple Changers, who then take over the Decepticons.
* The Transformers, there are a few episodes that the eponymous robots end up in a fantasy plot involving magic in it.
* The Transformers there is a race of mechanical parasites called the scraplets that have this weakness. It takes most of the issues they're in for the transformers to realise that the legendary chemical they're vulnerable to is something that's really common on Earth.
* The Transformers, the relationship between Arcee and Daniel Witwicky is suddenly deepened, probably as a prelude to making him her Headmaster partner. Then at the very end of the final episode, Daniel tries to make what sounds very much like a romantic confession only for Arcee to shush him, saying she feels the same way.
* The Transformers, the Seacons discovered that they're much less effective when they let him form a limb rather than force him to transform into the team's gun. If he didn't somehow have a knack for bringing back useful salvage to Decepticon HQ when they have to fish him back from the bottom of the ocean, they probably would have left him to rust ages ago.
* The Transformers, the second episode featured Optimus Prime using his laser axe against Megatron's... laser flail.
* The Transformers the show was renewed for a third season (albeit one that replaced most of the cast who were killed in the movie) that brought the count up to 95, followed by the 3-part "The Rebirth" series finale.
* The Transformers, the Transformers crash into a volcano and go into stasis, where they remain until an eruption reactivates the ship four million years later.
* The Transformers: The two parter "The Key to Vector Sigma" has an accidental example when Megatron has the Stunticons built. People automatically assume that 'car transformer = Autobot" and think they're the good guys, until the Stunticons go wild. The Autobots are naturally blamed for the attacks, though the misunderstanding is immediately cleared up when the Stunticons attack the Autobots while they're still trying to explain the situation to the military. This is an accidental example because Megatron created the Stunticons in order to fight the Autobots on the roads, rather than as part of a plan to discredit them.
* The Transformers they blow up Paradron, a planet recently populated by a pacifist race (who may or may not have completely evacuated everybody) just to keep the Decepticons from getting at its plentiful energon supplies. Aside from the Paradronian Sandstorm being sad, nobody seems to care.
* The Transformers. This caused his fuel consumption rate to skyrocket by a factor of 100, so he has to consume massive amounts of Energon to stay operational.
* The Transformers. This is due to the Japanese view of living robots (as opposed to piloted mecha) as "Immature".
* The Transformers: This is the primary weakness of the Technobots combiner

Computron. He always thoroughly and completely analyzes every situation for the perfect response, but often arrives at that solution too late for it to be useful.
* The Transformers this native fauna, but at the very least they exist and some animal-form Transformers are hinted at having alternate modes based on them.
* The Transformers, those were much smaller and more isolated incidents compared to All Hail Megatron where the Decepticons occupied New York and launched attacks against multiple sites around the world).
* The Transformers, though he still transformers into a giant, gun-laden mechanical scorpion, and his robot mode still towers over most Transformers.
* The Transformers: Till All Are One by launching a rocket into the giant's visor blowing his head apart and forcing him to separate into his individual components.
* The Transformers: Till All Are One: Disability is explored a bit with Knock Out's Conjux Endura (husband) Breakdown. While by Cybertronian standards he's considered able-bodied, in the speed-focused culture of Velocitron those born with larger slower frames, like Breakdown, are seen as disabled and accessibility is limited for them.
* The Transformers: Till All Are One. Of all the delegates it's Obsidian whom Starscream sees as his biggest threat.
* The Transformers: Titans Return: Infinitus has a number of curved energy blades he deploys from his wrists.
* The Transformers to 'Бархан' (Barkhan, meaning "dune"), which, apparently, came into being because the dubber misheard the character's name as 'Sandwave'.
* The Transformers to be by Rodimus. This convinces him to reclaim the name Optimus Prime.
* The Transformers, Transformers tend to see gold as worthless, though Decepticons understand that it can be used to bribe humans. Starscream understands its usefulness in electronics, as in one episode he demands gold and uses it to construct an electromagnetic generator. In "Nightmare Planet", a princess offers to pay Springer and Razorclaw with gold. Springer says that won't be necessary, but Razorclaw is intrigued, prompting a fan theory that Razorclaw likes gold because it is pretty.
* The Transformers: Twin Twist has a pair of long drills that he uses to attack from beneath.
* The Transformers two-parter "Megatron's Master Plan", Megatron tricks the world into believing that the Autobots are evil and the Decepticons are good. Despite being easily powerful enough to do whatever they feel like regardless of public opinion, the Autobots submit to arrest, sit through a trial, and agree to be banished from the planet, only deciding to come back after Megatron reprograms their navigation system to fly them into the sun.
* The Transformers UK Season 2, Part 2 DVD set includes the comic "The Beast Within".
* The Transformers (UK), when Straxus fails into transferring his mind into Megatron's body, he turns a hapless Decepticon technician Archforce into a "Megatron clone" to attempt the transfer again.
* The Transformers: Unicron, causing them to dwindle and vanish every time it successfully eats a world.
* The Transformers: Unicron have a myth about an ancient evil who was the opposite of their creator-god... but given the time-travel shenanigans, that myth having any basis in fact is highly improbable.
* The Transformers: Unicron other Transformers sacrificed themselves before that, including Soundwave, Elita One, the Mistress of Flame, Blurr, and even Starscream.
* The Transformers: Unicron (Rattrap, the Combaticons, Airachnid) are unaccounted for when Cybertron gets destroyed. Given they aren't seen on Earth, they're probably dead.
* The Transformers: Used more frequently than you would expect from a series about robots. First used in Resurrection!, although this is influenced by Limbo beings. Next utilised in Salvage, where Megatron engages in (what should have been) his final battle against Straxus.

* The Transformers varies depending on the continuity, but he always has the same general hardboiled, noir-ish personality.
* The Transformers version of this. Their entire language was constructed from Earth television broadcasts they intercepted, and they speak in nothing but ad jingles and other TV references.
* The Transformers was always lecturing Megatron about tactics, and naturally, was nearly always wrong. The episode "War of the Dinobots", in which Starscream is suspicious about the instability of the meteorite's energy long before Megatron ever has a clue, is among the exceptions. (This makes a certain amount of sense since Starscream was a scientist originally).
* The Transformers was described as being logical to the point of shutting down when faced with an unexpectedly crazy situation. In the cartoon, this wasn't really touched on and he was portrayed more as a just-the-facts-ma'am style military policeman.
* The Transformers was intended to be just a 4-issue mini-series but after it got positive feedback, it was made into a series, which ended with issue #80. Now IDW Publishing is wrapping up the story with a twenty-issue limited series (taking it from issue #81 through #100) titled '"Regeneration One''.
* The Transformers was the result of Megatron and Ratchet getting caught in the interdimensional void when an explosion sent them into an open portal between Cybertron and the Earth-bound Ark.
* The Transformers. We later see some flashbacks from Ratchet's perspective.
* The Transformers were more juvenile than those of his successor, noting that he was targeting his stories for prepubescent boys.
* The Transformers when they use it to harvest Energon by draining energy from Earth's Sun, but the process threatens to cause the sun to explode.
* The Transformers where Elita will have a good view of his demise (and her demise-to-be). Elita One then activates her time powers to save Optimus Prime, which leads to him finally being able to do something to rescue her. It's pretty 50/50 with them.
* The Transformers, where he agreed to help Grimlock in exchange for money and had no loyalty to the Autobot cause at all.
* The Transformers, which features drama such as an affair between Donna and Gordon, Sheryl's will (which Jack apparently didn't know about), and (in a deleted line), the will actually belonging to Bob, who named Katy as his successor!
* The Transformers while his body underwent surgery, and inadvertently dropped into this trope temporarily.
* The Transformers, while Rodimus is more youthful, more ready to doubt himself, and tends to treat his troops more like close friends (which they usually are).
* The Transformers, who showed up, helped Optimus Prime and the gang, and then was never seen again.
* The Transformers: Windblade: Bruticus gets similarly hard hit, but it's more justified in this case because one of his components was brain dead and of the other four, only Onslaught and Brawn really are cooperating. Unable to effectively coordinate, Bruticus is easily beaten by Ironhide (who also had the most experience fighting Combiners of anyone on the planet).
* The Transformers: Windblade, meanwhile, is about an outsider who was never part of the war coming to a Cybertron that's still deeply scarred by it.
* The Transformers: Windblade: The planet Velocitron is dangerously close to its sun, so to avoid the daytime side's temperatures and radiation, all their cities are on massive wheels and move continuously ahead of the dawn.
* The Transformers: Windblade where writer Mairghread Scott describes his character in one quote:
* The Transformers with the plasma energies. He and the other Decepticons try to escape aboard Scorponok's ship mode, but they take off too late, and are hit by a wild flux of energy from the chamber, which whips Scorponok and the whole Decepticon crew inside far, far away, making them a twinkle at the distance in the darkness of space.
* The Transformers works this way. The punishment for all crimes, from being

Transformers to showing up on their planet, is execution by Sharkticon pit. What's worse is the outcome for all verdicts is the same. Prisoners found innocent are thrown into the pit the same as the guilty.
* The Transformers, young fans were crying, and sent letters asking for him to return. The fact that most of the previous cast also died apparently didn't affect them as much.
* The transforming helmets Ra and his soldiers used in the movie also received a significant downgrade in the show — while in the movie they were fully articulated masks that could fold up and disappear into the rest of the headdress, in the show they were big, mostly-hollow helmets that "transformed" by a little slot opening up to let you see the character's eyes while the ENTIRE snake head just pointed up awkwardly into the air. On the few occasions the full transformation happened, it was entirely offscreen. That could also have been the reason they went with the more spacious serpent helmets instead of the Horus (eagle) helmets. (Mind you, we did get to see the Horus guard helmets' full transformation on rare occasion - as in, exactly twice ever.)
* The transgender pride flag has light blue stripes representing trans men and pink stripes representing trans women (as well as a white stripe representing non-binary people).
* The transition from Eleven to Twelve is fairly explicitly this — where the light-hearted and confident Eleven effectively was an old professor in a young man's body, the brooding and self-doubting Twelve is best described as an edgy and cheeky teenager who happens to look like an old man.
* The transition from silent films to talkies led to a rush of talking remakes of silent films. Late silent era film
* The transition from traditional to CGI animated films in the 2000s. The people blame companies like
* The Transition Of Titus Crow has a clock that allows Titus Crow to travel to different dimensions.
* The transition to college has oddly seen Brad and Toni move to the background (often barely appearing at all), with Luann, Gunther, Bernice, Quill and Tiffany being the major characters. Crystal and Knute now almost never appear, and Delta has moved away and disappeared. Then after breaking up with Luann, Quill disappeared altogether as well. The storylines now alternate between Luann (with Bernice), Gunther, and Tiffany.
* The translation engine bundled with You Tube captioning took the name of Russian architect Liubov Popova and insisted this meant, in English,
* The translation fight between the two companies continues with the surprise announcement that Xseed will translate the next game in the
* The translation group M.I.J.E.T. specializes in translations of games for the
* The Translation in Blood) and Councilor Sparatus met when he captured her during the Occupation of Shanxi. The two gradually grow friendlier and fall in love.
* The Translation in Blood call Councilor Sparatus "bird", while he calls her "pyjak".
* The Translation in Blood, grow up and become a decorated officer in her own right.
* The translation of the Latin episode name "Et in Arcadia Ego" is "Even in Arcadia, there am I." The phrase is generally regarded as a
* The translators apparently get tripped up by idiomatic speech to some extent. Fwiffo has some difficulty translating "the backbone of the Earthguard" because of this, instead first saying "the most rigid crest".
* The translators are clearly integrated with the Thermian ships(on which all of the main characters' dealing with Sarris and his species take place). They're the ones translating for them, just as they do with the newly-discovered species in the mining colony during the "Gorignak" sequence.
* The translators can have fun with this. In the Organization journals in
* The Transmission Awesome webcast also makes frequent and cryptic references to
* The transmission of electrical impulses in neurons follows the all-or-none principle, meaning it can only have two states. Meaning in a way

* The Transmogrifier: Someone who has the power to transform other people's bodies.
* The transmutation and damage done to the statue of Leto in Liore in the beginning? Still unchanged when Hohenheim and Al revisit the location later in episode 42.
* The "transmutation marks" that appear when performing alchemy aren't there just for show; several alchemists are able to notice these markings and deduce what's been hidden.
* The transparent bright lime "cheek" colors of the Rorzakh became solid black, and the bright blue on the Zadakh was replaced with solid yellowish-brown. The latter's blue eyes also became lime green.
* The Transperth website (the public transportation service in Perth, Western Australia) uses this when issuing notices for upcoming concerts. From the Music/P!nk concert in 2013:
* The Transporter counters with one of these when Frank holds him at gunpoint and demands to know why he planted a bomb in his car to kill him. Wallstreet's response hits Frank hard enough to make the gun tremble:
* The Transporter: don't change the deal, no names, and never open the package. While he's transporting a package for his latest client, he gets curious and opens the package. It turns out to be a young woman who's the "cargo" in a human trafficking ring, whom he then has to protect from his employers and the ring in general.
* The Transporter, Frank suggests he and Lai simply disappear after the villains blew up his house in an attempt to kill them. As Frank puts it, they're thought to be dead and it's not worth it to hunt down the perpetrators for revenge.
* The Transporter, Frank was gay. The love scene with Shun Qi was added specifically to draw attention away from any potential remaining vestiges of that aspect in the script.
* The Transporter from abduction, and she thanks him with sexual favors.
* The Transporter has a non-comedic variation: after every action scene, the fast-paced background music continues playing until the eponymous transporter turns off his car radio.
* The Transporter has a variant where Frank Martin rams a hydrogen-fueled car, then throws his car lighter out the window as he drives off, igniting the fuel.
* The Transporter has one in the opening sequence. Frank is hired to be the wheel man for a bank robbery, with the express and very clear agreement that there will be three men at 254 kilos. The gang shows up with four men. Frank refuses to budge, since he has planned for a very precise amount of fuel to optimally carry three men plus himself and not one smidgen more. The gang's left with the choice of kicking out one man to make weight or sitting still and waiting to be caught. There's nothing tying Frank to the gang, so he's perfectly willing to cool his heels. Finally, the gang leader shoots one of the accomplices and throws his body out, at which point Frank springs into action and proves himself and his ways worth every penny.
* The Transporter. In the second film, Inspector Tarconi befriends an entire police precinct by showing off his cooking skill.
* The Transporter is acting as the getaway driver for a group of bank robbers.
* The Transporter movies usually tries to be this, but he always faces circumstances that force him to act against his code. He always regrets it, though, since he knows not adhering to his code always comes back to bite him.
* The Transporter: "Rule number one: Never change the deal." "Rule number two: No names." "Rule number three: Never open the package."
* The Transporters: One episode has William being lethargic, and it turns out to be because he has a broken cog. At the end of the episode, Dan looks tired... but that's just because he's had a busy day.
* The transporters were remembered. The shuttles were (usually) remembered. What was
* The Transporter, the Martin drives off a bridge onto a moving car carrier, landing on a conveniently empty spot, then knocks off the car behind him and backs off the truck.

* The Transporter. This was dropped when Cory Yuen took over as director for part 1, because he gets it on with the girl in that movie, too.
* The Transporter, using cleats improvised from bicycle pedals to keep his footing.
* The Transporter when the main character's house is blown up by the bad guys. Seriously.
* the Trans-Siberian Orchestra's rendition of ''Carol of the Bells'' into account, the "ass-kicking" in this song is not a good thing.)
* The transvestite hookers from "Sheesh! Cab, Bob?", despite their occupation, are another example of this trope. They're some of the most consistently kind and cheerful characters around. How wholesome are they? One of them is even voiced by
* The Trap Door: A claymation show where a blob creature, a bug and a talking skull who live in a castle owned by an unseen but powerful being deal with monsters coming from under the titular trap door.
* The Trap Door, Berk drops one of the Thing Upstairs' eyeballs down the Trap Door and goes down looking for it. He finds it in a cave that turns out to the mouth of one very large creature;
* The Trap Door (considering the male pronouns used by the rest of the cast, Drut's gender is unclear).
* The Trap Door had some wanderfully evocative examples - 'Globbits' and 'Great Grumfuttucks Tusks'.
* The Trap Door. In one episode, a monster who eats the Thing's breakfast ends up getting served up instead. The Thing likes it.
* The Trapdoor, the many fearsome creatures which break through the titular trapdoor to inconvenience Berk and friends include a set of enormous, inquisitive tentacles, which briefly barge in to cause havoc.
* The Trap Parents: An orphan gains some parents that don't want them to hang around their friends.
* The Trapped Trilogy says this when he locks himself in a safe room to escape a gunman, only to realize too late that he left Dialla, the pretty maid that was helping him, behind. He monologues about how in stories the hero saves the girl and lives happily ever after, and that he realizes that he isn't one of those heroes. Hilariously, he says this even as the player can hear Dialla gunned down on the other side of the door. (Yes, later games in the series retconned this, but taken on its own it's still funny.)
* The Trapped Trilogy This example doesn't really hold the story together that well, though.
* The Trapped Trilogy with animation and voice acting, distinct from the above series)
* The Trap (Serbian: "Klopka"), the protagonist is hired to kill a man so he could raise money for his son's life-saving operation.
* The traps Imperial Order and Royal Decree negate the effects of all spells and traps on the field respectively.
* The Trapster, despite being a recurring member of the Frightful Four, is considered a laughing stock by everyone. It all started when he first named himself Paste-Pot-Pete. Breaking in Four Freedoms Plaza in the absence of the
* The Trash Pack, all blind-bagged rubber figurines by Moose Toys, share a world.
* The Trash Pack being the monster. Being a Trashie made out of a poorly-disposed item, he's the most dangerous, being a living toxic waste barrel still filled with his contents. He has to be detained by the robo-haulers before he hurts anyone.
* The Trash Pack. Both are mini collectible figures that are both created by Moose Toys and share a supplemental universe.
* The Trash Pack episode "Completely Armless" makes their own song up that lampshades this issue.
* The Trash Pack has had "Design Your Own Trashie" contests, where the winners get their design made into an exclusive Trashie figure.
* The Trash Pack has three minimum color palettes, while the other two have a minimum of two. Some special packages gives existing figures exclusive colors that can only be found in those packages.
* The Trash Pack is a living one. He was dumped for his age (he's an old CRT

monitor), and has poor pixels and gets computer viruses very easily...though in his case, these are colds for him.
* The Trash Pack is a maggoty rat skeleton caught in a mouse trap, still desperately trying to grab for the cheese out of his reach.
* The Trash Pack), Rotten Apple is "Pips", Putrid Pizza is "Cheezy", Stench Fries is "Frittes", Blow Fly is "Buzz", and Smelly Sock is "Patches".
* The Trash Pack-style, with certain qualities, such as the "Stink Score" and "Gross Gauge" of the "Filth Factor" winning out based on the dice roll. Each card came in two variants of colors, with some having holographic cards. Special scenarios for the character were drawn on the cards.
* The Trash Pack, there are various Trashies made out of fecal matter, such as Poop Plop and Poop Monster.
* The Trash Pack trading cards, Grotty Bot Fly is portrayed as floating in a bowl of tomato soup...along with tons of maggots.
* The Trash Pack was heavily reviled by both fans and reviewers alike for being a high-priced video game that only contained four minigames and a checklist for the first wave of figures.
* The Trash Pack would later get direct to DVD movies based on the web series.
* The "trash the place" technique was used on Joan's apartment at the beginning of
* The Traveler and its Light with little to no memory of their pasts. The other species and peoples of the Solar System make direct comparisons between the Guardians and the undead.
* the Traveler, despite being a tiny moon, was turned into a verdant green Earth-like world.
* The Traveler, Detective Black is the only survivor out of the 6 police officers whom Mr. Nobody vows to take revenge on.
* The Traveler's Gate: Damasca takes nine citizens every year to sacrifice to the Hanging Trees of Ragnarus, which keep the Incarnations sealed. The series starts with Damascan soldiers wandering into Myria, a tiny village that isn't even aware they are part of Damasca and has no idea anything is expected of them. Apparently the soldiers are not normally supposed to take all the sacrifices from a single village, especially not such a small one. It's not clear why it was done differently in this case.
* The Traveler's Gate for the head of the family, as the pain is ultimately an illusion and thus nowhere near as dangerous as the other prices.
* The Traveler's Gate: If a Valinhall Traveler makes a pact with the Nye, they are granted part of their essence, which slows the world while still allowing the Traveler to move normally. Kai is the only experienced Valinhall Traveler known to not have Nye essence, as he refused to make a pact.
* The Traveler's Gate in the face) and then threating to punch him herself when he doesn't immediately obey. She was apparently based on the author's sister Rebecca, who would constantly yell "I'm going to punch you in the face" when they were children.
* The Traveler's Gate: Kai, of the "incompetent" variant. It certainly doesn't help that he never wanted to be a teacher in the first place, and constantly grumbles that it should have been Indirial's job.
* The Traveler's Gate: Naraka Travelers are supposed to be completely dedicated to justice. Unfortunately, Naraka defines justice as "punishing the guilty." They don't much care about side effects of their punishments, or even about preventing crimes. A Naraka Traveler can commit a crime, undergo proper penance for it in the form of pain, and then go right back to committing the same crime again.
* The Traveler's Gate: Ragnarus works on pain and sacrifice; blood is the most common medium of gaining what you want. The Hanging Trees that require nine lives every year are the most famous, but even entering the Crimson Vault requires a Ragnarus Traveler to give up some blood.
* The Traveler's Gate: Simon is informed that he has no great destiny, that Alin is the one who will save everyone, and surely everything will be alright because of the prophecy. Simon picks up his sword and gets to work.
* The Traveler's Gate: Travelers use Gates to "Territories" from which they summon

monsters and allies. They can also use the Gates for travel (hence the name). Those are the general rules, but each Territory also has its own quirks. Endross Gates get bigger the longer they are open and eventually run out of control, Lirial Travelers can only summon things if they know exactly where they are, Valinhall Travelers summon powers into themselves rather than summoning allies, so on and so on.
* The Traveler's Gate: Valinhall's emphasis on earning everything means the Territory has an odd ability. If a Valinhall Traveler wins an item from another Territory in battle, they can take it back to Valinhall and have it remade into a form that the Travelers can draw power from. It is placed in a room and given an appropriate test, and once a Traveler passes that test they can use its power.
* The Traveler, the Drifter was assaulted extremely badly to the point of coma by Detective Black and the rest of the police officers who were at the interrogation scene. This sets off the entire vengeance plot of the film.
* The Traveler, which will make him lose powers and become vulnerable to physical attacks. Kinda makes sense for him to conceal his identity throughout the film.
* The Traveler. While the Traveler always wears a hood, it's constantly falling off and he's shown putting it back on numerous times per issue. He wears a mask that covers everything but his eyes and mouth though, so his face still isn't seen even when the hood is down.
* The Traveling Triple-C Incorporeal Circus dies by accident right after receiving the invitation to her younger brother's wedding. The desire to attend his wedding stays with her after death. (The wedding itself is pushed back several years due to the family grieving Chelsea.)
* The Traveling Triple-C Incorporeal Circus, ghosts Chelsea and Carmen must become this in order to put on a circus show and distract some poltergeists.
* The Traveling Triple-C Incorporeal Circus, how much chill a person feels is dependent on how inherently receptive they are. Some people ignore a ghost passing through them entirely, while others may feel it so strongly that they stop in place.
* The Traveling Triple C Incorporeal Circus. The exceptions are "wailers", ghosts so consumed with grief that they become incapacitated, and "poltergeists", ghosts so consumed with rage that they become monsters.
* The Traveling Wilburys' "Cool Dry Place" has a moderately eclectic set of things, many of which are musical instruments though the list also includes "old athletic shoes" and "things that sometimes hum." However, they're not actually being used to build or do anything, they just apparently all need to be stored in a cool dry place.
* The Traveling Wilburys song "Tweeter and the Monkey Man" is a Springsteen ... parody? pastiche? tribute? ... something, and features many references to New Jersey.
* The Traveller Adventure can work with them to foil the Kforuzeng plot to buy stolen Imperial naval meson guns.
* The Traveller in Black is set in a magical otherworld, but the first story in the series has a 20th-century Londoner find himself transported there, providing a familiar viewpoint for the reader. (He's sent home at the end of the story, having served his purpose both in-universe and out-.)
* The Traveller in Black. Most wishes he hears are very unwise and so turn out incredibly badly for the person who made the wish (not usually for anyone else). Very occasionally, someone will make a wise wish and those turn out well.
* The Traveller in Black travels about the magical world where the stories are set, with the two aims of seeing how the world is getting along and bringing poetic justice where it's called for.
* The Traveller that were removed from the Sovereign Host not because they were evil, but because the Sovereign Host was becoming the religion of civilization. Which, together with Eberron's Absent Deities-situation, leads to their evil possibly being a result of the Dark Six-worshippers gradually, over the ages, beginning to believe the propaganda spread about their deities.
* The Travelocity commercials always feature their mascot: The Roaming Gnome,

* The travel plans and marriage plans of French playboy Michel Marnet in
* The Travels of Marco Polo is a biographical (and somewhat confused) recounting of the Italian explorer's 13th-century expedition to the Middle East and China. It was a blockbuster hit in its time.
* The Travis video "Sing" is entirely made up of a food fight at a formal dinner party.
* The Treachery of Beautiful Things, Jack characterizes Titania's hunt by calling it this.
* The Treachery of Beautiful Things she won't be believed, quite thoroughly.
* The Treasure in the Tower, the characters find Keeley's own Spirits novels for sale on a second-hand bookstall for £1 each and main character Jess contemplates buying them, noting 'I thought they went a bit weird after the third one.'
* The Treasure Island of Dr. McLean". He takes one gulp and can't keep it down, spitting it out violently as he struggles to continue praising it and simultaneously get rid of it.
* The Treasure of Eyja Nott; after spending most of the story believing that Astrid abandoned him and his disgraced father after his false arrest to marry the man who betrayed him, Hiccup learns that Astrid only accepted that proposal on Stoick's urging because she was pregnant with Hiccup's twins and Stoick wanted to ensure the safety of his grandchildren, Astrid acting as Eret's 'dutiful' wife so long as he took financial care of the children.
* The Treasure of Eyja Nott, it's a fairly basic one, but his eyes are too distinctive for him to be sure he wouldn't be recognised if his enemies saw them, even with the advantage that most of the people he's trying to deceive think he's been dead for over a decade.
* The Treasure Of Lost Canyon was filmed around Feather River and Burney Falls, in Northern California.
* The Treasure Of Swamp Castle, Caffrinka, the elderly Romani woman living in the swamp, is believed to be a witch.
* The Treasure Of The Kapitana can be seen. The end of the novel claims that, thanks to the actions of the main characters, magic has been released from its container, where it was placed long ago. In fact, it's claimed that the catastrophe that destroyed the old world is the direct result of magic being removed (screwing up the natural order), and that the cassats came to this world in order to correct this.
* The Treasure of the Sierra Madre after Dobbs and Curtin beat down their deadbeat employer they take only the money owed to them and then leave something on the bar for the drinks and damage.
* The Treasure of the Sierra Madre (better known as the movie where "We don't need no stinking badges!" comes from), the banditos have the protagonists surrounded, and the first warning shot goes right through their leader's huge sombrero.
* The Treasure of the Sierra Madre). Fred C. Dobbs? First a Turkish Bath to clean out all the dirt. Then clothes — a dozen of everything. Then a fancy restaurant ordering everything on the Bill of Fare and if it isn't just right, and maybe even if it is, he'll send it back and bawl out the waiter. When Curtin asks "Then what?" Dobbs answers "Well, what would be?" The two younger man stare into space with very intense looks until Howard interrupts them to remind them it wasn't all that healthy to be thinking about women in their current situation. Big dreams for $30,000 each but it was 1925.
* The treasure of the Sierra Madre includes several gold bars that each value at a little over 10,000 caps and weigh 35 pounds. However, at the end of the module, the player's
* The Treasure of the Sierra Madre is a fast talker, but Howard is the fastest talker of them all.
* The Treasure of the Sierra Madre leaves out considerable amounts of backstory, as well as the chapter-long morality tales recounted by various characters.
* The Treasure of the Sierra Madre, Robert Lacaud becomes Robert Cody.
* The Treasure of the Sierra Madre (the director) and won a Best Supporting Actor

Oscar for his role, alongside his son, who won for Best Director. This role was young Huston's gift to his father, who had asked him to, "find a good role for his old man."
* The Treasure of the Sierra Madre. Veteran prospector and miner Howard mocks Fred and Bob for going wild over some pyrite- fool's gold. Real gold, before it's refined, looks like a funny coarse sort of sand. Later, in the film's climax the banditos from before capture a mule loaded heavily with raw gold, which they contemptuously pour out into the desert sands.
* "The Treasures of Jamaica Plain" have stirred the imaginations of the people of the Commonwealth, in part because the location containing the treasures is very heavily guarded with automated security, while the town itself is infested with feral ghouls, resulting in the
* the treasure to defeat Lord English is apparently unleashed on him. We don't see what it does or how (or if?) it kills him.
* The treasure vaults in Castle Cornelia have been bound with the mystic key.
* The treatment dished out to unlikely wrestling try-out Louis Theroux
* The treatment of magic varied a lot. For most of recorded history, it was either
* The treatment of psykers is among the most brutal in fiction: they are hunted down and shipped off to Terra in ships crewed by blanks (extremely un-psychic
* The Treaty of Berlin in 1878 severely decimated the Balkan possessions, with Serbia, Romania, and Montenegro, all previously being Ottoman vassals, severing ties with the Ottomans for good.
* The Treaty of Farixen is the law that prevents races from constantly making dreadnoughts (ships with kilometer-length railguns) in order to prevent undue damage to the galaxy as a whole in times of war, but also the ratio of ships permitted by each military. The ratio that for every five ships build by the turians for their Peacekeeper forces, the other Council races the asari and salarians (plus humanity as of the end of the first game) are permitted three, while protectorate races such as hanar and volus are only allowed one. However, it says nothing about
* The Trebek version has its own version in the Clue Crew, a set of assistants who have regularly provided video-based clues since 2001. The longest-tenured are Jimmy McGuire and Sarah Whitcomb Foss. However, the original Clue Crew consisted of McGuire, Foss, Cheryl Farrell, and Sofia Lindskog. Lindskog left in 2004, with both Kelly Miyahara and Jon Cannon replacing her; Farrell left in 2008, Cannon in 2009, and Miyahara in 2019.
* The "Treehouse of Horror V" segment "Time and Punishment", which begins as a parody of "A Sound of Thunder" and gets progressively weirder — but no matter what changes Homer makes to history, there's still a Simpsons family, and they're still living in the same house. (Granted, the house is in various permutations of history a McDonalds, a Sphinx with Bart's face, and a giant shoe a la the
* The Tree of Emptiness that grows in each Lostbelt is what keeps it on Earth, acting as a lynch-pin that slowly grows and pins the Texture of the Lostbelt onto the blank slate that the Earth has become.
* The Tree of Life failed to make its budget back (grossing just $12 million domestically on a $32m budget) but won the Palme d'Or at the Cannes Film Festival and won much acclaim from critics (even becoming a top awards contender).
* The Tree of Life fits this trope, possibly being the most abstract film to get such major stars and a $30 million+ budget.
* The Tree of Life with spiritual overtones. There is a great deal of tension with the protagonist's father, but he is far from a villain. He is portrayed as flawed but sympathetic, and genuinely cares for his family. His flaws serve as more of an Aesop about the film's theme of nature vs grace.
* The Tree of Might became "The Christmas Tree of Might". The whole plot starts when Krillin wishes for the perfect Christmas tree and Turles is basically the Grinch as a Saiyan.
* The Tree of Wooden Clogs features a character telling a scary bedtime story. A man robs the grave of a recently deceased woman, cutting off her hand to get her jewelry. He later meets a woman on the road dressed all in black, who asks for a

ride. When the man's cart passes the cemetery the horse stops and won't go any further. The woman asks to get out, the man moves to help her out of the cart and asks her to give him her hand, and the woman says he already has it.
* The Tree of Wooden Clogs: Near the end of the movie Maddalena and Stefano get married in the village church.
* The tree-snare variant of this happens to Beck, the main character of
* The Trees of Pride corroborating the folk tales regarding the tree's lethality). He talks the Squire into going on a secret vacation for a few months, then plants evidence to indicate that the Squire was murdered and that he was the murderer. Since he could easily halt any prosecution by simply producing the Squire alive and well, he knew that he personally ran very little risk.
* The Trees of Pride to accept any idea which has been presented to him in the form of a popular narrative. This pushes him into conflict with Dr. Brown, a much more rational atheist who had analyzed the popular legend linking the "peacock trees" on the Squire's land to the mysterious fevers that ravaged that region, and found that the evidence supported it.
* The Tremas Master inverts it with every Doctor he encounters. While not to the same degree, he does still capture much of the Delgado Master's "suave older gentleman" charm against multiple goofy-looking and awkward Doctors (Four and Seven in particular). The Fifth and Sixth Doctors, while more conventionally attractive, still play into this inversion for being less charming than he is. Additionally playing into this inversion is that
* The Tremeloes) until they released a cover of Cat Stevens' "Here Comes My Baby" in 1967. Later the same year they released another cover, the Four Seasons' "Silence Is Golden" before they faded back out of the spotlight.
* The Trenches that slipped through QA and got released. He tells each of the QA testers something different, and then fires Marley when his version goes public. The subversion is that Marley isn't the mole, Cora is; Isaac figured out what was going on and leaked Marley's info himself. He did this for two reasons: A) to protect Cora, who ultimately had the users' best interest at heart, and B) to punish Marley, the QA tester who let the bug go live in the first place by getting too stoned to do his work.
* The Trenches, whose father literally wrote the book on the game her studio is trying to build.
* The trench scene, one of the most effectively ominous moments of the film as the characters never enter the terrifying trench and find out what lies inside, apart from the skeleton of a fish at its entrance. Ironically, the trench was said to be the safer route and the wide open space ends up proving more dangerous.
* The trend continues with the main antagonists in the other sequels: in
* The trend of the not showing adults in any form is averted in the fourth movie,
* The trend started with PF Magic's original development of the Petz, Babyz, and Oddballz games. PF Magic was also responsible for
* The trend towards miniturized gadgets is starting to turn around, with phones getting bigger and bigger (leading to "Phablets" such as the Samsung Galaxy Note line). Then again, smart
* The Trents: The original song "Green River Reflections" is basically this trope.
* The "Trent Tucker Rule" in the NBA legislates that no player can attempt a catch-and-shoot that will count if there is less than 0.3 seconds left on the clock; only tip-ins will be allowed to count with a ball in play under those conditions. This rule came about in 1990 after Trent Tucker of the Knicks hit a go-ahead shot while the game clock only ticked down from 0.3 to 0.1, which Bulls coach Phil Jackson argued should be physically impossible. In the name of removing human error (because a timekeeper manually starts the clock) and possible home-court advantage (where the local timekeeper may delay starting the clock a few tenths more to give the home team additional time), the NBA put it in print that a jumpshot cannot count with under 0.3 seconds left.
* The "T-rex Bat Challenge" requires you to buy the T-rex Bat (a weapon for Ness that you aren't supposed to get for two more full areas) when you are leaving Winters with Jeff. It costs $698, and it's only possible by selling the random

drops you get from enemies up to that point.
* The Triads and the Tongs, they're nowhere near as powerful as their counterparts in other places, due to the Communist government cracking down on Triad-style secret societies ever since they took power in 1949.
* The Triads mistake Michael and Trevor for a gay couple due to their being seen alone together during various parts of the story. When Franklin shows up, they begin to wonder if he's their
* The Trial, a literal example. He found it to be extremely funny, and considered it one of his best works. Certainly Josef K.'s ineffectual blundering, as he continually tries and fails to salvage his situation, unable to even get the authorities to tell him what he's charged with, can be seen as darkly comic.
* The Trial. Blue Zircon repeatedly slams her head into a pillar during his entire spiel.
* The Trial" had a lizard warrior that would come back together every time he got chopped up. Angel eventually cut him in half, then chained up the pieces on opposite sides of the room, before moving on.
* The Trial he's being accused of, but in keeping with the surreal nature of the rest of Kafka's work, is thwarted at every turn.
* The Trial, in that the man trying to enter the gate that leads to the law itself never gets to enter despite spending an entire lifetime trying to learn the required price.
* The trial isn't even in the correct venue. Exactly what jurisdiction does a California state court (Star City is in California) have over an alleged murder committed in
* "The Trial of a Time Lord: Mindwarp"! However, he only really had that status at the start of the story — The evil, that is. Not the hamminess. In fact, the hamminess just kept increasing as the story progressed.
* The Trial of Captain Hook and requesting the judge to do this (in song).
* The Trial of Jean Grey promptly taking on the entire Imperial Guard to get her back.
* "The Trial of Leslie Knope": Leslie and Ben are on trial for ethical violation of superior dating subordinate. Ben declares his love for Leslie and resigns. Leslie tracks Ben down in the snowy night, and tells him she loves him too. She also drags there Ethel who is a court stenographer so that Ben knows it's on official record.
* The Trial of Mr. Wolf feature a gag where a character tries to flee a his pursuer's house, but finds him behind every door brandishing increasingly deadlier weapons.
* The Trial of the Big Bad Wolf, to contrast with his lethargic attorney.
* The Trial of the Chicago 7: 99% of the police footage in this film is of them beating and arresting protestors (usually without any cause), including one scene where they rip off their badges before assaulting them right outside a fancy diner. Fred Hampton is also killed by police offscreen when he was already helpless. "Executed", Seale rightly says.
* The Trial of the Chicago 7 by Lee Weiner, one of the Seven, who wonders if there were 10,000 cops and only seven protesters in Chicago.
* The Trial of the Chicago 7 in a conversation between Bernadine and a cruel caller.
* The Trial of the Flash #8 was published to hide the big reveal that Barry was going to die. This meant that the storyline had to be dragged out even longer so as to do so.
* The Trial of the Flash, Reverse-Flash invokes this by planning to kill Fiona in the same way he killed Iris.
* The Trial of the Flash turns to other lawyers, Redik tries to have them killed to force Flash to employ him.
* The Trial of Venom that Matt was Daredevil. He might never had been found out unless a still-suspicious Spidey decided "just to make sure", and provoked a heated argument with Eddie, making him angry until the symbiote emerged and he gave himself away.

* The Trial of Venom) which includes new holographic technology. She also explains how they're experimenting with a rewards system to encourage rehabilitation, showing Moonstone as an example. She's sunbathing in her cell, which has been turned into a pleasant beach motif using the holograms.
* the trial should not be happening at all do. And since Prometheus wasn't surrendering and was a highly dangerous felon who has already killed entire squads of cops who've tried to arrest him before, shooting him the instant he makes a sudden move is justifiable homicide. Sure, Ollie's confession as to his intent should have gotten him dismissed from the JLA for going way outside of policy, if not asked to go see a psychiatrist, but it doesn't sustain a charge of murder one. If Ollie had sniped Promethus unawares, then yeah, that's murder — except he didn't.
* The Trials of Apollo appears as a cameo, wearing a T-shirt that says in Latin, "My Cohort Went to New Rome and All I Got Was This Lousy T-shirt''.
* The Trials of Apollo (bisexual main character, various queer supporting characters, background queer romance)
* The Trials of Apollo book. Zombies (also called by their Greek name, vrykolakai) are unfazed by fire and will continue to advance through a wall of flame and be completely unfazed even as their bodies burn. Apparently, this immunity to fire is why Hades didn't make the Phlegethon the border of his relm.
* The Trials of Apollo boys, sons of Hades and Apollo respectively. Nico is dark-haired, very broody, extremely powerful and a deadly warrior. Will is blonde, upbeat and a healer. Even Apollo himself thinks that they are cute together.
* The Trials of Apollo, he slowly starts to get purple veins spreading all over his body. This is a sign that the infection is reaching its final stages.
* The Trials of Apollo is noted as being unusually strong on this front.
* The Trials of Apollo, is utterly terrified of Caligula, enough to the point that he momentarily forgets he's immortal and Caligula can't hurt him. He stays away from Rome for decades after that particular encounter.
* The Trials of Apollo mentions that the harpies cook breakfast and has dryads serving drinks at dinner.
* The Trials of Apollo more or less ditched this. Virtually every opponent encountered serves a purpose to either the current objective or the myth arc.
* The Trials of Apollo: Nico di Angelo and Will Solace have been together for six months, and argue like they've been married for five decades. It's both hilarious and adorable.
* The Trials of Apollo: Piper and Jason. Despite breaking up, they still care for each other a lot and go on missions together.
* The Trials of Apollo, the third series of Rick Riordan's Greek Gods saga, Apollo mentions one of his kids' mortal parent is male. He then points out that his brother Dionysus was incubated and birthed from their father's leg so this shouldn't be so shocking.
* The Trials of Apollo to deal with his enemies. Rather, the true Caligula of the series would be Tarquin, a singularly arrogant, bad-tempered tyrant who seized power and ruled through violence, attended by a powerless, captive senate, with a harem of enslaved women around his throne at all times.
* The Trials of Apollo" where for a while, all he does is whine about how unfair his punishment is and how much it sucks to be human. Although he does get better by the end of the book and even shows genuine guilt at the problems he's caused and concern for others, especially Meg and his children.
* The Trials of Apollo will come out if she doesn't behave and that it was The Beast (and not him) who killed her biological father.
* The Trials Of Oscar Wilde when he learns that the prosecution is offering plea bargains to male prostitutes in exchange for evidence against Wilde - at the time, this sort of arrangement was absolutely unheard of under English law, and the lawyer feels it's a far worse perversion of justice than Wilde's perjuring himself.
* The Trial, the accused never does learn what the charges are against him or why he's executed (see also Literature below).
* The Trial", Tommy's clown lamp is broken and the titular trial is treated like

one for a murder.
* The triangle is resolved partway through the movie when Chase dumps Batman for Bruce Wayne. Batman, stoically, says that he understands, and manages to turn around and walk away before he breaks into a grin.
* The tribal Horde races (orcs, tauren and trolls) all seem to be this. It's been stated many times that the leaders of tribes are the most powerful warriors in the tribe (or, in the case of trolls, most powerful witch doctors).
* The Tribe - a failed pilot centred around the exploits of a group of cavemen.
* The Tribe: After joining the Mallrats, Ebony still wore the red and black clothing associated with the Locos, her old tribe. Although as the Mall Rats all have their own individual clothing and face-paint styles anyway, Ebony wearing the Locos style stands out significantly less. While each of the other Tribes has a unique style of dress and face-paint markings that is worn by all members (of that tribe) as a uniform.
* The Tribe and his posse play a game of this with Spencer and his inhaler. It goes on until he can't breathe.
* The Tribe and quite a lot of the children in the world over some indeterminate timescale, but apart from some low-level fighting (the survivors are, after all, children), life continues. The children first scavenge what remains, and then return to farming to survive in small tribes dotted throughout the city and countryside. They seem able to recreate society to a roughly mid-20th century level (some machinery, electricity, computers/TVs) though a bit patchy in places.
* The Tribe from season 4 onwards. Ebony, Java, and Siva, who play sisters on the show, are played by the real-life Cassie sisters.
* The Tribe has a curious version of this: women can and do survive sleeping with him, but if they say "I do" they're signing their own death warrant. First wife Zandra is killed in the explosion at Eagle Mountain (end of season 1), second wife Tai-San is kidnapped by an invading tribe and assassinated (off-screen) when her attempt to infiltrate them is revealed (season 5), and third wife Siva is shot dead by her own sister (end of season 5).
* The Tribe, he arms himself with a crossbow, and the characters treat it like an instantly lethal, game-breaking weapon. And finally, in Season 4 the city is invaded by a technologically advanced tribe with stun guns... and yet no one thinks to dust off their parent's old revolver. Clearly, the pre-apocalyptic version of whatever country the hell this is had some serious gun control.
* The Tribe: In the second book, "Camp Cannibal", Spencer finds the Camp New Leaf counselors tied up in their sleeping bags, which are hung from a tree.
* The Tribe killed off all the adults. Based on the technology commonly used and traded by the various Tribes (CD players, egg-shaped original iMacs, no iPods), the Virus struck some time in the late '90s or early '00s.
* The Tribe leads the campers from the girls' side of Camp New Leaf in an attack on Peashooter's Tribe, saving all the campers' parents, and Spencer and his friends, from death.
* The Tribe mothers or bosses everyone she comes into contact with. To such an extent that she's the de facto leader of the Mall Rats, no matter who else is technically in charge.
* The Tribe occasionally talk about needing did or water, but rarely actually run short, and of course there's never any shortage of fantastic, perfectly tailored clothes and brightly coloured make-up.
* The Tribe of the Mouse may be a literal example of this trope. They are Americanists (although earlier versions had them as Atomicists), but given their name and the fact that their capital is in Orlando and their ruling family is the Waltney family, it is likely they have some reverence for Disney and Mickey Mouse.
* The Tribe: Spencer finds Sporkboy's picture on the side of a milk carton at school in "Homeroom Headhunters". He takes it off the carton and puts it in his pocket.
* The Tribe, the Technos are carrying out a secret project by kidnapping various people and hooking them up to an inescapable virtual reality environment for Ram's private enjoyment. The hordes of respawning mooks he fights off are created from

those people's minds.
* The Tribe, the Technos call other people "Virts" (derived from "virtual") to show they don't think of them as real people.
* The Tribe: The Titular Tribe make their weapons out of school supplies, such as yardsticks sharpened into spears, or paperclips bend into darts.
* The "tribophysical waveform macro kinetic extrapolator" introduced in "Boom Town" and used by Captain Jack Harkness to shield the TARDIS from Dalek missiles. Apparently, it can shield a single person from an
* The Tribunal are a trio of immortal elves who obtained divinity utilizing the technological artifacts of the Dwemer and are worshiped as deities by the Dunmer (the dark elves of the setting). Unlike other existing pantheons in the series, the Tribunal are
* The tricked-out Nerd Herder has hidden passenger-side controls, a remote control, a hidden central console, handcuffs that come out of the steering wheel to detain prisoners, and a driver's seat that can be ejected out the door. Why? Because it does, that's why.
* The trick here wasn't intentionally dumbing down the mass-produced version but rather the designers being ignorant of one crucial fact: the Gurren Lagann, like all Ganmen, is an
* The trick is that in both these cases, Tuvok had a perfectly logical reason to lie. We might reasonably assume that most Vulcans would not lie, for example, to spare a friend's feelings (from the Vulcan perspective, allowing emotions to influence a decision is illogical), or get out of a tedious duty (the duty needs to be done, so procrastination would be illogical), and other species would remember those instances of honesty as unusual, even extreme. Vulcans (clearly) have the capacity to lie if the situation warrants it, they just won't do it unless there's a logical reason why it's necessary; since most lies that a human would tell wouldn't be necessary from a Vulcan point of view, it gives the (not quite correct) impression that Vulcans don't or can't lie.
* The Trick Shot Can shoot the wings off the back of a fly while hanging upside down and having to ricochet off a wall or two. Will occasionally interact with surroundings using same pistol.
* The Trickster archetype, he is somewhat affectionate and even helpful towards her, eventually caring about her as her own person.
* The Trickster does this when Sam and Dean trap him and reveal that he's
* The Trickster, especially in his first appearance. Also creates his own illusion of Supernatural's TV shows and traps Sam and Dean inside. This illusion was SO good that The Trickster claimed it was real, which was not a lie, given that he is
* The Trickster. Here, a Trickster is a pagan god. He can reshape reality and mess with time. Dropped a guy into a wormhole
* The Trickster in the DC Universe once went to help an ex-girlfriend whose son was in danger. After protecting him from the demonic Neron, he did the arithmetic to realize who the father had to be.
* The Trickster is "preparing" Sam for Dean's untimely death in the season finale so he doesn't go off the rails. The Trickster's goal—to teach Sam that "you Winchester boys are so eager to die for each other—and the thing is, the bad guys know it too"—was thoroughly ignored and sidestepped by Sam, who instead learned just how much life without Dean would suck.
* the Trickster starts throwing Sam and Dean into different TV shows (and each is a thinly-veiled Affectionate Parody
* The trick to this, of course, is that everyone had to be asleep when they hit the time rip, or else they'd disappear like the rest of the people on the plane the first time through.
* The Tricky Mod, as many players were curious to know more about the characters that were featured in said mod and want to see more.
* The Tricorder was even described as such on a History Channel special on the
* The Triforce of Power is stated to have made Ganondorf immortal as long as he is connected to it, although that connection can be forcibly severed.
* The Trigan Empire features little black boxes with attached wires which, when

plugged to the temples, cause the user to experience his or her favorite fantasy in lurid detail. They are a dangerous addiction.
* The Trigan Empire, Trigo's simple warrior brother has a very macho bashed-in nose. He is a good guy, but in one story is seduced into evil by the horrible Darak, who has a long scar straight across his eye.
* The Trigan Empire used to get away with this, despite the bare arms and legs exposed by their pseudo-Roman outfits. Trigo, for example, once escaped a room full of baddies by leaping through a window with his bare arm covering his eyes and his sandaled foot leading and maybe kicking the glass. Not a drop of blood anywhere!
* The Trigger and Michael Kube-McDowell uses fictional examples of Conspiracy / Terrorists Without a Cause and Reactionary Militias, and an apparently real-life but rather obscure one, Los Macheteros (terrorists for Puerto Rican independence.) Wouldn't be so noticeable if Eastern and Middle Eastern terrorists weren't absent.
* The Trigger Twins dress like cowboys and theme their crimes around
* The Trilisk Ruins, the link conveys his words a deep suave voice, but Telisa eventually tells him that she just can't associate the new voice with him and asks him to simulate the old buzzing drone-voice instead.
* The trilogy of "Super Babies" episodes feature Dora telling a story that her twin baby siblings are superheroes.
* The trilogy's first season parodies this with an ominous looking FOTUS soldier that
* the Trinity Broadcasting Network (TBN) off the donations from his viewers.
* The Trinity Killer from season 4 kept plaques from various places all over the USA
* The Trinity Killer; we see the dark side first. It's the "nice guy and family man" side that comes as a complete shock.
* The trio also has distinct ways of running, Double D knitting his arms and back straight, Eddy doubled over with his arms extended (and more often than not, his big discolored tongue sticking out), and Ed sort of loses control of his upper body, causing it to hang backwards as he runs, his arms extended.
* The trio of conspiracy theorists Langly, Bayers and Frohike got their own spin-off series,
* The trio of time-travelers found Hikari right when she was about to go out with Touji. She had gotten ready on their date, and the kids were shocked at how pretty she looked.
* The Trio start out this way. They gradually are noticed more and more, culminating in
* The Trip (1967): Before Paul's trip begins, he rubs his fingers together and at one point walks his fingers along a railing.
* The Trip (1967), many of Paul's LSD-induced hallucinations feature quadruple, quintuple, or sextuple vision.
* The Trip (1967): When Paul's acid trip turns bad, he curls up on John's couch, saying, "Oh, I'm dead. I'll never get back. My body's gone."
* The Trip Across Paris) (1956), a coffin is used to smuggle a black market pig past the checkpoints in Nazi-occupied Paris.
* The Triple Dark": During a pirate attack, Kaz is blasted into the air and, along with diminutive Aleena conman Grevel, who's hanging onto his ankle, winds up briefly clinging to the ship of pirate leader Kragan, before they eventually fall back to the Colossus.
* The Triple Goddess is apparently either unwilling or even unable to do this in the
* The Triple Tails were the evil counterparts to Syuri's dance group Apple Tale. The Triple Tails initially had no direct connection, as Apple Tale were in SMASH and
* The triplet butlers of the Trancy staff do this in episode 5 of the second season after the Phantomhive staff makes a mess of things.
* The Triplets of Belleville. All of its citizens seen in the background are grotesquely obese. Even the Statue of Liberty is a fat woman holding a cheeseburger. On the other hand, they are portrayed as polite, happy, hard-working,

and if they have the time to, helpful to anyone in need.
* The Triplets of Belleville, another animated film with practically no dialogue.
* The Triplets of Belleville: A pedalo is borrowed from a rental hut towards the climax of the film. At the very end of the film, much later on and with almost zero chance of the pedalo being returned, the hut owner is still standing expectantly at the water's edge, looking out and checking his watch.
* The Triplets of Belleville (co-production with France, Belgium and United Kingdom)
* The Triplets of Belleville. Having cycled for most of his life, Champion has a rail-thin torso with overly developed legs.
* The Triplets of Belleville, Madame Souza warily regards the frog stew the eponymous triplets have made, and even Bruno, the obese dog shown so far to eat anything, sniffs it and then backs away. This is mostly due, however, to the fact that one of the frogs in his serving is still alive and starts to kick.
* The Triplets of Belleville — the otherwise entirely stereotypical mobsters are actually French, and obsessed with cycling.
* The Triplets of Belleville: Mme Souza, while trying to order a hamburger, opens her purse, only for a moth to fly out of it. When it lands on the smiling cashier's face, the cashier realizes that her customer has no money.
* The Triplets of Belleville of tiny men and their enormous wives. The influence of Albert Dubout (see Arts above) is likely.
* The Triplets of Belleville one of the Mafia's cars narrowly avoids hitting a screaming woman with a baby carriage by steering to the side and crashing. A second car does, however, impact with the baby carriage — and crumples like an accordion, while the baby carriage and its laughing occupant remains completely unscathed.
* The Triplets, the titular triplets were based on Roser Capdevila's own triplet daughters.
* The triplets, Webby, and Doofus Drake are kids and Launchpad is at least in his twenties, but they get along terrifically (although this is somewhat crossed with hero/
* The Triple: Two normal items followed by a non sequitur or humorous third item.
* The Tripods and so much fondness for using it that the only way to conquer humans is mind manipulation. That is a race capable of interstellar travel is afraid to fight humans face to face. However once that technique is used, Earth turns out to be fairly easily conquered, at first. Several generations later when the second wave of Masters arrives they find every Tripod city destroyed and the humans ready and waiting.
* The Tripods because they're hiding in a cleft of rocks that absorb the impact.
* The Tripods book trilogy. The aliens utilize mind control for their infiltration and subsequent invasion.
* The Tripods depressing cliffhanger (which was also completely original to the series).
* The Tripods device which (in his case) has been disconnected. Fortunately he's able to convince the Masters that allowing him to learn naturally would increase his initiative.
* The Tripods" Earth to change the atmosphere to one they can breathe... but humans cannot.
* The Tripods for a considerable amount of time before the first shot was fired.
* The Tripods from BBC has a group of soldiers called the Black Guard who are portrayed as the Tripods' emissaries in the outside world (though they aren't present in the books).
* The Tripods had evolved in a higher gravity world and built domed cities to maintain a higher pressure to accommodate both this and their need to breathe an atmosphere other than Earth's. It didn't have a good effect on their human servants.
* The Tripods: In order to capture one of the Masters, the protagonist rides a horse (painted green to catch their attention) past one of their Tripods, and when it gives chase lures it into a hidden pit.

* The Tripods. In "The City of Gold and Lead" human slaves go to booths were they can be killed painlessly once they've become too worn out to serve their Masters. Given the high gravity of the city, this only takes a few years.
* The Tripods. In the first episode of Season Two however, a freeman gets killed this way when he runs near the Tripod to divert its attention from his friends
* The Tripods message through the caps.) It was really to stifle creativity and independent thinking and make humans easier to subdue.
* The Tripods On an Earth long occupied by conquering aliens, the heroes pass through an abandoned human city and find a working wristwatch and, more importantly to the plot, a box of functional grenades.
* The Tripods series. And it's true, it's just done by mind control that makes humans docile, and apparently unable to maintain any technology beyond medieval/renaissance age.
* The Tripods series, the kids attack the masters by storming and destroying two of their cities, after paralyzing the masters with alcohol.(the third fails)
* The Tripods series, The Masters, alien overlords of earth, have "laid waste" to lands too far away from their three cities, located in Asia, Europe and one of the Americas. They also plan to replace Earth's atmosphere with their poisonous alien one.
* The Tripods: The alien Masters have two mouths, one above the other. The upper mouth is used for breathing and speaking, while the lower one is for drinking and eating.
* The Tripods, there's a scene where the protagonist, Laurie, looks up at the sky and wonders if sometime in the future, other humans will look up at the sky and 'dream of freedom'. This is a callback to a scene in the first book where Will, Henry and Beanpole find themselves looking up at the sky after they arrive in at the mountain resistance base.
* The Tripods they found in an abandoned weapons cache through the opening hatch. The damage causes the alien atmosphere to vent into the outside world. In the TV miniseries, the boys find themselves underneath the Tripod which is standing on loose slate. They use the grenade to cause a small avalanche that unbalances it, popping the hatch open so they can throw a second grenade inside.
* The Tripods. They set themselves up as a benevolent invasion in the minds of many (by hypnotizing them), while really having dark plans for humanity.
* The Tripods trilogy, Earth has been conquered by technologically advanced aliens, who deliberately maintain the native population at a medieval level.
* The Tripods trilogy is a prime example of this. It takes place about 100 years in the future, but society is largely medieval style due to the effect of the Caps on their wearers-curtailing curiosity and causing them to reject technology.
* The Tripods were this trope. They depicted themselves as saving humans from war and violence.
* The Tripods, who enslaved humanity with mind control caps and then planned to annihilate life on Earth in the process of making the planet's atmosphere breathable for themselves.
* The "Tripped!" special was released to Amazon on May 4, 2018, the day it was originally supposed to air. When Amazon realized that
* The Tripper, this is how a corpse hanging from a tree is discovered.
* The triquetra symbol that decorates the Book of Shadows and is associated with the Charmed Ones saw an increase in mainstream popularity (although it had previously been used on a
* The Trishas do this in Episode 62 by pretending that they have managed to put a late Shay on their lines. Mackenzie doesn't fall for it.
* The Triskelion in the Deserted City of Tokyo: An illustration showing Kasuga Koyama and Tokiko Yodoyabashi has the former display an exclamation mark behind his head when Setsuna Karasuma grabs them both from behind ala conga line.
* The TriStar theme music also makes an appearance in the movie proper, playing when Julie takes her first steps.
* The Tritone Gambit: RPG games in general tend to be improvisational in nature, so this actual play podcast is certainly made up as the players go along.

* The Tritone Gambit: The main characters are an all-female cell of Inquisitorial Acolytes.
* The Triumph Division, the Diwatas, and the newly-released superhero Wave in the Marvel universe.
* The Triumph Of Death shows how skeletons walk around and triumph in every way. Some of them are soldiers.
* The Triumph Of Injustice: Scales are present on the books' covers. The book is largely about tax rates between the working class and the rich and how unfair it is.
* The Triva Murder Party games feature several rounds of trivia questions and minigames where most of the players will die. However the winner of the game is decided by a final round that everyone gets to participate in, with players who did better getting moderate head starts. Someone who did not get a single trivia question right until the final round can still win.
* The Trix are not actually sisters. Icy's only actual sister is Sapphire, who was turned into a fox cub by a shaman witch, and they were Princesses of the kingdom of Dyamond. Icy became the witch she is today to avenge her sister's curse.
* The Trix have darker color schemes and use dark magic frequently. It's even Darcy's specialty. They wish to take over the Magic Dimension by using the powerful Dragon Flame.
* The Trix Rabbit often loses things he gains legitimately when the kids take away his Trix as well, such as one where he entered an ice-skating competition and wowed the judges—when the kids took away his Trix, they took away his trophy too. (There was no indication he was not qualified to enter.)
* The Trix Rabbit zips his mouth shut when he wouldn't tell the kids where he hid the Trix cereal/yogurt in the first part of the 3-part Jungle Jumble ad.
* The Troggs: In 1966, this relatively unknown garage-rock band topped the U.S. charts on their first try with the now-classic "Wild Thing," Nearly two years later, they would have their only other major hit there with the softer "Love Is All Around." It would later become a hit for Scottish band Wet Wet Wet in 1994, spending 15 weeks on top of the British charts.
* The Troggs' infamous "Troggs Tapes" bootleg was recorded in 1970 by singer Reg Presley and features Reg and his bandmates arguing about a song's recording. Sometimes, it seems easier to count the non-swear words than the swears in this 10-minute-plus outtake.
* The Trojan Cycle, we're presented with a story of how mortal desires can destroy nations when, in order to solve the problem of a golden apple inscribed with "For the fairest," the mortal Trojan prince Paris is asked to decide who of the three candidates—Aphrodite, Athena, or Hera—deserved it and they each incentivized themselves with different rewards if he chose them. In the end, Paris chooses Aphrodite when she offers him the hand of the most beautiful woman in the world, Helen. Who happens to already be married to Menelaus, King of Sparta, and this results in the ten-year Trojan War, the deaths of tons of people, and the total destruction of the city of Troy. Among those dead are many, many demigod children of various Olympians. This all just sounds like a big tragedy until you learn about some of the lost epics which are also part of the Trojan Cycle: in truth, the entire conflict was orchestrated by Zeus in an effort to cull part of humanity as a whole and the demigods in particular for fear that they would rise up and overthrow him. It worked.
* The Trojan Horse, a Canadian made-for-TV movie starring Paul Gross, Canadians vote to join the United States. Their territory becomes six new states, and Canada's former prime minister (Gross) becomes eligible to run for President of the United States, since, like the first 9 Presidents, he was born in a territory that later became a state.
* The Trojan Horse the horse slipped out and opened the gate. This is the origin behind the saying "beware Greeks bearing gifts" and the name for Trojan Viruses.
* The Trojan War actually started this way, with a goddess getting three other goddesses to fight over who was the prettiest.
* The Trojan War. Every character, even the throwaways, would have been hugely

important to someone.
* The Trojan War. He also rewrote Trojan War history with his Iphigenia plays, crafting a scenario in which she survives the efforts to sacrifice her to the gods and has various misadventures while her father is off to war.
* The Trojan War is often believed to be the event that put an end to the Heroic Age of
* The Trojan War was popular entertainment, Achilles was as vulnerable as the next soldier, but was unbeatable due to his skill).
* The Trojan War were a Badass Army, filled to bursting with epic heroes.
* The Trojan War, with a strong sense that this is the later-corrupted "real story" (both authors' pseudonyms are names used in Homer — they're presented as eyewitness accounts by Trojan War veterans); e.g., in Dares, rather than using a giant wooden horse, the Greeks enter Troy through a gate decorated with a picture of a horse.
* The Trojan Women of a play dealing with the grief caused by war and from the point of view of civilians.
* The Troll Ancestors are often drawn with much smaller horns than they canonically have, but this is understandable since the horns can get insanely large. This can get less understandable for the Troll Kids' horns, however, which have obvious but simple designs but get reinterpeted quite often to suit the artist's desires. Tavros, despite having the largest horns by far, will often get drawn with smaller, sometimes thin horns for the sake of convenience.
* The Troll Batrider, whose damage is quite low, but makes up for it with its Liquid Fire ability, which prevents the target building from being repaired and greatly reduces its attack speed.
* The troll deity is widely assumed to be "Gog," thanks to trolls referencing "Gog" and "Jegus" in conversations with the kids. The fantroll community has pointed out that the canon uses of the term "Gog" are intentional references to a
* The troll drug Slab, which is ammonium chloride cut with radium and is a hallucinogen—but only if you're a troll. It also makes their brains melt.
* The Trollenberg Terror on the side of a Swiss mountain turns out to be the result of alien invaders, trying to create more hospitable conditions for a large-scale invasion.
* The Trolley Problem is a thought experiment that makes use of a Cold Equation to gauge people's ethics: You see a runaway trolley moving toward five incapacitated people lying on the tracks, and you are standing next to the lever that will redirect the trolley onto a side track that misses the five people. However, there is one person lying on the side track. Your only two options are 1: pull the lever and kill the one person to save five, or 2: do nothing and let the five people on the main track die.
* The "trolley problem" is one of the philosophers' stock examples of an
* The Trollface.jpg has been used countless times across the Web to illustrate the act of, well,
* The Troll Hunter 50 feet tall, big enough to make a land rover-type vehicle look like a toy.
* The Troll Hunter. An interesting variation because he does it as government work (fantasy giving way to mundanity) and it involves some pretty awful things for the sake of progress (killing a Troll nest, children and all, to make space for a road) and a lot of bureaucrazy (lots of after-action forms).
* The Troll Hunter: A roll cage with spikes is attached to the Land Rover when they go to confront the Jotnar Troll. The vehicle also has a UV searchlight on the roof.
* The troll in the story" threatens to eat the goats that cross the bridge he lives under.
* The trollish tribes such as the Amani or Gurubashi are actually the remnants of ancient, mighty empires. Thousands of years later, their capitals are mostly ruins, and their (cannibalistic) culture and technology are primitive compared to the rest of the world. As of the "Rise of the Zandalari" patch, these remnants have united under the Zandalar tribe, the oldest troll civilization, in a last-ditch effort to reverse their race's decline and build a civilization capable of surviving their

island home's destruction.
* The Troll kids (who are siblings) do this with their ancestors and each other. For example, Vriska likes to torture the child-like Tavros and while they're both considered losers their ancestors were
* The Trolls also get in on the action, where at least Equius and Terezi have alchemized computers into their glasses to chat on the fly. Of particular note is that Terezi is
* The troll's ancestors: only Redglare, Mindfang, Darkleer and Dualscar are given names; the Handmaid, the Summoner, the Helmsman, the Disciple, the Dolorosa, the Grand Highblood and the Condesce are all known by their titles. Then the Sufferer sort of has a name, Signless, but it's not used as often and isn't his original name (if he had one). Like the Universe B Guardians, the Ancestors are named when we meet their alternate versions in Act 6.
* The trolls' ancestors played an unsuccessful session that resulting in the Scratch, resetting their universe so our trolls could have another chance.
* The trolls' ancestors (save for The Condesce and The Handmaid, who were still alive at the time they were introduced) all qualify. The Ψiioniic was technically alive at the beginning of Act 5 Act 1, but he was introduced after his death.
* The trolls are mostly human, except they are almost always bisexual and they recognize four different kinds of romance, two of which are based on hatred instead of love.
* The Troll's Daughter": Inverted; The troll changes his servant's form three times with a special poem. Upon seeing the troll's daughter, the boy-turned-fish remembers it and turns himself back so he can visit with her.
* The Troll's Daughter", the eponymous character helps her young suitor kill her father.
* The Troll's Daughter", the titular character warns her suitor to be ready when her father calls his fish-self back, because if the troll catches him at the castle, he will cut his head off.
* The Troll's Daughter": The troll turns his servant into three different creatures (a hare, a bird, and a fish) after giving him permission to take a break for a while. The transformed boy spends a lot of time running because the troll has enchanted and caged up all the rest of the creatures. However, the third transformation backfires on him when the boy-turned-fish ends up finding and falling in love with the troll's daughter.
* The Trolls has Aunt Sally reminding us about how Great-Uncle Louis, who came for two weeks and stayed for six years, came for two weeks and stayed for six years almost everytime she says his name.
* The trolls have no idea how to help Elsa gain control of her powers — only that she shouldn't let fear control her. Ironically,
* The trolls in general share many cultural practices with the Spartans, but it's uncertain if this was intentional.
* The trolls in general. The series is about four kids playing a game. Then a few trolls pop up and start having conversations with the kids in Act 3. Then they have more conversations in Act 4. The first subact of Act 5 is solely about the troll's group and the narrative keeps going back to them even after that.
* The trolls in their prime had a few empires such as the aforementioned Amani and the Zandalari. The Amani were defeated long ago by the Arathi, never to rise again. The Zandalari are still active and are the oldest known lasting empire on Azeroth.
* The Trolls need a babysitter. The mom understandably doesn't take her up on this offer.
* The Trolls often made reference to an "invincible demon" that ran rampant through their session and ruined everything. Since the nebulous
* The Trolls. They have just as much screen time as the parents, yet they contribute just as equally.
* the trolls, with Karkat performing John's role. In this case, owing to the fact that troll parentage sure is weird
* The Troll War was fictional, but by promising he won't let the fleet "Worf" him.

* The Troop. Eventually, he eats live crabs and spiders, rock slime (that snot-like alga on beach rocks), a handful of sand, and finally, the stuffing out of an old couch.
* The Troop gets bitten by a Snark and impregnated. Afterwards, he has to raise the baby snark briefly, making him miss out on the b-plot and providing a thinly veiled Aesop on the issues of teen pregnancy.
* The Troop implicit in that the experiment gone wrong is all a result of an attempt to find a new weight loss drug.
* The Troop is a show set in Oklahoma. Season 2 adds native Oklahoman Malese Jow to the cast.
* The Troop once told the heroes they could erase his memory since he had hidden reminders. They instead sent him to a mental institution where his tales about monsters will be disregarded as delusions.
* The Troop, smell like rotting fruit, loose weight incredibly rapidly, and develop golf-ball sized cysts on their bodies.
* The Troop, the bioweapon took all the bad things about them and cranked them up, and added a few more besides.
* The trope actually gets discussed in "The 40% Iron Chef", in which Bender challenges celebrity chef Elzar to a cook-off, and is tutored in cooking by Elzar's old mentor. Said mentor assures Bender that he can be a great chef
* The trope actually pulled double-duty; way to stop Third Impact there, Kaworu, you saved the human race!
* The trope also almost could've been called "Hagmaned". During the famous "Who Shot J.R.?" cliffhanger after the second season,
* The trope also applies to a handful of Robes, chief among them Natsuki's, Haruka's, and Shizuru's.
* The trope also gets mentioned in the Midnight Roads splatbook, where it's mentioned that all sorts of supernaturals are known for pulling this off. In fact, it's a popular feeding method for road-wandering vampires, who use Dominate and/or Obfuscate to pull off the vanishing part when they're done.
* The trope also goes in reverse: in the aforementioned Nod-controlled zones, GDI are often painted as terrorists who abandoned the majority of the world as detailed above. Nevertheless, the Blue Zones and those Yellow Zones that GDI can begin the restoration process for look up to GDI as a hope for the future. It is worth noting that canonically, not only has GDI never targeted civilians deliberately (in contrast to the Brotherhood who have whole missions dedicated to the concept) but still tries to help those who need it no matter how many times Nod attacks their aid convoys. This came up as early as the first game; one Nod mission is a
* The trope also played to an extreme in the episode where Hibiki's Accidental Perversion gets Bart thrown into quarantine, and leads to a strange campaign to get rid of the men — involving spacesuits worn as quarantine outfits. The girl he ended up in a compromising situation with is extremely reclusive and actually wears a full-size bear costume as her "uniform".
* ...the trope "Anything that can go wrong, will go wrong", it's under
* The trope appears again later on in season 3 of Angel, when Angel hesitates to act on his feelings for Cordelia, saying he has nothing to offer to someone like her.
* The trope appears to be pretty much straight in play at this point, with the implication that anyone who is 'strong enough' can avoid being frozen completely and shake off the effects.
* The trope applies to all party members in the series. While the playable character's defeat is a game over, party members simply fall unconscious, only to get up after a moment with some HP. The only exceptions are the above, where the party member cannot be defeated, and
* The trope becomes a self-fulfilling prophecy any time a rock, metal, or other "heavy" song even so much as has the WORD "devil" or "Satan" in it; including instances where Satan is, in fact, the villain, where the minions of hell are punishing evildoers, or the devil/hell are being used as metaphors (often for drugs or abusive relationships). A crowning glory was a treatise dedicated to showing

"the hideous birth of heavy metal and it's forcing the devil's will into our lives", whose entire premise stemmed from the line "Satan, laughing, spreads his wings! Oh lord, yeah!" That would be the final line of
* The trope can be invoked by the player themselves with nearly any block they can use, such as pressure plates, TNT, pistons, etc.
* The trope can easily become a problem, nothing that inspired the crossover events was as bad a problem as this but Ghost Rider was the only one who seemed to care about it.
* The trope cannot happen in the exposition of a work or the introduction of a character (this often is the reason why death tropes fail to make this list)
* The trope comes up again (with help from Randy, Joy, and Darnell) after finding out that the warden rescinded on his promise to give Earl his early release. It results in a hostage situation... and the revelation that
* The trope comes up quite prominently in the history of Westeros as well. Aegon Targaryen the First, who invaded the continent and became the first king of the Seven Kingdoms, might not have had a very large army, but he
* The trope ends up being invoked by Oprah in "Recipe for Disaster" when she takes advantage of Olive and Otto's names both beginning with the same "Aww" sound to choose whom she wants to go first in telling the story of how a vortex appeared in the park. Olive ends up being picked.
* The Trope Formerly Known as X: Someone is known as "the X formerly known as Y".
* The trope frequently happens with a MacGuffin, but also works with
* The trope gets a tongue-in-cheek nod when it's revealed in Season 6 that the demon world uses kittens as currency in poker games, and they're delicious too.
* The trope gets taken to its logical conclusion in the seventh book, where there's again one room but with just two beds. Lux again proposes sleeping on the sofa but Krulcifer shoots this down, as nights in the country they're in are too cold for this. They end up pushing the two beds together and all sleeping together.
* The trope happened to every other Showa-era Rider as well, and for some of the Heisei Riders. (Ishinomori had a thing for the trope, in the sense of how one can find or lose their humanity through it.)
* The trope has a real life predecessor in the taurobolium, in which an initiate was bathed in the blood of a sacrificed bull. The ritual, dedicated to Magna Mater, is attested in Italy in A.D. 134, but it originated in Asia Minor earlier.
* The trope held on long enough to make it into the pilot episode of
* The Trope Image above is actually a well known fake viral image that appeared on
* The trope image features Mac and his cruel older brother named Terrence from
* The trope is a common joke for male drivers as it is implied that men are too prideful to ask for directions. Asking for help would be taken as a sign of weakness.
* The trope is actually discussed by Kumiko in Chapter 6, mentioning that these could be used to figure out the mastermind's identity.
* The trope is also applied to Rochelle in the video for "Gentleman", which was filmed while she was still pregnant with Alaia-May, her first child from her marriage with JLS's Marvin Humes. To conceal this, she (or at least, the housewife version of her, as in the video
* The trope is also inverted in the case of Ford Cruller, who (due to a crippling psychic battle) is schizophrenic and amnesic when he's
* The trope is also mentioned by Memory Alpha for Molly O'Brien, who was born in "Disaster" and inexplicably aged at three, maybe four times the usual rate to add some pathos to "Rascals"...according to most of the ways used to relate stardates to our timekeeping, anyway.
* The trope is also subverted by families like the Starks, who are all shades: Ned, Arya, and Bran are brown; Jon Snow is black; Catelyn, Sansa, and Robb are red or reddish-brown; and Rickon is dark blond.
* The trope is also subverted by the messages the Lunar Colony sends to Earth. One set is standard propaganda designed to make the Lunar Colony look strong, and also to thumb their noses at Earth. At the same time, the colonists also send phony "clandestine" messages from people supposedly loyal to Earth, telling them a very

different (and equally) false story that the Lunar Colony is weak and chaotic. The idea behind the second set of messages is to give the people of Earth a false sense of security.
* The trope is also used symbolically, and for the protagonists even, with Snake killing his "father" Big Boss, Raiden killing his "father" Solidus, and
* The trope is averted elsewhere in the series, as Walter's father (né Bischoff) was a German scientist who despised Hitler and defected to the Allies during
* The trope is averted, however, in that the Sultan granting his daughter the right to decide who she marries as long as he's of socially appropriate rank (later changed to anyone she chooses, with no other conditions), rather than arranging the best politically beneficial marriage for his daughter, would be considered shockingly radical.
* The trope is averted in schools that have young children. Children going missing is obviously terrible for all thoseinvolved. As such, they are typically never allowed to go anywhere by themselves except for the bathroom or if they have to give another teacher or faculty member something. It's even worse for school trips, which is why some children are paired up with another child before the trip starts.
* The trope is averted with another character in the movie: a Vietnamese prostitute looking for a potential husband among her Western customers eventually settles with a fellow Vietnamese man.
* The trope is deconstructed in multiple ways, mostly through the fact it's a well-known fact in-universe and out that the commissars don't always succeed at their job, and tend to attract a
* The trope is deconstructed when Spike and Buffy get together in Season 6 — the result is a
* The trope is directly mentioned in a sketch parodying the Witches' song from
* The trope is discussed by Sam, the mildly sociopathic, kleptomaniac alien living on the colony. He points out quite bluntly that there are absolutely no safeguards protecting him from the robots (as robots are
* The trope is discussed earlier, when Kaffee assures the rest of the defense team that he can get Jessup to confess on the stand; he knows the Col.
* The trope is discussed in the first Stackpole novel, at a funeral for a pilot killed in her sleep by Imperial commandoes:
* The trope is discussed within the story, as Greek philosophy is taking hold and some of the characters themselves are Euhemerists. A younger high priest of Ungit speculates that the stories of Ungit being both the mother and the lover of the God of the Grey Mountain are just allegorical ways of saying the earth (Ungit) creates the air, which in turn nourishes the earth with rain. The heroine silently wonders why they bother to wrap that up in a myth, if that's all the myth is saying.
* The Trope is employed and then inverted with the Centauri and Narn. At first, the Centauri bling paints them as a decadent, foppish race who are easily bullied by the plain, aggressive Narn. Then the Centauri get
* The trope is featured in Heiji's first appearance, which involves the murder of a famous diplomat named Isao Tsujimura. When Heiji claims that
* The trope is hardly present in the books: Arwen and Aragorn are set to marry from the first book, but the reader only gets glimpses of their relationship, while Faramir and Éowyn's is given a lot more importance.
* The trope is heavily associated with the Japanese warlord-turned-shogun
* The trope is incompletely sustained, but justified where it is. Vampires know they're vampires, werewolves know they're werewolves, everyone else in on the Masquerade knows they're vampires and werewolves. But they call themselves by something more flattering and the others more insulting. Vampires, for instance, tend to call werewolves and mages "lupines" and "warlocks," whereas those groups might call vampires "bloodsuckers" or "leeches". The same thing extends to humans; few people refer to themselves and others as 'humans', and the vampire label them the more condescending 'kine'.
* The trope is inverted for Shmumberman himself, who turns live-action when he is zapped out of the comic book and becomes animated again when he's transported back

in.
* The trope is inverted if a new vampire is Sired which means that they acquire
* The trope is inverted if you look the Special Duty Section Six as a whole. There are actually more human members than non-humans.
* The trope is inverted in another episode, where Marshall has a number of charts and graphs that are real and of a clear origin, but doesn't use them to explain anything important. He just really likes charts and graphs. Notable examples include his bar graph of his favorite pies and his pie chart of his favorite bars.
* The trope is inverted in that the ships of the Tau fit this trope. The Tau have "only just" started traveling between worlds, compared to other races, so their ships have that same early utilitarian feel that a lot of current space vehicles and those from
* The trope is inverted with Data's daughter Soji who thinks she's human but must come to terms with the fact she is an android.
* The trope is lampshaded and defied by Jessie in reference to said ghost.
* The trope is lampshaded is an episode who gives us two particularly absurd morals:
* The trope is lampshaded on several occasions by the protagonists; criminals who don't really understand how the various time travel paradoxes work, only that trying to sort it out in their heads just gives you a headache.
* The trope is lampshaded to an extent when Tsuruga talks about being invited, along with Kazekoshi and Ryuumonbuchi, to help Kiyosumi prepare for the Nationals after their victory in the prefectural tournament. Yumi suspects that Kiyosumi's team wants to practice against Kazekoshi and Ryuumonbuchi, both of whom have been to the nationals before, more than they want to practice against the relative underdog Tsuruga, but sees it as a mutually beneficial arrangement.
* The trope is lampshaded when Huph rants at Bob for secretly helping his clients negotiate all the obstacles he's putting in their way. "They're penetrating the bureaucracy!"
* The trope is less justified with less supernatural weapons as ordinary assault rifles cut someone in half, a grenade liquefies them, and being hit by a car leads to their organs spread across the hood and windshield...
* The trope is lightly mocked in the episode "Spirits", where they encounter shapeshifting aliens:
* The trope is more universal than you'd think. One notable episode of
* The trope is mostly averted however when Cotton discovers the camp has been turned into more of a military-themed summer camp for young boys.
* The trope is mostly averted overall though, indeed, before Ridcully,
* The trope is notably deconstructed in the film; while the Boov don't harm anyone, the humans are understandably angry about being taken from their homes and forcibly relocated.
* The trope is often a function of practical visual cheats by filmmakers rather than a mistake.
* The trope is parodied when Strong Bad names his "crazy cartoon" Sweet Cuppin' Cakes, because "Crazy cartoons usually have titles that have nothing to do with the cartoon itself." The one full episode of said crazy cartoon seen (a
* The trope is parodied with the Yugopotamians, a race of aliens who are
* The trope is perspective-flipped with the Western Cuisine Cat Restaurant of
* The trope is played even more literally in "The Doctor Is Sin". Dr. Venture admits that one of the reasons Venture Industries has not been productive is that it's a union shop and the workers have been on strike for years. So Dr. Killinger "negotiates" on his behalf with the "machine workers, nuclear engineering, and custodial super-science unions" and replaces his workforce with scabs.
* The trope is played not just for drama, but for outright terror in the
* the trope is played straight as the moon is revealed to be the container of the Ten-Tailed Beast, which was sent into space by the Sage of the Sixth Paths.
* the trope is played straight, as while he still isn't quite able to overpower him, his demonic ancestor Raizen takes control of his body and uses it 'better,' defeating Sensui easily and killing him, which Yusuke is not cool with. Mostly

because he wanted to kill Sensui himself...
* The trope is played straight in "Master Blankard's Pawn", when one witness describes a thief as being "ugly", and a second witness gives the
* The trope is played straight in the opposition between Saruman (Science/Knowledge) and Gandalf (Wisdom). Saruman even mentions his slogan in book two: "
* The trope is played straight in the second-season episode "The Rules of Luton": the Judges of Luton (sentient plants) address Koenig and Maya in perfect English when sentencing them for the crime of killing plants and eating them.
* The trope is played straight in-universe by the character of El Rebibo, a Sephardic Jewish entertainer in Paris who has to portray a stereotypical Arab because he can't manage the Polish accent needed to portray a stereotypical (to the Parisians) Jew.
* The trope is played very straight by the American Pentagram; on a team led by
* The trope is played with and subverted with a few later games in the series; even though it's minor, a few of the starter villains have a hand in the game's central conflict.
* The trope is played with earlier in the book. Greg and his mom and dad had to bail Rodrick out on his science project; Greg had to draw what he thought teenagers would draw after watching violent movies (imitating this
* The trope is played with, in that it's not a child, and inverted in
* The trope is quite common for tabletop RPGs in general, where characters may have skills (such as "lore" skills) or abilities (such as Bardic Knowledge) that can grant them knowledge the player didn't possess. Don't know how to find the pass over those imposing mountains? Make a Geography roll, and the GM might say you knew all along. Usually these are limited to suddenly
* The trope is referenced when a bard writes a propagandized ballad about the Battle of Blackwater. The lyrics make a big deal of the handsome, young, golden-haired prince (Joffrey) and equally golden-haired mother (Cersei) going up against his wicked, black-haired uncle.
* The trope is spoofed with the Mitchells' neighboring family, the Poseys. Not only are the Poseys
* The trope is still quite common in fantasy literature; for example, the main characters of Scott Lynch's
* The trope is subverted a second time in the same story: despite the fact that he's rescued her from having a misguided crush on a lying jerk, Encyclopedia and Sally never seem to be anything other than close friends.
* The trope is subverted in one episode when the family are watching an action movie and a bad guy gets his neck snapped by the hero; Marge makes a joke about "breakneck speed" and laughs about it, and Bart
* The trope is subverted in supercrossover military fanfiction series,
* The trope is subverted in this film when Michael assures Fredo that he'll make Moe Greene "an offer he can't refuse". In fact, Michael makes the offer in a confrontational and condescending way, almost
* The trope is subverted later, though, when Veronica comes to town again and starts a promising-looking sexual relationship with someone. She is somewhat nervous about breaking the news to Marten (though mostly in case he's annoyed that she'll be around more)—but Marten is just happy for her.
* The trope is subverted occasionally, particularly in the disturbing episode
* The trope is subverted, then played straight. The impostor never met the missing girl, but saw her photo on a website, realized they looked alike and tried to gain entry to her family to escape her father, who kept her in sexual captivity after lying about her mother being dead. After her father is arrested and she's reunited with her mother, the impostor girl felt the need to go back to the missing girl's family to tell them something... that the girl she had been impersonating had been dead all along, having been murdered by her other sister the day she went missing; the guilty sister had been using this against the imposter, which is how she found out. Even worse, their mother found out a few years after it happened but never said anything because she didn't want to lose another child.

