* The Side Story arcs in general give characters who don't appear that often/at all in the Main Stories or are only mentioned there, a chance to shine.
* The side story to the episode "Bart Sells his Soul" centers around Moe turning his bar into a family restaurant. He starts to stress out over everything that happens, such as bratty kids (including Ralph squirting him with a water gun and one kid drawing a picture of him as "Uncle Stinky") and people taking advantage of his policy where if he's not smiling when your bill comes, you eat for free. He finally explodes over a little girl telling him that her soda is too cold.
* The sidewalk where Josh ran around in "Dinner With Bobo" is the same sidewalk Carly rode her electric-powered scooter in "iGo Nuclear." It also showed up on an episode of Victorious where Jade and Tori sing in Spanish.
* the Sidhe at every available opportunity) and the fact that no other humans do it

is more because the elves are incredibly dangerous rather than because the humans agree with their declarations of superiority. Clearly an example where the author fully intended them to be annoying even when they aren't being openly antagonistic.
* The Sidhe gets two free dots in Appearance which places most of them in 'Divine Level Beauty'.
* The Sidhe series, by Kenneth C Flint, is a retelling of the legend of
* the Sidhe that constantly seek to invade and destroy the world as we know it. Summer exists as a buffer between Winter and the rest of the world, both supporting the Winter fae in holding back the Outsiders and protecting the rest of the world from Winter.
* the Sidhe. The Queens of Faerie possess outright immortality unless killed at the right place or time — kill 'em, vaporise 'em, whatever, they'll just come back.
* The Siege, although it's likely that Hubbard has gone rogue and is acting alone at that point.
* The Siege and falling into a pool of water, not one drop of blood is found.
* The Siege behind Ileum's walls, where they unbarred the gates, allowing the Achaean army access.
* The Siege Engine is basically a steam-powered battering ram: it deals high damage to buildings, can't attack ground units, and has building-type armor... which is particularly weak to siege-type damage, which all factions' artillery have. Downplayed, in that killing it with normal units is only a bit longer.
* The Siege: FBI Agent Frank backhands Samir, a handcuffed suspect, after he insults him. Hubbard chews him out, while Frank defends himself by offering to tell him what Samir's people (the Palestinians) did to his village in Lebanon (presumably during the Lebanese Civil War, when numerous massacres were committed on all sides).
* The Siege has a slow dance between Hubbard and Elise Kraft at a bar while the FBI team is knocking back drinks following their takedown of the terror cell that blew up a bus. It's cut off when the bar is shaken by the distant rumbling of another terror cell bombing a Broadway theatre off Times Square.
* The Siege in his favor). He would have easily succeeded had it not been for Tywin Lannister's timely alliance with the Tyrells and his fortuitous proximity to the road leading to King's Landing at the time of his defeat at the hands of Edmure Tully. It's even mentioned that his ships were delayed by the winds, meaning that better winds likely would have enabled him to win. Later, Stannis defeats a wildling army in attack, despite being outnumbered 20-1 (his troops are far better trained and equipped, but the sheer ease with which he wins is impressive nonetheless). Currently he's set to pull victory from the jaws of defeat for his numerically superior but massively outmatched force at the Battle of the Ice, most likely by using an ice lake to his advantage against the enemy's heavy cavalry...
* "The Siege of AR-558" ends with the main characters in addition to 10 or so soldiers alive — out of a 150-strong unit.
* The Siege of Baghdad in particular comes to mind; contrary to popular belief regarding
* The Siege of Dollet, in which the part the player sees begins with
* The Siege of Lothal": Kanan mugs a stormtrooper for disguise, and later on Ezra dons his cadet disguise again.
* The Siege of Mantua, from August of 1796 to February of 1797, had a very real chance of being lifted in the third relief attempt. Napoleon was beaten three times already, and the Austrians were on the verge of linking up and allowing for Mantua's relief. However, the failure of the Austrians to capitalize on their successes and their vulnerable supply lines led Napoleon to make his gamble at Arcole, resulting in the failure of the relief attempt.
* The siege of Misrata in the Libyan Civil War. After the chaos of the early war solidified into Gaddafi holding western Libya and the rebels holding eastern Libya, Misrata was one of a few rebel-held settlements in western Libya. Gaddafi's forces laid siege to the town, and given how far it was from the rebel lines, most assumed it would eventually fall. However, despite Gaddafi having things like tanks and

heavy weapons, the people of Misrata held on, becoming a town of
* The siege of Rochester Castle, for example, involved digging a mine under the wall, then slathering it with the fat of forty pigs and setting it on fire. The heat-induced expansion of the stone and the ignition of the wooden foundations caused a section of the wall to collapse. This was amplified and dramatized in
* The Siege of Sarajevo forces surrounded the city in an attempt to make a new Bosnian-Serb state, which the Bosnians were none too happy about. The end result was nearly 12,000 dead, and a city forever scarred.
* The Siege of Spinner Cay, after receiving a book of 101 Fish Jokes from the Vaycaylian Tetra:
* The siege of Syracuse 215 B.C. . What was supposed to be a quick assault turned into a three year siege, credited to weaponizing the wonderful devices of Archimedes. As the biographer Plutarch put it "When, therefore, the Romans came up under the walls, thinking themselves unnoticed, once more they encountered a great storm of missiles; huge stones came tumbling down upon them almost perpendicularly, and the wall shot out arrows at them from every point; they therefore retired.... . At last, the Romans became so fearful that, whenever they saw a bit of rope or a stick of timber projecting a little over the wall, “There it is,” they cried, “Archimedes is training some engine upon us,” and turned their backs and fled." Other accounts also include hidden hooks and pulleys that could tear ships apart if they got too close to the walls and arrays of mirrors used as
* The siege of the Church of Saints Cyril and Methodius in Nazi-occupied Prague. The church was the hiding place of Jan Kubiš, Jozef Gabčík, and a handful of other Czechoslovak resistance fighters who had participated in the assassination of Reinhard Heydrich (who was the highest-ranking Nazi official ever assassinated). The Nazis, enraged, sent a unit of 750 soldiers to the church. Armed with no more than small handguns, the resistance group held off the soldiers' attempts to storm the church for more than two hours, despite the Nazis being armed with machine guns, grenades, and tear gas (there was also an attempt to flood the church which the resistance fighters thwarted). When the Nazis finally broke through, all of the resistance fighters either
* The "Siege of the Crystal Empire" arc (issues 34-37) was entirely engineered by Sombra's mother Rabia in order to free the
* The siege of Troy, told from the perspective of the Trojans in the Aeneid, is an example of this trope, while it is an example of
* The Siege of Wonder takes place on a world divided into scientific and magical power blocs, each of which is trying to use its type of power to defeat the other.
* The Siege on the street shoves the suspect into the van through the open door and then jumps into the van as well just before it speeds away. Although shocked at seeing the guy they were chasing kidnapped by unknown people, at least one of the agents can't help but admire the skill with which it was done.
* The Siege plans to bomb a protest march against internment of Arab-Americans, justifying this by saying it makes an optimal target and they'll be martyrs as well.
* The Siege, released three years before 9/11, was about the FBI dealing with homegrown Islamic terrorists committing bombings throughout New York, starting with an MTA bus, then a Broadway theatre, a school, and the FBI New York office.
* The Siege, that he was against it simply so that he would be in charge of it once it was approved anyway.
* The Siege, the FBI agent investigating a terrorist incident actually arrests the U.S. General whom Congress has appointed to head the handling of that incident. The soldiers supporting the general back down in the face of the FBI, showing the supremacy of the civilian arm.
* The Siege: The FBI hit an apartment where conspirators to the bombing of an MTA bus are holed up. Learning from the building super that they eat pizza all the time, they send an agent ahead of the SWAT team disguised as a pizza deliveryman to drop off a box, which the terrorists take inside. It actually contains a flashbang grenade meant to disorient them when the SWAT team kicks down the door moments later.

* The Siege. The first time, some Islamic terrorists detonate a paint bomb on an MTA bus, and no one gets hurt. This is a warning. The second time, a group of armed individuals take a different bus hostage with real explosives. Hubbard is able to negotiate the release of a group of children from the bus, but the terrorists proceed to blow up the bus just as a group of elderly passengers are being released.
* The Siege: The good guys must hold off an overwhelming enemy threat against impossible odds.
* The Siege, usually involving a Town Boss being held in a city jail, was the climactic event of four
* The Siege was about a terrorist attack against New York City, three years before 9/11. However, the World Trade Center was bombed in 1993, so the film had a precedent.
* The Siege, where Iraqi fighters trained (and abandoned) by the CIA have returned to America for vengeance.
* The Siege with Denzel Washington, Bruce Willis and Tony Shalhoub where a series of terrorist atttacks results in New York being put under martial law, habeas corpus being revoked temporarily, all citizens of middle eastern descent being arrested and the use of torture.
* The Sierra Madre vault itself was also intended to be an example of this: Dean Domino and Vera Keyes had been planning to betray Frederick Sinclair and escape with his gold, so he arranged to trap them both in the vault with the treasure. Neither of them makes it down there, though, but you can lock Father Elijah (the one who's currently trying to crack the vault) inside anyway.
* The Sifl and Olly Show: A bizarre sketch show on MTV consisting of sock puppets and very low production values.
* The Sifl and Olly Show ends with a song, including episodes with overlying plots. This leads to a lot of bizarre and ambiguous endings:
* The Sifl And Olly Show In the teaser to announce that the show was being revived online, Sifl surprises Olly by speaking. Apparently, Sifl hasn't moved or spoken at all in the ten years since the last episode of the TV series.
* The Sifl and Olly Show. Olly had Sifl's mom call their show and tried to get her to tell embarrassing childhood stories about Sifl. She did... except the stories all actually ended up being about something Olly did.
* The Sifl And Olly Show rarely says anything that makes sense, but always says it in the same intonation.
* The Sifl and Olly Show. (The actual on-screen text would debunk these, however.)
* The Sight. Characters often hear conversations about crucial plot details or the meaning of the book's prophecy while trying to hide from them.
* The sight of three Birds-of-Prey decloaking is enough to get Tomalak to back down.
* The Sight: sometimes they were 'deer', sometimes they were 'Herla'. Hedgehogs were occasionally 'brailah'.
* The Signal (2007) features an audio/video signal that has a psychological effect on anyone who hears/sees it, causing people to go insane, or become obsessed with the signal, and trying to make others experience the signal.
* The Signal (2014) All of the staff in the isolation hospital wear hazmat suits, with only their faces visible. At the end of the film, the boss takes his helmet off, revealing that there is only circuitry behind his face. The others are probably the same.
* The Signal (2014), Damon wears a hazmat suit with lighting inside the helmet.
* The Signal (2014) Nic walks with two crutches because of an unnamed wasting disease which he says will eventually put him in a wheelchair.
* The Signal. Although viewers don't report receiving actual messages from the television, they stare at its static for hours at a time, as though hypnotized.
* "The Signal". The titular signal abruptly sends Gumball and Darwin back home to their family, where they all share a laugh, with Gumball and Darwin nervously joining in, before the signal cuts in again.
* The signal to half time is blown while the ball is in play. First half can only

end when there is a stoppage of play.
* The signal was giving him permission to retreat, not ordering him to, and his commander sent it knowing full well that Nelson would ignore it if his situation was still tenable. Still an example, for the attitude if not the action.
* "The Signal", where satellite interruptions start affecting Elmore, because it's inside a TV show.
* The sign at the beginning of the promotional music video "Special" features a sketch of a prototype Johnny that has different-looking eyes, slightly different clothing and what appears to be bolts in his legs, meaning he was supposed to be a toy and not a living being like in the final product. However, the puppet in the video is the final character, so it's likely that Johnny's final promotional artwork wasn't ready yet when it was filmed.
* The sign at the Springfield International Airport says "no crashes since Tuesday", then immediately a plane crashes.
* The signature station ident of the BBC World Service for decades until 2008 was a jolly tune, dating from the late 17th century, called
* The "sign" commercials just have a guy with a sign that says "Drivers who save with Progressive save over $750 on avg." and don't really explain anything other than that.
* The Signet of the Orzhov Syndicates states that if it's worn as a trinket, the bearer is a master. If it's worn as a tattoo, the bearer is a slave. Interestingly, other than this little tidbit, Ravnica as a whole is freed from any sort of caste, with a person from any species or vocation very much welcomed to join another guild or job without much prejudice (well, except from their former guild).
* The sign for the children's ward now reads "WAR", which is kind of apropos since it's run by a militant matron.
* The significantly more evil and demented (if that were possible) Ramsay Bolton as well, who also bears a striking resemblance to perhaps the darkest and most destructive Emperor of them all,
* The Sign of Four. He thinks she's too far above him because they think she has a huge inheritance coming. After they find out she doesn't, he feels free to court and marry her.
* The Sign of Four: Sherlock Holmes' Greatest Case, and the library ransacked: books thrown off shelves, furniture broken, chairs slashed, etc. Presumably the rest of the house is in a similar state but the library is he only room shown.
* The Sign of Four: Sherlock Holmes' Greatest Case: The Tattooed Man is giving Small a shave when he nicks him with the razor. He then claims that it is the fault of the safety razor and that Small should let him have a go with a straight razor. Small is having none of it.
* The Sign of the Four of the people Jones had arrested really was involved, which doesn't change the fact that Holmes had cleared the names of everyone else in that household.
* The Sign of the Four, one of the criminals steps in creosote leaking from a cracked carboy. Holmes sends Watson to borrow "Toby", a homely mongrel with an amazing nose. At one point, Toby is confused when their quarry crosses paths with a creosote-soaked barrel on a hand trolley and follows the false trail, but they take Toby back to the spot where he appeared confused and he once again picks up the correct trail.
* The Sign of Three features this — victims stabbed with a fine blade (fine enough that they do not notice it), and kept from bleeding out by their tight belts. Once the belts were loosened, the victims would begin to bleed out — several hours after the actual stabbing occurred.
* The sign on the door of the Ankh-Morpork Post Office listing the things that
* The sign outside of Camp Campbell is missing the "bell", which either fell off or was destroyed some time ago. Not only does this foreshadow how run-down, minimum budget the place is, but also makes a decent
* The signs were visible even before that, as there are several moments in
* The sign that once read "X-Ray" now just reads "RAY", as though it's a direction to a man named Ray.

* The Sikh martial art, Gatka, teaches the dual-wielding of staffs for the purpose of fending off large crowds.
* The Silence (2019) sends a little girl to the protagonists' hideout, knowing that they'll take her in out of pity, and strap phones under her clothes that are set to activate their alarms not long after the family brings her in, sending the movie's sound-sensitive monsters swarming towards the protagonists.
* The Silence (2019): The vesps — blind, catlike monsters that hunt by sound — have no eyes whatsoever; their heads rise into a smooth, unbroken bony slope above their nostrils.
* The Silence and the Vashta Nerada are also both disturbing. The Silence combine a fairly unsettling costume with a very creative premise (you forget about them the minute you look away) and the Vashta Nerada are a swarm of living shadows who eat victims alive in a split second. In fact, any episode written by Steven Moffat during Russell T. Davies' tenure as showrunner will probably have an original and terrifying villain.
* The Silence are a religious order, who believe that if the Doctor's true name is ever spoken, it will lead to the end of the universe. Knowing that he will be asked "The Question" on the Fields of Trenzalore, where he
* The Silence are creatures whose presence causes amnesia, are a subversion, and downplayed as you forget them as soon as you look away.
* The Silence Ends after her predecessor Commander Azevedo received a medical discharge due to a traumatic brain injury. He apparently recommended her to his captain during a lucid moment.
* The Silence Ends": When listing off Tyria Sark's backstory from her dossier, Henry Wake mentions that she was captain of the Starfleet Academy women's basketball team.
* The Silence from series 6, with their eye-covering eyelids, long faces and lack of a nose and mouth.
* The Silence have eyes, but those eyes happen to be so deep into the sockets that you can't see them.
* The Silence manipulated humanity in secret for millennia and not for good ends. Supposedly they've been trying to
* The Silence of Adultery: After their first kiss, Rachel tries to avoid Michael, leading him to send flowers to her office.
* The Silence of Adultery has the Hillcrest Motel, the site of all Rachel and Michael's trysts after the first, where they rent for three hours at a time.
* The Silence of Adultery, Paul attempts this with Rachel in the morning, but she doesn't have time because she has to get to a meeting.
* The Silence of Adultery, Paul is so busy with his job as a building contractor that he never has time to help with the kids or emotionally support Rachel, leading her to have an affair with the father of one of her students.
* The Silence of Adultery: When Rachel visits the Harvott family home, she sees Michael's autistic son Steven asleep in his bed and pulls the blanket over him.
* The Silence of Bones (author was born in South Korea, lives in Canada)
* The Silence of Bones, such as Queen Regent Jeongsun, priest Zhou Wenmo, and Lady Kang Wan-Suk.
* The Silence of the Hams, agent Joe Dee Fostar flashes a waffle to the prison security.
* The Silence of the Hams: As befits a parody. Dr. Animal Cannibal Pizza is an amiable psychopath played by Dom Deluise, and a practical jokester.
* The Silence of the Hams: At one point, Jo corrects the narrator when he says that Jane stole 400 dollars—it was 400,000 dollars.
* The Silence of the Hams: There's a gag where a midget guard at the prison for mentally insane criminals directs Agent Fostar to a file on Dr. Animal Cannibal Pizza lying on top of a very tall cabinet. Fostar, who's about 6 feet tall, can't reach it, then the guard groans and extends his arm so he can easily grab it for him.
* The Silence of the Hams: This is parodied in the ending when basically every character in the film reveals themselves to be wearing a latex mask (e.g. Antonio's

mother disguising herself as her son, Detective Balsam disguising himself as Lily, Jo disguising himself as Antonio's mother's corpse). It's so prolonged that by the end the characters are placing bets on it.
* The Silence of the Hams: This shows up in a scene when the female lead caressess herself suggestively at a gas station to distract the clerk. The fuel dispenser rises up in response.
* The Silence of the Hams when FBI Agent Jo Dee Fostar consults with Dr. Animal Cannibal Pizza. The doctor is so insane that he sometimes violates the laws of physics.
* The Silence of the Hams where the protagonist is walking through the prison of mentally insane criminals—he walks past a bunch of maniacal, howling lawyers standing in a pit, with a warning sign reading "Don't feed the lawyers".
* The Silence of the Hams (which, confusingly, parodies Fox's name but the MGM logo, with the wolf howling in lieu of the lion growling).
* The Silence of the Lambs: After the Copyright notice and MPAA logo, a logo appears with the text "A Luta Continua" - Portuguese for "The Struggle Continues" ("To be continued").
* The Silence of the Lambs. A good example of this is the "It rubs the lotion on its skin" scene; when his victim realizes there are human fingernails embedded in the walls of her cell from failed escape attempts, she starts screaming. He just starts screaming along in sort of a grotesque parody.
* The Silence of the Lambs and she fires six times at the noise, two or three of which hit him. (In the novel, Clarice’s backstory includes the fact that her father, a glorified night watchman, is killed when he works the action on his pump shotgun, giving away his presence to an armed burglar. Symbolically, she’s avenging dear, old dad.)
* The Silence of the Lambs between the "good" doctor and heroic protagonists Clarice Starling and Will Graham.
* The Silence of the Lambs by Thomas Harris, Clarice Starling has gunpowder burned into her cheek. It's noted that it is placed in a way that the French call 'courage'.
* The Silence of the Lambs came out nearly a decade after Thomas Harris first created the character.
* The Silence of the Lambs Clarice Starling tells Dr. Hannibal Lecter that her father was a marshal. Later on, when she is recounting to him how the man died, Lecter catches enough clues to easily deduce that the man had actually been a night watchman. Starling's defense is that the official job description had read "night marshal".
* The Silence of the Lambs: Count Hannibal Lecter VIII — you heard me, this count eats people. His title is only added in the books, however.
* The Silence of the Lambs despite only appearing for a single scene in an already brief performance. It was bought back for both the sequel and prequel.
* The Silence of the Lambs does this when she's trapped in the serial killer's basement well. She sobs and cries "I wanna see my mommy!"
* The Silence of the Lambs, etc. The only time he ever raises his voice is to make himself heard over a screaming nutter.
* The Silence of the Lambs" flayings suspend the victim by the ankles, and the only ligature marks found on Bill's victims are from the nooses that killed them.
* The Silence of the Lambs Francis "The Tooth Fairy" Dolarhyde sends Lecter a fan letter (of sorts) written on toilet paper because, he says, "it will dissolve very quickly if you have to swallow it."
* The Silence of the Lambs had a nice spacious basement with rooms for raising moths, sewing human skin, and keeping screaming kidnapped ladies.
* The Silence of the Lambs. Hannibal Lecter is lying on a gurney in an ambulance with the face of a murdered police officer covering his own face. He sits up behind a paramedic, pulls off the false face and... We don't see what happens next, but we learn that he killed everyone in the ambulance.
* The Silence of the Lambs: Hannibal Lecter typifies this trope like no other; a cultured and refined genius as well as a homicidal cannibal. Some of his more

cultured actions include his charcoal drawings of Florence that he uses to decorate his cell (done from memory), killing and eating an untalented flautist in the Baltimore Symphony Orchestra to improve its sound, and listening to Bach's "Goldberg Variations" while removing a man's face. His conversations are rife with references to classical works from Shakespeare to Marcus Aurelius, and much more. Wine-lovers note how his "nice Chianti" is a rustic choice for such a sophisticate (only in the film; in the book it was an Amarone). This combined with his mispronunciation of the name suggest to some that he's being facetious and is further mocking Agent Starling's rustic roots.
* The Silence of the Lambs has the FBI preparing to raid Buffalo Bill's house by having an agent disguised as a flower delivery guy ring the bell. (It turns out to be the wrong house.)
* The Silence of the Lambs have outright said that it's horror and that the score was composed with this in mind.
* The Silence of the Lambs, he compliments her (during their final phone call) on how lovely she looked in her blue suit at her graduation ceremony. She almost faints at the realization of how close he was.
* The Silence of the Lambs. He's a minor character in the novel (and in the film he's on screen for only fifteen minutes or so), and yet he drives the plot forward on several occasions all by himself. (Amusingly, Anthony Hopkins set a record by winning the Best Actor Oscar in the shortest amount of screen time.)
* The Silence of the Lambs. He's got pictures of butterflies all over the place, swastika quilts, and dead people. He also has a collection of newspaper clippings regarding his exploits, plastered on the inside of the door of a large cabinet. Directly in front of it is his in-progress woman suit, which is substantially freakier.
* The Silence of the Lambs, he talked Mason Verger into cutting his own face off. Admittedly Verger was high at the time.
* The Silence of the Lambs, however, the series has become better known.
* The Silence of the Lambs implications of her sleeping in and thus needing to share a shower with her roommate, she realizes that Dr. Chilton hits on her because he's socially inept. In contrast, one of the entomologists asks her on a date because he really does like her, and it's implied she'd be tempted but for, y'know, the serial killer on the loose.
* The Silence of the Lambs. In search for Lecter, the police find an already empty elevator.
* The Silence of the Lambs. In that interview, he explained that his books sold well even though he didn't grant interviews, so he didn't grant interviews.
* The Silence of the Lambs In the movie the other officer is partially skinned and strung up on the bars of Lecter's cage to resemble a butterfly. Not only is this a reference to two important elements of Buffalo Bill's M.O., it is also a reference to a Francis Bacon painting.
* The Silence of the Lambs is depicted with maroon (brownish-red) eyes in the books.
* The Silence of the Lambs is probably the most famous example of this trope.
* The Silence of the Lambs, it does seem much likelier that Demme, Foster, and Tally might have all returned alongside Hopkins.
* The Silence of the Lambs, Miggs, the prisoner in the cell next to Hannibal Lecter's, masturbates and flings his semen on Clarice Starling. It's this unforgivable "rudeness" that compels Lecter to aide Starling.
* The Silence of the Lambs more intense when his latest victim to be abducted turns out to be the daughter of a U.S. Senator. There's never any indication that he knew who Catherine Martin's mother was, she just had the right body-type for his sick purposes.
* The Silence of the Lambs puts it) tastes. He shops at exclusive high-end stores and wouldn't miss a good opera for the world. He prefers to eat the rude.
* The Silence of the Lambs receiving a significant amount of complaints and being one of the titles to create the in-between rating of MA15+, which the movie was rerated to on a 2001 rerelease.

* The Silence of the Lambs refers to Starling being haunted by the memory of lambs screaming as they were slaughtered, and Lecter's suggestion that saving Catherine Martin might help put an end to that.
* The Silence of the Lambs reveals that someone is on the ceiling once a drop of blood falls.
* The Silence of the Lambs reveals the police squad followed a false lead, but the main character actually confronts Buffalo Bill and follows him into his own booby-trapped lair.
* The Silence of the Lambs, serial killer Buffalo Bill enjoys hunting his victims naked in his darkened basement, and does so when going after the hero, Clarice Starling.
* The Silence of the Lambs series. Anthony Hopkins based his performance on HAL 9000.
* The Silence of the Lambs series it is said that, while in prison, Hannibal Lecter often lives in the memory palace he has built in his mind.
* The Silence of the Lambs starts with some blood falling from the elevator's ceiling and hitting a cop in the face.
* The Silence of the Lambs; the narrator doesn't tell us Clarice Starling is beautiful, but comments from side characters do, and in a way that is nearly as blatant as if they came from the narrator. For example, when accompanying Crawford to a medical examination, two other cops watch her go in. One says that she doesn't look half as good as she thinks she does, the other replies that if she thinks she looks pretty damn good, he'd agree with her. These two people don't come up again, and literally their sole purpose in the text is to inform the reader that Starling is good-looking, a fact about her that serves no relevance whatsoever to the plot of the book or her job as a talented but inexperienced FBI trainee.
* The Silence of the Lambs, the obnoxious and abusive head of the institution in which Lecter's incarcerated, is by publicly pointing out that Chilton doesn't actually have an MD. However, Lecter's disdain for Chilton is not simply because of this (he holds most "real" doctors, as well as the rest of the world, in total contempt) but more due to Chilton's mistreatment of him and Chilton's mistaken belief that he's as clever as Lecter.
* The Silence of the Lambs via quietly approaching them from behind and suddenly saying "good morning" when they didn't expect it.
* The Silence of the Lambs. ("Well, Clarice, have the little lambs stopped screaming?") The book had Lecter send Clarice a letter, instead.
* The Silence of the Lambs when Hannibal Lecter contrasts Clarice Starling's "good bag and cheap shoes".
* The Silence of the Lambs, where an imprisoned Hannibal Lecter somehow talks his fellow inmate, "Multiple" Miggs, into committing suicide by swallowing his own tongue. Lecter is very mad at Miggs for acting inappropriately around Clarice. There is also mention made of a past incident of Lecter attacking a nurse and eating her tongue, among other damage.
* The Silence of the Lambs, where Hannibal is transported from his usual maximum-security cell by being chained inside a straightjacket, wheeled around on a hand truck, and wearing his iconic mask.
* The Silence of the Lambs: While Hannibal Lecter is the antagonist of the film, he informs Clarice on another serial killer named Buffalo Bill.
* The Silence (or Silents) could partially qualify; as they lack most facial features, save for two bulbous eyes, and a slit for a nose.
* The Silence (presumably deliberately) give this impression. Up close it starts to look like it's actually their skin, however. That or they haven't heard of dry cleaning. Or the Silence planted the idea of wearing suits in our head. That's why suits are considered as classy because that's what the Silence's body looks like.
* The Silencer, protagonist Honor Guest is a retired assassin formerly employed by Leviathan.
* The Silencers. She took the gun and fled. When she was later confronted by another guard, she pointed it at her own chest. The guard, thinking she was about to commit suicide, said "You don't have to do that." She replied "I must" and

pulled the trigger, killing him.
* The Silencer starts with the protagonist threatening someone with a gun in a diner, and the first arc tells how things got to that point.
* The Silent Age of Animation: Covers Animation history from the early 1900s to the late 1920s.
* The Silent Age of Hollywood through the late '40s, portrayed not only characters of African descent, but also American Indians, Mexicans, Arabs, Polynesians, and at least two Eastern Europeans, often using makeup of his own design.
* The Silent Bob: A character doesn't talk, but has no difficulty in making others understand them.
* The Silent Bob: A character who never talks, but can hold an entire conversation without saying a word.
* "The Silent Cartographer" has the semi-famous "Squally's Jump." When you go back to the door you unlocked there's a ledge that triggers a cutscene showing off the near-bottomless pit. To the right, you can see the side of the complex you would be fighting through, and on the bottom floor, you can see an
* The Silent City. Justified in the narrator's case since no one officially addresses her. Taken to absurd levels with the mayor due to an exchange where he could reasonably expected to give his name and doesn't:
* The Silent Deep: The Royal Navy Submarine Service Since 1945 by James Jinks and Peter Hennessy notes that it is surprisingly easy for subs to crash into each other, despite having a whole ocean to play around in. Sub A learns that Sub B is nearby, and tracks it using passive sonar. Passive sonar gives good directional information, but range is little more than educated guesswork based on how much noise one expects the target to be making. If Sub B is quieter than Sub A thinks, then it is possible for Sub A to run right into it. Active sonar gives accurate range, but the ping is a dead giveaway.
* The silent generation also live through these two events, but with the added misfortune of these events happening during their childhood and adolescent years. Like with the greatest generation, they also at least get to live through the aforementioned economic expansion during their adult years.
* The Silent Partner. A bank clerk steals money during a robbery, allowing the robber to take the blame. The robber doesn't like it.
* The Silent Partner centers around a bank teller taking advantage of a botched bank robbery to steal some money himself and pin it on the robber, only for the robber to decide that if he's been accused of stealing the money, he might as well get it for real.
* The Silent Partner involves a mall Santa who turns out to be a bank robber...and then gets caught up in dueling gambits with a teller at the bank who wants to keep the loot for himself.
* The Silent Partner, psychopathic bank robber Reikle disguises himself as a mall Santa so he can pull off a bank robbery and case out the joint undetected.
* The Silent Partner, which is about two thieves engaging in a battle of wits over who gets to pull off the heist.
* The Silent Sea, the totalitarian villains are actual Argentineans — the country has been taken over by fascists in-universe.
* The Silent Stars Go By that isn't in the manual, unfortunately, is "unguidely" and therefore an abomination.
* The Silent War aren't signs of insanity. While there are human sorcerers and undead to deal with, demon-slaying is essentially the day job.
* The Silent War, don't age nor suffer sickness or infections. Protagonist Katja is still only a teenager, but her mentor is her 130's (and apparently considered something of a teenager herself, by the true elders).
* The Silerian Trilogy: After the Valdani leave, Sileria's factions devolve into a power struggle between the Alliance and shallaheen versus the various water lords.
* The Silerian Trilogy, and once the empire leaves, the newly free country falls into civil war.
* The Silerian Trilogy at the scenes of attacks against waterlords which implicate others, setting them against each other.

* The Silerian Trilogy: Guardians have the ability to call up spirits of the dead from the Otherworld on people's behalf. Doing so requires having something personal of theirs, and it can be difficult to reach some. Not all spirits are able to be called either, with some just never making it there. This doubles as pyromancy, since the spirits appear in the flames of a fire.
* The Silerian Trilogy in terms of her sexual habits (yet with different motives).
* The Silerian Trilogy: Sileria has been torn apart by clan warfare for most of its history, with it explicitly being stated as the major reason they stayed unable to unite against their foreign rulers. Later, this is used to the rebels' advantage, by having a blood feud sworn against the Valdani, as if they were just another Silerian clan.
* The Silerian Trilogy: Suicide is anathema to Silerians. When some Silerian men are imprisoned, they find it ludicrous that the Valdani took steps to prevent them from hanging themselves.
* The Silerian Trilogy: Tansen wields two swords, and the difficulties with this are explicitly stated. Those who do it need special training-he recounts seeing a Valdan noble cutting himself apart trying to once.
* The Silerian Trilogy: The Beyah-Olvari are naturally pacifists, and live in perfect harmony (albeit hiding underground) together.
* The Silerian Trilogy: The rebels under Josarian free the slaves in Valdani brothels, not so much out of an anti-slavery sentiment as to hurt their morale (which it does, badly). Even so, the slaves are sent home. However, privately Elelar wonders if anything except disgrace and poverty wait for them there.
* The Silerian Trilogy: The Society in regards to Dar. Although they acknowledge she exists, none of them worship Her.
* The Silerian Trilogy: The Valdani Empire, which strongly resembles Rome. An expansionist power, they are trying their level best to conquer everyone around them. Though the story itself focuses on Sileria, an occupied island country to their south, wars they wage against larger neighbors are also important in the background. One Valdan character thinks about how they desire to conquer the world, which he desires a part of. However, it's heavily implied they have taken on more than they're capable of by the end, and may go down in defeat on the mainland.
* The Silerian Trilogy: The Valdani oppressed the Silerians for centuries while ruling Sileria, up to massacring entire villages. Once they withdraw, Valdani who remain behind there are then massacred in turn by Silerians.
* The Silerian Trilogy: The Valdani start using terror tactics as the rebellion increases, leading to entire villages being destroyed and the inhabitants slaughtered by the end. They also did this to Tansen's village before while hunting Armian. Later, Silerians take revenge on the Valdani left in the country with the same means.
* The Silerian Trilogy: The water lords essentially rule Sileria in part due to their control over its water supplies. Even the official rulers have to give them tribute or they'll cut it off. Once the Valdani leave, their goal is absolute rule of the island.
* The Silerian Trilogy: Zimran and Elelar both frequently have sex with people. In Zimran's case, it's simply for pleasure. Elelar though only seduces powerful men to gain useful information, taking no enjoyment from it.
* The silicon chips inside his computer churned the physics problem over, and came up with the grim answer: his love interest's breasts were probably made out of silicone.
* The Silicon Graphics cube, symbolic of its onetime preeminence in 3D graphics. The company's decision to drop this logo coincided its decline from relevance. (They eventually reversed course.) Deliberately imitated with the cubed N logo used by the
* The Silithid are a hive-dwelling race with a great deal of internal variation (or possibly several sub-species) to fulfill different roles. The
* The Silkie. Although the Silkie continued to perform for another three decades, they never had another chart entry anywhere in the world.
* The Silk Man, another survivor of a previous Creation, possibly the same one as

the Jin En Mok, possibly not.
* The Silk Road, Dentsu and Marubeni (Japan) in association with various Chinese companies.
* The Silkspinners resource is silk, and they have grown to hate it and long for other treasures. He is easily able to convince them that should they return to society, they will be able to trade the silk for other commodities, and learn to love their craft again.
* The Silkworm - given how many grudges there apparently are in the London writer's community, it's a surprise there's only one murder. One such author notes that if you want a profession with lifelong camaraderie, you should join the army and learn to kill people; if you want all your contemporaries to hate your guts, write novels.
* The Sillymarillion. Now imagine what the part listing all the characters in the different family lines sounds like...
* The Silly Will cannot be said to be written by someone "of sound mind".
* The Silmarillion, after betraying the city of Gondolin in return for its princess Idril, Maeglin tries to clean up the loose ends by killing her husband Tuor and son Eärendil.
* The Silmarillion: After the Noldorin Elves led by Fëanor have crossed over from Aman to Middle-earth on the ships they stole from the Telerin Elves, Fëanor orders them to burn all the ships. He does this to prevent any of his followers from returning to Aman, but also to make sure they cannot help the rest of the Noldor who follow Fëanor's brother Fingolfin get to Middle-earth.
* The Silmarillion, "Ainulindalë", is the creation story of Middle-Earth.
* The Silmarillion all but disappear from the narrative for long stretches of time, only occasionally rearing their heads to interact with other elves. We know next to nothing about the kingdoms the established in Eastern Beleriand, or even what their particular followers were like. Which is strange because their father was a major character in the early book. Eventually they do come back into focus towards the end, when they begin to commit further Kinslayings in pursuit of the Simarils.
* The Silmarillion allowed to return to life, because according to the laws of the Valar Finwë can't have two living wives at the same time. After he is later murdered, this leads him to give up his chance to come back to return Míriel to life.
* The Silmarillion, allowing them to depart from the world early and go on, presumably returning to existence beyond Middle-Earth, while the Elves are stuck on Middle-earth until its end, thus resulting in their growing wistfulness and melancholy as they see the world around them changing and decaying. Death also allows Men greater defiance of Fate.
* The Silmarillion also has the Doom of Mandos (whose domain is sort of a combo of Death and Fate).
* The Silmarillion also includes a map, although there was at least one other, quite different, version Tolkien created for Beleriand besides the one actually published.
* The Silmarillion. Also, Mandos lays a Doom on the Noldor who seek the Silmarils, and anyone who gets involved with them, including the Sindar, the Dwarves and Men.
* The Silmarillion also mentions Nargothrond's Noldor under the confusing appellation "deep elves" — it refers to their "deep" knowledge rather than an established habit of living underground, which no elves demonstrate.
* The Silmarillion, and for no particularly valid reason curses his son Maeglin to die the same way.
* The Silmarillion, and since the world itself is the source of all evil because of him, he cannot die unless the world is unmade.
* The Silmarillion and stealing a Silmaril), no doubt hoping he'd give up or die, which of course completely backfired in horrible ways for generations to come. (Don't mess with the Silmarils. Seriously.)
* The Silmarillion, and swearing/making his sons swear an oath to reclaim the Silmarils whatever the cost. This has nothing to do with Morgoth's corruption of the Elves, since Fëanor never trusted him as far as he could throw him; he

does this all on his own.
* The Silmarillion: Arda, the world the books are set in, was originally flat. It was reshaped into a sphere by Eru Ilúvatar to prevent humanity from attempting to sail to Valinor.
* The Silmarillion: Arda was created as flat world floating in a vast ocean like a giant ship, and was made spherical only after the sinking of Númenor.
* The Silmarillion, attacked Valinor, causing him to destroy Numenor and make the world round, meaning human vessels couldn't reach Valinor.
* The Silmarillion at the end, and states that Frodo destroyed the One Ring. This is not exactly accurate, as the Ring is destroyed more or less by accident after Frodo succumbs to the Ring and fails to destroy it. That being said, Frodo still deserves credit for getting the Ring to the spot where it can be destroyed, and Word of God has stated that no one has enough willpower to willingly destroy the Ring regardless.
* The Silmarillion became too complacent and that was one of the major contributors to Numenor's downfall
* The Silmarillion, Beren comes to the conclusion that Morgoth can't be defeated and his world can't be Unmarred, but it's irrelevant because his cause is worthy, even if hopeless.
* The Silmarillion body being pinned to a tree for her rescuers to find. And after the Battle of Unnumbered Tears, the bodies of the fallen Men and Elves are piled up into a hill as a monument to Morgoth's victory. There's also a thwarted example. After (narrowly) killing Fingolfin, Morgoth ordered his werewolves to tear apart his body and eat it, only for Thorondor to swoop in and carry Fingolfin's body away to where it could be properly honored.
* The Silmarillion. Both sides try to use this trope: Maedhros brings a large party to the appointed place, but "Morgoth sent the more and there were Balrogs" and so overpowered him.
* The Silmarillion by J.R.R. Tolkien, The song is called The Fall Of Gondolin.
* The Silmarillion came along and undid their work. The end result was that the world was very gradually formed.
* The Silmarillion, came along. For reference, she's so powerful that she can hide herself and Morgoth (Sauron's master) from the Valar. She is able to kill the Trees of Light by drinking their sap. Then for the finale, she captures Morgoth and it takes several Balrogs to free him. If there's ever an adaptation, there's going to be a lot more arachnophobes in the world.
* The Silmarillion Dark Lord after his handsome body died in the fall of Númenor.
* The Silmarillion decided to have Gandalf and another Balrog do the same (some 7,000 years before, in-universe).
* The Silmarillion deserves an honorable mentionfor killing Gil-Galad and the Dunedain king Elendil during the same battle.
* The Silmarillion details the conflict between Sauron and the good guys during the Second Age. Sauron had come close to defeating the Elves when the armies of Numenor arrived and wiped out Sauron's forces. He never forgot this, and when he re-emerged hundreds of years later, he allowed himself to be taken prisoner and brought to Numenor, where he quickly talked his way into the King's inner circle and corrupted the leaders, leading to Numenor's utter destruction when the Numenoreans were convinced by Sauron to attack the gods themselves.
* The Silmarillion die permanently from the world, and that their "underworld" is sort of a penalty box.
* The Silmarillion, dwarvish helms apparently were like these. One of these helms becomes significant as the signature item of the hero Túrin Turambar.
* The Silmarillion each with its own company of full-time guards. Passing those gets you into the valley; the city itself sits on a hill in the middle of that and has walls and defences of its own.
* The Silmarillion, Elves and Valar live together in Valinor. One of the Elven kings marries Melian, one of the more powerful of the Maiar (around the level of Sauron).

* The Silmarillion ended up taking over the brutality and violence of war and Tulkas became a God of strength and of fighting against evil capable of creating as well as destroying.
* The Silmarillion, Eru Ilúvatar is much like the Christian God, but the way to worship Eru is very different from Christianity.
* The Silmarillion. Every last atom contains a minuscule fragment of his spirit. Hence why evil endures even though Morgoth was thrust out into the Outer Dark by the Valar: "the whole world is Morgoth's Ring."
* The Silmarillion example of this trope in Finrod Felagund but also features an illusion-magic duel! Finrod is using an illusion to try and sneak through Sauron's base of Tol-in-Gaurhoth. However, as he fails to report to the orc captain, he is apprehended and brought before Sauron. Sauron realizes that he's not an orc, and so attempts to strip off the illusion. Finrod puts up a good fight, but loses in the end. Of course, neither Finrod nor Sauron use illusion-magic exclusively.
* The Silmarillion fan fiction, the two greatest Elven musicians, Daeron and Maglor, are still assumed to be in the Hither Lands, and often presented as rock musicians.
* The Silmarillion: Feanor has seven sons, which is remarkedly unusual for an Elf.
* The Silmarillion fear water, because of the presence of Ulmo, the one Vala who remains in Middle-earth.
* The Silmarillion features the Siege of Gondolin, except unlike the above examples, Morgoth's forces succeed in taking the city, with only a remnant of its population escaping.
* The Silmarillion. Fighting him, for an Elf or a Man, is a losing proposition.
* The Silmarillion, Finrod Felagund breaks his bonds, then kills a werewolf bare-handed (though he does die as well).
* The Silmarillion, Finrod Felagund disguises himself, Beren and their companions as orcs, probably by singing (which is how Sauron later strips them of their disguise). A little later, Lúthien turns Beren into a werewolf and herself into a bat-like creature.
* The Silmarillion, fleshing out and expanding on tales and events referenced in the previous work.
* The Silmarillion frees him, and he resumes kicking ass with her help.
* The Silmarillion game from having units of Rivendell Uhlans, which serve as the Elves' light cavalry.
* The Silmarillion happened and no one present besides him knows about it yet).
* The Silmarillion has his most famous love story, Beren and Luthien. He's a mortal man, she's an immortal elf. Her father couldn't keep them apart. Sauron couldn't keep them apart. Morgoth couldn't keep them apart. Not even death itself and the Valar could keep them apart. In Tolkien's work, elves and men had different fates after death; elves would go to a Hall in the Undying Lands and eventually be resurrected, while men would leave the world entirely to places unknown. When Beren died, Luthien died of grief soon after and sang a song of such sorrow that Mandos, who judges over the souls who come to his Halls, was moved to pity for the first time in his life. So he gave Luthien a choice; be resurrected and live among the Valar, forgetting Beren and her grief, or she and Beren can return to life and live together, but she will become mortal and leave the world with Beren when she dies, separated from her family forever. She chose the latter.
* The Silmarillion has Oromë's wild hunt, in which he and his Hounds range over the hills and woods of Middle-Earth, hunting orcs and demons.
* The Silmarillion has the Darkening of Valinor, the Oath of Fëanor, the Kinslaying at Alqualondë, the ships burning at Losgar, Fëanor's death, Maedhros's capture, the Battle of Sudden Flame, Fingolfin's duel with Morgoth, Beren and Lúthien's adventures, and the Battle of Unnumbered Tears. Most fix fics generally wipe the Kinslaying and burning of the ships from history, but despite the significantly better political situation this causes various tragedies still occur.
* The Silmarillion have really annoying younger brothers. Well. Not so much annoying as liable to start a war with everyone, including their own family and

supposed allies.
* The Silmarillion heroes like Tùrin Turambar are given great burial mounds. In "The Akallabêth" Númenórëans start to build great tombs for their dead after their decline and fall to pride.
* The Silmarillion his enemies and ensured his eventual takeover of the whole of Beleriand. While the surrounding plains were reduced to a poison-choked wasteland, the hill itself became the only verdant place for miles.
* The Silmarillion humans are made last by the Valar. First Iluvatar made the Valar (demigods), one of which made the dwarves before Iluvatar had planed to awaken the elves, so Iluvatar told the Valar to keep the Dwarves in hibernation until he had released the Elves. Only once those two races had existed for a long time did Iluvatar finally create or awaken Men. They have the least life-span of any race of Middle Earth (Hobbits and Dwarves make it to the hundreds, Elves on forever) and are seen to be coming into their own only in the third age.
* The Silmarillion in 1914. After his death in 1973 it still wasn't finished, so his son Christopher Tolkien continued working on it and it was finally published in 1977.
* The Silmarillion. Indis loved Finwë from afar even before he married. After he visits her when his first wife dies, she openly declares her love for him.
* The Silmarillion in the afterlife, at which point Lúthien out of love sings a lament over their fates, the suffering of Men and Elves at Morgoth's hands, and the prospect of spending an eternity without her love. This gets averted when her song moves the unmovable Mandos to pity, and he personally pleads their case to Manwë. Beren and Lúthien are allowed to return to Middle-earth to live out their lives together as mortals, and when they finally die their second deaths, pass from the world along with the rest of the race of Man.
* The Silmarillion is an intelligent, immortal wolfhound the size of a horse. He also helps Luthien escape from his former master Celegorm, who captured her when he found out she was on a quest to find a Silmaril, and afterward helps to slay Carcharoth, the werewolf who ate the Silmaril (along with Beren's hand). However, it was prophesied that Huan would only be killed by the greatest werewolf ever to live, and so even though he killed Carcharoth he died in the process.
* The Silmarillion is a rare good example. As the judge and the overlord of the realm of the dead (dead elves anyway) empathy would get in the way of his job.
* The Silmarillion is front-loaded with exposition, despite only being published as one book. Much of this is aimed at literally building the world of Middle-earth, but several chapters are devoted to the origins of minor figures. In this "History of the Silmarils," it's not until midway through the fifth chapter that the eventual creator of the Silmarils is even introduced.
* The Silmarillion is full of this, Nírnaeth Arnoediad (though not final, both sides build up for a confrontation and the good guys gets wiped to never assemble a credible threat against Morgoth again while Beleriand becomes as dark and edgy as something out of the Norse mythology Tolkien so liked). Then it gets worse... finally the Valar sends Eönwe with the armies of Aman to subdue Morgoth in a cataclysmic battle destroying Beleriand. There are several instances of the Valar and Morgoth battling it out before the arrival of The Children of Ilúvatar.
* The Silmarillion, is helped by forest animals to avoid capture by Morgoth's troops, and converts to vegetarianism out of gratitude. Luthien is also an example. Her (supernatural) charisma also works on animals.
* 'The Silmarillion is prose, it goes into poetry for about a page to describe it. Unfortunately, Sauron wins "and Finrod fell before the throne".
* The Silmarillion, is said to be the tallest of all the Children of Ilúvatar, though his exact height is never given. Also among the tallest elves are Turgon, King of Gondolin, and Maedhros (called The Tall), eldest son of Fëanor. Galadriel is said to be the tallest elf-woman, equal with Celeborn.
* The Silmarillion is the brother of Mandos, the judge of the Valar who has the best understanding of fate and the future.
* The Silmarillion is thus also not left in doubt. Everyone has expectations for

Lúthien, everyone is trying to limit her or get her on their side: everyone except Beren.
* The Silmarillion is to tear down the world until it is reduced to the original primordial void.
* The Silmarillion is wandering alone in the forest of Doriath and nicknames her Nightingale; he "fell into an enchantment", embraces her, and they fall wordlessly in love.
* The Silmarillion) like Gandalf aren't stock fantasy wizards so much as a group of minor gods (the same kind of being as Sauron and the Balrogs).
* The Silmarillion. Luthien chose becoming mortal to remain with Beren forever, even though it meant that she would get sick, she would get old and pass away, and remain apart from her kin forever.
* The Silmarillion, Luthien wears a magical jet-black cape which serves as a spell-booster.
* The Silmarillion, Maedhros and Maglor receive one from Eönwë, after they, being the last surviving sons of Fëanor, demand the remaining Silmarils from him. Eönwë tells them that they no longer have any right to the Silmarils, and gives them a chance to return to Valinor and be judged by the Valar for their crimes. Maglor wants to go and tries to persuade Maedhros, but Maedhros refuses, and in the end persuades Maglor to go along with his plan to steal the Silmarils from Eönwë. Needless to say, it doesn't end well for either of them.
* The Silmarillion, Maedhros fills this role, keeping his nastier brothers in check (for the most part).
* The Silmarillion (Maedhros tortured and chained to the side of a ravine, Hurin forced to watch as his family's lives went to Hell...)
* The Silmarillion, meaning "master of doom". But ultimately he can't, and his attempts only lead to more tragedy.
* The Silmarillion mentions a plague apparently sent by Sauron to weaken Gondor so he could regain control of Mordor.
* The Silmarillion: Middle Earth's First Age is full of Elven Lords and Human Heroes. Just to name a few:
* The Silmarillion Morgoth has committed genocide and countless betrayals and seeks nothing less than the subjugation of Middle-Earth under his absolute dominion. But the narrative goes out of its way to call out his desire to rape Lúthien as "a thought more wicked than any he had before conceived."
* The Silmarillion, Morgoth inflicts this on a captured human warrior as punishment for defying him and not submitting to his will. locked in to his body, he then, via Morgoth's magic, gets to watch the terrible fates of his son and daughter played out over a period of years.
* The Silmarillion, Morgoth takes Maedhros hostage and suspends him by his right wrist over a precipice of Thangorodrim. The rescue of Maedhros involves amputation.
* The Silmarillion must construct new bodies for themselves before they can interact with the world when their old ones are destroyed. Gandalf, Glorfindel, and Sauron (until he lost the ring) are notable examples of characters who resurrect themselves in this way.
* The Silmarillion, Noldor Elves note Sindar speech has evolved into a completely different language after several millennia.
* The Silmarillion, Númenorean king Ar-Pharazon the Golden and his army, interned in the Cave of the Forgotten in Valinor until the Dagor Dagorach.
* The Silmarillion once and for all (and to avenge the Elves' previous shocking defeat by Morgoth's forces in the Battle of Sudden Flame). It's the first coalition of all the races together to fight Morgoth, and the greatest army seen so far in the world outside of the gods. It gets crushed so badly and so many people die that Morgoth literally makes a hill out of the corpses. The worst part is that they never had a chance. And things get so much worse from there.
* The Silmarillion, one manifestation of Melkor's dark influence spreading over Arda is that "fens were made, rank and poisonous, the breeding place of flies."
* The Silmarillion - over fifty years! - and it was published posthumously by his

son Christopher.
* The Silmarillion plays this trope straight with Eärendil, an actual sailor who ends up sailing the celestial oceans in an actual ship - seen and interpreted as a star.
* The Silmarillion, relations between Elves and Dwarves were actually relatively friendly for most of the First Age; they taught each other many things, trade flourished, and the Dwarves were even happy to help the Elves build their greatest settlements. While Tolkien does still describe the friendship between the two races during this time as not being particularly warm, this didn't stop them from fighting side by side against the evil forces of Morgoth. In fact, it's not until near the very end of the First Age that Elves and Dwarves actually come to blows, when an argument over ownership of a Silmaril suddenly explodes into bloody conflict between the dwarven city of Nogrod and the elven kingdom of Doriath, resulting in Doriath's destruction and the complete annihilation of the Nogrod forces. Though brief (lasting less than a year), this war becomes the source of subsequent enmity between the Elves and Dwarves of western Middle-earth, though tensions never again escalate to the point of actual fighting.
* The Silmarillion, remains in his city as it falls to the forces of Morgoth, while his son-in-law Tuor and daughter Idril lead the remnants of his people to "safety".
* The Silmarillion remark he's violating the laws of physics because his wife told him to.
* The Silmarillion responsible for this state of affairs: the rift between him and his younger half-brothers was being manipulated by Morgoth, and Celebrimbor was manipulated by Sauron in disguise. Also, it should be noted that none of the Fëanorians goes outright evil. They are just no longer good enough to hold the Silmarils, the holy gems that were Fëanor's greatest creation.
* The Silmarillion Sauron. The prisoner then proceeds to play on the pride and fears of the Númenorean king Ar-Pharazôn until the king is convinced that he is powerful enough to ignore this "Ban of the Valar" against sailing west and that he will be immortal if he does. The Númenoreans spend years building the largest fleet of ships and stockpile of weapons that the world has ever seen and set sail. But as soon as Ar-Pharazôn lands on the Undying Lands, God intervenes to destroy the fleet, the army, the island of Númenor, all of its people except the ones who saw this coming, and even some of Middle-earth's coastline. The only "works" left behind are the kingdoms they founded in Middle-earth, a mere shadow of Númenor's original glory, and — according to legend — the very tip of the Holy Mountain in the center of the island. The Men of Middle-earth who are descended from Númenoreans tend to remember their history in later ages, but the other peoples generally know nothing about it.
* The Silmarillion's crown. Ostensibly this is as a bride-price to allow Beren to marry Thingol's daughter Luthien, but in reality it's a method of executing Beren without technically breaking his promise to Luthien that if she revealed the name of her lover, Thingol wouldn't kill or imprison him.
* The Silmarillion's elite troops, they're as powerful as Sauron himself.
* The Silmarillion, setting the point of his sword to his brother's chest. He is exiled... and his father Finwë goes with him. Poor Fingolfin. (Though arguably this might have been necessary to keep the slightly unhinged Fëanor from going batshit crazy... which he did anyway, mind, but only later.) Even so, Finwë declares that as long as his son is exiled, "I hold myself unkinged," and refuses to see or talk to his people, even during the holiest festivals.
* The Silmarillion. She must have either died of starvation or old age some time afterward.
* The Silmarillion shows their warmongering, greedy and cruel sides far more. The vast majority of plotpoints in the book are either directly caused by, or indirectly related to, Fëanor's war for the Silmarills, which can itself be summarized as "Elves are angry because someone stole their jewelry". In fact, while there are several non-elven characters who seek the silmarills, the elves are the only ones who actually want them just to have them. The dwarves largely stay out of

the conflict, or join to fight a common enemy, while most human characters are merely caught up in drama caused by elves. Even Beren, who actively seeks a silmarill, only does so because the elven king demanded it in return for his daughter's hand in marriage.
* The Silmarillion, since they were driven by their father's oath to recover the stolen Silmarils.
* The Silmarillion spoke three times. It's quite possible he wasn't a hound after all but a Maia (angel-like creature) in animal form — Tolkien doesn't seem to have made up his mind about this.
* The Silmarillion's Shelob. There are also Draugluin, the first werewolf, and Glaurung, the first dragon and progenitor of his kind, also known as the Father of Dragons.
* The Silmarillion succeeds, Finrod's brother Orodreth banishes his cousins from his kingdom. He warns them that if they ever cross the border again, they would be shot on sight.
* The Silmarillion suggests that it was difficult for him to take physical form, at least without The Ring's power.
* The Silmarillion take place in the west, at least partly because it was closer to the Blessed Realm and Númenor and because that was where the Kingdoms of the Noldor and of Thingol were.
* The Silmarillion that he had a devil of a time editing his father's as-yet unfinished material into something internally consistent, because this was so bad. But then again, it was unfinished, largely because J.R.R. kept going going back to the beginning to revise it. (And considering that at least one version had a framing-device of a sailor writing down previously oral-only tales at the equivalent of a wayside inn, some internal inconsistency would be expected.)
* The Silmarillion that many great works that might be considered magical can only be accomplished once. The great trees Telperion and Laurelin created by Yavanna could only be created once. The Silmarils created by Fëanor could only be created once. One may presume the One Ring created by Sauron could also only have been created once and it would make sense that reason for this is as given that he put his own power into the ring thus diminishing it in himself. In this respect, the act of using one's 'magic' to create a great artifact appears to forever diminish the creator of the artifact.
* The Silmarillion, the Ainur, who are normally incorporeal spirits, capable of changing their physical shape as easily as people can change clothes, upon arriving to Arda, take on a form closely resembling the "Children of Iluvatar" - Elves and Men, for the sake of convinience during future interactions with them.
* The Silmarillion, the Captain prefers to watch water freezing than play chess. It isn't that he dislikes chess; it's he thinks the former activity is genuinely entertaining.
* The Silmarillion, the Dwarves that sacked Menegroth are successfully ambushed by Beren and the Green-Elves because their loot was weighing them down.
* The Silmarillion), the end result feels very much like a collection of ancient texts from multiple authors (complete with partly-deciphered ancient languages!). Furthermore, Tolkien originally created Middle-earth's histories as a mythology for England, since he was really torn up about the English not having one.
* The Silmarillion, the first Dwarves to come to Beleriand were disorganized exiles called the Petty-dwarves. The native Elves assumed that they were just particularly strange animals and hunted them the same as any other. When the Elves made contact with the main Dwarven kingdoms, they realised their mistake and ceased such activities, but by then the Petty-dwarves were on their way to extinction.
* The Silmarillion the first of wood, then stone, bronze, iron, silver, gold, and steel." Morgoth's armies do eventually capture Gondolin — by coming in through the back.
* The Silmarillion, the godlike Valar fled to Aman which they lit with the miraculous Two Trees of Light. These, like the Lamps before them, never went dark (although they did periodically fade into a twilight-like state) and so Valinor had Endless Daytime.

* The Silmarillion, the knife Angrist, a knife that can "cleave iron like green wood..." But, in a realistic touch, it's not super-strong and eventually snaps while doing so.
* The Silmarillion, the mortality of mankind, first known as "The Gift of Men" soon became known as the "Doom of Men".
* The Silmarillion, there is a region in Doriath called, well, Region. Subverted in that Region is Sindarin for "land of hollies", not for "region".
* The Silmarillion: The werewolves, rather than humans who take lupine forms, are essentially corrupted spirits in the same vein as the Balrogs, only in wolf form. Carcharoth is the greatest of these, and he only becomes more hellish after ingesting one of the Silmarills, which starts burning him from the inside and drives him mad. Sauron himself, who rules over the werewolves, can take on their form.
* The Silmarillion they've married and had a child. He controls Aredhel by isolating her from the outside world and cutting her off from family and friends, forcing her to rely on him. When she does get the courage to leave he stalks her, tries to kill their son and ends up killing her (in the real world many victims of domestic abuse are at a higher risk of being killed by their partner when they're trying to leave).
* The Silmarillion, Thingol sends Beren on a suicide quest to get a Silmaril from Morgoth's crown in exchange for his daughter's hand.
* The Silmarillion though, and gifted them with their own wills which a mere Valar could not do.
* The Silmarillion to pull it off. He was told to return with a Silmarili in his hand, and he did so. Even though the hand was in the stomach of the werewolf Carcharoth.
* The Silmarillion traces the rise and fall of multiple families of both the Elves and Men. The one most central to the plot is that of Feanor, the Noldor who forged the Silmarils to hold the light of the Two Trees, and his sons' ultimately fruitless quest to avenge the Silmarils' theft and recover the jewels for themselves.
* The Silmarillion trolls with it before being captured. Gothmog, Lord of the Balrogs, has a massive, black one made of fire. Also, the Dwarves of the First Age use oversized axes with full helmets and masks to fight Dragons at close range
* The Silmarillion: Two other dwarven cities, Nogrod and Belegost, existed in the Blue Mountains, and dwarves from them carved out the Thousand Caves of Menegroth which served as the capital of the Elven kingdom of Doriath. All three were sunk beneath the sea at the end of the First Age.
* The Silmarillion, under threat of torture he reveals the location of Gondolin and is told he will be rewarded with rule of the city and Idril. Despite the threat, Maeglin still doesn't warn the city of Morgoth's attack and during the Fall of Gondolin tries to kill his cousin's son Earendil. However Earendil's father Tuor kills Maeglin.
* The Silmarillion was capable of sending these off with his will eventually, although he was just as good at using rumor and misdirection to accomplish the same end without sorcery.
* The Silmarillion was not confusing enough, in it the "Ring of Doom" refers to a completely unrelated meeting circle where the Valar hold council.
* The Silmarillion wasn't even compiled together into its current relatively cohesive form by J.R.R. Tolkien himself, but rather by his son Christopher. To quote the latter's foreword:
* The Silmarillion when Fingon tries to rescue him and looks like he won't succeed.
* The Silmarillion, when Melian and Elwë Singollo first meet, they stand looking into each other's eyes "while long years were measured by the wheeling stars above them; and the trees of Nan Elmoth grew tall and dark before they spoke any word." Meanwhile, his people get on the boat and leave without him; he doesn't care and stays there with Melian.
* The Silmarillion when the Witch-King commanded parts of Sauron's army but would have held no kingdom of his own.

* The Silmarillion, which is popular despite the fact that canonically Curufin sent Finrod off to his death and tried to steal his throne.
* The Silmarillion) whose original motivation was to impose order and structure upon what he saw as a chaotic and disordered world. Even he, however, becomes determined to condemn to oblivion whoever and whatever won't be bend to his will and only the fact that his goals are more possible than his master's prevents him from becoming as omnicidal.
* The Silmarillion who tries to stop them, regardless of their allegiance. This was the icing on the cake as Melkor's earlier lies about the Valar's were elaborate enough to warp Feanor's perception of them, if not subtle enough to leave himself outside of suspicion.
* The Silmarillion "Yea, I will drink thy blood gladly... I will slay thee swiftly."
* The Silthuri are the ruling caste and closest to the Ancient Martians genetically. Most of them serve as the bureaucracy; there is only a small ruling sub-caste in any principality.
* The Silurians all entered "hybernation chambers" when the Moon arrived in Earth orbit, because they thought it was going to crash into the Earth (or, given recent revelations,
* "The Silurians" and dinosaurs on the walls in whatever they can find, referred to in-story as "cave paintings". The Doctor finds a man in his hospital room drawing lizard-people in marker pen on the wall, which leads him to believe dinosaurs aren't the only things involved — and later, one of the UNIT potholers starts carving the drawings into the side of the cave he's stuck in with a stone. When in this state, when people are interrupted, they seem to panic and attempt to strangle whoever did it. The story leaves it unclear how and why this condition is induced (the novelisation says it's a genetically-inherited "race memory").
* The Silurians like to use the term "apes" to describe humans, a term the Ninth Doctor also uses for them
* The Silurians. While the Doctor usually tries for a peaceful solution with most foes, he turns this tendency
* the Silver Age, and promise to destroy the home city of the loser. (It turns out these are actually two of the Flash's arch-enemies, disguised as the aliens—who are back on their home planet betting on volcanic eruptions.)
* The Silver Age, as penance for supporting slavery. This naturally causes occasional friction in the crew, since the tank's gunner is black. The Haunted Tank recently reappeared in a Vertigo series set in modern Iraq. The general's new descendant is this Abrams tank's commander, who is descended from Stuart and one of his slaves.
* The Silver Age as well to make the series more sci-fi oriented. The original continuity that was displaced by these reboots was later shown to take place in an alternate universe, Earth-Two, which would later regularly crossover with the reboot universe, which was dubbed Earth-One.
* the Silver Age at best, but he's worthy of mention for having the most absurd-looking vehicle in the history of comic books: a car shaped like a giant violin.
* The Silver Age changed superhero comics forever. It introduced more flawed and relatable characters, more sophisticated themes, and more complicated plots. This led to an eventual shift in the target audience for comics from children to late teens/young adults.
* the Silver Age comics, Clark had to put up with Smallville High's resident top jock (and jerk) Bash Bashford. Somewhat ironically, post-crisis continuity has Clark as a star athlete throughout high school instead.
* the Silver Age comics: Clark Kent's sweetheart from college (who turns out to be secretly an Atlantean mermaid).
* the Silver Age comics. This is a device that captures all the information known by any mind on a planet and then allows Hawkman and Hawkgirl to access it. Its primary weakness is that it doesn't update when new things happen.
* the Silver Age got his powers because a lightning bolt struck a cabinet full of random chemicals, which then spilled onto him. Subsequent attempts to find out

which combination of chemicals would, when lightning-struck, yield similar results have all been failures.
* the Silver Age had a club of bowtie-wearing dweebs who hung on his every word. As creepy as it sounds.
* the Silver Age, he figured out the thrust mechanism early on but had trouble with steering.
* the Silver Age in prison was a bad idea, the most famous example being his creation of a time-displacing ray gun from a spring, a flashlight and some cans of fruit juice.
* the Silver Age is an insane version of this one who isn't affected by kryptonite.
* the Silver Age. It also adds the occasional dash of Bronze Age and Modern Day super-hero tropes to keep viewers on their toes.
* the Silver Age, Jet and her "Stunt-Girl Counterspies" worked as "Hollywood Stunt-Girls" when not on counter-espionage missions.
* the Silver Age. Krypto's actually a subversion of sorts as he has all the powers of Superman but little of the human restraint, making him a very dangerous combatant who can fight Superman's foes on even ground.
* the Silver Age limitation - he was utterly brilliant, but he could only modify things that were already invented, such as Mon-El's anti-gravity mineral and his ancestor's force-field. This limitation was eventually dropped.
* the Silver Age Luthor's hatred for Superman began when the latter as Superboy saved his life from a chemical fire after Luthor's experiment to create life went awry. Luthor not only blamed him for intentionally sabotaging his experiment, he also blamed him for turning bald as well. Now if that's not vanity, we don't know what is.
* the Silver Age New York City. So despite the fact they were mostly defence attorneys, Foggy and Matt seemed to be involved in everything from wills to contract negotiation.
* The Silver Age of Comic Books era, he started being shown as a redhead in costume, and subsequent flashbacks to the early days haven't included the dye.
* The Silver Age of Comic Books planting bombs in all the world's great monuments, and then he threatens to detonate them unless Superman would physically steal them for him. Supes does eventually find a way to disarm the bombs, but not before he has had to carry half the world's monuments to Luthor's hideout.
* The Silver Age of Comic Books's "interference" in a Freak Lab Accident resulted in his life being saved, his experiments being destroyed, and his hair loss. Furthermore, when Luthor tried to retaliate with grandiose tech projects to show up Superboy, they went wrong disastrously enough to force the superhero to intervene, embarrassing Luthor enough to hate him even more.
* The Silver Age of Comic Books's secret identity was John Jones. This was to hide his true Martian name of J'onn J'onzz.
* The Silver Age of Comic Books. The only E.C. comic to survive was...
* The Silver Age of Comic Books, the writers get away from that when they presumably realized a true friend would respect his privacy.
* the Silver Age of the Silver Age is to see if there are any gorillas around.
* the Silver Age once battled a villain from a dimension that existed within mirrors.
* The Silver Age Superman had secret plans arranged with each of his friends, known by their initial, which they would carry out if he gave them the appropriate signal. He once activated Plan J-for-Jimmy by breaking one of the arms off a ship's anchor so that what remained formed a capital J. Fortunately Jimmy Olsen recognised this for what was intended rather than thinking it was just a show of strength.
* the Silver Age, they made him stand out more by stressing his once-rarely-seen shape-shifting and psychic abilities.
* the Silver Age to yellow, like saying that the enemy contains a yellow compound, or that there is some "invisible yellow" or that the monster is giving off "infra-yellow" radiation.
* the Silver Age, very much of that point in the 20th century, weren't quite up to having a black character as just another guy instead of The Black Guy.

* The Silver Age was a man (in the future) who was a victim of four alien criminals trying to create a means to replicate armies of themselves to conquer the universe. He ended up with a freaky composite body and each of the aliens' powers, which he then used to become a superhero. (He later finds a way to switch back-and-forth between human and multi-form.)
* the Silver Age where Superman is almost accidentally killed because it was cheaper for a film company to use real kryptonite than to make a prop.
* the Silver Age, who had robotic duplicates that could impersonate any of their identities.
* The Silver Age, with just about everyone having some Superman-nerfing something. Worth noting that during the Silver Age, it's more or less accepted that Superman has solved the problem of traditional crime: thus, many stories deal with him doing strange publicity stunts instead of fighting evil.
* The Silver Branch, first book of the Keltiad: The protagonist, Aeron marries Roderick because her parents wish her to. Roderick and her parents die in the same well, murder. She then marries Gwydion, which was what she had wanted but her parents thought a pair of magic-wielding royals to be too scary.
* The Silver Branch, Justin visits a cockfight while stationed at Hadrian's Wall to hand off a tablet containing details of Allectus' plot to Evicatos of the Spear to deliver to Carausius.
* The Silver Brumby puts more emphasis on humans than the titular horse.
* The Silver Brumby series by Elyne Mitchell is told mostly from the point of view of the wild horses (however this technique is abandoned later on in the series). These horses are portrayed as not only being sapient, but with brains almost equal to humans. They can even understand the human language.
* The Silver Brumby series is rife with this trope. The first and most obvious example is Thowra, the eponymous "silver brumby". As a result of his coat colour - ordinarily cream coloured, but turning a paler 'silver' sheen in winter- Thowra finds himself the envy of rival stallions and hunted by humans who desire such a handsome horse. Given that your average brumby can be varying shades of brown, grey and black, Thowra is a VERY rare horse indeed. Other protagonists (and other important characters) of the series also have special attention given to their coats- notably, Thowra's own daughter, Kunama, who is also 'silver'; Socks, a black brumby with four white feet, and the brumbies of the night, who are milk-white with red eyes.
* The Silver Case. Suda 51 is doing this for his own sick amusement, isn't he?
* The Silver Case. Themes in the game include the divide between those with information and those without, with information being treated as a commodity that those in power have a lot of.
* The Silver Chair accept the existence of, allowing her to dismiss it with "So you made up a bigger version of a cat, and called it a lion", in the same way as heaven can only be described in terms of the mortal world.)
* The Silver Chair: Aslan assigns Jill the task of finding the lost prince Rilian as her Redemption Quest for causing Eustace to fall off a cliff.
* The Silver Chair, a Talking Stag cornered by giants told them not to kill him, as he was tough and wouldn't make for good eating. The giants remark over a tender venison luncheon that the Stag was a liar, but the real horror comes when the protagonists realize that they've been eating a sentient being (the text compares one's reaction to finding out that you've eaten a baby).
* The Silver Chair), claiming that while edible, they are very stringy and have a "muddy flavor."
* The Silver Chair England and thus she wasn't taught how to curtsy at school. She learns how in the next book.
* The Silver Chair has this done by the old, hard-of-hearing dwarf Trumpkin, who, among other things, mishears the protagonists' names ("Eustace" as "useless"), and eventually complaints that people these days don't talk clearly.
* The Silver Chair her accusations are baseless than embrace her overly-bleak perspective.
* The Silver Chair is sometimes called the Queen of Underland, though given how her

"subjects" were captive mind-controlled gnomes and her "kingdom" was more or less a palace under the ground, it's uncertain how certifiable her claims for the title are. Still, she would have become that had her plan succeeded.
* The Silver Chair Jill is very much afraid of crawling down the narrow corridors leading to Underworld, just like Eustace has acrophobia.
* The Silver Chair ones that are filled with delicious juice. The hard, dry, inedible ones that surface-dwellers hoard are stale and tasteless, hence without value.
* The Silver Chair, the entire history of Narnia occurs within the span of Diggory Kirke's life. The trips there seem to be as much for the enlightenment of English schoolchildren as to solve Narnia's problems.
* The Silver Chair: The narrator takes the time to explain and justify Jill Pole's right to be this, acknowledging that this trope is generally preferred amongst readers. Also, human emotions received more attention as the series progressed, which makes Jill's portrayal far different from the Pevensies' four books ago.
* The Silver Chair, the protagonists fall from the place where they meet Aslan for long enough to take a nap. It's probably an analogy for something. Later in the book, they also make a very long fall down through the earth to the Underworld.
* The Silver Chair. This is both for comic effect (he mishears a good bit of information before he finally gets his ear trumpet) and to emphasize how old he is, and thus how much time has passed since the last trip to Narnia.
* The Silver Chair, when faced with the Lady of the Green Kirtle's claim that Aslan and Narnia are simply things they dreamed up, Puddleglum answers that if that's true he prefers them to reality.
* The Silver Chair: when the characters enter the Underworld, most of the light there is blue and cold, which is reflected in the sadness of the faces of the beings living there. Later, this is contrasted with "it's our kind of light, not all blue and cold".
* The Silver Chair, which apart from looking cool has the magical ability to completely brainwash its occupant for 23 hours a day, and keep him imprisoned for the remaining one.
* The Silver Chalice, especially the infamous "sperm suit" he wears at the end.
* The Silver Codex: Hanlowa and Xarissa due discuss a being called the Divine Good connecting every religion and mythology to each other because different humans have different spiritual needs, which is why Centerville has different kind of monsters and magic.
* The Silver Codex II Reflections Edition" one of the characters tells how magic is divided by color with Silver Magic being the type that priest and priestess use in their religions for blessings and exorcisms.
* The Silver Codex the town of Centerville has a lot of dark secrets going on.
* The Silver Coin is, similarly a horror anthology comic where each of the stories involves a cursed Silver Coin.
* The Silver Crown to fool anyone looking for her (as they'll be looking for a girl and not a boy). As all Otto has is a switchblade knife, Ellen understandably refuses.
* The silver dagger called Wolfbane prevents werewolves from transforming if you fight them while wielding it, but it has no effect on werewolves that are already transformed.
* The Silver Dragon writes about how awesome immortality is in her autobiography. One of her hobbies is visiting a place after a century has passed; the mix of familiar and new is something "only an immortal can truly appreciate".
* The Silver Eagles have Nozel, Solid and Nebra. High-tier magic spells? Absolutely. A tendency to look down on everyone they deem inferior, which happens to include
* The Silver Eye after having been beheaded and then chopped to pieces. When Apen Shephard meets him in Gallitan, he is understandably rather shocked.
* The Silver Eye calls Velvare "Bay", short for his original name, Bhatair.
* The Silver Eye died a number of years before the story's beginning, but quite a few of the flashbacks are from his point of view.

* The Silver Eye, Enel had been denying that Velvare Bamidele was his father for years. Finally, after years of silence on the matter, Velvare admitted that he is his son after all.
* The Silver Eye is Melete's direct supply of energy, and it drains her.
* The Silver Eye is quite happily adopted by Marcus, and although Apen wasn't raised by the Alvarados, they still consider him to be a part of their family.
* The Silver Eye Melete Dolan cursed herself to be eternal so she would't have any chance of being reunited with her husband in the afterlife. Although the full extent of her invunerability is unknown, she can heal herself unless kept in extreme pain, and even then, there is no evidence that her wounds would kill her.
* The Silver Eye no one will tell Enel anything because he is a bad liar. His terrible lying skills are demonstrated in the first chapter when he tells Marcus that an imprisoned character must have escaped via lock picking. Not only was he not particularly convincing, but the key was still in the lock.
* The Silver Eye, the Hollingsworths and the Shephards have been in conflict for eight hundred years. The only reason given so far is that their Nedarian ancestors hated each other. This doesn't really help the fact that each family rules over one of two adjacent countries.
* The Silver Eye. They are inhabited by dragons known as weavers that kill all who choose to enter (or who are thrown into them as an execution, as they do in the eastern half of the continent.) The surrounding ocean is inhabited by sea-dwelling weavers who destroy any ships that sail past the continental shelf, and is known as the Deadwaters.
* The Silver Eye wears a fancy mask constantly, and only a handful of people in Gallitan have seen him without it. Initially it was to protect his identity, but eventually he wore them mostly because people expected it of him.
* The Silver Fangs married into many of Europe's royal families and shaped history as royal leaders.
* The Silverfronds Invasion ends this way in the end of book 3. The Souballo Empire did not succeed in taking over the Silverfronds Kingdom...because the kingdom is instead being destroyed by a powerful,
* The Silver Horde. Seven very old men. Six of them are Barbarian Heroes, the most dangerous occupation on the whole Discworld (and considering what some people do for a living, that's saying something). Their primary skill is NOT DYING. They've made quite a habit out of it, and don't plan on breaking that habit.
* The Silver Horse bitter about the wrongs committed upon them by careless children.
* the Silver King, right after the latter has formed an alliance with the other Clans to defeat the former. Shiro turns him down, because his ideas sound a bit too familiar to Shiro, considering his backstory.
* The Silver Lining series. Episode four was released in 2011 and a fifth and final episode has been promised, but no news of the game on its website has been published since 2019.
* The Silver Lining series of adventure games, received a ringing endorsement from creator Roberta Williams, who was overjoyed to see her characters in 3D.
* The Silvermans are obsessed with traditional Japanese culture, much to their daughter Lisa's chagrin.
* The Silvermoon City tailor shop has a basement that is filled with leper gnomes working looms to manufacture textiles. They sleep on thin rugs on the floor, cry at times, and are watched over the store owner's succubus minion.
* The Silver Pigs finds a denunciation of a political conspiracy written out on a wax tablet. However one of the names has been crossed out, so Falco tries to work out the name from the scratches left by the writer's stylus on the wood beneath the wax.
* The Silver Raven: Nero is half witch, one quarter human, and one quarter demon.
* The Silver Raven, the Boiling Isles are explicitly part of Hell and set in the circle of Limbo.
* The Silver Raven, when a slitherbeast was just about to kill Lilith, Nero, in blind rage, awakened his Devil Bringer and promptly crushed the beast with his new

appendage to save his mother.
* The Silver Raven. When Lilith confirms to her that she is a mother and the kid that she had just been talking to was her nephew, she reaches into her hood, pulls out a flask, takes a swig from it, and then spits it out, either accidentally or purposefully hitting a random bystander.
* The Silver Sequence is a member of a species that eats planets, or at least all the life on them.
* The Silver Shroud costume is a long, black trench coat paired with the Silver Shroud's iconic silver
* The Silver Skeeter is taking over his story, calls Skeeter out with this trope.
* The silver slippers in the book were changed to ruby for the movie in an effort to show off the new-fangled color film they were working with and by having Glinda be the witch who directs Dorothy to the Emerald City (in the book it's an unnamed Good Witch of the North, who appears only in that scene, while Glinda is the Good Witch of the
* The Silver Slyth monster can track any creature by scent even if the trail is up to ten days old. Once it starts tracking its prey, it will not stop until it catches it or the trail becomes more than ten days old. They feel no pain and never tire so they usually catch the target.
* The Silver Spike oddly enough) mopping up the aftermath of the first arc after the main crew has moved on.
* The Silver Sword. Jan wants to set Ludwig the dog on an official who is determined to see that all refugees in the area are sent home in the hope of seeing the dog bite a hole in the man's trousers. However, Ruth restrains Ludwig until the man has gone.
* The silver swords carried by the Wardens also qualify, as their entire purpose is to undo magical enchantments and thus penetrate the magical defenses of warlocks. Has an added bonus in that enchantments store energy, so when a Warden's sword cuts through an enchantment, it will set the item ablaze; thus, the more powerful your defensive gear, the bigger the backlash of magical energy. We see it in action a couple times, once negating one of Harry's defensive shields, and another time destroying some magical armor.
* The Silver Tide involves admiration, power, fame, and other ambition-related traits.
* The Silver Witch—he calls her "Amanda", she calls him "Beau" when their names are "Connor" and "Ashley", and they each have flashbacks or visions of the couple in question. They soon learn that the pair was murdered there 100 years ago and conclude that they are their reincarnations.
* The Silvius from Last Exile Fam the Silver Wing. A aerial aircraft carrier that is capable of submerging for defense.
* The Simian Line: Samantha Mathis watches Cindy Crawford pleasure herself.
* The Simic Combine has this as one of their premier products, allowing customers to add various augmentations with Cytoplasts (such as give a normal-sized human a giant's strength). Unfortunately Momir Vig had ulterior motives for these...
* the similar Cat Piano, whose concept artwork provides the page image.
* The similarities between Nazis and Daleks are lampshaded in the novel
* The similarities were pretty much shot for shot. Considering that Samurai had Megamode new cockpit scenes were filmed but as stated tended to be shot for shot of many of Shinkenger's.
* The similarly powered Scapegoat can absorb other people's injuries and then transfer them to his opponents. Unfortunately for him, he fully experiences any injuries he's carrying until he can load them off.
* The similar phrase "I can see Russia from my house", from Saturday Night Live, became more famous than the real Sarah Palin quote which inspired it, "you can see Russia from land in Alaska", to the point where many people believed that the SNL line was something she actually said.
* The Similarrion, "Ollie" [Aule] is exiled to the couch for not taking the Ents seriously.
* The Similars is that people stuck in a bus station have their faces transform

into exact copies of one man, who has no idea why. Late in the film this is shown affecting animals as well, as a dog that has been left outside shows up sporting his face.
* The similar sounding "88 Lines about 44 Women" by the Nails (which was
* The similar style of Celtic metal, represented by such bands as Primordial, Cruachan and Waylander, takes a similar approach to Celtic mythology, although for the most part these bands lack the (relative) exposure of their Nordic cousins, with the possible exception of Eluveitie.
* The Simon (Number Four) and Doral (Number Five) model Cylons are hardly seen, and certainly have far less character development than the other models. Arguably, the Fours are never prominent outside one episode, but the Fives have a fair amount of screen time in the first year of the show.
* The Simping Detective and is coerced into a back alley by a client, where he is accosted by ninjas. When he takes them down, the client gets the drop on him. He reveals that it was a feint and pulls out his badge, as his backup arrives.
* The Simping Detective has the Church of Simpology, a cult that takes money from its members and brainwashes, whilst also encouraging Simping, Mega City One's clown trend.
* The Simping Detective: Jack Point used an electric guitar to kill raptors. Justified in that loud noises are the only thing they are vulnerable to.
* The Simping Detective's protagonist Jack Point is a hardboiled detective who navigates the strange underworld of MC-1 and happens to dress like a clown.
* The Simple Gesture Wins: After several grand gestures fail, the one that works is the unimpressive one.
* The Simple Gesture Wins: After several grand gestures, the one that inspires the most gratitude is the unimpressive one.
* The Simple Life ask a guy out first or be the one to make the first move as that implies that she's easy.
* The Simple Life is Simple: The simple life is indeed simplified for games where farming is (one of) the objective(s); the complexities of real-life farming would take the fun out of it otherwise.
* The simplest and arguably most satisfying aspect of Bully is the ability to tackle boys and
* The simplest answer is most often the correct one: going to a toilet isn't important enough to be written down.
* The simplest solution seems to be reversing the compass needle itself: the Munchkins should be in the East, colored Blue, but the flag (which reflects the four quadrants of the land) has Blue on the left. Hence make East point left and West point right.
* The simplest way to describe the relationships between the players in Homestuck is that
* "The Simple Things" was originally titled "Boy Meets Gull" and "Gull Crazy".
* The Simpson family dutifully goes to church every Sunday even as Marge has become the only religious Simpson (aside from the Buddhist Lisa). Once upon a time (between the 1930s and 1960s), even families that weren't necessarily religious would go to church at least for appearances' sake, but this had largely disappeared by the 1970s, as social mores changed. And by the 1990s, religious people would increasingly not consider themselves as "practicing" believers (as in, actually participating in faith-related activities). These days, it's easier to find practicing Christians who
* The Simpson family visits an old apple cider mill that bills itself as "Now 40% Quainter!"
* The Simpsons 138th Episode Spectacular" contains a clip cut from "Treehouse of Horror IV" where Bart says he'd sell his soul for a Formula 1 racecar. The Devil immediately appears and says he can arrange that, but Bart changes his mind.
* "The Simpsons 138th Episode Spectacular" ends with "I'm Troy McClure, and I'll leave you with what we all came here to see:
* "The Simpsons' 138th Episode Spectacular" ends with "I'm Troy McClure, and I'll leave you with what we all came here to see: HARDCORE NUDITY!" Cue a montage over

the credits of naked Simpsons characters set to "Shake Your Booty" by KC and the Sunshine Band.
* The Simpsons’ Spin-Off Showcase invoked makes clear that the spin-offs wouldn’t run for long even if they actually existed.
* The Simpsons (1975-1979) got its U.S. premiere in the second half of the 1980s.
* The Simpsons 20th anniversary one of Homer screaming and Barney belching both to the tune of the theme song.
* The Simpsons 9th season episode "The City of New York vs Homer Simpson". Homer has to wait for a traffic officer to remove a parking boot from his car (which Barney left at the World Trade Center) while the rest of the family explores the city. This episode was pulled from syndication after the attacks that occurred in the actual city of New York in the year 2001, although it later started to reappear.
* The Simpsons, a bedside lamp suffers this fate when Homer is flummoxed by its inability to respond to his clapping, immediately after his claim that fighting a nuclear war is as easy as turning off a light.
* The Simpsons, Abe Simpson goes backstage during a theatre show in Branson featuring various celebrities commonly thought to be either dead or washed-up singing about how they are neither. He's shocked when he sees one of them:
* The Simpsons", Abe Simpson is shown to be very inept with modern kitchen appliances, to the point of nearly starting a fire.
* The Simpsons about a suntan lotion that's also a laxative. Troy Mclure demonstrates it by putting it on a moment before Dr. Nick mentions that it's a laxative.
* The Simpsons above, "Doh'in' In The Wind'' has a scene where Homer is shot by the police. The camera then pans down to a funeral... and then pans over to the hospital next to the cemetery, where Homer is recovering.
* The Simpsons; a child photographer tries to get Maggie to smile by increasing the pitch of his voice, only to dejectedly realize that the balloon just contains air.
* The Simpsons. A common parody is to have one of the heads have nothing to do with the topic at hand or be completely different to what the person actually said.
* The Simpsons: A contest to pick an image for the cover of the new phone book had a TV ad showing a "Mysterious" prize that was wrapped in a way anyone could notice it was a bicycle. As if it wasn't obvious enough, a kid at the commercial showed up and started riding it (with the bicycle still wrapped).
* The Simpsons a couple times, most of which involve Homer and/or Bart.
* The Simpsons, actually, especially if you'd ever been to an orthodontist.
* The Simpsons. Additionally, Mr. Burns used one to lay siege to the Simpson home when he found out that Mona Simpson was back in town.
* The Simpsons, a dispute over the sounds from nearby airplanes leads into:
* The Simpsons a drill, and chastises his family for taking so long — but they aren't listening due to being rightfully shivering in terror.
* The Simpsons, a family is driving parallel to Bart and his friends. The kids are in the back of the car causing absolute chaos for the father who eventually snaps.
* The Simpsons: A flashback from "Homerpalooza" shows a teenage Homer trying to socialize at a party. As some cool kids dance to a strobe light, Homer stands some distance away, coming closer with each flicker. When he's rejected, the next flicker has him instantly back where he started.
* The Simpsons." A flashback showed him happily playing with his teddy bear Bobo, and being referred to by his parents as "Happy."
* The Simpsons a fortune teller momentarily impresses Lisa by knowing her name.
* The Simpsons, after being harassed by the people of Springfield for failing to catch a ball.
* The Simpsons; after being played straight with two newspapers announcing plot points, a third one bears the headline "Spinning Newspaper Injures Printer".
* The Simpsons, after guest performer Robert Goulet finishes singing the joke rendition of "Jingle Bells", he swings his mic twice, with the second time hitting Milhouse square in the face and he earnestly apologizing.
* The Simpsons. After he had accidentally ended up in the Springfield mafia's turf,

he was taken and interrogated by them, believing that he was a spy. He answered their questions with "eat my shorts" and "don't have a cow". In this case, Bart's insults and tough guy act actually impresses the mafia, convincing them to give him a job as a bartender.
* The Simpsons." After he leaves Lisa reads the real ending, shrugs and decides that she likes Homer's better.
* The Simpsons. After he starts by burning down the counter, he's reminded of a little something:
* The Simpsons: after Homer joins the Stonecutters, he gives the secret handshake to his plumber so the plumber will fix his leaky basement pipes for free.
* The Simpsons. After several attempts at teaching them only resulted in getting beaten up, Martin tells his class that getting an education can result in them earning good money later on. They all settle down and start paying attention, only because they thought that Martin said he would pay them to learn.
* The Simpsons. After ultimately eliminating all 50 states, he asked Matt Groening for the answer. His response? "Springfield exists in a state of confusion, but mostly it's a state of mind."
* The Simpsons against students who wronged him in the past. When he's about to humiliate a kid, who says today is their first day at the school, Milhouse says the kid will do something bad to him in the future, so he's still going to need revenge. ("It's called pre-venge!")
* The Simpsons A guy drives down a lonely stretch of rural desert road, and goes to a gas station, where 3 sexy, scantily-clad women come up and wash his car, with a close-up of the bustiest woman's...cross necklace. A voiceover comes on and says, "The Catholic Church: we've made a few...changes."
* The Simpsons, a jewel on her hand starts flashing, and security staff take her away and replace her with a younger VJ.
* The Simpsons. A later scene shows the two of them battered and bruised and sharing a drink.
* The Simpsons, almost always wears his "stage" costume — which involves not wearing a shirt. Or pants: just a grass skirt thing.
* The Simpsons, almost gives himself away when his son is the next kid in line: "What's your name, Bart...ner? Partner?
* The "Simpsons Already Did It" episode even showed Kent Brockman himself as part of a hallucination where Butters sees the entire town as Simpsons characters.
* The Simpsons Also an example of artistic license, since in the American military, the men who give the notification are traditionally at the same rank as the deceased or higher.
* The Simpsons also fits this trope because he wanted Krusty to be a rabbi instead of a clown. When he found out Krusty was a clown during a club in his youth, he disowned him and didn't talk to him for 25 years.
* The Simpsons: A male example, Homer Simpson tends to be one sometimes.
* The Simpsons American Revolution to force them out. Mayor Quimby makes the declaration, only for the British to pull out sunglasses ("We're not falling for that one again!"), and catch the Springfieldians off-guard.
* The Simpsons) and Abe is implied to have gotten it from his own father, and on and on.
* The Simpsons, and a critical favorite, both adored by the general public and critics.
* The Simpsons and adult references (smoking, drugs, sex, politics,...) that children should not be exposed to at their young age.
* The Simpsons [and a humorous missolve of "THREE COINS IN THE FOUNTAIN"]).
* The Simpsons, and another revealed that he was born in Pangaea, making him over 200 million years old.
* The Simpsons and asks him why, Skinner makes a noise reminiscent of a wolf howling. Is he farting, is he saying, "Pooooop!", or is he just making the wolf noise randomly because he's crazy?
* The Simpsons." And Big Ben is a digital clock that nobody has figured out how to set (i.e. it still blinks 12:00).

* The Simpsons, and by this time doesn't much care with who). He tries to read the menu but the waiter tells him it's the wine list. "Very good."
* The Simpsons and destroying the raincoat he's wearing as soon as the clouds part and reveal the full moon.
* The Simpsons, and drives away. Homer even feels the same way about Bart.
* The Simpsons and earns various patches to sew onto his uniform. Some of them are for dubiously fantastic feats, the punchline being a shot of his "Patch Forgery" patch.
* The Simpsons and everyone is forced to smile by metal hooks in their mouths, and failure to do so results in a total frontal lobotomy.
* The Simpsons and Glasgow City Council grudgingly removed him from their list of 'Famous Glaswegians' when it was made official in-universe that he hailed from Kirkwall, Orkney. This is also thought to have given Orkney a tourism boost in the following years.
* The Simpsons and goes crowd surfing. The crowd passes him back until he's deposited at the rear of the audience.
* The Simpsons. And if that wasn't enough, in the episode "Hail to the Teeth" it was revealed he wasn't a real dentist, but a periodontist gone rogue.
* The Simpsons, and is one of the most influenced animated shows ever made.
* The Simpsons, and King George banded together to hunt for an ancient ruby and created the Revolutionary War as a cover-up for their search.
* The Simpsons, and Lisa", the second-most popular band in America. The group is sponsored by Avis Rent-a-Car and has a #2 single called "Born To Runner-Up".
* The Simpsons and/or the non-continuity "Treehouse of Horror" episodes.
* The Simpsons, and painted pictures of herself with him, including one of them getting married.
* The Simpsons and Senator Bob Dole, so Homer doesn't know what to tell them. The aliens Kang and Kodos are apparently familiar with the concept of an election, having monitored human activity for years, but when they kidnap Clinton and Dole and impersonate them, their campaign styles make it clear that they have no direct experience with elections. Once Kang is elected, he enslaves the human population and converts the United States into a dictatorial monarchy.
* The Simpsons and solely features Bart. Even adult-oriented merch and general marketing for the show seem to focus on Homer and Bart almost exclusively.
* The Simpsons and the 2014 season opener) has its kickoff plot as Peter writing a newspaper comic which features a terribly sexist joke, which gets him in trouble with feminists, reprising, in part, a pre-cancellation plot (though it is the main plot of the episode "I Am Peter, Hear Me Roar.")
* The Simpsons - and then Jay Sherman visits the Simpsons family. Gah!
* The Simpsons" And then, right after that comes another, similar truck:
* The Simpsons and the remaining residents disillusioned after buying Lyle Lanley's scam in "Marge vs the Monorail." In the end of the episode, a mob of angry citizens came to assault and lynch Lyle when he suffered the misfortune of his plane making a layover in that same town. Cue many seasons later in the episode "Little Big Girl," where the town underwent a massive renovation with Lyle's money.
* The Simpsons, and the spaceships move slowly because he wouldn't allow faster-than-light travel). The last panel of the premier shows that the entire audience has left in annoyance except for Comic Book Guy, who enthusiastically proclaims it "a triumph".
* The Simpsons, and the World Series, are the only games that air on Fox.
* The Simpsons and thinking about how she regretted entering the contest in the first place.
* The Simpsons and was created for that episode so that George Bush could move in.
* The Simpsons, and what happened to initiate the new plotline is rarely, if ever mentioned again:
* The Simpsons An early issue has the FBI keeping watch on Mr. Burns via one of these, until Smithers notices it.
* The Simpsons: An episode set in the future said Martin Prince went missing after a science fair explosion and lives beneath the school, playing the piano and

wearing a Phantom mask.
* The Simpsons. Another Native American then comes up to the one who cried at the single piece of litter and says "Do yourself a favor. Don't turn around." The camera pans out over the landfill where Springfield used to be, to the sound of screaming, followed by "I told you not to turn around."
* The Simpsons any more?"). Another episode has the Simpsons view the TV series Batmobile in a Hollywood museum and comment on how lifelike the dummies sitting in it are — who turn out to actually be Adam West and Burt Ward sitting perfectly still all day.
* The Simpsons". Any sane town would have kicked him out (and jailed him) long ago, but the people of Springfield somehow re-elect him every term.
* The Simpsons", Apu briefly converts the Kwik-E-Mart into a freakshow exhibit, and one of the items on display is a can where the label has fallen off, rendering it's contents a total mystery. Otto says a line almost exactly the same as the trope title when he comes across it.
* The Simpsons. A pumpkin is brought to life, and when Milhouse offers him some pumpkin bread, he assumes that it's bread made especially for a pumpkin. When Milhouse tells him that it's made out of pumpkins, he goes on a murderous rampage of revenge.
* The Simpsons arcade game features Bart's blue shirt (though he curiously wears the more familiar orange shirt in the opening sequence), but also has frames where Marge can be seen with huge, yellow rabbit ears under her hair. This comes from an unused idea for season 1 that Marge hid rabbit ears under a wig.
* The Simpsons Arcade Game has a dream level that has the player fight each of the playable character's alter egos or representation of their personalities. Homer is represented via power plant workers, Bart is by devil figures but Marge simply is represented by the clouds that make the floor to walk on turning into Marge heads that attack with their hair. Even Marge's own daughter Lisa has a more defined image of personality via saxophones.
* The Simpsons are all examples of shows that have become increasingly self-referential after a few seasons, with only their own fans able to get most of these references.
* The Simpsons are critically-acclaimed and do offer plenty of genuinely entertaining plots and dramatic moments, but fully dramatic shows in their vein are much harder to come across.
* The Simpsons are having an affair. When she confronts Homer on this he laughs and tells her "no woman would want to sleep with that loser" before remembering who he's talking to.
* The Simpsons, as Bart, Lisa and Maggie are all aware of what's going on, and Lisa comments how that song always sends a chill down her spine.
* The Simpsons as he just keeps growing fatter and fatter and fatter with no sign of displeasure. The torturer is left confused, as "James Coco went mad in 15 minutes".
* The Simpsons, as her ashes interfere with the launch of a missile sending nuclear waste from the power plant to the Amazon rain forest.
* The Simpsons as he tends to confuse his own life with things he'd seen on TV. Towards the end of the story, young Abe finally finds his father, standing on a bridge and crying and saying he regrets wishing he'd never been born; only to grow ecstatically happy when Abe calls him "Dad" and asks him to come home. Cue Bart, who has been listening to the story: "C'mon, Grandpa, I've seen that on TV, like, a million times!"
* The Simpsons as his idol. The show started 2 years before the first Sonic the Hedgehog game so the game should be a novelty even for Bart.
* The Simpsons: Aside from going all the place about the location of Springfield, Matt Groening has switched back and forth on the vague ending of "The Last Temptation of Homer", sometimes implying that Homer did have sex with co-worker Mindy (imagining she was Marge), and stating on other occasions that Homer never cheated on Marge (and never would).
* The Simpsons As in the show proper, if someone wants into the Nuclear Power

Plant, they can just walk in. One issue has two advertising executives weirded out by the notion that, A: Homer is the safety inspector for Sector 7-G, and B: They were able to get into the plant solely by wearing lab coats.
* The Simpsons: As in the show proper, it's not above pointing out when they've recycled their own plots (Marge mentioning all the countries they've been to, or all the jobs Homer's taken over the years, which takes her several hours).
* The Simpsons As in the show (see Western Animation), in disasters Chief Wiggum and Mayor Quimby will argue over who's in charge, starting with the first issue.
* The Simpsons as the ending theme to one of his movies, called "Blessed be the Guy that Bonds".
* The Simpsons, as the narrator is talking, Homer gets creeped out by Bart staring blankly into space and asks him to stop.
* The Simpsons as well as being younger than her, tries so hard to win first chair saxophone she passes out from lack of air. She wakes up to see the band teacher Mr. Largo leaning over her.
* The Simpsons at first confirms this assumption for him, but then he gets quite puzzled upon encountering his whole family at a restaurant. He assumes that either Bart or Homer must have run amok.
* The Simpsons, at one point even standing beside each other just to drive it home.
* The Simpsons", attached to a robot body (but still fond of his teddy bear.)
* The Simpsons at the military academy, her classmates mockingly play "Taps".
* The Simpsons, a world-wide group who claim to have fought since ancient times to "split the rock of ignorance that obscures the light of knowledge and truth", along with a few other tall claims (robbing cavefish of their sight, rigging every Oscar night). Mostly what they do is just hang out and get drunk.
* The Simpsons back in 1987. Is on track to debut it's 700th episode during its 32nd season. It's also had a theatrical film, several video games, and nine comic book series.
* The Simpsons back. She angrily points out that they've been married for years and he can put down the gun... and the second he does, she is out the door. There was also, in addition to the bride and groom figurines atop the cake, a father wielding a shotgun.
* The Simpsons: Barney Gumble once mentioned he drunkenly had his way with Moe's pool table. Repeatedly.
* The Simpsons. Bart (and his entire family) are mistaken for traitors.
* The Simpsons, Bart and his friends get stranded halfway across the country, so he gets a job as a courier in an attempt to get back home.
* The Simpsons, Bart and Lisa attend and graduate from a military academy, and the Commandant's commencement speech is as follows:
* The Simpsons, Bart and Lisa find a pile of old cathode tube television sets and say that "they're like TVs, but they seem to go on forever." Ironically, they're like the TV the Simpsons used to have in earlier seasons.
* The Simpsons), Bart and Lisa try to not sleep because the vengeful spirit of Groundskeeper Willy will kill them in their dreams. They realize quickly that they simply can't do it and resolve to fight Willy off themselves.
* The Simpsons: Bart awakens after falling, to find himself staring into the eyes of an attractive young girl.
* The Simpsons Bart. Bart only wakes up screaming from the dream after his dream-self starts turning nice and hugs Homer.
* The Simpsons, Bart enrolls his dog, Santa's Little Helper, in dog training classes but misspells the dog's name on the entry form, the trainer dryly noting the dog's name is "Satan's Little Helper".
* The Simpsons", Bart goes back in time and ruins his parents' first meeting, ensuring Marge never falls for Homer. He initially fears that this will erase him from existence, but instead discovers that he, and his sisters Lisa and Maggie, are now the children of Marge's old boyfriend Artie Ziff (and have gained his hairstyle, to boot).
* The Simpsons. Bart has to tell Lisa the name of the traitor to the Counter Truancy Unit (CTU). "Now I don't have much time so I'm just gonna come out and say

his name. So get ready to know his name. His name is the following. M-" ...and Martin knocks Bart unconscious.
* The Simpsons, Bart imagines life as a rock star performing a hit song called "My Fans are Stupid Pigs". The audience loves it. He also dealt with artist disillusionment when hired on to the Krusty the Clown show as a one-line wonder, complaining about the hollowness of his catchphrase.
* The Simpsons, Bart (in the Jack Bauer role) has to stop Jimbo, Dolph and Kearney from detonating a powerful stink bomb on the school's bake sale.
* The Simpsons Bart is forced to go to military school after blasting a soundwave through the town (and Lisa joins him after being bored with public school education).
* The Simpsons, Bart lamented finding Otto in a dumpster, whereupon he corrected him. "Dumpster brand trash bins are top of the LINE! This is just a Trash Co waste disposal unit." There really is such a brand (or was).
* The Simpsons, Bart, Lisa, Martin and Milhouse find giant squishee cups the size of children while exploring the Kwik-e-Mart; Squishzilla. Apu later explains that they weren't used because they were so heavy when filled that no one could carry them away. Lisa ends up using it as a makeshift smock.
* The Simpsons: Bart makes this declaration after Laura (the next-door neighbor girl whom he has a crush on) spat in his hand as part of a prank. He sticks with it until it's practically black and covered with band-aids and old gum, but decides to clean it after an attempt touch Lisa causes his hand to get stuck on the dog's fur.
* The Simpsons, Bart, on his dog running away, says this phrase, following it with "I called him a dumb dog". The rest of the family blame themselves as well.
* The Simpsons: Bart plays an arcade game called "Hockey Dad" loosely based on the real life phenomenon where the parent of a player, thinking that the referee made a bad call, confronts & assaults the ref either during the game or afterwards.
* The Simpsons: Bart Simpson encounters this when he's in the Shelbyville Zoo trying to leave without being eaten by a tiger.
* The Simpsons, Bart Simpson is usually surprisingly clueless about the effect he seems to have on girls, some of which are quite a few years older than him.
* The Simpsons Bart sleeps over at the Wiggum house. When Chief turns out the light, Ralph's night light is so bright Bart has to shield his eyes. Ralph says, "I'm scared," with the implication that he's STILL afraid of the dark.
* The Simpsons: Bart's Nightmare in the videos. Retsupurae would later apologize for some of these comments.
* The Simpsons: Bart's Nightmare, one of the levels features killer vacuum cleaners.
* The Simpsons: Bart's Nightmare. The first level had you planting trees and protecting them from evil spirits and creatures. The second had you navigating a dungeon with the ability to summon the trees you had planted and protected previously. The third had you engaging in a fight against a wizard of some sort.
* The Simpsons: Bart tells a scary story to Homer. "...and that is how much college will cost for Maggie."
* The Simpsons", Bart tells that the incident where Freddy Quimby beat up a waiter was actually a result of the waiter's own clumsiness. When the waiter tries to tell everybody that he's not clumsy, he slips and falls out the window into a truck full of mousetraps.
* The Simpsons, "Bart The Daredevil", had daredevil Lance Murdock intentionally invoke this by agreeing to jump over a tank filled with man eating great white sharks, ravenous piranha, bone-crushing alligators, and the most frightening of all, a ferocious lion (the lion is actually added into the pool with the other aquatic predators). Lance makes the jump, but then falls off the rim into the tank. Luckily, he manages to survive. Naturally, it was the lion that nearly killed him.
* The Simpsons, "Bart the Genius", Bart is mistaken for a genius after he cheats on a test and is enrolled in a school for prodigies.
* The Simpsons, Bart tries to build a house of cards, and Lisa and Maggie keep unintentionally causing it to collapse.
* The Simpsons. Bart turns into a five-year-old Chinese girl named Ping, while

Lisa, who went in after him, turns into Bart.
* The Simpsons, Bart uses a balloon to pull up Groundskeeper Willie's kilt during a "Scotchtoberfest" event and immediately gets busted by Principal Skinner who was using the phony "Scotchoberfest" as a sting operation to entrap Bart. Skinner does this even though the sting operation clearly takes place off school grounds and on a Sunday.
* The Simpsons, Bart visits a defunct spirograph factory looking for Millhouse. Its sole occupant, the spirograph obsessed Mr. S, tells Bart that there's a direct correlation between the decline of spirographs and the rise of gang activity.
* The Simpsons: Bart vs. the Space Mutants: an army of Homer Simpson robot duplicates.
* The Simpsons: Bart vs. the Space Mutants, Bart Simpson can see through the aliens' disguises with X-ray specs.
* The Simpsons: Bart vs. the Space Mutants in his room while struggling with a blanket and ignoring screams from Homer.
* The Simpsons: Bart vs. the Space Mutants, the aliens have a machine that's somehow powered by purple objects. Making this even more ridiculous, the aliens change the power source of the machine each stage to: hats, balloons, exit signs and plutonium rods (the only one that actually makes some sense).
* The Simpsons: Bart vs. the Space Mutants: The premise of the game is Bart trying to thwart an alien invasion.
* The Simpsons: Bart vs. the Space Mutants. Your X-ray specs show which people are disguised aliens.
* The Simpsons: Bart vs. the World has Bart win a treasure hunt around the world by winning a Krusty the Clown art contest. The places he and Krusty visit are Egypt, China, the North Pole, and Hollywood, and along the way, they encounter the relatives of Mr. Burns, who serve as the game's bosses.
* The Simpsons: Bart vs. the World he admits the ghost with Waylon Smithers' face is actually pretty funny.
* The Simpsons: Bart vs. the World: If you collect all the Krusty items, you get to fight Itch and Scratchy.
* The Simpsons: Bart vs. the World includes jumping over drinks that Moe slides down his bar, while catching the power-ups.
* The Simpsons: Bart vs. the World: Ramses Burns is fought while he's flying on a magic carpet. Unlike the other bosses, there's no way to damage him personally, instead you have to unravel the carpet by pulling on a loose thread until he falls off.
* The Simpsons: Bart vs. the World: The final Hollywood level contains skeletons that throw their skulls.
* The Simpsons, Bart was steering while Lisa and Milhouse were operating the gas and brake pedals, and they were doing it kinda randomly. Lisa would push the gas and then Milhouse would push the brake, Lather, rinse, repeat, all without any input from Bart. Milhouse took the opportunity to ask Lisa out.
* The Simpsons be a one-time thing, but ultimately came to love the character. On the DVD commentaries, the producers have recounted many times that he insists on voicing the character whenever he appears, "even if he just burps or sneezes". He's obviously serious, as one appearance amounted to him being choked by a plastic bag.
* The Simpsons became the Thompsons, complete with large-lettered shirts reading "WITNESS PROTECTION PROGRAM".
* The Simpsons before he arranged to set himself up on top of the gang.
* The Simpsons (before Maude's death), Apu and Manjula in later seasons.
* The Simpsons before taking his shotgun and firing at all of the bar stools and booths that had come to life. It cuts to the next scene before showing what happened in the end.
* The Simpsons. Before the episode, she was kicked out of boarding school. During the episode, she steals from the collection plate, which appalls Bart, and frames him for it.
* The Simpsons" began with Bart getting knocked into a coma. How does Lisa break the news to her mother? "Remember how you said you wished we'd stop growing up?"

* The Simpsons booby trap he put there: a giant swinging log on a chain.
* The Simpsons borrow his summer cabin, he left these on everything, complete with "-diddly".
* The Simpsons, both adult shows, are the only animated programs to have been listed in their TV section. And no animated show has been on there since 2002!
* The Simpsons, both Bart and Milhouse were apparently sheep in the school nativity play.
* The Simpsons both Homer's and Barney's cheeks flap when subjected to a centrifuge during astronaut training.
* The Simpsons broadcast: Springfield is terrified of being invaded by Martians. Sideshow Mel tells everyone to take off their clothes and wallow in the mud. That way the Martians will leave them alone, not realizing that they're humans.
* The Simpsons bully Nelson Muntz runs for Class President on the platform of "Vote for me or else."
* The Simpsons), but Abe retires once more after seeing that he's become a bad influence on Bart.
* The Simpsons, but also "22 Short Films about Springfield", and "The Simpsons Spin-Off Showcase".
* The Simpsons but also a big chunk of the things inconsistently found within the city's borders, including three mountains, two subway systems (one abandoned), a bridge that was once the only way out of Springfield, and "Area 51-A".
* The Simpsons - but his part as Burns was only used in one episode ("Homer's Odyssey"), and none of his voice works as Moe was heard in any finished episode (he recorded all of Moe's lines in "Some Enchanted Evening", but Hank Azaria re-recorded the lines late in production, so Chris Latta is only heard as a TV presenter in that episode).
* The Simpsons, but is more excited about the brownie in his hand than the fact that he's meeting a legendary musician.
* The Simpsons. But only a couple at a time are allowed to be badass together.
* The Simpsons, but particularly Dr. Hibbert (who had an afro when Bart was born, beaded cornrows when Lisa was born, and a Mr. T-style mohawk when Maggie was born).
* The Simpsons, but she then used the towels to drain the quarry of water so they can find the body.
* The Simpsons, but still wanting that sweet Hollywood money, Matt hastily sketched a family-based heavily upon his own (including the names). The rest is history.
* The Simpsons, but the kids don't believe her. After Homer defeats the witch by stuffing her in the oven, her handsome boyfriend George Cauldron comes to her house, wondering where she is for their date.
* The Simpsons buying Springfield's public transit, and Brockman is idly staring off-camera, then immediately stares at the camera to give his report, as if he was waiting for the Simpson's TV to turn on.
* The Simpsons by being called the worst person Ned ever met. And if you watch carefully, it looked like the final straw was his glasses breaking.
* The Simpsons by having Homer (in an episode in which he briefly became a grunge-rock star) watch Weird Al parodying his hit song on TV. To take the pop-cultural references one level further, Weird Al now uses a clip of that Simpsons episode as part of the visuals shown in his concerts.
* The Simpsons by having the "top story" edge out an article along the lines of "China Invades US" or "End of The World Imminent".
* The Simpsons by Lisa when Sideshow Bob tries to blow up Springfield with a nuclear bomb after failing to get Springfield to shut down all television broadcasts.
* The Simpsons, by shaking Lisa's present, Bart is not only able to tell that she's getting a sweater, but also that it's hand-knitted, and yellow.
* The Simpsons). By the end of his one episode, he has apparently succeeded in taking over the East Coast of the United States.
* The Simpsons called Americatown, complete with sarcastic waiters dressed as cowboys that state that they don't know anything as a result of America's educational system and also work in producing poor quality cars and inferior

electronics.
* The Simpsons can be heard saying this pretty much whenever he tries to dance or perform any athletic endeavor. "Oop, there goes my waggling finger..."
* The Simpsons can be seen this way, considering it involves Monty Burns holding a wrestling tournament and several Springfield residents take part in it.
* The Simpsons can get jealous when another woman shows interest in Homer, such as Lurleen Lumpkin for example. Luckily for her, Homer is oblivious to all attraction other women have, as Marge is the only woman he loves.
* The Simpsons can't comprehend his role in this horror even when he's told about it (at the absolute best he notices what he did way too late and gives a little "uh-oh").
* The Simpsons category, like being three-wheeled, tiny, running on kerosene, made in countries that no longer exist, needing a push to get started, and still having Cyrillic dashboards (hence "put it in H" for "put it in n(eutral)".
* The Simpsons Channel 6's traffic reporter is Arnie Pie. His news report, done while reporting from a helicopter over the traffic, is called "Arnie in the Sky" (instead of "Pie in the Sky").
* The Simpsons", Chief Wiggum goes down the list of suspects and finds that each one has an alibi or other exculpation.
* The Simpsons": Chief Wiggum has a police master key that opens any door in Springfield. Bart and Ralph steal it and get up to mayhem.
* The Simpsons". Chief Wiggum presents an eyelash for DNA analysis, and the technician warns that it takes eight to ten weeks. Then Wiggum bribes him with a carton of cigarettes, and the technician says "Did I say 'weeks'? 'Cause I meant 'seconds'."
* The Simpsons Christmas episodes, Bart and Lisa have to sneak past security guard Gary Coleman who is having an animated phone conversation. Lisa notices that the phone isn't even plugged in.
* The Simpsons, Cletus is dismayed that his show pig has a zit on the day of a county fair competition.
* The Simpsons come from the faraway planet of Rigel VII (also called Rigel IV in some earlier episodes).
* The Simpsons comes by with a book cart. Homer picks up a book on digging tunnels and says that the book gives him an idea. He then knocks out Moleman by hitting him with the book and runs out the open cell door.
* The Simpsons comes pre-programmed with several different kinds of inane babble.
* The Simpsons comic, an enemy of the Superior Squadron infiltrates their headquarters, and the shocked heroes demand to know how he came up with that plan. Cut to him sitting around reading a magazine while another villain tells him to infiltrate the heroes' headquarters. Flashback over.
* The Simpsons comic book did a parody of it, they got rid of the impossible situations rule. Which led to, among other things, Flanders getting pecked to death by a flock of flying penguins.
* The Simpsons comic-book ends with the townspeople getting drenched in mud and going skinny dipping to wash off.
* The Simpsons comic book story has Homer repeatedly moaning "Selma" in his sleep, which (along with a few other events) leads Marge to the improbable conclusion that Homer is cheating on her with her sister. At the end of the story, it's revealed that Homer has actually been dreaming about a pork festival in Selma, Massachusetts.
* The Simpsons comic book, where Bart says that if he doesn't find the school puma by the next day, he'd be doing detention till he's 80.
* The Simpsons Comic Book, Young Homer and Barney do this to sneak onto the set of a Michael Jackson music video.
* The Simpsons comic series had an Alien Spoof with an Alien Mr. Burns who sported a tongue that looked like Mr. Smithers, who himself sported a smaller tongue looking like the chipper Ned Flanders (which he promptly bites off in annoyance).
* The Simpsons comics, Homer is having trouble untangling the Christmas lights because Snowball II is playing with them.

* The Simpsons comics, Milhouse's dad claims to have a girlfriend onboard the cruise ship everyone is on, and he always uses some excuse whenever anyone asks where she is. Subverted in that he actually does, and she really was just in the bathroom or tired every time he wasn't with her. Used later in a Romeo and Juliet parody, where Romeo (Nelson) claims that Tybalt (Jimbo) is just jealous because he has a real girlfriend. Jimbo replies with the trope.
* The Simpsons comics open like this, with an overly dramatic title page before showing the scene from another angle.
* The Simpsons Comics parodies this in one issue; Chief Wiggum, who thinks he's in a 70's cops sitcom, does one of these with fellow cops Lou and Eddie. The credits begin to "roll," (as much as credits can roll in a comic, anyway...) and everyone is still laughing, although in a freeze-frame state. We then see things outside of Chief Wiggum's delusional state. He alone is "frozen," and standing still in a laughing position while the other cops are staring at him. Lou explains that the credits are rolling to Eddie.
* The Simpsons comics showed Lisa Simpson and Martin Prince engaging in a poetry duel:
* The Simpsons comic story, Marge and Homer begin starring in a series of commercials advertising Marge's home-made spot remover. Then the advertising executives decide to replace Marge with a younger woman, claiming that that is what viewing audiences are used to. To make matters worse, Homer is contractually obliged to do the commercials or the advertisers will sue. Marge is understandably upset about this, but instead of getting mad at the advertisers, she takes her anger out on Homer, even though (as she herself admits) she is fully aware that he is completely blameless in all this.
* The Simpsons comics, when the police dress up as statues to catch "El Barto". Bart and Lisa watch them.
* The Simpsons comic with "Globex Corporation - We Dominate Because We Care".
* The Simpsons coming back, much to everyone's (except Homer) delight.
* The Simpsons, complete with even more nonsensical descriptive words like "MINT!", "POOO!" and "NEWT!"
* The Simpsons concert"). They ended up onstage by interrupting the finale, with Bart performing "Do the Bartman" before they were all shooed off.
* The Simpsons contained a scene where Gaga suddenly kissed Marge on the lips — and then half a second later, #GagaKissesMarge appeared near the Fox logo. Viewers found it more annoying than "helpful" and Fox soon quit the practice.
* The Simpsons convinced that she's ugly. In an attempt to rectify this, Homer enters her in a beauty pageant. Lisa competes, and wins second place. Bart more or less tells her in this episode that she is quite pretty.
* The Simpsons cookie — whose theft will be blamed on Bart if it's noticed at all.
* The Simpsons couch gag involves the family breaking into a museum, where their living room is on display. They're wearing strangely erratically colored jumpsuits and at one point evade guards by standing in front of a Jackson Pollock painting which the jumpsuits match.
* The Simpsons, culminating in an episode where Bush briefly moves to Springfield post-presidency.
* The Simpsons currently have a deal with Fox, wherein they will not put up real advertisements like this on during their show.
* The Simpsons (Data East) uses the normal "three lanes with one lit for points" shot.
* The Simpsons dating, marrying, and eventually knocking up another one. It ends with Troy McClure saying, "And now that you know how it's done, don't do it."
* The Simpsons: Decades ago, Abe Simpson and one of his friends watched one showing Springfield as a "City on the Grow". Flash forward to the present time, showing those days of prosperity are over.
* The Simpsons, "Deep Space Homer": To prove that space travel is within reach of the common man, NASA selects Barney and Homer to go through a training course before one of them gets an actual rocket trip. Once deprived of alcohol, Barney

passes with flying colours and is given a congratulatory glass of champagne. He immediately goes nuts ("It begins!"), chugs the rest of the bottle, grabs a jetpack and flies off. The scientists don't understand, as it was non-alcoholic champagne.
* The Simpsons (despite the tie in question visibly hanging out of his shirt cuff) and Apu starts to wonder if he can trust his eyes. It was all for naught, as Marge was declared guilty.
* The Simpsons did an odd version of this where Marge and Homer were deemed bad parents, and were forced to wear portable pillories 24/7 and then had additional punishments added onto such as standing next to a road while motorists spanked them as they drove by.
* The Simpsons did it at the end of "Bart the Murderer." Bart has gotten declared innocent for the murder of Principal Skinner when a very alive Skinner storms into the courtroom and asserts his innocence. Bart then opines that crime doesn't pay, and Fat Tony sadly agrees ... before he and his men climb back into their huge expensive limousines to drive away.
* The Simpsons did it when Homer was believed to have eaten a poisoned fish at a Japanese restaurant.
* The Simpsons: Discussed by Marge in "A Hunka Hunka Burns in Love". She states that she can't stand seeing someone she knows being single, and when Lisa argues that some people enjoy the single life, insists that "everyone should be paired up".
* The Simpsons does this regularly. Often the episode starts out with a plot that seems to be going one direction, but then a side detail creates a new plot that may focus on different characters. For instance:
* The Simpson's dog Santa's Little Helper is usually voiced by Dan Castellaneta, but in a few episode where he has a major role,
* The Simpsons do it all the time, whenever a problem or commotion happens in Springfield (which may or not have been caused by the Simpsons), one or two of Simpsons take the initiative to solve it or get other people in Springfield to help in doing something about it.
* The Simpsons ("Don't Have A Cow, Mankind"). The Simpsons have just fled the overrun town and are wandering the woods in search of the "Safe Zone". They encounter a ragged, crazy-looking survivor.
* The Simpsons' "Do the Bartman" works like this; it's not clear that Bart has only been imagining changing the music and taking over the recital till the end.
* The Simpsons: Dr. Nick advertises with the line "If I kill you, you don't pay!"
* The Simpsons Dr. Nick once tries to revive a goldfish belonging to Ralph Wiggum using these. The nurses refuse to let him try, but he still has them charged up. Then circumstances involving some poorly place wires and the water inside the goldfish bowl result in Drs Nick and Hibbert getting shocked, along with the goldfish, which is miraculously revived.
* The Simpsons' Dr. Nick Riviera: "You've tried the best, now try the rest!"
* The Simpsons" (due to him finding the idea of a beer baron operating under his nose without getting caught "laughable"), he fails miserably.
* The Simpsons. During a school assembly introducing new principal Ned Flanders, he asks if there are any questions. Jimbo nudges Kearney, telling him to ask a question or else they'll all have to go back to class. Kearney asks what the new principal's policy is on lunch.
* The Simpsons. During a standoff between Homer, head of "Springshield", and Fat Tony:
* The Simpsons. During "Bart Versus Australia", Marge and Lisa visit a statue of a convict while Homer and Bart are in court. Marge reads the inscription on the statue noting its past as a penal colony and tells Lisa to watch her purse just as a group of locals are about to rob them. Further adding to the gag, the statue is of an ancestor of Springfield's own resident criminal Snake.
* The Simpsons during its early years for contributing to the alleged downfall of society, a lot of viewers have stated that this episode had political undertones.
* The Simpsons during the all-singing clip show when Homer says, 'Singing is the lowest form of communication." Marge says, 'But you sing all the time," and Homer

replies, "No I don't, I hate to rhyme."
* The Simpsons: During the annual company picnic Mr. Burns gets a very quiet "go" from Smithers in the sack race before everyone else. They all know that Burns is supposed to win the race.
* The Simpsons during the initiation for the Stonecutters. First, there was "Crossing the Desert" (where a blindfolded Homer was struck repeatedly on the behind with wooden paddles) and then, "The Unblinking Eye"...
* The Simpsons earliest season isn't from the 1991-97 era, which everyone considers the best.
* The Simpsons: Early episodes had Lisa and Bart as a classic Straight Man And Wise Guy pair, especially when they investigated mysteries together. Usually, Lisa would compare the situation to some historic moment or classical literature, and Bart would make a joke about it:
* The Simpsons East Germany, revealing that his story of coming to America by cartwheeling over the Berlin Wall in a previous episode may have not been what it seemed.
* The Simpsons, Ed Begley Jr. designed a go-kart powered by his own sense of self-satisfaction. It worked very well.
* The Simpsons." Edna Krabappel is one of the best known examples of this trope.
* The Simpsons ends up falling for Marge, while his frigid, controlling wife falls for Patty.
* The Simpsons" ends with a picture of the winning Springfield Nuclear Power Plant softball team, including the members whose fates were unfortunate.
* The Simpsons end with the characters interacting with the shushing woman in the Gracie Films logo after the end-credits (often in reference to something which has occurred in the episode itself). In some instances, the characters respond directly to the woman (eg: "Bart Star", which has Homer yelling, "You're cut too, shushy!"), while in others the "shhh!" itself is substituted with dialogue from the episode (eg: "Homer the Great", where Carl's "Shut up!" is heard in its place). In addition, for the Treehouse of Horror episodes, the normal Gracie Films music is replaced by a spooky organ version and a shriek.
* The Simpsons entered in a reality show in which they have to live in the lifestyle of the 1900s.
* The Simpsons episode, after Homer and Marge got a Kama Sutra book from Apu and Manjula during a fight between the two (long story short, Apu never told her that Americans weren't required to work on weekends until Homer and Marge brought it up, which left her upset at Apu as it made it seem as though he didn't wish to see her). Marge ended up taking over driving when it became apparent that Homer was far too distracted with the Kama Sutra book to pay attention to driving, and eventually Homer points out that the book stole one of their ideas in the book, beckoning to Marge to see it, causing Marge to get distracted enough to have an implied rear ender.
* The Simpsons episode "A Kind of a Stopwatch"), after breaking a magic watch and stranding themselves in stopped time, Bart and Milhouse raid a bookstore and spend ten years teaching themselves watch repair, finally returning to normal time as adults.
* The Simpsons episode "A Tale of Two Springfields" has Bart refer to a "Novelty Flying Disc".
* The Simpsons episode "Barting Over", Bart gets legally emancipated from his parents after learning that when he was a baby, Homer put him in an embarrassing series of mouthwash ads where he played "Baby Stink-Breath", and subsequently squandered what should have been Bart's royalties.
* The Simpsons episode "Bart's Comet". A comet is about to strike Springfield and so the entire towns' population tries to cram into Ned Flander's bomb shelter. They somehow manage this, but can't get the door closed. After arguing about who should be sacrificed Homer points out that the one skill future society doesn't need is the ability to sell left-handed products, so Ned gets thrown out of his own shelter. Eventually they all feel guilty about this decision, so leave the shelter to die with him. The comet ends up striking the bomb shelter and destroying it.

* The Simpsons episode "Bart Sells His Soul", Bart dreams that the other kids are playing with their souls and he's all alone. Nelson at first appears to sympathize with Bart, but he's really playing this prank with his own soul.
* The Simpsons episode "Bart's Friend Falls In Love", Milhouse takes his girlfriend to the treehouse. When she asks if Bart has any girl comics for her to read, Bart says he doesn't but his sister has a wide collection of crappy comics.
* The Simpsons episode "Bart's Friend Falls in Love" when Milhouse falls for the new girl at Springfield Elementary, it irritates Bart to the point he indirectly gets her sent to an all girls school.
* The Simpsons episode "Bart's Girlfriend", Bart hears angelic singing coming from the Springfield church, and assumes that it's Jessica Lovejoy. Turns out it's Ned Flanders.
* The Simpsons episode "Bart's Girlfriend", Jessica Lovejoy serves as one to Bart Simpson. She pretends to befriend and fall in love with him, only so she can act as bad as she wants; knowing that if she gets caught, she can always blame Bart and let him take the fall. If not for Lisa, it would have worked.
* The Simpsons episode "Bart's Inner Child", Otto's inattentiveness and Willie's laziness causes the Ferris wheel to break loose and run amok through Springfield's "Do What You Feel" festival.
* The Simpsons episode "Bart the Fink" features the law firm of Dewey, Cheatham, Howe and Weissman.
* The Simpsons episode "Bart vs. Lisa vs. the Third Grade". When Bart and Lisa go missing during a field trip, Groundskeeper Willie tearfully chisels their names on the school's Field Trip Memorial: "Ach. Why is it always the kids with the long names?"
* The Simpsons episode "Black Widower" shows a flashback of Sideshow Bob and Selma's relationship. During one of Selma's visits to Bob in prison, the two witness another prisoner kissing his visiting girlfriend through the glass window. Sideshow Bob offers to kiss Selma through the window in the same manner as the other couple, but Selma only agrees to a kiss on the cheek.
* The Simpsons episode "Brick Like Me" was about the family (and various other residents of Springfield) turning into LEGO bricks. Justified as the episode was intended to be an advertisement to the recently-launched LEGO Simpsons range.
* The Simpsons episode "Brother from Another Series" after Sideshow Bob is released from prison:
* The Simpsons episode "Brother From Another Series" revolves around this trope as Sideshow Bob is reformed and helps thwart his brother, Cecil. Unfortunately, Bob is still arrested and basically gave up on being good.
* The Simpsons episode "Brother From The Same Planet" had a vengeful Bart abuse the Bigger Brother program and get a brother named Tom. When he and Homer (who did his son one better by getting a little brother named Pepe) are at an amusement park with their new brothers and run into each other, Tom warns Bart not to talk to strangers, to which he identifies himself. Now angry, he asks if he's the "drunken gambler" that his son told him about and after he blithely replies that he is, Tom strikes the first blow.
* The Simpsons episode "Brother from the Same Planet" when Homer and Bart's 'bigger brother' Tom have a brawl in the aquarium. After the tank is shattered, they use the starfish as shuriken.
* The Simpsons episode "Bull-E", Homer is arrested and walked for being a bully. However, Homer had just set up a Slip 'N Slide in the front yard, and so he slips and slides straight into a police car.
* The Simpsons episode "Burns' Heir," a man is told Bart has been brainwashed by Mr. Burns and has to reprogram him. He tries to do this in the room 101 of a motel.
* The Simpsons episode "Burns Verkaufen der Kraftwerk," the new owners of the nuclear power plant assess Homer's usefulness. It goes about as well as you'd expect.
* The Simpsons episode "Children of a Lesser Clod" (the episode where Homer starts a home day care center after breaking his knee in a basketball accident), one of the video clips of how much of a horrible father Homer is to Bart, Lisa, and Maggie

shows Homer betting Maggie in a poker game — and losing her to Moe Szyslak.
* The Simpsons episode "Dancin' Homer" revolves around Homer's extremely short-lived fame as a mascot for the Springfield Isotopes. He was beloved in small-town Springfield for a few games, but when he was traded to Capital City, the jaded big-city people took to this trope big time and booed him off the stage.
* The Simpsons episode "Deep Space Homer", when Kent Brockman is welcoming Earth's "new insect overlords" he volunteers to help round up slave labour for their "underground sugar caves".
* The Simpsons episode "Deep Throats" showed Cleveland flipping off Brian after Brian drives by Cleveland uncensored, which also got a TV-14 rating (keep in mind both shows air on the same network).
* The Simpsons episode dolphins invade the land and take over. They can speak English.
* The Simpsons episode "Dumbbell Indemnity", Homer in prison finds a book from Hans Moleman titled "How To Tunnel Out Of Prison". He says it could be useful...and promptly hits Moleman with it allowing him to escape.
* The Simpsons episode "Eight Misbehavin'", Homer enters the Kwik-E-Mart to find Apu sitting in the ice cream freezer:
* The Simpsons episode "Eight Misbehavin'", the family describe what happened to them during a nine-month mid-episode time-skip. Lisa reveals that she became the most popular girl in school, "but then blew it by being conceited."
* The Simpsons episode "Flaming Moe's". Moe's bar, temporarily tremendously popular due to Moe's appropriation of Homer's drink, the "Flaming Homer", possesses a man going by "Hugh Jass", the fake name that Bart chose to prank the bar with. Jass good-naturedly allowed Bart to bail on the failed prank call.
* The Simpsons episode "Fraudcast News", Willie notes that the new tractors are all "shite". They got away with this in the first airing, but that line was cut in all subsequent broadcasts.
* The Simpsons episode "G.I. (Annoyed Grunt)" had a parody of this trope, where the Colonel ended up leading the Army unit to invade Springfield due to Homer Simpson and his unit going AWOL, going from trying to get the civilians to capture Homer's Unit (although they didn't capture Homer), and eventually locking up all of those who were either fat, bald, and/or were ever amused by the antics of Homer Simpson. His second in command also tried to convince him to call off the invasion, feeling it's gone far enough, especially seeing how the entire operation cost the military $15 billion just to continue. Eventually, he did end up surrendering due to a hangover. Also, the reason why Homer's unit went AWOL in the first place was due to their being in COMPNOR, which meant they were to be tested with weapons. Unfortunately for Homer and his unit, the Colonel in question seemed to think that they should test them with live weapons rather than simulations.
* The Simpsons episode "G.I. D'oh", when Bart announces that he's going to join the Army when he turns 18, and Marge is conveniently carrying a bust of Homer.
* The Simpsons episode "Guess Who's Coming to Criticize Dinner?", after Homer insults a chef's cooking, he attacks Homer with a meat cleaver. Homer thinks all his strikes missed, only to discover he has a chunk cut off one of his ears.
* The Simpsons episode "Guess Who's Coming to Criticize Dinner?", the first restaurant review Homer submits mostly consists of non sequitur and random rambling:
* The Simpsons episode had the chorus of a revue declare: "We took Nick at Nite and made it a town!")
* The Simpsons episode has a pile of Bart Simpson dolls appear as one of the many things in a gigantic (indeed, celestial) ball of garbage. Groening cameos as himself, the creator of The Simpsons as well as his new hit about life in 1,000 years, Futurella. Eventually the characters meet each other via time travel, and Bender shuts down in The Simpsons' basement to reawaken in his own time, and is sometimes seen in later episodes of that show.
* The Simpsons episode has Kang and Kodos coming to Earth to share their alien technology, which includes the most advanced video game they'd ever created: Pong.
* The Simpsons episode "Haw-Haw Land" features a sub-plot of Bart gaining an

interest in chemistry, which starts when a man approaches him and asks if he'd like him to show him something. Before the man clarifies that he is a chemist, Bart asks the man if he is a pervert.
* The Simpsons episode "Hello Gutter, Hello Father", the bullies can be seen flipping the camera off in the background during the news report.
* The Simpsons episode "Holidays of Future Passed", it seems they have figured out how to make pop-up ads out of the stars themselves!
* The Simpsons episode "Holidays of Future Passed," people will be able to read thoughts in the year 2041.
* The Simpsons episode "Homer Alone," Marge treats herself to a spa visit but is too worried about her family to relax. While taking a long hot bath, she finally unwinds, allowing herself and her towering hairdo to gradually sink beneath the surface of the water. When she comes back up, both she and the hair have loosened up.
* The Simpsons episode "Homer at the Bat" had Burns attempting to improve the plant baseball team by hiring a hypnotist:
* The Simpsons episode "Homer Badman" The sensationalist news media turns the whole town against Homer, convincing everyone that he sexually harassed his kids' babysitter.
* The Simpsons episode "Homer Goes to College". Mr. Burns uses one to escape the plant during a meltdown, and it crashes in the parking lot. It's built for two and he won't let Smithers in because he likes to rest his feet.
* The Simpsons episode "Homer of Seville", Homer's stalker Julia uses a blowgun concealed in a conductor's baton.
* The Simpsons episode "Homer the Heretic" subverts it: Ned and his family pursue Homer in a car; Homer attempts a Train Escape and just makes it across at the last moment, but Ned manages to jump through an empty boxcar to continue after him.
* The Simpsons episode "Homer The Vigilante": the police are investigating a series of robberies (not murders) using the map technique. After the titular family reports theirs and the police add it to the map...
* The Simpsons episode "Homer vs. Dignity," where Homer gets molested by a panda.
* The Simpsons episode "Homer vs. Patty and Selma", Homer is forced to borrow money from Patty and Selma. They agree to help him out on the condition that he become their slave until he repays the debt. They then begin smirking and laughing, and Homer chuckles a little with them at first. Eventually he starts to genuinely laugh more so than those two, who then get a little annoyed at him.
* The Simpsons episode "How I Spent My Strummer Vacation," in which Homer goes to a Rock 'N' Roll fantasy camp:
* The Simpsons episode "Hurricane Neddy" features many impossible features.
* The Simpsons episode "Hurricane Neddy": When Ned's house gets destroyed by a tornado and the town rebuilds it there are several oddly shaped doors because the townsfolk who rebuilt his house don't actually know anything about building houses.
* The Simpsons episode "I'm Spelling as Fast as I Can" has Lisa competing in the "Spellympics", until the host, George Plimpton, asks her to take a dive in order for her competitor to win, promising her a free scholarship to any college (and a free George Plimpton hot plate) if she does. When Lisa is about to do it, Homer arrives to cheer her on, and she confesses she was told to take a dive- only to accidentally misspell the word.
* The Simpsons episode inverted the trope with two American missionaries in suits showing up in an airport in India and a Hare-Krishna muttering: "Oh, great... Christians."
* The Simpsons episode "It's a Mad, Mad, Mad, Mad Marge", Otto holds up a boombox and plays a song for his girlfriend at a drive-in.
* The Simpsons episode "Kamp Krusty", Homer and Marge have a scene like this after Bart and Lisa leave for camp.
* The Simpsons episode "Kill The Alligator And Run" sees the entire family (yes, even Maggie) sentenced by the State of Florida to forced labor on a chain gang after Homer kills an alligator named "Captain Jack" (the Florida town's most famous resident) and addresses the jury at their trial as "Drunken Hicks."

* The Simpsons episode "King Leer", Moe becomes a mattress salesman and gets involved in a war with his siblings and their competing mattress stores. One of the acts of sabotage he commits is removing all the tags off the competition's inventory. Unlike most of these examples, this is a non-trivial action because the mattresses cannot legally be sold without that tag.
* The Simpsons episode "King of the Hill" simultaneously plays this straight and subverts this in a few ways with Bart and Rod Flanders picking teammates for a game of Capture The Flag. Bart picks Nelson over his best friend Milhouse, who naively comments on how he must be "saving the best for last." Rod, on the other hand, chooses his brother Todd as his first pick.
* The Simpsons' episode "Krusty Gets Kancelled", his rival show is hosted by a ventriloquist and his puppet Gabbo. When their show collapses, we see a newspaper subheading reading "Gabbo to have 'Real Boy' operation".
* The Simpsons episode, Lisa accidentally creates life when the tooth she soaks in cola gets zapped by electricity. The resulting highly intelligent lifeforms are the size of bacteria and live inside a petri dish.
* The Simpsons" episode, Lisa is seen wrapping up the original story with Bart in the treehouse with this trope, but Bart is less than impressed.
* The Simpsons episode "Lisa's Wedding" has a holographic image of a tree shown with the description "In memory of a real tree", as apparently all real ones are extinct.
* The Simpsons episode "Lisa's Wedding". Set in the future, trees are apparently extinct, as shown by a holographic image of a tree, with the description: "In memory of a real tree."
* The Simpsons episode "Lisa the Beauty Queen", Laramie Cigarettes sponsor the Little Miss Springfield Pageant.
* The Simpsons episode "Lisa the Vegetarian", Lisa is served lamb chops, but then she imagines a live lamb saying, "What did I ever do to you?".
* The Simpsons episode "Lisa the Veterinarian" has a subplot where Marge becomes a crime scene cleaner for the police department. Her first job involves one of these (the police warn her about the scene, she looks around the apparently corpse-free room, and then body parts start falling from the ceiling).
* The Simpsons episode "Lisa Vs. Malibu Stacy", as Grandpa Simpson gets confused by the conflicting dialogues:
* The Simpsons episode "Marge Be Not Proud", this was initially Marge's reaction when Bart was confronted for shoplifting during a family Christmas photo. But when the security guard shows her the undeniable proof, all bets are off.
* The Simpsons episode "Marge Gets a Job", Marge's new office at the nuclear plant doesn't have a key to the door because it was lost. Instead of replacing the lock, Smithers just tells Marge she can get in with a credit card.
* The Simpsons episode "Marge vs. The Monorail", Marge goes to North Haverbrook, the town Lyle Lanley sold a monorail to before Springfield. She finds the town nearly deserted after their monorail crashed on its maiden voyage.
* The Simpsons episode "Margical History Tour" features Lenny and Carl as Lewis and Clark, exploring the American Northwest, and Lisa as Sacagawea, the native woman who helped them — or, in this case, tried to help them, but gets frustrated by their stupidity.
* The Simpsons episode "Mobile Homer", a Turkish sea captain said Marge "dressed like a Lebanese Prostitute".
* The Simpsons episode "Mommie Beerest". It's Homer making the drive, but it's not really an example since he had just convinced himself that Marge liked Moe better when, naturally, she didn't.
* The Simpsons episode "New Kids on the Blecch", Lt. Smash says "Permission to say that's crazy, sir!"
* The Simpsons episode "O Brother, Where Bart Thou", Bart wants a baby brother, so Milhouse gives him his parents' Kama Sutra instructional DVD to plant in the DVD player in Homer and Marge's room. Their attempt at "Congress of the Crow" results in them screaming loud enough for all the icicles on 742 Evergreen Terrace to fall off, with Homer's arm in a sling and Marge wearing a neck brace the morning after.

* The Simpsons episode "Poppa's Got a Brand New Badge", Homer lists all the jobs he's had up to that point, all while Marge gets all her curlers into her hair.
* The Simpsons episode "Pranks and Greens", Bart makes friends with the school's former resident prankster. When he takes his hat off, revealing a bald head with a small tuft of hair in the front, Bart tells him to keep it on.
* The Simpsons episode "Pranksta Rap", Bart fakes his kidnapping to cover up that he snuck out to a rap concert. When Lisa finds the shirt Bart got at the concert, she shows it to Homer.
* The Simpsons episode "Radioactive Man", when a group of Springfield children see a painter on a movie set painting black spots on a horse to make it look like a cow.
* The Simpsons episode "Radioactive Man", where the channel breaks occur every syllable:
"Ev"-"er"-"y"-"one"-"is"-"tal"-"king"-"a"-"bout"-"Ra"-"di"-"o"-"act"-"ive"-"man"-"y 'all."
* The Simpsons episode "Radio Bart", where Bart pretends to (and the later, for real) fall down a well. Kent Brockman attempts to interview Homer on the air...
* The Simpsons episode "Realty Bites", Marge wants to become a real estate agent, so Bart and Lisa help her study for the big test. The kids create a game where they are a married couple looking for a house and Marge is their real estate agent.
* The Simpsons episodes "22 Short Films About Springfield" and "The City of New York vs. Homer Simpson" is said to have been based on writer Ian Maxtone-Graham.
* The Simpsons episodes can dip into this. Many of them manage to be genuinely creepy while still having all the hallmarks of the show's humor.
* The Simpsons episode "Secrets of a Successful Marriage" after Marge has kicked Homer out of the house for spilling secrets about their sex life, when we next see Homer he has a long scruffy beard, his clothes are tattered and dirty, and has lost a couple pounds which would imply he's been living outside for months, but Marge states he's been out for one day.
* The Simpsons episode "Selma's Choice": while on the way to Great Aunt Gladys's funeral, the family, with Patty and Selma, stop at a Greasy Spoon diner with a buzzing sign called "The Buzzing Sign Diner."
* The Simpsons episode "Separate Vocations" has Bart becoming a hall monitor and Lisa becoming a delinquent after seeing the results of their aptitude tests. When Lisa steals the teachers' answer guides and Bart finds them in her locker, Bart decides to take the blame because he knows that his sister is better than this and doesn't want her to throw her life away.
* The Simpsons episode ''Sideshow Bob's Last Gleaming", Bob attempts to detonate a nuclear bomb, only for it to go off with a disappointing fizzle and fall apart, revealing a family of mice and a 'best before' date of 1959.
* The Simpsons episode "Sideshow Bob's Last Gleaming", Sideshow Bob builds a miniature model of Westminster Abbey, which collapses from the sound of people laughing at the Krusty the Klown Show.
* The Simpsons episode "Simpson Safari", when the family gets stuck on a river, Homer gets leeches on his arm and even a giant one latches onto his other hand!
* The Simpsons episode "Simpsons Bible Stories," a pig in the Garden of Eden introduces himself as a source of bacon. Adam and Eve proceed to tear strips off his back.
* The Simpsons episodes often depicted mundane businesses that employ large, zealous, hyper-vigilant security forces.
* The Simpsons episodes still have a massive following. Just look at their view count on Simpsons World compared to all the other episodes.
* The Simpsons episode "Stop the World, I Wanna Goof Off", while Lisa was messing with a reality changing watch; Homer, Bart, Marge and Maggie are briefly gender bent.
* The Simpsons episode "Supercalifragilisticexpeali(Annoyed Grunt)cious", after Sharry and Bart and Lisa clean up the room by shoving everything in the closet, under the bed and under the rug, as soon as they close the door, everything spills back out, making the room messier than it started out.