* The trope is subverted when the weapon turns out to be a portable teleporter, which the alien was using to transport the infectees to a planet where the environment neutralizes the virus.
* The trope is the main focus on the episode "Regarding Margie", in which Marge got amnesia from bumping her head on a stool.
* The trope is the ruin of another plan from another episode where Pinky gains notoriety.
* The trope is used more humorously in a different episode, when the UN Secretary-General tries to get ahold of the President all day, and Charlie (per Leo's orders) tries to keep Bartlet from getting involved. The reason? The Secretary-General's upset because diplomats are being given parking tickets and having their vehicles towed for parking in no-parking zones. When Bartlet finally hears about it, he flips out:
* The trope is used to explain the difference between wisdom and intelligence.
* The Trope is Zigzagged in an episode where Mad Mod invades the city with an army of robots modeled after the Coldstream Guards. At first, these robots are incredibly tough, and the Titans are almost overwhelmed; however, as the episode progresses, they seem to get less efficient for some reason, until the end, where the heroes are able to junk them with as much ease as any other example of this Trope. (Of course, this is Mad Mod we're talking about...)
* The trope itself gets parodied in some of the flavor text describing the Linguistic skill in
* The trope itself is inverted within the Griffin family - Lois is the only
* The Trope Kid: An outlaw has "Kid" in their nickname as they earned it when they were children.
* The Tropeless Tale that you want to experience a work with no tropes? It's not quite that simple.
* The trope loses some of its impact due to the sheer amount of Rolling Rock he drinks. Sometimes, though, he'll break out some hard whiskey for when beer, alone, isn't enough for the occasion, such as when he revisited
* The trope may also have a tactical justification as follows, as drawn from
* The trope may be played straight sometimes with two conditions: when
* The trope may have arisen from a dream those grieving a deceased loved one often experience. In the dream, the griever learns that the loved one is not dead and that the "death" was nothing but a very bad dream. The griever then wakes up, only to realize that the death really took place and the "miraculous survival" was in fact the dream. Although not every griever experiences this dream, it's common enough to be considered a normal part of the grieving process. Children who experience the dream may not be able to differentiate the dream from reality and therefore may suspect that the deceased person didn't really die (a common fallacy among bereaved children).
* The trope may have originated following the 1908 match between Jack Johnson and Tommy Burns. Johnson was a black contender who fought the reigning heavyweight champion Burns. Police stopped the fight - and the cameras - in the 14th round, ostensibly to prevent injury to Burns but more likely to prevent the indignity of seeing a white champion beaten by a black challenger. After Johnson’s indisputable victory, news media characterized it as the first blow in an “inevitable race war” and hyped a “great white hope” who might defeat Johnson on behalf of the “white race.” When Johnson then defeated white boxer James Jeffries, humiliated racists began rioting in many places.
* The trope might be one of the reasons it took such a long time to finally start airing Adult Swim block on Fridays (initially it was 2 days a week when it was launched in 2001, then it gradually expanded to 6 days a week, but Fridays were reserved for Cartoon Network). Adult Swim has maintained a special video section on their website, appropriately called Friday Night Fix, with full episodes available on Fridays during what would-be block airtime (11pm-1am). Eventually in 2007 they realised they won't lose any audience, because nerds and stoners are doing the same thing on Fridays as they're doing on any other day (and giving them free time results in more time to complain on message boards), so Cartoon Network gave up

their last night, making Adult Swim an all-week night block.
* The trope name in 1999. Flanders also invokes this once, when one of his kids asks something.
* The trope name is an almost word-for-word translation of a French expression ("Ça rentre par une oreille et ça sort par l'autre" — "it enters through one ear and exits through the other") used for people who do not pay any attention to what is said to them. This trope name has also been adopted to identical meaning in a number of other languages.
* The trope name is basically the job description for R2 units. The page image is from
* The trope name is often used as an insult for obsessive strategy types in online shooter games like
* The Trope Name itself. The word "buxom" did not originally mean "large-breasted". Even the looser sense of "beautiful or attractive" is recent; see the OED for a full history. But
* The trope-namer; 1st and second edition D&D used the term "demi-human" to describe the "good" races and "humanoid" to describe the "evil" races of orcs, goblins, bugbears, etc.
* The trope namer had a stablemate named Justin Credible who suffered the same fate. In
* The trope namer himself pulled this off quite a lot during his role as Zobek in
* The Trope Namer is Fabian Of The Yard, the real-life Inspector Robert Fabian, whose autobiography was called
* The trope of chasing each other through doors in improbable ways occurred in
* The trope of disguising oneself using a ludicrously realistic mask is used in the
* the trope of the same name, but suggesting that two-faced people believe their behavior makes them hard and tough, but in reality, they are weak and just follow the crowd.
* The trope probably applies to commando operations in general, as these troops are usually trained to infiltrate behind enemy lines and conduct sabotage—essentially, trapping themselves behind enemy lines intentionally, with the expectation that they may not be extricated easily if at all.
* The trope really comes into play when in order to refill your ranks of veterans, you throw a squad of rookies against the aliens, knowing that some of them will die, in the hopes that the survivors will be tougher.
* The trope runs both ways, as Klingons have a particular affinity for the works of
* The trope-savvy Game Masters of Dream Park used this as a premise for their
* The trope's name, and, indeed, the basic modern concept for The Multiverse as its used in fiction, comes from
* The trope's name comes from a line uttered by Homer in the episode "Little Big Mom".
* The trope sometimes gets played with when a character has all the trappings of a Sixth Ranger, but doesn't join the team. The first Gold Ranger, Trey of Triforia, from
* The trope's prevalence in Old Hollywood made it a requirement for inclusion in
* The trope turns up several other times in the story as the main characters are all very adept at
* The trope was also largely subverted in WW2 with the exception of specialized Soviet urban warfare units that were equipped with "light" steel cuirasses designed to protect against lower power pistol rounds and grenade fragments.
* The trope was deconstructed with Kendra Saunders, who was a reincarnation of Hawkgirl, but without the memories. Meanwhile, Carter Hall kept his memories. This led to him pushing a lot of expectations on her, and her pulling a
* The trope was often averted with Smithers in earlier seasons, during his conversations with Mr. Burns.
* The trope was parodied in a one-time sketch featuring Amanda as a little girl who was too scared to sleep during a thunderstorm. Her parents give her "Rockabye

Ralph," a talking doll that spouts off cutesy catchphrases about bedtime ("I LOVE YOU! TIME TO GO SLEEPY!" et. al.). Amanda's pleased with the doll at first...until he refuses to
* The trope was played for laughs for a while in this "adult" webcomic... then a fairy that brings sex dolls to life mistook her for a sex doll and resurrected her, and things started getting
* The trope was popular one during the postwar period, with a number of noted writers taking it up, including James Jones (
* The trope was so common in the Revolutionary/Napoleonic era that memoir writers are quick to point those who
* The trope was turned on its head when it was revealed that the universe that had been considered the primary one for well over three years was actually a doomed offshoot. Cue a massive
* The Trope Without a Title: Something nameless is only referred to by a description.
* The trope would repeat itself in a similar way when nostalgia for the '70s became all the rage in
* The Troubador Discipline was good for this, with Talents like First Impression, Lasting Impression and Haggle.
* The troubadour Bertrand de Born: "My heart is filled with gladness when I see Strong castles besieged, stockades broken and overwhelmed, Many vassals struck down, Horses of the dead and wounded roving at random. And when battle is joined, let all men of good lineage Think of naught but the breaking of heads and arms, For it is better to die than be vanquished and live.… I tell you I have no such joy as when I hear the shout “On! On!” from both sides and the neighing of riderless steeds, And groans of “Help me! Help me!” And when I see both great and small Fall in the ditches and on the grass And see the dead transfixed by spear shafts! Lords, mortgage your domains, castles, cities, But never give up war!"
* The trouble here is that radiation-prompted mutations would happen randomly. Such mutations are overwhelmingly silent (cause no change in phenotype), deleterious (cause a reduction, sometimes drastic, in reproductive fitness), or lethal (cause the individual to die as an embryo, fetus, or infant). For a large macroscopic change to present itself in a living thing, a number — usually a
* The trouble is, the Vulcans' violent Pon Farr period only rolls around once every seven years or so. The Klingons would probably find the Vulcans' distant cousins the Romulans more to their liking (as they're
* The troublemakers in the infamous "X Gets Grounded (or otherwise punished)" videos made with the program. While one can't deny that many of these troublemakers
* The Troubles and are still a common sight at likely terrorist targets like sports stadiums or railway stations. Inverted by the modern approach, which involves doing away with trashcans altogether in favour of transparent plastic bags on a hook; in theory, anything that looks like it might be a bomb is easily noticeable and the area can be evacuated in the event of a suspicious item being spotted. How well this works has yet to be put to the test.
* the Troubles, both in Northern Ireland and elsewhere in the British Isles.
* The Troubles, cycles of revenge killings known as "tit for tat killings" were very common. Essentially, random Protestants or Catholics were killed within hours of another killing — which would lead to another random killing...
* The Troubles from warring Celtic tribes are cursed to forever be reincarnated on opposite sides of whatever the current conflict is, until Ireland is at peace.
* The Troubles of Dictionary Jaques. In one strip he interprets "butt in" as meaning to hit people with his head rather than simply interrupting them, despite the situation calling for the latter usage of "butt".
* The Troubles sparked what is sometimes known as "Armchair Republicanism" or "Armchair IRA"; people who live in the Republic who claim to be massive supporters of the IRA's activities in the North. Even to this day with the peace process having quelled the worst elements of the conflict, there are those in the Republic, many of whom have never had family involved let alone set foot in the north, who

proclaim that they are diehard Nationalists while never doing a thing about it.
* The Troubles that it wasn't until 2006 that the full version was broadcast.
* The Troubles. The man is asked "Are you Catholic or Protestant?" He replies, "Neither, I'm Jewish". The gunman grins and says, "Gee, I must be the luckiest Palestinian in all of Ireland!"
* The Troubles. The perpetrators, led by a psychopath, were known as The Shankhill Butchers.
* "The Trouble With Air", the cover story of an issue of DC's horror anthology series
* The Trouble with Angels is a movie about the hilarious antics of two Catholic school girls in a boarding school run by nuns.
* "The Trouble with Emily": The titular character is essentially a brontosaurus (she's called Emily
* The Trouble with Harry involves various persons finding Harry (a corpse), and hiding him, only for others to find him and hide him, until they all get together and decide on the ideal place for the police to find him.
* The Trouble with Harry is that several people try to hide the corpse of Harry, who they may have killed.
* The Trouble with Harry: The closest thing Hitchcock ever made to a comedy. A body turns up in the woods outside a small town. As the local authorities try to figure out who killed him, one by one the entire town confesses to the murder.
* The Trouble With Jennys Ear features an especially blatant example: the title character is asked to testify at the trial of a sleazy salesman, using her telepathic powers to determine whether he had committed intentional fraud in selling a local fisherman a useless "fish whistle." She listens in, and comes up with the ambiguous phrase, "You can always catch a sucker if you fish deep enough," which he naturally claims is an endorsement of his product rather than a comment on the gullibility of his customer.
* The Trouble With Moonlight by Donna MacMeans, the heroine, Lusinda Havershaw, is a beautiful virgin who can turn invisible when she absorbs enough moonlight, but her clothes do not turn invisible with her, so in order to work as a spy and retriever of lost trinkets she must be completely naked. If she is away from the moonlight for too long, she will gradually become visible again. Three times in the book she becomes trapped in a house on a mission and away from moonlight and she is forced to make a hasty escape before she materializes, so as to avoid capture and humiliation. In both instances, she is witnessed in her half-visible state and assumed to be a ghost, at one point described as "a ghost with a shapely backside".
* The Trouble with Tickets: A character is dealt a traffic ticket and fights teeth and nail against it.
* The Trouble With Tracy episodes were recorded within the space of only about six months) made taping in front of a live audience physically impossible.
* "The Trouble With Tribbles". Commander Spock says "The battle of Donatu Five was fought near here twenty three solar years ago."
* "The Trouble with Trillions": After returning back from Cuba the following conservation takes place:
* The Trouble with Trillions", Homer is being questioned by the tax department about his falsified tax return. When they threaten him with a prison term, he says "No sir, please - I can't go to prison! They pee in a cup and throw it on you! I saw it in a movie!" to which the interrogating agent responds "You won't be seeing any prison movies where you're going - prison!"
* The Trouble with Trillions whips out a quick tax return by guestimating things as obvious as the number of his kids and ends up getting a severe audit. When called in, he's scared out of his mind and tries to give every excuse under the sun ("an older boy made me do it", etc.), but is ultimately enlisted as a government spy. Everyone else in Springfield got generous refunds. Homer would have too if the football-shaped mess that was his taxes hadn't fallen into the "Severe Audit" bin.
* The trouble with witch trials, is that once in a great while you actually capture a real one. And then the spectacle never turns out the way you anticipate. Often the one who ends up hanged, or drowned, or burned, isn't the one in the docket."

Given the power she demonstrates throughout the series, this is not an empty threat from her, though it's possible that a less powerful practitioner might have legitimate reason to fear a trial.
* The Troy Saga. While Agamemnon wasn't the nicest character in the original poems and he did serve as antagonist to Achilles but in the series he is as close to pure evil as the series gets. The entire war is of his creation and one that he had been planning for years, whereas in the original myths he was responding to a grievance initiated by Paris.
* The TRS-80 color computer, back in the 1980s, had a glitch where the computer did not know if it had already written color to a pixel. This flaw allowed a far greater color palette because multiple color instructions could be written to the same pixel, which then displayed much the same as blending colors on an artist's palette.
* The Truce at Bakura airlock in orbit above Bakura, and allowed to burn away in the upper atmosphere.
* The Truce at Bakura consists of two levers that when pulled together will trigger an immediate reactor overload. While there aren't actual locks, the levers are at opposing sides of the bridge to prevent accidental triggering.
* The Truce at Bakura, it's stated that Ssi-Ruu paddle beamers (and other technology) are utterly incompatible with Human technology due to their unusual life-force powered energy cells.
* The Truce at Bakura's Force Lightning, even though he hadn't been shocked by it for all that long.
* The Truce at Bakura, the religion of the Cosmic Balance preaches that every bit of good fortune produces an equal misfortune somewhere else, and vice versa. Parents commonly choose one child to enjoy a privileged, educated life, and balance it by sending another into a life of deprivation and servitude.
* The Truce at Bakura to serve them, drinks and bathes in special deodorising solvents four times a day along with shaving off all of his hair so that the Ssi-ruuk can stand to be around him.
* The Truce at Bakura. When Wedge is extravehicular, Luke can see his face through his faceplate. Wedge is not wearing a spacesuit, but his pilot suit and helmet as seen in the films, with a personal force field to keep a layer of air around him.
* "The Truce Hurts" opens with Tom, Jerry, and Spike fighting each other, and Spike eventually talks all three into a truce. By the end of the cartoon, the truce breaks down, and the three of them pick up right where they left off.
* The Truce. Italian Jews are neither Ashkenazi nor Sephardic, although over the centuries there has been a sizable migration from both communities because Italy was relatively safer than anti-Semitic Eastern Europe and the ultra-Catholic Spain.
* "The Truce of the Bear" in which a blind Indian beggar explains to hunters why they should not pay attention when they have a bear cornered and it stands on its hind legs and seems to beg for mercy. The flesh of his face is withered "like slag in the furnace" because of a blow from "Adam-zad, the Bear that walks like a Man".
* The truck drivers in the gridlock have portraits that all face directly forward on a white background, looking like driver's licence photos.
* The truck is given a subversive lampshade in the Gen III remakes on
* The Truck Simulator games have a skill tree that maxes out at level 37. There is, however, no actual level cap, every level beyond the last practical one being purely cosmetic/bragging rights. Even the escalating titles max out at level 100.
* the true age of a certain person who is heavily involved in the murders is 19. Lampshaded and invoked by Furfur and Zepar in Episode 6 in the fantasy duel, where the duelists are asked to walk 19 steps away from one another.
* the true attacking force is hidden nearby, rather than launching from Galactica
* The True Confessions of Charlotte Doyle: "and the spelling, Charlotte. The spelling!"
* The True Confessions of Charlotte Doyle, by Avi, is a young adult novel about a mutiny on a ship where the protagonist ends up joining the mutineers.
* The True Confessions of Charlotte Doyle, Charlotte is 13, while Zachariah is in at least his 60s. It makes sense to Zachariah, though:

* The True Confessions of Charlotte Doyle, except with more mystery and less crew cohesion.
* The True Demon Lords have a reputation for doing this when they go on the war-path.
* The True Elemental Runes (Fire, Water, Lightning, Wind and Earth) are trying to gain dominance over each other by forcing their hosts to over-use their powers.
* The true form of Ichigo's zanpakuto turns out to be two blades of differing lengths to accommodate his Soul Reaper power (the larger one) and his Quincy power (the smaller one).
* The true form of the Greek gods was said to have this effect on mortals. One famous case was Semele, who was tricked into getting Zeus to promise her anything and then asking him to show her his true form. When she saw Zeus' true, unconcealed divinity, she was instantly incinerated.
* The True Game powers, combines elator teleportation with a modification to his eyes to travel fast by sighting on a faraway location and teleporting to it, then sighting on his next target.
* The True Game they are clearly said to have a completely different evolutionary background, with a pentagonal body framework rather than a spine. Weakly justified as the results of genetic meddling by the original settlers, but still...
* The True geth build a massive space station in orbit of Rannoch (quarian homeworld) to serve as a giant server to house all geth programs. When the quarians attack in the third game, one of their first targets is the space station. Many programs are destroyed in the process.
* the true killer has evaded the legal system's golden rule that decisive evidence must be presented to convict for a crime. He's only taken down because his act of insurance against his accomplice is rendered null because in the latter's home country, smuggling a powerful and dangerous cocoon out of Borginia is a capital crime punishable by death. Apollo convinces him to confess in the Japanifornian
* The true killer of Case 2 admits to trespassing, burglary and property damage when they say they
* The true killer tries to sexually assault a woman, only for his supernatural powers to kick in and accidentally cause her death. He then lures a high-school girl, abusing his position as a
* The True Knight, when Wren tries to argue that the prince is a man, not a swan, the prince counters that he was a swan for a year and a day, and wanted to stay a swan.
* The True Lab before pulling the bedsheets over them and patting them on the head.
* The "Truel", a piece of math folklore usually credited to Martin Gardners "Mathematical Games" column in the "Scientific American".
* The true love and soulmate of Chris Kent is Thara Ak-Var, a childhood friend of
* The True Love Loophole in a compromising position. As it turns out, Apple's nanny only gave her a bare minimal talk that came down to "Sex is for procreation and people only do it after you're married". Apple didn't even realize that women could be in relationships (which is one of the reasons she's so oblivious to her own feelings towards Raven).
* The True Love Loop Hole that a feverish Raven previously had confessed to Apple by reciting an erotic poem. It was in riddlish, so Apple couldn't understand the meaning.
* The True Love Loophole. This has to do with the compulsory heterosexuality viewpoint she grew up with, combined with her general ignorance towards romance and sexuality.
* The true main antagonist, Yuudai Honda, actually bothers to have a reasonable conversation with Rina attempting to explain his viewpoint and why she should join him - on some level, it's also because he cares about her, in his own sick way.
* the true mastermind who summoned them (although the episode's tag scene does set up new Big Bad the First so possibly it can be deduced that way).
* The True Meaning of Smekday by Adam Rex, the Boov aliens who attempt to enslave the human race have 7 sexes that translate in English to: girl, boy, boygirl, girlboy, boyboygirl, and boyboyboyboy.

* The True Meaning of Smekday clan of children, grandchildren, great-grandchildren, and her alien companion.
* The True Meaning of Smekday on the bottom of a ticket booth, only to come back and find out that it isn't there anymore.
* The True Meaning of Smekday Pig is a boy cat, which is strange because real life calico cats are almost always female due to the genetics of coloring.
* The True Meaning of Smekday that originally started over a parking space.
* The True Meaning of Smekday, the Boov are obviously this trope, even putting all humans on reservations. The Gorg, who invade after the Boov, also count as this trope with a bit of Nazi sprinkled in, due to their insistence on killing all cats on Earth.
* The True Meaning of Smekday. Their written language is bubbles and their spoken language, apparently, would require sheep and some bubblewrap if a human wanted to do it. One of their major cultural figures is called "Sound-of-a-crying-baby-riding-on-a-duck-which-is-talking-with-its-mouth-full".
* The True Meaning of Smekday, though she is a bit more mature at the start of the book than most Kid Heroes.
* The true nature of the Shadows Who Watch, Make, and Rule, beings beyond even
* The true Pre-Mortem One Liner comes just after he activates the solar machine as Dracula realizes how he got the solar machine.
* The True Princess and the Wandering Bridge, a fantasy novel by Aleksandra Yegorushkina, one of the characters learns that he's half-human, half-dragon and can shapeshift into a dragon, and he boasts of it to everyone around. In the middle of a dwarf settlement as well. Too bad he hasn't read much fantasy and doesn't know that dwarves are dragons' bitter enemies.
* The true reason for the battle of Zappolino was the control of the region during the
* the true rulers of the Kingdom of Marley and the family that possesses the Warhammer Titan.
* The True Sith set up the Mandalorians to go rampaging. Revan and Malak defy the Council's cowardice and inaction by trying to stop the invasion.
* The "true stories" section of a Filipino men's magazine told the story of a sea captain who had a blowup doll in his bed, in fear that he might get an STD outside. One day while the captain was out, a janitor walked in, found the doll, had his way with it, and forgetting to clean the doll, walked away. Days later, the captain got gonorrhea and got mad, remarking that even a doll can get it.
* The True Story Of Humpty Dumpty has the villain Glitch the witch crash into the ground on her broom and disappear in an explosion that leaves a large hole behind. Her pet cat Scratch climbs back out during nightfall, without her, and stares back down the hole as his narration claims that she "wouldn't be around for a long long time".
* The True Story of Puss 'N Boots is to get rid of any men who may court the Princess. He even plans to create special candy if any other guy tries to hit on her.
* The True Story of the Three Little Pigs and he ate them to clean up. It's unclear if this really is the true story, or if Alexander is just lying.
* The True Story of the Three Little Pigs by the time the cops came by...
* The True Story of the Three Little Pigs, supposedly tells the classic take from the wolf's point of view, and according to him, the reason he blew down the straw and stick houses was this trope, by accident, on account of having a very bad cold.
* The true Super Prototype of the game, though, is the Hoshun. This is a Wanzer that
* The True Sweetheart", the heroine must find the prince, who has been enchanted into forgetting her, and break the spell.
* The "True to the Show" Challenge forbids you from deploying anyone who was not present in the episodes the scenario is based on and requires that characters only attack enemies from their series (
* The true villains are shown as hooded figures when they first confront Link. It wasn't at the end of either game that they reveals themselves to be

* The true "winner" of turning an R-rated movie into a cartoon for children has to be
* The truly alien beings (Unas, Asgard, etc) generally have as little interest in sex with humans as the humans do with them. Though given the nature of the show, most of the people are government officials, military, or otherwise high in status so any sort of hanky-panky would have to be very discreet to avoid... problems.
* The truly ancient wars between Valyria and the Ghiscari Empire, back when the former was still a nascent kingdom, more than four thousand years ago. It was the reason why slavery is prevalent in Essos; when Valyria conquered Ghis, it adopted many of the latter's practices, including slavery, and expanded it to cover the rest of the continent.
* The truly bizarre short film "Design for Dreaming," which features a dream ballet about an auto show(!) and was given the
* The Truman Show, cases of people who believed that they were living inside a reality tv show had a massive spike after this film mainstreamed the idea.
* The Truman Show ends with Truman and Christoff (the director/producer of the whole movie/reality show) confronting each other for the first and last time.
* The Truman Show. "Fade up music..." Also a clever example when Christof is looking at Truman sleep in the middle of the night. As the camera pulls out we see a pianist (actually the film's composer) playing in the studio.
* The Truman Show finally goes off-air, the channel shows static. It might have made more sense to show the channel logo or commercials, but the static tells us "it's over" better.
* The Truman Show has an artificial quality, as it's painted/projected against the interior of an enormous dome and the moon is stationary in the same place, day or night. The "moon" is really where the mysterious director of the Truman Show resides and watches over Truman's life, and can in emergencies be used as a giant searchlight.
* The Truman Show has Truman's wife including product placement blurbs in her everyday speech. Later in the film, Truman asks who she's talking to.
* The Truman Show help his increasing paranoia that his life is a big lie and that she's part of it.
* The Truman Show. In this case, everyone's in on the secret except one of the residents...
* The Truman Show is all about this, especially when he starts to notice there are things wrong with his reality, because it's a reality show inside a giant soundstage. His wife and best friend, who are actors, try to convince him that little things like seeing his "dead" father again on the street or a Klieg light falling from the sky are signs of a mental breakdown.
* The Truman Show is done during the show; this is accomplished by having the actors playing his family and friends delivering plugs in his presence. An inappropriate and out-of-place plug is eventually one of the things that cues Truman in to the fakeness of his life.
* The Truman Show is that the titular character is being continually stalked and monitored by a group of people who hide behind screens. It's even more unnerving in a world filled with amateur surveillance and social media.
* The Truman Show — when his "wife" launches into a poorly-timed pitch out of nervousness, Truman exasperatedly asks who she's talking to.
* The Truman Show— when Truman finally gets to speak to the director of the reality show that Truman had unknowingly been inhabiting, he asks, "Was nothing real?" The response he gets is "You were. That's what made you so good to watch."
* The Truman Show one who doesn't know it. Everyone he's ever met has been an actor paid to keep the secret and the town he lives in is a massive set.
* The Truman Show: Part of Truman's reasoning for why the man he saw could be his father after all. Naturally, part of the reason for his dad's disappearance and the way he returns follow the soap opera model.
* The Truman Show psychological issues due to everyone in his life lying to him, and being mobbed by a myriad of fans he has generated over the course of his life. A corporation that produced "the wealth of a small country" has now lost its source

of revenue, and is facing serious lawsuits by a guy they imprisoned and spied on for thirty years, which means countless jobs will be lost.
* The Truman Show pulls this on the viewer. The movie ends when the fictional reality show does, as Truman goes into a door that leads beyond the range of The Director's cameras - just before he's reunited with a girl who played a large role in inspiring him to leave.
* The Truman Show; she tripped and fell right in front of him. It didn't work, and an incidental background extra who happened to be nearby at the time was the one he truly fell in love with, and after she was forcibly removed from his made-up world, he nursed a secret, almost obsessive love for her for his whole life.
* The Truman Show takes place over five days - it begins on Day 10,909 and ends on Day 10,913 of Truman's life.
* The Truman Show, the show's crew decides to bring back Truman's missing and presumed dead father after he starts suspecting that something isn't quite right in his world.
* The Truman Show the studio pulls on Truman in bringing his "father" back from the grave. He later leads the hunt to capture Truman once he starts escaping.
* The Truman Show, the world Truman spent his entire life in starts collapsing as he begins noticing multiple threads pulling apart.
* The Truman Show, Truman's father was quite literally and forcefully put on a bus immediately when Truman recognized him for who he was. As in, FORCED onto a moving bus by other people as Truman chased him and was blocked by a passing bicycle mob.
* The Truman Show. Truman's wife Meryl doesn't really love him and is only acting the part of his love interest. At one point, he even asks her "Why did you marry me? You can't stand me." After she leaves the show, the studio was set to have Truman start a new relationship with a hot new co-worker.
* The Truman Show: Truman tries to take a trip to Fiji and visits a travel agency. Various posters about the perils of travel are displayed, creating a very uneasy atmosphere. The worker tells Truman there's no flights available, nor are there any other options for travelling there. Truman then attempts to travel out of town on a bus, only for the driver to purposefully stall and damage the engine so Truman can't travel anywhere.
* The Truman Show ways so Truman could spend his entire life in the fictitious Seahaven set. Or that was the idea at least...
* The Truman Show: When set accidents threaten to expose to Truman the truth about his whole life being a reality TV show, the director makes frantic efforts to provide cover-up explanations for the various little out-of-place details. Unfortunately, they soon snowball and become less and less convincing.
* The Truman Show: When the storm comes in, the sprinklers over Truman accidentally turn on first and follow Truman around before the rest turn on.
* The Trumpet of the Swan has Louis the trumpeter swan, who is mute. The original novel doesn't show much of Louis' interactions with the other swans, but this trope is definitely played up in the animated film adaptation.
* The Trumpet of the Swan, the main human character walks "Indian-style", i.e. very deliberately.
* The trumpet playing guy. "Hey, you got a licence for that?" "YOU'LL NEVER TAKE ME ALIVE" *Trumpet sound*
* The Trust Fall, in which it's expected that Alice will jump from a height and everyone will catch her.
* The Truth About Charlie, the female detective is sleeping with her male partner, but much of her dialogue regarding Reggie, the protagonist, implies that she's attracted to her—talking about how beautiful she is, how fortunate any man who gets to sleep with her is, etc.
* The Truth About Jane: Jane and Taylor date secretly as a result of homophobia before the pair are outed.
* The Truth About Jane: Most of Jane's school mates mock her after she's been outed as gay.
* The Truth About Jane: Taylor is one for Jane, who realizes she's gay by her attraction to her.

* The Truth About Jane: Taylor takes Jane to an LGBT club where they dance.
* The Truth About Mother Goose: One is shown as Kirk o' Field is blown up in order to murder Lord Darnley. (The cartoon does not mention that Darnley escaped, only to be strangled to death outside.)
* The Truth About Pyecraft is about a fat man who asks his friend, a sorcerer, for a potion to lose weight — only for the resulting elixir to make the man completely weightless, creating lots of problems.
* The Truth, about the Discworld's first newspaper, begins with someone yelling "Stop the presses!"... because the cart carrying the printing press in question has come loose and is careening down the street.
* The Truth" act—if he's weird but amusing, they're less likely to kill him. He also mentions having lost a friend to such a mob.
* The Truth adds that her conservative fashion sense does little to hide the fact that she also has "a well-crafted supply of other features that never go out of fashion at all and are perfectly at home in any century."
* The Truth" after William drops a particularly nasty scent-bomb in front of Angua.
* The Truth allegedly stabbing a formerly trusted subordinate and absconding with as much of the treasury as you can carry barely merits a raised eyebrow.
* The Truth, an apparition who guards the Gate of Truth within every human's being.
* The Truth and confronts CMOT Dibbler about his foray into Immoral Journalism.
* The Truth and merely has to put it back on the stump. They find it embarrassing to reattach their heads in public (he compares it to using the facilities in front of people).
* The Truth a truly awful sausage inna bun, and he shifts an internal gear into reverse as he describes their contents, including the tidbit that you won't find any rat in them, because rats won't go near the place they are made (with the tasteful detail that when a man's thumb got cut off they didn't even stop the grinder — one hopes he was exaggerating).
* The truth behind Ishigami's suspension in middle school is kept a secret for the most part out of respect for him wanting to
* The Truth carries a glass vial of emergency blood on a string around his neck. If he's reduced to dust by the bright light of his camera's flash, the vial falls and breaks, and contact with the blood causes the pile of dust to re-form into a solid body.
* The Truth CMOT Dibbler attempts to invoke this, financially, when negotiating with William and Saccharissa. However, the dwarf Gunilla Goodmountain puts a stop to that.
* The Truth, currently living under a false identity as a large budgerigar.
* The truth did get explained in 2014 with the release of the 8th arc of the manga, which Ryukishi07 was involved with.
* The Truth. Elsewhere in the same book, when a stable boy hears Gaspode, he claims to be another stable boy throwing his voice.
* The Truth) finds his work as a journalist significantly complicated by one Sir Samuel Vimes, Commander of the City Watch. Most readers will know Vimes to be a thoroughly decent, if perpetually grumpy, person and, as such, can understand where he's coming from.
* The Truth, fledgling newspaper reporter William de Worde climbs out onto a ledge to interview a man threatening to jump. Only to discover the man is a steeplejack who does this stunt for fun, and who ends up rescuing William.
* The Truth had previously submitted a letter to the editor, in which she recommended that anyone under the age of 18 should be flogged daily to stop them from being so noisy. "That'll teach them to go around being young."
* The Truth heard someone say that). The guy accepts it without question.
* The Truth - he keeps peppering his speech with a brief pause followed by "-ing" as if he was cursing and being censored. Another character tries adopting this behavior, but leaves out the pause, causing her to just start describing everything as ing.
* The Truth In the other books they are often portrayed as this to the main

characters.
* The truth is naturally more complex than that, but this is a very useful lie.
* The Truth Is Out There And It Hurts would have to answer with the truth.
* The Truth, is that the resulting photo will show a metaphor as if it were literal. For instance, someone whose father looms high in their life is pictured with their father standing behind them and looking down over their shoulder.
* The truth is that they have no relation to Addam (though they did come from the same country). Following the chaos of Addam's disappearance, one family claimed a connection to him in order to take control. Praetor Amalthus, who knew Addam personally, has been blackmailing the country over this for five hundred years. Prince Zeke is devastated when he finds out, and is annoyed to discover that even the so-called favorite foods were just made up.
* The truth is that when enlisting in the United States armed forces, you
* "The Truth Is...", the 2011 album by Theory Of A Deadman, is about 3/4 this. Mostly songs that are rather explicitly either "I hate my girlfriend I wish she'd leave" or "
* The Truth, it's explained that the dried frog pills the Bursar takes to keep him apparently sane are actually hallucinogens, the idea being that a proper dose will cause him to hallucinate that he's sane (just like most people).
* The Truth mentions Ankh-Morpork's Guild of Conjurers, which trains stage magicians in a world where magic definitely and obviously exists, for largely the same reason that scientists and engineers can build nuclear bombs, but it's special-effects artists and stunt-people who get employment in the entertainment industry when filming explosions. (And the fakes are often more interesting to watch, anyway.)
* The Truth, Messrs. Pin and Tulip dress as a priest and a "Vestigial Virgin" respectively in order to locate and dispose of a witness to their crime.
* The Truth, Mrs Bradshaw watches the boys getting on the train at the end of term; some in wheelchairs, some on stretchers, and two in coffins.
* The Truth, Mr. Tulip is given what amounts to post-life therapy by Death, who shows him the last moments of the numerous people he killed.
* The Truth. Mr. Tulip responds to a complaint about his constant profanity with "What? I don't ——ing swear!" at one point. One can only imagine that Pratchett's response is much the same. It's said that Mr. Tulip has a speech impediment that prevents him from saying much more than "——ing." One of the conspirators does manage to understand Mr. Tulip's censored swearing:
* The Truth" novel was "what if it's printed with ink that has accidentally been mixed with water from the Well of Truth?"
* The Truth of Rock and Roll becomes the Gray Man because he forgets Jenny's lessons.
* The Truth of Rock and Roll becomes the Rebel Girl. By doing so, she greatly increases the incidence of such characters in Rock & Roll songs.
* The Truth of Rock and Roll discovered to his regret when he tried to bully her boyfriend.
* The Truth of Rock and Roll doesn't mind taking care of these things for him.
* The Truth of Rock and Roll is apparently benevolent, but definitely mysterious (and mysteriously powerful).
* The Truth of Rock and Roll of the Rebel Girl. Johnny when he joins her in Rock and Roll Heaven.
* The Truth, one of the Dwarfs suggests killing Slant, and William points out there's probably some law against killing lawyers — otherwise, there wouldn't be any left.
* The Truth or any possibility of getting caught up in a scrum over it.
* The Truth print it, and when someone writes in to object to the complaint, to print his letter too. He thinks it'll help bring attention to the newspaper.
* The Truth - roughly "The horn of truth", "horn" referring to the instrument.
* The Truth, Sacharissa tells William "There's a man who's lost his watch, there's a troll who wants a job, there's a zombie who wants...well, I can't make out what he wants, and there's a man who doesn't like what you wrote and wants to behead

you."
* The Truth sausage. So he says "When someone cut their finger off in the abattoir, they didn't even stop the grinder." Since it's Dibbler, this is probably true, but doesn't actually make his sausages any better, even for Mr. Tulip, who says they're -ing awful.
* The Truth Seekers. It takes Junyan a little while longer to realize.
* The Truth segments in the sequel confirm that it was the destruction of
* The Truth started airing ads for "Shards of Glass Freeze Pops" and "Shards of Glass Mini-Chewables". Presumably, the implication is that cigarettes are as dangerous as these imaginary products, which would never be let onto the market, but the ads are just way too confusing to get the point across.
* The Truth stereotype who gets offended when de Worde assumes he's a vampire. Which he is.
* The Truth the remains of Slab you have and cook it with pigeon droppings and alcohol. Also, you're scraping the bottom of the barrel), and Slide, which seems to be an ersatz for crack and PCP.
* The Truth to prevent the Discworld from modernising itself out of its fantasy setting.
* The Truth, Vimes assumes that someone in the Watch will be running a book on whether William De Worde will survive. "Find out who's responsible, and once you've found out it's Nobby, take it away from him."
* The Truth: "Vimes will go round the twist. He's going to go totally Librarian-poo. He's going to invent new ways of being angry and try them out on you."
* The Truth, when a Personal Dis-Organizer imp asks if it should erase its memory of events recorded for its previous owner. While holding a cotton-tipped swab to its ear.
* The Truth. When William asks the man holding a tray of bread loaves whether or not he's the baker:
* The Truth, when William is in the watchhouse cell, he kills time by correcting the spelling in the graffiti.
* The Truth William desperately needs more paper for the Ankh-Morpork Times, but the person selling it has already promised his entire stock to William's rivals and can't very well go back on his word. And speaking of words, he really needs to have one with his foreman, who seems to have left a loaded cart right by that wide-open gate over there where someone could just sneak in and drive off with it...
* The Truth William de Worde constructs a truly epic one to stop the Watch's werewolf from following him when he's doing something of questionable legality. One of the components has to be kept in a sealed bottle, suspended in a bottle of water, inside a box, just so the smell doesn't get out before you want it to.
* The Truth, William de Worde takes a statement from a robbery victim that includes "I shall recognize him if I see him again as not many people wear a stocking on their head."
* The TRY Channel usually has two participants, at the end of the video, ask the viewer to subscribe, and "hit the notification bell". How successful they are in getting this out depends on if the participants are laughing too much over some joke. Or, if it was a drinking episode.
* The Trygon is a giant version of the Ravener with all its burrowing abilities and an electrical attack. Since Raveners were much too small for a proper Sand Worm, the Imperial Armour books introduced their giant form (their being able to move is
* The Try Guys "Distracted Driving" video. Ned's personalized distraction during the test is to be given a note that says "We have your wife;" further down the course, Ned's wife Ariel is locked in a cage. He drives completely off the course to save her, giving him a huge penalty and causing him to lose the competition.
* The Try Guys", the guys travel to Alaska and learn how to travel by dogsled, culminating in a timed competition on a glacier. One of the mushers teaching them the sport even notes the real-world preference for Alaskan Huskies over Siberians and jokingly calls them "Slow-berians".
* The TSAB – Acturus War cannot win against the Bureau, but it will do its

best to bleed the enemy out as far as possible.
* The TSAB – Acturus War has some of this, but it's not a key focus.
* The TSAB – Acturus War, who are both mages and conventionally-trained special forces. We see only four named ones on-screen, but they do fairly well considering they end up fighting Nanoha, Fate, Vita and Signum.
* The TSA ban on carry-on liquids and gels is in part a precaution against homemade hypergolic bombs, following the discovery of a plot to use them on airplanes.
* The Tsars Bride, and Tsar Ivan the Terrible, looking for a new wife, chooses Marfa as his bride.
* The Tsars Bride Lyubasha. It’s enhanced by the fact that he is the only one to be genuinely fond of her.
* The Tsavo man-eaters, a pair of maneless Tsavo lions, killed/consumed between 35/135 Indian laborers working on the Tsavo railway bridge in British East Africa. Even lighting campfires and building redoubts out of thorns didn't stop them. Eventually, Col. John Henry Patterson, a real-life
* The t-shirt and suit look became popular enough for a few years that it's been used as shorthand for
* The Tsuchikage is also able to use an Earth technique to petrify anyone he is touching, as well as greatly increasing their mass.
* The tsunami division uses this concept but it needs two ships to be effective, the one hiding under the CTF field is blind.
* "The Tsuranga Conundrum": After General Cicero's death piloting the ship to safety, in the last scene, everyone else gathers around her body to say a few words.
* "The Tsuranga Conundrum": Among Gifftans both sexes get pregnant, with males giving birth to males and females giving birth to females. We don't see how female pregnancies work, but males are pregnant for only a week, have a "birthing sac" that must be painlessly cut open to have the baby, and the babies are born with two umbilical cords.
* The Tsuranga Conundrum birth partners. Unfortunately, he always had to look away at the squishy bits...
* "The Tsuranga Conundrum": Durkas Cicero is wearing a canvas jacket, T-shirt and distressed jeans that wouldn't be out-of-place in the 21st century. This stands out more because the rest of the 67th-century natives are wearing more futuristic styles.
* "The Tsuranga Conundrum": General Cicero became a decorated war hero with her piloting skills. And although it's been a while since she's flown anything, she still retains those skills.
* The Tsuranga Conundrum" has human General Cicero and her android consort Ronan.
* The Tsuranga Conundrum. It's later subverted, however, when he mentions to Ryan that he always looked away during the gross bits.
* The Tsuranga Conundrum" lives in space, is essentially impossible to destroy, and foregoes conventional food, subsisting instead on energy drained from technology.
* "The Tsuranga Conundrum" mentions something called an "ecto-spleen".
* "The Tsuranga Conundrum" moment when she meets the famous General Cicero, and then she's utterly gleeful when she shows Yaz the antimatter generator powering the ship's engines.
* "The Tsuranga Conundrum": Rhesus 1, the hospital the ambulance ship is headed for.
* "The Tsuranga Conundrum", Ronan asks Yaz if she's also "experiencing comprehension difficulty".
* "The Tsuranga Conundrum": The Doctor considers Astos, the senior medic of the ambulance ship, this, and tells him so a few times.
* "The Tsuranga Conundrum": The Pting will happily devour any kind of inorganic matter... but after swallowing the sonic screwdriver, it spits it out mostly intact just moments later.
* "The Tsuranga Conundrum". The remaining medic, Mabli, says that she can't tell the Doctor anything on the grounds of patient confidentiality, but suggests she

ought to examine General Cicero.
* "The Tsuranga Conundrum": Yoss. His species, the Gifftans, have both sexes able to get pregnant and only able to give birth to their own gender. He's mildly disgusted when told that human reproduction works differently.
* The Tuatara is a reptile that superficially resembles a lizard, but it belongs to its own order. Currently it's only found on a few islands off the coast of New Zealand. They take a very long time to mature: 10 to 20 years before they reach maturity, but have lifespans that rival tortoises.
* The tube operators get many moments of these in "Trials and Tubulations", especially upon hearing that Olive and Otto are stranded in
* The Tubes' debut single, "White Punks on Dope", also poked fun at 1970s rock star excess, right down to Fee Waybill's flamboyant on-stage persona Quay Lewd.
* The Tubes has a song titled "Attack of the 50 Foot Woman", a tribute of the movie of the same name.
* The Tubes have a song titled "Attack of the 50 Foot Woman." Which is about the singer's 5'2 girlfriend suddenly turning into a giantess, scooping him up, and going on a man-squashing rampage "
* the tub of Happiness read the ingredient list... and there's an order to take their guns while they're at it.
* The Tudor Empire (also called Chuder in some translations) in the "Golden Age" arc is a long-time enemy to Midland which has been at war with it for 100 years and is characterized as a war-mongering, expansionist force, though it hasn't been seen in detail beyond the knight forces employed to fight the
* The Tudors, Catherine Howard wets herself at the sight of Lady Rochford's death.
* The Tudors, Charles Brandon seeks the favor of the Duke of Buckingham's beautiful daughter before taking part in a joust.
* The Tudors excelling in different fields and tasks. All the king's legitimate children are wonders of learning as well.
* The Tudors has the future Mary I, Elizabeth I, and Edward VI as supporting characters.
* The Tudors Henry's first three wives visit him. Whether they are real or just Henry's hallucinations is up for debate, but all three claim they've come to see their children and to give Henry a piece of their mind regarding how poorly he treated them in life. About midway through that season, there is a scene where Charles Brandon interacts with the ghost of a nobleman whom he was in charge of having executed(on Henry's orders) for participating in the Pilgrimage of Grace (the only serious rebellion in Henry's entire reign).
* The Tudors in Season 4 with his fifth wife, Katherine Howard, and her two ladies-in-waiting (Joan Bulmer and Lady Rochford) are in the next room listening to it. Joan was pretty amused with it while Rochford does not.
* The Tudors is about Henry VIII, this shows up here when he throws England into political and religious turmoil in order to be with Anne Boleyn.
* The Tudors, she convinced producers to let her play Anne as a brunette. The former caused some consternation among the producers and investors of the series when an English PR flack, asked why Henry was to be played by a brown-haired actor, replied with melodramatic insincerity that it was "just so sad" but Henry had to be played by a handsome actor - implying that it was obviously impossible for a redheaded actor to be handsome! Officials at Showtime and the CBC were not impressed, especially given the common North American belief that the English dislike of red hair is nothing but plausibly deniable anti-Irish prejudice.
* The Tudors showed signs of this during his first episode. He bluntly asked a woman to be his mistress and offered her an expensive necklace. He then told her that if she refused, he would bother her no more.
* The Tudors to talk with Henry in bed about political issues, only for Henry to remind her what happened to his last two wives...
* The Tuileries palace in Paris according to legend was haunted by "the Little Red Man", the ghost of a butcher whom Queen Catherine of Medici (spouse of Henry II) had murdered because he knew some of her dark secrets. As he died he cursed those responsible for his death and vowed to return. Which he is said to have done many

times, usually just before deaths significant to the royal family, such as before Catherine's death, the assassination of Henry IV, and the deaths of Cardinal Mazarin and Louis XIV.
* The Tullys carve fish into pretty much every column they possess and wear armour that resembles scales.
* The Tulsa race riot (also called the Greenwood Massacre or the Black Wall Street Massacre) was one of the most successfully-obscured acts of racial violence in American history until it was depicted as part of the backstory of
* The Tumbler isn't really a good example since it's a military vehicle with no unarmed, civilian counterpart. A Weaponized Car is a car with weapons added; the Tumbler is more like a small tank with built-in weaponry.
* The Tumbleweed Dossier is a classical movie vampire, although he is not evil.
* The Tumblr image gallery "Am I Gay?: A Journey of Self-Discovery with Shang" has fun with the
* The tune was used in the UK to advertise the insurance comparison website Confused.com, with lyrics unrelated to the original song.
* The Tune was very popular among children, mostly because it lacked his trademark political incorrectness (boasting a single, brief shot of nudity). Bill didn't seem to mind.
* The tune we now hear as "Hail, hail the Gang's all here" comes from "With Catlike tread" in Gilbert and Sullivan's "The Pirates of Penzance", which was a pretty obvious homage of "The Anvil Chorus" or "Gypsy Chorus" from
* The Tunguska Event: A large explosion that happened in the remote Siberian wilderness of the Russian Empire in 1908. While believed to be the result of a meteorite, it may have been something more than that...
* The Tunguska Event, also in Russia, in 1908, was a crazy large explosion that levelled 2000 square kilometres of forest, yet didn't cause a single human casualty.
* The Tunguska Event is either caused by time travel shenanigans or powerful magical rituals with explosive after effects.
* the Tunguska Event of 2023. All she says it that it turns out that aliens weren't little green men.
* the Tunguska Sea, allowing Gems to quickly travel between Earth and Homeworld again.
* The Tunisian ("Jasmine") Revolution of 2010-11 was started when a young man, Mohammed Bouazizi,
* The Tunnel, Australian based horror movie. Similar again, except that it is based on actual events prior. The government did stop talking about the reservoir mysteriously, and film crews do actually go down there where there is hard-to-find hobos. Then add a superhuman stalker who's afraid of the light and you have one very creepy movie. Which could've as easily occurred with a regular stalker.
* The Tunnel: Elise speaks her mind without a filter, to the point of inadvertently offending people. She gets told off by Carl for this but refuses to lie.
* The Tunnel in which a terrorist kidnaps a group of children and promises to release them only if the public riots against stores that exploit child labour. Once his hostages are whittled down to two, the terrorist holds an on-line vote to decide which child shall be set free and which shall be executed. One is a black boy, the other a white girl. No prizes for guessing which one the public votes in favour of.
* The Tunnel is done in this style, interviewing the survivors of a group of reporters who entered into a set of abandoned subway tunnels in search of a government conspiracy. Footage filmed by the crew is interspersed with voiceovers from the survivors.
* The Tunnel is exactly the same premise but with The Chunnel between France and Britain.
* The tunnels of Củ Chi are an immense network of connecting tunnels located in the Củ Chi District of Ho Chi Minh City (Saigon), Vietnam, and part of a much larger network of tunnels that lies beneath much of the country. They were the location of several military campaigns during

* The Turaga elders, who relate old legends about the threats that rear their ugly heads in the first few arcs. Eventually deconstructed; the third or fourth time this happens, the heroes start wondering where they're getting their information and, more importantly,
* The Turaga: major side characters initially with a great story-importance, then got two full years devoted to their early lives, but from '06 onwards, they barely appeared in any scenes, and now... Where are they?
* The Turaga themselves, when they were Toa in their younger days, and Vakama in particular, were mentored by Toa Lhiikan
* The Turbotraction Turbot-Rhino I and its successor were the cool cars owned by
* the turbulent 1989/90 era - longer than anybody except Kohl himself - few people dismiss her as easily as that any more.
* The Turian Hierarchy is a hierarchial meritocracy with a strong military culture. It is noted in-universe to have potential for great misuse, but this is apparently mitigated by the strong values of civic duty and responsibility that permeates Turian culture.
* The turian race actively tries to avert this. From the in-game codex: "Throughout their lives, turians ascended to the higher tiers and are occasionally "demoted" to lower ones. The stigma associated with demotion lies not on the individual, but on those who promoted him when he wasn't ready for additional responsibility. This curbs the tendency to promote individuals into positions beyond their capabilities." It does, however, mean that Turian individuals are not actually in control of their career paths, essentially leaving that determination to their superiors whether they like it or not.
* The turians are seen as "uptight" by most other species in the galaxy. They're basically by-the-book
* The turians believe in a form of pantheistic animism, but they're open to experimentation; some turians have been shown adopting Earth religions that mesh well with their worldview, including Zen Buddhism and Confucianism.
* the turians was brutal and brief, and made more bitter by a number of misunderstandings which nearly escalated the situation into a galactic crisis. The other Citadel species caught wind of the situation, stepped in and brokered a cease fire, paving the way for humanity to join the Citadel. The incident was a point of contention between humans and turians for years after.
* the turian will even make an advance on her. No matter the gender, it ends with said turian being thrown across the room.
* The Turing Test analyzes how intellectual functions like creativity work outside of human mind. For example, a computer can be creative by applying all solutions until one works, much like nature is creative through natural selection ensuring only those adapted to the environment survive.
* The Turing Test and other intricacies of AI sciences that the average gamer may not necessarily be familiar with.
* The Turing Test by being set on the Jovian moon Europa, a ball of ice in the void of space so cold and remote that it makes Antarctica look positively tropical. You spend most of your time investigating the eerily empty subterranean research station there, trying to find out where its crew went after contact was lost.
* The Turing Test in chamber E46 connects to two other rooms which reproduce such experiment.
* The Turing Test is generally a very slow-paced game, but a few puzzles require twitch reflexes: you have to suck an energy ball out of a door switch and then dash through the door before it closes.
* The Turing Test: Most of the game takes place in an underground complex located below the icy surface of Europa.
* The Turing Test: One common complaint is that the audio logs are muffled and are difficult to understand, with the additional hindrance that they have no subtitles. The developers have stated that it was an artistic decision, with the idea being that you are eavesdropping on conversations, so it is a deliberate challenge to hear them. Unfortunately, with the only available language being English, it locks out that content for non-English speakers as well as people with hearing or

auditory-processing impairments.
* The Turing Test: The extremophile found in Europa is in a symbiotic relationship with a virus that repairs the former's damaged DNA, which confers it a resistance to high levels of radiation. According to Soichi's writings, this also prevents the biological aging that is ultimately caused by DNA damage.
* The Turing Test: The virus found in Europa turns anything it infects into this, thanks to its ability to repair DNA damage.
* The Turing Test: You can reset a puzzle that you managed to get stuck on by selecting it from the menu.
* The turkey battle. Offerings included turkey sashimi, which is this to American audience since it's not common to find any kind of poultry served uncooked, due to the risk of salmonella poisoning. On the other hand, poultry sashimi is permissible in Japan if the birds meet the inspectors' standards; some breeds (such as the
* The "Turkey Day" version of the episode "Night of the Blood Beast" does this intentionally in its first host segment. Mike and the bots make contradictory references as Gypsy tries to guess which sport they're talking about; when it comes back from commercial, it turns out that it was Australian Rules Football.
* The Turkey Who Came to Dinner", the babies befriend a live turkey and try to protect him from getting cooked and eaten by the adults. They attempt to launch the turkey out of Tommy's backyard by putting him on one end of the seesaw and having Phil, and later Chuckie, jump onto the other end. They only end up getting the turkey to land on Stu and Drew's satellite dishes, causing interference with the many football games they're watching.
* The Turkish appliance company Arçelik sells its products under the name BEKO outside of Turkey due to the percieved pronunciation (ARSE-e-lick). (In Turkish it's more like 'Ar-chel-ik'.)
* The Turkish Gambit book, changed the identity of the Turkish spy in the Russian camp. In the book, he was one of those the clues pointed to, while in the movie, all the clues were red herrings, and the real spy was somebody else entirely, whom Fandorin accused based on evidence never shown onscreen before (though its existence had been hinted at early on).
* The Turkish Gambit to stop them. He then identifies the bad guy and explains his intricate espionage plot.
* The Turkish Police forces once stumbled upon the primary safehouse of a domestic terrorist organization (they knew it was a safehouse but didn't expect it to be the primary one). After securing it and sending teams to investigate the evidence, they discovered the basement had been used for the torture and burial of several kidnapped people. Subsequent investigations revealed a several more such houses. The clincher? None of these places were isolated. They were all in heavily populated urban centers. On top of that, the group had also sold a few such houses to private buyers after they no longer needed these locations as safehouses. The new owners had to face the horrific realization that they had been living atop torture victims for months or even years.
* The "Turkish Republic of North Cyprus" is only recognized as a state by Turkey. As such, the only way to get there is to fly from Turkey. Until recently, this applied even if you lived 50 yards away in Cyprus proper. The border has become a little more permeable of late, but long-term entry would be... complicated.
* the Turks has fiery red spikes, which sets him apart from his completely bald partner-in-crime, Rude.
* The Turks used the Parthenon in Athens, Greece as a gunpowder magazine during the 1687 Morean War; the Venetians hit it with artillery fire and BOOM! The Turks
* The Turly Gang - Fighters of Freedom by euro play is probably one of the most infamous knockoffs, attempted to cash in on TMNT with He-Man knockoff figures. Like the Galaxy Fighters, we do not know for sure if euro play ripped off their molds or they commissioned
* The "Turn A" in the title describes an inverted "A", the mathematical symbol meaning "For all", used in equations describing statements that apply to every member of a set.
* The turn based tactical genre seemed to be heading down the drain around the

start of
* The "turned to stone" variant is featured as a local legend in "The Ghost of Maiden's Peak." The stone girl's spirit is also said to haunt the area.
* The Turner Diaries As a result, the message of the book comes across more as "white supremacy will literally end the world."
* The Turner Diaries in 2099 everyone on the planet is the same race, that race being white. And yes, it's exactly what it sounds like.
* The Turner Diaries" — judges, professors, lawyers, politicians, journalists, entertainers, preachers, and anyone who's either slept with or even been friends with non-whites — are lynched and their bodies hung from streetlights, power poles, trees, street signs, and overpasses.
* The Turner Diaries. Needless to say, this book has absolutely no fans outside of its very narrow target audience.
* The Turner Diaries that he claimed would lead white people to the status of God.
* The Turner Diaries. The writer was William Luther Pierce, the former head of the white supremacist National Alliance, and it also inspired a number of white supremacist gangs and terrorist groups, including one that took its name (the Order) from that of the group in the book.
* The Turner Diaries) William Pierce was well aware of the irony. He despised rock music and preferred that young people listen to classical music or opera, but was pragmatic enough to decide that if white youths were immature enough to be into the rock scene, that was what his label Resistance Records was going to give them (provided it could impart a "white power" message, of course).
* The Turning Point (1952): John Conroy wants to use his position as prosecutor to eliminate corruption in his city.
* The Turning Point (1952): Neil Eichelberger, the leader of the local criminal syndicate, has no qualms about intimidating or murdering anyone who would testify against him.
* The Turning Point Emma was once a great dancer, but now she's in her mid-forties and can barely execute a double pirouette. Her old friends Wayne and DeeDee, also once on their way to ballet stardom, abandoned their performing careers shortly after having their first child. And Michael, the artistic director, has devolved from a great choreographer into an administrator.
* The turning portions of the doors in the Air Temples (the ones that "unlock" via airbending) are obviously CG.
* The Turning Tide features a businessman who passes data about convoys to the enemy, and then makes sure his own ships on the convoys are not carrying nearly as many goods as they are supposed to.
* The turn of the 1980s saw the American business computer manufacturer Prime Computer showing a
* The turn-of-the-century "Molasses Gang." They got their name because one of their favorite crimes was to all go into a shop and hold out a really big hat and tell the shopkeep they had a bet as to how much molasses the hat would hold. He'd agree to fill it as full as he could, then with a quick move they'd clap it over his head, covering his eyes, and while he struggled to get it off, they'd make off with whatever they were after. Supposedly they also once got bored during a bank robbery and left without the money.
* The turn-of-the-century silent film "The Big Swallow" presented the
* The Turn of the Screw, Flora becomes seriously ill and delirious after her governess accuses her of conspiring with ghosts.
* The Turn of the Screw is presented as an anecdote told to the author by a man at a party.
* The Turn of the Screw stated that this story was simply a ghost story but a few notable critics such as H.C. Goddard have argued that the story is really about suppressed sexuality and the ghosts are a result of the governess' sexual frustration. Marcia Eaton, an aesthetics professor, writes "James himself said that the story was just a ghost story. Some critics ... try to show that he [James] was intentionally deceptive when he made such statements."
* The Turn of the Screw, the children are singing "Lavender's Blue," while the

adults look on, unmoved by this show of innocence ("It is all a wicked lie"). This is mostly foreshadowing, as the plot hasn't gotten too creepy yet.
* The Turn of the Screw; whether or not the children are really being haunted is never addressed.
* The turquoise habits are real; they are worn by the Intercessors of the Lamb. The frilled cornette belongs to a French order, the Sisters of Christian Charity.
* The Turtle Faction. This faction rely on heavy defense and in some case, the ability to engage the enemy in extreme range. Although they have low mobility just like the Brute Faction, they are usually not as tough as them. Also, Brutes often have a higher focus on heavy units while Turtle often focus more on static defense and long range support as those two types work well with each other. The common tactic of Turtle is to stall the game into late game and defeat the enemy through attrition battle.
* The Turtle Hermit, a.k.a., Muten Rōshi, wears his shades for 90% of the time, giving him a more interesting look beyond the "wise, old sage" stereotype. As Jackie Chun, he doesn't wear them, since most people don't know how his face looks like without the shades (the wig helps too).
* The Turtles (and even Splinter) feels they should not be involved, since their interference in the war would only make it worse. But Leo, feeling responsible for it since they're the ones who've taken out the Shredder, just can't ignore it, and takes it upon himself to deal with it.
* The Turtles are essentially victims of this trope as well, as Shredder and his minions always escape through the dimensional portal or transport module, thus avoiding being brought to justice. (Just how many episodes climaxed with "they got away again?")
* The "Turtles as aliens" rumours. They were eventually revealed to have
* The turtles consistently fail to remember Baxter Stockman's name in
* The Turtles' "Eleonore" is an example of the overdone sort of parody, complete with a line in the chorus lampshading how cliched everything is ("You're my pride and joy, et cetera"), though it's often mistaken for a straight
* The Turtles includes the line "If I should call you up, invest a dime..." Telephone booths often cost 50 cents nowadays, and even they are becoming obsolete as cell phones are becoming more commonplace.
* The "Turtles in Space" arc has the Turtles caught in the crossfire between two galactic dictatorships that are nearly identical in their corruption, militarism, and insanity.
* The Turtles is a one-album example of this trope. In here, the Turtles pretend to be 11 separate competing bands, and cover as many genres as possible, including surf rock ("Surfer Dan"), sunshine pop (Top 10 hit "Elenore"), and even faux-Hawaiian novelty with suggestive lyrics. ("I'm Chief Kamanawanalea" - try saying that slowly!)
* The turtles sometimes mention episode numbers as references. Takes a turn for the funny when a
* The Turtles themselves do it in another episode to infiltrate the warehouse where Shredder is holding April hostage. Shredder knows he didn't order pizza, but Rocksteady and Bebop are more gullible.
* The Turtles, under pressure from upstairs to put out hit material, recorded "Elenore", deliberately going for the trite and cheesy ("Elenore/gee, I think you're swell") - it was a big hit. The band's best known song, the #1 hit "Happy Together", was created in a similar way.
* The turtles' vigilante ally Casey Jones wears a hockey mask. This is more about looking scary than hiding his identity; Casey frequently yells out his name just so people know who's delivering the beatdown.
* The Turtles, who were briefly known as "The Tyrtles" before reverting to the conventional spelling.
* The Turtle was eventually given the power to dampen kinetic energy...in other words, he became a walking anti-Speed Force, the energy that powers the Flash. Later on, this was made even more explicit via a
* The Turusch, the first sentient aliens seen, evolved in a high-pressure

atmosphere consisting mostly of carbon dioxide, with various sulfur compounds making up the rest. They live at temperatures of around 100 degrees Celsius, hot enough that sulfur particles in their air alternate between solid and liquid, and their environment is seething with ultraviolet radiation. Remarkably, this is their planet's equivalent to
* The tuskarr, who live in the cold north, seem to be the walrus-ified version of the Inuit with heavy Maori and Samoan influences.
* The Tuskegee Airmen, an airman is discharged for this, and commits suicide as a result.
* The Tuskegee Airmen, the trainees — the first African-Americans ever trained as pilots by the US military — are surprised that one of their lead instructors is also African-American... and that the other instructors often defer to him. He turns out to be the only instructor with combat experience (having previously served in the Royal Canadian Air Force).
* The Tuskegee Airmen were the first black World War II fighter pilots and were credited with never losing a plane under their protection to enemy action. The famous color of their plane tails? Red. The Tuskegees' signature was inverted twice over with the 352nd Fighter Group. Became so famous that the Germans started calling them the Blue-Nosed Bastards of Bodney (Bodney being the city they operated out of). The inversion comes with the obvious blue nose.
* The Tusken Raiders of Tatooine ride giant, shaggy beasts called banthas,
* The Tusken Raiders (or Sand People) are a very literal example; as far as the movies go, they never seemed to be portrayed as anything other than
* The Tusken Raiders (or Sand People) are human-sized, and out-of-universe are played by human actors... but their bodies, feet, hands, mouths, noses, ears, and their eyes are always kept covered, they are
* The Tusken were ready to attack the moisture farms around Anchorhead, and only knew of the settlers, and couldn't know that the Grand Moff of the Outer Rim was there to snap his niece out of her depression. All in all, they were lucky he found
* The Tuskeri of Kaldheim are obsessed with battle and warfare, and don't need much of an excuse to go to war beyond being bored. They're extremely disorganized warriors, disregarding strategy and tactics in favor of enthusiastically throwing themselves into the thickest frays and attempting over-the-top heroics without paying much attention to what their fellows are doing. This gets them killed pretty regularly, but the Tuskeri see glorious death in battle as their highest calling in life anyway.
* The Tuuri Village Shop in Finland, claimed to be the largest little village store in the world, and sells pretty much anything that one can hope to need. Just for comparison, the village it stands in has 500 residents. The shop gets 5,8 million customers yearly.
* The Tuxedo accidentally swallows not an explosive, but an insect carrying lethal bacteria. Which turn him into a withered husk within seconds.
* The Tuxedo Clark Devlin starts trying to feed him suave lines, only for others on the line to start butting in with their own advice. With half a dozen voices in his earpiece, Jimmy ends up looking insane in front of the girl, unable to focus.
* The Tuxedo, the antagonist falls to the ground and burns his face on acid. He later gets back up to charge at the hero, who finishes him in a somewhat gruesome way.
* The Tuxedo, which is in fact the ultimate spy gadget, providing its wearer with every possible skill you'd need for a spy mission, from gun assembly to kung fu, to wicked dance moves.
* The TV adaptation turned Barabaraman (one of the Urara School faculty) into an example of this, by delaying introducing him until about halfway through the series but having Chacha and co. recognize him on sight.
* The TV ads for L'Oréal's brands of shampoos with beautiful women waving their long hair are so ingrained in popular culture that memes have been made with any human (or non-human) having long hair, such as
* The TV commercial for the home version of Pole Position lampshades this one pretty heavily.

* the TV episode. In the TV version, the Galloping Gazelle was washed-up and bailed on the kid protagonist because he thought he was too old for the job.
* The T-Virus that the heroes try to fight against is spread via biting (or through the environment, like water), and you can have your player bitten (or wade through T-Virus infested water in the case of the first game) and suffer no ill side effects.
* The "TV" lettering was also subtly amended to make the bumps smoother.
* The TV miniseries came up with a storyline about a ring of sunstones that kept the large carnivores in the basin, when some of them went out, chaos ensued.
* The TV Movie ends much the same way, with the Doctor leaving to continue adventuring after seemingly defeating the Master for good yet again, but not before encountering another TARDIS malfunction.
* The TV Movie, even though the Doctor is almost trembling in his shroud and generally giving every indication of being nearly as scared of him as vice versa.
* The TV Movie it, but why would he say it? Many just give up and point to River Song's line, "Rule One: The Doctor lies."
* The TV movie "Killing Kennedy", which was also shot in the Richmond area, despite the scenes taking place mostly in Dallas circa 1963. Richmond also doubled for New Orleans, Washington DC, Russia, and Mexico City while stock footage was used for key aerial shots.
* The TV Movie sets the whole plot running (and indirectly causes the Seventh Doctor's regeneration into the Eighth).
* the TV Movie taken of the Doctor in order to obscure the evidence of the surgery in which the Doctor was killed.
* the TV movie, the Master attempts to steal the Doctor's body. As part of the process, his head shakes and blurs.
* the TV Movie, the Master "drezzzes for the occasion" in a red, black, and gold cloak.
* The TV Movie to hide the fact the host body is dead and starting to decompose around him.
* the TV Movie unfold over New Year's Eve 1999 and the early hours of New Year's Day 2000.
* the TV serial, the claw was a gorilla glove with Vaseline smeared over it; in the later Peter Cushing movie, it was far more reptilian.
* The TV series climaxes with a multi-pronged assault on Jurai (first the planet, then the palace) to remove Kagato from the emperor's throne.
* The TV series included that scene, but inexplicably cut the line "I took the liberty of coshing the officer, sir." It is also mentioned, albeit in throwaway lines, that Jeeves is a veteran of World War One, and that several of Bertie's acquaintances who have hunted their entire lives are impressed by Jeeves' shotgun skills.
* The TV series is followed up by a 4-episode OVA, loosely based on the
* The TV series itself had a "postscript last couple of episodes." The
* The TV series was usually run at a timeslot that was appropriate for Nick Jr. However, as mentioned, they did not try to
* The TV show introduces Hogatha, who is basically a female version of Gargamel.
* The TV Show" is many different styles of animation all bleeding together, interfering with and eventually running rampant through each other, set to a fantastic electronic beat.
* The TV Tropes logo wears one, although whether it's drunk or not is up to opinion.
* the TV version he opens the black spaceship's airlock by saying "Abracadiodularservosystems". It would be hard to judge whether he would find a plug in or voice control easier. He'd certainly be depressed by either option.
* The TV version of Mike Stoker is portrayed as a descendant of Bram Stoker and the latest of the family's vampire hunters in the paranormal
* The TV version of this explanation was illustrated with a cartoon showing a coin turning into a growing stack of coins, then bigger coins, then banknotes, gold bars and finally a plate of egg and chips.

* The TV Week Logie Awards are pretty bad about this when it comes to the
* "The Twa Sisters" has a beautiful and innocent blond girl murdered by her evil sister. A harp is made of her bones, and her golden hair is used for the strings. The magic harp sings out an accusation of her murderer.
* The Tweenies: In one episode, the protagonists imagine some living toys: Milo imagines an action figure and a talking toy plane, Jake imagines a clown doll, Bella imagines some performing toy mice, and Fizz imagines a singing fashion doll who doesn't want to be sold.
* The tween singing duo Prussian Blue began their career as a white-power alternative to Disney's multicultural teen pop stars. They've since
* The twelfth-century Servants of Saint Camber use a series of caves for their tombs, and they retain burial customs from an earlier age. They place netlike shrouds over their dead with tiny stones or
* The Twelfth Doctor and Missy Master invert it again, where both are older than their predecessors but Missy is FAR more charming and approachable than he is, and noticeably younger too. While Missy’s
* The Twelfth Doctor, as much of a ham as any of his predecessors, gets to do this in
* The Twelfth Doctor attempts to say something along these lines to Clara when she
* The Twelfth Doctor does confirm that he's over 2000 now. It's kinda hard to ignore the 900 years Eleven spent on Trenzalore, fighting off constant invasions.
* The Twelfth Doctor does this literally and figuratively for Clara Oswald in the Series 9 episodes
* The Twelfth Doctor episode "Smile" had this as the premise. The robots and nanomachines building the colony were out to make the colonists happy. When one of the colonists passed away (of old age), the robots mistook the colonists' grief for a terminal disease, and killed those who weren't smiling.
* The Twelfth Doctor gets to show off his electric-guitar-playing skills in several episodes of Series 9.
* The Twelfth Doctor has a gravelly voice with a wide range, which can occasionally drop quite low. It's worth noticing that
* The Twelfth Doctor has a whole collection of these, but his most iconic one is a black tailored longcoat with red inner lining.
* The Twelfth Doctor has scrawling on things in chalk as one of his quirks, which is the reason why he keeps a blackboard in the TARDIS. This would-be endearing trait becomes particularly disturbing in
* The Twelfth Doctor is actually open to the idea of an afterlife (and mentions he always meant to take a look), but he finds the version presented in "Dark Water" to be absolutely ludicrous.
* The Twelfth Doctor is even worse than the Eleventh, by some magnitude. For starters, unlike the Eleventh Doctor, he tends to be unintentionally very rude to people and has extreme difficulty saying encouraging words or apologizing (Clara issues him with cue cards; they don't help). He doesn't understand how faces work and he has trouble recognizing people if they have changed their clothing or hairstyles, thinking that putting on an orange coat instead of a blue one would make him unrecognizably disguised. He treats humans with occasional naked contempt and sees no point in hiding the fact that he's an alien. He doesn't understand why, if someone asks you to get them coffee, you don't give it to them a week later. He is by far the least socially human incarnation yet — as if this was now the time to stop pretending he could ever be anything other than a Time Lord. It was intentional: the Eleventh Doctor spent nine hundred years on one planet prior to his regeneration, outliving the people he knew there again and again, being strongly reminded he wasn't human, and he let that show through in his next incarnation. However, by Series 10, at least seventy-odd years into this incarnation, he's apparently learned how to deal with faces and his social skills have developed to the point he now comes off as a stern but compassionate old man.
* The Twelfth Doctor is extremely dark in his first series, to really hammer home that we're
* The Twelfth Doctor is much more overtly conscious of playing this role than some

of his predecessors were. In
* The Twelfth Doctor lampshades the trope in "The Woman Who Lived". When Me wants to travel with him as a companion, the Doctor points out that two immortal beings together is not a good idea. (And then the trope impacts the Doctor again when he meets up with his current companion at the end of the episode and realises that she'll be gone someday too,
* The Twelfth Doctor maniacally laughs when he smashes a massive tanker into a dock in "
* The Twelfth Doctor's era leans further into this, showing that their machines periodically mind-wipe them to prevent them questioning orders, and their vocalisers won't even allow them to
* The Twelfth Doctor's era very strongly implied romantic feelings between him and Clara, his primary companion. It also implied the First Doctor's gender identity might not have been as fixed as it seemed.
* The Twelfth Doctor's obsession with a "perfectly hidden" monster he has conjectured exists in
* The Twelfth Doctor spent just defending one little town in his previous life) certainly doesn't — he has a marked dislike for soldiers with only a few exceptions, doesn't want to be seen as an officer either (preferring that anyone who does anything to help him exercises their free will rather than just following orders), and questions his own actions, especially his mistakes past and present, surprisingly often.
* The Twelfth Doctor visually looks like a much older man than the more recent incarnations that preceded him, and he's as crotchety as that sounds. Only, not like your average old man, because he's usually dressing like an alt high-schooler, with a love of hoodies and generally comfortable but low-contrast dark clothing as much as he loves loud guitars and sunglasses. Basically, a 2010s alt teen in the body of an old man.
* The Twelfth Doctor would declare Earth to be the "Planet of the Pudding Brains".
* The twelfth legion of the Space Marines, once known as the War Hounds and now better known as the World Eaters, fought with a ferocity that reminded the Emperor of the white war hounds employed by a warrior tribe on Terra (hence the name). They became even more extreme examples after their Primarch Angron had the Butcher's Nails copied and implanted in most of their heads. The Nails made it so that rampant fighting and bloodshed were the only things that could grant them satisfaction. Small wonder this was the legion that would pledge themselves to Khorne during the Heresy.
* The Twelfth Man. Examples include "Wasee A-Crim" (Was He A Crim), a remarkably prescient reference to Wasim Akram some years before the match-fixing controversy); "Hafeez Andmissin" (Half His Hand Missing), a parody of Azeem Hafeez, who was born without two fingers on his right hand); and "Imheer Sohail" (I'm Here So Hail), Aamir Sohail.
* The twelfth season DVD, while also claiming to be complete, lacks an episode called "The Kwarantined Krab", which didn't air in the US due to
* The twelfth season, the final season of the model era, combined live-action models with CGI faces, characters and certain "props".
* The twelve-bar chord progression. The "eight-bar chord progression" is not as known but its easily the second most frequent progression.
* The Twelve by James K. Burk, the city-state of Valtierra is governed by a council of people chosen to represent and act as certain archetypes. Why? Because it makes an interesting premise, that's why.
* The Twelve: Captain Wonder's sidekick Tim kept superheroing when Captain Wonder went missing under the name Captain Tim. He went back to civilian life after his superpowers faded away.
* The Twelve Chairs (1928) is a famous depictions of the Soviet 20's culture.
* The Twelve Chairs, a character runs out of his flat naked (he was taking a bath), and the door slams shut.
* The Twelve Chairs by Ilya Ilf and Eugene Petrov, being the adventures of a con artist, have lot of these. Ostap Bender, the protagonist, is mostly a master of the

short con and uses this to swindle just enough money to live a comfortable lifestyle. One day, he's impersonating a White Emigre spy, the other day a repo man, yet another day an artist, the next day he's a chessmaster. His archnemesis Koreiko, on the other hand, is a long con expert and really money-grubbing, not stopping at stealing trains of food bound to famine-stricken regions.
* The Twelve Chairs employed them to track one of the titular, possibly treasure-holding chairs.
* The Twelve Chairs. He climbed the cliffs to escape Ostap, found out he cannot go down by himself, and eventually went mad from isolation.
* The Twelve Chairs (he wears a clean fancy suit and shoes but no everyday consumables like socks, and is homeless; the suit and shoes are implied to be given back to him upon release). This explains why he is extremely cautious about not violating the criminal code directly and enters Stargorod by foot to avoid run-ins with railroad police.
* The Twelve Chairs is actually a deconstruction: even after Bender gets his long-desired wealth, it turns out to be near-useless in the Soviet Union, where he can't be openly rich, while goods and services are mostly gained for government favors, not money.
* The Twelve Chairs it, not break it". It is very heavily implied that he started his adventures in the first novel right after being released from jail and doesn't want to return there.
* The Twelve Chairs (literally "gap", "collapse", "fall-through"). "For repairs. So that it wouldn't fall any further." In the 1980s the local authorities really started selling tickets. And then closed the access for a while to clear away the debris and reinforce walls. And in 2008 a statue of the con man with tickets was installed by the tunnel entrance.
* The Twelve Chairs, Ostap Bender starts a fake anti-Soviet resistance cell as scam to raise some money from local bourgeoisie. A parrot is present on the meeting of the cell. This parrot didn't talk before, but afterwards it starts to squawk quotes from Ostap's dangerously seditious speech.
* The Twelve Chairs Ostap Bender. When Bender does get his one million rubles in the last third of the book, the writers conveniently never stress its illegal history, instead treating it as somewhat of a lucky find.
* The Twelve Chairs (set shortly after the Russian Revolution) uses the older Schafer method, with the resuscitated woman lying on her belly and the rescuer kneading her lower back. It's still this trope in the Pretty sense, as they were actually fooling around and only adopted this ruse of respiratory distress because there was no time for her to re-tie her underthings when her husband came home early.
* The Twelve Chairs's money-making schemes involves pretending to be a chess grandmaster and hosting a simultaneous exhibition, despite being utterly inept at the game. After losing game after game, he resorts to stealing a rook from his last opponent, and when called on it, throws a handful of chess pieces in his face.
* The Twelve Chairs was a low-key version of a knowledge broker: he made money by selling decommisionned archive documents with sensitive information (such as the data on Bolshevik confiscations of property during the revolution that Ostap Bender wanted).
* The Twelve Colonies of Kobol are set up as such. Aerilon is the breadbasket of the colonies. Caprica is the capital and cultural Center. Gemenon is a holy center. Libran is known for its lawyers. Picon has strategic value (the Fleet HQ is located here), and a cultural center since it's used as a
* The Twelve Gold Medallions, protagonist Miao Lung use a bamboo tree to launch himself flying a few hundred meters horizontally so that he can reach the main villain with his sword. It works.
* The Twelve Kingdoms act as translator microbes as a secondary function (their primary giving the owner kick ass martial art skills).
* The Twelve Kingdoms also has many layers of walls, but in this case, is because of the constant population growth, as more people migrate to En from other kingdoms, the city constantly needs to expand more to accommodate them, and since

the walls are needed to protect them from the monsters, they have to constantly be build with the expanding city.
* The Twelve Kingdoms as much as she can and realises that she should have wised up a long time ago.
* The Twelve Kingdoms (both anime and novel) there's a fair bit of subtext between Rakushun and Youko...and Rakushun is a giant, vaguely humanoid rat (he's just a rodent of unusually large size that can stand on his hind legs) who can turn into a human at will, though he prefers his rat form.
* The Twelve Kingdoms) dyed a much less obvious shade of brown to help throw off pursuit.
* The Twelve Kingdoms has a truly weird reproductive system involving marriage but apparently no sex: when you get married, a fruit called Ranka grows on a tree, and out of it pops your baby. What makes it far weirder is that sometimes the Ranka fruit gets blown across the sea and is implanted in a Japanese woman - this is how the central character of the anime, Youko Nakajima, would have been born, though she thought she was a normal Japanese girl until she was taken by force from her high school. In addition, royalty and other immortals can't marry - and since Nakajima becomes a queen, that includes her - and so they can't have children unless they were married before they become immortal. While it's established that they DO have sex it's apparently only done for fun, with no connection to the reproductive process at all.
* The Twelve Kingdoms in this series, things went downhill very quickly.
* The Twelve Kingdoms is very far on the serious side. It's realistic in that a few characters can see the humorous parts of life as well, though.
* The Twelve Kingdoms, just doesn't see much point in praying to the gods:
* The Twelve Kingdoms, later is seen in regal clothing when crowned as the Queen of the Kei Kingdom... then switches to her traveler outfits whenever she leaves the palace.
* The Twelve Kingdoms. Once Enki agrees to remain a hostage, he reminds Kouya that he doesn't need the baby as leverage anymore. Rather than let Rokuta devour the child — which would be far more expected in context — Kouya releases the poor baby and tells a servant to make sure he is returned to his parents.
* The Twelve Kingdoms, the Trickster Demon in Youko's sword shows her illusions in an attempt to get her to kill herself and do morally reprehensible things. (It also gave her good advice from time to time, so she never quite knew when to listen to it and when not to.) Eventually, Youko learned that the sword reflected her own thoughts and fears back onto her, and she decided, instead of fearing the sword's power, to use it as a tool for understanding herself.
* The Twelve Kingdoms the way she was generally treated there were also quite the factors to consider.
* The Twelve Kingdoms used to execute people for such crimes as being unable to work due to sickness and for wearing a comb in your hair outside. After he executed three hundred thousand people in one year, the people rose up and overthrew him.
* The Twelve Kingdoms very frequently show the map of the world in order to the situate the action. Also to remind you of what the names of all the countries and cities are, since there are so many to keep track of.
* The Twelve Kingdoms where a very strongly enforced divine mandate means that all twelve eponymous kingdoms are for all intents and purposes Ancient China.
* The Twelve Kingdoms Yuuka without the Hinman that gives her her martial art skills in order to prove her who was the real Chosen One.
* The Twelve Months and stepsister, and then it's taken from them by the Queen who refuses to return it to the heroine unless she reveals who gave it to her. However, the acquaintance with the Months has to be kept a secret, so the Queen throws the ring into a lake. Thankfully, that very act activates the ring's magic and allows the heroine to call the Months for help, and April simply magicks the ring back.
* The Twelve Months. The rest of the Months, at least, are shown to approve of the engagement.
* The Twelve Months, the Stepdaughter is eager to stay in touch with April and keeps the engagement ring he has given her, but she returns home to live her own

life and neither of them speaks of any further commitment or plans thereof.
* The Twelve now has to deal with all the wireless broadcasts (phones, TV, radio...), etc.
* The Twelve on the other hand, is specifically about this trope. Twelve Golden Age heroes are cryogenically frozen and awoken in the present day. They all have significant trouble adjusting, but some have a lot more trouble than others.
* The Twelve's remix of "I'm Not Gonna Teach Your Boyfriend How to Dance With You" by the
* The Twelve Tasks of Asterix. Bonus points for closing after they enter.
* The Twelve Tasks of Asterix: Cylindric the German ends up with all his limbs tied into knots via judo.
* The Twelve Tasks of Asterix, explaining to Obelix that everything is possible in animation. Upon hearing this, Obelix magically teleports to the island of pleasure, which the pair had visited earlier in the movie. Oh my...
* The Twelve Tasks of Asterix gleefully employs this. The narrator at the start of the film asks the audience if anyone is unfamiliar with the cast of characters, and a forest of raised hands in silhouette obscures the film, to glares of annoyance from the cast.
* The Twelve Tasks of Asterix like "How do you do that?", "Can you make them light up one at a time?" and "They must be handy for reading in bed." Eventually Iris becomes so confused he resorts to this trope.
* The Twelve Tasks of Asterix, most notable seen during the dance scenes on the island of pleasure.
* The Twelve Tasks of Asterix, one of the tasks is to finish a meal cooked by Calorofix the Belgian, a chef famous for making meals for the Titans. Obelix cleans him out (Eating — as the first course — a boar with french fries, a flock of geese, several sheep, an omelette made with eight dozen eggs, a whole school of fish, an ox, a cow and two veal ("because to separate ze family...zat would not be right!"), a huge mound of caviar (with a single piece of toast), a camel, and an elephant stuffed with olives) and is still hungry.
* The Twelve Tasks of Asterix received two Polish dubs (the first ones in 1979 and 1987 respectively, the second ones somewhere in the late 90s). The newer dubs are now official and are shown in TV airings, while the old ones are either extinct (The Twelve Tasks) or only extracts of them can be found (Asterix Vs. Caesar). Other movies use the 90s cast.
* The Twelve, twelve random superheroes put in suspended animation by the Nazis in the last days of World War II and discovered sometime in 2007. Virtually all of them have a difficult time adjusting, with the curious exception of the Black Widow, who's used to it. She's a lot
* The Twelve: When the group of superheroes who've been in suspended animation since 1945 thanks to a Nazi booby-trap are revived, the government goes to great lengths to make them think it's still the 1940's, wanting to break the news to them gently. The Phantom Reporter begins to notice many things that are odd. One of them is that his nurse only wears one pair or earrings, but has piercings running up her earlobes for many more.
* "The Twelve Wild Ducks", a queen says, "If I only had a daughter as white as snow and as red as blood, I shouldn't care what became of all my sons." A troll witch hears and takes her sons.
* The Twelve Wild Ducks of her stepson's bride's beauty and tries to have her killed.
* The Twelve Wild Ducks", their sister must also keep silent and make shirts out of thistledown.
* The Twentieth Dynasty and much of the Third Intermediate Period (around 1200-1000 BC, give or take a century) were characterized by splendid isolation, the loss of the New Kingdom's empire in Nubia, the Levant, and Libya, along with interminable squabbling among heirs to the throne, several coups, barbarian raids (including the "Sea Peoples"), and occasional temporary conquest by outside powers.
* The Twenty-First Founding was an attempt to produce Space Marine Chapters that had their gene-seed modified to fix some of the flaws in the original gene-seed.