* The Simpsons episodes. "We can do anything now that scientists have invented magic!"
* The Simpsons episode "Tales from the Public Domain," Homer starts the Joan of Arc story by saying the Hundred Years War was originally called "Operation Speedy Resolution."
* The Simpsons episode "The Blunder Years" revolves around Homer having a repressed memory of discovering the corpse of Waylon Smithers' father when he was a teenager.
* The Simpsons episode "The Boy Who Knew Too Much", one of Mayor Quimby's nephews stands accused of beating up a waiter. Bart, who witnessed the event, reveals that the waiter actually had a series of clumsy accidents. The waiter denies it ever happened, only to suffer a series of similar accidents right there in court.
* The Simpsons episode "The Burns and the Bees", Lisa creates a bee sanctuary to combat CCD, which Groundskeeper Willie says is caused by loss of habitat.
* The Simpsons episode "The Crepes of Wrath", Albanian child spy Adil Hoxha is exchanged for an American child spy.
* The Simpsons episode "The Curse of the Flying Hellfish," Abe Simpson's WWII military unit was revealed to mostly consist of the fathers of male Springfielders, including those of Chief Wiggum, Barney Gumble, and Seymour Skinner — all of whom looked and acted exactly like their sons (even though Sheldon Skinner was later revealed to not be Seymour's biological father).
* The Simpsons episode "The Day The Earth Stood Cool", a "cool" new family moves in next door and Homer tries to be like them. Guess what this family consists of. As more of them arrive, Homer starts to find them annoying but the episode ends with the entire town embracing their aesthetic and Springfield declared the coolest town in America. Which is, of course, the point at which the original family decide Springfield's "played out", and they should move.
* The Simpsons episode "The Day The Earth Stood Cool" dealt with a "cool" new family moving in next door bringing in lifestyles like breastfeeding, retro fashion and natural substances. Springfield gets overrun by these hipster types and are adopting their lifestyles. When New York Times declared Springfield the "coolest city", all the cool people moved out when the town has been "played out".
* The Simpsons episode "The Frying Game" has Marge and Homer in jail together, in a cell whose bars are clearly too close together for Homer but Marge could walk right through them. She doesn't, making this a Serious Type.
* The Simpsons episode "The Mansion Family", in which Homer is the only person who does not earn a Springfield Pride Award. He gasps in anticipation when it is said the next winner "brings laughter and joy to the children of Springfield", even though he is not known for anything like that. He still stands up and adjusts his tie when it is said the winner has a "red nose" and "baggy pants" and it is not until the winner's name is announced that he realises he has not won.
* The Simpsons episode "The PTA Disbands", the bus Bart's class takes to a field trip has such bad brakes that Principal Skinner has the students hold their shirts out the windows to use as drag chutes.
* The Simpsons episode "The Secret War of Lisa Simpson" has a filmstrip that ends with the phrase "The moon belongs to America, and anxiously awaits the arrival of our astro-men. Will you be among them?"
* The Simpsons episode "Thirty Minutes Over Tokyo" may have been banned (which, of course, was also banned in Japan itself) because it contains a lot of Japanese elements that are usually forbidden from airing over terrestrial signals in South Korea.
* The Simpsons episode "Treehouse of Horror VI" shows Krusty the Klown in the persona of the Headless Horseman.
* The Simpsons episode "Treehouse of Horror X" has Bart and Homer on a rocket filled with second-rate celebrities headed straight toward the sun. Rather than deal with their singing, Homer ejects himself and Bart into space, where they explode with a happy sigh.
* The Simpsons episode "Two Cars in Every Garage and Three Eyes on Every Fish", Burns is furiously trashing the Simpson home and tries to flip over a table, but he is too frail to do so and makes Smithers do it for him.

* The Simpsons episode (up to the end of season 17 anyway, when the DVD boxsets were discontinued) and movie that he has been involved in has a commentary track on the DVD, and he is personally on most of them.
* The Simpsons episode when Maude Flanders dies, Homer tries to make Ned a dating video...not fully taped over a recording of Marge giving birth to Maggie.
* The Simpsons episode where Bart and Lisa wrote episodes for Itchy and Scratchy with Grandpa's name on them.
* The Simpsons episode where Bart opens a can of "Carrot Cat Food" which is advertised as 88% ash 12% carrots. They are actually quite common ingredients, though certainly not in those proportions. Snowball II is understandably disappointed when the food lands in her dish with a puff of gray dust.
* The Simpsons episode where Homer and Barney visit the Duff brewery they see an old Duff ad that has a pleasure center directly targeted by Duff beer.
* The Simpsons episode where Milhouse's parents get divorced, Luann carefully boxes up all of Kirk's possessions, tapes it, labels it and then sets the box on fire. While humming.
* The Simpsons episode, where most of the kids at the school have been killed and eaten and Bart and Lisa are in mortal danger. Since the specials are non-canon, however...
* The Simpsons episode where she exposes founder Jebediah Springfield as an evil pirate named Hans Sprungfeld, Sprungfeld actually wore a silver tongue because his real one got bitten off by a Turk.
* The Simpsons episode where the family goes to Australia, Bart calls a boy in Australia to ask which direction the water in the sink is flowing. The boy has to check with his neighbour who lives many miles away, so he places Bart on hold and spends half the day visiting his neighbor and going back to answer the question. By the time he gets back Bart had already gone to bed and no longer cared about the question at all.
* The Simpsons episode "Worst Episode Ever" sees Bart and Milhouse uncover a secret room in Comic Book Guy's shop which houses a secret stash of bootleg videos and other illegal video clips. Among the video titles mentioned are "Alien Autopsy" and "Illegal Alien Autopsy".
* The Simpsons, especially during its golden age in the 1990s, was a master at this trope. The writers often refer to jokes built on double subversion (as well as jokes built on simple subversion) as "screw the audience" jokes.
* The Simpsons even after Bart survives the suicide attempt. Plenty of people in real-life have been tormented to the same degree as Bart in this scenario and have often died because of it.
* The Simpsons even if it's obviously fake, like Homer's interview on "Rock Bottom" having sound-bites edited into a confession (even though you can see the clock and scenery in the background keeps jumping around).
* The Simpsons example. After Homer tells the story of how Bart and Lisa used to fight, he continues to tell related stories, until eventually Bart tells him to be quiet, with Lisa adding that he's had three natural endings already.
* The Simpsons example (see below) shows a gross exaggeration of the subtler way these turds get polished.
* The Simpsons Examples include Lisa about to point it out on a US map just before Bart walks in front of the camera and a celebrity cameo flying to Springfield by going to the airport and buying a plane ticket to "the state where Springfield is located."
* The Simpsons explosion, and on the next review he finds and erases the "Dynamite" component from the diagram.)
* The Simpsons expressed disdain for this practice on the show's season one DVD set.
* The Simpsons faded into obscurity, many younger fans would know the song only as "Sideshow Bob's theme", not realizing that it was a homage to an older piece.
* The Simpsons/Family Guy crossover has Stewie watching Bart make a prank call to Moe. Afterwards, Stewie tries it and says, "Hello Moe? Your sister's being raped." and hangs up. Bart's

* The Simpsons family itself; there are two boys (Homer and Bart) to the family (three female members, two male members).
* The Simpsons fandub parody "Redeath". Not bad for a Presidential hopeful who lost badly and immediately faded out.
* The Simpsons featured a master criminal hypnotist named Sven Golly, who used his hypnotic abilities to manipulate others for his own gain or amusement.
* The Simpsons featured Homer forming a vigilante group to fight crime. At one point he recruits Jimbo (who calls the group "the drunken posse") on the basis that he can swing a sack full of doorknobs. Homer later gives an interview to the local news:
* The Simpsons features Mr. Burns being crushed by a robot. He hobbles as fast as he can — straight ahead, in the direction the statue is falling, rather than a few steps to the side, which would have allowed him to avoid it entirely.
* The Simpsons filled with continuity errors, with a computer juuuust out of reach, preventing him from going online to complain.
* The Simpsons first episode, was not going well due to animation and continuity problems. Because of this, the series premiere was delayed to December, so the first episode ended up being "Simpsons Roasting on an Open Fire".
* The Simpsons. Flanders chases Homer across Springfield, leaping over obstacles. Homer gets into an elevator and bounces off the walls as he waits to arrive at the top. Then the two steal horses, which proceed to practice Parkour themselves, jumping off cars and springing off walls.
* The Simpsons, Flanders recognizes Moe as the guy who reads to children at the hospital. The latter's response?
* The Simpsons fly home from Japan, the Chuck Yeager pilot keeps his cool even when the plane is grabbed and shaken about by Godzilla.
* The Simpsons focusing on Bart Simpson, and a few one-shots for characters like Lisa, Ralph Wiggum, Mr. Burns, Radioactive Man, Maggie, and Duffman).
* The Simpsons forgiven him... by elbowing him hard in the gut instead of in the face.
* The Simpsons for help with his money troubles when he doesn't want Marge to know the truth. Patty and Selma have fun with this.
* The Simpsons for his childhood by burning a box of his old toys and casting it out to sea.
* The Simpsons for lunch on Valentine's Day. Needless to say, this did not make things more romantic.
* The Simpsons: For most of the series' run, Bart and Principal Skinner have carried a relationship of cordial rivalry, although this is subverted by the fact Skinner asserts little to no actual authority over the school's students.
* The Simpsons for part 2 that they intentionally tried to leak the Smithers ending to the media, but they couldn't find a news source that was dishonest enough.
* The Simpsons for punishment. They're in the living room, watching TV.
* The Simpsons for why she didn't bother to just walk across the room and get them back.
* The Simpsons", Frank Grimes goes so insane at Homer winning the Nuclear Plant design contest that his final act is to grab a pair of live high-voltage power terminals, which immediately electrocutes and fries him. Homer and the rest of the plant staff can only cringe in disgust. (And this is considering Homer has fallen down Springfield Gorge, gotten hit by lightning, hit by baseball bats, etc.)
* The Simpsons, Frank Grimes's son tries to kill Homer, since Homer's idiocy indirectly killed Frank in an earlier episode.
* The Simpsons frequently displays this behaviour towards donuts and beer:
* The Simpsons: Frequently representing the Simpson family until 1998, Lionel Hutz (AKA Miguel Sanchez, AKA Dr. Nguyen Van Phuoc) is an unscrupulous, unqualified failure, and the only lawyer willing to represent Homer in his various trumped-up junk lawsuits (e.g., this exchange from "New Kid On the Block"):
* The Simpsons Frink welding a comically large sheet of spiky metal over it.
* The Simpsons. From "Bart the General", Bart and Milhouse parade Nelson, tied up in the wagon. Lisa stands in the street surveying the damage, when a soldier boy

rushes up and kisses her, the moment captured forever in a photo. Lisa slaps him and yells, "Ewww, knock it off!"
* The Simpsons Game attacking the Simpsons house. It starts moving around, firing then stops, prompting Bart:
* The Simpsons Game, Comic Book Guy gives this exchange in the level "Around the World in 80 Bites":
* The Simpsons Game Homer can transform into Homer Ball, Gummi Homer, and Helium Homer. A few of the other family members have transformations too, including Bart.
* The Simpsons Game is definitely a good example of "There Is No Fourth Wall". After the first level (which is a direct reference to the "Land of Chocolate" daydream from the German episode) Bart finds a videogame user's manual for the very game we're playing right now, and through that manual, discovers that each member of his immediate family has some kind of videogame superpower.
* The Simpsons Game, Marge's superpower is a megaphone that lets her incite non-police civilians into an angry mob, and the sic them on everything from the police, to busting down walls. Depending on the person you convert, you get torches, pitchforks, clubs, pipes and other things. In her three levels and the hub world in the Xbox 360/PlayStation 3 version of the game, you can recruit pretty much all the other recurring characters, the Flanders siblings and Ralph Wiggum as hobbits, and anthropomorphic dogs.
* The Simpsons Game, Mr. Burns wants to cut down every tree in Springfield, and turn each into luxury toothpicks.
* The Simpsons Game. Much like the game it parodies from, the player first has to find the weak points (by using Bart's slingshot to knock open the panels on the back of the statue) then find a way to get high enough to press the buttons (either by gliding from a high point as Bart, or having Homer suck helium and ballooning his way up to the weak points). There are three such buttons, each one needing to be found and pressed to take the boss out, while the player avoids the statue's lasers and evil Krusty dolls attacking them.
* The Simpsons Game one of Homer's powers is inflating himself in which he'll say random dialogue in helium speech. "I'm slightly lighter than air".
* The Simpsons Game, the Scratchy enemies in the "Grand Theft Scratchy" level will occasionally quip "I like eggs..." when KO'd.
* The Simpsons Game this, as pointed out by Comic Book Guy as a Video Game Cliche.
* The Simpsons Game twice. Early in the game, the manual for the game itself falls in front of Bart which helps move the plot forward. Later, Bart looks up the walkthrough for the game online to find out what they have to do next. Subverted in that he gets cut off before he actually says what they need to do by aliens attacking the house, and the rest of the plot evolves from there.
* The Simpsons Game, where you collect clichés (and Comic Book Guy explains them).
* The Simpsons Game, which has a level that is an eating contest where you go around several sets made to look like famous real-world locations- China, Australia, Mexico, Germany, France, Scotland, Italy, and the USA.
* The Simpsons Game, who published this game) makes an appearance as a minor antagonist who wants to destroy the 8-bit Simpson family, and proclaims himself as "the nerdiest nerd in the computiverse".
* The Simpsons gave the seasons following that a high standard to live up to.
* The Simpsons, generally with Homer (or occasionally Bart) earning money in a vaguely shady way and Marge and/or Lisa being suspicious when they use the money to buy extravagant presents for the family:
* The Simpsons gets for this (see further down), it can be right on in mocking this in some contexts. The "Special Edna" episode from the 14th season has the characters visiting Disney World and EPCOT Center, where Marge and Lisa go on the "World of Tomorrow" ride: '"what the people in 1965 thought the world would be like in 1987." It shows movies of giant robots with the Eastern Airlines logo enslaving people and taking over the world — a perfect parody of the Tomorrowland aesthetic.
* The Simpsons", giant billboard mascots come to life and rampage through

Springfield, and the only way to make them inanimate again is by not paying any attention to them.
* The Simpsons Gibson finally wises up, and kicks Homer out the limousine and drives off.
* The Simpsons gives him a chilling deep voice, which makes it all the more appropriate for Bob.
* The Simpsons - God is about to tell Homer the meaning of life when the episode ends.
* The Simpsons going on record claiming he is not fond of Hitler jokes, he has a let a few good ones pass. Sadly, some of Hitler's appearances on the show are more redundant than really funny.
* The Simpsons go to Ireland, Bart tricks people into kissing his bottom (which has been spray-painted) instead of the Blarney Stone, although this trick backfired when an Irish version of Nelson decides to carve his initials in the "rock."
* The Simpsons go to Italy, their car gets hit by Mortadella falling off a cheese truck. They got the cheese insurance, but it doesn't cover Mortadella.
* The Simpsons got this treatment on a meta level. In the original shorts and first season of the show, Homer wasn't too bright, but still a fairly lucid and conscious, if hot headed parent. Following this, Homer became increasingly dopey and more childlike, with more plots spawned from him being ignorant or self centered. The era where Mike Scully was the showrunner was known as the "Jerkass Homer years," with Homer being at the height of his callousness and stupidity. Around season 13, the writers actually made a conscious effort to tone both of these down without sacrificing his basic character, to great success.
* The Simpsons: Grandpa has false teeth and occasionally takes them out; plus one time he was babysitting and Bart pulled them out of Grandpa's mouth and put them in his own mouth, and took a ride on the ceiling fan with them. When Homer & Marge came home, Bart accidentally broke them, then taped them up real quick and shoved them back into Grandpa's mouth.
* The Simpsons: Grandpa Simpson puts the generational divide of pop-culture into perspective for his then-teenaged son, Homer.
* The Simpsons: Grandpa Simpson was the commander of the "Fightin' Hellfish" (Or the "Flying Hellfish", depending on the scene.)
* The Simpsons. Granted, his childhood was pretty exaggerated and far from being realistic so perhaps more of a caricature of a real person.
* The Simpsons (Granted this had happened in the show, albeit on one of their Treehouse of Horror specials).
* The Simpsons, Groundskeeper Willie fills the auditorium with rats in revenge for being humiliated. Bart warns Milhouse not to open his mouth; of course, Milhouse starts to say "What?", at which point half a dozen rats leap in.
* The Simpsons gushes over everything his students do. When Marge tells him how supportive he is, he curtly responds "Marge, please, I don't take praise very well!".
* The Simpsons Guy.", and Bart looks at him with a disturbed look at his face.
* The Simpsons had an early episode in which Bart tries to find a police badge at the bottom of his cereal. It turns out Homer got to it first.
* The Simpsons had an entire episode, "MoneyBART", revolving around Lisa falling in love with baseball because of its statistical bend (she runs Bart's little league team on sabermetric principles). During the episode it is also shown that Professor Frink is a fan, him saying that the game is "Played by the dexterous, but only understood by the poindexterous."
* The Simpsons had an episode in which Mr. Burns's long-lost son turns up - voiced by (and drawn to look like) Rodney Dangerfield.
* The Simpsons had an episode where Jasper, a senior citizen, got stuck in a freezer at Apu's Kwik-E-Mart. Apu becomes more successful by promoting the Incredible Frozen Man as a tourist attraction.
* The Simpsons had a parody of a bulk-buy warehouse that was packed to the rafters with these. A highlight is Barney knocking over a full-size human-shaped maple syrup bottle and thinking he's killed a woman.

* The Simpsons had a Thanksgiving episode with a vegetarian "turkey" sculpted from tofu.
* The Simpsons had Bart give Lisa a blanket when they were stranded in the woods. Said blanket was the flag Lisa made and Bart ruined. A bit of a subversion, as Lisa was still awake.
* The Simpsons had Homer repeatedly clapping his hands in an effort to turn the lights off. Marge eventually tells him that they don't have a Clapper.
* The Simpsons had Homer watching a promo for a Texas Deathmatch between Dr. Hillbilly and The Iron Yuppie. The announcer notes that one of the two wrestlers will be unmasked and killed in the ring.
* The Simpsons had Lisa and her friends try to do this to Bart as a fun slumber party activity. Bart manages to escape, so they do it to Maggie instead.
* The Simpsons had Lisa see a group of penguins flying, until they saw her and landed while looking shifty.
* The Simpsons had Marge's homely sister Selma try using a video dating service while trying to get pregnant. Figuring that she's not attractive enough to actually make a man stick around, she advertised herself as a "free lunch". Unfortunately, multiplying by zero is still zero.
* The Simpsons had Springfield trying to win the right to host the next Olympic Games. They pretty much had it in the bag until Bart played Insult Comic to the members of the IOC, costing them the games and getting Bart in a lot of hot water.
* The Simpsons had stiff-moving and poorly-detailed extra characters used as filler for large crowds. As the series went on and had better animations, the extras became more detailed and fluid.
* The Simpsons had the church hold an ice cream social, complete with a brain freeze clinic. Cut to a severely-affected Nelson getting an oral hot fudge injection.
* The Simpsons had the family visiting a dude ranch and Lisa falling for a cute boy (voiced by Jonathan Taylor-Thomas). When she runs into a girl who is looking for the boy, Lisa tries to get rid of her. It turns out that girl was the boy's sister, and Lisa's actions make him hate her.
* The Simpsons had the government using spy satellites to find the trillion-dollar bill Mr. Burns had stolen. All they could determine was that it wasn't on his roof.
* The Simpsons had their third baby, and Homer was pleased to have a new boy. Dr. Hibbert then mentioned that was the umbilical cord.
* The Simpsons had the Simpson family using a CRT television from their 1989 premiere up until they transitioned to HD in early 2009, adding a new intro sequence that featured an HDTV in the end. Though, the show itself wouldn't have the family owning an HDTV till the next season.
* The Simpsons had the subtitles on the ridiculous Japanese dish soap commercial from the episode "In Marge We Trust". "I'm disrespectful to dirt! Can you see that I am serious?"
* The Simpsons had this in an earlier episode, when Homer was made an astronaut. During the tense re-entry, the two veteran astronauts stoically hum "The Battle Hymn of the Republic", while Homer nervously sings the "Golden Grahams" jingle.
* The Simpsons had this when the show switched to digital ink and paint, though it went away in the HD episodes.
* The Simpsons Halloween short "Terror at 5 1/2 Feet" parodies the Twilight Zone episode "Nightmare at 20,000 Feet" by shifting the setting to Bart riding on the school bus.
* The Simpsons' Halloween specials, Bart is turned into a vampire. He rejoins the family and monotones, "Hello mother. Hello father. I missed you during my uneventful absence."
* The Simpsons' Halloween specials where Bart and Lisa are caught in Itchy & Scratchy's show. While their eyes are still out of their sockets they run away causing their eyes to follow up only later.
* The Simpsons: Happens to Homer Simpson, of course. He tries to get off but ends up hanging upside down. ("Come on, gravity! You used to be cool!")
* The Simpsons") has a downplayed example. Homer momentarily struggles to untangle

the lights, and he accidentally falls off the roof of the house right as he finishes their setup, all for an unimpressive display — only the red lights actually turn on, and they flicker weakly.
* The Simpsons has a few examples. After the first few seasons, the premise that it was simply an "animated sitcom" began to be interpreted a lot more loosely, with much more stereotypically "cartoon logic."
* The Simpsons has a gag where Mr. Burns goes away and part of his human chessboard escapes... and then the opposing pieces beat up the now-unguarded king.
* The Simpsons has always displayed a mastery of playing this trope for comedy:
* The Simpsons has an episode where after Homer gets his stomach stapled, he can only eat the smallest amounts of solid food after the surgery, and he has to puree it in a blender and drink it down. We see him do this with the tip of a slice of pizza, cut with a knife and fork.
* The Simpsons has an episode where Sideshow Bob escapes from prison by switching his face and hair with his near-identical cellmate Walt Warren, who was scheduled for early release.
* The Simpsons has an infamous scene with Mr. Burns, high on ether, believing Hans Moleman to be the Lucky Charms leprechaun and using a power drill to get the cereal himself:
* The Simpsons, has an unfortunate tendency to accidentally swallow the people making his giant-size meals, as he never waits long enough for them to vacate the frying pan before he eats. This particular trope happens to Lenny, and Groundskepper Willie, who states that he found a way out. "It's not pretty, but it'll do."
* The Simpsons has a sad Bart somberly staring at the board which contains a single line: "We'll really miss you, Mrs. K."
* The Simpsons has a serious case of Type 5: Fans who dislike the newer seasons generally say it's all the fault of the showrunner at the time: Mike Scully for Seasons 9-12, and Al Jean for Season 13 and onwards. While Scully and Jean aren't innocent, to be sure, they aren't 100% guilty either.
* The Simpsons" has a statue of Lady Justice as a little girl in front of the Juvenile Courthouse complete with her scales.
* The Simpsons has Bart doing this to his teacher Miss Krabappel as a culmination of a prank where he wrote her love letters under a fake name. When he feels guilty and confesses to Marge, she advises him to write a final letter making it look like an unavoidable parting kind of situation.
* The Simpsons has Bart get forced into one of these. Lisa ends up joining as well because she liked the rigid structure and the fact that it was actually teaching stuff.
* The Simpsons" has Bart watching one called Uncle Slam impaling a Bin Laden parody, Osama Bin Rotten with an American flagpole.
* The Simpsons has been altered for comedy a few times specific to the episode. At the end of every Halloween episode (with certain variants), the accompanying bit of music is played on a pipe organ, along with a woman's shrieking in lieu of the logo's usual "SHHHHH!" sound effect.
* The Simpsons has been known to steal beer mugs from Moe's, office supplies (including computers) from work, and especially just about anything from Ned Flanders. One episode had him get a job at a Walmart parody only to find out every employee has a shock collar on their neck. When his coworkers told him they all knew how to disable the collars and steal everything that's not nailed down, they asked him not to judge them. Homer not only doesn't judge them but he steals an entire cart of TVs right then and there.
* The Simpsons has done this a few times, with one of the better examples being "The Telltale Head", which begins with Bart and Homer, carrying the head of Jebediah Springfield, being chased by a lynch mob, with pretty much the rest of the episode consisting of Bart telling the mob the tale of the events that led up to him decapitating a statue of Jebediah Springfield (and the subsequent encounter with the mob).
* The Simpsons has Grandpa's kidneys burst, and he eventually wheedles one out of

Homer. It's lampshaded that "You've dramatically shortened your lifespan so someone else can enjoy a few more short years of life." The episode ends with Homer patting one of Bart's kidneys...
* The Simpsons has had a couple of forays into Postmodernism. They made a reference to their real-world merchandise enterprises, the 'I didn't do it' episode where they all embrace their status as one-dimensional catchphrases, a couple of episodes where they note how far along the plot is or how everything will be returned to normalcy for next week. Sometimes they call attention to the fact that they always wear the same clothes, never age, and have yellow skin... Most impressive example is the episode "Behind the Laughter," which shows these cartoon characters as actors with 'real' lives outside of their show. Also this trope might include those episodes that poke fun at the nerdiness of The Simpsons' fan community.
* The Simpsons has had more guest stars playing themselves than probably any show on television.
* The Simpsons") has Homer become an overnight opera star, and includes snippets from several shows.
* The Simpsons has Homer do this to Bart in order to get him to dance at a stadium event and cause him to pee himself.
* The Simpsons has Homer looking at a newspaper photo of war refugees, and disapproving that "there isn't a smile in the bunch".
* The Simpsons has Homer run in front of the TV alone and the top half of his body pops off to reveal Marge. Inside Marge is Bart, inside him is Lisa and inside her is Maggie.
* The Simpsons has Homer trying to steal Bart's Butterfinger bar during a power outage. Bart offers to give him a bite of it, but it isn't until the lights come back on that Homer realizes that he's been fed a dog biscuit.
* The Simpsons has Krusty sneak out of a porn theater wearing a trenchcoat and shades at night... but his trademark hair is still exposed.
* The Simpsons has Lisa go on a "take your child to work" day with Homer, but come lunch time she has nothing to eat. Homer starts a series of trades with the last morsel of his own lunch to put together an elaborate salad and place setting for her.
* The Simpsons has made frequent use/spoofs of this. Half the time, the characters don't even have to actually be shown turning on the TV themselves to catch the Coincidental Broadcast;
* The Simpsons has many elements of the picaresque genre: Both Homer and Bart are notorious underperformers who avoid hard work and shirk their duties whenever possible, are generally irresponsible, treat their fellow men shabbily and take refuge to lies when it suits them, all the while being not especially bright. Yet they somehow always manage to avoid all serious consequences of their foolishness or egoism and are likable characters despite their many flaws.
* The Simpsons has Mr. Burns naming his pet tortoise as a beneficiary of his will.
* The Simpsons has no real reply ready and he is just following along.
* The Simpsons has numerous fictional musical adapations which parody the concept by drawing from bizarre and/or inappropriate sources:
* The Simpsons has produced a number of neologisms which have come into varying degrees of common use.
* The Simpsons has several of them, mostly involving the villains, but occasionally major characters (especially Homer, sometimes Marge) end up in jail as well.
* The Simpsons has shades of this, though his war stories are never to impress anyone, more to traumatise them. This is the main reason he'll never impress his boss, the more laid-back Superintendent Chalmers, since he gets on Chalmers's nerves.
* The Simpsons has Shary Bobbins, an obvious parody, who comes, temporarily transforms the family, only to have them transform to their former unruly selves. She then leaves, not because she thinks her work is done, but because she realizes they're hopeless cases. The episode closes with her getting sucked into a jet engine as she flies away.
* The Simpsons has shoes with goldfish in the soles. Unfortunately, the fish are

dead, because he can't take them out or feed them.
* The Simpsons has some of this from time to time. (Marge was once turned on by Homer's "Mr. Plow" jacket.)
* The Simpsons has Springfield Elementary's Groundskeeper Willie. He has a crustier, creepier, crazier cousin, Gravedigger Billy, who only showed up in one episode and looked exactly like Willie except with white hair.
* The Simpsons has such a slogan. From Springfield Prison - "If you were a murderer, you'd be home by now!" - to Costington's Department Store - "Over a Century Without a Slogan".
* The Simpsons has the family's house being given a high-tech makeover. The house's computer eventually becomes attracted to Marge and plans to get rid of Homer.
* The Simpsons has their own Radioactive Man, and arguably the most popular of the two.
* The Simpsons has the Oscar Mayer periodic table (which is mentioned in the page quote) as seen on the season 10 episode, "Lisa Gets An A." Principal Skinner and Superintendent Chalmers are showing Lisa what the basic assistance grant money that she won for the school (by cheating on a test) can do for Springfield Elementary: get them a real tetherball set instead of a cinderblock tied to a bent pole, get them real working computers instead of the ones Gil is trying to sell, and get them real periodic tables instead of ones that were given to them by Oscar-Meyer as part of a promotional stunt.
* The Simpsons has the town's cemetery moved next door to their house, and it ends up scaring Lisa out of her mind.
* The Simpsons has this happen a lot in-universe. The show itself definitely averts this, as its voice actors alone cost more than most cartoons budget for entire episodes.
* The Simpsons has this. Marge and Homer (who were experiencing some marriage troubles, feeling their relationship lost it's "spark") have to go to an outlet mall hours away to get a new motor for their fridge. It starts to rain and the car gets stuck in the mud. There's a barn nearby and they trudge through the mud to get there. They lie down in the hay, and one thing leads to another...
* The Simpsons has used the primate gag a couple dozen times over its long run.
* The Simpsons has used this as a plot. Bart, finally tired of Homer's crappy parenting and neglect, gets himself emancipated, with his income coming from Homer's garnished wages intended to pay back money he stole from Bart's brief career acting in commercials as a baby. The judge even says she would never emancipate a ten-year-old, except in this case of blatant abuse and neglect she'll allow it.
* The Simpsons have a daughter named Zia. However, they arranged to have her made out of only their best genetic material...which means she's just a clone of Lisa.
* The Simpsons have a duel where they come up with bigger and bigger guns; eventually Itchy has the good sense to actually shoot instead of getting yet another larger gun from hammerspace(his gun is already the size of planet Earth), and sends scratchy flying into the sun — improbable targeting skills at work, too!
* The Simpsons have a front door which opens to an entry hall facing the stairs. But since it is an animated show, the staff has more flexibility with floor design.
* The Simpsons have done it (of course) even if it wasn't the rectal area. When Homer gets the town to make the world's tallest human pyramid, Jimbo says to Kearney "Dude, you're touching my hand!" Both pull back and the pyramid collapses. After the fallout, we see Jimbo lying on the ground and Kearney collapsed on top of him. Jimbo: "Dude, you're lying on top of me!...Dude?"
* The Simpsons have done their own spoof. In one episode, while house sitting for Mr. Burns, Homer comes across a large device designed to dress you in formal wear. He gets in, there's a lot of painful sounds and he comes out with all the formal clothes ripped, battered or misplaced. "Now I'm ready to hit the town."
* The Simpsons have the exact body shape and face with the obvious difference being Krusty is in clown shoes and makeup. Originally, Homer was supposed to have been a clown as a hidden job that Bart wouldn't know about, but the idea got scrapped and

Homer's clown design was made into a separate character.
* The Simpsons have this as the standard angry reaction (if they're not going straight for bodily harm).
* The Simpsons) having a run in with a judge, and was offered a choice between the Army, jail, or apologizing to the judge and old lady.
* The Simpsons", he became the official voice actor for both Smithers and Apu, replacing the late Jean-Louis Millette in both roles.
* The Simpsons, he becomes a drill instructor. When the bus arrives with his new recruits, the first one gets off the bus and asks in a heavy southern accent "Hi, where do I get my grenades at?"
* The Simpsons he briefly worked for. Homer wasn't happy about (b), though, since the Broncos were the laughing stock of the NFL at the time, a far cry from the then-dominant Cowboys. Every time, Marge points out Homer already had a lifelong dream, which he has already achieved.
* The Simpsons. He brings home a date and soon feels very embarrassed by his family. His date asks him awkwardly, if there isn't at least one sane person in his family. Bart looks to Lisa...but she is so high from her Happy Pills, that she is just mumbling to herself with a drunk expression.
* The Simpsons he doesn't realize everyone is dead until much later. He spends the early part of the episode casually interacting with several skeletons, causing them to break apart. It isn't until he sees a newspaper saying a bomb was headed towards the town does he realize the truth.
* The Simpsons he is going to disguise himself as a nun to enter...and Lisa says that's fine, as she's going to do it herself. Homer is taken aback and reveals that he already has the costume ready to go.
* The Simpsons; he meets Moe on the way who walks in the opposite direction... and devolves.
* The Simpsons herself gets this. She saves Bart and Lisa, then beats up the Comic Book Guy, before flying the Simpson children to safety—and not in a plane.
* The Simpsons", he's also shown to have won a People's Choice Award, five Golden Globes, and an Emmy.
* The Simpsons he says that his favorite is Homer. He also has mentioned some of the secondary characters as his favorite, like Comic Book Guy, Apu, and Ralph Wiggum.
* The Simpsons. He sees co-workers Lenny and Carl, and Principal Skinner, in green-tinged Terminator-style Stat-O-Vision.
* The Simpsons! He's gonna do something, and you know it's gonna be good!" Homer still gets pushed inside, and immediately afterward we hear the sounds of one loud karate yell, one connected blow, and about three bodies hitting the ground. Cue Homer's disappointed groan.
* The Simpsons; he (the writer) and a group of 10 friends went for a meal prepared by a shared acquaintance who was a chef. The chef told them he would "take care of" the meal, which they all assumed meant the meal was on the house. After a lavish meal which included wine, champagne and cigars, they were shocked to receive a bill for $3,500.
* The Simpsons. He uses it to bash the librarian over the head and runs off.
* The Simpsons. He was once engaged to a girl named Becky, but at the wedding she revealed she couldn't stand heavy metal after he hired a Poison cover band to play at the ceremony. Marge then told him he had to choose between Becky and his music - he chose the latter, leaving Becky at the altar.
* The Simpsons. His accent is exaggerated, he occasionally mentions Hindu gods, and his speech can be verbose.
* The Simpsons his camera is stolen. He reports this to a cop, who steals his suitcase. Almost immediately afterwards, a pickpocket steals his wallet, and a passing pigeon steals his hot dog. This is a fairly accurate depiction of New York in the 1970s.
* The Simpsons his foot gets caught in the stirrup of his horse and he's dragged away.
* The Simpsons, his selfishness overpowers his hero syndrome, but he ultimately

does the right thing when he realizes he is alienating his family by being selfish.
* The Simpsons: Hit & Run, a crop circle designed like Bart Simpson can be found in a tomato field in levels 4 and 7. In a cutscene, Abe also describes seeing a crop circle shaped like a planet with an antenna, and Marge came to the conclusion that the planet with an antenna matches the design of Buzz Cola.
* The Simpsons: Hit & Run also features a discussion between Kang and Kodos which eventually ends with one of them saying "Sounds good to space-me."
* The Simpsons: Hit & Run and the episode "Brake My Wife, Please", "I can't drive 55, 'cause it only goes 38!" If you have the speedometer turned on while driving as him that's clearly not the case... but still.
* The Simpsons: Hit & Run, Apu is the only playable character who isn't part of the family.
* The Simpsons: Hit & Run - Bart complains that if he doesn't get the new Bonestorm game, he'll be as uncool as Milhouse. To Milhouse's face.
* The Simpsons: Hit & Run has a "surfing" animation when you're on the roof of a moving car.
* The Simpsons: Hit & Run has Homer returning several of Ned Flander's belongings and one of them is a cooler that he gave to Barney as a birthday gift, which he apparently used as a toilet.
* The Simpsons: Hit & Run, Homer may blurt out "I have no insurance!" when he hits another car.
* The Simpsons: Hit & Run loading screens. Each level is set on a different day, with the last one taking place on Halloween.
* The Simpsons: Hit & Run, most vehicles which get destroyed are reduced to their frames, Buford T. Justice-style. They are still drivable, but have horrible acceleration, very low top speed, and terrible handling.
* The Simpsons: Hit & Run, the bonus races are run by Milhouse, Nelson, and Ralph. All of them will throw in some variation on the countdown just to mess with you. For example, Nelson will say "Psyche!" to mess with your timing, Milhouse coughs from inhaling smog and his countdown is extremely slow, and Ralph is incapable of counting so he just uses whatever random things he comes up with.
* The Simpsons: Hit & Run: The Open Wheel Race Car has some of the best stats in the game, except toughness, making it good for any mission that does not involve destroying vehicles. It can only be obtained by completing all three street races on the final level, which is not an easy task, and there is very little else to use it on by that point in the game.
* The Simpsons: Hit & Run there is a billboard that says, "Don't eat beef … eat deer."
* The Simpsons: Hit & Run, this exchange is made between Bart and Krusty:
* The Simpsons: Hit & Run will make you have no clue why everyone stopped suspecting Mr. Burns or the black vans).
* The Simpsons: Hit & Run, you can run over civilians (including actual characters of the show) however many times you want. Nothing happens to them, however, but the sarcastic retaliation comments are hilarious.
* The Simpsons, Homer’s nerdy friend Doug gets involved in the production of a science fiction movie. To keep the science realistic, he removes all sound from the space scenes. Everyone hates the movie, except for Comic Book Guy who declares it a triumph.
* The Simpsons, Homer accidentally buys an "F-series" Canyonero SUV, which has a lipstick holder in place of the cigarette lighter.
* The Simpsons: Homer & Marge are planning to sing "Let's Call the Whole Thing Off" at Marge's cousin's wedding reception but for plot relevant reasons Homer doesn't show up, so Marge just sings her half.
* The Simpsons Homer and Jay Sherman (and their stomachs) fight over the last pork chop (Jay ends up getting it because he's the guest).
* The Simpsons. Homer and Larry Burns are being chased by the police (since they faked a kidnapping) and Homer suggests they hide in a nearby abandoned warehouse. They open the door only to find that it's full of people at work.
* The Simpsons Homer and Lisa are hiding from a private detective. Lisa rubs black

dye into her hair and Homer tries to use a big blob of it to give himself an Elvis-style do.
* The Simpsons: Homer and Marge make love in a barn full of hay in the episode "Natural Born Kissers".
* The Simpsons. Homer and Marge's relationship is complex enough that they can be either a bickering couple or a peaceful couple depending on the needs of the story. When they are fighting, they are usually paired up with a more loving couple, usually the Flanderses; other stories have them paired up with a bickering couple (such as the van Houtens), resulting in the Simpsons either giving them relationship advice or trying to avoid becoming like them.
* The Simpsons, Homer and Marge (who was in a very pregnant state) were married in a chapel named "Shotgun Pete's".
* The Simpsons: Homer and the kids hate church and are relieved when it's over.
* The Simpsons: Homer attempt to injure himself in order to skip work, by slipping on some oil. Instead, he only manages to skid through the entire plant unharmed.
* The Simpsons", Homer becomes a food critic and invokes the trope by giving Marge's pork chops his lowest rating ever, "seven thumbs up!"
* The Simpsons, Homer believes that mundane learning has this effect on him, citing as an example a time when he took a home wine-making course and forgot how to drive. Marge points out the more obvious cause of this loss of ability.
* The Simpsons, Homer buys a Krusty the Clown doll that turns out to be evil. And parodied, the reason its evil is because it's set on "Evil Mode" and not "Good Mode". They solve the problem by calling the company.
* The Simpsons Homer, convinced that his time for buying the product is running out, hastily calls and asks if there are any left. The operator there replies "Yeah, a couple." The camera then pans out to reveal that the warehouse is, in fact, full of unsold microphones.
* The Simpsons). Homer decides that they should eat Grandpa, and Abe protests...because no sane person would want to eat a scrawny old man like himself.
* The Simpsons", Homer died and it was revealed that Professor Frink had made clones of him so that he has backups. He ended up dying over a hundred times in the next thirty years.
* The Simpsons", Homer disguises himself as a female panda and is dragged away by a male panda eager to mate.
* The Simpsons: Homer does it as he climbs to the top of what he hopes to be the worlds tallest human pyramid.
* The Simpsons, Homer does this from time to time when shown wearing his reading glasses.
* The Simpsons. Homer ends up getting stuck under a plane that flies through a rose plantation, winding up absolutely covered in roses. The plane then flies over the Simpson house and Homer gets stuck on the clothesline and winds up spinning around and depositing the roses at Marge's feet. Homer then lands in front of Marge on one knee with a rose held in his mouth. Marge finds the whole thing romantic; Homer thinks he has a collapsed lung.
* The Simpsons, Homer ends up in command of a nuclear sub after the Captain tells him that he is in command until he gets back. The Captain is then accidentally launched out of a torpedo tube. By Homer.
* The Simpsons. Homer ends up ordering planets from a pizza delivery-style service.
* The Simpsons. Homer eventually realizes his own father never acknowledged him either, so he amends his behavior and becomes overbearingly supportive of Bart and has him replace Nelson as quarterback, despite Bart being a terrible player and the rest of the team despising him for it.
* The Simpsons, Homer gets jealous of Flanders' family barbecue, resulting in the page quote.
* The Simpsons, Homer goes on an impromptu vision quest, and at the end sees what appears to be his wife. When he goes around her to look at her face, it's just her backside all the way around.
* The Simpsons, Homer has suddenly decided to spend time with his kids to get back at his father (somehow). He tries to teach Bart how to ride a bike (even though

Bart already knows), pushes Lisa on a tire swing (made with a broken, dirty tire), and showers Maggie with potato chips as he eats them with her strapped to his chest.
* The Simpsons, Homer intends to play this prank on the dean of Springfield University, however, somebody got there first, and Homer ends up with a bucket glued to his head.
* The Simpsons. Homer is a frequent offender, with most of his DIY work falling asunder in short order. Of note is the time he tried to build a barbecue and it got mistaken for a modern art sculpture instead.
* The Simpsons: Homer is caught by Mr. Burns trying to sneak into his mansion. He almost takes a cyanide pill, but Burns mistakes Homer for a magazine editor and allows him inside, stopping him from doing so. (He then tries to take it again when Burns says they'll be doing "a little walking".)
* The Simpsons. Homer is often abusive towards his wife and children and his reckless stupidity causes many of the problems on the show. Bart is a mischievous self-admitted hellion who often bullies those closest to him.
* The Simpsons, Homer is opposed to the thought of his dad marrying Marge's mom.
* The Simpsons", Homer is playing baseball on the Springfield Nuclear Power Plant team, and Mr Burns is the manager. Unfortunately, Homer zones out while Mr Burns is explaining what the signals are, and later, when Homer is up to bat, Mr Burns starts doing a series of strange actions. Homer has no idea what he's trying to say, and gets hit in the head with the ball and knocked out as a result.
* The Simpsons", Homer is sent to prison. When Homer is offered the position of prison snitch, it's clear he'll be whacked if he refuses.
* The Simpsons, Homer is stuck in an elevator with Mindy Simmons, a co-worker he finds himself attracted to. He ends the awkwardness by stopping the elevator between floors and getting out... into thin air, sliding down one of the power plant's smokestacks.
* The Simpsons, Homer is thrilled to discover he shares his name with its Don Johnson-like lead character (catchphrase: "And that's the end of that chapter!"); the next week Homer is horrified to see his character retooled as a blundering doofus (catchphrase: "Uh-oh, Spaghetti-Os!"). He seeks out the show's producers and writers.
* The Simpsons", Homer is upset because his 10 year old son Bart got his ear pierced.
* The Simpsons, Homer is walking up to Chief Wiggum after Wiggum exploding on him for "being a bad friend." Homer says "I brought a 30 piece chicken bucket", and Chief Wiggum responds "Did it occur to you that I might want some?".
* The Simpsons", Homer joins the Navy Reserves. He gets put in charge of a sub and sails to Russia. After he gets stopped, Homer is court-martialed. But all of his judges admit to other crimes (or at least investigations), so they are not currently qualified to judge him.
* The Simpsons", Homer leads a dazed and amnesiac Mr. Burns to a construction site in the hopes of bumping him off via this manner.
* The Simpsons, Homer, Lenny & Carl are playing chair hockey at work. Mr. Burns comes in to yell at them, but it turns out he's the coach and he's yelling at their poor teamwork.
* The Simpsons. Homer, Lenny, and Carl are waiting for Mr. Burns to leave the parking lot. The mailman talks with Mr. Burns a bit in regards to skydiving (which is not what they wanted to see, as they really wanted to leave). Homer then gets the idea of tricking him into leaving by calling him by claiming that he kidnapped his wife... and then changing it to his brother, and then to his dog, and despite it being a fairly obvious deception, the mailman still fell for it.
* The Simpsons: Homer Loves Flanders: Homer starts a food fight during a family picnic with the Flanders.
* The Simpsons, Homer manages to screw up the local hippie community’s production of all-natural health-juice by Homering up the place.
* The Simpsons: Homer, Marge, and Moe end up sharing a pre-booked hotel room. Marge takes the sofa, leaving Homer and Moe to awkwardly share the bed.

* The Simpsons, Homer proclaims that the next time a commercial comes on, he'll close his eyes, cover his ears and scream. Fade to black, cue Homer screaming, cut to commercial.
* The Simpsons: Homer's dreamscape includes Moe's Taverns on every street corner, skyscrapers made of Duff cans, bowling pins and food and a Homer-themed rollercoaster.
* The Simpsons: Homer Simpson briefly took this gig, and takes photos of Springfield's celebrities at their worst. The celebrities fought back and hired another paparazzo to take embarrassing pictures of Homer. Homer retaliates by taking more picture of them all in a night club doing some more celebrity excesses, but he will not publish the photos if the celebrities would do some generous acts for a change.
* The Simpsons: Homer Simpson does this mockingly in "Stark Raving Dad" after Leon tells him that he wore one white glove covered in rhinestones.
* The Simpsons: Homer Simpson imagined himself doing this once while under the influence of Duff. Flexing them in time to the Can Can, too.
* The Simpsons: Homer Simpson is a frequent offender. When he is showing his half brother around the house, he flicks a switch that he doesn't know the function of, which turns on the Christmas lights on the roof (which have been there since 1985).
* The Simpsons: Homer Simpson's mother, especially in contrast with Homer's father. She's a hippie, educated and cultured, and she bonds with her grandchildren, especially book-smart Lisa who finally feels she is a Simpson.
* The Simpsons: Homer Simpson teaches Bart how to put on a necktie by presenting his clip-on: "The hook goes over the top, and these things go in there!"
* The Simpsons: Homer Simpson tried to teach Apu all about America for Apu's citizenship test (e.g. claiming that the 13 stripes on the flag are for good luck). Afterwards, Apu was so tired and confused he didn't remember anything Homer taught him. Lisa happily declared him ready for the test. Which he passed.
* The Simpsons: Homer Simpson will always get busted back down to safety inspector at the Springfield Nuclear Power Plant. Sometimes this is due to his own negligence, but more often, the show lampshades the inflexibility of his day-to-day existence. (We even see an elderly Homer occupying the same office in the future.)
* The Simpsons, Homer's journey to track down the secret of his erased memories lead to a surprise party on a party boat.
* The Simpsons: Homer tries to convince Selma to marry Apu but fails, leading them to look into other ways to keep him in the country.
* The Simpsons, Homer tries to lure Bart with a bottle of Focusin pills. The string tied to his finger went all the way into Moe's Tavern while he waited. In another episode, Lurleen Lumpkin is wanted for tax evasion and several Springfielders want to catch her because they love seeing former celebrities going down. Nelson tries to catch her with that kind of trap using a fake Grammy as bait. Krusty falls for the trap.
* The Simpsons, Homer volunteers at a Habitat For Humanity build. He takes off his wedding ring so it won't get paint-stained, and Cookie Kwan thinks he's recently divorced or widowed because of the tan line on his finger.
* The Simpsons. Homer wants to buy Ned's new grill cheap; Ned is reluctant but eventually agrees. At this point, Homer says he will only pay that price now if Ned throws in several other items.
* The Simpsons", Homer winds up joining the army and ends up in a squad of dimwits like him. They took part in an army exercise which involves using them as cannon fodder, then they run off and hide in Springfield, to which the army occupies the town to flush them out.
* The Simpsons. Homer working at a nuclear power plant even makes this more literal than other examples.
* The Simpsons" Homer yells this as he dreams Bart having turned into a skeleton. He then yells "Why?.... Who?....When?.... How?..."
* The Simpsons. However, despite the level of detail displayed by extras, the background crowds were almost exclusively immobile, often to ridiculous degrees (such as figures shown frozen in the act of talking or shouting), although this was

less prominent in later episodes. They also occasionally used extras that didn't make sense being there (for example, Maude was used in backgrounds several years after she died).
* The Simpsons (i.e., Moe) to insert a crayon up his nose to re-dumbify him. The "doctor" delicately shoves it up there; he doesn't want Homer to end up too dumb or too smart.
* The Simpsons, if you pause the list of "corrections" Rock Bottom wished to make in "Homer Badman", you find, amongst various other hidden jokes, that you have no life.
* The Simpsons, if you touch the music notes coming from a flying sax, you'll moonwalk for what feels like a minute.
* The Simpsons Immediately Homer used it to clean his hat (and only his hat), and one scene had him sitting in a lawn chair entertained watching the sole piece of attire spin round and round in the dryer.
* The Simpsons immediately when Jimbo ran off with a cry of "Let's get outta here! He's using contradictory logic!"
* The Simpsons implies that Homer Simpson, had he actually been on a battlefield, would have been of this trope. When he has to be an army recruiter, one of the things he is asking people in a failed attempt at recruiting them is whether they want to kill people. Also, in "You Kent Always Say What You Want," Homer compares his elation to getting his 100th ice cream cone as being similar to gaining his first kill had he been in a war. Mitigated when he was once recruited by the Marines, he isn't smart enough to even hold a rifle, the one they gave him only shoots bubbles.
* The Simpsons: In "A Fish Called Selma," Marge's sister Selma starts dating washed-up actor Troy McClure and eventually marries him. It turns out Troy only dated Selma because his agent advised him that being seen in a relationship with a woman could repair Troy's reputation by casting doubt on the rumors of him having a fish fetish (and the implication he was banned from an aquarium for doing something unspeakable with the fish there). Troy drunkenly blabs the truth to Homer at his bachelor party, and Homer blithely tells Marge the night after Selma's married. Marge and Patty confront Selma, who refuses to believe them until she confronts Troy herself. Troy not only happily admits their marriage is a sham, he convinces Selma to go along with it for all the perks she'll get as a celebrity's wife. However, Selma decides to leave Troy when his agent proposes the two have a baby to get more publicity. Selma refuses to raise a child, biological or adopted, in a loveless marriage.
* The Simpsons in an attempt to make it up to her, which works wonders but also causes a lot of marital problems for all the other guys in town.
* The Simpsons in an episode. A runaway Sacagawea (Lisa) stops to weep on a rock, saying "O warm, fuzzy rock, you're my only friend!" The warm fuzzy rock is actually a wildcat.
* The Simpsons: In a parody story of Bonnie and Clyde, Homer (Clyde) thinks to himself, "Violence must be her turn-on! Well, there are probably others, but I'm too lazy to try and figure it out..."
* The Simpsons, in a race where Quimby may have legitimately received 0% of the vote.
* The Simpsons: In a segment from "Thanksgiving of Horror", the Simpsons buy a "Kitchen A.I." with Marge's memories downloaded into it. Marge finds it neat at first, but she soon starts to find it creepy and uncomfortable.
* The Simpsons: In a similar manner to the Roald Dahl example listed below, Abe Simpson, when held at gunpoint by a journalist trying to kill him, raises his hands in the air as if to surrender, only to suddenly grab the brake cord of the train car above him, forcing it to stop unexpectedly as well as burying the journalist with several hat packages.
* The Simpsons in a song "Ode To Branson". There is the line "So sit back, relax, and watch our revue," and Yakov slides in and says with a homophone pun, "In Soviet Union, revue watches you!" This probably had a hand in revitalizing the meme for the Internet crowd.

* The Simpsons: In "A Streetcar Named Marge", Homer is watching a 'Miss America' pageant on TV and shouting out rhymes for the states, until one stumps him. "Miss South Carolina!" "Nothing could be finer!" "Miss Delaware!" "Uh, um, uh... Good for her!"
* The Simpsons) in a test screening, Gibson, himself unhappy with the finished product, recruits Homer to make an edit that will appeal to the common man. Homer's suggestions are… not what Gibson was hoping for.
* The Simpsons, in a three-story episode about history, Lisa as Sacajawea is giving Lewis and Clark's expedition party quick advice and tells one soldier that he's holding poison oak.
* The Simpsons: In "Bart's Girlfriend", Groundkeeper Willie tries to save the wee turtles when the school evacuates due to the fire alarm going off.
* The Simpsons in both the original English audio and the Italian dub.
* The Simpsons. Incidentally, their parents contrast each other similarly.
* The Simpsons including breaking nearly every bone in his body, horrific gaping wounds, knocked out teeth, eye trauma, multiple shots to the groin, etc. But what the audience didn't see was the unfunny aftermath. Somehow, Homer became addicted to painkillers. It was the only way he could perform the bonecracking physical comedy that had made him a star.
* The Simpsons, including cherub versions of his friends Lenny and Carl.
* The Simpsons, including one where (in a flashback) we see teenagers installing a strobe into the back of their car. They turn it on and dance to music - the rest of the scene is shown as a series of stills as the light comes on and off.
* The Simpsons, including someone saying something mildly disagreeable.
* The Simpsons. In "Day of the Jackanapes", he is retiring for the fifth and "final" time.
* The Simpsons: In "Deep Space Homer", Bart wrote "Insert brain here" on the back of Homer's head. And later "Hero".
* The Simpsons: In "Dog of Death", while Santa's Little Helper is undergoing surgery, he sees the Pearly Gates and runs toward a doggy door that's built into it. However, he's pulled away once the operation's over and he's saved from death.
* The Simpsons: In "Fear of Flying" it is revealed that Homer has a fear of sock puppets.
* The Simpsons: In "Future-Drama", Homer Simpson owns the first hover car ever made. It scratches the streets it's driven through.
* The Simpsons: In "Girls Just Want To Have Sums", Springfield Elementary becomes segregated by gender. Since the girls' school isn't teaching math properly, Lisa disguises herself as a boy in order to join the boys' class.
* The Simpsons: In "Hail to the Cat", Lindsey Neagle does one of these to escape the Simpsons living room after Lisa pokes several holes in her claim she hasn't stolen Lisa's idea for a political ad.
* The Simpsons: In "Holidays of Future Passed", it's shown that Lisa had two girlfriends in college.
* The Simpsons: In "Homer Goes To College", during a safety audit, Homer and two other less-gifted employees are put in a room out of the way and given the task of guarding a bee in a jar. The other two question it but Homer, thinking himself brighter than the other two, boasts of his position as "head bee guy". He then immediately breaks the jar, releasing the bee, and gets discovered by the inspectors.
* The Simpsons: In "Homer Simpson, This Is Your Wife", the family participate in a reality show, which involves Marge lives with a British man in Connecticut. Lisa visits her on a FOX-sponsored flight by Frito-Lay.
* The Simpsons: In "Homer the Vigilante", Kent Brockman's initial report on the string of cat burglaries ends with him asking a professor if the town should panic. He nonchalantly agrees that they should. Later, Kent brings in the same professor after a large number of townspeople start searching for the cat burglar's loot.
* The Simpsons: In "Homie The Clown" this joke is subverted. When Homer, dressed as Krusty, enters a scene where the real Krusty is being threatened by gangsters, one of the criminals mutters: "I'm seeing double... four Krustys!"

* The Simpsons: In "HOMR", Homer buys stock in an animation company and calls an automated hotline to check its stock price.
* The Simpsons. In "Hom-R", when Homer temporarily becomes smarter, he does an equation that supposedly disproves the existence of God, but in another episode, a hand is seen giving a "thumbs up" in the sky after Ned Flanders's prayer comes true. God has also been seen onscreen several times, but only in dreams.
* The Simpsons: In "Krusty Gets Kanceled", Bart and Lisa encounter a homeless Krusty on a street corner holding a sign saying "Will drop pants for food". Unfortunately for Krusty, the Old Jewish Man is just down the block "doing it for free" (on top of dancing and singing "The Old Gray Mare").
* The Simpsons: In "Last Exit to Springfield," Mr. Burns tries to bribe Homer, who has recently become the union leader. It doesn't work out quite right due to his choice of words:
* The Simpsons in "Last Exit to Springfield", when Mr. Burns tried to use a fire hose to break up striking workers.
* The Simpsons: In "Lemon of Troy", Bart, before leaving to take revenge on Shelbyville kids who stole Springfield's lemon tree, tells Marge he's going to "teach some kids a lesson". She thinks he's going to become a tutor.
* The Simpsons: In "Lisa's Sax", as Homer dictates a dedication for Lisa's saxophone, he tells the clerk to write "To Lisa, never forget your Daddy loves-", when he drops the sax on his feet and says "D'oh!", which is transcribed as "To Lisa, never forget your Daddy loves D'OH!" In the end of the episode, Lisa gets a new sax with the dedication "To Lisa, may your new saxophone bring you years of D'OH!"
* The Simpsons in "Moe'N'a Lisa". Immediately afterwards, the sprinklers turn on, and then it starts to rain, but only on him.
* The Simpsons: In "Mr. Plow", Homer crashes his car. Fortunately, it's insured, but the agent wants to know exactly what kind of business Moe's is. Not wanting to admit he'd been drinking, but wondering what else is open late at night, Homer claims it's a porn shop, where he was buying pornography.
* The Simpsons: In "My Way or the Highway to Heaven", God doesn't believe atheists exist.
* The Simpsons. In one case, Marge tried to hook him up with her widowed mother (then Mr. Burns came along). In another, he dated a woman who lived in the same old folks home who died and left him a large sum of money. He's currently married to Rita La Fleur, who's roughly the same age as him.
* The Simpsons: In one episode, Apu studies to become a naturalized American citizen when a new Springfield ordinance threatens to have him deported. He passes the citizenship exam when he gives a detailed explanation of the causes of the Civil War (when he could have just said 'slavery'), showing his devotion to becoming a citizen. After the ordinance passes anyway...
* The Simpsons, in one episode, Bart gives Grandpa advice on how to hotwire a car.
* The Simpsons: In one episode, Bart Simpson is so sure he'll win the election for class president he decides to hold a victory party during recess. Unfortunately, recess is the voting time and everyone who would vote for him attended the party instead and Martin Prince wins the election by 2 votes to 0. The school newspaper allows Martin to mock a "Simpson Beats Prince" headline the same way the "Dewey Defeats Truman" headline was mocked.
* The Simpsons. In one episode he was forced to choose between his bride-to-be and metal. Guess what he chose?
* The Simpsons in one episode where Bart gets rid of Marge's birth control (out of desperation to have a brother). Nelson ends up finding and taking them and becomes stereotypically emotional like a woman for the rest of the episode.
* The Simpsons: In one Halloween episode, Ned Flanders is global overlord and deals with any rebels by having a part of their brain removed. Lobotomized Moe shows Homer "you get to keep the little piece they cut out", and lobotomized Marge just tells Homer that "it's bliisss...".
* The Simpsons. In one notable case, Homer is trying to buy a soda with a stolen $1 trillion bill.

* The Simpsons: In one scene in "Brother, Can You Spare Two Dimes?" Herb Powell is talking to his fellow beggars sitting around a fire. One of them is Charlie Chaplin eating his own shoe.
* The Simpsons. In one, the tractor beam isn't strong enough to lift Homer and they end up having to use two. In another, Marge is hit with what looks like a tractor beam... and then a lasso drops down instead and yanks her into the flying saucer.
* The Simpsons), in order to avoid paying a sum of money. When the smoke cleared, he had only just managed to get the exit door open and shouted something along the lines of "Oh, fine! Take it!"
* The Simpsons In order to convince Homer to become a wrestler, Mr. Burns tells Smithers to offer to half Homer's pay then multiply it by two, then raise it by three dollars a month. Homer accepts. ("Hello, upper-lower middle class!")
* The Simpsons: In "Realty Bites", Snake attempts to decapitate Homer with a length of piano wire strung across the road. He fails, but he does cleanly slice off the arm of Kirk van Houten's (who was waving a sandwich in the air).
* The Simpsons: In "Scenes from the Class Struggle in Springfield", Mr. Burns bakes a cake as a welcoming gift for Homer and his family into the country club. Smithers eats some and is less than enthralled.
* The Simpsons: In season 3 episode "Dog of Death", the dog needs an expensive operation, so the family cuts back on luxuries. This includes Lisa's monthly encyclopedia purchase—which happens to cover Copernicus, which turns out to be the subject for that week's report in school—Marge's weekly lottery ticket—so of course Marge's numbers come up right on cue—and new clothes for baby Maggie...who chooses just this week to have a growth spurt. This actually leaves the whole family angry at the dog for essentially robbing them of such good luck to the point he leaves, feeling unwanted.
* The Simpsons in Seasons 4 to 12 (though even those seasons had their share of emotional scenes). Come Season 13, the show entered this zone again (albeit not quite to the extent of the first three seasons).
* The Simpsons: In "See Homer Run", Marge washes Homer's "Safety Salamander" mascot suit (since it hasn't been washed once since he got it) while he, as the Salamander, is running for mayor. When the suit rips apart while giving a press conference, the townspeople, having preferred the Salamander and not the man inside, don't take Homer seriously and he doesn't get the 5% necessary votes to win the election.
* The Simpsons: In "Sideshow Bob's Last Gleaming", Sideshow Bob acquires a 10-megaton nuclear bomb and threatens to use it to destroy Springfield unless television is outlawed. When Krusty the Klown defies the ban, Bob detonates the bomb and a close-up of a mushroom cloud is shown... before the camera zooms out to show the blast radius was barely bigger than a human being. Bob then examines a piece of the bomb's casing, reads "Best Before November 1959" and realises the bomb's nuclear material has lost since passed its useful half-life.
* The Simpsons: In "Simpsons Bible Stories", Pharaoh Skinner dictates a letter:
* The Simpsons: In "Simpson Tide", Homer joined the US Naval Reserve expecting it to be like this. It doesn't quite go according to plan.
* The Simpsons in some areas, especially areas with a lot of schools built at the same time. In some areas of California, you're likely to find that all the elementary schools look exactly the same, minus the color they use on the outside trim of the buildings.
* The Simpsons in Springfield wanted to kill him, and in many cases, few would have blamed them. However, not only does he survive, the shooting was (presumably) an accident, making it a subversion twice-over.
* The Simpsons: In "Strong Arms of the Ma", Bart meets the newly-buff Ruth Powers and her fellow workout buddies, and he shouts "Ay carumba, I'm off women forever!".
* The Simpsons: In "Summer of 4 Ft. 2" when Homer buys illegal fireworks for the 4th of July, he accidentally shortens the fuse of an already-lit, massive one. He initially shoves it into the fridge, but then gasps, realising that the beer would be destroyed, so he moved it into the dishwasher, where it detonated.
* The Simpsons: In "Team Homer", Mr. Burns forces his way onto Homer's bowling team

(for which he was tricked into writing a $500 check), the team is disgusted at the old man's complete ineptitude but cannot simply kick him off. Moe hatches a plan to bash in his knee with a lead pipe so he can't play. Unfortunately, he does so when Burns is already indisposed and his whack on the knee has the exact opposite effect: the injured Burns is able to play again.
* The Simpsons: In "Thank God It's Doomsday", Homer believes the apocalypse is coming when he sees blood dropping from the sky. It turns out to be from a helicopter carrying an injured whale back to the sea, with the Sea Captain, armed with a harpoon, chasing it from behind in another copter.
* The Simpsons: in "The 138th Episode Spectacular" Troy McClure summarizes the origin of the show as “an old drunk made humans out of his rabbit characters to pay off his gambling debts.”
* The Simpsons: In the "Bartificial Intelligence" segment from "Treehouse of Horror XVI", Bart jumps out of a window yelling "COWA—", then hits the ground and goes into a coma. When he later wakes up, he jerks upright yelling "—BUNGA!"
* The Simpsons in the context of time travel and warning Homer not to touch anything.
* The Simpsons. In the epilogue, they find each other, and Abe meets the woman's adult daughter...who basically looks like Homer in a dress. He panics and runs onto the plane.
* The Simpsons: In the episode "Lisa's Date With Density", Lisa dresses Snowball II in costume while Nelson is over; Nelson is not impressed, and Snowball is not happy.
* The Simpsons, in the episode "Lisa's Rival", when Lisa does this after meeting a girl who appears to be smarter than she is.
* The Simpsons: In the episode "Summer of 4 ft. 2," Homer, in an attempt to light an illegal firecracker with the stove, accidentally burns off a significant amount of the fuse before shoving it in the sink. As a result, sewage overflows the sink and leaks onto the floor, to which Homer then walks away from the mess with his hands behind his back, whistling.
* The Simpsons: In the episode "The Devil Wears Nada", this happens twice between Marge and Ned Flanders when spending dinner with each other without the kids and Homer(who is with Carl in Paris).
* The Simpsons in the final issue of the previous continuity, the Radioactive Man series was rebooted with the first issue already ready to sell.
* The Simpsons: In the flashback episode that shows how Homer and Marge got together, Marge's mother insists she pinch her cheeks before high school prom to make them look rosier. When Marge asks if she can just use some rouge instead, she gives Marge this advice: "Ladies pinch! Whores use rouge."
* The Simpsons in the form of a hyperbolic advertisement for an upcoming football game;
* The Simpsons in "The Front", taking his own underwear without removing his pants so he can read his name.
* The Simpsons in the golf castle where Marge and Homer first made love.
* The Simpsons: In the 'In the Na'Vi' segment of "Treehouse of Horror XXII", Kang reveals that pregnancy is particularly difficult for females of his species as their planet has no pickles and their only ice cream is butterbrickle.
* The Simpsons in "The Kid is All Right" had President Lisa Simpson considering making Afghanistan a state.
* The Simpsons: In "The Man Who Came to Be Dinner", Homer gets patted by a Diz-Nee-Land security guard wearing a chipmunk mascot suit. When Homer claims he planted an acorn on him, the guard has him beaten by other chipmunks, one of whom covers the camera with his hand.
* The Simpsons: In the "New Kid on the Block episode, the Simpsons' babysitter, Laura Powers and Jimbo Jones are making out at second base when Moe Syzlak charges into the Simpsons' house to threaten Jimbo with a rusty and dull butcher knife in retaliation for making prank calls that Bart made in his name, causing Jimbo to break down in tears. Laura then dumps him.
* The Simpsons: In "The PTA Disbands", Marge briefly became Bart's substitute

teacher after he drove all the other subs away, and since Marge is Bart's mother he can't pull the pranks on her like he did with the other subs. She calls him "sweetie" in class.
* The Simpsons: In "The Saga of Carl", Homer's number contribution to a lottery pool is 69, because it makes people laugh (though he himself doesn't know why).
* The Simpsons. In the seconds before he woke up, his heart-monitor began to display Bart's outline;
* The Simpsons: In the second segment of a Halloween episode Bart and Lisa were sucked into a Itchy and Scratchy cartoon.
* The Simpsons in the series proper, much to Homer's (the real one's) dismay.
* The Simpsons: In "The Squirt and The Whale", Comic Book Guy buys a new girdle and wears it under a Captain Kirk shirt.
* The Simpsons In the Treehouse of Horror episode "I Know What You Diddily-Did", Homer ends his "eulogy" for Ned Flanders by hastily declaring that a man cannot testify against his wife, since he and Marge think she killed Ned.
* The Simpsons: In the "Treehouse Of Horror II" story "Homer's Nightmare", Mr. Burns steals Homer's brain to put into a robot designed to be the perfect worker. Since this is Homer, that doesn't turn out to be the case.
* The Simpsons: In the "Treehouse of Horror IX" story "Hell Toupée", Snake Jailbird gets executed and Homer gets his hair in a transplant, and when it possesses him, Homer speaks in Snake's voice.
* The Simpsons into the real world, as the two were worshipped as gods on Rigel IV. To stop them, Bart pointed a camcorder at a Radioactive Man comic and used the aliens' device to make his favorite superhero real.
* The Simpsons: In "Treehouse Of Horror IV" Homer is literally creeped out by "Dogs Playing Poker" by Cassius Marsellus Coolidge.
* The Simpsons: In "Treehouse of Horror V", Marge tries to call the police on a two-way radio when Homer goes insane.
* The Simpsons: In "Treehouse of Horror X'', Bart and Lisa get superpowers and have to fight 'The Collector' (I.E Comic Book Guy). He shoots Bart (with a laser!) who manages to dodge every shot. In a subversion though, when he throws the gun, it hits Bart and knocks him out.
* The Simpsons: In "Treehouse of Horror XVI", Disco Stu wears an arrow-through-the-head hat for Halloween. Unfortunately for him, a witch curses the townspeople to become their costumes, and Stu promptly and painfully dies from having an actual arrow through his head.
* The Simpsons introduces Principal Skinner with a dishevelled appearance from having a hectic day in his office.
* The Simpsons. In typical fashion, they have lampshaded it on more than one occasion:
* The Simpsons: Invoked when Lisa is asked to throw the National Spelling Bee in favor of her main rival, Alex, a younger boy who is genuinely so sweet and innocent that the spelling bee organizer believes having him as their champion would help bring mainstream attention to the competition. Alex is unaware of this and ends up winning legitimately when Lisa accidentally screws up her final word while exposing the attempted rigging.
* The Simpsons invokes this at the end of "Bart the Daredevil", when Homer accidentally gets on Bart's skateboard and launches himself across Springfield Gorge, but plummets straight down at the peak of the jump.
* The Simpsons involves Homer's life being invaded by an army of clones of himself. The clones, predictably enough, lack belly buttons.
* The Simpsons: In "We're on the Road to D'oh-where", Homer takes Bart on a trip to a reform camp and stops at a diner along the way. While there, Bart gets Homer in trouble by pretending to escape through the bathroom window so that Homer can get stuck trying to go through after him, and then telling the cook about a guy in the bathroom trying to dine-and-dash.
* The Simpsons, in which Fat Tony steps out from behind a tree sapling after hearing that the school would need construction for a wheelchair ramp.
* The Simpsons, in which Homer and Marge bond by learning to curl. Marge uses the

hands on approach to help Homer with his sweeping and Homer uses it to help her drink a beer.
* The Simpsons in which Krusty the Clown is arrested for using a Cayman Islands offshore holding company to evade taxes. When Krusty pleads that he can't go to jail because he lives a fancy lifestyle and is used to the best, The IRS agents assure him that "This is America, we don't send our celebrities to jail," but they do take control of 95% of his assets until he can pay off the debt.
* The Simpsons in which Michigan J. Frog sings about the upcoming terrible program.
* The Simpsons", in which Moe coaches Homer into becoming a boxer after Homer is found to have an anomaly that allows him to take multiple hits without falling.
* The Simpsons, in which Mr. Smith goes on a random killing spree during his famous filibuster, stabs the evil Senator to death with a flagpole, and even beheads the President after he enters the Senate. The test audiences and executives are horrified.
* The Simpsons in which, while trying to sneak out of Vegas away from their new wives, Homer and Ned Flanders pull two janitors into a broom closet to rob them of their uniforms. Punching sounds are audible, and the two janitors walk out content, leaving a beat-up Homer and Flanders. Similarly, in "Burns Baby Burns" Homer and Larry Burns are fleeing from the suddenly half-competent Police (who believe Homer to have kidnapped Larry), and duck into a costume store. The viewer is then shown a man who looks quite a bit like Homer, dressed as an organ-grinder leaving the store with a vaguely Larry-shaped man dressed as his monkey. The subversion comes when we see the clerk look into the store's bathroom, where Homer and Larry are actually hiding: "Either buy a costume or get out, fellas!"
* The Simpsons is after Krusty because he didn't pay his debts to them, with Fat Tony personally hunting him down with his men and later calling a world-wide search. In the end, it turns out that the amount of money in question is just 48 dollars which he pays in hand. They even give him a couple of bucks change for a fifty.
* The Simpsons is a late-night program, in its native English but with Thai subtitles, its audience consisting mostly of people who are already fans of American television.
* The Simpsons is an example of a show lasting long enough for this trope to become apparent numerous times over:
* The Simpsons is a parody of this trope. Even though CBG is fat, nerdy, and condescending and Kumiko is a perky, feminine mangaka, she fell for his shamelessness since she was tired of all the submissiveness in her home country.
* The Simpsons is a personification of this trope. In the past, he has played pranks on his family, school faculty, and the town itself, but was usually remorseful if his pranks had hurt someone badly. In the more recent episodes, Bart pulls pranks just to get a laugh and make himself amused, no matter how bad someone gets hurt. He gets upset whenever someone does try to punish him for playing a prank too far, as if they took his only source of entertainment away.
* The Simpsons is a teenager. Every single time she's about to speak, she's interrupted by something.
* The Simpsons is being built directly behind the Simpsons' house. The family aren't best pleased at having a construction site practically in their back garden, and successfully lobby to have it moved - it's shifted onto the site of Springfield Cemetery, which is promptly moved behind the Simpsons' house, giving Lisa nightmares.
* The Simpsons is clarified to include fluent comprehension of Penguin.
* The Simpsons is considered by pinball fans to be one of Stern's greatest pinball machines, if not one of the greatest pinball machines ever made.
* The Simpsons is extremely clever and perfectly able to outsmart and manipulate her enemies like Mr Burns.
* The Simpsons is how unfair (his actual word) they get to be to nuclear power.
* The Simpsons is infamous for this. Homer boasts an unbelievably long résumé. Among the episodes that Lampshade this are these gems:
* The Simpsons is notorious for its portrayal of the "typical hillbilly". In

"Rednecks and Broomsticks", Lisa is playing with the Spuckler children, they counted while she hid as saying, "One, two, backwards-z, one-legged triangle, banana hotdog, double-banana hotdog, sixty-corncob-two..."
* The Simpsons is now widely thought to be part of the show's "golden age".
* The Simpsons is one huge satire of late 20th and early 21st century Western society.
* The Simpsons is one of these, complete with dancing girls descending from cages in the ceiling.
* The Simpsons is portrayed as a nuclear explosion, including one where Professor Frink projected everyone in a large radius would be killed instantly.
* The Simpsons is pretty humiliated, Homer is fine with it; he gets all the free shrimp he can eat.)
* The Simpsons is preyed on by a shapeshifting mutant disguised as his wife.
* The Simpsons" is Samantha Stanky's strict and overprotective father. After Bart calls him on the phone with new concerning Samantha, Mr. Stanky shows up to the Simpson residence and immediately goes up Bart's treehouse. Shock to see Milhouse and Samantha together, he let's out a prolonged "Noooooooooooooo!" that is powerful enough to make birds flee from the tree. Mr. Stanky then snatches her out of the tree and nervously asks her what happened. Before Samantha can even fully explain, he yells at her. As Mr. Stanky carries her off on his back, he tells her that she will be put in an all-girl school and that she will never see Milhouse again. After Milhouse and Samantha cry out for each other, Mr. Stanky puts her in the car, slams the door, and bitterly drives off, leaving Milhouse heart-broken.
* The Simpsons is seen coming out of a convenience store, grossly overweight and in the middle of gorging himself further. Wolfcastle informs his onlookers that he's preparing for a role as a fat secret agent.
* The Simpsons is seen the same way by the rest of the school district.
* The Simpsons is "SOMEBODY THROW THE GODDAMN BOMB!" They even acknowledge this in commentaries, noting how the line seems to have more impact because Marge is the one saying it.
* The Simpsons is "When Flanders Failed", where Bart references a move in the arcade game to cover having ditched karate lessons he was forced to attend: the Touch of Death, where one person rips out the other person's heart in a single jab. He proceeds to threaten Lisa with the move when she disbelieves him.
* The Simpsons, Itchy takes Scratchy's tongue and ties it to a rocket. The rocket makes several circles to the moon, ties the tongue around it, and begins to fall. When Scratchy realizes that the moon is falling over him, he tries to hide inside a closet.
* The Simpsons. It gets worse when Smithers gets stung by a bee and begs Burns to get him to a hospital. How does Monty do it? By ordering Smithers to do it, of course.
* The Simpsons, it is all-but-explicitly stated that the fic depicts Ned Flanders witnessing a vision of a world where Maude never died; due to a moment of carelessness on Ned's part, the Flanders and the Simpsons never visit the race track where Maude died, but Marge dies in a car accident. As a result, Lisa quits most of her extracurricular activities because she is caught up in her grief, Bart is shown losing his temper and lashing out at the bullies who caused Marge's accident, and Homer is contemplating suicide as he cannot live without Marge. The fic concludes with Ned returning to the world in canon, reflecting that, as much as he misses Maude, it is clear that he is better suited to coping with life without Maude than Homer and the Simpsons would be able to cope without Marge.
* The Simpsons. Its entire premise is Scratchy the cat being horribly and graphically murdered by Itchy the mouse in every episode. As a parody of the often surprising amount of violence present in real kids' shows, this one inevitably goes to town with the deaths, which get sillier and more over-the-top by the episode.
* The Simpsons. It's gotten to the point where 3 of the top 5 results that comes up when the quote is typed in on Google are related to The Simpsons, with the top related searches also being related to the line's quotation in the show.
* The Simpsons. It's just coincidence that the defendant was actually innocent.

* The Simpsons" it turns out that the "angel skeleton" that Lisa discovers was actually planted there by the owners of the mall opening up in order to drum up interest.
* The Simpsons. It was featured on the episode "A Test Before Trying".
* The Simpsons. It would be years before FOX was allowed to show the episode again and include it on the season 13 DVD box set there.
* The Simpsons IV has the segment "Bart Simpson's Dracula" in which Bart gets captured by Burns and bitten. Later that evening, he visits Lisa outside her bedroom with a few other kids he's turned and tries to convince Lisa to let him bite her.
* The Simpsons, Jasper had his cataracts removed by a laser home defense system, only to be re-blinded by the laser's second pass. He even says the trope's name before walking away like nothing happened.
* The Simpsons, Jay outdoes Homer with a foghorn burp that sets off car alarms.
* The Simpsons, Jebediah Springfield is responsible for damaging the portrait.
* The Simpsons Jerk'. Then again, they don't object to much of what Homer does because he is at least frequently called on it, even though everything snaps back by the end.
* The Simpsons. John Waters' real mustache is basically a very straight thin line across his upper lip. However, in the cartoon, he had a wavy moustache. In the audio commentary, the reason John Waters' straight thin moustache was replaced by a wavy line was because John Waters' real moustache would just look like a straight line over his lip and disappear. John Waters said he actually liked it, but considered that it would be difficult to shave his moustache to look like that.
* The Simpsons". John who was gay and the campiest person ever (and in fact was played by John Waters), but he was not a Camp Gay. However, it was played straight with the gay steel mill.
* The Simpsons" King Mitothin forbids magic by mages who are not serving him. Those who aren't serving him are essentially drafted.
* The Simpsons: "King of the Hill" has a newly-fit Homer trying to climb the Murderhorn as a stunt for Powersauce bars, both to impress Bart and complete his father's climbing mission, where he was betrayed and knocked off by his partner. Homer then becomes disillusioned when he finds the partner's frozen corpse and reads his diary, revealing that Grampa was really the betrayer. In the end, the mountain collapses, and Homer sticks his flag on what's left of the peak.
* The Simpsons". Krusty quickly gets tired of it, and the resultant pain of getting bit in the ass every time he makes a commercial.
* The Simpsons, Krusty starts his promotional tour of his new merchandise factory (after initially forgetting about it and sleeping in) with a look at a cyborg monkey-run assembly line.
* The Simpsons, Krusty the Clown once manages to refresh his comedian routine by starting to complain cynically about the modern world, and becomes popular as a stand-up act again. Soon, however, he's once again persuaded to start endorsing a product even in his act in the middle of complaining about everything else, immediately losing his credibility. He doesn't regret it, though, because as he explains he's realised his real talent isn't comedy - it's selling out.
* The Simpsons "Labor Pains", Lisa helps the town's cheerleaders (the Atomettes) unionize so they can negotiate for better wages and on-the-job conditions. She gathers the Atomettes in Bart's treehouse, causing a crowd of men (from Nelson to the Mayor) to circle around them.
* The Simpsons: Lampshaded in the episode "The Lastest Gun In The West." Bart, running from a attacking pit bull, climbs over a fence and backs away from it; when a safe distance away, he relaxes, saying, "Ah, safe at last. Now, I'll just turn around, and confirm that safety," only to find a menagerie of menacing creatures ready to attack.
* The Simpsons later than expected with an overall destroyed car sporting a wagon wheel as a spare tire, infested with farm animals, and a US Military Missile embedded into the back.
* The Simpsons, leading them to experiment with new art and plot formats that led

to a drop in quality and lack of direction for the show.
* The Simpsons, leading to the two gangs forgetting about everything except fighting each other. After a while the two groups just keep brawling in the front yard while the Simpsons family go about their usual business indoors.
* The Simpsons led him to believe that they'd probably turn him down right away, so he naturally ended up surprised when they actually agreed to his conditions.
* The Simpsons, "Lemon of Troy": To get a stolen lemon tree from a Shelbyville impound lot, Homer and others park Ned Flanders' RV in front of a hospital and wait for it to be hauled away. After the plan works, Homer comments that no one in history has ever had such a brilliant idea.
* The Simpsons": Lenny gets a new plasma screen TV and invites his friends over. Homer is so impressed that he will watch anything at that picture quality. He watches a commercial with a dancing and laughing cold sore. It looks annoying as all hell.
* The Simpsons, Lenny goes to a '50s theme bar and the toilets are "Cool Cats" and "Squares". He goes into one, women scream, he goes into the other, same thing. He is confused.
* The Simpsons-licenced Fruit Machines. Winning £5 has never been this annoying...
* The Simpsons like in the original story, but then it is revealed that they both actually died when it was time for "the lowering of the bodies into the coffins."
* The Simpsons", Lisa discovers a pheromone given off by nerd-types which forces bully-types to beat up on them. She experiments by spraying Drederick Tatum (the show's version of Mike Tyson) with the scent, which compels school bully Nelson to beat up on Tatum, even though Nelson doesn't want to. Lisa names the new discovery "Poindextrose".
* The Simpsons, Lisa ends with a very brief speech, simply stating that Jeremiah Springfield was great. The response is this trope.
* The Simpsons, Lisa falls in love with a cowboy who is 5 years older than her. When Marge says that he is too old for her, Lisa points out that the difference won't matter when they are both adults.
* The Simpsons Lisa finds an old videotape seemingly labeled "Bart sad." It turns out to be a commercial that he starred in as a toddler, at which point she realizes that the title is "Bart's ad," albeit with the apostrophe missing.
* The Simpsons, Lisa is babysitting Rodd & Todd Flanders, and telling them a bedtime story about robots named Rod & Todd (per Todd's prayer).
* The Simpsons", Lisa is furious at Bart for revealing her true geeky nature to her new beach friends. In one scene, when Marge leaves the room, Lisa grabs Bart by his collar and prepares to pour syrup on his eyes, only to put everything back the second she reenters.
* The Simpsons", Lisa is jealous of the new girl in school and, in desperation, asks Bart to dig up some dirt on her. Bart reports that the girl is "clean as a bean."
* The Simpsons, Lisa never dreamed of Homer's American loaner car designed in Germany, assembled in Mexico from the parts from Canada could be so amazing.
* The Simpsons, Lisa sends a love note to the school bully Nelson, via Milhouse. Thinking that Milhouse is the author, Nelson pummels the crap out of him.
* The Simpsons", Lisa's forced to turn to Homer when she has a dream about the boogeyman. Upon hearing the very word Homer freaks out, orders the windows and doors locked, grabs his shotgun, and holes up the rest of the family in his bedroom until Marge comes home. And by the time Marge gets home the door has a noticeable hole in it.
* The Simpsons, Lisa's imaginary friend began killing random people and pinning their deaths on her out of anger for moving on. She is defeated when Lisa forcibly forgets her, causing her to disappear once again.
* The Simpsons: Lisa Simpson, after accidentally getting on bus 22a instead of the 22, finds Area 51. Her excitement is squashed, however, when she's told it's actually Area 51-A.
* The Simpsons: Lisa Simpson is extremely intelligent and a talented saxophone

player. She has great interest in science and environment.
* The Simpsons: Lisa Simpson is fond of this expression. Notably, the episode "Bart's Inner Child" and motivational speaker Brad Goodman:
* The Simpsons, Lisa tricks Homer and Bart into thinking they have leprosy and Ned sends them to a Hawaiian rehab center. While Homer is receiving a painful operation, Bart looks at his ticket, a #2.
* The Simpsons: "Lisa vs. Malibu Stacy" has Stacy Lovell, the creator of the titular doll, who Smithers claims hasn't appeared in public in twenty years. Lisa (rather easily) tracks her down to a gated community called "Recluse Ranch Estates" where she resides in a house exactly like the one the doll lives in.
* The Simpsons locations, including Otto's bus, Burns' power plant, Kang and Kodos' spaceship and finally Springfield Gorge.
* The Simpsons' long lasting success. Children laugh at the slapstick elements, while adults will recognize the innumerable cultural, political and historical references and love the social satire. There are also a lot of subversive jokes that are so child unfriendly that teenagers and adults love them on a totally different level. "The Simpsons" is also one of the few TV shows, cartoon shows for that matter, which is loved by the general public as well as intellectuals.
* The Simpsons losing your penis. Fifty years later, his grave features the epitaph "Homer Simpson, Impotency Spokesman". Nelson laughs at this, too.
* The Simpsons. Lou mentions a time he'd visited neighbouring Shelbyville, and visited a place called McDonald's, which looked just like Krusty Burger but with different names for all the exact same burgers.
* The Simpsons Luckily, Ralph was amused enough by the pun to accept it.
* The Simpsons Maggie was slipping Manjula fertility drugs, they have octuplets.
* The Simpsons mailbox, and was swiftly and painlessly taken down by Animal Control. Naturally, the mayor forms a "Bear Patrol" and passes the cost onto the taxpayers.
* The Simpsons makes use of these. Every time we see the Springfield Nuclear Power Plant, a crow caws in the background. In earlier seasons, a shot of the supermarket would always be accompanied with a stray shopping cart drifting into the street.
* The Simpsons, Manjula receives a life-sized chocolate in the shape of Apu. Apu himself is inside it.
* The Simpsons. Many episodes are used by teachers of social sciences to drive discussions.
* The Simpsons: Many episodes focusing on Homer and Marge's relationship, or with their children.
* The Simpsons many times, including comparing Mr Burns to the Goa'uld. The icing on the cake is when Dan Castallaneta, the voice of Homer, make a guest appearance on Stargate... and agrees with Jack's "Burns = Goa'uld" theory.
* The Simpsons", Marge and Homer met when they were circa 10 years old at summer camp and shared their first kisses together. When they met again in high school neither recognized the other, in part because Marge had very different hair and Homer had an eye-patch and was going by an alias when they first met.
* The Simpsons. Marge creates a pumpkin-headed scarecrow to get rid of a murder of crows attacking her garden. The scarecrow is scary enough that even Homer is terrified when he returns home that night. Thinking he's dealing with a real monster, Homer destroys it with a bat and subsequently becomes a god to the crows. This contrasts an earlier joke when Marge only had the cross-style post set up for the scarecrow to rest on. It attracted Flanders and his sons to come pray in her garden.
* The Simpsons; Marge goes through Bart's pockets while she's doing the laundry, and a matchbook from a jazz club is one of the things she tosses aside before a flyer for an upcoming bake sale catches her attention.
* The Simpsons: Marge has a pretty distinctive gasp. In "Chief of Hearts", she gasps so hard, she inhales one of Maggie's blocks.
* The Simpsons", Marge is arrested for accidentally stealing a bottle of bourbon, and her time in prison sends the town into chaos.
* The Simpsons, Marge is in a store looking at a set of kitchen knives. When she

notices that the label says "Made in USA", she decides against buying it.
* The Simpsons, Marge is trying to find a way to bring culture to Springfield:
* The Simpsons, Marge joins an online game and gets stuck walking into a wall. She comments "how incredibly annoying!" only for Grandpa, who is stuck like this in real life, to respond "tell me about it."
* The Simpsons: Marge once became a carpenter but nobody would hire a woman to do that kind of job. As she commented to Homer that it seemed people expected carpenters to be overweight people with visible buttcracks, she immediately thought about using Homer as a facade.
* The Simpsons, Marge once distracted Chief Wiggum by flashing her (temporarily surgically enhanced) breasts. Which Krusty referred to as "Mugumbos". Which happened to be the control word for Stampy the Elephant.
* The Simpsons Marge points out how much easier things are since scientists invented magic.
* The Simpsons Marge rides a shopping cart like a scooter because she is bored. It crashes into a large display, and she walks away like nothing happened.
* The Simpsons: Marge Simpson had the same chronic doormat problem when Gill wouldn't leave their house.
* The Simpsons: Marge Simpson's trademark blue towering hive, and Bart's spiky hair (Which he referred to as "Bad Boy Spikes") for that matter. To a lesser extent, Lisa and Maggie's star shaped hair (the former called it her "Good Girl Points").
* The Simpsons Marge tries to get Homer out of bed. In the process, she folds the mattress in half with Homer still in it. A red liquid leaks from the mattress and Marge screams. It turns out it was a juice box Homer had.
* The Simpsons, Marge used this nursery rhyme to put Maggie to sleep, only to scare the hell out of her.
* The Simpsons, "Marge vs. the Monorail", two guys discuss the speeding out of control monorail:
* The Simpsons marrying a black man named Virgil. (She did so in Canada, which was part of the British Empire at the time.)
* The Simpsons, Martin Prince has this role as a reporter for the "Daily Fourth Gradian".
* The Simpsons, Martin Prince wears one of these hats when he works for the school newspaper.
* The Simpsons mask also contains electronics that enable Mr. Burns to communicate with Smithers wherever he is.
* The Simpsons, Mayor Sideshow Bob is sent to Minimum Security Prison for rigging the election. Looks more like a college campus than a prison. The local prison Harvard rowing team even asked him to join up for a match against Princeton. It's likely that the place is a prison for "white collar" criminals like corrupt businessmen or, in Bob's case, a corrupt politician.
* The Simpsons — and is very fond of Maggie, and becomes her babysitter.
* The Simpsons — Bart finds a tape marked "Homer and Marge Get Dirty", and plays it for Lisa hoping to traumatize her. It turns out its just footage of the two carving pumpkins and getting covered in pumpkin pulp as a result.
* The Simpsons — he's too nervous and overwhelmed to make any such motions.
* The Simpsons—it's actually kind of shocking when they do play them straight.
* The Simpsons — the baseball mascot the Capital City Goofball is revered by everyone in Springfield.
* The Simpsons — the episode where Homer eats fugu and thinks he's going to die — Homer experiences the five stages of grief as quickly as Doctor Hibbert can recite them.
* The Simpsons, men are toiling in caves deep below the nuclear power plant walking in circles turning a wheel. We follow the crankshaft higher and higher through a series of smaller rods and complicated gears until we reach the cafeteria where all that effort is turning the dessert display.
* The Simpsons" mentioned a feud with Shelbyville but only shows the final prank.
* The Simpsons: "Midnight Rx" has Mr. Burns and his anecdote about the "Plywood

Pelican".
* The Simpsons,"Million Dollar Abie": When Marge hears that Abe wanted to be euthanized, she is quite shocked and says that suicide is a sin.
* The Simpsons' minor characters are completely bizarre without context, yet the show takes it for granted that the audience can recognize and appreciate most of them without any sort of perfunctory introduction or explanation. Examples would include Bumblebee Man, Sideshow Mel, Duffman, the Sea Captain, or Disco Stu, or even Krusty, all of whom are long-running continuations of one-off gags from many, many years past. One gag even relies on the viewer recognizing Duffman's voice, when he himself neither appears nor even gets mentioned in the episode.
* The Simpsons "Miracle on Evergreen Terrace" has Bart accidentally destroy his family's Christmas presents and Christmas tree. He tries to cover up his mistake by claiming that they were robbed by a burglar. At one point, the Springfield Police ask Bart what the burglar looked like, and he mentions the burglar wearing a striped convict shirt and holding a big sack with a dollar sign on it. Lou scoffs "Classic burglar".
* The Simpsons: modern-day phones just look and sound too "futuristic" to be "real".
* The Simpsons, Moe is waiting for his computer-date to show up. She knocks and he opens the door to nothing and assumes he's been ding-dong-ditched, but she's a little person and has to get him to look down.
* The Simpsons. Moe Szyslak gets visited by a health inspector which he knows well...except he dies there. When the new inspector comes, Moe hasn't even cleaned up the body of the previous health inspector.
* The Simpsons, Moe Szyslak is implied to have multiple fathers. In the episode "Moe Goes From Rags To Riches", it is shown that his father is a Yeti. However, in "Walking Big And Tall", a flashback shows a young Moe with a man resembling him. And in "Springfield Up" he claims "My dad was a circus freak, but my mom don't remember which one. I like to think it was a little bit of all of them."
* The Simpsons moments later when Homer sleep-walks in, and is also stopped by being given sausages.
* The Simpsons moment when he finds out which judge their case is to appear before:
* The Simpsons' Montgomery Burns lost his fortune and Lisa convinced him to be "environmentally friendly". He honestly tried to do the right thing, but... "What's wrong with Li'l Lisa's Slurry? It's made of 100% recycled sea animal!"
* The Simpsons, mostly because Homer fails to think something through.
* The Simpsons, most of the guys are going off to watch the Super Bowl. When they notice there isn't a single girl in sight, Homer exclaims that he can finally stop holding it in, and exhales revealing that his big gut is actually even bigger, and all the other guys follow suit, only to have to suck it back in once they discover that their bus driver is a gorgeous woman.
* The Simpsons move that actually scares the living hell out of Bart and he spends the rest of the episode afraid of having to testify on behalf of the defense of Freddy Quimby because it would mean having to confess he got out of school.
* The Simpsons Movie, a bomb disarming robot is trying to decide which wire to cut on the bomb that's supposed to blow up Springfield, but can't take the pressure and shoots itself in the camera.
* The Simpsons Movie, a flashback has Homer taking Bart fishing, where he throws a bug zapper in the water, which causes all the fish to float up dead. Homer picks up a fish and tries to eat it, but gets shocked every time he bites into it.
* The Simpsons Movie also has two commentaries. It also does something rare — the movie actually stops at points so that the commentators don't talk over too much of the action.
* The Simpsons Movie, and looks back upon his life of comic book collecting, tabletop gaming, and other solitary/geeky interests, he smiles and triumphantly concludes "life well spent!" Which is interesting, since in a Halloween episode of the series, moments before he gets blasted away by a nuclear weapon, he claims that he wasted his life.
* The Simpsons Movie) and the law because they escaped the dome that sealed

Springfield in as environmental control.
* The Simpsons Movie appears, stating "Yes, we even have these in movies now." (Actually, it's a newsbar, but still...)
* The Simpsons Movie, Apu is seen doctoring the expiration date of a milk carton, turning the 6 in 2006 into an 8.
* The Simpsons Movie, Bart doodles on a wanted poster with his family on it to prevent the owner of the store it was in from noticing it and calling the police and getting them arrested. A family resembling the modified picture ends up getting arrested after the store owner notices the poster.
* The Simpsons Movie, Bart is dared to skateboard naked, which leads to a scene of silly censorship and people reacting.
* The Simpsons Movie because they felt it would interfere with the main show. Colin also disappears for much of the second half.
* The Simpsons Movie, Burger King had a selection of Simpsons watches as toys for their Kid's Meals. One of the watches consisted of Bart and Lisa doing this to a very notably annoyed Homer while he's driving.
* The Simpsons Movie. But, here this is very much appreciated by the boy. Earlier in the movie Homer did take Bart fishing, just with a bug zapper.
* The Simpsons Movie came out, Homer was brought in to do the Top Ten List.
* The Simpsons Movie, Chief Wiggum can't carry enough donuts, so he stacks them on the barrel of his gun, and then eats them straight off it. The gun goes off while he's between bites, blowing a hole through his hat. He says "Whoa, that was a close one!" and continues eating. Another episode, showing film of him when he was younger at a firing range, has him looking down the barrel after his gun stops and getting yelled at by his instructor ("What did I say about pointsy-twardsies?"). He then gives the instructor a back massage with the gun and it goes off and shoots the cameraman. He's later shown to have gotten the position of Chief by giving the Mayor a back massage with his gun. Another episode showed Wiggum cleaning his ears with the barrel of his gun, and yet another showed him firing at his TV after forgetting where he left the remote. It was in his gun holster.
* The Simpsons Movie count when the family escapes from the dome Springfield has been put in and Lisa is separated from her love interest (although they could still see each other).
* The Simpsons Movie did this around the start of Act IV, with "To Be Continued" appearing on screen, and then followed by "Immediately" not long after.
* The Simpsons Movie featured a subplot with Lisa and her movie-exclusive boyfriend Colin. Near the end of the movie, they go out for ice cream and this interaction is never heard from again.
* The Simpsons Movie features some audience members struggling to surf the morbidly obese Comic Book Guy.
* The Simpsons Movie Granted, the ‘’Simpsons’’ fanbase is so large that they could get away with this entirely. Still, it’s packed with so many in-jokes that even long-term fans had forgetten a lot of them. Of course, the first thing the movie does is draw attention to the fact that it is virtually a giant Simpsons episode, so they probably knew that.
* The Simpsons Movie has a gag where dumping in Lake Springfield was prohibited just as Fat Tony and his goons were about to dump a bag with a dead body inside into it.
* The Simpsons Movie has Marge, Bart, Lisa and Maggie gassed while imprisoned in a government truck and they wake up back inside the encased Springfield.
* The Simpsons Movie has one near the end between Homer and Marge while driving a motorcycle.
* The Simpsons Movie has the town of Springfield quarantined by EPA chief Russ Cargill because of excessive pollution. When the Simpsons manage to escape, Cargill goes mad with power and requests armed guards to maintain quarantine, a top-class manhunt for the Simpsons, and plans to turn the whole town into a canyon-sized crater via nuke.
* The Simpsons Movie, Homer addresses (and insults) the audience. There's also a sign gag in front of the church which says "Thou shalt silence thy cell phone!",

which isn't an issue if you're watching it at home.
* The Simpsons Movie. Homer dresses as a hotel doorman to fool a soldier that he is a superior officer. He's only given away when the soldier queries why an order from the President is written on a leaf.
* The Simpsons Movie, Homer has a small billboard-sized poster of Alaska folded up to the size of a business card.
* The Simpsons Movie, Homer's selfish antics have more repercussions than is usual in the original series - especially for his relationship with Marge (though they naturally end up back together in the end).
* The Simpsons Movie: In an attempt to get the dome removed and free Springfield, Homer wears a hotel doorman's outfit and approaches a soldier, claiming to be General Marriott Suites.
* The Simpsons Movie is a step above that of the series, but, again, especially the Itchy & Scratchy short at the beginning.
* The Simpsons Movie, is a textbook, if self-aware, example of this trope.
* The Simpsons Movie is because the exact same crew was working on the television show at the same time. In order to make all their deadlines everyone had to work through their vacation and production breaks from the show. The same problem would plague any sequel as well.
* The Simpsons Movie, Julie Kavner was put through around 100 takes to get the exhausted-sounding delivery they wanted.
* The Simpsons Movie, Krusty is seen dumping a whole cistern tank of flop sweat into Lake Springfield.
* The Simpsons Movie, Krusty the Clown literally begs the viewer to eat at Krusty Burger rather than Burger King.
* The Simpsons Movie like the marked-up sketch, complete with an eyepatch-wearing Maggie. In the DVD commentary, Matt Groening comments that he wants to do an episode about that family.
* The Simpsons Movie: Lisa gets the citizens of Springfield to clean up the polluted lake by spiking their drinks with water from the lake, and everyone does this when she tells them.
* The Simpsons Movie: Lisa has a perfect moment with Colin before they escape the dome. And then...
* The Simpsons Movie opens with Grampa having a convulsive fit in church as he gives a dire warning: "Twisted tail! A thousand eyes! Trapped forever! Eepa! EEEEEPAAAA!"
* The Simpsons Movie revealed that it's nowhere. Flanders says that the four states bordering Springfield are Ohio, Nevada, Maine and Kentucky. No state like that exists and if one did it'd have to be huge.
* The Simpsons Movie Russ Cargill speaks to the citizens of Springfield through a giant video display on the dome enclosing the town.
* The Simpsons Movie: Russ Cargill underwent a complete design overhaul late in production, but a tie-in Burger King figure retains his original design.
* The Simpsons Movie seemed like it might be heading for this when the Simpsons head for Alaska and found it filled with oil rigs, Homer's idea of a map is to plaster the poster advertising Alaska to the car windshield. When they get there Alaska is great and actually has the exact same view as the poster.
* The Simpsons Movie. She asks questions about shooting techniques and the like that other commentators mention. She very often does the same in DVD commentaries of the regular series.
* The Simpsons Movie since it is also the 400th episode of the series.
* The Simpsons Movie territory, such as a slim cop becoming the fat Chief Wiggum and a bride turning into Selma Bouvier - leading her husband-to-be to scream in shock and try to run away.
* The Simpsons Movie: The chanted version of "Spider-Pig" that plays during Homer's epiphany with the Inuit shaman in Alaska was dubbed into 32 languages, all sung by the same choir.
* The Simpsons Movie, the logo was colored yellow, with the "O" replaced by a pink donut.

* The Simpsons Movie, the people of Springfield go after Homer with torches and pitchforks after finding out Homer was responsible for polluting Lake Springfield. Later in the film, Homer announces he doesn't want to leave Alaska because everyone came after him with torches and pitchforks, "at 4:00 in the afternoon!".
* The Simpsons Movie, up to and including taking steps similar to those taken by Scholastic lawyers to prevent plot details from leaking out before the movie was screened officially for critics and audiences in Springfield, Vermont, the site of the film's premiere.
* The Simpsons Movie was banned in Burma mostly because most of the characters' skin is yellow, and yellow and red were the colors of the main political opposition party, the NLD, as well as the skin being perceived as a stereotype of Asians having bright yellow skin.
* The Simpsons Movie was dubbed into Japanese twice. The original theatrical dub used Japanese celebrities to do the voices. It was so poorly received that the movie was re-dubbed for the home video release with the Japanese voice actors from the TV series.
* The Simpsons Movie when Fat Tony and his thugs arrive at Lake Springfield with a rolled-up carpet. Police Chief Wiggum deters them, stating that no further waste dumping will occur at the lake. Though his fellow officers are suspicious, Chief Wiggum points out that Fat Tony mentioned "yard trimmings," so there couldn't be a corpse in the carpet roll.
* The Simpsons Movie: When Homer tries to operate a wrecking ball he accidentally knocks himself over and gets tossed between a rock and a hard place — meaning an actual giant rock and a saloon-style bar called A Hard Place.
* The Simpsons Movie: When Homer tries to return to Springfield from Alaska, he uses sled dogs and is extremely abusive towards them, whipping them even when they're resting. The dogs eventually attack him and then abandon him.
* The Simpsons Movie when Lou arrests Bart for skateboarding in the nude.
* The Simpsons Movie when the family are on the run. We see a huge room full of government bureaucrats listening in on inane conversations until one of them overhears Marge on one of the bugs they installed on a train. The bureaucrat joyfully leaps up and declares, "We found them! The U.S. Government actually found somebody we're looking for!"
* The Simpsons Movie where Lisa is pointing out the increase of pollution, and has to use a scissor lift to show just how bad the problem has become.
* The Simpsons Movie, where the family is watching the credits at the end. Maggie's first word is "Sequel."
* The Simpsons Movie who help Homer and Marge undress watch, aghast, as they have sex, and a buck puts his hoof over his son's eyes.
* The Simpsons Movie with both hands as he escapes down a sinkhole. Then he gets stuck and tries to use the fingers to dig himself out. This wasn't digitized on the FX airings of the movie.
* The Simpsons". Mr. Burns accidentally hits Bart with his limo; the family attorney 'tricks' Homer into exaggerating the resulting injuries to squeeze more money from Burns.
* The Simpsons: Mr. Burns and Grandpa Simpson, for Marge's mother, Mrs. Bouvier—at first, Mrs. Bouvier was with Grandpa Simpson, but she ended up leaving him for Mr. Burns and almost marries him. In the end, Mrs. Bouvier chooses not to marry Mr. Burns but also doesn't get back together with Abe—however, Mrs. Bouvier at least leaving Mr. Burns is good enough for him.
* The Simpsons. Mr. Burns and Smithers attempt a Ceiling Cling in Homer's kitchen while trying to steal Maggie's teddy bear. Unfortunately Homer comes in at that very moment, and starts a marathon cheese-eating session that lasts until dawn. (That's when Smithers and Mr. Burns just give up and fall to the floor.)
* The Simpsons, Mr. Burns and Smithers bring Marge to Skull Island to use as bait for King Homer, which leads to an awkward situation for Burns when they get there:
* The Simpsons: Mr. Burns believed he had encountered "some kind of force field" when reaching for food at a cafeteria. It was a plastic sneeze guard.
* The Simpsons, Mr. Burns claims one of his siblings died this way, although he was

probably murdered.
* The Simpsons, Mr. Burns drains Loch Ness to find the monster, but it turns out it's just the Loch Ness High School float - which is then stomped on by the real Loch Ness monster.
* The Simpsons Mr. Burns gives Homer and two other lunkhead employees the duty of watching the company bee while a nuclear inspection is going on, thus hiding them away in the basement where the inspectors won't witness their incompetence. Homer is the only one of the three not to question what's happening.
* The Simpsons Mr. Burns makes an industrial film to promote working at the plant. We see how terrible it is and assume we're watching the filming process; but no, it's the final product.
* The Simpsons, Mr. Burns moves the power plant to India. When one of Moe's patrons comments that the bar is being powered by imported electricity, Moe sees no problem and points out other imported stuff. When he's asked if he has anything made in America, he shows his shotgun and tries to shoot, causing it to backfire.
* The Simpsons, Mr. Burns pulls this out when trying to bribe some nuclear safety inspectors.
* The Simpsons: Mr. Burns seems to be fond of this. He once listed among his childhood dreams: "...wiping out nations at the stroke of a pen."
* The Simpsons: Mr. Burns' son Larry fakes abduction to make Burns show his love. When the "kidnapper" calls, Chief Wiggum does trace the number but, upon reading "555", dismisses the number as a fake.
* The Simpsons, much to their amusement (and to Lisa's annoyance, of course.)
* The Simpsons, Nancy Cartwright noted how great her job is because she gets paid to "burp and fart". For some reason, the word "fart", which is frequently uttered on Nickelodeon uncensored, is bleeped out.
* The Simpsons, Naomi has a crush on Ned and so accidentally calls him "hot" instead of "sweet".
* The Simpsons, Naomi says, "What can a girl do to make some money around here?", then adds, "That's not what I meant! I mean, like a job!".
* The Simpsons, NASA decides to let an average person be an astronaut to better its image, which is how Homer ends up on the space shuttle.
* The Simpsons, Ned Flanders is trying to figure out who stole the Church's collection money when he's almost shot at by a passing car. Learning that a security camera captured the event, he checks out the footage to find that the car's driver was...
* The Simpsons: Ned Flanders was completely unruly as a child due to his hippie parents refusing to discipline him. A therapist chose to use the "University of Minnesota Spankalogical Protocol" which involved eight months of non-stop spanking. It got Ned to behave but it also taught him to completely repress all negative emotion and left him unable to healthily express his anger.
* The Simpsons, Ned is buried like this and Homer parks his car on Ned's head.
* The Simpsons - news segment. The episode was meant as a satire of the current state of the media - which, sadly, hasn't improved since the episode first aired (in 1994!).
* The Simpsons: Night of the Living Treehouse of Horror" episode segment of the same name. In this level, Bart has to rescue Santa's Little Helper, who is being held prisoner in the attic of a haunted house. As he progresses through the level, Bart needs to collect keys and fuses. The keys unlock the rooms in the house, and the fuses light up dark rooms. The boss of the stage is an anthropomorphic broomstick
* The Simpsons: Night of the Living Treehouse of Horror segment from the series.
* The Simpsons, notably part of Krusty's comedy schtick. Each time he does the flapping dickey gag, though, it is outright mocked for being cliche and old-fashioned, showing Krusty's desperation to get a laugh.
* The Simpsons. Not liking the idea of having her as a neighbor, Bart tried to make Ned's sons, Rodd and Todd, afraid she'd be a Wicked Stepmother who'd force them to do all the household chores. It backfired because Rodd and Todd enjoy doing them.
* The Simpsons numerous times, he finally doomed himself after a random act of

kindness nearly killed him. He then realized that evil was literally the only thing keeping his frail, 104-year-old body alive, and he vows to never reform his ways in order to keep himself alive forever.
* The Simpsons of 2010 has a quick gag where we see that the Big Ben has replaced its analogue face with a digital one... blinking at 12:00.
* The Simpsons of all characters, although, with the exception of Captain Jack, those were all subtext.
* The Simpsons of areas, as the show often does, but two examples could probably be chalked up to this trope. First of all, Barney's mother wouldn't be allowed an assignment on the submarine, as Navy regulations at the time forbid females from doing so. Second, the only way to be dishonorably discharged is to be court martialed, as Homer clearly was not.
* The Simpsons of Bart afraid in the dark and happy in the day ("Night is scary." "Day is awesome!").
* The Simpsons of being the man, and even when Homer outright unmasks himself in front of a crowd and confesses everyone calls him a liar.
* The Simpsons, of course, parodies this several of its Halloween episodes. One in which Homer buys a Monkey's Paw (subverts the expectation of the store mysteriously disappearing afterward), another in which Homer buys a cursed Krusty the Clown doll for Bart (it came with a free frogurt... which was also cursed), and another in which Bart finds the occult section of Springfield Elementary's library ("Gee, I never noticed that before!").
* The Simpsons, of course, that mentions this trope. Homer has to yell to Bart through a megaphone, and is told the true location of his remote:
* The Simpsons (of course) when Itchy and Scratchy smash the Simpsons' TV screen with axes and climb through the hole in a "Treehouse of Horror" special.
* The Simpsons of him, except attractive. But despite their attraction to each other, Homer decides to remain with Marge.
* The Simpsons of Homer's face graphically melting, arguably one of the most frightening moments of the series.
* The Simpsons of Quagmire assaulting Marge Simpson, then killing the entire Simpson family (including Maggie) afterwards. It was actually a loathsome moment to many, many viewers.
* The Simpsons of the fact that Strawberry has hit nine homeruns, because Homer is a right-handed batter and the pitcher left-handed. According to Mr. Burns, "it's called playing the percentages, it's what smart managers do to win ballgames"; the joke, however, is that Mr. Burns is using a real baseball strategy despite the fact that Strawberry is so obviously superior to everyone else. Mr. Burns then proceeds to confuse Homer with a series of bizarre coaching signals; while Homer stares in blank confusion, he's hit by a pitch and walks (or rather, is carried) in the winning run.
* The Simpsons of the hockey team, turns out to be a brilliant goalie because he has so much practice catching all the toys his toddler brother throws at his beloved computer.
* The Simpsons of the Simpsons are based in some respect on Matt more than any of their namesakes.
* The Simpsons once had this happen with a bachelorette party, but decided to just go with it since he wanted the money.
* The Simpsons once managed to create tomato/tobacco hybrids. They looked like tomatoes, but where brown on the inside and highly addictive. Every plant save one was eaten by local wildlife and the last one ended up in the hands of the tobacco industry. They really did appreciate it though.
* The Simpsons once stated that they came from a certain ringed planet they preferred not to name. In the episode where Homer thinks he has seen an alien, Bart makes fun of him by dressing up as an alien and shouting: "I am the thing from Uranus!"
* The Simpsons, one "deleted scene" has Homer lying naked in his hammock for no reason.
* The Simpsons One episode has Bart and Lisa distract airport security in order to

get onto a plane by having Lisa loudly declare she's going into a lounge she doesn't have the proper pass for. Two guards draw assault rifles to deal with one eight-year-old girl.
* The Simpsons: One issue has a future Lisa visiting Bart in hospital, with his only words being "fish logs". She goes around town talking to everyone, learning a long story involving Bart making a fortune off of fish logs when he was a kid. It's only at the end of the story that it's revealed this has nothing to do with Bart's injury, but because those were what landed him in hospital in the first place - he'd been overeating them at work on a dare.
* The Simpsons, one of the "deleted scenes" mentions Kang and Kodos (aliens) abducting the Simpsons.
* The Simpsons." One of the flashback episodes ("Lisa's Sax") is set during a time when "The Artist Formerly Known As Prince was currently known as Prince."
* The Simpsons - One of the uber-nerds Homer meets when he went back to college was so timid he couldn't use the bathroom after someone knocked on the door.
* The Simpsons: One time when Maggie Simpson is locked inside the bathroom all by herself, Bart uses Homer's head as a battering ram to try to open the door.
* The Simpsons: One Treehouse of Horror issue has pod-people taking over Springfield, and they manage not only to get Krusty, but the entire production staff of Itchy and Scratchy, so instead of mindless violence, the show consists of Itchy and Scratchy watching a wall dry (and commenting on it).
* The Simpsons on her neighbor's coffee table. Upon reading it, Marge is surprised at the headlines only to be informed that it's satire. Next, Marge opens the paper and upon reading the movie reviews, laughs at what the critics say about the movies only to find out the movie reviews are real.
* The Simpsons" on January 14, 1990, with the redone pilot being aired as the season finale.
* The Simpsons on their covers. Two of the comics have the titles "Deathkill" and "Killdeath" - which qualifies as a double example.
* The Simpsons on the Spanish version of Bart's early catchphrase "eat my shorts".
* The Simpsons on what he thought were some unsuspecting customers. He didn't exactly miss any notes, but without any dramatic echo, music, or shadows, it came across as more awkward and silly than outright menacing.
* The Simpsons" opens with Homer passed out outside in the snow with no memory of the past 24 hours.
* The Simpsons, Otto summons the strength to crack an exterior wall after leaning that Homer has called him a Sponge, not a bum.
* The Simpsons outfit and made unusually busty just for this episode) and eat away at her clothing. "But they seemed to know just where to stop".
* The Simpsons, over-eager mountaineers try to climb a park ranger — even though all persons involved are normal-sized.
* The Simpsons page quote, the actual episode is not an example. The first Zany Scheme was kidnapping a neighbouring schools' pig, which got the nerds expelled, and Homer tries to counter this with an even zanier scheme: having the nerds push the Dean out of the way of Homer's car, which... well it works in the long run. But yeah, it's not actually an example because both schemes were concocted by Homer.
* The Simpsons. Panning shot of the NYC skyline. Shirtless man strides into the room, lifts the snowglobe, and throws it, causing it to shatter. The dust clears where it landed, revealing a sign reading "MR. PLOW."
* The Simpsons: Parodied in one of the Halloween episodes, where Bart has a nightmare about facing terrible danger on the bus ride to school (which of course, comes true.)
* The Simpsons: Parodied in this encounter between Mafia boss Fat Tony and Chief Wiggum.
* The Simpsons parodied this in "Sideshow Bob Roberts" with a trenchcoat-wearing, cigarette-smoking Mr. Smithers. His identity was blatantly obvious from the shape of his head while standing in the shadows, even before Homer shined his car headlights on Smithers.
* The Simpsons parodies that appear as shows within a show that are viewed by other

characters in-universe.
* The Simpsons parodies this trope. In this episode, the Simpsons live in a medieval fantasy world, which is basically a mixture of the very well-known franchises (Dragon Age, Game of Thrones, Dungeons & Dragons). When the last dragon dies at the end of the episode, all magic disappears, and this world is almost no different from the ordinary Middle Ages. While Lisa triumphantly announces that the age of science is dawning, Homer revives the dragon so that the magic returns.
* The Simpsons parodies this with a robot running from a burning scientist's lab, saying "Why, Why was I programmed to feel pain!?"
* The Simpsons parody this trope repeatedly, especially with the Duff Beer commercials. The best, however, involves a nerdy young man driving a convertible through the desert. He stops at a deserted gas station and three scantily-clad women run out and start washing it. The camera zooms in on one of the girl's cleavage...to show a crucifix. "The Catholic Church. We've made a few changes."
* The Simpsons participate because they had already broken away to found Shelbyville, which recognized a man's right to "marry his cousins." Hmmmmm...
* The Simpsons: Patches and Poor Violet, who appear to have been transferred to Springfield from Dickensian London.
* The Simpsons pausing in the midst of their debate to plug Duff Beer.
* The Simpsons Pinball Party, a promotional pinball for a science museum.
* The Simpsons Pinball Party has three of them. Depending on how strong the ball is launched, it can net you one or more more of them with varying point values (for instance, hitting Comic Book Guy with a careful ball launch starts a "Hurry Up" mode with two targets lit).
* The Simpsons Pinball Party's release, would have been alive at a time before pinball machines had flippers; Abe would've been old enough to play some of them when they were new.
* The Simpsons Pinball Party, the flipper controls are reversed during "Springfield Mystery Spot".
* The Simpsons Pinball Party: The "Itchy & Scratchy" episodes are "Spay Anything", "Kitty Kitty Bang Bang", "Field of Screams", and "Esophagus Now".
* The Simpsons Pinball Party, the player activates Couch Multiball by getting three balls onto a couch figure on the upper playfield. When they do so, this exchange occurs:
* The Simpsons play/film about a man who neglects his wife and spirals into depression as he begins to realize he's in love with his dead (male) best friend.
* The Simpsons plays an MMORPG and his absurdly powerful, evil character is called the Shadow Knight.
* The Simpsons, plays washed-up has-been western film star Buck McCoy.
* The Simpsons plays with this. Recurring antagonist Sideshow Bob was already a criminal but didn't start off trying to kill anybody, only framing Krusty for armed robbery so he can take over his show and make it better since he was abused by Krusty on live air. But after Bart exposes him and gets him incarcerated, all Bob can think about is plotting horrible revenge against Bart, and has ever since.
* The Simpsons plays with this. They often try to overdub relevant jokes after the finished animation is back from its overseas production.
* The Simpsons plays with this. When Moe babysits and bonds with Maggie, it culminates with him saving her from a shootout in a restaurant with two rival mob groups. His shirt sleeve is snagged trying to go in, and he warns Homer not to stop him before realizing it's a tree branch. After he saves Maggie, he awkwardly makes an excuse to leave, only for his shirt to be caught again. He curses the tree before turning around to see Maggie tenderly grabbing on his shirt.
* The Simpsonsplosion? I thought you said—" and is interrupted when the plunger goes down. This confusion results in the casino being blasted into a huge dust cloud covering part of the town.
* The Simpsons pokes fun at this kind of reverse psychology several times:
* The Simpsons: Police Brutality appears often, mostly parodied and played for laughs, but occasionally subverted.

* The Simpsons: Popsicle started selling an ice shaped like Bart's face in the 2000s. Despite the continuing popularity and legacy of the series, the ice has been discontinued.
* The Simpsons, populated by expert linguists, whose caption to enlarge pictures reads, "Click to embiggen".
* The Simpsons porn, but some time after the 90s they just gave up. Marge Simpson even became the first animated woman to appear as a Playboy centerfold. That should tell you where they stand now.
* The Simpsons powerful), and Moe is forced to rescue Homer seconds before Tatum can deliver a blow that surely would have been fatal.
* The Simpsons Principal Skinner has a self-described Evil Plan to cancel Music, Gym & Art classes while pinning the blame on school council president Lisa.
* The Simpsons, Principal Skinner muses, "I always thought I'd marry a girl like Mom...even though I didn't want to."
* The Simpsons. Probably the best television example ever, animated or otherwise.
* The Simpsons, prompting everyone in the lab to run for the door which closes behind them.
* The Simpsons provided the noise for Maggie's sucking sound on her pacifier; he made an appearance as himself in a later episode.
* The Simpsons provides Maggie's voice for one word at the end: "daddy".
* The Simpsons provides the former page quote. When they went to Florida during Spring Break, the local sheriff was disappointed with Joe C. (the foul-mouthed little person who toured with Kid Rock). A parody as much as anything, given the utterly inconsequential matter.
* The Simpsons putting his name on pork based products and eating them himself.
* The Simpsons qualifies, as the entire town of Springfield can't go one day without stirring chaos or bringing an uproar into fruition, "Who Shot Mr. Burns" being a prime example:
* The Simpsons. Quite a number of episodes around season 7-11 made the fact that the writers thought the show would be on its way out into a common gag. Troy claims in one that the series would go on until it became unprofitable, another episode noted that the next few seasons would feature hilariously outlandish plots common to shows on the verge of cancellation, and Season 11's "Behind the Laughter" flat-out proclaims "This'll be the last season." (This is also why a large number of episodes in the Oakley/Weinstein era end on a sunset.) As of this writing in 2021, the show is currently on Season 32.
* The Simpsons quote above. He is then promptly taken to jail for "all that stuff [he] did" with unusual expediency for the Springfield police.
* The Simpsons really loves playing subversions for laughs. Another example: When the Simpsons are kicked out of their house, Homer remarks: "
* The Simpsons' record for most episodes of a prime-time animated series. It was a huge hit and they never heard any suggestions from Fox about adding another character again.
* The Simpsons record together, with the lone exception of Harry Shearer who, later in the show's run, has opted to record from his home studio. Hank Azaria will often be patched in from an outside studio when his live-action and stage career makes it difficult for him to join the others.
* The Simpsons, recurring gangster Snake was placed in the electric chair and killed, while his hair was harvested to use as a wig, which contained his personality. Anyone who wore the wig began to act just like him as it slowly took over their body and mind.
* The Simpsons referenced it with Smithers. Turns out, "The Boat House was the time!".
* The Simpsons referenced this in the episode 'Homer the Vigilante', when Homer becomes the leader of a neighborhood watch group.
* The Simpsons (representing Homer) wins a case because all of the people in the jury were fat food lovers like Homer who felt sympathy for his "plight".
* The Simpsons reveals Moe is too cheap to unscramble the porn channel at his bar. It turned out to be an advertisement for shoe inserts.

* The Simpsons) reveals that Mr. Burns believes that wrestling is legit.
* The Simpsons revels in not doing this when mentioning Springfield. Assuming it were a real American town, it could be any of 28 Springfields in 24 states (Wisconsin has five). Otherwise, it parodies the phenomenon:
* The Simpsons Reverend Lovejoy does this on a train ride at a zoo to escape from killer baboons.
* The Simpsons, Rev. Lovejoy used to be enthusiastic about spreading the word of God to the people of Springfield, but then he met Ned Flanders. Decades of trying in vain to counsel Flanders through his many frivolous crises of faith killed any enthusiasm Lovejoy had for his job.
* The Simpsons" revolves around the romance and marriage of Abe Simpson and Selma Bouvier, their ages separated by nearly four decades (Selma is in her forties, while Abe is at least 80). Their marriage didn't work out, due to Abe's senility leading to the ruination of their kitchen and Selma finding her new job as a department manager too stressful.
* The Simpsons Ride, a clip of Sideshow Bob's prison escape shows him about to jump into a truck full of pillows, but when he jumps the truck drives away and he instead lands in a truck filled with barbed wire.
* The Simpsons Ride chose to not be part of the ride, many of his characters either have no dialogue or are completely absent.
* The Simpsons Ride features a sign saying "Send Money to Universal Studios", a tongue-in-cheek reference to the company's long-time financial issues.
* The Simpsons Ride has Scratchy being reduced to a skeleton after he violates the no-photography rule and is blasted by a bunch of missiles as a result.
* The Simpsons Ride, Krusty asks this when he sees a mysterious button next to him. He pushes it, which makes the ride vehicle vibrate.
* The Simpsons Ride, Scratchy ends up decapitating himself while trying to lift the lap bar.
* The Simpsons Ride, Sideshow Bob forces not only the Simpsons through his theme park of death, but the riders as well, merely because they were grouped alongside them.
* The Simpsons Ride, when Abraham Simpson is not allowed on the ride due to his medical conditions, he claims that he's in the best shape of his life whilst suffering both a heart attack and a stroke.
* The Simpsons: Road Rage and get them to settle). Apparently they think they invented the road sign in 1999. → Look at us, we're violating a patent! ←
* The Simpsons role and successfully transplants Homer's brain into a robot:
* The Simpsons runs in and kicks both Hitler and Scratchy in the butt while Itchy holds a sign, "Save Scrap Iron".
* The Simpsons S25 E17 "Luca$", as Marge fears that the reason Lisa’s attracted to Lucas is because he reminds her of a young Homer. Selma flat out tells her that women marry their fathers.
* The Simpsons S 8 E 6 A Milhouse Divided , this is heavily implied to be the only reason why Kirk wasn't fired from the cracker factory, as despite his incompetence by turning one of the leading cracker companies in town into one of the worst, he was still married to Luann. However, once he learns about his daughter divorcing him, Luann's father quickly fires him.
* The Simpsons, saying "she could tie me up with that golden lasso anytime!"
* The Simpsons," says Skinner, to which Homer replies, "Oh man, is this awkward."
* The Simpsons's cameo in the "Who Shot Mr. Burns" episodes has introduced many viewers who didn't know much about salsa or mambo to the singer.
* The Simpsons scene. While he does get to his destination, it doesn't quite work out as the family drove through a lot of cacti and over a fair few speed bumps on the way there, not to mention Homer spilling his hot coffee under the car.
* The Simpsons scumbag Roy Cohn. He is always competent and cold, as in this exchange following Lisa's brilliant suggestion to a TV executive (from "The Itchy and Scratchy and Poochy Show" - 1997):
* The Simpsons scum, people who talk on the phone while driving, or tape baseball matches without permission.

* The Simpsons season 10 episode "They Saved Lisa's Brain": During the "How Low Can You Go?" talent show (in which contestants perform the lowest, most disgusting acts ever), Homer wears a popcorn kernel suit and uses some blow-dryers to make them pop while singing a parody of Foreigner's "Hot Blooded" called "Hot Buttered." Soon, the suit gets too hot, Homer gets 4 out of a possible 10 for his "act," and Homer gets attacked by the chickens Barney was supposed to use for his act (which was Barney drinking an entire six-pack and juggling chickens, but the audience thought his act was just drinking the six-pack of beer and belching).
* The Simpsons, season 23, "Exit Through the Kwik-E-Mart", Homer arranges for Paula Paul to call Marge live during her show to wish her a Happy Birthday. He makes everyone wait while he says "three...two...one!" Nothing happens. He continues to say "one" for hours. Then it turns out that Marge's new pet rabbit (given to her by Bart for her birthday) had chewed through the phone wire, preventing the call from coming through.
* The Simpsons (see Film, below), with the mayor's office apparently having both a war room and an accompanying big board of their own. Chief Wiggum fills the role of General Buck Turgidson, refusing to let Marge see it (she's there to help them find and subdue a giant-sized Homer).
* The Simpsons" sees Bart, Jimbo, Nelson, Dolph, and Kearney getting locked in the basement of their school by Principal Skinner so that he doesn't have to deal with them during the latest school inspection. Bart escapes, but Skinner forgets to let the others out until the very end of the episode... several days later.
* The Simpsons" segment "Homer³", where Homer enters the third dimension and is subsequently rendered in CGI, where upon he remarks that he "feels like I'm wasting a fortune just standing here".
* The Simpsons, Segment: Nightmare on Evergreen Terrace. Bart battles Willy at night in a foreboding, nightmare playground which is empty until the battle.
* The Simpsons segments, however, can reach fantastic or surreal territory.
* The Simpsons segment, the Simpsons move into a haunted house, which does its best to make them leave... but they refuse, because it's their dream house. The segment ends with the house destroying itself rather than live with the Simpsons.
* The Simpsons segment "Wanted: Dead, then Alive", where Bart Simpson is killed by Sideshow Bob, and his body is eventually taken to Bob's house. When Bob returns home after attending Springfield University as a professor, he opens the wall compartment... and reveals Bart's corpse, which he has stuffed in there, now standing as a trophy.
* The Simpsons: Semi-recurring character Drederick Tatum, a boxer who has a soft voice, yet is able to intimidate an entire prison into halting a riot just by asking politely.
* The Simpsons" she says, then affixes a "Drink Rum" sticker to his forehead and walks off.
* The Simpsons. She shares an unhealthy relationship with her son which often borders on psychosis. When Seymour was out of the house, Agnes phoned him regularly demanding to be taken out of the bath, shielded from the glare of car lights on the street, and other such petty requests.
* The Simpsons shorts, Bart and Lisa tended to get into one whenever fighting.
* The Simpsons shorts, Bart decides to get immersed in his bathtime playing and forgets to turn off the taps as he submerges himself and pretends he is Jacques Cousteau. He jokingly shouts for help, which Homer takes as a genuine cry for distress, causing him to open the door and be splashed.
* The Simpsons showcase hockey games that devolve into brutal fights, either on the ice or in the stands.
* The Simpsons showed Frink with a death ray he was developing, although it was only capable of generating a beam which felt pleasantly warm (plus he gave up on it when he failed to secure funding).
* The Simpsons show has the town overrun by zombies. High overhead, aliens Kang and Kodos watch patiently, observing "Soon the human race will wither and fold. Like the Earth plums we've seen on the Observe-a-scope."
* The Simpsons shown dumping a dead body (wrapped in a length of carpet) into a

trash bin in a 1999 episode, so they clearly are able to commit murder when necessary.
* The Simpsons shown to be a fully grown adult with his own kids). The most noticeable example is Bart, who is ten years old (the median American male height at that age is 4'6) yet almost exactly half of his dad's height, a figure more consistent with a toddler. Ralph Wiggum even makes fun of this in one of the comics.
* The Simpsons" shows a vision of the future which includes a vending machine offering "Soy Pops - now with gag suppressant!"
* The Simpsons: Shows up occasionally as part of Rainier Wolfcastle's shtick. Also, Duff Man.
* The Simpsons, "Sibling Rivalry," ends with a quiet a capella refrain about Bart and Lisa's fractious relationship, but afterward oh, you can hear Bart mutter "Let go of my hand, Lisa."
* The Simpsons, Sideshow Bob hypnotizes Bart to kill Krusty during Krusty's live retirement special. His trigger is a line in Krusty's speech, "I've never had such a great audience."
* The Simpsons: Sideshow Bob is very good at disguising himself. He disguised himself as Krusty and framed him for armed robbery of the Kwik-E Mart. He pretended to be a Western restaurant owner to lure the Simspons into a trap. He even used plastic surgery to switch his and his cellmate's faces so he can take his cellmate's release.
* The Simpsons. Signs suggesting he actually smokes pot didn't crop up until season seven. Prior to that, he was just some perpetual teenager who drove a school bus (despite not having a license), got along great with kids, and loved rock music from the 1960s to the 1980s.
* The Simpsons "Simpsons Roasting On An Open Fire" was picked at random to fill the air date, simply because it was finished sooner, making for some odd continuity when Santa's Little Helper was absent for most of the rest of the season. The episode after, "Bart The Genius," was the first episode of the show proper to air, while the pilot was bumped to the end of the season.
* The Simpsons, "Simpson Tide", Homer ends up in command of a nuclear sub and accidentally steers it toward Russia. This prompts an immediate emergency UN meeting, in which the Russian representative refers to his people as the Soviet Union, prompting the following exchange:
* The Simpsons, since her usual socks are white). He also has to wear a frilly pink skirt, even though his shorts are fine, apparently because he ‘has to co-ordinate’. He ends up being forced to go to school dressed like that.
* The Simpsons Sing the Blues, Mr. Burns Sings about his employees' "Xeroxing their buttocks".
* The Simpsons Skateboarding takes place in a construction site consisting of half-finished buildings, monorail tracks and an army surplus store with tanks.
* The Simpsons sketch "Dial Z for Zombie", Homer spots Barney eating an arm and exclaims "Barney, you're a zombie too!" to which Barney replies "Naah, but when in Rome..."
* The Simpsons" skit, Homer & family have survived a nuclear attack from France, but others in town have become mutated. The mutants attack the Simpsons in their home, but then they are moved by the love Homer & Marge show for each other.
* The Simpsons, "Smell you later" has replaced "Goodbye" in common usage—to the extent that "Smell you later forever" makes sense.
* The Simpsons, Smithers declares "Oh, what the hell!" and kisses the love of his life... Mr. Burns.
* The Simpsons, Smithers says "what the hell!" and kisses Mister Burns when everyone thinks the end of the world is coming. An embarrassed Smithers tries to play it off as professional affection, but Burns doesn't really buy it.
* The Simpsons's nonconsecutive terms absolutely hilarious for no reason anybody understands.
* The Simpsons soft-focus-and-music moment, while her braces play light over his

startled face.
* The Simpsons: Some citizens, like Homer Simpson, Barney Gumble, Moe, Mr. Burns, Patty and Selma, Lunchlady Doris, and Krusty the Clown fit this trope exactly.
* The Simpsons songs are rare). As a result, the episodes make an odd jump from characters speaking in Spanish, to the same characters singing in English and with different voices (as the voice actors are not the same).
* The Simpsons, so spoofed again when Apu and Manjula walk in seconds later and we learn exactly why this trope exists in the first place.
* The Simpsons, "Special Edna", Bart nominates Ms. Krabappel for the Teacher of the Year Award, and tells in the video submitted to the judges that she deserves the award for surviving teaching him. The judges believed the mere existence of Bart was an urban legend, so they accept the nomination.
* The Simpsons specials, Maggie's father is one of the green tentacled cyclops aliens, Kang, who abducted Marge and impregnated her with some sort of ray.
* "The Simpsons Spin-Off Showcase" had this: "Chief Wiggum, P.I. will return... right now!"
* The Simpsons Spin-off Showcase parody just used very, very bad humour with subtler indications that it was entirely on purpose.
* The Simpsons Spin-off Showcase'', they welcomed special guest Tim Conway! Part of the joke here is that Conway's estimate is way off.
* The Simpsons Spin-off Showcase", while there was no badge flashing, Chief Wiggum commandeers a docked airboat by kicking the driver into the water and shouting "police business" (The man he kicked was a fellow police officer).
* The Simpsons: Spoofed in "Sex, Pies, And Idiot Scrapes." Homer becomes a bounty hunter with Ned Flanders as his partner. When Flanders decides to leave the business, their boss tells him his last bounty is Homer himself. And if Flanders won't do it, one of the other hunters will. Cue a room full of thugs, including a knife-wielder, a psychotic man with a chainsaw, a girl with a machine-gun leg, and a grizzly bear practicing the nunchaku.
* The Simpsons sports car. While tooling around Italy, the car is crushed by huge wheels of Mortadella and cheese.
* The Simpsons: Springfield did the "human pyramid" version, trying to get into the Duff Book of World Records. There's also a gag where a group of cheerleaders do this in a sandstorm, which leads to them getting buried, and looking like an actual pyramid.
* The Simpsons Springfield has a hair salon named "Turn Your Head And Coif".
* The Simpsons, Springfield semi-qualified, as its events were contained enough to function as a separate world, even if it was never defined as such. This was abandoned later on.
* The Simpsons's Sideshow Bob, while broadcasting his plan to destroy Springfield from inside the Duff blimp in "Sideshow Bob's Last Gleaming"; Lisa figured out where he was from the squeaky voice, and she and Bart head out for the Duff blimp. After Bob finishes his speech in his chipmunk voice, he says "Pesky helium! Shoo! Shoo!" and waves his hands, and his voice goes back to normal.
* The Simpsons 's status as a long runner enabled it to spotlight most of its supporting cast. Kahn, Buck, Nancy and Cotton got fairly regular focus episodes, and even minor characters like John Redcorn and Enrique occasionally featured in their own shows.
* The Simpsons staff ends with Homer and "Lisa Jr." accidentally causing a volcano to erupt by ringing a church bell too loudly.
* The Simpsons started to take control of his businesses, including Krusty Burger, so all orders are made like filing taxes (and take as long to go through.)
* The Simpsons status by having them date each other's identical sisters.
* The Simpsons's thoughts suddenly trail off into the Meow Mix jingle.
* The Simpsons stories), it seems that the main criterion is which established characters fit the role best personality- and relationship-wise. Dr. Hibbert and Apu, for instance, have played all sorts of characters in all sorts of contexts where an African-American or Indian might not ordinarily be found.
* The Simpsons story, Bart, while pursing someone he finds suspicious, grabs the

bumper of a car and uses it to pull himself along on his skateboard. In the next panel, Professor Frink appears to warn the reader that they should not copy Bart, and shows two possible consequences of doing so (A - Bart slams into the back of the car when it stops, B - Bart goes flying when the car suddenly swerves).
* The Simpsons story "Time and Punishment", where Homer accidentally travels to prehistoric times with a malfunctioning toaster.
* The Simpsons. Strangely enough, when Homer offloads the Monkey's Paw to Flanders, he wishes away the alien invasion, is heralded as a hero, and remodels his home into a castle, without any obvious repercussions whatsoever.
* The Simpsons, Stretch Dude and Clobber Girl (a.k.a. Bart and Lisa) are tied up (using Stretch Dude's own arms, because they are stretchy) and dangled over a vat of lucite, which the Collector (Comic Book Guy) uses to turn real celebrities into life-size maquette figures.
* The Simpsons: students are expected to turn frogs (presumably of original frog descent) into princes.
* The Simpsons Subverted in an issue where Mr. Smithers becomes Homer's assistant. He and Marge get into increasingly petty arguments, and at one point it looks like Marge has start attacking him, complete with hissing... only they've been distracted by two actual cats fighting outside.
* The Simpsons Subverted in that it really was the best vacation ever. Double Subverted in that they promised to never speak of it again.
* The Simpsons such as Bart and Lisa when they see Itchy and Scratchy about to fire weapons at them or Homer when he sees the hole in the third dimension.
* The Simpsons, sung by Patty and Selma. The accompanying scene is available as a special feature on the season 8 DVD.
* The Simpsons!" Sure enough, Moe wins the contest, although he could have won the other two if the judge hadn't rigged them in return for a sexual favor.
* The Simpsons surprisingly still averts that; in many cases there are often still flat drawings and animation of vehicles used, along with traditional flat moving backgrounds for shots inside vehicles being driven.
* The Simpsons switched to HD, the same shot of kids cheering for Krusty was reused in several episodes. Other scenes were repeated occasionally too, like outside shots of the nuclear power plant or the Simpsons' house.
* The Simpsons ("Taft, you old dog, you!") and in another episode, Grandpa Simpson said that as a kid he got spanked by Grover Cleveland on two non consecutive occasions.
* The Simpsons takes this trope and applies it to the two halves of a gender segregated school.
* The Simpsons taking place in the future, "Lisa's Wedding," showcased a conversation between Lisa and Marge using a "picture phone." Marge kept forgetting that Lisa could see her over the phone, and her body language made it more obvious to tell when she was lying.
* The Simpsons: Tapped Out, even more so than in the show itself, where the player decides where buildings are located, and can move them around at any point for strategic, aesthetic, or boredom-fuelled purposes.
* The Simpsons: Tapped Out had the Homer Dog available during the Every Man's Dream Promotional event in September-October 2015 . It's a normal dog that has an uncanny resemblance to the family's patriarch.
* The Simpsons: Tapped Out has run multiple promotions where you can build buildings and landmarks that were never in Springfield.
* The Simpsons: Tapped Out, Lisa does this in "Rod And Todd Prelude" when Bart mentions he wants to cherry bomb four toilets at once at Sir Putt-A-Lot's.
* The Simpsons: Tapped Out Lisa kicks a soccer ball, Apu throws a bowling ball, the Comic Book Guy swings his nunchucks), to no real end. Not surprisingly, the sport was invented by Homer Simpson, and the rules make sense only to him.
* The Simpsons TCG, made by Wizards of the Coast. The goal here is not combat, but to create a setting with characters suited for that location. Despite everything about the premise suggesting it would fall on its face, those who've played it say it's very fun.

* The Simpsons telethon, which Bart tries to end with a $10,000 donation.
* The Simpsons, Teller manages to get out, in desperation, "I'm not the first Teller!"
* The Simpsons tells them that he's managed to prove that there's no Heaven, but Hell exists and everybody goes there. Though Heaven and God have appeared in other episodes.
* The Simpsons than forcing Bart to confess and accept what surely would be severe consequences – eventually writes a farewell note from "Woodrow."
* The Simpsons than on the much wittier patter and shtick of the later episodes, especially the post-Season 3 ones.
* The Simpsons than this; however, he once ran an online business whose business plan was something like:
* The Simpsons. That being said, there were only a few notable exceptions: Barney recovering from his alcoholism (although the writers eventually undid this), Lisa telling Homer that she'll never be happy with her body image (though the whole thing about Lisa being insecure with her body hasn't been mentioned since that episode), and Milhouse's parents staying divorced (though they did get remarried in "Little Orphan Millie").
* The Simpsons that karma cannot be sold, but "only be portioned out by the cosmos".
* The Simpsons that Marge would be available to "man or machine" if he were to die.
* The Simpsons that Nelson has a point: taking Nelson captive was just meant to be a short-term solution to humiliate the bully, and Bart had no plan in place for what to do after that. Fortunately, Herman, the man who had been instructing Bart, had prepared a plan just for this occasion.
* The Simpsons that reimagined the family in a fairy-tale world. It was primarily based on "Hansel and Gretel," but had references to others (for example, Homer passes Rapunzel's tower, etc.)
* The Simpsons that's getting retired at the end of the year due to silly things like "students dying". Before they had THAT, the school year used to be finished off with a full-out battle royale between the students.
* The Simpsons that she walks out on him for real, even if only temporarily.
* The Simpsons [the baby] beat/tie Homer in bowling. (He simply accused her of walking over the line, and docked her a point. The celebratory "300" balloon still fell from the ceiling, but Homer knocked it away quickly.)
* The Simpsons, the Blue-Haired Lawyer character shows up a lot whenever someone "violates" a copyright:
* The Simpsons The captain shoots him before he can say anything more. As he turns to face the rest of the crew, they start digging as fast as they can.
* The Simpsons, the cast parodies various Shakespeare plays including Romeo & Juliet, King Lear, Henry The 5th, and Titus Andronicus. During their parody of Julius Caesar (Portrayed by Mr. Burns), the senate (Portrayed by Homer, Mr. Smithers, and others) have accidentally stabbed each other because Mr. Burns/Caesar was too frail and thin to stab, which leads to a perplexing setup to a particularly awful pun.
* The Simpsons). The cat on the TV is apparently bleeding out of his ears, which frightens young Rod Flanders, but his father, Ned, tells him that it is just tomato sauce and raspberries and that the cat had had a big dinner.
* The Simpsons, the cliff would fall off now." It does, but only after a long wait and a complaint of thirst from Homer.
* The Simpsons, the clip where Homer falls down the Springfield Gorge (from the episode "Bart the Daredevil") was referenced several times. In the episode "The Blunder Years", when Homer flashes back to it, Lisa interrupts him, saying "Everyone's sick of that memory."
* The Simpsons The combined dosage was so high they ended up with octuplets, and almost went broke due to the resulting expenses.
* The Simpsons: The episode "A Tale of Two Springfields", has Springfield divided in two by a wall.
* The Simpsons: the episode "Guess Who's Coming to Criticize Dinner" has Homer

become the Springfield daily newspaper's restaurant reviewer, and his general inability to discriminate against anything edible leads all the town's eateries to do a roaring trade. However, when this attitude incurs the ire of his fellow reviewers, Homer then takes the opposite tack and scorns every single restaurant. Furthermore, his disparaging comments about the seafood restaurant Frying Dutchman appear in its window pasted over a poor assessment by a health inspector.
* The Simpsons: The episode "Homer's Barbershop Quartet" is a deliberate spoof on the Beatles' career, with Chief Wiggum playing the role of Pete Best and Barney Gumble (who turns out to have a breathtaking singing voice) as Ringo Starr. Wiggum takes it poorly, repeatedly trying to either get back into the group or screwing them over (like trying to arrest them).
* The Simpsons: The episode "King of the Hill" parodies this with Powersauce bars. The initial plan for their ad campaign is to get Rainier Wolfcastle to climb Springfield's tallest mountain. When he refuses, they get a newly-fit Homer to do it instead.
* The Simpsons: The episode "The Father, the Son, and the Holy Guest Star" has Bart sent to a Catholic school, where great emphasis is put on martyrdom and suffering.
* The Simpsons: The episode "The Frying Game" includes Lou the cop telling a reporter that he and Eddie (the other cop) have no last names, "like Cher."
* The Simpsons", the family sit on the couch and keep getting sucked into a portal above them. Eventually, one of the Barts gets off the couch and uses a nearby remote to close the portal, then notices that one of the Homers lost his head.
* The Simpsons", the family uses Play-Doh to make a bride for the Golem of Prague.
* The Simpsons; the family visits EPCOT and goes on an educational ride about electric cars, sponsored by "the oil companies of America". The ride, which moves slow and jerkily, proclaims that as an electric car it's slow, can't go very far, and that if you drive it everyone will think you're gay.
* The Simpsons: The finale episode from the ninth season is "Natural Born Kissers", which has Homer and Marge attempt to return home through Springfield while naked. At one point, Marge operates a hot air balloon while Homer dangles from an anchoring line. The wind carries the balloon over a church with a sloping glass ceiling. Homer smacks against the glass, then slides upward along it as the balloon tows him. The minister directs the congregation to admire the parquet floor to avoid staring at naked Homer. It doesn't help that the friction causes Homer to wail, "Ow! My ass!"
* The Simpsons, the humor and tone is mostly kid-friendly). Reruns on other channels give it a more proper A (all ages) rating.
* The Simpsons. Their chocolate spree involves them snorting lines, cooking (melting chocolate powder on spoons), and flushing chocolate bars down the toilet.
* The Simpsons - their house is getting gassed for bugs with a big striped tent covering it. Nelson and his bully pals think it's a circus and sneak in - then stagger out slurring the standard circus theme music.
* The Simpsons. Their loud lovemaking has been the subject of at least two gags, both times with reactions shots from Bart, Lisa, Maggie, and Ned Flanders (their neighbor in another house). On at least one occasion, the family holds a conversation about this habit while remaining in their bedrooms. Bart even punches through the wall to prove the kids' point.
* The Simpsons: The last segment of "Treehouse of Horror XIV" involves Bart and Milhouse using a magic stopwatch to pull pranks before they're found out. They end up breaking the watch and spend the next two decades repairing it to make time go forward again.
* The Simpsons themselves speak like this in "Helter Shelter", when participating in a documentary recreating life in 1895.
* The Simpsons them to get married, and neither did Marge's parents (who would, in fact, have preferred she marry literally anyone but Homer). They get married in a small wedding chapel across state lines (called "Shotgun Pete's), affiliated with a casino. Homer felt bad that he couldn't provide her with a nicer wedding, but Marge was happy to marry him.
* The Simpsons then shows up and delivers the trope — a miniature black hole

had appeared between Bart and Ray that absorbed the light from Ray so Bart couldn't see him.
* The Simpsons (the only ones in attendance were the kids and Ned's parents).
* The Simpsons. The only part that wasn't demythified was the burning bush (read: God) that snitched on Bart.
* The Simpsons: The only reason Moe's Tavern has stayed in business after all these years.
* The Simpsons. The patient gets up and thanks him, like nothing out of the ordinary happened.
* The Simpsons. The people on the show's constant pleas that it belonged there because it appealed to all ages really held no ground considering there are plenty of other shows that kids can also enjoy despite them being made for adults that didn't make the list. Once again, it seems to be the old argument "It's animated, that means kids must like it!"
* The Simpsons (the phrase "Burns-sexual" was sometimes used). As the series progressed, this logic was clearly abandoned and Smithers was shown dating and interested in men other than Burns.
* The Simpsons. The plot is about Homer being hypnotized into acting like a ten-year-old.
* The Simpsons, there are some specific cases where one character calls out another for not remembering a Simpsons family member:
* The Simpsons, there is an arcade at the Kwik-E-Mart called "Catfight", with such moves as "hairpull".
* The Simpsons", there is a scene where Homer (who has gotten a job as a Krusty impersonator for the episode) has to perform at Milhouse's birthday. There, he is forced to degrade himself by letting the kids throw cake at him while he dances, with Milhouse's dad forcing him to keep it going until the party ends.
* The Simpsons there was a gag where Kent Brockman was being fed lines this way even when he was socializing.
* The Simpsons, there was one episode where Homer became an ambulance driver. At some point, he was going around in circles and Lisa asked why he'd not admit he didn't know where the hospital was. Homer's reply was asking why she'd not admit he knew it was somewhere around there.
* The Simpsons. The scene will always cut to the delivery "six to eight weeks later."
* The Simpsons, the Scottish highlanders donned full-length sequined evening gowns in battle, in order to "blind your opponent with luxury".
* The Simpsons: The series loves making Terminator references, with several of them being characters directly impersonating the Terminator.
* The Simpsons, the Simpson family, mainly Homer and Bart, are prone to this.
* The Simpsons the Simpsons are kicked out of Springfield, find a community of people living "off the grid" and join them.
* The Simpsons. The Simpsons have appeared in commercials for 1-800-COLLECT, Baseball ads, ads for Coca-Cola, Burger King, Butterfinger, Church's Chicken, Domino's Pizza, Intel, MasterCard, Nike, Ramada Inn, Ritz Bits, Subway, T.G.I. Friday's, Toyota, Universal Studios Florida, and Wonderful Pistachios in the US, CC's Chips in Australia, KFC and Teletoon in Canada, Papas Margarita potato chips in Columbia, Kangoo car dealers in the Czech Republic, Vizir detergent in France, Sabritas Lay's potato chips in Mexico, Doritos in the Netherlands, Channel 4 and Sky 1 stations in the UK, No Problemos cereal in the UK, Japanese commercials for C.C. Lemon soft drinks, and ice cream at the Mister Donut fast food restaurant in Japan.
* The Simpsons, the Simpsons walk by Apu, who is facing the camera, wearing a baby carrier pouch with one of his babies. But then he turns to the side, revealing that the pouch actually extends outwards to carry all eight of them.
* The Simpsons", the Springfieldians are astounded by the announcement "live from Stockholm" that Krusty the Clown has won the Nobel Peace Prize. Krusty subsequently boards a plane to Oslo for the award ceremony, but to his surprise the plane lands in The Hague in the Netherlands. A Dutch policeman then reveals that Krusty is to

be arrested and tried at the International Court of Justice for his manyfold crimes in Europe (such as dropping a monkey from the Eiffel tower, "aggravated hey-hey" in Greece, and stealing the jokes of a Dutch clown); the Nobel was only a ruse to lure Krusty to Europe.
* The Simpsons, the titular family is conducting a séance, with Ned Flanders present, summoning the spirit of the late Maude Flanders.
* The Simpsons. The vast majority of his villainous plans is usually related to his greed.
* The Simpsons. The word existed before Homer used it, but it has since spread around the world as a universal expression of messing up.
* The Simpsons the would-be clothes stealers are themselves beaten up and have to settle for garments on a clothesline instead.
* The Simpsons. They all managed to create characters who look exactly like themselves, except for minor details (Marge's character is basically her with elf ears, for example.)
* The Simpsons they find it when Lisa turns around and sees an open staircase leading down with a neon sign on the wall reading "To Secret Vampire Lair" (followed by a blinking sign under it stating "No Garlic").
* The Simpsons), they have themed rooms (Camelot, Pharaoh, Caveman etc.) but the only one left is called "The Utility Room". It turns out to be the Hotel's actual Utility Room with a couple of camp beds in it.
* The Simpsons. They later changed their mind and it aired in the middle of season 26. (A similar occurrence happened during production of "Kamp Krusty".)
* The Simpsons. They were fortunate enough to land in the outdoor jacuzzi of a nearby hotel. Upon being asked if they had any money, however, they left... by jumping back down the mountain.
* The Simpsons This actually got the show in trouble, as the company that made Butterfingers was one of their major sponsors (And had several Simpsons-themed commercials) - up until they aired that episode.
* The Simpsons, this causes the unconsciousness that leads to level 6, Dreamland.
* The Simpsons this is what's happening... and it isn't. Gloria Grant really can't stand his alter-ego of Claude Kane the Third. In another instance, she mentions that despite having gotten married to Radioactive Man no less than three times, they've never actually dated.
* The Simpsons this, only for Homer to tell her to stop worrying and enjoy the party.
* The Simpsons. This straight up got him fired in the "Who Shot Mr Burns?" two-parter, where Smithers desperately objected to Burns' diabolical scheme to block the sun.
* The Simpsons. This was dropped simply for being "too complicated", but this is the reason for their remarkably similar appearance and was a joke that tied together Bart's utter disrespect for his father yet love of Krusty.
* The Simpsons This was meant to teach the lesson that we can do everything right and still fail, and that hard work does not always guarantee success (especially poignant since Bart seems to genuinely struggle with the material instead of just being a lazy underachiever.)
* The Simpsons, though, being portrayed as a genuinely caring guy who just has some annoying quirks.
* The Simpsons Though this is contradicted by several childhood flashbacks that show her with blue hair. Presumably she dyes it to cover up her greys — which Homer confirms in an episode where he gets in trouble for gossiping about their personal lives.
* The Simpsons throughout the episode. Like Bob, the suspect they are after has a revenge-based motive for killing a member of the Simpsons family.
* The Simpsons time machine and changes history so Marge married Artie instead of Homer, and they're rich. Homer tries to counter it with an army of Homers across history. They all get easily beaten up by Bart and Artie.
* The Simpsons) to a Civil War re-enactment. The other side is quickly curb-stomped.

* The Simpsons to find him a planet to eat. No prizes for guessing which planet Bart recommends.
* The Simpsons' to Homer over their wedding footage intentionally, so Homer would know just how badly he'd screwed up and how seriously she was taking leaving him. After seeing the tearful farewell from Marge, there was a little wedding footage left. He doesn't want to stop watching.
* The Simpsons to jiggle. Homer ends up buying the weight, but only works out one arm, leaving him with one massive arm and one arm just as out of shape.
* The Simpsons to kill Goliath II and reclaim his kingdom. Except it turns out that the Israelites were so happy with the work Goliath did as their king, so now Bart/David has got himself a nation full of enemies who put him on trial for assassination.
* The Simpsons to Lisa and a few other humans being chased by giant monsters.
* The Simpsons to Maggie as an adult, we never actually hear her speak — she's usually cut off in some way. It can be played off quite interestingly:
* The Simpsons...to the back of a police car as Nelson scores a game winning touchdown.
* The Simpsons' to the extent it can now be found in many scientific papers online.
* The Simpsons", to which Marge admits that isn't sure; she doesn't really keep up with the show and is only watching today because Brandi is coming out of her coma and she knows that the phony prince's body is hidden in the boathouse.
* The Simpsons toys. And since the show has dealt increasingly bluntly with subjects like animal and child abuse, politics, drug abuse, alcoholism, smoking, anti-establishment jokes, sex, murder, organized crime, torture, and war, and it references a lot of things that only adults will get or remember — a lot of its humour will go right above kids' heads, it just doesn't make sense.
* The Simpsons" transplants characters into new genres- Seymour becomes a street-smart detective's assistant, the eponymous family performs a song-and-dance skit, etc.
* The Simpsons Treehouse of Horror comics have a story called "The Legend of Batterface". Homer becomes a doughnut themed serial killer who murders childhood camp mates each year by force feeding them doughnuts until they suffocate. The reason he does this is because he was driven insane after his friends pulled a deserved prank on him for eating all of the doughnuts in summer camp.
* The Simpsons' "Treehouse of Horror" Halloween episodes, he'll take these traits, e.g. in the "Treehouse of Horror V" story "Time and Punishment", when Flanders is shown as the supreme leader of the world in an alternate timeline.
* The Simpsons Treehouse of Horror II. Lisa wishes on a monkey paw for world peace. The Earth is then immediately taken over by Kang and Kodos using only a slingshot and a club. When Ned Flanders unwishes it, Moe chases them away with a board with a nail in it.
* The Simpsons Treehouse of Horror IX, one of Snake's three strikes is for blowing up a bus full of nuns (but he insists it was self-defense).
* The Simpsons Treehouse of Horror spoof in which Homer was possessed by a hair transplant from Snake.
* The Simpsons: "Treehouse of Horror VII" features drooling aliens Kang and Kodos disguising themselves as presidential candidates, Bill Clinton and Bob Dole. During a speech, Kodos (Clinton) tells his audience that they "must move forward not backwards, upwards not forward, and always twirling, twirling towards freedom", while spinning in circles. The crowd explodes with enthusiastic cheers.
* The Simpsons Treehouse of Horror V. Originally broadcast in the early 40s, the original version was lost, but a 1962s abbreviated version Oboler made in 1962 still exists and is creepy as ever.
* The Simpsons Treehouse of Horror V segment "The Shinning", Homer finds that the cable has been cut and there's no beer in the fridge and responds with a cheerful "Well, whaddya know!" As Marge compliments him for taking it so well, he immediately snaps and threatens to kill everyone. He only gets more violent from there.
* The Simpsons Treehouse of Horror who the family keeps chained in the attic and

feeds fish heads. But then he escapes...
* The Simpsons Treehouse Of Horror XXVIII, Maggie is possessed by a Pazuzu figurine that Homer thought was pizza. The demon is exorcised from her and goes to Bart, who has "the darkest soul I've ever seen". In the next segment, Marge notes that Maggie still has "a touch of Pazuzu". She projectile vomits.
* The Simpsons, "Trilogy of Error": Each of the show's three acts follows Homer, Lisa and Bart respectively as they go on simultaneous adventures, which occasionally cross each other before meeting at the end.
* The Simpsons ("Trilogy of Error"), Homer gets his thumb cut off while trying to take a slice of brownie from the tin as Marge is still cutting it. It gets sewn back on later.
* The Simpsons two keys were required to be turned simultaneously to drop the "perfect 300 game" balloon at the bowling alley.
* The Simpsons Uncensored Family Album has Homer Simpson's detailed family tree depicting second cousins Amos Graycomb and Moselle Stemple marrying and having four children together.
* The Simpsons". Unfortunately for Kent, he joined the site just as it goes bankrupt.
* The Simpsons. Unimpressed, Moe says it's the stupidest name he's ever heard. As a patron gets up and exits the bar, weeping, Barney calls after him "Hey, Joey Joe Joe...!"
* The Simpsons, Unkie Herb invented a Baby Translator, which transformed Maggie's "goo-goo-gaa-gaa" into phrases that the parents could understand like "Burp me," "Oh, dear, I seem to have soiled myself," etc.
* The Simpsons until he came into Moe's Tavern. After Moe steals his Mayan coins, Snake declares "I'll take my revenge on society — by which, I mean convenience stores."
* The Simpsons. Until the credits roll and Lisa downs Bart with one punch.
* The Simpsons use screams for comedic purposes quite often. Usually with Homer who will typically overreact to something with a high-pitched yell.
* The Simpsons uses it often for live-action-like tracking shots; see the 9th season episode "And Then There Were Fewer."
* The Simpsons uses this trope often. They even have a store selling angry mob supplies during a riot! On another occasion, Quimby yells out Homer is a monster (Long story - involving a lot of plastic surgery) and tells the crowd to get out their pitchforks. Lo and behold, everyone had the foresight to bring theirs along to the ceremony honoring Marge's successful new gym. It seems they always come prepared for some mob mayhem.
* The Simpsons, using it as an excuse to speed up the beginning of Mel Gibson's movie.
* The Simpsons. "Vieira" is also a fairly common ethnic Portuguese name, while "Rivera" is common in Spanish, while The French Riviera is a place doctors retire to.
* The Simpsons: Virtual Bart, during the Baby Bart level, Baby Bart can use his diaper as a parachute when he is airborne.
* The Simpsons: Virtual Bart, just before the battle with the executives guarding the rest of the captive pigs, a framed picture of Krusty's head with the words, "OUR FOUNDER" on the plaque of the frame can be seen, as well as busts of Krusty's head.
* The Simpsons visit an exhibit of luxury cars, one of which is presented by a blonde bikini bimbo. Homer quips "Do
* The Simpsons visit China to pick up Selma's newly adopted daughter; Homer ends up disguised as a Budda statue to infiltrate the adoption agency. Unfortunately they drag him inside using a hook in the nose, but still never notice he's not a real statue.
* The Simpsons visit Mr. Burns' house), there was no full episode devoted to wrestling until "Gorgeous Grampa". Grampa Simpson confronts his past as Springfield's most reviled pro-wrestler, especially when Bart begins following in his footsteps.

* The Simpsons wants to play football!" ...only to quit in disappointment, when she finds out there are already four girls on the team.
* The Simpsons was acting up, but Homer was too off in his own little world to notice or comfort her. And they spent their wedding night on Marge's mom's couch, being yelled at by Patty and Selma. This ultimately prompts Homer in the present time to to do a re-do where he files for a divorce without Marge's knowledge so he can give her a proper wedding, albeit rather impromptu and at their house, but at the least with their family and friends, a proper minister to oversee it and a decent reception.
* The Simpsons was built on with the stink of corruption that fills it now.
* The Simpsons was debatable, given the fact that there was a winner sign, the dad smiling while being carted away by the police, and the announcer saying "You're a big man! BIG MAN!!"
* The Simpsons was how rarely Bart received punishment for his misbehavior.
* The Simpsons was like this before he met Marge, as evidenced by the time Lisa wanted advice on how to tell a guy (in this case, Ralph Wiggum) you aren't interested:
* The Simpsons was much stronger. Just to be seeing a television cartoon with "so many" jokes about swearing, sex and drugs was shocking for the audiences back then.
* The Simpsons, was never said by any character. In fact, no character uttered a single word when Rei showed up all in bandages, as it was a very serious dramatic scene, with a music crescendo, while Shinji watched the girl (who he really didn't even knew at the moment).
* The Simpsons was still dubbed, with Annica Smedius reprising her role as Bart.
* The Simpsons was still legal, to which Marge replies "Not since they passed Homer's Law."
* The Simpsons was worried that fans would react that way. This happened mostly due two reasons:
* The Simpsons. "We can do anything now that scientists have invented magic."
* The Simpsons, we see that Homer and Marge lived in a fifth-floor walk-up before marrying. When asked by Bart, Homer replies he took the elevator... on the building across the street, crawling to his building through a plank.
* The Simpsons? What the hell is that!?"), and it ends up as a pile of mismatched parts. Unable to get it refunded, it accidentally gets uncoupled from the back of Homer's car and it hits the car of Astrid Weller, a conceptual artist who praises his handiwork as outsider art.
* The Simpsons, when a hurricane is approaching, Homer removes the back door of the house and nails it over the window, leaving the doorway without a door. It doesn't work very well.
* The Simpsons, when a moth dramatically smashes through Bart's bedroom window. Bart then mutters that Homer needs to stop replacing the windows with stunt glass.
* The Simpsons, when a phone call from Ned Flanders distracted him long enough from his soufflé for it to collapse.
* The Simpsons" when Barney mentions that, since he's a recovering alcoholic, he's just as much a coward as everyone else.
* The Simpsons. When Bart and Lisa are enrolled in a military academy, Lisa proves herself to be such a terrible shot that the instructor awards her a special whistle, claiming he'd come to her aid if she ever needed his help in battle.
* The Simpsons: When Bart develops a crush on a girl, Nelson gives him advice which amounts to "bully her to win her love." Nelson gives Bart a piece of gum to stick in her hair, then adds an additional piece of gum. "Who knows, you may get lucky."
* The Simpsons, when Bart has a Radioactive Man comic book in which the hero marries "Larva Girl". The issue's title is "To betroth a foe!"
* The Simpsons When Bart impersonates a Shelbyvillian, he is questioned by the other kids.
* The Simpsons, when Bart loses his skateboard, he skids on his butt clear off the screen, crashes into something, and then runs back to the center of the screen looking as though nothing had happened.
* The Simpsons", when Big Daddy jumps out the window of the (stolen) Governor's

Mansion into the bayou, and starts inexpertly thrashing through the water about 10 feet from where the protagonists are standing:
* The Simpsons when billionaire C. Montgomery Burns opened up his wallet.
* The Simpsons when elderly Jasper freezes himself in the Kwik-E-Mart freezer so that he can be alive to see the future. Apu takes advantage of the situation by changing his store to the 'Freak-E-Mart' with frozen Jasper as an attraction for tourists. This doesn't last very long when the freezer fails and Jasper wakes up and sees the changes in the store, actually thinking he is in the distant future.
* The Simpsons whenever someone gets injured and, rather than do the courageous thing and help the victim, the other characters run and leave him (or her) for dead. Was used in a non–injury-related scene on "New Kid on the Block," where after Kearney (who's with fellow bully Dolph) hits on Laura with "Hey, baby, how 'bout puttin' your finger in my ear!", Laura snaps back, "Well, I dunno. Your boyfriend looks like the jealous type." Kearney and Dolph are so shocked by the comeback, they shout, "Let's get outta here!"
* The Simpsons: Whenever they buy a car in place of their Pink Sedan and Station Wagon, it will be totaled by the end of the episode (such as the Canyonero) to keep the status quo (the only exception is the snowplow Homer bought when he started his Mr. Plow business, which was repossessed because Homer never made payments on it). Homer's sedan does get severely damaged multiple times; it becomes good as new the next week, but it still shows the damage on the front fender.
* The Simpsons when Fat Tony invites them to his mansion after Selma snubbed Marge at their wedding.
* The Simpsons when Grampa is looking after Bart in the episode "Marge Gets a Job".
* The Simpsons when handing diplomas and shaking hands to the clown college graduates. Homer avoids this and runs off, but Krusty tackles and buzzes him several times.
* The Simpsons when he learns he needs to go attend to other matters. He orders Bart to think about what he's done since he can't carry out the full punishment. Bart has no idea why Homer was strangling him, and it turns out that Homer doesn't know what Bart did wrong either.
* The Simpsons when his follow-up works are deemed to be nothing but tediously repetitive.
* The Simpsons, when Homer actually is trying to give Bart advice about a girl.
* The Simpsons when Homer and Marge get stuck in a spooky-themed Tunnel of Love thanks to one of Bart's pranks.
* The Simpsons, when Homer and others are about to tour the Duff Brewery:
* The Simpsons, when Homer becomes the Grim Reaper in a Halloween episode:
* The Simpsons when Homer dashes off and a Homer-shaped dust cloud stays in place for several seconds after he's gone.
* The Simpsons: When Homer decides to throw a bash at his house, he has invitations printed up.
* The Simpsons: When Homer finds Abe teaching Bart how to surf, he asks why Abe never did that for him. Abe retorts that it's because he's got no attention span. Homer can't even finish objecting before getting distracted by a cloud that looks like a pork-chop.
* The Simpsons: When Homer finds out that Abe may not really be his biological father, he imagines himself playing baseball with the mystery guy who actually sired him. (He even has a question mark instead of a face!)
* The Simpsons: When Homer gets a brain upgrade, he mathematically proves the non-existence of God while working out a plan for a flat tax. Even his hyper-religious neighbor Ned can't find any errors in it.
* The Simpsons: When Homer gets the entire town together to form the world's largest human pyramid, it comes crashing down early because Jimbo notices that his and Kearney's hands are touching. They both instinctively pull away, causing the collapse.
* The Simpsons, when Homer is supplying Principal Skinner with the lines to win Edna Krabappel back:
* The Simpsons, when Homer is trying to think of an invention and Bart makes fun of

Homer's lack of progress, Homer tips his chair far too back and he falls down. Later, as Homer laments that his inventing career was not working out after all, he once again leans back too far on his chair... but this time, he doesn't fall. He explains that he added hinged extra legs so he'll stop tipping over while trying to invent stuff. The family commends him for his idea, and Homer is satisfied... until he looks closely at his poster of Thomas Edison and sees hinged legs on Edison's own chair. Realising that his own inspiration had a secret invention, Homer decides to go to the Edison Museum and smash the chair, taking all credit for himself. In the end, Homer couldn't do it because Edison was inspired by Leonardo Da Vinci, just as Homer was inspired by Edison.
* The Simpsons, when Homer's bemoaning the crisis of the week, and a convenient TV advert that'll hopefully solve his problem plays. Once it's done, he tells Lisa that it was a good thing she turned on the TV:
* The Simpsons: When Homer's car is abandoned in New York City he calls in to challenge the tickets.
* The Simpsons, when Homer Simpson became food critic he was at first the opposite of this and praised everything, but when another critic told him to be more critical he took it too far and started giving negative reviews to everything. The food critic he replaced was herself an example, as evidenced by her retirement party where she criticized the cake.
* The Simpsons" when Homer takes Bart to visit a steel mill which turns out to be staffed entirely by gay people.
* The Simpsons, when Homer tries to stop Barney from driving drunk by knocking him out. After getting whaled on with fists, a tire iron, and finally having his head slammed repeatedly in a car door, Barney remains very much conscious and a little bit confused at what Homer is up to.
* The Simpsons when it is revealed that Guy is not actually Homer when the real Homer steps in and notices Guy having been thrown out.
* The Simpsons when it's Agnes Skinner who wears a skintight dress to Homer's award ceremony as "Man of the Hour". Homer's father, her co-host, asks, "What's holding that dress together?", to which Sideshow Mel stands and answers, "The collective will of everyone in this room!"
* The Simpsons, when it was revealed that Moe was one of the original Little Rascals, whose most famous bit involved looking into a tailpipe and getting a face full of soot. There were apparently difficulties in getting reasons to look into the tailpipe, but they had good writers. It was one of these incidents that ended Moe's acting career, when Alfalfa looked into the tailpipe instead, prompting Moe to lose his temper and kill Alfalfa (though murder charges were not laid, as Alfalfa was an orphan owned by the studio).
* The Simpsons when Kent Brockman was one of the many people running for the re-call election of Mayor Quimby. He threatened to withhold vital information about deadly household products if not elected.
* The Simpsons. When Lisa is told she's failing gym in one episode, she imagines that it costs her a government position and she's sent to "Monster Island". She's told "It's just a name", but ends up getting chased by monsters anyway.
* The Simpsons, when Lisa notices Homer's wedding ring is 'just a band-aid wrapped in tin-foil." He tells her mournfully, "The real one's inside a turtle".
* The Simpsons; when Lisa tells Bart she found someone who could cheer him up, he asks if it's his pet rabbit, whom he believes "went to live upstate".
* The Simpsons", when Lisa tells Homer his website is just full of copyrighted material from other websites). But the sites keep popping up, and Fox has since given up.
* The Simpsons: When Marge and the kids are seen leaving a public pool, Marge tells Lisa that she shouldn't have loudly announced that Maggie did something in the pool and instead quietly told her and "let the chemicals deal with it."
* The Simpsons, when Marge became a successful businesswoman, Homer discovers that most of her peers have divorced their Homer-esque first husbands for younger, attractive men, and he begins to fear that Marge will do the same. One of the "trophy husbands" was actually a first husband who had completely made himself

over; Homer tries to follow his footsteps.
* The Simpsons when Marge becomes a cop. She is forced to arrest Homer after he repeatedly breaks the law (triple parking his car over three handicap spots so he could buy underage kids beer, then stealing Marge's hat). When she tells him of his right to remain silent, he replies "I choose to waive that right" and starts screaming.
* The Simpsons. When Marge says they are different people, Moe claims they are both in the tavern.
* The Simpsons: When Mr. Burns and several other employers decided to cancel their health plans, some people (Flanders included, to see how serious it was) decided to break the law to obtain medicine. It's different from most (if not all) other criminal examples in that the crime wasn't to get money to buy remedies but to bring the remedies themselves. They smuggled them from Canada.
* The Simpsons: When Mr. Burns steals some paintings out from under Grandpa and flees in a motorboat, Grandpa & Bart chase after in a boat of their own. Mr. Burns has Smithers toss stuff overboard to lighten the load so they can go faster. After everything has been tossed overboard (with the exception of the paintings) Burns gives Smithers a look. Smithers salutes Burns, saying "It has been an honor," and tosses himself overboard.
* The Simpsons. When Ned Flanders starts dating again after the death of his wife Maude, his new girlfriend Rachel is acutely aware of how much he still pines for Maude, to the point of her imprint on the bed still being there and him trying to style her hair like Maude's while she sleeps. At the end of the episode when she helps him remove the imprint on the bed, it's a major step towards him moving on.
* The Simpsons: When Selma is longing for a baby, we see a picture of her and Chub-Chub, her pet iguana, which she's giving bunny ears to.
* The Simpsons", when Sideshow Bob, actually innocent and reformed for once, actually helps Bart and Lisa thwart his criminal brother Cecil from sabotaging a construction project he and Bob are working on together. In the aftermath, Chief Wiggum sends him to prison along with Cecil on general principle.
* The Simpsons, when Sideshow Bob ran for Springfield Mayor, his campaign took out an ad against Mayor Quimby parodying George H.W. Bush's "Revolving Door Prison" and "Willie Horton" attack ads from the 1988 election. In the ad, prisoners are seen leaving the Springfield State Prison through a revolving door and over the walls on escalators and ski lifts while a narrator lets us know,
* The Simpsons when Smithers cradled an apparently dead Mr. Burns and cried he was too beautiful to die.
* The Simpsons, when the family goes to Florida during spring break. Kid Rock at a concert has a large novelty bottle of beer - a 40-gallon bottle - which he pours to the memory of "friends not with us... back at home", and Homer tries to drink from it.
* The Simpsons when the only bridge out of town is destroyed as a meteor is headed straight for them. Conveniently forgetting that Springfield has been shown to be on the ocean, bordered by a desert, a forest, and several other biomes.
* The Simpsons. When this fails, destroying the camera entirely, he remarks "I'm going to need a bigger drill."
* The Simpsons when white blood sells attack her, noting that "at least they know when to stop".
* The Simpsons when you take his relationship with Mrs. Bouvier into account...
* The Simpsons where a cash-strapped Springfield Elementary has resorted to using free periodic tables provided by Oscar Mayer - which, among other things, lists the atomic weight of "bolognium" as "snacktacular".
* The Simpsons, where after Homer buys a matter transporter from Professor Frink (and uses it around the house to save him walking from one room to another... though it takes more effort to move the transporter booths), Bart uses it to fuse with a fly, hoping it will give him superpowers. But instead of Brundlefly, he gets the 1958 Fly (Bart with a fly head, the fly with Bart's).
* The Simpsons, where an Australian couple's car is attacked by one of the space mutants.

* The Simpsons, where an episode reveals that Homer has a thick layer of fluid between his skull and brain that gives him enormous resistance to cranial damage. Known as 'Homer Simpson Syndrome', Homer: "Oh, why me?!"
* The Simpsons, where an improv team is given "A Starbucks in Serbia" as their setting. "I'll have a coffee" "That'll cost $8. This is Starbucks!" (audience mildly amused) "... In Serbia!" (rocking laughter).
* The Simpsons", where Bart and Lisa sneak into Mr. Burns's mansion to save their little dog puppies. When Mr. Burns tries to enter the room they are hiding in, we first see the door handle as it starts moving downward. Bart and Lisa look terrified. Then there is another shot of the handle as it slowly turns... and turns... and turns... until it has completed a full 360-degree turn. The door opening takes so long, that it gives Bart, Lisa, and the dogs time to escape through the laundry shaft.
* The Simpsons, where Bart at one point attempts to turn a frog into a prince. He bungles the spell and creates a "sin against nature" unable to do anything except vomit and claim to be in pain.
* The Simpsons where Bart plays a phone prank in Australia and the dial tone sounds like the National Geographic theme.
* The Simpsons, where Chief Wiggum discovers a corpse in the woods this way. "That was a face?"
* The Simpsons where Grandpa is meant to babysit Bart and Lisa and goes to the Flanders' house by mistake.
* The Simpsons, where he's shown as a more fatherly figure and seems to fully revert to his season 1 kindness (and then some).
* The Simpsons, where his character's bit was getting an exhaust pipe to blast soot in his face. Unfortunately, this led to him killing the original Alfalfa when he did the bit.
* The Simpsons", where Homer gets fired by Sherri and Terri's dad). Of course, in most episodes he only seems to have about a dozen employees in total anyway...
* The Simpsons where Homer is bemoaning what a terrible future they live in before Marge reminds him it is the present.
* The Simpsons, wherein Grandpa Simpson dies and is reincarnated as a love testing machine at Moe's.
* The Simpsons, wherein the son of Mister Burns (played by Rodney Dangerfield!) fakes his own kidnapping, and Burns mobilizes massive resources to relocate him, despite finding him at best disappointing. When Smithers expresses his confusion at Burns' out of character reaction, this is Burns' reply.
* The Simpsons. where Itchy and Scratchy draw progressively bigger weapons on each other and finally end up with enormous pistols that wrap around the globe.
* The Simpsons where Krusty the Clown is quite often shown taking roles that are beneath even him (which is saying something) because his incredibly poor money management skills have left him constantly in debt. In one episode, Bart chastises Krusty for lending his name to an inferior production, to which Krusty replies, "They drove a dump truck full of money up to my house! I'm not made of stone!"
* The Simpsons, where Mr. Burns is incapable of crushing a paper cup without Smithers' aid.
* The Simpsons, where Mr. Burns offers to use his influence to get Homer into college to actually get his nuclear physics degree, saying "I have a chair on the admissions board of Springfield University". His "chair" turns out to be a giant throne with devils carved into it, skulls for the handrests, and two attack dogs chained to it.
* The Simpsons where Mr Burns tells the team "There's a little crippled boy in hospital who wants you to win. I know because I crippled him myself to inspire you."
* The Simpsons", where prior to the 1996 presidential election, they kidnap Clinton and Dole and take their places (infiltration method). In the end they are discovered but still win because they have both major candidates and "It's a two party system. You have to vote for one of us." Someone suggests voting for a third party candidate: Alien: Sure, THROW your vote away!" In the end they are our

rulers.
* The Simpsons where Selma is indicated to have called out a TV repairman solely for the purpose of this trope. The door is slammed on the scene just as the repairman realises that the TV isn't broken, just unplugged.
* The Simpsons, where thanks to Homer, Bond loses his card game bet against Ernst Stavro Blofeld. As he's being carried off by the henchmen Bond exclaims, "That's impossible. I don't lose. I never lose! Well, at least tell me the details of your plot for world domination!" Blofeld replies, "Oh-ho-ho, I'm not going to fall for that one again."
* The Simpsons, where the family is reimagined as 17th-century Puritans: Bart and Lisa have their eyes glued to the fireplace, with Marge feeling concerned that the fire might be too violent for them to watch.
* The Simpsons", where the pet shop employee pretends to mind-meld with the Simpons' dog in order to increase sales.
* The Simpsons where the teachers go on strike, Lisa eventually snaps and builds a perpetual motion machine in a failed attempt to cope, which prompts this quote:
* The Simpsons, where they proceed to have sex on the altar... It was a "Treehouse of Horror" episode, okay? WEIRD shit happens during those.
* The Simpsons where they try to get Maggie out of a locked bathroom. Homer tries a coat hanger then gives up. Lisa tries it again and successfully unlocks the door.
* The Simpsons, where we see the first appearance of Scratchy in the short film "That Happy Cat." It consists of about ten seconds of Scratchy jovially walking down a street, then stopping at the curb and whistling. This is in contrast to Itchy's first appearance, which is far more elaborate and features an actual (if simplistic) narrative.
* The Simpsons (which are illegal in the state the family is currently vacationing in).
* The Simpsons. Which happens immediately after he says that; all the robots of the Itchy & Scratchy Land theme park turn against humans.
* The Simpsons, which has a group of astronauts about to suffocate from "space air" leaking in to a ship, until they put on goggles and resume breathing normally.
* The Simpsons, which he did with Barney in 1977. Their act was so bad that they got more gongs than "the breakdancing robot that caught on fire".
* The Simpsons which he passes off as sweet nothings uttered in different languages.
* The Simpsons, which it parodies, but Milhouse rushes in to shut off the iPod-dock stereo that's playing it.
* The Simpsons while a masked man whips him. Pan up past a complicated series of gears, and we find Lenny and Carl in the cafeteria... wondering what makes the dessert sampler rotate.
* The Simpsons. While Bart is overhearing a conversation between Principal Skinner and Groundskeeper Willie, Skinner reveals that he is trying his hand at stand-up comedy. He invites Willie, giving him directions to the comedy club starting from the Simpsons' house.
* The Simpsons", while in a cartoon promoting the opening of the titular theme park, Itchy stabs Scratchy in the head with a pair of scissors. Scratchy pulls it out along with his brain, leaving him drooling.
* The Simpsons, while setting up the class photo on the school's steps Mrs. Krabappel is going around correct various students' appearance issues and tells one student under her breath to "hoist his flag."
* The Simpsons: While the audience finds them lovable, it's made clear that most of the populace finds the Simpsons troublesome and/or dangerous. In the episode "Simpson Safari", this subtle exchange occurs:
* The Simpsons". While the ending to the episode implied that Ziff was gonna get killed off, he continued to make appearances in flashbacks, and eventually out of prison, alive and well.
* The Simpsons, whilst Leela does the same thing about Marge's ridiculous beehive hairdo.
* The Simpsons, who's a mouse who brutally and sadistically murders the perfectly

innocent Scratchy every episode. In the show itself, Homer Simpson can be this on some of his worst days.
* The Simpsons wide, and the show has always been aimed vaguely towards adults.
* The Simpsons will be sent after him if he jumps bail. Later on, the bail bondsman does send a bounty hunter after Homer because he was so busy bounty hunting that he didn't turn up for court.
* The Simpsons will be the new, no-nonsense authority figure... until he steps aside, gently and politely introducing the more innocuous person (like Ned Flanders in "Sweet Seymour Skinner's Baadasssss Song" or Marge Simpson in "The PTA Disbands") who will really be taking over. (Of course, for Bart, his mother being the replacement was even worse.)
* The Simpsons will do this on occasion. A Simpsons comic spoofed it, when Kent introduced his special report with "We interrupt this program, quite frankly... because we can!"
* The Simpsons, with 'Abandon, all hope...ye who enter hear' on the main post.
* The Simpsons with a spanking by Homer. He has been spanked by other people.
* The Simpsons with her, but later winds up having a fling with Selma. Their shared dislike of Homer helped to forge an attraction.
* The Simpsons with Homer and punches him in the face. Feeling guilty about it, he goes to Homer and asks him to punch him back so they're even. Homer refuses, not becuase he doesn't want to, but because it makes him the better man for a change. But in rubbing it in his face, it makes Ned so angry he punches him again.
* The Simpsons, within earshot. A man buys one from him and exclaims that there's nothing in there about the B-Sharps, and then chases after the kid as he runs away laughing.
* The Simpsons, with its broad satire of American pop culture, has parodied this trope on more than one occasion.
* The Simpsons with James Lipton interviewing Robert Evans, and he hallucinates that both are threatening to kill him.
* The Simpsons with Maggie placed in daycare while Marge rehearsed for a play. Instead of actually escaping, the plot was to liberate all of the confiscated pacifiers.
* The Simpsons with Mr. Burns taking a walk with his grandfather who was explaining to him the fine points of capitalism.
* The Simpsons with Radioactive Man's origin: he gains his powers when trapped at the site of a nuclear detonation.
* The Simpsons with Sideshow Bob in "The Italian Bob", rather than shun him, his wife and toddler son help him try to kill the Simpsons. Exaggerated in "Funeral for a Fiend" when even Bob's brother and parents help him try to kill Bart, too.
* The Simpsons with the four boys spouting constant bleeped profanity.
* The Simpsons with the French language, manages to clear things up (as it happens, the man speaks English).
* The Simpsons, with "The Lovematic Grandpa" - a love tester machine haunted by Abraham Simpson.
* The Simpsons with the Mr. Sparkle commercial, the actor in was in a hot tub and basically said "Don't believe me, watch this commercial".
* The Simpsons, with this one-off like from Moe: "Ah, my physical pain is gone! Now I can focus on my crippling emotional pain. Oh daddy why, why wouldn't you ever hug me! You hugged the mailman!"
* The Simpsons", with vampire Mr. Burns' shadow shown playing with a yo-yo as he walks away.
* The Simpsons, with very few jokes made on the whole topic and some incredibly maudlin music and dialogue. Then again, Keeler has also suggested that the message may have been garbled somewhere in development.
* The Simpsons work out (not least because the island lacks any bamboo).
* The Simpsons-world, bigamy is apparently legal in Nevada, though not in real life). Things are alright for Ned since Maude is dead, but Homer now has to sleep in the tree house.
* The Simpsons Wrestling, each character has a stage they're guaranteed to be

fought on in the league modes:
* The Simpsons Wrestling is the weakest character in the game, save for his Lightning Bolt attack, which does the greatest damage in the game. All you have to do is survive so you can use it.
* The Simpsons written by and guest-starring Ricky Gervais, in which the Simpsons and another family go on a Wife-Swap type show. When Gervais's character serenades Marge on the guitar, one camera guy filming them puts up a sign that reads, "What a jerk", to another, who promptly responds with glare and a sign reading, "Don't waste signs."
* The Simpsons (yes, really), Homer tells him the plant is undergoing a surprise inspection. Burns starts wracking his brains for a suitable patsy, with Homer repeatedly popping up in front of him and going "Hello!"
* The Simpsons: Zig-zags this trope, with some episodes portraying the house as a pig sty, while others showing the house as being immaculately cleaned by the obsessive super-housewife Marge. In one episode after an entire day of Marge cleaning until the place sparkled, the family comes in and goes into the kitchen. The door swings in as they go into the kitchen and when it swings open (two seconds later) the room is a disaster, with debris and food everywhere.
* The Sims 2, a cheat can be used to impregnate a Sim by him/herself. Doing this will produce offspring that is a clone of the parent, but it will always be of the opposite sex. Notably, the child Brandi Broke is pregnant with when first played is such a clone, and isn't genetically related to his supposed father at all.
* The Sims 2, a disastrous date will result in one of the Sims leaving a "Worst Date Ever" Flaming Poo Bag at the other's doorstep.
* The Sims 2 a lie detector can be unlocked as a career reward item for the criminal track, although in this case, the use for it is not to tell when someone is lying, but to increase a Sim's creativity skill by learning how to lie without setting it off (it will give the Sim an electrical shock if they fail).
* The Sims 2 allows talented Sims to creates Servos and imprint them with their personalities. An active Servo autonomously cleans, gardens, repairs broken household items and cooks, often desserts. Your Sims will get fat, and you may also get a craving for berry pie.
* The Sims 2 allows two dogs (and less frequently, cats) to fight if they hate each other enough. After the dust clears, one dog is lying on the floor looking sorry for itself and the other looks distinctly smug.
* The Sims 2 and actually cook this catch (though no Sim will enjoy eating the results).
* The Sims 2 and Circe's bio says that she knows 238 different ways to make someone scream. They also have a cell-like room in the basement for Nervous Subject, who, according to their family bio, they are experimenting on.
* The Sims 2, and establishes canon futures for a number of the pre-made characters introduced in the first game (e.g. Johnny Burb and Jennifer Pleasant get married when they grow up, Bob and Betty Newbie have a daughter sometime after the first game, etc.).
* The Sims 2 are objects that are actually NPCs coded to have artificial white skin, no nipples, and to not act on any script. This skin can be applied to normal Sims through the debug mode. The living mannequins created this way are perfectly at home among the other monsters walking around in the game. If living mannequins are used to create hybrid offspring, the mannequin genes are dominant.
* The Sims 2, a Romance sim will often fear marriages, committed relationships and having children.
* The Sims 2, a Sim with the Pleasure aspiration will put on a lampshade and start dancing (wasting your time and theirs) if their aspiration level gets too low.
* The Sims 2. Basically, it involves taking a child-Sim away from its parents, and sending it to live in the same house as an adult Sim, who from then on takes care of it and acts as a surrogate parent. When the child grows to be an adult, the relationship score should be high enough for them to fall in love and marry.
* The Sims 2 by male aliens. Of course, this means that the human, despite being male, plays the "Mom" role, so this trope arguably still applies.

* The Sims 2 can also inflict this on other sims with the "bleh!" interaction.
* The Sims 2 can reproduce (with other ghosts or with living Sims), and the babies are sometimes ghosts who will then age like normal Sims.
* The Sims 2, changes their behavior so that they will fight and infect other characters in the game. The mod, aptly enough, is called Zombie Apocalypse. It should be noted that the zombies without the mod do not do this, and control essentially the exact same as a normal sim, the only except being that they won't die of old age. (Though they do think about brains a lot...)
* The Sims 2 coffee made by the best espresso machine could keep a Sim awake indefinitely and (combined with some other means to slow motive decay) had no side-effects other than acting jittery for a short while after each cup.
* The Sims 2 didn't set them as "grouchy," they will be this trope; they're just like any other Sims except green.
* The Sims 2, Dina Caliente is implied to be this. She married Michael Bachelor and has the memory of "Married a Rich Sim", and he died before the game started. When the game starts, she's in love with Mortimer Goth, who is also very rich.
* The Sims 2 directly allows players to make transgender sims, allowing this trope.
* The Sims 2, dishes made from fresh-caught fish will take on a sparkly appearance and replenish a Sim's Hunger motive much faster than normal.
* The Sims 2 does slightly better in that the entire neighbourhood ages as you play rather than just the active household, but there is still the problem of disproportionate age groups. For example, in either game it's quite likely that a baby born while her/his older sibling is in high school will itself start high school before the older kid graduates. Later patches for the game allow you to set the length of each age group to avoid this.
* The Sims 2, Don Lothario is engaged to Cassandra Goth, despite having a total of four lovers simultaneously.
* The Sims 2 do this when dancing. There's a bug that they can have this face even when they're not dancing.
* The Sims 2. Even shy Sims have no modesty whatsoever, yet any Sim will gasp (or even scream) upon seeing anyone else who is naked. Since very outgoing Sims will forgo swimsuits in a hot-tub, they can cause quite a commotion at a community lot. Mix in some adult game mods and you end up with Sims freaking out over the nudity of the person they just explicitly "woohooed".
* The Sims 2 expansion pack, each university major gives a boost in several career tracks. The career tracks tied to the English degree include "Slacker" and "Criminal". Also, the final semester for Philosophy majors is "Senior Project: Preparing for the Fast Food Industry" and that major is where Sims who are still Undeclared after their Sophomore year are automatically enrolled into.
* The Sims 2 expansion pack, which introduces restaurants for Sims to go to on dates and outings, they have the option to skip out on the bill where they have to avoid the host for an hour before they can call a taxi (or more simply just drive off if they have a car). However, if caught, the Sim will be scolded by the host and be forced to pay the bill.
* The Sims 2 features nearly instantaneous home delivery of groceries, not to mention the fact that you can enter purchase or construction modes and instantly buy and place any product in the game's catalog.
* The Sims 2 from the base game, and the four simultaneous relationships he has.
* The Sims 2, ghosts cannot cross water, so an easy way to make sure that ghosts don't enter your home is to surround their grave with water.
* The Sims 2 had a downloadable object that was a large pair of scissors. If you forced the Sim to run with them, he would be killed.
* The Sims 2 had the Grim Reaper, who has an hourglass only if your sim died of old age. If a sim dies of old age with a low aspiration meter they try to pull the hourglass out of Death's hands to get more time. If they die of old age with a high aspiration meter they go peacefully, with dancing hula girls accompanying.
* The Sims 2 has goggles you can wear on your forehead, but not over your eyes. A lot of user made content involves giving your character other equipment such as weaponry, backpacks, etc. that don't do anything.

* The Sims 2 has many of these, including several alleged methods of getting twins and another cheat that supposedly will get Bella Goth back.
* The Sims 2 has the Culinary career, which starts you off in one of these and has you work your way up the ladder to Celebrity Chef status.
* The Sims 2 has the SimVac aspiration reward, which sucks skill points and aspiration points out of another Sim, or if the Sim using it has a low aspiration meter it may backfire and transfer them to the target sim instead.
* The Sims 2 has this occur with the plumbob whenever cinematic woohoo takes place.
* The Sims 2 have a strict father, but don't fit the "moving around" as the Sim military never seems to go much of anywhere.
* The Sims 2 have been aliens and alien abduction. Sims have a chance of being abducted by spaceships while stargazing at night. When they return in the morning, male Sims will often end up pregnant.
* The Sims 2. However, if you do it the wrong way, it backfires horribly and ruins your game.
* The Sims 2, if two sims have a bad conversation, one of them might cover his or her ears and go "La La La La!".
* The Sims 2. If your sim's social meter goes low enough, an imaginary friend comes along to help... an imaginary friend in a stained, worn, creepy-looking bunny costume that is missing an eye. Eeeeugh.
* The Sims 2, if you take your time in Create-A-Sim, Elder Sims will sometimes take one of these out and listen for something.
* The Sims 2, if you use the Tombstone of Life and Death, you can choose to "simulate a genetic merger with" the Sims that are currently on the lot. The selected Sim (the one who would be getting pregnant) is included on that list. Children produced through this method will always be a gender-switched clone of the parent (at least, in facial features and coloring).
* The Sims 2 included big gameplay elements that would have to be accounted for in future expansions, leading to extra features that you would never see if you only had one or two installed.
* The Sims 2 in the bios of the Kim family, whose home is the pre-made example of this style: they starred in a TV show set in the future that was cancelled once people realised that said future was rapidly approaching and looked nothing like the show.
* The Sims 2 in the Recruit description: I don't know but I've been told, scrubbing latrines gets mighty old!
* The Sims 2: It's possible to take screencaps showing that the Sims' world has a binary sun.
* The Sims 2 lets players dial up the reaper to ask for an already-dead sim to be resurrected. Offering too small of a bribe results in a Zombie, who has a set personality, and loses most or all of their skill points, essentially making them a different person. Their skin is blue, their facial expression is sagging and in pain, and they shamble instead of walking.
* The Sims 2, like any Sims game, lets you have sex ("Woo Hoo") with anyone if you get your relationship with them high enough. This includes university professors, who are Sims that can be invited on dates or to one's home... and incidentally, doing so will increase a Sim's grades.
* The Sims 2, loud noises will occasionally leak through the walls, annoying your sims who can bang on the walls to get the neighbors to shut up. One of the things that can leak through the walls is Woo-Hoo interactions.
* The Sims 2 (mercifully offscreen), and become pregnant when they are returned to Earth. The result of this pregnancy is the same as the result of a human pregnancy in the game, except that the baby will have alien features, including green skin, black eyes and extreme personality traits.
* The Sims 2. Naturally, your Sim wants to get promoted past wearing the Goofy Suit.
* The Sims 2. Not only do you catch boots, but you can put them in your blender and drink them and watch your Sims have wacky reactions to boot smoothies. You can also have them mounted on the wall like a prized catch.

* The Sims 2 often channel this trope: they will occasionally just glance up at you, the player, positioned in the sky looking down upon them. This is particularly amusing when you pause while they are doing this, making them freeze staring at that spot in the sky, move the camera elsewhere, and then unpause to watch them shift their gaze to the camera's new position.
* The Sims 2 often want to be abducted by aliens, have near-death experiences, become vampires or go through other paranormal experiences other sims dread.
* The Sims 2 premade examples of this include River McIrish (teen with 5 - out of 14 - days to young adult) and Claire Ursine (adult\middle aged with 16 - out of 21 - days to Elder), and (Ambitions expansion pack) Jade Greenwood (teen with 14 days to young adult) and Silver Racket (adult with 13 days to elder).
* The Sims 2 reveals this to be the case for Sim Earth. Which may or may not explain a few things.
* The Sims 2 sims can be abducted and impregnated by aliens if they use the telescope during the wee hours of the night. Females can also be abducted, but won't be impregnated.
* The Sims 2. Sims must be at least teenagers to become zombies (University expansion pack) or vampires (Nightlife expansion pack). Vampire Sims can reproduce normally, but the offspring will be human. (Zombie Sims are sterile.)
* The Sims 2 source of money that can net 1200 Simoleons per day in ideal circumstances.
* The Sims 2, supernatural sims who can breed will produce normal sim offspring, making this trope the norm. The exceptions are aliens, who have a set of genetics that will hybridize with normal sim genes, and plant-sims who use the "pollinate" option to asexually produce plant-sim toddlers (plant-sims that "woo-hoo" will have normal sim offspring).
* The Sims 2, the cinematic that plays when a Sim gets his or her very first kiss has the kissing Sims levitate briefly.
* The Sims 2, the final class for business majors is "Internship: Coffeemaking at Landgraab Enterprises."
* The Sims 2, the game does not even allow the option for first cousins to be married. (A certain cheat will allow them to have offspring if the player so chooses). However, more distantly related Sims have the ability to seek romantic interactions with one another (probably because the family tree in the game does not recognize first cousins once removed and beyond, or great-grandparents for that matter).
* The Sims 2, the garments that witches and wizards wear correspond t] the alignment of magic they use. Good witches wear white and blue, neutral ones wear grey and green, and evil ones wear black and purple.
* The Sims 2, the matchmaker NPC can bring a genie lamp to a household whose sims are accomplishing great things, and the genie will grant the household members three wishes chosen from a small list of options. Your sims can take their time making these wishes.
* The Sims 2, the method of their death affects their color, power and behavior:
* The Sims 2, the missing resident Bella Goth's face can be seen on a milk carton.
* The Sims 2, the Murphy Bed has a small chance of killing a weak Sim that tries to open it while in a very poor mood.
* The Sims 2 the neighborhood Strangetown is heavily based on typical depictions of Area 51. It is a desert area with military presence (the Grunt family) and also has several aliens. There also is a crashed alien spaceship in a crater.
* The Sims 2, this is a potential result of a visit to the catacombs or when a sim is caught in the middle of a detonation. Some random events also cause this. It also happens when a sim is caught in a fire but gets put out before they die. If they catch fire or get electrocuted (again) in this state they die instantly.
* The Sims 2, this is still possible with the added chance of running into someone around town dressed like this, say, reading a book in the park.
* The Sims 2. Though creators of mods have improved tremendously since the old days, it's not uncommon for it to appear that the sims are using industrial strength hairspray and way too much starch in their laundry. Also, a lot of custom

content creators try to fix this and end up with the hair having a gap under the neck, skirts with black areas under them, and even feet bending at the ankle (usually with high heels that are higher than what is usual in the game).
* The Sims 2 University be played this way, depending on the player's inclination, and some of the game mechanics (e.g. toga parties) are obviously meant to invite it.
* The Sims 2 University came out, that is... The "Send Sims to College" option can be used to instantly age up any Teen NPC in a town to a Young Adult and turn them into a playable character in the process.
* The Sims 2 University never have the same problem; a Sim can sleep in his/her dorm room even if a wild party is going on in common space.
* The Sims 2, when a romantic couple are in a photobooth together and have their picture taken, the last picture in the sequence is of one of them holding their hand in front of the camera.
* The Sims 2, which causes sims to spaz out in various animations for a few seconds.
* The Sims 2, which stops time for everything except the caster and any magical beings on the lot. The clock does not advance, your sim can interact with objects (and any witches, wizards, or familiars), and wears off in a few hours of game time or until cancelled.
* The Sims 2 will build a black version of a Jack-in-a-box which, unlike the normal ones, is rather sinister looking. It will scare most of the Sims that play with it, leaving them with a bad memory.
* The Sims 2 with the description of the Military Recruit career. "I don't know but I've been told, cleaning latrines gets mighty old!"
* The Sims 2, with the "Seasons" expansion, you have four slots which each can hold any of the four seasons. Bizarre combinations and inexplicable orders are very doable.
* The Sims 2, you can build male and female Servos (robot butlers). The male looks like a generic robot, but the female looks like the male with a pink bow and lipstick.
* The Sims 2 you can engage in relationships with policemen, firefighters or other emergency staff. You can befriend them, or even marry them and have them move in your household, making them a playable sim.
* The Sims 2 your Sim can have a relationship with a Servo if they want. If you have a later expansion pack, you can set robots as one of their turn-ons.
* The Sims 2. Zombies and Servo robots are immortal but cannot have children, while Vampires can reproduce, but any children born will be completely normal.
* The Sims 3 adds new professions to the game, one of those being Ghost Hunter, and your main tool of a the trade is the Banshee Banisher which is used to suck up spirits or ghost Sims.
* The Sims 3 also has a "Pets" expansion, and the cats added in this pack can go hunting for various vermin. When they find one, they'll get into a scrap lasting several seconds, during which they'll be tossed into the air several times. Even if their target is a mere spider.
* The Sims 3, a sim may do this when refusing an opportunity by phone call.
* The Sims 3 basements, and because she cannot be found in Sim PE, which a deceased character would be able to be.
* The Sims 3, being electrocuted gives you the singed attribute, which lasts an indefinite length of time but always more than a day. Not only does it ruin their mood, but doing any further electric work is more likely to fail, and if they get electrocuted again while singed, they automatically die.
* The Sims 3: Can be played this way if a sim gets an age freeze potion. They can master every skill, get to the top of every career and even complete every lifetime wish, but even after all that, they could always just settle down, start a garden even, and watch as their family and legacy grows and prospers, shaping the very town around them. Maybe they'll even write some books about all they get to see too.
* The Sims 3 can write novels, become a chess master and build time machines.

* The Sims 3 career. In a twist, though, the much maligned Fine Arts degree has the most "flattering" set of traits overall, and is linked to three fairly lucrative careers.
* The Sims 3, cats and dogs will "investigate the strange sim" if there is a vampire nearby and there will be a talk bubble on their head with a picture of bats.
* The Sims 3 comes with vending machines. Slamming into one can cause it to fall on you, causing death by Blunt Force Trauma.
* The Sims 3, detonation can fulfill this trope or invert it. On one hand, you can have a sim caught in detonation have no other effects other than be singed, on the other hand, sometimes it sets the area or random areas on fire too, which can kill them quickly as the sim is already singed (but it's still not quite the explosion killing them). It's played entirely straight if detonation is done at home lot and you have the lifetime reward that nullifies any fire occurring in your home.
* The Sims 3 expansion, a haunted house is used as a carnival attraction in Autumn, though you can use it from storage anytime. If you go in there is a slight chance that you'll temporarily turn into a ghost. As well as getting a terrified moodlet unless your sim is immune to fear.
* The Sims 3 expansion, one can even improve their Singing skill this way.
* The Sims 3 expansion pack) consists in husband and wife David and Janet, who are respectively a burglar and a policewoman.
* The Sims 3 expansion packs include vampires that have these hickeys on their necks, and a Sim can be created with a hickey on their neck even if they're not a vampire (yet), as it's categorized as costume makeup in Create-a-Sim.
* The Sims 3 expansions, which went for more modern inspirations for its vampires.
* The Sims 3 for very long, frequently wishing to quit the job. There is also a book entitled "Commitment Issues" Sims can read.
* The Sims 3, fulfilling your Sim's daily wishes earns you Lifetime Happiness points which can basically be used to buy anti-frustration features. You can make it so that your friendships decrease much more slowly over time, or various other needs of your Sim do not decline or decline much more slowly, among numerous other perks. Essentially, you are rewarded for keeping your Sim happy by making it easier to keep them happy in the future.
* The Sims 3: Ghosts become playable characters once you complete a certain opportunity. They control more or less the same as normal sims, though they can walk through walls and other objects, as well as have a creepy sound effect on at all times. They're also immune to most forms of death. By making ambrosia, you can fully restore them to life. They are also capable of having ghost children.
* The Sims 3, ghosts can be interacted with, invited to live with a family, and, yes, can produce ghost children with living Sims.
* The Sims 3 "Gold Digger" is a Lifetime Aspiration. To achieve it, sims have to marry someone worth a certain amount of money, and then have their spouse die and see their ghost.
* The Sims 3 has Forgotten Hollow, which both fall into this trope. Forgotten Hollow is only populated by vampires and night lasts longer than in normal worlds.
* The Sims 3 has the World Adventures expansion, where you can go to France, China and Egypt.
* The Sims 3 has this occur from low photography skill, making the photos near worthless.
* The Sims 3, Hollywood-inspired Starlight Shores has a large sign of the town written in Simlish.
* The Sims 3, if a Sim eats leftover food from a cheap refrigerator, they'll sometimes note that the food "Tastes like fridge".
* The Sims 3, if you have both the Supernatural and Pets expansions installed, witches recharge their magical power and raise their magical skill level more quickly in the presence of a familiar such as a cat or lizard.
* The Sims 3, Imaginary Friends, after being made real, get positive moodlets the first time they perform ordinary tasks like eating food or using the toilet. The descriptions of these moodlets talk about how amazing these tasks are, at least

from the perspective of the Imaginary Friend.
* The Sims 3, in Island Adventures, lifeguards can do this to recently rescued sims. They recover instantly.
* The Sims 3 in love with a woman and neither know of their partners sexuality.
* The Sims 3 In the spy career path, the default work outfit for men is a suit. For women, it's a backless black dress.
* The Sims 3, in the time travel expansion pack, gives you the option to go to the hospital in the future and create one of these.
* The Sims 3: In the World Adventures pack, if one disturbs their sarcophagus or steals their treasure, the Sim would be subject to their curse. If the curse is not treated for two weeks, they would die, and their ghost color will be dusty black.
* The Sims 3 "Into the Future" expansion, you have a special item called the "Tardisian Well Sonic Shower", by which it uses sound waves instead of water to clean your Sim, and would temporarily prevent Hygiene decay when fully upgraded.
* The Sims 3: Into the Future) that were accidentally sent to the future.
* The Sims 3) is friends with all the playable pets in the game when it starts, and she has the Dog Lover trait instead.
* The Sims 3 it's easier, since you can have children not related to you from the get-go.
* The Sims 3, it's possible to have ghost babies. This occurs through either making a ghost Sim playable again, or using a ghost potion on a regular Sim. If one parent is a ghost, the baby has a 50% chance of being a ghost as well. Subverted, however, in that the ghost baby will age normally and eventually "die".
* The Sims 3,moving into a new house can trigger the "Indian Burial Ground" opportunity, summoning a few ghosts into the property. The player can choose to keep them or ask the repoman for help.
* The Sims 3 pack, adding new sub-worlds to travel in such as Shang Simla (China), Al Simhara (Egypt), and Champ Les Sims (France).
* The Sims 3's expansion pack, Into The Future. Fortunately, your Sim can bring back their descendants through the mausoleum.
* The Sims 3, Sims who are not in the player's active household can start to romance and even get married to other Sims, even if they are not romantically involved with anyone the last time the player controlled them.
* The Sims 3: Sims with a strong romantic connection (in at least the "very alluring" stage) can offer each other massages.
* The Sims 3, Sims with certain traits, evil most notably, can troll forums, and derive fun from doing so.
* The Sims 3, Sims with the Easily Impressed trait will never get bored of another Sim boasting.
* The Sims 3, Sims with the "evil" trait will laugh at the suffering of others, up to and including their deaths.
* The Sims 3 somewhat fixes this, with Sims now being able to get out of pools without using a ladder, as well as having small ankle-high fences that Sims can cross, though waist-high fences remain insurmountable.
* The Sims 3 Supernatural expansion, Joe is this in the MacDuff family. Only he and his mother are not witches. However this is not possible if both parents are supernatural creatures.
* The Sims 3 that can have more or less alien features depending on the child (however, alien traits are still dominant).
* The Sims 3 that specializes in ironing out mechanics and streamlining the game's coding in order for the player to have a more enjoyable experience. Some examples include preventing Sims from re-reading the same book, allowing groups to enter movie theaters (when only individuals can enter at a time in the vanilla game), and preserving wishes so they can never disappear before they're fulfilled/erased.
* The Sims 3 that take place elsewhere on the timeline, and the various games that don't seem to fit in anywhere because they have no recurring characters present.
* The Sims 3: The cover of the seasons expansion to this game shows a poor Sim in a thunderstorm, getting electrocuted through her umbrella by lightning.
* The Sims 3, the same rules apply regarding the interactions between Teens and

Young Adults. Interestingly, there seem to be more than just a few mods that actually make it possible for adults to flirt with teens.
* The Sims 3, this can happen when normal Sims marry fairies or vampires, since they both have lives that are 5 times that of a normal sim.
* The Sims 3 to his or her house. In some cases, they can actually enter the houses without being invited if you don't sufficiently protect the door, and evicting them requires cheats; otherwise, they'll only leave when they're good and ready to (only to return later).
* The Sims 3 topped things off by introducing mummies and mermaids, respectively.
* The Sims 3 to the first two games; so - while the player is free to dictate the characters' fates as they choose - long-time fans of the series know whether their choices are canonical or not.
* The Sims 3 Vampires are no longer immortal (though they still live much longer then regular sims), and can have children at the same rate as ordinary Sims at least in theory although only half of their children with an ordinary Sim will be Vampires. Also, the Fairy Sims in the Supernatural expansion have the same lifespan as Vampires, and can likewise reproduce at the same rate as ordinary Sims. Both also age at the same rate as ordinary Sims until they reach adulthood.
* The Sims 3, when a Sim with both the Unlucky and Loser traits gets into a fatal accident, the Grim Reaper will appear. Instead of taking the sim to the afterlife as usual, he'll resurrect your sim. His rationale is that it would be funnier for your Sim to continue on with his miserable, pathetic life rather than being granted eternal rest.
* The Sims 3, which expand at least one day of a sim's life. Said fruit is a critical ingredient in the Ambrosia recipe that resets a Sim to the start of their current life stage.
* The Sims 3 with other Sims. If it is enough of a gain to move them up to the next skill point, it's more than a little funny to get the announcement while your Sims sit on their bed in post-coital bliss.
* The Sims 3, with the "Supernatural Expansion" you can buy paintings that change during nighttime. Such as a young woman turning into an old hag, a face of a man which turns into a skull, and so on.
* The Sims 3 you can apply a trait called Absent-Minded to an Inventor or a Scientist, resulting in this Trope.
* The Sims 3 you can have relationships with SimBots... you can even make them yourself.
* The Sims 4, an angry Sim has the option to kick over a trash can and stomp on the spilled trash.
* The Sims 4 are given the last name Shallot in surrounding lore, but in-game they are simply called by their first names. If the player cheats to edit them in Create-A-Sim, both their first and last names will be completely blank.
* The Sims 4, as it increases a Sim's Charisma every time they kiss someone.
* The Sims 4, as there's an option for Teen Sims that basically functions as the Woohoo action Young Adults and older Sims have, complete with the massive bonuses to the social and fun needs, but without the chance of pregnancy.
* The Sims 4 bed for a few hours until an adult Sim sprays it away. Spraying the bed just before the child Sim goes to sleep often prevents the Monster from showing up in the first place.
* The Sims 4 before snapping back up to leave the Sim dazed at best or in an eventual urn at worst.
* The Sims 4 can make plants grow or die, Sims who drowned track water everywhere, etc.
* The Sims 4, cheaper versions of appliances such as TVs and refrigerators can do this without warning.
* The Sims 4. Critical reaction, while considerably more positive than fan reviews, was generally mixed, echoing fan sentiment that the omission of several features made the game more dull to play in comparison to its predecessors.
* The Sims 4 described the stream as "not only just the funniest stream I've seen in a while, but the funniest, just, content in general that I've seen".

* The Sims 4 dials it back a bit but still features ghosts, vampires, witches, aliens, mermaids, and sentient robots as playable life states. There are also NPCs of the Grim Reaper, Easter Bunny, and Santa Claus. Furthermore, playable Sims can become plant people and cursed skeletons for a limited time in-game.
* The Sims 4 expansion, famous Sims have a chance of getting the fame quirk, A Serious Actor, after performing a dramatic gig. Any funny or mischievous actions performed on Sims with this quirk will fail and cause them to become angry.
* The Sims 4 expansion, it's possible for famous Sims to get a "Stan" as a fame quirk.
* The Sims 4 expansion reintroduce them and it can prove quite a surprise if you haven't been paying attention, with needs and moods erratically all over the place, along with the concern that you're heavily overweight, up until you spot the moodlet. And then a patch provided special gender options that allows you to create male Sims that can be impregnated through the more traditional means.
* The Sims 4 had previously been rated 6+ despite containing the same relationships.
* The Sims 4 has Trash Plants, which are the byproduct of letting garbage sit out in the open for too long. Once they reach full maturity, they can be harvested for Trash Fruit, which is used to grow — you guessed it — more Trash Plants.
* The Sims 4, if the father notices the mother in labor, he'll start flailing his arms and/or clutching his head while screaming and jogging in place. His mood will also become tense.
* The Sims 4 if you're playing a Sim with the Geek trait. Sims with this trait have a unique social in the funny menu, "describe alien invasion."
* The Sims 4 isn't installed the Politics career isn't even available).
* The Sims 4, it became an in-game challange, as the players gets achievements if they play a family for certain numbers of generations.
* The Sims 4 lets you do it with or without a musical instrument, but you need to be very skilled with the instrument in question for the interaction to be available.
* The Sims 4, one of the signs that the weirdness in town is getting worse is blue and red vines growing up through the pipes of sinks and toilets, giving your Sims Tense moodlets.
* The Sims 4, or else they'll become tense. In the Acting career, practicing in front of a mirror and as such getting this quirk is pretty much inevitable. No need to fret, though. In the Rewards Store, there is a cheap Quirk-B-Gone potion that only costs 250 Satisfaction Points.
* The Sims 4, parents can talk to their teenage kids about woohoo. It leads to both sides feeling embarrassed. In fact, that seems to be the only point of the interaction, as it serves no practical purpose in game. Occasionally, however, the interaction might not result in embarrassment and one or both might get a possible moodlet.
* The Sims 4 received much stronger accusation of this, since the most notable differences from 3 were the omissions.
* The Sims 4, sims can woohoo with other sims in a rocket they have built, ascending into space on a cloud of hearts.
* The Sims 4, Sims with the "Noncommittal" trait will become Tense if they stay in one relationship or job for too long, and become Happy when they break up with someone or quit their job. They're also more likely to reject proposals unless their romantic relationship with the proposing Sim is very high.
* The Sims 4 that the series had been experiencing, especially since the intended focus of the games is on the player's own creations rather than the canonical characters.
* The Sims 4, the game sometimes presents choices like these while your Sim is at work, at school, exploring the jungle, or exploring space in a rocket. It's particularly pronounced in the latter.
* The Sims 4, the relative check stops after a few generations. Hypothetically, a Sim can marry and have children with their great-grandchild. Under most

circumstances this wouldn't happen for obvious reasons, but if you've turned aging off or turned the great-grandparent into a vampire, you can cause an extreme variant of this trope to occur.
* The Sims 4, this trope sometimes comes into play when a Sim witnesses the death of an enemy.
* The Sims 4 through a leveling system as they grow more powerful, meaning that they can bring their vampire Sims as close to this trope as they wish.
* The Sims 4 treats mood potions as a drug because they're technically mood-altering substances. It's unclear whether taking mood enhancers is habit-forming, but it's highly discouraged by some sims for being unnatural.
* The Sims 4 Vampire expansion pack has different variations based on the participants. Two vampires, either in a friendly sparring match or an angry duel, will be partially obscured by a black mist. But if a human picks a fight, the brawl will be obscured by a slightly larger dust cloud, the color of which is easily influenced by the surrounding lights, and symbols will fly out of it.
* The Sims 4 Vampire expansion pack. Right after a vampire steals a deep drink, the victim will mumble something in Simlish and collapse face-down on the ground.
* The Sims 4, vampires don't have reflections in mirrors. Somehow this doesn't stop them from using mirrors the same way other Sims do — freshening up their makeup, trying on outfits, practicing speeches, calming down from potentially deadly emotional extremes, etc.
* The Sims 4 where your toon goes to the shower or toilet and his/her nudity is blurred out? Do it in an illegal version, and the blur never goes away. Ever.
* The Sims 4, with longer witch bloodlines having stronger powers. Sims can also be transformed by the Sages at Magic HQ.
* The Sims 4, you are encouraged to make your sims quit their current job and get a new one once they've reached the top of the existing career ladder. This is enforced though aspiration changes (certain aspirations require your sim to be working in a particular occupation to proceed) or unlocking household furniture and equipment (unlocking an appliance or furniture for one sim does not automatically make it available to all sims in the save file).
* The Sims 4, you can attempt to "Stuff a Fruit in [the] Exhaust Pipe" of a rocket ship. Trying to fly a rocket ship this way will almost certainly cause your Sim to crash and burn to death.
* The Sims, a cat killing mice gets the same "censor pixels" as a nude Sim. Sims fighting or dying in fires invoke no censor pixels, however.
* The Sims" action (which is simply two people going under the covers, making moans and laughing as the bed shakes in the unmodded version) into a full-blown 3D hentai session.
* The Sims add-on "Ambitions" the new skill and career choice allows Sims to invent a time machine with nothing a single work table and some scrap metal.
* The Sims) and equip them with Trait chips that replicate certain aspects of basic Sim behavior.
* The Sims and its expansions, and most of the true weirdness is contained in the expansions, meaning that any given copy of the games will start out as (relatively) normal, and will accumulate supernatural elements as the player installs additional expansions.
* The Sims and sometimes set things on fire accidentally... even the shower.
* The Sims and will try to get an autograph from him if he shows up. Visiting Sims can freak-out if they see her though.
* The Sims, angry or frustrated Sims would sometimes yell something that sounds like "Googlesnot!"
* The Sims, a pet dog can get into a similar dustup with a raccoon, complete with raccoon falling out and performing "put up ya dukes" sparring moves before jumping back in.
* The Sims are low enough, you can give or receive a wedgie. Getting one is likely to surface as a fear when your Sim has an enemy.
* The Sims are visible for player-controlled characters, but there are also more minimal visual indicators for NPCs; icons will appear over the characters' heads

when they become friends, best friends, enemies etc. Having a certain number of friends can be a requirement for getting a job promotion, or a goal unto itself.
* The Sims as the best-selling computer game of all time! Three major releases, each with about 8 expansion packs each, PLUS with Sims 3 they now have an easy built-in online store where things can be bought with real money.
* The Sims: At the very start of the "Get a Life" mode in the console versions, you can explore your dream house as you see fit before you join your mate in the tub. But if you keep them waiting too long, they'll get progressively angry and annoyed, until they give you a Game Over and end your playthrough before it even starts.
* The Sims because they never mug people and Townies don't have homes that the player can see. Hilariously, it's also theoretically possible to have an entire town where all the adult Sims are Mayors. Mods exist, at least for the second game, to fix the "all Mayors" issue, but not the issue of everybody being able to be a petty criminal.
* The Sims: Before a dog or cat is housebroken, they will pee on the floor unless promptly taken outside (for a dog) or to the litter box (for a cat).
* The Sims: Bustin' Out were later rated as PEGI 12 despite not adding any sort of sexual content to the base game.
* The Sims but can be freed and helpful household robots), aliens, werewolves, ninja teleportation, resurrection, the Grim Reaper, zombies, plantsims (Sims that function like plants, needing oxygen and water to survive), and more.
* The Sims can be credited with kicking off the resurgence of casual gaming of the 2000s (along with internet games).
* The Sims, creating Sims and building and designing houses are often so fun people make Sims and houses they never actually play with. Some people end up creating beautifully decorated Sim houses which look almost like real people's houses, but unfortunately are totally uninhabitable by Sims. Downloading custom content on its own can have this effect too.
* The Sims: Dead Sims can remain in the world as ghosts, translucent versions of themselves.
* The Sims doesn't retain this, meaning that many players will enact this trope by not making Sims use chamberpots unless a quest tells them to. Interestingly, male Sims will sit down on the toilet if their Bladder is below half, otherwise they'll use it while standing up; likewise, urinals can only be used if the motive is above half.
* The Sims expansion pack, which is the most spooky/gothic expansion and, as the title indicates, has a supernatural theme.
* The Sims fanfiction, no matter what the divergence is, Bella will always go missing and many times she will be revealed to be in Strangetown all along.
* The Sims features a carnivorous plant (the cowplant) that produces a substance that, when drunk, gives a Sim an extra day of life.
* The Sims- for a set of 47 items! And a lot of Store stuff was available on release day, raising suspicions that they held it out of the retail game on purpose.
* The Sims for child Sims is "Child Prodigy". However, the game's not programmed to let children do things like go to college or write novels, so it's not really possible to make a legitimate Child Prodigy without using mods.
* The Sims for the players revolving around the concept, such as the "Who's Your Daddy?" Challenge.
* The Sims Freeplay has a billboard on the town map where you can watch ads in exchange for for Lifestyle Points and other ingame currencies.
* The Sims Freeplay, which is widely praised as "freemium done right" since there is an alternative way of getting the other in-game premium currencies (read: Life Points and Social Points) without even forking out a single cent (read: by watching ads), and they've actually made waiting less painful since you can switch between multiple sims to alleviate the boredom, team multiple sims up to speed up progress, and the wait times in itself are actually quite reasonable. One wonders why the other parts of EA didn't just copy these dynamics for their other freemium games.
* The Sims friends, not personal friends, meaning that the friends of all the

people in the working sim's household count toward his friend total. A classic strategy is to have one Sim work and a second to do all the socializing.
* The Sims game, children whose grades stay at F for several days are sent off to military school for the rest of their lives — they disappear from the family forever.
* The Sims games have the Freezer Bunny, a recurring Easter Egg, in popsicle form.
* The Sims games when adult Sims age up to elders, but only while they're transitioning.
* The Sims game was initially rated G8+ in Australia along with its expansions before the "Living Large" expansion got an M15+ for sexual references as skimpier outfits and vibrating "Love Bed" along with the option to "Play in Bed" are added in said expansion. The series has been consistently rated M on PC since then.
* The Sims, Green Thumb is actually a Sim trait. With the introduction of a Supernatural expansion, Fairies are this.
* The Sims had a brain in a jar as furniture. In fact, said furniture is involved in one of the challenges.
* The Sims has any proper dialog, as they all talks simslish. You still can know what they are talking about thanks to the images in the talking bubble and their gestures.
* The Sims has a Scare Chord whenever something bad shows up, usually a robber but also for things like a raccoon showing up.
* The Sims has a surprising amount of this when it comes to different expansion packs, and how they may interact with one another:
* The Sims has Mimi or Dudley Landgraab (the Landgraab's gender will always match the player Sim), who asks you to move in with them to a pretty nice house. The problem is, Mimi/Dudley doesn't quite understand the difference between "roommate" and "maid", leaving the player Sim to do all the cleaning and a lot of cooking, in addition to having an actual job, which Mimi/Dudley refuses to do themselves. She/he often insults you as well. Thankfully, the next level of Story Mode is achieved by moving out with one of the nicer friends.
* The Sims has the Obsessed Fan, who while not quite evil can be a considerable annoyance to famous Sims, going so far as to show up at their house.
* The Sims have last names, such as Brigit the Maid and Freddy the Pizza Dude.
* The Sims have striped shirts. And if your Sim chooses the "crime" career track, he will change into the burglar outfit before going to work!
* The Sims, if a parent and child have a high positive relationship, the parent will often perform the action "Tuck In," which consists of pushing in the sheets a little and kissing the child on the forehead. This action cannot be selected by the player and doesn't affect any stats—it's just there to be sweet.
* The Sims if one effectively manages motives and develops the requisite statistics. Then again, all the other career paths work this way. It's also possible to go from "Boot Camp" to "Elite trooper" as literally the second step in the career path.
* The Sims, inactive households gets stuck in a time vacuum — they'll never age, meet new friends, get promotions, etc. Even if your active Sim encounters them in public locations, they'll go back to whatever they were last seen doing at home when you play them again.
* The Sims in the case of male abductees has come in for a bit of criticism.
* The Sims into this. Your Sim family can be populated with vampires, werewolves, witches, fairies, and even mermaids.
* The Sims introduced Zombies. Sims can play rock paper scissors with the grim reaper to save another from death, but if the reaper is in a bad mood, he only brings them back half way. Zombies are tinted green and lose ALL of their personality points, making them all dirty, mean, lazy slobs who don't like to play or talk.
* The Sims invites this, what with the detailed character and house design and its aimless open-endedness. How many times have you spent hours figuring out whether your character would wear his hair differently with a tuxedo than with jeans and which trash can he'd have in his kitchen, only to become irredeemably bored with

him as soon as he's got a job and some friends and keeps asking for a nicer TV or a trip to the bookstore?
* The Sims is based off the Montagues and the Capulets; the reason why they started the feud was due to the Monty Patriarch losing a promising job as an associate with the Capps.
* The Sims, is disaster-free aside from house fires and burglars, unless you are playing the firefighter career.)
* The Sims is used frequently to examine what-if scenarios, and to teach young students about family dynamics and the real world.
* The Sims, it takes an hour of Sim Time (a minute of gameplay, if you don't speed things up). When the pizza guy arrives and is greeted, a text box comes up with "Dude! I made it from Sim City to your house in less than an hour!" (And then your Sim household pays 40 Simoleons for the damned pizza!)
* The Sims: Livin' Large has a lamp that can be bought. Every 24 hours it can be rubbed, and a wish can be made. However the genie inside isn't very good, and occasionally messes up, such as granting a wish for money, but instead filling the house with overdue bills.
* The Sims Medieval a quest where you have to cure the Beast of an illness.
* The Sims Medieval are definitely against the law, dueling to the death doesn't seem to be.
* The Sims Medieval a Sim can get the negative mood buff You Call That Music if they hear the court jester play the fiddle badly.
* The Sims Medieval, bloodletting is apparently an effective treatment in the game's universe.
* The Sims Medieval, but swordfights don't because the player can control the Sim in a swordfight.
* The Sims Medieval can have tomatoes and eggs thrown at them (if the Sim you're playing is on the receiving end of this treatment, it increases the negative buff they get from the stocks).
* The Sims Medieval can steal from other Sims as well as from the messenger posts. Because of this, spies can get more money more easily than almost any other profession.
* The Sims Medieval, children just aren't playable to begin with (a player character Sim's child can take on their profession if they die, but they're instantly aged into an adult to do so) so the player choices and bungles that lead to adult Sims dying will never affect children, and playable Sims who can inflict death can't do so on children.
* The Sims Medieval features gender equality and acceptance of same-sex relations and marriage in the medieval period. It's sort of justified in that the Sim world is not the same as the real world, and bigotry may never be a thing in their universe.
* The Sims Medieval gives you a quest to deal with one of these who actually threatens the kingdom. (You could also, possibly, make your own kingdom's Wizard into one, as there are clothing and hat options that look like a witch's gear and the traits Cruel and Evil are available. You couldn't make her green though, just very pale.)
* The Sims Medieval has a moodlet "Tasteless Treat: That tasted like sheep hooves, only worse!"
* The Sims Medieval has a quest in which one of your heroes intends to learn the secret of creating life. The description ends with "...And somehow profit from it".
* The Sims Medieval has insurmountable knee-height fences, as well as serious difficulty pathfinding around other Sims. The Throne Room doors look big enough for multiple Sims to enter/leave at once, but they always have problems with them.
* The Sims Medieval has Kingball, a sport similar to tennis but played on a triangular field with three players instead of two, and a ball similar in size and shape to a volleyball.
* The Sims Medieval has the spell "Soul Theft," which allows you to steal a person's soul fragment.
* The Sims Medieval, if a Spy has low success odds of pickpocketing, the person

he's trying to pickpocket might turn around too soon and catch him. This leads to 1. the Spy not getting the money and 2. the Spy being sent to the stocks as soon as the constable is available to arrest him.
* The Sims Medieval includes top-tier gear like Doomplate, Doomsword, and Doomstaff.
* The Sims Medieval quest-specific items too. Looking for crab perfume? Well, obviously the village shop has it! (They also buy everything, including pond scum.)
* The Sims Medieval: The primary method of execution available is for a Sim to be tossed into "The Pit of Judgement" and forced to do battle with The Pit Beast, a carnivorous tentacled monstrosity. Gathered witnesses will either gasp in horror or cheer on the combatants.
* The Sims Medieval. There's also a piece of Gossip that says "I heard (Sim Name) is so handsome/beautiful he/she gets discounts at all the market stalls just by smiling!" Cue amused player reaction when the name of an average or ugly Sim is randomly plugged into this.
* The Sims Medieval, unlike previous Sims games, has text pop up on screen when your Sims Gossip. Two of the messages are jokes along the lines of Lightbulb Jokes poking fun at the game's two religions.
* The Sims Medieval, when a musician plays a lute, most people in the room start to dance; this includes any knights in full armor, and occasionally even golems.
* The Sims Medieval when your Knight achieves level 10, his or her title is "Commander." And a level 10 Knight, particularly if they've bought or acquired good gear, is quite badass.
* The Sims Medieval. You can fish all you like and you only ever catch fish.
* The Sims negate one or multiple Needs decay, or simply quickly fills it.
* The Sims of people through its wielders. Depending on the approach, you either guide a Knight and Spy in uncovering and ultimately destroying the blade (though the Knight becomes temporarily possessed by it), or letting a Jacoban Priest and a Blacksmith leverage the blade's evil for the good of the Jacoban Church.
* The Sims, one of the first spells Sims can learn is Toadfication, which, naturally, turns another Sim into a toad. If your Sim tries a spell on a magic-user that is more powerful than them, the target will realize what is about to happen and whip out their own wand, quickly using Toadification on the person trying it before they can finish casting the original spell.
* The Sims, one of the prank calls your sims can receive at night is "Your psychic adviser's head has just exploded, be forewarned."
* The Sims, one of the romantic interactions available when characters are eating at a table together is "feed a bite". The Sim initiating the interaction takes food off his/her own plate with the fork, and offers it to his/her partner. The partner either accepts it, which improves their relationship score, or is disgusted, with predictable results.
* The Sims, one of the towns features a river that happens to pass by the local cemetery, where there is a "No Fishing" sign posted on the river bank. If a highly skilled angler goes to that specific place between the hours of midnight and 4:00 am, s/he can, with the correct bait, catch the elusive Deathfish. Not only does the Deathfish have a high simoleon value if sold, it's one of the two ingredients used by a highly skilled chef to make Ambrosia, which makes its eater grow somewhat younger.
* The Sims, on the other hand, avoids all that. Eating and drinking is merely recreational, the toilet is a place to read the newspaper, there's nowhere to drown in, and if you could so generously give them an item that separates them from the door, they'd just teleport through it. The cruelest thing you can do is Be Mean, which chooses from a random set of mean actions (yell at, stomp on foot, throw water balloon at, breathe bad breath at, start a fight, pop an inflated paper bag...), and that doesn't even reduce your relationship below "Acquaintance," like repeatedly being nice raises it up to "Best Friend."
* The Sims. Or, alternately, make Sims of your enemies and torture them.
* The Sims, other Sims will instantly notice if a Sim has done something embarrassing, and depending on their personality may point and laugh.

* The Sims penguin that will occasionally walk by your house during the winter season. If you have a snowman built on your lawn/yard, it will stop by to talk to it. If you pet it it will pee.
* The Sims, pretty much any broken thing in your house can be fixed with a wrench.
* The Sims (provided you got to a good start by letting them out of the cop car after they tried to steal your stuff). Who cares about the next job, just invite them in, slip into something a little more comfortable and let your charms do the talking. In the process of a day after moving into a new lot, a lone sim was living with the postal woman. A week later they married. Done right, things can move... quickly.
* The Sims series are referred to as Simmers, both within the fandom, as well as officially.
* The Sims series, a Sim can try to fix their broken plumbing themselves instead of calling a repairman or telling the landlord, much like they can with appliances. Plumbing is safer. A broken computer or TV set can electrocute a Sim whose skill isn't high enough, whereas fixing a toilet or sink will only make a Sim dirty and angry (read: decrease their Comfort and Fun) and the thing is now likely to break again immediately after.
* The Sims series features multiple examples. The Sims 1, 2, and 3 all feature Zombies, although Sims 3's zombies are a strange variety that doesn't actually involve death, or coming back, so they don't count:
* The Sims series must have a first and last name. However, some NPCs aren't meant to be playable and can get away with having only one name:
* The Sims series, Sims can catch fire from a stove, oven, toaster or fireplace, as well as through the fireworks and floor mounted decorative flame jets in the second game, and flame traps in the World Adventures expansion in the third. They burn for about thirty seconds then disintegrate into a pile of ash unless the flames get put out first. In the third game, having been on fire and then put out gets them the Singed moodlet until they take a bath or shower, and if they catch fire again while Singed, they die instantly.
* The Sims series, the #1 example of this is where is Bella Goth? Why was she last seen with Don Lothario? And why is there a townie named Bella Goth in Strangetown? This one is probably intentional. Other common ones include the mystery of the Tricou family and the House of Fallen Trees in the premade Downtown in Nightlife. Who are those mysterious Tricou townies who are all related? Why does Mrs. Crumplebottom hate everyone?
* The Sims series, toddlers can't die, and children can rarely die. Teens and older can starve to death, however, if a child or toddler gets too hungry they will be taken away by Sims Social Services. This child can then be adopted into a different household.
* The Sims Sim fired, missing it once will just get you a nagging phone call, rather than someone throwing you in the brig for going AWOL), and they can quit whenever they like. They can also get up to shenanigans like replacing the recruits' rifles with baguettes.
* The Sims Sims 2 sequel features her (or a version of her), and explains where she's been. (Abducted, and now in hiding, since you asked.)
* The Sims, sims can can this simply by picking the 'ask if single' option under the flirting submenu. Despite its placement this does not count as a flirtatious option in terms of inspiring jealousy, however.
* The Sims, Sims can go skinny dipping and have their clothes stolen by other Sims.
* The Sims, Sims carrying a Death Flower will present it to him upon dying and he'll be so moved he leaves to take it home and put it in a vase, allowing your Sim to live.
* The Sims: Sims do this and yell at the player to get their attention so the player can direct them to the restroom.
* The Sims, Sims who are not at a high relationship status will refuse to share a bed. If two Sims in a relationship have recently been in a fight, their relationship status will drop, and this is likely to happen, unless the player decides to buy an extra bed.

* The Sims, some NPCs will randomly offer to set your sims up on a blind date. Of course, how it goes varies. If you ask the Gypsy Matchmaker to give you a blind date, how it goes depends on how much you pay her. For example the maximum amount $5000 guarantees someone who fits all the Sim's turn-ons and vice versa, meanwhile giving her $1 will get someone that probably fits the sim's turn-off.
* The Sims so much as... erratic. The player can summon him and gets a choice between two wishes. If you guess "water", you're either gifted with a new hot tub or a flood to mop up; if you guess "money", you get either a pot of gold or a stack of bills; if you guess "fire" or "love"... the list goes on.
* The Sims takes 3 Sim Days (3 hours of normal gameplay.) There exists a cheat that allows you to reduce the pregnancy to less than 1 Sim Day.
* The Sims. The children are literally unable to do anything about the taxes or get money.
* The Sims, their likelihood of doing so is influenced by their level of playfulness. If you have a couple playful Sims in the same place, a pillow fight is bound to break out eventually, to the annoyance of some players. It's a bit silly when a Senior Manager brings home one of her coworkers and they start beating each other with pillows.
* The Sims. Their rage is infectious, too- they can provoke other Sims using the "Rile Up" interaction.
* The Sims. Then again, it doesn't affect your performance in other careers or aspirations either.
* The Sims the part; other than the door and the way it impacts Sims' stats, it runs just the same as any other Sim-car.
* The Sims the ski lodge hotels had bear skin rugs in front of fireplaces your Sims could make out on.
* The Sims the toilet. Sims have to have a very close relationship to share the bathroom; generally, only lovers will do it.
* The Sims: This can be a randomly-rolled fear of a Sim, which means that they fear using a public toilet in general, even if it's clean, but when it's one of these it becomes a thousand times worse.
* The Sims, this is a very common player tactic. See two sims you think look cool? Marry one now, have your kids grow up with birthday cake and marry the other.
* The Sims: Those who max out their cooking skill can cheat death with food or give long-lasting emotes. Several premade Sims and NPCs in the series have high or maxed out cooking skill at the start of the game:
* The Sims, Tragic Clown is also very depressed and any attempt he makes to cheer your Sim up only makes things worse, that is when he isn't off on his own sobbing.
* The Sims uses flies as an indicator that something is dirty. They're actually hard to see, but when you're trying to figure out exactly what needs to be cleaned, you can hear their buzz.
* The Sims was a breakout success that challenged conventional notions of not only what a game could be, but also to whom it could appeal; studies have cited it as being played by girls and women more than any other video game in history.
* The Sims was a pretty big deal; and acknowledging same-sex couples with legally recognised in-game partnerships was similarly progressive in 2004 when the sequel came out.
* The Sims, when you sit on the couch with someone and select "cuddle", this is what happens.
* The Sims, where an early job promotion can lead to poor performance at the new level, if skills and other requirements are not improved.
* The Sims, which has also been cited as a major influence in getting women into gaming.
* The Sims, which includes the four pre-made playable children from the original games as adult protagonists, and adds a few more like Brandi Broke (daughter of Bob and Betty Newbie) and Tara Kat (implied to be the adopted daughter of Ginia Kat).
* The Sims who performs much of the same functions as a maid. While she doesn't actively try to scare Sims, they will sometimes run in terror from her. Additionally, if you already have hired a maid and the maid sees Bonehilda, she

will quit.
* The Sims, who seem to be a somewhat stereotypical embodiment of this trope, in that their relationship is massively shallow (although their attraction is not explicitly based on race or appearance, with a few other superficial factors listed).
* The Sims will do this if your controllable sims make friends with him. You can still lock your door, though.
* The Sims with someone with whom they are not in a committed relationship.
* The Sims, you can buy a giant cake to have a dancer come out and dance. Of course you have to keep children out of the room. The dancer can be of either gender (and you can hire both with two cakes). Rarely, a gag dancer, like a person in a monkey suit, will come out instead.
* The Sims: You can give your Sims the "Kleptomaniac" trait. It lets you swipe three items per day. However, the item your Sim steals is random.
* The Sims, you could subject a Sim to die, burnt up, filthy, stinking to high heaven and starving in a pool of their own urine.
* The Simulants make Cat's remarks towards humans look tame in comparison calling the Dwarfers everything from "human vermin", "scrabbler slime" to "pus sucking, puke laden walking cesspits of unspeakableness".
* The Simulation Argument, since any reality must be absolute from the perspective of its inhabitants (if we are indeed simulated beings, this is still the highest level of nested realities we can exist in).
* The simulation of a pleasant brightly-coloured playground Raimi gets plugged into after becoming a ghost in
* the simulation of her final moments: she shoots Forest in the head, but this causes the electromagnetic lift to fail, killing her as well. In the real world, she tosses the gun as the lift's door closes, ensuring that she can't shoot Forest. However, Stewart disables the electromagnetic field, killing both Lily and Forest.
* The simulcast was unable to use the Punk Hazard-centric opening "Hands Up!", continuing to use "We Go!" until Dressrosa.
* The simurgh, a giant bird from Iranian mythology, is said to nurse its young. Though to be fair, she's sometimes pictured as a
* The Simurgh is the most powerful telekinetic in the setting, though it's the
* The Simvan Monster Riders are an entire species specializing in riding monstrous steeds and can tame and ride most varieties of beastly steeds with relative ease. Their favored rides are the giant reptilian ostrosaurs, but they also ride rhino-buffaloes, dinosaurs, and a variety of large and normally intractable creatures.
* the. Since infantry bunch up when attacking, if a single Flamethrower dies, he's probably taking the whole group with him.
* the, since now the onboard AI has the authority to control it, and does not need to sleep, so presumably EDI controls it when Joker is off duty.
* The Sinclair brand of affordable consumer electronics, most famous for the
* The Sindar (elves) of Hârn suffer from an extreme form of this to the point where they will completely forget friends after a long absence. Often an elf will remember songs and tales of events he took part in but have no memory of the actual events.
* The Sinful Dwarf, has a big nasty scar on her cheek to signify her villainy.
* The Singaporean Ultimax 100 machine gun has very low recoil due to its implementation of the “constant recoil” system, in which the bolt carrier group does not impact the rear of the receiver. Instead, it stops moments before due to the opposing force of the return springs, reducing recoil greatly. Another weapon, the Knight’s Armament Light Assault Machine Gun (yes, that’s its real name) also makes use of the constant recoil principle and was designed by Eugene Stoner himself. Its recoil is so light that the weapon can even be fired like a pistol in full auto (see a demonstration
* The "Singapore Cane" was the preferred weapon of many ECW wrestlers, most notably
* The singer in The Jets' "You Got It All" views her former lover as such compared to her new one.

* The Singer of All Songs, the order of priestesses known as the Daughters of Taris live surrounded by a giant wall of ice. They are the only people who can use ice magic, so they control who can come in and out.
* The singer of Tomorrow's Starlight is depicted flipping off a crowd with both hands.
* the singer performing live using a horned cowboy hat, and the last line of the chorus even went "We were made for each other, she's a cow, I'm a bull".
* , the singer's team was losing by a hundred points, only for a teammate to pass the ball to him so he could pull off an awesome dunk worth a million points.
* The singer Tony Bennett was demoted and reassigned after some remarks he made against the Army's racial segregation policy. His CO ripped off his insignia, spat on it, and told him he was "a private again."
* The Singing Bee where they played two producers pitching the shows at the same time.
* The Singing Bell them. It's used to collect more evidence directly from the mind of the accused.
* The Singing Bell, the villain considers a public place the best place to have a clandestine meeting -as long as you're out of earshot of everyone else. He meets his patsy in a public park.
* The Singing Detective begin when, as a young girl, she catches her mother having adulterous sex with their next-door neighbour, the father of Vanessa's best friend, in the garden.
* The Singing Detective" for him. Until present day, he's been having nightmares about the scarecrow visiting him from time to time. With some help, he puzzles together the source of his terror: the scarecrow reminded him of his truly terrifying and abusive homeroom teacher.
* The Singing Detective has the main character attacked by two of his minor characters for not giving them names (it's a weird story). They start to pry apart his hands, which are permanently clenched into fists due to his arthritis.
* The Singing Detective, when the protagonist Philip Marlow, as a boy, catches his mother having adulterous sex in a forest. The experience is implied to leave him with permanent psychological damage.
* the singing frog - all of which is seen by Bugs Bunny, who's reading a DC comic.
* The Singing Mermaid escapes from the circus after the acrobat teaches her how to handstand. She then walks back to the ocean on her hands.
* The Singing Mute: A character is established as incapable of speech, but that doesn't prevent them from participating in musical numbers somehow.
* The Singing Ringing Tree than anything) as a reflection of her inner character, with her outward beauty only being gradually restored as she slowly redeems herself.
* The Singing Springing Lark" a man is asked by his daughter to bring her a singing, springing lark from his travels, but he's only able to find one at the very end of the journey. However, the lark belongs to a lion who demands that, in exchange for the lark the man stole, he must give him the first creature to come to him when he returns home — which ends up being, of course, that same daughter. The two end up marrying and remain together for some time, with the lion becoming human at night, until the lion is turned into a dove when candlelight falls on him and flies away. His wife has to track him down by asking after him to the sun, the moon and the winds, who give her gifts as they send her on her way, and eventually learns that he is once more a lion and fighting a dragon who used to be a princess. The protagonist is able to turn them back, but the princess flees with the former lion and intends to marry him; the lion's wife is able to buy the right to spend a night with him by giving the princess each of the gifts she was given — one gift, one night — but the princess gives her prospective husband sleeping draughts to ensure he does not wake. He does not drink the second night, however, and they're able to escape
* The Singing Tree by Kate Seredy, German children are sent as evacuees to the farm that is its setting.
* The Singing Tree, children, being brought to the farm so they could eat.

* The single-clone degeneration is addressed but ultimately averted in
* The Single Guy After the being addressed by the hated word, Janeane gets a tattoo to prove she's still young and cool.
* The Single Guy Jonathan eventually pries open the doors and braves the filthy underground tunnels trying to make it to freedom.
* The Single Ladies Dance. (All the single ladies? All the single ladies!)
* the single most important element of the Allied "island-hopping" strategy in the Pacific Theater, as without them, the transformation of small Pacific islands into "unsinkable aircraft carriers" in record time would simply have not been possible.
* the single most poisonous substance known to man, assuming it was distributed equally.
* The single-player campaign has a chicken on the first level that, if you shoot it, will transform into a giant golden chicken that chases you around the level and
* The single player campaign is generally quite well regarded as is, but the game is also known for its surprisingly solid four player multiplayer mode that is considered just as if not more fun than the main game.
* The single-player tends to avert this trope, insofar as an organized army will be much more effective than a disorganized one; being able to throw up a
* The "single resource mining planets" might be justified. Since replicator technology can accommodate most of the Federation's needs, there are only a few resources (like Dilithium Crystals) that they need to bother looking for on other worlds.
* The Singles Table, a 2007 sitcom about five 20-somethings who meet at a wedding after they are placed at the titular table for unattached people.
* The Single Standard: Tommy, who is perfectly aware that he is in the friend zone—he even calls himself "boring"—but is content to hang around Arden, occasionally asking plaintively if she'll marry him. Eventually, after Packy dumps Arden, it works, and apparently she marries Tommy out of boredom. Until Packy shows up again, that is, and Tommy pulls out his gun.
* The Singles Ward has another classic example, where Jonathan and Cammie, after having gotten off to a rough start, get into an argument in the kitchen, during a party at his house. They criticize and mock each other, stepping ever closer together, until a friend walks in to find them making out.
* The Singles Ward to intercept the girl he loves before she boards a plane for her mission. She shoots him down... and marries him when she gets back. Mormon girls everywhere sighed in romantic contentment.
* The Singles Ward, when a young woman is arrested for breaking in to what turns out to be her own apartment. A plastic tub full of white powder is handed to the senior partner (played by a Morning Radio Personality), who takes a deep whiff, buries his finger in it, sticks the whole finger in his mouth, and pronounces it "Tide".
* The single-target support spells rarely do enough good to spend a turn casting them. Most support classes only get party-wide buffs that increase agility and different types of defense, and those matter in very few battles. When you beat the story boss and start facing the real challenges, you don’t even bother with most support spells as bosses frequently Disrupt all positive status effects off you, and their bigger nukes will bypass defense/resistance/reflect buffs anyway. You only care about healing and resurrection.
* The single version of "Tropical Iceland" adds an extra verse where the first and last lines are reversed. Playing the song backwards reveals that the full contents of that verse are:
* The Singularities return during the Shinemon arc, and this time without the cost
* The Singularity: A hypothetical scenario where we become transhumans due to acceleration of progress.
* The Singularity: A theoretical point in technological development beyond which things are incomprehensible to people who came before.
* The Singularity: Increasingly rapid technological advances leading to increasingly alien or transcendent civilizations.
* The Singularity Is Near: A film about artificial intelligence and the future of

humanity.
* The Singularity Is Near. Among other things she saved the world from out of control nanomachines, even after someone tried to have her deleted. Having a creator who apparently loved her and treated her as his child probably had something to do with it.
* The Singularity Is Near and progresses through more and more advanced versions of cyberspace.
* The Singularity Is Near looks at this from a legal standpoint. When artificial intelligence is created, and it is sentient, how would it prove it and how would it gain legal standing as a person?
* The Singularity Is Near portrays a future where everyone will be able to have their normal human capabilities enhanced with technology.
* The Singularity Is Near, this technology has advanced so far that one specimen, Ramona, seeks recognition as a person in the eyes of the law.
* The Singularity, one can draw their own conclusions as to how well the story ends.
* The Singularity, religion is no longer practiced because everyone knows advanced physics as thoroughly as modern people know basic arithmetic.
* The Singularity System as part of its vehicle combat system. Due to their unique designs, they are treated more like large-scale human combatants than vehicles.
* The Singularity System features powered armors that allow personal-scale combatants to effectively be treated as vehicles for vehicle-scale combat.
* The Singularity. Zakharov also isn't shy about describing the Planetmind as an "embryonic deity", since there is more than enough empirical evidence to prove it.
* The Sinister Secret of Saltmarsh. One room has the corpse of an alchemist sitting in a chair.
* "The Sinister Snowman" and Kara watch the crumbled remains of what used to be a mountain inhabited by the demon Orgox.
* The Sinister Snowman fight an ice eagle that is several times larger than a man.
* The Sinister Urge, features a scene in which porn director Johnny Ride gave mannish porn mogul Gloria Henderson a long kiss.
* The Sinking City Brutus Carpenter killed this way, but it's interrupted by Reed.
* The Sinking City is a somewhat unhinged private investigator who gained sanity-breaking Postcognition abilities after a brush with an aquatic Great Old One. The plot of the game revolves around him coming to investigate a city that has been cursed with perpetual rains, violent oceanic activity, and an infestation of monsters by the doing of a Lovecraftian cult dedicated to that same Great Old One.
* The Sinking Of Japan the heroine's sole motivation to become a firewoman is because her father was one.
* The Sinking of the Lusitania. The kiddies must have flocked to it back in 1918. At that time, it should be remembered, the Ghetto as we know it didn't really exist yet. Adults were every bit as fascinated by the new medium as children were.
* The sinking of the MV Sewol., the Sewol capsized and sank, leaving 299 people dead, including 250 children on a school holiday.
* The Sinner has a young woman murdering a man in broad daylight at the beach.
* The Sinners of Hell there's stuff like a river filled with pus and sewage, and demons hard at work torturing people.
* The Sinner), who's a grandiloquent nihilist, frequently giving big speeches about the meaninglessness of existence and playing dangerous "games" designed to force other people (and himself) to face death and "feel something real." His college friend, Nick, sucked him into the idea and was an even more striking example of the trope. Amusingly, the show itself is aware that none of this is terribly original — one of Jamie's old college professors off-handedly notes that most disaffected young men who get into Nietzche move on pretty quickly, and the lead detective on the case rolls his eyes at one of Jamie's rants and basically says that everyone has dark thoughts and manages to get over them and live their lives without any real issues.
* The Sinner, who was the series' female lead in the first season, but who played no on-camera role in later seasons.

* The Sinn Féin politician John McGarrigle is played by the American Ted Rooney.
* the Sinnoh arc Pokémon Chimchar. As a result of this trope, Team Rocket calls Paul "the rude twerp".
* the Sinnoh saga concludes with a relay race where racers change mounts at certain points.
* The Sin of Nora Moran: Governor Dick Crawford is riven with guilt because his mistress, Nora Moran, is about to be executed for a murder that Dick committed, and he's going to let it happen. Finally he decides that he will pardon her after all. Suddenly Nora's floating disembodied head appears and starts talking to him. With a creepy air of calm, Nora tells him to let her fry: he's an important man with a lot of good to do, she doesn't want to see their love turned into a tabloid scandal, and if she were freed it would just be to return to a life of pain and struggle.
* The Sins themselves seem to be immune from any lasting damage, and can turn into smoke to avoid being hurt, which Wrath does twice during his fight with Shazam. At best, the most that Shazam
* The Sin, the woman's nude physique acts as a lure to the viewer while the snake is ready to strike, partially hidden in her hair and shadows. This is symbolic of the nature of sin; an attractive thing that tempts you into accepting it, only to corrupt and poison you.
* The Sin War, an eternal war between the forces of Heaven and Hell, is given as the background to
* The Sin War trilogy even briefly explains the origins of the Necromancers. There are 3 worlds in the Diablo multiverse, which are basically Heaven, Hell, and Sanctuary (Earth). Heaven is at war with Hell, and both sides think they could win by "recruiting" the mortals of Sanctuary. Necromancers want Sanctuary to stay neutral/not involved. They would like to kick ALL Angels and Demons out of Sanctuary, but, lacking the ability to do so, they wind up fighting against whichever side is winning. Usually Demons/evil has a stronger influence, so the Necromancers are on the side of the Angels/good.
* The Sioux don't even have taboo words. You'll find men named Penis or Testicles and women named Vagina with no trouble whatsoever.
* the Sioux Falls Massacre, reveals that the aforementioned massacre could've been averted had this trope not been played painfully straight by the North and South Dakota cops towards our Minnesota boys.
* The Sioux Gateway Airport in Sioux City, Iowa has the designation "SUX". When they petitioned the FAA for a new identifier, they got the options of GWU, GYO, GYT, SGV, and GAY. They elected to stay with SUX.
* The Sirantha Jax Series in ancient times. The beacons are the only way of navigating in grimspace, as normal GPS systems don't work in it and maps are useless while inside thanks to it's strange properties. Problem is, only people born with the "J-gene" (called jumpers) can still perceive the beacons while making grimspace jumps. Grimspace travel is like a addictive drug for jumpers, giving them a orgasmic high. It's also highly destructive to the mind and body of jumpers, ultimately leading to either a mental breakdown or jumpers developing brain lesions that eventually cause them to make a jump and come out of it brain dead (this is called "navigator burnout syndrome" and means that most jumpers don't make it past thirty).
* The Sirantha Jax Series is definitely a stand-up individual who is in the profession for the good it does rather than just getting paid. It's interesting in that, even while being alien, he is more "human" than some actual human characters.
* The Sirantha Jax Series, March the telepath knows the worst of everyone around him, and hardly bothers to hide his contempt for them. He knows when they lie either to others or to themselves. In fact, the main reason for his attraction to Jax is that she doesn't lie and there's no disconnect between what she's thinking and what she's saying.
* The Sirenen Reich. v5 toned this down by replacing the Führer with a Board of Directors, but it's still pretty heavy.
* The Siren from the episode "Sex and Violence", the Vetala from "Adventures in

Babysitting" and the Amazons from "The Slice Girls" are all monsters that use sex appeal to lure their prey.
* The Sirens are like an auditory version of the Gorgons, as they lure sailors to their death with their song.
* the Siren. She seems beautiful and promises to satisfy all of Dante's desires, but that goes to Hell when a saintly lady appears. She alerts Dante's mentor to the siren and he tears her clothing off while keeping his eyes trained on the saintly lady. Without her clothing, the Siren can no longer hide her hideous stench, which immediately awakens Dante from his nightmare.
* The Sirens' necklaces, in addition to massively increasing their power, also give them
* The Sirens of Titan The actual person in question is amused by the fabrication.
* The Sirens seem to have something like this, too. When Percy (who can't hear them) sees them, their human heads are shifting to all the people he most wants to see,
* The Sirens share the same type of immortality as the Chaos Six, due to their gems being artificial Elements of Chaos. As a plus, they've intentionally enchanted them in such a way that they
* The sirens which Marina wards off at one point are this as well, being feminine-looking, yet sinister water elementals with
* The Siren was an attractive woman who seduced married men and then burned them to death, along with their wives.
* The Sirius Island arc introduces two spells: Fairy Sphere, a defensive spell that Mavis seals Fairy Tail inside to protect them from Acnologia on Sirius Island; and Magilty Sense, Merudy's signature magic, which she reveals earlier in the final arc can multiply other people's power. Incidentally, both spells require a deep, emotional bond between others to be properly cast.
* The Sissy Duckling are very different. Elmer has upright head feathers in the book but a mop-top in the special.
* The Sissy Duckling ends up shot by hunters while trying to go south. There's no blood or even any sign of injury.
* The Sissy Duckling is about an effeminate duckling named Elmer. His father is not supportive, but his mother doesn't care if her son is different from the other drakes. Elmer's dad tries to get him into baseball but Elmer can't hit the ball. Elmer finally gets the respect of his father and the rest of the flock after he saves his father after he's shot by a hunter.
* The Sisterhood of Karn attempts to execute the Doctor by burning him at the stake in
* The Sisterhood of Night: Once Emily makes her accusations, some friends do too, until it blows up into twenty three supposed victims coming forward.
* The Sisterhood of the Traveling Pants after she steps out to spend time with Kostas to show that she's now open to love.
* The Sisterhood of the Traveling Pants: Albert, the father of Carmen, who divorced her mother Christina and then remarried with Lydia, was a lot more religiously praticant than with his former wife, being observed praying by Carmen.
* The Sisterhood of the Traveling Pants; Bledel surprised fellow Latina actress America Ferrera when she spoke Spanish to an interviewer.
* The Sisterhood of the Traveling Pants has Lena's father, who revokes his financial support for her to study art in college when he finds out her summer drawing class involves nude models.
* The Sisterhood of the Traveling Pants series. Her father has been keeping and hiding all the letters her grandmother has sent her over the years.
* The Sisterhood of the Traveling Pants, Shy and beautiful Lena and Carmen, the writer.
* The Sisterhood of the Traveling Pants who's with Christina when she gives birth.)
* The Sisterhood Of The Travelling Pants was originally given an ages nine and up rating from Common Sense Media, though the content (which includes references to age-inappropriate relationships, suicide, and terminal illness) would, in most viewers' eyes, be considered too heavy for a nine-year-old. It is now listed as

appropriate for ages 12 and up for these reasons.
* The sisters (and Leo) use a spell to this effect in season eight of
* The Sisters Brothers — French-Belgian-Romanian-Spanish-American coproduction.
* The Sisters Brothers; not only are they the only attendees, but Eli punches the deceased to make sure he’s really dead.
* The Sisters Doo. Also, come 2015, he's going to add a TSD sequel to that verse, as well as a story starring Dinky.
* - The Sister's flashback uses an old cartoon, like Scooby Doo kind of style.
* The Sisters Grimm as he suspects she tries to kiss him). She lampshades it, recalling that she had only practiced it once before that (on a doll at school) and got the lowest grade at that.
* The Sisters Grimm Expect him to burp and fart whenever he makes an appearance in each book.
* The Sisters Grimm, Little Red Riding Hood draws pictures of the family that she use to have before she went mad. At first, they look normal, cheerful and bright. Then, the pictures slowly become darker, until the only colors she used were black and red.
* The Sisters Grimm, Sabrina's wedding is crashed by Puck. Wouldn't apply, except that the epilogue shows that she and Puck now have two kids together. Ouch for her would-be husband, Bradley, whom we never hear of again.
* The Sisters Grimm series: Sabrina, the self-proclaimed "Queen of the Sneaks" and her sister Daphne.
* The Sisters Grimm: The elder sister and the grandmother have a conversation of the second type because of how loud the rattletrap of a car is.
* The sisters Helen and Clytemnestra of Sparta married the brothers Menelaus and Agamemnon of Mycenae. The resulting children were double first cousins, and two of them - Helen and Menelaus's daughter Hermione and Clytemnestra and Agamemnon's son Orestes - were eventually married in turn.
* The Sisters Hospitaller of the Imperium. While their focus is primarily on medical support, they are also skilled at torture. The Ecclesiarchy sourcebook for
* The Sisters of Battle field units of Sisters Repentia, who have decided to atone for some real or imagined failure by stripping down to
* The Sisters of Battle have the Exorcist tank, a mobile church organ on a tank chassis that plays inspiring hymns and shoots missiles at enemies.
* The Sisters of Battle may have the best, though. The Exorcist tank is a missile launch platform that looks a lot like an organ. The missiles are launched by a Battle Sister in front of a keyboard, playing devotional music that also causes explosions. The unit also features one of the more outrageous walker units, the Penitent Engine. Much like a Dreadnought, the Penitent Engine is controlled by a living user. Unlike a Dreadnought, a Penitent Engine pilot is fully alive, conscious, and unarmored; they are essentially a big, nasty suicide unit. They are also hardwired to the engine in a way that is sometimes described as "crucifixion." The only way out for them is death, which is actually fairly standard for WH40k.
* The Sisters of Battle started as the Brides of the Emperor and were the personal bodyguards to Goge Vandire sometime during the Age of Apostasy. The Adeptus Custodes would later convince the head of the Brides that Vandire was corrupt and needed to die. In atonement for assisting the man who started the Age of Apostasy, they reformed themselves into the Sisters of Battle, due to the literal wording in the subsequent decree that the Ecclesiarchy (where Vandire started) could not have "men under arms".
* the Sisters of Battle. The other Battle Sisters positively dress in one of the most concealing examples of female armour of any fictional setting, more often than not with a helmet.
* The Sisters of Battle. There is an entire army of nuns who go around armed with flamethrowers, chainsaw-swords and guns that fire explosive rounds the size of a human fist, and wear
* The Sisters of Battle use the Immolator, which is also built on the Rhino chassis and usually features turret-mounted flamers - essentially, a Razorback

modded as a chapel. They also field the Reppressor, an even more awesome version of the basic Rhino, with expanded transport capacity, a flamethrower miniturret, and a massive bulldozer blade.
* The Sisters of Death are the source of the Dark Judges' zombified state after they befriended the young Judge Death.
* The sisters offering teleportation service in the Pirate chapter of the second
* The Sisters of Mercy... after making which lead the band to a falling out and lineup overhaul.
* The Sisters of Mercy. Doktor runs the online advice column on the Sisters' website. He's also a drum machine.
* The Sisters of Mercy, in order to dissolve his Warner contract, released a "techno without drums" album under a quasi-side project called SSV-NSMABAAOTWMODAACOTIATW, short for Screw Shareholder Value - Not So Much A Band As Another Opportunity To Waste Money On Drugs And Ammunition courtesy Of The Idiots At Time Warner.
* The Sisters of Orion, Yon'ro, the other Shanda'ryn hybrids, Pleiades and the Alteriens in their true form all fit this trope nicely. They are important characters in Adam R. Brown's sci-fi series,
* The Sisters of Perpetual Gestation (a quasi-religious order of nuns whose stated goal is
* The Sisters of Silence, are a military force composed entirely of blanks who are tasked with hunting down and detaining psykers. They have a few of the special rules and wargear of the psyker hunting Culexus Assassins, but are somewhat more generalized for combat than just for eliminating psykers.
* The Sisters of Silence, of the Great Crusade and Horus Heresy era, were composed entirely of women that were
* The sisters (Prue in particular) in always run into difficulty when trying to get their heads around the concept of tenses when time travel is involved.
* The sisters' relationship with Tydal. In the beginning comments are made that while he raised them they see him more as a big brother. But the end of the second season Celestia commonly refers to him as her father and Tydal tells Tirek that they are his adopted daughters.
* The Sisters themselves have this dynamic with their "administrator", Last Order, who is physically younger than they are, and is hyperactive, impulsive, and can sometimes be rather irritating. Witness Misaka 10032's reaction to Last Order stealing her electro-vision goggles — she cocks her Airsoft gun and goes on the hunt.
* The Sisters, you play through the entire game only to find out that your character is a murderer, and the girl who kills you during the ending is actually the ghost of your victim getting revenge.
* The sister unit of the SAS, The SASR, better known as the Australian SAS, has similar methods. To date, more people have died in training for the SASR than they have for combat. Admittedly this includes 15 people dying in a helicopter crash, but it still stands.
* The Sister Verse and the Talons of Ruin has Jin and the Ring cult in act 1, who are implied to be this, and serve the interests of the Lord in White. They acquired their status by being the scouting party of a far more advanced civilization from a parallel universe.
* The Sister Verse and the Talons of Ruin has John, who was abused by his father at the request of the villain in exchange for wealth and immortality. It continues to haunt him throughout the story and is the reason most of his hallucinations have an uncomfortable, sexual inclination.
* The Sister Verse and the Talons of Ruin has the blood of the Astral Lords, which grants anyone it's injected into rapid regeneration, but if they don't have anything stabilizing them, they are transformed into mindless bird monsters who live in constant, excruciating pain.
* The Sister Verse and the Talons of Ruin has the citizens of the fifth sphere, who systematically kill off anybody with unnatural abilities, even at the expense of thousands of civilian casualties.

* The Sister Verse and the Talons of Ruin has the Crest, who created the Dreadlands and most of its infrastructure before they were annihilated by the Lord in White and its darklings.
* The Sister Verse and the Talons of Ruin has the eponymous Sister Verse, a book that eats any reality it is written in and assimilates it into its stories.
* The Sister Verse and the Talons of Ruin has this as the eventual consequence of John and Diana's story. As soon as Diana becomes an ascendant, her reality and everyone in it will probably cease to exist, or be reinserted into another reality.
* The Sister Verse and the Talons of Ruin has this in John's pre-dystopia world, though given his mental state, how much of it is actually real is up for debate.
* The Sister Verse and the Talons of Ruin is about an eldritch god that torments people by trapping them in a sadistic cycle of reincarnation until they are completely broken inside.
* The Sister Verse and the Talons of Ruin is about a sentient book that absorbs any reality that it is written in, devouring the souls of its occupants and turning them into mindless slaves.
* The Sister Verse and the Talons of Ruin is this, being told in part through visual metaphors stemming from the protagonist's constant hallucinations.
* The Sister Verse and the Talons of Ruin is trapped in an endless hallucination that mirrors their thoughts and fears. John has become particularly unhinged and paranoid as a result of this.
* The Sister Verse and the Talons of Ruin or hallucinations, and seemingly insignificant details are typically quite important later on.
* The Sister Verse and the Talons of Ruin reads like a fever dream. The world reflects the fears of all the characters in the most bizarre way possible, and things continue to unravel the further they go, typically ending in a forest made of liquid meat that surrounds a black hole shaped like a willow with teeth.
* The Sister Verse and the Talons of Ruin, so that it can enter the world and ascend humanity. Any subsequent logs describe the world-ending results of that decision.
* The Sister Verse and the Talons of Ruin, the Lord in White's more accurate incarnations usually have armored tentacles covered in man-sized fangs, one of which obliterates the space station of the Merlin project. Its humanoid avatar can also summon them through a portal, which it uses in the final fight against John.
* The Sister Verse and the Talons of Ruin, the protagonist is reincarnated whenever he dies, for the purpose of slowly overwriting his identity.
* The Sister Verse and the Talons of Ruin, this is what people think is initially happening, until the plague refuses to spread, and they realize that it's a conscious entity possessing people.
* The Sister Verse and the Talons of Ruin, this seems to be the Lord in White's general view of humanity, and if the events of the story are any indication, it's not too far off.
* The Sister Verse and the Talons of Ruin uses this often. Early in the first act, the protagonist visits an address in search of a killer. The killer, revealed to the audience in a previous scene, answers the door, and impersonates the owner of the home while the real owner is tied up in the basement.
* The Sister Verse and the Talons of Ruin, who was estimated to have an age several times the heat death point of the universe.
* The Sister Verse and the Talons of Ruin with stolen hovercrafts and energy weapons.
* The sister who was to receive it dies during the operation. Naturally, they assume someone else could get it, but the woman wants it back, and um, she wants to eat it. She's sane, it's just that her grieving rituals are not western.
* The site also has heartwarming SCP entities like 999 (a tickle loving blob buddy) and 2295, a healing teddy bear made by a grandmother for her relative.
* the site: "Best Falafel In Western Montana Kind Of A Hollow Victory"
* The site had a game based on the See 'n Say toy where a main character would speak if the pointer landed on the corresponding picture. The game was revamped in 2007 to a generic toy with buttons making the characters say the same lines.

According to some sources, Mattel sent the Brothers Chaps a cease-and-desist order over the game, resulting in the change. Even the Homestar Runner Wiki was requested to scrub all references to the original version. Prior to Adobe ending support for Flash, the original See 'n Say game could be accessed as a secret page. Playthroughs have since been uploaded to YouTube.
* The site has an article on how they work, and on the research that went into the "nuclear shaped charges" (codenamed Casaba Howitzer) that make it go. A tungsten "pancake" results in a beam of plasma (great if you want to use nukes in space, not so much if you want to use them to fly with). Conversely, a styrofoam (yes, really) "cigar" results in a wide wave of plasma, focusing 80% of the bomb's energy onto the pusher plate.
* The site has two articles about "Satirists Attacked by People Who Totally Missed the Point,"
* The site is banned in Saudi Arabia and the United Arab Emirates. And he's proud of it. He even once traveled to Dubai to verify that his site is indeed banned there and to litter printouts of his website around the city to taunt the ban. (Turns out he was banned for a technicality, not content, but he thinks it still counts.) He also made a dick out of their largest skyscraper.
* The site itself hadn't had new content since December of 2010 until the April Fool's Day special was released in 2014.
* The site TLWiki.org used to host info about many fantranslation projects within the genre; while the domain has since expired (making it unlikely that their unfinished projects will be completed), the site can still be viewed in the
* The Sith Academy. One of the running jokes/subplots was that use of the Dark Side always results in some visible sign of corruption for the user; for Sidious, it was his appearance, while for Maul it was his surroundings - just living in a room for a day or so could cause it to become a disaster area. There were at least two on-screen mentions (possibly three) where the contents of his fridge not only became alive and developed sentience, but actually developed whole civilizations; it was implied that this ended when he started actually cooking, in an effort to kill Sidious with cholesterol.
* The Sith come in all colors, genders, and species. Emperor Palpatine himself couldn't care less about it (considering everyone to be equally inferior to him personally), but encouraged humans' prejudice towards other species anyway to help maintain his power since humans are the majority of the Empire's population and the Core Worlds elite tend to be human males who actually are extremely prejudiced towards both aliens and, to a significantly lesser extent, Outer Rims humans and near-humans. Thus, the Empire officially was pretty much human only, with aliens being at best shuffled off to insignificant roles and at worst enslaved and genocided, but Palpatine would make (almost always secret) exceptions for aliens whose skills were particularly useful to him.
* The Sith Emperor, which would allow him to survive until the end of the universe and into the next.
* The Sith have an age-old rule that there can be only two Sith at any given time — a master and an apprentice. They break this rule all the time, especially in the
* The Sith Inquisitor PC, no matter their species, is revealed at the end of their Dromund Kaas arc to be a descendant of the ancient Sith Lord Aloysius Kallig, whose Force ghost is human-shaped. Twi'leks and Zabraks are among the free-to-play race options for this class.
* The Sith Inquisitor runs into multiple of these. On Dromund Kaas their master Lord Zash orders them to assassinate a rival, Darth Skotia. After Zash
* The Sith Lords campaigns, and the game visits several locations from the Mandalorian Wars.
* The Sith Lords (of sorts) they have in that voice — describing the statement that is to follow. With adjectives like "Insincere" and nouns like "Fabrication".
* The Sith Lords Restored Content Mod, along with over a thousand bugfixes. The mod was years in the making, and was finally completed in July 2012.

* The Sith Warrior already starts out with an enemy: Vemrin. While the Inquisitor competes in a group, their most fierce rival is Ffon, whom the Overseer showers with endless praise.
* The Sith Warrior has an opportunity to pull one of these in a cutscene when a group of Selonians on Corellia demand you surrender your lightsaber. You can pretend to comply, only to activate it when one comes close to take it and run them through.
* The Sith Warrior PC can espouse this kind of attitude as well, seeking out battle both to achieve their objectives and as part of a code of honor. Other Sith they interact with often do likewise: one apprentice encountered on Nar Shaddaa can even commit
* The Sith went so far as to destroy the entire Sith leadership because they had stopped the repeated betrayal that usually only weakened the Sith as a whole.
* The Sith woman Githany, of the Old Republic era, also utilised a lightwhip quite effectively. There have been a few others, too.
* The situational variant of this is used in the first movie. David Bowman travels through the Star Gate, which we presume is even more mind-blowing in the flesh, so to speak, and ends up... in a hotel room. Not only that: in the novel, Dave notices that it's a bad rendition of a hotel room. It might look okay on the surface, but he quickly finds out that he can't open any drawers, the books are painted on the bookcase and all food and drink containers, such as cereal box and beer cans, are filled with some spicy, blue stuff that smells like macaroons. It's as if someone was trying to imitate a hotel room without understanding it. He finally finds out why when he turns on the TV and sees the same room in an old soap opera on the screen. The aliens had based the room on what they had learned from
* The situation between Billy Fives and Scoot Andrews when Ring Warriors returned in 2011. The two polar opposites had been feuding for years, for the last six years they had been trying unsuccessfully to retire one another come 2012. So they decided to try something more productive and team up, but even after successfully winning the Global
* The situation doesn't appear to be very much better in the prequel, what with the whole "the entire of Manhattan Island is now one big concentration camp" thing, but other background details suggest the US government is
* The situation eventually turns around completely after Itachi is suspected of murdering Shisui
* The situation in Laos deserves a particular mention; it was a real-life
* The situation in Silver Age superhero teams with just one female member was often somewhat comparable, although here at least the token female had a choice. But what really were the odds that e. g.
* The situation in Syria evolved into this by 2013 due to infighting among the rebels: the sides were the Syrian Arab Republic government backed by Iran, the "
* The situation is downplayed, but still very much present between their best friends Lardo and Shitty, who overflow with
* The situation is even more tenuous after the end of the Covenant War; as the UNSC struggles to reassert authority over its pre-war domain, many colonies have become effectively independent from Earth, due to
* The situation is much the same for Klingon and Romulan characters, although in the Romulan case there isn't actually any
* The situation is not that romantic but he needed to do it in order to calm her down.
* The situation is repeated in "Inqueling" after Inque's daughter Deanna doublecrosses her mother. In an echo of the previous scene with Paxton Powers, Batman turns up to warn Deanna not to get too comfortable: "She's been dead before." Sure enough, Inque reappears in "The Call, Part 1," proving Terry right. (Deanna's fate is never mentioned. She's last seen reacting fearfully to every shadow, as her shapeshifting mother could be literally anywhere.) The storyline with Deanna is actually resolved in the comics, where an origin of Inque is also revealed. In the comic story,
* The situation is reversed in "As You Were", when Riley unexpetedly returns with

his new wife Samantha. Even though Buffy is utterly jealous of Sam, she admits that she can't bring herself to hate her because she's nice and sweet. Buffy and Riley depart in better terms at the end.
* The situation is reversed in "Fragile Balance", where an infuriated "Daniel!" from a considerably younger version of Jack is taken as confirmation of his identity by Daniel (the two characters usually adopt a particular tone when speaking to each other). The actor who played Young Jack should have gotten an award for the brilliant job he did of mimicking O'Neill's mannerisms and speech patterns.
* The situation proves that both Jackrum and Blouse are good and useful in their own ways. Jackrum because he defies the rules when they're too stupid to follow, and Blouse because he knows them and only listens to the sensible ones.
* The Six Ancestors, the first monsters Alipheese created, in turn became the basis and ancestral line through which all monsters can trace their original back to.
* the six-book, Adams writes about how the whole story came to be. The anecdote concludes with a section called "How To Leave Earth." Adams suggests calling (in order) NASA, The White House, The Kremlin, and The Vatican, giving working phone numbers for each. What they all think of prank calls from H2G2 fans is unrecorded.
* The Six Bullerby Children, Bosse gets a pet chick who he names Albert, but she turns out to be a hen so he renames her Albertina.
* The Six Cats Parade, Rico is the only black cat (and the only without white color) of the group, in contrast to his three black-and-white and one Siamese siblings and his mother, who is a gray and white cat.
* The Six-Day War was this for the Arab world. Not only had several invading armies been beaten by the Israelis, but Israel ended up in control of eastern Jerusalem (with the holy sites sacred to all the Abrahamic religions), the West Bank, the Gaza Strip, the Golan Heights, and the Sinai Peninsula. The fact that a small, outnumbered, and surrounded country could do this was considered a disaster by the Arabs. However, in the 1973 war, the Arabs (especially Egypt) gave a better account of themselves; while the Israelis managed to maneuver themselves into superior positions during the late stages, it could no longer inflict another catastrophe as the Six-Day War on their enemies, lessening the legacy of that defeat. Israel eventually returned the Sinai Peninsula back to Egypt, though it still keeps the other areas.
* the Six Degrees of Wikipedia, has been coded that will allow you to put in two pages in Wikipedia, and find the shortest path from one to the other. thus taking a Wiki Walk for you.
* "The Six Fingers of Time", the protagonist can move sixty times faster than other people, to the same effect. He uses his skill for all kinds of pranks, including the creepy one of kissing and fondling a girl he likes.
* The Six Flags commercials featuring "Mr. Six" used an instrumental version of "We Like to Party" by the Vengaboys.
* The Six Flags park in New Orleans and parts of it were cleaned up and some of the rides were re-wired to light up and have since fallen into an even worse state.
* The Six Heroes, at least those who are alive, are well-known historic figures that defeated the Black Beast and saved humanity from extinction. Anyone who recognizes them as a member of the Six Heroes either shows deep reverence or even deeper fear towards them.
* The six-inch-tall Wee Mad Arthur introduces himself with "Down here, bigjobs".
* The Six Million Dollar Man, an elderly man sees Steve sprinting across a field at his top speed. He then turns to his wife and says he needs a new pair of glasses.
* The Six Million Dollar Man, a worker was moving a "hanged man" prop when its arm came off—revealing that it was an actual human corpse—that of 19th century criminal Elmer McCurdy, to be exact. When the body was buried, cement was poured on the grave to keep the body from being stolen.
* The Six Million Dollar Man (despite it being named on the end credits), and the book has become almost entirely forgotten.
* The Six Million Dollar Man embodied this in some ways (though Steve did have some

problems his bionics could not solve). Interestingly, the other in-universe characters provided some counterpoint, there was another bionic man who had turned out to be psychologically unable to handle it, and Steve's lady-love Jaime Sommmers had recurring problems of bionic rejection that made her superpowers something of a double-edged blessing.
* The Six Million Dollar Man episode "Sharks". A villain group has learned how to train and control sharks.
* The Six Million Dollar Man episode, "The Price of Liberty" (1975), the Liberty Bell is stolen, and rigged with three time bombs by an embittered explosives expert. Steve Austin and another bomb expert — a convicted criminal serving a prison sentence — disarm the bomb. Short on time, the convict suggests connecting wires to short out the timing mechanism, and Austin remembers the bomber's last dying words: Red, White, and Blue. They connect the red and white wires, and then Austin has a hunch that "blue" was deliberately misleading, "his final stab at the country he'd grown to hate," and correctly selects the yellow wire instead.
* The Six Million Dollar Man episode, "The Ultimate Impostor," Steve Austin's friend Joe Patton is a POW whose mind has been wiped to a blank slate by chemicals. This makes him the perfect test subject for a new OSI procedure to create the ultimate agent by downloading information and skills directly into his brain.
* The Six Million Dollar Man, extreme cold could make the bionic heroes' parts stop working until they warmed back up.
* The Six Million Dollar Man had a few, short standardized sequences for some of their main characters' bionic powers — the closeup on Steve's eye with a sound effect to indicate he was using its special abilities, for example.
* The Six Million Dollar Man, had his bionics "throttled back" to normal human level after his initial appearance.
* The Six Million Dollar Man had Jaimie Sommers have a similar problem when her body started rejecting her implants, causing her maddening pain that drove her berserk and forcing Steve Austin to restrain her for emergency surgery that she seemingly didn't survive.
* The Six Million Dollar Man has a thermal imager in his bionic eye, which he used on occasion starting in the 2nd or 3rd season.
* The Six Million Dollar Man has Steve Austin crimp the barrel of a mook's gun closed with his bionic fingers. The mook doesn't notice this and, despite Austin warning him not to fire, he shoots and nails himself (though it's unclear whether he actually shoots himself or gets knocked out by backfire).
* The Six Million Dollar Man in which the woman of the episode goes waist-deep into mud and in the next scene is clean.
* The Six Million Dollar Man itself debuted in a 9 pm Friday timeslot, and was a hit.
* The Six Million Dollar Man — as Martini as the 70s TV series budget allowed.
* The Six Million Dollar Man of "red, white, and blue" to Steve. When Steve lifts the Bell for a bomb tech to disarm the bomb, there are FOUR wires — red, white, blue, and green. Steve figures out that the bomber WANTED the Bell to be destroyed, so he tells the tech to cut the green wire — which disarms it.
* The Six Million Dollar Man, only five or six people in history have been fitted with bionic limbs, despite the thousands of amputees and paraplegics that could benefit from such technology. The excuses are that (A) bionic parts are horrifically expensive, and (B) the technology is still a closely-guarded government secret.
* The Six Million Dollar Man, Oscar Goldman is introduced to a girl who claims to be able to read minds. She demonstrates her power by telling Oscar exactly what he's thinking, and the surprised Oscar, to show just how surprised he is, whips off his glasses.
* The Six Million Dollar Man Steve Austin action figure, which is featured in the story as a bionic voodoo doll; anything done to the doll inexplicably happens to Steve.