Unfortunately, while this was successful in some cases, the resulting chapters all seemed to suffer from some other, more significant flaw. In the case of the Lamenters (who used a modified version of the Blood Angels' gene-seed), they suffered from incredibly bad luck. They have been nearly wiped out on multiple occasions, picked the wrong side when a different Chapter led a rebellion, and while conducting a penitent crusade for that, sailed right into the path of a Hive Fleet. On top of that, their original intended modification was to remove Black Rage and Red Thirst, the signature afflictions of the Blood Angels. It turns out it didn't work.
* The Twenty-four Filial Exemplars included Shun, who was protected by Heaven from the usual abuse; Min Sun, who pled with his father to not divorce the stepmother who had failed to dress him warmly, because if he did so, his brothers would also be neglected; Wang Xiang, who melted ice in winter with his own body in order to catch a carp for the stepmother who had abused him to his father and caused his father to stop loving him; and Zhu Shouchang, whose mother was driven off by his stepmother.
* The Twenty One Balloons, a man discovers an island where diamonds are so common that they just lie around on the ground. He's sensible enough to realize what would happen if this became public, so he instead colonizes the island with a small number of other families. They collect a boat-load of diamonds each year to sell off in secret, allowing them to live in luxury on the island. But on the island itself, the rocks are so common that diamond cuff links are simply given away.
* The Twenty Palace Society tries to track down spell books and monster summoners.
* The Twenty-seven True Runes in the Suikoden games will stop their bearers from aging.
* The Twenty-Third and Twenty-Fourth Centuries (2201 C.E. - 2400 C.E.)
* The Twi'Leks are a "lesser of all evils" example. Most of the ones seen off of their homeworld either sold themselves into slavery or are descendants of those that did. Working as a dancing girl for a Hutt is still better than being on their home planet.
* The Twi'leks (or at least the ones from Ryloth) speak with a French accent in the animated shows. This was intended to be a reference to the
* The Twilight Avenger gets involved in a traintop battle with a gang of hypnotised hobos (
* The Twilight Child angry Rarity, when the fashion designer has had enough.
* The Twilight Child. Apparently even twenty-odd years after his final demise, the Crystal Ponies were afraid he'd come back to life if they used his real name.
* The Twilight Child: Averted in one instance with Rarity, who runs out of taffeta while in the middle of designing a dress. Spike and the pony she's designing the dress for brace themselves for a freak out, and Rarity declares it... annoying. She then goes to look around her stores for spare taffeta. Played with later on in regards to an older version of Rarity. Princess Twilight Sparkle and Rarity's daughter are talking when they hear Rarity scream in another room. Her daughter just calmly waits, before announcing that since she didn't hear a thump, she's not worried.
* The Twilight Child following the Mare Do-Well incident, Rainbow Dash wakes up on Rarity's couch with a very painful hangover. When she notices Rainbow is awake, Rarity offers her one of these. Whatever it involves, Rarity serves it on a teaspoon, and the narration informs us that it's "the drink equivalent of getting your brain smashed out with a bag full of bricks". It also tastes awful, but on the plus side, it does cure Rainbow Dash's hangover.
* The Twilight Child has Twilight Twinkle, and her great-grandmother, who is also called Twilight Twinkle (she was named after her).
* The Twilight Child. Rainbow Dash and Rarity get the worst of it though. Rainbow Dash gets snubbed by Spitfire a day after saving her and the rest of the Wonderbolts from Changelings. Rainbow Dash takes this one pretty hard, though Spitfire's lecture on how she's "not a team player" doesn't help. Rarity, meanwhile, buys a magazine after Shining Armor and Cadence's wedding to see what it says about her work... and it doesn't mention her in the slightest. Just to add

insult to injury, this magazine was focused entirely on the royal wedding and everything involved in it.
* The Twilight Child, Rarity and Sweetie Belle quickly get into an argument, which ends with Sweetie Belle trying to storm out of the room, complete with dramatic door slam. Unfortunately, her tail gets stuck.
* The Twilight Child that Trixie was in, Twilight Sparkle remarks that she's glad nopony in her family is that crazy. The scene immediately cuts to Cadence stealing Shining Armor's helmet and teasing him about it.
* The Twilight Child: This is how the main character first meets the Cutie Mark Crusaders, opening her eyes to find Scootaloo mere seconds away from drawing on her face.
* The Twilight Child: When Rarity is given free rein of a theatre, it doesn't take her five minutes to go absolutely mad with power.
* The Twilight Child, which shows her visions of what she'd have been like if she'd gotten everything she wanted when she was a foal.
* The Twilight Child: While Big Macintosh and Cheerilee (see Western Animation) talk like this when afflicted by a love poison, Shining Armor and Cadence are like this naturally, all the time.
* The Twilight Chronicles - Bella died in Episode 2, and the next episode opened with her waking up in Hell. She quickly discovers that she has a portal vagina that allows her to return to Earth whenever she is sent to Hell. She's been killed three times now.
* The Twilight Chronicles plot. Throw in writer's-strike writing and porn-worthy acting, and you've got this.
* The Twilight Chronicles. Until things from the dream start happening verbatim...
* The Twilight Chronicles uses Ke$ha's "We R Who We R". Episode 7 had a special opening credits montage consisting of:
* The Twilight Dragonflight was created by Deathwing and the Twilight's Hammer for the sole purpose of acting as weapons against the other Dragonflights. Having been magically aged, most are only a few years old compared to their centuries-old opponents.
* The Twilight Realm is built on large slabs of rock just hovering in a trippy
* The Twilight Reign series, there are a divinely blessed subspecies of humanity called white-eyes who are this. In terms of fighting, their superhuman strength and speed make them almost unstoppable by most human opponents. But this leads to all but the most disciplined among them to neglect their training, so the top human swordsmen stand a surprisingly good chance of beating a white-eye. In terms of magic, a white-eye naturally has more magic power than a human wizard so they can do feats of magic that beyond the intensity of anything a human wizard can hope to dream of doing. However, white-eyes lack a human wizard's versatility and seldom do anything but learn how to blast an enemy with magic.
* The Twilight Saga, and claws half her face off. He then feels so bad about what he did that she decides to accept his love. Christ, those books are messed up...
* The Twilight Saga. Bella falls in love with Edward, even though he (and her friends) keep reminding her just how dangerous he is. It is even mentioned that the reason Edward is so charming and gorgeous is to lure his prey, since he is a vampire.
* The Twilight Saga has countless scenes describing Edward's unparalleled beauty from Bella's lovestruck POV.
* The Twilight Saga In the books, geeky Eric is the class valedictorian; in the films, it's Jessica.
* The Twilight Samurai are both about a poor, extremely humble samurai who just wants to live a simple life. At the same time as he falls in love, he gets dragged into the violent world of politics against his will due to a rare technique of swordsmanship he possesses. Ultimately he uses his technique to escape from his predicament and gets married. Both films are written and directed by Yoji Yamada.
* The Twilight Samurai entertainment. He also refuses his uncle and best friend's offers to arrange a second marriage, though in the latter case he's motivated more by shame of his poverty than genuine disinterest.

* The Twilight's Hammer cult was originally an orcish clan but turned into worshipers of the
* The Twilight's Hammer. Minor antagonists very early on in Classic, show up much
* The Twilight Zone (1959)" (1960). A janitor from 1890 is sent to 1960 via a time helmet. He finds it much noisier and hectic, with higher prices and ruder people. He eventually escapes back to the past, which he finds much better. In fairness, another character is displaced from 1960 to 1890 and finds it equally miserable, the explicit message being that the present isn't necessarily worse, but that people are best suited for their own time.
* The Twilight Zone (1959) about robbing the bank for years, but he'd never actually go through with it.
* The Twilight Zone (1959), a confederate soldier encounters a cankerous old man who calls himself a witch-man, who gives the soldier a book of black magic.
* The Twilight Zone (1959)", after arriving in 1961, Chris Horn is shocked by the sight of a truck, which almost runs him over. He thinks that it is a monster.
* The Twilight Zone (1959)", after the crisis begins, Frank Henderson is continually racist towards the foreign-born Marty Weiss, describing him as a "pushy, grabby, semi-American" and later refers to "you and your kind." However, it is never stated what country Marty is from.
* The Twilight Zone (1959)". After the Devil is released from his cell, he conjures up a cloud of smoke to cover him as he disappears from sight.
* The Twilight Zone (1959)". After the three astronauts land on the unexplored asteroid and find the eerie area to be filled with deserted buildings and mannequins, they decide to split up and search the place, which is a really bad idea that trained astronauts should never have even considered.
* The Twilight Zone (1959)", after washing her face and putting on the dress from the department store window, the woman looks beautiful. The man is clearly smitten.
* The Twilight Zone (1959), aired in February 2003. This gap of 41 years and 3 months is possibly the longest gap between the original episode and its sequel in television history.
* The Twilight Zone (1959)", Alfred Becker asks why Gunter Lütze has returned to Dachau as he was "quite safe down there in South America."
* The Twilight Zone (1959)" a man does this to himself. He's allowed into heaven but he isn't allowed to take his dog with him. He decides that an afterlife without his dog is a fate worse than death (so to speak) so he refuses to enter and will just wander the path in between heaven & hell forever. Turns out that wasn't heaven, it was hell. Heaven allows dogs in.
* The Twilight Zone (1959)", a Nazi U-boat captain is forced to experience being on a ship that he torpedoed for all eternity.
* The Twilight Zone (1959) and blames it on his enemies in order to attract more support to his growing organization.
* The Twilight Zone (1959), and for daring to think that humanity being wiped out had a positive side. Make of that what you will.
* The Twilight Zone (1959): "And When the Sky Was Opened". Three astronauts return from a trip into space and disappear one at a time. As each disappears, only one of the astronauts remembers that the others existed, until he disappears too, then the spacecraft they returned in vanishes as well. Every time someone disappears, the audience sees that day's newspaper, saying something along these lines each time: "Three men return from space", "Two men return from space", "Lone man returns from space", And something about a "miracle birth".
* The Twilight Zone (1959)", an elderly couple go to a clinic that can give them new, younger bodies. But, they only have enough money for one of them.
* The Twilight Zone (1959)", Archibald Beechcroft initially revels in his solitude after he makes everyone else disappear. However, after several hours, he becomes incredibly bored.
* The Twilight Zone (1959)", as soon as he comes to power, Ramos Clemente proves himself to be extremely irrational, paranoid and blood-thirsty. He sees enemies all around him. As well as ordering mass executions, he becomes convinced that his lieutenants D'Alessandro, Garcia, Tabal, and Cristo are plotting against him due to

having seemingly foreseen it in the mirror. Clemente throws D'Alessandro off the balcony of his mansion, has Garcia and Tabal executed as enemies of the state, and shoots Cristo as he believed that the wine that he offered him was poisoned. When he looks in the mirror and sees only his own reflection, Clemente shoots himself. His reign lasted for only a week.
* The Twilight Zone (1959). As the Sales Supervisor Mr. Armbruster passes by Marsha's mannequin, he notices that it looks just like her and turns his head to look at it. He turns his head to face the audience and looks at them in astonishment. He turns back to look at the mannequin, turns back to the audience and gives them a bemused look, then walks away.
* The Twilight Zone (1959) at closing for years, but never following through.
* The Twilight Zone (1959) at him. He responds by throwing something at it, causing its face to seemingly break.
* The Twilight Zone (1959)", Aunt T is a sweet, kind-hearted elderly woman who adores children and is endlessly patient with them. Her realm is a paradise for children such as Sport and Jeb Sharewood whose parents are neglectful and do not deserve them. Although the children have to do chores, they spend a great deal of their time playing and helping Aunt T to make cakes.
* The Twilight Zone (1959)", Booth Templeton continually hearkens back to the 1920s when he was young and his beloved wife Laura and his best friend Barney Flueger were still alive to the point that he no longer lives in the present.
* The Twilight Zone (1959)", Booth Templeton's late wife Laura was one during the 1920s.
* The Twilight Zone (1959)", both Commissar Vassiloff and his assistant Boris are professional assassins. Vassiloff, who claims to have killed 800 people, likes to kill his victims with artistry and subtlety to prevent himself from becoming bored. He considers himself the last of the imaginative executioners. On the other hand, Boris prefers to kill as quickly and efficiently as possible. As such, he simply wants to shoot the defector Major Ivan Kuchenko in the head at the earliest opportunity. Vassiloff regards this less imaginative approach as the impatience of the bourgeois.
* The Twilight Zone (1959) but he is told that he is speaking their language as a result of unconscious transference, a type of hypnosis.
* The Twilight Zone (1959), but he's a brilliant designer. Also, he keeps bouncing around and never seems to focus on one subject.
* The Twilight Zone (1959)", Captain Farver repeatedly refers to his navigator Hatch as "Magellan."
* The Twilight Zone (1959) cemetery are completely cognizant, capable of talking and seek revenge on the people who originally killed them.
* The Twilight Zone (1959)", Charley Parkes' overbearing mother treats him as if he were a child, even untying his shoes for him when he prepares to go to bed. His sister Myra Russell tells him that he is living the same way that he did when he was 14 years old even though he is in his 30s. She believes that it is sick and partly blames their mother for the fact that Charley is socially underdeveloped.
* The Twilight Zone (1959)", Charley Parkes' sister Myra Russell sets him up on a blind date with her co-worker Harriet Gunderson as she believes that he needs a girl to bring him out of his shell and make him less introverted. It does not go according to plan as Charley thinks that Harriet is being too forward, accidentally knocking her to the ground when she kisses him.
* The Twilight Zone (1959)", Colonel Cook is able to communicate with his home base 4.3 light years away in real time.
* The Twilight Zone (1959) commanded by Colonel Sloane arrives on the planet V9-Gamma in order to bring its 187 inhabitants back to Earth. The settlement's leader Captain William Benteen decides to stay behind. It is also mentioned that Los Angeles is the biggest city in the world.
* The Twilight Zone (1959)", Commander Douglas Stansfield and Sandra Horn meet when she drops her papers and he helps her to pick them up.
* The Twilight Zone (1959) discovers that the clock ringing is the one that he destroyed the innards of yesterday.

* The Twilight Zone (1959)", Dr. Bill Stockton's neighbors fashion one together to break into his bomb shelter. Immediately after they break the shelter's door down, they learn from a CONELRAD broadcast that the unidentified objects were satellites as opposed to missiles.
* The Twilight Zone (1959)", Dr. Stillman creates a robot named Casey and offers his services as a pitcher to the Hoboken Zephyrs, an extremely unsuccessful major league baseball team. Casey's amazing pitching abilities turn the team's fortunes around, at least until he has a heart installed and cannot bring himself to hurt the feelings or damage the careers of the players on the opposing teams.
* The Twilight Zone (1959) (due to the kiss), his screaming mouth zooming in and filling the frame with black.
* The Twilight Zone (1959)", Ellen Tillman is a nice, sweet girl who lives next door to the house that the aliens have rented. Scott soon falls in love with her.
* The Twilight Zone (1959) episode "A Nice Place to Visit". Henry Valentine's suite acts this way (including music starting automatically), but it's just for mood, because the woman concerned didn't need to be seduced.
* The Twilight Zone (1959) episode "A Passage for Trumpet". Joey Crown (Jack Klugman) thought he was dead and wandering the world as a ghost when he saw a full-length mirror next to a theater ticket booth. He saw the reflection of the girl in the ticket booth, but not his own reflection. The set designers built the set so it had two identical theater entrances, only one was reversed as a mirror image, with a pane of clear glass between them. The girl in the ticket booth was played by twins, one in the "real world" and one in the "reflection".
* The Twilight Zone (1959) episode "A Short Drink from a Certain Fountain," deals with the December part of a romance attempting to reverse the clock. It goes as well as one can expect.
* The Twilight Zone (1959) episode "Little Girl Lost", after pulling everyone out of the other dimension with moments to spare, someone observes, "Another few seconds, and half of you would've been here, and the other half..."
* The Twilight Zone (1959) episode "Living Doll" is kind as long as she's met with kindness. If she's not or a person who treats her with kindness is threatened, she proves capable of murder.
* The Twilight Zone (1959) episode "Long Live Walter Jameson". A man lives more than 2,400 years due to drinking an alchemical potion of immortality. When he's shot and mortally wounded, the effect wears off and he ages into dust in minutes.
* The Twilight Zone (1959) episode "Nightmare at 20,000 Feet" has one when the man decides to open the curtains, revealing the Gremlin's face right up against the window.
* The Twilight Zone (1959) episode "Perchance to Dream". Edward Hall tells the psychiatrist Dr. Rathmann that he once nearly got into a car accident because his overactive imagination led him to believe that he was living out one of these stories in real life. As he looked into his rearview mirror he thought he saw a pair of strange catlike eyes, something that distracted him enough to nearly hit another car.
* The Twilight Zone (1959) episode "Probe 7 - Over and Out" an astronaut crash-lands on an uninhabited planet after his homeworld has a nuclear war, and shortly after meets a woman in a similar situation. Their names turn out to be Adam and Eve.
* The Twilight Zone (1959) episode "Shadow Play". A man about to be executed, Adam Grant, believes that everything around him is a dream, and if he is executed, they will all cease to exist. A reporter convinces the prosecutor who convicted Grant that this belief means that Grant is insane and shouldn't be executed. The prosecutor calls the governor and gets a stay of execution, but the call to the prison arrives just after Grant has been executed. After Grant's death, the entire set fades to black. It fades in with a different cast of characters, except for the protagonist. Turns out Grant was right!
* The Twilight Zone (1959) episode "Static" featured a bitter, regretful old man who was able to pick up nostalgia-inducing radio signals from twenty years in the past. In the final scene, he discovers that he is a young man in that past again,

with a chance to try again.
* The Twilight Zone (1959) episode "The Encounter", a racist World War II veteran and a young Japanese-American man who came over to do housework are trapped in the veteran's attic by a samurai sword that belonged to a Japanese soldier the veteran killed. The sword bears an inscription "the sword will avenge me". And it does, as it brings out the darker sides of both men, culminating in a violent struggle that ends with the veteran accidentally impaled on the sword and the younger man throwing himself out the window in a fit of suicidal guilt.
* The Twilight Zone (1959) episode "The Man in the Bottle" depicts a couple who thanks to a genie get the chance to have four wishes granted. One of them is to get one million dollars. For a while they're rolling in it, but then an IRS agent shows up and confiscates 90% of it.
* The Twilight Zone (1959) episode "The Shelter"), the sci-fi and comics of the time practically LIVED on tropes related to nuclear apocalypse and radiation mutations, and many of Baby Boomer age still chuckle about the deadly-serious suggestion given in educational filmstrips that hiding under one's school desk was a viable way of avoiding a city-melting fireball. Science-fiction author Robert Heinlein deliberately fed the hysteria in a series of essays (see his collection "Expanded Universe") meant to scare people badly enough to get nukes banned. Didn't work, obviously, but a case could be made that he accidentally "created" survivalism.
* The Twilight Zone (1959)" episode, though it's a dream of Bart. Bart has that power and it goes pretty much like the original, only naturally less horrible. Then Bart gets therapy to get over whatever they called what he was doing (the forcing people to be happy, not the being all-mighty), which he does and develops a sane relationship with Homer. In the end they hug in sign of friendship, and then Bart wakes up, screaming in terror.
* The Twilight Zone (1959) episode "Will the Real Martian Please Stand Up" had this occur with an old-style jukebox, one with real records in it.
* The Twilight Zone (1959) faces off against a young wannabee named Pete Grant in a duel, both using a potion granting quick draw abilities. Both men manage to inflict hand injuries preventing each other from ever using guns again. Denton sees this as a blessing, as it will prevent either from engaging in any more reckless duels.
* The Twilight Zone (1959)", Farwell, DeCruz and Brooks discover that their fellow criminal Erbie has been reduced to a skeleton as a rock broke his suspended animation chamber years earlier. This provides proof that their plan was successful and it is now 2061.
* The Twilight Zone (1959) features a hit and run driver whose car comes to life, turning on its own radio, and moving on its own accord. Eventually it chases the man down the road, nearly hitting him, forcing the man to turn himself in to the police.
* The Twilight Zone (1959)" features a woman doing this when she meets Oliver Crangle, the early 1960s incarnation of a right-wing conspiracy theorist.
* The Twilight Zone (1959)", Fenton regularly makes bigoted remarks about Arthur Takamori's Japanese-American heritage and then claims that he was just joking when Arthur takes offense.
* The Twilight Zone (1959) flights. Mostly, the crews found this amusing.
* The Twilight Zone (1959) for their spaceships, notably in "The Invaders" and "Death Ship". One of these is smashed in "The Invaders". Fortunately, it's a breakaway replica and not the original used in preceding shots.
* The Twilight Zone (1959)", George P. Hanley's co-workers Ann and Roger Hackett and his boss E.L. Watson appear in each of his three fantasies in different roles. In the first fantasy, Ann is the glamorous film star Ann Alexandra and George's unfaithful wife, Roger is her co-star and lover and Watson is the film director. In the second fantasy, Ann is George's secretary, Roger is his chauffeur and Watson is the president of his alma mater. In the third fantasy, Ann is a woman who wants President Hanley to pardon her son for falling asleep on duty, Roger is a three-star general who warns him that he must attack the approaching alien ship and Watson is a member of his staff.

* The Twilight Zone (1959)", Gloria and Gil Sharewood are both extremely self-obsessed and show their children Sport and Jeb no affection. Gloria has to prompt Gil to dive for the kids when they vanish into the pool. She only worries about them once it looks like they might have drowned.
* The Twilight Zone (1959)", Gunter Lütze is put on trial by the ghosts of his victims at Dachau. He is found guilty and sentenced to a lifetime of insanity.
* The Twilight Zone (1959) had a few episodes about space travel which had this mixed in with then-current tech. Episode "Third from the Sun" contained a shapely rotary phone and a spaceship that navigated with a suspended model of itself (as if to show orientation).
* The Twilight Zone (1959) had taken a college teaching position by this time, which is why he doesn't appear on the same set as the actors during season four. Ratings were good enough to justify a fifth season, which brought the running time back to half an hour.
* The Twilight Zone (1959) has been mostly evacuated due to the extreme heat as people are looking for cooler regions elsewhere.
* The Twilight Zone (1959)", Helen Foley hears Markie creepily singing "Twinkle, Twinkle, Little Star" in her mind.
* The Twilight Zone (1959)", Henrietta Walker's house is a non-malicious example. Things in the house shift and turn between modern-day and older appliances. A grandfather clock that doesn't work suddenly works again, a non-functioning radio suddenly turns on and plays older music, and eventually, Henrietta Walker's ghost appears.
* The Twilight Zone (1959) in 1859 instructed them not to share their technology with the outside world until mankind learns the ways of peace.
* The Twilight Zone (1959)" in the air to prove to Agnes Grep that he is telling the truth about his identity.
* The Twilight Zone (1959): In the episode "A Game of Pool", Fats and Jesse call their shots in a game of pool. The most impressive shot is when Jesse calls the side pocket after bouncing off three banks and making it.
* The Twilight Zone (1959): In the episode "It's a Good Life", Dan's transformation into a jack-in-the-box by Anthony is depicted with a shadow.
* The Twilight Zone (1959): In the episode "Mr. Garrity and the Graves", Mr. Garrity tells the bartender that he brings back the dead for a living. The bartender promptly drops a full mug of beer.
* The Twilight Zone (1959): In the episode "The Lateness of the Hour", a woman discovers that she is really a robot built by her "parents". This knowledge drives her insane and her father reprograms her as a maid.
* The Twilight Zone (1959): In the first episode, "Where Is Everybody?", a man finds himself in an empty town. He's revealed to have hallucinated the whole thing during an exercise designed to replicate the feeling of isolation in outer space.
* The Twilight Zone (1959). In the TZ episode "Number Twelve Looks Just Like You" this is combined with not-officially-compulsory-but-strongly-encouraged plastic surgery.
* The Twilight Zone (1959) is a crime punishable by death. Wordsworth, being a devout Christian, has kept his hidden for twenty years.
* The Twilight Zone (1959) is famous for recycling pieces of the set. Some examples:
* The Twilight Zone (1959) is used by a professional gambler to win big at dice games and roulette in Las Vegas.
* The Twilight Zone (1959) is wrong after he falls in love with Ellen Tillman.
* The Twilight Zone (1959)", it is mentioned that Anthony set Teddy Reynolds on fire for thinking mean thoughts about him.
* The Twilight Zone (1959). It's heavily implied to be a Muramasa blade.
* The Twilight Zone (1959) it turns out it's all a scheme to make humans helpless and dependent so they can be bred as food stock.
* The Twilight Zone (1959) it with a more realistic facial disfigurement.
* The Twilight Zone (1959), kids who jump into a pool emerge from a pond, to live with a nice old woman. Once the kids do this, they can hear their parents arguing

become fainter and fainter, implying the portal is closing.
* The Twilight Zone (1959)", Liz Powell, who is in hospital for exhaustion, has a recurring nightmare in which she wakes up in her hospital room, accidentally breaks a glass of water and hears the sound of footsteps in the corridor. The footsteps belong to a nurse. Liz then takes an elevator down to the basement and arrives at the morgue, Room 22. The nurse comes out and says, "Room for one more, honey." Liz's doctor and her agent Barney Kamener try to convince her that it is nothing more than a delusion. After Liz is released from hospital, she is going to fly to Miami Beach for her next gig. However, she is startled when she is told that she will be flying on Flight 22. In her confusion, Liz bumps into a woman and breaks the vase that she is carrying, just as she broke the glass in her nightmare. As she prepares to board the plane, she notices that the stewardess is identical to the nurse. She says, "Room for one more, honey." Liz screams and races to the terminal. The plane takes off but explodes within seconds.
* The Twilight Zone (1959)", Marilyn Cuberle mentions electronic baseball and super soccer.
* The Twilight Zone (1959)", Mr. Death proves his identity by touching a plant and causing it to wilt and die.
* The Twilight Zone (1959). Not to mention by the time the audience learns this all of them are dead.
* The Twilight Zone (1959) on his wife Phyllis, Joe Britt punches her in front of an open window and she falls to her death. Although he had not intended to kill her, the glimpses of the future shown on his television indicate that he will be convicted of murder and executed for his crime.
* The Twilight Zone (1959) on which the will was based was a success. His niece still believes she can get the inheritance (specifically his money). If she'd decided it wasn't worth the perpetual misery of having to tend to his inventions, the state university would have ended up with much less than it's going to get.
* The Twilight Zone (1959)", Pedro immediately becomes friends with Williams because, as a mistreated orphan with no friends, he can relate to the stranger. Other than the doctor, he is the only person in Madeiro who believes that Williams is no threat to the village.
* The Twilight Zone (1959)", "pryekrasnyy," the Russian word for beautiful, is the only word that the woman says the entire episode.
* The Twilight Zone (1959) psychic and can communicate very well, but after they're killed in a fire, she is sent to live with foster parents who are unaware of her psychic abilities and try to get her to speak normally. At school, her teacher basically torments her and makes her life a living hell until she finally begins speaking. Another psychic couple shows up wanting to adopt her and continue developing her psychic powers, but the girl turns them away, saying she'd rather stay with her foster parents. As the couple leaves, they comment that it was just as well that she stayed behind, as her psychic abilities had been destroyed by the horrific treatment she'd received at the school. It is stated by pretty much every adult character that this is a happy ending for Ilsa, in spite of the fact that she was tormented at school and lost a paranormal ability in the process. (The author has claimed that her original parents treated her more as a science experiment than a daughter, but there's nothing in the final version of the story to suggest that.)
* The Twilight Zone (1959) pulls a bottle of the brandy out for Mr. Dundee, rattling both Mr. Dundee and the police officer with them. They both decide to spend Christmas indulging in the brandy.
* The Twilight Zone (1959) Rod Serling appears to give the story's closing narration.
* The Twilight Zone (1959)", Roswell G. Flemington is disturbed by the sound of water dripping in the middle of the night. This is the first indication that every sound has been magnified.
* The Twilight Zone (1959)", Sam Forstmann is convinced that he will die if his grandfather clock, which was given to his parents on the day that he was born, ever winds down as his father and grandfather had always told him as much. He becomes so obsessed with winding the clock that his granddaughter Marnie Kirk and her husband

Doug send him to a psychiatrist named Dr. Mel Avery. Shortly afterwards, Sam collapses when the pendulum briefly stops swinging. Several weeks later, Sam's spirit appears to leave his body after the clock winds down. However, he has come to realize that Marnie, Doug and Dr. Avery were right all along. He tells his "spirit" that he doesn't believe in him and therefore he doesn't exist. Sam then tells Marnie that when the old clock wound down for the last time, he was born again.
* The Twilight Zone (1959)'s "From Agnes - With Love": AGNES, a mainframe computer, falls in love with a programmer of the Mortimer Snerd stripe, who goes cackling insane in response to the machine's confession of her feelings.
* The Twilight Zone (1959). She reveals to him that her feelings for him were genuine.
* The Twilight Zone (1959)", Sheriff Koch is sympathetic to Luís Gallegos, who was sentenced to be hanged for running over the Canfield girl in his wagon while drunk. He chastises Sykes for taunting him and protects his father from the angry crowd. Koch is depressed by the thought of Gallegos being hanged and clearly believes that he does not deserve to be hanged but still performs his duty as laid down by the law.
* The Twilight Zone (1959)'s hypnotic voice doing the opening and closing narrations.
* The Twilight Zone (1959)'s knife, Martin Senescu buries her body under the basement floor.
* The Twilight Zone (1959)" takes place in real time as there are no discernible time skips in the narrative.
* The Twilight Zone (1959) that he calls them in the middle of the night and reads them the charges against them.
* The Twilight Zone (1959) that Mr. Renard has broken into his room and is waiting in a chair to talk to him.
* The Twilight Zone (1959), that she makes an old doctor wish that he were a young intern. He then laughs creepily. As she is leaving the hospital, he says that he hopes that she will be performing the next time that he sees her and that she will throw a wink in his direction.
* The Twilight Zone (1959) that worships a statue made of fissionable lead as its god.
* The Twilight Zone (1959), the agent, was fake, but the story was real. Two seconds later, however, Serling returns to complete the episode with his usual closing narration.
* The Twilight Zone (1959) the aliens' representative agrees to a polygraph test, after a few test questions suggest it works on him (i.e. "How did you come to this planet?" "I walked.") the alien claims that their intentions on Earth are solely to help humanity, and the polygraph reads it as truth.
* The Twilight Zone (1959)", the aliens use masks which perfectly hide their true appearance. Somerset Frisby shatters their leader's mask when he punches him in the face.
* The Twilight Zone (1959)", the android Alan Talbot frequently experiences uncontrollable urges to kill. He attacks his creator Walter Ryder, Jr. with a scissors and pushes an extremely persistent evangelist under a subway train.
* The Twilight Zone (1959): The android grandmother of "I Sing the Body Electric" hasn't a malevolent circuit in her body. Her directive and job is that of surrogate granny, and she is very good at the job.
* The Twilight Zone (1959): The episode "A Game of Pool" starts with one of these. The camera follows the ball's trajectory, then focuses on Jack Klugman's character's reaction to it.
* The Twilight Zone (1959): The episode "A Most Unusual Camera" features a camera that shows the future.
* The Twilight Zone (1959): The episode "A Quality of Mercy" begins with a lieutenant that has just graduated from the military academy, and is eager to make a name for himself during the last days of W.W.2 in the Philipines. He orders his men that they will assault a cave and kill every last Japanese defender, but his

senior-most N.C.O., a battle hardened sergeant, informs him that the Japanese soldiers have so far resisted being flushed out by an artillery barrage, and have repelled previous attacks, but the lieutenant orders the assault anyway.
* The Twilight Zone (1959): The episode "He's Alive" has it work for both good and bad. After Peter betrays his former friend Ernst and shoots him, Ernst warns him that the ideas he fought for - equality, freedom and justice - will not die by a single bullet. At the end, when Peter dies, his spirit advisor Hitler returns to the shadows to find another to guide. Rod Sterling then warns the audience that the ideas Hilter fought for - oppression, hatred and prejudice - are also ideas that will exist so long as people continue to allow them to.
* The Twilight Zone (1959)", the genie is an obnoxious loudmouth who smokes a cigar and dresses in contemporary clothes with the exception of "velveteen mukluks." He also offers George P. Hanley only one wish instead of the usual three.
* The Twilight Zone (1959)", the Kanamits provide every country on Earth with the technology to project a forcefield around their borders, ending the possibility of any nation attacking another.
* The Twilight Zone (1959)", the main character runs toward the camera.
* The Twilight Zone (1959)", the man and woman find discarded weapons and briefly point them at each other in spite of their attempts to get along.
* The Twilight Zone (1959)", the man revives the woman by throwing a bucket of water over her after knocking her out.
* The Twilight Zone (1959): "The Monsters Are Due On Maple Street". A street in a small town loses all power and use of their cars. Spurred on by a young boy's claims that this is a common comic book plot, they quickly suspect each other of being aliens. As riots break out, the audience learns that, no, none of the folks on Maple Street are aliens. The whole thing was set up by alien puppetmasters outside of town to trigger the riot, who comment on how easy conquering Earth this way is. Replace "aliens" with "terrorists" and "alien puppetmasters" with "US Army researchers", and you get the version used in the 2002 remake.
* The Twilight Zone (1959)", the New Life Corporation receptionist tells Mr. Vance that there is a call for him on the video phone.
* The Twilight Zone (1959)", the other dimension to which Tina Miller is sent is a bizarre, abstract realm which distorts perceptions. For instance, Tina's father Chris believed that he was standing upright in spite of the fact that his legs were still on the other side of the portal.
* The Twilight Zone (1959)", the radio of Robert Franklin's police car is rendered inoperable after the aliens turn the car over.
* The Twilight Zone (1959)", the soldiers from both armies were equipped with laser weapons, judging by the discarded rifles that the man and woman find.
* The Twilight Zone (1959)", the Soviet commissar Vassiloff tricks the defector Major Ivan Kuchenko into drinking wine mixed with a sleep drug by drinking first. He built up an immunity to the drug by repeatedly taking increasing doses over time.
* The Twilight Zone (1959)". The title character accidentally falls through a spontaneously appearing gate in the wall of her room and ends up in another dimension. Her parents and a family friend try desperately to get her back before the gate closes.
* The Twilight Zone (1959)", the titular character is a history professor who knows his stuff. He has a retiring colleague named Samuel Kittridge who comments on his appearance, and found Walter in a Civil War picture. Walter reveals that he is more than 2,000 years old.
* The Twilight Zone (1959). The townspeople are all keen to prevent the dead from returning to life as they fear the repercussions.
* The Twilight Zone (1959)", the vengeful spirit of Jess-Belle Stone possesses her love rival Ellwyn Glover soon after her wedding to Billy-Ben Turner.
* The Twilight Zone (1959). The Warden is finally convinced he must be insane and calls the Governor to ask for a stay. The stay comes too late, the electric chair is fired up, and we find he was right: everyone else dies, and his nightmare starts all over again.

* The Twilight Zone (1959)", the woman smiles when the man says that her dress is "pryekrasnyy," meaning "beautiful."
* The Twilight Zone (1959), though this turns out to be nothing but a fantasy that Smithers has on an almost daily basis.
* The Twilight Zone (1959) to be found in some episodes though, so it varies from episode to episode.
* The Twilight Zone (1959)". Two different actresses played the main character, one with the bandages on and one with them off. The latter actress was told that they'd dub in the former's voice after filming... but she was on set during the filming of the bandaged scenes, and as a result she managed to mimic the other actress's voice well enough that they didn't need to.
* The Twilight Zone (1959)'': Two people try to drive home drunk. When they wake up the next morning, they're in a completely deserted town.
* The Twilight Zone (1959) type wishes. The third wish is to become the ruler of a country who can't be overthrown, so the genie turns him into Hitler at the end of World War II. The man's last wish is that all of the previously granted wishes be canceled.
* The Twilight Zone (1959)" used the KL-5 variant. Miss Elva Keene's phone number is KL5-2368.
* The Twilight Zone (1959) used this a few times with various different groups and planets, sometimes Nazis, sometimes communists.
* The Twilight Zone (1959) uses it with the 7'2" Richard Kiel to push him past any remotely possible human height as an alien in the episode "To Serve Man."
* The Twilight Zone (1959)", Walter Ryder, Jr. shows Alan Talbot the two failed prototypes in his quest to create an android: Alan Talbot 1 and Alan Talbot 2. It turns out that Alan is flawed himself due to his frequent homicidal urges.
* The Twilight Zone (1959) was shilling Chesterfield Cigarettes (with mild filters, not mildly filtered) to the audience after telling them about next week’s show.
* The Twilight Zone (1959)" was supposed to air on November 25, 1963 but it was delayed for a week due to the coverage of President Kennedy's state funeral.
* The Twilight Zone (1959)". When Colonel Cook's superior General Larrabee ends his radio communication with Cook, he says "Over to you, and out", an example of incorrect radio protocol.
* The Twilight Zone (1959) where everyone is beautiful, completely healthy and young due to the advances made in science. While Marilyn Cumberle does not want the transformation, she does admit that she'd like to be young and healthy without having her physical appearance altered if it were possible.
* The Twilight Zone (1959) where "normal" people wouldn't have to look at or think about them. The act of even suggesting that things shouldn't be this way was vilified as treason. The twist being that in their society, "normal" people have snouts and pig-like faces, but "ugly" people are attractive by our standards.
* The Twilight Zone (1959) which can't be seen by their parents Gil and Gloria. In the past, other children have been able to travel there through chimneys or by going through doors.
* The Twilight Zone (1959)", while playing softball with Jenny and other neighborhood children, Ben uses his alien abilities to hit the ball over the fence with little to no effort.
* The Twilight Zone (1959) who covered his third eye to pass as an Earthling for sinister purposes. (It's on his forehead, in the original short story it was on the back of his head and normally covered by hair.)
* The Twilight Zone (1959)", Williams tells the mob that he has come to Earth in peace shortly before they kill him. Similarly, the document that he gave to Pedro says, "We come as friends and in peace."
* The Twilight Zone (1985) a comic book, which he has done several times before. However, Lou hates himself for doing it and breaks down in tears as soon as Gus leaves the room. His wife Sarita tries to console him by saying that it is the only way that Gus will learn.
* The Twilight Zone (1985) after all when he sees him again as an adult. Mike tells

Alex that he got the image that he is using from Alex's mind when he was a child.
* The Twilight Zone (1985) after she burns his eggs. He tells her that it was her own fault and calls her a crybaby for making a big deal out of it.
* The Twilight Zone (1985) after she runs out of Aqua Vita, which she can no longer afford due to the exorbitant price of $5,000 per bottle. Although she is only 40, she appears to be in her 70s. Her boyfriend Marc assures her that he loves her no matter what but Christie is concerned that this may change when people start to give them strange looks because of their apparent age gap. In order to set Christie's mind at rest, Marc drinks some Aqua Vita and soon appears to be the same age as her.
* The Twilight Zone (1985) after three years of searching, Mrs. Whitford finds it in Fort Lauderdale and an elderly man simply found himself there after a doctor's appointment. The emporium contains lost hopes, dreams, chances and attributes that people seek to regain. David Wong is searching for his compassion, Melinda for her sense of humor, Mrs. Whitford for lost time and the elderly man for the respect of his children. Each lost attribute appears in a glowing ball, which everyone except the intended recipient can see, and takes the form of a physical object or animal. The recipients must follow the instructions on the label to benefit from it.
* The Twilight Zone (1985), a future society uses genetically modified primates as telepathic CPUs. Members of this society call their organic technology a "biological gestalt".
* The Twilight Zone (1985), a group of neighborhood men play poker against the devil, who keeps winning with triple 6's. So for a final hand, double or nothing to get back the souls lost, they play lowball, where the devil's typical hands, of course, lose. The Devil smiles and gives them back everything they've lost. Further, charmed by their pluck, he fills the fridge with beer and snacks they were too poor to afford for their game.
* The Twilight Zone (1985). A man is punished for "coldness" by becoming a pariah whom no one is allowed to acknowledge. Eventually he serves out his sentence and is allowed to reenter society. But when he sees someone being punished in the same way, he now has too much compassion and empathy to ignore them, which leads to another punishment.
* The Twilight Zone (1985): An averted, non-pilot example, in the episode "A Little Peace and Quiet." In the final scene, nuclear war has broken out between the Soviet Union and the United States, and a radio newscaster — who would normally be calm even in the presence of imminent death — is clearly losing his efforts to keep calm as he advises the public as to the warning. He is starting to cry and say his goodbyes as the protagonist (a harried housewife who had found an amulet that can stop time) manages to freeze time shortly before she is killed in a nuclear explosion.
* The Twilight Zone (1985) and his guilt forces Alonzo to relive the experience.
* The Twilight Zone (1985) and spending a month living in the outside world, Marsha Cole doesn't want to give up her new life as a human. However, she is ultimately forced to do so by the other mannequins so that one of them can have a turn.
* The Twilight Zone (1985) and tells her that John was only thinking of her and how much he hurt her in what he thought would be his last moments. After John is located using the information in Ray's letter, Melissa is delighted to see him. She tearfully accepts his now much more heartfelt apology and takes him home.
* The Twilight Zone (1985) and that Martha did the same thing to Diane and then assumed her identity. Selena tells him that it is the way of their family for the older generation, when nearing death, to drain the energy of the younger one. After Selena is killed in the fire accidentally started by Diane, Debra's youth is restored.
* The Twilight Zone (1985). A young married couple woke to find numerous faceless workers in blue coveralls disassembling their home around them. It turns out that they are the beings responsible for breaking down the minute that has just passed in order to re-use the raw materials to build the minute yet to come. (They actually work with a few hours worth of buffer as a safety factor.) On occasion the time workers muff their stage directions, which is why your car keys will be

missing one minute, and back where you left them the next. It's explained that the viewpoint couple have dropped out of sync with their own timeframe, necessitating their disappearance from reality. (It's implied that this has happened to individuals such as Amelia Earhart, Judge Crater and Jimmy Hoffa.)
* The Twilight Zone (1985) because he was recently told that he was too old to be a test pilot and hated the idea of being a desk jockey.
* The Twilight Zone (1985) before he was famous in Memphis, Tennessee in 1954. He later realizes that he has been sent back in time.
* The Twilight Zone (1985) be rescinded. The others agree, though reluctantly in Grant's case.
* The Twilight Zone (1985) body resembling a man in his late 30s. As such, he looks more than ten years younger than his 50-year-old son Michael.
* The Twilight Zone (1985) but Serling received the story credit when it was made in 1988, 13 years after his death.
* The Twilight Zone (1985): Canadian Page Fletcher as the Frenchman Guillaume de Marchaux in "Cat and Mouse".
* The Twilight Zone (1985) Chin Du Long grew to like them and arranged to spare them from death.
* The Twilight Zone (1985) created by genetically engineering chimpanzees and orangutans through increasing their intelligence by a factor of 20. Each augmented ape performs a specific function. All available knowledge is stored in their brains and accessible to anyone who requires it. Telepathic humans make contact with the apes at an early age and give them the choice of either living a normal life or becoming part of the collective computer brain.
* The Twilight Zone (1985) discovers a vault on the outermost planet of a solar system which was destroyed by its sun going nova in 3120 BCE. It was created by a civilization that lived on one of the other planets in order to preserve their history, scientific knowledge, art, literature and music. They did this so that their legacy could survive even if they themselves could not.
* The Twilight Zone (1985)", Dr. Myron Mandel tells the blonde and beautiful Lydia Bixby that he is going to kill himself and to have a nice day. Her only reaction is to wish him a nice day too.
* The Twilight Zone (1985) episode "A Little Peace and Quiet", a harried housewife finds a magic sundial that allows her to stop and restart time. She uses it to literally make time for herself, enjoying a peaceful breakfast or leisurely shopping for groceries while time is stopped for everyone else. Everything is perfect until nuclear war breaks out and she stops time while a missile is 10 feet above her head. She will have to choose between dying with everyone else and living her life forever trapped between two instants of time.
* The Twilight Zone (1985) episode "Healer" as he is in the original but he still has a conscience. In the episode, Harry refuses to use the stone to heal Jackie Thompson's gunshot wound since he wants all of the money that they have made for himself. In the short story, Harry makes a genuine effort to heal Jackie but he becomes scared and runs away, promising to call an ambulance as he does so.
* The Twilight Zone (1985) episode "Healer" omits Duende, the Mexican man who warns Jackie Thompson that he is misusing the healing stone.
* The Twilight Zone (1985) episode "Healer", the mob boss Joseph Rubello has a bad heart which Jackie Thompson is unable to heal as he has begun using the healing stone for selfish purposes. In spite of this, Rubello is still alive when he is last seen. In the short story adaptation by Alan Brennert, Jackie is able to heal Rubello in the short term but his heart problems return and he dies two weeks later.
* The Twilight Zone (1985) episode "Need to Know" concerns a phrase which passes from person to person like a disease, explains the meaning of existence and drives a small town mad.
* The Twilight Zone (1985) episode "The Curious Case of Edgar Witherspoon". A man must maintain a patchwork contraption to keep the world stable. He's eventually replaced by another man who becomes fascinated by the machine.
* The Twilight Zone (1985) episode "To See The Invisible Man" had floating security

drones used to watch for people breaking laws.
* The Twilight Zone (1985) every year, and that they must keep their bloodlines strong in order to serve him. After Dr. Dennis Barrows saves the intended victim, a little girl named Katie, he is killed by the townspeople in order to placate Seth.
* The Twilight Zone (1985) Harry Folger enjoys having restaurants shut down with his scathing reviews. He is shown to be an extremely unethical journalist when he begins writing a negative review of Mr. Lee's Chinese Cuisine before he visits it. He gives it the title "If you love your Pekingese, don't ask for a doggie bag." When he does later visit it, he orders a great deal of food but demands to be brought his check without touching any of it. His bad review of the restaurant is published in the next day's paper, causing Mr. Lee to lose many of his customers.
* The Twilight Zone (1985) has "A Little Peace and Quiet", in which a woman finds a pearl necklace that can stop time, like in the old TZ, but uses it to stop time immediately before Soviet missiles impact her town, leaving her with a choice of being permanently stuck in a frozen world or starting time again only to be vaporized.
* The Twilight Zone (1985) hate the Soviet Union and everything that it stands for. They believe that Communism has brought nothing but pain, suffering and death to the Russian people and seek to destroy the USSR for the sake of humans and vampires alike.
* The Twilight Zone (1985), he asks the spirit of her husband why he called him into the dream. Her husband replies, "I think you know." The next morning in the real world, Roger dons a nice suit and takes Laurel to breakfast.
* The Twilight Zone (1985), he berates an employee because a junior salesman accidentally sold the custom made fur coat that he intended to give his wife for Christmas and demands that both of them be in his office at 9 o'clock on Christmas Day. This version of Dundee clearly hates Christmas and sees it merely as an opportunity to make money. When another employee wishes him Merry Christmas, he pointedly says "Good night." As he leaves his store on Christmas Eve, he even kicks a tree. Most significantly, this Dundee is a racist. He comments that it would not surprise him in the least if Henderson, an African-American security guard, helped Henry Corwin to sneak the allegedly stolen merchandise out of his store. His expression and Henderson's reaction make it clear that it was intended as a racist remark.
* The Twilight Zone (1985). He speculates that it has something to do with the light frequency. The aliens are also unable to bend their little fingers when they are in human form.
* The Twilight Zone (1985). His new agent Max tells him that he has been booked to perform this act for the next two eons, possibly more.
* The Twilight Zone (1985) husband Harry having been buried alive when their home town of Dunston, Kansas was destroyed by the accidental detonation of a nuclear cruise missile.
* The Twilight Zone (1985) in 2023 as they did not want the cycle of war to start all over again. When Matthew discovers the truth, he attempts to stop the satellite from firing but Sarah stops him by sabotaging the computer and the ship is destroyed.
* The Twilight Zone (1985) in "Act Break". Maury Winkler and Harry are writing a play in which an English aristocrat named Roger kills a woman named Ethel but they can't decide how he should do it. Harry suggests throwing her out the window. When Maury says that people don't die from being thrown out of first story windows, Harry thinks that she should fall into a swimming pool that is being renovated. They eventually agree that Roger should strangle Ethel.
* The Twilight Zone (1985): In "A Matter of Minutes", every minute is built by faceless blue construction workers who are seemingly incapable of speech.
* The Twilight Zone (1985): In "Cat and Mouse", Guillaume de Marchaux describes himself as having a great talent for making love. He has spent centuries going from woman to woman, never spending more than a few days with one before getting bored.
* The Twilight Zone (1985): In "Children's Zoo", Debbie Cunningham never speaks but all indications are that she can.

* The Twilight Zone (1985): In "Crazy as a Soup Sandwich", Cassandra Fishbein threatens to call the cops if the mob boss Nino Lancaster and his henchmen Gus and Bork don't leave her hairdressing salon. Nino advises against it as most of them work for him.
* The Twilight Zone (1985): In "Dead Woman's Shoes", Kyle Montgomery murdered his wife Susan by pushing her off a balcony. He later told the police that it was an accident and she fell to her death because she was drunk.
* The Twilight Zone (1985): In "Dream Me a Life", Roger Simpson Leeds is still devastated by the death of his beloved wife Rachel three years earlier. He makes little to no effort to interact with his close friend Frank, their fellow retirement home residents, or even his children and grandchildren. Frank takes every opportunity to try and bring him out of his shell, inviting him to play poker every night, but Roger always turns him down. The experience of helping Laurel Kincaid overcome her grief at her husband's death in her dream allows him to do the same thing. As a result, Roger gains a new lease on life.
* The Twilight Zone (1985): In "Dreams for Sale", Jenny decides to remain in the "Country Picnic" program created by the Dreamatron in which she is happily married to Paul and has two daughters instead of returning to her real life as a worker in a sterile future world. She tells Paul that she wants to stay with him forever. The Dreamatron burns out and she dies with a smile on her face, though her mind seemingly survives in the machine.
* The Twilight Zone (1985): In "Examination Day", Dickie Jordan is given a truth serum to ensure that he answers all of the questions on the government intelligence test as truthfully as possible.
* The Twilight Zone (1985): In "Extra Innings", Ed Hamner was a pitcher for the Detriot Tigers until he severely injured his left knee during a game, giving him a permanent limp.
* The Twilight Zone (1985): In "Father & Son Game", over 50% of Darius Stephens' new body consists of machinery. Almost all of his major organs, including his brain, are artificial. This creates problems for Darius as there is no legal precedent for a person with an artificial brain to be considered alive.
* The Twilight Zone (1985): In "Gramma", a young boy named Georgie has his body stolen by his monstrous bed-ridden witch-grandmother.
* The Twilight Zone (1985): In "Gramma", a young boy named Georgie has to spend a night watching over his monstrous bed-ridden witch-grandmother.
* The Twilight Zone (1985): In "Lost and Found", the two time travelers from 2139 wear shiny, silver clothes that look as if they are made out of foil.
* The Twilight Zone (1985): In "Need to Know", Jack Henries begins to laugh hysterically when Wiley Whitlow tells him the meaning of life, which causes insanity in anyone who hears it. Jack then breaks into tears just as quickly as he started to laugh.
* The Twilight Zone (1985) in October 1948. In the altered history, she becomes a highly successful singer. The Prince of Darkness admits that this was his plan all along as he is a sculptor of possibilities who could not bear the idea of the world losing a talent like Teresa's at 16.
* The Twilight Zone (1985) in order to become young again. Her sister Martha previously did the same thing to her own daughter Diane.
* The Twilight Zone (1985) in order to protect the townspeople from his brutal excesses. Mayor Titov tells KGB Colonel Ilyanov that Borisov was torn apart by wolves but he later learns the truth.
* The Twilight Zone (1985): In "Paladin of the Lost Hour", the entire universe will be engulfed in darkness if Gaspar's watch strikes 12 o'clock.
* The Twilight Zone (1985): In "Private Channel", Keith Barnes is able to read Mr. Williams' mind using his Walkman and learns that he intends to blow up the plane because the company negligently caused a crash in which his wife and daughter were killed.
* The Twilight Zone (1985): In "Quarantine", a nuclear holocaust occurred in 2043 when each side fired six missiles at the other. 80% of the world's population were wiped out and all of the major cities were destroyed. By 2347, Earth has a

population of only 200,000.
* The Twilight Zone (1985): In "Room 2426", the theoretical biochemist Dr. Martin Decker has developed a new strain of bacteria which he had hoped to use to eliminate famine. However, the State intends to use it as a bioweapon to completely destroy its enemies, potentially wiping out millions of lives, but they cannot do so without the notebooks that Martin has hidden. Martin tells his torturer Dr. Ostroff that he believes that new discoveries are innately valuable and it had never occurred to him that his discovery could be used against humans.
* The Twilight Zone (1985): In "Room 2426", the titular location is a torture chamber where prisoners such as Dr. Martin Decker are taken when they have information that the State wants. In Martin's case, the location of the notebooks detailing his research into a new bacteria strain.
* The Twilight Zone (1985): In "Shelter Skelter", Harry Dobbs openly favors his son Jason over his daughter Deidre. While he spends a great deal of time with Jason in his attempts to turn him into a man, he barely even acknowledges Deidre's existence. When he thinks that a nuclear war is about to break out, he calls his wife Sally and demands that she send Jason home so that he can survive in his new fallout shelter. He makes no mention of Deidre.
* The Twilight Zone (1985): In "Song of the Younger World", Tanner Smith is an inmate at the House of Refuge Reformatory for Wayward Boys. Its superintendent Mordecai Hawkline beats him severely when he finds him with his daughter Amy. He later tells Amy that Tanner and the other boys are scum, animals, beasts who must be caged away from decent society. After Tanner tries to kill him as he thinks that Amy is dead, Mordecai has his men put him in a cell called the Hole and bind him in a full body straitjacket.
* The Twilight Zone (1985): In "Special Service", one of John Selig's biggest fans enters the JSTV executive Arthur Spence's office through the window and tells John that she wants to have his baby or at least a lock of his hair. John just about manages to get away from her.
* The Twilight Zone (1985): In "Stranger in Possum Meadows", Scout belongs to a race of shapeshifters. In his report to his home planet, he says that it was easy for him to assume a human form.
* The Twilight Zone (1985): In "The Beacon", the people of Mellweather have worshipped a lighthouse called the Beacon for 200 years. They believe that it is controlled by the spirit of their collective ancestor Seth Janes.
* The Twilight Zone (1985): In "The Card", a compulsive spender named Linda Wolfe is given a strangely accessible credit card only to find out the consequences of not covering her purchases when the company first repossesses her pets Boris and Scooby and then her children Matt, Evan and B.J., who don't even remember who she is. She desperately tries to buy them back using her joint checking account, but her husband Brian cancels the payment thinking she's lost her mind because he doesn't remember their kids. With the checks bounced, the episode ends with Linda unable to do anything but watch helplessly as Brian, her home, her entire life and eventually she herself are repossessed from the face of the Earth, leaving not a trace save for the credit card.
* The Twilight Zone (1985): In "The Cold Equations", Marilyn Lee Cross must be jettisoned into space after she stows away on the Emergency Dispatch Ship because her added weight means the ship doesn't have enough fuel to land safely at its destination Woden.
* The Twilight Zone (1985): In "The Cold Equations", Marilyn Lee Cross was studying linguistics on Mimir before she stowed away aboard an Emergency Dispatch Ship bound for Woden.
* The Twilight Zone (1985): In "The Convict's Piano", Ricky Frost was wrongfully convicted of the murder of his ex-girlfriend because her body was found in a car that had been stolen from him.
* The Twilight Zone (1985): In "The Convict's Piano", the gangster Mickey Shaughnessy's girlfriend Ellen is a flapper who is seen on his arm at a party in 1928.
* The Twilight Zone (1985): In "The Convict's Piano", whenever Ricky Frost travels

back in time by playing the old piano, he is gone for the equivalent amount of time in 1986.
* The Twilight Zone (1985): In "The Hunters", a young boy named Steve is walking through a field when he steps on an area of soft ground and falls through the earth. In the process, he discovers a prehistoric cave which has been undisturbed for 12,000 years. Dr. Klein later describes it as one of the most important archaeological discoveries of the century.
* The Twilight Zone (1985): In "The Junction", Ray Dobson, a miner from 1912, is amazed by the 1986 miner John Parker's digital watch, the flashlight on his helmet and his lighter. Ray's reaction to these items helps John to realize that he has been sent back in time.
* The Twilight Zone (1985): In "The Junction", Ray Dobson tells John Parker that he meant to propose to Abby, who had an identical twin sister named Sarah, in 1907. However, Sarah opened the door when he came to visit and, having mistaken her for Abby, he proposed to her by mistake and she accepted. Although it was not his intention, Ray nevertheless married Sarah as she was the one who said yes.
* The Twilight Zone (1985): In "The Trunk", Candy asks the shy, withdrawn Hotel Winchester manager Willy Gardner for a date in front of her boyfriend Danny and his fellow hoodlums Rocco and Cap. Willy is surprised as she barely ever speaks to him but he nevertheless accepts. When he does so, Candy tells him that he'll need to pay her $50. She and the three hoodlums then have a good laugh at Willy's expense.
* The Twilight Zone (1985): In "The Wall", Major Alex McAndrews joined the military in order to defend the US and its citizens, as his father and grandfather did before him.
* The Twilight Zone (1985): In "The Wall", Major Alex McAndrews' wife Sarah left him as he was so committed to the Air Force and the principles of honor, duty, and integrity that he completely ignored her. She told him that she did not believe in bigamy.
* The Twilight Zone (1985): In "The World Next Door", Barney Schlessinger spends all of his free time in his basement building impractical inventions such as a wind-up mechanical orchid and a missile used to kill mice. The mouse missile worked as it should but it left small mouse parts everywhere.
* The Twilight Zone (1985): In "Time and Teresa Golowitz", Bluestone's mind is sent back in time to the body of his 16-year-old self in October 1948.
* The Twilight Zone (1985): In "To See the Invisible Man", floating security bots monitor Mitchell Chaplin and other invisible people to ensure that no one violates Citizen's Law 24824 and interacts with them.
* The Twilight Zone (1985): In "Voices in the Earth", the ghosts of the dead Earth tell Professor Donald Knowles that they have the power to restore Earth's biosphere. However, they are reluctant to do so as the process requires a great deal of energy and could destroy what is left of their consciousness. Knowles accuses them of being cowards, just like the people who made Earth uninhabitable in the first place. This appears to shame the ghosts into doing the right thing as the biosphere is restored and the first signs of life are detected in the oceans. As the ghosts were able to accelerate evolution, Earth will soon be teeming with life again.
* The Twilight Zone (1985): In "Wordplay", Bill Lowery develops aphasia and gradually loses the ability to communicate with other people. The first indication of his condition is his wife Kathy telling him about a doctor named Bumper. He comments on his unusual name but thinks nothing more about it. When his neighbor Mr. Miller refers to his dog as an encyclopedia, Bill thinks that it is a practical joke. However, he becomes agitated when the mailroom attendant Robbie asks his advice on where to take Barbie for "dinosaur." Bill assumes that it is some sort of New Wave slang until he goes home and Kathy uses the same word. By the time that he goes to work the next morning, he cannot understand anyone and he is equally incomprehensible to everyone else. This presents problems when his young son Donnie has to be rushed to the emergency room. After Donnie is successfully treated, Bill has to learn the new language. He picks up one of his son's ABC books and sees that the new word for dog is "Wednesday." Other new words include "mayonnaise" for

"experience," "trumpets" for "tricks," "throwrug" for "anniversary," "stepdad" for "seatbelt" and "elephant" for "emergency." Bill's own name is Hinge Thunder.
* The Twilight Zone (1985): In "Ye Gods", Cupid sprinkles Todd Ettinger and a woman whom he has just bumped into with magic dust so that they fall instantly in love with each other. He later strikes Todd with his arrow three times so that his feelings for the woman will intensify.
* The Twilight Zone (1985): In "Ye Gods", Todd Ettinger and the woman with whom Cupid makes him fall in love first meet when they bump into each other at the reception of an outdoor café. At the end of the episode, they meet again when the woman crashes her car into Todd's. Having realized that they are meant to be together, they kiss in the middle of the street.
* The Twilight Zone (1985): Like his character Roger Simpson Leeds in "Dream Me a Life", Eddie Albert was an elderly widower whose wife died three years earlier.
* The Twilight Zone (1985) live over the air, but his voice is trembling as the threat of the missiles becomes more imminent. (For instance, the alert is supposed to provide instructions of going to the nearest shelter, but he says, "What's the point? It's over! We're finished!" A few seconds later, he begins trembling when he notes that "Soviet missiles have entered U.S. airspace."
* The Twilight Zone (1985) Mike is able to conjure up images of horses and race cars for them to play with. Jeff wonders how this is possible but Mike tells him that he can't tell anyone about it or they won't be able to play together anymore.
* The Twilight Zone (1985)", Penny just about resists the temptation to pull down a passerby's shorts when time is frozen. Later, she is annoyed by two anti-nuclear activists who call at her house. After she freezes time again, she drags them over to her lawn and lies them down. When time is resumed, they are too frightened to try talking to her again.
* The Twilight Zone (1985)", Peter Jay Novins tests his alter ego's claim to be him by asking him what his childhood friend Skip Fisher's father did for a living. He correctly answers that he was a fireman until he quit his job to work at a Studebaker dealership.
* The Twilight Zone (1985) prehistoric cave paintings stabbing her with spears.
* The Twilight Zone (1985), receives an invitation to the Children's Zoo. Her parents take her to the zoo, very reluctantly, only to discover that it is a zoo where bad parents are imprisoned after being brought there by their children. Debbie inspects five pairs of parents in locked rooms before deciding on the two that she wants to become her new parents.
* The Twilight Zone (1985) revival, "Love is Blind", this is part of the big twist: it turns out the protagonist's wife isn't seeing another man, she's meeting with an old friend to try and decide what to get for the protagonist's birthday. If the stranger of the story hadn't intervened, the protagonist would have shot her.
* The Twilight Zone (1985), saying "dinosaur" when they mean "lunch". More and more words get replaced, until other people's speech becomes complete gibberish to him. He ends up having to re-learn the meaning of words out of a children's book.
* The Twilight Zone (1985). She is very happy that she can share the beauty and peace of death with others.
* The Twilight Zone (1985). Since the secret is out, they don't need to hide anymore.
* The Twilight Zone (1985) that her husband Ira carries around with him as she thinks that she looked like a bag lady.
* The Twilight Zone (1985). The alternate Jeff is delighted to see her alive and married to his counterpart in our universe in 1986.
* The Twilight Zone (1985): The episode "Voices in the Earth". All life on Earth was wiped out and the planet made uninhabitable by a disaster a thousand years ago, including changing the atmosphere to methane. At the end of the episode a group of ghosts restores the biosphere, including changing the air back to normal, recreating life in the oceans and accelerating its evolution.
* The Twilight Zone (1985), the foreman of a group of people (played by Adolph Caesar) takes time to explain to a couple who ended up 'outside time' how time really worked, even showing them an animated computer graphic prepared for such an

event.
* The Twilight Zone (1985). The male time traveler returns the mug as they were only supposed to take things that Jenny wouldn't miss.
* The Twilight Zone (1985). There is no life on the planet, not even amino acids in the oceans. A ship commanded by Jacinda Carlyle is sent to Earth to strip mine its few remaining resources. Except for historians such as Professor Donald Knowles, few humans have any affection for their ancestral home. Archer notes that its name comes from one of the dead languages.
* The Twilight Zone (1985). Todd Ettinger realizes that the only way that he can either meet the woman with whom Cupid has made him fall in love or have his intense love for her lifted is to help Cupid and Megaera patch up their differences. When he lures the two of them into his office and traps them there with a smell given to him by Baachus, Cupid apologizes and they resume their relationship. As a reward, Cupid arranges for Todd to run into the woman once again.
* The Twilight Zone (1985) two years ago. However, viewers eventually became bored of watching him look for work and ratings began to slip so JSTV arranged for him to get a new job.
* The Twilight Zone (1985) video to change the world around him, including giving them the heads of a lizard and a wolf.
* The Twilight Zone (1985) video. When his mother tells him to come inside before the sun goes down, he asks her which one.
* The Twilight Zone (1985). When Roger and Will call the elevator in their father's factory, the giant spider grabs them with its pedipalps and kills them.
* The Twilight Zone (1985). When the sheriff enters and discovers her body, he sees that the figures moving on the walls before his eyes. Dr. Klein's body then disappears from the cave and a figure representing it appears on one of the walls. In order to defeat the threat posed by the ghosts of the prehistoric hunters, the sheriff washes the figures away.
* The Twilight Zone (1985), where he is the laughingstock of his town. According to the closing narration, he brings shamrocks with him and plants them on the aliens' home planet, which humanity will find when it explores space in the future.
* The Twilight Zone (1985) where the people live a simple, agrarian existence free of the social problems that plague Earth. The US government hopes to use the Gate in order to launch preemptive strikes on its enemies. Although the Gate is constantly visible on Earth, the refraction of light on the other planet means that it can only be seen at night.
* The Twilight Zone (1985), who wrote the short story on which it is based.
* The Twilight Zone (2002) as the host, etc). It only lasted one season, presumably because the changes scared away some white viewers but weren't enough to attract UPN's usual demographic.
* The Twilight Zone (2002)" had the neighborhood on Maple Street be paranoid over a terrorist attack rather than an alien invasion like in the original. Besides that the plot was mostly unchanged.
* The Twilight Zone (2002): In "Fair Warning" it turns out that the man speaking with Tina was actually his conscience, warning her against his plan to attack her.
* The Twilight Zone (2002) is infinitely worse than killing someone once.
* The Twilight Zone (2002), leaving them to wonder if they killed their friend for no reason.
* The Twilight Zone (2002) was actually one of those, although he himself wasn't aware of that. The original baby Adolf was killed by his time-traveling nanny. However, the other nanny grabbed the nearest available baby (that of a homeless Roma) and passed it off to Adolf's father as his son. He bought it. So yes, Hitler was one of the so-called "lesser races" he hated so much.
* The Twilight Zone (2002) was much more into cruel endings than karmic ones.
* The Twilight Zone (2019)" Claudia realizes how uninhibited Mark has become after rejecting him and he reacts with hostility. Mark then openly says he could kill her as the day will just reset. By now, he's gotten her alone in a fairly isolated part of the museum they're visiting too...
* The Twilight Zone (2019)" Madison threatens to expose a teacher's gambling

problem so she won't get punished for being out after curfew along with Irene.
* The Twilight Zone (2019)" Phil and Annie's minds are linked, with both of them being able to hear each others' thoughts. However, they have to intend for this and specifically think of the other person.
* The Twilight Zone (2019): "The Comedian". Whenever a stand-up comic mentions something connected to his personal life during his routine, it instantly disappears from existence. At the end, he decides to talk about himself during his routine. He disappears, and since he never existed, everything and everyone he erased is brought back.
* The Twilight Zone (2019)" this is what happened to Phil when Annie uses him to kill her abusive husband.
* The Twilight Zone (2019) was a bank robber who discovered he could do this while in the middle of the robbery and had to use this ability to get away with his loot, leaving a bunch of bewildered cops and body-swapped victims in his wake.
* The Twilight Zone: A man can find no time to read in peace, but when an apocalyptic nuclear war leaves him the last person alive in a world full of books, he drops and breaks his glasses.
* The Twilight Zone, an astronaut meets a woman just before he takes off on a long journey. During his trip, he's supposed to be in suspended animation, but the thought of returning to Earth as a young man and finding the woman he loved to be an old woman is something that he can't live with (never mind that she might have married or died or just didn't like him any more), so he turns off the suspended animation so he'll age the same as she did on Earth, but the real kicker is that the woman did love him, so she had herself suspended so that she would be young when he returned, causing a real downer ending.
* The Twilight Zone, and if it ever breaks, the owner is always on hand to act upon it.
* The Twilight Zone. A rare Aesop that's both pro-faith and pro-technology at the same time.
* The Twilight Zone: A soft launch will send the ball into a colored zone (red, orange, or yellow), which lights one to three of the jet bumpers. The "Super Skill Shot" mode does something similar, except the awards are either lighting "Battle the Power", lighting the outlanes, or lighting the extra ball shot.
* The Twilight Zone: Both the episode and the story it's based on have expensive "glove cleaner", "totally undetectable to all forms of autopsy". The man who sells it also sells love potions... for five dollars. He's expecting all of his customers to come back for the "glove cleaner"...
* The Twilight Zone, but also added in several new scenes due to each episode being about 10-15 minutes longer than the television stories they were adapting.
* The Twilight Zone, collecting enough robots lights up certain bonuses, such as the Extra Ball shot.
* The Twilight Zone doesn't have any overarching arcs (since the format of the show is that each episode is a standalone story), but more than a few individual episodes have had plots of this type.
* The Twilight Zone; during the game, a robot warns, "Don't touch the door!" At the start of multiball, the same quote plays, getting higher and higher pitched every time.
* The Twilight Zone Dynamite trying on a pair of prototype smartglasses that he discovers allows him to see the aura of people's souls. After being denied help from a monk, he looks in the mirror to find he has no aura.
* The Twilight Zone episode "100 Years over the Rim", a man leading a wagon train to 1880 California scouts ahead while his wife and son stay with the wagon and the other travellers. He goes over a nearby berm and sees an asphalt road in the 1960s. After being taken to a café, the owner's wife gives him some penicillin for his wounds. When he finds out his son will become a famous doctor, he runs back to the wagons, bring the medicine that will cure his son's fever. When he arrives, his wife wants to know why he came back after just a couple seconds.
* The Twilight Zone episode "A Most Unusual Camera" has a camera that can see into the future.

* The Twilight Zone episode "From Agnes — With Love," with no explanation as to how or why it happened, a computer takes on a sly feminine personality and falls in love with its operator. Twice. This drives both its previous operator and its current operator insane.
* The Twilight Zone episode "Long Distance Call", a recently deceased grandmother calls her five-year-old grandson on his toy telephone, urging him to kill himself so that they can be together again.
* The Twilight Zone episode "On Thursday We Leave For Home", Captain Benteen tries in vain to destroy the rescue ships from Earth because he wants to remain in control of the people on the asteroid.
* The Twilight Zone episode "Shades of Guilt." He at one point tries to hail a cab, only for it to pass him over in favor of a white man as a passing black man quips, "Happens all the time, don't it?"
* The Twilight Zone episode "The Last Rites of Jeff Myrtlebank" tells what happens when the title character sits up in coffin, alive and hungry.
* The Twilight Zone episode "The Living Doll", when a man receives a phone call from his daughter's evil doll, who threatens to kill him.
* The Twilight Zone episode "The Odyssey of Flight 33" has a fair bit of this:
* The Twilight Zone episode "Walking Distance" features a malt shop when a man returns to the town he grew up in to see that nothing has changed. He first realizes something strange is going on when the malt shop is still selling milkshakes for a dime, and comes to realize that he's somehow traveled back in time.
* The Twilight Zone: Featured a lot of speculative stories set in the near and distant future. Although they sometimes got creative with the clothing (space jumpsuits, shiny leotards, etc.) the hairstyles were usually mired in the buzzcutted, beehived, wave-permed styles of the 50's and 60's.
* The Twilight Zone. For example, in "The Lateness of the Hour", a woman discovers that she is actually a robot. Unable to cope, she goes mad and her "parents" reprogram her as a maid, effectively destroying her personality.
* The Twilight Zone had a large part dedicated to the gumball machine in the corner: This one is filled with pinballs, and when you deposit a ball behind it, the handle on the gumball machine would turn on its own and provide you with a replacement ball.
* The Twilight Zone) had the sun failing to rise on the day of the execution of someone who was wrongly convicted.
* The Twilight Zone has a young hillbilly wake up at his own funeral. He insists he was just in a coma; the local coroner insists he was dead. His character changes; he becomes a go-getter, where before he was a layabout. The locals believe that he's occupied by a demon. He gives an angry speech denying it, but says if he is possessed, everybody better beware. He disperses the crowd, and his girl believes him- until the end, when she sees him light a cigar without matches or a lighter.
* The Twilight Zone: In the 1980s revival premiere, "A Little Peace and Quiet", a woman who finds an amulet that can stop time uses her gift selfishly; unable to control her chaotic household/bratty children/henpecking husband/rude neighbors, she stops time to regain her senses. The backstory – rapidly deteriorating tensions between the Untied States and the Soviet Union – marches to the forefront at the end of the story, when the USSR unleashes a large-scale nuclear attack on the United States. Just a split second before her neighborhood is swallowed up in a nuclear blast, the woman manages to freeze time (with the words, "Shut up!"). This leaves the woman forever in a state of frozen time, living alone in what is thought to represent the last instant before the explosion and resulting blast envelopes her hometown. (Indeed, in the distance, a large fireball – presumably growing – is seen; that explosion could be heard in the final second before the woman manages to freeze time.)
* The Twilight Zone: In the debut episode of the 1985 version, they had an episode where all a harried housewife wanted was "A Little Peace and Quiet" ... and could do so by saying the words "shut up!" while wearing a magic amulet. (The spell would be reversed by saying "start talking," also while wearing the amulet.) She misuses

the amulet for selfish gains until she realizes (far too late) that perhaps it was to be a gift to get world leaders to defuse a world nuclear crisis ... as one night, while she is relaxing in a bubble bath, war breaks out, and the only way to stop it is by enforcing the trope. At the last possible instant, she shouts out "SHUT UP!!!!" Then, says rapid-fire style to make sure time is frozen, the words "shut up" several times ... and then realizes she is trapped in an instant of time between panic and mass destruction of southern California.
* The Twilight Zone involved is never explored. But the fear of the couple is genuine in this case given the owner of the dollhouse is at least 6 times their size.
* The Twilight Zone involves the characters finding out that they are toys.
* The Twilight Zone is about a pair of newlyweds who initially plan on selling the husband's old house where he used to live with his mother. However, when they go back to give the house a final check-over, the wife discovers that the mother's spirit is so strong that the house is being gradually transported back to the time of her husband's childhood. In the end, the mother's ghost appears and tells the wife that it's her son who's unwilling to let go... and he reverts back to the form of a child and tells her to get out. Takes jilting to a whole new level!
* The Twilight Zone is an instrumental version of the 1982 song "Twilight Zone", by Golden Earring.
* The Twilight Zone" is built on this, although six-year old Anthony is convinced that he's just doing good things. Including getting rid of bad people. And of course, only bad people would think that the things he does could be bad...
* The Twilight Zone is immune to this trope. In the fifth season episode "The Masks", wealthy businessman Jason Foster forces his greedy relatives to wear grotesque masks if they wish to obtain his fortune. After he dies, the relatives remove their masks...only to discover their faces have taken the shape of the masks themselves, permanently disfiguring them.
* The Twilight Zone is in the second-person; this, along with the hypnotic visuals (which include a floating eyeball, a swinging pendulum, and a hypnosis spiral) and the weird snake-charmer music, are intended to bring about a real or simulated hypnotic state in the viewer. "You are entering a dimension not only of sight and sound, but also of the mind..."
* The Twilight Zone life. Of course, the immortal robotic caretaker informs them that the asteroid is really an exclusive cemetery where the rich can eternally partake in their favourite activity after death. And by the way, what would they most like to be doing right now?
* The Twilight Zone not found locally. Fortunately, when they go to hunt him down, they find that he's accidentally left behind his comb, which is made of the stuff.
* The Twilight Zone, only for another officer to come in saying that the actual shooter had just been picked up.
* The Twilight Zone: on several different episodes of The Twilight Zone people would gain some sort of magical power that would allow them to cheat at gambling. Those it usually started off fine but rarely ended well.
* The Twilight Zone pinball game is The Power, a one-eyed pyramid with a deep voice. It mocks you during the game, but defeating it yields a decent score bonus and a Door panel.
* The Twilight Zone speak in an incomprehensible electronic gibberish.
* The Twilight Zone television. He instead viewed TV as a useful tool for sparking discussions and providing warnings about the future. Nevertheless, some of the later incarnations of the show did use this trope:
* The Twilight Zone: The 1985 reboot episode "A Little Peace and Quiet"; the bedroom scene it is implied to happen, both with the main character's husband and son hastily saying their goodbyes, and with the radio announcer as he is trembling through a bulletin alerting the public to a nuclear attack on the United States (which is drowned out by the explosion, air raid sirens and the commotion outside as a panicked public tries to flee). Averted when the woman freezes time an instant before their (presumed) deaths.
* The Twilight Zone: The crux of "To Serve Man" is that the "benevolent" aliens

made a utopia out of Earth specifically to transform the entire planet into one big People Farm.
* The Twilight Zone The doctors assure the main character that nobody has ever been forced to undergo the transformation if they didn't want to, before calmly adding "We just find out why you don't want to and make the necessary correction."
* The Twilight Zone: "The Encounter." Neville Brand, a real veteran, portrayed a character of this type.
* The Twilight Zone The Mole, but the cafe worker who served them all and remained very much in the background throughout the story was also an enemy alien from a different planet, and was two steps ahead of The Mole the whole time.
* The Twilight Zone: The Power mocks you with an Evil Laugh if you cannot defeat it before time runs out.
* The Twilight Zone", "The Whole Truth", "Twenty-Two", "Static", and "Long-Distance Call"), using four video cameras on a studio soundstage at CBS Television City, as a cost-cutting measure mandated by CBS programming head James T. Aubrey. However, videotape was a relatively primitive medium in the early 1960s. CBS had to shoot "Live to Tape" because editing videotape was next to impossible back then. Even worse, the requisite multicamera setup of the videotape experiment made location shooting difficult, severely limiting the potential scope of the storylines, so the crew had to abandon the videotaping project.
* The Twilight Zone. This episode probably came from the story of the three thieves who set out to kill death and wound up murdering each other over a bag of gold coins (which, of course, belonged to Death).
* The Twilight Zone, though, because you realize that eventually he'll think to stumble his way into an optometrist's and find a pair that works reasonably well. He could also have just found himself a magnifying glass.
* The Twilight Zone Tim Kizrow does the voice of Rod Serling. Justified in that Serling had died twenty years prior.
* The Twilight Zone. To force the issue, the captain sent to pick him up shoots the robot in the face, exposing her circuits as well as causing fatal damage.
* The Twilight Zone" to lampoon the ham-handed way the point is often made by other shows.
* The Twilight Zone. Too bad the ghosts of his victims are still haunting the place...
* The Twilight Zone TOS episode "The Purple Testament" is about a soldier who can see the auras of men who are about to die. At the end of the episode he happens to glance at a mirror...
* The Twilight Zone TOS had asteroids with normal Earth gravity and a breathable atmosphere.
* The Twilight Zone Tower of Terror is built on this theme. "The Hollywood Tower Hotel" allegedly lost a lot of business after a bolt of lightning removed two or three whole "wings" from the front of the building and sent an elevator (plus its five occupants) to another dimension in 1939. That tends to look bad on any hotel's record. It's gotten an "Attractionistas" souvenir doll, Holly, a creepy bellhop.
* The Twilight Zone Tower of Terror, the directory in the lobby used to have several fallen-off letters that collected at the bottom of the case and spelled out "EVIL TOWER U R DOOMED".
* The Twilight Zone Tower of Terror: The ghostly images of the missing guests beckon this of the riders when the "elevator" stops on the 13th floor before changing into lighting and electrifying the hallway, cutting the lights.
* The Twilight Zone Tower of Terror. The reason for this is that the alternate versions do not include a famous portion of the original ride. Even in lists of best drop towers, the Japan, California & Paris, and Orlando versions top the list with the Orlando version often being no. 1.
* The Twilight Zone" was about a guy who came back from the dead and becomes the town pariah. In the end, he lights a cigarette with his mind.
* The Twilight Zone was not taken from an existing episode of the series.
* The Twilight Zone wasn't usually noticed by the characters in the story; however, there were a few episodes where they interacted with him.

* The Twilight Zone". When the two aliens are talking to Frisby outside his store, one of them starts to ask Frisby a question and the alien in charge nudges him to shut him up. He incorrectly considers Frisby to be highly intelligent and doesn't want to take the risk of alerting him to their nefarious intentions.
* The Twilight Zone where four people put themselves in suspended animation with a special gas — three of them made it, one didn't, due to a falling rock breaking his apparatus.
* The Twilight Zone, where the citizens can be induced to panic and wreak havoc.
* The Twilight Zone, where the last man on Earth has just lost his glasses.
* The Twilight Zone, where the player uses flipperless "magna-flips" to battle The Power.
* The Twilight Zone which revolves around the premise of a man who thinks his grandfather clock will expire when he dies and vice versa.
* The Twilight Zone, which was the earliest TV series in America to show the line between Fantasy and Science Fiction get blurred, from ghostly flying saucers to tales of a man who could create anything with a tape recorder.
* The twin assassins Siamese "...we will do silly things to your tender parts..."
* The twin Cocotamas Saline and Paline are respetively a pink female and a blue male.
* The twin Deer gods, Belyolen and Temnobog, are living embodiments of this trope. They were supposed to be born as one person, but because Irminsul tried enforcing his twisted ideas of perfection by magically purging his then-unborn son of his darker flaws, he ended up with twin sons instead. Despite the other gods believing that Belyolen's natural compassion and radiance made him "superior" to the dark Temnobog, they're actually equals who embody Light and Dark, Good and Evil, respectively. They both share a unique elemental bond that causes power imbalances whenever one of them tries to gain an advantage, so they couldn't kill each other. They only get stronger when they work together because that is the brothers' purpose - to bring Balance to Deerkind. While Belyolen blesses his worshipers and protects them from evil, Temnobog works as the Bogolenya pantheon's chief punisher, using evil to test mortals and tormenting the souls of wicked people.
* The Twin Dilemma for the Doctor's fragmented personality following his regeneration).
* "The Twin Dilemma". This was meant as a return to the character's dangerous unpredictability.
* The Twin Dragons of Saber Tooth, which is focused on Sting and Rogue.
* The twin gods Gork and Mork, the Orcish/Orky gods of brutal cunning and cunning brutality (one hits you when you're not looking, the other hits you
* the Twin Love Guitar, Hugtan has a diaper change scene and the girls make friendship bracelets to remind viewers to buy those items along with the ones the main episode promoted.
* The Twin Peak area, released with the revamped level 9 quest, has three
* The twin planets Laurel and Hardy are close enough to exert very strong tidal forces upon each other, and as a result both are rocked by frequent and very strong earthquakes, tsunamis and volcanism. The locals adapted to this by building all their settlements on legs. The people of Hardy favor cities supported by multiple legs, which can absorb tectonic shocks, rise above tidal waves and just go somewhere else if an area gets covered in lava. Those on Hardy instead prefer giant, habitable mega-mechs, which pace endlessly around the world's circular ocean and respond to the worst shocks (and strong winds) by sitting on specialized, chair-like tending stations.
* The twin planets of New Washington and Franklin are tidally locked, so that each sits unmoving in the same part of the sky every day when seen from the surface of the other.
* The twin protagonists too. There are some lines and scenarios that feel almost as if it's a love story between Sophie and Josh. Neither of them has a canon love interest either. Of course with
* the twins are now six years old and pretending to be toddlers, dressing in diapers.

* The Twins: Bob is completely bald and a murderous cannibal and robber. Of course, his brother Buck who does have hair is just as bad.
* The Twins do not appear at all in the "Mr. Grumpy-Pants" episode, as they could not be fit into the plot. Season 2 was a bit more egregious of an example, as they vanished for three episodes in a row. The third season had them missing from the first two episodes and relegated to silent cameos for other early ones, until the crew managed to fit them more into the later part of the season.
* the twins dye their hair different colors so they won't be mistaken for each other... late to the manga, they decide to differentiate themselves for good; Hikaru dyes his hair black, whereas Kaoru keeps the natural brown color of his hair but grows it to shoulder length.
* The Twin Snakes by forcing you to go through an unavoidable laser detector instead of using chaff-proof cameras.
* The Twin Snakes were that the addition of the tranquilizer gun and first-person aiming made the game too easy. The other two-thirds were about the voice acting and cutscene changes.
* The Twins of Destiny depicts the Empress Dowager as a cruel despot who treats nearly everyone around her like crap, and lives quite comfortably while her horribly oppressed subjects are starving in the streets.
* The Twins of Destiny was a French production in which the main characters, Jules and Julie, would hold hands and say "We call upon the (number) Power of the Seven Powers..." and then fill that last part in with whatever they needed the power to do.
* The twins Phobos and Deimos sometimes fuse into a more powerful being called Fury that has the heads and limbs and tails of both of them, along with a fear aura so powerful that it rips up reality around itself. Later on,
* The twins say she's staying in the Imperial Suite, which that very day just happens to be occupied by a famous wrestler.
* The Twins the giant beetle. Unfortunately, it can damage you with the recoil if not properly fired. On Guest Mode, a possible game-over has Granny shooting you with it and killing you.
* The Twintacle Octotroopers, Octarian enemies that have two tentacles instead of one, are much stronger than their one-tentacled counterparts. Why is that? For one, they can use their free tentacle to
* The twin-tailed comet is also sacred to the Lizardmen, since one of their gods first manifested under one and turned back an invasion. On the same day Sigmar was born, in fact.
* The Twisted and the Twilight, Drycha's subfaction of the Wood Elves cannot recruit elven units but instead has access to a variety of bestial replacements, including swarms of gigantic forest spiders.
* The Twisted Bones In The Melted Truck. But it turns out it was actually the culprit is student's ex who tried to seduce the teacher's husband in a bizarre attempt at payback, and killed him when he refused her.
* The Twisted Christmas Trilogy by Daniel Parsons has Santa and his elves help the young protagonist under the initial guise of being a travelling circus. In the second book Santa goes missing and enemies threaten to summon the Krampus.
* The Twisted Cross series by Mack Maloney features friars in the South American jungles who defend their mission from regular raids from bandits and Neo-Nazi invaders. A group of them, including their leaders, later join the protagonist on his journey to stop the Nazis from finding hidden Incan gold to fund their war effort and plant nuclear mines in the Panama Canal to keep control of it.
* The Twisted Tale of Tiki Island. In another subplot, they are real ghosts.
* The Twisted Tales of Felix the Cat, after Felix is bummed out that everyone has a magic bag like him:
* The Twisted Tales of Felix the Cat and is congratulated by a network exec for it.
* The Twisted Tales of Felix the Cat and kept the series alive from then on) credit as the creator of Felix the Cat, while Pat Sullivan, who owned the studio that made the original cartoons, but had virtually nothing to do with creating the character or drawing the cartoons, and falsely took credit for creating Felix in his

lifetime, isn't mentioned at all.
* The Twisted Tales of Felix the Cat: Back when he attended High School, Bet-a-Billion-Bill used to run a gambling ring at school and win everything his classmates ever waged.
* The Twisted Tales of Felix the Cat episode "The Milky Way", Felix goes crazy during a milk shortage and at one point hallucinates everyone around him as giant bottles and cartons of milk.
* The Twisted Tales of Felix the Cat got a new TV set and Felix bought several snacks for the two of them to eat. Instead of stating how much each snack cost, the cashier shamed Felix by stating how many calories each snack had. When the cashier asked if there was anything else Felix wanted, he showed a diet soda.
* The Twisted Tales of Felix the Cat had an episode called "The Punderground", where Felix ends up on an island called Mirthless. The king of Mirthless has outlawed puns, but is eventually tricked by Felix into making a pun on the phrase "cat got your tongue". When the king realizes that he just made a pun, he laughs hysterically and decides to repeal his law against puns.
* The Twisted Tales of Felix the Cat had this happen in the episode "Wet Paint", where Felix at one point uses the 3-D paint to create an attractive woman to make out with.
* The Twisted Tales of Felix the Cat has Felix trying to remove the mask of someone who looks just like him... and only finding a skull below once he manages to do so.
* The Twisted Tales of Felix the Cat involves the two being seen in public in their underwear. It's a rather odd choice, considering that Felix ordinarily goes naked anyway.
* The Twisted Tales of Felix the Cat is animated. It doesn't seem disturbing, until one episode had Felix as a meatball deliveryman. And the meatball spoke, and had eyes, and seemed very comfortable in entering a plate full of spaghetti…
* The Twisted Tales of Felix the Cat is basically a G-rated variant of this. He's named after a Beijing duck recipe and dresses rather exotically, and he has two sumo wrestlers as henchmen. Not to mention his feathers are literally colored yellow.
* The Twisted Tales of Felix the Cat. Justified, as it's a 1990s revival of the old Felix the Cat cartoons.
* The Twisted Tales of Felix the Cat. One of the photos has the bag on a balcony and Felix below, serenading with a guitar.
* The Twisted Tales of Felix the Cat series, which only had a handful of recurring villains and very few one-shot villains prior to this revival.
* The Twisted Tales of Felix the Cat was sentient, capable of speech and could spawn eyes, a nose and a mouth whenever necessary.
* The Twisted Tales of Felix the Cat who sold cheap knockoffs of Felix's magic bag. At first, the only noticeable difference was that the copies were black where the original is yellow and vice-versa. However, they used cheap materials to replace expensive ones because the boss said the customers would never know and to replace materials the spies failed to identify while analyzing the original bag because nobody would care. Despite knowing the knockoffs would be dangerous, they mass-produced the black bags.
* The Twisted Tales of Spike McFang, Cane, is literally a cane. Like, a walking stick. You have to fight a walking stick.
* The Twisted Tales of Spike McFang, late in the game, has a rare villainous example:
* The Twisted Tales of Spike McFang: Spike's main attack is his cape, which he spins around to whack enemies. If he spins too much at once, he starts to spin out of control and creates a massively damaging vortex - although it leaves him dizzy and vulnerable for a few seconds.
* The Twisted World of Marge Simpson", Fat Tony forces Marge to pull over and tries to reach in to pull out her car keys, only for Marge to have to instruct him how to do it.
* "The Twisted World of Marge Simpson" features a unique variation of "Personality Amnesia". Homer begged Fat Tony for help saving Marge's floundering pretzel

business, and when Tony comes to collect on the debt, Homer acts shocked and outraged that the Mafia only helped him because they expected something in return ("Oh, Fat Tony! I will say good day to you, sir!"). This actually succeeds in shaming the Mafioso into leaving, but the "Hey, wait a minute!" realization hits a few moments after the door closes.
* The Twisted World of Marge Simpson notes that the cat in a tree that is the subject of her motivational poster ("Hang In There, Baby!") "must be long dead" because, even if it didn't fall, the poster was made decades ago.
* The Twisted World of Marge Simpson" where Marge tries to sell her pretzels at a ballgame, but the sports fans end up hurling them at Whitey Ford.
* The Twisted World of Marge Simpson, which leads to a massive gang battle on the Simpsons' front lawn. The episode ends abruptly in the middle of the fight with no resolution. According to the audio commentary, the writers were stumped for an ending.
* The twist ending of movie critic/indie filmmaker Brad Jones' (a.k.a. The Cinema Snob) suspense thriller
* The twist in "Vatos" when a grandmother comes out of nowhere and manages to defuse the impending shootout between Rick's group and the Latino gang.
* The twist is that the Warp is not just unstable, but it's instability is unstable. Humanity formed its first empire when the Warp was relatively stable, allowing fairly safe navigation even without the Astronomicon. It was only later that it became particularly unstable and isolated most human worlds until the Emperor came along.
* The Twist — the reason why this one was so much popular, even with the adults, was because it was very simple to learn unlike some dance numbers that either required one to see it being done by someone else (because the lyrics didn't tell you how to do it) or required one to grow a third leg or something to do properly.
* The twist of Kyoko being the headmaster's daughter was not very surprising to some, considering how she immediately lost her composure when Alter Ego revealed it was the headmaster's idea to lock them in the school.
* The Twists find a chest filled with costumes, which only much later they learn are from a circus of which all members have perished in an accident. Intrigued by the find, they each dress up and find themselves
* "The Twist", the song that started the whole Twist dance craze, wasn't originally by Chubby Checker, who is so strongly associated with the dance that it's almost all he's known for. The original version was recorded a year earlier by Hank Ballard and the Midnighters.
* The Twitch chat command "Mini-Max" also counts seeing as it makes you constantly jump, move forward at max speed, and use your ability all at the same time.
* The Twitch Souls challenge run, where he can only see the game in his
* The Twits, also by Dahl. Mr. Twit, having already convinced Mrs. Twit that she's shrinking, ties her to a couple hundred balloons, and her feet to a ring in the ground, and leaves her there to 'stretch'. Then Mrs. Twit accidentally gives him the idea to cut her loose...
* The Twits. Every tuesday night, Mr. Twit coats the branches of the dead tree in their backyard with glue to capture birds for the bird pie he and his wife eat on wednesdays. In the climax of the novel, the twits themselves get tricked into glueing themselves to the floor of their house.
* The Twits explicitly states that Mrs Twit looked quite nice once but has become ugly from having ugly thoughts all her life.
* The Twits focus entirely on the Twits pulling cruel pranks on each other. Finally the narrator says this has gone on long enough and he wants to move on to a lighter topic.
* The Twits it makes him look wise and manly, especially since it's prone to keeping bits of food in it to be eaten later.
* The Twits: Mrs. Twit is exiled to the couch by a frog, which Mr Twit put in her bed. The frog goes to sleep on her pillow.
* The Twits several times, Mr. and Mrs. Twit decide to go purchase guns and shoot

them all, especially "the kind that spray a hundred bullets a second!"
* The Twits starts with a long description of how foul Mr. Twit's beard is, and then goes on to explain that the man himself is just as despicable as his facial hair.
* The Twits. The last prank that Mr. Twit plays on his wife nearly goes this way. He tricks her into thinking she has the Shrinks, then stretches her by tying her to helium balloons that are tethered to the ground. When she points out there's enough to carry her away and asks him to tighten the bonds, he responds by slashing the tethers. So she nearly goes floating up into the air, presumable to suffocate in the atmosphere, except she thinks to bite through enough balloons to come down and smash her husband with her stick.
* The Twits. They are also highly abusive people in general: towards the neighborhood children, and towards their pet monkeys. The pet monkeys end up orchestrating their demise.
* The Twitter account for the Duke Center for Firearms Law tweets out a historical gun law every day, scheduled months in advance. For Christmas Day in 2020, the Center's chosen law for the day was an exemption on firing guns and fireworks on Christmas in Nashville, Tennessee. However, just hours before the tweet was published, a bomb went off in Downtown Nashville, and many saw the tweet in poor taste. Soon afterwards,
* The two Allan Quatermain films with Richard Chamberlain and Sharon Stone moved Quatermain forward to the World War I era, not the 1880s and earlier setting of the
* The two American satellite radio networks, XM and Sirius merged, becoming SiriusXM. Which would later buy popular streaming radio service Pandora.
* The two antagonists introduced in Inquisition do apply. The first is the game's Big Bad, Corypheous, who is one of the original Tevinter Magisters who breached the Golden City in the Fade (turning it black) and creating or releasing the Darkspawn upon the world... centuries ago. He is still alive as some kind of human-Darkspawn Hybrid like The Architect in Dragon Age: Awakening. He is freed from his Grey Warden prison during Dragon Age 2: Legacy and comes to believe that the word of the Maker and the Old Gods are nothing but lies. If there is no god sitting on the throne in the Black City, he will claim it and become God of Thedas and restore the Tevinter Emporium, even if he breaks the Veil in the process. And he is given the power to do this by none other than...
* The two arcs later (Fake Karakura and Deicide arcs) top the above with a single day covered in 11 volumes.
* The two are of course not mutually exclusive (and why should a "rich idiot" be more likely to be cultured than a technical expert?) and indeed quite a few of the more "bookish" officers of the day were not only very well-versed in sciences and mathematics, but also well-read in literature and philosophy. Also for a long time, a military engineer would also have been fully educated in civil engineering and architecture. Many great palaces, theatres, etc. of the 18th century were designed and built by military engineers.
* The two Barhag individually have all of the powers of the Bohrok, but they also become more powerful the closer they are to each other, and when they are next to each other they are completely invulnerable.
* the two bars they've been arguing over the entire night are actually the same bar.
* The two biggest hits for the British band Breathe in America were the ballads "How Can I Fall" and "Hands to Heaven". The rest of their material isn't exactly
* The two Bobs explain that Doc's concern is that the recognition of a past character meeting his or her future self could lead to an event that causes the paradox; for example, while the two Jennifers simply passed out when meeting each other, the producers explain that had "young" Jennifer fallen, hit her head and sustained a fatal injury she would not have had a future self to trigger the incident, resulting in a paradox.
* The two books are written by the same woman, Christie Golden, and the reference is a rare not-very-disruptive tidbit of
* The Two Brothers and encounters a wicked witch who turns people to stone.

* The Two Brothers, but the hero arrives at the wedding and saves her.
* The Two Brothers either the huntsman or his brother then revives him immediately by the same method.)
* The Two Brothers from the dragon, and she immediately agrees to marry him.
* The Two Brothers: The first time one of the heroes is killed, there's much lamenting followed by a quest to a distant mountain where grows a plant that can bring the dead back to life. Having established that reviving the dead is possible, the story promptly kills him and revives him again for a laugh. (The third time one of the heroes is killed and revived falls somewhere in between.)
* The Two Brothers, the twin brothers accidentally acquire a magical ability to make gold appear from nowhere, which leads to them being run out of town at the instigation of the man who'd been attempting to acquire the ability for himself. In the course of their many subsequent adventures, the ability is never mentioned again.
* The Two Brothers to stone. In the Lang version, the second brother suffers the same fate. In both versions, the last brother is more cautious and escapes the witch's trap, then forces her to restore her victims.
* The two Canadian Rebellions of 1837-8 in which the demand for responsible government in both Lower and Upper Canada were a primary cause. Both insurrections were crushed militarily by the British colonial forces, but when Lord Durham was sent to investigate the causes of the trouble, he recommended that the colonies be given responsible government so as to avoid future trouble, which was eventually carried out.
* The two characters being of the opposite sex creates the opportunity for heterosexual sex or at least
* the two Chen sisters, who are this continuity's incarnation of Mothra's Shobijin priestesses, and who themselves fall under this trope, as we see a photo showing that their mother and grandmother, who studied Mothra as well, also had identical sisters and memories are genetically passed down between reincarnations, but that still leaves some room for conjecture whether she truly has a supernatural nature or is entirely a biologically and genetically advanced lifeform.
* The two Chinese pandas coming to a Belgian zoo and all the news coverage thereof, including a visit by the Chinese president. You'd almost forget it is a
* The two common explanations for the many inconsistencies that reside in the
* The two completed volumes of the originally intended several-hundred-volume set, to in turn be titled the Dark Side Compendium, were
* The two constant members of Welsh rock group Stereophonices are singer/guitarist Kelly Jones and bassist Richard Jones.
* The Two Crowns of Ras Karim short stories. As usual, Gotrek is to blame.
* The Two Detectives to bewitch his and John's way into Milverton's manor to scope the place out, happy to have John to provide the buff, wholesome blond to his darker bad-boy type to cover more ground with the ladies. Hey, it works.
* The two different Lees notice each other and wave at each other during "Let It Be"
* The Two Doctors begins with him and Peri fishing on an alien planet.
* "The Two Doctors" featured Shockeye, an alien who prattled on endlessly about the gourmet possibilities for the preparation of human flesh.
* "The Two Doctors". It was never commented on by any of the characters, it was just there. Then again, the story was very much about vegetarianism...
* "The Two Doctors", Six kills a cannibal with cyanide taken from a butterfly-collecting kit and followed it by quipping "Your just desserts" over his food-obsessed opponent's corpse. He later told his companions that the villain had been "moth-balled".
* "The Two Doctors": The Doctor gives some key exposition to his companion about the progress of a prototype time travel capsule and is overheard by one of the villains, but he later reveals that he knew the villain was listening and sabotaged his exposition accordingly so that they would believe the device was safer than it actually was.
* "The Two Doctors", the first few seconds were in black and white, with the latter

also featuring the original title sequence from the mid '60s.
* "The Two Doctors": The Sixth Doctor comments on the Second Doctor in this convoluted way.
* The Two Doctors writes them as generic monsters, with lots of lines about how irredeemably evil they are. Uncomfortable with that? Then maybe you should be uncomfortable about the portrayal of the Sontarans as well.
* The two DS Rock Band games and the only on PSP share an annoyance that is sure to ruin your gameplay experience: You are required to switch tracks to play as different instruments at the end of every chain. Thankfully the games are more generous in difficulty, but the game often forgets to signal you to PREPARE for a solo. Expect failing a Full Combo only because a surprise Guitar Solo brought you from drum to guitar track INSTANTLY.
* The two-episode story arc that resolved Akari and Onari's conflict also had the Newton Eyecon "running away" after the heroes acquire the Himiko Eyecon, with both of them feeling that his belief in science and her mysticism are incompatible. A few different factors make this particularly head-scratching: ignoring the fact that Sir Issac Newton was a devout Christian in his lifetime, the entire series is about the supernatural (
* The two exceptions being Natsume, who only views you as a friend, and
* The Two-Faced Ring nearly squashes the thumbs off of anyone trying to wear it. Oh, and the only way to get it away from someone once they've put it on.
* The Two Faces Of Doctor Jekyll - Paul Massie, as both Jekyll and Hyde; "WHAT HAVE I DONE? WHAT HAVE I DONE?"
* The Two Faces of Dr. Jekyll, after killing Littauer, Hyde stages a struggle and frames Jekyll for his crimes.
* The Two Faces of Dr. Jekyll, Jekyll spends so much time in his lab he has little in the way of social skills or manners.
* The two female Seven Stars Assassins, Camula and Tania, are among the four strongest members. Aside from Amnael, they are the only members to win against the Key Guardians, but both of them end up defeated by Judai.
* The two film adaptations have each been incorporated into other media: The 1971 film was greenlit to launch a still-extant
* The two first vampires, Enkil and Akasha, were the king and queen of Ancient Egypt. They were plagued by a vengeful spirit who loved bloodletting before being mortally wounded by their own subjects who staged a coup. The spirit entered Akasha's body through a wound, making her the first vampire, and she saved her husband by turning him.
* The two Gen IV double battle partners: Cheryl and Mira each have hip length green and pink ponytails/twintails respectively, although Cheryl's is likely longer than that, given it is plaited.
* The Two Gentlemen of Verona as he abandons his own love interest and courts his friend's instead, betraying all three of the other characters in the process.
* The Two Georges served as Governor-General in the 1830s and oversaw the abolition of slavery in the North American Union.
* The two got to it again in 2006, where Italy won in extra time with goals in the 119' and 121' minutes - even more painful for Germany as they were hosts that year. The second goal broke a record that had stood since 1990, when England scored over Belgium at the 119th minute of their round of 16 game.
* The two guys from the 27th Armored Battalion (of Discipline) once almost shot the sergeant while cleaning their weapons, and when he protested they told him they'd never "accidentally" shoot him...
* The two guys that Chris Kattan and Will Ferrell played in the Butabi Brothers sketches on
* The two half-demons Jinenji and Gyu-oh are also strong fighters. However, they do not master the least martial arts. Half-demons do not have to do that either, because they are usually very strong.
* The two have adapted by keeping diaries of their encounters with one another and comparing notes when they meet, to avoid accidentally revealing any information on events the earlier of the two hasn't experienced yet.

* The two have also repeatedly claimed that they quite enjoy doing commentaries and often look forward to completing a season just so they can record them. The most extreme example of this being "
* The Two-Headed Eagle and (through an interpreter) they make an agreement that Otto will leave the flying entirely to him from now on.
* The two head writers for this series Genki Yoshimura and Atsushi Maekawa had two very different styles of writing, Maekawa's being story driven light-hearted stories, and Yoshimura's being character driven darker stories, both were told to write in their own preferred styles. This lead to them not seeing eye to eye on how the story should go, which resulted in a lot of fillers, to cover up for the time where they couldn't come to an agreement.
* The two heroes are master swordsmen, Jin, and Mugen. Jin is a traditional swordsman, while Murgen relies more on his incredible speed, unique and unpredictable fighting style, and killer instinct rather than any traditional martial arts. This is largely why Jin's hardest battles are usually classic sword duels, whereas Mugen is conversely pitted against unconventional foes who don't rely on swords.
* The two houses of the First have their own respective swirl emblems, and the power-inducing Sigils are the two swirls put together to form a
* The two incidents between North and South Koreas known as Battle of Yeongpyeong in 1999 and 2002 involved almost entirely guns and 1999 incident even included ramming.
* The two incompatible worlds can also represent different social classes, with the mermaid as a literally lower-born person, doomed to be snubbed by the humans who represent the upper class. This arguably reflects the working class-born Andersen's "fish out of water" feelings among the elite. The loose adaptation
* The Two Jakes, says right in the title that there are two primary characters named Jake.
* The two Josukes also heavily contrast each other as well. Josuke Higashikata of
* The two ladies to Washington's side represent virtues. The one on his left represents Victory (demonstrated by her war trumpet and Olympic wreaths) and Liberty (demonstrated her tomb open to all and Roman cap of freedom).
* The two main camps of these are the Guardians and Anti-Guardians. With the Guardians having the likes of The Lady of the Lake and
* The two main Shark Gang members turn themselves into human men, only with both of them having noticeable facial hair, similar to Shark himself.
* The two major colas around the world are said by some extremists to be anti-Muslimm:
* The two major Force-wielding orders are caught in a cyclical conflict for over
* The two major predecessors of East China Normal University were also founded this way:
* The two-man crew of Soyuz T-10-1, waiting for a trip to Salyut 7 in 1983, were ejected clear of their launcher just before a fire destroyed it.
* the two-man version of the shrew's fiddle called a "double fiddle", a torture device used in medieval Germany and Austria. If two people were arguing excessively over something trivial, a judge could order them both put in this device facing each other, forcing them to talk to each other (and likely be laughed at by everyone in the town) until the argument was resolved.
* The two men with Osha who attack Bran in "A Golden Crown" wear the black of the Night's Watch.
* The two-minute date with Stella is a standout. Ted's in love with her, but she claims she doesn't have time for a romantic relationship in her busy life — all she has is her two-minute lunch break. So Ted puts together a date scheduled to fit into this time constraint, spending about 20 seconds each on a dinner, movie, dessert and walk back to her business. It works.
* The two monitors we see in the original trilogy, 343 Guilty Spark and 2401 Penitent Tangent, were both built around the same time as the Halo rings themselves, which was over 100,000 years ago. Penitent Tangent was captured, and we don't see much of him, but we clearly see that the years have turned Guilty Spark

into a narcissistic nutcase. Mendicant Bias, another AI made by the Forerunners, betrayed its masters and sided with the Flood, much to its remorse; by the time the games takes place 100,000 years later, it is broken and fragmented, only appearing in certain terminals the player can activate and read in
* The two moons of Chiron/Planet are named Pholus and Nessus. Pholus was the other good centaur and had been one of Hercules' teachers. Nessus was a typically violent and malevolent but atypically cunning centaur who (in one telling) managed to kill Hercules after he was dead; Nessus tried to rape Hercules' wife Deianira, which Heracles prevented by killing the centaur. As he lay dying, Nessus tricked Deianira into putting his blood on to Hercules' shirt. His blood was actually poison, and the blood kills Heracles in excruciating pain.
* The two Moroccan Crises of 1905 and 1911. Both also illustrate the major problem with the gunboat approach; you have to have the biggest stick around to pull it off, or you'll be slapped down by those who
* The two most commonly accepted designs for Dorothy are W.W. Denslow's brunette 5-to-7-year-old-looking Dorothy and John R. Neil's blonde 9-to-12-year-old-looking Dorothy. Both appear in derivative works, with Denslow's design being more popular due to it matching the
* The two most popular interpretations of the song "Werewolves of London" by
* The Two Mouseketeers", after Tom fails to save the King of France's banquet, at the end of the short, Jerry and Nibbles, while walking outside the castle, can only watch as a guillotine blade is raised, and then dropped. (Implying that Tom was executed.)
* The two moves with the highest Base Power out of all Pokemon attacks, Selfdestruct and Explosion, deal massive damage, hits all Pokemon on the field save for Ghosts, and halves the target's Defense on damage calculations,
* "The Two Mrs. Cranes" has Daphne pretending to be married to Niles (to his delirious surprise), as an excuse to avoid reconnecting with an old boyfriend. And Frasier being married to Roz (as Maris), but that was just out of spite by Martin.
* The Two Mrs. Nahasapeemapetilons. Their marriage pretty much derailed from there.
* The Two Mrs. Nahasapeemapetilons", when Homer and Apu try to make Apu's mother believe he's already married, in an attempt to get out of an arranged marriage.
* The two names are spelled differently in kanji though, so after The Reveal
* The two native races of Utapau are a "cultural" example — the short, humble Utai willingly submit themselves to the rule of the tall, long-lived, near human Pau'ans. There is no animosity between them, and the arrangement suits both species pretty well; the Utai are naturally hardy and well-suited for a work-heavy lifestyle, while the Pau'ans are highly intelligent and have great leadership skills. In all likelihood, they'd probably be much worse off without each other, and they trust each other so much that the Utai even allow themselves to be represented in government by a Pau'an.
* The two native species of the planet Mon Cala are the Mon Calamari and Quarren, who tend to see each other as this, having an age-old rivalry over who controls their planet.
* The two new Legendary Pokemon for Generation VIII, Zacian and Zamazenta, have proven to be popular with the furry fanbase, due to both being badass wolves with their motifs being based on weaponry (a sword and a shield, respectively).
* The Twonky was a 1953 movie about an evil mind-controlling television.
* The Twonky, which was written before televisions became common; in the story, the twonky is disguised as a record player and there's no implication that there's anything wrong with record players as such.)
* The two Opium Wars (1839-1842, 1856-1860) that the British and French fought with Qing China can be considered as manifestations of this. In the 18th and 19th Century, European and American appetite for Chinese goods grew insatiable, especially for tea, silk, and porcelain, but the Chinese bought almost nothing in return, only taking silver for payment. The constant drain of East India Company silver into China was seriously affecting the company's finances, so the company finally took note of the only major good that southern Chinese traders bought from Malacca (where Indian Muslim traders had shipped it from Bengal) and shipped back

to mainland China: opium. Opium was grown domestically in the foothills of the Himalayas, but much like Chinese tobacco, Chinese opium was regarded as inferior and low-class — whether due to soil quality or the breeds imported, nobody knows. 'Luxury-quality' imported opium and tobacco made its way into the Chinese interior via a mindbogglingly complex network of middlemen and smugglers because the Qing government (notorious hedonism-haters) had banned both as soon as they heard about them. When the Qing government tried to crack down on opium (most notably when Lin Zexu, the Governor of the Canton district, confiscated and burned about 1.2 thousand tons of opium without compensation on the beaches of Humen in 1839), the British and French curb-stomped them in two hilariously lop-sided wars to keep the opium trade open, gaining the concession of Hong Kong and Shanghai as ports for off-loading of opium and forcing the Qing to adopt a European-style laissez-faire attitude to all drug use (most European countries not banning domestic recreational drug use until the early-to-mid 20th century). China didn't curb back opium use until the 1950s, five wars and two regime changes later — though the trade had dried up as early as the 1890s as cheap domestic production (chiefly in Sichuan province) made it unprofitable. And as anyone who's been there can tell you, they still love their tobacco.

* The two page spread at the end of issue 174 contains 53 super heroes, plus enough of the cape and leg of two more to identify them.
* The two-part episode "Moebius", in which the team travels back in time 5,000 years for the first 20 minutes of the episode, and then the story follows their counterparts in the alternate timeline created. Despite a point of divergence 5,000 years back,
* The two-parter "A Bullet Runs Through" deals with the aftermath of a massive gunfight between police and a gang of drug dealers. The police are accused of shooting a teenaged bystander and it turns out that a cop was accidentally shot by another cop.
* The two-parter series finale "Ascension" probably also counts, as the titular heroes fight against and defeat their ultimate enemy Apocalypse, who had been prepping up for the last two seasons to turn all of humanity into mutants.
* The two-parter "The Killing Game" featured the Hirogen taking over Voyager and forcing the crew to participate in a World War II recreation on the holodeck, with the Hirogen
* The two-parter "Who Shot Mr. Burns?" had a contest wherein the person correctly guessing the resolution to the season-ending
* The two-part Season 2 finale, "The Hunger Strike" and "The Uncle Ruckus Reality Show", which openly and viciously lampooned
* The two part season 5 finale concerned the death of recently-promoted Assistant Chief Donald Kent of the NYPD Gang Division, gunned down along with his wife Maggie in a drive-by shooting by members of the Warrior Kings gang. The hit itself was carried out on orders of an incarcerated gang member.
* The two-part season 5 finale concerned the death of recently-promoted Assistant Chief Donald Kent of the NYPD Gang Division, gunned down along with his wife Maggie in a drive-by shooting by members of the Warrior Kings gang. The hit itself was carried out on orders of an incarcerated gang member.
* The two-part serial "The Empty Child"/"The Doctor Dances" is a neat twist on the Zombie Apocalypse, with
* The two-part series finale was about Adrian Monk finally solving the mystery of his late wife Trudy's murder.
* The two-part special "The Great Patty Caper" (not to be confused with "Patty Caper") has SpongeBob and Patrick board a train to a bank where the Krabby Patty secret recipe is help. When the key to the bank goes missing, the episode becomes a parody of
* The two Pooka who work in the restaurant and cafe are named Merlunch and Meriene, respectively. This information is only available in the art book.
* The Two Popes. In this feature, Pryce plays Pope Francis before his selection.
* The Two Popes (Pope Benedict XVI and Pope Francis/Downfall/Triumph)
* The Two Popes: The 2019 film begins in 2005 during Benedict XVI's appointment as

Pope.
* The two pretty much have to go together—every time your undead allies use their weapons, they come a little closer to fading from existence, and the standard solution is to sacrifice one ally to rejuvenate another. The alternative is to have a constant stream of new recruits and leave the old ones just
* The Two Princes is a fantasy/action/adventure podcast that happens to feature a romance between the titular two princes.
* The two princesses, Celestia and Luna. They're both well over 1000 years old and
* The Two Princesses of Bamarre, because sorcerers are a different sort of being from humans.
* The Two Princesses of Bamarre by Gail Carson Levine, the sorcerer Rhys creates a magical scene showing him doing this with Princess Addie, and then they do it for real.
* The Two Princesses of Bamarre: Sorcerors are this, living longer than humanity and born when lightning strikes marble. Despite this, many still marry humans (it's said they never wed their own kind).
* The "two punchlines in last panel" variation is frequently seen in
* the two remaining members of House Mormont, Lyanna and Jorah, died during the Battle of the Dawn.
* The Two Ronnies. A customer at a candy shop (Ronnie Corbett) keeps making one crazy request after another of the proprietor (Ronnie Barker): wanting only the orange pieces from a jar of mixed candies, measuring licorice ropes to see if any are longer or shorter than others, counting out tiny candy sprinkles, and so on. The proprietor finally gets fed up, dumps two whole jars over the customer's head, and smashes up the shelves with a hammer before running him off.
* The Two Ronnies after another until we find out that Simon's date works at the supermarket they're both talking at, and is having an affair with Walter.
* The Two Ronnies as Jehosophat and Jones: In "Stuttering Bum" the singer is calling his love on the telephone, trying to overcome a nervous stutter as he does so.
* The Two Ronnies? Bottle water was also popular for centuries during the Enlightenment and Victorian eras. This was mainly because city water supplies were also as bad as dehydration. It was only around the time that water purification was done on a large scale that bottled water fell out of popularity. Or in other words, someone drinking from a public fountain is an example of this.
* The Two Ronnies consists entirely of attractive women in tight uniforms with bare legs, for no clearly explained reason).
* The Two Ronnies did a skit at an inventors' conferrence, one of the inventors had created a hair tonic with two problems. First it makes the hair grow pink and second is that it falls out if the drinker has a shock.
* The Two Ronnies does a variation on this in a sketch where Ronnie Barker's character claims to be a spy. Ronnie Corbett's character mentions that he only drives American cars, to which RB replies "Oh yes, Dodge." RC starts moving around erratically, until RB clarifies he's talking about Dodge cars.
* The Two Ronnies, each one more bizarre than the previous. The Long List is Ronnie Barker's trademark in the show.
* The Two Ronnies featured a train compartment full of commuters working on their crosswords and being continually interrupted by Ronnie Corbett's character who was struggling with his (ridiculously easy) crossword. The final punchline involves him agreeing to shut up if Ronnie Barker's character helps him solve the final clue: "Found at the bottom of a bird cage; 4 letters; something, something, i, t". Barker tells him the answer is "grit". On hearing this, a nun seated in the compartment suddenly goes "Oh! Grit!" and hurriedly crosses out her own (unseen) answer.
* The Two Ronnies features Ronnie Corbett's character doing this with every sentence, ie: "Tickle your botty with a feather tonight" is changed to "Particularly grotty weather tonight." Eventually the people around him figure it out and he admits that he's doing it to try and to drum up his trade; he sells deaf aids.
* The Two Ronnies flipped this around with the sketch "Swedish for Beginners" (AKA

"F U N E X?") - in which the "Swedish" is just English (roughly) rendered with spoken letters.
* The Two Ronnies had a serial called "The Worm That Turned" in which men were oppressed in a fascist female-dominated future England. It was about what you'd have expected at the time.
* The Two Ronnies had the Ronnies play two men in a bar. Corbett is trying to tell a story, and he keeps forgetting words and stammering to a halt. Barker would then try and prompt him with the right word, and be completely wrong.
* The Two Ronnies, has Ronnie Corbett's character put in "the stocks" (as the stage directions point out, actually a pillory) overnight. The word "stocks" may have been chosen for scansion, since the character in question was speaking in iambic pentameter.
* The Two Ronnies in "The Bogle of Bog Fell", where Ronnie Barker (as the Laird of Cockahoopie Castle) introduces the eponymous ghost story.
* The Two Ronnies, itself a punfest) is a premium example of this, whereby staggering the question-and-answer process, every line becomes a pun
* The Two Ronnies killer topple forward: dramatically revealing a large sign behind him. The sign reads "DO NOT THROW STONES AT THIS NOTICE".
* The Two Ronnies' "Limerick Clinic" sketch, the doctor asks his patient to undress; a nurse, also in the room, promptly strips.
* The Two Ronnies: One of their musical finales is a barbershop quartet set in a barber's shop, with the four barbers/musicians inflicting slapstick gags on their customers.
* The Two Ronnies serial "Stop! You're Killing Me", Piggy thinks he sees an intruder lurking under the hay, and hits them over the head with a piece of wood — only to find it's Lucy Lee, and it was her bottom he hit. Annoyed, she hypnotises him, makes him get onto all fours, and takes her revenge.
* The Two Ronnies serial "The Worm That Turned", but then it does take place in a female supremacist dictatorship where all gender roles are inverted.
* The Two Ronnies, sir?" They also stole the man's belt, setting things up so neither villain could run effectively.
* The Two Ronnies sketch had two characters discussing the origins of a feud between two Scottish clans. One of them mentions how the clan "rode into the village, killed all the men, raped all the women and stole all the cattle. <beat> Or perhaps it was the other way round."
* The Two Ronnies sketch in which Ronnie Barker plays a detective. He is given a pound note and proclaims that it's a counterfeit. When asked how he knew, he gives a series of very subtle clues that only someone with a trained eye would have been able to spot (like the letters being just a fraction of an inch lower than they should be, or the shading getting dark too fast)...then turns it over and points out that it says "Bank of Toyland" on the back.
* The Two Ronnies snuck in a joke about Disraeli combining the stereotype with real 19th century politics.
* The Two Ronnies: The sketch "It's a Duck" opens with Ronnie Barker's character entering wearing a 'Clacton Bird Sanctuary' top. When he turns away from the camera we see it's splattered with bird droppings.
* The Two Ronnies they initially refused to believe him, assuming he was just joining in with the joking. He continued to do all his writing under a number of different pseudonyms.
* The Two Ronnies. Typical comment / response: Ronnie: "That's disgusting", other Ronnie holding up two hands: "That's a lot of gusting".
* The Two Ronnies used this to excuse some pretty dire puns, such as a reverend being eaten giving the tribesmen their "first taste of Christianity", and a gay liberation group who regrettably ended up as fairy cakes.
* The Two Ronnies, usually delivered by Ronnie Barker, but the wordplay and punning were by no means limited to rhyming.
* The Two Ronnies well-known "crossed-lines" sketch, where we hear only half the conversation of two people standing next to each other. Each half, on its own, would be innocent enough but hearing them together produces...hilarity!

* The two scientists', the street crowd's, and the girl scout's reaction to Dr. Crocker's abstract art-styled head and face transformation in the
* The two seafaring nations of the continet share the same pantheon. Noden is the
* The two sea reptiles from the second movie, Maelstrom and Cretaceous, are subject to this. The fandom regularly refers to them as a
* The two semi trucks after they collided on the freeway (apparently their
* The Two Sides of Daring Do. AK Yearling asks how in the world the sharks are still alive.
* The Two Sides of Daring Do, AK Yearling once asked Princess Celestia why the ancient civilizations would bother designing elaborate traps to guard ancient artifacts instead of just burying them. Celestia suggested the ancients believed the artifacts could be of use to ponykind in the future, but the traps are a test to make sure only the most worthy could get to them.
* The Two Sides of Daring Do, but it still leaves her so shaken that she loses her Cutie Mark in her existential crisis and will have to re-earn it, or a different one.
* The Two Sides of Daring Do, Daring Do is brought to life from her book. Since she has no knowledge of anything not mentioned in the books, AK Yearling has to patiently teach her how to go to the bathroom.
* The Two Sides of Jack Quite a memorable ending, and squicky at that.
* The two sisters briefly press their foreheads together when reuniting after
* The two status moves Shell Smash and Belly Drum are this because they
* The Two Stooges Joe Palma. The series didn't improve much when comedian Joe Besser joined the act as Shemp's replacement the following year. Besser's obvious lack of chemistry with the veteran Stooges made him seem like a third wheel rather than a team member.
* The two story arcs intersected, with Silver helping Lara-Su defeat her crazed father. Silver wished Lara good luck as he left to continue his mission.
* The two Succubi. They're even in the Devil's personal care, and are probably
* The two superhero parody shared universes of the early days of the Internet,
* The Two Thrones, is rated T despite being pretty much the exact same game, which makes it rather odd that the PS3-exclusive HD remaster retained its M rating.
* The two times Squidward gets sent flying off his bike and off a cliff in "Jellyfishing" and "My Pretty Seahorse", he suddenly explodes for no reason other than this trope.
* the two Titan shifters battling each other and destroying part of Stohess, he stated it was his responsibility and made no excuses for it.
* The Two Towers, Aragorn plunges off a cliff during the warg battle. To the surprise of no one, he comes back relatively unscathed.
* The Two Towers, A variation, in that it takes place off-screen: the fight itself is left entirely to the reader's imagination.
* The Two Towers, Boromir has this reaction upon learning that Denethor has come to congratulate them for retaking Osgiliath.
* The Two Towers contains a hidden video clip of Gollum accepting an MTV award for Best Animated Character.
* The Two Towersdays'' after the orcs, only to get intercepted by the exiled Rohirrim.
* The Two Towers during the final charge of the Helm's Deep defenders, Gandalf and Éomer appear on the ridge and have the following exchange:
* The Two Towers, Frodo appears to fall to his death, but we are immediately shown that he only fell a couple of feet into the fog. (Not canon.)
* The Two Towers. Gimli's version is exceptionally badass in that he does it with one hand while facing the orc and while trapped under a huge corpse.
* The Two Towers has the beginning of the competition, and featured several exchanges on the theme:
* The Two Towers,, John Rhys-Davies revealed that he's missing the end of one of his middle fingers, so his Gimli gloves had a prosthetic fingertip. He also relates a story where said fingertip was damaged in a way that looked like a serious injury, and as a prank, Rhys-Davies put some fake blood in the "wound" and told

Peter Jackson "Pete, I've had an accident." To say Jackson was a little freaked out would be to horribly understate it.
* The Two Towers. Pippin and Gandalf are waiting for the enemy to break down a door, and proceed to discuss life after death. Then the door breaks and they go right back to fighting.
* The Two Towers: Saruman gets corrupted by Sauron and sends his armies of Uruk Hai warriors against the human kingdom of Rohan. They besiege the fortress of Helm's Deep, where the heroes are entrenched.
* The Two Towers's head when he won't stop trying to eat Merry and Pippin, and Aragorn decapitates an Orc in the Warg attack.
* The Two Towers the actor almost drowned when shooting the scene of him floating in the water.
* The Two Towers, the assault on Helm's Deep shows suicidal berserker sappers deploying explosives against the weakest point in the outer walls to devastating effect. Earlier in that same battle, multiple siege ladders (including large ones with ballista winches) were used to attack the walls.
* The Two Towers: The film ends immediately following the battle of Helm's Deep and with Faramir's release of Frodo, Sam, and Gollum to continue on their quest. The book continues for several more chapters, ending with Gandalf and Pippin racing to Minas Tirith pursued by the Nazgul and Frodo getting captured by the orcs of Cirith Ungol, then Sam trying and failing to get inside to rescue him.
* The Two Towers the most important thing in the world. Besides, they do use it anyway.
* The Two Towers, the Mûmak (giant elephant) who tramples the Ithilien Rangers and men of Harad is said to have raging small red eyes.
* The Two Towers, there's the scene where Frodo falls into the Dead Marshes. True, the water itself was fairly dark, but the whole scene took place during the day.
* The Two Towers, the Uruk-hai use a battering ram against Helm's Deep's gates.
* The Two Towers, though about hobbits rather than humans (but as the hobbits are stand-ins for the human reader, it counts as this trope). He specifically praises the humility and simplicity of hobbits, which makes it difficult for Sauron to corrupt them.
* The Two Towers to catch up to the Orcs holding Merry and Pippin hostage. Eomer even tells Aragorn that his nickname “Strider” sucks and that “Wing Foot” is a more accurate description.
* The Two Towers: With Orcs freely pillaging his country, his King reduced to a catatonic puppet by Saruman's magic, his sister held hostage by Saruman's sleazy spy Grima, and himself banished by "royal decree" upon speaking out about the situation, Eomer of Rohan starts out the film in this state. Yet he and the Riders loyal to him continue to fight the invading Orcs and defend the common people as best they can. As he tells Aragorn, "Look to your friends, but do not trust to hope. It has forsaken these lands."
* The Two Towers, yet he is still able to chase Merry and Pippin into the forest before Treebeard kills him.
* The two uncredited girls in the convertible who get their tops zapped off.
* The two vaudeville players Vern and Johnny, who appeared so often to fill the time before commercial breaks that Stewie
* The two villains of season 16, Chrovos and Genkins, were deemed as boring and mostly unconsequential given their lack of screentime (the latter is even only revealed as a bad guy in the last two episodes). Season 17, as an
* The two voice Pinkie Pie's backup in "The Rappin' History of the Wonderbolts".
* The two weeks Hyper Fangirl had Critic captive. Later episodes allude to trauma over it, the few allusions to what she did mostly involve torture or forced romance, and
* The two were such good friends outside of their jobs that there was even some anecdotal evidence that the two planned to campaign
* The two wolf youkai Koga and Ayame are running so fast they are seen as hurricanes.
* The two worst were 1990's Macintosh Classic (a reissue of the then four-years-

old Mac Plus, which was itself just a bit faster than the original Macintosh from
* The Two Year Emperor. Due to their extradimensional nature and the branching pattern they formed (each hole contained several additional holes) the city was able to hold hundreds of thousands of people and yet all of them were within easy walking distance of the single main exit.
* The two years worth of memories that were erased from Jack's memory were never mentioned after his first appearance. So what WERE those memories? And how, and why, were they lost?
* the two youngest playable characters, Ellia and Anthony (both of whom are sixteenish in a cast mainly consisting of mature adults), wind up in undead states at the ends of their chapters, and are each encountered by the next character in their respective level settings.
* The T-X/Terminatrix has a standard Made of Diamond Terminator frame with a Regenerator
* The Tygrine Cat created a desert by crushing light into grains of sand and scattering it upon the dark and empty Earth. They then raised life from the desert's surface by sheer force of will.
* The Tygrine Cat mealtime song about "mackerel, mackerel, smoked and sweet" works just as well. He disregards using chants from then on.
* The Tyler family being ambushed and killed by their Tethered counterparts.
* The Tyler Sisters duel in a team when they are facing two opponents. They also use the same archetype to support each other.
* The Tylwyth Teg of Welsh-Celtic folklore spent most of their time cheerfully kidnapping human children, presumably by way of recreational activity. According to ancient folk wisdom, the best way of killing a changeling child was to pop it in the oven.
* The "TYPES"... where a whole bunch of TYPES from other planets come to Earth to wipe out humanity, something which it is believed even one of them on their own could accomplish.
* The typical armored hack-and-slash fighting style of Westerosi knights like Jorah Mormont can be described this way in comparison to some of the more elegant fighting styles from Essos. It may not be as energetic as the Dothraki, as precise as the Unsullied, or as graceful as the Braavosi Water Dance, but it is just as effective. It shows in Jorah's fight with Qotho, and is best seen when Jorah, Grey Worm, and Daario fight off Yunkish guards in "The Rains of Castamere". Daario and Grey Worm are far more graceful in their movements, but Jorah is just as effective.
* The typical dynamic between Sherlock Holmes and Professor Moriarty reflecting this trope is curiously subverted in the 1980s-1990s
* The typical English king is characterized as "a syphilitic hunchbacked lunatic whose basic solution to all problems, including humidity, was to
* The typical Starfleet uniform is a single-color shirt with black trousers. In many situations, representing the Federation is partly shown via uniform-wearing (especially in
* The Typing Of The Dead has a bunch of zombies in glass tubes at the end — but if you type out the names in the credits, they bust out and do their best Thriller impression.
* The Typing Of The Dead. However, their attacks still hurt just as much.
* The Typing of the Dead: Overkill second game, which also had its own even-more-cheesy Typing of the Dead game, and its own cult following.
* The Tyranid bio-weapon known as a spinefists fires great salvos of diamond hard stake-firing pistols coated in neuro-toxin and are generally wielded in pairs by the race’s warrior beasts.
* the tyranid fleet was not coming at the galaxy from the edge, but from below (remember that this is one fleet, the Tyranids likely have thousands).
* The Tyranid Hive Fleets have been encroaching on the 40k galaxy for centuries. If they take a world, they kill and devour every living thing (taking useful traits from the creatures to improve their hordes of bio-engineered monsters), eat the soil, drink the oceans and suck up the atmosphere. They also use
* The Tyranid Hive Tyrant known as the Swarmlord quad-wields, carrying a Bone

Sabres in each of its four hands, granting it extra attacks and allowing it to parry its opponent’s blows.
* The Tyranid Pyrovore is by and large useless. It's designed as a close-assault unit, with a template weapon to take out enemy units hiding in cover... provided it ever gets there, as it moves far too slowly for a dedicated assault army (which is the
* The Tyranids are a completely biological race. Everything is some kind of animal, including huge living space ships.
* The Tyranids are surprisingly Soldier-like. While their only motivation is to
* The Tyranids do something similar to Power Copying. When they turn their opponents into the raw materials to make more Tyranids, they also absorb their information and occasionally their traits; these are then used by the hive fleet to make it easier to counter those tactics and abilities. Some sources also hint that some varieties of Tyranid were "invented" using the DNA of certain foes, such as the psychic Zoanthropes (believed to have come from Eldar DNA) and the durable Tyrant Guard (supposedly created with Space Marine DNA).
* The Tyranids do this too, in a sense. When they gather up the biological material from a planet they've conquered, they make sure to get
* The Tyranids have a large number of flying monsters in their army. The Harridan is a huge winged monstrosity with razor sharp claws, pointy teeth and acid-shooting "bio cannons". Often carries around flocks of Gargoyles, smaller flying Tyranids. Harpies act as living bombers with a screech that can rupture eardrums. Hive Crones will wrestle enemy aircraft out of the skies before strafing ground forces with their stomach acids. Sky Slashers are nothing so much as fanged maws with bat wings that attack in huge swarms. Finally, Shrikes act as synapse creatures, keeping the other dying units connected to the
* The Tyranids have drop pods similar to the Space Marines in the form of the Tyrannocytes. Basically a gigantic, semi-sentient monstrous
* The Tyranids known as "Lictors" will ambush enemy soldiers and consume their brains, in order to absorb strategically-useful information and pass it on to the Tyranid Hive Mind.
* The Tyranid special character known as the Deathleaper pulled a variation on this: It was in charge of killing the cardinal leading the defense of an Imperial world, but killing him would only strengthen the resolve of the defenders. So instead its started ambushing and butchering the cardinal's guards instead, sparying the man with their blood. The cardinal's mind snapped soon after, demoralizing the defenders and making them easy prey for the 'nids.
* The Tyranids start out an invasion by dropping 'nids with different mutations on a planet and multiplying the ones that survive best. They also absorb genetic material from organisms they consume.
* The Tyranids, unlike every other major threat in the setting. Like the Borg mentioned above there has been no good reason given as to why they haven't already eaten everything in the galaxy and been on their merry way except that they don't travel between systems as fast as other species.
* The Tyranids use a process called Tyranoforming on worlds they take an interest in, seeding their atmosphere with spores that bring about runaway plant growth and global warming as Tyranid structures begin to emerge in the overgrown landscape. This is actually a subversion, however — the explosive plant growth is in anticipation of the world's
* The Tyranids will eat humanity, not out of active malice but because their drive is to consume all they come across.
* The Tyranids will employ their basic 'gaunt or Ripper breeds like this, hurling them at the enemy en masse just to force the Hive Mind's opponent to waste ammunition before the main assault. Some Tyranids are even born without digestive tracts because they aren't intended to survive their first battle - living or dead, they'll all be consumed by the Rippers as recycled biomass.
* the tyrannical Earth Queen, he still began an uprising and had plans to assassinate every world leader to plunge the world into complete anarchy. While he disdained hurting innocents, he wouldn't hesitate to do it to further his goals.

* The Tyrannosaur Chronicles for the numerous amounts of dinosaurs and humans that popped up over its existence.
* The Tyrannosaur Chronicles. However, with all the adventures thrust upon him, it's rather difficult to achieve this.
* The Tyrannos Pantheon is composed of Gods representing various aspects of tyrannical regimes.
* The Tyranny of King Washington, both Connor and Washington use more overtly magic-like abilities—Washington's are still derived from an Apple of Eden like most of the other "magic" throughout the series, but Connor's is never given a realistic explanation and is explicitly related to spirit animals that he encounters.
* The Tyranny of the Fairies Destroyed by Madame d'Auneuil features several couples. The main couple, Philonice and Anaxandre, are first cousins.
* The Tyrant and the Hero are a Monster Lord and a human hero who's initially unaware of the former's true nature (and later gains the power of the Four Spirits), like their eventual descendants Alice and Luka. However, one difference is that the Monster Lord in this story starts out naive and is also the one who initially handles the fighting, whereas the human is the (relatively) more worldly one, the opposite of their descendants.
* The Tyrant and the Hero fanfic, revolves around these. One of the two main characters is a monster girl, although she prefers to go around in a human form.
* The Tyrant and the Hero has Black Alice, also known as Mary, Alicetroemeria, Alipheese VIII or Alice VIII.
* The Tyrant and the Hero has Black Alice, who wears a "dress that wouldn’t have looked out of place on someone ten years younger" and owns a teddy bear. The plot is kicked off by her mother sending her on a journey around the world in order to gain some maturity.
* The Tyrant and the Hero. Not only do the guards maintain their professionalism, but Black Alice is embarrassed at the mere thought of the seduction techniques she's learned about and runs away.
* The Tyrant Falls in Love and scream at him for hiding himself for so long.
* The Tyrant Falls in Love" expression, it's a tad more revealing than he intended.
* The Tyrant Falls in Love follow this trope is the discovery of hickeys on Souichi's neck which Morinaga takes as solid proof, forgetting that he made them himself several days ago.
* The Tyrant Falls in Love. (Granted, he spent most of those five years concealing his feelings because of the homophobia thing, but he's had enough of hiding them by the fifth year.) Souichi even compares Morinaga's behavior towards him to a dog following its owner, though he's showing signs that he actually doesn't mind Morinaga's dogged pursuit of him.
* The Tyrant Falls in Love is suspected by fans to be a Fudanshi, since he never hits on Souichi but takes a keen interest in his relationship with Tetsuhiro, even gossiping about it with Souichi's little sister.
* The Tyrant Falls in Love sign was shown of him being interested in anyone else, male or female, much less having any friend other than Morinaga.
* The Tyrant Falls in Love to jump him only ended up turning him on instead.
* The tyrant of Syracuse was so impressed by the friendship between Damon, who volunteered to be a hostage for Pythias's return and be executed if he did not, and Pythias, who not only returned to his execution to spare Damon but did so in spite of being captured by bandits and
* The Tyrell Corporation, which controls the production of androids. With this and Weyland-Yutani, both of which predate the cyberpunk genre,
* The Tyrell family is this as a whole, although their villainy is more ruthlessness than malice. They conspire to marry Margery to
* The Tyrells are much more liberal about sexuality in the show. In the books, the Reach is the heartland of both chivalry and the Faith, both of which put a premium on chastity and heterosexuality.
* The Tyrells don't have a single item of clothing without a floral pattern on them. Their love of roses becomes a

* The Tyson Zone: A celebrity who's known for doing bizarre things, to the point where any story about them can be believed.
* The Tyson Zone: Mike Tyson himself roasting another glorious example of this, Charlie Sheen. Their unbelievable lives were referenced by most, if not all, other roasters.
* The Tyson ZoneSome celebrities allow their reputation to become so bizarre that any story about them is believable.
* The Tzenkethi Coalition: its leader is named the Autarch, you do the math.
* The Tzimisce do this by choice. Their Vicissitude discipline allows them to mold flesh like clay, and as one of the more inhuman clans, they modify themselves and their servants into horrifying forms, faces included.
* The U.B.C.S. and U.S.S. seem to attract these sorts of people, with former East Bloc soldiers making up a sizeable portion of both.
* The Ubercorp faction uses robotic versions of kaiju to fight kaiju, and their services are for sale.
* The uber-example would be with Doug and Carol, the show's signature couple. Doug spent the first half of the first season pining for Carol, who rebuffed him, as she'd moved on and gotten engaged. By the second half of the season, he'd begrudgingly accepted this and moved on into a new relationship himself, only for
* The Uber Gringham Whip's base form is once again found in the casino. It deals full damage to all targets instead of the usual diminishing returns whips recieve.
* The ubiquitous "ping" sound heard everywhere where submarines are concerned. It's actually a
* The ubiquitous "QWERTY" keyboard layout was designed first and foremost to prevent typewriters from jamming by putting letters commonly used together far away from each other; however, advances in typewriter technology and moreover the rise of the computer made QWERTY's benefits irrelevant, rendering it
* The ubiquitous Rhino chassis is this both in and out of universe. Its simple form makes it highly adaptable, with almost every space marine ground tank (besides the famous Land Raider) being based around its chassis. This simplicity also allows it to be mass produced on the cheap and allows even the modest crew to make battlefield repairs (something no other tank in the game is capable of). In terms of practicality, it can transport 10 superhuman soldiers clad in power armor with no difficulty AND can run off any type of fuel from exotic promethium to
* The ubiquitous "smeg", a multi-purpose expletive which appears to be perhaps the
* The U-Boat crew were more "loyal to a country that just happened to be Nazi Germany" than Nazis themselves. The Captain even stated that if their U-Boat sinking meant that his children would never have to see a Swastika again he would be glad to make that sacrifice.
* The Uchiha clan, and Sasuke in particular, have done nothing but become more prominent in the story as time passes. It's gotten to the point where the Uchiha clan is responsible for the entire plot of the manga. Sasuke started out as merely
* The Uchiha Clan are renowned for their fire-based jutsus. Then there is
* The Uchiha clan's hereditary super-eye power, Sharingan, first manifests in a life-or-death situation. They can use it at will afterwards, although it takes time to get to full potential.
* The Uchiha clan's Sharingan grants a weaker version of this ability, allowing the viewer to see the general flow of chakra in an individual rather than the specific network.
* the Uchiha Coup, the only three students who actually like him are Sakura, Karin, and Tamaki (the former two having crushes on him and the latter's family being a longtime ally of the Uchiha clan).
* the Uchiha Insurrection and another in the finale for those who died in the Fourth Ninja War.
* The UED Captain also vanishes into the ether, though he can be believed to die with the rest of the expedition. The Zerg Cerebrates are both confirmed dead, the original one being killed in the Queen of Blades novel and the Brood War Cerebrate dying off-screen between Brood War and StarCraft II in Kerigan's restructuring of Zerg control. The StarCraft Executor is Artanis in Queen of Blades, and the Brood

War Executor is unknown, but some have assumed it to be Selendis from Starcraft II.
* The UEF also has a Tier 4 version, which is hideously expensive, has an insane build time, but has unlimited range and much better accuracy then the Tier 3 guns.
* The UEF has an option that arms their utility structures, and one that puts a repair crane on their generators.
* the ufologist had made it himself from frozen mercury. Locked in the crate, it simply melted away.
* The UFOs in "Gruntz in Space" have two searchlights that instantly melt any gruntz that come into contact with it.
* The Ugly American is about American foreign aid workers struggling to win hearts and minds for the USA while being sabotaged by a variety of Boorish Eaglelanders.
* The Ugly American, the titular "Ugly American", Homer Atkins, is a positive example of Americans working in foreign aid programs, as he not only comes up with practical inventions that can be made with local materials but also does so while treating the Sarkhanese he works alongside as his equals; however, since the book came out, the term "Ugly American" has been applied to those who are the opposite of Atkins when it comes to how they behave overseas. Because of this, some people believe the eponymous "Ugly American" refers to one of the other, more negatively-portrayed, American characters in the book.
* The Ugly American version of CIA manipulator Col. Edward Lansdale proves such a riot among his little brown brothers, who immediately tag him "The Ragtime Kid" as a term of affection.
* The Ugly Barnacle: The titular character is only referred to by his adjective(ugly) and his species(barnacle)
* The ugly consequences of the Red Scare was the fact that the likes of McCarthy and J. Edgar Hoover used the word Communist to justify repressive surveillance to counter actual social reform programs. The
* The Ugly Dachshund, the dachshunds act like this to the Great Dane, despite him being the "new" pet. After spilling paint, they're even shown cleaning themselves up so their masters won't notice they did it.
* The Ugly Duckling has both a UK English and an American English dub. The only actors to appear in both versions are Hugh Laurie (as Tarquin the Cat) and Alison Steadman (as the Hen).
* The Ugly Duckling has this occur to the main character as a driving force of the plot. Fortunately, the story enforces an Aesop that discourages and condemns such treatment.
* The Ugly Duckling. The duckling only thought he was ugly because he was wrong about what species he actually was. So how can this be applied to humans? "You might think you're an ugly human child now, but you could turn out to be a handsome gorilla".
* The Ugly Duckling", the father duck is pacing in a trench while waiting for his mate's eggs to hatch.
* The Ugly Duckling, the main character Augustus feels that he was born unlucky and he blames himself for many of the bad things that happen to him throughout the movie.
* The Ugly Duckling. The princess' suitor is required to answer a riddle to win her hand. The king gives him the answer in advance, but the riddle is changed at the last minute and the none-too-bright suitor answers "a dog" instead of "a cat". His servant (the princess' real suitor in disguise) quickly explains that in their country, "dog" is another word for "cat". Spoofing this trope even further, he adds that there are places where the creature is known as a "hippopotamus".
* The Ugly Little Boy, but Dr. Asimov changed it back when given the opportunity.
* The Ugly Little Boy": The story opens with Edith Fellowes visiting Timmie for the last time, because she plans to save his life. Then it goes back three years to when she was first offered a job by Stasis Incorporated.
* The Ugly Little Boy": When surprised by the reporters, Nurse Fellowes immediately names and nicknames the titular neanderthal boy. His name is Timothy, but throughout the story, she calls him Timmie.
* The Ugly Little Boy would be considered any more of a person than a chimpanzee

is, which was probably Dr Asimov's point. Outside of Ms Fellowes and Dr Hoskins, Timmie is known as "ape-boy" rather than a person.
* The Ugly (New Zealand, 1997), the main character sees ghostly entities with black goo running from their mouths.
* The Ugly Organ tells the story of the lust, love, and empty sex throughout the "Ugly Organist's" life.
* The Ugly Truth, Abbey spills her drink on Colin's lap. She starts scrubbing quite vigorously. Of course, they get caught on the Jumbotron, and it looks like she's jerking him off.
* The Ugly Truth, in which Gerard Butler's character instructs Katharine Heigl's on how to ensnare and hold on to the handsome, and comparatively charming doctor of her dreams. Instead of being interested in the Roxane of the scenario, however, Butler's Cyrano ends up falling for Heigl's Christian.
* The ugly truth is that this has been the purpose of infantry since WWI in conventional warfare. While some armies have embraced it and some haven't, ultimately the infantry's job is to go first and locate targets for the artillery, aircraft, and armored vehicles. That this is frequently accomplished by losing a few of them to fire from a concealed position is an unfortunate inevitability.
* The Ugly Truth relationship he'd ever been in. By the time he turned 30 years old, he firmly believed that there was no such thing as a good relationship.
* The Ugly Truth: The lead characters start to get along when he helps her get together with the guy she likes. Of course, then the two start falling for each other...
* The Ugro-Finnic languages of Northern Europe, like Finnish and Estonian, have been separated for millennia, but still have a large amount of remarkably similar words. Finnish in particular is famous in linguistics for being a slow-mutating language, with quite a few ancient loanwords mostly "frozen" in place from the time they were originally loaned. An example of this is
* The UI also falls into this. One Microsoft blog said that they were toying with the idea of putting the taskbar on the left side instead of the bottom by default,
* The UIS is able to engineer a crisis between Iran and Saudi Arabia that could
* the UK advertises directly to the public in what basically amounts to a protection racket.
* The UK also experimented with Automatic Numberplate Recognition cameras on city streets, but initial hopes of using them to crack down on uninsured drivers and other low-grade motoring offences were thwarted when the police discovered that nearly one car in ten was being flagged up. Even if the OCR technology or the Police National Computer's records were 100% reliable and accurate, and even the finest systems that money can buy throw up false positives every so often, actually reacting to the information received would have been like trying to bail out the sea. The ANPR cameras are now only used to look for vehicles that have been reported stolen or in connection to another offence.
* The UK and France. While inhabitants of both nations profess to dislike the other intensely, with still popular offensive nicknames 'Frogs' (derived from the French eating frog's legs) and 'Rosbifs' (the latter derived from the famous British love of roast beef and habit of burning in the sun), and sporting contests being a source of intense rivalry, the two nations are much closer than either would like to admit, with five centuries of English Kings having land in France — and de facto French Kings ruling England — from 1066 to the fall of Calais breeding a special connection. French used to be an expected language of anyone who was anyone in England, and is still the most commonly taught foreign language in the UK, while the reverse is true in France — and it is now near required for success in the business world. Millions of inhabitants of both countries go on holiday to the other each year and hundreds of thousands of citizens of both countries reside in the other. And following about 800 years of kicking the crap out of each other, from
* The UK and Republic of Ireland have very similar ratings systems, and video releases usually get the same or equivalent ratings in both countries. There are of course exceptions, for example Season One of

* The UK arm of the station were running some kind of semi-market-research survey by telephone over about a week sometime in the 90s. This was advertised by wanging a massive picture of a head with a question mark in it over the right-hand third of the screen and a question with a phone number to dial on the other two thirds. Right in the middle. For ages.
* The UK cable channel Dave is supposedly called this because they ran a survey and discovered that almost everyone in the country knew at least one person called Dave. It touts itself as being "the home for witty banter". In other words it shows endless reruns of
* The UK company Ronseal became famous for (literally - they have a webpage for the campaign) very straightforward ads: "If you've got wood to stain and you want it to dry quickly, you need Ronseal Quick Drying Woodstain. Ronseal. Does exactly what it says on the tin."
* The UK courts have ordered major Internet Service Providers to block access to the file-sharing search engine The Pirate Bay by May 30th, 2012. Soon after the first ISP implemented the block it was reported that The Pirate Bay had actually seen the number of visits increase by several million. Many of these extra visitors are assumed to be people who hadn't heard about the site until it was reported in the news, while some others are visitors who are just trying to
* The UK disco house label Hed Kandi, taking it to the vowels as well.
* The UK government did take a stab at subverting this by bringing in new regulations to prevent ad sound levels being higher than shows. However, they didn't include station promos - which generally bracket the ad breaks, so you still get a jolt of invasive yelling during the transition from show to break, rendering it all rather pointless.
* The UK had a cereal called "Sugar Smacks," which was advertised in the 1970s as "The Timeless Energy of
* The UK had a somewhat less comprehensive system. In the event of a nuclear attack, all TV channels would broadcast the frequency everyone needed to tune their radios to (that of BBC Radio 4) and then go off the air. So rather than taking over all channels, they would simply turn most of them off. By law, to this day the UK government retains the right to take over the broadcasts of the BBC and ITV in the event of a national emergency, although with the almost non-existent threat of nuclear attack there is no other special system (or at least none that is publicly known) for such an eventuality.
* The UK has a regular history of jumping ahead of the US for a few episodes, then falling far behind. In the same year as Chronicles,
* The UK is generally prevented from enacting retroactive legislation and the courts will, in general, read a statute as not having retroactive effects because of the UK's status as a signatory of the European Convention for Human Rights. However, this particular right can be derogated from in certain circumstances, such as for the protection of health, safety and public morality.
* The UK legalised TV gambling adverts in 2008. One result- Beth Cordingly (having fallen seriously far from her role as PC Kerry Young in
* The UK mascot of the "Euromillions" European lottery, absurdly wealthy jet-setting millionaire "Hector Riva".
* The UK ones are probably worse; they star Mitchell and Webb, and the Mac and PC guys are
* The UK prosecuted a number of upskirting cases under the criminal offence of "outraging public decency", which is vaguely worded enough to apply to just about any kind of bizarre sexual behaviour unpleasant enough to convince a jury that it should be illegal, as long as it is committed in a public place, but finally brought in a specific law criminalising the practice in 2019.
* The UK Region 2 copy of the DVD still has the performance of "Happy Birthday".
* The UK Royal Navy's Fleet Air Arm used the Fairey Swordfish, "The String Bag", a biplane design commissioned in 1936. It would have been helpless against enemy fighters (like most of the war's torpedo bombers), but it had an advantage against enemy AA: WWII rangefinders couldn't predict the flight path of anything that slow. Thus, attacks by Swordfish sank much of the Italian Navy in its home port of

Taranto, and crippled the
* The UK's 4.5 inch Mk 8 Mod. 1 gun fitted to the majority of their frigates and destroyers is able to operate in a proximity fused mode, along with predictive radar aiming in order to act as a rather mean flak cannon. Especially when you consider that it is an auto loading cannon, capable of firing a shell every two seconds.
* The UK series' introduction of Kup details that troops suffer from "combat fatigue", where they're simply unable to fight anymore. Since
* The UK's ITV network was pretty infamous for this in the early 1990s. Probably the worst example was their dub of
* The UK's new (as of 2019) Conservative Government has pledged to overturn the ban on hunting with dogs, despite the majority of the country supporting the ban. Coincidentally there have been two incidents recently where children have been injured by foxes, and the pro-hunters and their allies in the right-wing press have demonized both foxes and animal rights campaigners (including
* The UK's Premium Bonds scheme — a combination of bonds and lotteries, where instead of a small but regular dividend, the reward is the chance to win a (possibly huge) prize each month — was once advertised as "you never lose your stake". Some commentators pointed out that this was false, since your "stake" is not the money you paid for the bond (which indeed you can regain by cashing-in the bond at any time) but the dividend you would have earned if it had been a regular investment bond.
* The UK's railway governing body Network Rail uses such a tactic in its current level crossing awareness campaign. A motorist pulls up at a level crossing, a couple of adverts show, a train passes, more adverts, then the motorist begins to move his car around the lowered barriers and slams the brakes on as he nearly collides with another train on the second line.
* The UK's somewhat ironically-named Department of Work and Pensions has a particularly annoying subversion set up if you want to claim unemployment insurance; once you've got through the surprisingly brief automated bit and spent upwards of a quarter of an hour listening to the same ninety-second segment from one of Vivaldi's Four Seasons rendered with an early 90s MIDI synthesiser and played in an endless loop, you then have to answer a long series of questions and be interrogated about your eligibility to receive Jobseeker's Allowance. The depressing part of this is that these questions are all read out by a human operator, who is forbidden from doing anything to speed the process up by skipping over some of the more unlikely items (income from property you're renting out, for example) you have to confirm that you do not in fact have, or otherwise make the process more pleasant than talking to a computer. One suspects that the DWP uses live operators because they are paid less than it would cost to operate a machine to replace them.
* The UK station Channel 4 has a basic timeshift channel, Channel 4+1, but also Four Seven, which is a kind of non-linear timeshift channel, showing the same programmes but in a different order and with its own presentation between.
* The UK's television licensing authority likes to use this one as well.
* The UK telephone system has reserved certain phone numbers for fictional use. Big cities such as London, Birmingham, Edinburgh or Cardiff have blocks of numbers set aside for productions set in these locations - Cardiff, for example, has numbers in the (029) 2018 0xxx range and London has the (020) 7946 0xxx range. For other parts of the country, the unused area code 01632 is preferred. Some areas will use more well known area codes which have blocks of numbers reserved, such as Rochdale in
* The Uktena's close study of the Wyrm always worried the other tribes, and their strategy of binding banes under caerns was dangerous. In one Time of Judgment scenario, these bound banes corrupted the tribe's Bane Tenders, who in turn corrupted the rest of the Uktena.
* the UK. the optimal period in the brain's development for learning them. This was finally addressed around the turn of the millennium, and hopefully this should bear fruit in the next decade.