* The Six Million Dollar Man. Steve Austin gets the scientists who rebuilt him to do the same to his girlfriend, which they do. The problem is that in addition to the standard cybernetics, they give her padded knees, larger breasts, and a hand that automatically does a jerking motion (for "polishing things"). She's naturally angry and delivers a beatdown to Steve and the scientists, leaving them as nothing more than heads. They ask the people attending to them if they could be rebuilt, but they just get laughed at because the question is considered absurd, and they're told that they won't live through the night.
* The Six Million Dollar Man. The two superpowered heroes usually wear regular street clothes. Steve Austin does possess an iconic red tracksuit that he wears in occasional episodes, and Jaime Sommers gets to don a wrestling costume (with tights) in one episode, but that's about it.
* The Six Million Dollar Man to avoid confusion with the later, but better-known, character.
* The Six Million Dollar Man, was a continuation of the theme, but less explicitly stated.
* The Six Million Dollar Man, was employed by the O.S.I. (Office of Scientific Intelligence).
* "The Six Million Dollar Mon", which involves Hermes gradually replacing his body parts with bionic prosthetics, has a scene where he uses his new arm to help Professor Farnsworth retrieve his false teeth after they fell down the drain. Farnsworth thanks Hermes after having his dentures put in his mouth
* : The "Six Minute War" came to an end when a missed shot wipes out a colony of fifty thousand people.
* The Six Paths of Pain could also count as Artificial Zombies; they are corpses that
* The Six Sacred Stones in which a convoy is chasing a 747 down an Egyptian highway.
* The six scientists of Big Mountain in the "Old World Blues" DLC are all little more than a
* The Six Shooter: In "Ben Scofield", Britt and Sheriff Scofield follow and blood trail by the outlaw who robbed the Wells Fargo office, but was winged by a shotgun blast as he escaped.
* The Six Shooter indicates that the whole town of Lead Creek has mocked and ridiculed Jenny her entire life for being unnattractive, tall and clumsy. And the sheriff and his men don't see anything wrong with this; laughing as they remember some of the jokes played on her. Hearing this, Britt suddenly understands why Jenny has chosen to live in a remote cabin far out of town.
* The Six StatsThe six attributes that help or hinder you in gameplay.
* "The Six Swans," a girl's six brothers are all turned into swans and the only way she can restore them to normal is by knitting shirts from asters for them and never speaking or laughing for six full years. She manages to finish all of the shirts in time...except for one, which is missing a sleeve. This causes one of the brothers to still have a swan wing.
* The Six Swans", the heroine must not speak for six years and make shirts out of star-flowers to free them, and nearly gets burned as a witch for her strange behavior.
* The Six Swans. They could turn back into humans once an evening, but would turn into swans again after a short time.
* The Sixteen-Dollar Shooter, when Deputy Brad Counter leaves a combat pistol shooting competition and walks straight into an armed showdown with four Mexican terrorists.
* The sixteenth episode of the second season and the final episode both aired on the sixteenth of the month, while the official soundtrack will also be released on the sixteenth of the month.
* The sixth (and so far, last one) on the season 35 episode hosted by Ryan Philippe revealed that all four men
* the sixth Animorph, David, turns traitor there's this little gem from Rachel:
* The Six Thatchers, there is a brief reference to one of the busts belonging to a

Miss Orrie Harker, counterpart to the original's Horace Harker.
* The Sixth Battle (1992): South Africa vs. it's neighbouring states and the Eurasian Republic (a largely reconstituted USSR).
* The Sixth Battle, a Eurasian character mentally notes that while badgers are ferocious carnivores, they are prized for their pelts.
* The Sixth Battle and keeps getting waved off. It's not the plane that's in bad condition— it's the pilot, who, excessively tired, makes a fatal error and crashes into the ski-ramp.
* The Sixth Battle. As F-14s and A-6s feature a fair bit, you get "four in two" combos as well.
* The sixth book clearly states that the English Prime Minister, for one, has had
* The Sixth Day routed to an automated system. Not that it would have helped the main character, but you'd think reporting an in-progress kidnapping would be easier.
* The Sixth Doctor also does at the very end of "The Caves of Androzani", as delivers the line "Change my dear, and it seems not a moment too soon."
* The Sixth Doctor and Mr. Merryweather have a song about this in the
* The Sixth Doctor at one point went on a tirade against the rest of the Time Lords, claiming that rather than fighting evil by exploring the rest of the universe he should have stayed behind and opposed the corruption that had become so prevalent among them.
* The Sixth Doctor goes a little bit nutty after his regeneration in
* The Sixth Doctor has a totally different personality in the 80s comics featuring him because they switched to using him before his on-screen characterisation was known, had to invent a personality for him out of educated guesswork, and decided to keep running with that personality even after it was
* The Sixth Doctor's era cast the Doctor's wildly-inconsistent personalities into new light by revealing a possible future incarnation, a rules-obsessed
* The Sixth Doctor's talent for sounding like he swallowed a thesaurus and
* The Sixth Doctor took this to ridiculous lengths — and in Pip and Jane Baker scripts, most
* The sixth edition Imperial Guard codex suggests that particularly incompetent commanders eventually wind up meeting a Commissar's bolt round, no matter their social rank.
* The sixth episode of series three, entitled "Special Christmas Show", which starts with an announcement that it cannot be opened before Christmas;
* The Sixth Espada Guto makes some banter with Sternritter "T" Fleur de Lis about how impressive her Vollstandig is before activating his own Resurreccion, and the sudden release of power protects him from her attempted counterattack.
* the sixth game features a very serious example as a major plot point. One of the most important witnesses is Sorin Sprocket, the defendant's fiancé, who suffers from severe anterograde amnesia after being in a nigh fatal car crash that killed his sister. Because of this he meticulously writes down everything that happens in his notebook so as not to forget it when he wakes up the next day. When it's discovered that the notebook might have been tampered with he understandably panics, frantically flipping through the notebook trying to figure out which of his memories are real and which are fake.
* The Sixth Generation of Console Video Games and AntDude have done many reviews of these games.
* the sixth generation (which correctly only gave them out to JGSDF soldiers in the Kokubo Sosho level).
* The Sixth Gun at the Novice level, as well as making the casting cheaper per zombie (more power can be paid to increase the duration).
* The Sixth Gun has the Six, which have been reborn in every age of the setting. Built to free man from an enemy that is no longer there, the Six were known to early man as clubs, to the Knights Templar as swords, to other ages as crossbows and matchlock muskets. In the age of the comic, they are .44 revolvers due to the Western setting.
* the sixth installment. They were usually less central to the overall plot in

Baum's books than Thompson's, however. The main problem people had with Thompson’s usage was she often used it to focus on her own original characters at the expense of the established Oz characters created by Baum, who would be relegated to minor roles if they appeared in the plot at all; but again, Baum sometimes did this himself.
* The Sixth Men — descendants of humans who had fled to Venus following Earth's destruction — became obsessed with flight, and, taking advantage of Venus's lighter gravity, ended up genetically engineering their own winged successors, the Seventh Men. Like bats, the Seventh Men's wings were part of their arms and hands, rather than being separate limbs, but they kept two fingers (thumb and index) reserved for use as actual fingers.
* The sixth movie features the destruction of London's Millennium Bridge, which shouldn't exist yet it being, you know,
* The sixth season built up to wrapping up the various plot-lines: Elliott was getting married to Keith, who brought out the best in her; Turk and Carla had a lovely family set up with their baby daughter, Izzy, and the same was true of Dr Cox and Jordan with their kids, Jack and Jennifer Dylan; JD was as neurotic as ever, but mostly unchanged and dealing with the alienation that his unlikeable habits led to; Laverne had been
* The sixth season finale involves Starlight Glimmer, Trixie, Thorax, and Discord infiltrating the Changeling Kingdom to save their friends. Discord is captured first when a group of changelings lead him into a trap. Trixie sacrifices herself to keep another changeling group at bay and buy Starlight and Thorax time. Thorax (disguised as Starlight) is captured in the throne room, leaving Starlight alone on the receiving end of a
* The sixth season plays right into this by having Jack stop the terrorists seven hours early. The plot then changes to focus on the Chinese holding Jack's assumed dead girlfriend hostage.
* The Sixth Sense, a character that was only on-screen for a couple of minutes early in the film.
* The Sixth Sense avoids using the words "medium" and "psychic" although clearly the young Cole could be described as either. However, the ghosts of the film are called ghosts several times.
* The Sixth Sense, Bruce Willis's character discovers the ghosts actually exist when he can hear them on a tape recorder.
* The Sixth Sense, Cole Sear is frequently harassed by the spirits of the dead, whom only he can see and hear (and get mauled by, occasionally). Since he's only about ten years old, he is understandably freaked out by this.
* The Sixth Sense cuts to a fake cough syrup ad. The main character throws a shoe at the television to turn it off.
* The Sixth Sense, Doctor Malcolm Crowe believes that Cole Sear's problems stem from some sort of schizoaffective disorder... until he encounters something that turns his skepticism on its head.
* The Sixth Sense from Toni Collette. And yet it doesn't ruin the part where Cole gives her a message from Grandma which makes the scene a Heartwarming Moment.
* The Sixth Sense, he just taps the spot and claims the coin moved there. It actually works and convinces Cole that he has nothing to fear from Malcolm. Later Cole is seen doing the same trick to another kid, who just dismisses it as "stupid."
* The Sixth Sense). In many instances, hour-long episodes have been edited down to fit half-hour time slots, making the plots very difficult to follow.
* The Sixth Sense involved Cole encountering a ghost girl in a blanket fort he built in his room.
* The Sixth Sense is a popular example with Bruce Willis's character being a ghost after being shot at the end of the opening scene.
* The Sixth Sense. Kyra's mother is often assumed by many viewers to be her stepmother, despite the film never saying it, presumably because of this trope's influence. For reference - she poisoned her daughter to make her sick; with the elder daughter dead, she has now moved on to doing the same to the younger one. The

script merely calls her 'Kyra's Mother'.
* The Sixth Sense that he could handle non-action dramatic roles just as well.
* The Sixth Sense. The film concludes with Malcolm saying goodbye to his wife and moving on to the afterlife after he finally comes to terms with his fate.
* The Sixth Sense The first ghost to whom young Haley Joel speaks specifically tells him what she wants him to do, but most others don't even know they're dead and so have no effing clue what they're doing or want other than a vague jealousy of the living that manifests as hurting Haley. And rummaging through kitchen pantries, apparently.
* The Sixth Sense, there is an echo of the boy saying "I see people". The line "I see people" was not used in the final cut (he only says "I see dead people").
* The Sixth Sense: The surviving daughter of the Munchausen's-Syndrome-by-Proxy mother is shown on a swing during the funeral.
* The Sixth Sense turns out to be the "character talks to someone and doesn't realize they can't hear him" variety of this.
* The Sixth World, Humans must colonize Mars because Earth is unusable.
* The Sixth World, The Navajo general is creeped out by the spaceship corn, but everyone tells him it's been genetically-modified for this trip and it will work great.
* The Sixth World, The Omnicorn Corporation colonizes Mars with their special breed of corn.
* The size changing as he gets angrier and stronger thing is depending on the writer and the artist; some have his height stay consistent once he transforms, though this itself can be an informed ability as an artist will alter his height between panels for various reasons. Officially the Hulk's transformed height is just under eight feet tall. He'll often be shown as over ten, but that's usually stylistic or for dramatic effect.
* The size difference between animals appears to have decreased between books. The original had Cluny vs. Matthias and Cluny was far larger, and Constance was even bigger than he was, indicating a roughly accurate size difference that continued through the early books. About halfway through the series or so the difference seems to have changed from a normal person fighting a T. Rex to a smallish person fighting a tiger or something. Actual physical strength doesn't appear to be different except in extreme cases like badgers etc.
* The size difference between Oberon and Titania is less extreme but noticeable enough to count as well.
* The size of a keyboard can make it awkward to use for a while until your muscle memory gets used to it. For example, several of Logitech's gaming keyboards have a column of macro buttons left of the main keyboard area. You may subconsciously place your hands slightly right of where they should be because your brain thinks this column of macro keys are normal keys and it has been using this as an anchor point on where to line up your hands.
* the size of a motorcycle Of course, Harry only carries a firearm as a backup and does most of his combat with magic.
* The size of the Thieves' Guild is also justifiable in that they do work throughout the entirety of Skyrim, not just in Riften.
* The size of the United States was increased some 20% in 1867 when the Russians, believing their territory in Alaska to no longer be economically productive, sold Alaska to the United States. In part because Russia was on rather good terms with the US at the time, and in part simply to spite Britain, which it had lost the Crimean War to a few years prior.
* The Skakdi play with it: they're naturally violent, but are capable of forming civilizations that thrive, unfortunately the Brotherhood of Makuta decided to experiment by giving them superpowers and they devolved into the violent war torn mess they are today.
* The Skakdi race (the species to which the Piraka belong) has access to elemental powers (but
* The Skakoans' homeworld has a very dense methane-based atmosphere, and need to wear full-body environmental suits on other worlds — their atmospheres,

besides being toxic, are at a much lower pressure than their internal fluids, which can have...
* The Skatalites: they were active for only 14 months (!), but churned out more than 300 singles that were influential in the development of
* The Skateboard Kid, the gang of bully skateboarders distracts a cop by pulling the head off someone in a chicken suit advertising a wing store, and attaching his car to a towing line while he deals with the chicken-suited man. When he takes off in his car, the towing line smashes into the trunk.
* The Skaven, anthropomorphic rats who live underground, constantly squabble, are disease-ridden, and don't attack anything bigger than them without having a 10-1 numerical advantage. They also reproduce like crazy and the albinos or big ones get special treatment. One of their war-machines is
* The Skaven are sneaky, conniving, selfish, cowardly, and backstabbing, and each of these ratmen would gladly sacrifice their entire race for their own hides if not for their innate fear and paranoia. However, this does not make the Skaven race weak, as their disease-resistant qualities, large numbers, and dedication to keeping themselves hidden from mankind and the other races (to the point that they are regarded as a myth even when presented with irrefutable evidence of their existence) would make them a formidable foe that could potentially overtake the world if they could just put aside their in-fighting and distrust for each other for one millisecond.
* The Skaven, as chaotic scavenging rat-men, use thin, nasty-looking blades, spears and cleavers for the most part, usually notched and rusty and dull. They also have a variety of warpstone-powered mad science weapons such as warpfire throwers, ratling guns and glass globes of poisonous gas used as grenades. Clan Eshin, the oriental clan who fight as ninjas, use traditional ninja weapons, such as throwing stars, fighting claws and flat-bladed ninja swords. Clan Pestilens, the Plague Monks, use poison gas censers as makeshift flails!
* The Skaven, but they're still deathly afraid of Nagash, the very first necromancer and the most powerful sorcerer who has ever lived (and unlived).
* The Skaven fit the trope better, they have a massive underground empire that dwarfs the Empire, and all the other Old World nations combined. They have the potential of taking over the Old World, if they would put aside their
* The Skaven has been undermining all of civilization for ages, they are arguably the most technologically advanced race, with huge amounts of
* The Skaven have a spell known as "the Dreaded Thirteenth Spell", castable only by their strongest units (Grey Seers of 4th-level wizardry and
* The Skaven love these — not only can their normal "wonder weapons" decimate their own troops, but the magic items can cause madness, burn the skin off their arms, turn them into gibbering spawn or even suck them into hell. This doesn't stop them
* The Skaven of Clan Carrion are shameless thieves, and will gladly help themselves to anything they think they can get away with filching — even within the clan, a Skaven of Clan Carrion only truly owns what he's currently clutching in his own claws.
* The Skaven of Clan Mortkin adorn themselves with the bones of their enemies in an attempt to emulate the fearsome appearance of the undead, in addition to painting their fur and armor black and white to make themselves resemble skeletons.
* The skaven of Clan Moulder specialize in breeding gigantic, ferocious monsters to sell to other clans as war monsters. One of their crowning achievements, the Brood Horror, is a huge, hairless rat larger than a tank.
* The Skaven possess numerous spells to this effect, all themed around summoning hordes of reinforcements from underground. Vermintide summons a unit of Clanrats, Pestilent Birth a unit of Plague Monks, and the Dreaded Thirteenth Spell a unit of Stormvermin.
* The Skaven see all other races as inferior, and wish to exterminate/enslave them to prove that point.
* The Skaven's Stormvermin were a somewhat rare breed of larger, stronger and braver Skaven who formed the elite guard and shock troopers. In some versions

(including the Warhammer RPG), the Stormvermin were much stronger than a normal human and had the muscle power to rival Chaos Warriors and Black Orcs.
* The Skaven's ultimate goal is to invade the surface world and kill each and every one of the "worthless" surface-dwelling races.
* The Skaven (though since the race breeds like rats, it's probably a vital form of population control).
* The Skaven Warlord Queek Headtaker is in the habit of carving trophies from the bodies of especially challenging enemies after defeating them, which he then mounts on a rack he wears on his back. The display has become quite varied over time, bearing the head of the Dwarf King Krug Ironhand, the spine, ribcage and skull of the rival Warlord Ikit Slash, the skull of the Orc Big Boss Morglum Blacktooth and the hands of Baron Albrecht Kraus of Averland. This mainly serves as a reminder to his rivals and liege lord alike of the prowess of the almighty Warlord Queek, but he's also taken to having conversations with them.
* The skeletal pirates that the Tres Horny Boys, Davenport, and Kravitz,
* The Skeleton Dance has the first skeleton jump towards the camera, which goes through its mouth and out the ribcage.
* The Skeleton Driver in "Gentlemen, Start Your Monsters" is revealed to be a robot controlled by Jimmy and Cindy.
* The Skeleton Key, although at least one person seems to suspect something might be wrong.
* The Skeleton Key can unlock much more than just locks, including the mind and Nord puzzle doors.
* The Skeleton Key, in the scene where the heroine is roaming around the attic, there is a close-up on a door handle and the doors starts rattling.
* The Skeleton Key, it is claimed the African witchcraft of Hoodoo can only be used on those who believe it. The plot plays with the notion that this means it's only psychology and suggestion (if you believe you were witchcrafted, you'll just act as if you did). However, the scientific approach is eventually abandoned. Once the antagonists finally manage to get the protagonist convinced that it's real, they can perform supernatural witchcraft on her. They then proclaim it's getting tougher for them to use witchcraft on new victims, as it's getting harder and harder to convince modern people that it's real.
* The Skeleton Key naturally involves a skeleton key that will open any door in the mansion where the protagonist has taken a job.
* The Skeleton Key. The film did gross over $90 million at the Box Office, so it seems as though it fell into the ghetto with critics but not audiences.
* The Skeleton race from Kenshi have been around for thousands of years, seeing the rise and fall of two empires before the events of the post-apocalyptic world the game takes place in. Most of the skeletons have all but forgotten their origins, and any questions about their origins and history is usually met with lack of recollection. It's rumoured in the human populations they were the cause of the apocalypse, and
* The Skeptic has a possibly explained example in Beckett's Aunt's house.
* The Skeptic has Beckett seeing his mother's ghost throughout the film while staying in his aunt's house. He has severe repressed memories from when he was five and suffers from insomnia. He may be hallucinating his mother's ghost or she may exist. He's the only person who ever sees her, but the psychic is able to come up with a surprising amount of detail.
* The Skeptic, is a parapsychological researcher who believes in psychics and in chi, but not in ghosts.
* the skepticism with which Seldon's claims are received isn't entirely unreasonable would have an equally hard time being taken seriously, and for good reason.
* The Skeptic's Guide To The Universe edit that out" after someone says something stupid/embarrassing.
* The Skeptics Guide to the Universe to be fake, but the panelists are reluctant to pick it, naming this trope as a reason why.
* The sketch about the And Sandwich includes a long list of ingredients.

* The sketch immediately following the first appearance of the Spanish Inquisition, where Graham is recruited by a BBC executive, played by
* The sketch "Northern Playwright" featuring a father behaving like a stereotypical worker, his no less stereotypical
* The Sketch Show. A college professor is presenting a slideshow about bikinis, with pictures of women wearing them. He then advances to a picture of a building and, well, you know.
* The Sketch Show: a professor is going through a slideshow of women in bikinis as part of a lecture on the history of fashion or some such subject. The projector then switches to a slide of an apartment building and the professor sheepishly admits he doesn't know how that got in there.
* The Sketch Show: Discussed and invoked in a sketch where a man approaches a streetwalker, rejects her offer of "company", and then rather bluntly asks for sex. His annoying obfuscation eventually causes the hooker to walk off.
* The Sketch Show featured an office worker switching from a typewriter to a computer for the first time, then pushing the monitor off the desk as if she were still typing on a typewriter.
* The Sketch Show has a group of counterfeiters who realize it's costing them more than 12 pounds to produce a usable 10 pound note. After a few suggestions for rectifying this, they decide to just start circulating actual 10 pound notes.
* The Sketch Show: In one sketch Tim is reading a book in the theater with Lee and Jim sitting next to him. When they ask him what he's doing, he says that the book is better than the film based on it.
* The Sketch Show, in one sketch with a support group for people with phobias - Lee had a fear of screaming, Jim had a fear of apologies, Karen had a fear of repetition and Ronni a fear of awkward silences, while Tim shows up because of a compulsion to bark at people's phobias. It culminates in this:
* The Sketch Show, Lee Mack's tactic is to slip his made-up words into the conversation and explain what they mean before his turn starts. First is "quazoosl", referring to someone being so good looking they become intimidating (the example he gives is Elizabeth Hurley). In a later sketch, he offers Tim Vine a glass of "saxisquith". Tim replies, "Don't even think about it."
* The Sketch Show: Played with in a sketch where Ronni is listening to her husband Tim talk in his sleep in the hopes that he'll mention the name of a woman she suspects he's having an affair with. Each time he appears to be talking about a woman, he finishes his sentence in a way that turns it into something innocuous, such as "Allison... I'll listen to anything you say, Ronni!" Then finally he mentions Karen's name, who tries and fails to finish Tim's words in a credible way.
* The Sketch Show" sketch is about a support group for people with these. The group has one member who is afraid of the word "Aagh!", one who is afraid of apologies, one who is afraid of repetition, one who is afraid of awkward silences and one who doesn't have a phobia but who compulsively barks at other people's. They keep setting one another off.
* The Sketch Show: Spoofed in a sketch with a visual gag of a clown sitting by the pond boasting to another fisherman that he caught a really big shoe the day before.
* The Sketch Show: There's a sketch where Lee is selling Ronni various insurance policies before quickly rattling of all the legal stuff he doesn't want his clients to know when she's not paying attention. After he asks her out, he makes an aside in the same manner that he's a serial murderer.
* The Sketch Show, when Lee tells a psychiatrist that his friend is a woman (Pauline) trapped in a man's body — and that that woman has a man (Alan) trapped in her's, who in turn has a woman in his (Jackie, who apparently doesn't get on with Pauline). Ronni asks if he's talking about himself. He denies it, saying that it's his flatmate. Further subverted when she asks him to bring his friend to see her. He then pulls out a Babushka doll and opens it up.
* The sketch "The Visitors" has some of the rudest, unlikeable and weirdest ugly people paying an unwanted visit to
* The sketch "When Not To Correct People's Grammar" features a guy who repeatedly corrects a friend's grammar

* The Skies of Pern when F'lessan and bronze Golanth are badly injured by wildcats, which puts an end to their life of fighting Thread, but they find new meaning in studying astronomy and helping the other dragons and riders discover a new purpose in protecting the skies from other interstellar debris.
* The skill Estoma Sword normally stops all encounters on the World Map and also banishes enemies that you strike with your weapon in a dungeon if their level is lower than the player character's level. It does not work on Challenge Quest enemies, ensuring that you have to fight them even if you have the level advantage.
* The skill trees for Sharpshooters emphasises two different ways of fighting: Sniper is your classic long range shooter, using a rifle to pick off single hard targets at extreme range (and preferably from an elevated position); Gunslinger focuses on using the secondary pistol to deal out a lot of weaker shots at close range. Gunslingers struggle against armoured targets without AP rounds, but their ability to potentially attack a single enemy
* The ski-masked mercenaries in the employ of Horne and Vlad from the
* The skin around a gerbil's tail can fall off to let it escape from predators. The internal skeletal structure falls off a couple days later.
* The Skin I Live In, a would-be rapist is captured by the father of one of his victims (who happens to be a plastic surgeon) and turned into a woman as revenge.
* The Skin I Live In, the endless scribbles and artsy sketches that Vera's room is covered in? They didn't come with the room. Vicente/Vera made them him/herself to hold on to sanity.
* The Skinjacker Trilogy. Allie brings Mikey McGill, who reverted to his monstrous state out of jealousy, back to human form by kissing him even when he looks his most indescribably hideous.
* The Skinjacker Trilogy by Neal Shusterman, the Afterlights (ghosts) are like this. They can only stand on ground that has "moved on". The requirement to move on is being loved and cherished by many people. If they stand on 'living' ground too long, they will sink into the center of the earth.
* The Skinjacker Trilogy. She tries hard not to be villainous though. In the first book she prefers to call it "body surfing," thinking "skinjacking," the proper term for the trope in Everlost, sounds too villainous.
* The Skinjacker Trilogy villain even encourages this trope as her thousands of followers reenact their "perfect day" every single day (when they're not fighting our protagonist). This example takes the trope in more of a literal sense, as you may have guessed, rather than the degeneration of a character's demeanor.
* The Skinjacker Trilogy. When 'skinjacking' a human, random disjointed thoughts just bounce around.
* The skin lizards. They don't get why people are so intent on keeping their skin.
* The Skinner Boys Edward trips over a dog and winds up with tongue stuck to a bollard.
* The Skinner, the native alien life forms do not seem to like eating or otherwise decomposing bones, resulting in plenty of beautifully preserved and cleaned human skeletons around a pirate base abandoned for centuries.
* The Skin of Our Teeth, after Cain killed his unnamed older brother, his parents had his name changed to Henry in an attempt to protect his reputation.
* The Skin of Our Teeth at the end of Sabina's opening monologue. Sabina gives the cue several times, more loudly each time, until she finally appears.
* The Skin of Our Teeth begins with a beauty contest in Atlantic City, judged by Mr. Antrobus. Mrs. Antrobus is somewhat less than pleased when he chooses their former maid Sabina as the winner.
* The Skin of Our Teeth by Thornton Wilder, ends with Sabina coming out onstage, acting out her first scene of the show. She then stops and tells the audience that the play hasn't been finished yet, and they can go home whenever they like, with the implication that the play-within-a-play is on an infinite loop. This is itself meant to symbolize how human history keeps repeating itself, and that most things don't change in the long run.
* The Skin of Our Teeth (complete with talking baby dinosaur). The audience is told not to take this seriously.

* The skin received a thematic follow-up with "Definitely Not Vel'Koz". Vel'Koz, by the way, is
* The Skinsaw Murders adventure path, featured an encounter in a cornfield where ghoul-bitten villagers had been strung up as scarecrows by the ghouls to "ripen." When the party shows up, some "scarecrows" have turned, some are still human, and others are normal everyday scarecrows.
* The Skins of Dead Men has this right in the title—a particular medicine, together with skin grafts, brings dreams of what happened to the skin's previous owners.
* The skins of land snails and slugs are water permeable, and as such, are extremely vulnerable to fatally drying out. It's also why they're limited to dark, moist environments. Salt kills land snails and slugs by screwing up their osmotic balance, in that the salt speeds up the drying process by pulling the water inside of their cells and internal organs out.
* The skin tones and facial features of Billy Slade, from Simon Hawke's
* The Skitarii, primary cyborg troops of the Adeptus Mechanicus, can be an entire army of this. They trade melee skill for accuracy, but with the Protector Imperatives at maximum they're only a couple percentage points less accurate than the Vindicares, and that includes the
* The Skitarii suffer from this as well, but in their case at least it can be excused somewhat by the fact that they are mostly mechanical.
* The skits in which Don Music slowly and painstakingly tries to compose songs that already exist. He usually gets one word wrong, and then has to change the rest to fit, as in:
* The skit where two men in an office have jumpers pass by their window and, rather than alert authorities, simply bet on who would be next to jump.
* The Sklar Brothers do an imitation of a zoo crew style radio show as one of their bits.
* The Skorne have no afterlife and must instead trap the souls of their dead in enchanted stones if they do not want to lose them to the void. These stones can then be used to animate statues or grant special qualities to objects.
* The Skrall: Spartan-esque soldiers who have never been beaten in a one-on-one duel before. In the movie, they run around squawking like animals and fall to a single hit. Elite Skrall are the same but more so — several times tougher than regular Skrall, even weaker and dumber than them in the movie.
* The Skreeth assassin, who can telepathically speak through anyone wearing its bio-organic reciever (even over thousands of light years away) and read minds by touch.
* The Skrit Na, an odd bug-like species who go about scavenging things from other planets, including Earth.
* The Skrit Na are even stranger. The "Skrit" look sort of like giant roaches and are fairly stupid. At some point during their lives they spin a cocoon, die, but then out of their dead body a Na (basically
* The Skrull Empire, after an adoption of manic religious fervour (and the event of Annihilation devastating their empire), decide Earth isn't so insignificant anymore, and devote everything to seizing it.
* The Skrulls are a race of shapeshifters. Skrulls changing into other genders have been seen from their very first appearance (the four Skrulls that attempted to replace the Fantastic Four were all male). It's just that
* The Skrulls, the most recurring evil race and, in fact, the first one created by
* The Skull himself literally took on his infamous moniker after getting hit with his
* The Skull Kid has one plastered on his face almost throughout his entire encounter with Link.
* The Skull Knight actually stated that since Guts and Casca survived being offered as sacrifices during the Eclipse when they were fated to die, they now stand outside of fate. And this is why they are
* The Skull Knight is an example insofar as he is no longer human, and has more knightly trappings (barded warhorse, sword, shield, and plate mail) than most.

Unlike many examples,
* The Skull of Agarash, Lone Wolf kills a ravenous Anapheg by bisecting it vertically, from groin to skull, with one upward slash of the Sommerswerd, leaving two near-perfect symmetrical halves.
* The Skull of Agarash series, the eponymous demonic cranium is yet another evil artifact that needs to be destroyed by Lone Wolf. The series is actually rife with these, and has a bunch more examples listed under Gamebooks.
* The Skull of Truth, the embodiment of Truth offers to truthfully answer any one question for each of the main characters. One of the characters asks about his father's future and the answer Truth gives him is something along the lines of, "He will grow old. He will be happy. He will be sad. He will die." When the character complains that the answer wasn't what he wanted, Truth tells him he should have been more specific with his question.
* The Skull Scorpio is generally regarded as the weakest sets of the toyline due to its big and clunky, gimmick-based tail clashing strongly with its otherwise sleek and slender design, as well as for its legs being immobile. As well, it shares many of the frowned-upon aspects of its entire wave, such as a reused mask and somewhat garish colors.
* The Skulls gang makes their masks out of real skulls looted from graveyards.
* The Skulls, when the protagonist and his female friend turn on the shower to mask their conversation (his dorm room is bugged). During the course of their argument, they finally admit how they feel about each other and sure enough...
* "The Skull": When Clayton shapeshifts into Banana Joe's form, he looks like Joe's first season character model instead of his current one.
* The Sky at Night episode due to food poisoning, making him the world record holder for longest tenure presenting a television programme.
* The Sky Bison are giant, intelligent six-legged oxen with beaver tails that could fly, and were used by the Air Nomads as flying mounts. The Fire nation hunted them into extinction alongside their masters, and now only one member of their species — Appa — is believed to be alive. As of the
* The Skyblock challenge spawns you on a small island in the sky with one tree and requires you to complete certain objectives (make a tree farm, make a stone generator,
* The Skybourne campaign setting has the bone ship, a colossal undead monstrosity in the shape of a sailing ship made of bones and flesh and manned by a crew of enslaved souls. Not only does it repair itself by collecting the remains of anything that died in the sea, it also traps the souls of all unfortunate sailors who die in its vicinity, preventing any form of resurrection and adding them to its crew.
* The Sky Canopy Domain is even worse. At least the Overmind figured out a pretty reliable method to talk to humans. This one? Its spokesman saying "You... have... pretty... eyes..." over a period of about 20 seconds is considered a remarkable advance for it. Their interface gets better at talking in the novel 10 teaser though. The reason they were unable to talk very well with humans initially is explained mostly due to the fact that they're
* The Sky Crawlers (2008) depicts a future in which war has been eliminated, but corporations wage a continual war using clones and WWII-style aircraft for the public's amusement.
* The Sky Crawlers, but this isn't elaborated further. Maps still seem to have national borders drawn on them, but they are crossed by private military forces without incident or even mention.
* The Sky Crawlers features photorealistic-looking CGI airplanes and other items, to the point where it is absolutely distracting and makes you wonder why these bits weren't traditionally animated.
* The Sky Crawlers features such products as Pops-Cola and Treasure soft drinks (with logos that resemble Coca-Cola and Pepsi respectively), Green Label beer and Leopard cars.
* The Sky Crawlers, he and his crew traveled to Ireland and Poland where the movie is set to photograph not only the scenery or buildings but also radiators, electric

sockets and window frames to get everything to look authentic.
* The Sky Crawlers: Krakow seems like this, presumably because it's very late at night and for stylistic reasons. The only thing moving in the dark streets is the tram that brings the protagonists in, the bowling alley is near-deserted and the only person in the restaurant apart from the main characters is the silent and almost invisible waiter.
* The Sky Crawlers, so they don't really need to worry about something like lung cancer.
* The Sky Crawlers: There are two scenes where Yûichi and Kusanagi are together that may or may not have ended in sex, but the camera always fades to black before any kind of confirmation, let alone acknowledgment afterwards.
* The Sky Crawlers, where you work for a company called Rostock against their rival Lautern. As the opening narration summarizes it, "There are those who need war, and those who supply it", casting war as just another normal business activity.
* The Sky Crawlers who was previously known as Lynx/Cheetah, the player character of the Wii game, The Sky Crawlers: Innocent Aces.
* The Sky Crawlers, with the surprisingly good food variety. Oddly, it mostly resembles an American diner, but is set up somewhere in Northern Ireland.
* The Skydivers didn't do it, it actually happened. Actually a common mistake: the character Beth is with asks "Why doesn't he pull [the parachute cord]?" and she replies "Panic!" as in he's panicking and suddenly forgot how to use the parachute he's used many times prior. (A judgment call, really. The poor writing and the actress' odd delivery make it tough to be sure.) The next scene clarifies it: One character asks, "Why do you suppose his chute didn't open?" The reply is, "Target fixation. [He] panicked."
* The Skydivers, showing his identical expression of mild indigestion for situations ranging from guilt to sorrow to rage.
* The skygrazers resemble a cross between a manta ray and a whale shark but with pink skin. They even lay eggs that are identical to those of horned sharks.
* The sky island of Skypiea is inhabited by three races of winged people: the Shandians, the Skypians, and the Birkans. Their wings are purely vestigial, though, and do not provide flight. They do make some of them look like angels, at least.
* The Skylark of Space, also by Smith, he states that he is aware of this new theory of relativity, but that it's unproven and he doesn't personally agree with it. The book had been started in 1915, before general relativity had been published in its finished form (Einstein's seminal paper being published November of that year), and even special relativity was still not universally accepted among physicists at the time.
* The Skylark of Space for a very, very long time. Not just that, but:
* The Skylark of Space, Osnome is rich in heavier elements but poor in sodium and/or chlorine, so that common salt — an essential part of the Osnomians' process for making the super-tough material arenak — is extremely rare and valuable; the quantity of salt in Seaton's cruet is said to be greater than the total amount known to exist on Osnome. There is also an inversion in that "X", the nameless quasi-stable transuranic element that catalyses the mass-energy conversion of copper, while vanishingly rare on Earth, is found to be so common on some distant planet that entire cliffs and mountains are made of native X. Apart from the scarcity of X, none of these vagaries of elemental abundance are remotely plausible by the light of today's knowledge, but at the time Smith was writing the processes of stellar nucleosynthesis for elements beyond helium were unknown, and more or less any distribution was as plausible as any other.
* The Skylark of Space universe has portable gravity dampers for human personnel assigned to ships of races which are either heavy-gee to start with or have a higher tolerance of it in combat manoeuvres.
* The Skylens are predators that are transparent, silicon disks about three feet in diameter, attacking their targets with sun rays. They locomote by psychokinesis.
* The Skyline and Border leagues disbanded, but the WAC added more members and by
* The Sky Passages that Oranos uses to get his followers from place to place
* The Skypeia arc has also caught some flak for this, given its length compared

to, at the time, its relative unimportance
* The Sky People update the Burroughs depiction of Mars and Venus by being set in an alternate timeline in which aliens terraformed Mars and Venus millions of years ago and have since periodically transplanted species from Earth to the other planets.
* The Sky People were the once powerful ancestors of the Lufenian race of
* The Skyranger sees a lot of use in Infiltration and Domination. Enemies in Infiltration are extremely weak, but the Infiltration plans throws a lot of crises at you, which generally wrecks havoc with your logistics. Thus you have a lot of spare soldiers. Domination enemies are not quite as weak, but the main battle in Domination happens in the air. Removing crises with spare soldier thus gets very useful.
* The Skyrim chapter of the Dark Brotherhood also consider themselves a family, and could describe most of their relationships with each other in this way. They don't voice it as explicitly as the Companions, but it's there.
* The skyscrapers of Boston are somehow still standing after 210 years of neglect, complete with functional elevators. There are also many somewhat intact sections of elevated highways, some of which are used as settlements or raider/mercenary bases.
* The Skyshroud was an immense mangrove forest floating over the waters of a small sea on the plane of Rath. The forest reached immense heights, enough so that the elves living within its canopy could go their entire lives without approaching its root system — a good thing too, as the merrows living in the flooded maze of roots beneath the forest proper were quite hostile to them.
* The Sky Tides coincidence that all five player ships were suddenly decommissioned. Though the players knew that this was to make way for replacements, it's still uncomfortable to deal with the notion that your job and your home can easily be pulled out from under you through no fault of your own.
* The Sky Tides was the first game to take an AU route with their characters. This one is just as used as "Jamjars".
* The Sky Tides with their names no longer mentioned in case somebody else wishes to app the character.
* The Skywalker Paradigm showing it as a rebel propaganda film, with propositions like Darth Vader being a hero and Obi-Wan as the main villain.
* The Skywalker twins resemble the same-sex parents in terms of looks and career choice, but their personalities and temperaments are more reminiscent of the opposite-sex ones. Luke, like Padme, grows to see the good in Vader and show compassion for everyone. Leia, like Anakin, is strong-willed and not as forgiving, as well as being quite the snappy snarker.
* The Skywayman, stunt pilots Ormer Locklear and Milton "Skeets" Elliott were flying a biplane during a nighttime shoot. At the end of the scene, they were supposed to make it look like they crashed the plane. The sky was lit with several floodlights. Locklear had instructed that, because he would not be able to see the ground at night, the floodlights had to be turned off as they approached the ground so he would know to pull up. For some reason, this instruction was ignored. Locklear and Elliott died when the plane hit the ground going at full throttle.
* The SkyWings have the most eclectic naming scheme, as they've been seen to use the names of birds, the names of gemstones, words related to the color red and fire, and simply "dangerous" sounding words. SkyWing names include Kestrel, Ruby, Flame, and Peril.
* The SL-1 reactor, site of the only fatality directly caused by a nuclear incident in the US. It was built for and run by the US Army as a prototype for a small, semi-portable reactor to power mobile command centers. A technician was performing a maintenance test on it while it was shut down. Said test required him to manually elevate the reactor's only control rod a few inches. He raised it up almost 2 feet. The reactor became instantly active and went prompt critical
* The slaadi of Limbo — who have a similar reproduction method as the xill's — do indeed have a variety of that, although they're more like prison camps where they put captured victims.
* The Slaaneshi psychic power called the Lash of Submission, which creates an

immaterial whip that places the target under the control of the user.
* The Slacker Gensokyo gets lots and lots of flowers everywhere, because the spirits have no other place to go.
* The Slacktivist, a liberal Christian blogger, has repeatedly posted about the
* The Slammer: According to Mr Burgess there are two rules to Dance Club. Rule number 1: You must dance! And rule number two: No fizzy drinks near the stage!
* The Slammer, a fairy brings one of Peter Kokio's puppets, Naughty Thomas, to life. Naughty Thomas proceeds to run run amok, wreaking havoc during the Freedom Show.
* The Slammer episode where the Governor is replaced by Mr. Beltsem, who suffers from 'show-biz phobia': a crippling affliction for someone running a prison for show-biz offenders.
* The Slammer. He manages to cause accidents wherever he goes, including causing Mr Burgess to walk into a lamppost. Inside the prison. Twice.
* The Slammer in a straight jacket and face mask and strapped to a trolley like Hannibal Lector.
* The Slammer: In one episode, an escaped mime uses this to wreak havoc in the prison.
* The Slammer: In one episode, the Governer, Mr Burgess, Gimbert and Peter have to host the Freedom Show stuck together after Gimbert uses the 'Dangerously Sticky Glue' to repair the showtime lever.
* The Slammer in one episode where a journalist points out that there have been several escapes in the time she has been talking to him.
* The Slammer, Melvin poses as Lionel Blair in order to get back into the Slammer. When asked to tap dance, he first claims that he can't because the carpet is too brown, and then claims that he injured his wrist peeling a tangerine.
* The Slammer, one of his punishments is to clean the toilets with a toothbrush.
* The Slammer, the prisoners have to win their freedom by being the most popular act in the Freedom Show.
* The Slammer uses a clap-o-meter to register the audience applause and decide who is the winner of the Freedom Show.
* The Slammer: When Melvin and Pete are abducted and replaced by the aliens, the aliens wear latex masks that somehow perfectly conceal their lumpy and misshapen heads (and also disguise their longer hands).
* The Slammer: When the Governor loses his memory, Gimbert attempts to mime the name of the next act to him from offstage. The first attempt to convey the name of acrobat Alina Eskina is interpreted by the Governor as "a lean, mean laughing monkey".
* The Slammer where the Governor loses his memory, he introduces the next act as "a pint of milk, a bag of bin liners and three scratch cards". His nephew then tells him to turn the card over.
* The slang term in medicine for non-medical tasks (coffee, etc.) interns and others are made to do by more senior medical staff is "scutwork." It doesn't take most interns long to figure out that their job is perhaps the most important one in the hospital; if that doctor/vet doesn't get his/her caffeine, everything goes to hell, because "If the Doc ain't happy, ain't
* The Slann Mage-Priests of the Lizardmen are mummified frogs or toads, fitting in with the army's
* The Slann, the rulers of the Lizardmen, do not seem to be able to die of old age (the oldest are old enough to remember the
* The Slann used to be a dying race in older editions. It was subsequently
* The Slap — Harry is constantly portrayed as an abusive jerk with few redeeming qualities, but Hugo is an out-of-control brat who, at the time of the slap, had been threatening Harry's son and Hector's children with a cricket bat, and his own parents hadn't made an effort to stop him.
* The Slash'EM variant throws in even more stuff, the best example probably being
* The Slasher Arc has Jaccuzi's Gang vs The Gandors vs Larvae vs Martillo Family
* The slasher film final girl spoof was done a few decades previously (and just as, if not more, effectively) in 1982's

* The "Slasher" supplement brings us the Mask. Built for murder and only murder, these mindless killing machines can take a pistol magazine to put down (if you're
* The Slash reveals that Jacuzzi's mind tends to switch to Insane Troll Logic when he's scared.
* The Slaughter. Behaviour-wise, they're shamblers, but with superhuman reflexes. They also talk and eat brains.
* The Slaughter: Dana blows herself up in an attempt to destroy the demons.
* The Slaughterhouse 9 is a villainous example of this trope. A group of up to nine
* The Slaughterhouse Nine collectively also qualify, as they are basically parahuman serial killers/terrorists. They tend to show up in areas that are struggling to survive in the wake of Endbringer attacks or similar disasters and kill more or less indiscriminately. Needless to say a lot of unpowered individuals die as a result of their actions, but whatever they're trying to accomplish is generally focused specifically on other capes. They also are fans of a
* The Slaughtering Grounds video of the re-repost where he just blatantly attacks Sterling. People got wind of the tantrum and started to criticize the developer on the Steam forums, which got them swiftly banned by the developer. To top it all off, the developers issued a copyright strike against Sterling, which got their first impressions video taken down. While Sterling's original video was down for a few weeks, they were successful in their counterclaim and their video was restored. To rub salt in the wound, Sterling dedicated their victory to playing the game for 2 hours to show everyone just how bad it was, and to stick it to the developer who said Sterling wasn't allowed to critique the game unless they played longer.
* The Slaughter: These are terrifying Humanoid Abominations from prehistoric times, who have magical powers and can control the dead.
* The Slave by Isaac Bashevis Singer, Wanda fall in love with her family's Jewish slave Jacob. After Jacob manages to buy his freedom, he returns for Wanda and the two of them run off. Wanda converts to Judaism so they can be married.
* The slave-master part is partially justified as if they hadn't ever had a slave, they
* The slavers. Not only did they use squad tactics and didn't panic during the first few seconds of The Punisher's attack, they even forced him to retreat.
* the slave trade, and confirmed the infamous Torquemada as Grand Inquisitor.
* The slave traders of Sabaody Archipelago keep their stock in collars that explode if anyone tries to remove them without the proper key. Unless, of course, the victim is Silvers Rayleigh and can pull it off quickly enough. Amazingly, they
* The Slayer Prophecy, Buffy and Nightwing are briefly possessed by the spirit of the First Slayer and her lover as part of the villains' plan, but this is relatively downplayed as there is nothing to indicate that Nightwing was the 'natural' reincarnation of the First Slayer's lover.
* The Slayer Prophecy has a few of these, mostly explaining how the Buffy cast can be part of the wider DC Universe and still have spent so long acting alone;
* The Slayer really hates the fact that Ozpin deliberately keeps important secrets from his students and peers in
* The Slayers, named in honor of the Yuuzhan Vong war god, from the last book of the
* The Slayers OVA the Chrazy Chimera Plan has 11 Naga the White Serpent's storming the fortress where Lina is being held captive. Made plausible by the fact that there were only two defenders, who knew they were against a powerful sorceress who had bonded with the ten clones created to stop her, and whose laughter made defense impossible. They did the sensible thing and fled the approaching devastation.
* The Slayers, the Light spell is so simple even someone with zero magic potential can learn it. This is used to show how little people outside of the Barrier know about magic, as their version of a wizard can do the light spell, and nothing else.
* The SLDF discovered that any trip via K-F Drive made all of their attempts at drone warship AI suffer what is described as a "paranoid psychotic break" in which they would lock out all communications and see everything that moved as a hostile that was actively attacking them. Any K-F deployment of drones had to be conducted

with the AI powered down, then reactivated by a caretaker crew on arrival.
* The sleazeball Nazi. This guy didn't join up to kill people for fun, he joined up to take advantage of all the opportunities for looting, graft and partying that go with a victorious war. Generally found somewhere comfortable in France, Italy, or the main German Reich, taking a cut of every legal or illegal business that he can force or ooze his way into, getting high off morphine and speed intended to keep the armed forces going, and enjoying his private collection of priceless artworks that belonged to people who were "deported to the East" or had to leave in a hurry. If he isn't a complete monster, his sexual debaucheries will involve ladies who were already
* The sleep aid Ambien lists "sleep-eating" as one of its side effects. Not listed, but known to have happened to at least one person each, are sleep-painting and sleep-sex.
* The Sleeper, referring to itself as "the Witch from which all Witches descend".
* The Sleeper's funds weren't all just interest. One of the Sleeper's relatives as well as the man he fell asleep at became financially successful, and both chose to have the Sleeper inherit them. (The trustees of the estate are also portrayed as
* The Sleeping Beauty: During the course of a short walk, Siegfried grabs the wrists of two pickpockets as they're trying for his belt pouch. The first one is just a boy, so he scares the kid and lets him go. The second time, he can tell by feel that he grabbed an adult so he breaks the man's arm. The local pickpockets leave Siegfried alone for the rest of the novel.
* The Sleeping Beauty, Godmother Lily doesn't realize she's developed feelings for Jimson until Jimson accidentally calls her "my love".
* The Sleeping Beauty — Siegfried doesn't normally ride, because as soon as he gets attached to a horse (easy to do when you can speak with animals) someone decides that the best way to slow down the big barbarian is to kill his steed.
* The Sleeping Cardinal canon his first name was James (same as his two brothers).
* The Sleeping Cardinal, Moriarty's scheme involves breaking into banks, stealing large sums of cash, and leaving behind an identical amount of counterfeit cash.
* The Sleeping Cardinal, Roland Adair is found shot through the head in his locked study in what appears to be a suicide, except there is no gun.
* The Sleeping Cardinal to blackmail him into acting as a courier to smuggle the stolen currency out of the country.
* The Sleeping Dragon with an elf and proving that just because they literally invented magic, that doesn't mean nobody else can be as skilled as them.
* The Sleeping Giant: One story is about an island off the Irish coast coming to life some day in the future.
* the sleeping guard, but uses the keys not for opening the cell door, but for the freezer in her cell, which contains lots of tasty popsicles.
* The Sleeping King don't have unique dialogue bound to them unless they're important to the story or want you to run an errand for them. Inconsequential NPCs, on the other hand, spout quotes randomly selected from a text bank assigned to that town. This can be irritating if you talk to everybody: multiple NPCs might say the exact same thing, or the player can simply cycle through all the possible dialogue by speaking to the same NPC repeatedly. Yet this tends to be little more than irritating, as the townsfolk that this applies to generally don't have anything particularly important or helpful to say.
* The Sleep Over Club TV series, the M and M's clothes are stolen by one of the girls after a swimming lesson. After they apparently take ages to change, the teacher makes the boys come out (after hearing them claim that they can't find their clothes), otherwise they will receive detention. They were forced to come out of the changing rooms using a float to cover their penises.
* the Sleep status, and are affected by it normally (ie they can't use Teleport).
* the Sleeveless Insurrectionist Soldier, who shot Agent Maine in the throat several times, rendering him mute. This gave Carolina an excuse to give her A.I. Sigma away so that Maine could have an alternate way to speak. This contributed into forever turning him into the Meta.
* The Sleeves of Neo Zeon, have Nazi-esque designs for their mobile suits: example,

the Geara Zulu has a distinctive helmet shape. Their soldiers use "All Hail Neo Zeon!" as a battle cry of sorts.
* The Slender Man against it end up backfiring and giving it the last power boost it needs to win.
* The Slender Man and the Rake are joined by a number of other Humanoid Abominations in
* the Slender Man fic starts as our first viewpoint protagonist, but dies in short order. He ends up being replaced by Detective Carl Rourke and Mira Grolinsky.
* The Slender Man gradually took over the thread because he was, more than any of the other ghosts and monsters, genuinely terrifying, and thus, a legend was born.
* the Slender Man is that he kidnaps children who are going to die in an accident.
* The Slender Man is the most popular example. No one knows what he is, where he comes from, or even what he wants. Also, both people and technology tend to go crazy when he's around.
* the Slender Man levels. Don't expect a door to lead to the same room it did two minutes ago.
* The Slender Man Mythos: Although he's normally given connection to trees, the Slender Man is often thought of to have some connection to water; likely due to his fluid form (see: tentacles, variable height).
* The Slender Man Mythos and in some interpretations an utter monster, he bears a surprising similarity to the men in black: a sharp suit, the ability to rearrange memories of oddity, and the interest in those who know things which should not be known.
* The Slender Man Mythos attacking him. Most of the stories featuring him end with Slendy winning hands-down, and on the rare occasions in which he does have some kind of weakness, it can't actually do any real damage — it just dissuades him from pursuing his current target.
* The Slender Man Mythos. Both portrayals are quite common due to the suit.
* The Slender Man Mythos, but the details are unknown, and if you aren't familiar with the mythos, you really have no idea.
* The Slender Man Mythos doing this to its victims, with tree branches.
* The Slender Man Mythos, for instance, the main character has spent at least a solid 3 years drifting while trying to figure out the link between his missing friend and the nightmarish creature in a suit. How exactly he pays for anything is never explained.
* The Slender Man Mythos has generated a fair number of ARGs and works with ARG elements; there's a full list at the Unfiction forums, which can be found on the article itself. Some of those with elements are:
* The Slender Man Mythos. In certain stories, this is due to his arms actually being disguised tentacles.
* The Slender Man Mythos is confirmed to be fictional in this universe, meaning that Alex & Jay won't be showing up anytime soon. Though that didn't stop Tim Sutton from cameoing in EMH's Box 7.
* The Slender Man Mythos man, but his arms will sometimes become these (or be supplemented by them) if he's feeling particularly aggressive.
* The Slender Man Mythos mouth of them all, swearing in practically every single video that he uploads. Even versions of him from an alternate future aren't afraid to drop the F-bomb during their conversations with him.
* The Slender Man Mythos: Probably the most famous of all creepypasta characters, Slender Man inspired numerous different versions, imitators, and parodies.
* The Slender Man Mythos requests for all of the Slender Man blogs that the readers know about to be given to him, so he can figure out Slendy's weaknesses.
* The Slender Man Mythos series. No indication is given as to what "ark" is being referenced, nor why he wishes to be taken there.
* The Slender Man Mythos shows an entire tape being destroyed after a character takes a sip of water.
* The Slender Man Mythos stories are popular online, especially with tweens and young teens, but are almost unknown otherwise. Most adults only know of Slenderman because of the real-life stabbing related to him.

* The Slender Man Mythos. The best ones are really easy to miss unless you're paying close attention.
* The Slender Man Mythos: This trope pairs quite well with web series featuring a certain slim gentleman...
* The Slender Man Mythos to hinge on except as it pertains to individual works, meaning followers are free to ignore and disregard works they think are doing a crummy job of it.
* The Slender Man Mythos, video usually doesn't distort unless Slender Man himself is both in the shot and very close to the camera.
* The Slender Man Mythos, wherein we only see traces of the Slender Man. What exactly he does to his victims and how is completely up to the imagination.
* The Slender Man Mythos, where Vinny has been shown to vomit up a black, ash-like substance when he is in the Slender Man's presence.
* The Slender Man Mythos, which is just one of many things connecting all of the works together.
* The Slender Man Mythos, you probably got into it through Creepypasta or the PC game.
* The Slender Man Mythos, Zeke even refers to the drawings made by the first victim as "...what looked like Jack Skellington with about six extra arms and no eye holes, or any facial features, for that matter."
* The Slender Man. Needless to say, this aspect of the character was quickly dropped in favor of making him genuinely faceless.
* The Slender Man page image for the Mythos is one such example. However there are several outstanding examples from the major series:
* the Slender Man story is that the events of the story have happened before through some form of reincarnation. Over and over.
* The Slender Man to have a goal of some sort, but whatever it is, it's utterly inscrutable.
* The Slendermen all qualify as this, as do most of the other darker Fae (even the relatively nice ones tend towards the border regions of the
* The Slick Rick song "Sittin" In My Car" begins unsurprisingly with Rick sitting in his car. Rick then proceeds to tell the tale of debauchery and intrigue that explains why he is waiting in his Jeep outside a club for a particular girl.
* The slideshow/text epilogue, with voiced narration, was used for all
* The slide whistle, a universal indicator that something is falling (up or down). If it's something big, substitute the sound of a dive-bombing Stuka airplane. More whimsically, it can be
* The slightly infamous Snuggie blankets are banking on this in commercials aired in late 2010, saying to the effect, "No matter what channel you're watching, you just can't help but hear about the Snuggie!"
* The slightly terrifying Hunger used to be the mascot for Shreddies, on the basis that it "kept hunger locked up...till lunch". Nowadays they use a group of old ladies who are knitting the cereal.
* The Sligs as a species love their "jobs", in spite of being mere slaves to the Glukkons as well, because of their
* The slim man talking to Kira at the wake is the film's writer, Brad Keene.
* The "Slimy Doom" disease turns victims into infectious goo from the inside out.
* The Slinky company had previously taken the Slinky Dog off the market years before
* The Slipper and the Rose, a live-action musical based on Cinderella, Prince Charming at one point visits the royal crypt and sings "What a Comforting Thing To Know", describing his less-than-illustrious ancestors.
* The Slipper and the Rose, one of Cinderella's stepsisters cracks a mirror by looking in it.
* The Slipper and the Rose: The morning after the ball, Cinderella’s stepmother and her stepsisters Palatine and Isobella, still in pajamas, are dizzily gushing and bragging about their fabulous time.
* The Slippery Waverider is a tiny turtle creature riding on a giant axolotl.
* The Slitheen, being composed largely of calcium, can be killed with acetic acid,

most commonly accessible as
* The Slitheen family has a weakness for fart jokes and a generally sick sense of humour, giggling and sharing bad jokes while plotting to destroy whole planets.
* The Slitheen use literally hollowed-out human suits, with zippers in the forehead, to disguise themselves while on Earth.
* The Slitheen when not in human suits. They even rejoice in their nakedness.
* The slits in the window blinds at the police station create this effect on Christine Collins' face, in order to see the emotion in her eyes (and quite possibly take attention away from her lips) in the 2008 film
* The Slits: Punk groups who incorporated reggae and dub into their sound. Members of the two groups also turned up on each other's records, worked together in other projects and even shared a split single.
* The Sload, a race of "slugmen" native to the archipelago of Thras to the southwest of Tamriel, are naturally gifted in various schools of magic, especially
* The Sload, a race of "slugmen" native to the archipelago of Thras to the southwest of Tamriel, have a natural affinity toward necromancy. One of the most famous necromancers in Tamriellic history, N'Gasta, was a Sload. The Sload use their skills in necromancy to re-animate dead bodies to use as slave labor, as well as to "slaughter and revive" various forms of sea creature
* The Sload, a race of "slugmen" native to the Coral Kingdoms of Thras to the west of Tamriel, are said to serve various molds and fungi as meals. One account even mentions Sload consuming a regurgitated substance from one of their elders.
* The Sload, a race of "slugmen" native to the "Coral Kingdoms" of Thras to the west of Tamriel, have no known age limit or size to adult Sload. One story tells of an "Elder Distended One," who seems to serve as some sort of leader to the Sload. It is said to be "impressively corpulent" and regurgitates some unknown substance that other Sload then "eagerly consume."
* The Sload, a race of "slugmen" native to Thras, an archipelago to the southwest of Tamriel, have a heavy isolationist policy and
* The Sload "slug men" are another very alien race native to the Thras archipelago to the southwest of Tamriel. Born into broods of aquatic, amorphous grubs whose parents "
* The slogan for the Texas Rangers, as noted in the TV section entry for Walker, Texas Ranger up above.
* the sloppy in Seasons 1 & 2, and Unalaq being an unpopular villain.
* The Slorifings — also called red elves and goblins — are all male, and reproduce by worshipping a type of love spirits. After a successful worship session, the supplicant buries himself and goes into eternal sleep. Afterwards, a spore-bearing plant such as a fern sprouts over his grave and produces a crop of miniature Slorifings, which are called imps and treated as adults from birth.
* The Slovaks have a Version of the T-72 that has a pair of 20MM Anti-air guns
* The "slow death caused by being lowered into a pond full of killer fish" idea is
* The Slow Empire has an instance of a character making a pun so lame even he gets embarrassed:
* the slower switch-to speed (making it slower than molasses even with the Degreaser's 60% switch speed buff) and 20% slower attack speed (along with doing 1/3 less damage). This drawback was so severe that the Axtingusher stopped being the go to weapon for pyro, even as a sidegrade.
* The slowly developing and frequently sidetracked relationship between Chuck and Sarah is the meta-plot of
* The slow-motion breaches could also be considered this, although in that case it's the player doing so.
* The Slow Path guarding the Pandorica. The Doctor warns Rory about various perils, concluding with "and however bored you get, stay out of—" before he's abruptly transported away. Rory must have spent almost 2000 years wondering what the Doctor was warning him about. However the last word was only "trouble", which the audience hears when the Doctor arrives at his destination in the present day.
* The Slow Path. He was imprisoned for a decade in a South American dictatorship. When he gets home, he has to deal with all of the accumulated cultural upheavals of

the 60s at once — and it's an added challenge for him as he started out as a priest.
* The Slow Path. What makes this even more impressive is that she's Ageless, but not Invulnerable — and yet she outlives all other Immortals "brilliantly". Before the total collapse of everything, she is picked up by the Doctor and sets off to have her own adventures in space and time, during which she will truly have no equals.
* The Slow Regard of Silent Things: Auri's hair is frequently mentioned. It's very long, voluminous, and untamed, like a silver cloud around her.
* the Slowskies) constantly talk about how great their slow speeds are, since it gives them time to relax and unwind. A later commercial shows one of the turtles having a "nightmare" in which a hot blond cable executive got him to switch to cable.
* The Slow Walk, or inside of an extremely large and imposing vehicle.
* The Sl'sssk demon's head is made up of eight long squid-like tentacles. The demon hides underground and
* The Sludge Villain is nearly obliterated by one explosion from Katzuku (the fusion of Izuku and Katsuki).
* The Slug Count, an early antagonist, is in the "flat-out grotesque" category, complete with
* The slugger. This type of boxer moves slowly and doesn't maneuver too much, but has extremely strong chin and stronger punch. Usually one well-placed punch by a slugger is able to finish the boxing game.
* The Sluggoc is a huge slug with two tentacles next to its mouth. Each tentacle does 1-4
* The Slumber Caper" — When he was in elementary school, Sherwood scrawled scribblings on a piece of paper and called it "George Washington." A classmate got ahold of the drawing and wrote the name of a teacher he didn't like (along with a very inappropriate remark). Not long thereafter, said teacher saw it ... and yelled at young Sherwood and punished him, despite Sherwood insisting his innocence in that he did not write the remark. The situation was used to frame the episode's initial conflict of Marcia being blamed for insulting a teacher.
* The Slumber Party Massacre for the film also have authorities arriving on the scene right after the climax.
* The Slumber Party Massacre have killers who use big drills to commit murders (the second film takes it even further by having an electric guitar with a drill). In the first film, the drill represents penis.
* The Slumber Party Massacre Linda is attacked in the school by Thorne and takes refuge in a closet. Thorne starts drilling through the door, causing Linda to scream in terror before the camera cuts away to Thorne running outside. It seems doubtful that Thorne would have been unable to get in and kill Linda, but his clothes don't have any blood splatter and he looks flustered and urgent to get away rather than pleased and in control.
* The Slumber Party Massacre picks up a portable circular saw and tries to run with it upstairs to confront him, but it comes unplugged before she manages to get on top of the stairs. She then picks up a machete instead.
* The Slumber Party Massacre uses a rather large number of false scares, from a cat in a closet to pranking teens, to a neighbor killing snails with a machete. At one point there is a streak of seven consecutive false scares before the killer shows up.
* The Slumber Party Massacre was originally written as a parody of the slasher genre, but it was filmed as a straight horror film.
* The Slumber Party Massacre was written by feminist author Rita Mae Brown as a parody of misogynistic slasher films, but was ultimately filmed as a straight slasher.
* "The Slump": When sarge and detectives from 99 discuss their favourite cop movies and try to find the best one, Rosa lists things she likes about
* The Slurm episode also parodies this with Soylent Cola, the taste of which "varies from person to person".

* The slurring was unintentional: They recorded the song using one microphone
* The Slutcracker and includes nearly every costume cut up in stripperiffic ways.
* The Slylandro are a race of intelligent gasbags who live on a gas giant.
* The Small Back Room friend delights in deposing those whom he's deemed incompetent, but ends up putting an even more incompetent man in charge of the team.
* The Small Back Room) in which a bomb disposal officer consults the boffin protagonist in defusing a new type of German bomb. When the officer is later killed, the boffin has to complete the de-fusing himself.
* The small but important role of Rita's roommate Trish was said to have had a name actress - some sources reported
* The small but noticeable resurgence in popularity of the Simple Minds hit "Don't You (Forget About Me)" has two possible factors linking to it: a parody of it appearing in
* The small but well-trained British Expeditionary Force at the start of
* The small chainsaw. The absolute king of weapons that could kill most bosses in six hits and the
* The small crews required by the massive lighthugger class ships, collectively known as Ultras, generally consist of a
* The Small Death is the youngest brother, and represents the death of the individual. This is the guy that comes to pick you up when you die in bed.
* The small, doglike swamp dragons are living, breathing explodium. The internal chemical factory required to breathe fire is incredibly unstable; when a swamp dragon hiccups, people dive for cover. As in the
* The smaller breeds of dog tend to have high pitched barks or disconcertingly loud howls, hence the nickname "
* The smaller wrestler will often be able to sell his opponents' offense more spectacularly, bouncing around the ring from the impact of each blow.
* The smallest group of Mons is the Deep Savers - Digimon based on aquatic animals or monsters like Cthulhu and Leviathan. There are only a couple of dozen of them, while every other group has about 100 monsters each. To make things even worse, you don't have to breathe in the Digital World - in other words: there's absolutely no point to having an aquatic monster.
* The smallest matrix capable ship of the Republic of Cinnabar Navy in the RCN series is the Cutter, six of which are docked to an anti-pirate Tender. Cutters carry a cluster of twelve chemically-fueled rockets with explosive warheads.
* The Smallest Room In The House centred around his father bringing him a cup of tea while he was masturbating.
* The smallest-scale model train is in the window of a toy store—
* The smallest scale of model railroad, Z scale (1:220), can be used on larger model railroads to represent a model railroad. Yes, a model railroad featuring a model railroad.
* The Small Faces. A fly offers Stan a favour in return for a share of his meat pie; Stan is able to make the fly huge in order to transport him on his quest.
* The Small Faces, he dug a hole through the wall to ask their drummer, Kenney Jones (who would take Keith's place in The Who after his death), if he wanted to go for a drink.
* The Small Folk invokes the trope in its prelude fiction, thus acknowledging that some of the popular subcultures parodied by the game's "cliques" are a little dated.
* The small French town of Illiers, near Paris, inspired Combray in childhood resident
* The Small House at Allingham series, written in the 1860s and 1870s.
* The Smalljon inherited his father's mouth for sure. He calls Roose Bolton a cunt, repeatedly, to his son's face and openly admits that he knows Ramsay killed Roose.
* The Smalljon inherits his father's boastful nature, the size, the massive beard, the temper, and the brutal honesty. He just seems a tad more villainous.
* The Smalljon is described as "a massive bear of a man with a temper to match"

and he serves as Ramsay's muscle in his forces.
* The Smalljon taunts Ramsay in his introduction and he's clearly loving every second of it.
* The small mercenary unit Avanti's Angels got known in the late 3050s for having almost their entire unit made up of ace customs after a series of contracts led to them having a large amount of salvaged Clan weaponry. As Clan weapons are lighter and, in the case of energy weapons, more powerful than their Inner Sphere counterparts, the Angels were able to customize many of their mechs with the windfall and field a large number of mechs that were more powerful, better armored, and had more heat dissipation than the stock versions of the same mechs. This eventually gets deconstructed when they become targets because of their Clantech, and due to the lack of availability of replacement parts they have to return many of their mechs to stock configurations after they become damaged.
* The small mining town eaten by London at the beginning of the story is called Salthook in
* the small ones tend to be overthrown and killed, who's the Chieftain of his entire species, stands at about a head taller than the other Brutes (who already average about 9'00"/274 cm), making them look outright skinny in comparison.
* The small pirate in the green coat and the red hair is one, which is troublesome when they perform a dance and hit their bodies as he can't keep up.
* The smallpox-typhus-cholera-influenza pandemics in the Americas make a great example, though it only affected 1/10 of the planet's population
* The Small Rain as a pianist at a concert that Vicky and Zach attend, identified only by her married name of Vigneras.
* The small resistance force whose members include Kallen, Ohgi, Tamaki, and the late Naoto is also the most idealistic one. Lelouch is perfectly willing to grant them amnesty, providing they don't cause any more trouble since he wants to recruit
* The small Rim Collection, a backwater Periphery state, is one of a very few
* The small RPG company Atomic Sock Monkey Press has a particular obsession with the Rule of Cool. At least one of their games ("
* The small town of Lidköping is occasionally referred to as "Lidköping by lake Vänern" to distinguish it from the much larger city of Linköping. Since both places are occasionally misspelt as "Lindköping", the distinction doesn't always help.
* The small town of Mason, Texas had a problem with the influx of prisoners to its tiny jail. The sheriff's solution? Deter re-offenders by painting the inside of the jail pink and forcing the prisoners to wear pink jumpsuits and making them eat bologna sandwiches for breakfast, lunch and dinner. (Apparently,
* The small, tree-climbing, long-fingered scansoriopterygid dinosaurs, which were interpreted at the time as aye-aye like, were speculated to be gliders with membranous wings similar to gliding mammals, but unheard of in dinosaurs.
* The small unheard prayer that Ned mutters upon his death was an actual prayer of Bean's choice.
* The Small Woman in Grey is an old story about a woman trying to protect her newborn child at all costs. It usually starts at a convenience store in Midwest United States. Two guys run a small store. One night, a woman comes in, dressed all in grey, takes a glass container of milk from the dairy case, and leaves without paying for it. The two guys are frozen for a moment at the audacity of such a shoplifter, and when they run out the door after her, she's gone. Two days later, it happens again, the woman comes in, takes a bottle of milk, and leaves without paying. The third time this happens, they're ready, chasing after her, down the street, until the eventually lose her. But then they find a small cemetery they had never noticed before, and hear a baby crying. Following the cries, they come upon a fresh grave, where the headstone indicates that it holds a woman and her baby, who died together, possibly via miscarriage. And the crying is coming from it. Not knowing what else to do, they find shovels, and did up the coffin. Inside, they find the woman's dead body, holding a very living infant, along with three empty milk bottles. Whoever had interred the two had incorrectly declared the baby dead,
* The smarter villains in the Expanded Universe have this as part of their

* The Smart Girl: Amy, the crew mechanic. She follows the Build career path.
* The Smart Guy: Adelaine, the most versatile by bringing drawings to life. In levels she has puzzle rooms that can only be solved if Kirby has the right Copy Ability.
* The Smart Guy and/or taking on a very offensive role to wear down the rider from other teams. Lancers are nearly employed in nearly every discipline of road race cycling
* The Smart Guy and smartest character, who frequently uses her brains to fix Harry's problems.
* The Smart Guy and the most eager to learn magic to solve riddles and unlock secrets.
* The Smart Guy. At first an enemy of the group he joined at the end of Book 5 after the group collectively outsmarted him.
* The Smart Guy: Athena among the Olympians: she's the goddess of wisdom, strategic thinking, and various arts. Odysseus tends to be this whenever acting as part of a group, or leading a crew.
* The Smart Guy" Baker. Good with infiltration of both enemy bases as well as their computer networks.
* The Smart Guy: Bob, a "spirit of intellect" that is bound to a skull Harry owns, and is more than willing to help him on a case.
* The Smart Guy, book keeper, and delivers daily reports. Cynical and cold but totally devoted to Ike.
* The Smart Guy: Chi, Virtue of Wisdom, Warrior of Fire - the most clever of the Rooz. He was a child prodigy with a photographic memory.
* The Smart Guy: Chopin, a composer, a pianist, and a bit of a romanticist born in a village in Warsaw. Tge only one with a formal education.
* The Smart Guy companion who joins her and Drake in crime-fighting antics.
* The Smart Guy: Crane, the nerd who likes sensible solutions and avoids conflict.
* The Smart Guy: Dick, cheeky, but dependable. Relies on his wits to help the team.
* The Smart Guy: Digger, the burrowing owl who has a penchant for getting philosophical.
* The Smart Guy: Elliot, the Combat Medic who adapts some of the alien technology you find into workable items
* The Smart Guy: Fabian, who continues making the plans and solving the puzzles to allow Sibuna to advance.
* The Smart Guy for nearly the entire storyline, delivering intel from behind the scenes and directing strategy.
* The Smart Guy: Gabe, for Diagnosis mode. An intelligent diagnostician with great powers of deduction. After years of work, he became desensitized to human life.
* The Smart Guy: Grant. Makes the robots. Grant is not necessarily smarter than anyone else, but is the only member of the team with a degree related to what they do (electrical engineering), giving him a larger base of knowledge to tackle certain builds.
* The Smart Guy. He spends half his time dryly mocking everybody else's foibles and then goes on to outdo them all.
* The Smart Guy: Hoagie Gilligan / Numbuh Two, who makes the gadgets used by Sector V and is seen as one of the smartest KND operatives in general.
* The Smart Guy: Jennifer, Captain Gordon's sidekick who obtained every PHD by the age of ten.
* The Smart Guy: Jinpei "The Swallow" (G4), the reconnaissance expert. He is Jun's adopted younger brother, clever and resourceful.
* The Smart Guy: Jiro, who is skilled at both coming up with detailed plans and with machinery work.
* The Smart Guy: Jorge, whose knowledge of WICKED and the outside world are invaluable to the group.
* The Smart Guy: Kakashi, versatile with years of experience and knowledge of a variety of techniques.
* The Smart Guy: Kid Flash. He gained his powers by successfully recreating the Freak Lab Accident that gave the original Flash his powers. He's also a endless

source of scientific knowledge.
* The Smart Guy, knowledgeable in magic and literate in the language of the ancient Dagoth worshipers.
* The Smart Guy: Krile, Galuf's granddaughter, who takes up his Crystal. Her psychic powers give her a variety of unique skills to help the team.
* The Smart Guy: Mina, science and invention are her world of play. Like any good scientist Mina wants to see “what will happen next!”.
* The Smart Guy of the team who like most Asura is adept with inventions.
* The Smart Guy: Prof. Moshimo, The scientist who invented Robotboy, he keeps in touch with the kids to send upgrades for Robotboy or help them fix the problem of the day.
* The Smart Guy: Radio, the most cultured, and able to tune into relevant info.
* The Smart Guy: Raine, an extremely well-read and quick, logical thinker. Also a schoolteacher.
* The Smart Guy rather than a book nerd, carrying around a tape recorder to dictate an audio diary and a suitcase full of tools which he uses for things such as hacking into the box on top of the rec room building that controls the number of channels the rec room's TV set gets.
* The Smart Guy: Rhyme, the brains to Beat's brawn who drops proverbs and other nuggets of wisdom to help the others.
* The Smart Guy: Robin, Chrom's best friend and master tactician, who has a love of books and a variety of latent powers.
* The Smart Guy: Sayid, specialized diplomacy, intelligence gathering (torture), and fixing technical equipment.
* The Smart Guy: Shad, the only member of the resistance group without any combat experience. But, should you need intel about "the Sky People" and ancient texts, he's your man.
* The Smart Guy that tracks enemies using psychic powers, and stands on his head to think through complex issues.
* The Smart Guy to gather/relay mission intel before the others go in. As a full time bird he can spend his days with their alien allies and learn more about the lore of the series.
* The Smart Guy: Trevor, who is more focused on finishing the Pokédex and learning about new types of Pokémon.
* The Smart Guy: Tsutomu, the team's most strategic and book-smart player.
* The Smart Guy, uses a mace, probably just because it's round, and they had to show boulders shooting out of it.
* The Smart Guy who built the communicators, the flying car, fixed Alpha, repaired the Command Center etc.
* The Smart Guy who comes up with the group's tactics when they're more complex than "find bad guys, shoot them".
* The Smart Guy who recites all the instructions on how to get to where everyone's meant to go..
* The Smart Guy who says things like "they may have stolen your answer sheet, but they didn't steal the answers" while Ingrid cringes.
* The Smart Guy who who was with Katara when she discovered Aang and remained for the whole journey. Uses weapons, gadgets, and tech to make up for his lack of bending,
* The Smart Guy with surprising depths, having won several academic competitions and mainting her top marks in her classes.
* The Smart Guy: Xiao Long Bai, specialist in qigong, a special technique that requires lots of thinking.
* The smart little pig's brick house has a "No Dogs Allowed" sign with the word "dogs" crossed out and substituted for the word "Japs", and at one point they use a long cannon to blow up Tokyo.
* the smart minority tricks the stupid majority (millions and millions of them) into genocide. Then they kill the guy who helped them. He was a bigot and all but still.
* The Smart One Turns Traitor: The smartest or wisest of a group defects, deciding

to use their intellect against the cause of their former group.
* The Smart One Turns Traitor: The smartest or wisest of a team turns out to be or ends up becoming a traitor to their group and their cause.
* The Smash and Master Copy Abilities, the two best ones in the game by a mile. They are also the only two abilities in the game that can perform all three ability-specific actions: cut strings, break gray blocks, and pound pegs.
* The Smash Ballot was a way for fans to suggest characters for the series. However, it seems not even that was safe from trolling, as rather than pick a character whom fans wholly expected as the winner... Sakurai instead put in
* The Smashing Pumpkins all meant to be about abortion, they'd be pretty self-contradictory). Lyricist Billy Corgan has said it's an autobiographical song about his relationship with his parents growing up.
* The Smashing Pumpkins as Pitchfork has commented that the album is cited as "underrated" so often that this can no longer be the case.
* The Smashing Pumpkins from central casting. (After 8 years of running TNA she had no idea what kayfabe was.)
* The Smashing Pumpkins from central casting. (After 8 years of running TNA she had no idea what kayfabe was.) On-screen, he's a pretty neutral character, something the business sorely needs.
* The Smashing Pumpkins had a few of them. "Bullet With Butterfly Wings", "I of the Mourning", "Cash Car Star" and "Age of Innocence"... Kinda. They got better.
* The Smashing Pumpkins: "I of the Mourning" is told from the perspective of a man who seeks comfort in his radio and hears voices within that inspire him to start a band.
* The Smashing Pumpkins moments on the second disc. In 2012, over a decade and a half after the album's release, a remastered version was issued, and despite not having any changes in terms of track listing or lyrical content, now bears a Parental Advisory marking.
* The Smashing Pumpkins played their final show (at least before they reformed) in 2000 at the same venue they played their first gig at. The concert featured songs from all of their albums, and even Billy Corgan's dad showed up on stage.
* The Smashing Pumpkins released as a physical single, but the release was so long - with six B-sides, including a 23-minute medley of demos - that Billboard decided to classify it as an EP and put it on the album chart instead, where it made it to #46. Partially zig-zagged, as "Thirty-Three" was more MTV (where it received solid airplay) and top 40 friendly.
* The Smashing Pumpkins the chorus changes to imply that the narrator realizes they aren't alone, not wanting to grow up.
* The Smashing Pumpkins tracks, and it still wasn't complete as of the time of its issue (and, because plenty of additional material has been unearthed from the band's vaults for the band's recent deluxe reissues of its discography, it's even less complete now). It's fair to say that Billy Corgan is one of the most prolific songwriters of his generation.
* The Smashing Pumpkins, which incidentally features irony in a prominent manner: The song talks about the greatest day of the narrator's life... because he's going to kill himself tomorrow. Presumably using his Hyundai in a closed garage.
* The Smeet Series, a few aspects of Sobrekt culture are found odd (sometimes outright ridicule) by the Irkens, most notably that when a Sobrekt is defeated in combat, the opponent (regardless of gender) is seen as a potential mate afterward.
* The Smeet Series. However, after being left in the wild with a pack of wild indokuros he starts behaving more like his kind; becoming aggressive, standoffish, and predatory to the point of nearly biting Purple when he tries to touch him while feeding.
* The Smeet Series, Ilk has an extremely close and loving relationship with her father. Red may be a bit overprotective and overbearing at times, but Ilk knows he means well and quickly forgives him even when she's angry at him for it.
* The Smeet Series of all pregnant Irkenettes and naturally-born smeets.
* The Smeet Series, Zim and GIR refer to Ilk as "Ilk-Smeet" and "Ilkie", respectfully. Also, Red occasionally calls her "sweetie".

* The Smeghead considers Poison Ivy to be the best villain in Batman & Robin...while also noting how her competition is an obnoxiously exaggerated
* The Smellescope, a telescope that can allow the user to smell odors from far away places.
* "The Smell" from their first album also has a backmasked voice at the beginning and end.
* The Smell of Reeves and Mortimer surreal than most of the duo's output) starring Le Corbussier et Papin, both remarkably skilled farting artistes.
* The Smell of Reeves and Mortimer: Vic, in a moment of complete exasperation, finally snaps and tells Bob, to his face, that he is a silly sausage. Bob bursts into tears.
* The smell of the vomit attracted a bear, which proceeded to eat the girl's face.. When he was finally taken to the hospital, the doctors managed to separate the couple, though the boy's penis was destroyed in the process.
* The smell of WD-40 is artificial and added deliberately because breathing in too much of it is dangerous.
* the smell that people were complaining about was the ooze from some bodies that decomposed badly before she was called in?
* The Smelly Mystery (a combination interactive storybook and detective game for kids) features this, with Little Monster Private Eye and Detective Kerploppus gathering all five suspects into the living room at Yalapappus Manor so they can reveal which one has been going around as the Evil Smell Switcher.
* The Smiler roller coaster at Alton Towers suffered a bad incident (although not as bad as the Battersea incident) on 2 June 2015; the operator, following standard procedure, sent a test train around the track, but assumed that it had completed the circuit instead of checking that it had. He then sent a passenger train, and the ride safety systems detected the impending collision and shut down the ride — and the operator assumed that this was a malfunction in the safety systems, and manually restarted the ride without doing any further checking, probably using a key he wasn't supposed to have.
* The Smiling Lieutenant) is brought before the king and princess, the ladies of the court gawk at him. When he walks out of a burlesque show, the women follow him out. Anna (his wife) and Franzi (his girlfriend) commiserate on how damn handsome he is.
* The Smiling Lieutenant, the lieutenant gets the news from a lady friend that he is being forced to marry a princess he's not interested in. He hangs up the phone without saying goodbye.
* The Smiling Lieutenant, the lieutenant is forced to marry the daughter of the king of a tiny Germanic principality called Flausenthurm.
* The Smiling Woman involves a First-Nations kid who accidentally desecrated a grave while playing in the woods one day, unleashing a demon who kidnaps children on his hometown
* The Smilodon (very much at odds with what we know of the real animal, which had relatively short legs and heavy muscle attachment sites, indicating that it was a wrestler, not a distance runner or even a sprinter. No way it can outrun anyone.)
* The Smithereens only scored two top-40 hits, and just barely at that: "A Girl Like You" and "Too Much Passion" reached #38 and #37, respectively.
* The Smith family from "Supper Villain" and "Just Desserts" become a villanous but parodied version of this trope. In the former episode, Harold Smith aspires to become a villain out of boredom with his everyday life, but ends up getting
* The Smiths, also named John Maher. Ironically, after The Smiths broke up, drummer Mike Joyce joined the Buzzcocks.
* The Smiths, and only after that given a proper single release. This is commonly cited as the reason for its comparatively poor chart performance.
* The Smiths' bitter song "Stop Me If You Think You've Heard This One Before" features this memorable lyric:
* The Smiths' gay neighbor Terry promises his partner Greg that he'll come out to his domineering father...but gets cold feet at the last minute and instead claims that Stan's wife Francine is his girlfriend, and that Stan and Greg are "the homos

from across the street". Terry's dad seems to buy it, despite the obvious signs and Stan not doing a single thing to act gay.
* The Smiths have "How Soon Is Now?" It's probably their best-known song, but its dreamy atmospheric quality is nothing like their normal indie rock sound.
* The Smiths in the U.K. to save fans from expensive import prices. Some fans still complained about paying twice for what was essentially the same album.
* The Smiths: "Look at those Cure albums. No emotionally balanced, healthy person would listen to that. This is obviously our perp.").
* The Smiths next door also become this after they collectively snap in sheer envy of the Utonium household's perceived flawlessness.
* The Smiths' only-live song "What Do You See in Her", which was recorded with different lyrics and theme as "Wonderful Woman".
* The Smiths' record label has put out, it's fair to say that this is what they've become. This is especially ironic, since they parodied this kind of treatment in the song "Paint a Vulgar Picture."
* The Smiths were only together for a little over 5 years, yet every modern indie rock band and their mother cite them as a major influence.
* The SM Judge (2009): A Belgian erotic drama film based on the true story of a judge and his wife who were framed because of their sadomasochistic relationship.
* The Smoggies features a scene in which Miss Emma and Clarence believe Polluto has drowned and begin to weep for their fallen friend. Polluto, who has of course survived unharmed, walks up behind them and joins them in mourning his own apparent demise.
* The Smoggies: The Suntots are humanoids who are much smaller than the titular Smoggies.
* The Smoke a man tries to propose to his girlfriend by hanging a banner from a high rise building. He slips and ends hanging from the banner a long distance from the ground. When the firefighters arrive, they locate the girlfriend and it becomes apparent that she would have declined the proposal. However, with all the news stations covering the event, she loves the publicity and thus when the man is rescued she accepts his proposal on national TV. One assumes that once the publicity dies down, she will break off the engagement.
* The smoke bomb is a dud and releases little to no smoke, leaving the escapee to just stand there, or the smoke user belatedly realizes he doesn't have any more smoke bombs.
* The smokebomb is the only "engineering" device that non-Engineers can learn to create in
* the smoke bombs instead work as a literal sight gag, putting cigarettes in the enemy ninja mouths.
* The Smoke In, where a cloud of smoke is used to give a flashy, dramatic entrance instead of a stealthy escape.
* The smoke knights' repertoire of poisons, drugs and other chemicals include the stimulant Movit, which comes in a number of increasingly powerful and risky variants. Movit #6 provides a fairly powerful energy boost, while Movit #11 can render a drinker nearly superhuman if it doesn't kill them. In the battle in Castle Heterodyne, Zola downs a dose of #11 and becomes an unstoppable, manic juggernaut until
* The Smoke Knight Varpa is revealed to be hiding an eyepatch underneath the hood she keeps up and pulled over one eye.
* the smoke monster appears and kills him. This scene cemented in many fans' minds the theory that the smoke monster can impersonate others if it has a body to steal.
* the Smoke Monster, who turned out to be a former human who became what he is through magic.
* The Smokey Bear Show had one character installing an ejector seat in another character's newly acquired sports car.
* The Smoking Room has the staff forced to attend a smoking cessation workshop, "CigZowt". The representative finds himself unprepared for the staff's snark, general churlishness and short attention spans, and eventually loses his temper with them.

* The Smoking Room, set in the early 00s when these were a fairly common feature of large workplaces- smoking at one's desk or the general break room having become felt to be obnoxious by the majority, but the laws against actually smoking in a workplace building not being passed yet. The whole premise was that people now mixed in the smoking room from different areas and levels who wouldn't otherwise speak to each other (with a strong subtext that this meant all the best and most interesting interactions went on in there, as was the writer's conviction.)
* The Smoking Room whiles his break times away doing crossword puzzles, usually getting the answers wrong and asking Robin for help.
* The smoking salon on the Hindenburg was kept at positive pressure to prevent any wayward hydrogen atoms from sneaking in. In the end it didn't help but it was a nice idea.
* The Smooze in "Make New Friends but Keep Discord", who seems to be a mix of the "instinctual animal", "not smart enough to understand" and "
* The Smothers Brothers Comedy Hour. The show was infamous for being, in effect, a flame war between the eponymous hosts and the network.
* The Smothers Brothers Pat Paulsen was running a joke campaign for President, but was constantly denying it on the show. He was presented with a clip showing him in front of a "Pat Paulsen For President" banner, in front of cheering crowds, speaking about all the policies he would implement when he was elected. He responded "I was misquoted."|
* The Smothers Brothers Show: A bungling apprentice angel lives with his mortal brother.
* The Smothers Brothers, Tom and Dick, have made this a part of their act for decades. Specifically, how younger brother Dick was always adored, whereas older brother Tom got the short end of the stick. In fact, Tom's
* The Smugglers' Alliance, a loose coalition of the kind of people Han and Chewie used to be before joining the Rebellion. It's stated that part of the purpose of the group is to present a united front against factions like the Hutts and Black Sun, i.e. the "bosses" of the galactic underworld. They have a rocky but often mutually beneficial relationship with the Rebel Alliance and its successor state, the New Republic, whose more hands-off approach to economics (compared to the totalitarian Empire) allows many of them to earn a living legally after years of breaking Imperial laws. They, in turn, often help the Rebellion/Republic in its conflicts with the Empire.
* The smuggler sketch. The smuggler continues to dig himself deeper with his continued denials of having done anything.
* The Smugglers", Polly is dressed fashionably for the 1960s in trousers and a cap. When she goes back in time to pirate Cornwall, the locals mistake her for a boy, which she admits to the Doctor makes her feel 'very odd'. The Doctor tells her it's better she go along with it for her own safety, as pirates do not tend to be kind to women.
* The Smuppets, made and owned by Bro. They are not objectively ugly or disturbing, but Dave
* The Smurfette Principle: All the main characters are male...except for one, whose femininity is treated as her character trait.
* The Smurfette Principle franchise in particular actually really depends on female audiences.
* The Smurfette Principle: The one female member of a group otherwise consisting of males.
* The Smurfette Principle there are two female Homonculi: Lust and Sloth. Well, if you count Envy, whose gender is... indeterminate, the manga has about one and a half female homunculi, which sort of counts.
* The Smurfette Principle: The sole female character in a group otherwise consisting of males.
* The Smurfette Principle, which subverts this trope with a whole tribe of female smurfs, with one who also acts as a main character in the movie. This is also played with in the franchise with the addition of Sassette, whose presence depends on the work.

* The Smurfette Principle year. Or in Tolstoy. Or Shakespeare. Or the scriptures of Christianity, Judaism and Islam. Or the classical Greek dramas.
* The Smurfette Village and Smurfettes in it, keeping out Hefty, Toughette, Brainy, Brainette, Baby, Babette, and the Smurflings so that they would not be infected.
* The Smurfette Village, Brainy and Brainette are obviously paired together as they become the leaders of a new Smurf Village later on in life.
* The Smurfette Village features a village full of Distaff Counterparts of the male Smurfs.
* The Smurfette Village in the third story, leaving only ten surviving Smurfs who destroy the village with a fire to prevent the disease from spreading.
* The Smurfette Village series, Brainette does this to Brainy when she becomes rather irritated with his attitude towards her.
* The Smurfette Village series' second story, Toughette does this to Valvette's borrowed blue dress when she and a few other female Smurfs escape from the trolls that captured them. Needless to say, Valvette isn't very pleased about it.
* The Smurfette Village's third story "How Things Smurf", Hefty, Brainy, Baby, the Smurflings, and the Smurfettes who were with them are trapped outside the village by a magical force field Papa Smurf erected to keep a dangerous Smurf-infecting disease from spreading. Through the barrier, the Smurfs on the outside talk to the few Smurfs that are still barely alive to find out what had happened.
* The Smurfette Village unleashed on them by the time the flashback sequence starts.
* The Smurfette Village) was manufactured by either Gargamel or the new villain Asmoday to wipe out all the Smurfs and Smurfettes at once, although because Papa Smurf had put up a magical force field to keep the plague from spreading, several Smurfs were spared this fate and would go on to build a whole new Smurf Village elsewhere.
* The Smurfnapper accidentally wake Gargamel while trying to rescue their friend, so one of them makes a meowing sound to make him think it was Azrael.
* The Smurfs (1981) cartoon special "The Smurfic Games" turns into a Smurf snowball when he attempts to make a ski jump run during the titular games tournament.
* The Smurfs (1981) constantly wears a wig. In the episode "Smurfette's Golden Tresses", she wears a blond beehive wig on her date with Lizardo, only for the beehive to attract a swarm of bees that forced her to jump into the pond, where she lost her wig and her date.
* The Smurfs (1981), decides to make one of the last things he does before he passes away "taming a wild beast", which means participating in a bull fight. The Smurfs, fearing for Lazy's safety, swap out a harmless cow disguised as a bull and make it look like it was charging at him.
* The Smurfs (1981) episode "A Chip Off The Old Smurf" has the Smurfs having a dance party at the end after the locust invasion has been stopped, though with Baby Smurf showing off his hidden magical talent before the scene cuts to black.
* The Smurfs (1981) episode "A Hug for Grouchy" and really hates it! The way they were chasing after him to give him a hug in the episode, it comes off as a form of rape.
* The Smurfs (1981) episode "All Hallows' Eve", the Smurfs sing a happy birthday song to Jokey to the melody of "We Wish You A Merry Christmas".
* The Smurfs (1981) episode "Baby's Enchanted Didey", Gargamel decides to swear off chasing after Smurfs to take on a new hobby — bird watching. When he starts bird watching, he yells to Azrael "duck!" and ducks out of the way as a duck flies very low.
* The Smurfs (1981) episode "Bigmouth Smurf" when he was made to believe that he was a giant Smurf, though fortunately the only victims were Smurf houses.
* The Smurfs (1981) episode "Handy's Sweetheart", when Handy has his foot caught in a Smurf-eating clam and Marina the mermaid tries to get help from the Smurfs to save Handy before he drowns, Brainy presumes to do the job by diving into the water, only to find out that he can't swim.
* The Smurfs (1981) episode "Happy Unhappiness Day To You", Gargamel gets fed up with his happiness detector leading him everywhere but to the Smurfs, who were

having a day of happiness fasting, that he stomps the crap out of it and tosses it into his muck pond by the story's end.
* The Smurfs (1981) episode "Hats Off to Smurfs", where a new yellow hat worn by Vanity causes his face to be disfigured every time he gets it wet by washing his face with water.
* The Smurfs (1981) episode "Lost in the Ages". And occasionally, Azrael's tail would catch on fire from some of Gargamel's experiments.
* The Smurfs (1981) episode "No Time For Smurfs", Handy accidentally creates temporal copies of himself, Brainy, Clumsy, and Smurfette when they mess around with Father Time's Sands Of Time hourglass by first causing time to go backwards and then causing time to repeat previous events such as their discovery of Father Time's workshop. Averted in that nothing disastrous happens, but the temporal copies do inform Papa Smurf that they have seen what they think are copies of themselves in a cave. Fortunately, by the end of the episode, Father Time and Mother Nature straighten the whole mess out, and the temporal copies vanish.
* The Smurfs (1981) episode "Now You Smurf 'Em, Now You Don't", Papa Smurf used light shone through a magnifying lens into a magic crystal ball to blind the trolls digging tunnels underneath the Smurf Village to capture the Smurfs.
* The Smurfs (1981) episode of the same name gets thrown out of a few Smurf houses because they can't turn off the show with its most annoying host — Brainy!
* The Smurfs (1981) episode "Papa's Family Album," the evil imp wizard Hotap in Papa Smurf's flashback story turned Brainy's book into one of these, which then chased after Brainy until Papa Smurf turned it back into a normal book again.
* The Smurfs (1981) episode "Papa's Wedding Day", as when Papa Smurf bends over to show Brainy and Vanity that being old doesn't mean a loss of health, he hears what he thinks is his back crunching, but in reality is just Greedy chewing on a vegetable within earshot.
* The Smurfs (1981) episode "Papa's Wedding Day", Balthazar does this when Flowerbell gets Papa Smurf alone in the forest with a big giant cake waiting there.
* The Smurfs (1981) episode "Queen Smurfette", Father Time fails to bring the close of the day on Smurfette's birthday, resulting in the day never ending until Papa Smurf brings it to Father Time's attention.
* The Smurfs (1981) episode "Romeo and Smurfette" had a dueling Loud of War between two groups of serenading Smurfs led by Hefty and Handy who are trying to out-woo each other for Smurfette's affections, ultimately resulting in a brawl that Papa Smurf had to stop.
* The Smurfs (1981) episode "Smurfette's Dancing Shoes", Grouchy turns completely white when he falls victim to a harmless trap in Dreadful Hollow without realizing it.
* The Smurfs (1981) episode "Spelunking Smurfs" has the Smurfs discovering a treasure trove of frozen food hidden in a cave along with a diamond and a frozen ogre who stole both the food and the diamond. The Smurfs use Vanity's mirrors to reflect the sunlight unto the diamond so that the food would be unfrozen, but it also unfreezes the ogre, who tries to stop the Smurfs from taking his food. When Papa Smurf reminds him of what the diamond did to him the last time he was selfish, the ogre allows them to take what they need along with the diamond. Soon after, Gargamel catches the Smurfs and takes the diamond from the Smurfs, and because of his selfish heart, the diamond seals up Gargamel in ice.
* The Smurfs (1981) episode "The Fake Smurf", the formula Hogatha creates for changing herself into a Smurf causes the spoon she mixes it with to dissolve.
* The Smurfs (1981) episode "The Golden Smurf Award", when Brainy nominates himself as the winner of the titular award in order to break a 98-way tie after his friend Clumsy was unable to cast a vote to break the tie, every Smurf groans, and Vanity flatly says, "I'm so happy for you."
* The Smurfs (1981) episode "The Grouchiest Game In Town", which had a villain named the Game Master who forced people to do this in a game similar to chess. Losing meant being turned into a piece for his ever-growing collection. Fortunately, he had a rule "wizard takes all" which Grouchy took advantage of when he used Papa Smurf (who is both a Smurf and a wizard) to remove all his opponent's

pieces from the board, thus freeing all the people who became game pieces.
* The Smurfs (1981) episode "The Lure Of The Orb" hides a story of the effects of drug addiction behind the use of a magic orb that's supposed to give enlightened inspiration to whoever uses it.
* The Smurfs (1981) episode "The Magnifying Mixture". Also Snappy in "Little Big Smurf".
* The Smurfs (1981) episode "The Prince And The Hopper", when Smurfette finds out that Prince Theodore's bride-to-be is only interested in marrying him for the money.
* The Smurfs (1981) episode "The Smurfs of the Round Table", Morgan le Fey steals Excalibur, uses it to turn King Arthur and his men to wax, and then casts a spell on the sun to make it burn hotter so that King Arthur and everything in Camelot will melt away. Fortunately, the melting process takes time, which gives the Smurfs enough time to get Excalibur back from the evil sorceress and to restore everyone in Camelot to normal.
* The Smurfs (1981) Escaping it was almost impossible, because it could control every part of itself, doors, furniture, even items as small as silverware, and use them against anyone who caused trouble. One prisoner was Nanny Smurf, who was rescued after the Castle appeared a century after being kidnapped.
* The Smurfs (1981) had a gender-flipped version called the Mr. Smurf Contest in the episode of the same name, where the male Smurfs competed to be the one who would take Smurfette to the Harvest Ball as her escort. As it turned out, Smurfette couldn't decide which of the contestants would be the winner, so she judged all contestants to be the winners. Also, one of the contestants was Gargamel, who had disguised himself as a Smurf, but as his disguise wore off, he ended up being no bigger than a Smurf and thus was cast out of the village.
* The Smurfs (1981) has a few princes turned into frogs, twice by sorcerers and once by Hogatha the witch.
* The Smurfs (1981) has an episode where Gargamel's mother plants a money tree outside Greedy's house to test his avarice. Although the "money" it produces is actually a confectionery wrapped in golden paper called a "golden goodie", it has the effect of drawing the Smurfs to it and trading what they thought was personally valuable just to have a single piece of the money tree's candy.
* The Smurfs (1981) has been responsible for some unusual expressions of love, even among the Smurfs' enemies.
* The Smurfs (1981) in that special due to her being a deaf-mute. She and Smurfette work together to stop Gargamel's music machine from cooking the Smurfs in a giant pot. Although the big wedding was ruined, Woody and Laconia do exchange vows before Papa Smurf in a much simpler ceremony near the end.
* The Smurfs (1981) in the episode "The Smurfs That Time Forgot", which then kicks off the plot of Season 9.
* The Smurfs (1981): In "The Magnifying Mixture", Papa Smurf gets spun into a cocoon when he accidentally spills enlarging formula onto a small spider.
* The Smurfs (1981) in "The Smurfbox Derby", "Handy's Window Vision", and "Skyscraper Smurfs".
* The Smurfs (1981), Jokey's shadow comes to life when he accidentally sprinkles Mother Nature's magic powder for bringing trees to life onto it.
* The Smurfs (1981), not to mention Sassette's overalls and Brainy's bandage wrapping.
* The Smurfs (1981) of "The Fake Smurf", Hogatha attempts to destroy the Smurfs by sabotaging the bridge with Jokey's "surprises", but instead of the "surprises" going off when she pulled the trigger at the moment the Smurfs were crossing the bridge, they ended up going off when Hogatha herself started crossing the bridge.
* The Smurfs (1981): once by a treasure-hunting imp who was looking for the treasure of the ancient trolls, and once by Gargamel to track down Smurfs.
* The Smurfs (1981), one of them being with Hotap in "Papa's Family Album", another being with the druid leader in "The Smurfs' Time Capsule".
* The Smurfs (1981) Papa Smurf and the Papa Smurf they were talking to was Timid impersonating Papa Smurf.

* The Smurfs (1981) Season 9 episode "Big Shot Smurfs" are belligerent Viking-like fellows who are even smaller than the Smurfs.
* The Smurfs (1981) "Smurfily Ever After" has Smurfette imagining her marriages to various Smurfs, each of them ending in some sort of disaster: Greedy loves food too much, Vanity loves himself too much, Hefty loves exercising too much, Farmer loves farming too much, Handy loves fixing things too much, Jokey loves playing pranks too much, and Clumsy is just...Clumsy.
* The Smurfs (1981) special "Smurfily Ever After", when Smurfette imagines herself being married to Hefty, he carries her in a jog through the village to his house. Smurfette asks if he's doing this because he's so eager to be alone with her, and Hefty says he's doing this because it's good exercise.
* The Smurfs (1981) special "The Smurfic Games", Gargamel's cousin Argus gives Papa Smurf a powerful and dangerous magical item called the Medallion of Poseidon that he wants to see buried. Gargamel, hearing about the medallion from his cousin before he died, rescues the only book that didn't disappear with his cousin when he died and from it puts together all the items necessary to unleash its destructive power. Although Papa Smurf has buried the medallion and rendered its power inert, Brainy mistakenly unearths it and has Painter paint gold over it to present it as the Smurfic Games medal. As Clumsy is awarded with the medal which turns out to be the medallion, Gargamel recites the incantation that unleashes its destructive power ("Ravage the land as never before, total destruction from mountain to shore.") and thus the entire forest and village is rocked by a serious earthquake. Papa Smurf uses his magic to bury the medallion into the earth, thus stopping its destructive power from consuming everything.
* The Smurfs (1981) switches genders when she becomes a Smurf in "The Fake Smurf".
* The Smurfs (1981): The druid leader in "The Smurf's Time Capsule", and Nemesis, who wears a hood over his face because it's so scary to look at. He will even remove the hood to show his face in order to scare his victims into submission.
* The Smurfs (1981): The Root Of Evil in the episode of the same name. The Yellow Hate Disease in "Hefty's Heart" would also count, as would Chlorhydris' black-heart arrows which Cupid accidentally fires in "Chlorhydris' Lost Love".
* The Smurfs (1981) wants to be just like Hefty Smurf and will prove himself to be like him constantly by doing some daring things that usually put the other Smurfs in danger.
* The Smurfs (1981) when the "original symphony" he claimed he created was revealed to be musical pieces stolen from other musicians.
* The Smurfs (1981), which Gargamel consults at the full moon for various purposes, including catching Smurfs. However, the book's answers hardly work out in the wizard's favor.
* The Smurfs (1981), who fight with each other as much as they love each other. Zap-Zap-Kiss, anyone?
* The Smurfs (1981) who's only marrying him for his wealth. The wedding eventually gets called off when, at the ceremony, she ends up kissing a frog who's been turned into a copy of the prince who gets turned back into a frog when Smurfette kisses the real prince who was turned into a frog and turns him back into a prince.
* The Smurfs (1994) by Infogrames, a few Smurfs in addition to Smurfette must also be rescued from Gargamel.
* The Smurfs (2021) episode "Smurfs In Disguise", Hefty and Scaredy do this when they hear Papa Smurf wishing them (as girl Smurfs) good luck at the Iron Smurf Girls tournament.
* The Smurfs (2021), Gargamel gets his butt singed by the robotic nanny Smurf's laser beam.
* The Smurfs 2 — we just meet them being up to some hijinx as though who they were had already been established.
* The Smurfs 2, a transition starts with the camera zooming into a Smurf's mouth and inverts out of Smurfette's mouth as she's calling for help.
* The Smurfs 2 does this in the early part of the movie to show what's been going on with Gargamel and the Winslows since we have last seen them in the modern-day world.

* The Smurfs 2 ends with the Smurfs dancing to Britney Spears' "Ooh La La" at Smurfette's birthday party.
* The Smurfs 2, Gargamel plans to use the Blue Extract from Smurffette to create an endless supply of smurfs for him to drain energy from and increase his own magic power, eventually making him powerful enough to conquer the world.
* The Smurfs 2 has been successfully touring the world using magic in a stage show. The plot kicks off when he starts running out of Smurf essence that powers his magic so has to summon more Smurfs to the modern day.
* The Smurfs 2 in order to kidnap Smurfette, but since it's too small for him to go through, he sends Vexy through the portal to get her.
* The Smurfs 2 is used by Smurfette and Vexy in this fashion when they mock Azrael's failure to catch them.
* The Smurfs 2: Patrick starts talking to his wife Grace's fetus in a monotone and saying, "This is the sound of my voice." Grace says, "That is not the sound of your voice, that is the voice of a robot."
* The Smurfs 2, Patrick Winslow tells his stepfather Victor Doyle to duck when Gargamel is about to attack them with his magic wand, and Victor ends up being turned into a duck.
* The Smurfs 2 the robes of the Columbia Pictures's Torch Lady are a brighter shade of blue than normal (the Smurf color blue), and the fireworks of The K Entertainment Company's logo are also colored Smurf blue.
* The Smurfs 2, when Patrick Winslow says, "Is a Smurf's butt blue", Grouchy is seen bending over and preparing to flash his own butt, saying "You tell me".
* The Smurfs 2, when Smurfette was first created as a Naughty by Gargamel.
* The Smurfs. 542 years old, and still as vital and healthy and able to do the things his little Smurfs can do.
* The Smurfs: A Christmas Carol becomes a Smurf snowman due to a snowball fight. Earlier, Brainy becomes one when Grouchy slams his door and dumps snow off the roof of his house.
* The Smurfs: A Christmas Carol , Grouchy's gift of a Smurf hat (which is what every other Smurf gets) is considered lame to him, because he was expecting a hang glider. Even worse is that it's the same gift that he gets every year, up until the time Jokey fooled him with one of his surprises, leading to his rant about the gift.
* The Smurfs: A Christmas Carol , Grouchy's new hat that he receives as a Christmas present can be used as a glider.
* The Smurfs: A Christmas Carol , Grouchy tells his chimney-crawling visitor (who turns out to be the Smurf of Christmas Past) that he has a blue belt in Smurf Fu.
* The Smurfs: A Christmas Carol , Grouchy tells the Smurf of Christmas Past that she's a figment of his indigestion.
* The Smurfs: A Christmas Carol story, has lookalikes of Smurfette, Brainy, and Hefty playing the roles of the Three Smurfs of Christmas.
* The Smurfs: A Christmas Carol : The Smurf of Christmas Present shows that, if Grouchy doesn't show up to do his part at decorating the Christmas tree, Clumsy will volunteer, leading into this.
* The Smurfs: A Christmas Carol tries to lick an icicle and gets his tongue stuck on it. He is seen dancing with the other Smurfs with the icicle still stuck on his tongue.
* The Smurfs act in this role to prevent humans from ever getting their hands on them.
* The Smurfs' adaptation of Robin Hood, Vanity as Robin Smurf and Brainy as Prince John are both fighting with wooden swords, but Vanity acts as if he's barely even fighting. It only ends when Harmony tackles Brainy and sends him flying into the moat.
* The Smurfs, a fourth Smurf tries to build a rocket, a fifth Smurf makes a cutout of a moon shape, and so on.
* The Smurfs after the Smurfs saved his son. (Most all other Wart Mongers, however, fit the Trope.)
* The Smurfs album titled "The Smurf Menace", after Papa Smurf and a few of his

Smurfs were caught outside the Gray Smurf prison camp, the two Smurfs were chained up with the Great Leader threatening to give them ten lashes each. When Papa Smurf tells his little Smurfs not to worry because the Gray Smurfs aren't real and they will soon be gone, one of the Gray Smurfs gives one of the chained Smurfs a whip lash.
* The Smurfs almost gets flushed down the toilet, but is saved by being stuck inside a wad of wet toilet paper.
* The Smurfs a lot whenever they open one of Jokey's "surprise" presents.
* The Smurfs). Also used in "The Smurfs And The Book That Tells Everything" to pound open Brainy's door, until Brainy opens the door and lets the Smurfs with the ram enter only to crash into a wall.
* The Smurfs. A magical accident left him completely disfigured, and thus he hides underneath a hood. The few times he pulled it off to terrify his opponents he was only seen from behind, and his skin was yellowish and covered in boils.
* The Smurfs, and acts as a laughable lackey to his abusive godfather Balthazar in every episode the latter is in.
* The Smurfs and Co," if you talk to Timber Smurf, he'll call himself the best lumberjack in all of Smurf Village. You'll respond by saying he's the only lumberjack in Smurf Village.
* The Smurfs and forcing the Smurfs to work for them until Handy creates a robot filled with termites that destroys the robots, eventually restoring the village to normal and getting the Smurfs back to doing manual labor again.
* The Smurfs and goes to tell his fellow Smurfs about it, but in reality it's Papa Smurf talking about Vanity's withered plant.
* The Smurfs and keeping him a prisoner for twenty years. Manfred did end up leaving Chlorhydris when, shortly after being reunited, he was pierced with the witch's black heart arrows and his heart became filled with hate.
* The Smurfs, and many other occurrences in the show are much more terrifying than you'd expect from a show fitting this trope, there is never any permanent harm to the Smurf Village and everyone ends up fine at the end of each episode.
* The Smurfs and of Pantagruel, where Gargamelle is the mother of Gargantua and a giant, fitting as Gargamel is a giant compared to the Smurfs. Seeing as Yvan Delporte – Peyo’s co-author who designed the character – had a Jewish wife, “Azrael” could have just been an inside joke.)
* The Smurfs and the Astroniks toys (incidentally, both being green aliens).
* The Smurfs and the Magic Flute, Lady Prattle finds Peewit like this in his room.
* The Smurfs and the Magic Flute movie, but because the Smurfs became so popular, they end up getting the top billing even though they don't appear until the middle of the movie.
* The Smurfs and the Magic Flute was produced in 1976, but was not shown in the United States until 1983, when it was released to capitalize on the success of the Hanna-Barbera series.
* The Smurfs and the Magic Flute, where Papa Smurf sings that that's the only way they could be told apart from each other.
* The Smurfs animated series, where it is used on Weakly Smurf to make him stop thinking he really is weak. He ends up saving the village from a collapsing bridge during a storm and being crowned a hero as a result.
* The Smurfs an ointment that acted like this to prevent him from ever lying about his products.
* The Smurfs are a good example of this trope, since most of them are identical to each other in appearance. In both the comic books and the cartoon show, it's a good way for the creators to bring in a character who becomes prominent for a while and then easily write him out.
* The Smurfs are plagued by a malicious Genie called Genie Meanie who makes the lives of the Smurfs miserable, and then dangerous when Gargamel takes control of him. Fortunately, Papa Smurf finds the special words to put him under his control, forces him to undo the harm he's done and finally orders him to stay in his container until he decides not to be mean anymore.
* The Smurfs are universally popular European comics, but know next to nothing

about it.
* The Smurfs, a Smurf is about to enjoy a dessert when a passing bird flies over it and drops poop on top of it. Later on, he tries to give that same dessert to Grouchy, but he passes on it.
* The Smurfs), a Smurf tries to keep the Howlibird from destroying his house by piling a lot of furniture around his front door, only to realize that the bird destroys the house from above.
* The Smurfs, a Smurf who is using one of Handy's robot servants to go fishing ends up catching an old sock and other bits of junk from the river.
* The Smurfs as well. Sometimes, though, Papa Smurf would go, "Let's not smurf this again" or "Oh, smurf up!"
* The Smurfs attempted this with primitive counterparts of modern inventions (a network of hollow smurfmelon vines became the telephone, and a series of crystals became "window-vision"), but would soon be abandoned by the end of the episode.
* The Smurfs backpack weapon that acts like a vacuum cleaner for sucking up ghosts. Gargamel in "The Trojan Smurf" also had a weapon that acted like a vacuum cleaner for sucking up Smurfs.
* The Smurfs Balthazar's pet is a raven, which can be pretty scary for Smurfs as a bird of prey, aside from the fact that Balthazar is one of the few truly competent and scary Smurfs' villains.
* The Smurfs believe that Father Time and Mother Nature, the patron guardians/deities of the Smurf Forest, created the earth and the universe on what is called the First Day, which is what they have celebrated every Winter Solstice up until they discovered the human holiday of Christmas.
* The Smurfs, Brainy and Clumsy become "Ghostsmurfers", hunting for ghosts in a haunted castle. Handy equips them with ghost catching devices, which suck the ghosts into a jar using bellows.
* The Smurfs build arks for themselves and their animal friends in "Blue Eyes Returns" when Gargamel uses magic beans to create a flood that covers the entire Smurf Forest.
* The Smurfs, but smurfberries from the cartoon series still remain part of its universe.
* The Smurfs) but the gremlin eventually makes friends with a dragon who also loves grelch.
* The Smurfs by transporting his ship inside an inactive volcano and turning themselves into the alien cavepeople called Swoofs.
* The Smurfs called "The Purple Smurfs" in which Lazy gets bitten by a "purple fly". This turns him purple, makes him aggressive and causes him to bite other Smurfs. The same thing then happens to those Smurfs. As noted above, this is an adaptation of a storyline from the original Smurf comic book.
* The Smurfs can be interpreted as one, creating holidays like Unhappiness Day, where every Smurf has to be miserable while he walks around making sure they aren't having fun, and Hug a Smurf Day, which almost just becomes "Torture Grouchy" day because he hates hugs, not that Papa Smurf doesn't find this hilarious.
* The Smurfs can play either friend or villain of the Smurfs, depending on what will get him more food.
* The Smurfs character (an anthropomorphic jar of Benco chocolate drink powder).
* The Smurfs (cherries that he left so he could find his way back to the Smurf Village) and gets into a fight with it, getting bruised in the process.
* The Smurfs, Clockwork Smurf becomes the proverbial David to the Goliath that is Gargamel and Balthazar's wrecking machine giant that they use against King Gerard's castle. Clockwork attempts to fell this machine giant with just a rock and sling. It bounces off the machine with no effect. The two wizards use the machine to pound Clockwork to a pulp. Fortunately, Bigmouth the ogre, whom Clockwork befriended in the episode, comes and picks up the machine giant, tosses it, and destroys it in one throw, sending Gargamel and Balthazar swimming away in fear.
* The Smurfs comic book stories like "The Black Smurfs" and "Traveling Smurf" ended with parties.
* The Smurfs comic book story about Baby Smurf's paper dolls, who play that trick

on a hapless Greedy Smurf carrying a dessert with him.
* The Smurfs comic book story "Bathing Smurfs", the Smurfs trick Gargamel into leaving his camping area near the Smurf Village by saying that his house is on fire, and then set up a bonfire behind the house to make it look like the house was on fire. Gargamel tries to one-up the Smurfs by leaving a trail of cherries behind him so that he can find his way back to the camping spot, but on his return, he sees that a bear is scooping up the cherries and eating them.
* The Smurfs comic book story "Can't Smurf Progress": he eats garbage and he turns them into bricks which he ejects from his rear hatch. Surprisingly, he doesn't poop bricks when he sees that the queen companion Handy Smurf made for him when he became King Trash fell apart and a swarm of termites came out of her.
* The Smurfs comic book story "King Smurf" has the installment of King Smurf's kingdom, signified by the construction of his castle, completed in no more than a few hours, whereas it originally took a few days for the castle to be completed.
* The Smurfs comic book story "Smurf Soup", Gargamel sees that Bigmouth the ogre has turned ugly because he ate the Smurf soup. The Smurfs get a little sing-songy just to taunt Gargamel into having Bigmouth physically abuse him.
* The Smurfs comic book story "Smurf Vs. Smurf" is basically Papa Smurf recalling the language war between his little Smurfs that reached the point where he sought after Gargamel's aid.
* The Smurfs comic book story "The Finance Smurf", Miner comes across a pile of "worthless yellow rocks" in his mine that he doesn't know what to do with. The title character Smurf decides to use them for minting coins as part of the Smurf Village monetary system. Later on, when the Smurfs abandon that system and return to their old communal ways, it gets used for making musical instruments.
* The Smurfs comic book story "The Gambler Smurfs", as Papa Smurf discovers that the Smurfs have set up a private gambling room in the village.
* The Smurfs comic book story "The Gambler Smurfs", the Smurfs have Gargamel make a bet with the earl of Aubenas that he would best the earl's knights in a contest of skill so that the earl would not cut down the forest that Gargamel and the Smurfs live in, with Gargamel offering to be a jester to the earl for three years if he lost the bet.
* The Smurfs comic book story "The Jewel Smurfer" does this when he watches a play put on by the Smurfs and sees one of the Smurfs impersonating him, possibly revealing him to be a traitor to the duke of Abelagot.
* The Smurfs comic book story "The Little Tree", the golden tree that Lumberjack and Vini the elf set off to find for its legendary golden pinecones actually only produced regular pinecones. Lumberjack has Painter dip the pinecones in gold paint in order to trick Gargamel into thinking they were actually the gold pinecones they found so he would not threaten Vini's sister (an elf turned into the titular tree) with burning her to death.
* The Smurfs comic book story "The Reporter Smurf" stomps her blue dress to death when Reporter catches wind of the dress she planned to surprise her fellow Smurfs with from outside Tailor's shop and leaks the information to the press.
* The Smurfs comic book story "The Smurf Menace" makes a masterful dive into an empty river bed. A few Smurfs also make empty swimming pool dives in "The Smurf Garden" when Gargamel designs it to drain all the water from the pool and trap the Smurfs in it.
* The Smurfs comic book story "The Smurf Menace", one of the Smurfs in the Grey Smurf prison camp makes his escape by digging a tunnel from the camp to freedom. He reaches the Smurf Village by the time the story ends and the Grey Smurfs have disappeared.
* The Smurfs comic book story "The Smurfnapper" tries to pull this on the Smurfs near the end when he drinks a formula that is supposed to turn him into a giant, but because the Smurfs had switched the potions in the bottles, the formula Gargamel ended up drinking instead shrank him until he was no more than Smurf-size.
* The Smurfs comic book story "The Smurfs And The Book That Tells Everything". It's capable of answering every question and solving every problem, except that it never warns the consulter of the book the consequences of using its solutions.

* The Smurfs comic book story "You Don't Smurf Progress" when Smurfette takes a shower out in the forest and Greedy tries to get a peek but is stopped by one of the robot servants.
* The Smurfs comic book version of "The Astro Smurf", Harmony (or Drummer) makes an announcement that Astro Smurf's invention is ready to be unveiled, but the first thing he reads off is a recipe Greedy Smurf had given him.
* The Smurfs comic book version of "The Astro Smurf", Papa Smurf force-feeds the title character with the sleeping potion to keep him asleep.
* The Smurfs comic book version of "The Astro Smurf", the title character tells one inquisitive Smurf about the spaceship he's intending to build and warns him to keep it a secret. However, that Smurf ends up telling another Smurf, and soon enough the whole village knows about it!
* The Smurfs comic, the Smurfette completely botches the joke she's telling. That does not prevent all the Smurfs to find it hilarious, since she's a blonde bombshell by that point.
* The Smurfs counterpart "Haunted Smurfs") has one early on in the story, when the Smurf Village storehouse catches fire without any in-story explanation, immediately setting up the situation where the Smurfs are without food.
* The Smurfs, created by Gargamel and changed into a real Smurf by Papa Smurf as an adult female Smurf.
* The Smurfs, Cupid appears more as a cherub who spreads love than a true god of love.
* The Smurfs, ends up letting out a stream of words in Smurf that make the other Smurfs react as if he had a bad case of potty mouth.
* The Smurfs episode "All's Smurfy That Ends Smurfy", the fairy Prince Garth declares war on the Smurfs for supposedly stealing their gold, which turns out to be the work of Gargamel.
* The Smurfs episode "All The News That's Fit To Smurf". And this is just right after Reporter got some juicy news from his fellow Smurfs by hiding under a table and listening to them talk secretly to each other!
* The Smurfs episode "All The Smurf's A Stage", Actor mimics various Smurfs that are involved in the production of Poet's play, even to the point of copying their voices, in order to show his acting talent.
* The Smurfs episode "A Wolf In Peewit's Clothing", Peewit becomes a werewolf when he eats an enchanted condiment called Wolf Gravy with his dinner, and is turned back to normal by eating a garlic bud. The same thing also happens to Greedy, although only his face gets turned into something vaguely resembling a wolf. In "I Was A Brainy Weresmurf", Brainy turns into a furry blue weresmurf by being scratched by a thorny plant called wolfsbane, and is turned back to normal by wearing a garland of silveroot and garlic.
* The Smurfs episode "Born Rotten" is a purple smelly hatchling imported from the steppes of central Asia which hatches in the Smurf Village, forcing the Smurfs to wear masks over their faces. The main problem, however, was that Gargamel intended to use the hatchling's smell to help him find the village.
* The Smurfs episode "Clumsy Luck," Clumsy gets this when he returns to the village and sees that all his fellow Smurfs are mourning for him because they believe that he was killed inside his house when a meteor crashed right on top of it.
* The Smurfs episode "Gargamel's Dummy" shows he has a talent for ventriloquism when he frightens Brainy (twice) with the eponymous dummy.
* The Smurfs episode "Gnoman Holiday", Brainy is forced to fight a muscular brute named Biggus in order to keep Smurfette from marrying Julius Geezer's son Nerdo during their time travels.
* The Smurfs episode "Grouchy Makes A Splash" by jumping from a precipice into the river. Well, the Smurflings escape into the river, but Grouchy, who doesn't know how to swim, clings onto a root and causes Gargamel to fall into the river before he climbs to safety.
* The Smurfs episode "Handy's Sweetheart", the mean Custodian of the pools of Avalon makes the waters turn into quicksand to trap the three Smurfs who were trying to take his lilyroot without paying him gold in return.

* The Smurfs episode "Handy's Window Vision" was interrupted by Gargamel lifting up the roof of his Smurf house to capture him, and he just had time enough to warn his viewers that Gargamel has invaded the village.
* The Smurfs episode "Hats Off To Smurfs", Vanity undergoes a horrible cosmetic transformation by splashing water on his face after he started wearing a magic yellow hat that was created by Gargamel.
* The Smurfs episode "Haunted Smurfs"), before the Smurfs set off to find food and shelter for the winter after their storehouse has been burned to ashes, Papa Smurf tells his little Smurfs to "take only the bare essentials" with them on their journey. Apparently they interpreted the "essentials" to mean everything that they couldn't live without, as Papa Smurf sees that they're ready to take the whole village with them!
* The Smurfs episode "It's a Smurfy Life" is seen eating popcorn after watching Angel Smurf reveal to Handy what life in the Smurf Village would be like if he never existed.
* The Smurfs episode, Jokey's shadow is brought to life and goes around playing pranks, for which Jokey is blamed. As he is put on trial, one of the Smurfs notices that Jokey is not casting a shadow.
* The Smurfs episode "Memory Melons" to record a simple "I love you" message for Tallulah in Selwyn's own words. Ironically, the quote mined message was the original message Selwyn intended to say to his wife all along.
* The Smurfs episode "No Smurf Is An Island", Handy and Marina kissed each other underwater through the window glass of Handy's smurfmarine.
* The Smurfs episode "No Time For Smurfs", Handy, Brainy, and Clumsy accidentally cause time to stand still when they break Father Time's Sands Of Time hourglass.
* The Smurfs episode "No Time For Smurfs", when Handy turns the hourglass filled with Father Time's Sands Of Time, he causes time to go backwards, as in fishes swim backwards, deer leap backwards, and the Smurfs do their everyday things and even speak backwards.
* The Smurfs episode of the same name. Fortunately, Papa Smurf manages to shrink the spider back down to size before he becomes a victim.
* The Smurfs episode "Papa Smurf, Papa Smurf", the two Papa Smurfs realized that there was only one bed for them to sleep in and so offered each other the opportunity to sleep there while the other slept elsewhere. Both of them turned the offer down and slept elsewhere in the house.
* The Smurfs episode "Papa's Wedding Day", the male Smurfs at first become jealous of Papa Smurf's attention being drawn away by the young and beautiful woodnymph Flowerbell, but when they discover that Flowerbell was working for the evil Lord Balthazar and tricking Papa Smurf into marrying her so that the wizard could capture him and use him for his evil purposes, the Smurfs do everything in their power to sabotage the wedding so as to make Papa Smurf have second thoughts about marrying Flowerbell.
* The Smurfs episode "Papa's Wedding Day", where he sings to her, "You're Only As Old As You Think You Are".
* The Smurfs episode "Poet and Painter" has the two artistic Smurfs mistreated at the beginning of the episode as they were considered useless by Smurf's standards (in comparison to other, more practical, professions) motivating them to run away. Eventually the other Smurfs realize that they do need the art that Painter and Poet produce to improve their lives and go in search for them.
* The Smurfs episode revolves Jokey finding the ultimate joke. Anyone who hears it will laugh uncontrollably and never be able to stop. Jokey alone is immune because he doesn't get it. After a long, arduous journey to cure the laughing Smurfs, the band returns to the village... only for Jokey to burst out laughing, having finally got the joke.
* The Smurfs episode "Smurfette's Dancing Shoes", the spirit that guards the ancient Treasure of the Trolls appears as this.
* The Smurfs episode "Smurfing For Ghosts", Peewit looks for Papa Smurf's help to get rid of some unwanted ghosts in Quarrel Castle, but gets instead Brainy and Clumsy, who are both armed with vacuum cleaner-type devices that are designed for

capturing ghosts. At the end of the episode, as Brainy and Clumsy head back to the village, Brainy asks Peewit, "Who are you gonna smurf?", and Clumsy answers, "Autosmurfers".
* The Smurfs episode "Smurfquest", Sassette stows away while Papa, Grandpa, Handy, Hefty and Greedy Smurf go on a quest to recover elements in order to renew their long-life stone. They're none too pleased, but she comes in handy after all.
* The Smurfs episode "Soup A La Smurf"), Bigmouth eats one of Jokey's surprises, thinking it was food, and it explodes harmlessly in his mouth.
* The Smurfs episode "Supersmurf", as Brainy tries to make himself strong through exercise before he tires himself out.
* The Smurfs episode "Symbols of Wisdom" when they both try to grow their own beards, since it caused their beards to grow so long. Also, Papa Smurf had Hogatha's hair spell in "Smurfette's Golden Tresses" purposely altered by giving her bear fur dyed in the color of Smurfette's hair, which caused the hair to grow so long on Hogatha's head that it covered her face and immobilized her.
* The Smurfs episode "Tailor's Magic Needle", when Brainy pesters Tailor about using the magic needle to sew up his hard-cover books, Brainy gets thrown out of the village along with his books.
* The Smurfs episode "The Comet Is Coming" pays homage to Superman's origin by having Handy build a rocket for Baby Smurf so that he could escape the Earth's destruction on the night that a rare comet appears in the sky. Fortunately, they find out in time from Papa Smurf that the comet is just simply passing by and Baby Smurf remains with the Smurfs as the empty rocket launches and falls back to Earth, exploding in Gargamel's house.
* The Smurfs episode "The First Telesmurf", the overgrown smurfmelon vines that become part of the telesmurf invention also reach as far as Gargamel's hovel, and Brainy becomes the telesmurf's official operator. When Gargamel follows the vines straight to their source, and curses as he gets tangled up in the vines at one point, he gets sassed by Brainy for using bad language on the telesmurf. Gargamel complies and covers his mouth as he continues his struggling.
* The Smurfs episode "The Magic Earrings" when Gargamel tries to see how much money he has for a gift he wants to buy from a traveling salesman and finds out that he only has one penny.
* The Smurfs episode "The Royal Drum", Grandpa Smurf tells a story of when he went to Africa. The Smurfs being a reclusive medieval European culture, he obviously doesn't know what the local animals are called so he refers to a giraffe as a "long-necked leaf-eater," a herd of zebras as "black-and-white striped horses" and a lion as a "Smurf-toothed monster cat". The other Smurfs don't believe him until some of the animals are brought to their country by the princess of an African tribe that Grandpa Smurf befriended.
* The Smurfs episode, "The Smurfiest of Friends," after Clumsy saves Brainy from Buddy the imp, Clumsy tells Brainy he loves him. Brainy's response?
* The Smurfs episode "The Smurfiest of Friends", Brainy inadvertently leaves behind a trail of books in the forest that Clumsy follows to find his friend when he ends up being captured by an imp who simply wants him around to power his pampering machines.
* The Smurfs episode "The Smurf Who Couldn't Say No", who basically is a Smurf who has trouble saying no until he accidentally causes the Marsh Monster to be released by extinguishing the ancient Foxfire Flame in the Great Swamp, and then he and Scaredy return to the swamp to relight the flame and Pushover insists on Scaredy doing the honors. By the time the episode ends, Pushover is no longer a pushover!
* The Smurfs episode "The Three Smurfketeers", both Smurfette and Clumsy do this - Smurfette by picking the petals off the flower, and Clumsy by counting the falling petals.
* The Smurfs episode "Tick Tock Smurfs", Clumsy is told by his fellow Smurfs to clear the table because they're on Brainy's time schedule, and Clumsy does it by yanking the tablecloth, causing food to spill right onto Papa Smurf's face.
* The Smurfs escape being captured by Lord Balthazar by using a sack as a parachute in

* The Smurfs, even though all his pranks are just variations of the same exploding gift box gag (which they all keep falling for anyway).
* The Smurfs Farmer Smurf deliberately uses Harmony's bad music playing to bring on the rain in "The Finance Smurf".
* The Smurfs) feels guilty to be the only surviving Smurf after he accidentally caused what appeared to be his fellow Smurfs' deaths with the turlisiphone (shazalakazoo in the cartoon show) and, finding that there is no cure for the death sleep that he put them into, kicks the magical instrument into the fire and then proceeds to play a final farewell dirge. Fortunately with the destruction of the magical instrument, Harmony was able to revive his fellow Smurfs by playing music from his own trumpet.
* The Smurfs film series, as Papa Smurf treats Smurfette like a daughter.
* The Smurfs first released in French-speaking regions of Belgium on April 18, 2021 and an American release on September 10th, 2021. Is the first animated series completely animated in CGI, unlike previous works featuring the titular blue characters.
* The Smurfs, for all the troubles Weakling Smurf went through, he winds up not getting Smurfette (or at least, not getting a kiss from Smurfette) by the story's end.
* The Smurfs for Gargamel to infiltrate the Smurf Village) to the village, but cannot get it across the river because the bridge is too small. Brainy suggests a "short cut", which ends up taking the statue down a very steep slope, only to fall into a raging river that ends in a waterfall that Bigmouth is taking a bath at the bottom of, and said ogre mistakes the statue for a talking Papa Smurf doll.
* The Smurfs game app, there would be mixing of characters from most if not all of these continuities.
* The Smurfs, Gargamel creates a treat that ends up trapping a Smurf that touches it, but as Gargamel runs over to where he has set the trap, he also gets stuck in the trap, and so do birds, a cow, and several other things on his way home. Papa Smurf makes a potion that frees everything that got stuck in the trap — everything, that is, except for Gargamel, which Papa Smurf has no more potion for, but he does leave a recipe for the formula for Gargamel to make up.
* The Smurfs: Gargamel finds himself in a big cauldron being stewed alive by the Devil when a Smurf uses the magic wishing bird to send him to Hell in "The Smurfs And The Magic Bird".
* The Smurfs, Gargamel is the owner of the Great Book of Spells, which he occasionally turns to when his own magic abilities and knowledge aren't enough to help him catch the Smurfs.
* The Smurfs: Gargamel's family is made of evil wizards and witches. His good brother Gourmelin is considered the family's shame for not been evil.
* The Smurfs, Gargamel the evil wizard pretends to be, not only a baby, but a Smurf as well, to infiltrate the village.
* The Smurfs gets captured, the rest of the party goes back to rescue him, against his orders.
* The Smurfs - Goal: Kill the Smurfs. Sadly, Gargamel never got that chance. In the last season, the Smurfs were sucked into a time warp and spent the remainder of the series desperately trying to make their way back to Smurf Village. So it's two Sisyphean goals in one!
* The Smurfs goes through some heart trouble when a flea carrying Gargamel's hate juice bites him and causes his heart tattoo to change into a yellow X, also changing Hefty into a hateful abusive Smurf. Near the end of the story, when Hefty sees that Papa Smurf is being threatened by Gargamel, his true natured self and his heart tattoo return just in time for Hefty to rescue Papa Smurf.
* The Smurfs, Gourdy the genie, who wants to fulfill his master Farmer Smurf's wishes, gets this a lot from his master.
* The Smurfs, Grouchy lands in a candy dish full of blue M&Ms in a toy store which he mistakes for "Smurf droppings" and ends up eating them. Earlier on, Clumsy mistakes liquid soap for something edible and tries it out, only to not like the taste of it before he burps out a bubble.

* The Smurfs, Grouchy lands in a candy dish full of blue M&Ms which he thinks are "Smurf droppings" before he eats them.
* The Smurfs had an episode where Painter obtained a vial of liquid from an evil wizard, which improved his paintings but trapped whatever he painted in the picture.
* The Smurfs had a smurf pulling an unconscious Azrael by his tail. After a few seconds, Azrael wakes up, and his tail phases through his right leg (one image it's drawn behind the leg, the next one it's drawn in front of it).
* The Smurfs had "Little Peter's Christmas" and "The Smurfs Christmas" as its comic book stories.
* The Smurfs had The Moon-Eyed Mummy in the Season 9 episode "Mummy Dearest".
* The Smurfs: Harmony Smurf, as specified in Comic Books. This becomes crucial in one story where he saves the day.
* The Smurfs has a group of Smurfs transported to modern day New York alongside their nemesis, Gargamel and his cat.
* The Smurfs has a harem of male Smurf suitors all wanting to be her one true love, but though she is flattered by their affections, she turns them down because (1) she's too young to think about marriage, and (2) she loves all her fellow Smurfs equally.
* The Smurfs has Handy build Clockwork Smurfette to be Clockwork Smurf's companion. She initially falls for her creator instead, but after helping Clockwork Smurf defeat Gargamel, her affections turn towards Clockwork Smurf for the rest of the series.
* The Smurfs has produced the result of the Smurfs being united together again.
* The Smurfs has Tallulah and Selwyn, a couple of married wizards living in a hunted castle with a gargoyle for pet/son.
* The Smurfs has the child-friendly version of the trope in episode "The Littlest Witch": witches do not die from exposure to water but lose their powers for a year, so they never bathe. The evil witch teacher in the episode (who looks a lot like the one in the Wizard of Oz) suffers this at the end.
* The Smurfs has the eponymous characters making a Wacky Car Race with all cars allusive to each smurf' personality.
* The Smurfs have had sexual relationships with magical holographic beings in the Imaginarium. Smurfette in "Virtual Smurfality" was not pleased to discover Brainy replaying his King Smurf role and having a version of Smurfette be his personal servant. Papa Smurf recreated his deceased wife Lillithina on a few occasions in a few intimate settings such as a fireplace and a picnic. Grouchy created a personal intimate hookup for himself with a Smurfette named Angel in "Grouchy And The Love Doll". Polaris Psyche felt attracted to a female figure in a Smurf beach setting in "Polaris' Fantasy", only to find out that she is actually a disembodied soul that is trapped in one of the Imaginarium crystals.
* The Smurfs have Hefty in the comics and the cartoon show and Gutsy in the live-action movie.
* The Smurfs. He’s able to do advance machinery, steampunk vehicles and robots! with medieval-level technology.
* The Smurfs. He spends most of his time admiring himself in a handheld mirror.
* The Smurfs in 1981 did the little blue people become huge in the Americas as well.
* The Smurfs: In "Bigmouth's Friend," when King Gerard refuses to surrender Clockwork Smurf to the evil Lord Balthazaar and series antagonist Gargamel, Balthazaar counters by unveiling a huge giant, whom he hopes to use to break down the castle walls and storm the inside to force Gerard to give him Clockwork (which they hope to use to destroy the Smurfs). Clockwork tries to stop the giant robot but is crushed to bits ... before Bigmouth eventually averts the trope.
* The Smurfs in general are friends of all animals (except Azrael) and animals try to help them, although Papa Smurf and Nat are the more nature-oriented.
* The Smurfs: In one episode, Brainy enchants a needle to sew clothing faster than Tailor Smurf. But the clothing is cheap and even Baby Smurf can detect the lack of tender loving care sewn into his diapers. To finally drop the Anvil, attempts to

disable the magic needle turn it evil, and it attacks the villagers.
* The Smurfs. In "Smurf Versus Smurf", the sport morphs itself into a game of soccer (or European football).
* The Smurfs. In the first movie, it appears in the Forbidden Falls during a blue moon, opening a portal between the medieval-past Smurf Forest and present-day New York City. In the sequel, Gargamel opens one between present-day Paris and a pond near the Smurf Village.
* The Smurfs: In "The Smurfs And The Book That Tells Everything", Papa Smurf is given a drink that instantly puts him to sleep, giving the Smurfs the chance to lock him up inside his own house so that he would not interfere with their going to Brainy to consult the titular book.
* The Smurfs in the theaters, switching to all-CGI and different character models.
* The Smurfs involved the Smurfs being transported through a portal from a medieval forest into modern day Central Park.
* The Smurfs is about a dozen of the main characters lost in time due to magical crystals traveling from time to time. As the show was cancelled after that (generally ill-received) season, it ends with it never known whether the Smurfs did return to their original time.
* The Smurfs is called an evil wizard but he comes across as more of a crazy hermit, down on his luck alchemist.
* The Smurfs is capable of making all sorts of advance machinery like harvesting machines, telephone lines, a fire pump and even a robot in the Middle Ages.
* The Smurfs is constantly informing us that he's the most handsome Smurf in the village, though it's unclear if we're supposed to accept this self-critique. Physically, he's drawn identically to the rest of the Smurfs.
* The Smurfs is his love of pranks, especially his exploding gift boxes.
* The Smurfs, Jokey and Gargamel share the same birthday — Halloween!
* The Smurfs, Jokey is practicing a ventriloquism act for the talent show the village is having, with a dummy made to look like Gargamel. Unfortunately, after he and the others successfully flee from the real Gargamel, he drops it, and the evil wizard finds it; furious at being made fun of, he uses an incantation from a book of spells to bring it to life as an evil creature and let Jokey find it, so it can wreak havoc in the village.
* The Smurfs, Jokey's "surprises" don't go BOOM! but HONK! when they go off.
* The Smurfs. Just as Prince Theodore is about turn permanently into a frog, Smurfette confesses her love for the prince and kisses him, restoring him to his true human form.
* The Smurfs, Lazy and a bunch of other Smurfs get trapped in a volcano and work to rebuild a windmill into a helicopter so they could escape. Lazy feels entirely at fault for letting the Smurfs down and trapping them in the volcano, but Smurfette refuses to let him stay behind to perish.
* The Smurfs live-action film series, Smurfette after her transformation into a real Smurf is adopted by Papa Smurf as his stepdaughter.
* The Smurfs), located in what was called The Cursed Land. When the Smurfs got their own series, the village was relocated to a flourishing animal-filled forest until eventually it became a Sugar Bowl. When a prequel story called "The Flute Smurfers" was published in 2008, the forest of the Smurf Village kept the Sugar Bowl look of the comic book series instead of reverting back to its original Mordor appearance. However, this trope is downplayed, as there's still quite a lot of danger, with the forest being destroyed by a fire in one comic book.
* The Smurfs' magical villains often have animal companions that act more like familiars than normal pets; Gargamel's cat Azrael, Hogatha's vulture, Balthazar's raven, and Chlorhydris' talking Toucan.
* The Smurfs named Genie Meanie, who can only grant three wishes to whoever says "pumpernickel pickle" before sundown, when he goes back into the lamp for 100 years to rest.
* The Smurfs, natch. Originally a creation of Gargamel with a black heart who hunts down the Smurfs for him, she reforms her devious ways and transforms into a golden-hearted Smurf with blonde hair to match, now becoming a member of our pint-sized

blue buddies.
* The Smurfs, of all places. One smurf was doing the routine, and ends up with "Loves Me Not". Another smurf asks him about his luck and he replies, gesturing to the now barren flower field that "Yeah, I can't find one that has an odd number of petals!"
* The Smurfs. Of all the Smurfs, only Papa recognizes what diamonds are and knows about their value in human society.
* The Smurfs of sign language from Laconia, they were able to communicate with each other in order to tell the Smurflings what they must do to break the barrier.
* The Smurfs of "The Astro Smurf", Brainy and Clumsy also wear fishbowl helmets along with Dreamy as they "visit" the planet of the Swoofs a second time.
* The Smurfs of "The Fake Smurf", Hogatha sets up a sabotage of the Smurf River Bridge by placing Jokey's "surprises" underneath and was hoping they would detonate at the moment the Smurfs cross the bridge, but unfortunately they don't, leaving Hogatha fuming and thinking that a sneaky dishonest Smurf has "sabotaged [her] sabotage". The "surprises" don't go off, however, until Hogatha herself tries to cross the bridge.
* The Smurfs one of Gargamel's goals (aside from using them to create gold) is to eat the Smurfs.
* The Smurfs: one where Gargamel hides inside a giant hollow state of Papa Smurf so that the Smurfs would be lured into bringing him into the village, and another where the Smurfs themselves hide inside a hobbyhorse in order to rescue Smurfette from a spoiled little girl during their time travels.
* The Smurfs, Painter Smurf's canvas is taken away by the wind and it hits the ground several times, getting all kind of stains. Papa Smurf arrives and thinks his painting is brilliant, asking him how he did it. Painter Smurf replies it was "a little inspiration, a lot of perspiration".
* The Smurfs: Papa Smurf and Smurfette. In the comic books and the cartoon show, the idea that Papa Smurf would have an amorous interest in Smurfette was just all levels of creepy and wrong. Thankfully averted in the Sony Pictures live-action film series, where Papa Smurf treats Smurfette as a step-daughter.
* The Smurfs, Papa Smurf delivers this type of speech to Brainy Smurf to help convince him that he's up to the task of deciphering the spell that can get the Smurfs back home.
* The Smurfs, Papa Smurf gives to the puny Weakly Smurf a reddish doping jelly to put on his nose, in order to help him compete in the Olympic Games. When he eventually wins, he is about to confess his cheating, but it turns out that the substance was only raspberry jelly, and that Weakly smurf owes his victory only to his newly-acquired self-confidence.
* The Smurfs: Papa Smurf goes "Oh, my hip!" when he and his little Smurfs land on the roof of the taxicab.
* The Smurfs purposely evoke this trope on Gargamel in the episode "Heavenly Smurfs" to make him think he's being sent to his final judgment in order for him to change his ways and stop chasing after the Smurfs. However, the charade is revealed when one of the Smurfs posing as a visiting angel loses one of his wings.
* The Smurfs reads something to the effect of "this means war" — with the next thing the Smurfs see is the Grey Smurfs surrounding the village.
* The Smurfs represent undead and make children vulnerable to vampire attack
* The Smurfs Sassette was introduced as one of these when Gargamel caused the blue clay that she and Smurfette were made of to be explosive upon exposure to the noonday sun, but she was defused by Papa Smurf after she was turned into a real Smurf.
* The Smurfs, saying that Priscilla has shown her something she has never seen before, and thus has won the challenge.
* The Smurfs Season 9 episode "No Reflection On Vanity" takes place there.
* The Smurfs sees the Smurfs' human ally, Grace Winslow, essentially taking on this role for Smurfette, as the only other female influence Smurfette has met; in the sequel, Smurfette acquires a new 'sister' in the form of Gargamel's new creation, Vexy, with Grace musing that the relationship means that Vexy is her sister as

well, prompting Vexy to wonder if this is what 'happy' feels like.
* The Smurfs series, Peewit gives Johan and the King a cloud of ash in their faces when he tries out the magic flute for the first time.
* The Smurfs: Several instances, but one perfect illustration is the 1984 episode "The Kaplowey Scroll." The scroll allows its bearer to shout out the word "Kaplowey," destroying whatever the word was aimed at, be it a boulder, a pesky fly ... fellow Smurfs and their exploding boxes ... the list went on. The Smurfs abandon the scroll when they see it as nothing but trouble, before Papa Smurf realizes that Gargamel also is after the scroll. Gargamel indeed finds the scroll and learns about its powers. Just as he learns what it is and tells Azrael the cat, "K-A-P-L-O-W-E-Y. Do you know what this means, Azrael?" – the cat nods his head in wicked approval — the Smurfs arrive just in time and ultimately destroy the scroll. Had they been just a few seconds later, Gargamel and Azrael could have easily kaploweyed the entire Smurf population out of existence.
* The Smurfs, she's furious — all the more so when Blossom suggests she accept a tie so that they can focus on the whole issue of the river mysteriously drying up.
* The Smurfs: Some episodes, like "The Littlest Witch", show that a race of naturally born witches do exists in this universe. Most other characters like Gargamel and his family seem to be normal humans who study magic, much like Papa Smurf himself (the only smurf with magic), so magic can be learned by anyone. Natural witches just seem to have some special abilities and traits like the capacity to fly in broomsticks and losing their magic for a year if exposed to water.
* The Smurfs so that he could escape Rikers Island in New York City. Instead, he gets a swarm of flies that help him escape.
* The Smurfs Springtime Special, Gargamel's much-crueler godfather Balthazar tries to use his "magic wand of the future" (his term for a musket) on the Smurfs. He misses them, but hits their pet duck, much to the Smurfs' terror. Then:
* The Smurfs' Springtime Special) he was rather insistent that they hold back while he did it alone.
* The Smurfs Springtime Special when the wizard Balthazar tries to shoot Papa Smurf with his blunderbuss, Smurfette's pet duck Ducky dives in the way of the bullet's path and is killed instead, there is no blood on his body.
* The Smurfs story "Halloween" has the Smurfs and the Smurflings celebrating Halloween together, with the Smurflings paying a witch and Gargamel a visit by wearing pumpkins for masks and using lighted pumpkins to scare them.
* The Smurfs story "King Smurf", King Smurf announces that he's looking for volunteers to build a wooden wall around the village... and those who don't volunteer will be sent to prison.
* The Smurfs story "Salad Smurfs" accidentally refers to Papa Smurf as Papa Pea right after he gets transformed into a pea.
* The Smurfs story "The Great Smurfette", Gargamel was reported to have given a bald person a potion for growing a full head of hair, but the side effect is that it has given the person a chronic case of incurable hiccups.
* The Smurfs story "The Great Smurfette", Jokey accidentally creates one when he tests out a smoke bomb he created for Hefty's plan to rescue Papa Smurf from Gargamel.
* The Smurfs story "The Smurf Garden", when Smurfette kisses Dopey Smurf, the floppy part of his hat rises.
* The Smurfs story "The Smurfs And The Book That Tells Everything" whacks a few Smurfs in the head with the titular book in order to get them away from him.
* The Smurfs story "You Don't Smurf Progress", when he builds a female robot companion for King Trash, but fills it with termites which end up eating their way out of her and proceed to destroy the other robot servants under King Trash's control.
* The Smurfs style by revealing that the voiceover is in fact Narrator talking over the rehearsal for the Blue Moon Festival.
* The Smurfs That Canon Forgot: During their first holiday spent without the

missing smurfs, the villagers share poetry and stories about their absent friends. It's only as the night is winding down that one of them abruptly remembers Brainy.
* The Smurfs That Canon Forgot get into a dispute about how to cope with Papa's absence — and no longer being able to rely upon his protection — Flighty finds himself torn between the factions. Wanting to support his friend Scaredy, but also being intimidated by some of the more extreme methods he and his side argue for. His attempts to stay in the middle and meditate aren't appreciated by either side, with several of Scaredy's other supporters cornering him and declaring that if he isn't helping, he might as well not be doing anything at all.
* The Smurfs that were released in Australia and the United Kingdom even featured the episodes that were edited for syndication instead of their original unedited versions.
* The Smurfs "The Black Smurfs"), Lazy as a purple Smurf is shown to be strong enough to break the ropes that are binding him. Hefty as a Purple Smurf also breaks the ropes in the same fashion.
* The Smurfs the book to try to get the franchise "down with the kids".
* The Smurfs the day is saved when it turns out the (hordes of) fuzzles enjoy Harmony Smurf's awful music, which he uses to lure the fluffy pink tide out of the village.
* The Smurfs: The episode "Karate Clumsy" is built entirely around this tropes, as Clumsy Smurf has to learn karate in order to battle Ninja Rat.
* The Smurfs, the episode "The Magnifying Mixture" originally had a technical error where the audio was not in sync with the visuals and Hefty had Gargamel's voice coming out of his mouth. While the original one eventually got it resolved by reusing scenes, the Croatian dub corrected this by having the voice lines play when it was appropriate, even removing Gargamel's line due to him not speaking on-screen.
* The Smurfs: The Legend of Smurfy Hollow, Brainy does this to Gutsy when he finds out that Gutsy tricked him with a fake Headless Horseman shadow he had created to scare him.
* The Smurfs: The Legend Of Smurfy Hollow for the 2D animation sequence that tells the ghost story.
* The Smurfs: The Legend of Smurfy Hollow, the goat that keeps pestering Vanity by eating out of his cornucopia hat becomes the Headless Horseman that Papa Smurf used to save his little Smurfs in Smurfy Hollow from Gargamel.
* The Smurfs: The Legend Of Smurfy Hollow. The Headless Horseman cannot cross the bridge, but he can still throw a flaming pumpkin into it.
* The Smurfs, the Long Life Stone, which allowed the Smurfs to live long lives through decreased aging, was losing its power, resulting in this trope happening to the Smurfs. However, the Smurflings didn't grow taller as they aged, and Baby Smurf only showed slight wrinkles.
* The Smurfs themselves had this later on with the introduction of Sassette.
* The Smurfs themselves in the cartoon show episode "A Hug For Grouchy". The way they're always stalking after Grouchy to give him a hug, it almost seems like a legalized form of rape.
* The Smurfs the narration are part of the Smurfs' rehearsal for the Blue Moon Festival.
* The Smurfs), the rebel Smurfs attempt to break through King Smurf's defenses by climbing up a ladder, but King Smurf's forces douse the ladder with glue, causing the rebels to get their hands and feet stuck on the ladder long enough to get tipped over. In the Animated Adaptation, though, the glued ladder also rips a hole in the fence, allowing the rebels to get inside.
* The Smurfs), the rebel Smurfs do this to the Smurf Village when King Smurf orders his Smurfs to build a high fence around it.
* The Smurfs:There is an episode called "All Work and No Smurf" in which several smurfs transform into living versions of the tools they use in their work. They retain their limbs and their ability to speak.
* The Smurfs the swamp — was terrified of what might happen if it awoke, and when Vanity actually did so, Bullrush made him king so it would go after Vanity

instead. (The Smurflings were able to save Vanity by fooling the beast into eating a gourd dressed up in royal clothes.)
* The Smurfs, the village is divided over linguistic issues (they can't agree on the use of "smurf") and one enterprising Smurf paints a line along the middle. Unfortunately, it runs right through one poor Smurf's home, creating confusion as to which side he belongs to. The whole story must've been an allegory on the French/Dutch language struggle in Belgium (where the Smurfs' creator is from).
* The Smurfs The words at the end are something to the effect of "Don't let war destroy the world of children."
* The Smurfs. They have petty emotions (greed, selfishness, pride, and so on), but they'll end up doing the right thing - even an artificial smurf (like Smurfette.)
* The Smurfs. This was done as a "safer" alternative to what happened in the original comics, where he was hit on the head with a mallet, although it would take more violence to toss him far enough to land on the outskirts of the village.
* The Smurfs to another planet which turns out to be the inside of an extinct volcano and disguising themselves as Schlips (Swoofs in the cartoon show). It was repeated in the cartoon show story sequel "Dreamy's Pen Pals", except that the Smurfs simply transformed the village into the Swoof Village by using stage props, but Brainy had cut corners on completing the complex formula for transforming the Smurfs into Swoofs, so they ended up changing back into Smurfs a bit too soon.
* The Smurfs to Clockwork Smurf so she could be his creation's mate, but unfortunately she ends up feeling more attracted to her creator than to Clockwork. Eventually, though, after she helps Clockwork Smurf rescue the Smurfs from Gargamel, her affections turn towards Clockwork.
* The Smurfs Uphorns and Downhorns in "Big Shot Smurfs", who are as small as a Smurf's toe.
* The Smurfs upstaged Brainy's orchestral performance in one story (and episode) with music from instruments made of junk.
* The Smurfs used a leaf blower for capturing Smurfs while chasing after them in FAO Schwarz.
* The Smurfs used nothing but clips of classical music for mood and theme setting.
* The Smurfs using the technology available in the Middle Ages and with no magic involved is capable of doing tractors, crawlers, cranes, harvest machinery and a robot with artificial intelligence, just to mention the more impressive.
* The Smurfs versus Gargamel, or versus any human that is their designated villain.
* The Smurfs was a medieval-age European version of one, becoming a Robot Buddy for King Gerard.
* The Smurfs, was lost in the forest and raised by squirrels until his public discovery by the Smurfs. Although animalistic in his behaviors, Wild at least knew how to assemble a Smurf hat out of leaves, and in the comic books eventually learned how to speak in very primitive Smurf language when the Smurfs had him stay in the village during the winter.
* The Smurfs) wears both a crown and an ermine-styled red cape along with his gold-colored suit when he makes his entry into the castle that the Smurfs had built for him by his order. He wears this up until the rebel Smurfs demand him to surrender, at which point he ditches the crown and cape and wears a Roman warrior-styled Smurf hat in its place.
* The Smurfs, when Clumsy splashes water on Papa Smurf and is thanked by him for putting out his beard.
* The Smurfs, when Elroy the Beagle sticks his head in the toilet to look at the Smurfs who have fallen in there, his owner Grace, thinking he's trying to drink from it, says, "No, no!".
* The Smurfs), when Gargamel chases after Harmony after he plays the turlisiphone (or shazalakazoo), the evil wizard starts to complain about parts of his body aching until he collapses.
* The Smurfs when Grace Winslow finds him inside a wad of wet toilet paper that she lifts out of the toilet and she inadvertently throws him against a window in fright.
* The Smurfs when Smurfette calls Patrick Winslow's dressing up for work

"smurfalicious".
* The Smurfs when the boy Smurflings create her, leading to this trope.
* The Smurfs when the village was breached by the rebels. By the time the dust settled, King Smurf only had about a dozen Smurfs still loyal to him surrounding him in a circle and would have been consumed by the rebels had not Papa Smurf showed up to shout "STOP!" and bring all the Smurfs back to their senses.
* The Smurfs, when they were carting Astro Smurf and his spaceship to the inside of an inactive volcano, which became a constant running gag.
* The Smurfs, where the Smurfs gather around a coliseum to see Lazy Smurf engage in a bullfight, only to reveal that the "wild beast" he was taming was actually a snail.
* The Smurfs: While he never really stops trying to get enough Smurfs to make the Philosopher's Stone and with it the ability to make gold, Gargamel at one point admits that he's grown to genuinely hate the Smurfs after losing to them so many times and cares less about the gold than about getting payback.
* The Smurfs while looking for them, and Papa Smurf did indeed manage to make the cure.
* The Smurfs (who doubles as a prankster trickster), first controlled by Gargamel and then by Papa Smurf. Papa orders the "Genie Meanie" to first undo all the tricks it had performed that day, and his last command to it is to stay in its bottle until it can learn to stop being mean.
* The Smurfs who genuinely admires Brainy and likes being around him, despite Brainy's arrogance.
* The Smurfs who initially spread the infection, and retained some of the anti-social tendencies after the disease was cured. (In the animated version, Grouchy already exists, and Lazy is the first Smurf infected.)
* The Smurfs who plots to catch the Smurfs so he could create gold, eat them, or use them for magic potions. His cat Azrael tries to help him, too.
* The Smurfs, with his arrows causing whoever is struck by them to fall madly in love with whoever is in their line of sight.
* The Smurfs with his cousin Sagratamabarb, who with his genie creates a house identical to Gargamel's right next to his. Gargamel tries to destroy the house, only to find out that his own house also suffers the same damage. Gargamel calls upon Beelzebub for his help in defeating his cousin, though he had to offer his own soul in exchange for the victory. Though Beelzebub was easily chased off by Sagratamabarb's centaur, Gargamel soldiers on and calls upon all the powers of darkness to defeat his cousin. Eventually Gargamel wins the duel, though it not only cost him his house, it also cost him his eternal soul, as Beelzebub returns at the end to drag Gargamel down to Hell with him.
* The Smurfs with the male Smurfs. In her fantasy of Greedy Smurf, they do the meadow run — only for him to run right past her to the overflowing buffet table.
* The Smurfs with the Smurfs as the characters. Technically the Smurfs are making a play in a theater but the audience's imagination turn the scenarios and dresses into the real thing.
* The SMWCentral user Yogui is known in most hacking communities for the
* The Snacking Dead: A Parody in a Cookbook is a parody cookbook filled with recipes for snacks suited for every occasion and it has tips for cooking under duress — fitting for a zombie apocalypse.
* The Snack Is More Interesting: Being more interested in food that's in the vicinity than what's going on.
* The Snack Is More Interesting: I know this is super important, but...Food.
* The Snack World of Finn); but the dungeon crawler gameplay loop and other jokes (such as the more risqué humor and poking fun at role-playing game conventions) would appeal more to older players. The fact the game was given an all-ages rating in Japan while getting slapped with older age ratings elsewhere has furthered this uncertainty.
* The Snail and the Whale. The female snail is about the size of the male whale's eye.

* the Snail doesn't appear. It was made by a guest animator who was apparently unaware of the joke!
* The Snail Factory are completely apathetic to the suffering and horrible maiming of others.
* The Snail Factory features a menagerie of bizarre creatures, including various gods, demons and deities from different cultures, mutants, prehistoric creatures, mermaids and intelligent fungus.
* The Snailiens: An obscure action figure line, featuring a quartet of anthropomorphic mollusk-like aliens who for some reason are named after famous U.S. Presidents.
* The Snake by John Godey, a captive black mamba gets loose in Central Park during a heat wave, when the owner's attempt to sell it goes horribly wrong.
* The snake demons themselves are a version of this. At their lowest level of strength, they seem to just be normal snakes, and it takes a great deal of time and effort for them to gain speech, shapeshifting and other powers. Taking on a fully human form is noted to be something only their most powerful individuals can do, said forms being sought after for the various advantages they bring. When Blanca saves Xuan's soul it takes so much power from her to do so that she is reverted back to a regular snake and it takes her centuries to regain her powers.
* The Snake King up to this point, falling in love after the final battle. It is a prime example of this trope, complete with the one single kiss at the very end.
* The snakes are shown as shockingly aggressive, actively pursuing prey, whereas most snakes (including those shown in the film) are relatively sedentary; the snakes in the film bite repeatedly for no apparent reason, simply killing without eating the people or defending themselves, and then move to attack and kill other people who are neither a threat nor viable prey. The snakes are described as being so aggressive and violent because they are being stimulated by sexual pheromones, except that snakes are not praying mantids or black widows and do not kill their mates while they have sex. If snakes
* The SNAP-27 carried on Apollo 13 (and Apollos 12, 14, 15, 16, and 17) was a Radioisotope Thermoelectric Generator, essentially an atomic battery, not a reactor (there's no chain reaction fission going on, that's the clue). It basically turns the heat of spontaneous radioactive decay into electricity via thermocouples. It is similar in design to the RTGs carried on Pioneer, Voyager, Cassini, and the New Horizons probes. They've also been used to power lighthouses, Antarctic science experiments, and anywhere you need a decade's reliable power source. It was probably one of the most reliable components flying on Apollo 13. Even if the cask had ruptured during reentry, the plutonium inside would have remained intact and ended up at the bottom of the same 20,000 ft. deep trench, doing absolutely no harm to anyone for the next 5,000 years.
* The Snapper breed of dragons is land-bound, although Wind Snappers can fly by using magic to manipulate gusts of air to lift them up and Arcane Snappers can manipulate gravity.
* The Snapper. Due to Fox owning the rights to the Rabitte name, they were different characters. Especially glaring is the fact that Colm Meaney plays the father in all three films, but is ostensibly playing different characters.
* The "Snappy Snack Shack" was supposed to be a 7-11 but the execs at the chain didn't want to be associated with the film.
* The Snark Knight: The snarkiest characters tend to keep to themselves more often than not.
* The Snark Knight who believes firmly and unironically in a high moral code.
* The Snarkout Boys ends with the heroes capturing the bad guy, Wallace Nussbaum, and sending him to be imprisoned in the Chateau D'If. Then, in the last scene, Nussbaum's voice takes over a movie showing, as he announces that he has escaped and will soon reign in terror all over the world.
* The snarky outcast drow rogue Downer, the protagonist of the comics
* The Snarl. And the one after that, and the one after that, and the one after that...
* The snarling, vicious look on Tod's face during the fight with Copper in

* The Snarl, it would destroy everything if it was let loose, though it seems to be a mindless force to such an extent that it's not clear it has an actual intention to do so.
* The Snatcher is the first truly difficult boss in game, and the first one you're likely to struggle with defeating owing to his quick attacks that are difficult to dodge until you learn their patterns. After dying the first time against him, none of the in-fight cinematics are replayed and he also becomes vulnerable much sooner, rather than taunting you for quite a while beforehand like he does in the first battle.
* The sneakiest use ever of the A1/A2 variant was shortly after the rulings that led to
* the sneaky bastard lion Later encounters find the lion hiding in such diverse places as a sandwich and your underwear.
* The "sneaky gate" in Mechanicsburg leads to a passage underneath the town which the Jägers use as a loophole to get to Mamma's before the Doom Bell rings since they technically haven't entered Mechanicsburg itself.
* The sneaky way, the character only discovers the search when he returns and finds it subtly changed — maybe he was sneaky as well and planted threads or hairs on doors and such. The sneaky way often combines with planting bugs.
* The Sneetches and Other Stories to try to get them to learn. Different adaptations paint him in different lights.
* The Sneeze — The first thing ever to be caught on actual film (as opposed to paper, like earlier experiments were).
* The SNES game also has a battle taking place on a train, except it's Buster Bunny doing the fighting in this case. It even uses the above-mentioned Standard Snippet as background music in one part.
* The SNES original have the Rareware logo be drawn in with green wireframe and fill with color, before shrinking to the bottom right to accomodate the Nintendo logo.
* the SNES port, Shaft is replaced by an unrelated evil wizard named Ghost, who can summon skeletons, mudmen and flying gravestnes to his aid.
* The Sniper. Although considering his father has essentially forsaken him as a "crazed gunman", it's more or less by default.
* The Sniper (and his parents) become notable for being the only Australians in the entire TF2 'verse who
* The Sniper, correctly identifies that the police should be looking for a man with a history of crimes of violence against women.
* The Sniper, Eddie Miller calmly and dispassionately dispatches his targets. However, when he is not on a rooftop with his carbine, he is a emotional wreck.
* The Sniper has only his rifle, his wits, and his marksmanship to take down his opponents. And more often than not, he does.
* The Sniper is extremely deadly to infantry of all kinds, especially if he is well hidden in the woods or perched atop a tall building.
* The Sniper: Lt. Kafka experiences a minor one (in that it does not immediately bust the case) while complaining to Sgt. Ferris about the tips coming from the public, including one from the woman in the dunk tank talking about Miller hurling baseballs at her.
* The Sniper, may represent one of the earliest examples on film. The film was one of the first to focus on the psychology of a serial killer as a major plot point.
* The Sniper, Miller rips up the dress he brought home from the home of his first victim and burns it in the furnace in the basement.
* The Sniper Rifle and Laser sight can be considered one such weapon. The base Sniper Rifle kills any non-special infected in 1 shot, and most specials in 2 or 3. It also has semi-auto fire capability. The problem is, if you walked and fired with it (which, given the game's gauntlet crescendos, will be very often), the accuracy is so pathetically diminished you'd be wasting more ammo than with a full automatic rifle. However, getting the Laser sight almost completely erases this problem, and it effectively becomes a shotgun (the only other non-special weapon that can cause a kill with one shot to anywhere on the body) with 300 bullets (the tier 2 shotguns

all have only about 130 bullets).
* The Sniper shows the police manhunt for the eponymous killer, including showing how much of it is laborious legwork following avenues of investigation that ultimately go nowhere; while all the while the public is expecting them to work miracles.
* The Sniper's Motto, "Be polite, be efficient, have a plan to kill everyone you meet." (which is a take on a motto out of
* the Sniper's real father, as paint for his rocketships. Most of which have already exploded.
* The Sniper's "Skewer" taunt kill sees him pull an arrow from his quiver and stab his opponent with it, killing them instantly. If the Sniper has run out of ammo for his bow, however, he cannot use this taunt.
* The Sniper: The police start calling in every known sex offender in the city to quiz them. One of the offenders in the first batch is a peeping tom. It is watching his interview that convinces Dr. Kent that this is the wrong tactic. As he explains to Lt. Kafka, sex offenders stick to a particular type of crime, and they need to be looking for someone with a history of violence against women, not peeping toms.
* The Snitchbugs used to have normal wings, but lost them during their evolution. Instead their antenna now serve as their wings.
* The snobs have an unspecified issue that makes conception difficult.
* The Snorkel, the killer is revealed to have been under the floorboards the entire time.
* The Snorks did this to a lesser extent (at least the characters SWAM).
* The Snorks had what's clearly a baleen whale referred to as a killer whale. To make it worse (and even more confusing), it is shown trying to eat a baby whale like a killer whale would, despite its lack of teeth.
* The Snorks is a great example of this. They have Shellovisions, not Televisions.
* The Snorks known as the Snailsman shows up occasionally to sell items to the characters. Said merchandise has some kind of drawback and when the buyers complain about not being told, the Snailsman would reply that they never asked.
* The Snorks, the main characters had to deal with a predatory species called Snork Eaters once in a while, but in one episode they introduced another character who was a Snork Eater Eater.
* The Snorks, Willie does this after saying "piece of cake". He takes the cake minus one slice and shoves it in his mouth.
* The Snouters: Form and Life of the Rhinogrades, a 92-page biology in-joke describing a fictitious order of mammals that walk, climb, dig and/or catch insects with their noses.
* The Snouters: Form and Life of the Rhinogrades, by the German zoologist Gerolf Steiner in 1957, may be one of the earliest semi-serious examples, as the book documents the bizarre endemic inhabitants of a fictional island chain, cartoonish shrew-like creatures that have evolved to do every conceivable activity with their noses (walking, eating, jumping, swimming, reproducing etc.). Despite the absurdity of the subject, the snouters are treated with absolute seriousness and strict scientific rigour.
* The Snouters: Form and Life of the Rhinogrades, however, is a large, shaggy herbivore with prehensile trunks to obtain food, essentially making it a counterpart of a woolly mammoth.
* The Snowball Express: Among the hordes of happy hotel guests, there's a married couple who complain about every little thing.
* The Snowball Express: John gets his idea about turning the mountain into a ski resort when Wally talks about riding all over it in his snowmobile.
* The Snowball Express: Shifty banker Martin Ridgeway is a champion snowmobile racer.
* The Snowball Express The next day, the ski lift is up the hill and installed.
* The Snowball Express: Triple subverted. Despite being a novice snowmobile rider, Johnny enters the snowmobile race, not necessarily expecting to win but hoping he can get one of the top three cash prizes. He ends up taking the lead in the home stretch, passing the local champion, Martin Ridgeway. Then, at the last moment,

Johnny loses control, swerves off-course, and doesn't even finish the race.
* The snow boarding races with Yeto. Aside from being just fun to slide down a snowy mountain, his wife is quite the speedy racer. Expect to spend hours training to get all the shortcuts in order to beat her record time.
* The Snow Cat Prince: A map of the Three Horizons can be found inside the book cover.
* The Snow Cat Prince: The seven cat princes who rule the land of Nordan speak English.
* The Snow Child retells the fairy tale of the same name. It includes excerpts at the beginning of chapters, owing to its obscurity.
* The Snow Creature in the series premiere "There's No Creature Like Snow Creature" is revealed to be a robot who is entirely made of a transparent lucite in order to appear as if it was made of ice.
* "The Snowfoot Waltz" by The Divers, a band made of professors, is a lovely example. The chorus:
* The Snow Has Stopped The Rain for this reason and immediately starts thinking about dissection.
* The Snow Has Stopped The Rain. Rukia, Ichigo, and Shirayuki all answer "Yes" in unison.
* "The Snow Job". Negligent home contracting job → nationwide foreclosure-related fraud.
* The Snow Maiden. Kupava wishes her best friend the Snow Maiden (shunned by boys because of literal frigidity) would too find someone who'd love her. Five minutes later, cue Kupava's own bridegroom dumping her for the Snow Maiden, publicly humiliating Kupava in the process.
* The Snow Maiden, Mizgir says this is the reason he dumped his passionate fiancée and went for her shy, reserved friend.
* The Snow Maiden the passionate and hot-tempered Kupava is the Fire and the shy and literally frigid Snow Maiden is the Ice. Interestingly, there is a double triangle: Kupava's fiancé Mizgir spurns her for the Snow Maiden while Lel, initially being in love with the Snow Maiden, grows tired of her coldness and goes for Kupava.
* The Snowman (2017), Harry Hole declares that the killer is playing games with them.
* The Snowman (2017) plays twin sisters Ane Pedersen and Sylvia Ottersen.
* The Snowman (2017), the killer leaves behind a snowman at the scenes of his crimes.
* The Snowman, but that still makes the ending a downer and a gut punch.
* The Snowman Cannon is for all purposes a full-auto, homing rocket launcher that sprays missiles like a machine gun.
* The Snowman, causing many Nightwish fans to believe that their version was the original.
* The Snowman only has the spoken introduction and the lyrics to "Walking in the Air".
* The Snowman. What makes this all the sadder is that this is the end of the film, and the melody plays over the closing credits, leaving the audience alone to weep.
* The Snowman, when the boy and the Snowman fly from England to the North Pole, they pass a cruise ship whose passengers are in the middle of a Christmas party. A reveler with a paper jesters hat on his head sees them through the window, gasps, and then gapes in confusion at the bottle of spirits in his hand. Amusingly, he's one of only two people who see the Snowman and the Boy flying, the other being a little girl who's up waiting for Santa.
* "The Snowmen" after losing Amy and Rory, and even stops wearing his trademark bowties. He gradually regains his senses, and it's when he realises he's wearing a bowtie again that he fully snaps out of it:
* The Snowmen, and "The Gaslight Murders", which featured the Doctor teaming up with a plucky Victorian Cockney girl companion (an early concept for Leela) to solve alien murders.
* "The Snowmen": Captain Latimer's first response when things start going wacky is

to head for the drinks cabinet. The Doctor pours himself one too... then hands it to the Captain.
* "The Snowmen", Clara knocks him for a loop by going back outside, walking around the box, then sticking her head in and saying, "It's smaller on the outside!"
* The Snowmen" had various parts of the 19th century old town in Bristol stand in for parts of 1890s London. This was both due to the more convenient distance and due to the fact that most of contemporary London lacks the late-Victorian street look and even continuity of Victorian buildings that Bristol still has in a few places.
* "The Snowmen". She gets goggle-eyed and runs around the TARDIS, the Doctor waits for it, only for her to say "It's smaller on the outside!" The Doctor is actually surprised and muses that's a new one.
* "The Snowmen": The Doctor's kiss with the Victorian echo of Clara is a sweeter example of this. While it catches the Doctor off guard, we get a sweet little melody playing behind it, some lights short-circuiting and a very surprised Doctor. The height difference is made very obvious as the Doctor is pulled down and his face afterwards... On the special "Creating Clara", the clothes designer commented on deliberately dressing both the Doctor and Clara as a couple for this scene.
* The Snowmen": The force field created by Jenny glows red whenever the Ice Governess it imprisons slams into it.
* "The Snowmen". The present-day Clara Oswald was also born 23 November.
* The Snowmen, with her nanny persona being an almost spot-on impersonation of Julie Andrews's Mary Poppins. Her present day counterpart is also a nanny when she first meets the Doctor, and takes her charges on an adventure with the Doctor in "Nightmare in Silver" (admittedly, because they blackmailed her into it).
* The snowmobile shootout: the "terrorists" fire on Stuart's men with blanks and switch to live ammo to shoot at McClane. That is impossible, as blank rounds can't generate enough gas pressure to cycle the action of an autoloader (which they were clearly using) without an adapter. Firing live ammo in a blank-adapted gun will destroy it.
* The Snow Queen (1995) and its sequel end with the Snow Queen glaring at the camera to show she's still alive.
* The Snow Queen (1995)'s sequel, the Snow Queen kidnaps Dimly to force Ellie to go to her castle. A similar thing happened in the first movie, but there it wasn't intentional.
* The Snow Queen (1995). The ending of the movie shows her body to be intact, but completely turned to stone along with her staff. Her eyes glow before the credits roll, hinting that she is still alive.
* The Snow Queen (2012), Gerda and Kai's father tries to outrun the North Wind's wave of ice. After a while, it catches up to him and kills him and his wife.
* The Snow Queen (2012), Gerda sees a vision of her parents that say this.
* The Snow Queen (2012) takes place in a world conquered by a totalitarian Snow Queen, who has brought on a new Ice Age, and also banned art.
* The Snow Queen (2012), the Snow Queen controls the powerful North Wind.
* The Snow Queen (2012). The Snow Queen jokes about Vergard and Una's frozen bodies after killing them.
* The Snow Queen added by an old sorceress) where it's always summer, but when she manages to come to her senses and escape, the world beyond its walls has gone from spring to autumn.
* The Snow Queen, Aleksia's job is to arrange happy endings in her fairy tale kingdom, and it's often easier if her clients don't realize what she's doing. To do this, she's providing yet another instance where ideas are being given and created as someone else's idea. This could be useful in demonstrating the trope.
* The Snow Queen by Hans Christian Andersen, the main character Gerda rescued her friend Kay from the Snow Queen, after he was inflicted by a shard of the devil's mirror and turned cruel and cold-hearted. But when they arrive back home in their garden, they turn to find themselves both adults. Poetically, the whole adventure portrayed their adolescence.
* The Snow Queen, Elsa is a human who was born with the ability to create and

manipulate ice and snow.
* The Snow Queen, Gerda's journey is implied to take place over years; she and Kay have both grown to adulthood by the time they reach home in the end. In the film, they stay children from beginning to end.
* The Snow Queen Given the series' tendency to flip tropes up, down, and sideways, there's more to this situation than it initially appears.
* The Snow Queen has a very similar premise: an alien species can be killed for a serum that prolongs life.
* The Snow Queen involves a mirror that reflects only bad things. It does technically reveal things about people that are hidden but more importantly it hides the whole truth.
* The Snow Queen is evil because she once killed one of her sisters with her powers, and the other sister sealed her away in an urn. She eventually discovers a letter from the sister telling her daughters to free her from the urn before she died. She has a
* The Snow Queen Series. On the planet Tiamat, only off-worlders are subject to the star-spanning Hegemony's legal system; any Tiamatans caught in crime must be turned over to the Snow Queen's justice. Unless it's a crime that would affect her or her plans, Queen Arienrhod usually simply releases the perpetrators. Thus, criminal enterprises on the planet generally need only use a Tiamatan front man or front woman to avoid prosecution. This is an endless source of frustration to Hegemonic Police Commander Jerusha PalaThion and her force.
* "The Snow Queen" shows how the eponymous girl became evil. Born as Princess Ingrid, she discovered her ice powers one day while protecting her two sisters. The powers grew as she got older and she opted to hide herself away to protect the kingdom.
* The Snow Queen, the eponymous fairy godmother is surprised to find the frozen heroes still alive. She realizes that the attack by the Icehart was explicitly magical. Other deaths were simply caused by subzero temperatures and were irreversible.
* The Snow Queen, the Snow Queen defrosts to Irma at the climax of the film.
* The Snow Spider can grow nearly as large as a full-grown horse and their poison can cause permanent blindness.
* The Snow Storm, where after you fight your way out of the hospital you can continue to push through the police on land, or take the easy route and jump in a nearby boat.
* the Snow White and Prince Charming. This was her reaction to deal with the news.
* The snow world also contains a snowman monster that spawns mini snowmen to attack the player, but only when the player isn't facing them.
* The Snow Wraith from has thermographic vision that overlays its regular eyesight. A few shots depict how it sees warm things, as shimmering blue-and-pink auras surrounding the heat sources.
* "The Snuke" features a bomb-sniffing pig to try to find the titular bomb during a campaign rally. Some bomb squads actually do employ bomb-sniffing pigs as well as dogs due to their strong sense of smell and the fact that they are less aggressive.
* The /sob emote displays a word balloon (not so) smiley face crying two streams of tears, with a torrent of teardrops falling down.
* The so-called “Ball Guy” (a person with a Poké Ball for a head). Their constantly smiling face combined with their masculine-looking body make it look like they came out of the
* The so-called "best" ending Synthesis, does a poor job of explaining why it should be considered the best.
* The so called "Big Crunch and Big Bounce" theory for how the universe will end—eventually, gravity will pull all the mass in the universe back to a singularity, and then a new Big Bang will occur, creating a new universe. While it's less likely than the "Big Rip" or "Big Freeze" theories, which state that the universe will die either by expanding faster and faster until everything's pulled apart, or reaching maximum entropy, respectively, some people prefer hoping for this one because it's the only one of the three that doesn't end with the universe

being dead forever.
* The so-called "brainwashed Superman" who was working for Darkseid in
* The So-Called Coward: A character is passive and non-violent, making them branded a coward by everyone, only for something to happen that proves otherwise.
* The So-Called Coward Samwell Tarly was sent to the Wall by his father because he liked reading more than fighting, and is one of the nicest characters, his father wanting their second son Dickon to become his heir. The Tarlys have a reputation as fierce warriors, especially Randyll Tarly, while Sam is a peaceful and kind person.
* The So-Called Coward they're just a scared, weak little coward. But they'll think twice after they prove them wrong.
* The So-Called Coward: They think I'm a coward, huh?! Well, it time for me to refute them!
* The so-called "Divas Revolution" was considered by many fans to be a poorly-booked storyline, with the center being the rivalry among three-woman factions Team PCB (
* The so-called Four Founding Races, said to be extinct by the start of the series, all turn out to still be around in some corner of the world. The
* The so-called "Grey Court" (classic Dracula vampires) are, as their Marvel counterparts, descended from Varnae, an Atlantean experiment
* The so-called "Heidi Game" of American football, where the game was cut-off with 65 seconds to go and the score 32-29, Jets-Raiders, in favor of NBC showing
* The so-called "Hermit Challenge" is particularly difficult; it requires six of the seven embarking dwarves and every single immigrant to get killed off and caravans to be ignored or killed. This amounts to a
* The so called Jaghut War on Death is said to have happened millennia ago. The only source of information on that is an undead dragon in the
* The so-called "Sleeping Beauty", Rosalia Lombardo, a little Italian girl who died of pneumonia in 1920, was embalmed by the noted Italian mortician Alfredo Salafia with a chemical cocktail composed of a mixture of formalin (to kill decay-causing bacteria), salicylic acid (to kill fungi), alcohol (to dry the body tissues), glycerin (to balance the alcohol and preserve the body's tissues), and zinc salts (to keep the body rigid). Lombardo's body, still superbly preserved, can be viewed to this day at the Capuchin catacombs in Palermo, Sicily.
* The so-called "Wendigo psychosis" is a culturally specific mental disorder observed among several Algonquian peoples. It's specifically applied to cases where people kill and eat humans (often relatives) in circumstances where it doesn't make any sense, i.e. there's no famine whatsoever. This psychological category is very controversial, in part because Western society has cannibal serial killers too. Note: Cases do not always involve killing. Often, its simply taking a bite out of someone, usually whoever is sleeping next to you. Not that that's much better for the people involved mind you, as they are alive when the bite is taken. It must also be noted that it is considered imperative to kill these "Wendigo" infected people, leading to the Canadian government taking them away from their groups and putting them in psychiatric care. They don't display any unusual traits, and are largely kept contained to protect themselves from the attacks of others, as cannibalism was a major taboo in Algonquian societies, even
* The so-called witches of Salem were only officially proclaimed innocent some
* The Soccer Song., the singer just says (the equivalent of) "Nobody knows why." The line instantly went memetic in Germany.
* The Sociable, popular, hard working chick magnet Asino who is of average ability contrasts against the protagonist antisocial genius Chris from
* The Social Darwinist. After touching an amulet that was established to drive most humans into a mindless killing rage, his personality remained unchanged, the implication being that he couldn't possibly become any worse than he already was. Interestingly enough, he wasn't considered to be a bad ruler by the common people of Daein, largely due to his policy of awarding high-level positions to anyone of sufficient skill.
* The Social Darwinist as an excuse to torment anyone they believe to be weaker than them.

* The Social Darwinist: Distorts theory of evolution and related theories to justify wanton oppression.
* The Social Darwinist: It's survival of the fittest! Working together is so lame!
* The Social Darwinist: The strong survive, the weak perish, it's just the way things are.
* The Social Darwinist: The villain believes only the strongest should survive and that everyone weaker is better off dead.
* The Social Darwinist: We believe that the strong will survive and if you're not superior in every way of life like us, you deserved to be shamed, mocked, ostracized, and even killed.
* The Social Darwinist: You're a pathetic weakling, and I'm much stronger than you, so you don't deserve any mercy.
* The Social Expert is the most likely one on this list to exploit their social skills for their own purpose but also to support the team's purpose.
* The social hierarchy is rigidly recognized and enforced, even by the protagonist Iris. Marrying for love among the nobility is also considered as something rather foolish, though it's recognized that getting in the way of a Perfectly Arranged Marriage is a terrible idea. When Yuuri and Edward begin going against these norms they bring shame on themselves even if what they're saying sounds reasonable from a modern perspective if you don't pay too much attention to the context. However, in context, it's pretty clear that Edward is only saying this out of self-interest rather than any genuinely altruistic motivations and his hypocrisy becomes obvious as soon as he runs out of good arguments and falls back on being the prince.
* The socialite woman's reaction to Homer pushing her aside to catch an elevator: "How dreadfully rude! I do hope someone stabs him in the eye."
* The 'Social Justice Sally' meme targets hypocritical and self-righteous social justice 'activists' who just act exactly the same as the kind of bullies and bigots they claim to oppose.
* The social mobility in High Cromlech suggests that it is probably one of the most reasonably-ruled and egalitarian city states in Bas-Lag, which fits Melville's usual
* The Social Network, a Jewish character states that Jews like Asian girls because they're smart and not Jewish. The Jewish fraternity party seems to be entirely populated by Jewish guys and Asian girls.
* The Social Network: Dustin asks Mark if a girl in his art history class has a boyfriend. Mark starts to reply that people don't have a sign on them which says whether they have a relationship, but cuts his sentence short when he realizes that he can add such a feature through the relationship status on Facebook.
* The Social Network: Eduardo Saverin to Mark Zuckerberg's Protagonist.
* The Social Network. Erudite, Ivy League bluebloods who both manage to maintain straight A's at Harvard while training to row in the Olympics.
* The Social Network has been so overwhelmingly well-received that any damage Studio 60 might've done to his standing is utterly irrelevant.
* The Social Network if they have complaints about a certain scene, and provides the latter's email address (which is bleeped out).
* The Social Network. If you're writing out wicked smart equations, it's better if you can see through them.
* The Social Network in 2004, though the film's story begins a year earlier in 2003.
* The social networking website Foursquare has a badge called "French for 'The Moines'", given for exploring different places in Des Moines, Iowa.
* The Social Network It won the film an Oscar for Best Original Score.
* The Social Network. Mark and friends make a zipline from the roof (tied to the chimney) to the pool. After just two jumps the chimney breaks and the zipline falls.
* The Social Network or would simply have hired twins, but this film went the extra mile so that the twins could do things like walk around the frame in front of each other. Effective, but arguably not really required for a dialogue driven drama.
* The Social Network subverts this and plays it straight. It's somewhat admiring of

the technology we use today, and acknowledges the influence it has on society and why people would use it, but also notes how the people behind it usually don't have the best ideals...
* The Social Network that Mark Zuckerberg (the character as well as the real-life person) falls into this category, and is hardly subtle in demonstrating the irony of a man (or man-boy) creating a revolutionary tool for connecting friends and in the process driving away his own.
* The Social Network The most accurate bit of the film is the opening narration, where Zuckerberg describes how he's hacking all the individual facebooks at Harvard, lifted mostly from a real blog post Zuckerberg had made at the time. There was also the depositions given, the majority of it was most likely lifted word for word from the real transcripts.
* The Social Network Then she has the audacity to ask if he's going back to California - completed with a pouty face and big puppy eyes.
* The Social Network. The production team used an innovative VFX technique in which Hammer acted alongside a body double, Josh Pence, while his scenes were filmed, and Hammer's face was later digitally grafted onto Pence's face during post-production.
* The Social Network), this is how Eduardo Saverin's action of cutting off funds from Mark Zuckerberg, who has dropped out of Harvard to run Facebook from California with Sean Parker, is framed.
* The Social Network uses this as a major plot point: in its interpretation of Facebook's founding, Eduardo Saverin, who has been part of the company since the start, becomes aware of his business partner's attempts to minimize his contributions and force him out of the company. Lawsuits ensue. In real life Saverin has been candid that he didn't care so much about being on the Facebook "inside" as maintaining his deserved financial stake.
* The Social Network was a basic "Attractiveness Rating" web site piggybacking on Harvard servers, which was so unexpectedly popular it crashed the servers.
* The Social Network was completed, higher-ups at the studio decided that it was still too long and it needed to be trimmed down. Director David Fincher, however, liked the final draft as it was and didn't want to cut anything, so instead of trimming it down by cutting scenes, he trimmed it down by having everyone talk as fast as they possibly could. This upped the pace of the movie immensely and became one of the best-known aspects of the film after it was released.
* The Social Network Winklevoss twins, asks if they're related. It's not clear if he's being serious, and their "Never Heard That One Before" is friendly enough that it's not clear if they're being serious either.
* The Social Network: Zuckerberg. He cannot hold down a single topic in a conversation. He shows very little tact as well, as an offhand comment he makes to his girlfriend causes her to break up with him. In short, he is much more at home with his computers and code than he is with other human beings.
* The social services worker Cobra Bubbles is initially cold and aloof towards Nani and Lilo, even if he is sympathetic towards their plight, but he makes several
* The society influenced by Kelly during its Bronze Age eventually grows out of religious fundamentalism and embraces reason.
* The Society of Conscious Thought vessels, the Sunesis, Gnosis and Praxis, feature generous and balanced slot layouts and bonuses to all major weapon systems, leaving the choice of how to fit them entirely up to the pilot.
* The Society of Explorers and Adventurers storyline at the Disney Parks grew from a backstory for Tokyo
* The Society of Right and Harmonious Fists (more commonly known as the Boxers of the famous Boxer Rebellion) believed that through training, diet, martial arts, and prayer, they could perform extraordinary feats and become immune to swords and bullets.
* The Society of Righteous and Harmonious Fists (you might know them better as the guys behind the
* The Society Of S by Susan Hubbard, the main character Ariella finds out she is this. However, her mother became a vampire shortly after she was born, so it is somewhat of a subversion.

* The Society: Sam relates that Campbell once tortured a bird to death for fun, while Elle says he's inflicted pain on her for pleasure since their relationship began.
* The Society: Will's the only explicit boy of color we see in the town.
* The Sociopath about any other people around me, because they're all just disposable tools for me to exploit in order to get whatever the hell I want.
* The Sociopath: A character who has no empathy for other people and is willing to do anything amoral.
* The Sociopath: An individual who has no empathy for other people and has no problem hurting or manipulating others as they see fit.
* The Sociopath: A person lacking in empathy and morals can be capable of doing very evil, scary things without hesitation or remorse.
* The Sociopath: Completely self-centered and manipulative with no sense of right or wrong.
* the sociopathic, and the man sending the transmission is a former lover of Servalan.
* The Sociopath: I don't care about morality, empathy, compassion, or any other stupid human ideals. I only look out for me, myself, and I.
* The Sociopath, overarching egotism and grandiosity, ability to feign social cues to such an extent that it appears genuine to regulars, and willingness to escalate their depravity when they've grown bored with garden-variety cruelty are a lethal combination.
* The Sociopath, psychiatrist Hervey M. Cleckley decides that Alcibiades "had the gift of every talent except that of using them consistently to achieve any sensible aim or in behalf of any discernible cause."
* The Sociopath: Someone who is psychologically incapable of feeling any real empathy or compassion for other people will have no moral qualms about hurting them, if doing so can get them whatever they want.
* The Sociopath towards other people, allowing them to do evil deeds without feeling any pity or remorse.
* The Sock Obama of having a monkey, even a sock monkey, represent a black man, there was some controversy. They initially took the site down due to the backlash, but later gained some mysterious financial support and resumed business. There's a 50% chance it was White Supremacists having a grand vision of mocking Obama and 50% it was Obama who thinks that they're kinda adorable.
* The Socratic Method in action. The teacher is asking questions (75) of a class of third graders and illustrating its usefulness as an educational tool.
* The soft reboot has a more standard version added via a patch. As well as retaining all upgrades and loot from your initial playthrough, the game adds brand new gear to unlock.
* The soft-spoken "Mild Bill" spent his off-hours running a criminal underworld that stole rich peoples' yachts and conducted contract killings. He got caught as a result of a sting that the Oakland Police Department were doing on one of his acquaintances, a paroled bank robber, and initially his boss and others thought it was all a cover for him to do undercover work in jail until the truth came out.
* The software/database that allows one to find where a picture in New York was taken by measuring the skyline in comparison to a reference height (while the technique is sound, there is no such software).
* The software side is where the real "fun" begins. Software has become so user-friendly that the average user might think that loading up a computer is as easy as installing an "app". However, if the computer does nothing but beep at you when you power it on, you had better know what "beep codes" are.
* The software version of this is called polling. While there is generally no-one around to bother, it is typically considered a resource wasteful method and is only appropriate when it would be more expensive to set up a fancier event system.
* The Software Wars, we know next to nothing about this one, except that
* "The Soft War" of the Royal Guard and its general to prevent the execution.
* The Sojourn kicks off because of this trope. The Tantalus Star Cluster is located outside the main galaxy in the extragalactic void of space. In the series

backstory, this led to a resource crisis as the inhabitants of the cluster are cut off from their parent galaxy. The whole Avalon Expedition is about averting this, as they attempt to cross the massive void between the cluster and the galaxy.
* The Sokyoku is a phoenix-like creature that the Gotei 13 use to execute people in Soul Society. If a person is killed by it, their soul will be destroyed, rendering it unable to continue the cycle of reincarnation. Since the Gotei 13's entire existence hinge on maintaining the cycle (to the point of performing a genocide on Quincies because they caused a disruption on the balance), this is considered the ultimate form of punishment to unruly souls.
* the Solanum virus is fatal to all life, but only cause humans to turn into zombies. For anything else, it's just fatal and results in their flesh becoming unsafe for human consumption.
* The Solar Alliance reverse-engineers a downscaled version called the Tactical Paradox Warhead, a bomb capable of blowing up a planet.
* The Solar Exalted might have this particular category nailed; one of their abilities — Ascendant Battle Visage — places them into a battle-trance that physically changes them to reflect their
* The Solar Exalted, unsurprisingly, have a fair bit of light imagery - they
* The Solarian League Navy has spent literal centuries as the biggest, baddest space navy that absolutely nobody dares mess with. Unfortunately for them, this makes them complacent about their superiority, they fill their officer ranks through nepotism and cronyism far more than due to ability, and disregard the technological advancements coming out of the Star Kingdom of Manticore's and Peoples' Republic of Haven's bloody, decades-long war even as they're repeatedly warned of the potential threat either nation might pose. When Manticore and the League end up in a shooting war, the League almost universally sees heavy losses despite massively outnumbering their enemies because Manticore's missile technology has advanced to the point of being able to fire on League ships from well outside those ships' ability to reliably fire back, if at all, and commanders too stupid or stubborn to back off when this is made clear to them. The main problems Manticore has with regards to the League are literally running out of missiles before the League runs out of ships and, more seriously, that the League's much larger R&D program might actually start to match Manticore's capabilities once it has enough incentive to begin trying to do so.
* The Solarian League Navy's Frontier Fleet and Battle Fleet cannot get along either.
* The Solarian League's Eridani Edict also expressly forbid kinetic strikes on populated planets, unless you hold the orbitals, because the destruction caused by the sheer velocity of the missile is so much greater than any payload it could carry.
* The Solarian League's Office of Frontier Security is this as well. Theoretically, they exist to stabilize planets just outside the League's frontier, to smooth the way for them to eventually join the League and to ensure they don't become a source of
* the Solarian League's program to modernize their fleet does provide some improvements in technology, but many of the changes are merely to make the tactical and astrogation displays more photogenic, which also impairs the actual usefulness to the SLN personnel trying to read them while in battle.
* The Solarians are revealed to have a massive case of this when they are finally forced to go into battle against professional opponents instead of random pirates or beating up on isolated, underdeveloped and helpless planets.
* The Solarians have a wider taboo forbidding physical presence of another human in the same room for all but the most utterly necessary occasions. They feel disgusted by breathing the air which just went through someone else's lungs. Compare it to our disgust at drinking water from a brook someone has just urinated into in our presence.
* The Solarians, introduced two books past, have mysteriously vanished from their world at the start of the story, leaving only robots behind. Not even the other Spacers know how or why they left.

* The Solars gradually experience this as they become more and more godlike, from both the Great Curse and general detachment from humanity and less powerful divine beings.
* The Solars, Lunars, Dragon-Blooded and Sidereals all get various versions of the Great Curse, a psychological affliction thrown at them by the Primordials for besting them in war. The Solars and Lunars enter a brief psychotic period called a
* The Solar states that Amelyssan's soul will be completely erased after her defeat. The final cutscene sees her watching the magical space-floating Throne of Bhaal crashing and exploding on her.
* The Solar Storm of 1859 (a.k.a. the Carrington Event), which pushed both sets of polar aurorae down to tropical latitudes and caused telegraphs to fail all over the world (while some worked via induced current even after being disconnected from their batteries). If such a storm happened today, it could be devastating to the modern world.
* The solar system apparently has five suns (white, brown, red, black, and blue) that orbit around each other, each with their own planetary system, but despite them being close enough together to be the in the same system, you never see more than one in the sky at once. For once, sci-fi writers did have a sense of scale. The closest two suns are still about 70 AU apart — that's much farther than Pluto is from the Sun even at its most distant. The Sun already looks like a point from Pluto — it's still much brighter than any other star in the sky, but even that wouldn't be enough to overcome the brightness of a much closer star (all the inhabited planets in the Verse are much closer to their "parent" star, of course). Only one of the suns is bigger than the Sun (the central one) — the others are similar to the Sun or much smaller. They're in the same system, but it's a very large system — it has something like 400 AU across, and isn't even planar.
* The Solar System. Current theory instead says that Jupiter's gravity prevented the material in the asteroid belt from coalescing into a planet in the first place. This hasn't stopped the previous theory from popping up in Science Fiction stories, though, particularly in older stories or stories which aren't really all that "science-y" anyway, because a planet that blew itself up in a nuclear exchange ... or was blown up by someone else in retaliation ... makes a nice anvilicious Aesop.
* The Solar System. Nola Granville's soul enters the projector and creates a holographic image of her from a fetus to old age over the course of five days.
* The Soldier (1982). Ken Wahl's character is pursued onto the Israeli embassy grounds by US marines after breaking into the US Embassy. The Israelis order the marines to leave or they'll open fire.
* The Soldier (1982). The hero forces his way into the US Embassy at gunpoint and has them place a phone call to his superior in the CIA, who turns on his desklamp to take down the message. Unfortunately a terrorist has filled the bulb with a flammable liquid that explodes when the light is turned on, killing the man and preventing the Soldier from verifying his identity and passing on what he's discovered.
* The Soldier (1982). The title character is the leader of an elite unit formed after the "Iranian fiasco" and reporting only to the Director of the CIA. Which causes problems when he's assassinated.
* "The Soldier and Death" is a Russian folktale, retold in English by Arthur Michell Ransome and later used as an episode of
* The Soldier, as seen in the trailer. The Heavy Weapons Guy as well.
* The Soldier attack a convoy transporting nuclear material, to make an atomic bomb.
* The Soldier can earn an achievement for using the Buff Banner on his Steam friends called "Banner of Brothers". (The
* The Soldier/Demoman war was started in story because the Administrator hated friendships, and meta-wise over a new unlockable, which turned out to be a pair of boots that lowered explosion damage when worn.
* The Soldier enemies follow this pattern in every game they appear in, despite those games not doing this for other enemies. Green-armored Soldiers are the

weakest kind, blue ones are stronger, red ones stronger still, and gold and grey ones strongest of all. This convention mirrors the green/blue/red progression of the rings/armor Link finds as protective gear, since they are human warriors wearing armor rather than monsters.
* The Soldier even has a shovel (the Market Gardener) that's built for this trope, which will reward you with a
* The Soldier features a scene in which a character has a sawed-off shotgun strapped to his arm and hidden by his sleeve. When stopped by a policeman or security guard and asked to put his hands up, he complies... and uses the gun to shoot the guard in the chest.
* The Soldier. In the ICBM base, the keys are only to open the glass panels covering two red-handled levers which perform the same function.
* The soldier in the opening sequence. He knows that he's going to die, but he fights as hard as he can to set off the Great Wall's torch-warning-system, and then stands up to the terrifying Shan Yu before his death. Thanks to him, Shan Yu fails. Without his warning, the Huns' entry into China would have gone unnoticed, and the Emperor would probably be dead because Mulan and company wouldn't have been around to save him.
* The Soldier is a classic Type I taken to comical levels. According to his backstory, he tried to join the army to kill Nazis and was turned down, so he bought a ticket to Poland and embarked on a "Nazi killing spree" that lasted until 1949... In other words, four whole years
* The Soldier is considered to be very well-rounded. He's designed for leading the offensive, but he's also vital for filling gaps while on defense. He has slightly below-average speed (that he can compensate for by
* The Soldier, it is entirely possible that Soldier only understands ass-kicking to involve the direct application of his foot to someone's rear. Sadly, he has not yet been given any melee weapons or taunt kills which involve him kicking people in the ass.
* The soldier manning the turret had a bad case of Tourette syndrome, causing him to swear every time he fired a shell.
* The Soldier on an extendable cable before answering the door. When they burst into the room, our heroes have to grab and hold down the airman's hand before knocking him out, so he won't release the button and set off an alarm.
* The Soldier's Battalion's Backup giving increased resistance against Sentry Gun attacks while active (50% reduction compared to the 35% reduction to everything else).
* The Soldiers centers around three poets who committed suicide, interspersed with Cold War and Nazi audio footage; one movement contains no music at all, merely one of the poets (Konrad Bayer) laying out his reasons for killing himself. Zimmerman himself committed suicide shortly after composing this piece.
* The Soldier's Cow Mangler 5000 zigzags with dealing reduced damage against Engineer buildings but its
* The soldiers go through the mansion of a Nazi grandee and find a large supply of expensive wine. After which they solemnly enact an Ancient Military Custom...
* The soldiers in Grenada who called in their situation from a civilian telephone, and had to give a credit card number before the call was relayed (after which a gunship came in to save them). This is certainly the inspiration for the
* The Soldier Son. After almost three books of stressing how bad it is for Nevare's soul to be split, he is finally reunited with Soldier's Boy and absorbed by an ancestor tree, together with his beloved Lisana. Is this the end? No, he is split again. Admittedly, that half gets back together with Amzil, marries her and inherits the Nevare estate, but wasn't it bad to have one's personality split? Other issues concern the discovery of gold that draw the Gernians away from the Speck lands: how long before they'll return? And finally, Nevare completely destroys the source of the Plainspeople's magic in the process, sealing their fate. This is given almost no attention.
* The Soldier Son Epiny deliberately runs away in the night with Spink to force her parents' hand.

* The Soldier Son trilogy acts this way. It's not a living thing, but throughout the entire trilogy it is attempting to force Nevare's hand.
* The Soldier's Peak DLC allows the player to unlock a few Grey Warden-specific abilities, which drain health in return for certain benefits. For example, the Dark Sustenance spell allows the Warden to sacrifice a small amount of health to gain a larger amount of mana. Warriors get an ability that weaponizes
* The soldiers were hurt or killed by only the bullets that bounced off of Hyperion.
* The soldiers who attack Ghidorah with assault rifles. Granted, it's just emerged for the first time in recorded history, but their experience with other titans and the durability
* The soldiers who pursue Rouvray and D'Argenson in "The Reign of Terror," are little more than murderous thugs.
* The Soldier: The heroes manage to infiltrate a U.S. nuclear missile site by posing as high-ranking Air Force officers. The subterfuge is aided by them having the proper access codes, a remnant of a nuclear fail-safe developed by the U.S. military being afraid that a potentially unhinged President might lock them out.
* The Soldier, the villains then drive a car out of the truck they arrived in and drive off in it.
* The Soldier up his sleeve with a wire attached to the trigger, so it fires as he raises his hands in surrender when confronted by a police officer.
* The soldier vs warrior dynamic is shown during the Priority Tuchanka mission. The soldiers Shepard, Victus, and Mordin (or Wiks) plan a complicated operation in which Krogan ground forces in Tomkah tanks and Turian fighters launch a combined assault on a Reaper to distract it, while a small team sneaks around it to the Shroud to release the genophage cure. Problem is, the warrior Krogans comprising the ground assault team don't do some basic soldierly tasks, such as ingress route planning, maintaining comms with the fighter wing to coordinate the assault properly, or having contingency plans in case the initial ingress got stalled (things are probably not helped by the fact that the turians and krogan had few reasons to be friends and many reasons not to be
* The Soldier vs. Warrior dynamic is shown most strongly in the Battle of Qohor. 3000 Unsullied stood their ground against a force of 25,000 Dothraki screamers. The Dothraki could have flanked the Unsullied, but instead charged right into them out of contempt for infantry. The Unsullied forces held out for days, repelling eighteen Dothraki charges and three attacks by Dothraki archers. By the end of it, the Dothraki had lost 17,000 of their number including their
* The Soldier, when a terrorist being held by Mossad gets dragged out of his cell and down the corridor to the interrogation room by his feet.
* The Soldier. When the Soldier reveals that his men have a nuclear missile targeted on Moscow, the KGB boss says he's full of it. The Soldier's only response is a laconic "Maybe". The KGB boss decides not to call his bluff.
* The Soldier (who never actually was in the army because no branch of the US military wanted the madman) is a jingoistic, nationalistic, homophobic, xenophobic, paranoid schizophreniac who in his youth went on a Nazi killing spree in Poland, starting in 1945 and ending in 1949... oh, and he collect severed heads of enemies and talks to them.
* The Soldier, who was never in any branch of the military and thus has no basic training to fail, "salutes" by making an L with his left hand. This is also an insulting gesture in several countries, implying that the salutee is a
* The sole black character who's particularly recurring, Eponine, only in later times started getting attention.
* The Solemnance Archive, being a Necron record, has been expanding for the last hundred million years as its undead robot master, Trazyn the Infinite, adds new objects to his 'collection'. Such curios include the preserved head of an Imperial hero and entire armies of soldiers held in temporal stasis to form dioramas of historical conflicts.
* The Sole Survivor can be played like this. The Sarcastic dialogue choices very often stem from how pissed-off, disappointed, or done with the world they've

become.
* The Soletaken are individuals with the ability to assume animal form. Most assume mundane forms, such as wolves or bears, but Eleint Soletaken possess the rare ability to assume the form of a dragon. There also exist the D'ivers Soletaken, who can split their mind into several transformed bodies.
* The solicited hero comments that the shapeshifter shouldn't have to pose as others to get people to like her. At this point, the (female) shifter goes into her default -
* The solicited hero will refuse to be taken in by trickery. (He may get punched in the teeth by the minion but at least his conscience is clean.)
* The Solid Gold Cadillac, composed of four stuffed shirts named T. John Blessington, Alfred Metcalfe, Warren Gillie, and Clifford Snell.
* The Solid Gold Cadillac ignoring it in favor of financial news. (The movie version averted this trope.)
* The Solid Gold Cadillac is a diversified conglomerate manufacturing everything from locomotives to clocks to bobby pins.
* The Solid Gold Cadillac, Miss Shotgraven suddenly breaks down in tears about the state of her own life. Mrs. Partridge suspects it has something to do with her boyfriend Mark, which Miss Shotgraven mutely confirms. Mrs. Partridge, after blaming herself a little for the situation, then asks Miss Shotgraven if she's told Mark, and she becomes verbal again:
* The Solid Gold Cadillac, Mrs. Partridge cleans out her office after getting fired, withdrawing some very unlikely objects from a bookcase and from the filing cabinet.
* The Solid Gold Cadillac serves no purpose except to allow whoever is playing McKeever to overact ludicrously.
* The Solitaire Mystery. The main character's mother, Anita, has left them to find herself, and the protagonist and his father are taking a road trip to Athens to get her back.
* The Solomani Confederation, even though they no longer control Terra,
* The Solstice War are treated like they would have been in World War 2: shoot the sides or the back if you can, because the strongest armor is on the face. However, larger guns have better penetration, and characters rightly fear a gun of 100 millimeters bore or larger for its ability to destroy tanks outright.
* The Solstice War but most obviously, Leander loses Bika village a few days after becoming a citizen and settling down, this on the heels of being exiled from his home.
* The Solstice War but only the Ayvartan Civil War and the Nocht Unification War have been explored the tiniest bit in the story (through short flashbacks). At one point a character has a flashback of a dozen conflicts, suggesting a long history of Great Off-Screen Wars.
* The Solstice War is especially worthy of title, being seemingly indestructible if mechanically unreliable.
* The Solstice War is nominally "Military Fiction," but it also has the trappings of dieselpunk, epic fantasy, alternate history, period romance, queer fiction, and even anime.
* The Solstice War is one. Fitting since everything's a historical reference.
* The Solstice War. On the Ayvartan side, Major Gowon uses the army to do his chores and the country gets invaded on his watch, while several unnamed officers are slaughtered in the battle for Knyskna. On the Nocht side, Von Sturm is a pretty dubious leader, and Colonel General Ferdinand cares more about his shares in tank-producing companies than winning battles.
* The Solstice War seem to be borrowing from this trope. Noel's Strike Ranger tank was a prototype designed to cater to his tastes in tanks.
* The Solstice War, the eponymous city of Solstice, capital of Ayvarta. It has fifty meter high walls surrounding it on all sides, lies in the middle of a desert, straddling a river. In addition to standard military units, the city has three gigantic cannons known as Prajnas that can level whole streets.
* The solution? Spend a few hours converting sections of SkyTown into a gargantuan

nuclear weapon and countering Dark Samus' Colony Drop
* The solutions to dealing with such scenarios differ. Enlightenment advocates believe that
* the Solver posing as Butterfly loses his sword hand in his fight against Samantha.
* The Sombrero and Bloodfaced Volleyball as well, though they do do things...somehow. (though at least Sombrero is partially justified by being combined with a chicken's ghost.)
* The Someday Birds does this a lot. Davis calls it sideways swearing.
* The Someday Birds: Doodie, a bird at a parrot rescue, gets free of his leg leash, lands on Charlie's head, and poops. The worker has to clean Charlie's hair with wet wipes.
* The Someday Birds gets up early and sees two vultures start to eat a deer. After that, he loses his appetite for breakfast and considers becoming a vegetarian.
* The Someday Birds: The toilet in the camper is so foul-smelling that Charlie refuses to use it. When the travelers arrive at a convenience store, he rushes to the bathroom, only to find a concrete cinder block with no toilet paper and an empty soap dispenser. Charlie is so desperate that he goes anyway, but he can feel his hands crawling with germs, and insists on going to another public restroom ten miles away so he can wash his hands.
* The sometime foils to Buster and Babs, Roderick and Rhubella Rat. For example, they smoke in non-smoking areas (in most places that would get you thrown out), ban Buster and Babs from a public golf course (that they own), and in
* The Somewhat Cracked Mind Of Uchiha Itachi. He heals it afterward, but this incident along with Naruto learning the Shadow Clone jutsu is what convinces Tora to stop running away so often. Itachi's reaction to all this is to get drunk and have his first-ever hangover, while his temporary replacement, best friend and cousin Shisui, names Sasuke as his new favorite cousin.
* The Somewhat Cracked Mind Of Uchiha Itachi, Mizuki distracts Kabuto from attacking Naruto and Sasuke by talking about the Uchiha Clan being ostracized by the village and Danzo's machinations. Since Mizuki and Iruka were just chunins at the time, they had no idea how close to the truth he was.
* The Somewhat Cracked Mind Of Uchiha Itachi. Orochimaru himself had absolutely no idea he was coming off this way and was horrified when he was informed of it.
* The Somewhat Cracked Mind Of Uchiha Itachi them, which is a problem because most female Academy students were fangirls. Sakura and Ino even originally joined the summer camp as fangirls of Sasuke, only to break out of that mindset as they came to know Sasuke as a person along with being influenced to focus on their ninja careers more.
* The somewhat infamous Anonymous Raw General Manager. He'd send his directives via emails to a laptop on a podium that Michael Cole would read out loud. His identity was eventually revealed as a joke long after the bit had been dropped.
* The somewhat less hazardous dextroamphetamine (normally marketed as Dexedrine) is used for similar purposes by most air forces to this day, under much closer medical supervision. It remains controversial, however, being implicated in at least
* The somewhat-sequel has the Blacker Baron, who's just as strong as his predecessor and twice as black.
* The somewhat similar Yellow Claw in modern Marvel comics continuity (originally from 1956) still exists; however, the old coloring is lampshaded with a remark in the
* The Somewhat True Tale of Robin Hood features a narrator called the Town Guy, who "manages to work his way into every scene whether he belongs there or not," constantly snarks with Robin and is even buddy-bud enough with the stage manager to control the scene transitions.
* The Somme was really an attempt to force the Germans to refocus away from Verdun, another really lossy battle.
* The so-named Ming vases aren't priceless at all, as their name comes from the fact that if you run your finger along the edge, it goes

* The son and father who get involved in the wrestling celebration in the village are another example. Ironically, neither of them are even all that good.
* The song "1985" by Bowling For Soup is about a woman stuck in the past, namely the year 1985, who is described as being this trope ("Where's the miniskirt made of snakeskin?/And who's the other guy singing in Van Halen?").
* The song "A Bag of Weed" includes the lyric "When stupid people need a thrill, they rent
* The song "Across the Rainbow Bridge" by Swedish melodic death metal band
* The song "Actual Cannibal Shia LaBeouf" by Rob Cantor is a mock horror about being stalked by
* The song "A girl's going to Atocha" starts off describing the titular girl's pretty hair, the combing of the hair, the pretty gold comb and glass hairclips and so forth. Then suddenly:
* The song "Ain't There Anyone Here For Love" in the film version of
* The song "Alarm Clock" by The Rumble Strips deals with exactly this:
* The song also implies that Mick Jagger is Satan, or at least the generation of rock he embodies is Satanic.
* The song also returns in the next mission, being sung by a chorus of friendly fighter pilots as they fly in formation with the player's squadron towards the final battle. The mission's proper BGM doesn't even start until after the singing is over.
* The song appears to be about living in a crumbling, decadent, totalitarian empire. Take your pick whether it's the Soviet Union or Microsoft.
* The song "Bad Boys" by reggae group Inner Circle is often thought to talk about cops, and when you look at the big picture about this song, its message is "When you're caught by the cops, you're pretty much dead".
* The song "Barney's on Fire" by Tony Mason is all about this, to the point that even the audience delight in the gristly spectacle and actively refuse to help, even though they're aware there's a perfectly normal actor in that suit
* The song "Barricade" by Stars is occasionally, and erroneously, taken to be about a pair of revolutionary lovers who are torn away from each other by The Man. It's
* The song "Beg, Borrow, and Steal" by Ohio Express is all about how he'd rather do those three things for a living than go back to his
* The song "Big Rock Candy Mountain" by Harry McClintock depicts a hobo's version of paradise, with cigarette trees, hens that lay soft-boiled eggs, wooden-legged cops and rubber-toothed bulldogs, where the boxcars are empty and the "bulls" (railway police, whose job it was to protect railroad property and often booted hobos from trains) are blind. The
* The song "Big Yellow Taxi" by Joni Mitchell (covered by The Neighborhood and Counting Crows, and others) has this theme. From the Counting Crows version:
* The song Blood on the Risers also serves to illustrate another purpose behind a lot of Gallows Humor: the
* The song "Bust Your Windows", also by Sullivan, is about a woman who destroys her boyfriend's car after discovering him cheating.
* The song called "The Merry Go Round Broke Down" created by Cliff Friend and Dave Franklin is better remembered as the music for the
* The song "Cat's in the Cradle" by Harry Chapin focuses on a father who is far too busy with his work to connect with his son. By the time the father has the time (i.e. the son has grown up), he tries to reach out to his son and atone, but by then, his son is, like his father, far too busy.
* The song "Cellphone Vigilante" by The Arrogant Worms has the protagonist doing this to people's cellphones going off in appropriate situations.
* The song "Come Back To Me" is set through the dumped's POV. However, despite the title, the lyrics suggest that the person accepts that their
* The song "Convoy" ends with a 1000+ truck convoy (and "Eleven long-haired
* The song "Courtesy of the Red, White, and Blue." Is it a genuine (if a little overheated) expression of
* The song crossed over and became a hit in the United States, but it was

* The song "Cult of Personality" was successful back in 1989, winning a Grammy for Best Hard Rock Performance for the band
* The song "Dance Little Jean" is about a girl whose parents are finally marrying.
* The song "Dang, Fetch, Oh My Heck" by the Mormon boy-band Everclean is full of this trope.
* The song details a transition; for one of the clones, it starts with embarassment:
* The song "East Bound and Down" by Jerry Reed, and covered by him and many other bands like The Road Hammers, is the theme song for
* The song "Falling Down" by CunningLynguists is about three people who have a really, REALLY bad day on the same day, and eventually collide. In the beginning, a annoying radio DJ announces a traffic jam, then directly insults the listener, and to top it all "We're gonna play three full hours of the Baha Men!"
* The song "Flappie", by Dutch comedian Youp van 't Hek, was originally (in 1981) intended as a parody of Christmas songs, both contemporary and the older carols, and mostly of the fake 'Christmas spirit' people felt they needed to put up. Now most people don't realize that and play this song simply for the humorous lyrics (it tells the story of how a boy finds out his father killed his rabbit (called 'Flappie') to serve at the Christmas dinner). It's even a staple of the Christmas songs played on radio and in malls.
* The song "From Shadows" is a powerful song with hard rock and metal elements as the singer speaks of revolution — of the down-trodden rising up from darkness to take back what's rightfully theirs. However, the introduction and close bookends a song of revolution with a slow and lonely piano solo.
* The song "Früher war alles besser" by German mittelalter band Saltatio Mortis mocks this trope. It starts out seeming like another song reminiscing about the good old days, when everyone could find a job and the banks weren't corrupt, but the chorus tells everyone to stop thinking in such a way. It even outright calls anyone who believes in the 'good old days' an idiot. The claims about how things were better in the past get progressively more ridiculous as the song goes on, getting to the point where it's claimed that back then, the ice never melted in your drink.
* The song "Gay Boyfriend" by The Hazzards is the crystallized essence of this trope.
* The song "Get Up Lucy" by Thee Michelle Gun Elephant has a similar effect on the listener. Why won't Lucy get up?
* The song "Ghost Story" by Charming Disaster is about a woman being haunted by her husband's ghost, because he promised he'd never leave her. It's actually very romantic and sweet.
* The song "Hardware Store" is about someone being super-excited about the opening of a new hardware store.
* The song "Haus of Holbein" saw popularity on TikTok, specifically due to a trend that involved showing off the tightness of a corset set to the verses "You bring the corset, we'll bring the cinches / No one wants a waist over nine inches". Except the song in question is actually meant to poke fun at the harmful beauty procedures of the Tudor era — so much so that the verse in question is followed by an acknowledgement that the make-up at the time contained lead poison.
* The song "Hey Soul Sister" by Train, where the singer is in love with a woman.
* The song "Hey There Delilah," written by Tom Higginson of the group Plain White T's, is a charming love song about a long-distance relationship. However, it starts getting a little bit weird when you learn that the Delilah mentioned in the song is a real person, and that she never went out with Tom because she was involved with someone else. I'm reminded of
* The song "Ice Cream Man", by Sloppy Seconds, is all about this trope.
* The song "I'd Rather Have a Bottle in Front of Me than Have to Have a Frontal Lobotomy" is referenced in Tom "T-Bone" Stankus' song, "Existential Blues".
* The song "I Just Can't Wait (Till I See You with Clothes On)" from
* The song "Ikanaide" by Sohta featuring the Vocaloid Kaai Yuki, whose title translates to "don't go" from Japanese, is about someone who pretends that they

aren't bothered by a loved one going away on a trip/moving, but who internally wants to beg her not to go.
* The song in Jabba's throne room was "Lapti Nek", and it incorporated diverse Earthling styles, including adult contemporary, soul, and hard blues (played on a futuristic harmonica). As for "Yub Nub",
* The song in "Ripped Pants" overlays SpongeBob and other characters over live action footage of the ocean.
* The song is also almost impossible to decipher unless you know something about 1930s culture. Gay meant rakish, and jazz was bad (or worse... ethnic!):
* The song is also used in a 2014 Cheverolet Cruze clean diesel car commercial: The ad starts with a man coming into a gas station where they greet him by name as the song plays. Then another man comes in and the song stops. He's got a clean diesel car so he rarely has to buy gas; nobody there knows
* . The song is Jean Valjean's lamentation that this is what he must resort to when his date doesn't end well.
* The song is metaphorical, though, using "cats" in the hepcat slang sense of "guys."
* The song is so popular amongst fans, that despite Slash publicly saying he hates the song, he still played it every night on his solo-tours, simply because the fans wanted to hear it.
* The song is spot on for what has happened in the show though, so it could easily be thought of as performed by the character.
* The song is way more likely to be recognized among punk fans for the cover version by
* The song itself is a prime example of Confederate Railroad's adeptness at performing Christian-themed ballads and good-time southern rock.
* The song "I used to love H.E.R" by Common just reeks of this trope. In this case Common is reminiscing about how Hip-hop changed with the times, but at a certain point it's clear he feels saddened by what it eventually became.
* The song Jeremy Messersmith wrote for Minnesota Public Radio's fiftieth anniversary, "Little Blue World":
* The song "John Jacob Jingleheimer Schmidt". Supposedly the reason for the long name is that the song's writer thought German-esque words were inherently funny.
* The song "King of Rock 'n' Roll" by bookish new wave act Prefab Sprout was about a 50's rocker who is forced to sing his one stupid novelty hit over and over to crowds who only want to hear that one song. In a sad bit of irony, "The King of Rock 'n' Roll" became Prefab Sprout's biggest hit in the UK (they had six other Top 40 singles, but none of them troubled the Top 20), because people only
* The song "King of Spain" by Moxy Früvous has the line "a palatial palace, that was my home".
* The song "Kiss of the Spider Woman", in the version presented in the revue
* The song "La concubine de l'hemoglobine" ("The concubine of Hemoglobin") by French rapper MC Solar: unbridled science entails war and wholesale destruction:
* The song "Lady Aberlin's Muumuu" makes reference to being "shaped like a lady is shaped".
* The song "LAMC", the entire song being a recording of one man's desperate struggle against the automated telephone response system of the Los Angeles Municipal Court. The song only increases in bizarreness as the song goes on; the selections get increasingly outlandish and the man's obvious frustration mounts (we never hear him talk, but the sounds of the button presses tell us all we need to know).
* The song "Let it Go" is about the joy and relief of no longer hiding a secret about yourself. This is open to interpretations including, but not limited to, coming out of the closet, either as gay, lesbian, bisexual, or asexual. Elsa's lack of love interest or any romantic inclinations in the films has added to this.
* The song "Lied der Partei" (hymn of the party) was the song of the Socialist Unity Party, the ruling party of
* The song "Life's Been Good" by Joe Walsh is probably the epitome of this trope. A brutally satirical song, it talks about the jaded life of a rock star, the

wreckage and damage he's left across his life while remaining oblivious to it all. In the end, the rock star sadly rues, "everybody's so different; I haven't changed."
* The song "Little Red Riding Hood" by Sam The Sham And The Pharoahs not only shows the tale from the perspective of the wolf, but also reveals that he only
* The song "Lonely Boy" by Andrew Gold is about a boy who believes he's this after his younger sister is born and his mother tells him they need to attend to her needs because she's a baby. He ultimately leaves home six months after his eighteenth birthday "to find the love he had lost." (Many of the details match up with Andrew Gold's own life, but Gold has denied the song being autobiographical.)
* The song "Long Black Veil", which provides our page quote, has a man whose alibi is that he had been in the arms of his best friend's wife. Rather than reveal this and disgrace her, he chooses to stay mum and die.
* The song "Lord, Mr. Ford" by Jerry Reed contains the following lines:
* The song "Los Putos Traterrestres" (Fucking Traterrestrials!), which portrays a quartet of martians as degenerated
* The song "Love Potion #9" (recorded first by The Clovers and then The Searchers, among others) plays with this trope, illustrating why, if you ever get your hands on a love potion, you should
* The song Love The Way You Lie by Eminem and Rihanna is heavily censored on radio stations to get rid of offensive language and references to violence against women. One line is usually completely censored, which inadvertently gives the message that committing arson is okay
* The song "Macho Macho" by Austrian pop singer Rainhard Fendrich is about a male example. One memorable line is "Er war zwar in der Schul' ein Depperl, aber des stört die Hasn nie"
* The song "Mamma är lik sin mamma" ("Mum is like her mom") by Siw Malmkvist was about how it's the woman's job to clean the house, do the laundry and perform all the household chores. Back when the song was released in 1968, it was considered to be a pretty progressive song because it came out around the same time the Second Wave of Feminism was in full swing when such "
* The song "March of the Varangian Guard" by the band Turisas is about (you guessed it) the Varangian Guard of the Byzantine Empire (see under "Real Life" below)
* The song "Maria Navarro" by Was/Not Was. Maria Navarro called 911 because her estranged husband had threatened to kill her. Dispatchers ignored the call and Maria died.
* The song "Marry the Man Today" ("and change his ways tomorrow!") from
* The song "Millie Pulled A Pistol On Santa" by De La Soul. Millie's father is raping/molesting her, but despite her pleas to her friends, no one believes her because her father is well-liked by the community. Millie gets her revenge by shooting him in cold blood...in the middle of a mall, while he's
* The song "Mi Novio es Un Zombi" (My Boyfriend is a Zombie) by Alaska y Dinamarka.
* The song "Mi novio es un zombi" ("My boyfriend is a zombie") by Alaska y Dinarama.
* The song "Minus the Machine" by 10 Years references this concept explicitly in its opening lines:
* The song "Miracle" by Cascada essentially begins this way. In fact, the first sentence in the lyrics is "Boy meets girl."
* The song "My Little Pony Friends," a song originally written as the end credits song for the
* The song never actually specifies what they're trying to move- it's generally assumed to be a piano, but it's left deliberately ambiguous. The
* The song "New Soul" by Yael Naïm was used by Apple to promote their Macbook Air laptop. The commercial was so popular it propelled her song to being her only hit in the U.S.
* The song "Night City", by The Sword, is about such a place — a metropolis on the dark side of a tidally-locked planet, ruled by slavers and pirates.

* The song "No Homo" by The Lonely Island begins as a defense and demonstration of this but then amplifies into ridiculousness.
* The song "Not An Apology" by Bea Miller is sung from the perspective of a punk girl who forms this trope with her boyfriend. It's quickly shown that they couldn't handle each other's contrasting lifestyles, and so the girl chose to break up with him.
* The song "November Rain" from one of the albums is about a rather sad, subverted version of this trope. The entire reason why Ranma is singing the song is because he's heartbroken over his fiancée, Akane, ditching him under the umbrella they were sharing with each other. Since him hurting her feelings was what caused her to leave, he laments throughout the song over how
* The Song of Achilles. They don't so often say words like "beseech" and "verily", but Madeline Miller does refrain from using contractions most of the time.
* The Song of Bernadette, based on the life of Saint Bernadette Soubirous, is basically "Too Good For This Sinful Earth: The Movie". Unsurprising given that Saint Bernadette is still regarded by the Catholic Church as this.
* The Song of Bernadette. This took place in 1858, and the French Emperor is shown declaring that an atheist is "the most stupid thing a sovereign could be", but the church is still plenty worried about anti-Catholic officials and journalists who try to use Bernadette's visions to stir up public antagonism toward the Church.
* The Song of Hiawatha brother Kabibonokka. In fact, nothing of the sort has happened, because Shawondasee has mistaken a yellow dandelion for a girl.
* The Song Of Hiawatha: Longfellow's major story about the Iroquois leader, is considered a national epic of the United States, and one of few measured up to the classics.
* The Song of Roland, an account of how the title character was betrayed at Roncesvalles.
* The Song of Roland (and because the actual Roland died in that battle), most of his wounds are somewhat self-inflicted things, like when his temples explode because he's blowing so damn hard on that horn in order to warn Charlemagne's army. Also he keeps fighting even when his brains are running out his ears and onto his army.
* The Song of Roland and other material related to the Matter of France. He betrayed Charlemagne's rearguard during the retreat from Spain, leading to Roland's death at Roncesvalles.
* The Song of Roland, both of which go rolling to the ground with each sword blow to the head. Roland also carries a gilded and bejeweled horn, Oliphant.
* The Song of Roland: The Battle of Roncevaux Pass was a battle where the rear-guard of Charlemagne's army was massacred in the Pyrenees by a small guerrilla force of Basque Christians. In this book, the battle is between a small Christian rear-guard and a massive army of Saracen Muslims, takes place in Spain, and ends with the entire Saracen army destroyed by the main body of the army. Really, the story only resembles the historical event inasmuch as Charlemagne's rear-guard was destroyed.
* The Song of Roland, the sword of Charlemagne's paladin, Roland. Said to be indestructible, in addition to containing various holy relics in its hilt, including a tooth of St. Peter, blood of St. Basil, and a hair of St. Denis.
* The Song of Roland, when Thierry fights Pinabel to prove the guilt of Ganelon.
* The Song of the Lioness, there are two kinds of magic. The Gift allows for things like starting fires, healing, and all the other active spells you can think of. The Sight is a passive magic ability allowing the practitioner magical insight into things they see. One character says that the Gift acts as a shield against those with the Sight. Three miniseries later, another character has the Sight so strongly she can see a great many things about people with the Gift.
* The Song of the Shattered Sands recounts an incident in the early days of Ceda's courier job. She ends up embroiled with two demigods and an inhuman monster that provided the wealthiest individuals in the city with Irindai (also known as the Cressetwing moth). The Irindai is a magical moth that's put in the mouth of its user. A victim is chosen and there's a ritual to activate the moth's ability, the

victim has their memories pulled out and imbibed by the user. Both victim and user find the moth to be addictive.
* The song "Ohrwurm" by the German a capella band Wise Guys is an Ear Worm sung
* The song "Open the Door, Richard" (first recorded in 1946) has this call-and-response exchange:
* The song, particularly the opening lines, are referenced in Bruce's very brief speech at Bannockburn during the final scene of
* The song Perpetrator Emasculation by British/German metal band Venom Prison is about force-feeding a rapist his own severed penis.
* The song "Pinkie's Brew" is probably one of the more literal examples, as it's about
* The song "Prince Charmless" is fairly well-known on the internet and even
* The song "Que no destrocen tu vida" ("Don't let them tear your life apart") by Los Prisioneros (also covered by La Ley) is about a person whose close friend and said friend's girlfriend are in this situation,
* The song "Que Sera, Sera (Whatever Will Be, Will Be)" has a tautology in its title (as well as chorus), though it seems to be paraphrasing Shakespeare (see above).
* the song "Rain of Brass Petals (Three Voices Edit)". Fittingly, many feel the song's lyrics refer partially or completely to Pyramid Head.
* The song "Ranchera" by Chilean group Fiskales Ad Hoc is about a guy who pisses in his pants and can't go to the bathroom to, uhm, "evacuate" the rest since he's stuck with his
* The song regularly labelled "Skrillex - Cinema" is actually a remix of a song by Benny Benassi (with vocals from Gary Go) done by Skrillex.
* The Song Remains the Same: Any songs in a dubbed work don't get translated.
* "The Song Remains The Same" had an angel go back to that time to try to kill Sam and Dean's mother before they were born in order to stop the Apocalypse. While she seemingly succeeds in killing their father, he is brought back as a vessel for Archangel Michael, who kills the angel.
* The song "Remember The Name" by Fort Minor uses this trope heavily. The chorus of the song goes:
* The song "Rude" by MAGIC! is sung from the point of view of a man who is distraught over the fact that his girlfriend's father refuses to give his blessing to their marriage. The young couple in the song eventually defy the girl's father and decide to get married anyway.
* The song "Runnin'" by The Pharcyde deals with this issue. The chorus repeats, "Can't keep running away... (Run Run)"
* The song "Sadie's Song" by Adrienne Young is a retelling of the traditional murder ballad "Little Sadie" from the perspective of the victim instead of the killer.
* The songs "Blame It On The Boogie" and "Shake Your Body (Down To The Ground)" are commonly attributed to Michael Jackson...who does sing on them, but they are by his band The Jacksons and not part of his solo work.
* The song "Scandalous Scholastics" by Gym Class Heroes is all about a 15-year-old boy pursuing a sexual relationship with his teacher, but with a humorous tone.
* The song "Schlaflied" (Lullaby) by German band Die Ärzte is all about this. While it's entirely in the style of a nursery rhyme, the lyrics are constantly getting gorier and more bizarre.
* The song "Show-Off" may serve as an in-universe-in-universe example: in the show within a show, Janet is a famous actress and notable
* The song "Silhouettes", which plays over the credits, describes the format of the
* The song "Silver Bride" by the folk metal band Amorphis is about a widower who creates a woman of gold and silver to serve as this. It was inspired by a passage from
* The songs "Indomitable Spirit", "Flying!", "Question." and "Conflict" (including remixes) have been removed from every digital release due to Konami licensing.
* The song "Sister Golden Hair" by America has a groom who doesn't show up for a

wedding that day because he isn't "ready for the altar"
* The song/sketch "Barbecue" by Dutch comedian Andre van Duin has this spoken exchange during an instrumental break:
* The song "Skinnamarink" ("Skinnamarink-a-dinky-dink, skinnamarink-a-doo") dates back to 1910, but is best remembered now as the theme of the Canadian children's show
* The Songs of Distant Earth features a spaceship with a built-in space elevator - the ship remains in orbit and lowers a cable to the planet's surface to take on or discharge cargo.
* The song "Son Don't Go Near the Indians" — The whole time the main character of the Western song is told "Son don't go near the Indians, please stay away." Reverse psychology plays its part, and he goes near the Indians — a lot. He falls in love with a girl there about his age. Near the end, they resolve to get married. Only then does his father explain that his actual son got killed by the Indians, so he stole one of their baby boys, the protagonist, and that his girlfriend is his sister. "And that's why I've always said — 'Son, don't go near the Indians, please stay away'"
* The song "Son of Man", by Phil Collins, is all about a boy growing up to being his own man, as seen in the film with Tarzan, while growing up to be an adult, learning to be himself rather than something he isn't, and to be proud of who he is.
* The song "Stakes and Torches (The Uprising of the Peasants)" by artist
* The song "Stan" by Eminem focuses on the relationship between the artist and an obsessive fan who, furious at his idol for not writing back,
* The song "Starring Role" by Marina and the Diamonds is pretty much this trope. To quote the first verse :
* The song "Stay" by Maurice Williams and the Zodiacs, although a top-charting record and featured in
* The song "Steamboat Bill" by the Leighton Brothers was displaced by
* The song "Stool Pigeon" by Kid Creole and the Coconuts is about a mobster who is convinced by the FBI to be
* The song "Strut" sung by Sheena Easton is about how terrible it is for men to look at women as sex objects. ("Strut, pout, Put it out/That's what you want from women"). When the song was used in an advertisement for a health club in the United States, every second line was deleted, resulting in the song having the
* The song "Sugar" by System of a Down has the lyric "Every time I try to go where I really want to be it's already where I am `cause I'm already there."
* The song "Suite: Judy Blue Eyes" by Crosby, Stills, and Nash has a short verse in Spanish at the end. Original and English translation follow:
* The song "Summer Rain" by Belinda Carlisle contains this in the chorus, as she is "whispering our goodbyes/waiting for a train/I was dancing with my baby/in the summer rain." The music video depicts a
* The song "Susanna" by Dutch band VOF De Kunst/The Art Company is about a man who is about to get close with his girlfriend (something he has been waiting for for a long time now), but then the moment is interrupted by a phone call from someone who dialed the wrong number. Afterwards, the romantic atmosphere is gone.
* The songs "When the Tigers Broke Free" and "What Shall We Do Now?" were both cut from the album of
* The songs "Without a Trace" by Sabbat and "Flight Nineteen" by Angel Witch are based on the Flight 19 incident.
* The songs "You'll Be In My Heart" and "On My Way" from their respective films
* The song "Teenage Dirtbag" by Wheatus has the line "Her boyfriend's a dick/And he brings a
* The song that plays in the background during this scene is "Live to Win" by Paul Stanley, one of the members of
* The song that plays in the opening ballroom scene of the Disney movie
* The song "That's a Woman" is sung by Ryan Kelly and Paul Byrom of the group Celtic Thunder and is about a misogynist who finally falls for one of the women he so greatly disdains.

* The song "The Crossing" by the band The Action Design is about this, and seems to indicate that their current incarnations may not be able to be together for long in this lifetime.
* The song "The Geek Gets The Girl" by American Hi-Fi is made of this trope.
* The song "The Irish Rover" tells the story of a massive sailing ship in the early 19th century. After spending a verse describing the immensity of the ship ("she had twenty-seven masts!") and two verses describing the crew, the final verse describes the ship running into trouble (either a mechanical breakdown or an outbreak of measles, depending on the version) and a mighty storm, ending the song with the line "Now I'm the last of the
* The song "The Legend of Wooley Swamp", by the Charlie Daniels Band, involves quicksand. A group of hoodlums murder an old man who lives in the titular swamp by beating him up and throwing him in a pond. When they turn around, they sink into a quicksand with the laughter of the old man's ghost ringing in their ears. The legend is that on certain nights, you can hear the hoodlums screaming and the old man laughing at them.
* The song "The Song of the Cebu" ends this way, to much annoyance on the part of Archibald and the audience in general (Jerry wanted his money back, but the show was free).
* The song "The Statue Got Me High" makes reference to spontaneous human combustion supernaturally induced by a mysterious statue.
* The song "The Twelve Days of a Guido Christmas" by The How You Doin' Boys is
* The song "This is Only a Test" by American punk rock band Pennywise opens on distorted television sounds and the line "This is only a test of the emergency broadcast system, this is the product of hysterical mass confusion."
* The song "Tim I Wish You Were Born A Girl" by Of Montreal laments this. The protagonist says that his best friend would make a good match for him, if only he was a woman.
* The song "Tosi Tarttuva Täytebiisi" ("Really Catchy Filler Song") by finnish group Allekirjoittanut (later
* The song "Tribute" is about the Greatest Song in the World, but isn't itself the Greatest Song in the World, so we don't know what it sounds like. The original version of "Tribute" includes a sequence from "Stairway to Heaven" at the point in the story where the Greatest Song gets played, which tips their hand just a bit, and in
* The song "Tu es nicht" by the German band "Die Ärzte" parodies this.
* The song "United Nations Star" performed by all five of the Allies, is basically "We ARE Struggling Together: The Song."
* The song version of "Jos Jotain Yrittää" by finish metal band Imperanon ends after a slowdown with the accordion trying to start the chorus once more and dropping into this trope.
* The song "Video Killed the Radio Star" by the Buggles, which relates to
* The song was actualized into a real demonic ice cream truck by a fan of the band from Minnesota. The truck is referred to as Hell General. General because it is made from an AM General postal truck and Hell because of where it supposedly comes from.
* The song was also used with rewritten lyrics by Courtesy Dealers, changing the lyrics to "If you need a car/or a truck or van/Who ya gonna call?/Go Courtesy!" Ditto for Appleway Motors, cutting more lyrics and changing the rhythm. Also, if you're from South Florida, Maroone Used Car Dealers. Or Bankston in Dallas. Et cetera.
* The song was first recorded by Barbara Acklin in 1968 and was released in February 1969, only making it to the lower reaches of the Hot 100 and #33 on the R&B charts. Here's where it approaches
* The song wasn't well-known when it was released and became better-known later on
* The song was once used by Sara Lee foods in a series of commercials to promote
* The song was used by a Malaysian chicken meat conglomerate called Ayamas to sell chicken produce.
* The song "When I was a Bimbo" by Sue Wilkinson, a humorous singer/songwriter of

the early 80s with a half-spoken delivery. The song is about a middle-aged ex-Brainless Beauty (clearly of the
* The song "When I Was Your Age" features horrible incidents from the narrator's childhood. However, given how outrageously over the top (i.e. physically impossible) all of them are, it's not likely there's any truth in them: "Then he'd chop me into pieces and play Frisbee with my brain/ And let me tell you, Junior, you never heard me complain!"
* The song "When the Waves Roll Out to Sea" was written but never made it into the show until the Swedish production, where it's sung by Molokov with entirely new lyrics (aside from being in Swedish).
* The song "Who Am I?": Valjean could easily let another man hang in his place, freeing him from worry about Javert forever and no one would ever know. But he'll know, and God will know, so he stops the execution and reveals himself, forcing him to disrupt his now peaceful and productive life to go back on the run from the law.
* The song "Why Don't You Do Right" refers to the year 1922 as being "twenty years ago", mathematically placing the story in the early 1940s or so. The 1961 cover by Julie London updates the year to 1941. However, the usual approach for modern performances seems to be to embrace the period and dress up the singer as a 1940s siren.
* The song "Ya Got Trouble" ("Trouble my friends, I say trouble right here in River city...") from
* The song "Yankee Doodle", so the legend goes, was invented by the British as a means to demean American troops during the French and Indian War.
* The song "Yukon" by Lindemann is about a personification of the Yukon River, who has cold blood, rough skin, a dark face and clammy hair, and goes dressed in mud. The singer tries to
* The song "Zangra" by Jacques Brel is about an officer stationed in a frontier fort who looks forward to the enemy attacking so he can become a hero. But years pass and the enemy doesn't come. Finally, he retires, and that's when the enemy shows up.
* The Sonia/Kazuichi/Gundham relationship appears to be setting up to some kind of conflict, perhaps by creating conflict when one of the three is murdered. Instead, Gundham murders someone
* The Sonic Amigos, a plush-based web show featuring characters such as Sonic the Hedgehog, Homer Simpson, Super Mario, and others getting into various adventures. It has to be seen to be believed. Here's the
* The Sonicor is a wrist-mounted crossbow that fires off blasts that ragdolls the enemies.
* The sonic screwdriver can do just about anything. Because it's sonic.
* The sonic screwdriver is a small handheld device capable of performing almost any task needed to get the Doctor out of a jam, including diagnosing injuries, locking/unlocking doors, hacking computers, blowing up security cameras, and, yes, even turning screws. The device works by flipping a switch and waving it at the intended target. Overuse caused the screwdriver to get removed from the classic series, but it was brought back and significantly strengthened in the new run. To compensate for its increased usefulness, they introduced a
* The Sonics recorded three albums in the mid-60s, before splitting up after
* the Sonic Stadium Message Board. (Of course, they had the aid of a translation of his Japanese bio...)
* The sonic sunglasses return in Series 10, as the Doctor starts wearing them in
* The Sonic Twitter account has also had a lot of fun with Game Grumps episodes of
* The Sonne In Splendour above). The accusation was highly political and there is no surviving evidence of this marriage, but his many known mistresses (not to mention how he met and married the inappropriate Elizabeth in the first place) may have helped sell the fear that the story could easily be true, given how well it fit his known behaviour. This resulted in his children being removed from the line of succession (with some of them being killed outright) and yet another war for control of England. This ended with Henry Tudor slaying Richard III and marrying their eldest daughter and child Elizabeth of York to secure the throne with all

subsequent monarchs of England being their descendants from 1509 to the present.
* The Sonny And Cher Show, Cher finds a stray thread on her dress and quips that it's held together by three threads, so stay tuned to see whether she finds the two others!
* The Son of Bigfoot: Bigfoot and his son both have this ability. It comes in handy when Bigfoot is injured.
* The Son of Kong features a giant cave bear attacking Denham and Hilda, it only fails to kill them thanks to interference from the eponymous son of King Kong, Kiko who defeats and drives it away.
* The Son of Kong has Carl Denham go back to Skull Island to find a second giant ape, who is thought to be the son of the original.
* The Son of Kong. Kong's son himself is a victim as well; officially, his name is Kiko, but the movie only uses nicknames like "Little Kong".
* The Son of Kong, the ship crew stages a mutiny because they don't want to go back to Skull Island. Egged on by the villain of the film, but then they throw him overboard too.
* The Son of Monte Cristo takes place in the the Balkan kingdom of "Lichtenburg", where the good Princess Zona (Joan Bennett) suffers from the advances of the unscrupulous dictator, General Gurko Lanen (George Sanders). The eponymous hero (Lewis Hayward) leads the revolution in the guise of "The Torch."
* The Son of Neptune by rainbow goddess Iris, who hasn't quite decided whether her personal creed should be...Buddhism or Taoism. Amusingly, Buddhism canonically sees nothing wrong with being a god and Buddhist at the same time.
* The Son of Neptune ending has a holographic scroll made by Leo being found by Percy, as The Argo II flies into Camp Jupiter, signalling that the Seven spoken of in the Prophecy of Seven are about to unite.
* The Son of Neptune he could die and then he's dragged out of the border while he's writhing in pain.
* The son of Ravana, Meghanada, later called Indrajit for his feat of
* The Son of Tarzan (1915) literally fits this archetype. The daughter of a French general and a "princess in her own right", young Meriem was kidnapped by Arabs, and rescued by Korak. The two then spent their teen years together in the jungle before being found by Tarzan.
* The Son Of Tarzan. The character was later adapted into various comic series, sometimes having solo adventures, sometimes appearing alongside Tarzan.
* The Son of the Emperor depending on the country, unicorns are either banned from using magic altogether or allowed certain weaker spells.
* The Son of the Emperor tend to be biased or simply incorrect about a number of topics. Mostly those concerning Equestria.
* The Son of the Emperor. They posses no magical abilites and tend to be afraid of unicorn magic or consider it unnatural. This eventually led to them banning the practice of magic for the most part, though the specifics vary by region.
* The Son of the Sheik, Pincher the mischievous vaudevillian deliberately chucks a banana peel under the strong man's feet during his act. The strong man falls down, and in the process reveals that his supposed heavy barbell is really hollow.
* The Sons of Ether/Technocracy split: Sons Of Ether are basically people who think that science should stay
* The Sons of Korhal form the Terran Dominion which is just as repressive as the Confederacy they overthrew. In
* The Sons of Liberty (or at least the ones that Hamilton associates with) in
* The Sons of Svanir ban all females from joining their cult and many imply it is because they are too weak. The actual reason is that Svanir, their spiritual ancestor, was killed by the Norn woman Jora which they view as a disgrace.
* The Sons of the Desert, the official Laurel and Hardy fan club, take their name from the titular Laurel and Hardy film.
* The Sons of the Harpy wage a shadow war against Dany's rule because she outlawed slavery in Meereen and they want it back.
* The Sons of the Harpy wear scary, golden masks and they are really malevolent men.

* The Sons of the Phoenix use phoenix symbology to represent their willingness to throw themselves into the fiercest flames of battle.
* The Sons of the Serpent changed their outfits a number of times but usually wore green, often with orange highlights, generally with a conspicuous circle or serpent's head on the chest.
* The Sons were involved in a bloody mob war years before the series began and although they won, they came out of it very weak and still feel the effects of it.
* The Sontaran baton is a device of Sontaran design that was carried by certain high-ranking officers of the Sontaran Empire. They are symbols of rank and status, as well as multi-function tools.
* The Sontaran Experiment", although ironically not the Sontaran costumes that the serial was written to reuse.
* The Sontaran Experiment" is handled this way, to save his reveal for a cliffhanger.
* The Sontaran Experiment standards, showing Tom mostly in head-and-shoulders closeup with his scarf covering his neck brace, and Terry in extremely long shots where the Doctor's face is pointedly avoided.
* "The Sontaran Experiment": The Doctor digs through his pockets for something he's been holding on to. "Never throw anything away, Harry." He can't find it. "It's a mistake to clutter one's pockets, Harry."
* "The Sontaran Experiment", the human spacemen use a 'future English' that sounds vaguely South African, with words like 'yunnerstan?'.
* The Sontaran Ordeal. The Doctor and temporary companion Sarana have trouble getting their head round the idea this is any different from normal Sontaran behaviour.
* The Sontarans appear to have one of these until UNIT figures out how their weapons are being disabled and rolls over them. Even without that (like with most of the new series), their prowess is very much an
* The Sontarans, a race of cloned soldiers, are implied to be this — they're born in "muster parades" and skip anything we'd call childhood, deeming twelve an impressive age to live to.
* The Sontarans have been at war with the Rutan host for at least 60,000 years of the Whoniverse's timeline (mentioned in both
* The Sontarans have no civilian population. The entire race is an army.
* "The Sontaran Stratagem" and asking her if she's called her family to warn them about the poisonous gas. Subverted since the Doctor knew from the start that this was a Sontaran clone and was using her to his advantage.
* "The Sontaran Stratagem" and have the device just fizzle out harmlessly while the Doctor looks disappointed.
* "The Sontaran Stratagem" ... and the device simply shuts down with a fizzle.
* The Sontaran Stratagem": Donna and Martha meet. The Doctor worries there will be a repeat of the events of "School Reunion", but since Donna has no romantic attachment to the Doctor and Martha got over hers, the two become pretty friendly and pick at the Doctor a bit, who ends up wishing they would fight.
* The Sontaran Stratagem": Donna says she's going home, so the Doctor starts dishing out a farewell speech... only to realize she's merely going for a visit.
* "The Sontaran Stratagem" for him...) addressed to General Staal is actually a secret message to Donna.
* "The Sontaran Stratagem" has a news montage about the noxious gas spewing from every ATMOS-outfitted car on Earth.
* "The Sontaran Stratagem" has Luke Rattigan, who is a millionaire and runs a "genius school" at the age of eighteen.
* "The Sontaran Stratagem" is mentioned, and now has a knighthood (this must've disappointed Nicholas Courtney greatly — he expected the Brig to have a peerage by now).
* "The Sontaran Stratagem": Martha interviews a hypnotized factory worker who responds to almost all questions with a monotone "I am here to work."
* The Sontaran Stratagem", Martha Jones is put into some kind of slime vat and a clone is grown from a nearby pod. The clone gradually becomes an independent being

and the Doctor is able to talk it into helping him save the day.
* "The Sontaran Stratagem": The Doctor says that Sontarans see themselves as superior warriors because the weak spot on the back of their neck means they must always face their enemies. Later, as UNIT is retaking the ATMOS factory from, the commanding officer spots one of the Sontaran leaders, approaches him from behind, and:
* "The Sontaran Stratagem": The Sontarans capture Martha and replace her with a clone. The Doctor figures out right away she's a clone, but pretends not to notice her obvious out of character behaviour (such as showing no concern for her family being in danger) because he doesn't want UNIT launching missiles at the Sontarans' ships, the very job the Sontarans themselves are tasking the clone with. He only drops the act after he tricks the clone into taking him to the chamber where the real Martha is being held captive, and the clone subsequently attempts to betray him.
* "The Sontaran Stratagem": The Sontarans' clone-template, which eventually becomes an evil duplicate of Martha Jones, is in a pool full of green goo.
* "The Sontaran Stratagem", the Sontarans hatch an uncharacteristically circuitous plan to bathe the Earth in gas which is poisonous to native life but nutritious to themselves, so that they can turn the Earth into a clone world for themselves on which to mass-spawn more soldiers.
* "The Sontaran Stratagem": UNIT and the Doctor are investigating ATMOS, a factory they believe is a front for alien activity. While Martha examines the workers and the Doctor sonics an ATMOS device, Donna finds something suspicious in their filings.
* "The Sontaran Stratagem" work as advertised on the surface, but their true purpose is to spew a noxious gas the Sontarans can use to turn Earth into a clone farm. This facet of its design is disguised by hiding the dangerous part one second out of time.
* the son was molesting his father, which the other friend later wrote and directed as his thesis film.
* The Sony leaks revealed that one of the proposed takes to help freshen up the
* The Sookie Stackhouse Mysteries: After the vampires have their coming out party we meet shifters, werewolves, weretigers, fairies, and several other supernaturals.
* The Sookie Stackhouse Mysteries always seems to follow this pattern.
* The Sookie Stackhouse Mysteries as a one of the vampire summit judges, but she's the main star of the various short stories and novellas that expand the supernatural universe of the books, often investigating threats to her vampire nest.
* The Sookie Stackhouse Mysteries books. He's her employer, and first indicated her interest when she got into her first serious relationship with another man. They're just good friends by now.
* The Sookie Stackhouse Mysteries, Eric often follows Sookie into the territories of other vampires. Since, as an important leader in his own territory, he is often not welcome elsewhere, he frequently assumes a false identity for that time.
* The Sookie Stackhouse Mysteries has Hotshot, a trailer park full of werepanthers.
* The Sookie Stackhouse Mysteries is able to physically overpower her opponent. Both parties lacking functional weapons, the fight involves "wrestling and punching and hair pulling" before the protagonist is able to pin the other girl down. A male character who arrives on the scene initially declines to offer help in favour of watching the show.
* The Sookie Stackhouse Mysteries. Later she meets the undead Tsarevitch Alexei Romanov, saved by the vampire who had been donating his blood to fight his hemophilia.
* The Sookie Stackhouse Mysteries. On the other hand, Sookie breaks up with/kills most of her past lovers before moving onto the next one, so it's not quite such a tangled mess. Not to mention, with Harris' habit of killing off characters left and right, there likely soon won't be any characters left for Sookie to even have a relationship with, let alone have to worry about sparking rivalries.
* The Sookie Stackhouse Mysteries series is built on this trope, with vampires.

There's even a special term for people who like to have sex with vampires: "fangbangers".
* The Sookie Stackhouse Mysteries: She's a luscious, highly desirable telepathic barmaid. He's a vampire suffering from anachronistic attitudes.
* The Sookie Stackhouse Mysteries She's a luscious, highly desirable telepathic barmaid. He's a vampire suffering from anachronistic attitudes. They Fight Crime!
* The Sookie Stackhouse Mysteries). Sookie doesn't need to touch people to read their thoughts, but physical contact makes it much easier for her to do so. There are certain people and supernatural beings that are far harder for her to "read" than normal, and she has to touch them in order to get something more than their general emotional state. Two telepaths touching can also amplify their powers - Sookie and Barry use their super sense to find victims in the rubble of the Pyramid of Gizeh hotel.
* The Sookie Stackhouse Mysteries) take place in a world where vampires have revealed themselves to the world following the invention of synthetic blood that takes care of all their nutritional needs. Other supernaturals slowly follow in their footsteps
* The Sookie Stackhouse Mysteries: The eponymous Sookie, who can't turn off her powers. She is forced to read the minds of people and see the dark underbelly of her town. Highlights include finding out abusive relationships, a woman who is married to a man but is actually a closeted lesbian, a teacher who has dark thoughts about abusing her students, and the nasty things people say about Sookie herself. Sookie never had control of her powers until she found Bill and the other supernaturals. She is pretty much the personification of this trope.
* The Sookie Stackhouse Mysteries, there's talk of investigating if athletes are of werewolf descent.
* The Sookie Stackhouse Mysteries: When Sookie Stackhouse gets ticked and revokes her boyfriend Bill's invitation into her house, it seems to put him under a compulsion to leave, as he "walked out with a sort of helpless look on his face."
* The Sookie Stackhouse Mysteries, where those who don't know her mistake Sookie for stupid, but those close to her know she hears thoughts.
* The soon-to-be Pirate King himself was offered this by a rival of his, Shiki. The two apparently had many disagreements and issues in the past, but Shiki was willing to ignore it if they could team up. Unfortunately, Roger had no interest in dominating the world.
* The Soothsayer does acknowledge that this will only happen if Shen continues on his current path. So he
* The sooty albatross is an odd example. They're devoted parents, but they can only recognize their chick so long as it's in the nest. If a chick winds up outside the nest for some reason, such as being blown out by a storm, the parents won't recognize it. They'll leave it to die even if it's only inches away from the nest.
* The Sooty Show, a British puppet show that has been on television in some form since the 1950s, has had plots recycled over the decades, particularly after a new host takes over. The current host Richard Cadell borrows a lot from previous host Matthew Corbett, who hosted from the 1970s through the 1990s after taking over from his father and making the show into sort of a surreal sitcom rather than a traditional puppet show.
* The Sooty Show episode "Amateur Dramatics", Matthew is surprised to see only two people in the audience as Soo had told him that there were twice as many people before. She says that previously there was only one person in the audience and now there are two, so technically there's twice as many. Later, when they walk out in the middle of the play due to finding it boring, Matthew is embarrassed at having the "whole audience" walk out on him.
* The Sooty Show has an episode called "Never Play with Matches," in which Sweep fails at practicing being a firefighter because he fails to locate the pretend fire. They later sing a song that defies this by telling the audience not to play with matches or fire.
* The Sooty Show ran roughly from 1952-2004 under slightly different title changes and presenters. A new series was broadcast in 2011 with a new presenter and premise

but the same core characters with another due in 2013.
* The Sooty Show recently made it possible to view the show in the US and elsewhere).
* The Sooty Show, Sooty and Sweep take delivery of their miniature campervan. Matthew is to get his own vehicle, and is overjoyed to find his own full-sized luxurious campervan...only to find it was actually the bicycle behind it.
* The Sooty Show, when Sooty and Sweep both get given jumpers that are too big for them, they try to shrink them in the wash but use too much soap powder and the laundry room fills with bubbles. Later, they didn't shrink, so they put them in the dryer but they shrink to itty-bitty size.
* The Sooty Show: When Sooty asks for sausage, egg, baked beans, chips and fried bread with jam for breakfast, Soo says that she doesn't want all that as she's on a diet - so no jam on her fried bread, thanks.
* The Sooty Show, which now exist only through TV recordings and limited official VHS releases, explaining in an interview:
* The SOPA bill was an almost textbook example of this trope. While many of the supporters say that they are only trying to cut down on internet piracy, the true intentions are essentially trying to censor the internet in the same way as
* The Sophix power gives Musa power over wind in the 4th season. She also has sound-based powers, which could represent air.
* The Sopranos: A 20-year old AJ starts a relationship with Blanca, a 30-year old single mother. His parents disparage the relationship (Tony because she's Puerto Rican, Carmella because of the age gap), but figure it's a good thing that she's at least Catholic. The relationship doesn't last; it's implied that while Blanca recognized that AJ had a good heart, she was better off with someone her own age. AJ becomes so depressed that he attempts suicide.
* The Sopranos, a common theme is various gangsters missing the good old days, when the Mafia had more power, men were more honorable and acted like "the strong, silent type". The flashbacks we see make it clear that men like Johnny Boy and Junior were as bad, probably worse, than the current generation.
* The Sopranos, Adrianna gets this idea from a late-night crime show and proposes to Christopher so she can't testify against him. Unfortunately, some clarification from an actual lawyer points out the flaws in this plan.
* The Sopranos", after Carmela reveals to Tony that she has been secretly in love with Furio for months. Tony becomes furious, and raises his fist, appearing to be just about to strike her. He then punches the wall behind her several times in anger.
* The Sopranos" after he's been arrested by the FBI and they're trying to get him to turn federal witness:
* The Sopranos, a girl on Meadow's soccer team attempts suicide by slitting her wrists. Turns out she was having an affair with the coach, who was leaving to coach on a college team.
* The Sopranos", A.J. keeps complaining about the breakfast Tony prepares until Tony takes it from him and dumps it down the garbage disposal, smilingly informing him "Now you got nothing."
* The Sopranos", AJ's friends shave his eyebrows off while stoned. It takes Tony a minute to catch on the first time he sees him.
* The Sopranos all theories of the significance of the "Kevin Finnerty" name, he has neither confirmed nor denied the Purgatory theory regarding the dream itself.
* The Sopranos almost spoil Tony's and Johnny Sack's plan to bail Hesh himself out of some hock with Junior, who has instituted a retroactive tax on Hesh's businesses upon becoming boss. Junior listens and "magnanimously" lowers the rate, and the back taxes owed to "three hundred". Before anyone else can react, Hesh says, "Two-fifty!" There's a moment of brittle silence, and then Junior smiles. "What did I tell you? Hang on to your cock when you negotiate with these desert people!"
* The Sopranos also deals with the post 9/11 environment in an interesting way. It started by doing the standard thing: removing the Twin Towers from the intro montage of Tony driving from New York to his home in suburban New Jersey. But then it starts to realistically discuss the effects it would have on Tony's world, as

Dwight Harris, the FBI Agent that had chased him for several seasons, is re-assigned to Anti-Terrorism. Tony then spends the remainder of the series trying to cultivate a relationship with him in order to trade info about potential terrorists (the only snitching his colleagues will tolerate) for leniency in the ongoing investigations into his syndicate.
* The Sopranos and other mental problems, which cause him to have panic attacks.
* The Sopranos: Any stripper we see on stage at the Bada Bing qualifies, unless, of course, one of them becomes part of the episode's plot.
* The Sopranos", a real estate agent refuses to do business with Tony, so he has some of his men park a boat next to the agent's beach house and play loud music.
* The Sopranos are either crying out for his blood, or at the very least, calling for him to be removed completely. Patsy is the only one to declare that he has no problem with homosexuality. While Tony does have a problem with it, he has a far bigger problem with the fact that Vito is extremely competent and makes him vast amounts of money and wants to keep him on in an indirect fashion. However, his most homophobic members start crying too loud for him to ignore. Though the decision is eventually taken out of his hand by an even more homophobic member of another family.
* The Sopranos are impossible-to-please dark-haired beauties with serious psychological issues, just like his mother. However the most damaged—and the most like Livia—was definitely Gloria (which Tony realized when she snapped at him "Oh, poor you!"—just like his mother!).
* The Sopranos. A ridiculously rapacious and cheap bastard. Comically absurd like many of his shenanigans.
* The Sopranos, but Furio does consider murdering Tony before skipping the country and going back to Italy. When Tony finds out, he has a contract put out on him.
* The Sopranos by a couple years) is that the former is in the first person, and the more famous latter version is in the second person.
* The Sopranos can make gangsters look so cool at times and so pathetically uncool at others. Working in the Mafia is shown to come with its perks, but we're also shown how much of the lifestyle is not so glamorous and sometimes even outright scary. Sure, Tony has a nice house and makes a lot of money, but he has to face his boorish family all the time (and vice versa), suffers from depression and anxiety attacks, and he always has to worry about his "friends" turning on him, maybe leading to his arrest or assassination. As Christopher finds out when he finally gets made, the promotion means that he's under even more pressure to earn and is given more responsibilities, when he was expecting it to make his life a lot easier.
* The Sopranos Carmela is angry with Meadow for covering up for little brother Anthony getting a downtown hotel room and getting drunk with his friends; Tony responds, based on his own childhood, that that's what big sisters should do.
* The Sopranos, Christopher has a new girlfriend, Kaisha; he tells his boss Tony that he's never brought her around because he doesn't want to deal with the racism of the other mafiosi. A couple scenes later, we realize he was lying; his girlfriend is actually Julianna, the hot realtor that Tony has been unsuccessfully trying to hook up with.
* The Sopranos Corrado Soprano Jr. persuades a juror not to deliver a guilty verdict against him by having his assistant Bobby threaten the safety of the juror's family.
* The Sopranos crew are often found shooting pool in the Bing's back room.
* The Sopranos doesn't hold back on the profanity when Adult Mode is on.
* The Sopranos, Dr. Melfi helps Tony realize that his tumultuous relationship with his mother leads him to attempt relationships with women almost exactly like her personality-wise. His girlfriend of the season, Gloria, is arguably the worst in this regard (even using the same "Poor you" catchphrase as his mother), and the consequences are disastrous.
* The Sopranos - drugs, violence, male bonding, fatherhood, and diatribes about the emasculated state of contemporary Western society abound. Frequently subverts itself, though, by reminding viewers that most of the "manly men" in question are

in fact morally bankrupt human beings whose inability to express themselves in any way other than aggression makes both them and their families miserable.
* The Sopranos evolved into a fairly hilarious depiction of a lazy, entitled spoiled rich kid. He drops out of college, spends a lot of time sitting on his butt not working, does a whole lot of whining every single time his parents tell him to do anything, and never once looks like he's working towards any real future. The constant doting by his father (especially during a rough period of separation in his parents' marriage) doesn't help matters.
* The Sopranos famously ended with a mid-scene cut to black. This may or may not have signified the main character's death.
* The Sopranos for much of the series, initially appeared as a completely unrelated minor character in a season 1 scene where Christopher goes ballistic on a pizzeria clerk.
* The Sopranos from New York. Series creator David Chase says this was specifically to underline the fact that, in contrast to most gangster movies, it was not set there.
* The Sopranos going to approach Tony. He still isn't sure if he killed him or just talked to him or something.
* The Sopranos had a minor character like this who put a man in a coma for talking to his girlfriend. Christopher also had his moments over Adriana.
* The Sopranos" had Chris being abducted and mock executed by Russians while Meadow sang "All Through The Night" in the school choir.
* The Sopranos" had Junior Soprano, played by Dominic Chianese, singing an Italian ballad; Chianese is an accomplished tenor in real life. This is something of a subversion; while the adult characters are enjoying it, their kids are bored out of their minds. Meadow Soprano even starts heckling, and later describes the song as saccharine and cliche.
* The Sopranos has an episode revealing that Carmela and Meadow have a tradition of going out to a fancy restaurant wearing long gloves on her birthday. In the episode, Meadow decides that it's a childish custom and refuses to participate.
* The Sopranos has a safe that cracks in two after it is bashed repeatedly.
* The Sopranos has at least two episodes where a terrible, terrible stand up comedian shows up and performs one of the worst routines in the world. No one in the show finds him amusing at all, but the overall scene usually ends up being pretty hilarious.
* The Sopranos has Bada Bing!, a.k.a. the Bing, the strip club Sil Dante owns and manages as his front business. Tony's crew uses the Bing's back offices for meetings and the public side for general bar-ness. After Tony takes over the Jersey family, the Bing basically becomes a secondary HQ for the family (alongside Satriale's Pork Store).
* The Sopranos has the Bada Bing! strip club, complete with a pair of spinning bikini-clad pole dancers.
* The Sopranos, has trouble taking off his shoes at the security check-in and collapses. Following the reception, the newlyweds leave to go on their honeymoon, but their vehicle is blocked off by the U.S Marshalls' cars. Johnny has to return immediately, as he was granted more time at the reception than permitted. They put John in handcuffs and escort him, much to everyone's shock. John's daughter is heartbroken as she is forced to watch him leave, and he bursts into tears. His wife Ginny, horrified and helpless, collapses.
* The Sopranos. He denies the existence of the Mafia as a whole, claiming that it is a stereotype about Italians and that it is offensive, but he then grudgingly admits that his business does include some illegal gambling. The rest of the series sees him walking a very fine line with Meadow, since he continues to deny the existence of the Mafia but also sometimes goes out of his way to rub in the fact that her nice suburban life is financed by his criminal activities.
* The Sopranos. He snaps out of his when Big Pussy's son Matt tells him that Nietzsche was mentally ill and that he should study the works of other philosophers like Kierkegaard.
* The Sopranos. In the last half of season 6, an open war breaks out between the

Soprano crew and the Lupertazzi family under Phil Leotardo.
* The Sopranos. In the next episode, the jury is hung with a single holdout, leading to a mistrial — and that poor juror is hated by all the others.
* The Sopranos in today's Mafia, who tend to be shameless ass-kissers). At one point he tells his wife that there'd been talk of promoting him to boss instead of Tony when the role opened up, but he always saw himself as a consigliere, not a boss. When he had to serve as "acting boss" for a time while Tony was indisposed, Silvio was distinctly uncomfortable.
* The Sopranos" involves a lot of solemn oathtaking, pricking of fingers, and the ritual burning of an image of a saint. It's all done in a dingy basement in New Jersey, but between the ritual and the cinematography it could have been a church or a cave in Italy. (As noted in "Horrific" below, a prerequisite of Mafia initiation is generally committing a murder on behalf of the family, but all sources sugges this depiction is accurate as far as the actual ceremony is concerned.)
* The Sopranos, in which selfishness, myopia, and dysfunction are portrayed as the constants of the human condition.
* The Sopranos is a realistic example, until the cancer finally kills him.
* The Sopranos is probably the best known example: a high-profile, critically acclaimed show following the exploits of Tony Soprano, mafia boss, and the various members of his two families.
* The Sopranos is revealed to have started a relationship with one of the girls on her team. The girl even tries to commit suicide after learning the coach could be moving schools.
* The Sopranos is so dumb she believes a drug dealer when he says that the money from drug dealing goes towards poor children.
* The Sopranos), its increasing cooperation with other criminal organizations, and the laxity of certain Mob traditions.
* The Sopranos, "Johnny Boy" Soprano (a.k.a. Tony's father) plays an important role in several characters' backstories and appears in numerous flashbacks, but has already been dead for years by the time the series begins. Richie Aprile, while alive at the beginning, dies of cancer after a few episodes and only a few minutes of screen time, but continues to be talked about by his friends, family, and associates throughout the series.
* The Sopranos landscape both Tony and Johnny Sack's large homes for free. Feech apologizes to Tony and pledges his respect, but when he hears Dr. Ira Fried speak of his daughter's lavish, expensive wedding he organizes a mass hijacking of the guests' expensive cars, causing more headaches for Tony. Because he cannot have such a respected gangster killed, Tony has to resort to alternative means to get him out of the way. To do this, he has Chris and Benny trick Feech into storing stolen plasma televisions in his garage, then they tip off his parole officer. The last scene of Feech in the series is him on the bus to prison, catching as much of the outside world as he can before he returns to prison for the rest of his life.
* The Sopranos many an inflammatory comment is cushioned with the excuse of "just bustin' balls". Subverted in that this often doesn't help and many characters are hurt or killed for their "ball busting" anyway.
* The Sopranos mentions this to Tony in one episode when he comes home with a massive wad of $20 bills, which she comments is somewhat unrealistic for a plumber.
* The Sopranos, no one can come up with any touching memories to share. They endure a long awkward silence before Carmela finally chimes in.
* The Sopranos on his own life, Tony's behaviour, and his suspicions regarding Tony and Adriana having slept together. Carmela calls it "a revenge fantasy that ends up with the boss's head split open by a meat cleaver."
* The Soprano Sorceress and its sequels use their own body's reserves to cast; they have to eat like bargees just to keep their weight up.
* The Sopranos", Paulie Walnuts drops Valery's universal remote and gives a sarcastic oops after Valery tells him sternly (in his thick Russian accent) that "remote goes on docking station".
* The Sopranos", Ralph purchases a racehorse. His mistress, Valentina La Paz,

tricks him into stepping into horse manure; partly as a prank to make her and the others laugh and partly because according to superstition, accidentally stepping in horse dung is a sign of good luck.
* The Sopranos reveal that there were hints about it all along: every single one of Tony's previous panic attacks happened when he was cooking or handling meat while under more stress than usual.
* The Sopranos: Road to Respect has mediocre graphics, lousy game mechanics and has you playing Big Pussy's illegitimate son who gets to beat up a bunch of thugs by button mashing with the occasional character from the show cameoing for good measure (including your father's ghost).
* The Sopranos Rocco Sisto plays a younger version of Uncle Junior because the resemblance to Dominic Chianese is uncanny. The over-sized glasses help.
* The Sopranos said that he had been receiving flowers as condolence - for his own death!
* The Sopranos: Several - mob movies like those - but especially the one from the season 3 finale. It ends with half the cast bawling to Uncle Junior's Italian song - even though many of them accepted that the young man would get killed.
* The Sopranos: Several people tell Christopher right to his face that he's batting way above his league with Adriana and should be thankful that she's devoted to him.
* The Sopranos", Silvio pulls this with Tony when Tony seems willing to go to war with the New York mafia over his wayward cousin Tony Blundetto. Tony gives it right back to him:
* The Sopranos suffers a heart attack while constipated on a strip club toilet and surrounded by porn magazines. The series finale puts it best:
* The Sopranos", the heavily overweight Vito Spantafore orders a Grande Nacho and a Diet Coke.
* The Sopranos: The mafia action appealed to fans of mob movies (up to and including actual mobsters), the well-realized characters and drama appealed to fans of family dramas, the excellent acting, directing and production values appealed to film lovers, the excellent soundtrack appealed to rock lovers, the wry wit and middle-aged characters appealed to older audiences, and the complex themes appealed to intellectuals.
* The Sopranos' theme "Woke Up This Morning", if it wasn't for some distinctly British pronunciations in the opening monologue, you'd never notice.
* The Sopranos, the mobsters like to wear vulgar sportswear most of the time but they dress up according to their fancy businessmen status when the occasion requires it.
* The Sopranos. The reason why is all but spelled out, but Adriana herself doesn't get it.
* The Sopranos". The whole scene involving them is genuinely disturbing.
* The Sopranos, they are heavily involved in illegal construction, credit card fraud, identity theft, mortgage fraud, wire fraud, money laundering, and bribery. In many ways, this has allowed them to survive in a time where they are constantly embattled by the feds, the RICO law, and their own internal problems.
* The Sopranos to be covered up), but sometimes circumstances require that they address the aftermath. Usually when the victim is somebody that the mobsters can't afford to let it be known has been killed due to the risk of reprisals. The trope is explicitly discussed in the first episode, where Big Pussy explains to Chris why it's better for a dead rival mobster to "disappear" than for them to send a message by leaving his corpse somewhere it'll be found.
* The Sopranos", Tony and Junior are sampling some wine Furio brought back from Italy, which Junior grumps "reminds [him] of people's feet." After which, he continues drinking it.
* The Sopranos: Tony may be a thug and a murderer, but the most he does to his shrink is to swear at her and break her furniture. Still, Tony would have been much less attractive to the audience — and to Melfi — were he guilty of rape.
* The Sopranos", Tony resorts to this against a man who refuses to return him the entrance fee of a house that Tony no longer wants. The man lives by the sea so

Tony's men play invasive crooner music day and night from a boat with almost sheer impunity. The man finally caves in.
* The Sopranos. Tony Soprano's kid isn't concerned when told that the FBI might execute a search warrant on their house, until his sister points out that he might want to delete all the illegally-downloaded porn on his computer.
* The Sopranos Tony was more than happy to have sex with his rival Ralfies girlfriend Valentina but refused to make her his permanent mistress until he found out she never had sex with Ralf (due to sexual tastes being for S + M rather than conventional sex).
* The Sopranos" uses this somewhat. Fans have long debated whether the cut-to-black means somebody shot Tony, or if a deeper symbolism is in play.
* The Sopranos was a great show through and through, most point to the first season as its best overall.
* The Sopranos was set and filmed mostly in New Jersey. According to the creator, when he was trying to pitch the show to networks, various executives would often lose interest when he said that he wanted it filmed in New Jersey. He was later contacted by a producer from HBO, who was interested in the show specifically because the creator wanted it set in Jersey. (When Tony went to Italy on business, the show went there for real as well.)
* The Sopranos was set in New Jersey, and helped to reinforce many of the Mafia stereotypes. We should note, however, that most of the series takes place in Essex County, and much of the rest is in Hudson County, with occasional forays into other counties (most commonly Bergen, Middlesex, and Monmouth). To be somewhat specific:
* The Sopranos: When Tony's daughter realises they're likely to be raided by the FBI soon, she advises her brother to erase all that porn he downloaded off his hard drive.
* The Sopranos when Tony uses his belt to hit his corrupt congressman lackey for sleeping with his mistress. Even though he had (apparently) okayed it earlier.
* The Sopranos", while recovering from a severe gunshot wound, Tony notices that his old lieutenants don't follow his orders as readily as they used to, and he suspects that they now see him as weak. Tony responds by goading his hotheaded, musclebound bodyguard into fighting him. He kicks the everloving shit out of the much younger man in front of his entire crew, to their visible shock, then calmly walks into the bathroom and coughs up blood into the sink. No one questions his orders after that.
* The Sopranos: While talking to his therapist, Tony Soprano describes himself as a "Sad Clown": putting on a happy, joking face to his family and friends while keeping his pain locked away. His claims come across more as self-pitying than anything else, given his behavior throughout the series.
* The Sopranos, who in his mind epitomizes "the strong silent type", the ideal kind of American from a long-gone era. He's called on this by his number two, who points out he's mixing the real life person with the characters that he played. Tony still argues that the icon is what matters.
* The Sopranos with her head added with CGI, and playing lines Marchand had previously recorded.
* The Sopranos with lots of money can do that kind of thing. Subverted with Johnny Sack: due to his high rank in the New York crew it's assumed that like all the others he has a hot wife with affairs on the side. In season 4, however, we see that his wife is an obese woman whom he loves deeply and does not cheat on.
* The Sorcerer also has a rather bizarre cut: Lady Sangazure has a recitative in Act I that, unlike practically every other piece in Western music, fails to resolve to the tonic at the end, instead setting up an unused key change. This is because it was originally meant to transition into a cut song, and the recitative was neither revised or cut when the following song was.
* The Sorcerer class in the third edition is an inborn mage, as opposed to the Wizard, who has to nose through his spellbook in order to prepare spells. Many Sorcerers claim to have a dragon or other powerful being
* The Sorcerer: Dr. Daly, under the influence of the love potion, proposes to every maiden he meets, but each one refuses. (This happens offstage, but he sings a song

about it.)
* "The Sorcerer". During the episode the Sorcerer turns Jan and Jace into giant versions of the monkey Blip. At the end Jace says "He certainly made monkeys out of us." and Jan agrees with him. Blip takes offense at the insult and Jan apologizes, after which Jan, Jace and Blip all laugh.
* The Sorcerer from pursuing him. He admits in an audience aside that it's all a lie.
* The Sorcerer: "My Name is John Wellington Wells", "Love Feeds on Many Kinds of Food"
* The sorcerer Nevyn did some selfish things which resulted in his fiancée killing herself. When he learns that she will be reincarnated, he rashly swears "never to rest" until he has made restitution. It takes him 450 years to fulfill his promise, during which time she is reincarnated seven times. Nevyn's name literally translates to "no one" and this is played on several times. Including once when a guard tells Nevyn his lord will see no one. "Well then, tell him No One is here to see him!"
* The Sorcerer of the Wildeeps. Additionally, thanks to the aformentioned heritage, he is able to secrete a poison that in small amounts can act as an anaesthetic.
* The Sorcerer of the Wildeeps, but Demane mentions that Captain's been in the mercenary business for a couple decades already. His looks are very vague, age-wise, and his behaviour is that of a hardened veteran towards the band and that of an occasionally insecure 20-something when alone with Demane.
* The Sorcerer of the Wildeeps, Captain has a tic where he constantly, whenever he thinks that nobody's watching, checks if his head scarf is still in place and as tight fitting as always, showing not one strand of hair. It drives Demane mad, who thinks the scarf sits tighter than a virgin's drawers and besides, the repetition is likely to draw more attention to the gesture than Captain would ever want.
* The Sorcerer of the Wildeeps, Demane and Isa have to keep their relationship secret as homosexual relationships are a no-no in the northern lands (and much of the rest of the world). Demane is eternally frustrated about the lack of quality time they manage to have. Eventually, while on the road through the Wildeeps and in the middle of an unnatural winter, Isa snuggles up to Demane for warmth in the dark and Demane realizes that Cumalo either knew of their relationship or has just put the puzzle together, for he makes a pointed 'victory'-gesture towards them.
* The Sorcerer of the Wildeeps, the gods who were Demane's and Captain's ancestors are implied to have been visiting aliens whose magic was advanced technology; a lot of the words Demane struggles to translate when he's trying to explain things are technological ones, touching on medicine, genetic engineering, faster-than-light travel, and the like.
* The Sorcerer of the Wildeeps, two of the relationships Demane has been involved in so far have been with men, including his first love, but he also mentions almost marrying a woman at some point, and expresses some regret about not having done so. Though it's not entirely clear whether he loved her or it was just a 'she's been courting me for a year, that's got to mean something'-thing.
* The Sorcerer's Apprentice, about a girl in New England called Victoria who learns magic (with transformations included) in order to stop a series of monsters unleashed after she puts on an ancient ring. It takes a relatively realistic approach to the genre, both in terms of developing the magic system behind the transformations, and its focus on characterization.
* The Sorcerer's Apprentice about a music buff falling for a physics nerd. As a subplot to a modern fantasy film, it felt like it was duct-taped on.
* The Sorcerer's Apprentice after she dodges some plasma bolts thrown by the main character.
* The Sorcerer's Apprentice) and no indication is made that more are (or were) present.
* The Sorcerer's Apprentice can change according to his whims. Naturally, it gets cool.
* The Sorcerer's Apprentice, end with him taking a girl flying. The former occurs aboard a flying statue of a falcon, whereas the latter occurs in a small aircraft.

* The Sorcerer's Apprentice has this as well, with the main character having to hide his newfound magical powers.
* The Sorcerer's Apprentice has this problem, which is a major plot element. The titular sorcerer actually says this is a good thing, as good wizards are supposed to be truthful. This doesn't stop him from lying, although he's not that great at it either (sake is not Chinese).
* The Sorcerer's Apprentice in the mop shoutout scene. The camera cuts back to reveal that he keeps missing, despite what you saw in the shadow.
* The Sorcerer's Apprentice matter manipulation, telekinesis) is still fully visible. After the first couple of fights, the Masquerade isn't mentioned again, and the characters don't even bother trying to hide their magic anymore.
* The Sorcerer's Apprentice. One shows Chip and Dale wearing the outfit with Chip on Dale's shoulders. Dale appears to be having more fun than Chip.
* The Sorcerer's Apprentice) rigs tesla coils to discharge at a cage with Dave and the girl inside. The discharges make sounds that turn out to be playing "Secrets" by OneRepublic, a song previously heard on the radio. The actual song quickly picks up in the background, not through the radio this time.
* The Sorcerer's Apprentice said so at least once in the film when he was forced to take up the role of being a Prime Merlinian. Balthazar later revealed that his lover Veronica wished for the same thing as well.
* The Sorcerer's Apprentice :the lightning bolts make the same sound that the Tesla coil lighting makes in the film.
* The Sorcerer's Apprentice the main character's mentor explains that normal people must never know that magic exists. Later, an evil sorcerer creates a dragon that chases the main character through China Town. When police arrive citing reports of an actual dragon, the mentor, disguised as a fellow officer, says that it was just a bottle rocket hitting a paper dragon. Apparently that is enough to make the whole thing go away. Throughout the film, sorcerers throw powerful magic around with no one seeming to notice, although at one point a sorceress creates a flaming pentagram over New York and the hero's girlfriend literally can't see it, implying either that some magic is invisible to normals, or that normal minds refuse to accept it.
* The Sorcerer's Apprentice to defeat Morgana le Faye all happen to meet up in Manhattan.
* The Sorcerer's Apprentice to save Becky. Despite the consequences, Balthazar admits that he would have done the same.
* The Sorcerer's Apprentice. Twice. First, Balthazar traps him in the Grimhold. He escapes. Later, they were both sealed in a Chinese vase. They both escape ten years later. And the other Morganites; Sun Lok, Abigail, and Morgana Le Fay herself.
* The Sorcerer's Apprentice variety; one's a celebrity who undoubtedly has excellent security, and the other's a high-level student/researcher who has no need to learn self-defense.
* The Sorcerer's Apprentice, when Balthazar gives Dave the book, Dave marvels at how tiny and light it is. Balthazar then proceeds to unfold it several times until it's the size of an atlas, and hands it to Dave, who no longer finds it light. Balthazar then picks the top and lifts it and the book also becomes thick as a technical manual, nearly making Dave lose his balance.
* The Sorcerer's Apprentice, while not aging a day. In present time, he keeps an antique store in New York, having accumulated many items at the time when they weren't antiques.
* The Sorcerer's Daughter, and after the curse is lifted it takes almost an entire book for them to come to terms with their feelings and get together.
* The Sorcerer's Daughter is such a coward that he turns into a rat and tries to flee at the first opportunity, and is unceremoniously killed not even by Rothbart, but by a random soldier watchman who panics at the sight of the shapeshifting.
* The Sorcerer's Daughter quarrel, while Siegfried and Odile are sweet, tender and teasingly flirtatious. It has a lot to do with the fact that, for a number of reasons, Rothbart and Odette have a much harder time even admitting their feelings to themselves, let alone confessing them to each other.

* The Sorcerer's Daughter, Rothbart and Odette finally confess their love and share an embrace when Siegfried shows up and coughs tactfully... that is, tries to, forgetting his mouth is full of cherry stones.
* The Sorcerer's Daughter, Rothbart is defeated by Siegfried, loses his magic powers, gets imprisoned, and expects to be sent to the stake. However, he behaves calmly and with dignity the entire time. The only occasion when his resolve slightly falters is when he begs Odette not to make his daughter watch his burning.
* The Sorcerer sourcebook detailed many ways to play this trope out without being a full Mage from
* "The Sorcerer's Shadow", whose premise is a tournament which anyone can enter, we see a dual-wielding ninja-like warrior going up against Arthur briefly. Deconstructed: after a brief but impressive display of spinning swords by the ninja, Arthur punches him in his (undefended) face and knocks him down, winning the fight.
* The Sorcerer Supreme of the Masters of the Mystic Arts, an ancient organization of sorcerers dedicated to protecting Earth from the dangers of other worlds, is generally considered to be the most skilled sorcerer and fighter among them. True enough, the last holder of the title, the Ancient One, is a 700 years old immortal sorcerer who can deliver a
* The Sorcerer Yensid does this at the end of "The Sorcerer's Apprentice" in
* The Sorceress has been beaten a third time by MimiRiceCat. No Bronze Sausage yet, but the Sorceress has been upgraded
* The Sorceress's Orc, the orcs firmly believe that anger gets in the way of effective fighting. As a result, when the hero befriends an orc, she is way more angry at the racism he is confronted with on a daily basis than he is. Their enemies, all human, are rather more emotional than the orcs.
* The Sorcery in Warhammer is projection of psychic energy called Warp, and that energy comes from "condensated" emotions casted by souls and minds of sentient species. Its very similar to Force from
* The Sorrow and the Pity: A documentary about the German conquest of France in 1940, the difficulties of the next four years under German occupation, and how French people are still having problems dealing with it 25 years after liberation. Director Max Ophuls also takes time to interview some of the German generals behind that attack and the latter, despite Denazification cannot help but gloat about their victory.
* The Sorrow and the Pity", and a French aristocrat talks about how the Resistance tried to recruit him, but instead he decided to fight for the Germans and joined the Waffen SS.
* The Sorrow and the Pity: the Nazis and their puppets described all partisans in every occupied region as terrorists.
* The Sorrow and the Pity who claims to be an authority on Canadian media theorist Marshall McLuhan, telling a fed up Alvy that he teaches a course on McLuhan. Alvy's riposte? "Oh, do ya? Well, that's funny, because I happen to have Marshall McLuhan right here." Cue the actual Marshall McLuhan appearing from behind a pot plant to give the pretentious windbag a well-deserved dressing down.
* The Sorrows Of Satan, centers on the premise that Satan actually wants people to resist his temptations, because every human being who rejects him moves him that much closer to being allowed back into Heaven.
* The Sorrows of Young Mike). Both are tragic and worth reading, whether separate or in conjunction.
* The "sorry" emote was removed from the emote list (due to people using it sarcastically) however even after that every new hero released has still had a "Sorry" line recorded. Why? Because there's one joke card that randomizes your emote selection and that can generate the old "Sorry" emotes.
* The sorting algorithm seems to be based off the bosses' threat toward you rather than raw power level. The first boss, Toriel, is only trying to protect you from the other monsters, and attempts to avoid killing you outright. Papyrus is a
* the sort of things that Griffith is doing to Casca as he is raping her... It can only be described as pure sexual sadism

* the sort of things the Elves did with the stolen infants, he takes the trouble to manipulate someone else (a dragon) into going after Tony rather than facing him himself.
* The SOS Band abusive to the singer but he has a reputation for being a user, sees other women, and, possibly, does bad things to them. The singer professes not to care about any of that, won't try to change him, and will put up with him seeing other women as long as he spends time with her.
* The Sot-Weed Factor, by John Barth, is written entirely in the language of Queen Anne's era.
* The Sot Weed Factor, the poet protagonist and a friend have a rhyming contest at one point and the protagonist triumphantly does a short verse ending in month. Then, his friend does one ending in an obscure word, onth.
* The Soulbreaker Orb is a magical device that, when triggered, simply kills anything in a five-mile radius. No actual damage is done, there is no giant fireball, everything just falls down dead.
* The Soul Dew is a unique item that is stated to contain the soul of a deceased Latios.
* The Soulgems that are attached to the forehead of every mortal and Exalted in Autochthonia is a variant that captures the soul upon death, so they can be recycled in a new body. For an Alchemical Exalted to be successfully created, a soulgem containing a heroic soul is needed.
* The "Soulkiller" program, which would copy the victim's personality onto a sufficiently powerful mainframe and then kill the victim's physical body. Alt Cunningham, the program's creator, became its first victim when she had finished writing Soulkiller for evil
* The Soul Knife is a Psionic Class. Their mind is a weapon, and that weapon is a
* The Soulless don't have a soul, so I can't feel any empathy or remorse.
* The Soulless that 40k has to offer. Some Blanks seem to be perfectly capable of empathy, which suggests that those who lack it may have turned out that way due to severe abuse or neglect as children, no doubt due to the sense of "wrongness" that normal humans tend to feel while in their presence. There are mentions of Blanks/Pariahs being hunted down and killed on more superstitious planets due to this creep factor, which would lend credence to the idea.
* The soul of angelic little Eva does this after she croaks in the 1914 film version of
* The soul of one of the other Six Heroes, Trinity, is contained in her Nox Nyctores.
* The Soul Reaver is powered by the souls of the dead and a murdered Dark Eldar lord is raised as a vengeful spectre there.
* The Soulsaber FF has the Drill Craft Missiles, which are two drills attached to a compartment on either side of the FF's wrists. They can be launched, and when they do, the drills accumulate enough energy mid-flight to discharge it on impact, smiting the enemy.
* The Soul Society Arc revolves around an execution to take place at the end of a week. This took two years and 14 volumes.
* The souls of the dead come back to possess people. It's a normal part of life (well...death) that any advanced culture has to deal with to grow. One of the first people to be possessed is exorcised by a priest, thus leading you to think it's the usual demonic possession thing, except it turns out it only worked because the possessor was Catholic. It doesn't work if the soul doesn't believe in it.
* The soulstones were primarily prisons for the souls of the Prime Evils, because usually, all killing them does is send them back to the Burning Hells. They were corrupted, however, thanks to Izual the Betrayer, who filled them in on the soulstones and how to corrupt them, and helped the Prime Evils mastermind their own exile into Sanctuary.
* The Soulstorm expansion had the Adepta Sororitas worker unit (another Servitor) able to use an ability that did massive damage to a structure after a short delay. Some people even managed to think of a strategy involving rushing their servitors to their opponents' bases to dismantle their structures for a cheap win.

* The Sound and the Fury has a depiction of one character's breakdown that works in many of the modern conventions, including using worsening punctuation and capitalization to show the character breaking down, a blackout that starts abruptly mid-sentence, and said blackout is filled with a just barely comprehensible, completely unpunctuated or attributed flashback about the source of the character's trauma, followed by a sudden, temporary jerk back to the present, in which we get to find out what happened while he blacked out.
* The Sound and the Fury, Quentin tells his father he had sex with Caddie. His father doesn't believe him.
* The Sound Blaster card, introduced in 1989, was not only compatible with the existing Ad Lib card, which already had support for a number of MS-DOS games, it also supported digital sound. The real clincher was the inclusion of a joystick port, and the necessary proprietary CD-ROM interface connector for hooking a CD-ROM drive up to, back when CD-ROM drives required a proprietary connector
* The soundboard prank calling fad became popular around 2008, with the discovery of some notable victims who would go on to endure
* The sound collage "Revolution 9" features studio chatter from John and George, as well as Yoko and others, but nothing from Paul or Ringo.
* the sound effect of a needle skating across a vinyl record. This even applies to kids' shows, where it is otherwise assumed that the audience won't have a clue what vinyl records are and need it explained every time they're mentioned.
* The Sound Effects are justified in game by the simple fact that everything you see as a pod pilot is a VR simulation of actual events, piped directly into your head while you are safely curled up inside your pod full of goo. Apparently early versions of the Pod tech didn't bother with Sound but the lack of it tended to send the (already mentally unbalanced) capsuleers completely insane.
* The sound effects are only there in the remastered version (one of the many questionable changes made). The original version of the episode is silent.
* the Sound Four try to deliver Orochimaru's offer to Sasuke, only to get the wrong hospital room. Things only become truly problematic when Tayuya asks who the "big-titted whore" is; Tsunade is not amused.
* The sound guy of Women's Extreme Wrestling and Dangerous Women Of Wrestling
* The Sound of Drums about the fact that early versions of what became the 1996 TV movie included the idea, which got very mixed reactions from fans at the time when the information leaked.
* "The Sound of Drums" all appear endorsing Harold Saxon in a video on his website.
* "The Sound of Drums", becoming a Time Lord runs the risk of this. The initiates are taken to the Untempered Schism, a hole in space-time, and forced to look inside at the whole of time and space. Those who aren't inspired or run away tend to go completely flipping bonkers. The Doctor suspects the Master is a result of this.
* "The Sound of Drums" being tortured and killed in every possibly conceivable way.
* The Sound of Drums" certainly sounds painful, judging by the screaming.
* "The Sound of Drums" ensures that only a bunch of politicians end up permanently dead.
* "The Sound of Drums" on Gallifrey, involving staring into the Untempered Schism, a gap in the fabric of reality which exposes the time vortex. This then expanded upon in "The End of Time", where it turns out Rassilon, Lord President of Gallifrey during the last days of the Time War, retroactively drove the Master insane on his own command to establish him as a link between Gallifrey inside the time-locked Time War and the tangible universe outside it.
* "The Sound of Drums": Reporter Vivien Rook sets a video message to automatically be sent to Torchwood if she dies confronting Harold Saxon, which Jack receives via his Vortex manipulator later.
* The Sound of Drums sit back, smirk and share sweets just as the President is about to make first contact:
* "The Sound of Drums", the Doctor has another plan that works, because it's not revealed until the climax.
* "The Sound of Drums" the Doctor reverses time, saving the day, er, year, and only a select few people remember "the year that never was".