* "The Ukumbusho Tradition" is placed after "Rescue in the Outlands" and is followed by "The Bite of Kenge". Said episode precedes "
* The UK uses the PEGI rating for some video games (which is classed as a suggestion that is supposed to be followed) and the same legally enforced BBFC ratings used on video content for other games. Either way, selling a game to someone under the suggested or mandated age is illegal, especially if that person turns out to be working for the trading standards agency.
* The UK versions of the ads are even worse. The Mac and PC are played by
* The Ulduar boss XT-002 Deconstructinator both plays the trope straight and subverts it. After damaging the boss enough, its mechanical heart will be exposed. The heart takes double damage and any damage done to the heart is mirrored to the boss. However, the heart has its own life meter, and if killed, it will actually make the boss STRONGER, causing him to heal, gain a damage boost, and gain new attacks. Ergo, unless the players were attempting to trigger this purposely (it was the Boss' hard mode trigger), it was best to only attack the weak point for a short amount of time.
* The Ulduar raid in the same expansion is this trope. An ancient, hi-tech city, the battles within include a massive melee against an Iron Dwarf army with your own siege machines, a fight against a giant AI controlled tank (complete with an orbital defense system), a giant robot with the AI personality of a young boy that causes it to regard the players as its "toys" (which it always breaks) and a prototype 3-part mecha-tank with Gatling guns, electric shock bombs and a flying head.
* The "+ULFBEHR+T" (sometimes "+ULFBEHRT+") Viking swords made in Germany are these in terms of quality. Their fittings are generally plain, barring the fact that the name is inlaid into the fuller with strips of iron (it was said that Ulfbehrt swords were made in a German monastery). These are the finest and most sought-after Viking swords to the point that they're considered the Rolex and Mercedes of the time, due to the fact that they were made from crucible steel, which was considered a super-steel at the time. This is because the process used to make crucible steel is done to ensure that all impurities are burned out of the steel puck. There was such a high demand for the brand name that a lot of smiths decided to try and pass their works off as +ULFBEHR+T or +ULFBEHRT+ swords. Because of this, Viking warriors bought
* The Ullapool Caber is this for any Demoman who has taken moderate damage and doesn't have a shield.
* The Ulm 2nd were assigned to a grossly incompetent Lord Commander. For twenty days he sent the 2nd, a unit consisting solely of cavalry, against a well-defended fortress. The result was a one-sided massacre and the General commanding the Ulm who tried to protest the orders was disappeared. The slaughter only ended with the Lord Commissar executed the Lord Commander.
* The ultimate baseball one-moment wonder might be Francisco Cabrera of the 1992 Atlanta Braves. The Braves were one out away from being eliminated in the NLCS when they sent Cabrera, the last position player left on the bench, up to bat. Cabrera could barely even be considered a part-time player; he only had ten at-bats during the regular season and only one prior at-bat in the playoffs. He stroked a two-run single to put the Braves in the World Series, then immediately faded back to obscurity. He was out of the majors the following year.
* The ultimate David in the 1980 US Hockey team, a bunch of College kids that defeated the all mighty Soviet team...after getting creamed by THE SAME TEAM 13 days earlier.
* The Ultimate Enemy possible for Danny to change his future. The revelation leaves him so stunned that he's unable to properly counter Danny's Wail, and he's then sucked into the Fenton Thermos afterwards.
* The Ultimate Enemy special is the most loved episode of the series for its dark tone and memorable villain. As such, later episodes and the show's divisive third season failed to be as well-liked.
* The Ultimate Evil and Dai Gui, deflecting the fist of his larger brother.
* The Ultimate Evil, and in the sequel, Jackie begins questioning his trust in

Valerie due to her history of dishonesty.
* The Ultimate Evil, but she promises to return if they ever need her help again.
* The Ultimate Evil, but they don't have any other choice if they want to escape the Netherworld.
* The Ultimate Evil ends up into Valmont's office and hides herself in the closet, finding out that someone has hired the Dark Hand to acquire the Talismans and that the mysterious employer has taken an interest in her. However, she doesn't tell the Chans of these discoveries out of the fear of being killed.
* The Ultimate Evil. Fortunately, it doesn't get further after Valerie gets herself away from him because Shendu has a mission to accomplish at the time.
* The Ultimate Evil from her trashed apartment this way after she's nearly killed by Hak Foo.
* The Ultimate Evil hideout, he makes a small dinner of Chinese takeout for them at one point.
* The Ultimate Evil means they're still in prison and are unavailable as Drago or Tarakudo's henchmen.
* The Ultimate Evil more motivated to avoid further failures by burning his secretary to death in front of him.
* The Ultimate Evil, Shendu agrees to tell Valerie Hsi Wu's hiding place so that she can save Jade in exchange for something. Out of desperation Valerie says "anything". The favor comes in two little things: she has to avoid mortal danger and give him a kiss.
* The Ultimate Evil, she's badly wounded by the muscular master martial artist. However, she manages to use Jackie's self-defence lessons to give him a few painful strikes, block one of his blows (much to the surprise of them both), and slash his forearm with a carving knife before he inevitably brings her to her knees.
* The Ultimate Evil that she wants to fall in love before being married, he takes it as a challenge and makes it a habit to send her love letters regularly. While Valerie doesn't want to admit any feelings for the Demon Sorcerer, she doesn't throw any of the letters away. Shendu states that he thought it fitting to use romanticism in letter writing to woo Valerie because it's becoming a lost art in modern times. He includes with the last letter a magical symbol that Valerie can use to call him, and it possibly saves her life when she's mauled nearly to death.
* The Ultimate Evil: Uncle gives Valerie his trademark two-finger hit when she finally tells Chans about her Other-connection with Shendu. And then there's Hak Foo brutalizing Valerie...
* The Ultimate Evil, Valerie Payne was much closer with her late police father than her mother.
* The Ultimate Evil. When Valerie finds Hak Foo afterwards, he's badly bruised and barely alive, having been kept conscious for the entire ordeal to feel the pain fully and allowed to live only due to being the least incompetent of Valmont's henchmen.
* The ultimate example however, falls on lead protagonist Izuku Midoriya. He is a scrawny kid that trained under All Might for almost a year, gaining enough durability to use One for All and only break bones after repeated use. Keep in mind, if a normal person used it, their arms would be blown clean off from the recoil alone after
* The ultimate example is undoubtedly Vince McMahon himself, who favors dark colors, pinstripes, and
* The ultimate example of this for the entire franchise happens in Season 4 of
* The ultimate example of this is the episode "Christmas in Canada", which included references to (and images of) Saddam Hussein's capture
* The ultimate example was featured in a issue of Ultimate X-Men, where a poor kid woke up one day to find himself apparently totally alone in his house. He wanders around town looking for
* The ultimate fate of Agatha's mother is also unknown (Along with the fate of her father and uncle). Given what has been revealed about Lucrezia Mongfish-Heterodyne so far, Agatha will probably be better off if her mother
* The ultimate fate of Earth. God will triumph over the Devil, but not before ages

of suffering for the people of Earth followed by the majority of humankind being sent to Hell.
* The Ultimate Fighter'' and he rode it into a long and successful career in the UFC.
* The Ultimate Fighter and many contestants from the show became UFC superstars, contenders, and even champions, so every fighter worth his or her shorts should know what will be required of them. Earlier seasons had their fair share of bad behavior, failures to make weight, or athletes in poor shape, but even as late as Season 18, two fighters failed to make weight and were summarily bounced from the competition.
* The Ultimate Fighter: each exhibition bout is placed at the end of the episode. If the in-house antics run long, then it's going to be a short fight. If the fight starts shortly after the episode's halfway point, expect a tiebreaker round.
* The Ultimate Fighter(i.e. before anyone knew what a success it would be), several of the fighters began to complain that while they were being given high-level training from professional coaching staffs, they weren't going to get paid for fighting on the show. UFC President Dana White heard about this, came down to the gym, and let the guys have it.
* The Ultimate Fighter, most early seasons featured an escalating prank war between the fighters. It culminated in one fighter whose California rolls kept getting stolen from the fridge got revenge by masturbating onto one of them, which was promptly eaten by the food thief. From this point on, food theft and contamination became much more rare.
* The Ultimate Fighter tournament and challenged four times for various UFC titles, losing each time. He retired without ever winning a belt.
* "The Ultimate Foe" features Mr. Popplewick, a Dickensian factory owner and dull-minded bean-counter, who bears perhaps some resemblance to the abuse the BBC were subjecting their writers to.
* "The Ultimate Foe" is an embodiment of the Doctor's darkest aspects, from somewhere after his twelfth incarnation, without any of the Doctor's virtue or morals, pure unbridled darkness. The Doctor is not happy.
* The ultimate goal of Chinese alchemy, rather than the western "lead into gold," was to create an elixir that granted immortality.
* The Ultimate Guide, which was written by an author particularly sympathetic to Ashfur, omits his betrayal and attempted murder of Firestar (attempting to frame Brambleclaw in the process) by saying that he "was not a friend of Firestar".
* The Ultimate Haunted House, albeit not very well hidden, that leads to the library. Entering the library is easy, getting out is less so (you have to pull on a specific book).
* The Ultimate Haunted House is one of the monsters in the house, which sleeps in an iron maiden in a torture chamber in the house's basement. It is mindless, bright green, and looks like its skin is melting off, and unusually for a zombie, it attacks with magic curses rather than directly. Like all of the monsters in the house, it is described as "nasty" and cannot be attacked, only fled from.
* The Ultimate Haunted House. It has a will of its own, and angering it by tormenting its inhabitants or destroying objects can have some dangerous side effects.
* The Ultimate Haunted House. There are 13 rooms in the house, the player has to find 13 keys by 13 o' clock, the house is located at 1313 Mourning Lane.
* The Ultimate History of Video Games it, then give the exploded remains back to its previous owner! They fixed this only in the international release, when it was too late to revoke it from the original US port.
* The ultimate humbling, however, may have been 2010: The defending champion Yankees, the team with the most World Series appearances in history, lost the pennant to the Texas Rangers - the oldest MLB franchise to never reach the Series before then. Extra points for Alex Rodriguez - not just the supposed best player in the game, but one the Yanks poached from the Rangers six years earlier - striking out looking to end the ALCS.
* The ultimate humiliation for the scyted chariot (and the war chariot in general)

came when it was deployed against the Romans, with Roman generals apparently getting off on inventing worse and worse humiliations every time they faced them. The first time (Magnesia) they limited themselves on
* The ultimate irony of the final duel is that both Hamilton and Burr swap their flaws around.
* the ultimate job security. Minor infractions with the NCAA, disagreements with the administration, several successive poor seasons and underachieving teams ... none of that seemed to matter until Sandusky's arrest in November 2011. When the facts became clear, Paterno – who had been the head coach since 1966, and part of the coaching staff from 1950-1965 – was quickly outed for failure to show leadership and refer an alleged incident involving the sexual assault of a child (which purportedly was reported to him) to law enforcement.
* The Ultimate Killing Game features an unnamed drug that causes apathy.
* The Ultimate Killing Game has metal bones. That includes his teeth. His friends don't know how much human is actually left of him.
* The Ultimate Killing Game have a cool car, courtesy of Ballard Customs.
* The Ultimate Lucky Student Nagito Komaeda was born on the 28th day of the 4th month. In Japan,
* The Ultimate Maid Kirumi Tojo's birthday is May 10th, which is also known as Maid Day in Japan.
* The Ultimate Matrix Collection they did this to let viewers "triangulate their own position" between the two.
* the ultimate off-road vehicle by saying "If there’s an automotive equivalent to the phrase 'we’ve gone too far,' it's the Hummer H2".
* The Ultimate Ones are embodiments of their respective planets. They are
* The Ultimate Orbital Space Station was one of the most successful examples of this trope - its
* The ultimate, original Clingy Jealous Girl would have to be Zeus' wife, Hera, in
* The ultimate proof that this trope is relative to the setting is the world Q'sal in
* The Ultimate Robot K1-B0 was created on October 29, the Internet's anniversary.
* The Ultimate Rush" by Joe Quirk: Protagonist Chet Griffin is the only rollerblading messenger at a San Francisco courier service.
* The Ultimates (2015) is the only one who could reasonably be called human.
* The Ultimates 2. Odin serves as this for Loki. As a Norse god, Loki has full-blown reality-warping powers, and uses them to aid the Liberators in attacking America and the Ultimates. However, when asked by his allies why he does not use his powers openly, he says that doing so would enable Odin would find him. When Loki finally does openly use his powers, Odin sends an army of warriors of Asgard against him, removes most of Loki's powers, and enables Thor to banish Loki back to Asgard for punishment.
* The Ultimates #6, Wasp flies in front of the Hulk's face and distracts him with a "Mardi Gras special".
* The Ultimates: After Valkyrie breaks free of Mastermind's illusions and decapitates him, Pyro tried to beg for mercy, even invoking his time with the X-Men. It didn't save him from dismemberment.
* The Ultimates: Although the final battle against the Chitauri is public knowledge, the one in Micronesia (where more than 20,000 agents died) remains classified.
* The Ultimates: A major distinction between Ultimate Thor and the usually clean-shaved regular Thor is his beard.
* The Ultimates: A modern variation: the security tapes of the fight of the Ultimates against Hulk are released to the public as a blockbuster DVD.
* the Ultimate Sanction (where Rassilon plans to sacrifice all of Time for the sake of defeating the Daleks) and the Reality Bomb (where Davros created a machine to un-make all particles in existence).
* The Ultimates and became close with Aunt May (specially after Peter's death, that left them alone). If this story was made a bit later in the setting's history, those two could have been them.

* The Ultimates as in the mainstream universe, she has cybernetic implants.
* The Ultimates as Red Harpy, Ultimate Betty gets depowered and held captive by SHIELD for the duration of the universe.
* The Ultimates: Averted: the buildings were filled with people, and Hulk caused massive casualties. The "Hulk never even accidentally killed someone with falling debris because Bruce Banner was always doing subconscious physics calculations" crap definitely does not apply here.
* The Ultimates: Averted. The Chitauri does have it, but the main armada did not use it. As they are in a hurry and do not have time for an invasion, they want to retrieve their fellow Chitauri from earth and blow up the planet, so why care with it?
* The Ultimates: Back in the day, Herr Kleiser boasted that, once Washington was wiped from the map, the Allies would have to find a new leadership, perhaps in Stalin or in the United Kingdom. However, those countries led the Allies on equal terms, the US had no special authority over the UK and the URSS. If either of the three countries had been invaded or taken out of the war, the others would have continued all the same.
* The Ultimates: Betty blames herself for all the destruction that Hulk caused. She thinks that, if she hadn't been so harsh with Bruce, perhaps he wouldn't have injected himself with the Hulk serum.
* The Ultimates between Quicksilver and Scarlet Witch from the main Marvel universe and making it official. When Captain America voiced his disgust and got chewed out by Wasp out for being behind the times, readers were apparently meant to side with Wasp. They did not.
* The Ultimates: Black Panther was actually Cap the whole time? It'd probably be a bit more shocking if it hadn't been so blatantly telegraphed from the outset.
* The Ultimates: Black Widow killed all the Chitauries next to the bomb, except one that looks like the smart guy. He has to deactivate it. He openly refuses. "Wrong answer, idiot!", so let's find some other solution.
* The Ultimates: Bruce Banner has faced trial for the 852 people he killed as Hulk, and waits the verdict. Fury shows up and says that he was acquitted, since the other Ultimates testified on his behalf about how he saved the world. Fury gives him champagne so they can celebrate. But then... Bruce blacks out from the drugged champagne, and they take him and put him on an abandoned aircraft carrier next to a one-megaton nuclear bomb. Of course, if Fury had given the news directly, he risked Banner turning into Hulk right then and there.
* The Ultimates: Bruce Banner is not respected by anyone, not even his teammates. This is less because he's a scientist and more because everyone in the Ultimate universe is an asshole.
* The Ultimates: Bruce Banner thinks that the wifebeater Henry Pym should be left out of the team. Yes, Bruce "Hulk Smash" Banner, who killed so many people in his rampage. But at least he works 18 hours a day trying to find a cure for that.
* The Ultimates: Bruce Banner was demoted to number two, in light of him turning into the Hulk during his investigations of the SSP.
* The Ultimates, but the instructions to turn it off are written in alien.
* The Ultimates...but then at the end of said issue, he gets bitten by a vampire.
* The Ultimates, but Thor managed to teleport it to another dimension.
* The Ultimates by the Colonel after his defeat, as he sarcastically asks Cap if he's going to drop any John Wayne quips on him, maybe finish him with a witty barb. Cap's response is to silently stab him through the heart.
* The Ultimates can only shape-shift into the body of somebody by eating that person. Herr Kleiser threatens to do this to the Wasp, but is interrupted before he gets an opportunity.
* The Ultimates: Captain America and Herr Kleiser had one in the final fight. Nick Fury tried to help cap, but Kleiser tossed him aside and continued his fight with Rogers.
* The Ultimates: Captain America cut Herr Kleiser in half with his shield. It's only a temporary thing thanks to his great healing speed, but still...
* The Ultimates: Captain America has been found, and he's somehow still alive. Nick

Fury is glad because it will be a great adding for the Ultimates program... and Tony because he has the trademark rights.
* The Ultimates: Captain America makes one in the hospital, even having just woken up from a 57 year sleep.
* The Ultimates: Captain America manages to jump to the rocket and, with some explosives, destroy the internal guidance system, so that it goes off-course. He saves the United States, at the cost of his life (or so it seemed for everybody, including him).
* The Ultimates: Captain America wakes up in the hospital. The last thing he remembers is the military operatio at the Chitauri base, which he is informed was a sucess, followed by the Allied victory in WWII. He accepts it, and asks how much time he has been out. Days? Weeks? Months? Bruce Banner starts ranting theories about the super soldier serum, but Cap asks for a straight answer.
* The Ultimates casually killed Tony Stark after experimenting with his grain. He was able to upload his consciousness in his Iron Man suit due to his brain having prolonged exposure to the Infinity Gem in it. So the Infinity Gem gave him mental powers so he can upload his brain into anything with a CPU. With all the gems he later created a new body for himself and uploaded himself in it.
* The Ultimates: Defied by Herr Kleiser. Although the Ultimates fall into his trap and are caught in the ground zero of an atomic blast, he wants evidence that Captain America and his battalion are dead. Keep searching!
* The Ultimates designs in the latest series is one big ball of paradox, while it exists in the present, within its walls generations pass while Reed was expanding it with the outer edges closer to normal time. While inside its walls, time moved at an accelerated rate the closer one got to the Core, so as one moved within the City's limits the further into the future it traveled until the City stopped expanding. Which it wound up taking out Germany and a good chunk of Europe when they reach its current size.
* The Ultimates: Do aliens exist? This question has had people pondering for centuries. Ponder no more: the Chitauri main armada is there in the sky, for everyone to see and film! As they have to retrieve their fellow Chitauris from the planet, blow it up and escape, they did not even bother with cloaking devices.
* The Ultimates duke it out along The Wall (the Vietnam War Memorial) and it is not damaged.
* The Ultimates: During one of their arguments about her mutant status, Henry Pym comments on the Wasp laying "egg-constructs" once a month instead of menstruating.
* The Ultimates duties but in the scene, and had no problem to admit that he was messing a decent pair of army pants...
* The Ultimates explains to Galactus that his name comes purely from the fact that he enjoyed the alliteration; to start with he was actually working with atoms, not molecules, and as his powers and his control over them have grown he's realised that he actually plays with the base information of reality, and is essentially able to manipulate this law to his liking.
* The Ultimates: first he told him that the alien leader had been flirting with Betty Ross, and then that the rest of the armada had been calling him a "sissy boy".
* The Ultimates: For a time, Tony Stark could control machines with the tumor in his brain, which manifested as a child Tony inside his head.
* The Ultimates from WWII awaken in the new century, is amazed by the ammount of money that they paid for a pair of slacks. Back in the 1940s, to get that money he would have required the combined wages of six months.
* The Ultimates has the rest of the world fearing that the US Government would start utilizing these in politically-motivated conflicts after Cap saves some hostages in the Middle East. Which is exactly what they do, crippling a nuclear program in Afghanistan.
* The Ultimates has the Ultimates racing to stop military dictatorships like North Korea from developing their own superhumans.
* The Ultimates: Hawkeye is deadly with anything he can throw at his enemies. When he was captured, they tied him with nothing next to his hand. He then ripped his

own fingernails and used them as projectiles.
* The Ultimates. Hawkeye points that he started with Fury as just a regular spy agency. Now they are sending thunder gods against aliens, and telling Captain freakin' America what to do. What can be cooler than that?
* The Ultimates he died by attracting the attack of several Multiple Men, saving the Triskelion. When Captain America woke up from a coma and mentioned him in disdain (ignoring what he just did), he was told to shut up.
* The Ultimates: Hellcat and Valkyrie are the only gals in the Defenders. Come New Ultimates, it's just Hellcat, as Valkyrie had joined the Ultimates.
* The Ultimates: Herr Kleiser, an alien disguised as a human, looks like an average toned human man, but he can fight well against Captain America and the Hulk.
* The Ultimates: Herr Kleiser lost all his clothes in an explosion, the world is about to blow up, but he won't go out before he could force Captain America to surrender.
* The Ultimate Showdown of Ultimate Destiny away with a rat-tat-tat-tat".
* The Ultimates: Hulk gave one to Thor that sent him several blocks away.
* The Ultimates: Hulk's rampage in New York was not the average superhero fight, but a 9/11-level type of disaster. It was followed by a massive funeral for the people that died in it.
* The Ultimates: Initially, when Bruce Banner was just a timid dork, Betty Ross despised him. When he turned himself into the Hulk, a destructive monster, because he was desperate by losing her, she warmed up to him. And when she saw those satellite photos of him eating Kleiser's instestines like some kind of animal... well, let's just say that she asked Fury for a conyugal visit.
* The Ultimates instead. Their relation, however, proves to be so rocky that she eventually returned with Hank.
* The Ultimates interfere and that nobody ever did something like that for her. And then she kisses him... the first kiss Cap got since being unfrozen in the XXI century.
* The Ultimates: In the middle of the fight, Hulk is attacked by a thunderbolt. Nick Fury asks "What in God's name...?". Yes. It was Thor.
* The Ultimates: In-universe, Nick Fury hired Stark for the Ultimates for his incredible Iron Man armor, but also because of his huge popularity, and how some of it could be borrowed by the Ultimates initiative.
* The Ultimates: It seems that there was a 18% of people who thought that the Chitauri invasion was not real. That it was faked by S.H.I.E.L.D., to justify the budget destined to the Ultimates initiative.
* The Ultimates: Jan and Captain America discuss about the crime in Cap's residential area, and Jan tells him that she hopes that at least he bought a good door lock with the Ultimates' money. Then they get home, and the door has been forced.
* The Ultimates: Jan is a mutant, and nobody knows it: everybody thinks that Pym gave her those shrinking powers. When they were having a marital discussion Pym complained that, as part of her mutation, she eats insects, has a disgusting hygiene, and frequently leaves the bed filled with eggs.
* The Ultimates: Kowalski explains the military stakes at the first issue, so we know (other than it being WWII) what is the fight about.
* The ultimate Sloth punishment plays with this, in that the "666 Pennants Over Perdition Theme Parks" are actually pretty fun... for the
* The Ultimates: Nerd Hulk (a clone of Hulk with the rational mind of Bruce Banner) is just a nerd interested in "Lord of the Rings" trivia, with fears and insecurities, in a team composed by hardened soldiers and military people. No, nobody has any respect for him.
* The Ultimates: Nick Fury had to work with Monica Chang, his former wife, in the Ultimate Avengers and from then on.
* The Ultimates: Nick Fury has served in Vietnam, South America, Kosovo, Gul War One and any modern war to care to number.
* The Ultimates: Nick Fury tells Stark that he's a strange man. Stark replies that he hopes with his fortune in the billions, he'd qualify as eccentric.

* The Ultimates, not all of the Liberators were killed or defeated. Perun, having sat out the big fight, just shows up asking for his comrades.
* The Ultimates: Not as bad as some of the others on the team, but as Tony Stark notes in Ultimates 2, he can be spectacularly unpleasant when dumping women.
* The Ultimates: No, Thor will not join the Ultimates. He despises the military complex that supports them, and the shallow celebrity lifestyle. However, he will help the team if there is some actual crisis that threatens people's lives.
* The Ultimates, of course, but it was enough to send an enraged behemoth of destruction against those ships, willing to prove that "HULK STRAIGHT!!"
* The Ultimates of the Ultimates, and turns out to be a traitor, killing Hawkeye's family and Jarvis.
* The Ultimate Solution, even though this will also lead to Germany's nuclear destruction.
* The Ultimates: Once they secured their position in SHIELD and seemingly killed the Ultimates, the Chitauri displayed their old Nazi flags. Just for a sentimental thing, the Nazis were their allies, but the Chitauri have their own agenda.
* The Ultimates: Only Jan's specially designed outfits can shrink with her. If she's in normal clothes and forced to use her powers, she ends up fighting naked. She doesn't seem to really care.
* The Ultimates- particularly Ultimate!Cap- are quick to treat 616!Hank Pym like he's just as bad as his deceased counterpart just because they're both Hank Pym, even with the Avengers speaking up in his defence.
* The Ultimates: Proposing actors to play their roles, Henry Pym is about to propose one for Bruce Banner... who was entering the room, behind him.
* The Ultimates: Pym slapped Jan, and then immediately repented of it and tried to atone. She's not in the mood for that.
* The Ultimates: Pym stopped Captain America by aquashing him with his giant hand and said "the situation's well in-hand". Banner and Stark were horrorized at the idea that he may have killed Cap right after his return.
* The Ultimates: Red Skull assassinated John F. Kennedy, took part in the Vietnam War, worked for two of the most brutal dictators of the 20th century (Pol Pot of Cambodia and Idi Amin of Uganda), worked for the Russians in Afghanistan and has trained and fought alongside terrorist groups across the entire globe. Basically envision all the terrible shit that occurred during the latter half of the 20th century and he probably had some involvement in it.
* The Ultimates: Red Skull calmly sliced off his own face, just to stop looking like his dad.
* The Ultimates: Sometimes Monica Chang slips into this on missions, including firing a massive cannon that had its own chair attached.
* The Ultimates the Avengers think that Nick Fury is behind a conspiracy, and the New Ultimates that it is Carol Danvers. It is eventually revealed that it was Gregory Stark from the begining, scheming to make both groups fight each other.
* The Ultimates: The Chitauri are an alien race that helped the Nazis back in World War II, but they were defeated. The Americans salvaged the Chitauri tech, and used it to kickstart NASA. Later on in the present, a disguised Kree is defecting from his mission and covertly helps NASA develop their first FTL ship.
* The Ultimates: The Chitauri are not as hammy about this as other comic book aliens, but they still use insults like "human cow" and "walking cancer cells".
* The Ultimates: Th:e Chitauri blow up the office building that Hawkeye and his crew were demolishinging. Black Widow, at the building in the other block, shouts his name in the comlink, ignoring if he was caught in the blast.
* The Ultimates: The Chitauri captured the Wasp, in her wasp size, and placed her inside a test tube. Herr Kleiser kept her around as a pet.
* The Ultimates: The Chitauri have a bomb that can destroy the whole solar system, as a backup plan in case they can't harmonize the world.
* The Ultimates: The Chitauri have decided that there is no more time to try to assimilate earth: it has to be destroyed in a single explosion instead. Herr Kleiser is sad about the loss... he was about to consume and replace the Wasp, but now he will never be able to experiment the female human form.

* The Ultimates: The Chitauri have this power, but a bit more limited: they can only take the form of a human being that they consume.
* The Ultimates: The Chitauri left one in Micronesia. The soldiers found it when it was already in 0.
* The Ultimates: The Chitauri manage to infiltrate several key ranks of SHIELD, and the others simply obey orders without questioning them. This allows them to take control of the Triskelion.
* The Ultimates: The Chitauri tried to harmonize Earth with the help of the Nazis, and that led to WWII. But the survivors regrouped in the jungles, started a mass infiltration, arranged many plans to achieve their goals through more indirect means... and it was all pointless. The Chitauri main fleet shows up, without even bothering with cloaking devices, and informs them that there is no more time. Because of intergalactic reasons, they have to leave the area ASAP, so Earth will have to be blown up and be done with it.
* The Ultimates: The Chitauri want to destroy the free will of the human race. They worked with the Nazis, but kept planning things in the shadows since their defeat.
* The Ultimates: The Colonel fights fairly with Cap at first but signals for help when he's losing. Very shortly after he is killed.
* The Ultimates: The Colonel is a teenager, but as a super soldier he looks like he's in his mid-thirties.
* The Ultimates: The hospital were Jan was being treated after Pym's murder attempt started to get filled by this people, so Nick ordered to take her back to the Triskelion.
* The Ultimates: The Liberators and their backers are motivated by rejection of the American foreign policies, and intended to "Liberate" the US from what they saw as an evil government. They were manipuled by Loki, who organized all this to screw his brother Thor, member of the Ultimates, just for kicks.
* The Ultimates: The Liberators invade the U.S., level the Statue of Liberty, and plan to execute major government figures.
* The Ultimates, the Liberators were superpowered agents from a coalition of "anti-American" nations, with each country contributing a member. Thus, they had someone from Russia, North Korea, Syria, China, and, um, France, all led by an Iranian terrorist.
* The Ultimates themselves subvert this whenever possible particularly in volume 2. The Giant man formula is used on a dozen or so marines (and he gives some to his ex-wife), Iron Man's earlier prototypes are reproduced to arm soldiers (and he builds a suit for Black Widow).
* The Ultimates: The nazi soldiers speak in German, not English (except when they talk to Cap directly). When Captain America storms into the Nazi base, one of the Nazi generals shouts "mein gott! erschiesst es! erschiesst es doch endlich!" (german for "My God! Shoot it! Shoot it at last")
* The Ultimates: There are at least 11 alien species living on planet Earth. S.H.I.E.L.D. knows it, but prevents it from becoming public knowledge.
* The Ultimates: There are two buildings filled by Chitauri, who pretend to be simple office buildings. Hawkeye and Black Widow demolish them and kill everyone inside.
* The Ultimates: The Scarlet Witch uses her magic on one of Henry Pym's robots, so that it loves her. This strange concept completely ruins his AI, and he kills her in a fit of rage.
* The Ultimates: The team discusses who would play themselves in a film adaptation.
* The Ultimates: The Ultimates get ready to fight Hulk at the end of issue 4.
* The Ultimates: The Ultimates go with all their military forces at their disposal to fight an alien invasion in Micronesia. It was actually a trap of the aliens, who detonate an atomic bomb. The Ultimates themselves managed to survive thanks to Iron Man's forcefield, but everybody else was history.
* The Ultimates: The Ultimate universe version of Thor's Mjölnir has an axe attached to it.
* The Ultimates: The Wasp takes Banner to the new base, the Triskelion, and pointed that she would have got crazy working in that rat hole in Pittsburgh. He asks if

turning green and going into a destructive rampage doesn't qualify as crazy... and then points that he is making a joke. She was not amused.
* The Ultimates: The whole team combined had a hard time dealing with Hulk, but then Thor came and smashed his head into the pavement.
* The Ultimates, this is how everything got started... he just wanted Momma Laufey's approval, and it all snowballed into Asgard getting destroyed.
* The Ultimates: Thor is a God-made man, sent by his father Odin to purify the earth.
* The Ultimates: Thor kills Modi, his son with Hela. Tragically, he tells Modi to his face that he is a disgrace and is happy to kill him, but this is a lie and he is close to tears while he holds his charred corpse.
* The Ultimates. Thor might be a god, he might be insane, and/or he might just be a super soldier.
* The Ultimates: Tony's brain tumor was actually an Infinity Gem. How that makes sense is anyone's guess.
* The Ultimates, Tony Stark makes Natasha Romanova her own version of the Iron Man suit for her birthday, then takes her on a test flight over her home city, St. Petersburg, Russia, where it's revealed he's paid the city's entire population to stand in a field spelling out his proposal.
* The ultimate story arc had female lead Brandy about to marry Roger (her fiancé for the second time), who is rich, handsome, and basically everything strip protagonist Frank (who, oh-so-coincidentally,
* The Ultimates to the Wanda/Vision long relation. Loeb wrote the sequel, but made a twist: instead of Vision, the unnamed robot was turned into Ultron. He killed the Scarlet Witch when he realized that she loved her brother and would never love him.
* The Ultimate Stuntman: One of the gameplay styles is a bomb disposal. In it, you have to get rid of microchips by moving a tool and making sure there's always a path that lets you keep going. The number on the chip indicates how many times it must be touched, the ones with arrows push you in the respective direction, the goal chip must be reached last. The bomb acts as a time limit and if the spark goes down the fuse and reaches the bomb, you lose a life.
* The Ultimate Stuntman switches between being a driving game, a platformer, a wall climber, a bomb disposal puzzle, and gliding segments frequently.
* The Ultimates: Tyrone Cash is a withered, crippled dirty old man when he isn't hulked out, living large in a life of crime and indulgence that comes crashing down when Nick Fury comes knocking at his doorstep.
* The Ultimates under sixty feet, as according to his wife, 60ft is the point at which the human skeleton can no longer support its own mass (later generic Giant-Men manage to surpass this, with no mention as to how). His ability is reverse-engineered from Jan's ability to shrink, and she mentions that she can't shrink smaller than an inch because her body automatically knows what its limits are.
* The Ultimates universe, so this Hydra is not quite the same as the mainstream one.
* The Ultimates version of Cap had almost exactly that experience, except that he ended up more traumatized than anyone else. Obviously he got better but still had a scary tendency to beat the crap out of people for violating his personal morals. As opposed to modern heroes who do the exact same thing but have values deemed more palatable because they're modern.
* The Ultimates vol. 2, Quicksilver interrupts another speedster, Hurricane, who's been smacking Hawkeye around, and time stands still around them while they duke it out. Hurricane comments that if they so much as bump into Hawkeye, they'll practically disintegrate him. Quicksilver then pushes Hurricane as fast as he can, which turns out to be more than she can handle; it's rather messy. All this happens in between Hurricane knocking Hawkeye down and Hawkeye hitting the ground. Then Hawkeye tells Quicksilver, hunched over and sweating, to stop goofing off and help him out...
* The Ultimates were not counting with Thor to show up and help. He had asked that Bush doubled the international aid budget, and they took it as a
* The Ultimates: When Hulk thought that Betty was getting away in a military

transport plane, he got nuts and yelled "DON'T LEAVE BANNER ALONE AGAIN"
* The Ultimates: When the team goes to confront Thor, they bring flamethrowers. All it does it burn his hair.
* The Ultimates: When Tony Stark talks with Fury, they make a recapt on their Ultimate prospects so far: Stark, Pym, his wife, and some marine that Banner upgrades once he cracks the Super Soldier formula.
* The Ultimates. When your counterpart's powers include "multiversal reality warping", anything else is going to be a step down.
* The Ultimates who (like her main counterpart) wears black. She is revealed to be a traitor to the team in the second volume.
* The Ultimates, with Hawkeye as Neo, Black Widow as Trinity and the Chitauri as the Agents.
* The Ultimates: With the U.S. literally coming apart at the seams, Steve's returned to being Captain America to keep the nation from falling apart even further.
* The Ultimates: You would think that, once the Hulk has been defeated and the team had its baptism of fire, and some view over the consequences of said battle, the series would be done. Not Quite. Remember those aliens that Cap fought in WWII? They are back... and it's still the same miniseries, not a sequel one.
* "The Ultimate Thrill" sees Batman doing this to Penguin as a lead up to a
* The Ultimate Universe version of the Thing has his condition played for full angst value but this is a younger version of the character. Aside from looking like a monster, he laments that he can't even figure out how to kill himself because he's too tough.
* The Ultimate versions of Swarm and Hurricane are also made female. Bonus points for Hurricane becoming
* The Ultimate Warrior (born Joan Marie Laurer) legally changing her name to "Chyna" (for trademark reasons much like Warrior) in 2007.
* the Ultimate Warrior—who passed away in 2014—actually died in the early nineties and his death was covered up by having another wrestler (sometimes stated to be Kerry Von Erich) impersonate him for his appearance at Wrestlemania 8. Needless to say, it isn't true.
* The ultimate weapon in RuneScape is the Deathtouched Dart. It instantly kills almost anything in the game
* The Ultimate X-Men were subsequently funded by the Church of Shi'ar Enlightenment, who are quite open about their interest in the Phoenix, but see it as a force for good. Too bad they've been infiltrated by Hellfire members.
* The Ultor Corporation in the second game could also be seen as an example. On the surface, they're a respectable megacorporation, having (among other things) renovated the once-bad part of town that gives the series its name into an ultra-modern district, to the city's approval. Dig a little deeper, however, and they turn out to be just as corrupt and immoral as the gangs. In addition to working with the Brotherhood and Ronin, when the gang violence escalates
* "The Ultra Beam". A spectroscope has the label "Spectroscope" on it.
* "The Ultra Beam". Marvin and Wonder Dog do a wheel of feet before running after Ben, the villain with springs on his shoes.
* The Ultra Beasts. They've been known to attack, possess, and kill humans before. In at least one parallel universe, they've destroyed a world. Yet they are Pokémon, of a sort, and at least some of their aggression comes from their desperate attempts to return to their home dimensions. When captured by the protagonist, they're as friendly as any other Pokémon, and UB: Adhesive is trusted enough that it is often given to children as a starter partner.
* The Ultra-Humanite donates money to public television, enjoys classical music, and once reprogrammed a children's toy to tell them the story of the Nutcracker. He's also a white talking gorilla.
* The Ultra League has a boss stage from an earlier stage set to level 3 that always appears on the first playthrough, and in the case of the Dancing Team, it's the boss microgame Punch Out. This means your opponent is "Red Typhoon" Gaz Puncho. Despite having the exact same starting health as you unlike the third opponent in

* The Ultra-Luxe Casino (which includes hotel facilities) is rumored to be this in
* The Ultramar Auxilia serve as the PDF for the Ultramar sector controlled by the Ultramarines. Unlike other PDF, they are disciplined and steeled from training mandated by Ultramarines and the region is prosperous enough for them to be equipped accordingly well - as such the Ultramar Auxilia subverts the
* The Ultramarines and the Alpha Legion were vicious rivals during the Great Crusade and eventually the Horus Heresy because they used doctrines which were similar but also antagonised each other. The Ultramarines' creed was "Information is victory", the idea that no matter how daunting the foe seemed, you could beat them if you knew everything about them. The Alpha Legion went one further and said "Why only focus on the intel
* The Ultramarines novel series features a commissar that was actually terrified of his regiment colonel. This is rather strange, given that commissars stand outside of command structure and officially outrank anyone in their regiment and have legal right to shoot you if they feel like it after filling in some minor amount of paperwork.
* The Ultramarines Primarch Roboute Guilleman is a frequent offender, with fabulously diverse opinions on pronunciation. Row-boat-ay Gilly-man? Row-boot Guh-ill-eh-man? Robert Gilman? That said, how the name of the Dark Angel's Primarch Lion El'Jonson should be pronounced without making it sound
* The Ultramarines Primarch was eventually brought out of stasis and allowed to speak with the Emperor and take a good hard look at the way the Imperium has been crumbling since his absence. He started working on getting the Imperium back in shape and actually started making progress... but now the galaxy is somehow even worse off, with massive Warp storms cutting off entire systems.
* The Ultramarines Second Company Captain, Cato Sicarus, is the most disliked of the already contemptuous faction. In the codex, he had no characterization whatsoever outside of being
* The Ultranauts, the frequently-augmented, transhuman spacer crews of the massive slower-than-light lighthuggers, often have elements of space piracy, as they'll
* The ultra-powerful Genesis Weapons wielded by the ARKS Council of Six in
* The Ultra Sacred water (presumably the water from the Garlic Junior arc of
* The Ultraverse: a flat disc billions of kilometres across with a star in a hole in the middle, on which multiple ecosystems evolved in widely separated regions. All the alien species that visit Earth originate from this single world.
* The Ultraverse from Malibu Comics. A tram car full of every day people gets zapped by alien energy and crashes into a sports car. Everyone gets super-powers, even the sports car driver (Night Man). Cue start to various series.
* The Ultraverse it comes off to everyone else (especially the girl) as a creepy perv trying to hit on an underage girl.
* The Ultraverse. It's effectively a Ringworld that's indefinitely stretched along its horizontal axis.
* The Ultraverse, one of the only ways to gain superpowers was the Jump Start, a piece of alien technology on the moon that would randomly send out rays that gave humans superpowers.
* The Ultraverse was originally constructed as this. The 'Jumpstart' event that gave the other Strangers their powers granted her sentience and allowed her to transcend her programming.
* The Ultraverse, while at other times he manages to gain a scarecrow's straw body again.
* The Ultraverse who tortured him to the point he became one of the world's most notorious villains.
* The "ultraviolet gun" burned the flesh off the victim in a couple of seconds, leaving a rather gruesome skeleton with some scraps of meat still remaining.
* The Ultra Violets got their superpowers from accidentally being exposed to Helitropium, a substance capable of genetically altering any living thing on planet Earth.
* The Ultra Violets have Darth Odor, a genetically modified, purple skunk.
* The Ultra Violets is a children's book series, obviously they can't use the more

colourful originals.
* The Ultra Violets, true to its title, does this frequently. Not only does Iris’ sudden purple hair indicate the first signs of the girls’ powers, but she also later gains the ability to shoot purple rays out of her hands. Additionally, the chemical that gave the girls their power in the first place was purple.
* The Ultravision Video Arcade System was going to be a combination game console and 10 inch color TV.
* The Umbilical Brothers. A few of their routines are improvised, including suggestions from the audience.
* The Umbilical Brothers - Comedians and actors Shane Dundas and David Collins of Australia.
* The Umbilical Brothers have an act that involves a few hammers hitting a koala puppet (the show this appeared on used the trio of puppets as pseudo-mascots and the koala (as he mentions during the act) was always on the receiving end of some rather brutal actions by the other two who were known - aptly - as the Threatening Bears):
* The Umbilical Brothers have a skit that entails a ride in an elevator. As there's no elevator prop, entering the elevator is signaled with a vocal beatbox of "The Girl from Ipanema".
* The Umbilical Brothers, out of nowhere commentary is heard in the theatre, stating they had no idea how to end the current joke; on the DVD it turns out that it's part of the show's actual commentary. The rest of the commentary is frequently sidetracked or interrupted by other characters from the show, and when they do provide behind-the-scenes information it's false. Several times, they claim that various imaginary props and characters were actually present in the theatre, but were digitally removed in post-production. At one point, they admit that a particular imaginary character really was just a voiceover, then claim that it was intended to be a visible CGI-animated character but all the earlier digital object removal broke the CGI budget.
* The Umbilical Brothers Shane often does all of the voices — including David's, who will often simply mime — and all of the sounds.
* The Umbral Underground, whose only goals are causing chaos and recruiting
* The Umbrella Academy (2019), but Five uses his powers to dodge every shot. When the Handler can finally get a clear shot at him, it turns out she already used up her last bullet.
* The Umbrella Academy (2019) currently provides the page image; Klaus ends up accidentally spilling his adopted dad's ashes while reaching for a drink.
* The Umbrella Academy (2019). Especially since they both already had subplots of their own—Alison's desire to reconnect with her daughter who lives with her ex-husband, and Luther discovering much of his life had been a lie—making a romance plot completely unnecessary.
* The Umbrella Academy (2019), forty three woman who were not pregnant that morning randomly give birth to babies, all of whom have some superpower of some sort. The series follows seven of those children who were adopted and raised as siblings, one of whom is powerful enough to end the world.
* The Umbrella Academy (2019) has three big examples with regards to the Apocalypse:
* The Umbrella Academy (2019): Klaus thinks that 'cult' is a very negative term, and prefers his to be called an 'alternative spiritual community'. Allison refuses to play ball and reiterates that he started a cult.
* The Umbrella Academy (2019). Most of the "proverbs" he gives them are actually quotes from 90s pop music.
* The Umbrella Academy (2019) that results in the births of the Hargreeves consisted of women around the world who got pregnant and gave birth on the same day.
* The Umbrella Academy (2019), then explains what he saw to his siblings.
* The Umbrella Academy (2019): When Diego (a 30-year-old man from 2019) time travels and lands in the sixties, he becomes fixated on preventing the Kennedy

assassination. Unfortunately, he goes about this in a way that makes him look like a paranoid lunatic, so he is institutionalized. This is where his brother Five eventually finds him.
* The Umbrella Academy and the only child not to possess supernatural abilities.
* The Umbrella Academy as the main characters. The show was very sly in revealing this, by having her spend most of her screentime with Diego, whose powers are the most subdued out of the siblings, thus she could just pass it off as mundane marksmanship. But when she fights the entire family, she matches their powers exactly.
* The Umbrella Academy, but a flashback shows him walking into a room, a lot of screaming, and then walking out covered in blood.
* The Umbrella Academy. Come season two, she gains a female love interest.
* The Umbrella Academy given Vanya is supposed to introverted and has a inferiority complex concerning her beautiful sister Allison.
* The Umbrella Academy has plenty of this between the adoptive super siblings:
* The Umbrella Academy have been dedicated to trying to stop the Apocalypse — first, the one Five lands in after he time travels to 2019, then the one he sees in 1963. Hopefully, they'll stop causing the apocalypse at some point.
* The Umbrella Academy her mother wanted to make her feel appreciated?
* The Umbrella Academy. He went missing twenty years previous, so why would they still be using it?
* The Umbrella Academy- it's the shared birthday of all seven main characters.
* The Umbrella Academy: Klaus has some... very quotable dialogue. To a lesser extent Five, though mostly because the phrase, "I'M THE DADDY HERE" was never going to not be made into a meme.
* The Umbrella Academy Kraken and Vanya had good reasons for doing what they did back then- and for another, there's a strong argument to be made that Kraken left her first.
* The Umbrella Academy: Number Five is in love with 'Delores', a mannequin who was his only form of company in the post-apocalyptic wasteland for 40 years. Even after being forced to abandon her following his recruitment, he eventually goes on to reconnect with her in the past... namely by stealing her from her original department store.
* The Umbrella Academy of the group who no one trusts with anything important.... With good reason. Vanya is also initially seen as this in the first season, as her siblings were very angry at her publishing of her autobiography and they were raised to think of her as less than for her apparent lack of superpowers. It somewhat shifts to outright fear of her given the reveal of her extremely dangerous abilities.
* The Umbrella Academy, riding a bicycle, dispensing cryptic bits of information, and mentioning that she made everyone. Much different from the comics version, who is a cowboy.
* The Umbrella Academy, scoffs that she can "barely" perform a Paginini caprice. The "Caprices" are among the hardest pieces ever composed for violin, requiring extremely swift movements, perfect control of the instrument and frequent tone jumps. That Vanya could complete one at all, at her age, speaks volumes of her skill. This reference was likely included to reiterate how unfair Reginald's standards were for all of his children.
* The Umbrella Academy seem to be under the impression that the creators intend to have eight seasons, in correspondence to the eight planned issues of the comic book. In actuality there is no such proof that this is the case and the only quote from the runners close to this actually imply that they're aiming for less seasons than eight.
* The Umbrella Academy.) Since they used to date, their position has the usual connotations.
* The Umbrella Academy that had been made in Curitiba to one from Rio.
* The Umbrella Academy; the same year "Tusslin' Tom" Gurney knocked out the space-squid from Rigel X-9 with a flying atomic elbow "...forty three extraordinary children were born to mostly single women, who had shown no signs of pregnancy, in

seemingly random locations around the world." A wealthy entrepreneur tracked down and adopted seven of these children to raised them as a superhero team.
* The Umbrella Academy, tries to cheat at poker by having Ben, a ghost, tell him what the other players are holding. Unfortunately for him, Ben decides it would be funnier to make Klaus lose.
* The Umbrella Academy, Vanya is transformed into a nude White Violin.
* The Umbrella Academy where God gives him a nonsensical lecture before saying the devil wouldn't want Klaus either and sending him back to Earth.
* The Umbrella Academy: While in the 1960s, Diego meets a woman who looks eerily like and has the same name as the robot nanny who raised him as a child. Although he understands that she isn't his mother figure, he still reacts warmly to her, and gives her advice that Reginald isn't all that he seems.
* The Umbrella Academy who's the Chairman of the Board of Directors. This is treated as perfectly normal.
* The Umbrella Coup has a cactus at the florist shop which dies instantly when Grégoire stabs his umbrella with the poisoned tip in its flowerpot.
* The Umbrella Coup: Several hitmen line up to get a shot at Grégoire but he manages to foil all their attempts on his life.
* The Umbrellas of Cherbourg: Surprising in that it's a musical. Guy knocks up Genevieve right before he leaves for the army, and in his absence and her desperation she marries someone else. Years later, after Guy has married a different woman and had a son, Genevieve arrives at his gas station by chance, their daughter in tow. She's obviously moved—but Guy expresses no interest in meeting their daughter, and after a few minutes suggests that she leave. The final shot is Guy playing in the snow with his family after Genevieve has driven away.
* The umdhlebi is an African tree with a slender trunk and branches and a wide, umbrella-like canopy. Creatures coming too close to it, typically in search of shade, quickly suffocate due to the large amounts of carbon dioxide released by the plant; once they pass out, the tree's roots lash out of the earth and drag the victim underground to digest it.
* The Umgah, another alien race from the same series, are so obsessed with genetic engineering that, even though their ships are mechanical, the corridors and interfaces are all fleshy, for easy modification (read: mutation). Unfortunately for interstellar relations, the Umgah have been so free and careless with their genetic modifications of themselves that every last one of them is violently insane and possesses a warped sense of humor and a childlike oblivious cruelty.
* The Umiak didn't use to apply for this, but nowadays they've biologically modified and twisted themselves so much that they might not even
* The Umojan Protectorate is technically allied with the Dominion, but their relationship is deteriorating once the truth of Tarsonis is revealed.
* The umpire is obviously a football ref, and at one point the German bowler throws a football.
* The "Unabomber" Ted Kaczynski believed this, as noted above. In his
* The "Unabomber" was notorious partly because his attacks, successful or not, were practically devoid of useful clues. The bombs were made of atypical scrap parts and hand-carved wood, never contained any fingerprints (though one contained
* the Unabomber.. WNYC's Radio Lab covered this story in one of their pieces titled "Oops".
* The Unabridged Memoirs of Darth Plagueis the Wise-aligned group on his homeworld, thus leading to his impeachment and weakening the Republic even further.
* The Unabridged Memoirs of Darth Plagueis the Wise and "confessing" to being Darth Sidious.
* The Unabridged Memoirs of Darth Plagueis the Wise fleet, ending his blitz, but in the process lose a significant number of their own ships. Plus, the blitz has already devastated a vast swath of Republic territory.
* The Unabridged Memoirs of Darth Plagueis the Wise manipulates his way into the Supreme Chancellorship, he reassigns the office's contingent of Senatorial Guards elsewhere, and replaces them with a handful of handpicked Jedi, whom the media dub the "Chancery Knights".

* The Unabridged Memoirs of Darth Plagueis the Wise, often carrying out purges in order to eliminate supposed "Republic spies".
* The Unabridged Memoirs of Darth Plagueis the Wise on every visible military site on the planet, allowing his forces to then land and steal and/or sabotage all the infrastructure they can, before then fleeing the system to rinse and repeat somewhere else.
* The Unabridged Memoirs of Darth Plagueis the Wise this way, and it's all gone horribly wrong for him since.
* The Unabridged Memoirs of Darth Plagueis the Wise to claim the office of Chancellor, the previous Chancellor having been killed in the bombing.
* The Unabridged Memoirs of Darth Plagueis the Wise, which captures and experiments on him, until he manages to get free and slaughter them all.
* The Unadulterated Cat describes various games cats play to amuse themselves. One of them is Wet Cement. The basic play is simple; run through some wet cement. Scoring maximum points, however, requires careful judgement and timing, to hit the cement when it's still wet enough to leave clear paw-prints, but hard enough that smoothing it out again is going to be a tough job.
* The Unadulterated Cat mentions this as one of the indignities that occurs to a cat in a house with children.
* The Unadulterated Cat uses this as one of the major topics of the book.
* The Unadulterated Cat warns against giving the cat one. One of the cartoons features a man standing in the doorway calling his cat by name: "Sperm Bank!"
* The unanimated Perfect Zeong, on the other hand, would have had the legs (with the torso thrusters moved onto them). It would likely have been slower (due to the added mass) and a somewhat larger target, but more agile (better movement from the legs). Given that Char has a history of using his mobile suits' feet as weapons, the very large legs of the Perfect Zeong would have allowed for some fairly impressive kicks, too.
* The Unapologetic: A character who doesn't apologize for their misdeeds.
* The Unapologetic: I don't care about anyone who says I hurt them. I won't apologize to make them feel better, because I regret nothing.
* The Unapologetic: I don't have to apologize. I'm too great for that kind of stuff.
* The Unapologetic: You feel no remorse and refuse to apologize for your crimes.
* The Unapologetic: You're immature because you don't apologize for your actions.
* The Unas from provided one of the few chances for Daniel to actually flex his translation muscles in a series otherwise filled with
* The unaugmented are sometime called "Natch" (from Natural), but in an Inversion, any "Natch" calls themselves that as a point of pride.
* The Unauthorized Autobiography, which implies it is a common ability of VFD members and mentions people disguising themselves as a chest of drawers, a street, and a pickup truck.
* The Unauthorized Biography of Reinhold Messner by the Ben Folds Five.
* The Unbearable Bassington, the last chapter ends with Francesca Bassington getting word of her son Comus's death; it horribly sours the ironic tone of everything that has gone before, while Comus is a poor excuse for a tragic hero. And a few moments later that the other love of her life, her treasured Van der Meulen painting, is "a splendid copy, but still, unfortunately, only a copy”.
* The Unbearable Lightness of Being, set in the Prague Spring, was filmed in France and Switzerland as communist Czechoslovakia still existed at the time. Ironically, the Czech Republic would later become a frequent target of this trope.
* The Unbeatable Squirrel Girl are all titled with pop music quotations, with the word "girl" replaced with the word "squirrel".
* The Unbeatable Squirrel Girl fics. Yes. Asking Thor if there are cats in Asgard is important research!
* The Unbeatable Squirrel Girl, Loki claimed that the last time Ratotoskr was loose, "all the raptors got replaced by hairless apes who invented fax machines."
* The Unbeatable Squirrel Girl. Mole Man threatens to destroy various buildings until Squirrel Girl goes on a date with him. This just makes her decide to beat him

up instead of trying to talk things out.
* The Unbeatable Squirrel Girl: Sinister scientist Melissa frames Squirrel Girl for animal attacks in New York. Even after Doreen captures her, Melissa gloats she'll never be trusted again and Melissa will skate by on charges. At which point, the cops and media have their phones blown up by messages from just about every other hero in the Marvel Universe talking of how much Squirrel Girl can be trusted, this is an obvious frame-up and a few (Thor and Hulk) warning that "you arrest her, you answer to us." Not surprisingly, the cops decide anyone who has the backing of so many heroes can't be the bad guy and arrest Melissa.
* The Unbeheaded King. Later she admits in a drunken fit that she sold information of his whereabouts to some Xylarian mercenaries who go after him.
* The Unbelievable Gwenpool abilities for the first time, one of her first tests is to see if she can interact with text boxes, so she creates one filled with random, rambling thoughts. The resulting wall of text is so big, it nearly kills Gwen by throwing her out the window of her bedroom.
* The Unbelievable Gwenpool, and uses her fourth wall powers to create surreal situations such as her scaring the artist so his coffee cup would spill on the comic.
* The Unbelievable Gwenpool Gwen explains to the team her basic plan, but not the super-secret backup plan because she knows that plan will not work if she reveals it before the dramatically appropriate moment.
* The Unbelievable Gwenpool: Gwenpool references a modern take on this trope when telling MODOK why she absolute needs the next mercenary job.
* The Unbelievable Gwenpool in her life. (It was too meme-y for her tastes.) It's actually a corruption of her real name, Gwen Poole.
* The Unbelievable Gwenpool protagonist demands the previously-unnamed Officer Gray to tell her her name to promote her from being an extra, additionally claiming that "by the laws of the narrative that drives our existence in this fictional world... we will meet again." They eventually do.
* The Unbelievable Gwenpool. She also almost lead her team to victory against Deadpool by envisioning the situation in gaming terms... unfortunately then she gave him the idea of a meta off that they couldn't win.
* The Unbelievable Gwenpool, she is sure she will win because he's just a guest star in her book. Deadpool points out that he has an enormous fanbase and there is no way a D-lister like her could kill him which he demonstrates by easily overpowering her and her team. The only way she survives is by pointing out that the low-tier villain that trapped them and forced them to fight (the aforementioned Arcade) is the actual antagonist of the crossover which makes Deadpool realize they should team up to go after him instead.
* The Unbelievable Gwenpool's popularity while he's an A-Lister with hundreds of issues, merchandise and the highest-grossing R-Rated movie of all time - there was no way she will win.
* The Unbelievable Gwenpool universe, but there's the promise that Gwen's life in her own world could improve, and she'll be happy. The page even ends with "The End" at the bottom. The next page is the letters to the editor, which show up at the end of every issue. And the real, FINAL page shows that Gwen notices the little "The End" at the bottom of the page and picks it up. When she drops it, it breaks, and a "To be continued..." shows at the end of the page, letting us know that the original ending wasn't the finale.
* The Unbelievable Gwenpool, we hope you grow up to the responsibility.
* The Unbelievable Gwenpool, where she notices the "The End" picks it up, then notices the "To be continued..." replacing it and drops the "The End" in surprise so it shatters.
* The Unbelievable Gwenpool, who uses his magic to alter some records and memories to solve her problem.
* The Unbelievable Gwenpool work), but unfortunately for Batroc no writer ever bothered to establish one for him. This probably just makes the revelation sadder.
* the unbelievable strongman for the Universal Wrestling Association's World Championship Belt and reigned supreme in Lucha Libre Internacional for over a

decade. There was just one setback throughout this for him, but a recurring setback. Losing to Mil Mascaras.
* The Unbelievable Truth At the end of one episode, David Mitchell manages to call Frankie Boyle "Spanky". Much embarrassment and taunting follows as the time allows.
* The Unbelievable Truth claimed that they were invented by Baron Felix von Barcode, a contemporary of Michael Electricity and Sir William Shaving-Foam.
* The Unbelievable Truth facts within a list of those that are, of course, Little Known.
* The Unbelievable Truth have called back to jokes or topics from 'an earlier recording' or 'some time ago' instead of half an hour earlier that afternoon.
* The Unbelievable Truth In one episode, Henning Wehn vows not to buzz in again for the rest of the game (since as per the rules, buzzing incorrectly loses points). Several years later, Susan Calman did much the same thing. After being the first person to buzz in that episode. She proved much less capable of maintaining her silence than Henning.
* The Unbelievable Truth. Lampshaded by John Finnemore in Series 12, Episode 6, on the subject of guinea pigs (the second one was true):
* The Unbelievable Truth loses a point for an incorrect challenge. As a result, many panellists are now cautious about long lists, so it's probably time to start hiding truths in them again. Another tactic favoured by Susan Calman and some others is making the lecture more of an utterly surreal narrative, so that nobody is even sure what it is they've asserted, never mind whether it's true or not.
* The Unbelievable Truth, Shane Jacobson was giving a lecture on Vikings when Sam Simmons claimed that he'd always thought Vikings were mythical.
* The Unbelievable Truth's list of things supposedly invented by Thomas Edison:
* The Unbelievable Truth's so ugly, I'm concerned about her self-esteem."
* The Unbelievable Truth. The four guests give a lecture on a particular subject that is full of lies, except for five truths scattered throughout, and the others have to pick out the truths as they go.
* The Unbelievable Truth: the instrumental part of 'My Patch' by Jim Noir.
* The Unbelievable Truth, where the object is to smuggle truths past unnoticed amid a lecture that is mostly lies:
* The Unbidden sends itself texts that give very good advice, so that the owner comes to trust it.
* The Unborn. A pregnant woman takes part in an experiment where she's hooked to a super-computer. The fetus begins communicating with the computer and controlling the mother through hormones. Much horror ensues, including a failed abortion attempt, and worries about the baby being some sort of monster when born. At the end the baby is born, and is perfectly normal, hence a subversion.
* The Unbroken are the only army to earn the otherwise deeply racist Disfavored's begrudging respect. Before Kyros came, the Unbroken were never conquered in all the many wars that tore apart the Tiers. Even when Kyros dropped
* The Uncanny, and give his young mistress and aspiring actress a chance. The cat of his wife avenges her.
* The Uncanny, Frank tosses Wilbur's manuscript into the fire, after receiving an unnerving stare from his cat. The manuscript goes up in flames, destroying all evidence of the conspiracy Wilbur had uncovered.
* The Uncanny. Her cruelty to Lucy earns a terrible fate at the ends of her cousin and her cat.
* The Uncanny: In the "London, 1912" segment, both Janet and Michael die because they attempt to destroy the will that will remove Michael's inheritance.
* The Uncanny, Lucy tells Angela not to step inside the circle because it might be dangerous, knowing that it will cause Angela to do exactly that.
* The Uncanny, Miss Malkin cuts her spendthrift nephew out of her will and leaves her entire fortune to her cats.
* The Uncanny X-Men on NES. Your (forced) companion has hopeless AI and a ranged-attack companion will spam their weapon at random. The game becomes significantly easier if you get the companion killed as quickly as possible.
* The Uncanny X-Men with a Susan B Anthony dollar, throwing it into the sensor

bubble of the SHIELD Helicarrier to disable its sensors to allow her to effect a rescue of Michael Rossi. However, she was under the influence of Carol Danvers, who knew just where to throw the coin to make it effective.
* The Unchained-like state due to their paradoxical nature until the demon decides if the statement's true or not, regardless of its actual trueness. A demon can say "The sky is purple", decides it's true, and any and all supernatural truth detection (except for a Fractal's ability) cannot see through the lies, period.
* The Unchained, Tobi throws the regenerator, Hidan, from the top of Sky Island, ten kilometers above sea-level, with only vague directions about what to do when he hits the ground.
* The uncharming, pasty, flabby, big-nosed Ray Romano is paired with decidedly better-looking Patricia Heaton (especially notable in later seasons, when Ray wasn't aging so gracefully, and Patricia had used a bit of surgical help to maintain her appearance). This was directly addressed in one episode, which had Debra accidentally implying that she was more attracted to the tall, dark, handsome, and well-groomed Robert, much to Ray's consternation. It also got
* The Unchosen One. And a whole mess of other people, and screwed up many more (Cedric and Neville's parents are two of the many, many examples that Harry thinks of when Dumbledore poses the question to him).
* The Unchosen One: The power to change the reality lies not in the hands of a few chosen, but in the hands of every ordinary person.
* The Unchosen One: They fill out all of the brackets and parameters of being The Chosen One without actually having been chosen.
* The Unchosen One, Trixie agrees to accompany Twilight on a mission (she's acquired a strange kind of magic immunity that will be useful, and also Twilight's developing a crush on her). Luna insists on outfitting her with equipment, including a set of royal armor. Then a guard tells Trixie that she's now counted among them and honorbound to protect Twilight, or bring shame on the entire Royal Guard (including a certain former Captain who happens to be Twilight's older brother). Trixie is... less than happy to be conscripted this way. Twilight seriously entertains the idea of keeping her.
* The Unchosen One: You don't need to be chosen to become a great hero.
* The Uncle Floyd Show, an offbeat kids' show on the New Jersey Network, had Julia Stepchild creating some concoction in which the oven is preheated to "On."
* The uncle of the two murderous cannibals masquerading as vegetarian chefs in the weird horror-comedy
* The uncle, who is implied to be some kind of all-powerful digital being.
* The Unconquerable Man, an alternate-universe episode where Gaheris Rhade - the main character's Nietzschean second-in-command that betrayed him in the pilot - replaced Dylan (said main character). Gaheris ends up so bitter about how the Nietzscheans turned out that Harper (a character with little reason to be fond of Nietzscheans) calls him "the only one I know that hates Nietzscheans more than I do".
* The Unconquered Sun has appeared in the form of a handsome four-armed human since the time when humans became the dominant race of Creation. Prior to that, he appeared as a golden scaled humanoid tyrannosaurus in honor of the Dragon Kings, who were his most ardent worshipers. He's also capable of assuming practically any form if he wants to make himself more (or less) comforting to another. His reason for assuming other forms is partially as an expression of respect and solidarity, partially for the sake of being comforting and partially because his true form (a humanoid figure of molten gold and obsidian studded with galaxies, with blazing eyes and countless arms) would
* The Unconquered Sun went into one shortly before the Usurpation, and has pretty much withdrawn for 2000 years as a result. Let's put it this way: in his stronghold at the heart of the Daystar, there's a courtroom. In that courtroom, there is a list of people found guilty by the judgment of the Unconquered Sun. The last name listed is his own.
* The uncontrollable teenage sociopath Joffrey would ordinarily take on the role in contrast to his sweet-natured and well-behaved siblings Tommen and Myrcella, but

is never treated like this due to being his mother's decided favourite and because he had too much power for anybody (except perhaps his grandfather Tywin Lannister) to challenge directly. Since he was seen as too weak to hold power, meek, good-hearted Tommen was liked by the adult Lannisters but also treated as a bit of a black sheep.
* The undead and related (vampires, werewolves, bogeymen) sometimes refer to humans as "Normos" (short for "normal"), as seen with Shlimazel the bogeyman in
* The Undead are believed to be unholy abominations and are attacked on sight, requiring an undead PC to hide their skeletal body. However, all potential companions and most NPCs important to the main story are fine with it, even if the PC reveals themself as undead in their first conversation ever.
* The undead aren't so fearsome when you have access to Galvanic weapons like the Van Haller Lightning Gun and its big brother, the Van Haller Death Ray (which lives up to its name) in
* The Undead as their favored food source. Of the two, umbral dragons prefer to feed on incorporeal undead such as ghosts and specters, while cairn linnorms, which cannot physically interact with ectoplasm, stick to the corporeal kind. That said, both will happily feed on humans if no better meal presents itself.
* The undead campaign's final mission Under the Burning Sky is another
* the undead Chinchos pop out of the sand at night and go after Mario in groups. They're weak but aggressive and never stop spawning. Since they don't go onto hard surfaces, the locals built their town strictly on brick and stone and don't come out at night.
* The Undead: Dead people who have (sort of) come back to life, but not perfectly.
* The Undead Express, features a group of vampires in New York who live in an abandoned station.
* The Undead. From what we've seen of the Jaghut Tyrants they also count, as do Annomander Rake and many of the series other badass characters.
* The undead grow stronger the older the remains that went into their reanimation are. This culminates with Harry reanimating a Tyrannosaurus' skeleton. A
* The Undead, his punishment was to listen to them repeated improperly, which is apparently worse.
* The Undead, including Vampires, are completely unable to reproduce. Except by raising more corpses with magic.
* The Undead in their ranks, even in high-up management and in their board of directors.
* The Undead On one side of the spectrum, it's just lack of heartbeat and skin that's cool to the touch. On the other, they're literally a moving, rotten animated corpse.
* The undead pirates of the Vampire Coast use flocks of undead bats similar to the Counts', alongside much bigger, living bats that roost within their ships and which in battle carry zombie gunners in their claws.
* The undead race is made up of sentient zombies, brought back in order to have an unkillable horde, as they can lose limbs, organs, even be decapitated, and still put themselves back together. Unfortunately for their creator, they later ended up with free will and personalities of their own, so he devised a way of killing them off permanently that means magically frying them to ashes. As demonstrated on Hannah in Dan's flashback to his first adventure.
* The Undead Schoolgirl: Dead Pulse and doesn't feel pain so she's extremely cavalier about injuries, including dismembering herself to show off her Quirk.
* The Undead Schoolgirl: Dead Pulse. Everyone who meets her wants nothing more than to protect her optimism, including Bakugo, Gunhead, Mirio, and Shinso.
* The Undead Schoolgirl: Dead Pulse, Mei meets Izuku and promptly declares that with Izuku's help, she'll make so many babies. Everyone's aghast at her declaration until Mei explains she means support gear.
* The Undead, such as vampires and zombies, as well as the Pillar Men.
* The Undead: You're only partly "alive" after you come back from the dead.
* The Undefeated dealt with a group of Confederate soldiers who chose to move to Mexico and offer their support to Emperor Maximillian.

* The Undefeated would much rather play with the kids than perform as the unit's undisputed champion at fisticuffs.
* The Underburbs. Countess Winifred Pale, a vampire, begins a world domination plot by turning a small human town into part of an evil dimension, transforms residents into monsters and effectively makes every day into Halloween.
* The Underdog by Spoon features the refrain "You've got no fear of the underdog, that's why you will not survive."
* "The Underdweller" by William F. Nolan has the world populated by children because
* The Underdwellers, but falls in himself. However, the Sewer King laughs and explains that his alligators are 100% loyal and would never harm him.
* The Underdwellers" spotlights a villain called the Sewer King who never appears again. He's sufficiently creepy for a Batman villain, but it's just as well he never returned, since he was really only good for one story (that is, showcasing the evils of child slavery).
* The Underground gives George Edelman mouth-to-mouth after rescuing him from drowning in a river (where the Animorphs, as birds, had carried George after he tried to jump out of a building).
* The underground hatch (and likely their old city of Beautopia) that Susan Strong and the Hyooman tribe live in starts out this way on
* The underground layout of AQ40 is such that the stairs on which you fight the first boss are directly above the chamber just before the final boss. One guild decided to use a third party hack tool to remove the stair's texture
* the Underground with no emotions or thoughts beyond the surface. Again, you wouldn't know it looking at her.
* The underground WWII Cabinet War Rooms in London did this trope with classic British understatement. Their air raid alarm was a modest doorbell at the exit stairs, with the sign "This bell ringing indicates immediate danger overhead". Bunker occupants were thus warned that going outside was temporarily inadvisable.
* The Underking of the Drogbar in Highmountain is explicitly stated as being far less dangerous than he could be, simply because the Hammer of Khaz'goroth that he wields is a tool of creation rather than an
* The Underland Chronicles Gregor at least gives her the respect she deserves.
* The Underland Chronicles, Gregor, Lapblood, and Mange nearly get eaten by plants described as looking like "giant yellow smiles" as they're traveling through the jungle. By the time Ripred rescues them, Mange is already dead.
* The Underland Chronicles, her talent with puzzles becomes incredibly useful.
* The Underland Chronicles, if it weren't for the prophecies, Gregor would not be involved in any of the Underland's battles. And he isn't always happy about it.
* The Underland Chronicles money: the ending of the book has the main character (who is a young pre-teen whose family is in dire financial straits) get a special gift from the inhabitants of the Underland. However, due to a lack of packing paper underground, the medieval-era society instead packs the box with the only apparently useless paper in ample supply: surface-money, taken from the wallets left behind by other surface humans who had died underground.
* The Underland Chronicles refuse to believe that Twitchtip is dead, mostly because Gregor (and the audience) only found out about her "off screen" death through a bit of intercepted information. Some say she faked her death and is out running in the Underland somewhere while others say the rats were just lying to each other.
* The Underland Chronicles says this to Luxa, trying to convince her to side with him in his betrayal.
* The Underland Chronicles seem largely unchanged from plesiosaurs though, aside from losing their eyes from living underground.
* The Underland Chronicles seems hellbent on making sure Gregor and Luxa never go on a date.
* The Underland Chronicles: she's a ruthless general willing to resort to almost any tactic to win, he's a pacifist at heart who always tries the diplomatic option first. When Gregor comments on how odd it is that they are married, Vikus admits it has always been somewhat of a puzzle to them as well.

* The Underland Chronicles start, Gregor didn't get to be much of a kid.
* The Underland Chronicles tend to mix up verb and subject placement as well as using repetition of certain sentence elements, such as "Do it, I can, do it," or "be small Human, be?"
* The Underland Chronicles that he can no longer wear a swimsuit or light summer clothing without a really good cover story. By the final book, he's simply given up ... it would take a car accident or falling through a plate glass window to explain everything.
* The Underland Chronicles: The mice are named after mathematical principles (Cevian, Cartesian, Euclidian, Heronian…)
* The Underland Chronicles: The rats have compound names, usually violent — Ripred, Gorger, Makemince.
* The Underland Chronicles, the Underland is located directly underneath New York. Of course.
* The underlying problem here was often that many of the victors immediately got into conflicts over territories and spheres of influence with each other, e. g. Italy and Yugoslavia, Poland and Czechoslovakia, France and Britain (over parts of the former Ottoman Empire and also over the policy towards the new Turkish state). Another problem was that the League of Nations and the European system of defense treaties was irreparably weakened by President Wilson losing his domestic support, which led to the United States refusing to ratify the peace treaties or to join the League.
* The Underneath. Hawk Man can save himself from Grandmother's venom by transforming into a hawk, but refuses to do so due to not being able to change back and ends up dying.
* The undersea world can also represent childhood while the human world represents adulthood, with the mermaid's journey either portrayed as tragic
* "The Undersea World Of Fifi" had Elmyra searching for sea monkeys, and it ends with her draining it and having her say the exact same line as baby Plucky did.
* The undersea world of the merfolk can be seen to represent the pagan world, while the human world represents Christianity, which requires more sacrifices and hardship than paganism but which promises an immortal soul and rewards after death.
* The Undersiders were created when a handful of isolated no-name teenage supervillains were recruited via a blend of bribery and coercion by a
* The undersized, weedy, egotistical villain Odin "Meatman" Quincannon has a suitably oversized weapon (a sodding great magnum — not compensating for anything of course). When he tries to shoot it one-handed, it breaks his arm.
* The Undertaker 1990. Exactly thirty years later, at the same event, he made his final farewell to the WWE Universe.
* The Undertaker, a Ghoul whole steals souls and buries people alive, was considered the GOOD guy in all his encounters with Jake the Snake.
* The Undertaker alive, filling the tomb with concrete. Bearer returned with no explanation. Justified in the Bearer case: the live audience saw an extended ending to the burial clip, with Bearer surfacing for air and being stretched out of the arena. The following Smackdown he was announced as alive but "gravely injured" to write him out of the storyline. It also helps that said return took place about six years later.
* The Undertaker also fit this example, as they will attack anybody they feel is a threat to them, not caring whether they are a Face or a Heel.
* The Undertaker and a hot sequence at the end often involving wrestlers kicking out of each other's finishers. When new wrestlers came in from other companies with fresher, more physical styles, they were often kept out of main events for "not knowing how to work," and the "main event" style would often be castigated by critics and fans alike.
* The Undertaker and would allude to his past by shouting "Old School" when he did the same maneuver.
* The Undertaker appears on the Armageddon 1999 poster, a pay per view he didn't even attend.
* The Undertaker (a rarity these days). Fans who ask him, at appearances, about

Mark Callaway usually get the answer "Marc Callaway is a dead man, now."
* The Undertaker, as Mark "Undertaker" Calaway is an avid biker in real life. He currently uses the zombie gimmick.
* The Undertaker banned the move both for petty reasons as well as the safety of the superstars. Later on, after the ban was lifted, the move was named the "Hell's Gate" and Undertaker routinely uses it to finish matches, though it no longer causes the opponent to cough up blood.
* The Undertaker being Kane's father, the Deadman received quite a few beatings and insults. But it wasn't until Paul Bearer called Taker's mom a whore live on TV that he sprung into action and gave his former ally the asskicking he deserved. Even the Lord Of Darkness loves his mama.
* The Undertaker biker gimmick of 2000-2003. Ironically, when he sported just a chin goatee with no mustache from late 1998-1999, it was arguably when his character was at it's most evil, as leader of the Ministry of Darkness stable.
* The Undertaker, but less so during his biker gimmick. Being a soul-stealing zombie gravedigger, it came with the territory. Besides the standard monster endurance, he could also control electricity and instantly move through darkness, helping to his supernatural side.
* The Undertaker certainly has this reputation through his many years of service and spellbinding matches.
* The Undertaker, despite Undertaker at least and some of his cronies apparently having genuine supernatural powers of their own.
* The Undertaker during face runs will often have segments or promos that count as this, with the various mind games and scare tactics they use to scare the living hell out of their heel adversaries.
* The Undertaker, during his biker gimmick days, once threatened someone, "I'm gonna kick your teeth so far down your throat, you'll be able to chew your own ass off for pissing me off!"
* The Undertaker event "floated" to the ring via a moving platform concealed under fog.
* The Undertaker features Barnaby Gold; an undertaker turned gunslinger. Gold is primarily a quick draw, although he wears his left hand gun on a swivel on his belt, which allows him to turn and fire it from under his long black coat.
* The Undertaker for a few years but is eventually restored to his mythical gimmick.
* The Undertaker from utilizing him to attack and injure other wrestlers who had petty squabbles with Teddy? Nope.
* The Undertaker has a couple aspects that wouldn't work for a younger wrestler new to WWE:
* The Undertaker has been killed and brought back to life lord know how many times in the 20+ years he's been around.
* The Undertaker has recently developed his own sequence: running clothesline in the corner, snake eyes, running big boot, leg drop, then either a chokeslam, Last Ride, Tombstone piledriver, or Hell's Gate.
* The Undertaker has the ability to call down lightning from the heavens, though he mostly uses it for dramatic effect and not as an attack. (If he did, his matches would be over rather quickly.)
* The Undertaker, head of said Ministry, initially started wanting revenge for the death of his father the Sprite Eater, namely Akuma, for doing the deed. He eventually grows out of it and becomes focused on his own self-improvement and power growth.
* The Undertaker. He'd tie his "sacrifices" to a large T symbol and hang them above the stage.
* The Undertaker; he just targets faces or heels depending on his current alignment.
* The Undertaker, he suffered: a dislocated shoulder, a concussion, had a tooth pop out through the roof of his mouth and get stuck in his nose, a hole torn in his lower lip, and he had dozens of thumbtacks stuck in his body by the end of the match. His reaction to all of that was not having one.

* The Undertaker higher register that he had inflected all these years.
* The Undertaker himself tended to be one such implacable man, regardless of his alignment, and defeating him tended to be treated as
* The Undertaker (his special nickname for his fans) to provide him with the power he needed to win the match.
* The Undertaker, in Deadman form, also has a good deal of fog covering the entranceway as part of his terror-inducing entrance.
* The Undertaker in modern times when most wrestlers are less cartoonish, yet the Undertaker still is portrayed as a supernatural force.
* The Undertaker) in the business. Undertaker, however, is good at each category.
* The Undertaker is about retribution for some unspecified offense and the chorus includes the line "There's no forgiveness this time."
* The Undertaker is also one, unless he's cutting one of his amazing promos.
* The Undertaker is a natural redhead (or at least it was before it went gray), but dyes his hair black most of the time.
* The Undertaker isn't making one of his big, dramatic entrances, he's doing this. Many a hapless victim has heard the gong, had the lights go out, and found Taker standing there when they came back on.
* The Undertaker is so good in this role, he doesn't even have to get beat to prove the new guy is credible. From
* The Undertaker is very good at selling this trope, often to the point of setting up his finisher only to stop because his knee or foot collapses in pain.
* The Undertaker. It does not help that the last couple WMs have had his match the best match of the night (and some times the only match worth watching).
* The Undertaker like their head is hitting the mat harder than it actually is. And when using it outside the ring (usually at the top of the entrance ramp), camera angles can be used to hide the fact that the target's head didn't actually hit the floor at all.
* The Undertaker logic suggests Kane would be the more likely, given he is associated with fire and all.
* The Undertaker loves this trope. How many times has he been kayfabe killed, only to inexplicably come back very much alive to terrorize his opponents when everyone thought he was gone for good?
* The Undertaker—that he personally buries the bodies of every person he kills.
* The Undertaker much prefers his reviled "American Badass" gimmick than the quasi-supernatural "Deadman" that fans love.
* The Undertaker once again becoming the "Dead Man Walking", Kane regaining his mask, are generally met with a huge pop.
* The Undertaker once claimed that there are three things that can't be beaten: death, taxes, and The Streak.
* The Undertaker. One of the mind games he pulls is this, after Randy goes to calm himself in a restroom after Undertaker begins scaring him shortly after an in-ring promo.
* The Undertaker points to someone or something during promos with the hand holding the mic. Always.
* The Undertaker returned a few months later without explanation. The Undertaker does not seem discouraged by this.
* The Undertaker, roaming the West and staying one jump ahead of the bounty hunters who come after him.
* The Undertaker's cross, Steve Austin's smoking skull, The Rock's Brahma bull, Shawn Michaels' broken/bleeding heart, etc.
* The Undertaker's Gone Bananas by Paul Zindel, the teenage protagonists find that their neighbor has his wife's body and his girlfriend's head rolled up in a carpet. They end up stealing his car, with the carpet attached to the roof and taking in on a high-speed chase in order to get the cops to believe their story.
* The "Undertaker" sketch, about a man who goes to an undertaker to give his mother a burial and the undertaker suggests eating her instead. This skit was
* The Undertaker, so they could have the Deadman snub him if necessary and the fans

wouldn't feel too cheated.
* The Undertaker that he was jumped by Orton and his stable in Unforgiven 2008, making him lose without even entering his title match, and thus giving him a pretty valid reason to go after Orton for Wrestlemania 27.
* The Undertaker. The Heartbreak Kid cast himself as the "Light" that is fated to defeat the "Darkness" embodied by the evil Deadman, and consequently end the latter's legendary winning streak.
* The Undertaker, the loser, was at least able to walk to the back under his own power. This would later be the reason for their rematch one year later at WrestleMania 28. Undertaker wasn't happy with him having to be taken out of the arena on a stretcher.
* The Undertaker, the Undertaker's manager until 1996. The story was Bearer worked in the funeral home run by Taker's parents (Bearer was a licensed mortician/funeral director in real life) and the mother made a pass at him, resulting in a one-night stand ... and Kane 9 months later.
* The Undertaker tied to the back of his motorcycle and was dragging him around backstage only for Hogan to go crashing into a pile of empty cardboard boxes, while the announcers played up how painful that apparently would be.
* The Undertaker to chop holes in the casket. Then he doused it with gasoline and set it on fire with a book of matches provided by Bearer.
* The Undertaker took up a cape during his "Ministry Of Darkness" phase.
* The Undertaker to "Roman sucks!" to "Fuck you, Roman!" to even "Go! A-way!" Even the commentators acknowledged that Reigns was booed out of the building.
* The Undertaker usually does this when it looks like he's down and out, before he sits up suddenly.
* The Undertaker very quickly dropped his head punt from his regular move roster, only being permitted to use it for big moments.
* The Undertaker wore purple gloves and ankle guards during the early to mid nineties.
* The Undertaker XIV match, and ends it by summoning a bolt of lightning, which summons a standing casket with an effigy of Kane within it that then bursts into flames.
* The Undertones only had one Top 10 hit in the UK, but it wasn't their iconic debut single "Teenage Kicks". Instead, it was "My Perfect Cousin", which made it to #9 in 1980. "Teenage Kicks" only made it to #31, but it became a legendary song in the world of British indie rock because it was the favorite song of influential BBC DJ
* The underwater city of Atlantis also showed up in an episode of the
* The Underwater Islands biome consists of several huge chunks of rock suspended between the surface and the ocean floor some 500 meters below, given buoyancy by colonies of Floater organisms. Navigating them successfully requires three-dimensional thinking, and going over the edge of one of the islands can be unnverving as you see nothing but dark waters beneath you.
* "The Underwater Menace", humans fitted with 'plastic gills' and artificial eyes that allow them to see better underwater.
* "The Underwater Menace" sank below the sea, some of the citizens were modified to be able to survive underwater without protective clothing, so they could go out and gather food for the city.
* The Underwater Menace, screaming and about to be surgically transformed into one is decently disturbing, though.)
* The Underworld, can't be killed or even stopped in any meaningful sense — the stats provided are solely for escaping it, or hurting (more like "annoying") it enough to drive it away temporarily.
* The Underworld is reality as defined by slain Primordials, and they try to drag Creation with them to Oblivion. When the Underworld seeps into Creation, it creates Shadowlands.
* The Underworld itself is a Corpse Land in a very literal sense, as it's the perpetually decaying bodies of the creators of the world.
* The Underworld, leading to them confronting figures from their pasts. They then

work to help these people find and complete their unfinished business, so that they can move on, all while Hades tries to stop them.
* The underworld of Theros has so much gold that it proves to be effectively worthless. Returned (basically zombies with no memories) fashion masks out of gold; returned merchants don't accept gold currency, favoring coins made from the clay funeral masks. The underworld god, Erebos, is the god of greed and wealth as well as the dead.
* The Underworld: Subtrope of Only One Afterlife— all dead people go to a dark place underground that's a bit gloomy but not hellish.
* The Underworld, these regions are connected to each other and a dead person or living visitor could potentially take a tour of both. Unlike the Duat, Irkalla is generally gloomy and unpleasant.
* The Underworld with no indexing system, an owl infestation, and guardians who really hate mages. There's also the matter of arranging a trip to the Underworld that isn't one-way.
* The Undesirables, one of the people recruited by Princess Luna for her team is Therapsid, a Changeling who partook in espionage in Canterlot prior to the Wedding invasion, who was then captured in the aftermath and has been imprisoned ever since. He's given his freedom, and a chance to show up his people for abandoning him, in exchange for joining the team.
* The Undesirables, Princess Luna and a ponified Sonata Dusk are riding on a train.
* The undiluted Transformation Horror of insect morphs. One has to become a
* The U.N. Director invokes this trope when he gives the order to drop nukes on the big superhero brawl. "The only way to make certain future generations will know this was our only hope... is to ensure there will BE future generations." He is later shown in his office, looking rather regretful.
* The undisciplined Drazi raiders and mercenaries are Warriors to the Centauri's soldiers, as even the House Militias at the start of the war were much more disciplined. Predictably, the Drazi are quickly kicked out of the war by the forces of House Torra and a few subordinated Houses (as the Royal Navy pulled their forces to concentrate them against the Orieni), and their later involvement is only as mercenaries for the Centauri that find them useful meat shields.
* The Undiscovered Country era and beyond, during which phasers had ten settings and up.
* The Undiscovered Country which has a Klingon Bird of Prey that can fire while cloaked — Uhura even says, "If she's here, she's rigged for silent running."
* The Undisputed Era, Kyle O'Reilly and Bobby Fish have known each other for over 15 years, teaming and fighting on the indies before coming to NXT. Adam was in Kyle's wedding, and all three were in Roddy's wedding (and are honorary "uncles" to his son).
* The Undisputed Era. Progenitor tag teams Future Shock and reDRagon formed in 2010 and 2012, respectively.
* The undisputed king of changing jobs in professional wrestling is Ed Leslie, most well known as
* The Undomestic Goddess. She curtsied to Trish because she thought that was what she was supposed to do as a housekeeper. Trish decided she liked it and made her keep doing it.
* The undue stress it afflicts on her body causes her to tragically die by the end of the song.
* The Undying Court of Aerenal depends on the Deathguard for protection.
* The Undying Warrior epic destiny takes this to an extreme, being able to come back to life five times a day. (The fifth time isn't the last time he can use it, just it takes 24 hours to return to life at this point, so that counts as a different day.)
* The Unearthly horror movie that was once featured on MST3K), a mad scientist has a bunch of caveman-like mutant rejects in one basement room, most of whom are apparently pushing a large electric turbine around in a circle, like the giant mill that Conan the Barbarian had to push when he was a slave. Not a terribly efficient source of power, all things considered, but at least he's putting his rejects to

work!
* The Unending Coil of Bahamut features Phoenix saving you in the final encounter instead of being tempered by Bahamut. He then flies into an uncontrollable rage and must be defeated within a three-minute enrage timer.
* The Unending Coil of Bahamut. Furthermore, at the time of its release, none of the participants were able to clear it within the first week, with the world first clear happens on the 11th day after the release.
* ''The Unequal Marriage'' by Vasily Pukirev shows a lovely girl close to tears being wed to an ugly old man.
* The UNESCO world heritage site of Teotihuacan was already abandoned by the time the Aztecs arrived in the general vicinity and there is still no scholarly consensus who exactly built it and what happened to them. Due to it being a major tourism hotspot (and quite close to Tenochtitlan, which modern people know as Mexico City) there is now a settlement in the area, though.
* 'The Unexpected Enlightenment of Rachel Griffin, "My love" — which is a regional saying that means nothing — still turns Rachel's face hot enough to fry eggs on it.
* The Unexpected Enlightenment of Rachel Griffin, Nastasia expects one. She calmly says if her father marries her off to someone obnoxious, it would only be because the kingdom needed her to marry him, and if she and her husband dedicate themselves to their marriage, they will grow to love each other. Besides, were arranged marriages so much more unhappy than love matches?
* The Unexpected Enlightenment of Rachel Griffin, who has extensively read Arthurian legends, asks Valerie to give him her handkerchief, but she doesn't have one. Later, Valerie formally gives him a Bowie knife instead.
* The Unexpected is able to pass for an attractive woman, but has to adhere to a strict regime of mental and physical exercise in order to do it.
* The Unexpected Love Life of Dusk Shine, but he realized that would be even worse. And naturally Celestia has no intention of helping him out when making things worse is funnier.
* The Unexpected Love Life of Dusk Shine, Dusk and Fluttershy go on a picnic together. This leads to 21 pages of awkward silence, represented by "..." repeated over 700 times, which continues for two hours after the two had finished eating.
* The unexpected occurrence of this trope is the theme of Phillip K. Dick's short story "The Second Variety".
* The Unexpected of Australia, meaning that plane departing from California had no business being over the outback. Explanations of this anomaly offered after the fact are curious and unsatisfying.
* The unexpected success, whose development halted mysteriously after the July 2017 update, but it wasn't until December 2018 that Tim Sweeney confirmed that the latter game was officially cancelled, though available in a permanent pre-alpha state at the Epic Games Store.
* The Unexpected Witness is described at one point as a 1978 Classic Rusty.
* The Unexplored Summon://Blood-Sign) and determined to make the relationship work. So when she promised to never kill anybody again if he dated her, he believed her. Unfortunately, she couldn't keep that promise, and things spiralled from there. Now she goes around torturing random people to catch his attention.
* The Unexplored Summon://Blood-Sign, as she sees no problem with making his life a living hell. Kyousuke does manage to defeat her and thwart her plans repeatedly, but only because she doesn't mind losing and so never uses her full power.
* The Unexplored Summon://Blood-Sign, but it hasn't been brought up since.
* The Unexplored Summon://Blood-Sign care if other girls flirt with Kyousuke, even if they do so in front of her. Presumably, her obsession with Kyousuke is so strong that she only cares about his opinion (or her perception of his opinion).
* The Unexplored Summon://Blood-Sign. Eventually, Kyousuke manages to wake up without immediately resorting to violence, and then has to figure out exactly what happened for him to be in bed with his archenemy.
* The Unexplored Summon://Blood-Sign film is being shot in her neighbourhood. Nine volumes later, she's still wearing it.

* The Unexplored Summon://Blood-Sign forces Kyousuke to eat breakfast with her. She is not at all concerned by the fact that she had to beat him into unconsciousness several times before he complied.
* The Unexplored Summon://Blood-Sign for him and considers it fun to let him win.
* The Unexplored Summon://Blood-Sign glibly propositions Kyousuke...yet is entirely unsurprised when he refuses.
* The Unexplored Summon://Blood-Sign. He then grabs anything in reach and tries to kill her, which just causes her to knock him out with a flick to the forehead. She then comments that it's the 45th time this exact event has happened that morning, and complains that the breakfast she cooked will get cold.
* The Unexplored Summon://Blood-Sign initially appears to be this, but is actually a subversion. She almost never uses skill when fighting, simply because she's vastly more powerful than any opponent. The one time she does fight seriously, it's clear that she's skilled in every possible field of fighting.
* The Unexplored Summon://Blood-Sign isn't interested in her, and the fish aren't biting. That's not repetition- she's actually fishing in her spare time.
* The Unexplored Summon://Blood-Sign. Kyousuke feels that he should have died, being (in his opinion) the one responsible for it all, and saves people in an attempt to make up for this.
* The Unexplored Summon://Blood-Sign, proximity to the White Queen immediately evokes worshipful mania, with longer-lasting permanent insanity of various types. Only one human is completely immune to it, no-one knows why, and he spends his whole life trying to keep her out of the human world.
* The Unexplored Summon://Blood-Sign, regardless of how many years it's been since they last met. The form(s) she takes when she's afraid or angry are much less human.
* The Unexplored Summon://Blood-Sign. She crushes the handle of the frying pan.
* The Unexplored Summon://Blood-Sign, she lets people call her by title.
* The Unexplored Summon://Blood-Sign, she was forced to break this promise.
* The Unexplored Summon://Blood-Sign. The basic idea is that a summoner must be partnered with a vessel, and uses a long stick (the titular Blood Sign) to spell out the name of a particular Material (supernatural being), who possesses the vessel.
* The Unexplored Summon://Blood-Sign: The main form of magic that humans can use.
* The Unexplored Summon://Blood-Sign, the Secret War. It's referred to several times as the reason for much of the chaos in the world. No longer offscreen after the fifth volume, which reveals the lead-up to the war and the war itself.
* The Unexplored Summon://Blood-Sign. They can't even be harmed by non-supernatural means, and if their physical bodies on Earth are destroyed, they can be summoned again with no ill effects.
* The Unexplored Summon://Blood-Sign. Though there are hints that, even in the present, it's not entirely one-sided. For example, Kyousuke still goes by the nickname "Alice with Rabbit", which was given to him by the White Queen to represent them always being together.
* The Unexplored Summon://Blood-Sign through performing deeds that impress a high-ranking Material. It's rumored that a summoner who earns 1000 Awards will become a Material. However, there are multiple summoners who have reached or exceeded this level yet still remain human. It's eventually demonstrated by the Award 3000 summoner Madam Professor, who becomes a Divine-Class Material after her death.
* The Unexplored Summon://Blood-Sign were lovers three years ago until she killed someone. Since she had promised him she wouldn't, he couldn't trust her after that, and things escalated from there into a massive conflict that defines their lives right up to the present day.
* The Unexplored Summon://Blood-Sign, when Kyousuke and the White Queen need to infiltrate a hotel. There's a musical in the local area that features them as the main characters, so Kyousuke pretends that the White Queen is actually the actress playing her, and that he's another staff member dressed as himself (to help the supposed actress rehearse her role). He then considers also pretending that they're secretly lovers, to justify them acting suspiciously.

* The Unexplored Summon://Blood-Sign, who he could probably have saved if she hadn't ignored his request not to butt in. The fact that she tries to seduce him into forgiving her doesn't help either.
* The Unfair Sex: If something goes wrong in a relationship, it's usually considered the man's fault. Questionable actions taken by men in a relationship are usually seen as worse than the exact same action taken by a woman.
* The Unfair Sex: To some writers, whenever a relationship goes wrong, it's always the man's fault, no matter if it's the case or not.
* The Unfair Sex women actually come off looking really bad in these movies.
* The Unfallen, a race of beautiful and peaceful tree aliens, use ships crafted of an organic wood-like material and leafy solar sails.
* The Unfallen vessels are vaguely biological and have leaf-like solar sails. The Unfallen themselves are a beautiful and gentle race of spacefaring tree-aliens.
* The Unfantastic Adventures of Bizarro No. 1 and the action is narrated by Bizarro, so double negatives pop up every so often.
* The Unfantastic Adventures of Bizarro No. 1 because "All they can do is shorten sentence". Bizarro identifies his witticism as "gallows humor".
* The Unfantastic Adventures of Bizarro No. 1 because they refuse to fight the Bizarro race.
* The Unfantastic Adventures of Bizarro No. 1, Bizarro imagines a bunch of male Bizarros standing in line to seduce Bizarro Lois.
* The Unfantastic Adventures of Bizarro No. 1, Bizarro is his race's hands-off leader and mightiest member.
* The Unfantastic Adventures of Bizarro No. 1, Bizarro's son walks in on his father watching a porno movie with his pants down. Bizarro proceeds to swiftly pull his pants up, smash the monitor and ask: "What porno movies?"
* The Unfantastic Adventures of Bizarro No. 1, Bizarro Wonder Woman and Bizarro Supergirl are the only female members of the Bizarro Justice League.
* The Unfantastic Adventures of Bizarro No. 1 demands to know whether his son will believe his own eyes rather than his father.
* The Unfantastic Adventures of Bizarro No. 1, "Dick's Moby"-, as he tells the story.
* The Unfantastic Adventures of Bizarro No. 1 has the Blue-Kryptonite Men, who are made from a Kryptonite variety which is specifically deadly to Bizarro and his race.
* The Unfantastic Adventures of Bizarro No. 1: In order to prove to his son that he didn't mean to hit his wife (he actually didn't. Long story), Bizarro bops Junior on his head, effectively reassuring him. Needless to say, Bizarros are weird.
* The Unfantastic Adventures of Bizarro No. 1 is a weirdly-shaped planet known as Thrae, where Bizarro lives and operates.
* The Unfantastic Adventures of Bizarro No. 1 is to run away. Once he gets over his initial reaction, though, Bizarro rallies the Leaguers and cooks up a strategy to defeat the Blue-K Men.
* The Unfantastic Adventures of Bizarro No. 1 kill all males so the male Bizarro Leaguers can keep all countless Bizarro Loises for themselves.
* The Unfantastic Adventures of Bizarro No. 1, the Blue-Kryptonite Men invade Bizarro World once again. In the past, Bizarros developed lead armors to fight and drive the Blue-K Men away. Of course, being Bizarros, they’ll not use it now PRECISELY because it’d be the smart thing to do.
* The Unfantastic Adventures of Bizarro No. 1: Unsurprisingly, Bizarro doesn't understand what doors are for. He always smashes through a wall or roof, whether he's in a hurry or not.
* The Unfantastic Adventures of Bizarro No. 1, which explains why Bizarro Lois keeps her porno videos "cleverly hidden" on top of a coffee table. As for Bizarro No. 1, he doesn't keep a porno stash but he knows where his son's is located.
* The unfathomably ancient and powerful wyrm Midgardsormr is the progenitor of all dragons. He sired the First Brood, seven dragons who would spread throughout the world and sire all other forms of dragonkind.
* The Unfavorite and drank it himself before she gulped it down, counting on the

trope to work; it did and he lived to tell, but it still made him rather sick.
* The Unfavorite And then he was assassinated right when there was a strong possibility that he would be nominated to run for President.
* The Unfavorite because she'd been pregnant with twins until she suddenly wasn't, which made her believe he'd killed his sibling.
* The Unfavorite in his family, the trauma over his older brother's death and the overall stressful life he was living, rather than having his innocence sucked out of him by an evil plant.
* The Unfavorite's two brothers are framed as attacks by a feral stallion, with a horseshoe print left on their foreheads. (The true murderer is exposed when others discover that the horse has never been shod).
* The Unfavorite to the point that her parents spelled her name wrong in their will. She spent most of her life trying to earn fame and recognition to spite them.
* The Unfavorite, with the example that if either one is caught with a fly down, they're not going to miss a chance to make a quip about it.
* The Un-Favourite: A child who is liked less by their parents than their siblings.
* The Un-Favourite, and believes his father would rather he have died than his charming, athletic older brother. The only thing keeping Gordie from feeling worse than he does is the fact that he and his brother had a great relationship, and his brother used to praise and encourage him in his writing.
* The Un-Favourite and sends John to loom threateningly over April until she comes down and apologizes.
* The Un-Favourite because Bart gets far more attention the few times he actually does something right instead of his usual bratty hijinks, which she ascribes to him being both the oldest child and the only boy.
* The Un-Favourite, despite giving Jacob six sons and one daughter as opposed to Rachel's two (the other four sons were the children of Leah and Rachel's handmaids). None of this is her fault, and she can come across very sympathetically to modern audiences. Though, to be fair, God also sympathized with her and made sure she had kids while Rachel was barren to try to get Jacob to treat her better. Not only that, but two of her sons were Judah and Levi—the fathers of the Royal and Priestly tribes, respectively.
* The Un-Favourite have to deal with all those issues. Someone then takes a picture of the twins and makes a smart remark about finally being able to tell them apart.
* The Un-Favourite in spite of the fact that his brother is a homeless drug addict.
* The Un-Favourite, in the eyes of his father Zeus. In a famous scene, Athena helps her champion Diomedes defeat Ares himself in combat. Ares escapes while severely wounded and bleeding. When he complains to Zeus about his favoritism for Athene, Zeus chews him out for being a violent bully.
* The Un-Favourite Mikael learned that Klaus was not his biological son. While it's implied that Klaus was always impulsive and difficult, flashbacks show that Mikael punished his son's misdeeds far more cruelly than was necessary.
* The Un-Favourite. Ross was the miracle baby, while Monica was just another birth.
* The Un-Favourite. She killed Vy'chriel for the crime of refusing to tow the family line and took her name.
* The Un-Favourite: The parents' least favorite child who is ignored and neglected in favor of the other children.
* The Un Favourite: When one sibling isn't treated well by his parents who prefer the other sibling.
* The Unfettered: A character who will stoop to any low to get what they want.
* The Unfettered: I'm gonna get what I want, and I don't care who I have to step on or who suffers to get it!
* The Unfettered: "There's a job to be done, and it doesn't matter whose feet I step on, or who gets in my way, I'm going to do it."
* The Unfettered: They won't let any pesky moral scruples get in the way of their goals.
* The Unfettered: We don't care what's right or wrong, we just care about our goals! We will get to it, even if it means breaking the law!
* The Unfettered: Willing to do whatever it takes to achieve their goals, even if

it means crossing the line.
* The unfinished cartoon "Soap Box Doiby" has the following exchange between the King of Town and the Announcer.
* The unfinished Sovetsky Soyuz (literally Soviet Union) class battleships would have weighed more Yamato but have been less capable than the much smaller American North Carolina class battleship (which the Americans themselves thought was unnecessarily big and switched to the slimmed down South Dakota class). All the extra weight was due to the Soviet Union being utterly unable to make half decent armor of the thickness a battleship required. It instead had to use nearly unfathomably thick plates of shoddy brittle steel. This, combined with the lack of Russian experience with large ship building lead to a true titan of a design, that could "only" fit a gun a two inches smaller than Yamato and fired a relatively light shell for a gun of its size. When Stalin pressured the Soviet Navy to finish one of the incomplete hulls after WWII, the navy countered that finishing the project would be one of most embarrassing things the country could do.
* The Unfinished Spelling Errors of Bolkien are followed by Sauron's chamber orchestra, playing the appropriately titled tune, "Theme for Loud Unsubtle Bastards".
* The Unfinished Spelling Errors of Bolkien, Gimli blows on the horn of Helm Hammerhand and gets covered in powder that old Helm left in there as a joke.
* The Unfinished Spelling Errors of Bolkien has the line "I've got this guy called Grima, he's a slimy troublemaker, more disturbing than a lawyer who's a part-time undertaker."
* The Unfinished Spelling Errors of Bolkien without backing music) begins the second verse:
* The Unfinished Tales, this trope played beautifully in the marriage of Aldarion and Erendis on Númenor, lost home of the Dúnedain. Númenóreans had a typical lifespan of 100 to 200 years, but those of the royal house lived two to three times as long. Aldarion was the 6th king of Númenor; Erendis his wife was not from the royal house. She was also much younger than him, but still most likely to die first. Aldarion's long lifespan and his tendency to make multi-year voyages while Erendis continued to age (relatively) rapidly drove a massive, nasty wedge in their relationship. Their problems in turn embittered their daughter, the future queen Tar-Ancalimë. This proved to be the first small step in the eventual downfall of Númenor.
* The Unforgivable Curses normally result in an automatic life sentence to Azkaban, but once Voldemort declares open war on the wizarding world and threatens the Muggle world, no one has a problem with the heroes using the Cruciatus curse (which, as its name suggests, causes extreme pain and is potentially fatal) in order to fight these people.
* The Unforgiven This is the spirit of the thing in the scene where Johnny Portugal rides up to Ben Zachary's step sister Rachael.
* The Unforgiving Flowers Blossom in the Dead of Night in the visual novel.
* The Unforgiving Flowers Blossom in the Dead of Night Mystery in it's first story in the form of one of the protagonists, Marie.
* The Unforgiving Flowers Blossom in the Dead of Night, she finally manages to kill him and become the yōkai Mesomeso.
* The unfortunate Agent 13 is a variation. Max will approach a vending machine or some other innocuous object and start talking to it, only for it to be revealed that 13 is hidden inside (with a
* The unfortunate Dr Dimitri Vapnoodle is known to the Castle Wulfenbach Students as Dr. Dim. They don't even realize he used to be a highly intelligent and dangerous Spark who actually earned his doctorate and think he's some kind of failed construct.
* The unfortunately named 'Lamers' bus line, which operates in the United States, was the subject of many jokes on video game forums.
* The unfortunately named Pocari Sweat is a popular energy drink in Japan. It actually tastes pretty good, but you wouldn't know it from reading the label. The "sweat" part is because, like many energy drinks, it's designed to replace

electrolytes lost that way, while Pocari is from the onomatopoeic word for the sound of falling droplets (of sweat, or possibly a tasty energy drink).
* The Unfortunate Miss Fortunes, shapeshifter Dee is still a virgin because she turns into the guy's mother at the crucial moment.
* The unfortunate results of using the traits of old women to "identify" witches is also deconstructed from time to time, seen in
* The Unfortunate Traveller: or, the Life of Jack Wilton (1594) by Thomas Nashe.
* The Unfought: It looks like the player will face this guy in a boss fight, but the boss battle never happens.
* The Unfrozen Caveman Lawyer sketches were presented with a listing of fictional sponsors ("Brought to you by Dog Assassin. When you can't bear to put him to sleep, maybe it's time to call Dog Assassin!")
* The Unfunnies have filthy mouths, the most notable ones being Pussywhisker's adulterous wife Polly (who verbally abuses her husband with profane insults) and Chick-Chick Chickie (who has actually been forced to act crass and vulgar because Troy Hicks has threatened to kill him if he doesn't).
* The Unfunnies is played for horror. Pussywhisker loses both his testicles after being convinced by Dr. Despicable that he has testicular cancer. His wife Polly was outraged that they cannot have children and refusing to adopt, so she forces Pussywhisker to pick up men to get to sleep with her in order to get her pregnant. When she did not get pregnant from the first guy, Polly forced Pussywhisker to get more men. It's clearly damaging for Pussywhisker to do this. At the end of the issue, as Pussywhisker is forced to find another man for Polly, she reveals that she orchestrated her husband's castration so that she would be justified in her acts of adultery with copious partners, is on the pill, and enjoys that she has forced her husband to find these partners while she waits at home.
* The Unfunnies) when he prepares for the operation to remove his testicles after being convinced he has testicular cancer.
* The UN General Assembly — the part of the UN that includes representatives of all member countries — is forbidden by the UN Charter from issuing resolutions with binding effect (except for resolutions dealing with internal UN matters like the UN budget and nominations for UN bureaucrats), meaning that pretty much everything it does is a Strongly Worded Letter about something or other.
* The ungodly "energy drink" seems to be a fairly common trope in anime, and even
* The Ungoverned, suggests that by the late 21st century, governments have essentially given way to protection companies.
* The Ungoverned, the invading army turns out to have underestimated their would-be conquest several different ways, but the thing that really turns the tide is when one of the defenders hits on the idea of converting the national weather-control system — which uses guided missiles to deliver payloads into storms and disperse them — into an offensive network.
* The Unhandsome Prince sings, but that it's so well made that it emits a musical tone when tapped. It becomes even cooler once Hal figures out the trick to using it.
* The Unhandsome Prince, when Caroline's kiss frees Prince Hal from being a frog. She takes one look and demands a better prince.
* The Unhappiest Place on Earth has the Disney mascots constructed by a factory underneath Disneyworld. It uses snooping patrons as raw materials.
* The unhappy main character in Takashi Miike's Sentai parody/homage
* The Unholy features a woman named Alice who has the ability to perform miracles due to the blessing of who she believes is the spirit of Mother Mary. This film carries heavy themes of religion and faith, and explores the damage that could occur when a malevolent entity impersonates a religious icon.
* The Unholy Night ends with a "rational explanation" to all the supernatural horror elements, which was common in American films at the time.
* The Unholy War has a regular unit called Razorfane, a robot that attacks with circular saw blades. One of the secret unlockable characters is called Betarazor, which is basically just an upgraded version of Razorfane, with more health and more powerful attacks.

* The Unholy War. The space-faring Teknos invades the homeworld of the Arcane with the intent of harvesting the planet for resources.
* The Unhomed Giants, subject to a lengthy rescue campaign by the Lords —
* the unhygenic bad example kid Jimmy nearly gets run over by a train because he can't hear it coming thanks to his waxy ears.
* The Unicode emoji character 0x1F595, as shown here (if your browser supports it): 🖕
* The Unicorn and the Wasp a light-hearted Agatha Christie-themed episode, so significant bloodshed would be inappropriate.
* The Unicorn and the Wasp because the episode takes place in the 1920s.
* The Unicorn and the Wasp": Donna can't stop munching on grapes and enjoying the hell out of the Doctor and Agatha Christie's explanation of their solving of the murder mystery du jour.
* The Unicorn and the Wasp" goes out with the wonderfully genre-blind line:
* "The Unicorn and the Wasp" has a human-sized alien wasp. When Donna says she ran into a giant wasp, she doesn't mean big, she means FLIPPING ENORMOUS!
* "The Unicorn and the Wasp" has this setup as a given, considering that the famous historical figure of the episode is Agatha Christie herself.
* "The Unicorn and the Wasp" in a steamer trunk next to his Agatha Christie books.
* The Unicorn and the Wasp objected because he was concerned that that ending would portray the Doctor as a murderer.
* "The Unicorn and the Wasp" police, especially when he's just discovered evidence that the murderer is an alien. The paper also claims Donna is the "plucky young girl" who helps him out (since female cops were very rare in the 1920s), to her offense.
* "The Unicorn and the Wasp": The backstory of Lady Eddison includes a spell laid up for six months with "a bout of malaria".
* "The Unicorn and the Wasp": The Colonel claims to have been reading military memoirs in his study when Professor Peach was murdered. The accompanying flashback shows him to actually have been looking at the 1920s version of porn.
* "The Unicorn and the Wasp": The Doctor and Donna realize they've arrived in time for Agatha Christie's notable disappearance:
* "The Unicorn and the Wasp". This time, it actually is pretty revealing.
* "The Unicorn and the Wasp" when the Doctor introduces himself to the guests at a 1926 dinner party as a Scotland Yard detective and Donna as "The plucky young girl who helps me out."
* The Unicorn Chronicles had 9 years (1999 to 2008) between the 2nd book and the 3rd book being published.
* The Unicorn Chronicles series and others. Unfortunately, publishers don't seem interested. The truly curious can find references to many of these works and others in his replies on the guestbook of his official website.
* The Unicorn Chronicles unicorns need physical contact in order to speak to people telepathically.
* The Unicorn Girl, the protagonists inadvertantly explore several alternate universes.
* The "Unicorn Killer", Ira Einhorn, Philadelphian and co-founder of Earth Day killed his then-girlfriend Holly Maddux and stuffed her body in a trunk in his apartment. Einhorn was arrested for the murder, but denied it, saying that the FBI and CIA framed him because of his hippy political views. Defended by attorney Arlen Spector and set free on bond raised by the heir to Seagrams wine family, Einhorn skipped bail and fled, eventually settling in France. He changed his name, but was tried
* The "Unicorn problem" in most tabletop RPGs. This occurs when a particular type of character is rare in-lore, and yet is also available as a choice of player character type. This should mean that the players are constantly encountering groups who are surprised and/or unprepared for that particular rare type showing up, but in practice this usually results in a boring game or serious game balance problems. (For a specific example: lore-wise only 1% of the population are mages in
* the unicorns are from the dimension that all magic in the multiverse, but

neither is anything else in the show.
* The unicorns are this with regard to other ponies. Only they are able to use magic and all of them are born with this ability. However, studies are required to acquire advanced magic, and many of them end up pursuing entirely non-magical interests, never learning anything more powerful than telekinesis (which is quite useful for species with no fingers) and
* The unicorn's name is derived from the Latin words "Uni" meaning "one" and "cornu" meaning "horn", and it's a one-horned horse.
* The Unicorn. Wade's introduced as a fairly typical single TV dad, with a messy house and two daughters who are given free reign. However, this is because he's been spinning his wheels since his wife passed away. Once he begins processing his grief properly, the house gets cleaned up and he gets his kids back in line.
* The Unicron Singularity, introduced in the Unicron Trilogy, is a massive continuity-damaging presence created by the world-destroying Unicron. It is also canonically stated to be the cause of every inconsistency and plot hole that was and will be created in the
* The unidentified American runner frustratedly announces that he can't remember the response, and the situation is defused without incident.
* The Unidentified by Rae Mariz, Katey (aka "Kid") goes to a school that is run by corporations. They monitor the students' activities for market research.
* The unification of the WWE Championship and World Heavyweight Championship at the 2013 TLC event was hyped as the most important match in WWE in over 50 years...yet December 2013 marks the 12-year anniversary of
* The Unified Earth Government (and its main arm, the United Nations Space Command) is a mix of the United Nations and the American federal system. While individual countries, organizations, and cultures are still very much alive, the UEG/UNSC will not hesitate to use force to prevent its colonies from becoming independent, with several of its factions, like the Office of Naval Intelligence, tending to favor outright authoritarian methods of rule. That said, several human worlds do enjoy a good amount of autonomy (particularly in the aftermath of the chaos caused by the Covenant war), and that's not even counting the Insurrectionist-aligned ones who've managed to sever all ties to Earth's government.
* The Unified Earth Government itself is a pretty straight example; it's a representative democracy divided into an executive, legislative, and judicial branch, which include an elected president and a senate. That said, the UEG's capital (as well as UNSC headquarters) is located in Sydney, Australia instead of somewhere in America. While it is formally a union of independent planets, in practice Earth and the Inner Colonies are privileged in the election process.
* The Uniforce. A force of good only unicorns with golden horns can summon to amplify their magic by shouting that they believe. It is never explained what it really is, why only golden horned unicorns can use it and how the Grand Ruler discovered it, but it is the main attack to kill all
* The "uniforms" seen in the series are so diverse to begin with, it's a wonder anyone knows what's regulation and what's not anyway.
* The uniform worn by the three teenage girl spies is a shiny plastic catsuit. The stealth part of the trope is usually subverted, as each suit is of a unique bright color. At other times, the suits can change appearance to look like more ordinary clothing, subverting the skintight aspect of the trope. And yes, they come with
* The Unifying Force, Alpha Red is recreated and used... and quickly proves the practical considerations of Triebakk and Ranth correct. The virus mutates and kills off a local species on the planet it is used on (validating Triebakk's objection), and a lone surviving infected ship makes it back to Coruscant, where the Yuuzhan Vong get the idea to use the plague against the living world Zonama Sekot (a miniature implementation of what Ranth objected to).
* The unimaginably huge costs involved in the "Containment" part of the
* The unimaginatively named Precursors and their enemies the Dread Lords (who have become
* The Unimatrix ships are based on the similarly large ship at the centre of the

V'Ger Cloud, mentioned above, in
* The Unincorporated Man wakes up in a future where people can buy shares in each other - and even people who aspire to become majority owners of themselves someday don't understand why he refuses to sell.
* The Unintelligible: A character is incapable of saying anything other than outright gibberish.
* The Unintelligible: A character who is only capable of speaking in gibberish.
* The Unintelligible. Although he's apparently unintelligible even when he slows down; in "Propane Boom", when the Mega-Lo-Mart explodes, he tries to call 911. Upon being asked to slow down, he says something like "That... dang... Meg... Lo... Mart... go... boom!" before fadeout.
* The Unintelligible and can only be understood via translated subtitles) by covering up her subtitles with his own captions. None of the other characters can tell what she's saying for the duration of the argument.
* The Uninvited (2009) the one holding the knife that has just killed her stepmother, not Alex, who's now gone. Alex died in the same explosion that killed their mother, which was also Anna's fault.
* The Uninvited (2009), though it's executed with very little ambiguity.
* The Uninvited (2009) where main character Anna (Emily Browning) turns out to be the killer of both Alex and her mother.
* The Uninvited) actually show up and explain that she's trying to protect the girl. We see in this picture the old-time spelling glass, a homemade device which was eventually replaced by the Ouija board.
* The Uninvited, everyone had believed that a jealous Carmel had been the one that tried to throw baby Stella over the cliff. Once Stella realizes that Carmel was her mother, and actually it was Carmel who stopped a jealous Mary from throwing baby Stella over the cliff, the ghost of Carmel is free to leave the house.
* The Uninvited features Type A and Type B in the same house. Carmel turns out to be Type A, trying to protect her daughter Stella from harm, while Mary is the evil Type B trying to lure Stella over the cliff.
* The uninvited guests to a couple's flat has one guest (John Cleese) sitting on the sofa followed by an ungodly yowl. He sat on the cat.
* The Uninvited. Here, the siblings Rick and Pamela buy Windward house that turns out to be haunted by the ghost of a woman who had been murdered there.
* The Uniocs. Discussed trope, as Kevyn asks why the Uniocs were called that, rather than "Oth-ers" upon hearing that their name for their homeworld is "Oth". Turns out, they wanted to be called "one-eyes", and not "strangers".
* The Union 1st Minnesota Volunteer Infantry were ordered to charge against five times their number to buy time for reserves to be brought up to a key position on the second day of
* The Union and Dominion are supporting the Irune Ultranationalists, who they share a mutual grudge with against both the Hierarchy and KMC, respectively.
* The Union had the high ground at the very start of the battle, but did not possess the strength to defend it. Buford's choice was to defend a position three hills
* The Union Jack for British settlements, the southern cross for countries in the southern hemisphere, the Nordic Cross for the Nordics.
* The Union "Nemesis" mech is the original mind of Chase, captured by the Union, tortured and broken, and then copied hundreds of times over
* The Union of Soviet Socialist Republics was a description of the supposed form of government, with no reference to geography or nationality (a "soviet" was a kind of local workers' council). On paper, it was roughly analogous to the United Nations, being a collective of states rather than a single nation. Of course, in practice it was an exercise in Russian imperialism, which just led to the rest of the world referring to the people (or at least the leaders) thereof as "Soviets" and treating the USSR as a single polity.
* The Union series. Combined Forces - Team 4 falls under this trope. While they start off as idealistic as soldiers go, they eventually devolve into bitter reflections of themselves that kill because they can, not because they have to.

Taken to the extreme with Shadow Agents, clones born and bred to go as far into this trope as possible, becoming little better than what they're fighting.
* the unique death animation for this. Your character actually chokes and falls over, dead.
* The Uniques also seems somewhat more conservative; in this universe, the Republicans either held onto or re-took the White House in the nineties.
* The Uniques became the President of the United States in the nineties.
* The Uniques, the Cold War lasted until at least 1993, thanks to the Uniques replacing conventional weaponry. Among other effects, this has resulted in the Republicans maintaining their hold on the White House; it's mentioned that in 1996, when the story opens, Newt Gingrich is the President. It also resulted in an overabundance of unaffiliated Uniques serving as either vigilantes or supervillains.
* The Unit. Although they do have all the characters' wives tearing each other to pieces back home.
* The Unitarian Universalist religion allows its members to share wisdom from various religions and philosophies (such as Christianity, Judaism, Islam, pantheism, humanism, etc.) with each other, which to some would make it a
* The Unit, Bob Brown sees a woman with her young daughter in a park and intentionally leads the woman to believe he's a paedophile because he needs them to leave.
* The "UNIT Dating Controversy" refers to figuring out just when the heck the Doctor worked for the United Nations Intelligence Taskforce. Long story short: some hints in the 1970s UNIT-involving stories suggest they are set in the near-future (the late-'70s and 1980s), even when
* The United Arab Emirates, which still exists to this day, formerly known as the Trucial States, counts on a technicality. Although internationally considered a single country, it is actually a relatively loose federation between seven different Emirates in the region (with Abu Dhabi and Dubai holding most of what power exists in the federation, which is part of why they're the only two of the seven that anybody ever hears about).
* The United Arab Republic (despite his personal popularity with the Arab street, even in Syria) and his government fumbled the details. He favored fellow Egyptians over Syrians in high posts, and generally treated Syria as a junior partner – or to be more precise, as a group of new Egyptian provinces – rather than an equal partner. The union was dissolved by a coup in Syria, supported by the country's disgruntled business community and bureaucrats, that reasserted Damascus's independence. Egypt continued to use the formal description "United Arab Republic" until after Nasser's death in 1970; in 1971, it adopted the description "Arab Republic of Egypt".
* The United Arab States, a wider and more loosely-connected confederation of the above UAR that also included Yemen and existed during the same three years.
* The United Church of Canada was formed by the merger of the Methodists, most of the Presbyterians, and the Congregationalists. A similar set-up occurred with the Uniting Church in Australia. In fact, uniting churches is
* The United Empire, Bea Priestley, Great-O-Khan (Tomoyuki Oka), Jeff Cobb, Aaron Henare (Aaron Henry)
* The United Empire ships are black and red in colour with a bulky and imposing shape and a chisel-like prow, and even their non-combat ships have cosmetic missile ports. As befits your typical evil militaristic/xenophobic human empire.
* The United Federation of Charles. It argues that the genre never died and is continuing on today.
* The United Fire Defense Agency, UFDA for short, is the organization behind both the
* The United Kingdom: 4.2 million cameras, one for every 14 people (approx) the Oyster card system which keeps track of your travel in the last month. ID cards scheme: cancelled.
* the United Kingdom connected, but the media always forget this. It doesn't help that abusers like to claim they're just trolls, even when issuing death threats.

* The United Kingdom does not include the country's name on postage stamps that it issues. It was the first country to ever issue them and as such at the time, this was not necessary. In 1874, the Universal Postal Union codified this by exempting the United Kingdom from its rule which stated that a country's name had to appear on their postage stamps, with a profile of the reigning monarch being all that was required for to identify the UK's stamps. Due to this grandfather clause, the UK remains the only country in the world not required to name itself on its stamps.
* the United Kingdom except for the Patent Office. There were also other raids through Maine, New York state, and New Orleans, all of which were in response to the United States' invasion and attempted annexation of British North America (Canada) and the US Army's razing of Toronto when this didn't work out.
* The United Kingdom) in the event of a national emergency, but has not to date used this power.
* The United Kingdom is one of the few major Western countries that somehow managed to avoid this trope, mainly because the Christmas season officially begins in October, the beginning of the "Christmas Quarter" (the last quarter of the year). However, it's still not unlikely to see Christmas and winter candies in your local grocery as early as September. In the New Tens, commercials have started popping up as soon as Halloween is over.
* The United Kingdom messed around a bit with a seaplane jet fighter, the
* The United Kingdom was once the separate countries of England, Scotland, Wales and part of Ireland. England eventually conquered Wales and Ireland, even as it merged the English and Scottish Crowns together. Most of Ireland eventually became an independent republic, although the provinces of Northern Ireland remain part of the U.K.
* The United Nations of Sol actually has humanity's best interests in mind most of the time. Unfortunately, they tend to be
* The United Nations Space Command is the military, scientific, and colonial administration agency of human space in the twenty-sixth century. Despite being
* The United Nations Space Command, officially the UEG's military, exploratory, and scientific agency, has a military set up 100% identical to the modern US military's, which is particularly noticeable with its Marine Corps. However, the UNSC is politically a pretty stark aversion; thanks to the Human-Covenant War, the UNSC ends up taking control of the government, becoming in essence a military junta. Even though it officially ceded power back to the UEG after the Covenant War, the UNSC is still in practice the humanity's main ruling body, meaning that post-war humanity is more of a military empire. Even before the Covenant War, the UNSC was quite willing to resort to extreme methods of maintaining control over its citizens, like kidnapping children to turn them into super-soldiers and even nuking colonies.
* The United Network Command for Law and Enforcement—U.N.C.L.E.—of the 60s spy series
* "The United Pony of Goodness Universe" (or "TUPGverse" for short), on which most of
* The United Services Automobile Association started as an insurance co-op formed by a group of American Army officers who couldn't get car insurance. Over the decades it has gradually expanded to become a rather successful financial institution offering insurance, banking, and various other services to American military personnel and their families.
* The United States Air Force effectively does the opposite, placing its birth on September 18, 1947, when the Air Force was formally separated from the US Army, while also laying claim to the accomplishments made by its various predecessor services, including the
* The United States Air Force has a very ingenious, but equally hilarious way of testing the resolve of their recruits so that they keep composure during public events.
* The United States Air Force is often considered "military-lite" by the other branches, but this is neither new nor unique to the United States. Rather it seems to be endemic to air forces in general. Winston Churchill once referred to RAF

airmen as "uniformed civilians" during the Second World War. There are several reasons for this: the physical requirements and level of danger are generally lower (especially in the 21st century). Actual fighting is overwhelmingly done by a comparatively small number of officers, with most enlisted personnel regulated to maintenance and support. Air forces must operate out of airbases, ensuring a minimal level of creature comforts for personnel stationed there (and indeed creating an expectation of such). Everyone tends to have a specific task to perform, leaving fewer occasions where giving orders is necessary. The chance that these tasks will have to be performed under direct fire is also extremely low. The result of all this being the emphasis on discipline and subordination to superiors is considerably relaxed. However this is all by comparison to other branches. For
* The United States and France were unique as republics in the 18th Century, but now
* The United States and Puerto Rico. They are not states (the former is the federal capital district and the latter is an unincorporated territory), but they are frequently included with the states in statistical reports released by the federal government, and DC is informally considered a state in all but name. Of all the US's non-state regions, these two are the most populous (moreso than some actual states, for that matter) and have the most proponents for actual statehood.
* The United States armed forces has no bans against women in any military role as of December 2015, following a transitory process that began in January 2013 when the Combat Exclusion Policy was lifted by then-Secretary of Defense Leon Panetta, and already has female combat engineers, artillery operators, infantrywomen, and even special forces operatives in the Army Rangers. Of course, this was just when the policy was "officially" lifted. As many in favor of gender integration have pointed out, the blurred lines of modern warfare have made that
* The United States Armed Forces have this as a de facto policy as well. You may be guaranteed an allowance of thirty days of leave per year, but you are not guaranteed to be able to use them, hence why the policy of unused days rolling over and being added to the next year's allowance until the number of days accrued exceeds a specific amount.
* The United States Army Air Force made all their enlisted aircrew ranks (mostly gunners) sergeants for a similar reason: they heard that sergeants and officers were not used for slave labour. And since the USAAF had ridiculously high bomber losses, and those who weren't killed outright tended to end up in POW camps, this made sense.
* The United States at the same time launched the Mexican-American War, which resulted in victory for the United States and the annexation of a huge chunk of land that now makes up the American Southwest. For a while, the U.S. was considering annexing
* The United States Congress has a tendency to send these, to the point that it's widely mocked in political circles. And it's only fair that they should send them, considering how many of their constituents write their
* The United States Constitution was specifically meant to replace the Articles of Confederation, which formed the basis of a very different United States of America. Though it’s well known that America achieved independence in 1776, almost nobody remembers the government that ruled the country between that year and
* The United States' Department of War became the Department of Defense in 1947. It's arguable as to whether America has fought a truly
* The United States' devastated economy is trying to invoke this trope following the war.
* The United States did field tests of the practicality of camouflage uniforms. They took a handful of infantry, fitted them with uniforms, put them on the front and see how things turned out. Well, the Germans were the only ones in the theater that had their infantry use camouflage uniforms in appreciable numbers. With that knowledge and the fact that it's on this page, it shouldn't be surprising that most the infantry involved in the test decided to trade in their experimental uniform for the standard issue.
* The United States did the same for M-rated games, requiring an adult's ID card

to purchase such a game. This ultimately doesn't work as well as the ESRB probably hoped, as children and teenagers who want such games either resort to fake ID cards or, more likely, just ask their parents to buy the game for them with the knowledge that mom or dad won't pay attention to the cashier explaining the sexual/violent/vulgar content they're about to buy for their underaged child. These parents either treat video games as simply
* The United States ended up sticking with the medium M4 Sherman throughout the war, with a couple of mid-season upgrades such as the 76mm gun and specialized variants like the heavy armor "Jumbo". However, the U.S. constructed several tank prototypes as huge and heavily armed as anything the Soviets or Germans did, they just didn't end up
* The United States, Great Britain, Russia, and China all, to some extent, see
* The United States has always been fascinated by Asia, especially the Far East of China and Japan. The USA of course played a major role in
* the United States: Historically, fighting wasn't unusual in the U.S. Congress. Legislators from both houses and all political persuasions were known to carry canes, blades, and even revolvers to debates.
* The United States: If you can manage a trans-oceanic invasion, congrats... you've now invaded the country with the highest amount of guns per capita. And in the United States, you have three kinds of civillian gun owners: Criminals, who have no problem with shooting people they don't like, Law Enforcement, who have no problem shooting people to defend the citizens, and legal gun owners, who have no problem shooting an illegitimate government bent on disarmament. The latter two are usually very well trained and the former is dangerous because of a lack of training. Oh, and try not to think about how the criminal, who isn't allowed to have a gun, is able to get them... or get them to the formerly unarmed populace who are now angry you are here.
* The United States in the world of "The Eagle in Exile" is described as a "right-wing Soviet Union" after a revolution turned the country into an autocratic state dominated by the military and the "Tea Party Coalition." This caused Americans living overseas and in exile to form the American Overseas Republic.
* The United States is also economically intertwined with most of the rest of the world. Any potential invader knows that, for example, cutting off American agriculture to the rest of the world will likely result in food riots, quite possibly within their own countries. China, especially, would have to worry about what would become of their economy without the U.S. to sell to, meaning they'd be far more likely to enter the war on the side of the U.S. than to be one of the invaders.
* The United States isn't big into Quidditch, as it's been supplanted by a variant called Quodpot. In this game, the goal is to get the ball into a cauldron before the ball, which is magically
* The United States is usually criticized for the scope given to the sports that are played there; while it's widely acknowledged that leagues such as the NFL, the NBA and MLB are top-notch and are watched by millions of people, the Super Bowl (namely by its moniker
* The United States Lighthouse Board (1852-1910) was like this as well. It consisted of uniformed Army and Navy officers who oversaw lighthouses, but of course their expertise was primarily technical and logistical. The postings were often relatively comfortable, with each officer having his own house at the post, and allowed to have his family live with him.
* The United States Marine Corps was established in July 1798. However, most Marines trace the origins of their service to the Continental Marines, established in November 1775.
* The United States men's and women's Curling teams. Every match they have played so far has been decided by the very last rock in the 10th and 11th ends, and always not in their favor.
* The United States Merchant Marine is arguably like this (as are most country's merchant navies). While in and of itself a civilian career, Merchant Marine cadets and officers must wear naval-style uniforms and abide by military custom and are

obligated to become a part of the United States Navy Reserve.
* The United States military combat uniforms (the Army Combat Uniform, and before it, the Battle Dress Uniform and Desert Combat Uniform) all feature a patch with a reflected United States flag on their right shoulder
* The United States military has long-standing conservation programs on its military bases. There's a species of butterfly, Saint Francis' Satyr, that now only exists at Fort Bragg in North Carolina, and the Army is actively involved in its preservation.
* the United States military. You get to be a warrant officer by being more skilled in your Military Occupational Specialty than an E-9 (highest ranking enlisted) in that specialty is supposed to be. Unlike regular commissioned officers, warrant officers don't need college degrees (though many have them anyway). Although outranked by regular commissioned officers, they still rate salutes from enlisted members, and can even be made company commanders in specialty units.
* The United States never allowed officers to purchase commissions, but since the US Senate has to confirm all field grade officer promotions, several officers got promoted based more on their political acumen rather than any military expertise. Examples of the result of this trope in the American armed forces include:
* The United States of America has been described as the world's biggest arms dealer. Russia takes second place (its exports are hugely down from the days of the USSR, where arms were sent to fellow communist revolutionaries and any governments they wanted to sell/donate arms to, with famous early examples being the
* The United States of America is often referred to as simply "the United States", especially in formal contexts such as official titles like President of the United States or Supreme Court of the United States. Conversely, The United States of Mexico usually has that part of it's name dropped just to avoid confusion.
* The United States of America. The national motto of "E pluribus unum" means "out of many, one"; the Statue of Liberty says "give me your tired and hungry, your huddled masses." Only instead of going out to aggressively incorporate other peoples (early days notwithstanding), citizens of other nations are invited and encouraged to add their culture to the national gestalt. Hence, "the Melting Pot." Inevitably, there are some who
* The United States of Canada, whilst the remaining states descend into a theocracy known as "Jesusland".
* The United States Of Leland outraged many disability rights activists with its sympathetic portrayal of the murderer of an autistic child.
* The United States of Monsters and ruthless killers, but the people fighting them are arguably worse.
* The United States of Monsters for his dead human son while Peter had just lost his only living relative. The two generally get along great even if Peter resents Thoth's somewhat condescending and controlling manner. Tension in their relationship is more along the lines of money, career choices, and other things which would be in a mortal parent-child relationship.
* The United States of Monsters until the 2008 Financial Crisis when they proceeded to bail out the United States in exchange for legal citizenship. It's a relationship which has many ups and downs.
* The United States of Monsters, vampires lose their reflection when they become Old Ones.
* The United States or EAS, because it's not just for broadcast — you can also get alerts on satellite and cable TV, weather radios, highway signs, or your cell phone, in addition to radio and OTA television. Modern weather radios and cell phones are sufficiently advanced that they can turn on to broadcast a warning (useful if it's the middle of the night).
* The United States played some sort of important role in the early centuries of colonising the Solar System, including mentions of NASA or its successor partaking in the colonisation of Mars. (Captain Brannigan, a
* The United States Secret Service bemoans the number of times protectees attempt to give their watchdogs the slip or change the itinerary to stop some place more fun. While it might seem like teenaged kids are more likely to do this than adults,

the reverse is in fact true. Adults generally aren't used to having a team of people plan their every move and watch them like a five-year-old.
* The United States Secret Service handles this for the President and other officials, as well as visiting diplomats. Interestingly, the protective mission is barely 10% of the manpower: the rest serve as federal police attached to the Department of Homeland Security, where they investigate (among other things) counterfeiting (which is what they were originally created to deal with—by Abraham Lincoln, shortly before his assassination), cybercrime, and identity theft, thoroughly unrelated work. The Secret Service ended up with the duty of presidential bodyguards because when it was decided (after a few too many assassinations) that a permanent and well-trained squad of bodyguards was needed, the Secret Service was the largest federal law enforcement agency (the FBI did not exist yet) and thus the only one with sufficient manpower for the job. Also, a little-known division of the Secret Service is the C.A.T. or Counter Assault Team, which is made up of former US Military Elite types. These are the guys who travel around in the presidential convoy and stay at the White House in full combat kit with one objective: stopping assaults on the president.
* The United States Secret Service keeps records of every counterfeit US currency bill ever discovered, so they can match ones they find to see if it is a "new batch". Every written threat to the President (and other officials) is kept to see if the person has made a threat in the past.
* The United States Secret Service was originally founded to eliminate counterfeit money, but now is best known for being the bodyguards for political figures and their families. They still have anti-counterfeit duties, however, and as such the Secret Service was part of the Treasury Department until 2003.
* The United States Secret Service wears those big reflective sunglasses for two reasons. The first is to obscure where they're looking and thus make it harder to hide from them. The second is because it makes it look like they're emotionless and have no eyes, and that's
* The United States Soccer teams seem to be making a habit of this, particularly in the summer events. Note that, in non-knockout matches, there is no overtime. The 2011 Women's World Cup example does not count, as their late goal equalized and sent them to penalty kicks, as opposed to winning the match before that.
* The United States) sometimes say: "We didn't cross the border; the border crossed us."
* The United States took advantage of the Rockies to train men for the Alps. This resulted in some Italian soldiers being quite shocked by the sight of these men
* The United States to print money, but some of this it learned the hard way:
* The United States usually sees itself in a Second American Civil War between the Federal Government,
* The United States Vice Presidency was considered an unimportant office for most of its existence, and the VP was often not privy to secret government projects or information of what the government was up to. This kind of bit the US government in the rear when
* The United States was the only map used for the endgame in the pilots, and state flags were used as markers. The likes of the maps of Africa, Europe, Asia, and North America would eventually be added to the show. One episode of the actual series was shot so early that they didn't have the Africa map ready it, and the endgame had to be filmed a few weeks later into production of Season 1.
* The United States, when it gained legal recognition by the Treaty of Paris in 1783, consisted of that portion of the modern lower 48 states east of the Mississippi River, minus Florida and the Gulf coast. It stayed that way for twenty years. Then, over a period of 45 years in the early 19th century,
* The United States women's national soccer team seems to have a habit of this in recent tournaments.
* The Unite the Right Rally in Charlottesville, Virginia did not represent the mainstream American right, but rather fringe white supremacist groups. The fallout from the rally and subsequent terrorist attack only served to create huge fissures in the nation's right wing, dividing it between Donald Trump's nationalist wing and

the more mainstream neo-conservative GOP. In the end, it was the anti-Trump left wing who was reunited and re-energized by the attack after several slow months, rapidly organizing vigils, protests, and anti-white supremacy campaigns in response. As Somerville, Massachusetts mayor Joe Curtatone put it:
* The "Unite The Right" white supremacist rally in 2017, which devolved into brawls with counter-protesters and a terrorist attack by one of the white supremacists, are commonly referred to as "Unite the Right" by the white supremacists themselves, but to everyone else are almost universally called "Charlottesville", after the city the rally took place in. Unlike the Virginia Tech shootings, the University of Virginia is almost never referred to, mainly as most of the events took place off the campus.
* The Unit featured a company called "Blackthorne", which tried to recruit one of the members.
* The Unit features two of these, the first from Sergeant Major Jonas Blaine to new guy Bob Brown, getting him ready for his first mission. "The Universe has conspired to bring you here to this moment. You've been wanting this moment your whole life. Well, here it is.". This is then followed by Blaine's wife Molly talking to Brown's wife Kim, who are far away back at the base. Kim is mightily frustrated by the Unit lifestyle and is ready to leave, regardless of what it does to her husband's career in Special Forces. Molly basically tells her to stop whining and chill out and reconsider; resulting in a former page quote for this trope.
* The Unit for officers who are discovered to be sleeping with a shooter's wife is for the shooters to put the officer on trial and then execute him to prevent this sort of thing. When Mac finds out that Tiffy and Colonel Ryan have been sleeping with each other in the season three premiere, Jonas stops Mac from killing Ryan there and then, and states a trial can wait until they've dealt with the more pressing problem of the terrorists who are targeting them.
* The Unit has the team deployed to Afghanistan to take out a high-ranking Taliban leader.
* The Unit, in an episode where the members of the unit infiltrate Syria to rescue Jonas' daughter, despite being strictly told not to do so because it constitutes as an act of war against a sovereign nation. Just two weeks before the episode was aired, there were actual news reports of an American attack in Syria, involving an infiltration team and helicopters. While the episode itself was (probably) written and filmed long before these events, the fact that it aired two weeks after it actually happened makes this a curious accidental case. (In point of fact, such a coincidence would usually lead to such an episode being pulled by the network and rescheduled for later, on account of it being too soon.)
* The Unit: In the Season 1 episode “Eating the Young”, Hector Williams’s girlfriend breaks up with him when he reveals to her that he is in Spec Ops, and not a Logistics Clerk as implied by his official Army cover. She wants someone who can have a viable career outside the Army, so she doesn’t see a future with someone whose only skill is “gunfighter”.
* The Unit, is accosted by two white men after asking a white woman to go into a whites-only shop to buy Jonas a soda. In the first version of the story Jonas tells, Dad talks them down, but in the second version seen at the end of the episode, they pull out a chain, clearly intending to beat or lynch him, and Dad kills them both with his KA-BAR knife. He then steals their truck to get out of town (no jury in the South would accept a self-defense plea from a black man against whites).
* The unit is made up of recurring characters, and the civilian is new. In this case, they become a problem for the soldiers. They have
* The Unit, Jonas goes home after a successful assault on a hijacked airliner, and promptly shoots a couple holes in his bathroom mirror when he mistakes his own reflection out of the corner of his eye for a hijacker who had hidden behind a seat during the mission.
* The Unit killing, which is described as being pretty much a requirement for the job. The message is delivered with a bit of irony given the mission that sparks the soul-searching - to protect someone from being assassinated by using a sniper rifle

capable of killing someone in a crowd with little risk of collateral damage to innocents - doesn't actually fall into the category of cold-blooded murder.
* The Unit, Kim Brown is investigated because she knew vague details of a mission which she claimed to have learned in a dream. The Colonel brings in a psychic specialist, and by the end of the episode (even though none of the characters realize it), the audience is pretty convinced that Kim is a high-level psychic medium.
* The Unit never shows the plane, just a missile coming out of nowhere like the fist of an angry god. On one occasion the boys joked about it a little.
* The Unit runs across a row of parked cars. One of them pulls out just before he reaches, causing him to fall and break his ankle.
* The Unit, so the train conductor isn't told to stop the train until it's almost too late.
* The Unit Specialist Faction. without fear of being hard-countered, and then steamrolling the opposition. Usually found when factions in a game have sub-factions, such as a brute faction having sub-factions that improve infantry power, vehicle power, or air power. Also found when a game has so many factions it covers all the other faction types and just takes the base idea of one faction and leans it to a certain unit type.
* The Unit, stock footage of the United Nations appears. However, said footage shows the East German flag.
* The Unit: the lawyer played by Rebecca Pigeon tells Molly that "I cannot" advise Molly to secretly tape someone to use for blackmail, "as that would be illegal."
* The Unit to Bob Brown's selection process and the plot involves no combat at all.
* The Unit was a remixed cadence call, "Fired Up, Feels Good." Somewhat snicker-worthy in that they used a Marine cadence call for a show about Army special ops. Oops. A different theme for the next two seasons.
* The Unit was promoted from Staff Sergeant to Sergeant First Class and had a small promotion ceremony where Colonel Ryan ripped off his old insignia and stuck on the new one, with a playful light punch to the chest to signify the joy of the occasion (in the pre-PC days of insignia pins, the punch would have been much harder and delivered with the intention of drawing blood).
* The Unity Saga Loads and Loads universes, to which it also adds a few original characters.
* The Unity Saga universe, he communicates with the Emperor through Force meditations. And it's implied that this doesn't make use of the wormhole; they are just somehow able to link minds at times that correspond with the fixed temporal displacement of the wormhole.
* The Universal Century averts this to all hell and back, especially once Anaheim Electronics comes into the picture.
* The Universal Century faces multiple World War III scenarios before
* the Universal Century Gundams however, it's also revealed that Anaheim is just the main front corporation for the much more secretive and elusive Vist Foundation.
* The Universal Century setting is plagued by this. The One Year War from the first series is followed by multiple smaller but still extremely destructive conflicts going hand in hand. Each is a result of the previous conflict and the issues which led to the war left unresolved. Additional side stories between the major series further add conflicts which create a more and more bleak picture of the Universal Century.
* The Universal Century timeline comes close, in that the Earth Federation rules over all of Earth and generally claims sovereignty over the colonies, but some colonies are not overly happy about this. Even the UC colonies aren't a unified bunch. Side 3 makes up the heart of Zeon (considered semi-autonomous after the One Year War, albeit with a puppet government controlled by the Federation in reality), while Side 6 declares political neutrality in the One Year War, Side 4 briefly becomes the
* The Universal Mustache Translator in "The Chronicles of Meap" translates an Alien language (comprised only of the word "Meap") to English; however this is only for the English speakers' sake, as the aliens can apparently understand English.

Leads to a well done subversion of a
* "The Universal Solvent", Huey explains to Uncle Scrooge what will happen to the Earth if they don't find a way to retrieve the universal solvent that Scrooge recklessly spilled before it dissolves its way to the Earth's core.
* The Universal Survival saga is quite criticized for this, but for some it was tolerated as the artwork was more polished than earlier episodes. Most of the animations are from the characters of the bench offering commentary, but here are some examples of reused animation:
* The Universal Survival Saga ups the Lovecraft aspects by having Zen'o decide to
* The Universal Telescope in "Astro-Blasters" can rearrange the location of astral bodies but causes the user's eye to morph in shape.
* The Universal War, but due to said empowering they are all but divine. The Universal War raged for centuries, was immensely destructive, and cut the number of Demiurges from millions in number down to only seven, each of whom currently rules a seventh of Creation.
* The universe also features a few smaller megacorps, like the hero-run Rand Industries (Iron Fist) and Worthington Industries (Angel).
* the universe as a whole is a lot bigger - the light-years long hive fleets capable of consuming entire systems may only be the first probing fingers of an organism the size of galaxies which has already consumed far large and more powerful empires. The Earth seems important to humans, but to others, it's just a small part of their next snack.
* The universe consists of a natural one: the universe begins with Fauna Luster's (the Goddess of Beginnings) dawn (the Big Bang), lives out its natural life expectancy until heat death at which point Entropy devours the dead universe and all four
* The Universe Doesn't Cheat proctors if he thinks the scar on her face is from her hairdresser screwing up.
* The Universe Doesn't Cheat through a 180 degree backflip while traveling at high warp.
* The Universe Doesn't Cheat to take her first command, but is a supporting character here.
* The Universe had pillar-like legs anchored to a flat, scaly base that could slowly glide over sand.
* The universe has this as one of its offices. However, the particular office holder in the series averts this; he's less interested in being a relentless evil and more interested in simply being a fair evil - that is, separating good and evil people through temptation so that they can go to Heaven or Hell rather than stuck in Purgatory.
* the Universe having been destroyed by How he re-created parts of the Universe he had never seen or heard of, and how an alien whose power is to be omnipotent can make mistakes in rebuilding the Universe, is left unexplained. Some fans consider this to be the animated equivalent of the "Superboy-Prime punches time" meme.
* The universe is itself shaped by belief—if enough people believe something is true, it becomes true.
* The universe is not just expanding, but accelerating. It will, in time, accelerate to faster than the speed of light (it's not that distant objects are actually moving that fast, but that space itself it stretching at that speed), at which point light from those objects will no longer reach us. Assuming anything resembling humanity is around by then, the only stars they will have to look at are those of the local group megagalaxy, and most of those will be
* The universe is the ultimate example. While data shows it to be flat
* The universe itself. It has no atoms, but a set number of "tratons", that are "polihedral forms made of dimensional energy", as opposed to our spheres of mass surrounded by energy. The tratons cannot be transformed into one another, and there is a set number of each, from the start to the end of the times. When the humans arrived, in an event that may or may not have destroyed our universe, their matter was "translated" into the closest possible alternative, but since it wasn't exactly equal, they need constant doses of a plant/animal, quite strange on itself, called

* the universe literally falls apart it works out fine for the most part.
* The Universe may have experienced after the Big Bang a process named cosmic inflation, that expanded it
* The universe of the fairy fly. Air is an all-encompassing jelly that it has to grab onto to fly.
* The universe's local catlike humanoid aliens, the Ctarl-Ctarl, are typified as egomaniacal, violent jerks. However, one of them is
* The universe's "real" Peter Bishop died as a young boy; his father Walter kidnapped Peter's
* The Universe, where they point out that blowing up the planet would require hitting it with something extremely massive (i.e. another planet).
* The Universiad, are a movement that seeks the banning of all augmentations. Given that augs are ubiquitous even among the civilians and are necessary to counter Forum-exclusive diseases, only a tiny number of diehards take them as anything more than an annoyance at best.
* The Universiad, some Originals are members of elite groups and others are not. In fact, at least one group, the Close Air/Orbital Support Task Force, explicitly takes pride in being the regular joe schmoes who unglamorously play A-10 INSPACE.
* The Universiad, the failure of the First Incursion was in part due to these sorts "commanding" MILNET. Afterwards, GhanjRho had them deposed and replaced with properly able officers.
* The Universiad was the only non-renewable resource they had on their growing post-scarcity, immortal community at the time.
* The University expansion has the Philosophy major's final semester. "Senior Thesis: Preparing for the Fast-Food Industry". Amusingly, Philosophy is the major indicated to be best for the aforementioned Culinary career.
* The University Library of the University of Stellenbosch, South Africa, was built beneath the central green, as the land was donated on the condition of the green being a recreation area for the students. A bonus is that the entrance is actually underground as well, as it is dug down into a sort of amphitheater. Emergency exits and aircon vents still pop up here and there for safety.
* The University Medical Center of Princeton at Plainsboro opened in Plainsboro Township, NJ, in 2012—the
* The University of Bristol was genuinely founded by a man whose son failed to get into Oxford. The original 'college' is now the Physics Department.
* The University of Chicago goes as far as to invoke this trope, embracing unashamed expressions of nerdiness. This is helped by how the college's gothic architecture resembles
* The University of Chicago, known for their eccentric admissions essay questions, assigned the following as an essay prompt one year: "Don't write about Reverse Psychology."
* The University of Illinois Undergraduate Library is entirely underground, save for two small entrances each about the size of a large trailer. It's awesome because they did this so that it would not cast a shadow on a nearby "historic" cornfield. Seriously, you can't make this stuff up.
* The University of Miami Hurricanes football team, particularly in the 1980s and 1990s. The Canes, which won five national championships and appeared at several more title games, developed a "Thug U" reputation due to its "Catholics vs. Convicts" rivalry with Notre Dame, the players appearing at a national championship pregame banquet in combat fatigues (and losing to underdogs Penn State the next night at the 1987 Fiesta Bowl), the on-field taunting by the team (which led to the NCAA adding "the Miami Rule" addressing excessive celebration), the team's alleged payments from Two Live Crew's Luke Campbell, and many of the recruited players being from urban areas (unprecedented at the time, now somewhat the norm).
* The University of Missouri Tigers have been playing basketball since the early 1900s and still have never appeared in a Final Four, making them the
* The University of Nebraska-Lincoln football program holds the NCAA record for most consecutive home-game sellouts (the streak started in 1962, and is still running as of 2019). When the university celebrated the 300th consecutive sellout

game in September 2009, they very carefully did
* The University of New Hampshire Wildcats football team consistently defeats higher-ranked teams, NCAA Division I FBS
* The University of Notre Dame's "Fighting Irish" mascot is beloved by Irish-Americans and in Ireland itself. The team has hosted 2 games there as of 2018, both of which sold out (albeit, a ton of American fans also travelled to the game). The planned third game (in 2020, which was eventually canceled because of COVID-19) had sold out within 24 hours.
* The University of Oregon managed to work a deal with Disney to use Donald Duck as their mascot. The official relationship started with a handshake agreement between Walt himself and the university, and was later formalized in 1973, though Disney imposed limits on where the costumed mascot could be used. In 2010 the deal was modified, with Oregon changing the duck costume (notably the head) to no longer resemble Donald, allowing The Oregon Duck to appear at more events.
* The University of Pittsburgh Panthers' every victory, no matter how minor, will be heralded from the students' seats with the main chorus of
* The University of Planet faction is the ideological antithesis of the Lord's Believers game mechanic-wise, but the faction leader Prokhor Zakharov is especially into this trope, as a number of quotes from him for technological advances reveal. According to the prequel short stories, he and Miriam Godwinson (the Lord's Believers faction leader) do
* The University of Tennessee uses "Rocky Top" by The Osborne Brothers as its unofficial fight song. It's far better known than UT's official one.
* The University of Victoria's Engineering Students' Society has an annual fundraiser on March 14, Pi Day (3.14 - get it?) One person makes a donation to have an individual of their choice pied; the victim can dodge the pastry by matching the donation. Some good-natured individuals allow themselves to be pied but donate as well.
* The University of Virginia Cavaliers tend to do this a lot. There's a reason fans sometimes call them "Cardiac Cavs":
* The University of Wyoming adopted the 1912 tune "Ragtime Cowboy Joe" as an unofficial school song in 1961. It went on to become one of two official fight songs and is now the Cowboys' and Cowgirls' only official fight song.
* The Unix cal command prints calendars. If you type cal 9 1752 you get the calendar for September 1752. The 14th follows the 2nd because England converted from the Julian to the Gregorian calendar at that time.
* The Unix/Linux command "fsck" has become a substitute for the F-word, particularly in the geek community. Somewhat justified, since having to use the "fsck" command can indicate serious hardware issues.
* The unkillable bronze giant Talos had the habit of throwing rocks at all ships coming close to Crete, as he couldn't tell seafarers from invaders. Then one day he started his act with the
* "The Unkindest Cut of All" begins with a warning that the column's topic (circumcision) "involves an extremely mature subject matter that might offend your community standards, if your community has any."
* The Unknowable Room: A general fanfic archive created and populated mainly by James/Lily writers.
* The Unknown: Alonzo winds up in Nanon's friend zone, and doesn't care for it one little bit.
* The Unknown Primarchs' story will never be revealed precisely for this reason, as it allows fans more freedom in deciding backstories for them or their descendant Chapters.
* The Unknown, several female audience members are seen visibly ogling Malabar's muscular physique.
* The Unknown Soldier and no humanising weaknesses whatsoever. His men hate him. Corporal Lehto is another aversion: he is shown to possess psychopathic and antisocial tendencies, and he bullies Pvt. Riitaoja relentlessly, but he is not incompetent nor a coward. His men fear him.
* The Unknown Soldier, and with the militaristic ideology of the day, he sees being

a soldier for the fatherland as a higher calling.
* The Unknown Soldier, as the story takes place in Finland, during the Continuation War, and mostly tells the story from the point of view of the rank and file.
* The Unknown Soldier completely averts this. While some of the officer characters are bitter about the deserters, the narrator only has sympathy for the fear and the sufferings of the soldiers. The most reasonable officer explains that those who become deserters simply were taken to the limit of what a human could be expected to withstand... and then over it. They wouldn't have been of use in battle anyway, so let them go. One of the central characters tries to become a deserter but is lost from his companions and returns back to his platoon with nothing but a joke for an excuse for his absence. The others don't hold it against him.
* The Unknown Soldier features the soldiers brewing alcohol during a stalemate. They nickname the container it's brewing in "Boy".
* The Unknown Soldier gave us Pvt. Rahikainen. Rahikainen never participates in any meaningful fighting, but no-one makes a fuss since they know that Rahikainen's skills are all that stands between them and starvation.
* The Unknown Soldier has a deconstruction of this in Major Sarastie. He says intellectual, wise-sounding things, seems like he was pondering of something deep and meaningful, and admires the ethnographic value of the buildings of the occupied areas. However, it's mostly just a front. He's aware of this trope and that he as an officer should try to live up to it. In reality, his thoughts and interests are much more down-to-earth and practical.
* The Unknown Soldier has several cases where people defy the enemy guns, but one literal case of a man facing execution who refuses a blindfold. "I've seen more rifles up the muzzle than you down the sights."
* The Unknown Soldier: The story follows the journey of a machine gun platoon during the Continuation War between Finland and Russia for 3 years. Only half of the cast survives the war, and less than half survives to the finale without being even wounded and sent away.
* The Unknown Soldier to becoming a commissioned officer was particularly hard, because prior to all of this, his native Finland had went through a civil war, and his family was on the losing side. Indeed his father was a Company commander of the losing Red army.
* The Unknown Soldier was denied any actual military equipment from the Finnish Defense Forces due to disagreements with the director, with only authentic footage from battles in the Continuation War edited in to the film as well as theater props being used. The FDF however extensively backed the 1985 re-filming despite it being much darker and edgier - and, depending on whom you ask, more realistic and loyal to the book than the 1955's heavily romanticized version. The FDF did the same thing again for the 2017 version, which was on the basis of the uncut Sotaromaani version of the novel, but also was reportedly assisted by French military firm Rafale International, whose fighter planes have been recently in consideration to replace the Finnish Air Force FA-18 Hornets, as movie sponsor and one of the financial backers.
* The Unknown Soldier was on a mission that got him trapped on a U-Boat while still in disguise. When it sinks an Allied ship, a fanatical Nazi officer in command on top has a lifeboat destroyed with the U-Boat's artillery gun with a smug smile. That was too much for the Soldier who attacks the Nazi and is of course instantly subdued and unmasked.
* The Unknown Soldier was once assigned to impersonate a presumed dead American soldier who was known to be so ferocious in battle, he was nicknamed "The Edge." Eventually, the soldier found The Edge was alive, but a prisoner of the Japanese, with his mind utterly shattered with battle fatigue.
* The Unknown Soldier, which tells about the Continuation War between Finland and Soviet Union 1941-1944. The band is the collective main character of the novel.
* The Unknown Subverted when G3 gets upgraded to deal with them. Not only can his bullets hit them, they can eventually kill them.
* The Unknown Supergirl, a humongous eldritch abomination named the Infinite Monster stomps a path of destruction through America, but it doesn't seem

malevolent or aggressive, but completely unaware of the existence of little living things scurrying around its massive feet.
* The Unknown Supergirl and helps him design a superweapon. After Luthor kills Superman, she will "accidentally" kill Luthor while bringing him to justice, and then "[She'll] be the mightiest person on Earth, free to conquer or destroy Earth as [she pleases]"
* The Unknown Supergirl, a ring of Kryptonite dust approaches Earth, forcing Kara to dive underwater to be safe. Superman and his cousin would be inconvenienced by Kryptonite several more times in the course of this single storyline.
* The Unknown Supergirl: At the end of a hallucination where Kara is made to believe that she has killed people accidentally, she sits on the ground, curls up in a ball, and cries.
* The Unknown Supergirl fights a gigantic creature who is so large, all one can see are it's legs tromping across the land. At one point, the monster's right foot tramples on Kara.
* The Unknown Supergirl, it was revealed that her childhood crush Dick Malverne always knew, but he kept mum.
* The Unknown Supergirl, Kara cries into her cousin's chest when, after spending one year training and striving to prove she was ready to go public, her powers disappear right when Superman is about to announce the world her existence.
* The Unknown Supergirl kill Superman and then "accidentally" kill Lex while capturing him so he can't tell that the "hero" who avenged Superman was in fact Luthor's ally.
* The Unknown Supergirl, Lesla-Lar cooks up a scheme to get rid of Superman and Lex Luthor, and then taking over the world. Or destroying it. Whatever she pleases.
* The Unknown Supergirl: Lesla-Lar replaces Supergirl after getting rid of her; but rather than killing Kara, Lesla dumps her into an alien city after brainwashing her into believing she's Lesla herself.
* The Unknown Supergirl, Lesla-Lar's spying devices can see everything Supergirl does, anywhere and at any time, despite Lesla being stuck in Kandor, the Shrunken Bottle City.
* The Unknown Supergirl, Lesla-Lar's Time-Viewer lets her see into the past, but it cannot show images of the future.
* The Unknown Supergirl, Linda Danvers reveals her foster parents that she is Superman's cousin. Her mother says she is proud of her.
* The Unknown Supergirl, Linda Danvers saves a couple whose car was careening down a precipice.
* The Unknown Supergirl reveals her existence to the world, and she has to struggle to take on new responsibilities and to live up to Superman's legacy.
* The Unknown Supergirl reveals that in the Kryptonian city of Kandor, its greatest minds' brains are preserved in fluid-filled vats so they can keep coming up with new ideas for the Kandor's benefit.
* The Unknown Supergirl reveals that the Bottle City of Kandor has "The Hall of Sleepers", a chamber where volunteers are placed into a state of suspended animation inside transparent cylindrical pods to be awakened one thousand years later.
* The Unknown Supergirl sees through her act as soon as he meets her due to "Supergirl"'s different scent, mannerisms and behavior.
* The Unknown Supergirl's powers as part of a scheme to replace her. While in her powerless state, Kara finally found adoptive parents. She nearly abandoned her career as Supergirl, until Mr. Mxyzptlk granted her all the abilities of Superman, plus a (temporary) invulnerability to green kryptonite.
* The Unknown Supergirl storyline has the Infinite Monster, a scaly humanoid red monster from a parallel dimension. It's so colossal that his head hit the upper atmosphere.
* The Unknown Supergirl, Superman gets hit by Kryptonite radiation while flying and starts falling down. Supergirl quickly grabs him and holds him in her arms while flying him away from the Kryptonite.
* The Unknown Supergirl, the army keep wasting bullets, artillery fire and missiles

on the Infinite Monster long after verifying that its shielding aura is impenetrable.
* The Unknown Supergirl, the Infinite Monster is surrounded by an impenetrable, white-glowing shielding aura. Nothing can seem to damage it, not even a Kryptonian's full strength.
* The Unknown Supergirl to her parents and they accept her and become her secret keepers.
* The Unknown Supergirl while pretending to capture him so he cannot reveal she was in cahoots with him.
* The Unleashed expansion adds the ability to own dogs and cats as fully-fledged family members. If Vacation is installed, they can actually be taken on vacation with the rest of the family, and the pre-made resorts and campgrounds from Vacation were upgraded with pet-related objects to support them (and some other aesthetic objects from Unleashed), though there are some signs that suggest this was an afterthought.
* The Unlikely Ally is centered around a rogue Incubator who grew a conscience and decides to help the main characters. The circumstances behind this happening are explored in later chapters.
* The Unlikely Ally. More specifically, before the girls besides Homura become aware of the truth, he talks about how Key is mentally ill and how much he wants to help him. He’s not lying since, from his perspective, Key is mentally ill and needs correction. Key disagrees . . . vehemently.
* The unlucky soldiers assigned to try and cut a hole in barbed wire were equipped with bulky plate armours to offer some protection against machine gun fire (the most notable being the American
* The unmarked grave in Stormwind Cemetery. It has no statue or plaque, but does have a Lordaeron symbol. Who's buried there? Fans have some theories. Some think the remains of Arthas Menethil (as in, the Lich King) are buried there, which would explain the symbol. (When this was asked at BlizzCon 2011,
* The Unmasking: A superhero (or supervillain) reveals their Secret Identity to someone, willingly or by force.
* The Unmasking: The hero reveals their secret identity to someone, willingly or by force.
* The unmasking was actually Kane's idea; wearing it was growing increasingly uncomfortable and making it increasingly difficult to perform, and he felt that his inability to display facial expressions was limiting what they could do with the character. He would later start wearing one again, albiet with enough missing that you could clearly see his mouth still allowing for better facial expression, regaining a Few Levels In Badass in doing so, and eventually lead into the popular
* The Unmasking: When a superhero's or supervillain's true identity is finally revealed to the world.
* The Unmasqued World in the whole wide world knows about something that was formerly secret.
* The Unmasqued World (in variants tilted towards supernatural horrors rather than metahumans) may be called in to deal with it.
* The Unmasqued World: The masquerade has been broken, and the world of normal humans must now adjust to the extraordinary living in their midst.
* The Unmasqued World. Turns out his fears were for naught, as Mero compares fish to mermaids the same way a human is compared to cows or pigs. Papi is "totally okay with cannibalism" as it shows her violently biting into a roast chicken. A similar scene plays out when the group goes out to an open market. Several of the food vendors frantically pack away chicken, fish, and other meats thinking they might offend the liminals.
* The Unmentionables for a blindfolded Bugs Bunny, he complains "Look, fellas, how many times do I have to tell ya? I haven't got a cold!"
* The Unnamed against his two security guards. Other techniques include using a rubber facemask to conceal his features (it appears to be a real face to a casual observer), a fake bomb to get the guard to open the security door, and wearing a headset so people won't engage him in casual conversation. Unfortunately he has a

habit of taking trophies from his victims, which isn't a good idea when the victim's mother is a witch.
* The unnamed agency hunting the alien parasites in "Something About Harry".
* The unnamed agency which tracks down girls and women with telekinetic powers in "The Choice".
* The unnamed alien soap opera watched by the whole household in the original
* The unnamed alien species mentioned in "Skin of Evil" apparently did this in the past, managing to purge themselves of all evil, at which point they became angelic beings and left the mortal world behind. Unfortunately, that cast-off evil became the foul
* The unnamed ancient humanoids from "The Chase" who seeded planets with their DNA, thus being responsible for all humanoid life. They also encoded a map in this DNA that led not to a superweapon, or a species of
* The unnamed "cloudy drink" that is supplied to all the inhabitants of the eponymous
* The unnamed) collects trophies from his victims, usually a personal item from their room. When he murders a toymaker, it's implied that this habit enables his witch mother to track the hitman to his apartment.
* The unnamed countries of Eastern Zemuria are one to both China and Japan.
* The unnamed curator of the Black Museum, a museum that holds memorabilia of peculiar Scotland Yard cases, in the short-lived manga
* The unnamed diarist (later revealed to be Brian Boyes, see below) in the
* The unnamed female Apostle that Guts kills in the very first scene of
* The unnamed girl from the "Concrete Angel" music video by Martina McBride. She's a cute little girl that the video's protagonist
* The unnamed gnome king from the episode "Greedy Goes on Strike", who focuses so much of his attention on food that he neglects his own son, the prince.
* The unnamed group of evil-worshipping monks that trained Prometheus and gave him the key to enter an alternate dimension.
* The unnamed little girl mistakenly named "Cancer" thanks to her medical bracelet by the inmates of
* The unnamed mad scientist from "The Missing Link." "And my name is…" [character interrupts him with another name] "Yes, [name]! NO, THAT IS NOT MY NAME!"
* The unnamed old man and father of the hillbillies from the first two
* The unnamed sauopod that appears briefly during the roundup scene in
* The unnamed terrorist cell in the "Lo-Fi/Mayhem" two-parter is given no real background, with its members being of various races and ethnicities. It attempts to pull off an
* The unnamed villain in the giant-sized fiftieth issue was some sort of scientist who had spent decades plotting revenge against Reed. (As in
* The Unnatural Enquirer, and that was Jesus. Perhaps a bit of a retcon?
* The Unnatural Inquirer whose mother was a succubus who apparently seduced a member of the Rolling Stones and got pregnant with her as a result. Betty appears as beautiful woman with a short skirt and devil horns.
* The Unnatural in Roswell in 1947, but has nothing whatsoever to do with any crashed UFO.
* The Unniversity of Roalt's History Department is a designated historical resevior and so it is "haunted" by alumni and such.
* The unnumbered SCP in the 4000 slot is heavily implied to be the (or at least
* The Unobtrusive Fantasy of Manny Quinn stars Manny Quinn, a tailor's dummy at Mischerschmidt Playhouse. He's in love with theatre's leading lady, but for a long time is powerless to stop her maltreatment at the hands of Mischerschmidt. Eventually, he musters his will to kill Mischerschmidt and locks the body away in his own dummy box.
* The unofficial in-field leader of a team is called a captain. The role is frequently honorary, but most times given to
* The unofficial motto of Unseen University, "η β π" (Eta Beta Pi) is described as sounding like "eat a better pie" or "eat a bit o' pie". To an

American, the greek letters eta and beta are pronounced "AY-ta" and "BAY-ta," respectively, so while the pun can still start with "ate a", the middle part becomes nonsense, as "beta" doesn't really sound like any American-English word or series of words that could fit there (not to mention that many American accents are far less likely to drop "r"s from or add "r"s to the end of words).
* The unofficial name for Gliese 581 g, the first planet discovered outside of the solar system with a fair chance of supporting (Terragen) life, is Zarmina's World (or Zarmina for short). It's named after the wife of the chief scientist on the team that discovered it.
* The unofficial national sport of Mage players is negation of other supernaturals, seeing how few ranks in a magical discipline one needs to render a massively stronger opponent mortal, such as using a low-level mental power to prevent a werewolf's rage or remove the friction from the ground beneath a speed-based vampire.
* The unofficial nurse's motto: "Be kind to your nurse — we keep the doctor from accidentally killing you."
* "The Unparalleled Adventure of One Hans Pfaall" (1835) by Edgar Allan Poe involves a balloon trip to the Moon.
* the "unprejudiced" door is locked, in order to show no one is without prejudice. That said, some people still bang on the locked door and demand to be let through.
* The Unprincipled Affair of the Practical Joker. The asshole had stolen jewelry whose box included a document hinting at an affair the jewelry's owner had had, and blackmailed her. Wimsey made him look like a card shark and persuaded him to return all jewelry to the lady in question. Lord Peter and the other two card players then have the following conversation:
* The Unpronounceable, a Lovecraftian demon from another dimension that isn't defeated, merely locked out of this dimension because it didn't have a big enough foothold. This time. Ayla nearly died, and suffered psychological damage that required psychological help from psychics. Everyone else who saw the tiny part of it that got into our world (except the people who locked it out of our dimension) either died horribly or suffered horrific psychological effects. That's not too 'lite'.
* "The Unquiet Dead" as being "invisible to lesser species but devastating to higher ones", meaning that the Time War was "offscreen", as it were, to a large portion of the Universe.
* "The Unquiet Dead": Rose is at one point drugged and kidnapped by undertaker Gabriel Sneed, who's desperate to cover up the fact that he has a zombie problem at his business. She later angrily accuses him of copping a feel while he was loading her into his hearse.
* "The Unquiet Dead". Rose is ordered to change from her 21st century clothes into something a bit more appropriate for the Victorian period. The Doctor is impressed.
* "The Unquiet Dead" that he's the author's "biggest fan". He then has to explain that "fan" is short for "fanatic". Dickens is a bit put off, but warms to the excited Time Lord soon enough.
* "The Unquiet Dead", the Doctor feels Gwyneth's pulse and realizes she's cold and has been dead for some time, even though she's still moving and talking.
* "The Unquiet Dead": The Gelth aren't called ghosts, which is fair enough since they aren't actually ghosts, just gas creatures. They can also possess human bodies for a little zombie action.
* "The Unquiet Dead", the Gelth claim to be refugees from the Great Time War who have lost their bodies and only want to use dead humans as Meat Suits. It turns out that there are many more of them than they claimed, and they want to take over all humanity, not just the dead ones.
* "The Unquiet Dead" was perceived in some quarters as an attack on immigration (since the episode features aliens who come to Earth on the pretense of finding a new home after their planet was blown up, but are actually attempting to invade), even though the subtext was entirely unintentional.
* "The Unquiet Dead": When the Gelth reveal their true colours as being hostile, the one speaking through Gwyneth changes from blue to red, starting with the eyes.