* "The Sound of Drums": The Master gets himself elected Prime Minister of Great Britain using his Archangel network. He also goes out of his way to create a fictional backstory for himself, with pictures and everything. At the same time, he makes it blatantly obvious he only appeared out of nowhere eighteen months ago when he first launched Archangel. All the obviously photoshopped pictures of him as a University student don't look any younger than his current appearance, and he has no paper trail despite getting a first at Oxford and being a former rugby champion. Then he deliberately became one of the most visible people in the world by founding his own political party, leading it to an electoral landslide and becoming Prime Minister of Great Britain, to put the eyes of the world on him when he brings the Toclafane in. Thanks to the Archangel network, he's got the populace under subtle mind control that prevents anyone looking too closely...well, 98% to 99% at most, and being able to fool a planet full of stupid humans without even trying probably appealed to the troll in him. The few who aren't mesmerized by Archangel note how obvious the Master's forgery is.
* "The Sound of Drums": The Master, having missed the end of the Time War, is intrigued to learn that the Doctor has destroyed both Gallifrey and Skaro.
* The sound of him whetting his sword whetted her curiosity. The bathroom is wet.
* The Sound of Music, 5'7" Julie Andrews wore flats and 5'9" Christopher Plummer wore lifts so he would appear tall next to her.
* The Sound of Music admit that Andrews and Plummer are so iconic as to be unsurpassable.
* The Sound of Music after it was first sung, promoting its musical arts grants to schools.
* The Sound of Music, and is probably surpassed as a singer by a dozen West End mainstays. On top of that, she was playing opposite Julian Ovenden as the Captain — a BBC Proms mainstay who trained at Oxford on a choral scholarship and who has one of the most-praised voices in British musical theatre. By all rights, she should have been completely overshadowed by her co-star — but her fresh, sweet, spirited take on Maria, and the lovely way her voice blended with Ovenden's, meant that her relative lack of "star" vocal power mattered not a whit, and she charmed critics and audiences alike with her captivating performance.
* The Sound of Music, as Georg Von Trapp's adorable daughters (particularly little Gretl) do it from time to time, especially, if you're using the film's moves, in "So Long, Farewell."
* The Sound of Music as if the big concert is their farewell to their father (who is theoretically about to go join the German navy) and consequently the end of the movie, but then subverts it by escaping during the judging.
* The Sound of Music, Captain von Trapp and his family escape from Nazi-occupied Austria so that he may avoid serving in the German navy.
* The Sound of Music Captain Von Trapp's wife (and mother to his children) has been dead for years. He is currently half-heartedly courting the Baroness and he has one housekeeper. Maria is the final woman in his life to be introduced in the movie and she of course ends up marrying him. Notable in that she and the Baroness have a quasi-rivalry for his affections in the second act which really emphasizes the "Last" part of the trope.
* The Sound of Music, Captain Von Trapp tells Maria she must put on a better dress than the one she has on before meeting his children as their new governess. Maria states she doesn't have one, as she is a nun and when nuns enter the convent, their worldly clothes are given to the poor. The Captain then asks why she still has the one she's wearing now. Maria replies: "The poor didn't want this one."
* The Sound of Music: Captain Von Trapp, who runs his house like a tight ship and doesn't tolerate unruliness or deviancy, softens up when he hears his children sing "The Sound of Music" to the Baroness and, for the first time since his wife's death, allows the wonderful sound of music to enter his heart.
* The Sound of Music comes on two VHS tapes. The first one is a cheerful family film which ends when the berry story is told. The second one has Nazis.
* The Sound of Music: "Darling, haven't you ever heard of a delightful little thing called boarding school ?"

* The Sound of Music, despite its success on Broadway, became regarded as treacly and old-fashioned. The movie made some attempts to tone this down (e.g., changing the placements of some songs, casting actors who could try and add dimension to their roles) without completely eliminating it. Christopher Plummer still famously described the film version as "The Sound Of Mucus" because of this trope.
* The Sound of Music DVD that he had tried to avoid doing anything that would get him in the papers in a bad light because he "didn't want to ruin the image" and the rest of his castmates agreed with him. Slightly subverted in that A) they didn't seem to mind all that much and B) Nicholas is really the only one involved with film these days (in Australia).
* The Sound of Music expecting exactly that to happen, even though the children obviously would rather have Maria as their mother and, as Brigitta can tell, the Captain is fonder of her too.
* The Sound of Music following the death of his wife and reconnect him with his children, who he'd previously been neglecting, in addition to making him realize the potential for true love still exists.
* The Sound of Music friends you had to kill? Yeah, he set that up years in advance.
* The Sound of Music had her written into the show as a character called Summer Shaw. The character was then talent spotted by Lloyd Webber appearing as himself on the show.
* The Sound of Music has been dubbed into Japanese six times. The first and second dubs were made for the TV Asahi and Fuji TV airings in 1976 and 1978 receptively. The third dub was made for the VHS release, while the fourth dub was made for the DVD release. The fifth dub aired on TV Tokyo in 2011, while the sixth dub was made for the DVD and Blu-ray re-release, which was released on May 2, 2015. Only Maria's first voice actor, Reiko Mutou, stayed consistent for the first three dubs.
* The Sound of Music has been mistaken for an Austrian folk song. Theodore Bikel was approached by an Austrian after a performance, who told the actor that he had known the song for a long time, but only in German.
* The Sound of Music has one of these when the family escapes after singing in the concert. The announcer introduces them several times before someone else yells that they're gone.
* The Sound of Music, in which he stops talking during musical numbers to play what the song sounds like sans vocals.
* The Sound of Music is a combination of Minor Flaws and Let's Call The Whole Thing Off.
* The Sound of Music is one of the most popular musicals of all time... except in Germany and Austria. Most people in both countries have never watched the movie and those that have seen it despise it.
* The Sound of Music is though. That is of course considering whether or not they make it over the Alps in the first place, with no protection or supplies. Which is why the real von Trapp family escaped to Italy via train, then sailed to America from there. But that would've been too complicated for a Rodgers and Hammerstein musical.
* The Sound of Music, Liesel's former boyfriend tells Captain Von Trapp "it's you we want, not [your family]". He presumably thinks that the German Navy will trust an anti-Nazi without having his family close by. Possibly justified as Rolfe may not fully understand how evil the Nazis he affiliated himself with really are.
* The Sound of Music, Liesl and her boyfriend, a telegraph delivery boy, joke about sending telegrams to each other, speaking out the would-be messages. Liesl's message? "Dear Rolf STOP. Don't stop!"
* The Sound of Music: Maria and Captain Von Trapp, when the kids ask to be shown the Laendler. Whilst the audience (and the Baroness) can see this coming long before that, it's the first time either of the eventual couple give any inkling of noticing they love each other.
* The Sound of Music, Maria has absolutely no clue the Captain is in love with her until the Baroness (for her own ends, of course) points it out. This is possibly because Maria has spent too much time in a convent. A moral crisis immediately

ensues, which the Reverend Mother very nicely clears up.
* The Sound of Music, Maria sings a scale starting "do, ti, la" from middle C, and can't quite make the final "do". (This gag was not used in the movie version, where Julie Andrews concludes the number more conventionally on a high note.)
* The Sound of Music, Maria's song "Do-Re-Mi" teaches musical notes using homophones for the syllables. The line for "Fa" is "Far, a long long way to run", which relies on non-rhoticity (the lyricist was Oscar Hammerstein II, who had a non-rhotic New York accent). The original production had Maria played by Mary Martin, who had a rhotic Texas accent, but still pronounced "far" as intended. The film adaptation had her played by British actress Julie Andrews, whose accent naturally works for the line.
* The Sound of Music: Maria Von Trapp is the guitar-playing free spirit who ends up marrying the head of the household.
* The Sound of Music. Nevertheless, popular culture has more or less superglued the song to the Christmas season.
* The Sound of Music of the details were rearranged for the musical, including the timelines, the songs, and the names of the children:
* The Sound of Music: Once he starts paying attention to his children, Captain Von Trapp edges into this on occasion. Most notably, he's very, very upset when he finds out that Max had intended to have the children perform publicly in a music festival (though he's ultimately forced to go along with it).
* The Sound of Music, one of the children asks Uncle Max if they're really going to sing in a concert tonight. He says they are and reads their names from the program, ending with Gretel, which leads to this exchange:
* The Sound of Music, on her wedding day with the real Captain Georg von Trapp, she was actually depressed and angry with the Mother Abbess, the Captain, and God. While she was fond of Captain, she didn't love him, and ultimately still wanted to be a nun, and married him mostly out of her devotion and love for the children. She later remarked, however, that "I learned to love him more than I had ever loved before or after."
* The Sound of Music reaction to "normal" life in the Von Trapp household.
* The Sound of Music reintroduction of music into his house eventually brings him out of it and lets him find new love with her.
* The Sound of Music that he can't marry the wealthy, sophisticated Baroness (who's of an equal social standing to him) because he's in love with Maria, his children's governess.
* The Sound of Music). The camp counselors forced Wednesday, Pugsley, and their friend Joel to spend time there watching the movies for not participating in camp activities.
* The Sound of Music. The real Maria von Trapp was twenty five years the junior of Captain Georg von Trapp and only six years older than her eldest stepchild. They married when she was 22 and he was 47.
* The Sound of Music). There's an entire song dedicated to her MPDG tendencies, sung by the other nuns in her abbey who are frustrated with her childlike flightiness and apparent inattention to the reservation demanded of her as a nun.
* The Sound of Music: The Von Trapp children lost their mother sometime before the start of the the play, jumpstarting the plot as Maria is tasked to help the emotionally distant widower father raise the children as a governess.
* The Sound of Music. The Von Trapp children place a pinecone in a chair that Maria was going to sit in.
* The Sound of Music tries to comfort the children during a lightning storm by explaining that "the lightning says something to the thunder and the thunder answers back". Of course, the thunder and lightning in the film happen at once, so apparently Lightning and Thunder are talking over each other.
* The Sound of Music warmheartedly wishes Maria, her rival for the hand of Captain Von Trapp, happiness with the Captain when it becomes clear where his affection lies.
* The Sound of Music. When his girlfriend points this out, he responds, "Yeah, and don't think we're not suing!"

* The Sound of Music, when Maria and the captain dance the Landler, the gaussian effect on Julie Andrews is used to show how the captain starts seeing Maria differently.
* The Sound of Music: While it's never stated outright, it's implied that the Von Trapp's butler is the one who alerted the Nazis to the family attempting to escape the Third Reich. He's seen watching them sneaking out of the house and was previously seen discussing "developments" with Rolf (a confirmed Nazi), making him the most likely culprit.
* The Sound of Music, who had lost his wife and made changes in his household - such as allowing no dancing or singing - to prevent anything from reminding him of her.
* The Sound of Music, willingly ending her engagement with Captain von Trapp after he realized that he loved Maria.
* The Sound of Silence, the album it came from is one of their heaviest yet.
* The Sound of Waves has a poor boy falling in love with a rich girl, and her father doesn't approve and there's Malicious Gossip and all that. The boy eventually gains the father's approval by going out on one of his fishing boats and saving it from being wrecked in a storm.
* The sound of whistling can seriously incapacitate Namekians, as a result of their incredibly acute senses of hearing. This becomes a plot point in
* The sound of wood splintering, followed by Baldrick dragging the front door in to Lord Blackadder's Breakfast Room.
* The soundtrack and "Let It Go" also banked on the film's success. After word-of-mouth gave
* The soundtrack of the game itself is enough to grow hair on your chest. The fact that one of the main instruments is a SYNTHESIZED CHAINSAW hits hard that this isn't some peaceful game.
* The soundtrack uses licensed 80s music to give a feel of that time, but most of the songs are a few years into the future after 1984. The most anachronistic one is
* the sound V-twin engines and thus made the same sound. The courts, recognizing Harley-Davidson's application for a trademark as being what it was (an end-run attempt to put its competition out of business) denied the application.
* The Soup, but is arguably still rather scary, especially when they froze on the face when the intro was still new.
* The Soup had a gag like this, but it was intentionally parodying 10-10-321 (formerly 10-321) and a host of other similar ads that were advertised at the time, especially on E! network. The chain ended with "...and pi, then press 1, and then the number you want to dial!"
* the Soup Nazi franchise and no-showed its grand re-opening. Since going corporate, Yeganeh has had little public presence (although his likeness still serves as the company logo), probably at the insistence of shareholders who prefer more PR-friendly personalities as active spokespersons, such as Reggie Jackson and Shaquille O'Neal, both of whom are also investors in the company. Reportedly, Yeganeh sold his share of the company but lives somewhere near the New York Location.
* The sourcebook "Rascals, Varmints & Critters" introduces the undead 'Glom, which is literally a mass of corpses fused together and made ambulatory, as well as capable of absorbing more bodies into itself.
* The Source covers the events at one (fictional) site in the Middle East from 10,000 BCE to 1962.
* the Source in the New 52, it's in the form of ... a terrier. Apparently said entity has a strange sense of humor.
* The Source is the most powerful demon who rules the Underworld — don't call him "the Devil". To be fair it is a position rather than a single being, but then plenty of other works have used "the Devil" that way too.
* The Source magazine, being a genre-specific mag, is this by default.
* the source material are being mowed down en masse by Dracula's forces. Unlike the source, however, the Papal Knights are nowhere in sight, the forces under Bishop Enrico Maxwell being comprised of fringe factions, the KKK, and the Sacred Order of

the Temple Beth Zion. The last of these take the hardware Maxwell gave them and leave, leaving the extremists, the Klansmen and Maxwell to their fates.
* the source material are bizarre - ranging from octopus to gummy bears to peanut butter.
* The source of Stanley's "prestidigitation" powers, which is not explained and
* The source of the page quote; even with a spot in the opening credits Warren Keffer was not slated to live past the second season. The character was created because of
* The source of the "Who Wore it Better" articles in several tabloid magazines.
* The Source protect against evil spirits — one begins to snarl and creates a sort of magical barrier that weakens him.
* The Source (the universal creative force, mostly appears in works related to
* The souring of U.S.-Russian diplomatic relations under President Obama
* The Sour Lemon Score escapes from George Uhl's ambush by diving through the farmhouse window when Uhl shoots Bernie Weiss. The house is so dilapidated that he takes most of the most of the window frame with him.
* The Sour Lemon Score, Rosenstein and Brock use a truth serum on Parker to find out what he knows about George Uhl. Parker later uses the same serum (which he discovered when her searched Brock's apartment) to interrogate Uhl about the location of the money.
* The South African government refused to allow the introduction of television broadcasting until 1976, as they felt television would corrupt its people. In 1969, South Africa was one of the few countries where the moon landing could not be seen live. This was seen as a national humiliation and proved to be the catalyst for the eventual lifting of the ban on television. Then, mixed with
* The South Atlantic Solidarity Strikeforce is a group of human and demihuman guerillas who support the Giant Telepathic Communist Penguins.
* The Southeastern Conference of NCAA Division I FBS football has THREE universities (Auburn, LSU, and Mizzou) that share the same team name: Tigers.
* The Southeastern Conference's classic "letters formed into a circle" logo, which needs no elaboration (
* The southermost of the Tian kingdoms is the jungle realm of Nagajor, an insular and often hostile nation ruled by
* The Southern Baptists eventually gave up (saying so publicly) after their boycott of Disney for hiring gays and lesbians only made Disney's stock rise. (They had no more success trying to turn people against Starbucks, Cheerios, Oreos, Microsoft, and several other much-beloved products and companies, which is no surprise.)
* The Southern Belle is chatting with a group of Yankee lawyers. "So, where did y'all go to school?" she asks. One of them answers, "Yale." So she takes a deep breath, and bellows, "
* The Southern Book Club's Guide to Slaying Vampires is implied to be this on top of being a vampire. His victims kill themselves either because they are addicted and go through hellish withdrawal, or because he has drained so much of their lives away anyway.
* The Southern Book Club's Guide to Slaying Vampires: Published in 2020, and is set from 1989 to the mid-1990s.
* The Southern Book Club's Guide to Slaying Vampires: While Miss Mary, Patricia's mother in law, has severe Alzheimers, her babble proves infallible when she's telling Patricia that James Harris is "the man in the white suit" from her childhood.
* The southern elephant seal is probably the most extreme example, with males averaging roughly five times the mass of females. Female elephant seals typically grow to about 1700 lbs, while the males average a whopping 7000 lbs (and have been known to reach as much as 9000 lbs)!
* The southern general that Homer fought a duel with in "E-I-E-I-[Annoyed Grunt]" is also an example.
* The southernmost quarter of the continent proper is dominated by the impassable Valashmai Jungle, a stretch of rainforest, swampland and volcanic ranges dotted

with the ruins of ancient civilizations and home to tribes of
* The southern part of Gondor split away after many people refused to accept one of the Kings due to them not being a pure Númenórean, and by the War of the Ring is inhabited by the Corsairs of Umbar, pirates. Eventually, the Haradrim conquered Umbar.
* The Southern Raiders" has a plant example with a tomatocarrot. This is a particularly odd example, as other fruits and vegetables — melons, mangoes, eggplants, cabbages, apples and so on — have shown up completely unaltered.
* The southern reaches of the continent of Garund are dominated vast tracts of jungle known as the Mwangi Expanse, which is filled with dinosaurs, demons, demon-worshipping
* The Southern Reach Trilogy Area X are warned to avoid "contamination" in vague, unspecified terms. They only learn the exact nature of the contamination when their bodies begin transforming. Most turn into animals similar to the existing local wildlife, but sometimes the process goes wrong and results in a hideous abomination.
* The Southern Reach Trilogy, Control is appointed as the new director of the Southern Reach. His secretary immediately makes it known in no uncertain terms that she is still loyal to the old director and will go to every length to undermine anything he attempts to do and sabotage any change he attempts to make.
* The Southern Reach Trilogy creates doppelgängers of the people who die in it, but they tend to be... off, with only superficial memories of the original and all with the same docile personality. But Ghost Bird is off even compared to the other clones. Normally, they are indistinguishable from each other in what they know and how they act. Ghost Bird retains significantly more of the biologist's personality and memories of Area X.
* The Southern Reach Trilogy, each expedition member is given a black box with the instruction to immediately evacuate should the light bulb on it turn red. The biologist later learns that it doesn't actually measure anything; it's just intended to make them feel safer.
* The Southern Reach Trilogy for most of the Southern Reach's existence and she also hung around Saul, the lighthouse keeper, when she was a kid. She only escaped the formation of Area X by coincidence.
* The Southern Reach Trilogy is deliberately all female in order throw a new variable to it. Barring the anthropologist (and the linguist who drops out before the expedition begins), they're a very tough group and have had additional survival and weapons training prior to the expedition.
* The Southern Reach Trilogy, Saul, the lighthouse keeper, and his boyfriend Charlie, a fisherman, show no steretypically gay behaviour at all. If they weren't sleeping together, they'd look just like close friends who like to share a beer at the bar.
* The Southern Reach Trilogy, the biologist and her husband became a couple because she thought he was energetic and alive while he thought she was mysterious. As they got to know each other after marriage, their relationship hit the rocks... Turns out he's overbearing and she's withdrawn.
* The Southern Reach Trilogy: The biologist is an extreme introvert who'd much rather observe plants and animals than interact with people and has never had any friends. The closest thing she had to that was knowing the friends of her husband.
* The Southern Reach Trilogy, the biologist's "brightness", which she gains from inhaling spores in the tower, renders her immune to hypnotic suggestions, and gives her superhuman healing and reflexes.
* The Southern Reach Trilogy: The Crawler's misguided purpose is to revive the world of its creators by terraforming Earth through returning it to a primeval state even though said creators are long dead.
* The Southern Reach Trilogy, the psychologist implanted the expedition members with post-hypnotic suggestions, which she can activate using trigger phrases woven into her speach.
* The Southern Reach Trilogy. They're not allowed contemporary equipment like cellphones or laptops. The surveyor freaks out when she finds out that the one

concession to their group, her assault rifle, is nothing more than 30-year-old parts cobbled together. The reason for using old equipment is that whatever created Area X can sense the more advanced tech and attack the items along with whoever is using them.
* The Southern Reach Trilogy used to be known, as a child. This is why she was driven to work at the Southern Reach in the first place.
* The Southern Reach Trilogy used to live in the place that became Area X and her mother disappeared together with everyone else within it when the border came down, which later motived her to work for the Southern Reach no matter the cost.
* The Southern Reach Trilogy, which is made of living tissue. It's able to hide its true nature to a degree and appear as stone to the casual observer, but people who have been "contaminated" by Area X are able to see it as it truly is.
* the southern United States for cases)will have the face of a wrestler on it, especially if any involved wrestler has had exposure in one of the few major promotions left on the post territorial circuit.
* The Southern Vampire Mysteries "fang bangers" who get off on having their blood drained, having sex with vampires, or just being around them.
* The Southern Vampire Mysteries was ordered by his queen to seduce Sookie, as part of a plan to use her telepathy for whatever it is a vampire queen needs a telepath for.
* The Southern version of the American Civil War song "The Battle Cry of Freedom" includes the lyric "Our Dixie forever, she's never had a loss...". Technically true, but since they'd never had a win either it isn't much of a boast.
* The Southern Water Tribe is more progressive in its attitudes towards women since female waterbenders are seen fighting in flashbacks, but Sokka plays it straight at first, then gets character development after meeting Suki. The next time he meets her, he now has an overly protective attitude, since his last girlfriend
* The south gate of the Darklands city of Kaag is adorned with the huge skull of Nyxator (the
* The South Kaioshin fills that role for a while during his fight against Majin Buu.
* The South Korean marketing campaign for chocolate Chex was guised as a democratic poll between chocolate and green onion Chex. The green onion mascot, a

* The South Pacific Power Couple (TK Cooper and Dahlia Black) who have appeared in companies such as
* the South Park movie when the Mole looks at his watch when they arrive at the USO show. Under the time is the label "Act Three: The Ticking Clock".
* The South Sydney Rabbitohs have won the more premierships than any other
* The South Vietnamese government officially ceded power to the North Vietnamese in 1975, and the country was considered unified in the same year. April 30, 1975 continues to be known as a day of shame for the South Vietnamese loyalists who fled abroad (the majority to America). The loyalists still fly the
* The Southwest Sentinels are so close-knit that at first they're treated as one deck, and they remain very close-knit as they evolve into the Void Guard.
* The Sovereign Glue is a classic magic item that creative PCs can put to multiple uses. It takes another magical fluid, the Salve of Slipperiness, just to prevent it from sticking to its container. And it is safer to have yet another magical fluid, the Universal Solvent, at hand whenever you're using Sovereign Glue, to avoid embarrassing accidents.
* The Sovereign is the official Diabolical Mastermind of the series as the head of the Guild of Calamitous Intent. It's technically an elected position, but it fits the rest of the trope well. He also flexes his muscle as a fiendishly powerful shapeshifter and has some hand-to-hand skills, but the majority of his power comes from the vast, high-tech Guild he leads.
* The Soviet Air Force customarily removed the wing guns off the Lend-Lease Bell P-39 Airacobra fighters, leaving only the 37 mm cannon and two 12.7 mm machine guns in the nose. This both lightened the airplane and improved its manouevreability,

making it able to turn tighter than any German aircraft at low altitudes, and the
* The Soviet army seems to have planned this at the start of the Nazi advance on Stalingrad and the Caucasus, although it became close to a rout. But it did have a positive effect, as the Germans wasted a lot of time and resources they couldn't spare encircling armies that were no longer there.
* The Soviet Baltic Fleet spent most of the Siege of Leningrad moored at the Kronstadt Island Naval Base or the Baltic Shipyards. Bombers trying to strike at either location had to run the densest concentration of AA fire
* The Soviet BMP-2 armored personnel carrier/infantry fighting vehicle was notorious for its poorly-protected fuel tanks mounted around and above the passenger hatch. Although rifle rounds wouldn't do it, and the fuel wouldn't necessarily
* The Soviet brand of cars, Zhiguli (named after Zhiguli Mountains, a hills/short mountains formation in Southern Russia) was renamed "Lada" when they realized the former name sounded like "gigolo".
* The Soviet BT-series tanks were among the fastest tank designs of WWII, and were also fairly well-armed for their time with a high-velocity 45mm gun. They could reach speeds of up to 72 km/h on good roads, and had good range to boot. However, their light armor couldn't protect against anything much more powerful than rifle-caliber gunfire.
* The Soviet cartoon "An Old Record" is about aliens borrowing a few records to listen (and, through some strange technology, view, too).
* The Soviet engineer is equipped with a revolver that can maybe defend him from one attack dog/war bear at a time.
* The Soviet film version to show for it, and they filmed the byzantine Tokyo highway system.
* The Soviet-Finnish Winter War begins on the pretext of an artillery attack by Finns against the Russian village of Mainila despite Finland having withdrawn its artillery from the border to prevent such an incident.
* The Soviet-German War had four Winter campaigns, in which no fewer than two million combatants died. Most famous is probably the first Winter Counter-Offensive of 1941-2, in which the Red Army tried and failed to destroy Army Group Center at the cost of a million lives for fewer than 200,000 German ones. Most important are undoubtedly the Korsun-Cherkassy encirclements of February-April 1944, in which most of Germany's panzer forces (800 operational tanks and more than 200,000 troops) and two infantry armies (more than 200,000 troops) were encircled west of the Dnepr river and forced to break out during the
* The Soviet laser pistol was an attempt at this, with such being called "Soviet laser
* The Soviet military theorist Alexander Svechin separated all wars into two categories: 'Wars of Annihilation' whose outcome was chiefly determined by the military efficiency of the combatant organisations, and ''Wars of Attrition' whose outcomes were chiefly determined by said organisations capacity for replacing their losses. If the combatants have sufficient military efficiency, replacement capacity, and political will to prosecute it until the final victory/defeat then an Attritional conflict can be utterly ruinous even for the victor.
* The Soviet military was markedly better, as the Soviet Union placed extremely heavy emphasis on military preparedness after the 22nd of July 1941 (for understandable reasons). However, a culture of
* The Soviet missile submarine's lack of amenities for its crew is a major plot point. In real life, the Typhoon-class boats are the closest thing to a luxury submarine that has been made by anyone. A mitigating factor is that most submarines, Soviet or otherwise,
* The Soviet Navy had no marines prior to the Great Patriotic war, and first marine regiments at the Black Sea were formed on-the-spot with enemy attack already underway. Nevertheless, Soviet marines proved to be utterly terrifying and mercilessly effective in battle. These sailors had, from the go, more technical expertise and physical conditioning than the average Joe; but more importantly, they had exemplary level of unit cohesion, a shitload of self-respect and

professional pride, and incredibly strong morale. Therefore, Soviet marines immediately got the reputation for being relentlessly aggressive, tough to break and proficient in assault tactics (often leading the charge and bolstering the regular troops' morale). The unusually high number of semi-automatic SVT rifles in Crimea arsenals and sailors' ability to adequately maintain them, as well as their propensity to use grenades a lot, helped too (also, SVT high rate of fire made these marines routinely wear 7.62 ammo belts around their bodies, giving them a huge intimidation bonus). In the end, their all-black Navy uniforms (which earned them a

* The Soviet/Russian nuclear briefcase, codenamed "Cheget", after a mountain the the Caucasus, is actually a communication terminal that's
* The Soviets also conducted their own experiments in the 1930s called the
* The Soviets also fielded several all-female anti-aircraft regiments.
* The Soviets also utilized children during the Second World War, with some of them becoming affectionally called "Sons of the Regiment". While they are mostly errand boys, a few children served as reconnaissance. One such soldier, named Sergei Aleshkov, six or eight years of age, was an example: he lost his family during a German anti-partisan raid, and was forced to flee into the forest until Soviet soldiers found him starving and half-dead. The commander of the unit decided to take him in and adopt him as his own son, believing he would be better fed and clothed with his unit. Sergei was even present in the Battle of Stalingrad was wounded by shrapnel; later in the war, he saved the regimental commander and his adoptive father from the rubble. After the war, Aleshkov was sent to a cadet school and became a lawyer later in life.
* The Soviets built a ternary computer, or a computer with 3 states. But in this case, it's not 0, 1, and 2, but rather -1, 0, and 1. There are some practical applications, but binary took off and the Soviets needed something compatible with the rest of the world.
* The soviets could have just claimed they were travelling out to the Atlantic from their home port, which does require passing Italy.
* The Soviets get a special power that dumps increasingly larger orbital satellites at an enemy location. The highest level
* The Soviets had plans to use their Energiya rocket to launch nuclear waste into a safe, planned solar orbit, but the plan came to nothing thanks to the fall of the USSR. This was less dangerous than it sounds because the Soviets sited their launch facilities in such a remote and lightly-populated part of their territory that they probably had less chance of hitting some innocent bystander with a failed rocket than NASA did with flightpaths aimed over the sea. Of course these days we can recycle nuclear waste a lot more easily than we could in the late Eighties anyway...
* The Soviets had their own equivalent designs for manned anti-satellite spacecraft, and sent armed
* The Soviets had two launch keys and unlock codes held by the higher-ups (i.e. on shore) for their submarines. Now the case for US subs, but not always.
* The Soviets have the T-80U as their Heavy Tank, T-62A as the Medium, and the PT-76 as their Light. NATO has the Leopard 2A4, Chieftain, and Scorpion, while USA has the M1A1, M60A3, and M551, all taking on identical roles.
* The Soviets in turn, featured swimming and airborne tanks (which however, due to weight constrains, proved to be too lightly armed and armored to be useful, though in the context of behind-the-lines partisan warfare/recon for which the tank was intended those factors were not actually that much of a problem, leading to the
* The Soviet song "I Am Glad, 'Cause I'm Finally Returning Back Home" is best known as the "Trololo song" thanks to a
* The Soviet/South Yemeni/North Korean/any other communist nationality enemy pilots from
* The Soviet Soyuz return vehicle relies on solid rockets to augment its parachutes, allowing it to land in dry land - unlike American spaceships, which rely on oceanic splashdowns - resulting in a slightly fiery landing.
* The Soviets use Badger Bombers to deliver toxic gas, one-hit-kill bombs, or to

drop troops in cutscenes. Most notably in the first Soviet campaign, which features an absolutely massive infantry paradrop over the Imperial palace grounds... of which the only survivors are a conscript and a war bear.
* The Soviets were over 10 kilometers from the city center. The Germans who were on the frontlines had been soldiers from the Eastern Front and been given a hammering the whole time they were retreating. Even if the Red Army couldn't send troops in, they could have at least been more giving in sending the resistance air support and supplies. However, Stalin was not interested in Poland having its old government back at all. The fact he directly ordered the Red Army to halt before Warsaw after being informed of the plans for the Uprising tells you exactly what he wanted in the long run. Declassified Soviet documents actually show Stalin ordered the Red Army to prevent outside help from getting to the Uprising.
* The Soviets would add the value of components to finished products, and then the finished products themselves, to their GDP. Normally everybody only tabulates the finished product, but a screw driver made in the Soviet Union would have the handle, the shaft, and the screwdriver itself counted toward the Soviet GDP.
* The Soviet T-34 tank was first introduced in 1940 alongside the KV-1 as replacements for the aging BT-7 and T-26 designs. When the Germans and their allies invaded the Soviet Union in June 1941, it was the only tank aside from the KV-1 capable of fighting German tanks head-on. When the KV-1 turned out to be
* The Soviet tank forces had several fight songs that all sound pretty awesome and glorify their vehicles: "Three Tankmen" and "March of the Soviet Tankists" are the most famous. (Badly) translated from Russian:
* The Soviet Tupolev Tu-144 supersonic airliner was rushed into testing and introduction in order to beat the Concorde, as Soviet political priorities at the time favoured one-upping Western developments. As a result, it became an
* The Soviet Union also had a long list of communist substitutes for the "decadent, bourgeois" culture of the West.
* The Soviet Union also had a praetorian guard in the form of the Kremlin Regiment, who were used to arrest any member of the Party if needed, guard Lenin's tomb, and march daily near the Russian version of the Tomb of the Unknown Soldier. These guards fought in WWII, being entrusted with the defense of the Kremlin itself, and killing some 1,200 German troops (they were arranged as snipers to do this). The Kremlin Regiment still serve the Russian Federation today, however recently (2013) some of the Tsarist era regiments were restored and god knows how this salad of historical artifacts will settle together.
* The Soviet Union captured numerous German AFV's during World War 2, which it then sold off to client states. One of the most prominent was Syria, who used long-barreled Panzer IVs and Sturmgeschütz III assault guns. They then used them in combat against Israel during wars in the sixties. By the time of the Six Day War, most of them had been destroyed, stripped for spare parts, or turned into static fortifications on the Golan Heights. A number were also
* The Soviet Union coined the term "Monkey Model" to describe a piece of military equipment that was significantly inferior to the original that it was based on but was much cheaper to build. The purpose of these simplified Monkey Models were to replace front-line stocks if a war went on for several weeks and for export to countries that wanted to buy Russian Military Equipment but were either too poor or of questionable intentions to be allowed use of the real stuff. For example, Iraq received "Monkey Model" T-72M, while Syria (considered a closer and more reliable ally despite adhering to a non-Marxist and Arab nationalist strain of socialism) received the T-72M1 which was significantly closer in capability to the USSR's own T-72A. This is a major part of why despite both nations using the "T-72" as their primary tank, Syrian tank divisions fared much better against Israel in the Arab-Israeli Wars than Iraqi tankers did against the United States in the Gulf War and Iraq War. (The other reason of course being that the Syrian Army also got Soviet training, while the Iraqi Army was more or less sold the tanks and told to have at it.)
* The Soviet Union dissolves into infighting when it becomes clear it's losing World War III

* The Soviet Union, founded by the collapse of the Russian Empire in the late 19th Century, secretly backed by meddling European nations. Occupies mostly the same Central Asian territory as the real world Soviet Union.
* The Soviet Union had the only real life female aces: Olga Yamshchikova (17 confirmed kills), Lidia Litvyak (12 confirmed, up to 20 rumored) and Katya Budanova (11 confirmed, up to 14 rumored). Litvyak and Budanova were killed in action, while Yamshchikova went to become the USSR's first female jet test pilot.
* the Soviet Union had won, never dissolved while still leaving the Cold War intact, or never existed (typically painted as the result of the Russian Civil War ending in a Tsarist victory)?
* The Soviet Union has shattered into dozens of warlords with most of them having a shot at re-unifying the country under every ideology in the game ... or collapsing back into yet more warlords.
* The Soviet Union hockey team in the 1980 Olympics: Coach Viktor Tikhonov rested most of his best players in the days prior to the medal round while U.S. coach Herb Brooks maintained his team's intense training. But the big shot was during the U.S.-Soviet game itself, when Tikhonov benched goalie Vladislav Tretiak after one period for allowing two goals; many U.S players saw this as arrogance that the Soviets felt they could win with backup Vladimir Myshkin
* The Soviet Union is still going in 2030, though revisions and reprints made after 1992 by Shirow Masamune himself changed this to reflect their downfall. The establishment of the Soviet Union still existing in the future was made in the
* The Soviet Union kept using vacuum tubes in its bombers long after the development of transistors since vacuum tubes are resistant to EMPs and many kinds of electronic counter-measures (ECM).
* The Soviet Union made much to do about the number of women in their Air Force. The first two women in space and the only two female flying aces were Soviets. They also had tankers, snipers and a good many partisans.
* The Soviet Union placed its Far East Army on alert for 30 minutes when it received word that US President Ronald Reagan had said, jokingly and as a sound test, "My fellow Americans, I'm pleased to tell you today that I've signed legislation that will outlaw Russia forever. We begin bombing in five minutes." This panic attack, however, was delayed by two months; contrary to legend, it was
* The Soviet Union pulled off a massive con on the USA in July 1955 at the Soviet Aviation Day demonstrations at the Tushino Airfield, ten Bison bombers were flown past the reviewing stand, then flew out of sight, quickly turned around, and flew past the stands again. They repeated this six times, presenting the illusion that there were 60 aircraft in the flyby. This led to the "
* The Soviet Union retain the Gregorian months, and it still counted years in "BC/AD" as well. The calendar had five- and then six-day weeks, the idea being that weekends would be more frequent, and different industries would get different days off. Even the authorities doubted whether it was really necessary, and it lasted even shorter than the French Republican calendar.
* The Soviet Union shells the Russian village of Mainila near the border with Finland, claiming the artillery fire to have come from across the nearby Finnish border, despite Finland having withdrawn its artillery to preempt such an accusation.
* The Soviet Union tried multiple times to invoke this trope through anti-religious campaigns which included propaganda, secular education, and mass executions.
* The Soviet Union was a strict command economy, and there was a huge disparity between the "official" exchange rate for the Soviet ruble and the black market exchange rate, the latter of which was much more commensurate with the currency's real value. If you managed to get into the Soviet Union with foreign currency (or cool Western goods like jeans), and you could exchange it on the black market, your purchasing power in the Soviet Union was near limitless.
* The Soviet Union was at first known as the "the workers' paradise". It quickly turned into a Crappy Promised Land, especially after Stalin took over.
* The Soviet Union was infamous for overstating their accomplishments by running

figures through arbitrary multipliers and claiming that is simply how Marxist-Leninist economics worked. Some of the more infamous examples:
* The Soviet WWII-era T-34 tank plays this trope straight, subverts it, and generally
* The Sowers are publicly known as a small and reserved hyper-fundamentalist Christian sect
* The Sox, meanwhile, were 89-0 when leading after 8 innings that year, with closer Jonathan Papelbon facing the bottom of the hapless O's lineup with two outs and no one on.
* "The Space Ark". Inside the title ship there's a control to activate the Force Shield, with a label that says "Force Shield".
* The Space Bar and think all of his films are hilarious and wonderful.
* The Space Bar descriptions for everything. (Did you know, for instance, that diving helmets were used by cowboys to help defend against Indians and Nazis?) The main character even lampshades it at one point, snarkily noting he thinks the bar's creators did about fifteen minutes of research.
* The Space Bar Ni'Dopal has a deep, guttural voice, all the better to creep the main character and the player out while threatening to do horrible things to the main character and his partner that's being held hostage.
* The Space Bar regularly calls the main character's PDA to taunt him with his partner's potential fate. Since the two seem to be good friends as well as work partners, it ends up being a rather significant motivation.
* The Space Bar, you play a detective that can read people's memories as an interrogation method, with large chunks of the game involving playing through said memories.
* The space battle at the end of the first game looks a little more like a dogfight. The space battles in
* The space battle, where Anakin actually shouts out "I'll try spinning!
* The 'Space-Bending Tape' can make those who attempt to enter a house never getting into it, by forming a dimensional loop outside the house, so that when they 'walk into' the house they are actually walk out of it.
* The Space Between, Sam. It starts to come out when Jack and C.J. hook up at their house party.
* The Space Between Us; it doesn't get much more long-distance than that.
* The Space Bridge has been seen in many Transformers series - never the same in any two versions, but pretty darned cool in all of them! Depending on the version, sometimes you only need a device on the "sending" end and can target it anywhere, but sometimes you need a device at both ends. There are also versions where they're part of a
* The Space Commando role is filled by Starfleet MACOs, who are established in exposition in
* The spacecraft had camera all over the place in order to review the mission at mission control and to enable the on-board computer to monitor the whole craft. Molly deletes it afterwards to remove evidence that she was talking to her dead boyfriend.
* The space dogfights were explicitly based on the real thing from WWI, the Death Star could arguably be compared to things like the impossibly big tank projects Germany had running during both world wars (the K-wagen during the first, the Maus, Ratte and Monster during the second) or the atom bomb or both.
* The space-faring powers will divide their territory into sectors, each containing multiple star systems.
* The space-faring quarians of the Migrant Fleet refer to Shepard as
* The Space Gamer magazine #29. The wizard Garl casts a spell on the ship Broken Stone that freezes it and everyone aboard into a giant ice cube. When the spell is later broken, the ice melts and everyone aboard is perfectly fine.
* The Space Gypsy Adventures), but the characters visit several other worlds in the system. Other planets such as Zenophon aren't numbered.
* The Space Gypsy Adventures featured this on occasion, with the characters complaining about the set to the narrator.

* The Space Gypsy Adventures, Gemma has been raising her brother Damien since they escaped from a Federal Alliance prison camp following their family's collective arrest for gunrunning. She often acts maternal towards him (unless he's being a mischievous little brat) and has been mistaken for his mother more than once.
* The Space Gypsy Adventures insults at Constable Bones after he shoots Fluff down. Bones is part space gypsy and understands what she's saying but no one else in the area does, especially not the audience (it is a kid's show after all).
* The Space Gypsy Adventures military and that Damien's only about ten years old.
* The Space Gypsy Adventuress mass and distract the coppers chasing them.
* The Space Gypsy Adventures the Space Gypsies claim to have originated on a planet that was destroyed by a nova thousands of years ago. Due to more recent persecution by the Federal Alliance many of the few who remain free have resorted to smuggling and theft.
* The Space Gypsy Adventures to escape arrest. On a couple occasions though they had to dump their cargo first so the mass wouldn't slow them down and/or as a distraction for the Federal Alliance.
* The Space Gypsy Adventures Zenophon, the planet that serves as the primary setting, was a counter-Earth where dogs, cats, foxes, and some other animals evolved sapience instead of humans. The 2004 revival seems to have discarded that detail.
* The space heroes rally a mob in Romania to attack Castle Drakul in the
* The Space Kidettes is a pathological Noble Demon. His evil minion, Static, enthusiastically suggests all sorts of gruesome villainy be done to the Kidettes, only to be chastised by Skyhook, who replies that "They're just itsy bitsy, teeny weeny little kids!", and promptly bashes Static's helmet in.
* The "Spacelings" are friendly, tameable animals which live among the reefs of space, between the stars. They appear to move via a reactionless drive of some sort—figuring out how they fly is one of Steve Ryland's goals in
* The Space Marine Codexes, after making each one stand alone and coming up with Chapter Tactics, ended up inverting this for many marine players; there is effectively 10 different (in-game) types of Space Marine armies, 11 if you count the Grey Knights (but they're excluded as they often have unique wargear normal space marines don't have) and 12 if you count the Chaos Space Marines. And very rarely do they have consistent rules between them. This meant that most Marine Players, and especially Dark Angel and Blood Angel players, would often paint up all their marines in one chapter's color scheme, but change rulesets and books whenever they wanted to field something different or if their book hasn't been updated in a while (Dark Angels suffered the worst of this in 4th and 6th edition, as their book were not given the new updates other marines got).
* the Space Marines and Power Creep; Space Marines, while nowhere near as overpowered as the fluff make them out to be, are indeed better than the average rank-and-file troops of every other army. This is evident if you compare Warhammer 40k with its parent game Warhammer Fantasy; the baseline toughness is 3 while the best rank and file armor is usually 5+. This is in contrast to the Chaos Warriors, who are literally Space Marines in all but name (and gun) and considered one of the elite troops. However due to the vast majority of the players playing Space Marines, as well as the subsequent numerous spinoff armies, they became the baseline.
* The Space Marines are chosen for initiation prior to adolescence. While that is plenty of time for them to be used to other opinions, they train and fight for decades before becoming a versatile Tactical Marine, leaving a likely similar effect. They'll have been experienced killers long before being chosen for initiation anyway.
* The Space Marines believe, "Better to die for the Emperor, than live for yourself."
* the Space Marines. But both in- and out-of-universe they are forever forgotten and pushed aside by the Space Marines.
* The Space Marine's handheld missile launcher and the Ork Kannon are good examples of the difference between anti-infantry and anti-armor since they both

allow to choose between two kinds of ammo: One is a single-target high-power round ("krak" missiles), the other is weaker but with an
* The Space Marines have several other toys that bring in Dreadnought-equivalent power to the battlefield without a half-dead pilot. The Invictor Tactical Warsuit is essentially a stripped-down Redemptor Dreadnought with the sarcophagus replaced with seating for a Space Marine pilot. The Nemesis Dreadknight is an exoskeleton that leaves the pilot quite exposed, thankfully his Terminator armor might protect him.
* The Space Marines in general arguably count under transhumanism since their genetic and surgical modifications put them far, far, far beyond the abilities of normal humans. They are impossibly strong, with bulletproof bones, quickly clot should they become injured, have heightened senses, require less sleep and turn off parts of their brain to continue being awake, and may very well be capable of living forever if the violence of their universe didn't make a violent death so likely...
* The Space Marines special unit, the Assault Marines, have this phrase as a battlecry. The same faction also uses drop pods in a planetary assault. The commander unit can call in an Orbital Bombardment as well.
* The Space Marines. Their 5th Edition Codex allows you to create almost any type of list you want. Want to head a small army of elite warriors? Take Terminators and Land Raiders. Want to lead a fully mechanized force? Put everything in Rhinos/Razorbacks. Like close combat? So do your Assault Marines. Prefer to shoot the enemy off the table? They have an app for that. Want to be a sneaky git? Take some Veterans and Infiltrate like a boss.
* The Space Marines themselves possess an oft-forgotten organ, the omophagea, that allows them to learn a bit from any creature by consuming some of their mass. Brain works best, but not always necessary.
* The Space Marines think nothing of using replacement limbs. Most notably the Iron Hands chapter, who are often seen sporting several bionic limbs and favor them over flesh and blood. This belief leads the Iron Hands marines to replace their right hand with a mechanical one upon initiation via religious ceremony.
* The Space Merchants and C.M. Kornbluth has tumour meat cultures called "Chicken Little".
* The Space Merchants and C.M. Kornbluth), only wealthy snobs can afford to eat "new protein" exclusively. For the lower classes, there's a giant growing fleshy lump called "Chicken Little" (it was originally a piece of chicken heart tissue) that they carve slices off: the working man's "meat". Better yet, it's fed by hundreds of tubes carrying raw yeast in from a multi-story yeast farm above it, tended by hordes of perpetually abused sweatshop workers.
* The Space Merchants, commercial law, which has largely or entirely replaced criminal law, permits a company to engage in a lethal feud with its rival upon serving a formal Notification. These are recognized as dangerous enough that private police forces charge special exorbitant rates to star-class personnel such as the protagonist, who wonders why he was targeted for attempted assassination in the absence of a Notification.
* The Space Merchants has a rocket fitting this description on the cover of the original Ballantine edition. It more or less fits the story's description of the Venus rocket as "the bloated child of the slim V-2's and stubby Moon rockets of the past."
* The Space Merchants, Jack O'Shea gives a first-hand report on the un-Earthlike environment of Venus:
* The Space Merchants makes passing reference to "compulsive subsonics" being used in audio ads until that was outlawed.
* The Space Merchants than it was in the 1950s when the story was written. If it weren't, a lot of advertising men, including the protagonist (a loyal smoker of his client's Starrs brand), would be quite disappointed, since "Kiddiebutt" cigarettes can not only be marketed to children but are even included with school lunches.
* "The Space Museum". In this state they come across their own corpses, before time catches up to them and they are bumped into the normal universe.

* "The Space Museum". The TARDIS "jumps a time track" and deposits them on the museum planet's in this manner. It eventually wears off on its own but while in this state the Doctor and companions are invisible and inaudible to everything around them. The glimpse of the near future they receive while like this is what starts the serial's plot.
* The Space Odyssey Series from the first book plays a large role in the last one.
* The Space Odyssey Series. It's implied in the first book that this is the natural progression for any species that doesn't blow itself up first.
* The Space Odyssey Series stuck in your head for you for a fee. Uh... it's called a search engine and it's free.
* The Space Odyssey Series, the body of Frank Poole (one of the spaced astronauts) is discovered floating in space. Thanks to the advanced technology of 3001, he is revived, making him one of the few non-superpowered individuals to survive spacing.
* The Space Odyssey Series tries to identify his steak and asks which animal it came from.
* The Space Odyssey Series, was banned mid-serialisation in 1984 after it emerged that a number of characters were named after Soviet dissidents.
* The Space Pirate-Citadel Council War: The Space Pirates invade the worlds of the Citadel Council, who get some support from Samus Aran and other freelancers.
* the space pirate leader is her sister to her own employees and doesn't blink twice when they get killed.
* The Space Pirates appear either reptilian or lobster-like, depending on which specific game they're in. The KI Hunter Pirates slip into
* The Space Pirates from the Chorus Trilogy (Seasons 11-13) had a pretty good
* The Space Pirates seem to be to blame for wiping out most of the remaining Chozo in
* "The Space Pirates" They're not asleep, though, they're almost passing out from oxygen deprivation. It's still cute.
* The space Romans from the episode "Bread and Circuses" also had "son-worshipers" as counterparts to the persecuted Christians.
* The Spacer's Choice company, whose product line is deeply unreliable, poorly made knockoffs sold at discount. Their slogan "It's not the best choice, it's Spacer's Choice!" pretty much
* The spaceships being built by the Middleton Space Center, and occasionally used by the heroes in
* The "spaceships" used by the Prospitians and Dersites in their eternal war are a bit of an odd case — they're for all intents and purposes world wars-era warship designs capable of flight, but they nonetheless use tapered, slender designs (as a consequence of their real-life bases) and are painted bright gold or purple, respectively.
* The spaceship that crashes in Roswell is found to use demon-summoning rituals to power at least some of its actions.
* The Space Shuttles, in spite of their flaws, qualify as "cool", if for no other reason than that they are among the relative few spacecraft recently in use (by July 2011, the fleet was retired).
* The Space Shuttle, which required two boosters, a launch pad and a huge fuel tank to get into orbit. It was also incapable of any real powered flight, having to glide back to Earth. It pretty much defined the term "
* The space station Credomar is a cylinder designed to make use of this, but it's considered to be so
* The Space Trilogy allegory instead, with the somewhat Christian-unfriendly aesop that violence is sometimes necessary to do good (granted, this concept also turns up in the Narnia novels and was played up in the big-screen adaptations).
* The Space Trilogy, and have floating mats of seaweed on which 'land-dwelling' life grows instead of islands.
* The Space Trilogy are quite like sapient seals, only their planet's lighter gravity has made them taller and thinner. This resemblance to Earth animals make Ransom uncertain and awkward when he sees the intelligence in their eyes and tries to talk to them through panicked gestures.

* The Space Trilogy by C. S. Lewis explicitly has Greco-Roman mythology be a reflection of the celestial politics of the Solar System.
* The Space Trilogy, drops all pretense, and in fact events in the book flatly contradict actual then-current political history.
* The Space Trilogy for the entirety of its existence. They've done all they can to pervert the populace with endless wars, miserable lusts, and the invention of death itself.
* The Space Trilogy. His demi-divinity makes him quite charismatic, even making animals perfectly obedient around him, yet his inability to age also keeps an injury on his foot from ever healing, so he's in constant pain while on Earth.
* The Space Trilogy, is a philologist. It's an extremely good thing, because he wouldn't have been able to learn the alien language otherwise.
* The Space Trilogy: Merlin considers himself to be this in the third book; when told that he wasn't to use magic the same way that he did a millennium and a half ago, his assumption was that there would be a fight using spears and swords, and admitted that he wouldn't be good at that kind of fighting.
* The Space Trilogy occasionally refer to Earth as "Tellus," the Latin name for Earth.
* The Space Trilogy, Ransom is fighting the Un-man (the demon-possessed undead corpse of Weston, the previous book's villain) when it suddenly reverts to Weston's actual personality and begs for mercy. Ransom ignores it, and the narration points out that Weston's actual soul had most likely been completely subsumed long before.
* The Space Trilogy, Ransom, Weston, and Devine have only ninety days to get home with a limited supply of oxygen. The characters move and speak as little as possible in order to reduce their respiration, and they only barely make it.
* The Space Trilogy, she will turn her husband to reject Him too and all their descendants will descend into the hatred, war, and death that the black Archon desires. Thankfully, Maleldil's agents on Earth have recruited Ransom to launch a counter-invasion and stop the Queen from falling like Eve did on Thulcandra.
* The Space Trilogy; the Hrossa, Sorns, and Pfiffltriggi have reasonably sophisticated cultures and gradually come to realize that humans can be dangerous, while the Eldila (angels, really) know almost immediately that Weston and Devine are up to no good on Mars.
* The Space Trilogy. The humans refuse to revise their opinion and insist the Oyarsa is only a trick of ventriloquism by one of the more visible Martians. The Oyarsa isn't pleased.
* The Space Trilogy, we have alternating criticisms of Enlightenment and Romanticism:
* The Space Trilogy which orbits the Earth and shows its face in the dead of night.
* The Space Wolves and Dark Angels have an ancestral grudge, going back to a duel fought between their respective founders ten thousand years earlier. This is nowadays
* The Space Wolves do have some magic users among their ranks, but are primarily warriors who prefer close combat. Their
* The Space Wolves' gene-seed contains a specific gene sequence called the Canis Helix which causes animalistic physical changes such as lengthened canines, a heightened sense of smell, and their skin gradually becoming darker and more leathery as they age. However, occasionally these changes go out of control and turn the Space Wolf into a feral monstrosity. This danger is called the Curse of the Wulfen, and each Space Wolf aspirant must confront the Curse as they receive the gene-seed—either their bodies will stabilize so that they become a full Marine, they'll degenerate into a Wulfen, or they'll
* The Space Wolves had such a deep hatred of sorcery that they needed little excuse to attack the psychically-gifted Thousand Sons during the
* The Space Wolves seem to have a habit of forming rivalries with other chapters more so than any other, particularly if the chapter in question has a high reliance on psykers,
* The Space Wolves (Space Vikings) are this to the rest of the Adeptus Astartes, mostly the

* The Space Wolves themselves have their own take on the problem, due in part to their method of recruitment (a Wolf Priest selects a badly-wounded warrior from one of Fenris' many clan wars, and the recruit is made aware that he has been chosen to make war on the Emperor's enemies for all eternity). Where other chapters only use veteran Marines in melee assault teams, Space Wolves give their newest members a sword and a boltgun and point them in the enemy's direction, viewing it both as good training and an opportunity to remove the weak and unlucky. The survivors can then move on to become Grey Hunters and Long Fangs (Tactical and Devastator Marine equivalents), while those whose enthusiasm for melee combat never abates can get a bike or jetpack to continue on their chosen path.
* The Space Wolves were originally the Emperor's executioners, being the ones who would take down their brother
* the SpaceX Falcon 9 rocket's first-stage landing. It's like one of the MLG parody videos, except the hype is real here.
* The Spade Kingdom's Dark Triad and their Dark Disciples are this. They are all dressed in black and use the powers of devils, with higher percentage use manifesting horns and dark demonic wings.
* The Spain/Romano pairing. Romano used to be under Spain's care as a kid, with Spain doting on him and Romano getting jealous whenever Spain paid more attention to his brother than to him. In modern times, Spain's still very affectionate towards the grown-up Romano, and Romano still has his
* The Spam sketch features several screeching "SHUT UP!"s from the hostess whenever the
* The "Spam" sketch was the origin of the term "spam" in the sense of junk email, due to the tendency to read it as "
* The Spanish-American War served as this for Spain. The Spanish Empire had already been in decline for the last century or so, but the loss of the last remnants of their once-great empire came as a profound shock. This sparked the rise of the
* The Spanish Apartment: A neurosurgeon represents the different parts of the brain using food items.
* The Spanish Apartment is narrated from the perspective of the main character, as he's writing a book about the story.
* The Spanish Apartment (L'Auberge Espagnole): Wendy's brother (an Englishman) tries to amuse a German student by comparing the German reputation for order with Hitler and starts goose stepping around the room, much to the annoyance of the German student.
* The Spanish Apartment when the tenants want to find out how the negotiation between Xavier and the landlord is going, but don't dare get involved themselves.
* The Spanish band Loquillo y los Trogloditas have a few examples, but "Rock'n'Roll Star" and "El Ritmo del Garaje" are pretty representative of this.
* The Spanish built CASA 2.111s and Hispano Aviacion HA-1112s were mostly used as they were airworthy, having been used by the Fracoist Spanish Air Force well into the 1950s!
* The Spanish Civil War veteran arrived and Spanish Civil War veterans were branded as communist traitors. As a result, this trope quickly disappeared from subsequent films about World War II. Despite the fact that World War II movies are still made in abundance and that there's much less of a stigma about Spanish Civil War veterans now, the trope of mentioning Spanish Civil War service to establish anti-fascist credentials appears to be well and truly dead.
* The Spanish dubs fortunately make a point of pronouncing his name "Xavi-air".
* The Spanish East Indies was also annexed by the United States after the Spanish-American War. The Philippines achieved independence in 1946, while the rest (Guam and the Northern Mariana Islands) remain US territories.
* the Spanish Flu pandemic of 1918 (which killed 10 times as many as WWI) children would skip rope to "I had a little bird/Its name was Enza/I opened the window/And in-flu-enza".
* The Spanish garrison in Baler, Philippines bunkered in the local church and resisted the siege by Filipino forces until June 2, 1899, missing on the Spanish-

American War completely.
* The Spanish hero Alonso Pérez de Guzmán defended the town of Tarifa from a siege by the Moors in 1296, but in the process his son was kidnapped. When they threatened to kill his son unless he handed over the city, according to legend
* The Spanish Inquisition, among other things, was to alter that attitude.
* The Spanish Inquisition) but rather the description of their work, i.e. investigation (cf. the adjective 'inquisitive'). The officials themselves were officially tasked with 'inquisitio haereticae pravitatis' (investigation of the heretical subversions) and thus the common name stuck.
* The Spanish Inquisition powerful). The Inquisition in Spain became the political police as much as (if not more than) ecclesiastical police. By contrast, the Inquisition in most other Catholic countries was separate from (and usually more fair and consistent than) the secular legal authorities of the time.
* The Spanish Inquisition, which probably contributed to the legend that the Inquisition was having its hands full on the witch-killing topic. The Inquisition was more concerned about Jews and Moors, in particular the remnant population of Muslims in Spain: Castile-Leon had only conquered Granada in 1492, so the region and its Muslim people were something of an ongoing problem for the Christian rulers until the last of them were ethnically cleansed in the early 17th century. That said, this probably didn't stop non-Royal and non-Church town authorities (i.e. about 2/3 of all towns) or angry mobs from holding witch trials and hanging 'witches', despite the Inquisition's efforts to impede it.
* The Spanish-language children's song "Señor Don Gato," which was popular in elementary-school music classes for decades due to its English translation by Margaret Marks. The song is about a cat who is so excited when his girlfriend promises to marry him that he falls off a rooftop and dies from his injuries. On the day of his funeral, as the procession passes through a marketplace, the scent of fish is so strong that it brings Don Gato back to life.
* The Spanish-language dub aired in the Latin American markets has had its own cases of banned episodes. Aside from "200" and "201" (which were already banned for international adaptations and DVD box sets), there are at least eight other cases to date:
* The Spanish language has the "hoygan" 'dialect' for those people who don't give a flying rat's ass about spelling. The rules involve adding or removing random "h"'s anywhere (since it's a silent letter, you can put as many as you want and not notice a thing in the final pronunciation!), and switching "b" and "v" around (same pronunciation), "y" and "i" or "y" and "ll" (depending on the sound); "qu", "c" and "k"; "g" and "j"; and "z", "c" and "s" as much as you want. And, of course, no accents whatsoever. So "Hoy es un buen día" would become "oi ez un vuen dya". Enjoy the eyebleed.
* The Spanish-language webcomic ''A Friki's life" does this in a strip when a man sent to Hell is forced to choose between being tortured, or having sex with a chicken for all eternity. After he choses the chicken, it's revealed that it's a 2-meter tall chicken with a passion for BDSM.
* The Spanish Princess: Englishwoman Charlotte Hope plays the titular Catherine of Aragon.
* The Spanish Princess: Lina and Oviedo, the only two black characters on the show, get married. Justified, as their historical counterparts married.
* The Spanish Princess: Oviedo is a crypto-Muslim, because all Muslims and Jews were forced to convert or leave Spain. He, like those who remained, is officially Catholic. Thus, if this were discovered, the Spanish Inquisition would try him as a heretic, carrying the death sentence if Oviedo didn't repent.
* The Spanish Princess (purity of blood - essentially, being able to prove your ancestry was totally Christian) they would ever have allowed her a guardsman who wasn't ethnically Spanish such as Oviedo (who's also black)..
* The Spanish Princess: The Spanish retinue all insist on following their customs, for instance Catherine taking a siesta in the afternoon, to the annoyance of the English.

* The Spanish Prisoner, Joe attempts to prove that Jimmy Dell actually existed by leading the authorities to Dell's suite of offices, only to find them abandoned. A bit harder to explain is the exclusive club Jimmy took him to which turns out to actually be a public restaurant.
* The Spanish Prisoner. "Nobody ever pays attention to Japanese tourists."
* The Spanish Prisoner who turn out to be undercover U.S. Marshals who have had Jimmy's con under observation since the start.
* The Spanish Queen Mariana of Austria averted this after the death of her husband Philip IV when she always dressed as a nun even on public acts.
* The spanish song "La Cucaracha" acquired a lot of variations over the course of history, especially during the Mexican Revolution period. To the point where even one of the more common variations can refer to president Huerta's addiction.
* The Spanish songwriter Jose Jose has a song called "Cuarenta y Veinte" ("Forty and twenty"). The song is about the protagonist who is in his 40s and has fallen in love with a young twenty-something girl, and it deals with the obstacles the couple has to face, including other people's disapproving comments.
* The Spanish-speaking countries have a more contrived example of this: in Mexico and the rest of Latin America, albeit not universally, they have no problems with using the Spanish equivalents of
* The Spanish swearword "cojones" (balls), when used by English-speakers, is occasionally misspelt or mispronounced as "cajones" (furniture drawers).
* The Spanish Tragedy, Bel-Imperia confesses via monologue that one of her motivations for getting together with Horatio is to spite the prince who is wooing her and who killed her former lover Andrea (Horatio's best friend).
* The Spanish webmanga author Jesulink does this on videos with opening themes for his series, parodying famous anime theme songs. If you know some Spanish,
* The Spanish word for "question" also sounds a lot like "pregnant" (pregunta). At least one high school Spanish book uses this in an extended gag dialogue to illustrate the dangers of false cognates.
* The Spanish would often leave breeding pairs of pigs in places they explored. The pigs could be relied on to survive without human supervision, and would reproduce so quickly that future voyages would be able to use these pigs to resupply. However, this also damaged many native ecosystems, and spread plagues throughout the native populations.
* The Sparkhounds, in service to Martellus Von Blitzengaard, count as well. Though they're nowhere near as mentally acute as Krosp was made to be, they're still smarter (and larger and stronger) than a regular dog.
* The Sparkle In His Eye, this trope is taken to the extreme, as Captain Quark has the ability of being so stupid, he changes reality. As in, if you told him the door could be blown up by throwing a rock at it, it could actually happen.
* The Spark of Genius: Some scientists' madness is strong enough to warp reality.
* The Spark. Semi-example. The machines are powered by science, but you have to have the mysterious "spark" to invent technology that runs on incomprehensibly eldritch principles. Against the basic concept of intuition, the further down you go into
* The sparks that starts the 1905 revolution against the Tsarist forces and the church in
* The sparks themselves generally call everyone else "minions." The word isn't offensive in and of itself, but is often made a part of rants against clumsy lab assistants.
* The Sparrow by Mary Doria Russell, Anne and George have one suggestion: duck tape.
* The Sparrow, Emilio Sandoz is sent on the Jesuit mission to Alpha Centauri, to a large degree, because of his skill acquiring new languages. His methods are studied for use in computerized language learning programs.
* The Sparrow, Fr. D.W. Yarbrough observes that Sofia Mendes brews up "awful damn Turkish mud".
* The Sparrow has Jesuit priests making First Contact on a planet near Alpha Centauri. Although many of their practices are tolerated (in some cases

enthusiastically appreciated), the gentle Runa natives get very upset when anybody sings or eats meat; all Masses have to be spoken only, without hymns, and when somebody opens a can of spam the room they're in is evacuated and sealed off. At the very end of the story, you find out why.
* The Sparrow is that Japan is the pre-eminent economic power in the world.
* The Sparrow: New Orleans Provincial D.W. Yarbrough. Ex-fighter pilot, ugly as sin, and from Texas to boot. He came to believe in God as a "cosmic comedian" for a reason.
* The Sparrow, one of the two species of aliens present in the work refer to themselves as the "Runa," which simply translates into "the people." However, the Runa seem very tolerant of the differences of outsiders. When a group of humans make first contact with some Runa, the villagers dub them "foreigners," using a word that literally means "people from the next river valley."
* The Sparrow the group sent to the alien planet start out by testing each alien food on their own as they're out in the woods; for the most part it's edible. A few of them become ill temporarily, but one of them actually (and suddenly) dies.
* The Sparrow to save Jenny from falling off the Greenview banner that hangs in the gym. Jenny giggles after receiving attention from Mr. Christopher, which reminds him of his dead wife. They slow-dance, which leads them to share a kiss.
* The Sparrow with the Runa people of Rakhat, a planet circling Alpha Centauri. Their first efforts at communication are between the team's linguist and a little Runa girl. Runa are used to dealing with "foreigners" from other parts of their own world. Taking advantage of children's capacity for language learning and adaptability, Runa children are traditional interpreters. The girl addresses the linguist because he came forward first; also, he is smaller than the other team members, and she thinks he's a child, too.
* The Spartan Blades CQB tool is designed to be used as a quick access dagger when grappling with an opponent. The ring at the pommel is designed for you to slip your index finger through, so you can transition to a pistol or a long arm without having to sheathe the knife. There are numerous copies, such as the
* The Spartan Captain in a dark room. There's also the people who were once all those corpses you see lying around deep inside each of the major locations, and the Argonauts, Perseus, and Icarus are also on their own adventures on the island.
* The Spartan-IIs are said to have "mild sociopathic tendencies" due to their years of being formed into killing machines, though it's shown throughout the series that the Spartans
* The Spartan-IIs are this to the Spartan-IIIs and IVs. The IIs tend to be larger, stronger, and just more naturally talented overall, due being subject to a much more stringent selection criteria than their successors. On top of all that, their
* The Spartan-II supersoldiers, at 14, underwent a laundry list of enhancements that made them physically and mentally superior to all other humans—those that survived the process, that is. Even so, damage remains in that overall
* The Spartan-IVs have somewhat less extensive augmentations, due to being modified as adults, but they can still do things like breathe methane for an hour.
* The Spartan Laser, an anti-materiel weapon that is used to destroy tanks...and aircraft...and turrets...and high-health enemies...
* The Spartan relief force arrived at Marathon just in time to take a curious look at the
* The Spartans and the Athenians infamously did this to Darius' messengers at the beginning of the
* The Spartans are played predominantly by British and Irish actors rather than Greeks. They speak
* The Spartans' last stand at Thermopylae concluded its last few moments with a handful of soldiers clustered round the body of their dead king, Leonidas, before an arrow storm finally finished them off.
* The Spartans manage to do this collectively, albeit more slowly, using their Phalanx formation to
* The Spartans, though it's subverted in that they're part of a larger force.
* The Spartans were all well-educated, to the point that it was a shock to ever

find an illiterate Spartan. From the same website above:
* The Spartans were bound by their law and honor to stay and fight, but the contingent from Thespiae, who lacked the strict, lifelong military training of the Spartans and had no particular reason to stay, also decided to stand and fight with them as they covered the rest of the Greek army's retreat.
* The Spartan Way and conditioned with drugs and brainwashing techniques to make them robotically fearless and literally immune to pain. They somewhat subvert this trope by the fact that they are substantially less effective individually. Their castration limits their physical strength, and their combat skills specialize in phalanx tactics designed for large-scale battlefields. One character notes that they are soldiers, not warriors.
* The Spartan Way, and have every adult dwarf in the settlement spend a certain amount of time each year practicing their skill-at-arms.
* The Spartan Way, and sponsor Gruumsh against him, figuring that if nothing else, they'd keep each other occupied.
* The Spartan Way like the Dinobots are and Grimlock being unwilling to accommodate them. When he briefly took over the Autobots he threw the rulebook out the window.
* The Spartan Way, possessing thousands of years of combat experience over their loyalist brethren as well as various boons and mutations granted to them by the Chaos gods to make them even stronger, tougher, faster or give them whole new abilities altogether.
* The Spartan Way, since the slaves revolted against the Spartans quite often — the army would have to drop everything it was doing and race back home to get their slaves under control, then raid other villages for more slaves to replace their losses. As a result, Spartans were rarely on the offensive, and if they were, it was frequently to raid more slaves. And Persian accounts described Sparta as thoroughly corrupt and easily bribed for allegiance. All in all, the actual city of Sparta reads more like a deconstruction of The Spartan Way, despite naming the trope.
* The Spathi already know about the Orz, but don't associate them with the ULTIMATE EVIL. that it's merely a product of their paranoia.
* The Spathi captain Fwiffo does mention being reduced to "pre-atomic savagery".
* The Spathi have the Black Spathi Squadron, a band of rogue Spathi who, unlike the normal cowardly Spathi, wander space "performing brave and hostile deeds". They're never actually encountered in the game and are mentioned only in rumors; their existence is denied by the Spathi authorities.
* The Spawn of Azathoth specifies: It was caused by a Seed of Azathoth entering the Earth's atmosphere. The Seed was thrown off by the Spawn of Azathoth (AKA Nemesis) circling the Solar System outside the orbit of Pluto.
* the spawn of the Elder Dragon. Their original brethren tend to be more monstrous and, similar to the Nightmare Court, often kidnap those of the other races to corrupt into more minions.
* The SPC in Chungqing used CQA assult rifles and NR08 SMGs in the past decade, the former is a semi-licensed AR-15 copy and the latter is an MP5 copy.
* The speaker moves on to something else, while everyone else is awkwardly silent.
* The speaker of Algernon Charles Swinburne's poem "The Leper" finally manages to gain the woman of his dreams after she develops leprosy. He isn't about to let her go now that she's dead, either.
* The Speaker of Canada's House of Commons also gets a big fancy chair, minus the built-in toilet. Unlike Britain, everyone else also gets a chair, but they're rather basic compared to the Speaker's chair. In addition, the Canadian Senate actually has
* The speaker of "Quiet Little Voices" by We Were Promised Jetpacks is this in full:
* The speaker (the person about to curse) is interrupted by another person:
* The spear is the standard weapon of common darkeyed soldiers; swords are reserved for the lighteyed upper class. Particularly of note is
* The Spear of Destiny and other works mention an occult secret society named "The Green Dragon Society" located in imperial japan and supporting the Nazi Occultists.

* The Spear of Destiny enraging, because even after the tension has become thick enough to cut with a chainsaw, they never actually kiss.
* The Spear of Destiny makes one invincible in battle. However, if lost, the former owner will quickly meet his end.
* "The Spear Of Selene" takes place in Greece, and has Selene, Zeus, and Storkules voiced by actors of Greek descent (Nia Valadros,
* The spear was a weapon of great value to the Incas and they held their own variant of the halberd as the weapon of the nobility instead of swords, which were not known yet (hence why the Incas are often depicted as holding one in tandem with a rectangular shield).
* The special abilities many classes gain bear some mentioning. Rogues can hone their reflexes to the point where they can dodge a fireball—
* The special about the invasion of Xerba give us a variant of the shapeshifter Evronians
* The special "Atlantis SquarePantis" had several different shifts of art style during the various musical numbers including an old video game, a green parchment look similar to U.S. money, and several different styles of painting during Squidward's song. The inside of the bus in this episode is rendered in 3D CGI.
* The special challenge path "Zombie Master" has you playing through a zombie apocalypse.
* The Special Counsel. His last words to his killer are an even "Fair enough."
* The Special Edition Episode 1 makes it clear that the company Wily failed to get a job at was Vick-Tek; in the original it was an unnamed company and mentioned in passing.
* The special edition of the first game Jim performing a variety of inane acts on a
* The Special Editions of the original trilogy do this three times: once for each Death Star (vertical and horizontal rings, respectively) and once when Alderaan is destroyed. None of these were in the original versions, though, which simply used ordinary explosion effects.
* The special editions were then dubbed at Mexico at Ultra Video (with casting done by Audiopost) under the direction of Carlos Pontón, along with partial redubs for later releases recorded at
* The special even shaped the public perception about how Rudolph's own red nose works. The special made Rudolph's red nose smaller and had it work like a flashlight (such as being able to glow randomly), complete with sound effect coming from his nose. Compared to the original story and pre-Rankin-Bass adaptations where Rudolph's red nose always glowed (such as his nose being so shiny that it glistened during the day,
* The special forces of the Alliance use a numbered rank preceded by the letter "N", going from N1 (recruits) to N7. N7 can only be obtained by N6 soldiers who went through several combat situations and walked out of it with honors.
* The special function that allows the player to take pictures without wasting film. Depending on the game, it's either called
* The Specialist, and though it is often used to show the character's vulnerability, in several other scenes it is portrayed as being elegant, sophisticated, and intensely sensual/sexual.
* The Specialist by Gayle Rivers. Rivers is training Iraqi special forces during the first Gulf War, and notes that their commander had a technique for weeding out anyone he didn't think had what it took to be in the unit. He'd hand a gun to a candidate and invite them to fire it out the doorway, while at the same time inviting another dubious candidate to walk down the corridor and take the random chance of being shot. If either person refused to walk or fire, he was thrown out of the unit.
* The Specialist by Gayle Rivers, the mercenary protagonist is recruited for a mission into Beirut. He doesn't take out insurance but mentions there's nothing to stop him from doing so, as no insurance company would be told he was thrown off the roof of a Druze command post with a knife between his shoulder blades. The most violent death that would happen to him officially would be a car accident.

* The Specialist decides to repeat the trick using the old system. He gets his braking technique wrong and plummets all the way to the ground, breaking several bones.
* The Specialist. Fortunately the bomb goes off prematurely, removing the evidence of River's more professional attempt.
* The Specialists, Captain Victory feels guilty about the loss of Project Ares, which produced only him.
* The Specialists, even though it's actual combat, didn't exactly help.
* The Specialists; once disarmed, you can simply whip out a second, third, or seventh gun and blast them in the face.
* The Specialists takes place in a deconstruction of superhero-filled WWII, except the Nazis have magic and they're winning.
* The Specialists. Who submits to that ridiculous code name only in propaganda — his secretary must call him by his real title.
* The special "misfire" charts of many skaven war machines (which the skaven player must roll on when things go horribly wrong with their shot) include a result where the enemy player can choose a nearby skaven unit to resolve the shot against, since someone on the skaven side is clearly trying to settle an old score (or has paid the war machine crew to do it for them).
* The special moves "Hadouken" (Surging Fist), "Shoryuken" (Rising Dragon Punch), and "Tatsumaki Senpuu Kyaku" (Hurricane Kick) are moves with the potential to severely injure opponents (Ryu's Shoryuken left Sagat heavily scarred, for example, although that particular incident was exceptional). These moves are toned-down versions of the original
* The Special Operations Team aka Red Berets, who, unlike regular Red Hats, do not have face coverings and carry out important roles, like protecting the Proxy, leading the arrest of insurgents and overseeing the Gate Ways between Blocs.
* The 'special parts' mentioned in the theme song, used to create the Bots (thus including, among other things, a bowling pin and a gumball machine), which in turn somehow explains why Joel/Mike can't just turn the damn movies off. Later, of course, the same theme tosses an iconic
* The Special Projects Division (or OSP using its Russian spelling) was established by Stalin at the end of WWII to handle Soviet supernatural studies.
* The Specials are done by different artists, with different styles each.
* The Specials broke away to form Fun Boy Three. While neither camp was quite as popular as the original band had been, The Fun Boy Three were a lot more successful without the rest of The Specials than the remainder of The Specials were without the Fun Boy Three.
* The Specials didn't write "A Message to You Rudy" or "Monkey Man". That was Dandy Livingstone and Toots & the Maytals, respectively.
* The Specials ends with the team, having patched their differences and renewed their sense of purpose, getting a call from the president. Giant ants are attacking the Pentagon and none of the A-list teams are available, leaving them to jet off and save the day.
* The Specials: Former villain Amok tells of an incident where he lost control of his power to generate anti-matter particles during an... intimate moment, and in his words, "...next thing I know, I'm holding half an ass!".
* The Specials ghostly-sounding song. As in, an instrumental version could be used as Haunted House music without any other changes.)
* The Specials have a song named "Little Bitch". In the opening verse, it describes a 19-year old girl who still sleeps with her mom when she gets scared and wets her bed when she has to sleep alone.
* The Special Special Special, which is an entire stand-up special performed in a living room, with an audience of two: Maria's parents. It's as awkward as you're thinking, if not more.
* The Specials. There is no actual super-combat or rescuing on screen at all.
* The Specials' trombonist Rico Rodriguez was a good twenty years older than the rest of the band when they started out and acted as a direct link to the Jamaican ska that they revived.

* The Specials was written about a real life incident (ye olde rockband Hotel room smash) they were innocently blamed for.
* The Specials, who are explicitly the seventh or eighth guys you call in an emergency.
* The Special Tasks Group are basically the Salarians' version of this, and in fact inspired the Spectres.
* The special "Tripped!" had a bad case of this. At first it was going to air on May 4th, 2018, but Nickelodeon delayed it for unknown reasons. It was then moved to May 25, 2018, and was delayed again because of Nickelodeon wanting to air the last 5 episodes of
* The special "Truth or Square" had a few shifts of art style as well, including an animated TV commercial from the 1950's and a "rubber hose" Disney-style cartoon.
* The specialty of the Dominion of Korx in the second game where species other than humans are playable. They consider selling your own mother into slavery a "rite of passage."
* The special versions of Artix and Sepulchure Figures have black armor.
* The Special Weapons Dalek was basically a self-propelled BFG that first blew down a large metal gate before
* The Special Zones where you tried to get the Chaos Emeralds. Those were a game in their own right. The trope is played straight when you lock Sonic the Hedgehog cartridge on Sonic & Knuckles'. You get a full version of Blue Spheres minigame, with a total of 134,217,728 levels! It also will sidetrack players from playing
* the species of each newscaster taken from the region the movie is playing in, although not necessarily voiced by a real newscaster.
* The species that are referenced include one carbon-based race that "goes through a meat stage" (possibly
* The species that most resembles elves physically are the Sephi. They are intelligent, refined, and have a tendency toward haughtiness, though some can be just as ugly as baseline humans. Their lifespan is typically between 200-450 years. They do not dwell in their homeworld's few forests and force-sensitives are no more common than most races. Fay's species is never stated, but it is widely accepted that she is a Sephi.
* The specific case of "Knock your socks off" (encompassed in this trope) was tested by
* The specific example is that a person who robs a house will then go to any length to escape rather than consider giving up.
* The specific form and style of a Guild of Assassins contract is described in
* The specified age in the warning has changed over time. Initially, when AS launched in 2001, the warning specified that its programs are intended only for people over 18. After the 2003 rebrand, it was changed to 14 (shows that aired on the block around this time carried either TV-PG or TV-14 ratings), and then 17 sometime around 2007 before they dropped the age as a whole sometime the next year.
* The Speckled Band have done a heck of a lot of damage to them if it had wanted to, but the fact that it didn't cause any harm and wasn't the incomprehensible monster Watson first envisioned, makes it an example of this trope.
* The spectacular collapse of Barings Bank, the world's second oldest merchant bank (est'd 1762) was caused by the machinations of a single employee, who, in an attempt to cover for a bad investment, ended up going on an increasingly disastrous spree of high-risk speculative gambles that dug the company into a $1.3 billion hole (and no one noticed because the man was essentially appointed to be his own auditor via an administrative oversight).
* The Spectacular Now girl and learning that there is more to life than just having fun and living "in the now".
* The Spectacular Spider-Man, a bystander attempts to hide from the Lizard's rampage through a subway station by ducking into an alcove. Cue the drips of saliva falling on her head. She manages to survive via Spider-Man's timely intervention.
* The Spectacular Spider-Man after she kisses him and runs off. After a moment he composes himself enough to whisper "Wow..."

* The Spectacular Spider-Man also has a pool table in his office, and is seen playing. Green Goblin also plays pool when he crashes the Big Sky, getting every ball in the pocket but one, and he blows up the one remaining.
* The Spectacular Spider-Man, although most of Spider-Man's villains are products of mistakes or malfunctions. Rhino was a perfect success, so after enough time to avoid a paper trail, Norman Osborn attempts to sell the Rhino armor schematics to the highest bidder. However, no explanation is made of why Vulture, once he teams up with Master Planner, doesn't build an army of Vultures instead of doing everything himself. This was later expanded on and explained in the comic adaption.
* The Spectacular Spider-Man an albino. His bodyguards are black men and women.
* The Spectacular Spider-Man and go in knowing they only have to bide their time before their underworld connections break them out. Mysterio has a robot double doing time for him, so he literally isn't in prison at all.
* The Spectacular Spider-Man and introducing pre-Sandman and Rhino versions of Marko and O'Hirn as recurring petty thugs before being supervillain-ized. We also met John Jameson and Mark Allan before they became Colonel Jupiter and Molten Man, respectively. Black Cat appeared in-costume first, though.
* The Spectacular Spider-Man and is very bluntly rejected. Later, another (less bitchy) cheerleader, Liz Allan, shows interest in him and she become his first girlfriend on the show.
* The Spectacular Spider-Man, and naturally Spider-Man needs to save him.
* The Spectacular Spider-Man, and Roderick Kingsley (the latter only in the first episode of the arc) fighting The Big Man for control of... well, you can probably guess.
* The Spectacular Spider-Man and super reflexes for just that reason— to avoid getting hit.)
* The Spectacular Spider-Man animated series, as Peter Parker confidently walks up to the head cheerleader and asks her out, only to be bluntly rejected.
* The Spectacular Spider-Man Annual to take MJ to fancy places like this. Noticing his mood MJ decides to snap him out of him dragging him to the ocean for a swim.
* The Spectacular Spider-Man appear in the show's opening, Spider-Man co-creator Stan Lee also made a cameo in the first episode of season 2.
* The Spectacular Spider-Man as it pretty much just makes her look like a blonde MJ.
* The Spectacular Spider-Man, a story about Spider-Man in a rival newspaper outsells the Daily Bugle's own story on his son's heroic landing of a space shuttle. As a result, Jameson finally snaps and begins a smear campaign against the web slinger.
* The Spectacular Spider-Man: Aunt May finds out that Peter might have a date with an older woman who isn't Mary Jane, and therefore tracks the woman down and pressures her into breaking it off. And she gets away with this.
* The Spectacular Spider-Man been called many names. My favorite...is Tombstone."
* The Spectacular Spider-Man, being the head of a major crime organization and posing as a legitimate businessman.
* The Spectacular Spider-Man "Blueprints" when he was talking to a crew member at the docks that he hates it when he sticks his tongue on a ship in the cold weather.
* The Spectacular Spider-Man, both Peter Parker and Harry Osborn try out for the Midtown High Football team. During the tryouts, Peter uses his spider powers to make plays while Harry uses the abilities granted to him by ingesting Oscorp's Globulin Green formula.
* The Spectacular Spider-Man but a lower-ranked but likable villain who lives by it: Sandman was a thief and never forgot it even once getting super powers, and once, when offered payback against Spider-Man by joining the Sinister Six, he said that he didn't care about revenge and just wanted the "big score" he'd always dreamed of. (He joins anyway, once convinced there'd be a lot of money involved.)
* The Spectacular Spider-Man but the castle is sent plummeting toward New York. Obviously, they stop it just in time.
* The Spectacular Spider-Man, but then they bring the camera around to show the rest of the transformation.

* The Spectacular Spider-Man by calling Electro repeatedly Max (his real name), making him shoot lightning bolts everywhere. The result? The destruction of the Master Planner's base.
* The Spectacular Spider-Man comics lead and puts Mary Jane Watson, Harry Osborn, and Gwen Stacy in high school with Peter Parker and made Eddie Brock Peter's childhood friend, a college student, and a lab assistant for Curt Connors. Likewise, the show also put Hobie Brown, Glory Grant, and Randy Robertson, characters Peter didn't meet until later, in high school with him.
* The Spectacular Spider-Man dating Randy Robertson, and even Randy seems unable to understand why he sticks around with such an obnoxious harpy.
* The Spectacular Spider-Man, described the lead character as having had spider-powers for something like a summer when the series begins, that he's been interrupting small-scale crimes, specified "liquor store hold-ups" as one example, and that there was a "bank robbery" that Peter's particularly proud of.
* The Spectacular Spider-Man. Doc Ock uses these as extra arms and feet, and to batter and throw opponents. The three claws at each end can rotate like miniature buzz-saws.
* The Spectacular Spider-Man does the usual A-then-2 speech to Peter Parker when convincing him to help him get a girl to notice him.
* The Spectacular Spider-Man: Eddie Brock returns to town without telling anyone, and messes with Peter's head by following him around and letting Peter get occasional glimpses of him, eventually even making a suit that makes him look like Venom at a distance. The purpose is to get Peter to check on where he left the Venom symbiote, leading Eddie to it in the process.
* The Spectacular Spider-Man effectively enough to take down much more powerful opponents.
* The Spectacular Spider-Man episode, Doc Ock explicitly points out that none of the methods Spider-Man used to stop his foes last time will work: Doc Ock's arms are powered by Electro, the power pack on Vulture's back is better armored, Electro has much better control of his power (such that he can safely contact water), Shocker and Rhino know better than to confront him in an enclosed space, and um...there aren't any concrete mixers around to trap Sand-Man. It goes both ways, though, since Spidey's also been upgraded since the last time he fought them.
* The Spectacular Spider-Man episode "Gangland" had a cameo from a school which won a contest to be animated in the series.
* The Spectacular Spider-Man episode "Growing Pains", Flash Thompson's mother has a framed photo of him as a toddler happily running around with no pants on, which Peter points out upon the revelation that he and Flash had been best friends in nursery school.
* The Spectacular Spider-Man episode "Subtext", while trying to avoid suspicion, wears a trenchcoat over his purple-and-green costume.
* The Spectacular Spider-Man, especially in its early seasons, can make it unbearable to sit through for viewers wanting more drama and/or characterization.
* The Spectacular Spider-Man. First with Tombstone offering Spider-Man a job that amounts to not fighting crime, and with Green Goblin offering to Spidey that the two of them could rule New York together. Too bad he doesn't partner with anybody green. Or, you know, psychotic.
* The Spectacular Spider-Man gets particularly nuts if people use his original name (Max Dillon).
* The Spectacular Spider-Man had Green Goblin do the "tied up" joke, chuckling to himself that you gotta love the classics.
* The Spectacular Spider-Man had one owned by the Shocker, though he left the running of the place to Blackie Gaxton. It gets burned down in a fight between Spidey and the Molten Man.
* The Spectacular Spider-Man Hammerhead both dress this way, as do their comics incarnations.
* The Spectacular Spider-Man has an episode where Spidey has to fight the entire Sinister Six on Christmas Eve. And thanks to burning his tongue on some hot chocolate, the villains can't understand what he's saying.

* The Spectacular Spider-Man has this happen a lot, one episode even starts with it.
* The Spectacular Spider-Man has used his to smash through brick walls without ill effects.
* The Spectacular Spider-Man, he admits that she's been a really great girlfriend, but he feels they'd be better off as friends. Unsurprisingly, she doesn't take it well, as she'd been genuinely in love with him.
* The Spectacular Spider-Man, he doesn't even have a base (he finds them, rather than the other way around). Spidey therefore has to let Goblin come to him, rather than go looking for him like he would with other Big Bads.
* The Spectacular Spider-Man. He is thwarted by his Aunt May, who approaches Betty for a frank talk about their relative ages. Betty then turns Peter down.
* The Spectacular Spider-Man, he starts constantly emitting electricity, and has to wear a protective suit at all times so other people won't be hurt. Even so, his power leaks out — he can't watch TV, lightning arcs out of his hands when he's upset - and he can't even eat without zapping something. By the time he gets into a supervillain teamup, of course, he's managed more control.
* The Spectacular Spider-Man. His actions force the team to retroactively forfeit the game and lose their title, something that he had worked long and hard for (having even broken his leg for and costing him a potential scholarship), but he felt that the championship did not mean anything if had been earned dishonestly. After this, Sha begins to reciprocate his feelings.
* The Spectacular Spider-Man. "I cannot believe I once lived in this anemic hovel."
* The Spectacular Spider-Man: In episode 12, Peter almost succumbs to the symbiote, but Uncle Ben appears and helps him. Was this just Peter's conscience helping him in the form of someone he cared for, or did Uncle Ben really come from beyond the grave to help him? The fact that Uncle Ben was able to interact with not only Peter but the symbiote itself suggests he may have been more complex than a simple product of Peter's mind.
* The Spectacular Spider-Man in order to keep control of the film rights, leading to the show getting cancelled.
* The Spectacular Spider-Man: In the episode "Nature vs. Nuture", Spidey stops a helicopter from crashing into an office building, and the janitor doesn't even turn around.
* The Spectacular Spider-Man. It becomes a lot more exaggerated once he becomes Venom.
* The Spectacular Spider-Man. It's stated that Spider-Man's presence and fighting crime on his own has driven down crime in the whole of New York through deterence. However, this fades as the number of super-villains increases, some accidental and some engineered, and Spidey is forced to spend his time with them as opposed to ordinary crooks.
* The Spectacular Spider-Man, JJJ's son John has to pilot his shuttle when it's damaged by a stray meteor, with the risk that the shuttle might not make it upon reentry. Fortunately, he was able to land it safely.
* The Spectacular Spider-Man. Just like in the original comics, Flash Thompson is a star high school football player and a typical jock and bully who mercilessly bullies his nerdy classmate Peter Parker but greatly admires the costumed superhero Spider-Man, an irony in which the superhero takes some gratification. This version of Flash continues to bully Peter, even when Peter has already been bitten by the radioactive spider and Flash is always trying to outsmart Parker but usually fails. In the series, he dates Liz Allan until they break up, seemingly due to Liz developing a crush on Peter. The series also says that Flash and Peter used to be close friends years ago, but it wasn't able to explain what led to their falling out before it was cancelled.
* The Spectacular Spider-Man, locking all the guards up as the prisoners are let out of their cells.
* The Spectacular Spider-Man, making a cartoon that is recognizable to both older and younger fans.
* The Spectacular Spider-Man, making a Spider-Man cartoon that is popular and

recognizable to both older and younger fans.
* The Spectacular Spider-Man Mary Jane's reaction to Gwen and Peter getting together.
* The Spectacular Spider-Man Miles Warren already working on such stuff by the end of the second season.
* The Spectacular Spider-Man of all people says that hammers home what he is supposed to do:
* The Spectacular Spider-Man. One, "Credo Elvem ipsum etiam vivere," translates to "I believe that Elvis is alive."
* The Spectacular Spider-Man, one episode has the supporting cast quoting Shakespeare passages in auditioning for the school play. Sally Avril turns hers into a cheer - needless to say, she doesn't get a part.
* The Spectacular Spider-Man, one episode opens with the wall-crawler webslinging across town at top speed, reflecting on his dire circumstances and noting that not even his powers could save him now. Then we hear a bell ringing. Spider-Man looks down on his school and says, "Man! For once, I'd like to be early to school!"
* The Spectacular Spider-Man, one of his many reactions, besides depression and anger, is semi-maniacal chuckling.
* The Spectacular Spider-Man: one of Mysterio's bats starts saying "Non sequitur" repeatedly after being attacked (though they tend to throw them around anyway).
* The Spectacular Spider-Man only to discover that Gwen Stacy is the one taken hostage. However, it's only after Gwen kisses him at the end of the episode that Peter puts two and two together and starts noticing his own unrealized feelings for Gwen.
* The Spectacular Spider-Man, Peter has no one to go to prom with and moans as his aunt tells him she set him up with a friend's niece. He mentions all the red flags he's about this girl and shudders as he goes to open the door... only to trip over his words as he sees a cute red-head, Mary-Jane Watson, for the first time.
* The Spectacular Spider-Man, Peter is so busy getting ready for school and talking to Aunt May that he doesn't notice the (muted) news report of the escape of the Sinister Six.
* The Spectacular Spider-Man: Peter Parker, who started off wearing glasses, and Gwen Stacy (but not as much as Peter. However, She does become just like her comic book incarnation).
* The Spectacular Spider-Man, Peter's suit suffers this a lot. Not generally Fanservice.
* The Spectacular Spider-Man, Rhino calls out for his mom as a result of delirium caused by the steam around over-heating and his face being the only place he could sweat from. Spidey takes the opportunity to pretend to be Rhino's mother and ask who his boss is. The drama comes from Spider-Man learning that the crime boss, the Big Man of Crime, is none other than Tombstone aka L. Thompson Lincoln. It cements Spidey's war on crime and him realizing there's a much bigger picture.
* The Spectacular Spider-Man, Rhino delivers one to Spidey after he tosses a traffic cone onto his horn.
* The Spectacular Spider-Man: Sandman is driving an armored truck, Spidey jumps in the cab and the two fight. Sandman asks; "Gee Webhead, if I'm over here... Who's driving?" No one is, and the truck plows right into a gate.
* The Spectacular Spider-Man sequence down the school stairwell, and then they enter the gymnasium, where venom throws an entire set of bleachers at Spider-man. Finally the battle concludes in the boys changing room.
* The Spectacular Spider-Man's fights, while indeed fitting the "spectacular" label, tend to fall into this - Spidey will get thrashed around for most of the battle, and only finally start to visibly slow down when it's time for the climax.
* The Spectacular Spider-Man's first season finale, Flash Thompson attempts this on Mary Jane Watson, with predictable results.
* The Spectacular Spider-Man's Gwen Stacy drops her books in shock at seeing Harry Osborn unconscious on the ground after disappearing a while.
* The Spectacular Spider-Man. She is a popular and bitchy cheerleader, but not very smart.

* The Spectacular Spider-Man she starts with the "Where have you been, I thought you were dead!"
* The Spectacular Spider-Man, Silvermane shows off his powered armor, which inexplicably doesn't cover his face. It's the kind of powered armor that hums and whirs with every movement, and the noise tips Spidey off about how to defeat him.
* The Spectacular Spider-Man: Spider-Man, just like his comic book counterpart. Probably most notably is when he does this repeatedly to Kraven to make sure he can't break free this time.
* The Spectacular Spider-Man: Spider-Man's enemies Shocker, Ox, and Ricochet are riding an elevator, and Ox starts to hum the show's (and by extension, the titular character's) theme song, prompting the other two to stare at him. "What? It's catchy."
* The Spectacular Spider-Man, Spidey fights The Lizard on top of a moving subway.
* The Spectacular Spider-Man, Spidey takes on The Vulture and the Enforcers who, while upgraded from their original comic gimmick of lasso-wielding guy (Montana), short martial artist (Fancy Dan), and strong guy (Ox), weren't exactly going to make it into the Sinister Six as was.
* The Spectacular Spider-Man. The fact he mentions her being okay with his work gives the implications that the real issue was Peter's own feelings. Sure enough, the next issue has him work in being a more attentive boyfriend, but eventually, she ends it.
* The Spectacular Spider-Man: The Green Goblin crashes Tombstone's party, threatening to expose him. Spider-Man comes in and assumes that he's Tombstone's new goon. Tombstone corrects him that he isn't, but Spidey can still pretend that he is. All while ignoring the Goblin.
* The Spectacular Spider-Man the Green Goblin doesn't get annoyed by the Web-Head's quipping and mocking and still has the original version's wacky personality, manipulative planning, and amazing acrobatism. He is shown to crack sadistic jokes.
* The Spectacular Spider-Man: The Green Goblin hacks the Vault's security while Spidey's testing it, trapping him inside with an army of crooks after him and the supporting cast helplessly watching through the security cams. Then Mysterio sicks his non-sequitur-spouting gargoyles on Spidey.
* The Spectacular Spider-Man, the humongous supervillain Rhino steps into an elevator where a meek-looking man is already inside, and tells the man to take him to the top floor. After a moment of awkward silence, Rhino explains that his fingers are too big to push the buttons.
* The Spectacular Spider-Man; the resulting movies would include footage cut from the episodes for time and standards and practices reasons. However, this plan was scrapped after the release of the first such collection, "Attack of the Lizard".
* The Spectacular Spider-Man, the Sandman — by letting him connect with cement, thus creating concrete.
* The Spectacular Spider-Man. The second half of Kraven's debut episode centres around him gaining superhuman powers of his own derived from deadly predator animals to even the odds against Spidey.
* The Spectacular Spider-Man!): "They just don't make [noun] like they used to."
* The Spectacular Spider-Man, they used the symbiote crawling across the screen.
* The Spectacular Spider-Man to complete his job. Throughout his battle with Spider-Man, he expresses a fondness for his work as a killer.
* The Spectacular Spider-Man to fight off Rhino. She is one of the coolest characters in the show and doesn't even have a name.
* The Spectacular Spider-Man to stop the explosion from harming anyone on shore.
* The Spectacular Spider-Man, Venom can manifest a large mouth in the center of his costume, and can talk through it.
* The Spectacular Spider-Man: Villain Doctor Octopus pairs his long coat with goggles.
* The Spectacular Spiderman wasn't anywhere near a human port of millions of people, though I'm sure that was cold comfort to the wildlife.
* The Spectacular Spider-Man, when asked to try out for the football team with his friend Harry, Peter has a brief, absurdist fantasy of making touchdowns while in

costume as Spider-Man, wearing a football helmet.
* The Spectacular Spider-Man. When fighting Green Goblin, Spider-Man is thrown out a window, catches himself, swings back up, and breaks back through another window, all while commenting on the definition of Defenestration.
* The Spectacular Spider-Man, when Kraven first confronts Spider-man, he attacks with a bow and arrow. When that doesn't work, he pulls out a pair of huge knives. When those don't work, he pulls out a boomerange, then bolos, a blow dart, a spear, and finally, resorts to his bare hands.
* The Spectacular Spider-Man when more intelligent characters like Doc Ock and Tombstone are around.
* The Spectacular Spider-Man when Spidey unmasks Mysterio as Quentin Beck:
* The Spectacular Spider-Man, which had virtually every blow delivered on screen.
* The Spectacular Spider-Man You'd expect Peter to be very upset over the fate of his "best bro" and try to reason with him, with the hope of redeeming him. Instead, he spends surprisingly little time dwelling on this issue and treats him as just another villain in subsequent fights. It's made pretty clear though that Peter doesn't think he's fighting Eddie, rather the symbiote who's warped Eddie's mind. He refers to Venom as "the symbiote", and does his best to get the symbiote off him, and attempts to get psychiatric care for Eddie afterward.
* The spectacular stargate opening "kawoosh" effect was filmed by placing a camera in a pool, and then quickly blasting a jet engine down into it. While they initially had to do new takes for every angle, they soon got the visual effects crew to work around that, also creating a digital effect for the later seasons and spinoffs. As this isn't exactly cheap to do, sometimes the gate will open off-screen, with a blue, wavering lighting effect applied to nearby scenery and characters.
* The Spectator's gaze: That's you. The gaze of the one reading the book, watching the movie, or whatever.
* The Spectre and he's normally presented in a morally ambiguous light.
* The Spectre brief stint, are shirtless, and usually lack pants as well.
* The Spectre. Current continuity has him as an aspect of God-given independent existence, outside of the standard angelic hierarchy, with his fellow aspects of God (like the Radiant) as peers.
* The Spectre does this as his shtick in most incarnations. Unlike many comic book supers, he is perfectly willing to kill and often does, and usually has the reality warping powers to make the event horrific and terrifying for the evil-doers.
* The Spectre embodiment of God's Vengeance, slaughtered the entire country of Vlatava while the country was in the midst of a bloody civil war between ethnic groups. He claimed that no one in the country was free from the hatred that drove the war, and even the children and infants would grow up to repeat the same cycle of violence.
* The Spectre headlined issues #60-61 (February-April, 1966) and #64 (October, 1966). The character had not been used in two decades and these issues successfully revived him. It took a while to fully re-establish him but he "graduated" to his own series in December, 1967. His ongoing series lasted to 1969.
* The Spectre introduced Chris Esperanza, who is the Spirit of Redemption.
* The Spectre later, he found some early Spectre stories that were just up that alley, and voila.
* The Spectre likewise only wears his cape and cowl. Since he's basically the embodiment of God's wrath, he's not exactly worried about getting hurt, even in a nuclear holocaust.
* The Spectre once tried to stop a war by removing all weapons from the battlefield. The armies simply picked up rocks. Even the embodiment of God's Wrath can't stop humans from killing each other.
* The SPECTRE organization for the Connery and Lazenby eras of the series, with the exception of
* The SPECTRE organization had a short run in the Ian Fleming novels and was Bond's full-time archenemy in the movies for a while. Effectively, it is the first known example of a Rogue Intelligence agency devoted to its own profit.

* The Spectre replaced, is another example from DC. Anyone who is unlucky enough to come into contact with Eclipso's black crystal prison will be possessed by it.
* The Spectres are cool enough that they are their own internal affairs department. One goes rogue, the Council sends another to off him.
* The Spectres are the Citadel "Special Tactics and Reconnaissance," given special rights by the Citadel Council that places them above the law and allows them to take whatever measures are necessary to ensure galactic peace. They very much subscribe to the
* The Spectre, those who find themselves on the wrong side of the Spectre almost always end up facing the most gruesome form of poetic justice.
* The Spectre tries to punch him and his fist goes right through The Spectre.
* The Spectre Trilogy, Carla’s motivations for becoming a trainer are purely monetary. Subverted in that the money is for her sister, who needs it somewhat urgently.
* The Spectre went from being a dark supernatural hero to being a guardian angel for "Percival Popp, Super Cop!"
* The Spectre, who is a being of almost limitless power. And if the Spectre is that powerful, what about his creator?
* The Spectre, who serves as an agent of God's Divine Wrath in the form of The Spirit of Vengeance. He was absent at the time of Jesus for the specific reason that Jesus was the Spirit of Forgiveness and the Lord did not want the two of them on Earth at the same time, as it would seem like he was sending mixed messages.
* The Spectre Wyvern Rhadamanthys. His Greatest Caution attack is a wind-type move that charges up Rhadamanthys's Cosmo to the highest point of power. It is then unleashed at a central point via two opened palms. The opponent becomes helpless as powerful, typhoon-like winds blast them into oblivion. It can take two forms: a dark energy blast, or the form of Rhadamanthys's spirit, the mythical Wyvern.
* The Spectrum Game. His Defense and Resistance are incredibly high, and his Speed is the highest of his allies. To compensate, however, his Strength is poor and his Intelligence is merely okay, hampering his offensive potential.
* The Spectrum Retreat, all the staff in the Penrose Hotel are robos, up to and including the manager.
* The Spectrum Retreat attempted to make their first murder look like his victim stumbled and fell on the tracks, but though it initially works, soon eyewitnesses abound and the case is re-classified as homicide.
* The Spectrum Retreat only after the player was expected to put it together themselves.
* The Spectrum Retreat, the basic puzzle element are gates that will only let you through if your phone is carrying a matching colour, which you can get from various cubes scattered around the area.
* The Spectrum Retreat, this is how teleporters work - click it, and you will leap at high speed towards it, regardless of distance.
* The Spectrum Wars, dividing the earth up into major regional power blocs in order to lessen the disparity in power between major superpowers and the third world. For similar reasons, the United States and its military was usually split in half by a civil war in the backstory.
* : The speculative alien species has three sexes, but only needs two, each of a different sex, to reproduce. Sexual organ-wise, they're all hermaphrodites and the organs are in their chests, accessable via a normally airtight hole into which they stick their own tongue during mating to get their own set of sex cells. Then they stick their tongue into the hole of their partner while said partner is in heat to drop the cells into. The whole process takes about a minute and, while it feels 'nice' to them, it certainly isn't as pleasurable in the same way as humans.
* The Speculative Dinosaur Project. It's a speculative biology project on how dinosaurs could have evolved if the K/PG mass extinction had not occured.
* the speech in question reveals that it's pretty light on drama, however.
* The speech..."I say", the speech mannerisms of Senator Claghorn on the radio show "The Fred Allen Show" live on today as the voice of Looney Tunes character
* The Speechless: A character who doesn't speak because they are unable to.

* The Speechless: A character who never talks because they are unable to.
* The Speechless, it can temporarily force you to resort to this. Same goes with being at brink of crying.
* The Speechless when she was an inanimate watermelon, becomes this when she gains a humanoid form when the Fierce Deity Mask is put on her in "Mario's Mask of Madness", since she just makes various voice grunts and only had a few text based lines in "The Melony Felony"
* The speech patterns associated with valley girls, such as using "like" as an interjection or a substitute for "said",
* The speech takes most of the episode, around 15 minutes in length. It's a moving and massive love letter to MMO gamers the world over.
* The speech then goes on for five minutes detailing exactly how much he
* The Speed Force is weaker in the Avengers’ world than it is on Barry’s native Earth.
* The Speed Force seems not only to be the source of power for all the Speedsters in the DCU, but also their Valhalla. Several of them (such as Johnny Quick and Max Mercury) have been absorbed into it. The only reason
* The Speed Gamers are a group of people who perform live, consecutive speedruns of all or most of the games in a given series. Their speedrun marathons occur about once a month and are usually used to raise money for charity. You can check when their next marathon will be on their website.
* The Speed of Dark, everyone in Lou's section is autistic, so all his coworkers have at least one.
* The Speed of Dark lost his first fencing tournament, he drank a six-pack, threw up behind a tree, cried, and said it was the worst day of his life.
* The Speed of Dark: When Joe Lee, one of the cured autistics, invites Cameron and Lou to dinner, Cameron says "I have a date," and Lou says, "I have a meeting."
* The speed of Jimmy's spacecraft seem to vary depending on the episode. In some episodes such as the one mentioned above, travel seems to be limited to below light speed and it takes the characters hours or at least minutes to accomplish interplanetary travel within the solar system, and in other episodes they can jump millions of light years within hours. Weirdly, Jimmy's love interest April from "Win, Lose, and Kaboom" cites interstellar/intergalactic distances as a reason for why they can't maintain a consistent friendship/relationship, despite the fact that within the same episode they jumped light years nearly instantaneously.
* The speed of light in the real Universe keeps humanity restricted to the Solar System, because the amount of energy required to increase a ship's speed increases exponentially the closer you are to the speed of light, until you reach a point where you need absolutely titanic amounts of energy to move a decent speed, far more energy than is practical. So unless scientists find a loophole in the laws of physics that allows matter to be transported faster than light, travel outside of our solar system will require time investments of hundreds of thousands of years.
* The Speed Reading book. The book is locked behind three books that each have three bookmarks in it, meaning they require three reading activities to complete. These books are also in Jinbocho, a location that isn't an early unlock, and the Speed Reading book itself costing 12,000 Yen. As a result, by the time the player has finished reading this book, there's only an odd book previously missed to read. Mitigated in
* The "speed yourself up so fast time seems to stand still" variant is briefly
* The Spellcasting Series as a rule, he does rescue a drugged Gretchen from a fraternity party. She attempts to jump his bones back at his place, but she passes out and Ernie leaves her be out of chivalry.
* The Spellcasting Series, as opening Ernie's fridge will cause him to black out, or wish mightily that he had.
* The Spellcasting Series has this as part of the plot in the second and third games. The second game centers around the main character having to perform various hijinks as part of his frat initiation, while the third centers around the main character's frat competing against a frat from a rival university over who is king of the beach. The first game references this trope by having every frat on campus

throwing a wild party every night.
* The spell Cometfall exists explicitly to do the summon rock trick as an actual attack spell.
* The spell "Comprehend Languages" lets the target understand any language for a short time, while the more powerful "Tongues" also lets them speak any language.
* The spell "Doom" may be a bit of a subversion — it presumably fills its (single) target with appropriate dread if it works, but as it's only a first-level cleric spell, that means "only" a -2 penalty to most d20 rolls in terms of mechanics.
* The spell "Expecto patronum", which repels Dementors and allows communication over long distances, summons a
* The spell Larissa's Conjuration of the Singing Sands of Time creates a whirlwind. Any creature that touches or is touched by the whirlwind immediately ages 1-10 years.
* The spell Mana Clash drains the mana from any enemy mage in its target radius and deals damage proportional to the mana lost,
* The Spellman Files, Isabel is dating a Guatemalan-born dentist. Isabel's mother doesn't approve—once, talking to him, she uses the phrase "you people." He's surprised when Isabel tells him that her mother wasn't expressing hostility to Latinos, but dentists.
* The Spellmonger Series, the first book ends with a literal bang, as the main character and his Ex have sex to power a giant spell to forcibly bridge two location in the fabric of space and time, in order to save the population of the valley from a horde of genocidal goblins.
* The spell of transformation into the three-headed Beast of Darkova was a secret of the Titanian royal family, now stolen and used by Ingway. For him to be calmed and released from his hunger for human flesh, he must be defeated by someone of Titanian royal blood. Fortunately for Prince Cornelius, the beast has no hunger for pooka flesh.
* The spell "Tongues" makes its target fluent in all languages for a few minutes and can be made permanent with more powerful magic.
* The spell Unnatural Life only works on a corpse which has been dead for less than a year and a day.
* The spelunker boldly climbed down into the crevasse, using a crevice here and there for a handhold.
* The Spencer Davis Group: They were the first band Steve Winwood was in. Not only did "Gimme Some Lovin'" and "I'm a Man" make the Top 40, those two songs also made the Top 10.
* The Sphere-Builders at least were given a very clear reason for their participation in this war. At some future date (possibly the 26th Century) they invaded the galaxy from their "trans-dimensional realm" (read:alternate universe) but were defeated by the Federation. Having lost the conventional war, they joined the Temporal Cold War to try to prevent the Federation from ever forming which would ensure their eventual victory.
* The spherical, iPod-like starships used by Garry Shandling's character (and the other humanoid
* The Spherons, a species of ball-shaped aliens from "War is the H-Word". They move around by bouncing, and despite lacking mouths (or any visible facial features), they can talk to humans.
* The Sphinx after having Seth in his clutches, he actually tells him that his victory is so assured, he'd like to have one honest conversation with one of his respected nemeses. He then goes on to explain in detail his origins, his source of power (and weaknesses thereof) and all the other things that usually pertain to this trope. He then has Seth sent to his dungeon, and, for the most part, doesn't really suffer any consequences from this particular discussion.
* The Sphinx ends up beheaded after a performance in Egypt, when cats started going berserk and jumped on the button that turned up the bass, the vibrations causing the Sphinx to break apart. It's seen being repaired at the end of the episode, only for the sarcophagus containing Toki's dead cat to fall on it,

crushing it.
* The sphinx from "Daring Done" is willing to strong-arm (paw?) food out of the ponies to the point they're starving, and she
* The Sphinx is an even bigger example of this: about 400 years after it was built the body, made of softstone, was starting to deteriorate, so the then Pharaoh had it covered in tiles and painted BRIGHT RED, with a blue headdress and gold painted face. This was maintained for centuries and was one of the most common forms of Sphinx. There's also evidence that the face originally had a beard.
* The Sphinx that ancient Egyptian men sported. Bits of an alleged beard have been found, but given the lack of damage to the chin, it's likely that it was added on later and then fell off.
* The Sphinx was a court wizard to Rameses II until he was fired after a certain Hebrew mystic showed him up. Then he wandered into the desert and found a magic stone that made him immortal.
* The Sphinx was an example. After Oedipus solved her riddle, she was so upset that she committed suicide by throwing herself off the cliff she perched on, rather than live with the shame.
* the S'pht have been so advanced for so long that prior to meeting the Pfhor couldn't conceive of non-cybernetic intelligence. They were originally created to serve as servants of the Jjaro, a race so advanced that they could warp entire planets instantly through space millions of years before the game's timeline.
* The Spider and a brilliant improviser, and he's never shy about telling everyone within earshot just how magnificent he is, including himself (in his thoughts) when there's nobody else there to listen to him.
* The Spider, a wealthy woman runs a restaurant that serves human flesh to New York's upper crust (without them knowing what it is).
* The Spider Cliff Mysteries. After surviving an explosion, Barlow suggests doing this. Crystal tells him it's a stupid idea.
* The Spider Cliff Mysteries is an "interactive, animated webcomic series."
* The Spider Cliff Mysteries must eat brains to prevent the decay of her own.
* The Spider Cliff Mysteries: Spider Cliff has the occasional zombie attack, which are all quickly contained offscreen. Except for Annabelle, the intelligent, intact, friendly zombie.
* The Spider Cliff Mysteries: The lead's investigation releases a nasty force and after he uses amnesia potion to reseal it, he does it again.
* The Spider" features a hotel room which guests always end up hanging themselves, and it mostly consists of the journal of Richard Bracquemont, a medical student who offers to investigate.
* The Spider has very fidgety hands and uses a ghost shell as a makeshift fidget toy. Some lore entries indicate that this is a bit of a nervous tic for him; he knows full well that the Guardians could easily kill him and is constantly on edge when they’re around, despite his seemingly calm demeanor.
* The Spider-Man/Deadpool series seems to show she spends the night at his place sometimes, where she has her own room. When she lives with the Prestons, she has to share a room with her step-brother.
* The Spider-Man films update the technology but also address the changes in society since the initial publication of it's source material, specifically in the way they handle Peter Parker; since being geeky isn't stigmatized like it was in
* the Spider-Man of 2099 to just open a window to slip out of his high rise apartment, but the windows are "sealed for [his] safety".
* The Spider marks his victims with a spider brand on the forehead; not all of them are dead first.
* The spider race of the Visorak are treated as an Always Lawful Evil race, being very disciplined soldiers while they often go and conquer other lands on the behalf of their commanders while taking pleasure in killing and mutating any life they come across. No thought is ever given by any of the heroes to somehow turn them towards noble purposes (except Toa Vakama when he was in the middle of
* The Spider, relatively few of the serial magazine protagonists of this era worked with the open approval and admiration of the police.

* The spiders are named for various fears, Death, Abandonment, Senility, etc.; amusingly, at one point, one of them is given the title "Ironically, Spiders."
* The Spiders by Ezekiel Boone. Spiders act more like army ants and have no respect for humans' role as being the top of the food chain.
* The Spiders. Imagine a spider as big as a Goliath bird-eater with masticating jaws, venom that first paralyzes and then kills, a hard crabshell-like exoskeleton, and two evil eyes that you can see looking at you. Now imagine that's just the drone in a social system similar to an ant or bee colony — its job is to find food and bring it back to the hive, which consists of some even larger spiders and an enormous queen. This is what the protagonists of the book have to deal with in order to save England, where the spiders are slowly advancing from the country into the cities.
* "The Spider Slayer", Flash Thompson disguises himself as Spider-Man to pull a prank on Peter Parker. Being the real Spider-Man, Peter doesn't fall for it but plays along because he doesn't know how to expose the other as a fraud without revealing himself.
* The Spider's War series. The tide of the war had actually begun to turn against Antea in the previous book, and the armies of Elassae and Sarakal are closing in during most of the fifth book, but even though the Anteans had committed horrible atrocities against the innocent people of those two countries, and even though the spider priests were not entirely to blame for everything the Anteans had done, Cithrin and the other heroes spend much of the book trying to figure out a way to get the Elassans and Sarakalese to forswear revenge, precisely to prevent it from leading to another war down the line.
* The Spider Tier List claims that social spider colonies are held back by having to deal with freeloaders.
* The spider-type Pokémon can be considered more of an aversion to this trope due to their basic designs not being all that grotesque, especially what with Spinarak and Joltik being more cute and cuddly looking in appearance.
* The Spiderwick Chronicles: Arthur Spiderwick makes a similar departure in the film version, although it's dandelion-seed fluff that he's swept away as, and he's being carried off to a fairy realm rather than dying.
* The Spiderwick Chronicles gives us Arthur Spiderwick's Field Guide, which contains all the vast knowledge on the world of faeries he collected.
* The Spiderwick Chronicles goes further with the protagonists having actually read the books and Field Guide, meeting up with the authors at a book signing for help in dealing with a problem with Giants as well as actually meeting Jared, who explains that their last names were changed in the books for privacy's sake.
* The Spiderwick Chronicles have a passion for constructing clockwork creatures, ranging from bugs to guard dogs, out of a desire to have creatures as long lasting as they are.
* The Spiderwick Chronicles: House Fey are known as Brownies, and one by the name of Thimbletack is a major character. However, when they are mistreated they transform into Boggarts, who enjoy wreaking havoc in households. Treating a Boggart nicely will turn it back into a Brownie.
* The Spiderwick Chronicles just can't help but read the book, especially after a note tells him not to. Considering he's a teenaged boy, this is understandable.
* The Spiderwick Chronicles Mulgarath wants the book so that he can use its knowledge for his own purposes.
* The Spiderwick Chronicles or baby dragons to gain fire-breathing abilities. They play a significant role in the second series, as their awakening and search for food drives dragons into a frenzy and disturbs water fey.
* The Spiderwick Chronicles resemble much like most depictions, but draw more from their depictions in European fairy lore. They are entirely subterranean (they can't stand bright light), reproduce by carving others of their kind from stone, and are miners and craftsmen. However, their centuries-long lifespans means they greatly pity the shorter-lived beings and try to improve on nature with mechanical replicas or preserving living beings in glass coffins for immortal slumber. They serve as the antagonists of the 4th book in the original series, under Mulgarath's orders.

* The Spiderwick Chronicles, the main human characters have to look through a hole in a stone (also called a hagstone or adder stone, in the books, a "seeing stone") to see the fairy creatures when they don't want to be seen.
* The Spiderwick Chronicles weakness: Tomato sauce is corrosive to goblins. (This was not in the original book.)
* The Spiderwick Chronicles. Whenever anything other than a human tries to pass through it, they comically bounce off the magical barrier.
* The Spiderwick Chronicles who were either invisible or glamoured to look like something else.
* The Spiderwick Chronicles will age and die as soon as their feet touch the ground.
* The Spider Woman (1944), Sherlock Holmes deduces that a series of apparent suicides were really murders because "suicides invariably leave notes behind them," and none of these people did. Actually, no more than about 20% of suicides leave a note.
* The Spidey villain Screwball has no powers but her skill in parkour.
* The Spiegel Series (from the HG family), a windowless racer that has the driver lie in it like a closed-cockpit luge sled.
* The Spiffing Brit, the Spiffing Brit points out that if you tried legging it the instant you left the bus, you'd get grabbed by the guards before you could escape... only to instantly escape, prompting him to break into laughter.
* The spiked chain, introduced in 3.0, is a far more effective weapon. Though Exotic and dealing a little less damage than most Large melee weapons, it has nearly every special ability a weapon can have and, almost uniquely, threatens all squares out to 10'. A character willing to devote almost all his feats to the task could be
* The Spiked Collar and Demonic Figurine create Felhounds and Doom Guards respectively.
* The Spike Jones song "My Birthday Comes On Christmas" is about a kid's lament over how being born on December 25th means he only gets presents once a year instead of twice.
* The Spike VGA's have voice acting awards for "Best Performance By A Human Male" and "Best Performance By A Human Female." In 2012, during the pre-show, this caused
* The Spikit. It has been known to tear parts off people's cars and eat them.
* The Spinach Can from the fifth installment has one, which emphasizes the low quality of his/her song and helps invalidate his/her flimsy health advise.
* The Spinaroonie. However, since this is a drawn out break dance taunt, it's a good opportunity for
* The Spin Attack (The Woo) takes every mook in your general vicinity out in true cinematic style, and as an added bonus, you get the
* The Spin Doctors' "Two Princes" has the poor Prince (the singer) and the rich Prince (the guy with the diamonds and the rockets).
* The Spine of Deathwing encounter takes place on the titular dragon's back, fighting against his corrupted blood while trying not to be thrown from his back when he rolls to the side. The goal is to loosen metal plates and then destroy the tendons holding them in place to expose his flesh to a more powerful attack.
* The Spine of the World, the barbarian adventurer Wulfgar's post-traumatic stress disorder after spending a few years as a demon lord's prisoner causes him to lose his heart for adventuring. He becomes an alcoholic and takes a job as a bouncer at a seedy tavern in order to support his drinking habit.
* The Spin from the original novel is also a planet-wide time dilation field that slows down Earth to a crawl compared to the rest of the universe. The protagonist's two friends immediately recognize the implications: in a mere 20 years on Earth, millions of years will have passed outside, and the Sun will have expanded to consume the planet. However, they take this as an opportunity to
* The Spinners' "Rubberband Man" describes the eponymous musician hooking one end of the rubber band onto his toes, which would mean by necessity, he performs without shoes.
* The Spinnetod (Spider) husband and wife. According to the husband when they saw

each other in school "they just knew"
* The spinoff also features such a character, Major Lorne. Sheppard, Rodney, Teyla, and Ford (later Ronon) are the "main" Atlantis team that we follow most of the time. Meanwhile, Lorne and his crew are busy with their own missions on other planets that we rarely get to see, only showing up occasionally when he is needed as support for the main characters.
* The spin-off novel "Peter and Max" has the same witch threatened with a trial, to which she responds "
* The spin off novels by David Weber and Steve White reveal that in the Rigelian's case, their surviving planets were interdicted with orbital weapons platforms to prevent them from progressing back to Industrial levels of technology. They had no such qualms when they decided what to do when deciding to do about
* "The Spinoffs" is a sketch show about how the show would be if the main character was someone other than Gumball.
* The spinoffs would largely avert this trope, though they still tend to feature
* the spin-off TV series, in which at one point, she comes up with an evil scheme, before straight up saying "All that's missing is some good old evil laughter".
* The Spinto Band have performed a version of their song "Later On" entirely using vocals,
* Thespiphobia at times. However he's usually too peppy and sweet to fit either of these.
* Thespiphobia giggled and said "I've never heard that before!" when Gwyn said they'd do their best not to dump pig blood on her. Gwyn and the other jaded techies were surprised and confused as to whether she was being sarcastic.
* "The Spiral King Lordgenome's eldest daughter, Nia Teppelin commands you to stand down, Andiane the Elegant! Are you aware of who I am?" Simon and Yoko instantly did a "holy shit!" expression upon hearing it.
* The Spiral Labyrinth has an army of insects at its command. Under its control, they can even take down attacking dragons.
* The Spiral Path. After the heroes prevail and all the other ogres have been killed, the injured Marjuk is surrounded by his foes and realizes he has no way out, so he turns to Hackle (who had earlier called dibs on killing him) and, right before the gnoll finishes him with one blow from his war club, spits out, "Gnaw easy kill."
* The Spiral Series be imagined can be present at some point within the Spiral.
* The Spiral Series. Both times it's presented as a business deal in his office, since that's how his brain could best handle what was happening.
* The spiral staircase at St. Paul's Cathedral has been used as a location more than once. Since the room it leads to is always different (the Divination classroom in the third film, the Defense classroom in the fourth film, and the Ravenclaw common room in the eighth film), they're presumably three separate, similar-looking staircases in-universe. Either that or the staircases moved, as they tend to do at Hogwarts.
* The Spiral Staircase cites this as his reason for killing women with any sort of physical defect, such as the mute heroine:
* The Spiral Wars, we are informed that most humans are just somewhat brown, but many characters are still specifically one race. The main Character, Erik Debogande, is African, and one Major character, Major Trace Thakur, is specifically of Nepali ancestry.
* The Spiral Wars, who shared it with the again already spacefaring Humanity.
* The Spire in the Woods are kicked off by a teenager's suicide, and the narrator himself attempts suicide in the epilogue.
* The Spire in the Woods ends up on medication for the rest of his life.
* The Spire in the Woods manages to cram in a lesson on consent alongside the supernatural thriller material.
* The Spire in the Woods she can haunt anyone who sees her body partaking in the civil war play the clock displsys. In the clock tower, her desecrated, clockwork-riddled corpse will seek out and try to kill anyone who stays for too long. When someone she haunts dies, she ferries their soul to the clock tower.

* The Spire in the Woods. The bells sound so beautiful that they cause the protagonist to nearly acheive orgasm. They become horrifying later, to be sure.
* The Spire in the Woods with the control linkages from the clock embedded throughout her body), the guests who attended the unveiling, and everyone who went searching for the bells over the years.
* The spires of Commorragh would be this, if there were any stars in the Webway.
* The Spire, those with superpowers are referred to by the less enlightened as "skews". They prefer the term "sculpted".
* the spirit and/or memory of Kamina shows up and saves everyone to the tune of "Libera Me" from Hell.
* The Spirit Beast Tamers are Psychic-type, just like all of the human Gusto monsters.
* The Spirit Cats are the remains of Clan Nova Cat, who were destroyed by the Draconis Combine.
* The Spirit cracks a pun that doesn't just get the booing but also a caption to apologise:
* The Spirit, doesn't get this hyperbolic of an assessment. The people who make this statement, however, are simple-minded clones who were created by Floss to begin with.
* The Spirit. Embarrassed, he turns around and says "Okay, put on a robe or something, but no tricks!"
* The Spirit Engine 2 claims to have this, though we must take his word for it. Mostly it tells him there's something wrong with Ionae, in case it wasn't already obvious.
* The Spirit Engine 2", played during the first section of the ending sequence.
* The Spirit Engine without so much as a sigh. It's similar in the sequel, although not as pronounced.
* The spirit gift "Taking The Forgotten" lets you steal something and makes the previous owner forget they possessed it in the first place.
* The Spirit. "Hand me that chair, Lorelei, this one's got a head like concrete...."
* The Spirit has it all...two-fistedness, the ability to take it (in SPADES!) and the guy to makes the women swoon. Probably comics signature guy for this trope!
* The Spirit has one extended fight scene that involves various objects culminating with a kitchen sink smashed over someone's head.
* The "spirit house" becomes a Running Gag between Richard and Kahlan.
* The Spirit in front of him. The kitten's entire body liquefies - fur, bones, everything - but its innocent blue eyes remain perfectly intact, afloat in a basin of liquid kitty.
* The spirit in Max's bat is a grudge, an insane spirit pumped up on pain and rage. It's unclear what it was originally like, but at this point it is nothing but a mad animal that lashes out at everything in reach. While it is still recovering in the bat, it can't do anything, but Max still gets access to its magnet powers.
* The Spirit. In virtually every strip his suit is shredded, though it's not fanservice. Or is it?
* The Spirit, is a classic example. Debuting in the 1940s, he anticipated both Dr. Claw and Blofeld in that his face was never seen — even on those occasions when he confronted the Spirit in person, his face was always in shadow, his most distinctive feature being his purple gloves with three yellow lines down the back. Initially a crime boss, the modern-day reboot by Darwyn Cooke recreates him as the leader of a terrorist group — the Octagon.
* The "spirit" is the Lunarians, the main antagonists of the series. They look like heavenly beings from Buddhist lore, and appears every once in a while to attack the Gems and take them to the moon.
* The Spirit is the most beautiful woman in the world. And she will remain so, as long as she never takes those fucking things off.
* the spirit is the true source of a character's strength (kung fu) philosophy.
* The Spirit, it is implied that the Octopus, who has just been blown up all over an alleyway, will be able to regrow himself from a single finger.

* The Spirit Morph Saga, Connie talks about how she thought the book series was, in her own words, "subverting these witch tropes", and was really self aware, only for none of that to seemingly matter in the end.
* The Spirit of '76, Adam-11 and Chanel-6 do this to the CIA agents when the agents run up behind their dune buggy in a muddy alleyway.
* The Spirit of '76, director Lucas Reiner appears briefly as a fireworks salesman.
* The Spirit of '76 likes calling random people to ask "Is your refrigerator running?"
* The Spirit of '76: Made in 1990, set in 1976. Claims to be the first '70s retro movie.
* The Spirit of '76, the inside of the time machine is papered with bills because money is almost worthless in 2176.
* The Spirit of '76, with a Pinto just missing getting hit in the midst of a car chase, but exploding anyway.
* The Spirit of America Dance Team's videogame-themed performance in the 2014
* the spirit of a previous Maou who's possessing makes a similar offer. The Yuusha again points out how ridiculous it is to expect a hero to accept such an offer.
* the spirit of chaos; an abstract concept instead of a celestial body. The sisters could only defeat him using the Elements of Harmony.
* The Spirit of Christmas was credited to "Robert T. Pooner" instead of Parker and Stone's real names. After the short went viral, many other animators claimed ownership of the pilot to get jobs before Parker and Stone went public. This name also appeared in the credits of the episodes "Chickenlover" and "Mr. Hankey's Christmas Classics."
* The Spirit of Krampus, a short story written by Kate Danley, in which the titular spirit infects all the adult and a young boy named Skip goes to find Santa Claus to fix things.
* The spirit of Naruto's mother Kushina explains how she fell in love with his father Minato: When she was kidnapped, Kushina
* The spirit of Snake of the Festival, a Godzilla-sized snake, possesses Yuji's body. Bel Peol wonders why her mighty leader would choose a lowly human body as a host. Snake holds her hand, caresses her face, and says he can think of a few
* The spirit of the Avatar has reincarnated into both male and female over the centuries. The Avatar is respected no matter which gender the current incarnation takes. However, the age and training level of the current Avatar WILL cause that respect to vary. Incidentally, of the seven incarnations we learn any detail about, the men were all conciliatory to a fault and the women were decisive and relatively ruthless.
* The spirit of the Hardcore title 24/7 rule (but without the hardcore violence and use of weapons) has been revived with WWE's new 24/7 Championship.
* The Spirit of the Millenium Ring again during the Millenium World arc, both as
* The Spirit of the Millennium Ring in the Monster World R.P.G. traps those who play the eponymous R.P.G. with Bakura inside mini-figures. When Yugi and the gang get involved, Dark Yugi has to finish the game.
* The spirit of the Millennium Ring is defeated many times, but keeps coming back. To count: he loses to Yugi, the ring containing his spirit is thrown away, he loses to Yugi again, and then he loses to Marik. And that's not counting "Season 0" taking place before the main series, where he's defeated a fifth time. With the exception of a
* The spirit of the seventeenth-century witch Isobel leaves Lana's body only after exacting revenge on the descendant of the woman who had her killed. This is an unusual example, however, as in previous episodes, Isobel showed absolutely no desire to kill this woman.
* The spirit of this trope is still used in certain prisons around the United States. Instead of doing time, you are given ONE chance (and only one chance) to go through an extremely intense boot camp-like training from the moment you step off the prison transport from the courtroom. They put you through the wringer. You will sleep when told to sleep, eat when told to eat, eat
* The Spirit qualifies as both brainy investigator and two fisted gumshoe; his aide

Ebony White has moments of brilliance as well.
* The Spirit shows him doing this over rooftops. Of course, he was also good at this in the comics.
* The Spirit spent most of his time being embarrassed by and fending off women's advances, a not-uncommon trope seen in comics and movies of the '30s and '40s.
* The Spirit Squad (a ridiculed heel faction from back in 2006) are an interesting case. They're heavily muscled, gung-ho, and prone to picking on people who don't measure up to their standards. But....they're cheerleaders. Yes, with pom-poms and a megaphone and cheesy rhyming chants. If they were girls, they'd serve as a
* The Spirit Squad. The other members — Kenny, Johnny, Mitch and Mikey — had varied success in the WWE and Ohio Valley Wrestling (OVW).
* The Spirit's sidekick Ebony White. About eleven and can drive a car, has a thorough understanding of the city, finds minutiae info his hero misses, crafty with tools, can knock out an adult using any handy heavy object, a dead aim with a slingshot, and good at research. So what if his pronunciation makes Popeye look erudite!
* The spirits that inhabit the Masamune (plus their older sister) transmigrate into that game's main character's weapon, becoming a weapon even
* The Spirit Stone marriage promise, and they're simply delaying the public announcement of it until the war is over.
* The Spirit, the only clue the reader has to his identity at any time is when his hands are visible; he always wears purple gloves with three yellow stripes appliqued onto the back. It has been established that he has the same height, weight, and general build as the Spirit, so he frequently chooses to impersonate the Spirit in order to implicate him or to confound the cops into shooting at the wrong guy.
* The Spirit Thief, all demonseeds eventually become puppets of the Master of the Dead Mountain.
* The Spirit Thief, all three main characters have mysterious origins, and there's an unspoken agreement between them to never discuss this. As the books go on, though, their backstories are slowly revealed due to various blasts from the pasts coming back to haunt them.
* The Spirit Thief and staying utterly still. His entire mind is focused on hunting, to the point that when he finally spots his quarry, Miranda calls his joy so powerful, no human would be capable of feeling it.
* The Spirit Thief, as Eli's life goal is to have a bounty of one million standards on his head and he uses the posters to check how high it is.
* The Spirit Thief, as the combined bounty for Eli, Nico and Josef eventually exceeds 600,000 gold standards, everyone and their dog is out to get them, including master swordsmen, unnoticeable men, spiritualists, League of Storms, random bounty hunters and one very angry empress.
* The Spirit Thief) capabilities, the main characters agree that they're worth every standard.
* The Spirit Thief, demonseeds like Nico feel an overwhelming urge to feed on spirits and kill every human that stands in their way.
* The Spirit Thief, Eli has a way with spirits that makes them like him and want to help him very quickly. He's a bit worse with gaining support of humans, though.
* The Spirit Thief forming between the main characters and their biggest enemies to battle the greater threat in a glorious, trans-dimensional clash.
* The Spirit Thief has its personification, which is anthropomorphic in character, if not shape, as every object, weather pattern and geographical feature has a spirit which can be awakened by a sufficiently skilled wizard.
* The Spirit Thief has some form of this reaction, ranging from horrified "oh no" to nervous breakdowns.
* The Spirit Thief: in the Council Kingdoms, bounties and, by extension, bounty hunters are how most criminals are pursued and imprisoned. Most notable bounty hunter in the series is Josef, who actually left the job a year prior to the beginning of the story, when Eli convinced him that going with him would let Josef find better opponents.

* The Spirit Thief is almost ridiculous. Despite that, there's no trace of any romantic or sexual tension between them whatsoever.
* The Spirit Thief is the Deputy Commander of the League of Storms, and as such he serves as the second-in-command to the Lord of Storms.
* The Spirit Thief, Miranda volunteers Eli and his entourage to help solve the crisis in Mellinor because they're the ones who inadvertently caused it in the first place.
* The Spirit Thief, most magic is performed by manipulating spirits, leaving a few loopholes to exploit.
* The Spirit Thief persona, but Eli's jokes manage to crack her up every once in a while.
* The Spirit Thief set down that all spirits must obey: don't look at the sky, don't ask about the stuff you see in the sky, and never, ever mention stars. By the fifth book, the elephant becomes so conspicuous, the Shaper Mountain goes "screw it" and explains everything to Slorn and Miranda.
* The Spirit Thief the Council Kingdoms' army, and when he's spotted during the second war, swimming alone for the beach, the entire fleet almost pulls back to try and stop him from reaching the shore.
* The Spirit Thief, the Duke of Gaol is infamous in the spirit community for using creative torture to bend them to his will. He's not averse to doing the same to humans, as one of the protagonists learns the hard way.
* The Spirit Thief, the Immortal Empress has sent people into the Council Kingdoms following her first defeat twenty years prior with instructions to make themselves as powerful and trustworthy as possible so that they might act as saboteurs during the next invasion. In some cases, even the original infiltrators' children are utterly loyal to her.
* The Spirit Thief, their eyes start to glow yellow. This is your last warning to turn tail and run before everything goes to hell.
* The Spirit Thief, the spirits are forbidden from talking about the important apocalyptic thing that might be happenning again by their goddess, but as the Shepherdess is becoming more and more neglectful and self-absorbed while the world begins to burn around her, they're breaking this rule to help the heroes stop the apocalypse.
* The Spirit Thief, with neither interested in consummating the marriage, much less falling in love.
* The Spirit, this is how The Octopus and The Spirit are revealed to be practically immortal.
* The Spirit times the comic to take approximately ten minutes of the reader's time. This was in 1949.
* The Spirit, two bank robbers take this approach to cover their crime. They don't realize they missed a little girl down the block, who fell down out of fear. The police are a bit peeved.
* The spiritually charged Magatama has the ability to "sense secrets" in the form of binding chains called Psyche-Locks; in essence, it makes the holder a
* The Spirit. Unfortunately for her, the title character chooses to turn her upside-down and shake it out, rather than reach in.
* The Spirit universe. This is because writer Brian Azzarello felt Ebony was more fitting as a female name in the 21st century.
* the spirit within the Staff of Creation was so concrete that he couldn't play around a bit.
* The Spirit World is this, being a place beyond time where normal physics don't apply and full of
* The spirit world itself; Aang has to brave various monstrous terrors so that he can ask questions of his previous incarnations.
* The Spirit would create new versions of fairy tales, set in the 1940s.
* The Spirit would sometimes add a trenchcoat to his trademark blue suit.
* Thespis: The Roman gods have ended up old, powerless and ridiculously out of touch. Apparently they still get sacrifices from Australia.
* The Spithead Mutiny in 1797 was an interesting one. It was a mutiny by an entire

fleet of British ships in time of war. It was so orderly that historians often compare it to a labor strike. This mutiny was notable for the political savvy of the mutineers which involved demanding no more then they could demand without losing sympathy. This included a pay raise, removal of corrupt officers, and a more standardized enforcement of regulation. Notably it did not demand the abolition of flogging; the sailors were prepared to accept much severity, including flogging, if it was predictable severity, but they did not want captains whose punishments were erratic. It also did not address the issue of impressment: forced conscription of civilians into the navy against their will. Another notable part of their proposal was to concede from the beginning the promise to renounce the mutiny and sail into battle if the French were spotted coming out of harbor as demonstration of their non-treasonous motives. These PR gambits made the Spithead Mutiny more successful then many.
* The Spitting Image, in which Big Ears advises an unhappy Noddy to cheer himself up by singing happy songs. Noddy then proceeds to dance and sing a happy tune that quickly turns into a horrific, Wilfred Owen-like lyric about World War I. ("Oh what does it matter / If things aren't so merry / And death-shrouded corpses / Lie ready to bury"). The parody ends with Big Ears saying, "I don't see what you're so happy about. You've spoiled my whole bloody evening!" and an illustration (in the style of the originals) of him about to hang himself.
* The splanch has also made appearances in the creator's other comic,
* The splash called his version the "Five-Star Frog Splash", which involved pointing at himself while he jumped, and then hurting himself as a result of being such a show off.
* The Splash Wall sub weapon is effectively a throwable version of this. When thrown, it creates a raining wall of ink that stops enemy attacks dead in their tracks and instantly splats anyone foolish enough to walk into it. They stay on the field for a limited amount of time, but do dissipate faster with damage.
* The Splatfest Tee is considered by many to be a source of unnecessary grinding. You are given the shirt up to 1 week beforehand, but it is a three-star shirt with three empty slots—so it takes the most experience to max out—and you are expected to level it up from scratch. Granted, the extra abilities are weaker and affected by
* The Splattershot exists in real life. It shoots water rather than ink, but it otherwise is identical.
* The Splinter: All avatars have this ability. Each race has three forms that they can switch between. In fact, beings in the Realm that can't shapeshift aren't even considered truly sapient.
* The Splinter; an enormous, ever-changing, labyrinthine world that's used for gladiatorial combat and dungeon crawls. It has made him fabulously wealthy.
* The Splinter are an entire race of atoners. They're incapable of letting go of their past and are primarily driven by the desire to repent for their sins by doing good.
* The Splinter are primarily interested in discovering and studying the history and technology of The Realm, respectively.
* The Splinter are this, especially if they’re player academy graduates. They have to be or else they would have died long before getting recognition.
* The Splinter as punishment. If they survive long enough, they can become super stars.
* The Splinter deliberately falls into this category. Most of the gear that fits this description is leftover from one of the many precursor races that have inhabited The Realm.
* The Splinter, Earth is controlled entirely by Gamescorp which has, by the time of the setting, absorbed every other corporation. Seeing as they have no competition or entities capable of imposing regulations on them, they're pretty nasty.
* "The Splinter" features a rather detailed closeup of SpongeBob getting a splinter in his thumb.
* The Splinter is a cyberpunk setting. The natives of The Splinter - taken by Players as their Avatars - don’t know it’s an ultra-violent spectator

sport for Earth. To them, The Splinter is the True Realm: an ever-expanding, ever-changing mega-dungeon labyrinth. The inhabitants of the Splinter are as strange as their environment: powerful shapeshifters gifted with the power to alter reality through will alone.
* The Splinter is of the Russian Nesting Doll variety. Earthside scientists created the Realm as a computer simulation, and then the Pyx created their own universe from within the Realm.
* The Splinter. Players have to complete an objective and escape the S.P.L.I.N.T.E.R. within 8 hours. If they don’t meet that objective, neurotoxins are released into their bloodstreams.
* The Splinter rewards this. Professional players can pause in the middle of an action and describe what they're doing, similar to how reality tv shows cut away in the middle of an event so that the participants can describe how they felt and what they saw and did. Depending on how awesome and over-the-top their description is, that player can get a bonus to their dice pool.
* The Splinter runs on this. Players are only allowed out of the game if they complete their objective and, if a Player's Avatar dies, the Player dies on Earthside. This isn't a side effect of the VR technology being used, rather it's because the Mega Corp. in control of the VR technology will give you an immediate lethal injection if you lose.
* The Splinter's two realities (the Realm) was created as by the citizens of the other (Earthside) to serve as a hyper-realisitic infinite dungeon crawl, making it a diegetic dungeon crawl within a recursive RPG.
* The Splinter: The network in charge of the games in the Realm has zero problems with killing players for the sake of boosting ratings and creating drama. Dying in the game means you die in real life. It's tough to get screwed harder than that.
* The Splinter. They see The Realm as a massive proving ground and can shape shift into humanoids made of metal spikes.
* The Splinter to be ordered to stalk and kill other players. Keep in mind, if you die in the game, you die in real life.
* The Splinter: When players enter the Splinter, they think that they're taking on a computer-simulated form in a virtual reality game. They're actually doing this to some poor denizen of the Realm.
* The Split-Pot Poker's base form, the Poker, is found in the final dungeon of Act 2. Its attacks cannot be parried or blocked.
* The Split Second, the second book in the Seems series written by John Hulme and Michael Wexler, this happens to Tom Jackal. His body is rapidly aging and he is talking to Becker about his family, whom he left behind to come help save The World (and The Seems): "Don't feel bad for us, son. Because our love will survive anything. And I know I'll see them in A Better ..." He would have said "Place," if he'd had the time... He just didn't quite make it.
* The Splitting has two worlds, the normal world and the mirror world. The player character has to figure out how to progress by using objects from world in the other or modifying something in the normal world so the mirror world changes to match.
* The Splugorth also make use of a bio-engineered race of slave-warriors called the Altarains, or else "The Blind Warrior-Women of Splugorth" who are a
* The Spock: A character who relies on logic in all decisions would be portrayed in Enlightenment-leaning works as an ideal to aspire to.
* The Spock for years to the point he is a shell of a man, and she casually notes, "To be sure, the White Christ never suffered so long or terribly as did this traitor. Three days on a tree. Hardly enough time for a prelude. When it came to visiting agony, the Romans were hobbyists."
* The Spock series had the role of first officer as a standalone position.
* The Spock that no one could really learn good and evil from "a vernal wood" unless they had an idea of it before hand and that someone could draw a lesson Wordsworth would not approve of as creatures in vernal woods spend a lot of time eating each other.
* The Spock who advocates rigid mental control, so his mind is a blank featureless

box floating in a void that expands into specific memories on command.
* "The Spoiler": Leslie, Banana Joe and Juke all act out scenes from a movie Gumball wants to see with their food, so to avoid spoilers, Gumball eats all of their food. Anton then keeps talking about the movie, so Gumball slaps him onto another piece of bread and eats him too.
* The Spoilers (1942). A prospector in a gold rush town is told that a hotel doesn't have any vacancies. Suddenly there's a gunshot from inside the hotel and a body rolls down the stairs. The hotel owner promptly sells the now-vacant room.
* The Spoils of Babylon "The Age of the Bastard": While Devon cannot get a vegetarian option at the steakhouse that somehow fits in the tiny submarine, Cynthia's order just gets more and more complicated.
* "The Spoils of War" ends with a large battle in which Daenerys's Dothraki forces ambush a Lannister caravan moving Tyrell gold into King's Landing. This is the first extended battle sequence featuring a dragon. On a related note, it also broke records for most stuntmen set on fire.
* The Spoils, the Gearsmith artifacts such as the Runic Cannon or the Runic Whale often have curly glowing runes of power running around their surface.
* The "spokescandies" for M&M's which take the slavemaster's line and turn it into a rendition of
* The Spokesmen’ "Michelle" also got significant airplay on WIBG, but was nowhere of a hit as "Dawn of Correction". Group members John Medora and David White were more successful as songwriters: they co-wrote Danny and the Juniors' "At the Hop" (White was a member of that group), Lesley Gore's "You Don't Own Me" and Len Barry's "1-2-3", among others.
* The Spongebob Movie Sponge On The Run ends with a sketch of SpongeBob from the early stages of production of the TV series and a dedication to Stephen Hillenburg, who died of ALS on November 26, 2018, overseeing the early stages of the movie.
* The SpongeBob Movie: Sponge on the Run ("Gary Rescue Operation"; "Pingping-i" is the Korean dub name for Gary).
* The SpongeBob Movie: Sponge on the Run). He then pulls down a lever after some difficulty, shooting electrified green goo through a pipe attached onto the logo. The logo's lights turn on, one after the other, and the dark walls fall down to reveal a purple sky. The Nickelodeon blimp passes by, shooting a 2D goo projectile that forms the word "Movies" below the logo. It ends when Spongebob sings the last notes of the logo's theme.
* The SpongeBob Movie: Sponge on the Run, she didn't appear at all in this one.
* The SpongeBob Movie: Sponge on the Run. Squidward also says "freakin'" in one scene.
* The SpongeBob Movie: Sponge on the Run, with Sponge on the Run's flashback sequences of a young SpongeBob going to camp serving as the basis to the spin-off series.
* The SpongeBob Movie: Sponge Out of Water’s back (she is a giant in comparison). His attempts to get off the woman’s back are mistaken for a massage.
* The SpongeBob Movie: Sponge out of Water, after the plot has concluded, the talking seagulls begin to reprise their version of the SpongeBob theme, in a stylistic Flash animation. However, Bubbles reappears and expresses his disdain for the song, which inexplicably leads into a rap battle between them.
* The SpongeBob Movie: Sponge Out of Water, apparently, Mr. Krabs made a rule that only one copy of the Krabby Patty formula could exist and that no one was allowed to memorize it. The cause of the plot comes when that one copy disappears right when more patties need to be made.
* The SpongeBob Movie: Sponge out of Water, as SpongeBob and his friends chase Burger Beard down the street, the seagulls watch them go while eating popcorn. While this happens, one seagull yells to Burger Beard, "That's what you get!"
* The SpongeBob Movie: Sponge out of Water by attempting to get a Krabby Patty from SpongeBob with a Gary robot, the real Gary slowly chases him out the door.
* The SpongeBob Movie: Sponge out of Water episodes like "F.U.N" and "Single Cell Anniversary" where SpongeBob had trouble teaching Plankton the concepts of fun,

friendship, and love.
* The SpongeBob Movie Sponge Out of Water feature Spongebob, Patrick, Squidward, Mr. Krabs and Plankton, (as their superhero egos), as colossal giants.
* The SpongeBob Movie: Sponge out of Water. Following Hillenburg's unfortunate passing of ALS in November 2018, winning back the crowd again will probably be even tougher.
* The SpongeBob Movie: Sponge out of Water. Given that the story was penned by Steven Hillenberg himself, the entire movie can be seen as a "Sorry for what the staff turned my show into after I left."
* The Spongebob Movie Sponge Out Of Water has a gender-flipped version in the scene when the gang are on dry land and are crossing the road trying to avoid the bicyclists and skaters and Sandy carries Squidward in her arms to safety.
* The SpongeBob Movie: Sponge out of Water has one called "Thank Gosh It's Monday". The scene was posted online before the film was released as a teaser, but it's nowhere in the final product.
* The SpongeBob Movie: Sponge out of Water, he tapes him to his desk and tells a knock-knock joke. ("Jimmy." "Jimmy who?" "Jimmy BACK MY FORMULA, PLANKTON!") SpongeBob's ensuing laughter after he gets the joke (with Krabs wearing ear protectors) is what gets Plankton screaming.
* The SpongeBob Movie: Sponge out of Water interrupts the theme song and expresses his hatred of it and, apropos of nothing, goes into a rap battle with one of the seagulls.
* The Spongebob Movie Sponge Out Of Water, it is pointed out that Plankton is naked when Past SpongeBob asks why he's naked. Plankton explains that he goes nude because they don't make clothes his size.
* The Spongebob Movie Sponge Out Of Water of the film sold out and took months to meet demand.
* The Spongebob Movie Sponge Out Of Water, Patrick is holding his binoculars backwards during a WWII-inspired scene.
* The SpongeBob Movie: Sponge out of Water reference) seem to have been added for the PG rating.
* The SpongeBob Movie: Sponge out of Water, Sandy (in her superhero mode) spits peanuts out at Burger Beard.
* The Spongebob Movie Sponge Out Of Water, Spongebob and Plankton are sneaking into the Chum Bucket to get Karen, and have to get the key to Karen's cell. Plankton starts tiptoeing and we think it's regular cartoony tiptoeing sounds. But then he stops and we see that it's just Spongebob standing there playing a tiny piano.
* The SpongeBob Movie: Sponge out of Water, Spongebob says hypothetically that the only way that he and Plankton could possibly fix the scrape they've gotten themselves into is go back in time and stopped the events that happened in the first place. Plankton tells him to "hold that thought". He proceeds to grab the thought bubble over his head and hold it like a balloon.
* The SpongeBob Movie: Sponge out of Water". SpongeBob's reaction is "...that's kind of gross, Plankton."
* The SpongeBob Movie: Sponge out of Water, SpongeBob tries to tell Mr. Krabs and others that Plankton didn't steal the formula this time, but they don't even bother listening to him.
* The SpongeBob Movie: Sponge out of Water, Squidasaurus is appalled that the Bikini Bottomites try to sacrifice Spongebob.
* The SpongeBob Movie: Sponge out of Water, Squidward does this when he comes in to complain to Mr. Krabs:
* The SpongeBob Movie: Sponge out of Water, starts the end credits with N.E.R.D.'s "Squeeze Me".
* The Spongebob Movie Sponge Out Of Water that he goes naked because they don't make clothes his size.
* The SpongeBob Movie: Sponge out of Water, the Bikini Bottomites are in a conga line.
* The SpongeBob Movie: Sponge out of Water: The logo rises out of the ocean, covered in kelp and coral.