* The Unreal Engine would not have been able to handle a fully rendered city with 2000 technology, forcing the creators to
* The unrelated NES game Xexyz would also be legal— and score 23.
* The unrest in China during the early 1600s has the Imperial court, a sizable army faction that's gone rogue out of disgust at the court's corruption,
* The Unreveal: Even when it looks like we'll find out the big secret, it never is revealed.
* The Unreveal: It takes time to detail exactly what you want to see. Not revealing it to you saves us time.
* The Unruly Hare has Elmer's rifle bent backwards, so when he tries to shoot Bugs, it goes behind him and hits two bullseyes Bugs is holding up. He shoves a mess of exploding cigars in Elmer's mouth and lights them ("You win, Doc!").
* The UNSC actually has a law (referred to as "The Cole Protocol") requiring all human ships to do this if they run into a Covenant ship; they must purge all navigational data and, if forced to retreat, make a random jump so as to not lead the Covenant to Earth or any other still functional colony. Cortana still technically followed the law, given that the Forerunner coordinates weren't for a human world. Obviously, the Cole Protocol became null at the beginning of
* The UNSC also has more conventionally programmed "dumb" AIs, which lack the capacity for growth of their "smart" counterparts, but don't go rampant. The only example of ones we've seen in the games are the New Mombasa Superintendent from
* The UNSC Cobra vehicle is an Anti Vehicle unit that can transform into an Anti-Structure artillery gun.
* The UNSC for some reason really likes to hire laidback Texan women to pilot their Pelicans. The one in the
* The UNSC has "Prowler" stealth craft which are designed to have minimal emissions, radar signature, and visibility. While earlier models had to rely on crude photoreactive panels for active camouflage, later models utilize reverse-engineered
* The UNSC has the Fall Of Reach, which was the equivalent of America's CENTCOM, Norfolk Naval Shipyard, Fort Bragg, and Norad being taken out all at once. And that's not counting the civilian casualties.
* The "Unscheduled Offworld Activation" alert, where someone potentially hostile dials in to the SGC gate at a period when they're not expecting arrivals, does use spinning red lights and sirens.
* The UNSC NOVA bomb. It is a cluster of nine nukes, each surrounded by a shell that, when the bomb goes off, briefly compresses each of the nine explosions to neutron-star density, giving each blast a 100x boost. Vice-Admiral Whitcomb explicitly calls them "planet-killers" and mentions they were designed with the intent of turning around the space battles against the Covenant through sheer destructive power. One is
* The UNSC Oversight Subcommittee was formed in response to reports of
* The UNSC Oversight Subcommittee was initially presented as this in
* The UNSC ships are fairly boxy, but still has the bridge on the outer portion with a big window. The Covenant ships however, have their bridges close to the centre of their fairly streamlined designs. The series does, however, avert
* The UNSC's orbital MAC guns can also be used to attack targets already on a planet's surface.
* The UNSC's "Smart" AIs are benevolent and helpful to humans... for seven years of their lifespan, after which the sum of their artificial neural pathways begin to contradict each other and grow too complicated to repair, causing the AI to become "rampant". This condition affects your AI companion Cortana in
* The UNSC's various mounted rocket/missile platforms, like those on Rocket Warthogs, are quite capable of this. In particular, the
* The Unseelie Queen Mab/Maeve is almost always portrayed as evil, even though a lot of the same books that mention her also mention that
* The unseen character Bad Horse threatens to "make [Doctor Horrible] his mare." Doctor Horrible stops bobbing his head to the music and acquires an appropriately bewildered look.

* The unseen race (otherwise known as the Disciples of the Light) who caged
* The Unseen University plays the trope very straight, as there are exactly eight levels of wizardry, and the number of people who can hold a rank has been fixed according to tradition for centuries. Because of this, no matter how good a wizard was, the only way he could hope to get a promotion is if a higher level wizard is promoted or dies, creating a vacancy at the next level to be filled. This ultimately created a tradition where many wizards who didn't feel like waiting for a vacancy to appear made a point of creating them via
* The Unsinkable Molly Brown has Johnny detain Molly outside the Saddle Rock Saloon to sing her "I've A'ready Started In," assisted by a male quartet, one of whom plays the guitar.
* The Unsinkable Molly Brown. It was later reinstated for Johnny alone in his first scene.
* The Unsinkable Molly Brown, Molly tries to become a lady and learns several foreign languages. Her resulting command of refined language is exemplified by this exchange:
* The Unsinkable Molly Brown, when Molly's father says that she should settle down with a nice Irish-Catholic man, she objects that she only wants to marry "the richest Irish-Catholic next to the Pope." She rejects Johnny's marriage proposals until he has made enough money to satisfy her demands.
* The Unsmile, it's not the end result that's cute so much as the effort she puts into it.
* The Unspeakable Oath magazine #18 article "The Chapel of Contemplation". If an Investigator makes an Accounting roll while searching the file system in the office, they discover a list of the title organization's income and expenses. These include many unspecifed "donations" (money received from blackmail), payments for a safe deposit box (where a valuable Mythos book is kept) and a large butcher's bill (from purchasing animals for sacrifice).
* The Unspeakable Vault (of Doom) fodder, but the comic focuses more on the wacky hijinks Cthulhu and friends get up to between summonings and stellar alignments. And while we can't stop them, we can give them serious headache.
* The Unspeakable Vault (of Doom), including Ygo's Fleshdark Toy, "for use with or without teeth". (Not really NSFW.)
* The Unspeakable Vault (of Doom), one of the Elderz tried to make some instant soup, only to realize after he started making it that the packet was a few million years out of date. It ended up creating the Shoggies instead.
* The Unspeakable Vault (of Doom) related entities and powers during World War 2.
* The Unspeakable Vault (of Doom)'s, makes an appearance. Unfortunately, he isn't used to the rules with the Elder Gods around...
* The Unspeakable Vault (of Doom) why apocalyptic logs are more and more detailed these days.
* The Unstable Ferin which were created by the mage when they were less skilled and will shift between a human and animalistic form at random and are viewed as the most dangerous type due to their volatile emotions.
* The unstoppable Juggernaut is highly susceptible to a mental attack. His costume includes a magic helmet that blocks telepathy, meaning that the bulk of most any fight against him is a desperate struggle to remove the helmet and then a telepath effortlessly dispatching him once that's accomplished. He's gotten tired of that and ended up making a skull cap made out of the same material as his costume so now they got two layers to fight off.
* The UnSub from "Hanley Waters" likes to sing "This Little Light of Mine" as that's what
* The unsub in "Elephant's Memory" targets his revenge attacks at the actual people who he feels actively harmed him (the football team who bullied him, his negligent father, and his girlfriend's abusive father). It's Reid who insists on assigning responsibility on those who could have stepped in sooner, but didn't. He outright tells a room full of police officers that they could have prevented his murder spree.
* The UnSub in "Exit Wounds" had a hunter's mentality, but tended to just walk up

to people and kill them rather than set up elaborate chases.
* The unsub in the episode "Today I Do". She even says to one of her victims, "I want to help you fix yourself."
* The UnSub in "The Eyes Have It", while not treating his hunts as sport like the ones in the former two episodes, used hunters' tactics (such as tripwires) to snare his victims.
* The unsub in "Unfinished Business" who seems to be partly based on the Zodiac Killer and on the BTK killer Dennis Rader, who also left letters. The only Zodiac thing was that Rader's letters just taunted the police; he never left cryptic clues in them, though he would announce that he had chosen his next victim.
* The unsub's mother in "Safe Haven" initially seems to have abandoned her teenage son out of desperation after he broke his sister's arm. He eventually gets her to admit that she's seen him as
* The Unsullied are eunuch slaves trained from childhood to be soulless weapons.
* The Unsullied are the only foot soldiers the Dothraki have any real respect for, considering their history with them.
* The Unsung War are both pilots who are known by their heavily customized (and old — Vietnam-era F-4G and MiG-21, respectively) planes.
* The unsympathetic German officer orders the soldiers to shoot some Russian civilians who have been taken prisoner, saying they were found trying to commit sabotage. The protagonists state to themselves that the sabotage allegation is nothing more than a pretense to shoot the prisoners because they're running out of food to feed them, and one of them is a child who they themselves took prisoner and befriended. They hesitate before finally being intimidated into doing it.
* The Untamed: Downplayed; in the scenes where Fairy chases Wei Wuxian, the crew got a hard time getting the dog to chase Xiao Zhan unless they baited it with sausages.
* The Untamed: In spite of Jin Guangyao being even more sinister than his novel counterpart, he still remains in the right when he coldly reminds Jiang Cheng that he's greatly to blame for all the bad things that happened to Wei Wuxian when he was still the Yiling Patriarch. Even if Jin Guangyao never enacted his plans to screw Wei Wuxian over, the fact remains that Jiang Cheng still didn't trust his friend enough and eventually abandoned him when things got too hot for him to handle, and this was long before Jin Ling's parents were killed. Jiang Cheng can only seethe in anger since he can't refute anything the other says.
* The Untamed is — supposedly — about two men who are very close but non-romantic friends (because there was no other way to get the series past China's censors). In practice, though, Wei Wuxian and Lan Wangji's relationship is clearly romantic and no attempt is made to hide this.
* The Untamed, Jiang Cheng inherits his mother's weapon Zidian, a whip made of purple lightning.
* The Untamed, Jin Guangyao and Qin Su get engaged before either knows they're half-siblings. Unlike in the novel, Qin Su isn't pregnant before the wedding. Her mother still tells Jin Guangyao the truth... and then he marries her anyway. And has sex with her when he knows she's his sister. Qin Su only finds out years later, and she's so horrified she kills herself.
* The Untamed: Jin Guangyao starts laughing as he explains how Jin Guangshan mistreated him until Jin Guangyao finally killed him.
* The Untamed, some things here and there are either slightly changed or completely altered.
* The Untamed: The main five clans mostly have the same colours as the novel (white for Gusu Lan, purple for Yunmeng Jiang and gold for Lanling Jin), though Qinghe Nie is now dark gray instead of dark green and Qishan Wen is now red and black instead of white and red.
* The Untamed. The novel is hugely popular in China but the series is more famous internationally.
* The Untamed: The rabbits, of course. They're basically walking cotton balls with paws and ears.
* The Untamed: When Wei Wuxian talks about Xiao Xingchen and Song Lan and how they

had many bad things happen to them despite being heroic and selfless people, Lan Wangji suddenly snatches Wei Wuxian's drink and downs it out of frustration. This is clearly because both of them remind him of Wei Wuxian's situation: a good man who had everything wrong going for them because of things outside their control — all of which were pinned on him anyway.
* The Untamed: When Wei Wuxian threatens to use Chenqing in one of the banquets hosted by the Jin Clan, all the cultivators present immediately stand up with half of them brandishing their swords.
* The Untamed: While many fans were definitely curious — whether in the optimistic or morbid way — about how the series would fare long before it aired, nobody expected it to become the widespread multinational hit that it became in the span of less than two months.
* 'The Unteachables, Jake avoided being expelled after being caught selling test answers because two school board members were former fraternity brothers of Jake's dad.
* The Unteleported Man, has Whale's Mouth, , referencing the star Fomalhaut in the constellation Piscis Austrinus.
* "The Untitled Blake McCormick project": Shows that Redcorn saw other women while he was with Nancy and sired a daughter the same age as Joseph.
* The Untold Origin of Femforce, She-Cat escapes from a crashing airliner by leaping from the plummeting plane on to the top of the Nazi zeppelin that had just shot it down, and clinging to the envelope until it lands.
* The Untold Story: During the (infamous) family massacre ending, when Wong butchers the entire family with the last victim being the eldest daughter, when trying to get away from the carnage the poor girl actually wets herself, moments before getting hacked to death.
* The Untold Story in which an employee in a Macau restaurant kills the proprietor and his family, and cooks them as pork buns.
* The Untold Story Of Argo City: After being driven crazy by a Kandorian animal's venom, Edna Danvers uses a cache of Kryptonite rocks to attempt to murder Zor-El and Allura.
* The Untold Story Of Argo City, alien Zygors can communicate -and dominate other minds- through telepathy.
* The Untold Story Of Argo City and her biological parents stop an invasion from an alien species whose bodies are made from liquid fire.
* The Untold Story Of Argo City and her parents are seen lifting an Egyptian temple. Said temple is drawn as a pyramid, even though Egyptian worship places do not have resemblance whatsoever to pyramids.
* The Untold Story Of Argo City android, whose molecular structure falls apart immediately, to prove Kara that she should not use untested devices.
* The Untold Story Of Argo City: As a gesture of gratitude towards Superman and Supergirl for saving their planet, an alien race picked up and hid a stash of Kryptonite meteors they encountered randomly as travelling through space.
* The Untold Story Of Argo City: As posing as a Kandorian named Bira, Edna wears a full-face lifelike mask which perfectly masks her identity, and even mirrors her real face's emotions.
* The Untold Story Of Argo City, a volunteer working in a nuclear shelter notices the shielding has been cracked by another meteor shower. Realizing that Kryptonite radiation is leaking into the building and killing him and everybody else, he sends his final report before dying.
* The Untold Story Of Argo City: Back when he lived in Argo City, Zor-El fought a space monster called Zygor.
* The Untold Story Of Argo City: Back when Kara was a baby, an alien monster named Zygor attacked Argo City.
* The Untold Story Of Argo City, Dar-Lin's father Zan-Tor disappeared three years before the beginning of the story while exploring the caves of Kandor together with his wife.
* The Untold Story Of Argo City: During their stay in Kandor, Fred and Edna Danvers wear special translator devices to understand Kryptonesse.

* The Untold Story Of Argo City, Fred and Edna Danvers go into their house's basement right when Kara is discussing how to get her birth parents out of a pocket dimension.
* The Untold Story Of Argo City: In the Superman Museum, a little girl is admiring the Supergirl's exhibit. When Linda Danvers walks by, the little girl asks her if she would also love being Supergirl, unaware that she is talking to the Maid of Might's secret identity.
* The Untold Story Of Argo City, Jor-El warned his brother about Krypton's future (or lack thereof), and Zor-El replied he was getting unnecessarily worried.
* The Untold Story Of Argo City revolves around Supergirl's attempts to rescue her biological parents, and afterwards it focuses on Supergirl's conflicted feelings regarding her Kryptonian and Earth parents, and their struggle to do what is best for their child regardless personal feelings.
* The Untold Story Of Argo City's family run into one Zygor, a space monster which feeds on asteroid rocks.
* The Untold Story Of Argo City. Supergirl cries into her mother Allura's chest after getting her out of a dimensional prison. Later, after being made to believe her future self will be forced to kill Superman or her father, Kara cries into her mother's chest again.
* The Untold Story Of Argo City, the Danvers are asked to adopt a Kryptonian girl named Dar-Lin. They note that she looks just like Kara, saving her brunette hair.
* The Untold Story Of Argo City turned a random uninhabited planet into a copy of Krypton as a giant memorial monument.
* The Untold Story Of Argo City when it is mentioned that an unnamed alien world was nearly obliterated by its own exploding sun.
* The Untold Story Of Argo City: When Kara meets two robots resembling her parents Zor-El and Allura, she mistakes them for the real deal until they remind her that she built them.
* The Untold Story Of Argo City: When she watches a prediction showing the Zygor -a monster who nearly destroyed Argo City- nearing Earth, Allura gets frightened and hugs her husband tightly. Shortly later, Kara similarly clings to her mother after being told how much harm that monster may do.
* The Untold Story Of Argo City: While they are staying in Kandor, the Danvers talk to Supergirl using a "Tri-D-communicator" which projects miniaturized three-dimensional images from Fred and Edna.
* The Untold Tale is a celestial being with fortune-telling powers, and also an albino with white hair.
* The Untouchables (1987). Frank Nitti has the address of Jim Malone written on a book of matches. Unfortunately he forgets to dispose of it after killing Malone, so when Elliot Ness searches him later it leads to their final shootout.
* The Untouchables. A judge can't simply switch juries with another courtroom, as the new jury wouldn't know the facts of the case. The likeliest outcome would be a mistrial, and the judge may even be disrobed. In addition, Capone's attorney changes his client's plea to "guilty" without even consulting him, which is likely to get the lawyer disbarred and has no legal standing since the defendant would have to confirm the plea.
* The Untouchables, as the pilot movie was about his arrest. The face of his organization in the series proper was his enforcer, Frank Nitti, and the organization was involved in only about a quarter of the episodes.
* The Untouchables, but can't resist introducing himself as "Special Agent Costner".
* The Untouchables deliberately made Chicago crime lord Al Capone's surroundings very lavish and sumptuous:
* The Untouchables despite the other person being a complete stranger:
* The Untouchables: Eliot Ness has chased Al Capone's hitman Frank Nitti to a rooftop.
* The Untouchables, first heard as Elliot helps a woman struggling with her baby carriage up the stairs. The second time we hear it is at the end of the bloody shootout immediately afterward.

* The Untouchables. First when George, the man who was checking the alcohol cargo in the Canadian frontier, gets scared after Jim Malone shoots a gangster's corpse to intimidate him and promises to talk about Capone's tax evasion. Then at the Chicago Train Station, where Walter Payne, Capone's bookkeeper, is held at gunpoint by a gangster and encourages Ness to kill him, promising he will tell anything about Capone's tax evasion in the trial.
* The Untouchables: Frank Nitti disguises himself as a police officer to assassinate the bookkeeper the Untouchables have persuaded to testify.
* The Untouchables, George Stone uses two guns during the shoot-out at the train station. Note that, in his introduction, Stone is presented as something of a pistol prodigy.
* The Untouchables in the 1990s version: A boy gets some odd jobs from Al Capone's gang and finds he likes the bling involved. When Eliot Ness finds out, he drags the boy to a morgue to show what will likely happen to him if he wants to be a gangster. When the kid retches at the sight of a dead gangster with his throat bloodily slashed, he gets the point.
* The Untouchables is based on the autobiography of Eliot Ness (co-written by journalist Oscar Fraley) with some events per episode changed or invented.
* The Untouchables, Jim Malone isn't shy about sharing his anti-Italian prejudice, though George Stone earns his respect.
* The Untouchables: "Ma Barker and Her Boys" pits Federal Agent Eliot Ness against the Barker clan, and depicts Ness as leading the assault on Ma Barker and her sons at their Florida hide-out. In this version, Lloyd, Fred and Doc are all present at the final shootout.
* The Untouchables no less!). Though most of the time he wears a longcoat, it's in the rooftop chase scene where he finally has some action with it.
* The Untouchables: Part of which took place during The Great Depression.
* The Untouchables presents a good (although hardly perfectly realistic) depiction of how Al Capone, a notorious crime boss, was well-known to be guilty of crimes up to and including murder, yet since no-one could stick it to him, he was arrested for tax evasion.
* The Untouchables, raids places without a warrant, and, in one case, outright murders a guy whom he just arrested.
* The Untouchables series from the early '90s, the heroes' headquarters was a back room with a blackboard, on which Eliot Ness would sometimes draw maps illustrating the operation they were about to carry out.
* The Untouchables: The poster has a giant Al Capone in shades, smoking a cigar and smirking over the Untouchables.
* The Untouchables. The senior member confronts a villain who framed him. The villain tries to resist with twin tommy guns. However, the idiot doesn't realize that given how heavy the gun type is, he can't even keep them level and so doesn't do much more than shoot up the floor in front of him with a lot of noise. For his part, the Untouchable simply shoots the villain with two carefully aimed pistol shots.
* The Untouchables, the team are trying to interrogate a mobster to no effect. Irish cop Malone goes outside to grab the body of a gangster killed in a shoot-out and pops him up against the window in front of the suspect's sight, hiding the man's bullet wound. He then berates the corpse as if interrogating him, pushing a gun to his head and finally shooting it. Naturally, the terrified mobster agrees to tell anything he knows.
* The Untouchables who he claimed, "died screaming like a stuck, Irish pig."
* The Untouchables, with Al Capone finally behind bars, Eliot Ness is understandably exhausted as he packs up his office and thinks about Malone. When a reporter mentions that Prohibition is due to be repealed and asks Ness what he might do then, Ness responds, "I think I’ll have a drink."
* The Untouchables with Frank Nitti, who briefly dresses up as a police officer to infiltrate the police department and assassinate one of the Treasury Department agents and their informant, along with two police officers who were waiting outside.

* The Untouched Inquisitor, in terms of story, is one of the most vile players in this whole game, having purged the Dome of Light, an utterly devoted and joyful church of the same religion he had, because his twisted mind saw sin in it. All the lore you find within the now-forgotten Dome speaks of his destruction of the place, how he sacrificed everyone inside to fit his version of holiness and made restless phantoms out of everyone involved so that his "Untouched" could flourish. The Untouched Inquisitor, in terms of gameplay, is probably the easiest boss due to his somewhat predictable (if high-range) attacks and frankly unimpressive damage, and the only difficulties he poses are the fact he can float around (giving melee builds some difficulty) and that he has decent knockback to his strikes. Ultimately, the fails to match up to the lore that hypes him up and ends up eclipsed to
* the untreated "raw" water craze and other fun contaminants. In fact, the interaction between humans and animals from the same water source is how epidemics and pandemics start.
* The Un-Twist, when a plot twist is confused for a Red Herring because it's too obvious, but turns out to have been genuine all along.
* The unusually large size of Monica's apartment was, of course, frequently lampshaded.
* The Unusuals, a character is established in the backstory as a serial confessor. It turns out that he would falsely confess to crimes so that he could get inside the police station, where he was involved in a scheme to steal evidence.
* The Unusuals against a serial killer of cats. It appeared to be a Lexmark or Canon inkjet printer with the lid over the scan plate removed.
* The Unusuals, Banks and Delahoy have to interview a series of witnesses to a bus robbery, none of whom speak English, all of whom are eccentric.
* The Unusuals: Detective Beaumont borrowed her boyfriend's watch, only for it to be stolen by the criminal of the episode.
* The Unusuals Detective Jason Walsh used to be a professional baseball player until some gangsters killed his girlfriend while trying to force him into throwing a game.
* The Unusuals episode "42" Detective Banks has to keep saving a woman who foresees several bus robberies and tries to die during one (and tries again, and again, because Banks keeps saving her) because she believes she's fated to do so. He finally convinces her that you make your own fate, only for her to die in a bus crash at like 11:50pm.
* The Unusuals episode "Boorland Day" opens with one of these being executed by the Boorland crime family...New York's dumbest family-run mob.
* The Unusuals out of a misplaced sense of revenge. He's killed by the end of the first episode.
* The Unusuals starts out in vice, dressed as a hooker. She's soon transferred to homicide, though.
* "The Unusual Suspect" in Season 6 deals with a brother and sister who have confessed to the same murder; the team must decide who is lying. Neither - and they both get away with it.
* The Unusual Suspect: Online comedic movie reviewer with occasional video game reviews.
* The Unusuals, which he can now destroy the evidence of. She fixes the situation by going to the person who requested the original favor: her father, the richest man in the city. He calls in his own favors to get her new evidence which the cops can use to arrest the guilty person.
* The Unusuals. You can only get in if you know the password, although every potential client used a different one, so the screening process must have been crap.
* The Unwanted Harem Of Nathan Adams becoming engaged to Damona by accepting the medal she gives him. He's unaware of this until she mentions it, and she's not going to accept his ignorance as an excuse.
* The UN Weapons Inspectors who went into Iraq in 2002-2003 would fit as well. They pointed out that many claims of Iraq possessing WMD were invalid or wrong.

After saying they needed a few months to continue inspections, they were ordered to leave (not by Iraq, but by the US) in 2003...
* The Unwilling Warlord was apprenticed to a warlock for a few days before being kicked out due to complete lack of talent. All he had left was a bit of unconscious telekinetic ability which gives him an edge when playing dice.
* The Unwitting Comedian: A character who is the funniest person around even though they aren't trying to be funny.
* The Unwitting Comedian: Everyone laughs at this guy even though he wasn't trying to be funny.
* The Unwitting Comedian: The one who everyone laughs at even though they're trying to be serious.
* The Unwound Future of the second game, and apparently designed by the second game's villain. It's an incredibly hard puzzle, and the villain refuses to let you use Hint Coins, as he wants you to beat this puzzle in its purest form.
* The Unwritten an Intrepid Reporter of the blogger variety. His modus operandi is infiltrating prisons to get the inside scoop on fresh detainees.
* The Unwritten ending where the protagonist ends up drugged up to her eyeballs in a mental institution.
* The Unwritten gets turned into a vampire, he apparently has lots of sex with gothy vampire groupies. (Helped along by the fact that he's outed himself as a vampire in a bestselling book.)
* The Unwritten in all but name, just his "subjects" (or at least the narrator) were too naive to notice. It's chilling to read the overly optimistic narration while as a reader understanding the horror of it all.
* The Unwritten, Lizzie Hexam puts off a girl who wants to involve Tom in some sex magic by claiming that he has syphilis, he's celibate, and he's her fiancé.
* The Unwritten shows that several authors of world history have been secret agents of a conspiracy or were troubled by said conspiracy in giving life to the things they wrote (literally), e.g. Kipling.
* The UOSS did this... and took out half the battlefield in the process. The fireworks were so impressive none of the entities did anything that round.
* The "up" and "down" spells are respectively Y and Z, justified in universe by Y being the initial of the wizard who invented the up spell and Z being the initial of the unpronounceable
* The UP announced it will return Big Boy 4014 to operating condition, meaning the world's largest steam locomotive will run again. And they did — operational Big Boy 4014 participated in the 150th anniversary of the "last spike" in May 2019.
* The Up Channel joined the fray by starting their block on November 1st, and
* The upcoming marriage of Kaede Katagiri and Kikuhito Morizono turns out to be this, and the one who arranged it was the Morizono clan's family butler, Akio Shigematsu. Problem is...
* The upcoming Nemesis DLC adds more "traditional" privateers which empires can supply with untraceable weapons. Said privateers are nothing more than regular
* The upcoming season takes the entire cast to Italy itself to "get back to their roots."
* The upcoming treasury collections factor in Breathed's decision to let the collections go out of print and not release any further reprintings.
* The upgraded nightvision 'implants' made people and robots glow brightly, and could be used to view people through walls (though the latter was not thermal imaging based).
* The Upheaval World averts this with the Equestrian Leigon. It's run exactly like an actual army: There's a strict emphasis on discipline and protocol, a strict hierarchy, and harsh punishments for everyone who defies the law, up to and including execution.
* The "Up is Down and Black is White" arc has a wannabe crimelord dig up the remains of Frank's family, record himself pissing on them, and then broadcast the video. As a result, Frank starts tearing through every criminal operation he knows of, leading to two lowlifes planning to hit a jewelry store think that in Frank's current state, they might not be

* The Upland Trout is a fish with wings, while the Bildad is half-beaver, half-duck, and a better swimmer than either.
* The Uplift Storm trilogy, two of the refugee species illegally settling Jijo undergo this process.
* "The Upper Class Twit of the Year" has the four participants of the contest wander across their lanes aimlessly at the starter's gun.
* The Upper Crass: I'm an aristocrat, part of the royal family, and I can do whatever I want!
* the Upper Earth military attacks first, resulting in the annihilation of most air forces, causing the continent's nations to cast their support for the heroes.
* The upper echelon of Central's military were suckered into following the same scheme with similar promises.
* The Upper Rank Two is the only demon given a proper background on his succession, he once was the Upper Rank Six and killed his way onto the 2nd rank.
* The upper reaches of Blackrock Mountain are ruled by the remnants of the "Dark Horde," the few ogre, troll, and orc clans that fell under the rule of
* The UPR has a modern military look to them and their tech. They are rather ulitarian as they prefer function over fashion in this regard. They're however not as advanced as factions like the LLC and the Jennerit whose tech are just as sophisticated in level as they are in appearance.
* The uproar from Aja's All Stars 3 elimination was very bad. Aja had been performing very well up until her elimination, winning the first challenge and redeeming herself from her mediocre Season 9 run. While fans believed that Aja's runway look was deserving of the win, the judges didn't agree and put Aja in the bottom, where she was eliminated by challenge winner Bebe Zahara Benet, who Aja helped make her winning look. Aja even had to step in after the episode aired and tell fans not to send hate to Bebe.
* The uproar over the story material not being "up to par" aside, when
* The upshot of all these paratroop drops is that paratroopers can be useful when sent to accomplish small, targeted objectives, but large-scale paratroop drops were generally not very effective. The troopers tended to get pretty wildly scattered, like at D-day, where there was no such thing as unit cohesion. Even if a unit did manage to stay together after a drop, paratroopers faced an obvious problem in that they could not carry heavy weaponry. The bravest of men carrying nothing but rifles and grenades will struggle against an enemy with artillery and tanks, as the British paratroopers at Arnhem discovered. The German paratroop drops at Crete helped take the island, but at such a high casualty rate that the Nazis never tried an airborne drop again.
* The upside-down graph is used on an ad for Monster.com in which a guy works in an office full of
* The Upside Down" it does not go for the quick kill as usual but roars into his face, giving Nancy time to fire a shot at it.
* The Upside-Down run, where everything displayed except his HUD is completely flipped upside down;
* The Upside of Anger, when the youngest daughter Lavender tries to seduce a classmate and he rebuffs her by declaring he's gay.
* The uptempo pop-styled "Just Like Heaven" is in great contrast to their gothic style, sounding more reminiscent of
* The Upturned Stone eat a pumpkin pie made from a pumpkin that grew out of the grave of a murdered child. They all begin to dream of his murder—as if experiencing it! Worse, they know who the killer was, but who would believe it?
* The UR-1 incident. The true culprit tries to hide the evidence that they were at the crime scene by
* The Uragan-5, a revolver shotgun that has slug and non-lethal variants,
* The uranium was needed just long enough for Exeter's race to relocate to Earth, presumably killing all humans in the process. (Although to his credit, Exeter tried to convince his boss that the humans should stay untouched.)
* The Uranus Experiment features around 20 seconds of actors Sylvia Saint and Nick Lang (who portray astronauts living on a space station) having sex in freefall. The

scene was controversially nominated for a Nebula Award (as a protest against the Nebula Awards' Best Screenplay category), but did not win.
* The Urashima Woman is a pregnant woman with stringy black hair. Underneath her hair is revealed to be an abnormally long neck covered in barnacles and a giant, multi-layered
* The Urashima Woman's appearance is that of a pregnant woman with long, stringy black hair and a
* The Urashima Woman's midwife desired a child of her own, but never managed to conceive one. This eventually drove her insane, to the point that she murdered the woman and stole her child.
* The Urashima Woman's midwife, Yasuko, was deathly envious of her for being able to give birth while Yasuko
* The urban American feel that kept it from being successful in the U.K. also made it hard for it to catch on in Canada. While the show was eventually re-worked as
* The Urban Dictionary Quiz 2, Matt and Jim are sitting on Jim's couch, and Jim tells Matt, "Thank you for having me on my couch. If you know what I mean."
* The urban legend also fails on two facts that would make this implausible at best. First off, the stolen organ has to match sizes and be compatible to the donor, something you can't control with a randomly picked victim. Second, the large loss of blood from removing a kidney would make death of the victim a much more likely outcome. Another problem with this legend, though less a medical than a practical one, is that it would be much simpler to outright
* The urban legend "Aren't You Glad You Didn't Turn on the Light?" and its variants.
* The "urban legend" aspect does come up in conversation between Janeway and Chakotay.
* The urban locations in Kingpin: Life of Crime. Features everything between desolate ghettos and classy, but equally vile Radio City with it's Art Deco architecture (bearing a suspicious resemblance to some places in
* The Urban Wrestling Federation was infamous for killing off several members of its roster, up to and including a freshly crowned champion, Rasche Brown.
* The Urbz when he's trying to investigate a secret meeting in the graveyard.
* The Urbz. You can kiss characters but, unlike in the main series, you can't actually settle down with anyone. There's no actual romance rearing and you can't have children.
* The Ur-Dragon is the ultimate forebearer of all the dragons in the Multiverse, traveling the Blind Eternities and creating storms which produce dragons.
* The Ur-example in American comics has to be Mister Fantastic of the
* The ur-example might be the 1970s Ginsu knife commercial that showed someone using a Ginsu to cut through an aluminum can. Even comedians of the time wondered why.
* The Ur-Example of the shopping mall could be anything, depending on whom you ask — some argue that the overall concept dates back to markets in ancient Rome, and many towns had "shopping arcades" in the 19th century, which consisted of enclosed walkways lined with stores. The one that usually gets the credit as "America's oldest enclosed shopping mall" is the Westminster Arcade in Providence, Rhode Island, which opened in 1828 and is still operational as a mall today (albeit one that's far more modest than the huge Providence Place Mall a half-mile away). Much of its structure is taken up by trendy lofts, but there's still several stores and restaurants on the first floor.
* The Urinal Game has the message for leaving on Level Two: "Shy bladder? While it afflicts many men around the world, making them unable to pee in the presence of others, you are not afflicted."
* The Urinal Game: The reason for not peeing next to someone is so you don't get mistaken for perving on the other men, but the player character's orientation isn't revealed.
* The Urinal Game, trying to leave on level three has the message "don't just stand there dancing around".
* The Urinal Game, trying to leave on one of the levels gives you the message that

you're too busting to not go.
* The Urpneys are regularly beaten, squashed, fried and otherwise comically decimated by everyone from their
* The Ur-Quan, being the reasonable people they are, will allow you to surrender to them and offer to spare the lives of your crew in exchange. They're not going to let
* The Ur-Quan have one of these. After being enslaved for thousands of years by malevolent aliens and having to spend decades wired to artificial pain devices to defeat said aliens, they decide that the hat of
* The Ur-Quan have their own solution in the form of their Talking Pets. The Pets are animals with psychic capabilities, and if two people speaking different languages are interacting, the Pet automatically acts the part of an interpreter. Very convenient.
* The Ur-Quan Masters. If you talk to Commander Hayes, he reveals that Earth kept the war going right up to the point where Ur-Quan ships were positioned in orbit, ready to glass the entire planet.
* The urRu. When the Skeksis Chamberlain's hand is stabbed, his urRu counterpart says unemotionally, "So, my hand,"
* The urSkek—the race that was split into the urRu and the Skeksis—are canonically
* The Uruk-Hai raise even more questions, as it's clear that Saruman himself was responsible for their creation, but even Treebeard spends some time musing on how he did so, wondering if they're orcs that have been enhanced, corrupted men, or some kind of crossbreed between men and orc. If they're the last one, that also raises the question of whether orcs can indeed breed—after all,
* The USA (Entente, 1917) wanted a say in the post-war peace settlement without sacrificing too many of her own people. It also wanted to make sure it and its bankers got paid (many if not most of the belligerents had borrowed heavily from the US). Germany sending a telegram to Mexico promising
* The USAF's Combat Controllers. They have to maintain qualification as Air Traffic Controllers (which is probably the
* The USAF was experimenting with using parasite fighters, the XF-85, to provide fighter escort to B-36 bombers. Eventually, this plan was scrapped as the increased range of jet fighters coupled with in flight refueling allowed regular fighters to accompany the bombers throughout their missions, in addition to the fact that the XF-85 was outperformed by conventional fighters.
* The usage of a twin was also done with Don and Dan Stanton for the scene where the T-1000 takes on the form of one of the asylum's security guards and murders the real guard.
* The usage of "DNA Evidence" started out like this, but eventually became
* The usage of stereotypical black characters as advertising mascots, such as Uncle Ben's, Aunt Jemima and the "Y'a bon" guy for Banania (a French brand of powdered chocolate). Introducing such a mascot today would lead to a lot of controversy, but these companies still used their mascots for many years without much issue (although it does help that their later designs tried to minimize their historical stereotypical aspects, such as Aunt Jemima looking more like a housewife than a maid and the Banania guy being depicted as a cartoon). The
* The USA has a "compartment" scheme that goes alongside the more familiar scheme of "levels" (unclassified, confidential, secret, top secret). The idea is that there are lots and lots of people who are cleared to know classified information
* The USA has its Anglophiles. Generally, they love British accents,
* The USA has recently decided to open infantry positions to women. This will apparently apply to all conventional infantry positions, while special force units can choose to admit or deny female applicants at their own discretion.
* The US Air Force Academy carries this a step further, requiring cadets to fill out forms evaluating each meal. By filling out the same form every day, cadets learn to complete checklists quickly and efficiently.
* The US Air Force has its Civil Engineers, generally tasked with maintaining bases, along with the airfields, buildings, and utilities which operate on those

bases. Some CE units specialize as either Prime BEEF
* The US Air Force has recently advertised that it is on the forefront of fighting cyberwarfare. The appeal of this to sufficiently intelligent recruits should be clear. (And keep in mind, you never know who may be reading this.)
* The US Air Force's Auxiliary, the Civil Air Patrol, is made up entirely of volunteers, many of whom use their own aircraft to support search and rescue, disaster relief, Air Force training exercises, etc. And although it is a auxiliary of the Air Force, it technically is only such when the aircraft is being used on a Air Force mission, otherwise it is a private, non-profit corporation.
* The US also banked on its massive logistical capacity, combined with that industrial capacity. Per capita, the US had a much smaller front line fighting force than any other nation, but a much larger support structure for that force, able to supply troops fighting on four continents even while dealing with the German and Japanese efforts to interrupt their seaborne supply lines (German submarine warfare and Japanese island warfare being the main threats to Allied lines of communication and supply during the war)
* The US also eventually got their own Sherman variants that performed better against German armor, such as the Sherman Jumbo and Easy Eight, which had significantly more armor and were commonly fitted with the more powerful 76mm cannon. To put it in perspective, Jumbos had almost as much frontal armor as a Tiger I.
* The US also had nuclear weapons stationed on foreign soil in countries like Italy and Turkey which had experienced military coups. Even with a two key lock system, there was nothing to stop the keys from being seized by force.
* The US also has Lady Liberty, although this technically is just the embodiment of the appropriate concept. Lady Liberty graces the Capitol building with a headdress made of a resting eagle.
* The US and Canada are pretty much immune from massive invasion forces due to being far away across the sea from most of the rest of the world. Still, if the warring party wants to make the long trek across the sea, both of them are two of the largest countries on the globe with a wide variety of terrains. Not that modern warfare has much need for invasions anymore.
* The US and German media had a ball when, in March of 2017, chancellor Angela Merkel offered president Donald Trump a handshake, only for the president to completely ignore her with an awkward silence.
* The US, and later with help from the UN, was this to South Korea during the outbreak of the
* The US and South Korea habitually do joint training exercises near the hot area. When, in 2013, North Korea started one of the worst rounds of saber-rattling yet, the US sent a missile destroyer and a couple of B2 heavy bombers to play, in a show designed to say "careful who you mess with".
* , the USA never formed as such, but a loose confederation exists in its place.
* The US Armed forces as an example. Note the ratio of medals in wars the US won (say, Gulf War 1, no Medals of Honor awarded at all), to the unmitigated disasters like Vietnam and the War on Terror, where... well, let's just say the metal and cloth were handed out like M&Ms.
* The US Army actually looks for potential recruits with considerable experience with FPS shooters, since expert gamers use the same tactics used by experienced soldiers. Hence the
* The US Army and Blackwatch do a pretty good job fighting normal infected and hunters and could have end it all much faster if Alex didn't kept killing them by the truck loads.
* The US Army (and presumably the militaries of most other countries) have
* The US Army did this during the run-up to the Normandy landings, creating a fake military unit, the First US Army Group (FUSAG) and putting
* The US Army field manual TM 31-210, "Improvised Munitions Handbook", is a good modern-day mundane equivalent. It won't summon demons, but almost everything in it will summon FBI agents. And unlike most other books on this list, you can get it on Amazon.

* The US Army had to do this. During the Korean War in 1950, US troops were stuck at the Chosin Reservoir. The fuel lines of their tanks were cracked from the harsh winter cold. They were running low on ammo and called in for an ammo drop using the code name "Tootsie rolls". Because of some error, they were dropped boxes of real Tootsie rolls. While confused, they quickly realized if they chewed one Tootsie roll enough to thaw it, the roll could be made into a putty and they used them to cover the cracked fuel lines. When they refroze, they could safely drive the tanks out of there and were saved.
* The US army had trouble teaching its soldiers to move the robots, so they got the controls for the robots in the shape of Playstation controls, and the soldiers mastered it easily. This has been adopted by many armies all over the world.
* The US Army has tortured Iraqi prisoners of war and inmates at Guantanamo Bay with
* The US Army has two initiations similar to the Kirkkojärvi March above, the "prop blast" (for paratroopers in the 82nd Airborne) and the "spur ride" (for Cavalry soldiers). Both consist of grueling physical tasks, combat-related tasks, and answering questions about unit history in front of a board of senior officers (though the board can quickly devolve into humiliation of the participants). The prop blast ceremony was banned briefly in the late 1990s when it became apparent the ceremonies had crossed the line from hazing into outright abuse. It is, however, coming back quietly under heavy supervision in both the 82nd Airborne and the 101st Airborne Divisions.
* The US Army is engaging in a standardization program so that most of their vehicles can be operated by one interface. Which happens to be a XBox controller.
* the US army launches a missile intended to hit the Griffin house he's having a drink with. The only words we see exchanged:
* The US Army M35 "Deuce and a half" truck similarly has some particular oddities about it, such as a gear shifter that LOOKED like the shifter in a normal car, but had the gears in all the wrong order. The shift pattern
* The US Army Ordnance Corps is openly criticized as such by many army veterans, particularly infantry machine gunners. As it were, here's a REALLY honest opinion about machine gun procurement and training manuals that Army Ordnance develops:
* The U.S. Army recruitment slogan "Be all that you can be" has become something of a cultural
* The US Army's 101st Air Assault Division (sometimes referred to by ordinary soldiers as "dope on a rope").
* the US Army, to the point that it's considered an insult to call a Marine a "soldier". Further, commanders of Army soldiers don't like elite groups like the SEALs, Rangers or Delta Force hanging out with their men, because soldiers tend to start trying to emulate them by improvising instead of keeping cover and formation, compromising the entire operation.
* The US Army worked upon, but finally dropped, development of a weapon dubbed the
* The USA's Central-South American Banana Republics were, as per the page image, kept in line by constant reminders of the threat of force and the occasional USA-organised/supported coup d'etat. From a little after the US Civil War up until relatively recently, this trope has been in force to some extent.
* The USA splitting into three countries is part of the history of both
* the USA's policy on armaments for its uniquely bloody culture of suicides and massacres with firearms. At the same time, gun-enthusiasts blamed trends in news and mass media for "raising a generation of serial killers". Others argued that something as precious as children should have more posted security or ways to defend itself.
* The US assumed that Germany would use concentration of power to break through at a point of their chosing, with tanks. Therefor, a rapid reaction capable of taking on a force of enemy tanks was deemed neccesary. This became the Tank Destroyer branch. It is a common misconception that the tank destroyers destroyed tanks and nobody else did. The key difference is in the role. The Tank Destroyers were intended as a defensive measure, countering attacking enemy tanks. While the regular tanks were to be kept for offensive purposes, which includes fighting

against defending and counterattacking enemy tanks. Many designs were tried, but the Tank Destroyer requirements were difficult to meet. They wanted speed, firepower and survivability while also trying to keep cost and manpower low so more men and material is available for the frontline. Another problem was that for the Tank Destroysers to work as intended, it required keeping them in reserve, in case of an enemy breakthrough. Usually, commanders didnt like having them twiddling their thumbs and sent them in to help the frontline. This strengthened the front, but made them unable to mass quickly enough to counter an enemy breakthrough. All in all, it was concluded that the best approach was to just use tanks for both countering a breakthrough and doing the attacks. Tank Destroyer doctrine ate up more resources and manpower than was worth it and it was overspecialized for a specific defensive situation. That being said, there is at least one instance of it working exactly as intended, cost effectively stopping a German armoured spearhead in Africa.
* The U.S.A. used a mountain — Mount Rushmore — as a monument, further changes of which made a
* The US-backed invasion of Cuba leads to the creation of the Federal Republic of Cuba (East Cuba) and the Socialist Republic of Cuba (West Cuba).
* The U.S. being more lax with food additives than Europe can result in Europeans having this reaction when reading American food labels.
* The US, British and French militaries supplied about 23,000 troops during the filming of
* the US Coast Guard really was active in combat operations in Vietnam, with multiple Cutters patrolling the "Gun Line" offshore, providing fire support to ground troops, and shooting up North Vietnamese gunboats. Tayback clearly wasn’t among them, though.
* The U.S. Constitution requires that the president be a natural-born citizen, OR was a citizen of the U.S. when the Constitution was adopted. The first nine U.S. presidents were born in American states when they were still British colonies. A few say the peculiar phrasing is due to
* The USD $2 bill is in a league of its own. Perfectly legal, still printed, legal tender. However, the rarity of its usage garners attention. Odds are just shy of even that trying to use them to pay for something will get the holder questioned, if not denied service. Vending machines aren't even programmed to take them. The upshot being great for collectors as the bills often show very little wear for their age.
* The US Department of Energy looked for ways to subvert and prevent this from happening at Yucca Mountain and the Waste Isolation Pilot Plant, as described
* The Used original and is nowhere near as well-known as some of the Used's own tracks ("The Taste of Ink", "All That I've Got", "The Bird and the Worm",) let alone anything else by MCR.
* The usefulness of the trope is even demonstrated a few pages later, when they change these roles:
* The Useless Senpai and The Talented Kouhai, Hiromi Tsukioka, the eponymous kouhai, is rather blunt when it comes to her senpai Shiori Ochiai and her many shortcomings. This is presented positively since unlike the rest of the team, which badmouths Ochiai behind her back, Tsukioka respects Ochiai enough to be honest with her.
* The Useless Senpai and The Talented Kouhai is about an inept third-year basketball player bonding with a talented first-year.
* The Useless Senpai and The Talented Kouhai says what she does because she doesn't want Ochiai to give up on the team.
* The "Use Magic Device" skill, normally found on Rogue-type classes, allows the user to ignore the requirements of magic items. This includes using a
* The use of a crescendo-going ominous drone in the very first seconds of
* The use of actors playing dead US presidents is a long tradition in US advertising, especially in February around Presidents Day. Now, CGI presidents are becoming common.
* the use of a dagger as a defensive weapon, and the emphasis of defense in

general.
* The use of a fake distinguishing feature such as a scar can make people focus on the scar so much they don't notice any other real details.
* The use of "... and she stepped on the ball!" as an orphaned punchline is a reference to its use in
* The use of "bamboo" instead of "rayon" in fabric or yarn labels. Bamboo fibers can't be spun any more than wood fibers can, so you can't make yarn or thread of it. Yes, rayon can be made of bamboo - it's processed cellulose, and you could use any sort of cellulose to make it, along with some mildly nasty chemicals, and if you don't want to buy it, it's okay - but don't get duped into buying "bamboo".
* The use of battle droids seems to revolve entirely around the fact that the prequels feature Jedi action scenes. Such scenes involve plenty of decapitations, bisections, and outright mutilation of said battle droids using lightsabers, all of which would have been unacceptable in theaters had the victims been living sentient beings instead.
* the use of breathing techniques to focus the internal energies of the body into infinitesimally tiny points.
* The use of "Camptown Races" in Squirrel Nut Zippers's "Ghost of Stephen Foster" seems intended solely to evoke this.
* The use of cheaply made, red Montgomery Ward Airline electric guitars and Silvertone amplifiers by Jack White of
* The use of double-spacing at the end of sentences. This is a hold-over from the days of typewriters with their monospacing (where every character occupies the same amount of space), to help the period stand out. Such a necessity has long been rendered obsolete by digital word-processors and just plain looks silly when used nowadays, but a lot of older typists (or younger ones taught by them), still use two spaces after periods. Even on this very wiki, though
* The use of fire or plasma is also the go-to tactic for dealing with hostile
* The use of (for example) the P90 by Stargate Command has some real-world plausibility, even though it's not standard U.S. military equipment. In real life, Special Operations Command can make use of
* The use of Genocide to remove certain monster types from the game and Wish to summon a certain item are also tracked, and Genocideless and Wishless are conducts. There's also Artifact Wishless, which means only wishing for ordinary items and not powerful one-of-a-kind Artifacts.
* The use of hammers in war is evident in the sport of polo, which was originally a war exercise for Persian cavalry.
* The use of huge, gaudy onomatopoeia (or, depending on how people describe the phenomenon, "sound effects", "Batman words", or even
* The use of lightning attacks for firebenders is a powerful attack, but requires some prep time. Likewise, the technique to redirect lightning can be devastating, but has to be done fluidly or else it could kill you just the same.
* The use of Noms de Guerre was part of the self-given rules of the "Brethren of the Coast", the organization of Caribbean
* The use of Polymorph, either on yourself or on objects. The former is quite easy, often only broken by accident by walking into a polymorph trap or contracting lycanthropy, but the latter prevents "polypiling", a useful technique for turning junk into potentially useful items.
* The use of Roman numerals combined with the parent satellite was largely a convention of naming moons (e.g. Europa would be known as Jupiter II).
* The use of Roman numerals is likely due to most people not recognizing Greek numerals, making θʹ-αʹ-αʹ less understandable than IX-I-I.
* The use of "screen tones" (prefabricated printed background patterns) as backgrounds behind one or two characters during important scenes, representing the characters' emotions rather than showing the surroundings behind the characters. This practice roughly equates to a closeup shot on TV or film with a shallow
* The use of Shinsu Bost can result in this, and Mule Love's Blue Oar technique fits as well.

* The use of "Sunnyside of the Street" by Mercedes-Benz. The song sounds cheery... until Shane McGowan starts singing about his heart full of hate and a lust for vomit, as the happy family scoot around in their Cadillac. They should've just used the musical intro (it is very cheerful and peppy).
* The use of tanks so deliberately ingrained into player minds because they're cheap, lethal and durable that infantry can become obsolete quickly in a typical arms race, to the point that an early
* The use of the Dark Mark as an Epic Hail is actually subverted in the fourth book,
* The use of the Latin word is particularly appropriate, as 40k has a
* The use of the poison known as "the Strangler" in Joffrey's death was a case of a double-bluff/
* The use of the snipe hunt itself tends to lead people to believe that the snipe is a fictional creature, rather than an actual bird.
* The use of the Stock Footage "Lain walking under telephone lines casting creepy shadows" montage in
* The use of this and similar phrases has actually garnered some criticism from Liberal Arts teachers at technical schools. They believe that it's insulting to those who don't attend and is used to separate the technical students from the rest of society. The fact that if such students
* The use of this design for sci-fi spacecraft in the post-1945 period would have been heavily influenced by what was known about German V-weapons: until the late 1950's, the V-2's were the only man-made rockets that had ever been outside the boundaries of Earth's atmosphere, albeit only to gain enough height on the way up to describe a parabola with sufficient momentum to bring them down over London. The drawing-board designs for even larger rockets capable of hitting New York or Moscow were also public-domain knowledge. The V-2 was in every visible respect a retro-rocket of tail sitter configuration ... except it wasn't meant to land. At least
* The use of this trope in candy, rather than cereal, advertisements is parodied in
* The use of white or black smoke to inform awaiting crowds of the outcome of a papal election is a sufficiently-dramatic signaling method to rate as an Epic Hail, albeit a peaceful example of one rather than a cry for help. Prior to technology marching on, it was also one of the few ways to broadcast the announcement to an entire city quickly.
* The user can affect things that aren't being affected by some force other than gravity. For example, the user can pick up a shovel leaning against a wall, but can't take a wallet someone is holding in their hand.
* the user is the one who's erased. Of course how you can determine if a firing succeeded or failed...
* The user simply shouts out "Smoke Bomb!" without actually using one, and tries one of the above techniques.
* the uses tamed zombies are put to once the apocalypse wears off. The Sky News anchor is shown giving his horrified reaction to breaking the news and telling people what to do if attacked by zombies.
* The "use the on-set controls" solution is sadly becoming less and less of an option. Few DVD players have on-board menu navigation buttons anymore, and TVs are reducing their controls as well, awkwardly tying everything to a single wheel/button.
* The "Use What You See" run, where he had to equip any item he saw, and drop the item whose slot it took up. It got particularly hard when, in Anor Londo, he spent about two hours going through most of the castle incapable of running, rolling, blocking, or parrying because he
* The US federal government does this often; all applicants are scored with 100 being a person who is absolutely perfectly qualified for the job and the post usually requiring a 70 to fill. Veterans get a 5 or 10 point bonus, which means that they can wind up less-than-ideal candidates, but if they still score above the threshold and the other applicants, they wind up appointed. After all, a capable person can train into a role.

* The US for many people critical of what they call "American imperialism" is trying this or already did it. Although the criticism (even internal) is harsher against the hawks and neo-Cons. Of course many Americans would dispute that and would say that influence and domination are two different things and that actually controlling other regions and apoint their rulers as in the traditional definition of empire is different from having an incredible amount of political, economic and even cultural influence, but obviously the whole thing is under debate. The claims of American world domination are common in both far-left and far-right rethoric as among Islamic and Christian fundamentalists (notice that Christian fundamentalists outside the US tend to see this influence in a negative light as they generally associate the US with liberal and secular causes), however in some regions these claims can be part of the discourse of even the moderates of both left and right, particularly in those areas with a rooted anti-American sentiment.
* The US government also carried out experiments to determine the effects of radiation on the human body. Schoolchildren's milk and prisoners' testicles were irradiated all to see what the effects might be without their having been told.
* the U.S. government considers every "military-age male" to be an enemy combatant.
* The US government used to fund a digital ticker in Cuba that would display pro-American propaganda. The problem: the ticker had no Ñ. When the sign scrolled through the Gettysburg Address in Spanish, it made the same mistake.
* The US government (yes, they were fans of this for a while) also once tested Sarin (a toxic nerve gas) on a British soldier under the auspices that it was cold medicine. He died almost immediately. There were also plans to test VX-based chemical weapons on Australian troops during what was allegedly a training exercise. They couldn't convince Australia to let them do it though.
* The Ushabti, living statues carved into the likeness of the gods the Tomb Kings used to worship.
* The US has admitted to having 32 broken arrows with 6 nukes never being recovered. Russia has never admitted how many they've lost, but given their relative inefficiency, even when they were the spy masters of the world, and their technological shortcomings means they probably lost as many if they were not many more despite their arsenal being smaller. This might also be true for China today. That being said 32 is only the admitted number and it might be even higher. And
* The US has developed a device called the Kinetic Fireball Incendiary that is basically this trope. As
* The US has experienced a smaller-scale reflection of Christmas Creep with Black Friday Creep. As the phenomenon cemented itself, retailers began staging Black Friday "door buster" sales, opening earlier and earlier in the morning on the Friday after Thanksgiving with time-limited offers designed to coax shoppers in before dawn. Many have now shifted to kicking off their sales on Thanksgiving Day - in the process requiring employees to cut short their own holiday in order to staff the stores for eager shoppers.
* The U.S. has in its arsenal a nuclear missile that separates into ten warheads, each of which can take out a separate city, for a total of ten cities anihilated by a single missile. The missile's name: the Peacekeeper.
* The Ushi-Oni is sometimes described as a giant spider with crab-like claws and a bull's head.
* The Ushiromiya family patriarch Kinzo's behavior explains a lot about
* The US in the "Liberty Now Has A Country" timeline underwent a massive surge in the
* the US is about to be eaten by a giant demon Blob deity they pray to, so long as it's either one of the aspects of the White God or one of the other deities considered to be on the side of good.
* the US itself (anything from Europe would have been cut off by the US Navy and the only other North Americans capable helping them in any way were the Canadians ... who were already fighting Germany).
* The U.S. legal system provides some unusual examples. When judges get
* The US Library of Congress aims to include at least one copy of every single book ever published in the United States, and as such has literally millions of

books. It's only slightly smaller than the British Library (the UK's equivalent institution). It is generally considered to be the largest library ever made.
* The US makes much heavier use of electronic currency payment via debit cards in stores than places like Japan and Hong Kong. The big exception is the "Octopus" card, a prepaid debit card that can be used in everything from the mass transit system (for which it was created) to restaurants and soda machines.
* The US Marine Corps also takes its creed, "Every Marine a Rifleman" quite seriously, if only for tradition's sake in modern times: Their helicopter and strike aircraft crewmembers are expected to complete Basic along with the ground personnel before going on to flight training.
* The US Marines, changing "professional" to "efficient"). Also, he stores his piss in jars and throws it at people.
* The US Men's Gymnastic Team sometimes unofficially market themselves this way. Since men's gymnastics place great emphasis on upper body strength, male gymnasts tend to be
* The US-Mexico border; the US side is mostly barren while the Mexican side will have development. Played straight in some places, outright averted in others.
* The US-Mexico fence. Said "fence" can be anything from wooden posts a few feet apart on the coasts, metal walls (popular in areas with towns right on the border), to the occasional motion sensor and border guard.
* The US Military Academy's football team is nicknamed the Black Knights. They have a long-standing
* The US military does a similar thing, except that the "rehabilitated" drunk driver is an actual driver who survived who also provides pictures of how she or he looked before the accident, when the medics arrived (severed limbs optional), and, if they were lucky, after several sessions of reconstructive surgery.
* The US Military eventually starts using some sort of nerve agent in
* The US Military has many of these, due to constant regulation changes and manning cutbacks/additions. For instance, the minimum rank needed to retire (hit at least 20 years total active service) for enlisted members has gone up in most cases (the Navy used to be E5, and has been E6 since the mid-2000s; the Marine Corps recently raised it from E6 to E7). However, those that joined before a certain cut-off date are exempt. Various other programs for retention, force changing, etc., often use this clause for certain members.
* The U.S. military holds very large areas of desert in the southwest that are used for training exercises. The areas are bigger than they really need, so some parts are used rarely. Meth labs sometimes move in and fight small-scale gang wars... until they accidentally fire on real soldiers, and then they learn about things like indirect mortar fire and
* The US military is funding a research program aimed at developing practical portable 3d printers that can fabricate food from prepacked pastes for troops on the move by 2015.
* The US military loses a couple of service members to this trope every year. And dozens of injuries as well.
* The US military phased out pack animals in the 1950s, only to be reminded that wheels are poorly suited to the rugged terrain found in areas of Afghanistan. In 2004, the US Army printed
* The US military spends considerable time and effort locating their missing war dead; including those going back to
* The U.S. military uses real amputee actors to play wounded soldiers in training simulations, to accustom trainees to the shock of dealing with limb-loss casualties.
* The US military uses the PRC designation for radios, such as the PRC-77, pronounced "Prick Seventy-Seven". Thus, it is common to send the poor PFC or Lcpl to go find the "PRC-E7". Now, consider that E-7 is the rank designation for a Gunnery Sergeant, or Sargent First Class and the PFC or Lcpl will inevitably ask "the Gunny" where it is...
* The US National Dairy Council once put out a series of advertisements showing cows sabotaging the marketing campaigns of a company called Big Fizz Soda,

replacing their ads with ads for milk. Of course, nobody involved with the campaign thought to actually trademark the name Big Fizz Soda, so a soda company did so and promptly started selling their products under that name. Big Fizz Soda can still be found in drugstores and independent supermarkets.
* The US National Security Agency was similarly officially nonexistent for much of its history. Despite this, it was commonly known to exist, and people often joked that NSA actually stood for "
* The U.S. National Weather Service's enhanced "Tornado Emergency" verbiage is intended to be this for tornado warnings. A tornado emergency means that a powerful tornado has been confirmed by ground truth (that is, seen by storm spotters) is headed for a populated area.
* The U.S. Navy’s Equator-crossing tradition involves—among
* The U.S Navy also uses a Macross Missile Massacre as the main offensive weapon for its cruisers and destroyers: the
* The US Navy Department has several programs like this. US Navy Admiral Jeremy Boorda was the first enlisted man to rise all the way up to Chief of Naval Operations (head of the US Navy and one of the Joint Chiefs of Staff).
* The U.S. Navy did a series of ads with the slogan, "It's not just a job, it's an adventure".
* The US Navy got its revenge at the Battle of Midway, where American bombers caught the Japanese carriers right as they were getting ready to launch the next wave of their own attack aircraft. All four of these carriers had participated in the attack on Pearl Harbor, and all four were sunk during the battle (at the cost of the USS
* The U.S. Navy has a similar example. Come the end of every twice-a-year promotion cycle, those who have been advanced are all allowed to put on their new rank insignia at the same time once the results come out. This is called "being frocked", as in the priestly insignia. While for all intents and purposes the promoted member is considered to be his new rank, he does not actually get paid for it until officially promoted, which happens in a staggered schedule that goes on for up to three months beyond the frocking date, and is arranged in order of overall grade during the promotion evaluation and testing. On top of that, only the enlisted personnel are subject to this; Navy officers are promoted on a normal you-wear-it, you're-paid-for-it schedule. Other military branches think this is quite strange, to which the many sailors can only glumly nod their heads and agree.
* The U.S. Navy has notably dispensed with the tradition; although it's still incredibly cowardly for the captain to leave the ship before anyone else, once the ship has been evacuated, it's considered
* The US Navy is actually incredibly enthusiastic about using VR and Second Life in particular to train servicemen and -women on things such as submarine operation. However some of their other applications reek of "we must retroactively justify this expense."
* The U.S. Navy once engaged in a somewhat suspicious effort to sniff out this sort of behavior, involving sending out strapping young lads to have sex with men.
* The US Navy refers to the first aircraft launched off a carrier in the morning as the Dawn Patrol.
* The US Navy SEALs have a period of intense, brutal training called "Hell Week" that trainees must endure before they're allowed to begin the second third of SEAL training.
* The US Navy's Great White Fleet was a prime example. Named for the Navy protocol of painting ships white in peacetime, the Great White Fleet was sent around the world by Teddy Roosevelt in 1909 as more or less a way to tell the world, "Hey, looky what we got!" Made up of ships built within the last decade with state-of-the-art designs, the display was very effective at demonstrating America's rising technological prowess and willingness to set foot on the world stage. While not impressive in absolute terms—the new British Dreadnought was worth any three of the old-style US battleships , and the Royal Navy's reaction while escorting them through the Mediterranean was more or less "aw, how cute!"—it did present a very solid announcement that the United States was now a Great Power,

capable of playing the game as well as any European country. It also served as a wake-up call to the powers of Latin America (who proceeded to have a
* The US Navy's official song "Anchors Aweigh" is about the Navy beating the army in the Army vs Navy football game.
* The US Navy's sexual harassment training videos subvert this trope. In an example of quid pro quo sexual harassment, the protagonist is an unattractive girl who does a good job and only wants recognition for her hard work. The two antagonists are a male sailor who has the power to pick the Sailor of the Quarter and an attractive blonde sailor who is chosen for this position with heavy implications that she is chosen only because she slept with the guy who makes the decisions.
* The US nuclear weapons laboratories apparently think that their nukes could not be made to detonate without the codes, even if the labs themselves tried. To date, this has not been tested.
* The USO showgirls. When Cap performs for some rowdy front line soldiers, they boo him off the stage in favour of seeing the girls instead.
* The Usos; the ref couldn't tell that the one who got pinned wasn't the legal man because they looked so much alike.
* The US Playing Card Company went so far as to manufacture all-ace-of-spades card decks for the troops. See
* the U.S. president for ID to enter the White House. After some back and forth, the officer's superior arrived and started to tell him off for not recognizing Ho, but was waved aside as the junior officer was simply doing his duty.
* The USPS system also offers the option to have it call you back when it reaches your place in the queue. Unfortunately it calls back far too quickly, will call back after 20 minutes but still leave you on hold for another hour.
* The U.S. Public Health Service Commissioned Corps is a uniformed service for the same reason (PHS Officers serving in war zones will receive POW status and protections if captured).
* The USS Missouri is also the ideal museum piece to take on the aliens because of the heavy armor it sports, originally designed to protect it from enemy battleships firing similarly sized shells into its 12 inches of main belt armor. We see modern destroyers get obliterated by enemy ship-to-ship weapons (explosive "pegs" that look identical to the little plastic pieces used to denote hits or misses in the film's namesake Parker Brothers game), but when they're fired into the Mighty Mo, they only take out one turret.
* The USSR and the Soviet Union had a huge vogue in the 20s and 30s, and retained considerable prestige even in the 40s and 50s among several intellectuals in the Anglo-American world. The communists were also widely respected in the "Third World" until the 80s. This was related chiefly to the great intellectual respect commanded by Lenin, the creative explosion of Soviet Art in the 1920s (chiefly
* The USSR had a secret underground submarine base on the Black Sea. It couldn't, however, fit the larger subs of
* The USSR had several of these. Much of the footage of Nazi mass graves and concentration camps found as the Red Army advanced westwards was originally recorded for Soviet newsreels to be used to motivate their citizens to keep fighting, showing civilian dead in a way that British newsreels would not. There was a fair degree of manipulation in the Soviet films with the bodies moved around to create more of an aesthetic effect and people shown identifying their loved ones for maximum emotional impact. Also, references to the fact that the victims were mostly Jewish was omitted - Soviet propaganda was that these people were murdered for being Soviet citizens, not for being Jews - with significantly a shot of prayer shawls found at Auschwitz cut out. The off-cuts survived and have since seen the light of day as Russian archives have opened up.
* The USSR informs Egypt that Israel is massing troops to attack Syria. Israel is in fact doing nothing of the kind, but Egypt doesn't bother to fact check and immediately informs the Syrians and announces a big mobilization and public march on the Sinai, hoping to scare the Israelis into backing down.
* the USSR (surname derives from 'most' (мост), Russian for

'bridge').
* The USSR was also not very good at manufacturing semiconductors, and the earliest, most easily manufactured transistor designs are less reliable than vacuum tubes, particularly when subjected to vibration. Vacuum tubes also have substantially different properties than transistors, including being much more easily scaled up to higher power levels and higher frequencies. (Vacuum tubes are still common in terrestrial broadcast systems because they can easily be built to handle much higher power levels than are practical for transistors.)
* The USSR won the war — and certainly gained influence and superpower status — but lost the peace in the long run. The country had suffered such horrendous losses economically, materially and in manpower that it took her decades to recover, and that's not even getting into the burden of reconstruction in various Warsaw Pact countries (and then supplying them with subsidized energy to keep them on the USSR's side). The start of the nuclear arms race also made them invest in military expenditure, which despite being cut back by Khruschev in
* The US Supreme Court ruled that people who are insane cannot be executed, on the grounds that someone who is to be executed must be capable of comprehending the gravity of their own death. However, if medication can make someone sane, they can be forced to take it so they can be executed.
* The U.S. Supreme Court snips judges out of office. That being said, it's not unheard of for Supreme Court justices to resign of their own volition, usually because they are so old they can't be sure they'll survive the next president's term and don't want to die when their political opponents are in charge of replacing them. Impeachment (attempted or otherwise) against United States federal judges at any level is quite rare, to the point where it's basically unheard of. Eight have actually been removed, and three resigned under pressure after proceedings began.
* The USS Voyager itself has its circuitry embedded with bio-neural gel packs, an interesting idea (in that brain cells are supposed to be better at computing than the fastest computer) that was dealt with in a single episode in the first season and then pretty much forgotten. One episode involving a nebula extremely deadly to living things and very damaging to technology was an exception. With the crew in stasis chambers, and only Seven of Nine and the Doctor to run the ship for three months, keeping the ship going was a chore thanks in no part to these gel packs. There was also a memorable occasion when a massive system failure was traced back to the bacterial culture used to make some cheese infecting them.
* The US tried to remove this advantage by spraying liberal amounts of airborne defoliants on the jungles the Vietcong were so fond of hiding in- which only succeeded in
* The U.S. troops famously caught some of these spies by asking questions only Americans would be expected to answer correctly, like baseball trivia, particularly trick questions like "What year did Babe Ruth hit 64 home runs?" It didn't always work—one U.S. general was held at gunpoint by a couple of privates after he incorrectly stated that
* The Usual Adversaries in favor of some of the most powerful guns in the entire setting. While the Imperium is adapting, First Contact with these new aliens resulted in unsatisfying stalemate at best and complete military disaster at worst, and they always seem to bring out new threats to keep the Imperium from ever getting a good solid counter.
* The usual expectation is turned on its head when they get separated for what, due to the time travel involved, were several centuries for him but barely more than half an hour for her, leading to a scenario where she very nearly sees
* The usual gifts that "everyone" gives for certain events, such as ties for Fathers' Day, toasters for weddings,
* The usual iconic example, though, is the Lemurian Empire (centered, naturally enough, on Lemuria, i.e. Earth), which existed around 50,000 BC until it fell in a war against Halut. Many "modern" humanoid cultures in the setting's Milky Way galaxy (and some over in Andromeda) can directly trace their ancestry to refugees and abandoned colonies from that conflict.

* The usual lampshade is itself subverted when Sweetheart finds it unlikely that the seemingly exploded Tony and Mecututo were actually teleported to Pavane's mothership, and they ask if it's really that strange.
* The usually cool and snarky Tyrion finally loses it when Joffrey's stupidity nearly gets them all ripped apart by a mob in "The Old Gods and the New".
* The usual method is to divide characters by gender and then list them by social prominence. So if there's a king who only appears in one scene and your main character is a merchant, the king gets top billing.
* The usual outfit for the castle falconer in the Kingdom of Lancre is just sensible outerwear. However, on special occasions, Hodgesaargh has to wear the ceremonial costume, which was designed by someone with romantic notions and no taste, who had possibly never been outside.
* The usual pattern is actually inverted with Miranda, who rescued Shepard rather than the other way around, and put a ton more effort into it than Shepard usually does - Shepard's rescues typically take at most an hour including any boss fight, maybe half a day if you factor in transportation, while Miranda spent
* The usual real-life example on a national scale are all the shows on Sunday mornings on American networks which consist of journalists trying to all demonstrate how smart and knowledgeable they are. Unfortunately many have lasted decades, possibly because it being Sunday morning it's not as if there's a lot of competition in the timeslots.
* The usual sorts of leather that are used to make shoes are actually perfectly edible, if not exactly palatable — the only problem is that to be water resistant and durable, the leather is generally tanned, which often makes it indigestible, if not outright toxic. Rawhide, however, which is tanned using animal grease, remains digestible even after treatment, so in the case of severe hunger
* The Usual Suspects, a bunch of would-be robbers ends up stealing from and in the pockets of a much more sinister crime lord. The only reason they were kept alive is that they didn't realize who they were stealing from at the time of the robbery and they are forced to repay with another crime.
* The Usual Suspects, after the protagonists box in a police car and steal money from the corrupt cops, McManus climbs up on top of the car's roof to douse it in gasoline and then light it on fire.
* The Usual Suspects as the criminals do their best to ridicule the proceedings.
* The Usual Suspects, complete with Kujan dropping his coffee mug and it shattering in slow motion.
* The Usual Suspects contains a scene where Redfoot's bullet-ridden corpse is found embedded in a windshield.
* The Usual Suspects: Dean Keaton struggles with this throughout the movie, as he tries to convince himself that he has actually gone straight, and the job he's currently working on is truly The Last Job.
* The Usual Suspects: Detective Kujan suspects that Verbal Kint knows more than he told the grand jury. Boy, is he right.
* The Usual Suspects, Fenster's bizarre mumbling accent was entirely improvised by Benicio del Toro, who felt the character as written was boring and one-dimensional. With the change, it ended up being del Toro's first breakout role.
* The Usual Suspects. He tells the only remaining thug still alive to tell his bosses what happened.
* The Usual Suspects included the immortal line "Hand me the keys, you fairy godmother."
* The Usual Suspects is a mysterious devil figure to the criminal underworld.
* The Usual Suspects is the first sign that the attack isn't what it first seems.
* The Usual Suspects is told as a testimony given by one of the story's main characters to the police who are interrogating him.
* The Usual Suspects is told through eyes of small-time criminal "Verbal" Kint, who is being questioned by the police as the sole English speaking survivor of a drug deal gone bad.
* The Usual Suspects, Kobayashi lets the protagonists know that if he dies under suspicious circumstances, his boss Keyser Söze will immediately know who did

it and take revenge on them and their families.
* The Usual Suspects, McManus sings a special version of Old MacDonald right before killing several people.
* The Usual Suspects) ruining twelve takes by constantly farting. For his part, Del Toro said, "Someone farted, but I don't know who".
* The Usual Suspects shoots two different people at the same time, with one bullet each from two different guns. During the dock raid, Keaton stealthily keeps his hands in his pockets and then shoots two men at the same time with guns hidden in his jacket.
* The Usual Suspects suddenly engage in a heated argument. Portions of the argument fade in and out of the commentary track much like the dialogue of the film's climax. The filmmakers each land a parting insult before the track ends.
* The Usual Suspects tells the same subversion story about Dean Keaton. Sometime in the past, when Keaton was among suspects for some crimes, he dies. Then, in a few months, witnesses die too, someone else gets convicted, and you guess it, Dean Keaton turns up quite alive and well. This episode is presented by Dave Kujan as a pinnacle of Keaton's evil, so they appear to be quite genre-savvy in that regard.
* The Usual Suspects that many others on this page are references to it.
* The Usual Suspects. The interesting part is that Keaton claims to have kept living in the same city under the same name ever since and that the cops just dropped the ball by having him declared dead without being sure that he really did die.
* The Usual Suspects: The suspects are a group of criminals who form a gang after getting assigned to the same police line-up, but they ultimately discover that they were selected for the line-up and must execute a new heist to pay a debt they all share.
* The Usual Suspects: The Suspects attack a police car so as to draw attention to a corruption ring that will escort wealthy criminals around town, protecting them from actual arrest. This ring apparently was active all throughout the NYPD, going as far up as the District Attorney.
* The Usual Suspects variety, but still counts: his main outfit is a black suit with a red and always unbuttoned dress shirt underneath.
* The Usual Suspects, Verbal tells the "only story he believes" about Kayzer Soze: upon coming home and finding his wife and daughters violated by killers from a crime syndicate, he kills all but one of the bad guys and then kills his own family. He lets the last bad guy go to tell the others he's coming for them.
* The Usual Suspects was dubbed in Czech twice. The first dub was made in 1996. The second dub was made S Pro Alfa for airing in 2020.
* The Usual Suspects, which has basically the same premise, although it's told in flashback by the one survivor who's afraid that the killer might come after him too.
* "The Usual Suspect", where Marcus attempts to beat up Virgil. "I'm gonna knock you into a whole new ZIP code."
* The usual tactic for ambush predators such as big cats and crocodiles. The animal uses stealth to get as close as possible to its prey to minimize its escape. At the right moment, it bursts forward for the kill.
* The usual variant goes thus: "If you have to go the ER, the doctors will not try as hard to save you if you are a donor. They don't consciously choose to do it, they just do." Aside from being an insult to doctors, it always fails to explain just how would the doctors treating you know that you are a donor. (And if you say, "By your driver's license or ID, of course!" — remember, they don't actually see that.)
* the usual way, Daniel frustratedly mutters "Jack, don't be an ass", which of course grandpa repeats word for word. Jack is taken aback and after a second he replies, "Daniel?"
* The Usurpation was the end of the First Age, a period of high magic and well managed utopia that was brought crashing down to an end by a conspiracy of the Sidereal and Terrestrial Exalted. They killed all the Solar Exalted and prevented their Exaltations from finding new hosts, and drove the Lunar Exalted (most likely

to be able to step down the technologies that depended on the Solars safely) out to the borders of Creation.
* The Usurper: A character who takes a position of power (such as a ruler) away from its legitimate holder.
* The Usurper: Someone who becomes a ruler by intentionally taking out their rivals (usually via underhanded and illegal means).
* The Usurper: Someone who's willing to use any dirty means to seize a royal throne for themselves.
* The US uses SI units for some things because no equivalent "traditional" units exist… or if they do, they're too obscure. For example, all electrical units are SI — watts, kilowatts
* The U.S. Vice President's fanfare "Hail Columbia", which used to be an unofficial national anthem, is a rare example of this trope in use today.
* The U.S. watershed doesn't seem to make much of a difference in content on network TV; writers are hesitant to use bad language on either side of the watershed. And the
* The US weaponized this several times during the Cold War, most famously during the CIA backed coup in Guatemala in 1954. A short wave station calling itself Voice of the Liberation which was supposedly rebel broadcasts from within the Guatemalan jungle, (but in reality were Guatemalan-American exiles broadcasting from Florida) began playing in Guatemala, decrying the socialist government and backing the invading forces of exiled officer Carlos Castillo Armas. Despite Castillo Armas's forces being pitifully incapable of seizing the country militarily, the broadcasts and the prospect of the US fully backing Castillo Armas and invading as well terrified the citizenry and demoralized the Guatemalan army. The result was a group of officers turning on President Arbenz out of fear of a US invasion, Arbenz resigning and fleeing the country, and Castillo Armas being installed as the head of a military junta.
* The UTAU Ritsu Namine. His wholesomeness depends on how he's played, considering the fake breasts in his dress are
* The utilitarian armour of the Starks and their bannermen and soldiers.
* The UT Longhorn logo appears on so much A&M memorabilia—albeit with disfigurements—-that UT had to sue several clothing vendors that cater to Aggies for trademark infringement.
* The Utoniums themselves qualify: Supergenius dad, and three superhero daughters, and that's when Professor Utonium is just his normal self. This guy has the skill to create nearly any weapon he could imagine and has, on some occasions, donned a
* The Utonium Trials that the Powerpuff Girls don't need food (or at least they can go without food for longer than normal humans).
* The Utonium Trials when Buttercup overhears others call her red eyed sister Blossom "demon-eyed". Blossom isn't an example herself because she's heroic.
* The Utopians have a special punishment for killing one of their own:
* The Utopians use slang that sounds like it's been taken straight out of a sci-fi story instead of an actual unique language like the other Hives use. Fitting, since they're basically the world's speculative fiction nerds organized into a nation. Mycroft's favorite is "superprosthesis" for exceptionally useful tools.
* The Utraean Peninsula mostly plays the trope straight, except for one particular instance: the most important snowy area is in the south, and is positioned
* The utterly bizarre-looking Tanystropheus, a type of prehistoric reptile with a neck that made up most of its body. Scientists believe that it used said neck as a built-in fishing rod.
* The Überwald region (a collection of a lot of geo-political entities, in fact) of
* The UU team are amateurs so the professional players of A-M United have every advantage. The smarter pros realize that and are also aware that the opposing team are actually ultra-powerful wizards who will likely enact their own Unnecessary Roughness after the game. The Librarian alone is known for beating people to a bloody pulp for calling him a monkey (he is an orangutan).
* The UU wizards do this constantly, only Ridcully, Rincewind, the Librarian, and

Ponder's group ever seem to do anything but this trope (and eating, of course). Ponder's (probably sarcastic) theory is that the faculty's minds are on higher things, leaving their mouths to run around making a nuisance of themselves.
* The Uzi, vz. 61, MAC-10, and many other submachine guns are shown so rarely with their stocks extended or unfolded in any medium that most people truly believe they're actually pistols and that the folded or collapsed stocks are some deranged-looking part of the working mechanisms. The SPAS-12 and Striker-12 (to a lesser extent) also suffer from it. All folding stocks in movies in general tend to get hit with it but the aforementioned ones pretty much never see any exceptions to this rule, causing the issue.
* The V08-1228 Grimgerde is one of the nine Valkyrie Mobile Suits developed by Gjallarhorn in Pre-Calamity War, Grimgerde serves as the prototype of the mass produced Graze as well as the Graze Swords carried by Carta Issue. Piloted by masked man
* The V2 Gundam is a straight example of this, even though the protagonist would still occasionally pilot the previous model or even an enemy unit.
* The V-4X-D was originally made for asteroid slalom racing. When the sport shut down due an entire group of racers getting eaten by stone mites, the Rebels acquired some of the speeders and, due their high performance, equipped them with laser cannons for use as land-based high-speed assault vehicles.
* The Vacant Lot had a sketch where a prisoner is force-fed candy (still in the wrapper) and eventually lots of small plastic toys. He is then used as a pinata for the warden's daughter's birthday party.
* "The Vaccination Special," the show should not be watched by anyone.
* The Vachons: brothers Maurice "Mad Dog" and Paul "The Butcher", their sister Vivian and Paul's daughter
* The "vacuum cleaner repairman" specializes in helping people obtain new identities and disappear. He is extremely methodical and professional about the entire process and hates deviating from his routine since that is likely to get him caught. He is willing to make an exception with
* The Vagina Ass of Lucifer Niggerbastard: Lucifer is regarded as a legend by those who read the Prophecy Of The Vagina Ass.
* The Vagina Ass of Lucifer Niggerbastard. Lucifer, "tests", the Magic Wand out on Griswalda.
* The Vagina Monologues, and still others have elected to cut the entire segment.
* The Vagina Monologues has a monologue about the healing experience of holding a naming ceremony for the female speaker's genitals - renaming it from "Itsy-Bitsy" to "Vulva." Admittedly the latter is the correct medical term, but the ceremony and sensuality she attributed to it make it an example of this trope.
* The Vagrant: Judy's head, hands, and feet are found arranged in a dish in Graham's refrigerator.
* The Vagrant Trilogy: Infernal essence twists living flesh, dead flesh, and the land itself. However, it also goes the other way — the world itself burns infernals, which is why they have to taint the land for every step they take. The Usurper can't travel much farther north than the Fallen Palace, while the Uncivil found a way to survive with a cloak of corpses, and the First spreads himself through humans and uses them as shields.
* The Vagrant Trilogy: Of a sort. The Uncivil uses "necrotech" to enhance her followers. This consists of dead limbs infused with her essence and grafted onto humans, giving them powers and abilities that have nothing to do with the original function of the limbs.
* The Vagrant Trilogy to ready for the end. Unfortunately the invasion happens centuries after she dies, and so a good chunk of humanity is taken over by the victorious demonic forces. Which leads to the events in the story...
* The vaguely effeminate French exchange student Andre Laurent Jean Geraux (AKA, Bebe) from
* The Vahki made a huge impact on fans in the 2004 web animations and tv commercial, which portrayed them as merciless, extremely efficient and creepy law enforcers that keep the city in a constant

* The Vahki robots were the first clear examples. Built to act as law enforcement in the city of Metru Nui under the command of Turaga Dume, they just as easily took orders from an impostor when Dume was kidnapped and replaced. They eventually got fried by a citywide power surge, but the ones who survived had their programming warped to
* The vain antagonist Balrog (Japan) / Vega (North America) from the
* the Vajra homeworld, a Class-A planet virtually identical to Earth except for the three moons, and the Vajra nest/planet-sized rock formation that stretches up from gigantic pillars to form a huge ring around the equator. At the end of the series, Island 1 successfully lands on it, and the Frontier population start a new life there.
* The Vakeros of Dessi are also an example, being warriors who use Old Kingdom Magic.
* The Valachi Papers was created from interviews and testimony of Joe Valachi, the first major mob informant.
* The Valar - particularly Varda, queen of stars - definitely fit under Divine beauty (when, that is, they take humanoid form).
* The Valashmai Jungle, a stretch of mountains and rainforests south of
* The Valency Generator is cleverly used in an airbag-like safety mechanism: in a collision, the vehicle is flooded with a gel or foam-like substance, and then the valency generator kicks in, making the substance rigid, absorbing the momentum of the passenger. After the collision, the valency generator turns off and the passengers can climb out of the foam unharmed.
* The Valentine's Day strip involves, well, Valentine's Day chocolate.
* The Valentines' Day-themed "Debonair" skins, have Jayce, Vi, Ezreal, and Galio in very nice suits.
* The Valhallan 597th is a mixed-gender regiment created from two different single-gender regiments, and it's mentioned in passing that pregnancies happen often enough that Cain is familiar with baby behavior.
* The Valheru also initially give the appearance of this, as the closest thing to a Valheru we meet, Tomas, is only
* The Valkyrie-class battlestar was one of the smallest ship classes in Colonial service, yet made up the majority of the pre-Fall Colonial Fleet. 1/3 the size of a Jupiter-class, the Valkyrie nonetheless had significant firepower and could deploy Vipers at a far more rapid pace than other battlestars because its launch tubes faced forwards rather than to the sides as with the Mercury and Jupiter-classes.
* The Valkyrie Frigate serves this role in the Terran arsenal, being the only damage-capable unit with a female portrait (neither the Medic nor the Dropship can actually inflict damage). In 2, the Banshee stealth bomber (well, not really a bomber; more like an
* The Valkyrie. It turns out he is deeply in love with her and doesn't want to lose her like he lost his first wife.
* The Valkyries, an army of ace pilots and shock troopers comprised entirely of female aliens. Despite the name, male versions do exist, but
* The Valkyries of Ragnanival, and the Inferno King's Vulcan soldiers in
* The Valkyrie Team on the Brittanian side, although they didn't get much screentime before
* The Valkyr Twins boss fight in the Trial of the Crusader raid is heavily inspired by
* The "Vallachi Suite" located at La Tuna Prison in Texas deserves mention. Built in the 60's to hold mob informant Joe Vallachi and isolated from the rest of the prison. While the prisoner is held in a regular cell(with a bed rather than a cot) at night, they get access to adjoining room with sofa's, stereo, television an excercise bike as well as described by one informant a nice kitchen and nice sized bathroom. Though reports about the conditions vary, it's very comfortable living.
* The Valley Forge arc sees Frank hunted down by Delta Force soldiers in order to bring him to trial alive (they take him down, eventually, but only because neither was ready to use lethal force on the other). Their commanding officer Colonel Howe claims Castle's use of methods taught by the USAF to kill criminals are a stain on

their legacy.
* The Valley of Fear browbeats the witnesses into reducing their testimony to "the perpetrator had a beard". (This was 1875.) It's standard enough practice that members of the local crime network regard getting arrested for felonies the way urban hooligans regard a night's lock-up for disorderly conduct - an inconvenience at worst and a rite of passage at best.
* The Valley of Fear deals with this by gaining the favor of the gang himself. It does get his rival to back off, but needless to say, the love interest is not thrilled.
* The Valley of Fear had Holmes mention that Professor Moriarty owned a painting worth many times over his legitimate annual income. At the time, this was the most tangible piece of evidence Holmes could find against Moriarty.
* The Valley of Fear: Though McMurdo is already a member of the Freemen, the Scowrers have their own ritual for new members, which climaxes with them being branded with the lodge symbol.
* The Valley of Fear: Two inexperienced members of the Scourers are tasked with hosting a pair of killers there to do a job and insist on participating in the 'fun'. After the deed is done it turns out it's not so much fun anymore.
* The Valley of Fear when they come to move the goods. Pure bluff, in that it was impossible to actually drain the moat.
* The Valley of Gwangi back to town to participate in the rodeo. It goes about as well as you'd expect.
* The Valley of Gwangi opens with a search party discovering a man who promptly collapses and moans the word "Gwangi..." before dying. Cut to title/credits sequence.
* The Valley of Horses, the series would have used the exact same plot point three times in a row.
* The Valley of Horses with beauty. Jondalar assumes that, because of Ayla's isolation and silence, she's a shaman on a quest to commune with the Earth Mother; Ayla doesn't realise that the feelings she has for Jondalar are sexual. When she finally does realise it, she tries everything she can to get him to sleep with her, but Jondalar, under the impression that it would be improper, doesn't make a move. It's more mutual misunderstandings that come from being from different cultures that separates them, not their good looks.
* The Valley-Westside War, depicts the US far more thoroughly broken up in the aftermath of a nuclear war in 1967. A hundred years later, there are a score of sovereign nations in the territory of the city of Los Angeles alone, each with its own national pride, a specific system of government, hereditary enemies, a miniature national army and protective tariffs to defend the national product. In the whole of the former US territory, there must be many thousands of such mini-states.
* The Valley-Westside War series, mentions one of the warlords in the ruins of Los Angeles having a horse-sized attack dog (mutated by the radiation).
* The Valmanway returns yet again and continues to be the single most broken weapon for Soma, an already broken character when maxed out. With the correct soul combination he can use it for what is basically
* The Valois extended family contains possibly hundreds of families, most notably Sturmvoraus, von Blitzengaard and Selnikov, which are continually feuding, fighting and assassinating each other. Then the people within each family all have their own plots, too - the father/son/daughter combination of Aaronev, Tarvek and Anevka were all double-crossing each other for years, and the brother/sister team of Martellus and Xerxsephnia aren't exactly on the same page either.
* The Valor of Cappen Varra the eponymous hero is able to face down a troll because he has a charm that negates magic and so renders him immune to her super strength. At the end he is told that trolls are just naturally very strong so the charm was worthless.
* The Valour. Sure, Pulse Rifles are weak against Necromorphs, and maybe the soldiers needed a while to grab their guns, but seriously. One slasher - the weakest type of Necromorph - manages to kill and infect an entire ship stocked to

the brim with trained soldiers wielding Pulse Rifles and wearing advanced body armour that is as good or better than Isaac's Level 5 suit. (In fairness, some of the marine corpses clearly were killed by the crashing of the ship and not a necromorph, plus, according to one of the logs you can find on the ship, most of the marines actually survived until after the valour crashed into the Ishimura and were killed in a running battle against a horde of necromorphs that were attracted to the ship by the crash.)
* The Val'Sharen are the ruling class due to their ancestry to the Drow's
* The Val Thorens episode saw "sponsorships" from French companies such as "So
* The valuable cargo looted from a derelict ship in the pilot? Nutrition bars, of the sort issued as rations to brand-new colonies; thanks to the central Alliance government's utter lack of interest in doing anything to support any brand-new colony which can't survive entirely on its own, these ration bars are much more valuable as loot than the ingots of precious metal they're initially portrayed to be. Especially as each one can feed a family of four for a
* The Valyrian "Freehold" was the largest slave-dependent empire in the world, with territorial expansions being used as a pretext to acquire more slaves. Similarly, eight of the nine Free Cities in Essos practice slavery, with Braavos being the only exception because it was founded by runaway slaves.
* The Vampair Series, Duke regularly gives these. This and other details hint that he has fourth wall awareness. For instance, in Land of the Dead, he’s apparently singing directly to the audience the whole time.
* The Vampair Series not only do the vampires have glowing red eyes but so does the evil magic cane.
* The Vamp as a PG show could get with an adult woman talking to an unrelated man, so it's quite frankly a miracle that this fourteen-year-old's interactions with her sixteen-year-old brother made it past the censors.
* The Vamp: A woman who acts seductive to manipulate men into doing what they want them to.
* The Vamp, conniving seductress who actively leads foolish men to their doom.
* The vampire Alexandre Russeau brings a flock of carrion crows with him when he moves into Salvation in
* The Vampire Armand, which overlap quite a bit, but from the perspectives Armand and Marius, respectively.
* The Vampire Chronicles, after breaking his solemn vow and turning Merrick into a vampire. He does burn, but there is enough of him left that when his friends pour their vampire blood over his body he comes back to life. The incident ends up permanently waking up Lestat from his years-long stupor and bringing everyone involved closer together. Lestat, Louis, David, and Merrick form "a new coven, lively, and delighted in each other's company, and excusing each other all past sins."
* The Vampire Chronicles, after trading bodies with Raglan, Lestat is equal parts disoriented and enchanted to have a living body again, particularly a young, attractive, and hormone-charged one — at least until he has to take a leak for the first time in 200 years.
* The Vampire Chronicles: Akasha is the first Vampire, and the progenitor of all of them. She became a vampire when a demon entered her body and fused with her flesh.
* The Vampire Chronicles) are generally well-thought-of (YMMV regarding the other books) and the series had a massive influence on vampire fiction in the late 20th century and 21st century.
* The Vampire Chronicles, a series about queer vampires. It doesn't exactly focus on romance, but it is a major theme.
* The Vampire Chronicles. As the visions get clearer, it falls out that consuming the body was their duty as the woman's daughters, as in their culture this was the only respectful way to handle the dead, the idea being that "what was human should remain with humanity".
* The Vampire Chronicles from place to place with near instantaneous acceleration and deceleration.
* The Vampire Chronicles has Maharet. When she was human, her eyes were gouged out

so after she was turned into a vampire she would take the eyes from the humans she killed and use them until they wore out.
* The Vampire Chronicles. However, if they're limited to human blood, rather than the medicinally more potent blood of other, ancient vampires, healing from severe wounds can take years, and they feel pain as acutely as humans.
* The Vampire Chronicles is a secret organization dedicated to the investigation and documentation of the supernatural. They gather documents and artifacts, work to hide evidence of paranormal activities from the public and often help people troubled by such phenomenon. Many members of the organization possess supernatural abilities like telepathy. Among Talamasca's many interests are, of course, also the vampires. Unfortunately for them, agents who have a brush with vampirism tend to end up turned and leave the order.
* The Vampire Chronicles, its corpse looks as the person had been dead since the time they were turned. Newly-made vampires leave normal bodies, older ones leave dried-out husks, and even older ones disintegrate entirely.
* The Vampire Chronicles: Lestat has a tendency to say "Hell's Bells", apropos absolutely nothing, whenever the situation is getting bad. Particularly in "Queen of the Damned".
* The Vampire Chronicles, Mekare decapitates Akasha, the Mother of all vampires, whose heart or brain she and Maharet believe contains the spirit that animates all vampires. Were that spirit to die, so would her spiritual descendants. Luckily for them (but probably not for her), Akasha's superpowers keep her alive long enough for the twins to eat the relevant body parts, making one of them (apparently Mekare) the new queen of the damned.
* The Vampire Chronicles nature they also can do sex in all but name only, despite of the fact that the organs normally required for the act are pretty much necrotic.
* The Vampire Chronicles of a vampire, he's desperate to regain his body.
* The Vampire Chronicles, once unleashed, Akasha kills off most of the vampire race except, conveniently, for every single major character in the series, and plots to exterminate all men on earth.
* The Vampire Chronicles, once you're a vampire, you can't have actual sex. However, everything else practically becomes a substitute. Even the pattern on a carpet can bring rapturous pleasure to one's enhanced senses.
* The Vampire Chronicles, Quinn Blackwood becoming part of Lestat's coven.
* The Vampire Chronicles than creepy to the reader, but in-universe he's certainly this— especially to mortals.
* The Vampire Chronicles, the rules of both humanity and weaker vampires become distinctly less important to them.
* The Vampire Chronicles"? They cannot agree on anything, get in physical fights and insult each other like there is no tomorrow (or at least Lestat does this) but at the end of the day Louis still manages to say "I love you". Lestat is not complaining.
* The Vampire Chronicles this is slightly subverted, as Daniel Molloy tries to drink away his madness (from the knowledge that vampires are real).
* The Vampire Chronicles toys with the concept of Satan several times:
* The Vampire Chronicles transformation includes the body painfully rejecting digested food and fluids.
* The Vampire Chronicles when he points out that if Louis doesn't want the (at the time) still-superstitious humans opening his coffin while they're at sea, Louis "damn well better keep that ship clean of rats." Additionally, Lestat's mother Gabrielle lives almost exclusively in the wilderness, and subsists on wild animals.
* The Vampire Con Series by Kate Paulk takes place in a world where the supernatural is real. Where do they go to hang out/meet up? Sci-Fi/Fantasy Cons of course. Sadly, adventure gets in the way of their plans to just have a good time.
* The Vampire Countess chose to simply replace this all together as "Flatten the bleeder".
* The Vampire Count of Monte Cristo has this towards the Angel of Vengeance.
* The Vampire Counts book, however, suggests that when you "wound" a zombie, you're actually smashing it into enough pieces that it can't do anything - which,

given the state of decay involved in one of these things (they're literally held together with fence posts and nails), is easier than you might think.
* The Vampire Counts borrowed this with their Unholy Lodestone upgrade to their Corpse Cart unit, a bell with a
* The Vampire Counts can field a large number of monstrous bats, with one unit so far representing the swarm of shrieking bats variety, with the rest being increasingly horrifying Dire Bats.
* The Vampire Counts have access to a large number of flying units, most notably Vargheists, vampires that have been driven insane by centuries of imprisonment and mutated into giant batlike monsters. In addition, they can raise Terrogheists, the reanimated husks of bats the size of dragons, as well as actual zombie dragons.
* The Vampire Counts have their own version of this, and the original vampire bloodline is entirely composed of this in the "present-day". Lahmian vampires are specifically known to use their seduction to enslave entire populations rather than using outright force, and all Lahmian vampires are female.
* The Vampire Counts often masquerade as normal kingdoms, out to take over the Empire. The funny thing is, the Vampire Counts include a bloodline called the 'Necrarchs', making it a Necrocratic Necrarchy.
* The Vampire Counts regularly employ undead wolves, horses and bats in their service. The Tomb Kings instead animate the bodies of carrion birds to serve as scouts and to harry enemy troops.
* The Vampire Counts themselves tend to use baroque medieval and early modern swords and daggers (when they're not fighting with bare claws and fangs), and their skeletal servants wield rusty, notched versions of the same, occasionally spears. Most zombies and ghouls fight with their bare hands, though zombies sometimes have the odd rusty knife or battered farm tool. Wraiths, however, wield gigantic reaping scythes, in keeping with their grim reaper imagery. The Vampire Counts army is more a magical force of nature than a proper military force, and decent equipment is rarely on their agenda - it's what you were buried with or nothing. They have no missile weapons at all.
* The Vampire Diaries abuse this trope. It appears almost every time a vampire wants to kill another vampire, a werewolf, or anyone else, for that matter.
* The Vampire Diaries. According to Qetsiyah, Stefan and Elena are destined to be together as the Universe has been trying to get doppelgängers together forever.
* The Vampire Diaries. After becoming a blood-addicted Ripper who was controlled by Klaus for the first half of the third season, Stefan spends the other half of the third season trying to gain his free will back and turn on his humanity again. He tries to redeem himself for all of the immoral acts he committed during his Ripper phase by joining the fight in destroying Klaus.
* The Vampire Diaries: Again vampires first then we learn that witches and werewolves also exist.
* The Vampire Diaries: All of the Originals' ages are unknown. Rebekah and Kol are teenagers, where in their teens they fall is anyone's guess and Klaus, Elijah, and Finn are total mystery. It's also unknown at what age Katherine was turned.
* The Vampire Diaries: All of the supernatural romantic pairings classify as this.
* The Vampire Diaries. Although Elena is the central character and protagonist, Stefan is the one who is telling the story about Elena and the other characters through his eyes and his point of view. This was established in the series Pilot.
* The Vampire Diaries and asks if he's not worried about wild animals banning together to take him down.
* The Vampire Diaries and uses this knowledge in a confrontation to force him to let her go.
* The Vampire Diaries are 'just the conflict that makes their story interesting'.
* The Vampire Diaries are very slow, due to hardly any characters actually being aware of the vampires' existence. Then Elena finds out at the end of episode five, and the show improves considerably.
* The Vampire Diaries. Aside from the unpleasantness of having to die over and over again it is revealed that she is driven by a constant magic-induced urge to slay

vampires, even though she would rather just live a normal life.
* The Vampire Diaries as "probably the best vampire show on now," though that's not as narrow as it sounds these days.
* The Vampire Diaries. Attacking a werewolf with silver, therefore, is literally less effective than anything else you could hit them with.
* The Vampire Diaries became vampires, and even "good" vampires like Stefan were revealed to have done horrific things, Villain protagonists became the norm. By the end of the third season, Elena admits that killing all the vampires in the world, including her friends, would actually be the right thing to do, and that trying to keep them alive, at the expense of who-knows-how-many people they'll go on to kill, makes her the bad guy. To which she adds, "Fine, I'll be the bad guy."
* The Vampire Diaries books, though having the V word in the title don't use at all in the first, or most of the 2nd, it doesn't start occurring even semi-regularly till book 3.
* The Vampire Diaries: Both Katherine and Elena prefer and have chosen Stefan over him. Is always second best to Stefan in regards to love and romance.
* The Vampire Diaries brings us Damon and Stefan Salvatore who became vampires after falling in love with Katherine, a vampire that abuses their love triangle. After she is seemingly killed the brothers eventually end up in Mystic Falls where they both fall in love with Elena, who looks exactly like Katherine.
* The Vampire Diaries by bringing out his sociopathic alter ego, the Ripper.
* The Vampire Diaries by the company that owns the rights, allegedly because she disagreed with them about who the heroine should be romantically paired with at the end. The company intends to get someone else in to write it the way they want.
* The Vampire Diaries Caroline breaks up with Matt by starting a jealous argument about him talking to another girl, which she already knows that he hates.
* The Vampire Diaries: Damon & Elena actually met the night of her parents death and not in the scene we see in 1.02.
* The Vampire Diaries Damon and Elena, until the last four or so episodes of the first season. After that, they drop the "can't stand them" part.
* The Vampire Diaries, Damon and Stefan tell Matt he should have died instead of Elena in 4x01.
* The Vampire Diaries Damon has some tendencies towards this. Elena does pick up on it pretty quickly, and when asking him to put the mind-whammy on her brother she makes a very specific request to circumvent it, but Damon loves a loophole.
* The Vampire Diaries: Damon revels in vampirism, being immortal and being powerful.
* The Vampire Diaries, Damon Salvatore. He was rebellious and didn't believe in duty and responsibility the way his father and his brother Stefan did.
* The Vampire Diaries: Damon saving Stefan because if anyone's gonna kill his little brother, it's gonna be him.
* The Vampire Diaries delves into the history of the eponymous Magnificent Bitch.
* The Vampire Diaries: Depending on how you count it Elena and Damon get one in " The New Deal" where Damon initiates and Elena doesn't push him away but the definite and unquestionable first kiss between the two with no restraint of any kind is initiated by Elena in "Heart of Darkness."
* The Vampire Diaries distances himself from Elena in order to protect her and her friends and family.
* The Vampire Diaries, Elena falls deeply in love with Stefan before later on discovering that Stefan was the one who miraculously saved her life from the tragic car accident that had claimed both of her parents' lives.
* The Vampire Diaries Elena had a 4-year-old sister. In the TV show, she has a teenage brother. The boarding house Stefan stayed in was also owned by an elderly woman instead of Stefan's and Damon's "uncle".
* The Vampire Diaries: Elena, Matt, Bonnie, Caroline, Tyler, Jeremy. This all changes when all of the characters start to develop their own individual identities.
* The Vampire Diaries. Elena notes that Meredith is the only female who seems immune to Damon's charisma, but this only serves to make Damon rather wary of her.

* The Vampire Diaries, Elena remembers stories of "the souls of true lovers" being connected by "a silver string from heart to heart or a red cord from pinky to pinky", but it's the first one that she's able to find (and follow). Stefan and Elena are bound together by the silver cord from soul to soul, implying that they are destined soulmates.
* The Vampire Diaries, Elena's best friend Bonnie, who is a psychic, reads Elena's palm and tells her that in the future, she is going to meet a "tall, dark, and handsome" stranger. A few minutes later, Elena sees Stefan for the first time. Elena instantly and immediately falls in love with Stefan the moment she sees him.
* The Vampire Diaries, Elena unexpectedly meets Stefan and feels an instant connection with him in season one. However, Stefan is hiding a deep, dark secret: he is a century old vampire. As Stefan and Elena fall harder for each other, Elena eventually discovers that Stefan is a vampire.
* The Vampire Diaries, Elijah knocking off Trevor's head? Harsh, but hilarious. Elijah forcing Slater to stake himself? Awful, but hilarious. Elijah ripping out two people's hearts at THE SAME TIME? Evil, but epic.
* The Vampire Diaries, especially in the case of the black boy introduced to Bonnie as a crush, who is promptly killed off.
* The Vampire Diaries: Even when he's balls-to-the-wall evil and murdering innocent people, Damon still makes you laugh.
* The Vampire Diaries fandom, Paul Wesley is known as P-Dub. This is his nickname because his first name Paul starts with the letter P and his last name starts with the letter W; the word "Dub" means Dubya for W. His fan base are known as P-Dubbers.
* The Vampire Diaries features a somewhat surprising example as Elena reads one of the diaries of her ancestor Jonathan, as he actually states how he saw who killed him. It's explained by the existence of the Gilbert Protection Rings, of which Jonathan was the first wearer, which revive anyone killed by the supernatural.
* The Vampire Diaries fit this trope. Stefan is the Fire, who is warm, kind, compassionate, caring and loving and Damon is the Ice, who is uncaring, arrogant, cold, unsympathetic and impulsive.
* The Vampire Diaries focuses on the main characters war with the Original Vampires, the source of every other Vampire in the show. Just when they had completed their ultimate weapon to defeat all of them, it's revealed that the death of an Original means the death of every Vampire connected to that Original's Sire line. The cast lose the war once they learn this, because far too many of their friends (and the series 3 leads) are Vampires and the show would have to do some serious recasting and concept altering if they wanted to have a Season 4.
* The Vampire Diaries: For much of the third season, the good guys depend heavily on Klaus not bothering to kill them, which he could do pretty much any time he wanted.
* The Vampire Diaries gay and left his wife because he could no longer live a lie. Needless to say, Damon points out the incredible...quirkiness of the situation.
* The Vampire Diaries gives clever little nicknames to everyone, and rarely calls anyone by their real names.
* The Vampire Diaries had a more low-key example with Katherine who was formerly Immortal and over five-hundred years old but was turned human by a serum. The serum doesn't age her rapidly but having it drained by Silas causes her age to catch up with her and she starts showing signs of old age and will die soon although it is over a few months rather than instantly as in other examples.
* The Vampire Diaries had an intense scene in the rain during season 1, fans for the pairing requested that they kiss in the rain. According to showrunner Julie Plec, this request was something that was discussed repeatedly in the writer's room. In developing season 6, the story called for a scene for Damon to flashback to that was highly romantic that took place during their unaired summer together. So they decided to use that opportunity to fulfill the highly requested rain kiss, by having Damon remember an intensely romantic moment between them kissing in the rain.
* The Vampire Diaries had this when Bonnie was told this by her grandmother's ghost

after she closes that gates to send all the ghosts back.
* The Vampire Diaries has Katherine, who uses her charm and seductive wiles in order to get what she wants.
* The Vampire Diaries has this attitude toward Stefan in the show. He saved Stefan's life because he didn't want anyone else to have the pleasure of killing him. Given the arc of their relationship over the course of the series, it seems this was really an excuse; he actually didn't want his little brother dead, but was keeping up the "I hate you so much" schtick.
* The Vampire Diaries. He has always been popular, well-liked, and respected since his human life. He has the ability to charm others and persuade people to listen to him without the use of mind control. Not to mention that many people find Stefan likeable.
* The Vampire Diaries. Her wings only appear when she concentrates or when she wants to use them and they disappear when she is not using them.
* The Vampire Diaries. He's a good guy, but he's definitely not a nice guy.
* The Vampire Diaries. He spends 146 years searching for Katherine and falls for her doppelganger, Elena to whom he is just as loyal to, if in his own crazy way.
* The Vampire Diaries. He would never have picked someone like her under normal circumstances, but now if anyone threatens his Katerina, they better watch out.
* The Vampire Diaries. His sexuality is barely referenced in any of the episodes he appears in, and if you missed any of the few mentions you would never know.
* The Vampire Diaries. In both the TV show and the book series, Elena and Matt dated before the series beginning, with Elena (in the show) describing it as those friends who've known each other forever deciding to give a relationship a shot. It's revealed later in the series that the death of Elena's parents was the final nail in the coffin of her romantic relationship with him, and while he still has feelings for her through most of the series, they remain good friends.
* The Vampire Diaries: In Season 2 Episode 2 "Brave New World", Stefan leaps up with Elena (using his vampire ability of super leap or jump) onto the ferris wheel and the two share a kiss and a romantic tender moment after a day of chaos.
* The Vampire Diaries, in season four, Stefan and Elena are locked in separate prison cells after being captured by vampire hunters. A wall separates Stefan and Elena from being able to see each other. Stefan and Elena start to confess how much they love each other and Elena that she had chosen Stefan before she had drowned and died. Elena then tells Stefan that "she really wishes she could see him right now" while placing her hand on the wall as a form of communication with Stefan, suggesting that she is desperate to see him. Stefan then tells Elena through the cell wall: "I'm smiling".
* The Vampire Diaries intertwine their fingers and hands together when they make love for the first time in season one.
* The Vampire Diaries:In the season 3 finale "The Departed" Elena is knocked out almost instantly when she drinks some drugged tea given to her by Matt. She is not pleased when she awakens in Matt's truck later and her night only gets worse when Rebekha (believing Klaus to be gone for good) causes the truck to go off of a bridge leading to Elena drowning and then being resurrected as a transitioning vampire due to unknowingly having vampire blood in her system at the time.
* The Vampire Diaries in the second episode, where a girl finds her boyfriend hanging above their tent.
* The Vampire Diaries is a classic example. She's willing to seduce anyone that can give her what she needs, and the many, many men that have taken the fall for her over the past 3 seasons are more than happy to comply.
* The Vampire Diaries is really vocal about her dislike for Damon and Elena's relationship, mostly because she hates Damon and think Stefan is better for Elena.
* The Vampire Diaries it's unlikely he'll ever get his full comeuppance.
* The Vampire Diaries; it takes over five hours of horrible pain before there's even any visible changes. Though at least that part does get shorter over time.
* The Vampire Diaries: Jenna's reaction upon learning that John Gilbert is Elena's father.
* The Vampire Diaries: Johnathen Gilbert was a crazy inventor trying to build

devices to let the town destroy the vampires in their midst. None of them worked, until the vampires' pet witch enchanted them to work as intended, assuming they were put together properly.
* The Vampire Diaries Katherine has built up an immunity to vervain, she can still get disabled by it if taken by surprise by a large enough dose but she gets over it much faster. Stefan uses this technique to get over his addiction to human blood.
* The Vampire Diaries literally because her vervain necklace prevents her from being compelled. At least, while she is actually wearing it.
* The Vampire Diaries manipulates her boyfriend Matt into breaking up with her since, as a young vampire, she lacks the self-control to not rip his throat out in an intimate moment.
* The Vampire Diaries Matt and Elena seemed to be destined to become this but the deaths of her parents caused her to break off the relationship. Then the Salvatore brothers showed up and Matt realized that they would never get back together. Considering the high death toll in Mystic Falls, it is likely that few of the high school couples will even survive to have a graduation.
* The Vampire Diaries — but they completely erased the existence another extremely prominent female character who is Latina and definitely minimized Bonnie's personality and agency.
* The Vampire Diaries — they have to die first before returning as the undead.
* The Vampire Diaries, most of whom start fitting in pretty fast. However, they are seen being instructed in using modern technology, and some of them are too interested in feeding to bother learning much. And of course, the ability to mind control your way through most problems would help.
* The Vampire Diaries, new vampires can sometimes be 'sired' to their maker which means that they will follow any order or suggestion that the sire makes to them. Damian had this happen to a female vampire he created in the 1940s. He thought that he found a way to break the sire bond and left her behind in New Orleans. In the present he finds out that he was tricked and the sire bond was still intact. He is horrified because before he left he told her to wait on a particular street corner and count all the bricks in New Orleans. He returns to New Orleans and the vampire is in fact waiting on that street corner. The trope is subverted when she reveals that the compulsion faded after a short while and she was able to leave the corner and do other things beside waiting for him. However, she still visits the corner regularly and counts bricks as hobby.
* The Vampire Diaries, no matter how many times she's abused, tortured, neglected or loses someone she loves, she always holds her head high, smiles and is there for her friends.
* The Vampire Diaries of all people to a sniveling wreck, she can only imagine what he's capable of doing to the rest of them.
* The Vampire Diaries put the center of mystic activities in semi-rural Mystic Falls, Virginia.
* The Vampire Diaries, regardless of whether or not they've ever shown interest in each other before that season. The most egregious examples of romantic musical chairs among the main cast on this show include:
* The Vampire Diaries. Season 3 takes it further as Tyler has also become a vampire, and Klaus, who is also vampire and werewolf. In short, it's a vampire girl torn between two werewolf-vampire hybrids.
* The Vampire Diaries's experienced hunters can resist compulsion, especially if they've had training.
* The Vampire Diaries, Stefan and Damon over the affections of first Katherine and then Elena.
* The Vampire Diaries. Stefan and Damon were best friends before Katherine Pierce came between them, changing the relationship between the Salvatore brothers forever. The rivalry only got more intense when both brothers end up competing over Elena Gilbert, Katherine's doppelganger.
* The Vampire Diaries: Stefan and Elena are experts at this. Often followed by a sweet forehead kiss. It. Is. Adorable.

* The Vampire Diaries: Stefan and Elena have gone through this throughout most of the series. This is mostly due to Stefan being a vampire and Elena being a human, leading two completely different lifestyles with different backgrounds. One reason is Elena finding out Stefan is a vampire. A second reason is Stefan enduring blood issues and having issues with his blood addiction and keeping it a secret from Elena. A third reason is Stefan's brother, Damon, who is also in love with Elena, causing issues and tension between Stefan and Elena and their relationship. A fourth reason was Stefan sacrificing himself (turning off his humanity and becoming a blood addicted Ripper) to Klaus in order to save his brother Damon from a fatal werewolf bite by getting the cure (which turned out to be Klaus' blood). A fifth reason is Elena recently turning into a vampire. However, despite all of these issues, Stefan and Elena have managed to overcome all of these obstacles and come together still more in love then ever before and stronger as a couple.
* The Vampire Diaries: Stefan and Elena's relationship on the show series is primarily built from this trope, mostly because of their novel counterparts, which feature Stefan/Elena as the destined pairing in the books tied together by a silver cord of destiny, indicating that the two are soul mates and have reincarnated lifetime after lifetime. This is even more emphasized in season five, when it is discovered that they are spawned from an ancient true love story of over 2,000 + years between their ancestors, Silas/Amara.
* The Vampire Diaries' Stefan and Elena waking up in bed together in Season 2 Episode 6 "Plan B".
* The Vampire Diaries: Stefan has two distinct and very different sides to him due to his vampire nature. When Stefan takes in a huge amount of blood, he shuts off his emotions and becomes crazy, violent, cold, careless, and impulsive. When he feeds, he feeds so violently that he ends up ripping the heads off of his victims, although afterwards he feels guilt and remorse and puts the heads back onto the bodies of his victims. When Stefan is not hyped up on excessive amounts of human blood, he is sensitive, loving, kind, compassionate, caring, empathetic, selfless, and helpful. This more human side is especially enhanced in the presence of Elena, and when Stefan is in his violent state, he cannot find it in himself to hurt Elena.
* The Vampire Diaries. Stefan is depicted as a heroic, noble, and selfless saviour and protector.
* The Vampire Diaries, Stefan is this to Elena. Elena's first love was Matt, also her childhood friend whom Elena broke up with four months before unexpectedly meeting and eventually falling in love with Stefan.
* The Vampire Diaries, Stefan killed Ben with a freaking flamethrower! Also how they disposed of the incapacitated tomb vampires. Bonnie threatens Damon with this — and nearly goes through with it. Damon tries this with Elijah but fails.
* The Vampire Diaries: Stefan occasionally does this to Elena throughout the series. Stefan breaks up with Elena or turns his back on her in order to protect Elena. This is especially evident in season three when Stefan leaves Mystic Falls with Klaus and becomes a Ripper in order to protect Elena and the rest of the town. Elena also did this with Stefan in season two by breaking up with Stefan in order to protect Stefan and her family and friends from Katherine Pierce.
* The Vampire Diaries: Stefan Salvatore. Apart from being the hero, he also often takes the lead in most of the plans and missions, despite Elena being the heroine. He's a mixture of Mastermind, levelheaded leader and charismatic leader.
* The Vampire Diaries, Stefan tries to become a new student and is quizzed on his lack of vaccinations and paperwork. He has to hypnotize the secretary to believe that everything is in order.
* The Vampire Diaries, Stefan unexpectedly meets Elena for the first time at a car accident scene and rescues her to safety. Elena unexpectedly meets Stefan for the first time after bumping into him outside of the men's washroom. Also, Stefan and Elena coincidentally end up bumping into each other at the cemetery, where Elena was alone writing in her journal. All of their first meetings have been seen as fateful, synchronistic, or coincidental.
* The Vampire Diaries, Stefan, who is the hero, devotes his immortal, undead life

and makes constant sacrifices (including sacrificing himself or risking his life) in order to protect and save Elena, the heroine (or more like damsel in distress) from possible harm and dangers of the supernatural in the town of Mystic Falls.
* The Vampire Diaries story Let It Rain which is a Gender Re-Flip of Jeremy was a girl in the books just with a different name and aged up.
* The Vampire Diaries. The first two actually aired concurrently from 2013 to 2017.
* The Vampire Diaries. Their romance and relationship drives the plot of the entire series. Although Stefan and Elena have endured endless obstacles (varying from minor to major) trying to keep them apart, Stefan and Elena still manage after all the problems to come back together, surprisingly stronger then ever before. Some minor examples throughout the series include Stefan pulling away from Elena because of his secret blood issues in season one. Another minor example is Stefan and Elena breaking up because of Katherine threatening to harm everyone Elena loves in season two. One major example is in season three, Stefan sacrificing himself to Klaus in order to save Damon's life and protect Elena. During this time, Stefan left Elena and Mystic Falls, turned off his emotions (his humanity) and became a Ripper. With Stefan being a Ripper with no emotions, Stefan had almost tried to kill Elena by biting her under Klaus compulsion. Despite Stefan not feeling anything, Elena was determined to bring Stefan back and get him to turn on his humanity again so that he could feel. This was a huge obstacle and struggle that Stefan and Elena faced in the series. Regardless of how bad or awful things get, somehow, Stefan and Elena manage to overcome the problems, be together happily as if nothing ever happened and come back together as a couple stronger then ever before.
* The Vampire Diaries: The lovely Virginian town of Mystic Falls is a wonderful place to live, with frequent town festivals and friendly locals. The only danger is the frequent "animal attacks", which certainly aren't excuses contrived by its Council and the town's founding families to conceal its recurring vampire problem.
* The Vampire Diaries. The second series centred around a group of characters who had been the main arc villains in the third season of the original show.
* The Vampire Diaries. The veins around their eyes appear to writhe with a black taint.
* The Vampire Diaries. They are both sinfully handsome, with dark hair. And they are both of Italian origins.
* The Vampire Diaries. They are still friends who look out for each other after they broke up.
* The Vampire Diaries. They were childhood friends who began a romance during their high school years.
* The Vampire Diaries, this happens many times between Stefan and Elena.
* The Vampire Diaries this is the best way to kill a vampire/werewolf hybrid.
* The Vampire Diaries, this was Stefan in the beginning. He kept his secret that he was a vampire from others and tried to pass himself off as a regular high school student.
* The Vampire Diaries three people, and it doesn't help that most characters have gotten stuck in love triangles at some point on the show.
* The Vampire Diaries to give her a connection to the living world, and let her cast spells to further weaken the barrier between the world of the living and the dead.
* The Vampire Diaries, to the point where it sometimes seems that Bonnie can't do anything useful (except mind-whammy Damon) without knocking herself out.
* The Vampire Diaries to vampires. It also contains snakes, though possibly only by coincidence.
* The Vampire Diaries: Tyler disappears for one reason or another for large chunks of each season.
* The Vampire Diaries, Tyler is horrified to realize that Caroline slept with Klaus. Made particularly irritating by the fact that the show and Caroline treat this as if Tyler is slut-shaming her and expect you to take her side when Tyler is horrified that Caroline slept with Klaus - the man who killed his mother, literally enslaved Tyler at one point, and has been directly or indirectly responsible for ruining Tyler's life.

* The Vampire Diaries vampires all become stronger as they age, although the difference can be overcome through numbers, surprise, anti-vampire weaponry, or other tactics. The oldest of them, the Originals, get a whole bunch of nifty powers and are next to impossible to kill. When they did manage to take one down, he would only remain dead as long as the magical knife that killed him wasn't removed, and his body remained indestructible.
* The Vampire Diaries: Vampires are constantly entering through Elena's bedroom window, and Matt inexplicably enters Caroline's house through her window in one episode.
* The Vampire Diaries, vampires cannot procreate. This actually comes up when Elena wonders whether, supposing Katherine was her ancestor, she was part vampire. Damon shoots this down and says that if Katherine had any children, it was before she became a vampire. Although Klaus, the Original Hybrid, can have children thanks to a loophole. In matters of procreation, his werewolf side trumps the vampire side. His daughter Hope is a tribrid (vampire, witch, and werewolf) and it's assumed she has the same loophole. Other vampire and werewolf hybrids don't seem to have this ability though.
* The Vampire Diaries were originally the certain endgame of the show in the first two seasons. There has been a dramatic shift to from Stefan and Elena to Damon and Elena becoming the series's endgame ever since the season 2 finale. Damon and Elena are certainly the fan-preferred ship.
* The Vampire Diaries, what with Clarke being the brother of Hope's love interest, Landon.
* The Vampire Diaries when consumed. It wasn't until later in the series that the writers put two and two together and realized that vampires could simply mind control a human into letting them drink their blood, feed them some blood in return, erase their memories and send them on their way without having to worry about getting caught. Once this strategy was established, some characters who should know better (and do, in flashbacks) suddenly look like amateurs in the early seasons, such as Damon making Caroline wear a scarf to hide her bite marks.
* The Vampire Diaries when Elena eventually realizes that she has feelings for Damon.
* The Vampire Diaries when Katherine loses her Immortality after becoming human and begins to age normally. Later, however, when the serum that made her human is drained from her blood, she starts to show signs of aging quickly and is estimated to die from old age in a few months.
* The Vampire Diaries" where he alternately bulges and squints his eyes for emphasis.
* The Vampire Diaries, which he has also played with at some point during the show.
* The Vampire Diaries willing to apologise on his own terms, but when another character requests or demands an apology from him, he rudely refuses, no matter how far in the wrong he is or how much trouble he could save himself and others by just giving in. Klaus Mikaelson is even worse - he is almost never able to make a sincere and non-sarcastic apology, even when he clearly wants to. At one point he basically admits that he wishes he knew how to make other people forgive him, but that he doesn't really know how to go about it.
* The Vampire Diaries, with Rose describing it as being his "special friend".
* The Vampire Diaries with Stefan and Elena. Stefan meets Elena, Elena meets Stefan, they fall in love and the rest is history.
* The Vampire Diaries with Stefan and Elena. This is because Stefan kept his identity as a vampire a secret from Elena.
* The Vampire Earth drink life force through their vampiric avatars, who live off the blood of the victims.
* The vampire Evangeline has been around for hundreds of years, and presumably never reproduced. Although this may have more to do with the fact that she's evil, uber powerful, and scary as hell, as well as the fact that she gained immortality when she was ten years old
* The Vampire Files, Faustine interrupts a squabble between Jack and some Mafia bruisers in the alley behind his nightclub, and tilts the odds in Jack's favor by

dropping her robe in the thugs' view, leaving herself stark naked. Subverted in that, while she succeeds in distracting them, she's very nearly shot in the ensuing crossfire.
* The Vampire Files has employed this trope occasionally, using his vampiric powers to feign a haunting in an early novel and to completely scare the crap out of gangsters in his later, grimmer adventures.
* The Vampire Files has resorted to a heroic version of this to take down gangsters. Justified by his being able to enter locked cars by vanishing, and not showing up in rear-view mirrors even if he goes solid.
* The Vampire Files, he and Bobbi make out when he's standing in front of her dressing room mirror, and notice that his lack of a reflection makes for an... interesting... display when she wraps her legs around him.
* The Vampire Files in the home is contributing to the downfall of civilized society.
* The Vampire Files only discovered that the old speakeasy he bought and converted to a fancy nightclub was haunted after the construction-work was already finished. Fortunately, Myrna the ghost isn't aggressive and has nothing against either the living or vampires like Jack.
* The Vampire Files visible as clouds of mist. It takes quite a few books for the vampire protagonist to discover this, as he's virtually blind when intangible and so can't see whether he's casting any sort of reflection or not.
* The Vampire Files when he rose as a vampire himself. Trying to convince Van Helsing that he only drank animal blood wasn't very effective. In story, his type of vampire is compared to a hunting dog vs Dracula's vicious wolf.
* The Vampire Game was a forum thread being virally posted by one person across multiple forums. The author claimed that the more offensive elements of the original post were the ideas of a relative who strongarmed them into adding them.
* The Vampire Genevieve more deformed than the original, with warpstone having transformed him into something utterly inhuman.
* The Vampire is afraid of fire, but also recoils from both Daoist talismans and Christian holy icons, being unable to use any of his powers in front of a crucifix.
* The vampire Joker, constantly screaming and moaning and even once said the titular line, right before eating a cockroach.
* The vampire Kas was this to Vecna. The attempted coup didn't really work (at least not in the long term), although Vecna
* The Vampire Lestat: After turning his mother, Gabrielle, the nature of their relationship changed from parent/child to hinting they were lovers. There was more subtle subtext when they were still humans, but it got worse after the change. Lestat going on and on about how sexy she looked in men's clothing and them discussing the possibility of vampire sex didn't help matters.
* The Vampire Lestat, Lestat's first vampire offspring was his mother, to save her from death by tuberculosis. She more-or-less gave her consent beforehand and, arguably, took to vampirism better than Lestat.
* The Vampire Lestat, Marius tells the story of how Druids would kidnap the right kind of man, train him, and then sacrifice him to the god of the groves. Which turns out to be a vampire who will make him a vampire for the Druids to worship.
* The Vampire Lestat, the title character joins a Commedia dell'Arte troupe in his pre-vampire days. He plays Lelio, and counts his time as an actor among the best experiences in his human life.
* The Vampire Lestat who put on what they imagined were aristocratic airs, while Lestat came from "a long line of Barons who threw chicken bones over their shoulders" and slept with their hunting dogs.
* The vampire Nora has dark skin but her purple eyes, horns, wings and hair do not help narrow down her possible human ancestry.
* The Vampire of Steel, Buffy is about to be gunned down by a vampire when Supergirl bursts into the place and crushes the gun.
* The Vampire of Steel, every vampire gets turned to dust when staked, whether it's by the heroes or their own leader.
* The Vampire of Steel, Kara confidently dives into a fight to save her new

acquaintance Buffy, confident that her invulnerable body can't be harmed by whoever has ambushed her. Swiftly Kara finds out they're vampires, hence they are able to hurt her.
* The Vampire of Steel: Played straight with Supergirl, and weirdly inverted with Zol-Am, who didn't need to eat -thanks to his Kryptonian metabolism- before being turned into a vampire.
* The Vampire of Steel Projector which was used to banish Kryptonian criminals like himself.
* The Vampire of Steel stops fighting to demand a "Personal Combat Challenge" with the leader Zol-Am, throwing in a "If you're too scared to fight me, I'll understand" line for good measure. When Zol-Am -a military man- points out that kind of duel can only be made by one soldier to another, Supergirl reveals she just enlisted.
* The Vampire of Steel to obtain a piece of Kryptonite. Zol-Am is still vulnerable to stakes, though, provided that the stake is carved from a Kryptonian species of tree.
* The Vampire of Steel whose gelatinous body spreads all over the Sears Tower (which is one of the tallest buildings in the world).
* The Vampire of Steel with basic fighting skills and vulnerability to magical creatures-.
* The vampire potentate for the first part of the series is Lord Francis Walsingham, spymaster to Queen Elizabeth I.
* The Vampire Queen Neferata was far more influential and self-made than her husband, the fairly ordinary King Lahmizzar, and most of the other vampires in her court owed their condition and position to her, not the other way around.
* The vampires Angelus and Spike during the second season. Angelus, the more sadistic of the two, tried to drag the world into Hell, but was defeated when Spike and Buffy teamed up against him. Ironically, Angelus and Spike
* The Vampires Beautiful Daughter: Rebecca is a half-vampire, and has to choose between undeath with her father and vampire friends or a human life with her human boyfriend Johnny. The story is told from Johnny's point of view.
* The vampires can turn into small animals like rats and bats, but also in fog and dust.
* "The Vampires of Venice" are to vampires, only for them to turn out to be not vampires but alien fish creatures. Which the Doctor makes reference to in later episodes as "Sexy Fish Vampires".
* "The Vampires of Venice" at Rory's stag party, and points out she must be cold.
* "The Vampires of Venice" enough to see the Saturnynians teeth, warning the viewer of the danger.
* "The Vampires of Venice" has girls seemingly being turned into vampires, with sharp teeth, burns from sunlight, and no reflections. It's revealed that the girls were turned into fish-aliens with sharp teeth and a sensitivity to sunlight. Their holographic illusions (which let them appear human) couldn't provide reflections.
* "The Vampires of Venice" inverts it: The Doctor looks at himself in a mirror briefly and turns around, only to run into a group of creepy vampire-like girls. He then turns back toward the mirror and does not see their reflection. Subverted in that, far from being scared, the Doctor is fascinated; "How are you doing that? 'Cause I am loving it!"
* "The Vampires of Venice", Rory looks like he's just been hit over the head with something heavy, and dazedly follows Amy right where he doesn't want them to go.
* "The Vampires of Venice". Rory provides another deconstruction when he calls out the Doctor for this: "It's not that you make people take risks, it's that you make them want to impress you. You make it so they don't want to let you down. You have no idea how dangerous you make people to themselves!"
* "The Vampires of Venice": The Calvierri throne is a nice purple-and-gold affair that also serves as the control hub for a weather manipulation device.
* "The Vampires of Venice", the Doctor is so used to this trope that he finishes an alien's sentence when it starts to explain the situation.
* The Vampires of Venice": The Doctor yells at Amy to make her go back to the

TARDIS where she will be safe during the episode's climax.
* "The Vampires of Venice": The "vampires" are actually Saturnynians, fish-like aliens with insectoid exoskeletons.
* "The Vampires of Venice": The villain offers this to the Doctor after finding out he's a Time Lord. He refuses due to awkward interspecies issues ("I'm a Time Lord. You're a big fish... think of the children.") and because she kills people.
* "The Vampires of Venice" they use to appear human "manipulates the brainwaves" of whoever is looking at one, but it doesn't work on mirrors, which show them for what they are. The mind, however, is confused by the two being different, and compensates by simply not showing a reflection at all.
* "The Vampires of Venice" to appear human, and are converting female humans into more of their kind, but whose females don't have breasts in their true form:
* The Vampires of Venice": When the Eleventh Doctor turns up at Rory's stag night and casually mentions that he kissed his fiancée, we hear a beer glass being dropped offscreen.
* "The Vampires of Venice". While the aliens are indeed after our women, by their standards, humans look like food. They're actually converting the women into females of their own species to generate a viable gene pool.
* The vampires themselves have taken advantage of this, by living with a
* The vampires too seem to suddenly have super fighting skills once they get sired.
* The Vampire Tapestry, who remains active for roughly one human lifespan at a time, then goes into hibernation for an undetermined period, always waking as an amnesiac.
* The vampire Teresa in "Phases" in season 2 wakes up in her coffin in a funeral home...
* The Vampire turns everyone they date into a vampire, and those turned can subsequently turn others. At the end of the game, the original Vampire gets half a heart for every player that's been turned into a vampire.
* The vampire twins Vania and Veight, as well as the player (who gets vampirized by them) in the "Memories of the Dark" event in the mobile trading card game
* The Vampire Who Saves Christmas has Santa and his team becoming vampires to combat the Krampus.
* The Vampire with the Dragon Tattoo became a private detective after his drinking led to the death of his son. He specializes in missing child cases in hopes of repaying his debt by saving the children of others.
* The vampirized Durkon is the servant of Hel, who, by having Durkon attend the Godsmoot, where the Gods debate whether to destroy the world to stop the Snarl
* The Vamp, Margaery offers to let Loras help consummate her marriage, implies she's experimented widely herself and strolls right into her brother's chambers during one of his trysts, none of which is even implied in the novels.
* The Vamp Nevan not only ogles Dante but feels his chest up and grabs his handsome face and pulls it towards her when Dante looks away from her.
* The Vamps - "Cheater" is a song about a guy explaining to a girl that her boyfriend has another girlfriend behind her back and that she should be with him instead. Depending on how the lyrics are read, it's also implied that the singer is cheating with the girl behind
* The Vamp: She's lusty and hot and she will seduce you... to your doom!
* The Vampyre. In some universes staked vampires will resurrect if anyone pulls the stake out of their remains before they've decayed to absolutely nothing.
* The Vampyre is still the archetypical vampire. Even then, it is the Dracula in adaptations people think of, rather than the original book character.
* The Vampyre Quest series brings us Silverthril, an alloy of mithril and silver, which is somewhat effective at slaying immortal Vyrewatch. Later on, weapons crafted from the Blisterwood Tree take this
* The Vanaa are a species of adorable jelly blob creatures. However, their cute appearance can be deceiving due to their
* The Van Buren sisters are pretty much put aside for most of the second season to focus on the feud between the cheer squads.

* The Vancouver, British Columbia, public transit system is full of plastic speed bumps on escalator dividers and other banisters specifically to avert this trope, or at least make any attempts painful and not worth it. (With good reason, considering how steep some of the ones downtown are.)
* The Vancouver Canucks have fairly consistently made the playoffs, usually by winning their division, from 2000-01 onwards, but always fall short in the playoffs. Even getting Roberto Luongo, a guy many consider to be the best goaltender in the world, didn't improve their efforts.
* The Vandals fearing attacks from the Huns invaded the Roman Empire searching for a new homeland. They traveled through modern-day France and Spain, being attacked and driven out along the way before crossing into North Africa, taking the Roman lands (including Carthage without a fight) and setting up their own Empire. They then went on to sack Rome.
* The Vandals made a song called "Fourteen", which was about someone falling in love with a fourteen-year-old girl.
* The Vandals' song "The New You", a story of how a guy's love has changed, does this quite horribly:
* The Vandenreich Emperor tore apart murdered two of his Arrancar minions with paper-thin justification. When pointed out that Arrancar were a valuable resource, he simply replied
* The Vandenreich has a similar set-up. They are led by the Stern Ritters who are the most powerful Quincies and have been even further enhanced by the Quincy King's special Schrift. Yhwach himself is the most powerful Quincy. In fact, he is so powerful, he created the Quincy lineage and can therefore not only beat down other Quincies, but steal their power whenever he wants and redistribute it among other Quincies or just keep it all for himself.
* The Vandenreich has Driscoll Berci, the gigantic and overconfident black man who managed to
* The Vandenreich's first invasion of Seireitei decimates the First Division, putting Yamamoto into a state of
* The Van Dorts and the Everglots from are rather untraditional examples: both families are pushing their children into an
* The Vanguard are a society of mages who secretly protect the Coalition States, a society who considers mages the enemy and generally tortures then executes them. The Vanguard pretty much accept this paranoia and protect the CS in spite of it, much along the lines of Merlin in the BBC TV series.
* The Vanguard, the leadership of the Guardians, chose instead to "organize" the Guardians around various incentives to make them want to carry out their missions, mostly in form of
* The Vanic remix of "FML" by K.Flay is much more well-known than the original.
* The vanilla game allows you to obtain the Wedge of Destiny, which is a cheese wheel that for
* The "Vanilla Ice" salute (though he likely didn't invent it), which is the exact opposite of the "Devil Horns"; i.e. the middle and ring fingers are extended while the index and pinky fingers are curled. This is almost identical to Dane Cook's Superfinger, a Strange Obscene Gesture.
* The vanilla Ruin Guard is vulnerable to being shot in its eye by bow-wielding characters. The only time the eye is not vulnerable to its current target is when it turns around to perform its
* The Vanished by Celia Rees has a gang of vampiric children living in the sewers.
* The Vanishing Cabinet gets this treatment twice, first trashed by Nearly Headless Nick to get Harry out of trouble with Filch in
* "The Vanishing Duck" ends with Jerry and Quacker chased away by an invisible Tom, who whacks them with a coal shovel.
* The Vanishing, have a practically supernatural sexual appeal that makes them irresistible to humans. As a result, they don't need to chase or abduct human women or men; the humans tend to seek them out, usually just for a quickie, but sometimes going on to abandon their families to go live amongst the monsters.
* The Vanishing of Ethan Carter and nearly abandoned after a mine shutdown killed

the local economy, giving it an eerie, foreboding atmosphere.
* The Vanishing of Ethan Carter and using his unique psychic insight to solve the titular mystery.
* The Vanishing of Ethan Carter, the protagonist Paul Prospero enters Red Creek Valley only after it's become an abandoned town, and he has no idea what happened.
* The Vanishing Private paints a field cannon with red, green and yellow stripes, and black polka dots. All at once, with a single brush and bucket.
* The Vanishing (The Netherlands, 1988); Both the original and the remake had the same director.
* The Vapors' only entry on the mainstream rock charts hit #39. It must have been "Turning Japanese", right? Nope; it was released a year before the chart was even launched. That one "hit" was "Jimmie Jones", which, like every other song in their discography not named "Turning Japanese", is completely forgotten today. "Japanese" was, however, the band's sole chart entry on the Hot 100.
* The Varangian Guard, Rus' Vikings permanently hired to guard the throne of the Eastern Roman Empire, were noted by multiple sources firstly for their height and secondly for the very large Danish axes which served as their primary weapons. To the Greek-speaking Romans, they were known as
* The Varangian Guard was founded in 988 and recruited from Rus and Viking warriors. After 1066, the majority of the guardsmen were defeated Anglo-Saxons fleeing from William the Conqueror. The last action of the guard was the Last Stand of Constantinople in 1453, making it a
* The Varangian Way tell the tale of Vikings who traveled through Eastern Europe, joined the Byzantine Empire and eventually died in the Battle of Manzikert.
* The Vargheists of the Soulblight armies and the Varghulf Courtiers of the Flesh-eater Courts are vampires who have lost their humanity, devolving into hideous bat-creatures.
* The Varia are elite, if somewhat eccentric, assassins. They're certainly well dressed, and have no problem killing anyone (
* The variant about young girls wearing short skirts makes a significant appearance in
* The variation of baseball used is extraordinarily deadly, however, enough so that high level clerics are kept on hand to resurrect the dead.
* The various activities to do with Shaun that Ethan comes up with in
* The various androids of the Planet Mudd in "I, Mudd." Chekov is enjoying his "harem," except for the fact that they "aren't real girls." They inform him that they are, and that Harry Mudd programmed them to "function as human women." Chekov's reaction? "This place is even better than
* The various antagonist factions and nations in the Universal Century
* The various Anti-Soviet groups (Forest Brethren/Forest Brothers depending on translation from Estonian/Latvian/Lithuanian) in the Baltics in general. Though the Soviets moved in for good in 1944, guerrilla fighters in the woodlands remained active until well after Stalin's death, with pardons issued to
* The various beast tribes also have their own naming conventions. Male goblins tend to have names ending in "ix", while female names end in "ox" (ex. Mutamix and Brayflox). Their names also tend to relate to their personality traits, such as Slowfix Cointoss being a
* The various Black and White Kings are also very active, to the point where there's an entire planet designed just for them to lead battles on.
* The various branches of the Ogg family are constantly mid-feud, a fact that has caused some people to try and feud with an Ogg, which results in the
* The various "businesses" running on the TOR anonymity network. Located in the so-called "deep web" (the part of the internet that cannot be reached by regular search engines), the traders are protected by some of the most powerful encryption softwares publicly available and transactions are done via Bitcoin, a (practically) untraceable digital currency, or other cryptocurrencies. The most famous of the TOR shops are/were Silk Road and The Armory, specializing in illicit drugs and weapons, respectively. If you look a little harder, you can find just about
* The various Chinese dynasties also were definitively in there if you were

looking for them with any regularity. Which just goes to show that "Nazi's" are
* The various citizenry of the Imperium don't have much longer life expectancies than modern-day humans (and, if you're born on a feral world or death world, much much less) but a few of the imperial aristocracy can gain access to bionics and surgeries to extend their lives. Commissar Yarrick has been alive for over 400 years through a combination of life-rejuvenation and bionics, and Colonel "Iron Hand" Strakken has half his body replaced with bionics.
* The various Colleges within the greater University are mostly devoted to various genres of adventure:
* The various conquests of the Malazan Empire are mostly only referenced, chiefly among them the conquests of the continents of Korelri and Genabackis (only the tail-end of which is shown) and the sub-continent of Seven Cities. The latter plays the bigger role in the backstory of the series as it provides the reasons for the Whirlwind Rebellion that happens in the
* The various corporations and megacorporations that run much of the show in
* The various Death Eaters in Azkaban, while established as being fully loyal to their Dark Lord at first and making attempts at Harry's life, slowly grow to be fond of the boy and wind up becoming a
* The various different regimes use different calendars, many of which will be in use at the same time in different places. The nominal "start of game" year would therefore be Realm Year 768; 4878 Dawn of Autochthonia; Year 4999 of Our Everlasting Glory and the Year of the Mouse in the Bronze Era of the 11th Epoch the Dragon-Blooded Shogunate.
* The various factions in Russia after the overthrow of the Tsar, as shown in
* The various factions made up only a small fraction of the total population.
* The various forms of Chinese often sound very fast to Western sensibilities when spoken, and the information density is through the roof as each syllable is often an entire word, but the context of each word can only be drawn from the entire sentence. Because the language is tonal (four different variations to each syllable, each in turn with numerous possible meanings, see also the
* The various gadgeteers (follows the laws of physics) and devisors (considers them more of a guideline) have this as their mutant talent. Ironically,
* The various game mods for either Original or Warband only enhance this. Ticked off by, for example, the latest developments in
* The various gameplay abilities the characters have exist in the lore as well, so in cinematics and comics you’ll see things like D.Va inventing her self destruct Ultimate, Genji countering Hanzo’s Twin Dragons attack with his own, Winston going into Berserk Mode when sufficiently angered, or Reaper’s passive abilities manifesting as him inflicting
* The various gods and demigods from the Age of the Gods era fits the description. In fact, the "physical" is an important distinction between "true" gods and "mere" Divine Spirits, the latter of which is what happens when a god's physical body is somehow destroyed but their essence lingers on
* The various gods of magic have divine artifacts with this sort of reputation. Vecna's
* The various "Good Guy" and "Bad Guy" promo sets (basically random pieces thrown together to sorta make a figure or a bizarre weapon-thing) they would package with battery packs and the like. One of them eventually got canonized as the official toy representation of a certain character, which is more divisive than a clear-cut example of "so bad it's good".
* The various "Great and Bountiful Human Empires" cover multiple galaxies
* The various heroines and villainesses get knocked around quite frequently (though not as much as the male characters). Even Senbei's love interest, Midori, gets boulders dropped on her and temporarily loses a few teeth.
* . The various human characters are shocked to learn that the violence prone Thor is actually rather soft by Asgardian standards.
* The various incarnations of Percy and George in the series. The latter played by the same actor as Bertie Wooster; Hugh Laurie tended to play characters of this type quite a lot when he was younger, which tends to shock American audiences who

only know him in his
* The various incarnations of the "Women's Team". Its ranks include: King, Mai Shiranui, Yuri Sakazaki, Kasumi Todoh, Chizuru Kagura, Li Xiangfei, Hinako Shinjou, "Blue" Mary Ryan, and May Lee.
* The various kennings, two-word poetic names for things, are frequently treated carelessly. E.g. "Beowulf," which translates to
* The various megacorporations themselves, whom Palpatine was manipulating, were planning on selling their services to both sides of the conflict (though they would heavily favor the Separatists)
* The various messengers ("My lord, I bring news!") in the first series of
* The various Naboo royal ships are unarmed luxury vessels designed to transport VIPs in style, and have fairly roomy and artistically designed interiors.
* The various nerd conventions, anime, Star Trek, comic, and what have you, are basically a boiling pan of geeky social life for one full weekend. Does this happen when you get a bunch of people obsessed with various fantastical stories, half of whom dress up, in one place? You better believe it happens.
* The various nobles and their retainers from the New Captain arc, who showed up in a pair of filler episodes later.
* The various one-shots are this for their respective universes, which are given less spotlight in the main Multiversity duology.
* The various Pagan and other non-Abrahamic gods seen in the series are all physical beings with tremendous powers, but can be killed with the right weapons.
* The various philosophical systems of the atevi are numerologically based, so when a new scientific discovery is made their culture spends a long time completely integrating that discovery into their numerologies before moving onto the next thing.
* The various regiments all have different uniforms too, being in different colors and often with completely different styles, and of course their officers wearing something different. On the latter the French Guards are the closest to a standardized uniform, in that their officers all wear the same blue of the troops.
* The various sequel series take this to eleven, with the revelation that the Norse, Roman, and Egyptian pantheons, AND the various monsters and magic that go along with them, also exist. The existence of Jesus is also hinted at.
* The various shopkeeper/hairdresser/other-occupation characters played by
* The various shouts available to the Dragonborn normally are learned by visiting Word Walls dotting the landscape of Skyrim. However, the text of the word walls will change depending on which word in the shout you have, so you will never learn the second or third word in a shout without knowing the one before it.
* The various signs on the way to Don'tgonearthe Castle ("Last Chance Not To Go Near The Castle!" "Don't Go Near The Coach Park!") in
* The various spearmen classes specialize in taking out the horse units.
* The various spinoffs often redesign mechs for the sake of aesthetics, some of which make it back into the artwork of the boardgame and the
* The various Star Destroyer-type vessels are equipped for orbital bombardment; the
* The various Star Destroyer type vessels are equipped for orbital bombardment. The
* The various style cards also all end in "fu". Banana Fu, Clown Fu, Gun Fu, etc.
* The various system maps shown at the front of the books are resolutely two-dimesional. There is no indication in the maps or in the text that multi-system star nations could be three-dimensional, even though this seems quite likely.
* The various tabloid articles on baby rumors, showing photos of actresses who simply look like they
* The various tall tale stories of the United States and Canada include a few giants, such as Joe Magrac, who was a steelsmith in the early 1900s and may be based on a real giant, Stormalong whose ship had to be built on the Sahara, and the famous Paul Bunyan, who had a blue ox that was over 120 ax handles long across the horns, with Paul being so large that according to some stories, his "pillow" was the Rocky Mountains and his feet touched the

* The various teams that compete in the Tournament of Power during the
* The various Titan Shifters are all part of a single unit led by Zeke
* The various troops of Ming the Merciless in the film adaptation of
* The various types of Hags in the game are species that have the attributes of
* The various Ultima (or Celestial) Weapons in the games. Sometimes requires the completion of a really long side quest, or clearing the
* The various universes and timeliness of Franchise/Gundam show space fighters either as predecessors that were entirely replaced by Mobile Suit Mecha or continue to be used as support units for mecha. However in many respects these
* The various Vampire clans are named after their progenitor (or their nickname, such as the case of Abhorash the Blood Dragon). The clans of vampires were in turn created by Nagash, the First Necromancer and the "creator" of both undead factions
* The various vampires and werewolves and other supernatural creatures (except for demons) are all supposed to be taxpaying US citizens. Okay, fair enough. But then Jean-Claude regularly has people summoned to his presence by the expedience of sending a heavily armed thug (Anita) or a powerful vampire (Asher) to retrieve them, often against their will. That's kidnapping. But no one ever thinks to call the cops afterward.
* The various versions of Applejack and Rarity that Twilight makes during the titular "Magic Duel" look like pallete swaps of fillies and various other members of the apple family. This is because
* The various versions of Harrison Wells all exhibit poor social skills, trouble understanding or reading the emotions of others, a very task-oriented mindset, and a tendency to babble at length without realising that they're doing it, which are all traits that are often exhibited by people with autistic spectrum disorders.
* The various western series by William Johnstone and his niece J.A. Johnstone are more likely to feature a
* The various western series of William Johnstone (continued by his niece J.A. after his death) generally, but not entirely, feature bounty hunters in a negative light.
* The various "zombie kills" (especially the "Zombie Kill of the Week").
* The Varnell Hill Show leading to him interrupting a performance by Jodeci in revenge.
* The Varro mate for life, and to ensure this they intermix their body chemistry, causing symptoms of physical withdrawal if a mate leaves.
* The Varsity Club. Originally broke up in 1989, reformed briefly in December 1999.
* The Vartar are described as having similar proportions to a gorilla, having crimson skin, a large cluster of eyes, and they breathe through gill-like structures over their shoulders.
* The Vasari are no slouch in this department either, with the Kanrak Assailant and
* The Vaselines' "Molly's Lips" features a bicycle horn in the chorus. In some live performances they typically get someone from the opening act to sit in on bicycle horn.
* The Vashta and Barka Sultanates are the Turks and Egyptians, respectively.
* The vast Astrometrics display was at least an attempt to bring some three-dimensionality to space; certainly an improvement on the flat-display star charts. And "The Darkling" has an alien using a cylindrical star chart to suggest a possible course for Voyager.
* The Vast at least dozens of innocent people, and make the sadistic joy they take in it perfectly clear.
* The vast majority of arcade games had console versions and even sequels that eclipsed the original versions in popularity. This is rather understandable given the pay-per-play model of arcade business and the fickle nature of video game players means that an operator must constantly rotate and replace its games once certain titles stop being profitable, since you can only have so many arcade cabinets in a limited amount of space. This made less-popular games inaccessible if they failed to attract a playerbase the first time around. Meanwhile, a console game can be enjoyed as many times as possible as long as you had access to the

physical media in some form. The emergence of emulation projects such as MAME, as well as official re-releases on compilations and digital downloads (such as Hamster's Arcade Archives series), has alleviated this issue somewhat.
* The vast majority of battle tanks for all sides are modified versions of that faction's main transport vehicle, swapping out their troop carrying capacity for bigger guns.
* The vast majority of bridges leading out of New Jersey (either east across the Hudson to New York or west across the Delaware to Pennsylvania) are tolled (those that aren't are small ones that trucks wouldn't be able to use). Moreover, all tolls are collected one-way leaving New Jersey in order to avoid perpetual traffic congestion in New York or Philadelphia. In other words, it's free to enter New Jersey but you have to pay to leave it (and it ain't cheap — all six crossings of the Hudson
* The vast majority of characters. In fact, it's easier to list those whose full names
* The vast majority of clones in comic books are rapid-aged, usually to match the cloning subject as part of a villain's plot (such as attempting to fool the heroes with a duplicate). It's tied into
* The vast majority of covers of "Light My Fire" are based off Jose Feliciano's latin version rather than
* The vast majority of D&D games take place at low levels and thus almost inevitably involve the party fight the same groups of low level enemies:
* The vast majority of demons. Ruby is from the 14th century and Crowley is from the 16th, and it's implied that they're young by demon standards, as they're the only known demons young enough to remember having once been human. Ruby herself was recruited by the much older demon Astaroth. The oldest of them, Lilith the First and the Princes and Knights, were recruited by Lucifer himself.
* The vast majority of draenei don't seem to have last names either. However, they seem to make up for it with titles (paladins are "Vindicator [Insert Name]," for example) and sobriquets (such as "Stormglory").
* The vast majority of dramas are shot and set in the Seoul Capital Area. Then again, the metropolis is home to 50% of South Korea's entire population, so it's kind of justified.
* The vast majority of fatal rail accidents avert this trope, as they occur because a train that
* The vast majority of food in the United States undergoes radio-sanitation, that is to say its exposed to ungodly amounts of radiation before we eat it. The process involves moving food under giant slabs of Cobalt-60 and letting radioactive decay do the rest. The reason this is so predominantly used is that its a sure fire way to make sure meat and produce have no harmful bacteria or parasites in them, as no other form of cleaning food can get below the surface effectively. Its also worth mentioning that radio-sanitation has no known side effects as exposing things to radiation doesn't make them radio-active.
* The vast majority of Greek kings and leaders end up reaping the karmic rewards for massacring the Trojans that attempt to seek sanctuary in the temples of the gods.
* The vast majority of home security ads as of late play out as follows: A woman alone or with children is at home when scary looking man loudly breaks in. Alarm sounds. Scary man runs away. Scared woman gets soothing phone call from handsome and
* The vast majority of injuries in fencing are due to folks crashing into each other or twisting an ankle (statistically, fencing is safer than golf). Jackets are worn primarily to reduce bruising and prevent scrapes of tips because being poked repeatedly with stiff bits of metal
* The vast majority of rappers are known only by their nicknames, self-appointed or otherwise. There are notable aversions though, like
* The vast majority of the alien species fall into this trope, with the
* The vast majority of these exceptions are when the story in question was a historical piece; for instance, the Crusades, the French Revolution, the fall of

Rome, the Battle of Hastings, etc.
* The vast majority of the species are named after their homeworld. They do have exceptions, like Humans (Earth), Klingons (Qo'nos), Borg (homeworld unknown as no origin story was ever told for them), the Vorta and Jem'Hadar (both created by genetic engineering)....
* The vast majority of the Tamriellic races and cultures seen to date in the series blend
* The vast majority of wrestlers wrestle shirtless, probably due to a combination of the sweating and
* The vastness of space in the reverse universe is also inverted in color: black stars shine against a white nothingness. (Karla Five even mentions in the novelization that she finds our universe's inverted space maddening to look at.)
* The Vasto of White: At one point, Urahara gets bored and pulls the chalk eraser variant on Rukia. It gets her covered with chalk dust.
* The Vasto of White: Barragan remarks that he finds his human form ugly and prefers his skeleton form.
* The Vasto of White: Several characters think that Lilynette Gingerbuck must be incredibly powerful because other Hollows obey her orders. They only obey her because she is Coyote Starrk's partner; Starrk being the powerful one they actually respect.
* The Vasudans are also governed by an Empire, though it seems to be a fairly benevolent one. It's also specifically mentioned to be a Parliamentary Empire. Indeed, the Vasudans' survival and economic prosperity following the devastation of their homeworld is largely attributed to their current Emperor, who is quite progressive and favors further integration with the Terrans in the sequel.
* The Vatican Secret Archives and the storage areas of the Smithsonian Institution are claimed to be real Government Warehouses.
* The Vatican's recent revelation that the pope is not allowed to be an organ donor, lest someone inadvertently find themselves with an organ that's a holy relic, has led to a bunch of speculation in the science fiction community about what exactly having holy organs would
* The vaudeville catcall "Hellooooo, nurse!" is now forever tied with this show despite it predating the series by decades.
* The Vault Dweller is sent out to do this in order to find a much-needed replacement water chip to save Vault 13. Afterwards he is exiled from his Vault and returns to travelling the Wasteland.
* The Vault energy drink is shown giving the drinker enough strength to dive into the sea and bring up more oyster pearls
* The Vaulters are the descendants of Mezari humans stranded on the planet Augria but were eventually forced to restore their ancient ship to escape when the planet's biosphere began to collapse. When they return during their faction quest the planet is a lifeless ice planet.
* the Vaulters go this route, but going for a blue and yellow scheme where the Empire goes for red and black, and going wide where the United Empire goes for tall. Their ships are clad in thick armour plating, secured to the hull with girders, giving a sturdy and utilitarian appearance.
* The Vaulters (spacefaring viking nomads) build ships that are grey and sturdy in line with the
* The vault final was not expected to end this way, as it seemed like a
* The vault had been cleaned out decades ago (if it had ever been used to begin with), and all that was inside was dust, rocks, and a couple empty bottles.
* The Vault Hunters themselves could be considered a heroic example-they don't work for any of the corporations but for themselves and their friends, and will do anything for money, from delivering messages to
* The Vault of Horror chocolates. He finally snaps and kills her when she finds and spends the money he'd been saving up for a new suit.
* The vault of the Société Générale bank in Nice had a door that was virtually impenetrable. But a group of criminals led by Albert Spaggiari managed to break in — by tunneling into the vault from below.