* The Spongebob Movie Sponge Out Of Water, the original voice of Mermaid Man, who died back in 2012.
* The SpongeBob Movie: Sponge out of Water, though. However, it takes place before the events of the first movie.
* The Spongebob Movie Sponge Out Of Water, we see Gary still chasing Plankton.
* The SpongeBob Movie: Sponge out of Water when Mr. Krabs breaks back into the Krusty Krab after finding out Plankton got into his safe:
* The SpongeBob Movie: Sponge out of Water, when the background characters refuse to go the surface.
* The SpongeBob Movie: Sponge out of Water, which was also generally well-received.
* The SpongeBob Musical: During "Hero is My Middle Name", Spongebob tells Sandy that she's the only person in Bikini Bottom with the smarts to figure out a way to stop the eruption of Mount Humongous, then hastily adds "But no pressure!" This gives Sandy the idea to build a device to disrupt the building pressure in the volcano's magma chamber which will nullify the eruption.
* The SpongeBob Musical even cutting entire songs that already had lyrics cut in the original live broadcast.
* The SpongeBob Musical had its Broadway run cut short less than a year after its opening because the Palace Theater wanted to perform renovations, though the show's ticket sales weren't ideal either.
* The SpongeBob Musical has SpongeBob doing the splits right as he hits his high note in "No Control". There's no logical explanation for this except for the fact that Ethan Slater can hit the splits and this was as good a time as any.
* The SpongeBob Musical. Instead, critics found a surprisingly heartwarming and funny musical.
* The SpongeBob Musical of the Macy's Thanksgiving Day Parade, many fans of the show's source material said that they despised it because the actors did not resemble the characters they were supposed to play the roles of. Other fans, and some parents with young children, said that the humanized characters could give people nightmares.
* The Spongebob Musical: Old Man Jenkins goes around looking for someone to blame for the volcanic eruption, and he ends up attracting an angry mob of Bikini Bottomites when he picks Sandy Cheeks as a scapegoat. They spend much of the rest of the play chasing her around chanting "Blame the squirrel! Blame the squirrel!"
* The Spongebob Musical; Patrick covers his eyes, Spongebob his ears, and Sandy her mouth.
* The SpongeBob Musical, Plankton has a rapid-fire rap verse in "When the Going Gets Tough". Unfortunately, it's not on the cast album, which reflects the Chicago cast before it went to Broadway, but it is preserved in the televised version.
* The SpongeBob Musical, Plankton's actor wears an eyepatch to represent how the character is a one-eyed plankton in the cartoon.
* The Spongebob Musical somehow struggles to rhyme the word "rock" during the opening number. SpongeBob informs him that several words do rhyme with "rock."
* The SpongeBob Musical: Squidward gets briefly confused by his own use of multiple negatives in "I'm Not a Loser".
* The Spongebob Musical, usually during their Couch Potato Stew block.
* The SpongeBob SquarePants Movie, a deleted scene (storyboarded but not animated) revealed that Sandy was planned to make a cameo appearance on the surface world as a real squirrel. Come this film, and Sandy dons the appearance of a real squirrel in her superhero form.
* The SpongeBob SquarePants Movie, after being captured by the diver, SpongeBob smacks into the side of fishbowl he and Patrick wake up in. Patrick initially assumes it's a wall of psychic energy.
* The SpongeBob SquarePants Movie after being hit by a beam from Neptune's trident.
* The SpongeBob SquarePants Movie after they show off their impressive dance skills.
* The SpongeBob SquarePants Movie also has live-action/animated sequences. However this time, the animation is done with CGI instead of traditional hand-drawn animation whenever real people show up.

* The SpongeBob SquarePants Movie at the beginning of the film, we see the pirates still sitting in the theater, and the female usher tells the pirate they have to leave the theater, and they do so.
* The SpongeBob SquarePants Movie began with live-action footage implying it was a live-action movie set in a submarine, but then it cuts to SpongeBob in a bathtub.
* The SpongeBob SquarePants Movie, despite lasting several more seasons and two movie sequels, this can be considered Plankton's final fate.
* The Spongebob Squarepants Movie, during the bubbles scene in the bathroom, Patrick is seen shower juggling bubbles.
* The SpongeBob SquarePants Movie, during the scene where Mr. Krabs is trying to tell King Neptune he didn't steal his crown, he receives a message from someone who claims he sold the crown to him and that he in-turn sold it to someone in Shell City, Mr. Krabs desperately trying to turn off the answering machine, even pulling it out of the wire, only for the call to keep going until the guy hangs up himself.
* The Spongebob Squarepants Movie during the trip to Shell City, SpongeBob decides to give up and go back home, telling Patrick that it's hopeless and that everyone is right about them only being kids. Only for Mindy to show up and warn them about what's going on in Bikini Bottom.
* The Spongebob Squarepants Movie ends this way too. After his adventures, Spongebob gets promoted to manager and this exchange occurs:
* The Spongebob Squarepants Movie everyone who sees it. Another reason, of course, is that he's in permanent denial about being bald.
* The SpongeBob SquarePants Movie features Mr. Krabs experiencing one after being shot by Neptune.
* The SpongeBob SquarePants Movie, for a film starring SpongeBob features the title sponge confronting King Neptune, encountering a cyclops, and deciding the fate of his home. The tone and homages make this a "mock epic" of sorts.
* The SpongeBob SquarePants Movie for the entire length of time that they have the Patty Wagon in their possession.
* The Spongebob Squarepants Movie) got this from nearly everyone in the movie as a reason he's not capable of doing what he sets out to do. Of course, he does prove himself.
* The SpongeBob SquarePants Movie has a colorful explosion, then a blue sphere (possibly a shout-out to the Nickelodeon Pinball logo), a rose blooms as an orange blimp flies through it, followed by kaleidoscope view of goldfish and finally has the Nick bubble and the Movies bubble floating to place in the orange sea.
* The SpongeBob SquarePants Movie has Plankton initiating Evil Plan Z, after he remembers that the alphabet doesn't stop at Y.
* The Spongebob Squarepants Movie has the 12 numbers, but in scrambled order.
* The SpongeBob SquarePants Movie in order to give the film a PG rating.
* The SpongeBob SquarePants Movie introduced Dennis the bounty hunter, who was out to kill SpongeBob on Plankton's orders. Although his method of murder was stomping people with a cartoony spiked boot, Dennis was a surprisingly menacing villain.
* The SpongeBob SquarePants Movie is searching for SpongeBob and Patrick, one of the two gas station owners that heckled them earlier makes a joke about his hat. Dennis silences their laughing by ripping their mouths off.
* The Spongebob Squarepants Movie, King Neptune is much different than his appearance in the show. On a minor note, news reporter Perch Perkins is colored purple rather than orange, and seahorses are drawn more realistically.
* The SpongeBob SquarePants Movie looks even better due to the improvements in technology, especially when the 2D characters become CGI.
* The SpongeBob SquarePants Movie, Mindy convinces SpongeBob and Patrick that they are men by giving them seaweed moustaches. They spend half a minute admiring them before setting on their way, only to run into paid assassin Dennis, who rips off the fake moustaches and shows them what a "real" moustache looks like by willing one to grow instantly on his face.
* The SpongeBob SquarePants Movie more than any other animated film. This treatment has lasted since they got the rights to show the movie 16 years ago.
* The SpongeBob SquarePants Movie: Mr. Krabs is framed for stealing King Neptune's

crown, and remains frozen over the course of six days. He may either wait until SpongeBob and Patrick retrieve said crown or be burnt to death after the six-day shift.
* The Spongebob Squarepants Movie music. Once the smoke clears, SpongeBob is left dangling on the end of a rope suspended above the stage, which is a literal reference to the original deus ex machina trope of ancient Greek theatre.
* The Spongebob Squarepants Movie of the Goofy Goober song while he's at it!
* The Sponge Bob Squarepants Movie. One of the attendants immediately asks, "What'll it be, fellas, mustard or ketchup?"
* The SpongeBob SquarePants Movie over microphone before realising that the new manager is actually Squidward.
* The SpongeBob SquarePants Movie) Patrick at first appears to notice the skulls and shouts to SpongeBob as if to warn him... but turns out he's just asking for chocolate.
* The SpongeBob SquarePants Movie, Plankton complains that he has gone through Plans A through Y in trying to get the Krabby Patty formula. Then his computer wife Karen reminds him that there's another letter after Y, and so Plan Z goes into effect.
* The Spongebob Square Pants Movie, Princess Mindy denies to King Neptune that she's stalling:
* The Spongebob Squarepants Movie, Princess Mindy turns SpongeBob and Patrick into "men" with seaweed mustaches with her "mermaid magic", or so she claims, which are then ripped off later by the villain. In typical manner, they still manage to make it through.
* The Spongebob Squarepants Movie) run into a movie theater to watch it.
* The Spongebob Squarepants Movie," so he can operate it perfectly competently.
* The SpongeBob SquarePants Movie: SpongeBob and Patrick are captured by a cyclops (actually a man in a diving suit) and taken to his gift shop to be dried and made into souvenir knickknacks. Among his victims are a group of fish made to look like a mariachi band. When the sprinkler system revives the fish, the mariachi band starts playing as they exact revenge on the cyclops.
* The SpongeBob SquarePants Movie, SpongeBob and Patrick are dried up to death in the Shell City gift shop and then revived a minute later when their tears short out an electrical outlet and activate the sprinkler system.
* The SpongeBob SquarePants Movie, SpongeBob and Patrick travel most of the way to Shell City in the Patty Wagon - a large drivable hamburger, originally intended for promotion of the Krusty Krab.
* The SpongeBob SquarePants Movie, SpongeBob and Patrick, under the belief that they've become men with mustaches and invincibility, jump into a monster-infested trench. They fall for about 30 seconds before hitting a coral branch that slows their descent so they have a safe landing.
* The SpongeBob SquarePants Movie, SpongeBob attempts to bribe Dennis with "Goober Dollers". He's unimpressed.
* The Spongebob Squarepants Movie, SpongeBob brings up that there's something he must say when he is finally given the job as manager of the Krusty Krab 2 that he wanted, but states that he doesn't know how to put it. After Squidward suggests that SpongeBob is trying to say that he's realized he didn't really want the job after all, SpongeBob denies Squidward's assumption and explains that he was actually trying to tell Squidward that his fly was down, which is odd considering that Squidward never wore pants in the first place.
* The SpongeBob SquarePants Movie, Spongebob gets a hangover from too much ice cream.
* The SpongeBob SquarePants Movie, SpongeBob steps into the podium thinking he's just been named manager of the Krusty Krab 2. He starts making his speech when Mr. Krabs whispers in his ear:
* The SpongeBob SquarePants Movie, SpongeBob visits what at first looks to be an ice cream stand surrounded by skulls and bones, but is actually a giant fish and the little old lady who runs it is the fish's tongue. One of its organs looks like a skinless cat that meows.

* The Spongebob Squarepants Movie: Squidward quickly deduces Plankton's Frame-Up scheme and threatens to tell King Neptune about it... in the middle of Plankton's restaurant.
* The SpongeBob SquarePants Movie takes place over six days, according to King Neptune and Patrick. Including the part where The Krusty Krab 2 opened, Plankton steals King Neptune's crown, and SpongeBob visits Goofy Goober, the film would take seven days, making it one week.
* The SpongeBob SquarePants Movie" theme song is played in order to identify who the "bubble-blowing baby" was. Fortunately for them, one of the tough bar customers starts dancing to the music, and the others beat him up, giving SpongeBob and Patrick the chance to escape.
* The SpongeBob SquarePants Movie: The movie begins with SpongeBob exuberantly thanking Mr. Krabs in front of an enormous crowd for making him the manager of the new Krusty Krab, entirely oblivious to the fact that Mr. Krabs named "Squidward" and there's a giant poster of Squidward's face unrolling behind them.
* The SpongeBob SquarePants Movie, the titular character performs a rock cover of the Goofy Goober anthem (to the tune of Twisted Sister's "I Wanna Rock") in order to break everyone out of Plankton's mind control.
* The SpongeBob SquarePants Movie. This extends to fans who were kids at the time of release but are now adults.
* The SpongeBob SquarePants Movie, this is used for comical effect as a background character's reaction to King Neptune's baldness (which is apparently so severe that his scalp's as bright as a spotlight).
* The Spongebob Squarepants Movie this job!", while laughing maniacally.
* The Spongebob Squarepants Movie, this sequence is too cool to question.
* The SpongeBob SquarePants Movie through the waves. The ensuing fight scene takes place on top of Hasselhoff's legs, and is complete with dramatic jumps from one leg to the other. Dennis is eventually defeated when he hits his head on an overhanging catamaran.
* The SpongeBob SquarePants Movie to get the key to the Patty Wagon. At first the plan is for SpongeBob to do the distraction while Patrick gets the key, but Patrick wants to do the distraction. So while SpongeBob tries to get the key, Patrick stands in the middle of the bar, and... announces that he has to use the restroom.
* The SpongeBob SquarePants Movie Two gas attentants, Floyd and Lloyd laugh at SpongeBob and Patrick's car, the Patty Wagon (a car shaped exactly like a krabby patty) and then Floyed asks "Where are you two dumb kids headed anyway?"
* The SpongeBob SquarePants Movie video game: SpongeBob is about to get hit.
* The SpongeBob SquarePants Movie was all a joke. Not one person buys it, and he's shipped off to prison, screaming that he'll destroy everyone.
* The Spongebob Squarepants Movie was dedicated to Jules Engel, a former UPA colorist and Stephen Hillenburg's mentor at CalArts.
* The SpongeBob SquarePants Movie was released this way, with the theatrical version being subtitled and shown as a limited release.
* The SpongeBob SquarePants Movie. When he finally loses his patience, Neptune throws her out of the Krusty Krab and magically wraps the place in chains and padlocks.
* The Spongebob Squarepants Movie: When King Neptune freezes Mr. Krabs, Squidward says, "Oh, no! This is terrible! Who's gonna sign my paycheck?"
* The Spongebob Squarepants Movie, when King Neptune's crown gets stolen by Plankton and stationed in Shell City, SpongeBob and Patrick volunteer to retrieve it after Mindy coaches them how to survive. When SpongeBob and Patrick are ready to give up when they're separated from Shell City by a monster trench, Mindy arrives and inputs courage to their hearts by tricking them they've become grown men through her "mermaid magic". SpongeBob and Patrick then proceed with their journey without Mindy.
* The Spongebob Squarepants Movie, when Mindy talks about the "cyclops" to SpongeBob and Patrick, her eyes merge into one big eye.
* The Spongebob Squarepants Movie, when Spongebob and Patrick go to buy ice cream from an old lady in a stand, right in the middle of piles of bones all around it.

Ignoring the danger, Spongebob wades through the bones. Patrick looks at the bones, then looks at Spongebob, and cries out "SPONGEBOB!". Spongebob turns around, and Patrick says "...Make mine chocolate."
* The SpongeBob SquarePants Movie when they go under a buoy and Dennis is knocked off.
* The SpongeBob SquarePants Movie, when unfreezing Mr. Krabs, King Neptune accidentally turns him into a human boy. Turns out he accidentally set his trident to "Real Boy" instead of "Unfreeze".
* The SpongeBob SquarePants Movie (y'know, because the heroes are a sea sponge and a sea star).
* The Sponge House episodes, the story "The Great Dog Race" (parodying "The Great Snail Race") has Mr. Grouse get misnamed as Mr. "Goose", "Grease", and "Gross".
* "The Sponge Who Could Fly"; the "lost episode" begins with SpongeBob walking in place while
* The Spook: An individual whose background and motivations are not known.
* The Spooktacular New Adventures of Casper, Casper himself gets tickled by a mischievous, shape-shifting Ghost Horse.
* The Spooktacular New Adventures of Casper episode "Poil Jammed" when Poil sweet-talks him into helping her be scary so Spooky will like her.
* The Spooktacular New Adventures of Casper had a gag where Elvis' ghost goes to haunt Lisa Marie, presumably for marrying Michael Jackson. By the time it aired, Lisa Marie and Michael had been divorced for a month.
* The Spooktacular New Adventures of Casper jokes. Sometimes they varied things with jokes like a tombstone reading "I'm with stupid" next to another tombstone reading, "I'm stupid".
* The Spooktacular New Adventures of Casper, where Elvis' ghost appears in a therapy session with Dr. Harvey.
* The Spooktacular New Adventures of Casper, which amongst other things, prompts him to dial 2 if they are being harassed by a Ghostbuster.
* The spooky forest room has roots that are easy to trip over, fog, and motion-sensing fake spiders. Oliver and Veronica set up a real axe in a stump there as well.
* The Spoony Experiment, a character mentions that technology similar to what the Ripper (a serial killer) is using was recently stolen from her. The main character asks, "And you think the Ripper did it?"
* The Spoony Experiment a fair chance but she just annoys the hell out of him and he doesn't think she's that good an actress.
* The Spoony Experiment (and by this extension, the film it was based on), satirizing the heroes' careless thrillseeking and eventually winding up with the scissors stuck in his eye.
* The Spoony Experiment. And yet none of them seem to have stuck around long enough to film an ending; the movie just sort of stops 20 seconds after the climax.
* The Spoony Experiment, Benzaie hears it and remarks that it is the sound of the Ultimate Suffering.
* The Spoony Experiment briefly ran with it, although he did note how petty and stupid it was for a grown woman who is supposed to be running a company to decide that arguing with a single Internet reviewer was the best use of her time.
* The Spoony Experiment built a literal Gaydar; it measures stereotypical gayness. He refuses to say why.
* The Spoony Experiment, but his (unseen) nurse and tendency to carry around a stethoscope might put him in this category.
* The Spoony Experiment by studying science, travelling back in time and then obtaining all the knowledge he needs from his future self.
* The Spoony Experiment. Despite claiming to have killed thousands with his army of robotic suicide squirrels, and winning the 2008 presidential election, what we mostly see him doing is sitting around Spoony's house, helping with reviews (and occasionally doing his own), and fixing an Atari Jaguar CD.
* The Spoony Experiment, Doctor Insano suffers a breakdown after failing to create the ultimate being (instead producing a cute pink blob thing). He begins crying

about how his science never works and nobody loves him before his new "son" cheers him up.
* The Spoony Experiment episode "Viking Bikers from Hell", Reb Brown's character assassinates a drug dealer during his birthday celebration while the guests are singing "For He's a Jolly Good Fellow".
* The Spoony Experiment games, the Black Knight succeeds in his plan to annoy Spoony by spreading the hashtag "#SpoonyHatesEverything". Spoony pulls out his cellphone to confirm, and is quickly ranting. The Black Knight has succeeded, which is more than a lot of the villains on the show can say.
* The Spoony Experiment had gamers hitting the used game stores and bargain bins in droves, searching for the obscure title. Which, in turn, nicely remedied his problem of not being able to find any info on it.
* The Spoony Experiment has a character class for it and more than one monster is built on this concept, most commonly the succubus.
* The Spoony Experiment has stolen Neutro, sees him singing, and slowly backs away.
* The Spoony Experiment hot, when they slip in a picture of a *ahem* well-developed cosplayer in a kinky Rikku costume, distracting Spoony for a moment before cursing the "Stupid Sexy Cosplayers".
* The Spoony Experiment": "I just want you guys to know, in a minute I could make a 'Curtis coming out of the closet' joke, but I'm not going to. Because I'm better than that."
* The Spoony Experiment: "I'm not crazy! I'll kill anyone who says I am!"
* The Spoony Experiment (in which he played a fictitious cardigan-wearing critic, Leslie Styker).
* The Spoony Experiment later cloned him using his protoplasmic remains and essentially brought him back from the dead.
* The Spoony Experiment mocked her so much that he replaced the video with an article calling them out on it and never put her in another video again (though she was the webmistress of his site). His later girlfriend April has appeared in videos without the same issues.
* The Spoony Experiment. Moral of the story: Never give your characters wishes.
* The Spoony Experiment movie, he comments on how Bella and Jacob are about to kiss several times before something stupid happens, such as, as he put it, a guy runs in yelling "Hey you guys I made muffins!!".
* The Spoony Experiment, now involuntarily slaps himself whenever he makes a terrible pun.
* The Spoony Experiment occasionally reviews old computer games, prompting Spoony to explain to the youngsters what things like floppy disks and BBSs were.
* The Spoony Experiment, Spoony and two sort-of doubles are watching a movie where women are frolicking on a topless beach, but then it cuts to two guys in speedos. The Spoonies are horrified.
* The Spoony Experiment: Spoony gets one in his Skullduggery review by announcing "Oh and I'm back"
* The Spoony Experiment: Spoony invokes this after seeing a scene in the Ultimate Warrior's Christmas special comic depicting the Ultimate Warrior pulling on Santa Claus' pants while standing over a naked, unconscious, Santa Claus with a strange white substance on him. "He raped Santa!"
* The Spoony Experiment, Spoony jokes that the villain's name Mystema "sounds like some sort of hemorrhoid infection, or some sort of tropical disease" and then we see commercial-style testimonials from some of the other Channel Awesome contributors who are "suffering" from mystema. Dr. Insano then presents "XCALIBR8" (the name of the artificial intelligence/technology created by the hero) as a medicated lotion that can cure mystema, followed by more Channel Awesome testimonials.
* The Spoony Experiment, Spoony pulls one during his "FMV Hell: Make My Video" review when he realizes that the two children from the "Marky Mark and the Funky Bunch" game look exactly like younger versions of him and his sister.
* The Spoony Experiment. The Spoony One was driven insane trying to comprehend the game's time travel plot and became determined to invent his own method of time

travel to stop the series from being made, ultimately causing his own time paradox by his future self appearing and presenting him with the technology fully formed. Along with a rather neat bit of acting, with Noah making a seamless transition from Spoony to Insano before our eyes.
* The Spoony Experiment, to a rant about his career turning into in him nearly going on a shooting rampage.
* The Spoony Experiment, who often uses "Space Mountain" as a innuendo:
* The Spoony Experiment with personal hygiene problems" are played by the same guys.
* The Spoony Experiment: "YOU MOTHERFUCKER. I WILL PUNCH YOU IN YOUR FUCKING SOUL, YOU FUCKING ASSHAT!"
* The Spoony One dedicated his VCR Golf review to the memory everyone who donated copies of the game(s). He's implied to have killed them earlier in the episode. For sending copies of the games to him.
* The Spoony One. (Given the amount the reviewers cameo in each other's videos, someone who starts with one will soon be aware of most of the main cast.)
* The Spoony One's involves acknowledging his own pot-shots at various geek fandoms (not the least of which is the Final Fantasy crowd) but ends with a rousing speech telling geeks not to be ashamed of who and what they are.
* The Spoony One tabletop game, he would love to spring this trope on a party who thought they were clever.
* The Spoony One. This has caused Noah Antwiler (who plays Spoony) to take some real backlash, with him having to point out that Spoony is a character and not everything "he" says is Noah's real opinion.
* the spooooooooky wizard who lives by the coast. The Beholder scheduled to be in the next comic is then sent away before the lawyers notice.
* The sport became very popular in Israel for a while when Shakhar Pe'er and the duo Andy and Yoni became prominent.
* The Sport Hero, where all the members of the team lift you up and carry you out on their shoulders.
* The SportKa ads that depicted a cat being decapitated by a sunroof may or may not have been an intentional viral marketing campaign. In response to angry protests, Ford claimed that the clip was "accidentally" leaked by an ad company and hadn't been approved. On the other hand, the ads released at the same time that depicted a pigeon getting squashed by the hood were
* The sport of Billiards was killed by its professionals getting too good at it in a very boring way. This is
* The sport of endurance riding, which involves trekking great distances on horseback. In older times, these races could be cross-country. Nowadays, most national events are between 50 and 100 miles, which can be completed in about 12 hours by the winners. The rides are divided into different legs, with health checks for the horses and riders before they're cleared to continue the competition.
* The sports/culture news website, Defector, is a spiritual successor to Deadspin; Defector was formed by former Deadspin writers after they all quit in protest of the current owners' controversial "Stick to Sports" policy.
* The sport suffered from an overdose of Boring but Practical heavy defensive tactics during the early 2000's.
* The sports world has its share of romantic partnerships. For just a few examples:
* The Spot has the ability to create portals anywhere, including over his own body. These portals allow him to place anyone or anything anywhere he wants at any time, could potentially make himself untouchable, and could allow him to blindside or ambush his opponents from anywhere. Fortunately for the Wall-crawler, however, Spot is a complete idiot and never realizes the full potential of what his powers are capable of. Thus, while his abilities may annoy and inconvenience Spidey for a time, the hero will usually adapt and defeat Spot without too much trouble.
* The Spot is a scientist who became a living portal network after being accidentally sucked into the interstitial dimension by a malfunctioning portal generator.

* The Spot. It didn't help that Matt's friends already thought he was going nuts because he was trying very hard to act happy in the face of all of the tragedy in his life.
* The spotlights in "High Rollerz" force your gruntz to sing if any spotlights catch them. Since your gruntz can't sing properly, a trapdoor opens up underneath them and removes them from the game.
* The spot on Rose's back where her wings come out seems quite sensitive, when Ryuji touches her there she blushes and starts trembling. Then there are the scales on the back on Rose's hand.
* the Spot's powers. Named Coyote, he used special collars with his portal abilities to indefinitely separate peoples' bodies from their heads, keeping them on shelves in a room, the disorientation and horror of the situation making them compliant laborers for various illicit operations.
* The Spreader of Darkness averts this. But then again, he's secretly
* The spread of the Black Death is also one of the few scripted events guaranteed to happen in both
* The spren who were bonded to the old Knights Radiant were all killed during the Recreance when all the knights broke their oaths at once. Since the spen were also their Shardblades.
* The Spriggan Mirror, the castle- presumably Derathon's- was said to have the only entrance carved like a gaping mouth.
* The Sprightly Companion, a musical instruction book published by Henry Playford in 1695, describes the oboe as 'not much inferior to the Trumpet.'
* The Spring Attack feat line allows a character to attack in the middle of their move, and it requires both decent Dexterity and two feats that boost Armor Class. Because of this, it makes the character tricky to attack and hard to hit when they do get attacked. However, it also heavily drops damage, since you only get one attack per turn while on the move, and it takes up feats that could be used to boost your strength. It's mostly not favored, since while
* The Springfield baseball stadium has a "tomato day", when people are given free tomatoes with which to pelt a representative of the Springfield Communist Party.
* The Springfield Connection", Homer discovers his friend Herman is running a counterfeit jeans ring in the former's garage while on "breaks" from their regular poker game with Lenny, Carl, Barney, and Moe. When the episode ends with Herman arrested, we see Barney, Carl, Lenny, and Moe still waiting for them to return:
* The Springfield Connection: Marge tells Chief Wiggum that she wants to join the police force. He answers with roaring laughter, seemingly implying that the concept of a female police officer is just ridiculous for him - then his laughing abruptly stops and he welcomes her to the team. And at the end if the episode, this scene gets a reprise, but now with Marge's request to quit her police job.
* The Springfield Elementary school bus has been portrayed as this, owing to how underfunded the school is and the life of hard knocks from being
* The Springfield Files", Bart finishes a campfire horror story with the line "...and that's how much college is going to cost for Maggie." Homer's rightfully horrified.
* The Springfield Files via operator settings. The feature, when activated, would put the player in a no-win situation that could only be overcome by using another credit. It's not as extreme as Milhouse's situation, no sane operator would've charged $40 per credit, and these games tried to stay subtle that the player doesn't notice they cannot win, but the principle is identical.
* The Springfield Mob keep a guy named Frankie the Squealer, who will randomly spout private details about his coworkers even as they're beating him up over it.
* The Springfield Police Department sometimes do have a large force (even if we only know the names of three). At other times it is explicit they're just three people: Chief Wiggum, and his subordinates Eddie and Lou.
* The Springfield Times as Homer struggles to write the review even with a little help from Lisa.
* The Springheel Saga: The entire series details the exploits of Jonah Smith, a Victorian policeman, hunting for the creature over the course of his career. Some

of the events in the series are in fact based on "real" historical sightings of Spring-heeled Jack.
* The "Spring" OAV features a scene between Mana and Misora, the latter being shocked at Mana bringing a small arsenal into the tub with her.
* The spring peeper. A frog no longer than the end of your finger, which manages to be one of the loudest animals in the world.
* The Sprout Sharing Show featured videos of viewers doing something like swimming or dancing ballet and drawings which would become animated stories that had been sent in via Sproutonline.com.
* The Spurbury Police Department and the Vermont Highway Patrol continually clash over jurisdiction in
* The Spurs were victim of an even worse case in game 6 of the 2013 Finals. San Antonio was guaranteeing a title over the Miami Heat, the yellow tape to cordon off the floor had already been brought out. And then Ray Allen shoots with 5 seconds remaining and the 3 pointer goes in to force overtime. Which Miami wins, (making the fickle fans who
* The Spy also relies on the metagame to perform effectively. The Spy player has to know how certain classes behave and be able to act like the one they're disguised as, recognize certain tactics, know various routes and blind spots on a map and generally play with the opponent's mind, much like a true spy.
* The Spy, as the real Eli Cohen had as many as 17 mistresses while undercover, in spite of being married.
* The Spy: A Tale of the Neutral Ground by pretending to be a spy for the British. He couldn't afford a martini even if it had been invented by 1780, but the story is belongs to literary Romanticism and makes it quite clear who the good guys are, so it does not belong to the stale beer flavour either.
* The Spy carries gas grenades that make enemies exposed to the gas see and hear imaginary explosions, gunfire etc.
* The Spycatcher's Omnibus currency which would be useless to an army retreating into Germany? Turns out the 'hero' was actually a paid Gestapo informant.
* The Spy: Eli Cohen is mistaken for a waiter at the house party of his wife's wealthy boss. This helps motivate him to take risks to achieve something great with his life, leading him to become a secret agent.
* The Spy Fights Godzilla ᶠᵒʳ ˢᵒᵐᵉ ʳᵉᵃˢᵒⁿ)
* The Spy Fights Godzilla ᶠᵒʳ ˢᵒᵐᵉ ʳᵉᵃˢᵒⁿ sizes thanks to snorting the crystal meth, his eyes bulge out, breaking through the sunglasses he was wearing.
* The Spy Fights Godzilla ᶠᵒʳ ˢᵒᵐᵉ ʳᵉᵃˢᵒⁿ, the Spy orders his troops to "fire broadside BATTERIES!" at Godzilla. The Soldier interprets it as firing actual batteries (as in, cell batteries) from cannons at Godzilla, who ends up laughing at BLU team's stupidity, much to the Spy's frustration.
* The Spy, generally, didn't swear except for one instance of "shit" (in French). He's become more foulmouthed after his update, and also uses "fuck" in
* The Spy has a device that allows him to disguise as any playable character on any team. Some items, including Your Eternal Reward, remove this ability, instead having you backstab someone to disguise as them.
* 'The Spy in Black is a 1939 film with a German spy infiltrating a Scottish island to destroy the British fleet.
* The Spy in the Green Hat (1966) (reedited version of the third season two-part episode "The Concrete Overcoat Affair")
* The Spy in the Ointment was a minor social activist before the FBI drafted him into infiltrating an umbrella organization that had mistaken his group for a similarly initialed group of minor terrorists.
* The Spy is a class literally fueled by paranoia. A substantial chunk of the metagame is based purely around the idea of a spy
* The Spy is based on the real life Israeli spy Eli Cohen, who posed as a wealthy Arab playboy to ingratiate himself into the highest levels of the Syrian

government.
* The Spyker double bladed propeller which stems from the original company's World War I planes.
* The Spy: Ma'azi is a rather trivial and untalented man, but his uncle is a powerful Syrian general, so he has more authority than his rank would suggest.
* The Spymaster (considered "dishonorable" in the honor-obsessed society of Westeros).
* The Spymaster to counter the forces of evil, or else helping people on the sly.
* The Spy: Of all of construction magnate Mohammed bin Laden's 56 children, of course it's a young Osama who makes a brief appearance.
* The Spyre, a tower that's twice as long as it should be, thanks to the fact that Mote is waiting for you inside where he will trap you in the Dream World again and screw with you for a while. There's one room that's notoriously bad: glass bridge suspended above a black abyss. There are multiple branching pathways, dead ends, no landmarks, and many switches you are
* The Spy's Dead Ringer and Eternal Reward screw with the enemy kill feed and, in some cases, give out completely legitimate achievements and dominations for kills that never really happened. It's even possible for the spy to disguise as another member of his OWN TEAM, and upon his "death" with the Dead Ringer, it will drop the corpse of the class he was disguised as and provide the name of the particular teammate he was disguised as in the kill feed, leaving the enemy completely clueless that they had even "killed" an enemy spy.
* The Spy's main attack is "backstabbing" his "teammates" by literally stabbing them in the back with a knife while disguised as someone on their team.
* The Spy's official class role, as given in the original 2006 gameplay trailer, is "Uncloak and Dagger".
* The Spy's often-overlooked ability to disguise as a member of his own team can let him create a diversion for himself, disappearing behind a corner while disguised as a Medic or Sniper and waiting for the victim to give chase.
* The Spy's Red Tape Recorder downgrades and reverses Engineer's structures' building process.
* The Spy's Sappers cause an enemy Engineer's structures to become nonfunctional and eventually destroy them if not removed.
* The Spy tends towards the repeat backstabbing part of things a bit too much and
* The Spy: While touring a Syrian fortification under the guise of being a Zionist-hating zealot, Israeli secret agent Eli Cohen is invited by a Syrian general to open fire on Israeli civilians with a machinegun. Cohen makes several attempts to beg off, but must ultimately either go along with it or break his cover identity.
* The Spy Who Came In from the Cold by British Intelligence plays on the natural antagonism between Mundt and Feilder, the latter a Jew and dedicated communist.
* The Spy Who Came In from the Cold. This is sort of thing is called "to come in from the cold".
* The Spy Who Came In from the Cold was shot in very run-down early Sixties Dublin to stand in for Checkpoint Charlie and the various bombed-out back-alleys of East Berlin.
* The Spy Who Loved Me: 007 chooses to defy his superiors to save Anya Amasova from the villain's lair, which is about to be torpedoed by the navy. Considering that she said she would kill him as soon as the mission was over, this proves that he really did care about her.
* The Spy Who Loved Me actually has an impact on the main plot. The team leader of the team was the lover of Major Amasova, the Russian agent Bond works with during the film. She's not happy to find out James killed him.
* The Spy Who Loved Me. A female undercover KGB agent sends a message via radio and ends with the phrase "Over and out" while awaiting a response. The male agent she's calling responds and also ends his message with "Over and out".
* The Spy Who Loved Me. After Dr. Bechmann and Professor Markovitz completed the submarine tracking system for Stromberg, he called them in, congratulated them, and told them he was transferring $20 million to their Swiss bank accounts. After he sent them off in a helicopter, he blew it up by remote control and sent a message

cancelling the money transfer.
* The Spy Who Loved Me, also qualifies as he's one of the darkest Bond villains.
* The Spy Who Loved Me and wants to wipe it out except for those in his undersea utopia.
* The Spy Who Loved Me, asks "What's wrong, sailor? Haven't you seen a major using a shower before?"
* The Spy Who Loved Me. At the end of his second film appearance, he has one line of dialogue when preparing a toast to his bespectacled girlfriend as the rocket ship is heading back to Earth. He says, "Well, here's to us." (Possibly, the reason he doesn't speak is because his metal, cybernetic teeth make talking difficult, but that is just a theory.)
* The Spy Who Loved Me, Bond and Anya show they know enough about each other by both asking the barman for the other's favorite drink.
* The Spy Who Loved Me, Bond goes to Atlantis to rescue Anya Amasova before Atlantis is blown up. Again, Bond's entrance is noticed by Stromberg, who says, "Good evening, Mr Bond. I've been expecting you."
* The Spy Who Loved Me, Bond has to stop two stolen nuclear missile submarines from launching their missiles at noon.
* The Spy Who Loved Me, Bond skis off a cliff, only to reveal he was wearing a parachute.
* The Spy Who Loved Me broke up with her with a letter that revealed that he was "semi-engaged" to someone else, essentially telling her that she was just a summer fling.
* The Spy Who Loved Me. Disappearing nuclear submarines → A plot to start a nuclear war between the U.S. and U.S.S.R.
* The Spy Who Loved Me featured a battle between the infamous Jaws and James Bond in a train. Jaws lifts Bond to the ceiling of a bathroom and presses him against it several times before throwing him into the bedroom.
* The Spy Who Loved Me) flip flop between working together and working against each other before they finally hookup at the end:
* The Spy Who Loved Me for Egyptian censors, the producers worried that Bond's "Egyptian builders!" quip would be poorly-received, but it got a huge laugh.
* The Spy Who Loved Me has a brief aversion; besides Mr. Bond himself, a random sailor in the background during the Liparus shootout is also called James.
* The Spy Who Loved Me has a massive submarine that eats an aircraft carrier.
* The Spy Who Loved Me. Imported, brick by brick, from France to California (he bought the Eiffel Tower too, but was refused an export permit). The former is often seen sitting around his dining table in his underwater mansion, eating expensively and listening to Bach.
* The Spy Who Loved Me, instead of simply shooting them. Bond easily escapes and he frees the submariners and they fight back against their captors, eventually foiling Stromberg's hopes of instigating WWIII. Later, as Bond makes it to Atlantis to stop Stromberg and save Anya, Stromberg first tries to send Bond down a booby-trapped elevator into his shark tank, but Bond manages to avoid the trap. Later, Stromberg finally tries to shoot Bond himself with a special gun hidden beneath his dining table, and again, Bond avoids the attack and he finishes off Stromberg himself.
* The Spy Who Loved Me is a billionaire shipping magnate with an underwater base that steals nuclear submarines.
* The Spy Who Loved Me is a genuine KGB defector, rather than a fraud seeking to play the British and Soviets against each other while he uses the distraction to accomplish his own agenda.
* The Spy Who Loved Me. It is not known if Hargreaves and Brown's M are the same character, though it's very plausible.
* The Spy Who Loved Me: James and Major Amasova, while visiting Stromberg.
* The Spy Who Loved Me, James Bond works with Major Anya Amasova of the KGB. Despite the fact that he killed her lover (in self defense), she naturally falls in love with him by the end of the movie.
* The Spy Who Loved Me, James gives his tuxedo jacket to Major Amasova as they are hiking across the desert at night. They were abducted from a nightclub and she is

wearing a backless evening gown.
* The Spy Who Loved Me Karl Stromberg has a device that can cause submarines to lose power and surface. He also has a giant oil tanker with a bow that can open and swallow up the helpless submarines. He uses them to capture three nuclear missile submarines (one Soviet, one American and one British) during the movie to reuse them for his nefarious scheme.
* The Spy Who Loved Me lives through the two movies by sheer force of not stopping ever.
* The Spy Who Loved Me of Blofeld) both want the population of the earth to die; that's genocide but not terrorism because inspiring terror is an unwanted side effect.
* The Spy Who Loved Me perspective of the woman in the story, rather than his usual third-person perspective focusing on Bond. (He didn't like the result, though fans of the books generally find it an interesting experiment.)
* The Spy Who Loved Me plans to ride it out in his undersea base and then rebuild the world in his image.
* The Spy Who Loved Me, quite disturbingly as the woman may have been meant to be working with the bad guys, but it isn't made clear.
* The Spy Who Loved Me realised the character's appeal and had him survive.
* The Spy Who Loved Me's James Bond-themed episode "Tearjerker", wherein Stan is helping a British agent out of a jam, only to accidentally crush said agent with his snowmobile after they both jump off a cliff and activate their parachutes.
* The Spy Who Loved Me (SSN-593), a nuclear submarine which disappeared in 1963.
* The Spy Who Loved Me), stabbed and thrown from a building, etc. Each time he experiences one of these he just gets up and dusts himself off.
* The Spy Who Loved Me start to do this, but when the Russian agent stops falling asleep she jerks herself back from Bond.
* The Spy Who Loved Me. Stromberg invites Bond to join him for dinner so that Bond will be sitting right in the sights of the gun attached to the underside of the table. Bond figures it out, gets clear in time and returns the favor down the firing tube.
* The Spy Who Loved Me, Stromberg's mooks also wear orange, as contrast to the British, Russian and US sailors with proper coloring though those mooks aren't proper soldiers, but rather workers and builders with guns for defense. And such workers (like aboard oil rigs) occasionally wear orange, so they could be spotted easily during rescue missions.
* The Spy Who Loved Me, Stromberg tries to sneak attack Bond with a gun that fires an explosive projectile under his table aimed at Bond's groin. Bond dodges the shot, then says, "You've shot your bolt, Stromberg. Now it's my turn!" and shoots Stromberg in the balls.
* The Spy Who Loved Me, the car carrying Jaws and his goons in hot pursuit of Bond's Lotus Esprit ends up down a cliff and crashing through the roof of a small house. The car explodes, but Jaws just walks out through the door, dusting himself off.
* The Spy Who Loved Me, the villains fire a hollow bolt through the hull and attach it to a tank of cyanide gas, giving those inside a choice of surrender or die.
* The Spy Who Loved Me was considered a tremendous return to form after ten years of rather tepid installments, and even today, it's considered one of the finest films in the franchise.
* The Spy Who Loved Me: When Bond's car/submarine Lotus Esprit drives out of the ocean onto a beach, a wine-drinking beachgoer takes a bewildered look at his bottle.
* The Spy Who Loved Me, when they transfer to the submarine, when the Captain discovers that Major Amasova is a woman, he makes some rather lame innuendo. The scene then cuts to an exterior shot of the submarine nosing up.
* The Spy Who Loved Me) when, while checking into a hotel, he walks in on two small-time mobsters who are attempting to rape Viv Michel.
* The Spy Who Loved Me. While Anya and Bond are sailing down the Nile, Anya knocks out Bond with sleep dust blown out of a cigarette.

* The Spy Who Loved Me, who is swallowed by a whale. In the film, the tanker swallows submarines.
* The Spy Who Loved Me, with detonation for failure). He then uses the bomb to get into a secure room.
* The Spy wields a variety of butterfly knives that, in addition to any number of other abilities, can be used for a
* The Spy with My Face (1965) (reedited version (with additional footage) of the first season episode "The Double Affair")
* The squad comes across a machine gun nest apparently operating all by itself and decide to take it out. However, despite having the element of surprise
* The Squadette of Bardock's team and the only female Saiyan warrior we see in the franchise, she wears a pink leotard under her amour. Which contrasts with the green/blue clothes of Bardock and Tora. It's also very weird seeing a pink-wearing Great Ape.
* The Squad film is made out to be an elite team, which was not the case in the game itself. Them being military regulars rather than elites would actually have helped the plot, as it would have made the presence of Portman and The Kid (both of whom had absolutely no business being in an elite military squad)at least somewhat less egregious.
* The Squad, he lets out the anguished: "Oh, he's gotta be taking the piss!"
* The Squad members of the squad killed, anyway because though he has the spoken language down, he committed a big mistake when it came to hand gestures.
* The squad of five Rubies that arrive in "Hit the Diamond" are named by the credits as "Doc", "Army", "Navy", "Eyeball", and "Leggy". These names were later used by Steven in-show when the five of them reappear in "Back to the Moon". The credits for the latter episode also names
* The Squad Toby's transformation into a cheerleader causes her to be adored by most of the male student population.
* The Squad with little in the way of equipment when the special ops team is destroyed. With no other means o extraction, the team takes on the mission the special ops team was supposed to undertake and succeeds, although not without casualties.
* The squalid, vermin-infested London flat the protagonists inhabit in
* The Square button is devoted to having Atreus shoot a targeted enemy, among other context sensitive actions or attack calls on various enemies. After Atreus has learned of his divine heritage and may be suffering a bit of corruption from a key rune he picked up in Tyr's vault, he begins to behave coldly and cruelly thinking "I'm a god, I can do whatever I want". At this point in the story until Kratos shakes some sense into him, Atreus will often times ignore Kratos'/the players commands, attack enemies you're not targeting, and use his mana-using, on-long-cooldown attacks without being prompted.
* The Square Cube Law is actually referenced by Imperial Biologists, who are astounded that creatures the size of a Squiggoth can exist (in their own words, it should collapse under its own weight and be completely incapable of movement, though such knowledge is likely cold comfort to troops staring down one charging at their lines). The only other faction to field super-huge creatures is the Tyranids, though both groups have in-universe explanations (the Tyranids make use of genetic engineering and
* The Square example. Christian, a museum director, is distracted by a bunch of issues in his personal life—his cell phone and wallet getting stolen, a messy affair with a reporter. So he doesn't check the video that an advertising agency makes for "the square", a new piece of art. The video the agency creates is particularly tasteless and backfires on him horribly, going viral in a very negative way.
* The Squares of the City. Here the "moves" are political maneuvers, but a real person is assigned to each piece.
* The Squares of the City is based on a chess game (specifically the 1892 world championship game between Wilhelm Steinitz and Mikhail Chigorin), with key characters representing various pieces and their interactions representing their

positions; when a piece has the potential to take another piece, this is echoed in the story with one character being under threat from another, and when a piece is taken, the corresponding character is "taken out of the game" by death or imprisonment.
* The Squares of the City, the the villain subconsciously manipulates the population with the assistance of a scientist who just wants to try out the techniques he's devised in real-world conditions, and never mind about fiddly ethical considerations.
* The Squats, to include companies of Squad mercenaries in their force.
* The Squatty Potty ad has been described by Adweek as "The Best Ad You'll See Today With a Unicorn Who Poops Rainbow Soft-Serve".
* The squelching noise of Spiderbugs emerging from their nests, followed by their clicking mandibles when they move in to attack.
* The squib "Medical Notes", written by Sir Terry for one Convention programme guide, claims some people on the Disc suffer from Floribundi Syndrome, the opposite of
* the Squibs: they're unmagical humans born to magical families and are usually looked upon with disdain or at least pity. Filch is presumably mean to his students because he is jealous and bitter. An advertisement for a product that teaches magic to Squibs is presented like a Hollywood diet pill, including testimonials. It doesn't work, of course. However, Squibs do serve as excellent (if eccentric) informants, witnesses, and spies for wizards amidst Muggles. The leading explanation for the origin of muggle-borns is that they are descended from squibs who integrated into muggle society.
* The squick factor isn't helped by the flashback in one of the later episodes. Apparently, Van Kleiss has known Rex since he was a young child (roughly 7 or 8 years old).
* The Squid and the Whale: Bernard and Joan are pretty crappy parents. However, at least Joan kind of made an attempt. It turns out Bernard didn't really contribute much to his children's lives. Both parents are apathetic about their son Walt's plagiarism and troubles in school. Most notably, at one point both parents leave their pre-teen son Frank at home by himself for three days, where he proceeds to get alcohol poisoning.
* The Squid and the Whale: Bernard lusts after Lili, a student in the college class he teaches who writes "very racy" stories. She's substantially younger with him, and, in what would certainly be an HR violation today, moves in with him after she gets evicted. While she expresses some interest in him, when he eventually makes a pass at her it doesn't appear to be consensual.
* The Squid and the Whale, newly divorced mom Joan starts dating her son's tennis instructor, which creates tension between the instructor, the kids, and the dad.
* The Squid and the Whale-type opinions about literature and is a jerk to his girlfriend.
* The Squid and the Whale, Walt is rather judgmental about his girlfriend's sexuality. He angrily demands information, which he then judges her for, about giving her previous boyfriend a handjob. Later, he gets upset when she expresses interest in having sex with him because she's being too eager about it. It's very hypocritical on his part considering he's thinking about cheating on her with Lili, and all the authority figures in his life are telling him he should sleep around.
* The Squid and the Whale: Whenever Walt learns anything about his mother's love life, either directly from her or from Frank, he gets more than he wants to hear.
* The Squiddles are among Jade's toys. They are plush, smiling, tentacled friends. It is implied that their creation was inspired by the Horrorterrors,
* The Squig is a giant pig with eight tentacles sprouting out of its neck. Each tentacle does 1-4
* "The Squire's Tale" alongside other wondrous items. Yes you read that right.
* The Squire's Tales, by Gerald Morris, one knight is threatening another and shouts, "I shall not rest until thou art cleaved in twain!" The other characters present (including the second knight, who doesn't really want to fight) start arguing over the proper past participle of "cleave".

* The Squire's Tales, crossdresses to help rescue Sir Gawain from a dungeon.
* The Squire's Tales: One of Gerald Morris's books has the heroes ask a random couple for directions. The couple mentions things like "the swamp where Betty's horse almost drowned," and "The tree that was cut down after it was struck by lightning" before they start arguing about whether someone's son broke his arm before or after they painted their barn, and the protagonists leave in disgust.
* The Squire's Tales series by Gerald Morris, both Sir Dinadan and Beaufils. Galahad reads more as a deconstruction.
* The squirrels that she has control of only seem silly until one has encountered the tiny raging terror of a
* The squishiness of wizards is highly variable as well, sometimes changing abruptly with the addition of a single skill level. A mage in
* The squishiness was why Kotarō initially despised western mages. He started respecting Negi after he proved not-so-squishy.
* The SR-71 Blackbird reconnaissance aircraft flew so high and so fast that despite several attempts no one ever managed to shoot one down, because the aircraft and missiles sent after it
* The SR-71 was considered obsolete due to the existence of spy satellites. However, its predecessor, the U-2, is still used today — primarily because it can relay information to other aircraft, which the SR-71 couldn't do due to the shockwaves caused from flying at speeds exceeding Mach 3. And this is an aircraft model that was introduced to the USAF in
* The SS-20 "Saber" (Soviet designation RT-21M Pioneer) was a medium-range, multiple-warhead ballistic missile, which lead to the counter-deployment of Pershing II and Gryphon missiles in Western Europe.
* Thessaly, a human being (as opposed to cosmic spiritual entity) and powerful witch, sounds Neolithic when she describes her age in
* Thessaly. Her "name" is actually a pseudonym, taken from the region near
* Thessaly), including some Christian characters' reactions to finding themselves living well before the birth of Christ.
* Thessaly. Presumably, she wears them to convince others that she's harmless.
* Thessaly: Witch for Hire, a being known as the Tharmic Null has this power. Anything it touches is retroactively removed from existence.
* Thessaly: Witch for Hire has managed to get her contracted to kill a Tharmic Null - a beast that nothing and nobody can kill - she starts laughing and crying simultaneously, because he's finally given her a death sentence from which she can't escape.
* Thessaly: Witch for Hire, Thessaly is told that "no one and nothing" can defeat the monster coming after her... so she sends Fetch, a ghostly being who is quite literally no one and nothing.
* Thessaly: Witch for Hire. The title witch is revealed to have captured or enslaved several monsters over the centuries. When her would-be suitor Fetch accidentally makes her a target for a seemingly invulnerable beast, she decides to let most of these monsters go because she doesn't expect to survive her encounter with the beast, and thinks it would be cruel to let her assorted captives die.
* The Ssi-ruuk, a race of, essentially, sentient alien velociraptors who rule a dwarf galaxy that orbits the Galaxy Far Far Away. Much like the Vong, they are religiously motivated conquerors with a strict caste system, but while the Vong are incredibly technophobic, the Ssi-ruuk power their technology with the stolen life-force of their slave races. They also tend to use
* The Ssi-Ruuk language mostly consists of whistles, clicks and hisses, but is extremely tonal, to the point that the same sound at different pitches or modulated in different ways can represent completely different phonemes. One human character wears himself to the bone trying to combine music notation and text to create an alphabet which can be used to write Ssi-Ruuk for human consumption.
* The SS-N-22-Sunburn designation was applied to two entirely unrelated missiles, though until the fall of the Soviet Union no one in NATO realized this. The NATO and DoD designation were given without ever actually seeing the missile(s), because like many Soviet anti-ship missiles they used fully enclosed launch tubes. It was

assumed that these tubes fired only a single type of missile, because that had always been Soviet Navy practice in the past. But the launch tubes of the Sovremenny class destroyers (Project 956
* the's sorcery abilities, instead always opting to make his powers a side effect of the scientific accident that disfigured his face.
* The SSR agents who clear out the automat in "A Sin To Err" continue to act like customers, perusing the menu and sitting down, even though the suddenly near-empty restaurant is a huge tip-off that something's about to happen.
* The ST-1 Laurel is a 10 feet tall humanoid military mech with various armaments. It is primarily used for infantry support. Unlike most of the vehicles in the Acid Rain series, it cannot transform.
* The Staal brothers of Thunder Bay, Ontario, Canada. Eric, Marc, Jordan, and Jared were all active in the NHL as of November 2011.
* the stabbing scene which was foreshadowed in the opening sequences. It doesn't work.
* The Stabbington Brothers attack Eugene and Gothel stages a rescue of Rapunzel to make her come back to the tower.
* The Stabilizer is captured by the bad guys when they ram her car into a back of a truck with an another truck.
* "The Stable Boy" does this for Regina. Her ambitious and cold-blooded mother wanted her to marry up, but she was in love with a stable boy. When Snow White, then an innocent child, tried to help Regina by letting the ambitious mama know her stepmother-to-be was with the stable boy... Well, let's just say
* The Stacked Deck Club, which was the setting for the episode "Almost Got 'im".
* The stack operates in a "Last In, First Out" manner. This means that the last ability put into the stack, played in response to something, occurs first. This can be exploited by
* The staff brought in Thomas' mother during a session where he recorded for the wildebeest stampede. The director told Thomas to visualize her falling to perfect Simba's reaction to Mufasa losing his grip. This worked too well; Thomas screamed "MOM!" on the first take instead of the scripted "DAD!".
* The Staff College at Camberley (now defunct), replaced with several institutes.
* The Staff of Magnus. It drains the target's magicka and adds it to your own. If the target runs out of magicka, it starts draining his health.
* the staff room for help was a bad idea. She was also able to accurately assess why the police weren't responding and why they hadn't heard any sirens yet, when Hirano brought it up.
* the Stage 1 themes or the closest equivalent are usually the most well-known themes of any given game per se, as it precedes the final boss).
* The stage adaptation has "The World Above", in which Ariel sings about
* The stage persona for Utaite/singer-songwriter Mafumafu includes a barcode on his cheek. He
* The stage play was the inspiration for a lot of the modern interpretation of Dracula — buying the rights to the stage play was cheaper for Universal, and so that's what they did. (In fact, both of Universal's
* The stage production (and the newer film) of ''The Producers" even uses a rear wall of mirrors to display the top angle of the dance number, replicating the overhead camera shot.
* The stage version originally had "Summer Night City" (itself the musical's working title) sung just after the prologue. It was cut after the London production's first previews, supposedly because the scene took things too fast by introducing nearly the entire cast all at once. After its removal, the characters were introduced gradually throughout the first act. This also resulted in switching the placement of "Money, Money, Money" and "Honey, Honey", as Sophie's friends were now introduced a scene before Donna's. The song survives instrumentally as scene change music after "The Winner Takes It All", as well as in the form of distorted lyrics heard during the entr'acte.
* The Stainless Steel Rat and pulls out a gun he keeps in his ankle holster. We can assume that the gun is waterproof. Needless to say, the neighbors are a little

freaked out by a naked guy firing a gun.
* The Stainless Steel Rat: Angelina. Keeps an assortment of deadly weapons in with the diapers in the baby carriage.
* The Stainless Steel Rat as well as play Musical Identity Tags with the other corpses as a joke.
* The Stainless Steel Rat. At the beginning of the first novel Slippery Jim diGriz steals an armored car full of money and drives it into a truck to escape the police.
* The Stainless Steel Rat books feature several uses of sleep capsules; break one open under a mark's nose and they lose consciousness instantly.
* The Stainless Steel Rat. Can range all the way up to full body surgery.
* The Stainless Steel Rat cocktail that's somehow more than 100% alcohol by volume. When he throws it aside in a dramatic gesture, it starts eating into the starship floor.
* The Stainless Steel Rat does this when breaking into an Inland Revenue office complex to wipe his and Angelina's tax record clean. At one point he is poised on a very narrow windowsill manipulating a glass cutter and a suction disc, so as to be able to remove the glass circle cleanly without triggering any alarms.
* The Stainless Steel Rat element to her relationships with her husband and children.
* The Stainless Steel Rat escapes a planetwide dragnet by hiding in a building just a few blocks away from where he escaped. Unfortunately the authorities quickly track him down there, because he's being pursued by the Special Corps whose agents consist of former criminals who think just like he does.
* The Stainless Steel Rat feature psychics used explicitly as communicators over interstellar distances. Later novels don't seem to rely that much on conversations at distance.
* The Stainless Steel Rat for President sends a recording to Jim that does this. It annoys Jim to no end; he hates it when his boss is one step ahead of him.
* The Stainless Steel Rat Goes to Hell features a device called a 'bioclast', used on recalcitrant workers by an evil mine supervisor. Its effect is described by the protagonist/narrator as feeling "like the flesh had been sliced to the bone and boiling acid poured into the wound".
* The Stainless Steel Rat has endless rationalizations on how the main character's crimes actually help society. Most of them turn out to be true.
* The Stainless Steel Rat has humanity involved in a genocidal war with slimy tentacled aliens, simply because they find us so repulsive. The protagonist discovers that the Grey Men (villains from a previous novel) are using brainwashing to engineer the war, and so he uses the same technology to make the aliens see the positive aspects of humanity. Like our slimy sweat and flickering red tongues.
* The Stainless Steel Rat has the titular hero being forced to do something by showing a contract he signed, which he actually read. He claims that the contract contains no such clause, at which point the other party pulls out an electronic microscope and enlarges a dot at the bottom of the contract, revealing a whole paragraph there.
* The Stainless Steel Rat he is married to someone he met in a previous book.
* The Stainless Steel Rat, humanity is attacked by a coalition of alien races hell-bent on wiping out all humans simply for looking ugly. Their only similarities are that they're all slimy, ugly (from a human point of view), and reptilian/amphibian.
* The Stainless Steel Rat in Jim and Angelina trying to rob a cashless society via computer fraud.
* The Stainless Steel Rat. In later books, this serves as a useful method of instantaneous communication across light years.
* The Stainless Steel Rat in the description of his risking serious injury, possibly even involuntary amputation, from a power saw he wedges tightly in a desk draw, hoping it won't slip as he cuts the steel...
* The Stainless Steel Rat is himself one of the most infamous thieves in the galaxy. He is the one who manages to trap the protagonist before offering him the job.

* The Stainless Steel Rat is screening a propaganda broadcast to a colony of pacifists, with a montage of marching troops and tanks with guns blazing. Rather than being intimidated however, the locals given their culture are simply confused as to why so much energy and resources are being wasted to no apparent purpose.
* The Stainless Steel Rat, is the reason they were in jail in the first place.
* The Stainless Steel Rat. Jim diGriz discovers that the government of the planet Cittanuvo is building a Warlord class battleship under the pretense that it's just a transport ship. After investigating, he finds out that two elite criminals tricked the government into building the ship with the intent of stealing it and using it for interstellar piracy.
* The Stainless Steel Rat just because he's having second thoughts about their marriage.
* The Stainless Steel Rat: more of a spiritual leader than a god, Mark was the first fully sentient AI (his name being a corruption of "Mark Four"). Some time before the events of the book, he led those who would follow him off to an empty world to form a pacifist, socialist utopia.
* The Stainless Steel Rat mother has educated them the criminal arts in the absence of their dad, so all is well.
* The Stainless Steel Rat novel, Jim diGriz asks his Special Corp robot if it has any compartments he can use to stash his clothes as he has to change into another disguise. The robot then appears to explode as all kinds of drawers and hatches open up in its body.
* The Stainless Steel Rat pops whatever pill he needs to get the job done, and although he's a criminal there's no mention of any of them being illegal.
* The Stainless Steel Rat's base. No sane man would walk in there, not to certain death. So he pops a pill that kills sanity stone dead: grinning sociopathy in a capsule, live wire applied directly to the Id.
* The Stainless Steel Rat series: began as somewhat yandere for Slippery Jim di Griz, her personality integrated more after marrying him. But let anyone dare approach Jim with violence in mind when Angelina is nearby...
* The Stainless Steel Rat series. Makes sense, considering it occurs at a time when a collapsed Empire is being reassembled.
* The Stainless Steel Rat series starts with that as the protagonist's latest job. He rents a part of a warehouse. Next room, there is a large amount of seldom checked government supplies. He makes a hole, and sells these supplies with different labels.
* The Stainless Steel Rat sometimes acts this way, because "there's one thing better than not being noticed, and that's being noticed and filed into a category. Your description gets mixed up with every other guy in the file and that's the end of it."
* The Stainless Steel Rat Special Corps agent James Bolivar "Slippery Jim" DiGriz lands on a planet once run by women (until they were usurped by a male revolutionary party working in cahoots with galactic invaders). He teams up with the resistance – former members of the military who are of course fit, shapely young amazons— much to the annoyance of Jim's lethally-armed and dangerous wife.
* The Stainless Steel Rat's Revenge, when Jim is being escorted by soldiers after a failed escape attempt, he looks at his captors and suddenly notices their number seems to grow smaller. Turns out his wife has arrived and is quietly taking out the rear of the line one by one.
* The Stainless Steel Rat (sure enough, she's working behind the scenes to launch a revolution).
* The Stainless Steel Rat. The aliens have covered their entire planet this way because they hope to wipe out the humanoid races, but they've adapted by moving into the city and hiding there like stainless steel rats themselves.
* The Stainless Steel Rat. The planet of Cliaand is completely militarized and every person on it has a uniform with a color appropriate to their job.
* The Stainless Steel Rat. The Robotnik (robot hotel) has a luggage robot (with tentacles to grab bags) that sings a little song to every guest who arrives. It

also has bellboy robots to show guests to their rooms.
* The Stainless Steel Rat (through fake documents), but is naturally averted, as the title reveals.
* The Stainless Steel Rat to get some insight into her next move. Things almost go badly wrong, but experiencing that self-centred narcissism makes Jim realise that nothing short of this trope will satisfy Angelina. Sure enough, she's working behind the scenes to launch a revolution.
* The Stainless Steel Rat Wants You. The Special Corps investigates the mysterious disappearance of a navy space station whose last message was: "THE TEETH!" He uses time travel to go back to the event and sees it swallowed by a planetoid sent by alien invaders, who carry the station back to their homeworld.
* The Stainless Steel Rat was sent back to Earth in 1974. He learns English first from a Hell's Angel he turns the tables on, and then from TV in his hotel room.
* The Stainless Steel Rat whenever she thinks her husband is getting too slippery for her taste. Supposedly, her more psychopathic impulses have been removed by the psych-techs, but Jim frequently has to restrain her natural enthusiasm for killing and torture.
* The Stainless Steel Rat. When subjected to it himself he snaps, and when he comes to he's nearly killed the chef.
* The Stainless Steel Rat who is regarded as incredibly sexy by all the other aliens he meets. He puts one admirer off by saying he's a hermaphrodite who is still halfway from he to she.
* The Stainless Steel Rat with an acid that dissolves precise lines through the metal ceiling of the cell like a cutting torch. He does warn the inmate not to touch the edges of the hole on the way up, though.
* The Stainless Steel Rat with a nasty fight with a slave-bully to establish his place in the hierarchy.
* The Stainless Steel Rat without breaking a sweat. The only reason she allowed herself to be taken was to give Jim time to act, and he needs his boys to do that.
The men who took her work for the planet's tax service. Upon hearing this, the principal immediately signs the twins' graduation forms and wishes Jim good luck. When they ask their father, he explains that the taxmen as the universally hated group on any world. Jim and his wife may be criminals, but they still have to pay taxes like everybody else. Jim and the twins end up breaking into the tax service's archives and destroying their files, thus eliminating any case the taxmen have against them.
* The Stakeout: One or more people setting up camp somewhere and watch a location in secret to search for information.
* The stalemate between Hammerfell and the Dominion that existed just after the Great War was ended when the Redguards removed the Dominion by use of guerrilla warfare, thus giving the Redguards of Hammerfell their own Screw You, Elves! moment.
* The Stalker also qualifies, at least in the early game, as an extremely rare
* The Stalker has Dread (his bow), Despair (his knives), and Hate (his scythe).
* The Stalkers are implied to be made of both human and animal corpses, namely household pets like dogs and cats.
* the stalker takes her role in the spectacular failure of the Black Opera.
* The Stalking Zuko Series: Aang is portrayed as more childish and naive than in canon. As a result of his immaturity and stubborn adherence to Air Nomad ideals, his decision-making skills are much worse than in canon and he rarely contributes anything useful to discussions.
* The Stalking Zuko Series about his (and the Northern Water Tribe's) opposition to interracial marriages, something he thinks the South should adopt. Katara obviously opposes this, since she's secretly going out with Zuko, and her brother is in a relationship with Suki.
* The Stalking Zuko Series after nearly dying during his Agni Kai against Azula, and temporarily got back together with Mai for the sake of his honor, readers started getting frustrated.
* The Stalking Zuko Series and ends up getting back together with Mai for a little

while. As a result of that and various other factors, such as Hakoda's disapproval of Katara seeing Zuko, Katara doesn't confess again until near the end of the series.
* The Stalking Zuko Series: a respected Ba Sing Se therapist named Dr. Wang is noted to have a very nice beard that Smellerbee imitates when trying to help Jet talk about his problems. Guess where Sokka got his inspiration for the Wang Fire beard?
* The Stalking Zuko Series Averted by Jet, who thinks Zuko looks extremely strange when he smiles.
* The Stalking Zuko Series by others and needed to distinguish herself somehow for anyone to see her differently.
* The Stalking Zuko Series, differing outlooks on life help make Zuko and Mai's relationship, although Azula revealing that Mai had spied on Zuko is the final nail in the coffin. Zuko is a passionate and honest person trying his best on a number of serious causes and responsibilities, while Mai is a seemingly disinterested noblewoman who keeps tight control on her emoting. While Mai does care about Zuko, she isn't very understanding of his priorities and concerns and frequently tells him that he's boring and she doesn't care what he thinks or how he feels. On Zuko's side, he often asks more of her than she feels comfortable giving, such as his request that she visit Azula, which blows up in Mai's face. They inevitably break up because there really wasn't much keeping them together other than the perception of being convenient for each other, and even that falls apart pretty quickly due to how dysfunctional they are as a couple.
* The Stalking Zuko Series fireflakes are very spicy to Non-Fire Nation with everyone complaining of the pain it causes their mouths. Averted with Fire Nation colony cuisine, which A: has evolved to use less spices due to the difficulties in bringing them from the homeland, and B: has absorbed elements of Earth Kingdom cuisine.
* The Stalking Zuko Series forgot to tell Zuko about cooler fever until he'd already got extremely sick to Katara's annoyance.
* The Stalking Zuko Series had unprotected sex. Suki is initially disappointed in Katara and freaks out when the latter mentions that she's afraid that her friend is pregnant.
* The Stalking Zuko Series has a non-mystery related example. Katara eavesdrops on a conversation between Zuko and Aang about love. Zuko then asks her if Aang is also asking her personal questions, prompting Katara to say no, but also muse that Zuko must be the only one Aang's asking about love. Zuko then realizes that he didn't specify what he and Aang talked about. She manages to deflect suspicion before Zuko fully catches on that she eavesdropped on him, though.
* The Stalking Zuko Series. He is known for a get sexual appetite before settling down with his wife, which rekindled during Zuko's search. His track record, according to Zuko, consists of two nuns, their Ba Sing Se neighbor and Li and La.
* The Stalking Zuko Series, in which the events of "The Southern Raiders," as well as the murder of Katara's mother, took place on Katara's birthday. Luckily, the Gaang later has a proper birthday celebration for her.
* The Stalking Zuko Series. It takes almost half of "Not Stalking Zuko," the longest installment in the series, to get up to "The Ember Island Players," and there's still more than a few chapters to go before it gets up to "Sozin's Comet."
* The Stalking Zuko Series Jet and Zuko's neighbors. Jet realizes that "Mushi" must be the Fire Nation spy instead of Lee since the apartment is poorly insulated and it's early spring, too cold for a non-Firebender to walk comfortably naked.
* The Stalking Zuko Series. Katara also regrets accusing Sokka of not loving their mother, a sentiment she didn't openly show in canon.
* The Stalking Zuko Series Katara did not like Zuko joking that he'd rather get hit by lightning than do something else, once he was on the mend after his duel with Azula.
* The Stalking Zuko Series, Katara doesn't mention being in love with Zuko, the new Fire Lord of their defeated enemy). As for Zuko and Mai, Zuko mainly gets back together with Mai for the sake of his own honor. By a little over halfway through

"Not Stalking Firelord Zuko," both pairings are permanently broken up.
* The Stalking Zuko Series, Katara had a crush on her father's friend Bato when she was 12, a mere 2 years before the start of the story. She got over it quickly, and as such, hopes that the 12-year-old Aang will get over his crush on her. The author also points out that she doesn't think much of this trope, saying that people don't wind up with those they're interested in when they're 12.
* The Stalking Zuko Series, Katara says this word for word in her narration when Sokka plans to introduce a sixth flavor into five flavor soup... fireflakes. For context, Katara has, so far, gone from absolutely loathing fire flakes to slight acceptance of them, not unlike her relationship with Zuko.
* The Stalking Zuko Series, she realizes that Zuko has made a reference to something he and Aang talked about while she wasn't there, leaving her confused.
* The Stalking Zuko Series she was one but it is either obviously deliberate or fail to materialize
* The Stalking Zuko Series status among the Kyoshi Warriors, drives her to find her own role in the Gaang.
* The Stalking Zuko Series, Teo says that sea prunes are not the worst thing he's eaten, and considering that he's had to eat grass as a refugee, this isn't saying much.
* The Stalking Zuko Series that Katara and Zuko both like each other due to their history and self-esteem issues, they think they are not good enough for each other or are in love with someone else.
* The Stalking Zuko Series, the author and Zuko see the ending to the tale of Oma and Shu as this. Oma ends a war and establishes a city, but loses her lover in the process, which is why those in the Fire Nation see it as a tragedy. Zuko, in particular, having seen his cousin Lu Ten's girlfriend take his death quite badly, understands how painful it can be to lose a lover.
* The Stalking Zuko Series, Toph, fed up with Haru pestering her to teach him metalbending, sends him to find metal around the temple, confident that he'll be hard-pressed to find it and will be occupied for a long time. Haru comes back with the spoons from the kitchen.
* The Stalking Zuko Series when Arnook gleefully tells Aang of all he had killed by drowning.
* The Stalking Zuko Series would dictate that the cooler punishment in the Boiling Rock would be driven useless by any firebender that can keep himself warm or has a resilience to cold. Not so much when the extreme temperature differences cause the prisoner to catch "cooler fever" and he has to defend himself from the other prisoners and the guards while horribly ill.
* The Stalking Zuko Series Zuko's firebending lessons to Aang. Aang finds Zuko's lesson extremely boring and all Zuko teaches is how to block and breathing exercises but Zuko points out how dangerous fire is so it's more important to know how to block before learning how to attack and the breathing exercises would be good for his control.
* The stampede scene is a sequence of multiple Hope Spots. The stampede catches up to Simba.. but then Mufasa arrives, grabs Simba and drops him off on a safe ledge. Then he's dragged away by the stampede, vanishing out of Simba's sight. He jumps back and grabs a ledge.. which is a cue for Scar to show himself to Mufasa. Mufasa thinks that Scar's there to help him, only for Scar to commit his
* The stamp on the left has three dart-like silver ships, with excessive fins and one or more thrusters.
* The stamp on the right has three red rockets with an oblong shape and three fins. A line of these ships appears, growing smaller and smaller, in each stamp to the left of this one, ending in the centre.
* The stance until recently was that universal streams and the multiverse and all that are untouched, but things in the
* The Stand, after Sergeant Peters executes DJ Ray Flowers, his own men, fed up with they see as senseless murdering of civilians, open up on him on the spot. One shocked private refers to it as "We just scragged Sergeant Peters!"
* The standalone DVD of "It's a Very Special Family Guy Freakin' Christmas" also

featured the
* The Stand, and at least a few divine miracles occur. Magic and civilization are treated as opposing forces in the book; early, uncivilized peoples experienced magic more often, and, now that civilization's crumbling, magic is on the rebound.
* The Stand and decides to raise the baby herself, later accepting the help of new beau Stu Redman.
* The Stand and puts it in dialogue boxes over the action as it is happening.
* The Stand, an Irish Setter in the novel and a mixed breed (mostly Labrador Retriever) in the film. "If all things serve the will of God, maybe that goes for big dumb dogs, too."
* The Stand, a number of characters dream about being chased through a cornfield by the Dark Man.
* The standard Akatsuki uniform consists of a black coat with red clouds. A running theme seems to be whenever an Akatsuki member is forced to discard or has their coat destroyed, they're going to die in that fight.
* The standard armour of the Equestrian Royal Guard is a gold suit of plate with a blue-crested helmet, which is more than enough to meet the required levels of fabulousness.
* The standard audience reaction to a joke by Krusty is a deathly silence punctuated by the sound of a lone man coughing in the back row.
* The standard backhanded compliment, "You're the funniest person in that chair."
* The standard editions of the games mostly avoid this (surprising for a
* The standard Imperial E-11 blasters were made from surplus British
* The standard Imperial rayguns are classified as "las weapons". They fire a laser beam capable of blowing a man's arm off (they've been most often been compared to midrange caliber rifles in terms of kinetic force). Though they're
* The standard in the Soviet military and political structure; if you wanted to be recognized within the high command or local Party chapter, then having more medals on your chest than a Christmas Tree has ornaments was
* The standard issue Soviet gas mask looks like a skull with glass eyes.
* The standard-issue steeds of said Heralds are no less conspicuous between the indelible white coats, silver hooves, and blue eyes. However, a sentient warhorse with more speed and stamina than anything remotely natural is usually useful enough to make up for it even without factoring in the various psionic and arcane abilities.
* The standard-issue T-65 X-Wing— of which the one we see the most of is Luke's— cuts an impressive and distinctive silhouette. It's not the fastest or the toughest or the best-armed, but it may well be the most versatile, and in the hands of a skilled pilot can take on darn near any mission. It got upgraded for
* The standard operating procedure of the Angels is to go undercover. Some of these assignments involve posing as prostitutes, exotic dancers, or in massage parlours, which gives many opportunities for
* The standard owls in this universe really are cats as birds; one was used to aid in the creepy atmosphere of "
* The standard protagonist of Decadent fiction, as well as the standard author. You have to wonder if they'd be so filled with existentialist ennui if they quit moping around the house all day long and got jobs. The pinnacle of the Decadent novel (and this trope) was
* The standard psychology of a tag team match suggests this trope. Typically, the heel team shows more skill at actual tag team wrestling, isolating
* The standard Ring of Invisibility allowed its wearer to become invisible. The joke Invisible Ring, on the other hand, is itself invisible.
* The standard rollover lane skill shot gets a more difficult revamp in
* The standards for military discipline seem to have dropped compared to present time in
* The standard sidearm for military officers of the Imperium is the Bolt Pistol. It fires .75 caliber depleted-uranium rocket-propelled grenade rounds instead of bullets. Space Marines use the same gun but in the form of a
* The standard Skill Shot is to immediately shoot the left ramp (for a minimum of

2 million points), which can be
* The standards on what qualifies as Nightmare Fuel are especially stringent on works aimed at children and pre-teens: kids have hyperactive imaginations, so even something benign can give them nightmares.
* The standard "These Foolish Things" is a canonical example - its writer called it a 'catalogue song'. Sample lyrics:
* The standard TiVo remote control and the DirectTV-branded version are identical in all respects other than markings — and the placement of two buttons. One of them turns your TV off.
* The standard trope of having to choose one girl is actually part of the
* The standard U.S. Navy order is "Rig for silent running." Submarine personnel then go through a series of checklists in which equipment is organized to be as quiet as possible.
* The standard variant is present throughout much of the series. While not inherently superior to the
* The standard variant of the Experimental MIRV, the Fat Man, returns in
* The standard variant, The Fat Man, is also this. Sure you can kill tough muties in a couple of hits, but the mini nukes are all hidden away across the entirety of the Capital Wasteland with only 70 in the main game and an extra 28 from all the DLC. The second problem is how it fires its payload; it lobs them. Like a mortar cannon, it's difficult to aim over long distances and can't be fired indoors without blowing yourself up in the process. It's ultimately cheaper, if more difficult
* The standard way of saying "Speak of the Devil!" in Egyptian Arabic is to say (translated) "Would that I had said 'a million pounds'!" (or some other large sum of money). This is occasionally turned into "Would that I had said 'a quarter-pound piece'!" (either as an insult or jokingly with friends). (For those not in the know, a quarter of an Egyptian pound is worth slightly more than four cents.)
* The standard weapon issued to the Canadian Rangers (the militia force based in the Arctic) was the No. 4 Lee-Enfield, first produced in 1939 and out of service with the regular Canadian military since the 1950s. The rifles were finally replaced beginning in 2015... with
* The standard weapon of the Space Marines during the Great Crusade was a weapon called the volkite charger, literally a Martian heat ray which could punch like Tau pulse weaponry and cut through thick armour like butter. As the Great Crusade wore on however, the legions expanded and the foundries couldn't keep up with demand for more volkite weapons. Bolters were antiquated, but cheaper and easier to manufacture, and they could accept different types of bolter shell for different situations. They also had the distinction of being especially effective against Orks, by far their most common enemy. The bolters won out and volkite weapons were relegated to special weapon status, the kind of "one man per squad" deal that meltas and plasma guns have now. After the Horus Heresy, the know-how to create more volkite weapons was lost and nowadays only the Mechanicus have a few working examples, which they fervously cling to.
* The standard whip is a fairly underpowered weapon. In earlier editions, it delivers a mere 1d2 damage (
* The standard X-Men uniform is often depicted as involving this (yellow briefs over black tights), along with Kitty Pryde who pretty much wears an adult version of the attire as her standard look in modern times. Occasionally this is changed into just a yellow stripe down the torso between the legs, which has the unintended (or
* The standard Zanpakuto being a sword forged from the user's own soul can slice through just about anything provided that the wielder has enough spirit energy.
* The Stand are in the works to kill the remaining members of the "good" side of humanity.
* The Stand. At the beginning of the novel, the first infected almost blows up the gas station where one the main character is spending the day with some friends when he loses control of his car.
* The Stand between the Boulder Free Zone and Flagg's empire in Las Vegas: While

the Free Zone has a rudimentary government and elects Stu sheriff, everyone is still free to live and do however they like (so long as no one is harmed). Las Vegas quickly becomes a fascist society, where everyone is assigned a job and crimes as small as drug use are punishable by torture and death. Yet because of their discipline, Vegas has electricity and supplies while the Free Zone struggles to even turn the lights on. In the end, as the Zone becomes closer to a pre-plague society, Stu notes that it's probably best for everyone to go their separate ways.
* The Stand), but it clearly bothers Larry at how pointlessly selfish he was and how he lost a really good friend over it.
* The Stand... but the slightly damaged child Leo sees things a little differently.
* The Stand, Dayna Jurgens tries to use a retractable blade tied to her arm and hidden in the sleeve of her nightgown against Flagg. He turns it into a banana.
* The Stand deserves an honorable mention. He remembers being involved in many of the most horrifying events in recent American History, everything from The Manson Family to handing Lee Harvey Oswald pamphlets, meeting Donald Defreeze (and suggesting the name Cinque in the first place), going to school with Charles Starkweather, and plenty else. It's all the more horrifying in that he has absolutely no investment in any of this; he has no misguided cause, or even a desire to profit. He just likes to be part of the hate.
* The Stand, Flagg's mass rally in Las Vegas features vexilloids resembling the Third Reich's flag: red, with a stylized black crow fimbriated in white.
* The Stand, Fran at one point muses about Harold's very unusual fiction writing style: second person, present tense.
* The Stand, Frannie Goldsmith buries her father, a victim of the superflu informally called "Captain Trips," in the garden he tended with utmost care in life. It's a painful ordeal in every way from physical to emotional.
* The Stand gives the appearance of this, but is in his mid-twenties to thirties.
* The Stand. Glen found him, then he was with Glen and Stu until they had to leave him. Later, he makes it to Boulder, goes with the final four to face Flagg, and ends up helping Stu by bringing food until Tom arrives.
* The Stand, Glen telling Tom "it's time" as in 'time to go West', after hypnotizing him earlier.
* The Stand has deaf-mute character Nick Andros who carries around a notepad to help him communicate. Unfortunately, he winds up paired for a while with the mentally retarded Tom Cullen, who can't read.
* The Stand has wiped out most of humanity. Flagg's minion Trashcan Man is particularly adept at finding these new toys and getting them in working order.
* The Stand, he would have found an excuse to kill the Trashcan Man no matter what he did.
* The Stand. However, due to the communicable nature of the superflu, they realize that containment became impossible "as soon as Campion bought his first take-out hamburger."
* The standings going into the final game determine the order of play (the panelist in third place goes first), and panelists sometimes actually complain about having the most points going in because the third set of lightning round questions is supposed to be harder — though this seems to be more of an
* The Stand: In Stephen King's miniseries, Randall Flagg does this to his second-in-command Lloyd when he tries to tell him about the third spy.
* The Stand, in the form of Fran's and Harold's diaries—though Fran doesn't die at the end of hers.
* The Stand, in the form of the bomb Harold and Nadine set off inside the house where the Free Zone committee is meeting, killing several people including a main character and injuring several more. King specifically said he used this tactic because it was getting too dull.
* The Stand in the neighboring cell, all while continuously singing the nonsense chorus lyrics from "Camptown Races."
* The Stand. In the prologue to the unabridged version, he says he felt the original abridged version failed because it was specifically lacking this trope.
* The Stand. In the television mini-series adaptation his fate is less enigmatic as

one of the soldiers at the base is obviously ill with the superflu... but even here Creighton is not sick the last time he is onscreen, raising the possibility he was one of the 0.5% immune to Captain Trips.
* The Stand is built around this trope, as it is how Mother Abigail and Randall Flagg contact the survivors of the superflu.
* The Stand is forced to Opt Out of the final confrontation when he's injured during the trek to Vegas.
* The Stand it's Stu Redman. There are others in Boulder and there's Tom Cullen, but Stu was the only survivor of the four sent to face Flagg (if you don't count Kojak, the dog).
* The Stand, it's used for horror: When a woman tries to assassinate Randall Flagg, she finds that her concealed knife has turned into a banana.
* The Stand killed almost all the domestic animals, too, and left the rats and such.
* The Stand, King spends a short chapter describing the "second wave of deaths" caused by the after-effects of the plague. Unlike the billions of people who die from the super-flu plague, these people die of mundane causes. Like the guy who dies of tetanus because all the doctors who could have treated him have died, or the girl who dies in the car accident when she decides that a lack of people equals a lack of traffic and runs into a stalled car at 100 mph, or the older man who dies of a heart attack because he runs out of his medication, and so on.
* The Stand, Kojak the Irish setter comes to the aid of the hero in a time of need, braving wolves and later the wide virus-ravaged wasteland even when injured.
* The Stand miniseries, Campion sees (or believes he sees) Randall Flagg traveling with him and his family from Project Blue to Arnette in the backseat:
* The Stand, Nadine has prematurely grey hair which later turns completely white. She's in her mid-30s.
* The Stand Nadine toasts "To new acquaintances," and Harold replies "And absent friends." It's just after the end of the world, so that description includes a lot of people.
* The Stand, Nick meets the sheriff, a huge man, and later his wife, a slight little thing, leading Nick to ponder the trope and its implications.
* The Stand. Not supernatural, but it still, unusually, warrants almost half a page of description.
* The stand-off between alpha troll Detritus and an enraged adult male rhinoceros in
* The Stand, one of the survivors trapped in the prison calls out for "Mother!" all the time, much to the aggravation of Lloyd Henreid.
* The standout example, ironically enough, however, is Assassin — actually some nobody who only got summoned
* The Stand, Randall Flagg claims to have been Cinque/Donald DeFreeze, one of the key figures in the Patty Hearst case and leader of the Symbionese Liberation Army.
* The stands are full for a Springfield Isotopes (minor league baseball) game because
* The Stand; she healed Frannie's back after the explosion. It was probably a channeling holy power kind of thing, given her role in the novel and the religious aspects.
* The Stand, the U.S. Army should have expected that trying to design a killer virus as a biological weapon would probably go wrong. But, they didn't, and it escaped...
* The Stand treatment from Flagg via a motorcycle crash. As Harold lies dying slowly and painfully, he finally lets go of the petty hate and resentment that he's carried throughout his entire life and drove him to villainy. He writes an apology to everyone he betrayed in Boulder before shooting himself. Made more poignant in the television mini-series, since Harold is only able to scrawl a brief apology. Though it's doubtful anyone in Boulder would accept it.
* The Stand unsuccessful) including a military checkpoint that opened fire on civilians.
* The Stand was decimating the general population was adorned with the uplifting

graffiti "All Dead Here".
* The Stand wasn't as compressed as one might expect of a 900+ page book, but the Boulder section and Stu and Tom's journey home suffered it. The Boulder stuff was justified, as even King thought it got a bit boring before the bomb incident and he wrote that part to kick start more action.
* The Stand, where Flagg executes-read 'crucifies'- a guy who was caught doing drugs.
* The Stand, who is mildly mentally challenged and doesn't know how to spell anything, will often say, "M-O-O-N, that spells [word related to the topic of conversation]!" Accidentally accurate at one point when he says it in regard to the moon.
* The Stand with a disease killing 99% of the population starts seeming much scarier (and more plausible) than Randall Flagg's supernatural menace.
* The Stand Your Ground, Castle and similar laws in some states of the USA, which state that a person can defend themselves against an attacker and has no obligation to try to evade or retreat. SYG applies anywhere in the state, while Castle applies in the home.
* the Stanford Tree. Despite Stanford not officially recognizing the Tree as its mascot, the Tree is allowed to dance around during games, and there is a special student committee that determines who gets to be the Tree each season. Whoever is the Tree has to design the costume, hence the varying quality of the Tree each year.
* The Stan Freberg Show (1957), "Incident at Los Voraces" begins with the narration: "It was 1960 when the incident occurred — that's almost ten years ago."
* The Stan Freberg Show featured a "real-life" couple who would occasionally turn off the radio during the episode to discuss what they'd just heard. At one point, the husband tunes back in just in time to hear this apparently hilarious punchline:
* The Stan Freberg Show, "Gray Flannel Hat Full of Teenage Werewolves", where a werewolf-by-night ad man is almost enraged enough by a scratch on his record to revert to his hairy state.
* The Stan Freberg Show: "Incident at Los Voraces" tells the story of two casinos, El Sodom and Rancho Gomorrah, which outdid each other with bigger and bigger attractions until one of them brought in a hydrogen bomb test.
* The Stan Freberg Show "just the facts, ma'am" originated in these parodies.
* The Stan Freberg Show sketch "Gray Flannel Hatful of Teenage Werewolves", in which an ordinary, respectable, well-adjusted werewolf, due to a curse, turns into an advertising man "when the sun is full."
* The Stanley Cup ten times before moving and folding (the current Senators have banners for the old one's conquests).
* The Stanley Ellin story "Specialty of the House" deals with an exclusive restaurant which occasionally offers kitchen tours to its (fattened) premier customers, who are never seen again. It's implied but not stated outright that they become the titular dish, which the proprietor claims is lamb (rather than pork) sourced from one extremely specific flock of sheep in Afghanistan. Kind of an unusual example in that there is no indication of this trope being in play because of financial difficulties—it's more to the effect that humans taste good.
* The Stanley Parable, and that he's really, truly, stuck in an endlessly looping hallway... and then he starts screaming for help.
* The Stanley Parable catchphrase "God DAMMIT Ross!" after everything goes wrong.
* The Stanley Parable features a "compliments room", where pushing the button will earn you a shallow compliment from the narrator. He's only able to praise the player's ability to eat uranium, then place them in the top 5000 of people playing the demo at this exact moment, before running out of nice things to say.
* The Stanley Parable, he gets increasingly irate. In some endings, he even kills Stanley- sometimes he crosses the line when he does so, sometimes he doesn’t.
* The Stanley Parable is a comedy game, but viewers report feeling distinctly uncomfortable, horrified and confused by the experience. It's very hard to explain without spoiling it.

* The Stanley Parable is an interactive postmodern art piece dealing with the question of the player's ability to make decisions, whether that be with or against the Narrator's wishes. One of the good endings comes from following the Narrator's directions exactly, while ironically, the story shows that the player character is free from control. However, not even the Narrator himself is safe from being controlled, as other endings demonstrate.
* The Stanley Parable is that Stanley suddenly notices all co-workers are gone from the office and he tries to find out why.
* The Stanley Parable mod with most graphical assets reused from that game, then re-released commercially with original graphics.
* The Stanley Parable, on rare occasion you can stumble across some office worker's abandoned workstation whose monitor has a game of Solitaire still opened.
* The Stanley Parable results in Stanley being trapped in "the serious room", leaving the player no choice but to restore or restart.
* The Stanley Parable, the Narrator tries to come up with cheap compliments for the player, one of which is "Of all the people I know who are playing this exact demo at this exact moment, and standing in this exact room, your performance is easily in the top five thousand."
* The Stanley Parable, the narrator will ramble on incredulous as to why you decided to step inside. If you wait long enough, he'll deprecate your choice by claiming that when you go talk about this with your friends, you'll be all "OH DID U GET TEH BROOM CLOSET ENDING? TEH BROOM CLOSET ENDING IS MAI FAVRITE!" reminiscent of a typical web commenter.
* The Stanley Parable. The office eventually becomes impassable from glitched-out doors and piled-up models. A similar but less elaborate effect appears in the demo.
* The Stanley Parable. Ultimately, your choice is all an illusion, as every potential path Stanley can take has been predetermined for him. Even the Narrator, for all his semblance of control, is just as doomed to this meaningless existence.
* The Stanley Parable when you activate the Real Person ending, somehow making an 'incorrect' decision.
* The Stanley Parable-y, or the target of Stanley's defiance causing his story to crumble around him.
* The Stanley Parable, you can open the door opposite the boss's office. This leads to an elevator which goes nowhere and does nothing, except it shakes a bit to give the illusion of movement and you hear Ipanema-style music playing.
* The "Stan Wrong Song" from "Boss Mabel." Stan is caught singing it to himself in "Mabel's Guide to Fashion".
* The Star Adders, while much more warrior-like in individual outlook, were founded on the principle of
* The Star: An acapella performance of "Carol of the Bells" plays over the Sony Pictures Animation and Walden Media logos.
* The Star Beast. A "truth meter" is used on witnesses during a court trial. When the subject lies, a needle swings into the red zone, a ruby light flashes, and a warning buzzer goes off. Interestedly enough, a witness is telling all sorts of lies and the device keeps going off. At one time, she tells an obvious falsehood and it doesn't go off. The judge concludes that she really believes what she is saying...even though it patently is false. A limitation of even perfect (i.e. fictional) lie detectors. In-universe, lawyers like to make the point by telling the old saw about the lunatic who said he was God and the veridicator backed him up.
* The Star Beast. It is also stated that humanity is the shortest lived sapient species in the known universe.
* The Star Beast made a blind hyperspace jump to other solar systems, and had to make another blind jump to get back to Earth.
* The Star Beast, the Rargyllians while honest, are like mercenaries. They would sooner let a man die of thirst on an alien world, rather than tell him the native word for "water", unless money was first offered up-front for their services.
* The Starbug shuttle averts this, with a much more streamlined design made almost entirely out of spheres, although it still feels very modular. The Blue Midget

shuttle, on the other hand, seems like a compromise between the two designs, looking more like a flying brick with all the sharp edges sanded off and a pair of tank treads stuck on the bottom.
* The Star Chamber: All of the secret court judges. The only crime they deal with is murder and the punishment for each one is death.
* The Star Chamber, having to free obviously guilty murderers on technicalities inspires Judge Stephen Hardin to join a secret court which "tries", convicts and sentences them to death, with a hitman carrying it out. Two specific examples from early in the movie:
* The Star Chamber. However when two drug dealers are judged guilty of a child murder, then later turn out to be innocent of that particular crime, the protagonist finds himself in a dilemma.
* The Star Chamber, the turning point comes, if not before, when Hardin and the rest go vigilante in order to pursue justice as they see it.
* The Star Chamber, though its hard to say if he falls in the first or second category.
* The Star Chamber to a hitman. A major plot point is the inability to call off a hit on a couple of lowlifes when they turn out to be innocent of child-killing. Presumably this is due to the security precautions used to hire the killer — there would be cut-outs, and both hitman and employer wouldn't know the identity of the other.
* The Star Chamber, two of which are shown to be killed by a hitman. The father of a murdered boy also attempts these when the suspects get off this way, but ends up instead shooting a cop by accident when he tries to stop him.
* The Star Chamber. We only see the secret court go after freed killers, with the punishment that, in their view, fits the crime-death.
* "The Starchild" had Master Splinter do this, using such as mask as part of a
* The Starchild Trilogy also stimulates the pleasure centers, helping to ensure the loyalty of the technicians to the computer and the Plan of Man.
* The Starchild Trilogy: At the reefs of space, between the stars, life has evolved from primitive cells called fusorians, which actually fuse hydrogen and other elements to produce energy. They have evolved into a wide variety of odd creatures—most notably, the friendly spacelings and the terrifying living rockets known as pyropods (flame-foot).
* The Starchild Trilogy, political dissidents are fitted with explosive collars with undefined timers that need to be periodically "wound up" by the guard's key to renew the timer. Within the series, legend has it that the only way around the tamper mechanism is to detach the head, remove the collar, and sew the head back on.
* The Starchild Trilogy, the population of Earth has reached the thirteen billion mark.
* The Starchild Trilogy: Under the Plan of Man, all must contribute. Those who cannot or will not contribute willingly are sent to the inescapable prison called "Heaven", where they can peacefully wait until their body parts are required.
* The Star Diaries has an episode where scientists are trying to send into the past a particle which will become the Big Bang (they are also trying to imbue it with the properties to create a better universe... doesn't really work out).
* The Star Diaries, Ijon Tichy is viewing a video filmed by a probe on a half melted planet. A local professor complains about the cold of 860° Celsius, and dismisses the idea of creatures living on planets as cold as Earth. Another part has a catholic priest complaining about the difficulties of preaching on a certain planet — its inhabitants are freezing at 600° Celsius, so of course they are more interested in Hell than Heaven.
* The Star Diaries living on an extremely hot planet discuss a possibility of an intelligent species living in a lower temperature; the oldest one explains that the existence of such creatures is impossible, and any other sapient species must be exactly like them. While Lem used the trope in comedic works, he criticized its use in serious ones.
* The Star Diaries: One story has such plants. However, they've been left

uncultivated for several generations and the cross-pollination has created some bizarre results (like carnivorous, ambulatory furniture).
* The Star Diaries. The story is a parable of living in a country, where everybody upholds the official ideology no one actually believes in, which was the case of People's Republic of Poland at the time when Lem wrote the thing.
* The Star Diaries to him by someone or something. At the end of conversation, professor Corcoran admits, that he is also suspecting that he is not real and surrounded by phantoms, products of false signals sent to his senses and that it is probable that even the creator of this world is also a chest in someone laboratory, and so on and on...
* "The Star" ending, which the players consider the best possible one in the game.
* The Star. Felix, Debra and Cyrus briefly pose as Herod's shadow while hiding behind a curtain.
* The Starfighters features an 80 minutes of fighter plane stock footage, seven minutes of insipid dialogue and three minutes of credits.
* The Starfighters. No, this isn't about the endless refueling scenes. One of the higher-ups flat-out says flying a fighter jet is like making love.
* The Starfighters. The whole movie is an endless stream of nothing of interest happening to incredibly uninteresting people, and she does not disappoint.
* The Starfighters was really an advertisement for a series of fighter planes shot as a movie. The movie has almost no conflict whatsoever. The closest the film has to an antagonist is the Congressman, whose son is a part of the Starfighter project against his wishes, but he never does anything other than call his son or the CO to try to talk them into reassigning him.
* The starfort the Soul Drinkers were occupying proved to have a wing of fighter craft onboard.
* The Star Fox depicts a future in which the system of Letters of Marque has been revived and "space privateers" battle in starships.
* The Star Fox), Heim contemplates his motives for keeping on plugging in the wearisome, dangerous, and unlikely to succeed journey; one might be this, though he's not sure.
* The Star Fox, there's a reference to the Russian Republic, which is also noted as being 'amiably inept'. (Poul Anderson was a noted anti-communist).
* The Stargate franchise has never been afraid of metahumor. A number of
* The Stargate franchise's biggest offender was The Ancients. Introduced in season 1 as 1 of 4 unnamed old and intelligent races, they gradually grew in scope, with each new addition making their backstory a bit more convoluted. Atlantis's addition that they had left the Milky Way after the plague, leaving it to repopulate itself, didn't break things too badly. But when Season 9
* The Stargate is a wondrous piece of technology on which the fate of humanity rests when it is first found, only to become increasingly trivial as time goes on; by the end of
* The Stargate network), and the Ori home galaxy. The initial expedition to Pegasus was one-way, because they only had one Zero-Point Module (ZPM), a football-sized super-reactor that was a pinnacle of gate-builder technology. Later they find more of these and are able to sporadically link the Stargates back and forth to Earth while having a ship with Asgard-built hyperdrives make regular month-long trips between Milky Way and Pegasus, which can be accelerated to three days with a ZPM.
* The Stargate Project was an attempt by the Defense Intelligence Agency launched in 1978 to determine if
* The Stargates have safety systems built in and for this very reason won't transmit anything or shut down while an object is only partway through the event horizon, but can only maintain their wormhole for thirty eight minutes (and change), so when that limit is reached, the gate
* The Stargate system itself has plenty of failsafes, however, as presumably it was designed to be used by other races, without such devil-may-care attitudes about personal safety. Unfortunately for the SGC, they're operating their Stargate without the standard control device, and feel free to completely disregard any warning signals from the Stargate itself.

* The Stargazer tribe practices Kailindo, a martial art style specialized for werewolves that uses wind-magic and their natural shapeshifting.
* The Stargazer tribe seceded from the Garou Nation and joined the Asian Beast Courts in an attempt to regain their lost power and lands.
* The Star Guardians are a Magical Girl team existing as a set of alternate champion skins in
* The Stark children become this early in the series when their most prominent members are either dead or missing, their army is scattered, their household is ruined and family members are exiled by the crown, and their family name is also almost extinct in the male line. As Bran tells Rickon, if anything were to happen to him and Robb, he is the heir to Winterfell. With Bran going beyond the Wall, Sansa and Arya trapped in the South, and Jon being an
* The stark contrast in between the Conspicuous CG Riding Duel segments and the rest of the series.
* The Stark direwolves can all be pretty hard to keep track of when they wish to be (just ask the Ironborn and Bolton trackers), but Ghost is the best of the bunch at pulling this trope. White fur + ice and snow = Cheshire wolf.
* The Star Kings. It ate up a good part of a starship's energy balance, but where it hit, nothing remained.
* The Star Kings — and started using them when the hero figured out how the weapon worked. Probably the League was not the first to invent those.
* The Star Kings, the main hero, while prisoner on the enemy ship, manages to escape and draw the attention of his own side's ship. The bad guys are victorious in the battle, and they tie him up in a chair. However, the battle forces a crash landing, which cracks the chair just enough for the hero to saw through his bindings after half a day or so.
* The Starks and Lannisters. The only reason they are civil to each other is because Ned Stark's best friend Robert Baratheon married into the Lannister family.
* The Starks and Lannisters were never on the best terms, but they quickly slide into
* The Starks are reduced down to a few children by the end of Season 3. Fortunately, they have returned and reclaimed their home.
* The Starks are the most classical in terms of heroes, honor-bound warriors devoted to each other. Notable examples include:
* The Starks, Arryns, Tullys, and Baratheons are all confined to half a dozen or so members at the most, and the inheritances of their various regions are threatened because of it, while the former ruling Targaryen family is down to one (confirmed) member. Meanwhile, the Lannisters, Martells, and Tyrells are all bursting with
* The Starks' reputation has suffered over the years but this is mostly averted by Season 6. "The Door" reveals that Ned Stark is remembered (or at least lampooned) as a boorish yokel who was executed for greedily trying to steal the throne rather than a noble martyr. King Robb and Talisa's love affair is blamed for the loss of the war. Jon is seen as a Night's Watch deserter who betrayed his oath as Lord Commander of the Night's Watch by letting Wildlings into the realm, who Northerners believe will rampage their lands. This causes House Umber to pledge their allegiance to the Boltons, whom they despise very openly, to defend themselves. The Umbers are the ones who give Jon's little brother Rickon to Ramsay as hostage. Sansa is seen as a glorified Southerner owing to her time in King's Landing and marriage to Tyrion and few powerful northern families support Jon or Sansa because neither of them are legally Starks.
* The Starks' steward, Veyon Poole, who predeceased his children, asks Sansa what happened to his daughter Jeyne, who doesn't Remember. Sansa just tells him that they should be glad that she doesn't (as she'd ended up in one of Baelish's brothels).
* The Star League had the M-series of drone WarShips, known as "Caspar", as well as the Pavise automated defense station and the BlackWasp and Voidseeker automated interceptors. Lacking any pesky crew to house/feed/breathe/protect, they typically had raw performance characteristics far above other ships of comparable size and

mass
* The Star League in its heyday did in fact do rather a lot of terraforming and other mega-engineering projects. Then the Succession Wars started and military budgets took priority over such expensive flights of fancy and massive terraforming projects stopped.
* The Starless Sea is this, an entire underground world's worth of magical library with stories inscribed on everything and recorded in every way possible.
* The Starlight Crystal, the heroine's spacecraft comes across another satellite orbiting the Earth, filled with people in cold sleep. Only two of the frozen people are long dead, one of which is the heroine's boyfriend. The other is the heroine's future self, who deliberately caused both cold sleep chambers to malfunction.
* The Starlight Girls (the foster girls Jerrica takes care of) were created specifically for the
* The Starlights also have different accessories on their uniform and different strap colors. Kakyuu's version (which only appears in the manga) has a unique skirt and shoulder pads and her crown remains.
* The Starlight Sword, a mystical weapon forged from the walls of the Starlight Tower, taken by Betsy Braddock, the current
* The Starlost didn't have much of a budget to begin with, and most of it was blown trying to get a fancy special-effects camera to work. Most of the sets and special effects are terrible as a result.
* The Starlost, it's a case of slower than light colony ship with hundreds of domed biomes that have had most of their connections cut. The heroes are from a Biome of Space Amish whose biome is breaking down due to the entire spaceships malfunctioning.
* The Star Lost, so that once they slowed down they started rapidly aging to their "real" ages.
* The star of Sylvie's show, Lucy Wolper, is a classic midcentury housewife for the cameras but brash and funny off it. When Sylvie considers letting Lucy be herself onscreen, Kate scoffs that the censors will never allow it.
* The Star of the Guardians (hence the name) due to being outside the government's control. It's also pretty often raided by the local life-forms, a race of plasma-based creatures that eat energy.
* The Star of the Guardians is a CCG that tWeis made on her own. Given that you've probably never heard of the series, you can guess how well it fared.
* The Star of the Guardians is all built around the Masochism Tango between two of the three main characters.
* The Star of the Guardians who tries to use one gets cancer for their theft.
* The "Star of the Month": Over the course of a calendar month, a certain day of the week gets its prime-time-to-the-wee-hours lineup turned over to the films of a particularly prolific performer, resulting in 3-4 weeks worth of marathons in their honor. Some months add additional marathons on other themes elsewhere in the week — a look at portrayals of African-Americans on film over the decades with filmmakers and scholars providing analysis, a similar series covering homosexuality on film, blocks of movie spoofs, etc.
* The Star Org / Endless take it from a different angle, running with a starfaring naval branch that's curiously powerful for something that's just supposed to be part of a church. At least two of the players (White Noise and Xanatos) are ex-Star Org soldiers; White was left for dead after he was caught hacking into a space station's life support (supposedly on orders) and has since become a "heretic" and renounced his faith, while Xanatos is implied to have mutinied. Xanatos still talks in some of the Star Org's slang though, regularly calling the fans "cogs" among other things.
* The Star Rover has the hero placed in a straight jacket as a punishment in San Quentin Prison. He wanders through space and time while confined.
* The Star Sapphires are powered by love, with much the same addictive effects.
* The Stars Are Cold Toys, altered to look like a dead alien pilot and his memories suppressed. After arriving to the race's homeworld, the pilot's friends are shocked when he doesn't recognize them. After some testing, which is also meant to reveal

any infiltration attempts by a hostile race, his (false) identity is confirmed, although they determine that he has completely lost all his memories. A few days later, he and "his" friends discuss sending in agents to infiltrate humanity, which one of them claims to be extremely easy due to the race's similar appearance. He then excitedly points out that an easy way to disguise any oddities is with amnesia. Everyone then falls silent, realizing what they have just suggested, but they then dismiss it.
* The Stars Are Cold Toys duology, the rat-like Alari have short and weak front appendages. As such, they go into battle with back-mounted guns. Then again, their role in the Conclave is that of space fighters, not ground combatants.
* The Stars Are Cold Toys)—but apparently allowed alien art. Humans use this loophole to get their hands on things like decorative plating that is, conveniently, more durable than any human-made material. Hey, it's not a crime if you want your body armor and starships pretty, is it?
* The Stars Are Cold Toys, one of the heroes, who spent some time in The Shadow, an interplanetary society where everything is possible, mentions he saw this twice. The first time it was a loving couple who fused into a single two-headed body, the second time - an entire large family. It is implied that this state is completely voluntary and reversible.
* The Stars Are Cold Toys that sends people to a place matching their innermost desires.
* The Stars Are Fire: Sentinel trees resemble thorny masses of knotted vines and are mobile, aggressive, and feed on almost any sort of organic matter.
* The Stars Are Going Out: Stars disappearing from the night sky is a sign of bad, bad things.
* The Stars Are Going Out: Stars going out, usually used to indicate an apocalypse.
* The Stars Are Going Out: The stars blinking out foretells the end of the world.
* The Stars Are Ours as a way for a remnant of fugitive scientists and their families to flee a dystopic Earth for what they hope will be a fresh start on another planet. Some of them don't make it.
* The Stars Are Ours: Dard Nordis wakes up and immediately asks "Where is here?" The attending human praises him for coming up with an alternative to "Where am I?"
* The Stars Are Right! supplement, adventure "Music of the Spheres". The Mi-Go have an electric rifle that throws a bolt of electricity.
* The Stars Ascendant, Celestia notes that had she realized just how powerful Tirek had become, she would have ordered Twilight to rip the Elements of Harmony out of the Tree of Harmony. Given that the tree had been withering without the Elements of Harmony, it might kill the tree, but Celestia felt it would have been justified in order to defeat Tirek. Fortunately, it wasn't necessary.
* The Stars Ascendant has Luna call out Discord for being an idiot; his betrayal of Equestria was inevitable, but it was stupid of him to betray Equestria to someone who was going to pull this trope on him the moment he didn't need Discord's help anymore.
* The Stars Ascendant, Luna and Celestia use the images in the starry realm of ascension to review Twilight Sparkle's battle with Tirek.
* The Stars Ascendant, Luna is not surprised that Discord betrayed Equestria, merely that he betrayed Equestria to someone even less trustworthy than himself who then immediately (to the surprise of absolutely no one other than Discord) stabbed Discord in the back.
* The Stars At War do it anyway in combat situations, considering the superior concentration of firepower worth the losses; the civilized races jump sequentially, and make up for their slower arrival by sending a wave of robotic missile pods through first.
* The Starscream: An underling of the main villain who plans to overthrow their boss.
* The Starscream: An underling of the main villain who wishes to overthrow them.
* The Starscream: An underling who plans to overthrow the main villain.
* The Starscream: A traitorous minion of another villain, who's secretly plotting some way to betray their boss.

* The Starscream death montage has been called one of the greatest moments in all of
* The Starscream — A villain's sidekick who makes no secret of their disdain for the villain and plans to usurp them.
* The Starscream on Shredder and remains a persistent thorn in both sides' sides by hitching his wagon to the aforementioned mob and later Bishop). Stockman usually gets eliminated from the three-way first, though.
* The Starscream) that his name has become synonymous with treachery. It also helps that there's not a single word that encompasses Starscream's power-hungry character (such as his open ambition, overly egoistic to a fault, seizing every opportunity to usurp his leader, failing miserably, and groveling for mercy).
* The Starscream: This could sum up the Roman Empire in the 3rd and 4rth centuries CE. One series of these after another. Almost every Emperor was a military general who betrayed his Emperor and seized power for himself, only to have the exact same thing happen to him.
* The Starscream Yuri, but it feels rewarding when you finally remove him from command.
* The Star Seekers by Milton Lesser depicts a coming-of-age quest on board a generation ship which has turned into four separate societies in the centuries since it left "Urth".
* The Star Shadow you want to go but to a location best suited for your current deepest desire. This is, as you can imagine, a bit of a crapshoot, as finding a specific world is almost impossible, and one should never trust one's own deepest desires. That is why there is a new organization within the Shadow that strives to build its own Portal Network, which is more typical. Also, neither the Gates nor the planets they're joined to can be destroyed.
* The Starship Heart of Gold and Marvin the Paranoid Android in the film adaptation of
* The Star Sisters also became the Star Siblings, with Jewelstar being male. Interestingly enough, the Star
* The Stars, Like Dust. At the end, when the characters read the document for the first time, it turns out to be a text of the United States Constitution.
* The Stars Like Dust is basically a sandblaster for the face, and he's concerned about rumors that this technique leads to skin cancer.
* The Stars Like Dust: Nephelos, one of the planets conquered by the Tyranni, is named to evoke the term Nephilim, a Hebrew word for "the fallen". The planet has fallen to the Tyrants.
* The Stars My Destination alone) is ubiquitous, to the point that not being able to do so is considered a disability. With the ability to travel and date across the world with as little effort as walking across a room, race soon became a thing of the past.
* The Stars My Destination also has everyone able to learn to teleport, or "jaunte" from point to point, with various personal limitations. As well as a very few who can transmit and/or receive thoughts.
* The Stars My Destination and disappearing people, although one of their members asserts that they made up stories of atrocities themselves so as to scare people. They are all descended from Chinese tongs.
* The Stars My Destination, and the removal process involved bleaching out the tattoo by injecting acid into his skin while he is awake and screaming. The book was written in 1957, three years before the invention of the laser, let alone laser tattoo removal. There is some dialogue in the book suggesting that tattooing is a lost art in the future, and tattoo removal would not be a priority in a culture without tattoos.
* The Stars My Destination, anyone can teleport, but if they don't know exactly where they're going, they will invariably wind up inside a solid object and die horribly. Played straighter than most uses as people actually die of it once in a while.
* The Stars My Destination by Alfred Bester, Saul Dagenham recognizes a disguised Gully Foyle when he uses a pseudonym that Dagenham had implanted in Foyle's mind

back when he first attempted to interrogate him via hypnosis.
* The Stars My Destination Gully Foyle activates this ability by pressing down on one of his teeth, and briefly wound up in a position of being unable to turn it off.
* The Stars My Destination Gully Foyle is the unwitting recipient of an extensive facial tattoo. When he later adopts a new identity he has it removed, but the process leaves him with scarring which only becomes inflamed and visible when he is angry. He therefore has to learn to control his anger in order to avoid blowing his cover.
* The Stars My Destination has the Scientific People, the descendants of a research team that crashed in the asteroid belt, and whose rituals are built around the scientific paraphernalia of the ship.
* The Stars My Destination religion has been outlawed and pictures of people practicing it in secret are treated as something akin to pornography.
* The Stars My Destination, the failure Gully Foyle is put in a fantasy where he's rich, famous, and loved, and all his remembered past is part of a psychosis he's struggling to overcome; the goal is not to imprison him but to wring valuable information out of him. Fortunately, he's too stubborn to accept it.
* The Stars My Destination. The novel never explains the origins of the war, so it's not clear if it is this, or a war that just happens to be between former colonies and former colonisers.
* The Stars My Destination. The trauma of the experience is pivotal to his character development and his main motivation for the rest of the book.
* The Stars My Destination). They're gentle and welcoming, but they don't want you to leave.
* The Stars My Destination, where Jaunting is the most common psychic talent, anti-teleport security measures include turning headquarters and homes into elaborate manipulable mazes. Anyone trying to jaunt in risks embedding their foot in an uneven floor or their entire body in a wall that wasn't there the day before.
* The stars of the show he wrote ditching the wake to go on a convoluted treasure hunt... Which suddenly turns into the investigation of a
* The stars of the St. Louis Rams "Greatest Show On Turf": Kurt Warner, Marshall Faulk, Isaac Bruce, Torry Holt, Az-Zahir Hakim and Ricky Proehl. Faulk and Warner are now in the Football Hall of Fame. Isaac Bruce and Torry Holt are maybes. Proehl, although not as well-known as the other four, played in four Super Bowls and won two. Hakim did very little after leaving the Rams.
* The Star Soldier series uses this variant as well. At times, a ring-shaped enemy ship will enclose you, and the fastest way to dispatch it is to mash the "speed change" button while firing.
* "The Star-Spangled Banner" author Francis Scott Key was a lawyer who wrote poems strictly on an amateur basis.
* "The Star-Spangled Banner", the national anthem of the United States, is a poem that was set to the tune of "The Anacreontic Song" (a.k.a. "To Anacreon in Heaven"). How many Americans have ever heard (or even heard of) the original drinking song, popularized by a society of amateur musicians to the point where it was often used as a
* The Star-Spangled Girl, we're told that Andy spends time with the landlady in lieu of paying rent. At one point they go surfing; Andy later describes his sunburn in detail, saying that he has the outline of a bird from where a seagull passed over them while they were out at sea waiting in vain for waves.
* the Star Stalker is eight billion years old and was constructed by one of the first civilizations in the universe.
* The Stars. The daughters of destiny and grandchildren to the All Mother. Six in total, but only Evalka is named.
* The Stars Will Aid Their Escape during his fight with the Princesses because he's actually getting visibly angry.
* The Stars Will Aid Their Escape emerged in Equestria, Celestia was only able to stop him by calling down the power of the sun and incinerating everything for miles, sacrificing the lives of every pony in the affected area (most of whom were

rendered hopelessly insane by Nyarlathotep anyway) in order to stop him from spreading. And all that succeeded in doing was temporarily banishing Nyarlathotep back where he came from — he describes it as having been inconvenient.
* The starting area of the first game, Angara, bares similarity to medieval Europe, has a region similar to the Scandinavian peninsula to the north, and a (comparatively small) area with Oriental influences to the east. It goes so far as to call the path from the eastern reaches to the western reaches "Silk Road".
* The Starting Line's only entry on the Alternative charts wasn't "The Best of Me", but rather the long forgotten "Island (Float Away)" four years later.
* The startling regularity with which the Cruciatus (Torture) Curse is thrown around in
* the start of a real WAR occurred during riots following a heated game of football.
* The start of the game has Indr teaching Ajna how to protect herself. Throwing you into your first "Battle" as Ajna where the game teaches you how to perform a clean block. Before the final boss Ajna has a flashback to her lesson with Indr, being able to clean block is vital to beating the boss.
* The start of the story has the family watching the news about a "peasant" found dead with teeth marks on his throat and drained of their blood. Despite there likewise being evidence of a black cape at the scene, the police can't make the connection of a vampire attack and Wiggum thinks they're dealing with a
* The Star Trek Cookbook by Ethan Phillips and William J. Birnes. In-universe, written as if by Neelix.
* The Star Trek episode "A Taste of Armageddon" has neighboring planets Eminar and Vendikar fighting for the silliest reason of all: it's easier to continue their centuries-long computer-simulated war than it is to organize a cease-fire. If it weren't for the executions, it'd be just a game. When Kirk destroys the computer, they quickly come to a peace treaty, since they have no actual hostility or disputes.
* the Star Trek Fight Music. The music from both episodes was even included together on one soundtrack album.
* The Star Trek films often have this, on the few occasions when the crew goes out in space suits, such as Spock's thruster-suit in
* The start-up of the old Windows 95 computer in alternate-world Nagato's classroom during the
* The Starvation Army was formed by an alliance of Dragon Islanders fleeing famine in their home islands, and laid waste to pretty much everyone else, all while constantly starving and culling their own forces. The combination of wars, famine, and societal collapse eventually led to the death of at least 75% of the population of Antarctica.
* The Star Wars Expanded Universe it is stated that the Death Star fueled itself with a Ram Scoop for self sufficiency.
* The Star Wars Holiday Special" and then again for the montage at the end of Santa Christ.
* The Star Wars Holiday Special, but it's just confusing — like the rest of the show.
* The Star Wars Holiday Special, Chewbacca's family uses one of these hidden in some kind of dresser to contact the other characters associated with the Rebel Alliance—Luke and R2-D2, Leia and C-3PO, etc.—to ask about Chewie and Han Solo's whereabouts. In a separate instance, Chewie's wife, Mala, contacts Art Carney with a device that doubles as a television which Carney's character refers to as a "wall screen."
* The Star Wars Holiday Special, even though he had nothing to do with it beyond writing a basic story outline for CBS.
* The Star Wars Holiday Special (feature-length television special), "A Visit to Santa" (short; revived in the 2009 live show)
* The Star Wars Holiday Special that they never show the product at all; they seem to be riding on "Buy our product or you hate America!"
* The Star Wars Holiday Special, with Luke Skywalker having trouble understanding

Chewbacca's family unless they speak slowly. Understandable, since by that time he hasn't known Chewie for a long time.
* The Star Wars: In Issue 4, the Imperials are seen riding ostrich mounts. Ostriches with teeth. Luke ends up hijacking one of them (after he and Annikin killed the others) to chase down one of the survivors and bisect him with his saber.
* The Star Wars like the Jedi and the Sith not having any powers since the Force functions more like a standard religion rather than a source of power for its believers. They are still very skilled fighters with lightsabers nonetheless.
* The Star Wars, one of the Imperials is killed by Luke before he could finish his words.
* The Star Wars Technical Manuals describe Particle Shields such a way that they could be Reinforce Fields that make armor more resilient against physical impact. They're paired with Ray Shields,
* "The Star Wars" was originally going to have a young up-and-coming Jedi named "Annikin Starkiller"
* The Star, when Thaddeus and Rufus start barking at the camels, Cyrus and Felix pile up onto Deborah out of fear. She falls over almost immediately.
* The Star Winning Gundam has Star Funnels, which can attack, defend or combine together to for
* The "Stasis Field". Only problem is that nothing inside can go faster than 16.3 m/s, rendering most projectile and ray weapons useless, and any living thing not wearing special armor dies instantly when inside of it. Which means that inside of the field, it's a
* The Stasi, since the files, information, and evidence accumulated provided a stable database of blackmail. It's just that nobody expected the GDR to collapse and their legacy to be discredited.
* The State: An actress is starring in and directing a TV costume drama. The scene shown is a monologue of hers, which is repeatedly injected with camera instructions.
* The State and unintelligible screaming. However, once you learn that the song is officially named "Boys And Girls Action", it becomes apparent that what's actually being screamed is "Boys and girls! Action! Action!". It's also more intelligible in an alternate version heard on some of the menus on the DVD of the series since the lyrics are being yelled by children instead.
* The State as a crime-fighting, Batman-style superhero. He and his sidekick (the Boy Savior) have been captured by the bad guys, and are tied up in an abandoned factory next to a time bomb that's about to explode when...
* The State". At one point, one of them says, "You know, this would be a lot more fun if I actually wanted to see you naked."
* The State. A waiter brought a year's supply of radishes in a wheelbarrow.
* The State called "You Will Always Give Me A Boner", one singer sings "I would do anything for you! I'd even shoot the president!" Cue the secret service.
* The State Counsellor and that their best course of action is capitalistic reforms that he supports.
* The State criticizes the concept. The skit was pretty popular and the character made at least one reappearance.
* The State debuted on MTV and (initially) received wretched reviews, they started running commercials for the show with said negative review quotes, with the cast members crying in the background dramatically as "I Started A Joke" played. Some would argue it was the funniest sketch they did (at least to that point).
* The stated logic of using Black Dog for real-life books of the extra-noir, extra-bloody variety is that the World of Darkness is (as the name implies) a
* The stated requirement for the test to earn S Rank is for the twins to pour their passion into a single item of amazing quality to turn in to Mireille. However, all you're actually required to do is turn in an item that's good enough to pass the first line, and if it doesn't, you can just deliver two or three crappy D-level items until you pass the line and then choose the "report" option. Mireille will tell you that just barely passed and to do better next time (though there

isn't one) and everything else will play out exactly the same, with Mireille praising Lydie and Sue for successfully reaching S Rank and saying
* The State Farm campaign where agents materialize out of nowhere to help their clients. Not recommended for losers with
* The State had a sketch where two characters play strip poker. Since they're both male and straight, they don't find it all that interesting.
* The State in the sketch can't understand why the gag never gets old to any of the other characters. Ironically, the character proved popular and was brought back a few times.
* The State lampooned this idea with a sketch where a man wakes up in a hospital after only a short time knocked out in an accident only to find that he missed the "most exciting 15 minutes in the history of the world", and now aliens have landed and all sorts of things have changed.
* The Stateless: Dissenters are deported to an unknown region and are stripped of their citizenship or nationality for criticizing us.
* The Stateless, or whichever native homeland their family originated from).
* The Stateless: Someone is not a legal citizen of any real sovereign nation in the world.
* The Stateless: Someone who is not a citizen or national of any sovereign nation-state. Sometimes this can be done voluntarily, but otherwise it happens because no country is willing to legally recognize them (or the government of their homeland may have even forcibly stripped them of their former citizenship/nationality).
* The Stateless: Someone who is not officially recognized as a citizen or national of any sovereign country. Because they are unable to obtain a valid passport, this makes international travel and immigration laws a very legally confusing mess for them.
* The Stateless: You have no home country because you were either stripped of your citizenship and deported, or left because the country no longer exists (if it was ever officially recognized).
* The statements in episode 100 are unscripted, with the parts played by improv actors the team knew.
* The State of Israel has long had something of an unofficial ban on the performance of Wagner's music. There's been some movement on that front in recent years, but it is understandably a rather contentious issue.
* The state of Jefferson, which would have incorporated territory in northern California and southern Oregon
* The state of Kentucky allegedly threatened to sue over the commercial use of its name.
* The state of nature is the notion that humans are more than willing to fight each other and without a ruling power to keep everyone in check, life tends to be "nasty, brutish and short". In this state, there is neither law nor security, only absolute freedom. Thus, it's argued, people must give up some rights for mutual benefit (or in some cases, philosophers like Thomas Hobbes said
* The State Of New Mexico wishes to bring charges against the Greys of
* The state of Oklahoma, which has gone through numerous booms and busts over the years (oil, coal, lead, etc) is littered with literally thousands (to be exact, over 2,500) of these, to the point that there's actually an official state list and classification system for them. There are even several which are partially underwater due to the construction of artificial lakes, and many more which are
* The State of the Art Cars best embody this trope as they were specifically designed to be futuristic as to promote to the general public what their transit systems could be like with a little funding. The carpeted,
* The state of the art in artillery has see-sawed between solid and explosive projectiles as different generations of armor and target hardening have come and gone.
* The state of the art in satellite phone handsets are comparable in size and weight to a regular cellphone from about 1989. Their sound quality is pretty poor but they can make and receive calls from just about anywhere on Earth's surface. Some of them can even be tethered to a laptop and provide internet access, albeit

painfully slowly. However, they have a noticeable delay - you'll always notice that it takes several seconds for the person on the other end to talk back after you've spoken as if you are making a call from the moon, even if the person you're talking to is just down the street.
* The state-of-the-art National Defense Management Center, situated in the MoD's Third Building on the Frunze Embankment in Moscow, right across the river from the Gorky Park, features as much as
* The State of the Art''. The latter is technically a glorified spacesuit, but anything that provides super-strength and plenty of damage resistance can easily be used for military purposes.
* The State of the Art, the opening tale "The Road of Skulls" features a pair of pilgrims trying to reach a city. The city is actually on huge wheels and is perpetually moving away from them, laying the road they're traveling on.
* The state of the terraforming efforts combined with the cultural base also give planets such as the Albino Zulus whose gene engineered solution to a poor Ozone.
* The state of Virginia has the geographic region known as Western Virginia, comprising of the Shenandoah Valley, 26 counties and a number of independent cities in Southwestern Virginia, with some communities located within driving distance of West Virginia.
* The state of Washington was going to be called Columbia because of the old Columbia territory (the reason why the Canadian piece is called British Columbia). They named it Washington to avoid confusion with DC. You can guess how that turned out in the long run.
* The State, one cold opening sketch had a kid calling to his mom to check under his bed for monsters. When she looks, she's dragged under and eaten, then a monstrous hand comes out holding a dollar bill, which the kid takes, then calls for his dad.
* The state religion of the Chantry demands that all persons with magical abilities have to permanently join the Circle of Magi and be confined to their towers where they are constantly monitored by templars who are to slay them at the first sign that demons have possessed their bodies. Every mage who tries to escape from the Circle of Magi or refuses to join is treated as being potentially possessed and killed. Since blood magic is not officially sanctioned by the Chantry, blood mages share the same fate as all other apostates. Ironically, the Chantry itself uses phylacteries, enchanted containers filled with the blood of Circle Mages, to hunt down any who try to escape. Destroying their phylactery is the only way a mage can ensure their freedom.
* The State said candidate, concluding that while he's crazy, he at least doesn't need a colostomy bag like his opponent does.
* The state song of Kentucky, which is sung before the Kentucky Derby, is "My Old Kentucky Home". Very touching song, until you realize it's an anti-slavery song about a slave (or slaves) being "sold down the river" to work in the Louisiana sugar cane plantations.
* The Statetan-Project never wears shirts or shoes. Even during the Civil War. Seriously. Apparently this exposure works very well, since a certain Virginian can't keep her eyes off of him...
* The State that's too vague to be useful: there was no discussion of what causes gangrene or what should be done if you do get it, just constant reiteration that it is a serious, potentially life-threatening infection and you should try to avoid it.
* The State, the musical guest was Cake Like, co-host Kerri Kenney's band. This involved her introducing the band in character, then switching costumes and singing a song as herself.
* The State where they played with this. A man escapes from prison (through a wide open gate) and then returns years later, but finds that they gave up looking for him.
* The State who would continually do stupid things. One was having his arm set on fire and not knowing what to do about it, and the other was a fire IN A BOAT.
* The state-wide surveillance operations performed by the Stasi in East Germany

between the 1950's and 1980's were nothing less than Orwellian in magnitude. To quote just a single paragraph in the Wikipedia article (among many, many similar ones) on the subject: "Full-time officers were posted to all major industrial plants (the extensiveness of any surveillance largely depended on how valuable a product was to the economy) and one tenant in every apartment building was designated as a watchdog reporting to an area representative of the Volkspolizei (Vopo). Spies reported every relative or friend who stayed the night at another's apartment. Tiny holes were drilled in apartment and hotel room walls through which Stasi agents filmed citizens with special video cameras. Schools, universities, and hospitals were extensively infiltrated."
* The Station Agent isolate himself when he inherits an abandoned train depot in the middle of nowhere and promptly moves in. He strikes up a reluctant friendship with Olivia, who is battling depression after the death of her young son, and Joe, who was forced to leave his life in Manhattan to care for his sick father and run his food truck.
* The station airing the aforementioned two series experimented with anime from 2012 to '15. They did everything to downplay the effects of this trope, but since their target demographic is people aged 18-49, and
* The station does the same again against the attacking Dominion fleet in the episode "Call to Arms" (in fact using some of the same effects shots, with Dominion ships replacing Klingon ones).
* The station is in fact a giant Mass Relay from which the Reapers intend to launch
* The station itself gets one in "The Way of The Warrior" after revealing that Deep Space Nine now sports a complement of
* The Station Ofthe Cross: The Priestly Society of Saint Paul split from the Catholic Church because the Church began to incorporate secular music like that of Bach, gospel singers, and soul artists into the liturgy. The members of the PSSP see these musical genres as being works of the Devil, who uses their tempting rhythms and demonic baselines to seduce children into the evils of dance and sex.
* The Stations of the Canon: A fanfic revisits a series of iconic canon events.
* The Statler Brothers' 1972 country hit "Do You Remember These" has a quick line, "Veronica and Betty" toward the end of songs, part of a longer list of 1950s nostalgia.
* The Statler Brothers brought on by Jimmy Fortune replacing Lew DeWitt on tenor vocals and occasional songwriting duty. Among those four, the only one during DeWitt's tenure was the hardly-obscure "Do You Know You Are My Sunshine", while the only one of the three during Fortune's tenure that anyone seems to remember is "Elizabeth". "Flowers" averts this on the Hot 100, where it is their only top 40 hit at #4.
* The Statler Brothers' comic alter ego, Lester "Roadhog" Moran and The Cadillac Cowboys, which began as a sketch on one of their albums and later spun off into a full-length album of their own. A small-time country band with minimal musical proficiency and off-key vocals, who also has a tendency to forget songs right in the middle of playing them.
* The Statler Brothers, Don and Harold Reid, were actually brothers, and none of the other members were related.
* The Statler Brothers' "Do You Remember These" has one as the closer of this ode to nostalgia of the 1940s and 1950s:
* The Statler Brothers found great success with a number of songs reflecting on old times, sometimes fun — "Do You Remember These," a 1972 top 5 hit reflecting on popular culture from the late 1930s through the end of the 1950s; and "The Movies," a 1977 country hit that was a roll call of all the great movies from the earliest days to the then-present — and sometimes bittersweet, most notably "Class of '57."
* The Statler Brothers: Original tenor Lew DeWitt wore these when he began wearing glasses in the early 1970s.
* The Statler Brothers, with the male narrator describing a woman he's known all his life. In the opening lines, getting ready for her prom, she has "bought her first heels" and "combed those last pigtails from her hair."

* The statue atop the US Capitol dome, while not officially of Columbia, shares many of her characteristics.
* The Statue Of Liberty has become a popular site for final one-on-one duels. (What it symbolizes is often a factor.)
* The Statue of Liberty is reported to have been destroyed (beheaded) by terrorist groups. It is later suggested, and given the context of all you discover, very likely, that the government itself destroyed the Statue of Liberty to raise outrage against "terrorists."
* The Statue of Liberty was based on what the Colossus of Rhodes might have looked like as a woman, albeit much more modestly dressed. She is approximately the same height and wears a very similar crown to popular depictions of the Colossus.
* The statue of Nathan Bedford Forrest near I-65, which is widely seen as the best representation of the ugliness of white supremacy. The face is so
* The statue of Sir Robert Borden at the Parliament of Canada depicts him wearing an overcoat which, combined with his awesome moustache and its location at the edge of a hill overlooking Wellington Street, makes for one
* The statue of Vulcan on Red Mountain in Birmingham, Alabama, was built to symbolize the city's thriving steelmaking industry. From most viewpoints, Vulcan looks majestic with a big blacksmith's apron and a raised hand. However, for decades the neighborhoods behind Red Mountain enjoyed the sight of a giant iron butt on top of the mountain, since Vulcan is
* The statues that line the Field of Maidens came about when an army of female invaders was turned to stone by a spell by a powerful wizard-king. Petrified maidens are classed as "monster" rather than "plot hook" or "scenery" because after so long the ghosts of the victims have started possessing their own petrified corpses.
* The status move Curse works differently depending on whether or not the user is a Ghost-type, but operates on the necessary drawback principle either way. If the user is not a Ghost-type, it
* The status of Gallifrey in the series has bounded back and forth quite a bit as a result of the three showrunners of the new series having considerable disagreements regarding it. Upon its premiere in 2005,
* The status of Link and Hylians in general as elves or another species altogether has been
* The statute of limitations running out on a murder trial is what kicks off the events surrounding case 1-4. The trial ends up taking place on the last day before the statute of limitations runs out, and Phoenix has to take down an
* The Statute of Secrecy, making the masquerade formal, was instituted in 1692. Perhaps it was precipitated by
* The Steadfast Tin Soldier is often depicted (and sometimes explicitly translated) as a jack-in-the-box.
* The Steadfast Tin Soldier", the toys come alive when humans are asleep, and play their own games.
* The Steadfast Tin Soldier while attempting to kill the titular tin soldier. This is actually reversing the original story, where both the soldier and the ballerina died this way when a boy threw the former into the fire for no reason, while the latter was blown into said fire by a gust of wind.
* the steadily multiplying series of shambling and brain-dead Doofenshmirtz clones probably cleared that up real fast.
* The Stealer of Souls. When Elric finally catches up to him, Theleb K'aarna has lost his mind and is tittering to himself.
* The Steal Life spell causes the target to quickly age and die over a period of 1-3 minutes.
* The stealth mission can be made more like the rest of the game if you can get to the alarm button before any troopers can, since they need to physically hit the button to actually catch you - it's pretty hard for them to do so when you're standing right between them and it, saber in hand and active.
* The Stealth Suit Mk. II is the other kind of clingy. It has a pathological need for your approval.

* The Steam Engines of Oz, but Heflin face plants at the base of the cliff.
* The Steam Engines of Oz, is a young mechanic who works keeping the eponymous steam engines of Oz running.
* The Steam Engines of Oz, lions Magnus and Lucila are mates (and, according to their dialogue, he chose her because she was the only female willing to stand up to him) who hunt and fight and together. Fighting side-by-side (or back-to-back) they cut a swathe through the Tin Man's army.
* The Steam Engines of Oz operated by gunners positioned on the wings.
* The Steam Engines of Oz: Oscar ends up hanging by his fingers when he falls off the side of the munchkins' invisible bridge.
* The Steam Engines of Oz: seeking to destroy both magic and the munchkin race as the two factors he considers responsible for her death.
* The Steam Engines of Oz, the Tin Man decapitated his advisor Scarecrow for daring to question his plans to modernize Oz. The heroes find Scarecrow's head in the Emerald Palace and are shocked when it calmly starts conversing with them.
* The Steam Engines of Oz, Victoria has keys not only to her dungeon cell, but the other cells and the main doors of the dungeon. She lets herself out each morning to go work, and locks herself back up at night. It never occurs to her to escape because she does not consider herself a prisoner: instead believing that being kept in the dungeons is her part in the Tin Man's grand design.
* The Steam Engines of Oz, Victoria lives in the dungeons and spends her days maintaining the engines that keep Oz running. She is completely happy with this because she believes that the Tin Man is a kind and benevolent leader who is never wrong, so if her part in his grand design requires her to live in a dungeon and toil underground then so be it. She even thinks that part of the reason for her being kept in the dungeon is so that the dungeon guards will have employment.
* The Steampunk Bible, a troper is quoted about whether the Steampunk movement has jumped the shark:
* the Steam store page comments, all sourced to reviews that were actually quite positive and gave the game a perfect 10 rating.
* The Steam Video Company, where a soldier pulls the pin on a grenade then opens a can of Coke, throws the can and puts the grenade to his mouth.
* The "Steel-drivin' Man" John Henry, who faces off against a steam drill using nothing but a hammer.
* The Steelers have been able to advance further and further in the postseason each year they made it and 2017 had their best team and season yet. Most of their pieces in place, two dazzling rookie sensations in JuJu Smith-Schuster and T.J. Watt,
* The Steel Fist had Ludlow, the Nazi saboteur who mutilated Tim's hand and is arrested by issue's end.
* The Steel Fist: Ludlow only appears in the first issue, but he's responsible for the Steel Fist's existence, due to his mutilating the hand that ends up being empowered.
* The Steel Helmet, a 1951 war movie by Sam Fuller. Sergeant Zack has a bullethole in his helmet, which saved him from a North Korean execution squad. He regards the helmet as good luck and refuses to exchange it for another one.
* The Steel Helmet and his own commanding officer testified in his defense. The Pentagon was not amused but they let it slide.
* The Steel Helmet, by reminding the African-American soldier Thompson and the Japanese-American Tanaka of the very real bigotry and discrimination they face back home and how little their sacrifices on the frontlines will be rewarded. This was the first American fiction film to acknowledge the internment of Japanese-Americans (which "Red" brings up to taunt Tanaka) and it, and other factors, earned Fuller an invitation to the Pentagon. The Communist is still a bad guy, but Fuller allows him to be cool and make valid points and the main criticism towards Communism is its hypocrisy.
* The Steel Helmet ends with the surviving characters marching off with a new platoon, then has "THIS STORY HAS NO ENDING" appear on the screen.
* The Steel Inquisitors. A little more elite than most Elite Mooks; in the first

book only
* The "Steel" in Steely Dan's name would make one think he's a physically strong or brave character, yet he's a
* The Steel Remains explains zombies this way — a parasite attaches itself to a corpse and reanimates it.
* The Steel Remains to them, by way of an object lesson to anyone who tries to work against them.
* The Steel The Mist And The Blazing Sun. The U.S. develops a bug that can cure diabetes by producing insulin. Unfortunately it infects non-diabetics too, causing them to go into insulin shock.
* The Stellar Converter, which can only be mounted on ships of Titan class or larger
* The Stellarians have 'Lights' Chosen' armor, which is roughly comparable to the Paladin Armor used by the Equestrians.
* The Sten in his own way, even sometimes addressing the player character with an affectionate pet name if he likes them enough.
* The Stenza are a subversion — they promote themselves as this but are actually cruel, treacherous and hypocritical.
* The "step backwards" moving from the Space Shuttle to the Orion capsule is more of a purification. The Space Shuttle was, from its inception, an ungainly ship that was intended to do every possible orbital mission in one reusable package, a design choice that ended up making it a
* The Stepbrother Sitch, we're treated to an exchange about Kim Possible's doubts in doing certain things with Ron Stoppable. Like watching a silly reality series.
* The Stepfather and psychopath who's obsessed with creating the perfect family seen in the television sitcoms of the 50s and 60s.
* The Stepfather does fit his case very well; it just goes the extra step of having him do this habitually instead of it being a one-time incident.
* The Stepfather had a sequel where the titular stepfather escapes from a mental institution and assumes the identity of a random guy he saw in the obituary section of a newspaper.
* The Stepfather — Psychological horror series. 3 films and a remake since 1987.
* The Stepfather often whistles the tune of "Camptown Races" to himself, usually after he commits a murder.
* The Stepford Cuckoos (Weapon XIV) were part of a mass-produced super soldier experiment for creating a
* The Stepford Cuckoos were an attempt by the Weapon Plus Program and a sentient bacterial life form (
* The Stepford Husbands with the gender roles reversed-this time it's the women seeking to make their husbands "perfect".
* The Stepford Wives (2004) originally use the robotic duplicate ending but the ultimate verdict was that it was unsatisfactory and was thus changed to be a happy win despite the fact that it completely changes and tramples the theme and message of the book.
* The Stepford Wives also contains a robot wife whose breasts can be enlarged by remote control.
* The Stepford Wives are playing husband and wife, and no attempt is made to conceal the height difference.
* The Stepford Wives At the end, nothing is really perfect, but it is real.
* The Stepford Wives concerns a small community where every woman acts like the perfect wife. Only it turns out that the "wives" are actually robots who are programmed to act this way, and they are replacements for the real wives of Stepford who are murdered by their husbands.
* The Stepford Wives ends with Joanna being killed and replaced with a robotic lookalike.
* The Stepford Wives. Even Joanna's husband says that ever since they've met she's beaten him at everything. She's stronger, she's faster.
* The Stepford Wives, have an unhealthy obsession with being the perfect housewife

and making sure their homes and gardens are pristine and perfect.
* The Stepford Wives husband. It's indicated that while he loves Roger, the husband thinks he's just too over the top and puts him in the "program" to "tone him down" in public. Roger is not happy when he reverts to normal at the end.
* The Stepford Wives is doing this to their wives, replacing them with docile robot servants who won't threaten their status by doing such "uppity" things like getting jobs or showing interest in the women's movement.
* The Stepford Wives this during the antagonist's speech near the end:
* The Stepford Wives, Type 1 happens to Joanna after she loses her job for causing multiple murders with one of her shows and then trying to capitalize on it.
* The Stepford Wives (where technology allows the men of Stepford to create realistic robots). The idea that men raised in conservative families could replace their liberated feminist wives with domestic robots seemed far more plausible and horrific back then. The numerous couples with problems stay together rather than divorce because the common belief at the time was that it was better to stay in a loveless marriage than subject the children to an unpleasant divorce. That attitude had given way to more liberal views by the end of the 70s, so when the 2004 remake came along the premise was played for comedy rather than horror.
* The Stephanie Miller Show, a morning political and comedy show, is a skinny, white, middle-aged, brunette woman. Many a listener, however, call in and express surprise after seeing pictures of her on the show's website that she is not a blonde and/or fat. One caller even thought she was black.
* The Stephanie Miller Show describes itself as "a Mensa meeting with fart jokes!"
* The Stephen J Cannell Productions logo has writer/producer Cannell typing at his desk and pulling out a sheet of paper, which lands on a stack and forms the logo. This is the logo for all the shows Cannell produced. A compilation of the logos can be seen
* The Stepsister Scheme Danielle has a sword made of glass which contains her mother's soul.
* The Steps of Faith tasks players with stopping a dragon from storming the gates of Ishgard across a long bridge. If the dragon manages to make it to the end of the bridge and destroy the last ward, you are shown a cutscene of your character watching powerlessly as the dragon breaks through, leaving Ishgard to their mercy.
* The steps of many quests can be done out of "normal" order, such as solving a problem before finding the quest giver, but everything will work out fine and you'll just get some Easter Egg dialogue for your trouble.
* The stereotype doesn't carry as much of a negative connotation due to lack of a negative history.
* The stereotype, for whatever reason, doesn't translate over or read as negative—as mentioned on this page, for instance, Speedy's horrible diction and accent were absent in Spanish dubs, where he spoke perfect Spanish. This also happens a lot in cases of whitewashing, which tend to get a pretty cold reception in diaspora communities but barely raise an eyebrow in their home countries.
* The stereotype is carried so far as to be clear parody even to a casual viewer — for example,
* The stereotype is so unintentionally ridiculous that members of the stereotyped demographic can't help but think, "It's hilarious that this is what
* The stereotype of Native Americans using the phrase "many moons ago", or similar, comes from some of them using a lunar calendar rather than a solar or lunisolar one ("moon" meaning "actual lunar month" as opposed to the abstraction called a "month" on a lunisolar calendar). Other cultures primarily speak in terms of seasons; Navajos, for example, are religiously forbidden to discuss certain religious subjects or do certain tasks (like weaving) except in winter, "the Season when Thunder Sleeps". Some cultures may have eight or six seasons instead of four, depending on the local climate or what the calendar is designed around (hunter-gatherers, for instance, may find the breeding seasons of deer more important than the planting seasons for grains).
* The stereotype of vikings, local legends, and even in the national anthem of Norway), and made polearm versions called dane axes for war. The pole-axe is

present in the Norwegian coat of arms, and Telemark county weapon shows a battle axe.
* The stereotypical monster/alien sighting is the redneck who lives out in the middle of nowhere.
* "The stern girl whose few kind words were more precious than the Asgard's whole treasury"
* The Stern Ritter are the elite fighting force of the Vandenreich, and their effectiveness against the rank-and-file Shinigami is shown in spades in the first invasion, and prominently in the second invasion. As it stands, the only true defeats inflicted upon the Stern Ritter have been by Zaraki, who is one of the Special War Potentials, Yamamoto, and Renji, Rukia and Byakuya after their Royal Guard training. While Kyoraku and Ukitake have yet to get into a serious fight, the rest of the Captains - barring Mayuri - have either been steam-rolled or won
* the Sternritter Fleur de Lis under Discord with Clover at the same time the Humane Five are training their Fullbrings, it's only when both of them brought to their very limits fighting skeletal copies of themselves after eight floors of grueling battles with skeletal constructs with their spiritual power being suppressed and sapped all the while that their Zanpakutou respond to their determination to win by granting them access to even greater power than they had before to triumph at the last stage.
* The Stern Ritter "N" Robert Accutrone manifests his cross as a relatively ordinary looking pistol. This being Bleach, everything is but ordinary and the guy actually
* The Steve Allen Show: The kitten wears heavy black eyeglasses and declares "Schmock!" in the voice of Steve Allen.
* The Steve Harvey Network since about 2013, due to its constant marathons of the Harvey version of
* The Steve Harvey Show are Steve Hightower and Cedric Jackie Robinson. Also Merlin Santana as Romeo Santana.
* The Steve Harvey Show at a Bulls game but Lovita misses it entirely because she is in the bathroom and the screen is shown earlier than Ced would have liked. When Ced does manage to drag Lovita out of the bathroom, the proposal is gone and in its place is an ad for rhinoplasty, infuriating Lovita. Finally, he prepares a romantic dinner for Lovita and puts the ring in a piece of pie. Lovita refuses to eat the pie, saying she's full. Ced keeps asking her to have a bite of the pie. Lovita starts to eat it but then puts the pie down. Steve, having witnessed the whole exchange, gets mad and takes the ring out of the pie and shows it to Lovita explaining that Ced had been trying to propose to her all week. She then says yes.
* The Steve Harvey Show: Cedric gets a platinum card and immediately runs it up by buying unnecessary items like a leather bathrobe. When the end of the month arrives, he does not have the money to pay the bill in full. He agrees to a payment plan that will pretty much take him the rest of his life to pay off.
* The Steve Harvey Show for nearly seven years, he actually does well on his SAT's and by the series end, he gains admittance into a four-year university course.
* The Steve Harvey Show has Booker T. Washington High. It has two hallways, a music room (sometimes it actually had instruments), an office, another classroom, and a cafetorium. There was a staircase that led to a second floor of the school but that part of the school was never seen.
* The Steve Harvey Show has Bullethead entering (and winning!) the Miss Booker T. Pageant to spite Lydia and win a computer.
* The Steve Harvey Show, it became the next-to-last episode. However, it is shown as the final episode in syndication.
* The Steve Harvey Show mentions "Saving Ryan's Privates" and "Legs Wide Shut".
* The Steve Harvey Show: Regina hosts the event for her sorority. Steve initially isn't bid on at all but at the last minute a very attractive young woman bids $2000 for him. Ced (who really didn't want to participate at first) is involved in a bidding war between his girlfriend Lovita and another woman. Later in the episode, it is revealed that the young woman who bid on Steve was actually bidding on behalf of her boss, an older woman who is using Steve to make her husband jealous because

he's been ignoring her. In Ced's case, the other woman beats out Lovita. Ced is excited to go out with her but Lovita demands that she goes on the date too. When Nikki (the other woman) comes to the apartment for the date, she and Lovita become friends and leaves Ced out in the cold.
* The Steve Harvey Show, Steve finds out that Regina Grier, the fat girl he tormented in high school, is (1) no longer fat and (2) now his boss at the high school where he teaches.
* The Steve Harvey Show: Steve follows Regina to her new job in California, Ced and Lovita win the lottery just as Lovita goes into labor, and Romeo, Lydia, and Bullethead graduate from high school and are accepted at college.
* The Steve Harvey Show. Steve Hightower is a former disco singer who is now a high school music teacher.
* The Steve Harvey Show: This happens to Cedric when Regina decides to give him a back rub before a dance competition.
* The "Steven's Knife" meme, where the titular character, canonically a
* The Steve Wilkos Show have never seen an episode. Many don't realize that if you're not a "victim" then you'll probably get yelled at horribly and you won't be able to sit down on stage.
* The Steve Wilkos Show, where Wilkos seems to confirm Lando's claims and shames Robert about it.
* The Steve Wilkos Show will invariably include a mention of how said guest has disgraced the U.S. Marine Corps through his/her actions (see: Damian in the episode "Did My Boyfriend Download Child Porn?", who ultimately confessed to doing just that after feeding Wilkos a line of crap through his entire appearance).
* The Steward and Cinderella's family don't believe the Baker when he reports the Giantess despite a Giant having just been slain a little while ago.
* The Stewards of Gondor are (in theory) the deputies of the kings, and have their own cool stick — a white staff that is their symbol of authority.
* The Stick figure series Shock is an inversion of this trope. The first two are a two-part episode and the third one basically stands on its own.
* The Stick of Truth auto-revives a few turns after dying. She also dies if you fail any prompt when using her skills.
* The sticky, viscous liquid dripped down his back. The vicious thought came into his head "I'll gut those treacle bandits if I ever catch them!"
* the stigma of the word "cartoon" isn't going to get that epithet in casual circles.
* The Stig who guest-starred in a couple of the team's adventures on the Continent. Make what you will of the tabloid articles alleging that Jeremy Clarkson was cheating on his wife that started popping up not long afterwards...
* the still-living but mentally-ill Sena sees Nemu performing on TV and concludes that Nemu is impersonating her, leading Sena to try and kill her.
* The Stillman Sisters' identity theft spell, from The Power of Three Blondes, worked this way as well.
* The still-more upgraded T-90MS introduce an entirely new turret with integrated ammo bins in the bustle and radically improved protection (and digital FCS and new autoloader). The Army decided not to order it, as they're developing a radically new MBT, but was very pleased with the turret design and will probably use it to upgrade the existing inventory of T-90s and T-72s.
* The Stimpack upgrade for the Terran Marines allows them a short-term boost of speed and reflexes. Side effects include insomnia, weight loss, mania/hypomania, seizures, paranoiac hallucinations, internal hemorrhaging, and cerebral deterioration, represented by a loss of hit points in-game. Of course, in the expansion they give you medics, letting you use multiple stimpacks while countering the side effects, making a squad of marines with a few medics a very formidable force.
* The Sting a boxer gets into the ring with a professional, but as he plans to take a dive, it doesn't matter much. Until his partner figures the mark double crossed them, and Hooker has to win the bout! He does, to his own surprise, but learns later that his partner had paid off the professional to take the dive.

* The Sting: A team of con artists (Johnny Hooker, Luther Coleman, and Joe Erie) inadvertently swindle a numbers runner for crime boss Doyle Lonnegan. Lonnegan assigns hit men to find and kill each of them, and the hitmen appear and carry out attacks throughout the movie.
* The Sting at some point in Season 7. Also, whenever he takes off a pair of medical gloves, he always uses the elastic to ping them away. That last one is actually the way you're supposed to take off gloves to minimize exposure.
* The Sting. Detective Snyder arrests Hooker and takes him to meet with Special Agent Polk of the F.B.I. Polk tells Snyder to take off Hooker's handcuffs and Hooker rubs his wrists after he does.
* The Stinger, a fan commenter accuses Matt of putting subliminal messages in his video. Messages, including ones telling the viewer to subscribe, show up on the video for a fraction of a second.
* The Stinger and making it all but explicit that this plotline would be never be explored or resolved.
* The Stinger are trying to unify humanity under their rule is to get them ready to fight the Ebon Fleet. The failure of Crow’s time machine is also implied to have transported Sola into the present.
* The Stinger at the end of the episode, they're still playing, and Candace, having watched them all day, comes to the conclusion that this was an ordinary game and walks off. Three seconds after she leaves, Phineas announces to Ferb that their tennis ball invention had been charged enough and it activates.
* The Stinger, Bart has one, and he tells Homer that he's been holding it since the EPA put the giant dome over Springfield. Homer makes him stay, telling him, "A lot of people worked hard on this film, and all they ask for in return is for you to memorize their names!".
* The Stinger Bernard only returns to normal because Minion didn't empty Megamind's pockets before doing the laundry.
* The Stinger during the end credits of "The End of the Galaxy" has a decrepit space capsule from the planet Earth sitting on a destroyed planetoid, brimming with green energy similar to that of Lord Hater's and accented with the sound of a monkey screeching and evil laughter.
* The Stinger episode "My, How Ewe Have Changed" has a man state that he isn't an accountant, but he plays one on TV. We then see him pretending to be an accountant while playing atop a television set.
* The Stinger episode, "Scary Had a Little Lamb", the ghost of Ezekiel Fitchhorn comes to the Duncan house to return the favor to Amy for visiting his grave the night before. When he asks Amy to go on a date with him, she turns him down due to him being 90 years older than her and dead. She then sucks him up in her vacuum cleaner.
* The Stinger, even by MCU standards! The movie has five scenes during and after the credits.
* The Stinger features Andrea doing the facial variant when she gets her necklace caught in the photocopier at Alice's workplace and Dennis presses the Print button.
* The Stinger for "Mac Daddy" depicts all the times that Cheese says "I like cereal!" and "I like chocolate milk!" in the episode. It's played twice, the first time ending with Cheese saying "Do it again!", and the second time ending with Eduardo saying "I like potatoes." and Cheese saying "Yeah, I like potatoes."
* The Stinger for that same episode has General Specific find a Question Genie who offers him the answer to any three questions. General Specific wastes all three asking for confirmation that he'll answer any three questions.
* The Stinger for the episode "It's About Time!", Lawrence (the dad) keeps rewinding the end of the audio tour tape he got from the museum so he can hear the part that goes "Fossils! Dun, dun, dun!"
* The Stinger hanging out in a coffee shop. Well, everyone except Shego.
* The Stinger has Maddie trying out different outfits to London's "talking mirror".
* The Stinger: Has reached the point where many abridgers throw out two stingers instead of one.
* The Stinger has this trope listed twice - one bullet point right beneath the

other.
* The Stinger implies that Daisy, who Ruby meets once rather early on in the quest, will be the heroine of the next attempt to escape the Metal Glen.
* The Stinger implies that this trope has been in effect all along: one of the game's characters put the game on the market to trap people's spirits and bring them to the mansion, your avatar among them.
* The Stinger-inducing Overcharge energy drink to the rest of the world.
* The Stinger in the final level for the second time), actually reveals that the game's events are all part of a storybook Rosalina was reading to the Lumas. While Mario and Yoshi are both flying through space rescuing Peach and the Power Stars from Bowser.
* The Stinger in the God King's cloning facility reveal that the setting is science fiction and not fantasy.
* The Stinger. In the stinger a man claiming to be her boyfriend appears; the episode leaves it the audience to decide if it was Richard playing a joke on her, or if she accidentally talked him into existence.
* The Stinger is lightened by Pinkie Pie noisily slurping on her drink with a straw.
* The Stinger, Lillian Luthor finds this out the hard way when Lena turns out to really be Morgan Le Fay.
* The Stinger of an episode where Hawkeye, BJ, and Charles were on a promotion committee, they evaluated prospective promotees and gave their recommendations. Private Igor, who works in the mess tent chow line and was not promoted, tosses a scoopful of mashed potatoes on BJ. "Oh, I'm sorry. But what do you expect from a dumb private?"
* The stinger of episode 8 of the anime reveals that this happened to Hori, with regards to Kashima. When they first met, Hori assumed that Kashima was a boy, despite the obvious signs indicating otherwise, like that she wears a skirt with her uniform. It wasn't until he saw her head to use the
* The Stinger of volume and he just looks like caveman Jesus. A lot of people find it distracting and hard to take seriously.
* The Stinger on account of there being too many sorcerers in the world.
* The Stinger revealing that even Deadpool can't bring himself to do it. Played straighter.
* The Stinger reveals a group of men showering. One drops the soap, and bends to pick it up… and a huge shadow looms over him. The dropper cringes in terror; a few seconds later, he comes running from the bathroom with bubbles shooting from his rear end.
* The Stinger reveals that Rosalina was actually narrating the game's plot via a storybook she was reading to the Lumas. At the end of "The Perfect Run", she writes herself into her own book to give Mario/Luigi the final Power Star.
* The Stinger reveals that the mechanical slapping dummy is actually controlled by a dwarf who loves to slap people.
* The Stinger Season 3 opener "She's the Boss" sees Martin struggling to get a coherent picture on the television. Daphne solves the problem by picking up Eddie, who is wearing a protective plastic collar to stop him from scratching the cuts he picked up in a fight with another dog, and putting him on top of the set.
* The Stinger that Della is still alive, which the main characters wouldn't discover until the middle of the second season... at which point Donald Duck goes missing, unbeknownst to everyone other than the audience.
* The Stinger the events of the Stinger to better fit with the later movies.
* The Stinger the penguin is lounging in a hot spring, surrounded by beautiful ladies, and declares he was behind everything the whole time and it went just as planned.
* The Stinger to a full series recap episode near the end of the Deicide arc even lampshades how much has happened in only a few months.
* The Stinger to pick up on Coraline, Dipper, and Mabel's...dirtier thoughts and point out how dirty they are, thoroughly embarrassing the three of them.
* The Stinger to "The Ricklantis Mixup" mentions that Morty got to have sex with a

mermaid.
* The Stinger. Victor's Wooden Railway, Take-N-Play, and Trackmaster models that tie in with the same special depict him in his yellow livery, indicating that he was the yellow engine that Luke inadvertently knocked into the sea when they first came to Sodor.
* The Stinger was "For more information about the BBC website, just listen to BBC radio. We bang on about it constantly." — both a reversal of, and a reference to, continuity announcers always saying "For more information about BBC radio..."
* The Stinger was never to be followed up on as the franchise ended up being abruptly cut short as well.
* The Stinger, when Chef and Creek plummet into the maw of a hill-shaped monster (the same one that nearly ate Poppy earlier in the film).
* The Stinger where Control a.k.a. Malcom Hargrove demands to know whether a package he wanted was delivered to him. The computer screen then shows the Meta's helmet.
* The Stinger with all 120 Power Stars, then we actually get to see a cutscene where Rosalina is actually shown bidding Mario/Luigi farewell and flying off to another part of the galaxy, followed by a Luma climbing out of a damaged spaceship. Moments later, however, Mario/Luigi is actually now back on Rosalina's ship!
* The Sting features a piece called Solace, done both as a piano solo only and as well as an orchestral version. And yes, it's played during the rain.
* The Sting features a poker game in which the bad guy is cheating because he controls the dealer and thus which cards are dealt, but the good guy cheats by covertly switching his hand. The antagonist knows he's being had, but can't call it out because it would mean admitting he knew which cards his opponent "should have been dealt".
* The Sting, Fred and Charley) were very real; while the fictional Gondorff (and Hooker) got away with it, the real Gondorff brothers' victim went to the equally-real police, and the brothers were quickly arrested.
* The Sting, Hooker blows through his entire stake of a large con job in a single afternoon, which alerts the villain to his identity.
* The Sting: Hooker's main motivation in conning Lonnegan is revenge for the murder of his friend, Luther. Despite Gondorff's claim that revenge is for suckers, it appears that it's at least part of the motivation for many of the grifters. Revenge and the money, at least. It's acknowledged early by Gondorff and at the end by Hooker that it's not enough, but it's close.
* The Sting in order to earn Lonnegan's ire. Once Gondorff is dealt a hand of four Treys, he knows a stacked deck play is in effect. At the climax of the hand, Lonnegan plays four Nines ... and Gondorff lays down four Jacks. When his adjutant wonders why Lonnegan suffered the loss, Lonnegan growls at him: "What was I supposed to do? Call him for cheating better than me in front of the others?"
* The Sting, Johnny Hooker (Robert Redford) has many tics, including the way he holds a cup of coffee and the way he throws one shoulder back.
* The Sting occasionally uses an artsy wipe, such as a side-to-side wipe in which the transition follows a merry-go-round horse.
* The Sting off with marked money when the latter comes looking for a bribe. It's used against him later.
* The Sting", Professor Farnsworth assures Leela that nobody thinks she's going crazy, but he is thinking it loudly.
* The Stingray Shuffle drives erratically because he is high on marijuana. The ex-KGB agents following him mistake his driving for elite evasion techniques, and assume he must be former CIA or Mossad.
* The Sting: Robert Redford and Paul Newman team up to scam a racketeer. The inspiration for and referenced by many others on this list.
* The Sting) saves his life and he ends up spending the night with her. However, on the following morning, it turns out that she was herself a hired killer, the feared Loretta Salino, and that she intended to kill Hooker herself - his life being saved at the last moment by a hitman on the side of the Good Guys who kills her in the nick of time. What is understood of her motivation is that she saved Hooker from

the rival killer in order to claim the reward herself, and she killed the rival in punishment for intruding on her turf; that she regarded killing Hooker as a professional obligation, with no personal animosity involved; and that the plan to kill Hooker in no way precluded enjoying sex with him first.
* The Sting song "Brand New Day" has a series of euphemisms along these lines. Example: "I'm the plow and you're the land / You're the glove and I'm the hand / I'm the train and you're the station / I'm a flagpole to your nation."
* The Sting the FBI agents who assist Lieutenant Snyder in his pursuit of Robert Redford and convince him to help their investigation are revealed to be the final part of the sting.
* The Sting. The vaudeville comedian starts his routine but the main character is in the foreground talking over him so we don't here the first part. Once the main character leaves, the scene remains long enough, that we hear that punchline to the joke he just told.
* The stinking rich Saiki clan has a butler named Katou and a housekeeper/cook named Ohatsu.
* The Stinky Cheese Man and to really rub things in, her wicked stepmother and stepsisters change her name to Cinderumpelstiltskin.
* The Stinky Cheese Man has a fake entry for a story titled "The Boy Who Cried 'Cow Patty'."
* The Stinky Cheese Man. He argues with the Little Red Hen, he spoils the ending of "Little Red Running Shorts" (at which point the characters simply walk away, leaving blank pages where the story was supposed to happen), and he gets kidnapped by the Giant when he tries to tell "Jack and the Beanstalk".
* The Stinky Cheese Man, he tries to sneak away by moving the endpaper a few pages before the actual end of the book.
* The Stinky Cheese Man since none of the book's pages are even numbered.)
* The Stinky Cheese Man, the Giant's story is a mish-mash of lines cut out and pasted from other fairy tales.
* The Stinky Cheese Man (The Really Ugly Duckling and Other Crazy Tales) in Brazil. The Brazilian title's focus was on a different fairy tale in the book ("The Really Ugly Duckling").
* The Stixes' invasion of the Galaxian's home moon through a Trojan Horse ploy.
* The Stixes tried to invade the Earth, more specially Quebec, in the third album.
* The St Kilda Saints have won only one premiership (1966), and hold the records for longest losing streak and most wooden spoons (last-place finishes) in league history.
* The St. Louis Blues went to the Stanley Cup Finals in their first three seasons (largely due to the fact that from 1967-68 to 1969-70, the playoff format forced one of the Finals opponents to be one of the six 1967 expansion teams), only to be swept all three times (most famously in 1970, when Bobby Orr scored the game-winner in overtime). The Blues then had a consecutive playoff appearance streak of 25 seasons (1979-80 to 2003-04), but never made it back to the Finals in that time period, getting closest in 1985-86 (lost to the Calgary Flames in 7). Then the streak was broken in the post-lockout season of 2006, with the Blues having the league's worst result. Years of futility aside from a quick playoff run in 2009 (sweep by the Canucks' hands) later, the team was finally rebuilt into a contender in 2011 under coach Ken Hitchcock. A contender that couldn't beat the two strongest teams of the west, the Kings and Blackhawks (or in 2015, a surging Minnesota Wild team that prevented a Blackhawks rematch; and in 2016 the San Jose Sharks, as the Blues beat the 'Hawks in round 1, and then returned to the Conference Finals after 15 years). Hitchcock was fired following struggles in 2016-17 - and the Blues still fell in round 2, this time to the Nashville Predators. After Hitchcock's replacement Mike Yeo was axed in November 2018 in favor of assistant coach Craig Berube, the Blues were last in the NHL in early January... then rebounded to not only make the playoffs, but return to the Finals for the first time in 49 years (in some historic resonance, against those same Bruins from last time) and downright win their first title ever!
* The St. Louis Cardinals' path to the 2011 World Series definitely fits this

trope. They were 10 1/2 games back from the wild card spot and most people assumed they wouldn't make the playoffs. Then they starting winning. And winning. And winning some more. And the Atlanta Braves
* The stock footage launch sequences meant that small errors were repeated every episode, such as the "2" on the side of Thunderbird 2 being a different size during launch than at other times (because a different, smaller model was used for the take-off scene). After the sequences were filmed but before broadcast someone noticed that the Tracy brothers enter their craft in their "civvies", but then are seen wearing their International Rescue uniforms. So they added extra shots of the uniforms on hangers rising out of the floor, after they are sitting in their pilot seats. (Presumably they stand up to put their uniforms on, off-camera, while the swimming pool and palm trees move out of the way).
* The Stockholm Opera House got around this one quite neatly, by having the seats in the top stalls that hardly got any view of the stage re-labeled as "listener's seats", and had the price adjusted accordingly. As of writing, the worst seat in the house offers no view, but a great listening experience, at the price of half a movie ticket.
* The Stockholm Syndicate by Colin Forbes. "Telescope" is a vigilante anti-terrorist group operating in Europe, that finds itself going up against the titular syndicate.
* The stock market. Expectations of the future are one of the most powerful forces, as evidenced by how stocks consistently rise/fall after optimistic/dour speeches, reports and addresses. So if the market tanks, it will come back to life if everyone just believes in it.
* The stogie the Warden is smoking while collecting prisoners turns into a smoke bomb that sends the guards into a coughing fit while the Warden takes the prisoners out of the jail in a jeep.
* The stoic and controlled Angel has had a few episodes of this. He nearly smothered Wesley to death for betraying him and costing him his son, completely blew up one time on Buffy after she dealt him some very harsh words, and later with Connor after he locking him in a safe and letting him starve in the bottom of the ocean for 3 months. Season 2 and Season 5 in particular were nothing but a non-stop
* The Stoic at him over losing, before catching himself and wondering aloud why he's talking to a dog.
* The Stoic. Cue to everyone gasping loudly. Justified in that he never, ever swears — not even by accident — so him calling someone an S.O.B. is quite a shock for others.
* The Stoic) despite Ancient Belka being closer in line with Medieval Europe. Levi the Slasher even calls her "Bushido".
* The Stoic fills this role for series namesake Chiko in the early parts of the series, teaching her about the practical ins and outs of burglary and life on the edge of the law by drilling her when she least expects it.
* The Stoic, first seen during his reunion with the Straw Hats and seen several times afterward to the end of the Fishman Island arc. Another example of it is when he carefully thinks up a complicated plan to save his beloved Fishman Island and King Neptune, who are nearly taken over by Hody Jones. However, he wastes time on one last detail: what name the plan shall take.
* The Stoic. He doesn't care about anyone but himself and is shown to be more interested in his experiments than the well-being of others.
* The Stoic, he runs over to them screaming wordlessly in horror and grief. It's so at odds with his normal persona that it's actually quite effective.
* The Stoic, making Alexander think he is unscrupulous. Burr is actually quite emotional, but he also has terrible timing and a tendency to wait too long before making his move.
* The Stoic: Men shouldn't show emotion of any kind, not even positive ones.
* The Stoic, only that she thinks he's handsome and mysterious, yet she goes to insane lengths in her attempts to confess her feelings for him.
* The Stoic presented as just his battle face) and always speaks with ellipsis. Blue also makes several jokes about him being quiet.

* The Stoic. She didn't even know what ice cream was until Nagi showed her.
* The stoic, soft spoken, respectful, always serious "World Warrior"
* The Stoic: Someone who's seen it all and maintains a default calm and indifferent persona.
* The Stoic that her gaze alone accomplishes what Wolverine's famed "claw on either side of neck; dare me to pop the middle?" approach cannot.) Surprisingly, "computer brain" simply describes her brain works. Despite the functions of her mind often being described in computer terms, it, and the rest of her, are a hundred percent organic.
* The Stoic that looks like a very goofy, cartoonish version of a kaiju.
* The Stoic under most situations, but ends up flipping out over Wasabi's over-cautiousness when they are being chased by the villain:
* The Stoic. While it was a good act, it was just that, and he would occasionally break character.
* The STO is a fairly common move but commentators always use the acronym instead of the full name: "Space Tornado
* The Stolen Accordion is the default weapon of KoL's bard class, the Accordion Thief. The Accordion Thief also has singing as a basic attack.
* The Stolen Child are not evil, per se (similar to how they are portrayed in Yeats' poem), but they are wild and uncivilized creatures, given to theft, vandalism, all manner of mischief, and stealing human children.
* The Stolen Child; while they believe they are doing the child a favor, as it's implied that he's unhappy (although he might just be overwhelmed by the misery around him), they show no sign of telling his parents or family that he's alright.
* "The Stolen Earth": After his venture into the Time Vortex, Dalek Caan becomes the first "pure" Dalek to laugh.
* "The Stolen Earth". "Dalek Attack Formation Seven" seems to mean "Line up in front of the house and blow it up." Usually they just yell "EXTERMINATE!" and fire their lasers left and right.
* "The Stolen Earth": Davros and the Daleks attempt to destroy the entire universe across all possible realities.
* The Stolen Earth" gives us not one but several broken badasses: Sarah Jane, Jack and (to a much lesser extent) Martha and Rose. All four are them are tough, and ready to face anything... until they find out that the Daleks are invading, upon which every single one of these tough, experienced, ready-for-anything heroes starts to fall apart out of sheer, agonizing terror.
* "The Stolen Earth" half of the biological metacrisis and makes her half-Time Lord and making her smart enough to stop the Reality Bomb while unrestrained and with none of the villains paying attention to her.
* "The Stolen Earth": Harriet Jones, having had her location exposed to the Daleks while helping the Doctor's companions find him, is immediately faced by a squad as they crash into her house. Staring death in the face, she uses her last seconds to tell them who she is:
* "The Stolen Earth", his one functioning hand had been replaced with a mechanical one capable of shooting electricity from its fingertips.
* "The Stolen Earth", in which the Doctor and Donna have finally found the Earth and along with it, the Doctor's beloved former companion Rose, who has been lost on a parallel world for the last two seasons. The pair begin running towards each other as fast as they can, leading every Doctor/Rose shipper to believe they would finally share their first kiss and the Doctor would confess his feelings to Rose at last — at which point a Dalek appears around a corner, shoots the Doctor, spoils the reunion, and forces a regeneration, shocking fans who believed David Tennant would be continuing in the role for at least another year. Needless to say, it was a hell of a cliffhanger, and therefore, unlike every other episode to date of New Who, did not feature clips of the next week's episode, only the words TO - BE - CONTINUED. By the way, the Doctor got better.
* "The Stolen Earth" is broadcast over and over on the public airwaves.
* The Stolen Earth", it's clear he won't actually change, since news of an upcoming regeneration has never been successfully kept secret.

* "The Stolen Earth" It stands out even more as by now she knows the Doctor had companions before her. Seriously, Rose, THIS ISN'T THE TIME!
* "The Stolen Earth", Jack pulls Ianto and Gwen close to him and kisses each of their foreheads.
* "The Stolen Earth" machine, hiding their headquarters, the 27 planets they've stolen, and the large nebula they're hiding out in one second out of sync with the rest of the universe. This causes the Doctor some trouble when he's trying to reach Earth.
* "The Stolen Earth": Martha attempts to use a reverse-engineered teleporter despite the fact that the scientists have no idea how to program the thing correctly. Lucky for Martha, the tech has an empathic link and she is teleported to her mother's house instead of being scattered into atoms.
* "The Stolen Earth": Rose can only watch Harriet's video conference with the other companions since Wilf isn't allowed to have a webcam — his daughter says they're naughty.
* "The Stolen Earth", the Daleks attempt to dispose of Captain Jack's body in an incinerator. Of course, he's not actually dead at the time...
* "The Stolen Earth"). Though technically the TARDIS wasn't present for that last one.
* "The Stolen Earth" to the Medusa Cascade, where the 26 other stolen planets are clearly visible in the sky against the background of a greenish-yellow nebula.
* The Stolen Earth was supposed to have members belonging to races who'd previously tried to invade Earth but they were cut for budget reasons. It's unspecified if they were rare good members of villainous races or if it's a Slitheen scenario where the invaders were criminal members of benevolent species.
* "The Stolen Earth", we saw that Sarah Jane, Rose, Jack and Martha helped with the fight. But what about Ian, Barbara, Ben, Polly, Jo, the Brigadier, Tegan and Ace? All of them encountered the Daleks and were presumably still alive and on Earth at the time. Seems hard to believe they would have just been sitting around...
* The Stolen Earth, when the Doctor and Rose see one another across a street and start running... You know where this is going.
* The Stolen Earth where said girlfriend became half-converted into a Cyberman... Then again, this is Ianto we're talking about.
* The stolen Fire Nation uniforms that the northern Water Tribe was planning on using had pretty large shoulder spikes, but are are quickly dismissed by Sokka as archaic and no longer used.
* The Stolen Spring by Hans Scherfig, has a quite straight example, set in a pre-war Danish society. The boys are regularly bullied by the teachers, and they bully back on eachother and on other teachers. No wonder the whole story centers around the pupil who eventually ended up killing the most hated teacher of them all.
* The Stolen Throne describes the rebellion against the Orlesian occupation, although the final battle in which Loghain really proved himself as a general is not described (the future King Maric wasn't even present there, choosing instead to settle a personal score).
* the stomach spontaneously sprouting an arm and force-feeding the mouth.
* The Stomping Land focuses more on Rule of Cool than horror elements, but attempting to forage for resources in the forest at night is still an adrenaline-pumping experience.
* The Stoned Age follows a pair of stereotypical metalheads who are trying to get laid during a night in the late 1970s.
* The Stone Dance of the Chameleon: male main character Carnelian has romances with two different males during the course of the trilogy.
* The Stone Dance of the Chameleon prefaces all its chapters with excerpts from in-universe documents, most often the writings of the Wise.
* The Stone Dance of the Chameleon. The Masters place a tremendously high value on blood purity, so much so that their women are not allowed to leave their house, except when they get married off and are instead kept at their husband's house. As such, males often form very intense emotional and sexual relationships with each other.

* The Stone Dance of the Chameleon to a god they call "The Darkness Under The Trees". They appear to greatly fear him themselves and keep him imprisoned on the Island of Flies.
* The Stone Dance of the Chameleon trilogy, due to real life getting in the way. (His house burning down, for instance.) His British publisher picked up the book and reprinted the older two books, his American publisher did neither.
* The Stoned Guest, during which he laments that he can't do anything right.)
* The Stoned Guest, except then the entire cast inexplicably rises again to sing a final chorus. It even ends on the words, "Happy ending!"
* The Stoned Guest has the two main female characters briefly discussing their opera careers before getting back into character. Later they start singing ever-higher notes until one of them breaks off and says "I'm only a mezzo, you know."
* The Stoned Guest), they all spring back to life and sing about how it's a happy ending.
* The Stone Diaries: This novel is a fictional biography of protagonist Daisy Goodwill Flett. The book's dedication to this idea includes a family tree in the beginning, and, even more surprisingly, pictures of all the fictional characters in the middle of the book. In interviews, author Carol Shields explained that she used older pictures that she found in archives, and her own children and family for the younger pictures.
* The Stone Dogs: Orion spacecraft are created during an arms race between the Domination of the Draka and the Alliance for Democracy, and used by both sides in their explorations of the solar system and as warships. The drive itself features as an improvised weapon in the book, being used to keep other ships at a distance.
* The Stone Eater (a giant two-headed centipede monster) can be easily killed with a weapon moist in human spittle, a nod to the legend of Hidesato Tawaratota.
* The Stone Gods explores this on both a human level and a planetary level. Recurring themes of love and loss on the human side, environmental destruction on the planetary side.
* The Stoneheart Trilogy, Edie's stepfather falls to his doom when he tries to kill Edie and she retaliates by hitting him hard with a pebble, knocking him into a chasm.
* The Stoneheart Trilogy. Guess what happens. But it's okay, 'cause he was the bad guy.
* The Stone Killer (1973) a police officer sees a car thief opening a trunk with a huge bunch of keys, and detains him when he tries to flee.
* The Stone Killer superior makes it clear they'll both take the blame if it doesn't pan out.
* The Stone Masks were originally created by a member of a vampiric species known as the Pillar Men who sought complete immortality and immunity to both the sun and the Ripple. His fellow Pillar Men realized he would be a danger to the whole world and tried to stop him, but he and a handful of his disciples eradicated his whole species. The only thing keeping him from perfect immortality was the Super Aja, a gemstone that perfectly concentrates sunlight. In the climax of the story arc where he is the antagonist, he gets the Super Aja and becomes a perfectly evolved life form that cannot die.
* The Stone of Desire, a magical stone from Equestria which grants the user's every wish but fuses with their bodies and slowly corrupts them. Twilight assumes that Timmy has one, which is what leads the Rainbooms to getting close to him, in the hopes of getting rid of it before it drives him crazy.
* the Stone of Gender Transformation, that allows the user to change their gender.
* The Stone-Piercer Bow, the signature weapon of the Starlight Stones (an Equestrian special forces squad), is a magically built bow designed to work with the Stones'
* The Stone Prince in the middle of a battle, to the point where the man retires from combat to let his hormones settle before going after the woman again.
* The Stone Prince of a fire god, able to withdraw Its warmth from her son.
* The Stone Prince, the eponymous prince has been pretty much beaten by his mother into being unable to express his feelings (hence the title), and his only current

relationship (which is gay) happens to be one he fought a civil war to preserve when his mother disapproved. By the start of the novel, she thinks it's time for him to get married — to a member of the kingdom's most powerful noble family, which hints at rebellion if their candidate doesn't become his consort. Complicated further by the fact that the bride-to-be's brother is the prince's former lover, the noble family was split down the middle by the prince's rebellion, and the ruler has a nasty habit of slaughtering her enemies.
* the Stone Prince throws water on the wizard who is holding the witch Morwen hostage. The wizard melts; Morwen, who practices clean living, does not.
* The StonerMany of the stereotypes attributed to weed smokers can be traced back to the idea of the Hippie.
* The Stone Roses is widely considered their best. Their second album never quite managed to get the same kind of praise.
* The Stones Are Hatching" began, everyone had long since dismissed magic and mythology as mere superstition. With the hatchlings now rampaging around Britain and presumably, Europe, this is no longer the case.
* The stone-skinned Inara has a joke emote where she refers to humans as "soft skins" and is amused that they would use a balm to make themselves even softer.
* The Stones of Blood", as a sentence for her criminal past. Unusually, she wasn't turned into any sort of statue, but a featureless monolith.
* The Stones of Blood" has killer, blood-drinking rocks moving around and killing villagers.
* "The Stones of Blood" has the Megara, Justice Machines which had found their civilization guilty of a crime and executed everyone.
* The Stones of Blood" has this happen to Romana. Clearly a punishment for the Burberry hat and impractical shoes.
* "The Stones of Blood" hid as some of the stones in Stonehenge and were possibly the inspiration for ogres, Gog and Magog.
* The Stones of Blood is a case of Incriminating Evidence in the form of a set of portraits showing the villain over several centuries.
* The Stones of Blood more obvious had the daytime sequences been shot on film.
* The Stones of Blood that move by sliding about and glowing an ugly shade of yellow.
* The Stones sang songs about how hard, painful and nasty relationships could actually be, sung from the persona of womanizers, sleazebags and
* The Stone Tape (1972) the scientists speculate that the chill is caused by heat being drawn out of the air and converted to other forms of energy, to create the physical manifestation of the ghost.
* The Stone Tape accidentally 'erase' the scream. They give up their research, thinking they've blown their chance, and refuse to listen to the sole member of the team who insists the scream was 'recorded' on top of a more ancient evil, which is now free.
* The Stone Tape are said to be rats, but one character notes that there are still cans of spam left over from the war that would have been chewed open if that were the case.
* The Stone Tape only dates back to the 1890's, but it turns out the foundations are a lot older. Much, much older...
* The Stone Tape. The leader of the research team investigating the haunted house tells everyone not to use words like ghost or spook because the impulse is not to take them seriously.
* The Stone Tape, they try to study the phenomena in the hope of developing a new technology. It doesn't end well.
* The Stone Tape; this is why some people are more sensitive to paranormal phenomena than others.
* "The Stoney Glare Stare" has a bald and overweight supervillain named Thaddeus Blimp, who may have been inspired by
* The Stone Zealot, a giant stone statue of a Zealot, fires the exact same thing, though now called
* The Stooges are the Trope Makers when it comes to punk rock. While there may have

been other artists before who laid the groundwork for punk, they were among the first to put all the pieces together and perform what could reliably be considered punk rock.
* The Stooges being pelted with beer bottles thrown by the angry truckers he invited to the final Stooges show.
* The Stooges for a short while had no less than three members named James—James "Iggy Pop" Osterberg, James Williamson, and Jimmy Recca. They also had two members named Scott Asheton and Scott Thurston.
* The Stooges of what punk would come to be, to the point it is sometimes classified as "Proto-Punk")
* The Stooges' "Your Pretty Face Is Going to Hell" is a deconstruction.
* The stop-motion animated musical dream sequence with dancing hamburgers in
* The stop-motion music video for "English Summer Rain" was actually a fan creation produced by Grégorie Pinard; the band was so impressed by it that they decided to use it as its official promo video. It actually
* The stop sign that Barbrady sees is 멍청이 ("meongcheong-i"), Korean for idiot.
* The Storage Papers after killing spree shooter Peter Garrett, or if he was simply driven mad by his guilt over killing Garrett and his refusal to deal with his trauma.
* The Storage Papers disguised as a dog over a victim both parties had set their sights on.
* The Storage Papers featured a monster that mimicked the sounds of a baby crying to lure in unsuspecting good samaritans that it could eat.
* The Storage Papers who sometimes provides Jeremy with information. They're remarkably informative as far as this trope goes.
* The store security room turns out to be hidden behind a shelf and false wall in
* The store where the clerk asks for "more" (teeth, skin) from smokers in the "Truth" anti-smoking PSAs does not have the official Circus Liquor sign, but it is
* The stories occasionally feature Morpheus becoming involved with or perpetuating some of history's biggest legends. Throughout the Fables and Reflections trade paperback, he is the catalyst behind the City of Glass myth, as well as giving Joshua Norton the dream to become the Emperor of the United States on a bet with his siblings. He also made an arrangement with Shakespeare, giving him the stories and the immortality he wanted in return for two plays:
* The stories of many folk heroes often end up this way. Often, reading collections of such things will highlight how certain monsters met their demise, or how certain things came to be.
* The Stories of Sodor, where the police are not only competent, but the conflict of several episodes is solved by them.
* The Stories", Principal Brown fakes being pregnant as part of Gumball's scheme to give Molly an interesting story to tell.
* The stories which bring Ankh-Morpork closer to the Industrial Age (creation of newspapers in
* "The Stork Job". Spanish Prisoner scam with orphans → weapons smuggling.
* "The Stormbreaker Saga" involves Zoe and Torg going back to medieval times and stopping the demon K'Z'K (who they blasted into the past in an earlier arc) from conquering the world. How this works in terms of a
* The Stormcloak Rebels have a prominent bear motif. Their generals even wear bearskin cloaks, complete with a hood made out of the bear's head.
* The Stormcloaks are a militia of hot-blooded Nordic nationalists that are fairly racist and xenophobic towards non-human races (though there are some exceptions, even their leader is apathetic at best when it comes to non-Nords), and their capital of Windhelm is highly segregated and miserable. While as one of the two joinable factions in the Skyrim
* The Storm Dragons world. Most Elves and Dragons know a legend about a black dragon born during a storm that will cause a great deal of evil for the world. Both races attempt to kill the black dragon Ravana, but not only does he prove himself extremely hard to kill, but their attempts to do so drive him over the edge of

insanity when he realizes every living thing is his enemy, turning him into exactly the kind of vengeful and murderous creature that the prophecy spoke about.
* The Storm Empire is an alliance of Storm Kings from across the multiverse formed out of strength in numbers. They aren't an enemy of the Alliance because they have no interest in making enemies of other big fish in the multiverse, and simply want to focus on keeping their empire running. In addition, not all of them are evil.
* The Stormguard Citadel Dig site, introduced with the Archaeology skill.
* The Storm King could've taken any of his siblings under his wing, but he chose Grubber -who never thought he'd amount to anything- causing him to be forever grateful.
* The Stormlight Archive, abandoning the last of their number to be tortured in Damnation alone.
* The Stormlight Archive a city. Everyone else just mistakes it for oddly shaped rock formations.
* The Stormlight Archive, a Cryptic named Pattern manifests in the Physical Realm as a complex geometric pattern, implied to be based in quantum uncertainty.
* The Stormlight Archive act as a low-key version of this. Each rhythm represents an emotion or mood (Resolve, Amusement, Joy, etc). Parshendi automatically attune themselves to the rhythm that matches their mood at the moment. They can deliberately attune a rhythm that does not match their mood, but this takes concentration and is detectable. They seem to exist in some kind of gestalt awareness, and are sometimes used as a marker of time (i.e. a meeting might be at the third movement of Joy or the second movement of Regret).
* The Stormlight Archive actually grow armor upon entering warform, and keep it until they shift to another form.
* The Stormlight Archive: Adolin Kholin is generally considered one of the best duelists on the planet, to the point where his religious purpose in life is dueling. Of course in Alethi culture, competition and being the best is everything, so many others won't admit his prowess even while doing everything they can to avoid being caught in a dueling ring against him.
* The Stormlight Archive after abandoning their duties), and part of her madness is that whenever she sees a religious depiction of herself, she has to stop whatever she's doing and destroy it. One character who is trying to locate her takes advantage of this to lure her out of hiding, putting out a very nice painting of Shalash and setting some agents to keep an eye on it until Shalash shows up to destroy it.
* The Stormlight Archive - after all, it's his role as King's Wit to provoke the high and mighty, perhaps causing them to consider their actions and behavior.
* The Stormlight Archive afterwards when she admits to her protégée that the insult was uncalled-for and unfair to the mother.
* The Stormlight Archive (although there are ways to magically heal such wounds).
* The Stormlight Archive and chats a bit about his goals, which happen to include Dalinar's home planet as collateral damage.
* The Stormlight Archive, and Deep Ones can phase their bodies through rock but can't phase clothing or equipment.
* The Stormlight Archive and doesn't like this fact one bit, but per the rules, can't tell Lift anything about it. So of course he keeps on bemoaning the fact that Lift is going to be hitting people with him, and then tries to convince her that he doesn't mean anything by this, no siree, why would she even be asking? Luckily for him, Lift thinks he's kind of insane.
* The Stormlight Archive and has the cynical mindset to prove it, invokes this trope when grudgingly joining forces with the heroes.
* The Stormlight Archive), and it's still uncertain what the Ghostbloods want, except that they have agents all over the world and are more than willing to lie, cheat, steal, extort, and kill in service to their goals.
* The Stormlight Archive and millennia of combat experience from their repeated ressurrections), their limited powers still make them far more dangerous than regular singer soldiers.
* The Stormlight Archive and refused to return when the Desolation ended, realizing

that only one of the Ten had died, Talenel, who had had never been the one to give up and being a Desolation.
* The Stormlight Archive), and so on. The interesting thing is that the color breeds true according to how pure someone's bloodline is. Cross-breeding will result in hair with streaks of several colors. The son of an Alethi man and an Iriali might have golden blond hair with black streaks, for example, or vice versa. This also ironically means that the lowborn castes have purer hair that fits their nation's ideal of beauty; they have less opportunity to meet and marry foreigners.
* The Stormlight Archive, and the fact that Dalinar is the most logical suspect.
* The Stormlight Archive, and the Ghostbloods have the mysterious ability to know everything that goes on.
* The Stormlight Archive: A non-murderous variety. Adolin finds hunts against beasts positively boring, due to how the prey has little chance of countering the elaborate hunting methods humans can come up with. He much prefers one on one duels, where warriors can pit their wits against an opponent of equal intelligence and strength.
* The Stormlight Archive, a Parshendi can assume several different forms that grant various supernatural powers (for example, stormform grants the ability to throw lightning and summon an Everstorm). But, as just mentioned, you have to be possessed by a bit of the Cosmic Principle Of Hatred to access these forms.
* The Stormlight Archive, a preliminary betrothal is formed between him and fellow protagonist Shallan Davar, and they are fairly solidly in love before the book ends.
* The Stormlight Archive Ardents, the priestly caste of the Vorin religion, are allowed to ignore most of the usual Vorin rules for gender roles: Ardents can eat men's or women's food regardless of their gender, male ardents are allowed to be literate, etc.
* The Stormlight Archive are actually Parshendi possessed by Voidspren, tiny fragments of the Cosmic Essence Of Hatred. Depending on which kind of Voidspren did the possessing, Voidbringers can manifest a wide variety of supernatural powers.
* The Stormlight Archive are developed, which link two quills so that when they are both turned on, they will mirror each other no matter how far apart they are; combined with a standardized writing desk, and instantaneous long-distance communication is achieved. While it's used as essentially a telegraph, it actually functions using quantum entanglement, meaning that there is no upper range of the effect. Once the planet progresses more, they will be able to use it as a more traditional ansible.
* The Stormlight Archive are examples of this, being composed of a number of small cremlings called Hordelings, tiny bugs that can operate separately from the main entity, and even can be specifically bred to have things like extra eyes for the main consciousness to see things far away from itself. They are almost more or less immortal as individual hordlings are replaced, and killing an them means ensuring that almost the Hordelings are killed at once. Although people (understandably) find them very creepy they aren't villains or evil.
* The Stormlight Archive are legally siblings because Navani is the widow of Dalinar's brother, which makes it difficult to find someone to marry them.
* The Stormlight Archive, a scholar theorizes that this is at least partly due to the fact that the planet has a higher oxygen concentration than most worlds. While in modern times the people understand fire enough for it to be safe, in pre-history it was likely too dangerous to be used as a casual light source, leading to the ubiquity of the safer gemstones.
* The Stormlight Archive. Aside from the obvious evilness of this action, it turns out that this is what pushed the Parshendi into assuming Stormform and summoning the Everstorm. If not for Sadeas's actions, the Desolation would have been at the very least delayed and weakened somewhat.
* The Stormlight Archive, a squad made from former slaves and disgraced soldiers, because their captain Kaladin forged them into a force to be reckoned with. Renarin is eager to start from the bottom, but the others humor him at first. Eventually, he fully integrates into the squad.

* The Stormlight Archive authority in his warcamps, which she uses very judiciously. It's mentioned that he's proposed to her several times.
* The Stormlight Archive be an ironic twist on the wish, but just as often is totally unrelated. Wording your wish really well won't get you out of it.
* The Stormlight Archive because it dissolves their cups. And, apocryphally, their clients' teeth. The horneaters, by contrast, think very little of Alethi wines, even though some of them would be classed as distilled spirits on Earth.
* The Stormlight Archive be like a dance, with circling and testing and parrying. Justified because Shardblades are indestructible and impossibly lightweight. But even with Shardblades, dances like that are rare. Notably, only two of the ten Shardblade fighting styles teach parrying, and even they don't use it often.
* The Stormlight Archive books for expanding out of control, in his interviews.
* The Stormlight Archive: Both of Shallan's love interests, Adolin and Kaladin, are a head taller than her, though Kaladin has an inch or two on Adolin. The Alethi are noted to be pretty tall in general, which the Veden Shallan finds annoying.
* The Stormlight Archive boys are being conscripted. Or at least, that's the excuse. The truth is that a lighteyed noble wanted revenge against a darkeyed surgeon, and found a loophole in the conscription laws, so he got his cousin Highmarshal Amaram to recruit the least useful of the surgeon's sons.
* The Stormlight Archive. Brightlord Amaram is famed for his honor and impeccable record, which makes Adolin suspicious because his own father is also well known for honor, and yet has a stained reputation. Adolin also notes that he wouldn't dirty his own reputation to save someone's life, unlike Kaladin.
* The Stormlight Archive, but fake ones can't. Stormlight does fade over time, however, so dun spheres are theoretically as valuable as infused ones, but you might have to call in a moneychanger to make sure the gemstone is genuine. This causes some problems for the burgeoning Knights Radiant, who are subconsciously using Stormlight to fuel their abilities and don't understand why their spheres keep going dun.
* The Stormlight Archive, but he realizes that the armor has a visor slit, and if you hit at just the right angle you can get a spearhead through.
* The Stormlight Archive, but it made him successful. For example, the Shin have prohibitions on harming stone, which means that they can't mine or accept metal from a mined source. So Vstim buys junk that's been Soulcast into metal, and sells it to them at a reasonable price. His apprentice Rysn takes his lessons to heart, and when she finds all of the grain on her ship is wormy, rather than trying to scam someone into buying it, she sells them to a tribe that eats worms.
* The Stormlight Archive but without any skin showing. One of the oddities of Vorinism is that women are supposed to keep their left hands hidden at all times in a sleeve. This "safehand" is not supposed to be used for anything, so the more higher-class women become very good at only using their right hands. Peasant women just wear a glove.
* The Stormlight Archive can jump over the chasms that cover the Shattered Plains, while the humans can only cross them on bridges. Thus, the Parshendi have a huge mobility advantage in the Plains, which is why they retreated there after killing the human king.
* The Stormlight Archive can reincarnate it by sacrificing a singer. As such, Fused will often pursue risky or even downright suicidal tactics, since they cannot be permanently killed.
* The Stormlight Archive can survive just about any injury if they're holding enough of the titular Light.
* The Stormlight Archive can "talk" to these to convince them to change into something else, though it's not clear whether they are actually self-aware in the sense we would understand it or if it's just how the Soulcaster conceptualizes what they are doing.
* The Stormlight Archive capital with plenty of civilians, enterprising merchants have attempted to sell the meat at food stalls, with mixed success.
* The Stormlight Archive case. But as a Truthless, he is still bound to obey anyone who possesses his Oathstone.

* The Stormlight Archive connected to the Order of Elsecallers, look basically like this, though with an iridescent sheen like oil or ink.
* The Stormlight Archive Dalinar applies this strategy during a flashback in Oathbringer. An enemy archer hits him multiple times from roughly 400 yards away. Dalinar and his elites run him down, only for Dalinar to demand he makes another such shot to prove he can duplicate the feat. He then informs the archer that he is now one of his Elites: See Quotes page.
* The Stormlight Archive Dalinar Kholin and Navani Kholin. They are both in their fifties, he used to court her but she finally chose his brother Gavilar. The marriage resulted in two children but did not seem to be very happy. After her husband's death and Dalinar's near death, Navani finally decides to throw propriety to the winds and get together with the man she really loves. At first, he objects, because it's against the society's rules. He gets over it, though.
* The Stormlight Archive. Dalinar's own son, Adolin, is one of the best duelists in the world, and has even chosen it as his religious Calling. He spends much of the first book annoyed that the Codes of War his father follows forbids unnecessary duels.
* The Stormlight Archive, Desolations happen every few centuries, each of them nearly destroying mankind and knocking civilization back to the stone age. The current state - over four and a half thousand years without one - is a prelude to the worst Desolation in history.
* The Stormlight Archive: Downplayed with wielders of the Surge of Abrasion. They can "slick" things so that friction has no effect on it; slick their entire bodies, and they can skate at ridiculous speeds because they can ignore wind resistance entirely. However, ice skating doesn't exist on most of the planet, so this is a difficult skill for them to master. It's easier for them to slick everything but the soles of their feet, letting them run at high speeds.
* The Stormlight Archive: Dustbringers and Edgedancers can both manipulate the Surge of Abrasion, which controls all forms of friction. We have seen it used to let a heavily-armored knight run through waist-deep water as easily as dry land, let a girl slide around a palace on her butt as if she was greased, and to run very very fast by ignoring air resistance.
* The Stormlight Archive, each of which can bind a different Surge, and have a complex heirarchy among themselves determined by skill, force of personality, and the degree to which any given Fused retains its sanity. Sapient Voidspren occupy a variety of positions in this heirarchy depending on their power and level of intelligence, with some outranking Fused while others are roughly on the level of Regals. Humans are by and large slaves below even the common singers, though a rare few are elevated to higher ranks.
* The Stormlight Archive, each section of each book follows a theme, from ancient texts to letters to quotations from the dying, all in-universe sources.
* The Stormlight Archive eyes, with no indication that this is at all unusual.
* The Stormlight Archive fabrials that create food, allow for communication, provide heat, etc and the more mystic Surgebindings that some can perform.
* The Stormlight Archive features a magical version of this. Windrunner Radiants can redefine what direction "down" is for them (or anything else they want), allowing them to fly at upwards of 80 mph without any effort on their part.
* The Stormlight Archive features two related variants. First are the Oathgates, a set of ten fabrials that allow transit between the legendary city of Urithiru and the capitols of the ten Silver Kingdoms. Second, it is revealed that you can only transit out of Shadesmar through a "perpendicularity". When a Radiant sends only their mind into Shadesmar, a perpendicularity is created wherever their body happens to be, but if they transit fully, sending their body as well as their mind through, they can only get back out through a rare natural perpendicularity. They also form a portal network between worlds in the greater Cosmere setting.
* The Stormlight Archive, for no reason anyone's been able to figure out.
* The Stormlight Archive for trying to usurp Adolin's father, knowing that Sadeas left no proof and would be too highly ranked to convict normally. When the body is found, Adolin's father assigns him and his fiance Shallan to investigate. Adolin

reluctantly goes along, but they're all quickly distracted by the coming war.
* The Stormlight Archive from the Almighty, part of which states that he is dead. He doesn't denight the Almighty existed is not sure exactly where he lands on if there is or is not a true God, but if the Almighty was killed he was never truely God in the first place.
* The Stormlight Archive (gems can be used for Soulcasting, or magical transmutation). The entire Alethi court is stationed there after a war for vengance brought them there, but now they're most just seeking wealth by killing these beasts. While the other Highprinces are off fighting Parshmen and eachother to kill the Chasmfiends and take their Gemharts, Highprince Sebarial took one look at the chasmfiends and knew they were going to be here for the long haul. Even after the war that brought them there ends, the opportunity to keep hunting the Chasmfiends and literally make money is too valuable to pass up. He largely ignores hunting them, instead focusing on setting up a permanent economy in what is currently the de facto Alethi court and will inevitably become a permenant part of the kingdom. As he tells Shallan, no matter who harvests the gemhearts, they end spending it in his camps.
* The Stormlight Archive gets sent to the bridge crews. "I may have, uh, enhanced the soup".
* The Stormlight Archive. Giant dog-like stone monsters, created by a Voidspren possessing part of the ground and just pulling itself out of the surrounding rock.
* The Stormlight Archive group the Sons of Honor: they seek to foster chaos and destruction to induce the return of the Knights Radiant and the Heralds, in order for them to fix everything wrong with the world.
* The Stormlight Archive has Dalinar as the flashback character and Venli as the interlude character. Several more minor characters also get one off point of view chapters throughout the series.
* The Stormlight Archive has THREE shards, Odium, Honor and Cultivation. Getting into the full details of information about them is impossible without excessive spoilers. However Honor leads to both culture and magical focus on Oaths, Odium is to blame for constant violence and strife, and Cultivation seems to have by far the best ability of the Shards to predict the future, and a penchant for helping people improve themselves.
* The Stormlight Archive have four sexes, with almost any given individual belonging to two of them over the course of its life. The listeners have the standard two genders (masculine and feminine), but these are each further subdivided into fertile males and females and infertile malen and femalen. To make matters more confusing, the listeners are limited shapeshifters, able to assume any one of several forms to fill various social roles. One of these is the fertile and sex-obsessed mateform.
* The Stormlight Archive have gotten a little power-mad over the centuries, which tends to drown out the ones who actually are honorable.
* The Stormlight Archive have the ability to bind two objects together with a temporary but virtually unbreakable bond. Often used for comedy, especially when Kaladin is learning his powers and practices by gluing his squadmates to random walls.
* The Stormlight Archive, he earns more in his first few weeks than he did in the entire rest of his life combined. It says a lot about Kaladin's depression that he spends most of the book wondering how this new fortune will be taken from him.
* The Stormlight Archive Hoid, who nonchalantly tells her that everything's already come out in the interim. She's equal parts furious, relieved, and just plain perplexed.
* The Stormlight Archive. If they choose the latter, they will be released if they survive a week. They rarely survive more than two days, but criminals always take the deal, because the hope of survival is better than the certainty of execution.
* The Stormlight Archive. If you don't have Shards of your own, any attack against them is a suicide attack, a desperate move to do enough damage to the armor that eventually someone will be able to kill the Shardbearer within. The person who actually strikes the killing blow wins the Shards for himself.

* The Stormlight Archive In many ways, he is also a subversion of this trope, having great difficulty with forming meaningful relationships with women. Indeed, he is a serial womanizer with a colorful dating history.
* The Stormlight Archive. In order to avoid the same fate befalling the world, they abandoned their oaths and powers and refused to explain why (lest someone else follow in their wake), condemning them to being named traitors and villains by subsequent generations.
* The Stormlight Archive: In the first demonstration of a Lightweaver's true power, Shallan Davar transforms a band of deserters back into loyal soldiers. Some even die rescuing a civilian convoy from bandits.
* The Stormlight Archive: In the second book, Prince Adolin is almost killed in a five-on-one duel, but Captain Kaladin (who dislikes him but admires his father), jumps in to save his life. Immediately after they win the duel, Kaladin accuses a nobleman of a serious crime and is arrested. Adolin believes him, and plants himself in the cell next to him, refusing to leave until Kaladin is released.
* The Stormlight Archive is collecting these in an effort to patch his supposedly-omniscient Diagram, and in the second book it is revealed that they are caused by the influence of a massively powerful Voidspren called Moelach.
* The Stormlight Archive is set in a land where seasons change randomly every few weeks, with the only predictable weather being the Weeping, a period with a few weeks of constant rain that mark the end of one year and the beginning of the next.
* The Stormlight Archive. It functions as something between a master plan and holy scripture for his followers.
* The Stormlight Archive: It's repeatedly mentioned that the bulk of any army actually consists of the workers and support staff. In fact, noble officers are expected to bring their wives to war with them; the husbands fight on the battlefield, while the wives keep track of logistics back in camp. By the time the story starts, the armies of the ten Alethi princedoms have been camped at the edge of the Shattered Plains for six years, so they've turned from "armies with camp followers" to "ten small cities with their own armies."
* The Stormlight Archive Jasnah gets rid of a thug by Soulcasting him into a quartz statue. Also, the corpses of slain lighteyes are frequently Soulcasted into statues to preserve them.
* The Stormlight Archive: Kaladin ends up acting like this in regards to anyone he is in a position to help. For most of the books, this means his bridge crew.
* The Stormlight Archive: Kaladin Stormblessed is a downplayed example. He shares at least one important bit of background with his author—both of them had parents who wanted them to go into medicine, but they ended up doing something else.
* The Stormlight Archive: Kaladin was trained as a surgeon by his father before going to join the army and becoming an expert spearman.
* The Stormlight Archive, King Taravangian experiences days where he is either kind but stupid, or intelligent but amoral in varying levels each day. In order to judge whether or not it is safe for him to make policy decisions, he created a series of tests for himself on his most intelligent day which would inform his aides of how intelligent he was that day, and they would limit his powers accordingly. More than once, he has tried to cheat the system by deliberately failing certain questions, but on that most intelligent day, he included mechanisms to catch when he was doing so and shut his attempts down.
* The Stormlight Archive. Later on other applications of fabrials are discovered, such as creating elevators, refrigerators/heaters, and even wearable painkillers, which can be reversed to instantly paralyze someone with pain.
* The Stormlight Archive legal for a slighted lord to kill the Wit... if he is willing to revoke all his lands and titles.
* The Stormlight Archive, Lift fails to notice the Indicium — the only building in Yeddaw that sticks above the ground level — until it's pointed out to her. Keep in mind that she actually ran to the city from the hills, and even commented on how flat it was.
* The Stormlight Archive Lift lends her supernatural abilities to a gang of thieves

because, while they're off stealing boring old valuables, she gets to enjoy the challenge of eating well-guarded aristocrats' dinners.
* The Stormlight Archive, lighteyes who commit the same crimes are just executed outright.
* The Stormlight Archive maintain their pacifism simply and efficiently: Anyone in their culture who takes up arms is instantly enslaved for the rest of their life, traded around as a mercenary fighter. These "Truthless" are rare and tend to get killed quickly.
* The Stormlight Archive: More like Grinning Mad. Dalinar calls Szeth's combination of horrified, haunted eyes and gleeful grin to be the most evil thing he's ever seen.
* The Stormlight Archive, Nale is very careful to follow the laws of whatever country he's in. He doesn't necessarily follow the spirit of these laws, nor show respect to the people who wrote them, but he does follow what's written down. His true purpose seems to be to kill people with Surgebinding abilities, but he'll only do so if he can get a legal writ of execution for some crime they committed. When someone thinks to pardon his current quarry, he has no choice but to leave her alone. It's also implied that this is true of every Skybreaker (the Radiant Order Nale founded). Many of them choose to follow the law above all else for their Third Ideal, though they can choose to follow something else (many swear to follow Nale himself, for example).
* The Stormlight Archive needs to advance his plans. If not for Sadeas's actions, the Desolation would have been at the very least delayed and weakened somewhat.
* The Stormlight Archive. No wonder Lift doesn't think he's even human.
* The Stormlight Archive of suspects. Basically everyone except for his wife had a motive. However, the readers know the whole time that it was Adolin, Dalinar's son, who killed him. Sadeas had explained how he was going to continue undermining Dalinar at every turn, but they were alone, so Adolin snapped and killed him. Once Dalinar discovers the truth, he's as vexed by the inconvenient timing as he is by the whole "murder" thing.
* The Stormlight Archive of the Cognitive Realm has "mandras", colossal flatworm-like flying creatures with multiple sets of legs and manta-like wings. Although their body shape could never fly normally, as spren, they're spiritual beings who aren't quite bound by normal physics. They're also quite useful for pulling ships.
* The Stormlight Archive: One of the more uncomfortable truths the heroes are forced to confront is that, without the Oathpact to imprison the Fused spirits on Braize, the only way anyone can think of to stop them from simply taking new bodies every time the Everstorm rolls by is to wipe out the entire race of singers in order to leave them no new bodies to inhabit.
* The Stormlight Archive, one of the protagonists, Dalinar Kholin, sought out a being that grants a boon and a curse that it feels is appropriate. For instance, one person who sought it out is mentioned as having gotten enough food to feed his family through hard times, but at the cost of seeing everything upside down. In Dalinar's case, he cannot remember anything about his wife other than the fact that she existed, and can't even hear her name when others speak it. Given that he sought the being out after her death, it really isn't clear (and isn't stated) whether this was his boon, his curse, or both.
* The Stormlight Archive: One of the reasons Adolin's relationships keep failing is because he has a shameless wandering eye.
* The Stormlight Archive Pattern, Shallan's Cryptic, considers anything spoken that's not literal truth (exaggeration, euphemisms and figures of speech, humor, sarcasm, etc) to be "a lie," and is fascinated by how many different kinds of lies humans have come up with.
* The Stormlight Archive: Peasant characters who perform particularly impressive feats gain titles like this, since they don't have surnames normally. One of the main characters, Kaladin Stormblessed, is the only one we see.
* The Stormlight Archive perceive emotions as a series of rhythms to which they can attune their thoughts and speech. They naturally attune the rhythm that matches their emotion at the moment, but can deliberately attune a different rhythm

instead.
* The Stormlight Archive phone system. It also can apparently block the magical elements of a Shardblade, which can otherwise cut any inorganic material (and kill anything organic). However Shardblades are still swords, so it will take more than aluminum foil to block one. The Fused also specifically refer to aluminum as Ralkahest, and aluminum panels were used to prevent the Fused from infiltrating the tower-city of Urithiru.
* The Stormlight Archive: Played with but ultimately subverted. The location of the city of Urithiru was lost long ago by the peoples of Roshar, but maps existing at the time of the Knights Radiant depicted it as being located immediately next to that mapmaker's nation's capital city. Jasnah and Shallan theorize that Urithiru was a city which moved from place to place, but ultimately it's revealed to exist in the mountains and be accessible to these capitals through portals.
* The Stormlight Archive, plus various social manipulations like fake accents and effectively lying to get things done through relatively subtle means. She still blushes when confronted, though.
* The Stormlight Archive possible to force a Shardbearer to give up his Blade without killing him. It's just the Alethi see ownership of Shards as a sacred right, and refuse to take them except in duels.
* The Stormlight Archive" rather than "the grinders will arrive soon").
* The Stormlight Archive releases the stress caused by his father's abuse by pulling the legs off small animals.
* The Stormlight Archive, repeatedly expresses annoyance at what he finds to be a thoroughly depressing landscape.
* The Stormlight Archive reveals that most Lightweavers possess this power.
* The Stormlight Archive: Roshar has three moons; the largest one, Nomon, is bluish white; middle moon Mishim is green; and Salas is the smallest and purple.
* The Stormlight Archive: Ryshadim, Parshendi. Interestingly, the parshmen (mindless Parshendi, essentially) are not capitalized.
* The Stormlight Archive Sadeas is one as well. And Dalinar's dead brother Gavilar was a warrior king, considered one of the best duelists in the world.
* The Stormlight Archive. Sebarial might be rich and too lazy to indulge in politics, but he saw a market and took it.
* The Stormlight Archive: Several animals native to Roshar play the role of real-world animals. Chulls are beasts of burden like oxen, axehounds are, well, hounds, songlings are similar to singing birds and cremlings are very much like crabs.
* The Stormlight Archive: Shallan gives a speech to a group of deserters that inspires them and reminds them of the men they could have been, causing them to go from planning to kill her to fighting for her.
* The Stormlight Archive: Shallan is quite petite, and constantly annoyed at having to jog to keep up with "storming Alethi and their long legs." With Adolin, the problem is exacerbated when he rides his giant ryshadium.
* The Stormlight Archive, Shallan mentions she tried avoiding Adolin's exes, but quickly had to give it up as impossible.
* The Stormlight Archive: Shallan uses a variant to justify her stranger requests.
* The Stormlight Archive, she admits that she feels like she has two brains; A rational brain that can focus on important topics, and a childlike brain that constantly jumps to the nearest thing she notices. She regrets that her impulsiveness usually wins out.
* The Stormlight Archive, shearing through the weapons and armor of the people futilely trying to slow him down, leaving a swath of corpses with burnt-out eye sockets in his wake.
* The Stormlight Archive; she didn't speak for months afterwards, and spent years hiding inside herself, refusing to confront anything.
* The Stormlight Archive. Shin "warriors" are treated like slaves, with Shin culture greatly favoring farmers and craftsmen and elevating them to the rulership positions of society. Soldiers are slaves that are conditioned to view themselves as having little value and to obey whoever possesses them.
* The Stormlight Archive, since seasons are random and only last a couple weeks at

a time. Each year is five hundred days, with the end of the year marked with "the Weeping", two weeks of constant light rainfall and no highstorms except for one right in the middle — though every other year is a Light Year, with no highstorm in the middle of it. Together, each pair of years creates the thousand day cycle of storms which influences everything. This does mean that the characters are older than their stated ages. However, Rosharan days are also shorter than Earth days, so in the end a single Rosharan year is only ten percent longer than an Earth one.
* The Stormlight Archive. Since Shardblades don't cut living flesh, instead severing the soul and burning out all the nerves below the "cut" (or all the nerves in the body if you hit the head or spine), there is no blood from the use of the things. Though in some cases people have to cut through a pile of corpses to get them out of the way, which does result in some blood leaking out.
* The Stormlight Archive solidly contrast each other in this regard. The physically stronger Parshendi are much more powerful and maneuverable than the human Alethi soldiers, who have to rely on regimented and tight formations and drilled coordination in the field. The Alethi tend to win through using long-term strategies, superior logistics, and disciplined soldiers to gradually wear down the Parshendi through a multi-year war of attrition. At the same time, the refusal of the Alethi high princes to work together means there's little strategic plan to trap and destroy the Parshendi armies.
* The Stormlight Archive. Somewhat deconstructed in that Kaladin is quite depressed about how he keeps surviving while other around him get killed, and thinks he might be literally cursed for a while.
* The Stormlight Archive so the Shin seem bizarrely wide-eyed to them.
* The Stormlight Archive. Speaking to him as a person rather than a king reveals that he's very insecure about ruling a recently established kingdom (it was founded by his father within his lifetime and he only became king after his fathers assassination), and his actions are the result of poor judgement and an inability to determine which of his advisors have his or the kingdom's best interests in mind. Even several people who dislike him acknowledge that he's really not a bad guy, he's just a terrible king, but with how much power he has his intentions are largely secondary to the results.
* The Stormlight Archive (specifically, he spends most of the book flying back and forth across the continent), but the focus character of book five.
* The Stormlight Archive. Specifically, "strength before weakness" is a pithy way of saying that those with power have an obligation to use it for the benefit of those without.
* The Stormlight Archive style of Ironstance to deliver a brutal beatdown to remind his fellows that they are in the middle of a war.
* The Stormlight Archive suffer from this. Kaladin takes something like a book and a half to really get a handle on things.
* The Stormlight Archive Szeth, he fully admits that he's a monster, but that he's "the monster who will save this world".
* The Stormlight Archive: Szeth, like most Shin, has a shaved head. He is also a very powerful, dangerous assassin, despite being a pacifist like the rest of his people.
* The Stormlight Archive: Teft and Lopen end up acting as Kaladin's Secret Keepers after Kaladin first discovers his magical abilities (though Teft actually knew about them before Kaladin even did). Later the rest of Bridge 4 gets let in on it, though it was kind of necessary seeing as Kaladin demonstrated said abilities fairly spectacularly. Also Shallan and Jasnah act as mutual Secret Keepers of their shared innate soulcasting powers, and Dalinar's sons and Navani keep the secret of Dalinar's visions.
* The Stormlight Archive that a sensible army will almost always try to kill the Shardbearer first both because he's easily more dangerous than a thousand regular troops and because if you take a Shardbearer down, you can capture his Shards and turn them against the enemy. It helps that Shards obviously have to be in battle to be any use, so the Shardbearer will always be where you can send more troops at

him.
* The Stormlight Archive that give their wielders access to the lost magic of Surgebinding. When Szeth (one of the trained wielders) is declared Truthless and sent out into the world, he proceeds to become the most feared killer on Roshar, single-handedly fighting through armies and royal guards to assassinate dozens of kings and nobles.
* The Stormlight Archive that more closely resembles ocean life. Shinovar is the one exception, being sheltered enough from the storms that it more or less resembles Earth with things like horses, grass and chickens. They've exported a number of these animals to the rest of the continent, but since the rest of the continent doesn't have any birds at all, any bird they encounter is just called a chicken. In one chapter, Shallan encounters a trained parrot, and wonders how the multicolored chicken with only a small bit of shell (the beak) could survive, and why it's owner has it sitting on his shoulder, since chickens are for eating.
* The Stormlight Archive that theory, confirming that Eshonai is definitely dead and not coming back.
* The Stormlight Archive: The Alethi are tall in general, but Kaladin is tall even by their standards. Among the bridge squad he leads, he is the tallest, except for the seven-foot Horneater named Rock. Even then, Rock only has a couple inches on him.
* The Stormlight Archive, the entire war camp is shocked and starts treating him with borderline religious reverence, which the equally shocked lighteyes try and fail to squash.
* The Stormlight Archive: The Nahel bond between human and spren (essentially a sapient idea) is a slightly odd example of this, since spren are incorporeal. The bond grants the human Surgebinding powers, and allows the spren to retain its sentience in the Physical Realm (spren are native to the Cognitive Realm). If the bond is broken, the human loses access to Surgebinding, while the spren becomes mindless.
* The Stormlight Archive: The Parshendi and Alethi are a strange contrast. The Parshendi fight in loose order, operating in pairs supporting one another during battles, while the Alethi fight in tight ranks of regimented spearmen. However on a larger scale the Parshendi are united, sharing common goals for the war overall, while the Alehti highpriences are divided and each seeking was to gain as much personal glory.
* The Stormlight Archive: The planet that the series takes place on is primarily inhabited by crustaceans and other shell-covered animals to survive the harsh and constant storms. The most common crop is tallew — a powdery, unpleasant-tasting grain that has to be grown in large polyp-like plants. The Horneaters, a people living on tall mountains, also eat crabs and other carapace-covered animals without shelling them, which is impossible for other peoples on the planet because they lack the extremely strong throat-teeth of Horneaters.
* The Stormlight Archive the stone rather than away. This is because they are literally transmuting the air into stone, which obviously needs a lot of air.
* The Stormlight Archive the storms carry to fuel the transformation to the next stage of their cycle. In the second book, Shallan points out that since the Alethi have been slaughtering pupating chasmfiends on a massive scale for the past six years, they're dealing huge damage to the ecology of the region, and it's not sustainable.
* The Stormlight Archive, the Surge of Illumination covers all the senses, though novices have trouble with anything beyond sight.
* The Stormlight Archive, the truly reprehensible villains are defined by this behavior.
* The Stormlight Archive, the world of Roshar is entirely dominated by the massive Highstorms, violent hurricanes which every few days scour the land to bare rock. In the face of this, Roshar's vegetation has become more analogous to coral or sea anenomes than terrestrial vegetation, extending leaves or tendrils when the weather is fair and then retracting them when danger threatens. For another example, the main food grain of Roshar is something called lavis, which, instead of growing a

head of grain the way terrestrial grain does, possesses a head-sized shell of stone-like substance within which the grains grow, suspended in a sand-like medium.
* The Stormlight Archive, they become terrifyingly deadly. A soft style focused on grapples and throws can be absurdly lethal when coupled with the ability to change which direction gravity is pulling someone. At one point Szeth flows through an entire room of opponents, lightly touching them and sending them smashing into the ceiling far above.
* The Stormlight Archive, they do not have the same behavioral checks as normal Surgebinders. If a Windrunner stops protecting people, he loses his powers. If someone wielding the Windrunner Honorblade assassinates hundreds of people, the only thing that will hurt is his own conscience.
* The Stormlight Archive, they save each others lives, and Shallan admits that she has fun teasing him. Ultimately, while Kaladin is a good friend, Shallan goes ahead and marries Adolin because of his kindness, and because sees the real her behind her multiple personalities.
* The Stormlight Archive, this is Wit's entire job. One can tell he greatly enjoys it, and more or less every single noble deserves it.
* The Stormlight Archive, though Lift will sometimes use it to grow vines she can climb.
* The Stormlight Archive (though there are some hints for the observant in the books).
* The Stormlight Archive, though the total lack of character in the meat- and grain-like substances make people avoid it when they can. Kaladin is outright incredulous when a recipe manages to make Soulcast meat tasty.
* The Stormlight Archive, threatening to wipe out everyone on the battlefield.
* The Stormlight Archive through a combination of lighter gravity, higher oxygen content, and magic.
* The Stormlight Archive to cover up any cultural misteps he might make.
* The Stormlight Archive to jump from a building and fall head-first without any lasting consequences. The armor is powered by Stormlight, losing most of its properties if the gems fueling it run out. In those instances it's more of a hindrance than anything, as moving in the heavy armor without the strength it grants is incredibly difficult.
* The Stormlight Archive too smart. Fortunately, this precaution was put in place before he came up with that plan to make everyone below a certain level of intelligence kill themselves. He does note that the inverse relationship between intelligence and emotion isn't how it works for most people, it's part of his condition.
* The Stormlight Archive to the ceiling to put them out of the fight for a minute.
* The Stormlight Archive to transmute materials, such as turning rocks into grain or air into stone.
* The Stormlight Archive: Urithiru is a legendary hundred-story city carved into the side of a mountain, meant to permanently house thousands of the Knights Radiant. It's described as each floor having massive balconies with self-sufficient gardens growing from them. It's worth noting that most of Urithiru's support mechanisms no longer function by the time characters rediscover it, and they are having little success figuring out how to get it working again.
* The Stormlight Archive, usually as a result of a Shardbearer getting swamped by shear weight of numbers.
* The Stormlight Archive Vedens are an even more straight example, since they look entirely human with only their red hair being an indicator of their descent from the Horneaters. Herdazians are also descendants of human and Parsh intermarriage, though in their case it manifests with them having hardened, carapace-like fingernails.
* The Stormlight Archive), we have Eshu, who speaks of things he does not understand in front of those who do.
* The Stormlight Archive, when a Fused spirit kills a singer and takes their body, the singer's form shifts to something unique to the Fused.
* The Stormlight Archive. When he joins Bridge Four, he gets even more.

* The Stormlight Archive When Lift initially claims to be a friend of the Prime Aqasix, the local bureaucrats are understandably skeptical, and try to throw her out. When confirmation comes and they are ordered to obey her, she immediately makes them start calling her "Your Pancakefulness".
* The Stormlight Archive, when Navani tells Dalinar that she really tried to hate his (now deceased) wife, but couldn't because she was too nice.
* The Stormlight Archive, where the map indicates that the continent the story takes place on is in the southern hemisphere.
* The Stormlight Archive, which are instrumental in breaking through walls and fortified positions.
* The Stormlight Archive, which leads to an incident where he shows Dalinar a vision so surprising that Dalinar curses, and the Stormfather answers.
* The Stormlight Archive", which leave the continent bare of soil and marked by large, drift-like sedimentary deposits. The lee sides of those deposits are the only places suitable for agriculture; some are large enough to protect entire cities. Inverted by the country of Shinovar, which is considered quite weird by most Rosharans for being sheltered enough to have soil and free-growing plant life.
* The Stormlight Archive, while only two of the ten Orders of Knights Radiant had power over literal light, all use the titular Stormlight as the fuel for their powers. The aforementioned two orders, Lightweavers and Truthwatchers, can use light to craft illusions.
* The Stormlight Archive who have formed a bond with, oddly enough, Musicspren which makes them larger, stronger and massively more intelligent, to the point that several individuals believe they may be sapient.
* The Stormlight Archive who preach this message, even claiming that valorous warriors who die in battle will join the fight to retake Heaven in the afterlife. Part of it is the basic problem of nobles not understanding what it's like down in the trenches, but there's also the fact that the Alethi are stricken with the "Thrill," a bloodlust that drives them to fight and contest, especially in real battle. It lets them ignore the horrors of war, even when they're right in front of their faces.
* "The Storm": Masami's crush on Alan is funnier when you realize that they
* The Storm of Magic book brought with it two Mythic Artefacts clearly designed by people with more mystical power than sense: the Sword of Last Resort, which will make you stronger for one challenge and then kill you by draining your life energy before teleporting to someone else on the field, and the Black Book of Ibn Naggazar, which eats up to 3d6 models from its bearer's unit each time he casts a spell and will take the bearer too if there aren't enough victims or he fails to cast a spell from it in each of your magic phases.
* The Storm of Souls was also accused of this, but that was more forgivable since it was the culmination of everything that had come before.
* The Stormrunners features Ssuara, a soldier of a Martian race 3.5 billion years in our past. Although basically reptilian, she has large and very human-looking breasts (and incidentally, she's always naked). It seems this is a deliberate piece of cosmetic genetic modification — the Martians had time viewers which they used to view 21st century human culture and presumably pornography.
* The Stormrunners when the Martians and their human guests are under attack. Short straw gets to be the first line of defense. The humans are excluded because they're "tourists".
* The Storm Titan, the one that invented the most chaotic magic in the Spiral, from
* The Stormtroopers are actually the Elite Mooks of the Empire; the Imperial Army (which the Corps are not a part of) is actually the mook component, though the movies would have you believe otherwise.
* The stormtroopers are so memetically bad at hitting their targets that they became the
* The story adheres more to actual physics when, asked if they can send a reply, Artemis nonchalantly quips, "Certainly. Just give me six months, some specialized equipment and

* The story also deconstructs the trope: without adults to take care of them, many children end up dying from starvation, accidents, disease, or wild animals.
* The story also expands a scene from TBBT, where Leonard fires up a hologram of the world to delight Penny, and speculates it might all just be a gigantic hologram being monitored by beings standing outside our Universe, maybe a long-term experiment. Which is nearer to the truth than Leonard could imagine.
* The story also focuses on what it means to be human, because the protagonist Akira Fudo is given the power of a devil to save humanity. His best friend Ryo is cynical about humanity's downfall into decay, but ironically notes that even as a devil Akira has a righteous human heart.
* The story also makes a big deal about how much more powerful Laura and Fie are compare the rest but in gameplay, (barring overpowered skills like Rean's Arc Slash) they aren't too different from any of the other physical-based characters.
* The story also makes a clear distinction between the concepts of magical power and magical complexity. While any unicorn, regardless of study or skill, can cast simplistic spells (such as the standard telekinesis), and can cast very
* The story "An Average Day" features an America that has become dominated by corporations. Lower and middle class employees/citizens are forced to take drugs that keep them obedient and compliant, and those who show resistance to the drugs' effects face a variety of cruel fates, from conscription to exile to liquidation.
* The story assumes a "logical" plan is one where every step makes the goal visibly closer, and accepting a short-term disadvantage for a long-term advantage is not "logical". There's nothing inherently illogical in accepting a short-term set-back if it makes the long-term success more likely. (This is in fact studied in algorithmics: a step that visibly takes you closer to the goal may eventually run you into a dead end if you don't consider alternatives.).
* The story "Becka the Beast" (NSFW) is about Gia Cameron, a karate black-belt who falls in love with gay school bully Becka Jackson. It's quickly revealed that Becka is the victim of
* The story begins as a typical Japanese high school drama. ...For all of ten minutes, until the protagonists get a video clip of a horrific train crash that leaves a mess of bloody corpses behind, including their own. A little later, Dubhe shows up in the midst of some terrified civilians and self-destructs, leaving a smoking crater where they used to be. It's at this point that the protagonists, and the player, realize this is really an apocalypse story.
* ; the story begins when Harry, the night before his first train trip to Hogwarts, receives a note from his future self telling to get to know Ginny Weasley. Over the course of the fic, Dumbledore speculates that Harry and Ginny had a soul bond in the future due to the depth of their feelings for each other, with Harry's future self sending the note back in time by invoking a ritual known as 'Fate's Debt' to get more time with Ginny after some future tragedy; Dumbledore speculates that the future Harry didn't realise that the ritual would basically send at least the potential for the bond back through time as well as the note. As a result, where a normal soul bond takes years to go through the relevant three stages as the souls become acquainted, due to the side-effects of the ritual Harry and Ginny jump straight to the second stage after they meet at the station, where they are capable of communicating telepathically across great distances, and are legally considered to be married despite only being eleven and ten (although nobody knows about the marriage as they would need to read an obscure book of records in the Ministry, and Dumbledore can make arrangements to delay it being checked).
* The story begins with a Cybertronian becoming dissatisfied with the status quo, forming a rebellion that breaks out into full-blown war, three centuries after the end of the last one. Several characters make note that it's another war, with the supercomputer The Oracle quoting the Battlestar Galactica example.
* The story begins with Ji Ning, a teenager on Earth, dying and going to the Land of the Dead. There, he is told that his memories of his previous life will be removed Grandma Meng’s Elixer of Forgetfulness and he will be reborn into a new body on a new world.
* The story begins with Kaede and Shuichi trying to convince the class that they

were the killer. Shuichi is voted off by a margin of one and executed for Kaede's crime. It isn't until the fourth chapter that Kaede proves Shuichi's innocence to the class with the existence of a copycat crime.
* The story begins with Shuurei telling her students the story of their country's founding, ending it by saying that according to legend, the eight immortal sages who helped the first emperor found Saiunkoku are still alive in secret among the people. This is absolutely true, and Shuurei goes on to become personally (albeit unwittingly) acquainted with several of them.
* The story begins with this being Starfire’s ultimate desire, which is the reason she starts a modeling career. Robin shares her dream, which is why he decides to retire from hero work and proposes to her.
* The story behind the airship is a long and complicated one full of
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length. At the end of the chapter, she unfolds her skirt, braids up her hair, and puts her glasses back on for her normal look (though she's quite good-looking like that too).
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length), but just as he's about to find him, the man takes off his lab coat at his wife's urging.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length, even in works where it's clearly not present at all. As soon as there are two male characters, they will ship them regardless any blatant evidence of the opposite.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length form).
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length) has it, but to Poemu it just looks like a normal Shonen manga. Note that in the actual manga Izubuchi and Sakuradaimon are straight and have shown no hints otherwise.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length: In Chapter 25, Poemu's sister Ririku and Tougo's sister Kikuka secretly tail their older siblings to find out if they're dating.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length: Izubuchi carries anyone who needs to get to the infirmary and can't walk like this, which has made several girls, especially Akina, fall head over heels for him.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length: Kohinata and Sakuradaimon live 50 meters apart from each other, only discovering this when he walks her home.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length magazine.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length, since he only realized he liked her earlier that day.
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length to the committee, charging them with preventing anything "impure" from happening (like *gasp* couples holding hands).
* The Story Between a Dumb Prefect and a High School Girl with an Inappropriate Skirt Length" Yamato her name, she fumbles and comes up with "Yamada Hanako".
* The Storybook Land boat ride at Disneyland begins by entering Monstro the whale from
* The Storybrooke Sheriff's Department has got a surveillance camera recording everything inside the room (its recordings are even viewed in season 3 finale to investigate upon
* The story "Cannibals Anonymous" is about Aylee overcoming her addiction to eating humans. After she's "cured", she goes

* The story centers around the unconditional love between Mother and Child, and family as a whole. The Final Battle has
* "The story continues where it all began..." and "Men cry not for themselves but for their comrades." —
* The story does feature something refered to in universe as Zombies that is closer to traditional zombies. When a Reaper dies, their Servants body stays behind, losing it's soul and most of it's intelligence. These Zombies will attempt to kill humans to steal a soul to replace the now missing soul (which is not actually possible). They still maintin most of their previous strength, making them very dangerous to regular people although they can't harm Reapers.
* The story ends in an inversion, as the roleplay itself freezes in the exact instant when Edgardo is about to punch Xer0, the
* The story ends when the Russians overreact to Reagan's "We begin bombing in five minutes" joke.
* The story ends with Batman flying off into the city while the game leaves you back at the island. The Batman who is off fighting Two-Face in Gotham probably knows the move
* The story ends with Spliced, having finally served out her full sentence, asking the council members to fulfill their promise and make her mortal again so she can die permanently... only to learn that they don’t know how.
* The story ends with the quasi-apotheosis of the narrator's soul among the dogs that have just devoured his former congregation.
* The story ends with Valerie leaving Uncle's Rare Finds to catch up with her mother in Toronto and sort out her mixed feelings about everything that's happened, promising to return (which she does at the beginning of the sequel).
* The story even has an example where the predator is the hero and the prey are the villains: the monkeys that kidnap Mowgli are the antagonists,
* The story eventually elaborates on The Grand Design: a massive spell that guarantees sealed evils will
* The story exists in several variant forms. In some versions, Kelly wanted to use
* The story expands in Season Two with the assassination of EarthGov President Santiago, whose death is staged to looked like a random ship explosion. This paves the way for
* The story follows another Roman legion which has been sent to find out what happened to the lost legion and (if possible) recover its Eagle Standards. This one tends to appear more often in
* The story follows the lost legion itself and / or its descendants (assuming it leaves any behind). While also somewhat common in
* The story for every game in the series was only written when development for that title began, which was problematic in regards to the Future saga where the first entry,
* The Story Girl accidentally poisons herself (she lives), the children's doctor bans them from doing it.
* The Story Girl counts, being the emotional core of her little group of friends, and constantly telling enchanting stories.
* The story goes of a rabbi who was called upon to say something at a funeral for a man he didn't much like. He said, "What can I say about this man? He was like King David, he was like Moses our Rabbi, he was like the Holy One, Blessed be He!" Later on, he explained his praises: "David died when he was seventy, he died when he was seventy. Moses stuttered, he stuttered. 'God is not a man'—and frankly, neither was he."
* The story goes that after one too many assassination attempts against him ostensibly ordered by Moscow,
* The story goes that Disney was in financial trouble at the time most of these overlapping films (shown in the video and mentioned above) were made, so they needed to do things cheaper and still make memorable movies.
* The story goes that John Henry "Doc" Holliday once literally brought a knife to a gunfight — and used it successfully. It wasn't the one he's
* The story goes that one Yakuza boss ordered an end to the practice in his

organization to improve their image, only to
* The story goes that the early 20th Century folk musician Huddie Ledbetter, aka Leadbelly, secured his release after serving 7 years of a maximum 35 year bid for murder by writing and performing a song for the Governor, then again after serving four years for attempted murder, having recorded songs for folklorists John and Alan Lomax. Although his musicianship probably helped, he was also a model prisoner and in both cases had served close to the minimum of each sentence.
* The story "Groucho-con" has what is possibly the most epic one in fiction, in that the one who's murdering the Groucho Marx impersonators at a convention the moment they fail his test and tell him a bad joke is
* The story had been published in 1985, with an existing Soviet Union. When re-released in 1991, such references were
* The story had originally been planned with a five-season arc (though the Shadow war would have, even in the original plan, been wrapped up during Season 4). Then, at the beginning of writing Season 4, the creators were told that they were not going to get a fifth season, so they set about compressing the original plotline so they could wrap almost everything up by the end of Season 4 (with the exception of the Centauri Prime arc, which would've been resolved in the canon novels). Then they discovered they were getting a fifth season after all on a different network, but by that time it was too late to rewrite. As a result,
* The story happens just a few years after the Forulkan War, which is often referenced but never explicitly shown. Almost all characters have in some way been influenced by it, be it through participating or losing a good chunk of their families to it, and the entire population of Kurald Galain has been decimated; some noble houses are almost gone. All that is shown for certain is that the Tiste won.
* The story has an intentionally heroic example when we get to see what happens when a giant from
* The story has an unofficial rule that people who still think they can fight solo in AC 198 must suffer, and some otherwise capable pilots (or suits, including the Gundam Epyon) get into trouble because they're blindsided by the wingman of their current target.
* The story has been retold numerous times, both by word of mouth and in published form, and has acquired a large number of variations because of it. Versions differ on whether the child lives or dies, and the specific manner in which his rescue is delayed varies as well (though it is always due to multiple repetitions of the very long name). The various names attributed to the unfortunate kid include Nikki Nikki Tembo No So Rembo Oo Ma Moochi Gamma Gamma Goochi, Sticky Sticky Stumbo Nos E Rumbo E Pro Pennyo Hara Bara Brisko Nicky Prom Po Nish No Menyo Dumbricko, and Ikky Bikky Stumbo Nozo Rumbo Addy Baddy Basco Tana Rama Tasco, among others. There are even non-Chinese versions, which in retrospect show their roots a bit, such as "Eddie Coochie Catchie Cama Toka Nera Toka Noka Sama Kama Wacky Brown".
* The story has quite a few instances where the handsome Sangwoo is down to his skivvies,
* The story "He Walked Among Us" in EC Comics' 'Weird Science #13' shows an astronaut marooned on a backward planet where he uses in medical kit to heal the sick, feeds the hungry with his instant rations, and publicly questions the status quo. When his colleagues eventually find the planet,
* The story "High Beams" has a young girl driving home when she notices a large truck following her. She tries to shake it, but it won't go away; occasionally, the truck driver turns on his high-beam headlights for no apparent reason. When the girl gets home and her parents call the police, the truck driver—a huge, bearded man—emerges from his vehicle with a gun and refuses to move from the driveway. The cops show up to arrest him...
* "The story I got told was some pavement artist sold it to a Texan tourist. Told 'im it was a genuine Jackson Pollock".
* The story includes a second set of precursors in the ancient predecessor of Athens (in another location in Greece which no longer exists), which embodied all of the traits of Plato's ideal state. After the war between the two ended in victory for Athens, it was also destroyed in the same calamity as Atlantis. Oddly

enough, no one ever seems to believe that this culture was real, even though it gets much more focus in the story and the claims about it are much more modest.
* The story in Tone Loc's "Funky Cold Medina" involves the rapper trying to use the eponymous love potion to find a girlfriend, but it works only too well. The first girl he dates as a result of it is a man in drag, and the second comes on
* The story is about a teenager who is in love with someone her society, and especially her family, rejects. She loses her voice and literally cannot speak to Eric ("the love that dares not speak its name") until the end of the film. On top of Ariel's love for Eric, there's coding in her isolation towards others. Her
* The story is actually ridiculously sad. Linda and the Morning Birds, by law in South Africa at the time, couldn't receive royalties for their music, and received a "petty cash voucher" instead. When Pete Seeger brought the song to America, he didn't check to ensure that Linda received the royalties he was due, and again, Linda was left with a tiny cash sum. He eventually died impoverished and it was 15 years before a stone was placed on his grave. In 2000, it was estimated that, had he received what he was due, he and his heirs would have earned upwards of $15 million just from its use in
* The story is also very much open to a queer reading. Andersen was bisexual and is thought to have partly based the tale on his own unrequited love for another man. The themes of forbidden love, of being literally unable to speak those feelings, and of being rejected in favor of a more "conventional" partner are easy to read in that light. So is the theme of parental opposition that the Disney version emphasizes. The fact that the mermaid literally wants to change her body also brings to mind the experiences of transgender people, especially in the Disney film, where Ariel doesn't just want to become human for love but distinctly wants to
* The story is further complicated by Klytaimnestra (Agamemnon's queen) hooking up with Aigisthos, murderer of Agamemnon's father Atreus, who wanted to get revenge on Agamemnon for driving his father Thyestes (Atreus' brother) into exile from Mycene. (Because of an oracle, Thyestes had fathered Aigisthos by raping his own daughter Pelopia, in order to avenge his other children whom Atreus had killed). Aigisthos and Klytaemnestra together killed Agamemnon and Klytaemnestra for good measure also killed Agamemnon's prisoner/concubine Cassandra of Troy.
* The story is more complicated than that. In the case of Europe/Japan, World War II destroyed much of their infrastructure, including complex rail systems dating to the 19th century. In rebuilding, these countries were more able to build trackage and equipment that enabled much faster rail
* , the story is no longer included in later collections, and Gardner claimed that "the tale is now as dated as a story about Martians or about the twilight zone of Mercury".
* The story is set in a secret grade school for the children of superheroes. Most of which also have superpowers and are training to be superheroes, except for the main character....
* The story is set on "The Stillness", a continent rife with earthquakes, supervolcanoes, tsunamis, and other seismic phenomena that periodically turn the place into a
* The story is split between two characters that are in different time periods. Near the end they do eventfully end up in the same time period but as Kain is immortal it makes you wonder why he even cares about waiting for 100 years to meet up.
* The story is told of an ambassador to an Arabic country, whose wife stood in the bazaar one day shouting "God bless you" (or so
* The Story Keepers even calls her "the barefoot streetwise member of the group".
* The story kicks off with male lead Shouta's discovery that his classmate Ichigo wears diapers. The reason for this is because Ichigo has issues with bladder control when she gets nervous. She's especially prone to problems if it's a male like Shouta making her nervous. As a result Ichigo wetting herself while interacting with him is a
* The story lampshades how much Tywin Lannister enjoys being "the power behind the

throne", with Syrio Forel reminding Arya that Lord Tywin basically ruled Westeros for Aerys Targaryen and
* The storyline effects of Shulk's visions vary a bit, because of their nature. Shulk sees what will happen if things continue
* The storyline for the Zendikar block is much the same. In antiquity, the fearsome
* The storyline "Grillo Parlante" introduces Daisychain, a string of mice which, as the name suggests, are linked in series, and the hedgies, hedgehog-like plant-creatures that can assemble into a giant hedgie as a defence mechanism.
* The storyline of the Billy Joel music video for his song "You're Only Human (Second Wind)".
* The storyline on one show comes to an end, only to be continued in a new show with a different name.
* The storylines have exploded in length. According to the once-kept stats page, Elliot and Grace are still far and above in the most strips and central characters in the most storylines, but you'd never know because you've spent the last four or so years in Tedd's living room and the girl's bathroom at school. And of course, out of those last four years, we've gotten
* The storyline stuff in each of the gamebooks and sourcebooks should be considered
* The storyline to do with Fortress Accident, a computer game developer trying to make a groundbreaking fantasy RPG, somewhat analogises the struggles the team had trying to put the game together, complete with the game having a staggeringly overambitious remit despite being based out of a tiny office in a (
* The story makes a huge deal about how important and battle-changing combat links are but they hardly even make a difference during actual gameplay battles, especially during early and mid game.
* The story "Men of Good Fortune" began and ended with snippets of conversation in pubs, 600 years apart, with similarities including the punchline "... up her dress, and she says, 'Hunting for rabbits again,
* The story "Midnight" took on the oft-used idea that the Doctor could show up with no history, no credentials, and a lot of knowledge which he refuses to explain, be detained for two minutes, and then be treated like an authority because there's a crisis going on. In this one story, these traits actually make everyone else
* The story "Mimeographic", featuring the supervillain Mimeo. He's not an amoral street thug. He's an amoral street thug with unstoppable superpowers.
* The story mode features time travel, so this comes into play. Kano threatens the life of Past Johnny Cage in a hostage situation, threatening that if Cage dies in the past, his future daughter, Cassie Cage - whose mother, Sonya Blade, is currently holding a gun to Past Kano's head - will die too. Sonya proceeds to
* The story normally takes place in such a way that any episode can happen any day, but Season 3's premiere ended like this, with Princess Celestia nodding at Princess Luna, who magically summons a book with
* The Story of Adele H. She always had schizophrenia, but her obsession with Lieutenant Pinson causes her to act out in increasingly troubling ways, all of which she justifies due to what she assumes to be their grand love affair. He wants nothing to do with her, especially when she begins directly and indirectly sabotaging his personal life due to her unhinged antics.
* "The story of a love that can never be, and a hate that always was." and "One man can make a difference that lasts forever" —
* , the story of an American girl and a Japanese boy in the 1940s who are in telepathic contact with each other in their sleep, and eventually fall in love.
* The Story of Anima, a group of merciless mercenaries that are way too in love with their work.
* The Story of Anima, are capable of harnessing their own Anima into unique super powers.
* The story of Apollo and Hyacinthus may have been this originally. While generally referred to as simply a prince of Sparta, scholars believe Hyacinthus

originally was a minor nature deity of an early pagan religion that was replaced by the Greek religion.
* The Story of a Seagull and the Cat Who Taught Her To Fly, by Luis Sepúlveda.
* The story of Batman's first Post-Crisis meeting with Superman has a scene like this. He corners one of Magpie's goons in an alley and tries to scare him into revealing his boss' hideout. The thug refuses, knowing that
* The Story of Bensurdatu", the hero is trapped at the bottom of the river — to perish.
* The Story of Cinderella: One episode features Cinderella and her stepsisters being hired to clean the royal palace. The palace has a large china doll that has been in the royal family for generations. While cleaning the hallway, the stepsisters get into a fight and knock the doll off its pedestal, breaking it into pieces. As a result, the stepsisters are told that they won't be forgiven for it and are subsequently fired.
* The Story of Cinderella. The top of Cinderella's head only goes up to Charles' mouth.
* The story of Dido and Aeneas kinda counts. (Kinda, because Dido was not exactly a villainess, but nevertheless got flak for keeping Aeneas from founding Rome. Especially under Mussolini, but that's another story.)
* The Story of Eastern Wonderland, had a proper True Final Boss with Mima's second form (really third, but you don't fight the first one), which you can only see if you don't continue until then. Interestingly, you can continue at that form, but you get the bad ending.
* The story of Emerich Juettner (see Real Life folder for the details)
* The "Story of Evil" song series has an event where Princess Riliane is so furious that King Kyle rejected her proposal of marriage because he was in love with a green-haired woman in Elphegort that she decided to
* The Story of Ferdinand, cork does grow on trees, but as bark that needs to be peeled off and shaped.
* The Story of Ferdinand that's based on it show bullfighting from the bulls' point of view.
* The story of "Hearing" was written by guest star Robert Daniels, who played Lee Tovan in that episode.
* The story of Hesione and Heracles is very similar to that of Perseus and Andromeda. However, Deianeira, another woman in Heracles'
* The Story of Holly and Ivy - a Christmas-themed doll named Holly wishes for a little girl to play with her while a lonely orphan called Ivy wishes for a doll to play with.
* The story of how the line was invented is also a bit of this trope. Short version: The writers came up with a lot of punchlines. They finally pinned one of the writers for his opinion and his response was "I'm thinking it over!" The longer version is
* The story of Iphigenia being rescued at the last minute by Artemis was invented out of whole cloth by Odysseus to try to comfort her mother.
* The story of Joseph and his brothers. Jacob had twelve sons by four wives; his favorite, Joseph, was the elder of his two sons by his deceased favorite wife, Rachel. Not only did Jacob give Joseph a special gift (traditionally a colorful coat, though translations vary), Joseph had prophetic dreams that the others would one day bow to him. In anger, the ten older brothers sold Joseph into slavery and
* The story of King Midas has the eponymous king's greed cause the death of his wife and daughter, who got
* The story of King Minos: When asked to save Crete from a disaster, Poseidon agreed and sent a pure white bull to Minos and asked him to publicly sacrifice it after the disaster as a sign of respect. Instead, Minos swapped it out with a decently good but not divinely-granted bull, and as revenge Poseidon made his love Pasiphae fall in love with the white bull, thus begetting the Minotaur.
* The Story of King Odd" is about an elf queen who is forced by the circumstances to pose as a man in the human world.

* The Story of Louis Pasteur is about Pasteur trying to convince the French medical establishment that germs cause disease, and that doctors need to wash their hands and sterilize their instruments. No one listens, and he actually gets ordered by the Emperor to quit his research.
* The Story of Luke, a store clerk takes pity on Luke's ignorance of sex and gives him some dirty magazines, which he looks at in secret.
* The Story of Luke how to make some of them, although she struggles to make anything edible without Luke's close supervision.
* The story of Luke, it goes without saying that there's going to be a warning for a lot of foul language)
* The Story of Luke, Luke's grandfather Jonas pees himself in Cindy's car, to her horror. She stops at the nearest store to buy every kind of air freshener they have in stock while Luke helps Jonas clean up in the bathroom.
* The Story of Menstruation" (1946) — educational short made by Disney, shown to schoolgirls in public health classes
* The story of Mrs. O'Leary's cow. The Great Chicago Fire in 1871 started at a barn owned by Catherine O'Leary. Because of the weather conditions (high winds), the fire spread until it reached the city and burned a good chunk of it. Afterwards a reporter wrote that the fire was started when a cow in the barn kicked over a lantern while it was being milked. There is even a picture that was drawn of Mrs. O'Leary milking the cow when it starts the fire. However, the reporter who wrote the story later admitted that he just made the cow part up. People still blamed Mrs. O'Leary for the rest of her life because, cow or no cow, it started at her barn.
* The Story of Mr Sommer pieces he has to play on the piano are so easy that even people who can't play anything else can play them.
* The Story Of My New House from the perspective of a seven-year-old, accompanying the short texts with his drawings.
* The story of Nino Brown was based on the Chambers Brothers story. These four brothers sold crack in Detroit. Like Nino had his apartment building called "The Carter," the Chambers Brothers also had an apartment called the Broadmoor. They moved into the 4 story, 52 unit building, selling different types of drugs on each floor. They often sold drugs alongside families who already lived in the building, forcing them to leave or deal with their illegal and dangerous activity. Officials have often claimed that the brothers ran their drug operation like a large, very organized corporation. The foursome became nationally known when they were caught on tape counting laundry baskets of money and flaunting their wealth.
* The story of Oedipus who unwittingly married his own mother is the subject of
* The Story of O in French, a soft erotic S&M drama film, based on the famous erotic novel by Pauline Réage (Anne Desclos).
* The Story of O? The novel exists in two versions. These versions have very different endings, casting the rest of the story in very different light. In the most popular version (which most adaptations are built on), the first option might be the most likely. In the alternative version, the second option is far more likely. That version of the novel ends with the protagonist and her boyfriend agreeing that she should commit suicide... and she does.
* The story of Psyche and Eros fits most of the same elements of the tale, but acts as a whopping subversion: Psyche was considered to be as pretty as/prettier than Aphrodite. But she found it difficult to find a husband for plot reasons. An oracle deemed that she was to be left on the side of a mountain as a bride to a "monster that neither gods nor men can resist." Psyche was taken to a beautiful palace, attended to by invisible servants, and her husband would come by night, but not stay until morning. In the darkness, she could not see his face. Her sisters convinced her that her husband was a terrible beast that meant to devour her and their unborn child, and to hide an oil lamp and a knife for the next time he comes to visit. Turned out, her unseen husband was anything
* The Story of Robin Hood and His Merrie Men, Friar Tuck is doing this when Robin Hood first meets him. He even sings the male and female verses of a love song!
* The Story of Robin Hood and His Merrie Men, Marian sneaks out of Prince John's

castle and journeys to Nottingham disguised as a pageboy. The loose tabard actually does a pretty good job of concealing Joan Rice's curves.
* The Story of Robin Hood and His Merrie Men, Robin and the Merrie Men infiltrate the castle to rescue Marian disguised as the Sheriff's men.
* The Story of Saiunkoku Korin, and they're well on their way, as he usually ties his up in a ponytail and, though we never see it down, hers is long enough to pin up elaborately.
* The Story of Saiunkoku to feudal China, after the current Emperor changes the law that previously denied women the right to apply for government positions. Even with the support of the Emperor, she faces quite a bit of opposition, to the point that when an outbreak of plague occurs in the province she's been appointed to, a cult starts a rumor that it's divine punishment for allowing a woman to hold office.
* The Story of Santa Claus has one, the somewhat-anthropomorphic flying book of Nostros, the wizard.
* The story of Shadrach, Meshach, and Adbenago, who refused to engage in idol worship and were thrown into a fiery furnace but were saved from death by divine intervention, in
* The Story Of Silver Ketchum. This leads to elements such as pre-evolutions and evolutions that don't exist, "Pikablu" (Marill) being an Electric/Normal type, and moves that aren't canon.
* The Story of St. Nicholas, Bob and Larry actually enter the story they're narrating, and whenever Larry suggests something Christmassy to be added to the scenery, it appears. Larry is amazed at first, and Bob explains that since they're the narrators, the story happens however they tell it.
* The story of "Stone Soup", in which a hungry traveler comes to a village that is unwilling to share any food, but manages to get everyone to pitch in to make "stone soup", simply by putting a stone and some water in a pot. The generally accepted interpretation is that this is a story about the power of cooperation and sharing, but a more cynical interpretation may be that the traveler managed to convince the villagers to give their food in the hopes of getting something out of it, and thus managed to get a meal despite his own contribution being minimal.
* The Story of Tam and Cam", Tam is murdered by her stepmother, who gets the king to marry Cam in her place, but Tam keeps coming back.
* The story of the Chinese Zodiac involves the 12 animals racing for the positions on the calendar. In many versions of the story, the dragon stops to provide assistance to various people and animals in need, thus coming in fifth place when he could have easily made first.
* The story of Thecla in the Biblical Apocrypha involves a pool of sharks. Thecla, who learned the value of celibacy from the Apostle Paul, was sentenced to death for the effects her preaching was having on other women. Miraculously, she survived. The lions in the arena refused to harm her, and she threw herself into a pool with live sharks in it, baptizing herself. The sharks, it is said, died the moment she entered the water.
* The story of the cyclops is about a cannibalistic monster getting stabbed in the eye with a tree trunk.
* The story of the film's stay in Development Hell—and the numerous script ideas that came before the final script—is a bonus feature on the movie's DVD.
* The Story of the King, Hamed bin Bathara, and of the Fearless Girl and tries a number of tests to see if his friend is secretly a woman. The princess passes each one and the king finally tries to trick her into undressing for a swim at the beach, at which point she jumps into the ocean and swims away. He only figures out she's a woman by seeing that she carved the truth into a door before leaving.
* The story of the "Miracle of the Roses", in which St. Elisabeth of Hungary is claimed to have been saved by God's own intervention. Carrying bread to the poor in defiance of her husband's wishes, she is saved from discovery when her pouch turns out (to her surprise) to hold roses instead of the bread (other versions say that she did not actually speak when asked what she had, however—presumably because a saint shouldn't be lying in the first place).

* The story of the parents of Kimiko, a seventeen-year-old girl with
* The Story of the Stone He was named for his cheerful, laughing demeanor and charming little dance step. Li Kao diagnoses him as brain-damaged from repeated consumption of a mercury-laced "elixir of life."
* The Story Of The Stone until they stop demanding to go back and shoot the rapids again.
* The story of The Sufferer that served as his final sermon, and encoding his message into the fabric of existence itself for future followers to hear. This is implied to be the reason his descendant, Karkat, is so constantly angry and easily frustrated.
* The Story of the Youth Who Went Forth to Learn What Fear Was: A fairy tale in which the protagonist tries to find out what fear is and is confronted with a lot of creepy events and creatures. Yet, at the same time, his total lack of knowledge about being scared also provides many funny moments.
* The Story of the Youth Who Went Forth to Learn What Fear Was, after the Youth sleeps in on his wedding day, his bride-to-be throws a bucket of cold water on him to wake him up.
* The Story of the Youth Who Went Forth to Learn What Fear Was and locks the corpse back up in his coffin.
* The Story of the Youth Who Went Forth to Learn What Fear Was warms a corpse by the fire, because he thinks it might feel cold. Then the body reanimates and announces he will kill him. The youngster feels this is so ungrateful that he puts him back in the coffin.
* The Story Of Thor for SegaMegaDrive, there's an enemy that takes the form of a string of flames moving around the area. Predictably, attacking it with fire-based attacks restores its health.
* The Story of Tracy Beaker of Cam chasing Tracy with the knife, until Cam bluntly points out that it's just tomato sauce.
* The Story Of Twilight Glow de facto advisor. Despite being understandably nervous and fearful, she still manages to stand up, and even physically attack, Nightmare when she goes too far.
* The Story Of Twilight Glow: When Twilight first meets Nightmare Moon, she mistakes her for an actress, and barely escapes retribution for poking and prodding her.
* The Story Of Twilight Glow, where her goal has been to temper Nightmare Moon's megalomania and ruthlessness. Unfortunately, other ponies believe she willingly betrayed Equestria to gain power.
* "The Story of Uriah,", is a story about this trick being pulled on someone in colonial India.
* The Story of Valentine and His Brother, Richard can't bring himself to love Val because he takes after his mother, who abandoned both of them. He wishes she had left Dick, who looks more like Richard.
* The Story of Valentine and His Brother. She then escapes the awkward situation by lying that Lady Eskside has called her.
* The Story of Valentine and His Brother, the fact that Dick is slightly older than Val becomes one, as Val was raised to eventually become a lord, while Dick grew up poor and is satisfied with his current job as a supervisor at a boatyard.
* The Story of Valentine and His Brother, Valentine becomes so upset when he thinks his relationship with Violet Pringle is over that he is delirious with fever for over a week.
* The Story of Valentine and His Brother, Violet's mother intercepts Valentine's letters in a misguided attempt to spare her heartbreak, leading her to think that he doesn't care for her anymore.
* The Story of Valentine and His Brother: When the vagabond Myra does her hair and puts on a nice dress, she starts looking more like an exiled princess than a tramp.
* The Story of Yunan and The Sage Duban", one of the tales nested in the "Tale of the Fisherman and the Jinn". It also involves tricking someone into turning the pages in a book that has been poisoned.
* The story of Zoonama, a minor villain from episodes 7 and 8, is very similar to

Oolong's origin story from the original
* The Story on Page One", Peter tries to give Meg the pony she wished for when she was six. However, they end up discovering a horse skeleton in the closet,
* The story predates the IDW comics canonizing that Trixie grew up with a single mother.
* THE story) requires them to be in his realm at that particular point in time. The invitation might be expressed as "Destiny requires your presence." Literally.
* The story revolves around Fluttershy taking in a deathly ill Trixie. Later episodes confirm that Fluttershy's medical skills apply only to woodland animals, not ponies.
* The story says that the guard was getting ready to kill himself because he was afraid of punishment from his bosses for losing the prisoners. Paul actually has to tell him, "Do yourself no harm for we are still here." The guard falls down to his knees and asks Paul the most important question of his life: "What must I do to be saved?" and the response given is, "Believe in the Lord Jesus Christ and you shall be saved." The story notes how the guard is converted by the wonder of the occasion, that a prisoner would stay behind to help his prison guard.
* The story seems to use this setting early on, with Jade dreaming that she lives in a beautiful tower on a golden moon. It doesn't take long until it's established that said dream lands, Prospit and Derse, are just another part of the physical plane in which Sburb takes place, primarily accessed in the players' sleep through their
* The story's ending is seen in 'Everlasting Night'. The lost villager finally finds a way to break the "Groundhog Day" Loop. How?
* The story "'Sieur George" by George Washington Cable has the title character raise the daughter of the woman he (apparently) once loved; when she's sixteen, he points out that it would now be scandalous for them to be living together... unless, of course, they were married. She promptly leaves their small apartment and never speaks to him again.
* "The Story So Far", a Dorothy Parker pastiche by John Clarke, is a list of how wonderful various world hotspots are doing, concluding:
* The Story So Far, the narrative character is a secondary character in someone else's story, and is only conscious while she's "on screen", and is forced to act like a puppet. But she learns tricks that let her remain aware and in control of herself while the main character and the readers can't see her.
* The story song "El Gallo del Cielo" by Tom Russell is entirely about cockfighting, and the lyrics utilize detailed imagery of fighting pits, gamecocks, and gambling on the outcome of the fights.
* The story starts off this way, as Taiju Oki is about to confess his love to a girl when suddenly the entire world becomes
* The story starts out in space, where the Guardians of the Galaxy are mucking things up again.
* The story starts out with Kara reliving her final battle against Superwoman. As she is hitting the supervillain, accusing her from destroying her planet and causing a war, Superwoman retorts the Kryptonians were not blameless, Alura was far from innocent, and Supergirl killed her. Then her flesh melts off her face, and a legion of skeletons -including Supergirl's dead parents'- move in on Kara to drag her down with them.
* The story starts out with Shinji keeping watch over a comatose Asuka after the battle against
* The story starts out with the four protagonists waking up on another planet.
* The story takes place after modern society has collapsed and a few corporations/ obscenely wealthy individuals have taken control of large areas of the world, turning these areas under their control into
* The story takes place within the Sephardic community of Algiers in the 1920s, where Ashkenazi Jews are considered weird and foreign (such as
* The Storyteller (AKA Elsa Strict) has twice in the event done a performance where she cuts out the tongue of a helpless victim with scissors.
* The Storyteller, an evil grandmother-like lady that is able to bring people into

her own twisted books; along with having a tendency to
* The Storyteller called "Sapsorrow" showed the titular princess having this power. The episode was based on the German folk tale "Allerleirauh" and featured Princess Sapsorrow having her coat made by all her animal friends.
* The Storyteller chimes in every once in a while to comment on the story.
* The Storyteller" has him mediating a border dispute between two Bajoran tribes. An ancient treaty had set a river as their border, but then during the recently ended Occupation the Cardassians diverted the river twenty kilometers to the west. One tribe wants to use the river's old location as the border, the other wants to use the new one. Sisko sides in favor of the old border, but with the stipulation that the losing tribe must still have free access to the river for trade.
* The Storyteller — A common role for sidekicks is to ensure the hero's story is passed on.
* The Storyteller's standard epithets for Justin is, "The Embodiment of Manly Beauty".
* The Storyteller, the plot of the story details that there has been a string of murders in Anna’s hometown and her love interest Abel, has been framed for the murders. It turns out that Abel really is the murderer and he ends up killing himself once he is cornered by the police. The story then ends with Anna taking care of Micha, Abel’s younger sister and imagining that she is living with a different Abel from the one she knew.
* The Storyteller: The retelling of Daedalus' story presents him as falling into this. After terrible actions in the past (causing the deaths of his nephew and son), Daedalus had a chance to atone when he befriended the young prince and princess at a court. However, when he is blackmailed by King Minos into building the Labyrinth, he throws away that chance by his terrible revenge on Minos - rigging his bath to boil him alive. The story indicates that with that revenge, Daedalus essentially froze his heart, and he dies alone, a broken man.
* The Storyteller wastelands for many years, possibly even decades, in order to spread and receive information (hence the name). And.... that's about it.
* The story that Doumeki tells about his grandfather's encounter with a ghost during the Hundred Ghost Story Ceremony in
* The story that explains where Frieza's fear of the Super Saiyan Legend comes from is more universally derided, despite being a
* The Story That Never Was: In cases where the solution is to undo whatever started the loop, rather than going through the correct iteration of it.
* The story thread "Lust Dust" features a powerful aphrodisiac that makes a mess of many, many relationships.
* The story titled "Mice" featured a narrator who had trained "mice" into becoming intelligent and making their own communities. He regularly kills some of the weaker ones to discourage any rebellion against him. In the end, it's revealed that the narrator is actually a robot and the mice are really people.
* The Story to End All Stories, each chapter ends with a cutaway to Mike and the Bots discussing what they've just seen.
* The Story to End All Stories, fiction itself might cease to exist if the Nothing is not stopped dead in its tracks.
* The Story to End All Stories implies that the heroes will continue to have adventures together.
* The Story to End All Stories swears revenge on both humanity and the rest of fiction for forgetting about him. He unleashes the Nothing (see below) in order to wipe out fiction and destroy people's ability to imagine.
* The Story to End All Stories, the cast keeps growing as the story goes on. Lampshaded by Poirot towards the end.
* The Story to End All Stories, the characters are fully aware that they're fictional and frequently comment on how absurd and illogical the events unfolding before them are.
* The Story to End All Stories, the Doctor gathers together a group of heroes in order to find a way of defeating the Nothing once and for all.
* The Story to End All Stories, the Doctor only mentions there's food in the TARDIS

after numerous attempts to find food elsewhere are thwarted.
* The Story to End All Stories, the plan is to destroy all fiction so that humanity won't be able to create new stories.
* The Story to End All Stories, the villain attempts to wipe out all of fiction.
* The Story to End All Stories, this is used several times to explain what happens in the story.
* The Story to End All Stories, this occurs when the heroes discover who was behind the Nothing all along.
* The story "Two Killers for Diabolik" features two desperate men who had started rumors hoping to get hired to kill a man, except neither of them has any criminal experience and
* The story usually goes like this: Bob is driving home when he picks up Alice, a teenage hitchhiker. He drives her home and she goes into the house. He then realizes that she forgot her jacket (or scarf, some other accessory, etc) and goes up to the house to give it back to her. Her parents answer the door. They tell him that Alice died ten years ago on the very road where he picked her up, but confirm that it is her jacket.
* The story usually takes place on Archer Avenue near Resurrection Cemetery.
* The story was notably influenced by production difficulties that plagued
* The story went through a rewrite (possibly with a different author at the helm this time) and was originally going to be more nuanced if not straight
* The story "World Enough and Time"/"The Doctor Falls" had an example where things went horribly wrong before the planned voyage even began. A
* the story would be over. Like the Deus ex Machina, it only applies if it comes out of left field.
* The story writing for the historic Icelandic tome "Njorl's Saga" gets picked up halfway through by the North Malden
* The Straight Dope column of March 5, 2004, recounts talking to Cindy Fletcher, a woman who Toth herself put him in touch with when he asked her to identify someone who could corroborate her findings, who had lived in the tunnels in the early 90s (about the same time Toth was gathering the material for her book). Fletcher has this to say about the supposed Mole People: "I'm not saying the book is not true, I just never experienced the things [Toth] said she saw," and "There are no leaders down there." Adams' conclusion: "One draws the obvious conclusion: Parts of Toth's book are true, parts of it aren't, and you take your chances deciding which are which."
* The straightest answer to the question "What does "American Pie" mean?" that anyone has gotten out of
* The straightest example comes in volume ten of the manga when she learns that Takeo, who is often old-fashioned about romance, is avoiding her because he struggling with wanting to be more physically intimate with her. After the initial shock and embarrassment, she gets a gleam in her eye Suna is
* The straightest example is Carm (an Italien woman), who took part in World War One as a mountain guide for Italian troops when she was pre-teen, and ended to kill a dozen of men during the course of the war (in the actual game, she is in her late thirties).
* The straightest example is Simon Cowell who did play himself in the
* The straightest example of this trope would be, after a critic writes a bad review of Paddy's calling it "Paddy's Pub: The Worst Bar In Philadelphia" (the episode's title), Charlie gets drunk and kidnaps him, leaving the rest of the episode as an exercise in how to release him without legal repercussions.
* The straightest example would probably be Naggaroth, the land of the Dark Elves. Unlike other states, which are often ruled by either
* The straight male Chase was also clearly interested in Karolina in the early issues. He and Nico eventually got paired off with, respectively,
* The Straight Man, not being partial to drugs and hedonistic behavior and having been married to the same woman for over 50 years. However, one anecdote stands out. One night, a drunk Mick Jagger woke Watts with a phone call to his hotel room, screaming "Where's my drummer?! Where's my drummer?!" Watts got up, showered,

shaved, put on some clothes, went down to Jagger's hotel room, punched him in the face and yelled "Don't you EVER call me your drummer! You're my fucking singer!"
* The Straight Story, every character who appears in the film is a good person in some sense of the word. The closest we ever get is the fact that there are some people who try to talk Alvin out of the journey, and even then they're just concerned for his safety.
* The 'straight-up platformer with puzzle elements added in' is, essentially, just making the story part of the puzzles.
* The Strain, and - for most of history, anyway - the only one in the New World.
* The Strain are revealed to have been fragments of the Archangel Azrael, who went rogue after developing a taste of blood. They appear vaguely human at first glance, but their bodies are composed of capillary worms that transmit vampirism.
* The Strain: Eph and Nora have to strip and decontaminate before investigating the plane. Eph notes the process of sterilization reduces sexual tension.
* The Strain) have met with corruption or death, and it leaves a wake of destruction.
* The Strain into vampires, forcing Quinlan and Bruk to fight their way out against their former friends. Bruk is infected during the struggle and request his friend to decapitate him before he can become a monster himself.
* The Strain show, we get close-ups of Eph picking bullets out of Quinlan instead of a mushy declaration of affection. And it's still kind of touching.
* The Strain: The Master hides in Eph's apartment to await his return to tell him "I have your pig wife."
* The straitlaced Kendra gets a katana named "Honor's Grace" that allows her to stop time for a few seconds every time she draws it.
* The Straits. It focuses on infighting in the Montebello crime family, but also how a drug trade between a developed nation (Australia) and a developing nation (PNG) impacts the people on all sides who get caught up in it.
* The Strange Adventures of Edgar Switchblade #1: Krampus Unmerciful is a gruesome and graphic tale from Lonesome Wyatt.
* The Strange But Wonderful Cosmic Awareness of Duffy Moon the narrator's father writes a cooking column under the name of Grace Gallagher.
* The Strange Calls: At the end of almost every episode, the wrap-up of the episode's plot is interrupted by a new strange call with another weird situation for the characters to deal with, which is never shown onscreen.
* The Strange Calls, Banks, the fish out water in the small town of Coolum, is offered a promotion back in the big city. He chooses to stay at his job instead, partly out of love and loyalty for Gregor.
* The Strange Calls: Gregor very actively tries to encourage Banks' relationship with Kath, and often invades Banks' privacy to do so by sending her flowers and text messages under Banks' name.
* The Strange Calls: In the final episode, Kath and Banks lean in for a kiss, only to be interrupted by Gregor's groaning with their faces about a inch from each other. Banks breaks away to go attend to him.
* The Strange Calls is a humorous and fairly mundane example. The series focuses on a night-shift police officer in a small town. Though he has no special powers, every case involves some kind of supernatural element, from a ghost vandal to fried chicken that turns people into chickens.
* The Strange Calls is as obsessed with twitter as a stereotypical teenager and is constantly posting, much to the annoyance of everyone else.
* The Strange Calls is a supernatural comedy variant. The show deals with Toby Banks, a young cop who's sidelined by his superiors, working the night shift assisted by the "town security" Gregor, and older man who's not a cop but has extensive knowledge of the town.
* The Strange Calls: Toby has a tendency to trip and fall into people. In episode 4 he bursts into a clearing in hot pursuit of a suspect, but trips and falls onto a teenage boy who was sitting there, who calls Toby a pervert.
* The Strange Calls websites and frequently uses them while Toby is in the room, and often makes inappropriate sexual comments.

* The Strange Calls who takes everything about his job very seriously, and is always skeptical of any supernatural explanation by things. Gregor meanwhile is an old man with lots of weird fetishes and eccentricities, who constantly makes fun of Banks and ropes him into wacky adventures relating to his expertise on the town's supernatural doings.
* The Strange: Cannibals in the Thunder Plains suffer a terrible curse that strips them of their humanity, turns them into monsters with an appetite for human flesh and causes them to hibernate in the hinterlands until the winter, when they become wendigos and prowl the darkest hours in search of human prey.
* The Strange Case of Dr. Jekyll and Mr. Hyde, adaptations tend to focus on the drama between Jekyll and Hyde, often making Jekyll more heroic and giving him a love interest or two to further enhance the tragedy. Utterson, the viewpoint character in the book, often has his role reduced, combined with Dr. Lanyon, or omitted entirely.
* The Strange Case of Dr. Jekyll and Mr. Hyde adds two female characters: Helen, the beautiful and intelligent young woman who attracts Jekyll's interest, and Cybel, the prostitute who forms a relationship with Hyde.
* The Strange Case of Dr. Jekyll and Mr. Hyde: As Jekyll reasons in his final letter, the only reason that his potion worked (sort of) was because the batch of salt he used had been contaminated with an unknown substance. The potion has a limited supply because when he ordered more salt, the other batches were pure, and he couldn't re-create his potion with them.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Cybel responds to a doubtful statement with "And I'm Queen Vicky herself."
* The Strange Case of Dr. Jekyll and Mr. Hyde. During the final confrontation, after Utterson has tracked Hyde down and figured out his secret, Hyde says that now Utterson has tasted life and is fair game.
* The Strange Case of Dr. Jekyll and Mr. Hyde ends with Utterson looking thoughtfully at a copy of Jekyll's lab notes while the Greek chorus tempts him to try the formula out himself.
* The Strange Case of Dr. Jekyll and Mr. Hyde has a scene in Dr. Jekyll's trashed laboratory, where Dr. Lanyon finds a book of theology belonging to Jekyll, made harder to read because of Hyde's insane and blasphemous scribblings all over them.
* The Strange Case of Dr. Jekyll and Mr. Hyde has Dr Jekyll give the narrator his Apocalyptic Log in the final chapter.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Henry Jekyll's old friend Utterson calls him "Harry", the only character who does.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Hyde casually knocks down a flower girl who gets in his way when he's in a bad mood.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Hyde describes himself this way. "All those little rules, those little limitations we put on ourselves, don't matter any more." When another character accuses him of being insane, he responds, "Making love to those I love, and killing those I hate—is that madness, or is that just doing away with the formalities?"
* The Strange Case of Dr. Jekyll and Mr. Hyde, Hyde has an evil laugh. When Jekyll finds himself laughing the same way during Enfield's party, it's one of the first hints that Hyde can take over without the serum.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Hyde makes one in Act II after Utterson speculates on how Hyde will evade the police.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Hyde murders Dr Lanyon at the end of the confrontation in which Lanyon learns Hyde's secret. In the novel, Hyde leaves him alive, though the shock of the revelation ruins his health and he dies some time later, after writing an account of the confrontation which would have been superfluous in the stage version where the audience saw the confrontation directly.
* The Strange Case of Dr. Jekyll and Mr. Hyde: In the original novel, Utterson's investigation is the main plot, but now Hyde's secret is too well known for that to work. The play keeps Utterson's investigation, but only in the second act, and plays it mainly for dramatic irony as Utterson struggles to catch up to what the audience already knows.

* The Strange Case of Dr. Jekyll and Mr. Hyde, Jekyll deliberately destroys all notes of his experiments to prevent another man from suffering the same fate as he, and also comments that the solution as written wouldn't have worked, as it was only an impurity in the original batch that made the stuff effective.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Jekyll explains that no matter what happens to him as Hyde, Jekyll will be dead as there's no way for him to return once the formula runs out.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Jekyll is attracted to Enfield's fiancee, Helen, while Hyde takes interest in the brainy prostitute Cybel.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Jekyll's evil alter ego Mr Hyde is noted in both stage directions and dialogue to be remarkably ugly.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Lanyon dies of brain fever after witnessing Hyde transform back into Jekyll.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Lanyon's final appearance is in a flashback to the night before he was murdered by Jekyll's evil alter ego. The flashback ends with him jokingly remarking that Jekyll is going to be the death of him one day.
* The Strange Case of Dr. Jekyll and Mr. Hyde: Novel —> Play —> Many films based on the play
* The Strange Case of Dr. Jekyll and Mr. Hyde of this. Although we don't see him shrug off lots of damage, the point is made clearly — if absolutely, positively nothing is going to stop you, then surely that must include even the innocent little girl who just got in your way. Which is indeed what happens when Hyde callously walks onto her. In the face of this monstrous behaviour the observers are disgusted.
* The Strange Case of Dr. Jekyll and Mr. Hyde omits Sir Danvers Carew, the gentleman whose murder makes Hyde publicly notorious in the novel. His death is given to Enfield, a minor character in the novel who is given a more significant role in the play.
* The Strange Case of Dr. Jekyll and Mr. Hyde really pushes it — not only is Jekyll juggling two women who long for him (aristocratic Emma and prostitute Lucy), a bunch of showstopping songs are trucked out for both of them. Lucy, in particular, gets so much attention that the show's momentum slows to a crawl. It takes about 45 minutes into the musical for Hyde to show up!
* The Strange Case of Dr. Jekyll and Mr. Hyde. She finishes it with him, and notes wryly that she's heard it "fairly often".
* The Strange Case of Dr. Jekyll and Mr. Hyde, the first act proceeds linearly, while the second act has this structure; it opens with Utterson arriving at Jekyll's house for the final showdown, then recounts his investigation in a series of flashbacks, before continuing on to the showdown itself.
* The Strange Case of Dr. Jekyll and Mr. Hyde: the fog is symbolic of the mystery of Hyde, and sets up the dark and ominous atmosphere of London, especially the immoral slum of Soho.
* The Strange Caseof Dr Jekyll And Mr Hyde Then, depending on the version of the show, he either is shot by Utterson after he turns into Hyde again, or throws himself on Utterson's swordstick when Utterson can't bring himself to do the deed.
* The Strange Case of Dr. Jekyll and Mr. Hyde, the potion responsible for separating Jekyll and Hyde only worked because of an unspecified impurity in one of the ingredients. When Jekyll/Hyde ran out of the one contaminated batch, it didn't work anymore.
* The Strange Case of Dr. Jekyll and Mr. Hyde, there is a sequence of flashbacks during which one flashback ends with Utterson telling Jekyll that "Hastie has wanted to tell you how pleased he is with all this charitable work you're doing", immediately followed by a flashback to the next night, and Lanyon apparently picks up the conversational thread with, "Precisely. It is good to see you back to your old self." However, the audience knows, having already seen the second scene from Jekyll's viewpoint, that Lanyon's comment is actually a response to something said by Jekyll.
* The Strange Case of Dr. Jekyll and Mr. Hyde, the surviving main characters have

to deal with Hyde on their own during the climactic confrontation. The police show up at the end moments after Hyde's death.
* The Strange Case of Dr. Jekyll and Mr. Hyde, though this is not present in the original book:
* The Strange Case of Dr. Jekyll and Mr. Hyde to contrast him better with the more rugged Hyde).
* The Strange Case of Dr. Jekyll and Mr. Hyde, two characters designated in the script as The Butler and The Maid narrate, stepping into the scene from time to time to play the minor characters or to give voice to a character's inner thoughts.
* The Strange Case of Dr. Jekyll and Mr. Hyde, Utterson's kinsman Richard Enfield is a major character. In the novel, he only appeared in a couple of scenes, and his only significant part in the plot was to witness the flower girl incident and later tell Utterson about it.
* The Strange Case of Dr. Jekyll and Mr. Hyde: When Dr. Jekyll drank his potion, "the most racking pangs succeeded: a grinding in the bones, deadly nausea, and a horror of the spirit that cannot be exceeded at the hour of birth or death."
* "The Strange Case of Frank Cash and the Morning Newspaper" by T-Bone Burnett. One part of the song has the title hero using his fictional nature as
* The Strange Case of Mr. Challoner (1930), the butler indeed does it.
* The Strange Case of Origami Yoda, Harvey hangs out with Tommy and co but does nothing but whine and argue with them. It's pretty obvious that none of them like him because of his behavior, yet they keep him around anyway. This goes further in the sequel, where Harvey goes from obstructive friend to antagonist, and even gets one of them suspended from school.
* The Strange Case of Starship Iris is aggressive on this topic, to say the least. One couple in the series comprises a human trans man and an alien who finds the concept of a gender binary hilarious.
* The Strange Case Of The End Of Civilization As We Know It version of the continually asking conversation:
* The Strange Circumstances of one Mahiro Yasaka, as written by H.P. Lovecr/a/ft.
* The Strange Dr Weird, also voiced by Maurice Tarplin, and who was based in "the house on the other side of the cemetery".
* The Strange Fate of Flight 608: stock footage is used to show the evacuation of the jet after it crashes into the ocean. What makes it really painful? In the episode, the male pilots have all been poisoned & knocked out; the Hardy Boys are the only conscious males on board. Yet the stock footage clearly shows wide-awake male pilots helping passengers crawl out over the wing to the waiting rafts.
* The Strange: In the Sunny Flakes cereal line in New York Grey, humans are dried, powdered, and processed into an innocuous-looking ingredient that is fed back up to the regular factory floor. Yes, Sunny Flakes is people.
* The strange Kallar Dancing Frog was found to have tadpoles that, unlike most tadpoles that live in water, live in soil.
* The strange-looking redheaded man carrying the "End is Nigh" sign.
* The Strange Love of Martha Ivers as the films he was most proud of throughout his acting career.
* The Strangely Beautiful Series were star-crossed lovers in another lifetime. Naturally this leads to a romance during the events of the books.
* The Strange Monster of Strawberry Cove of Loch Ness and Nessie; when a teacher thinks he saw the local monster and is ridiculed as a result, three of his kid students try to help his case by building a fake monster. Ultimately, it turns out that what the teacher had seen was actually smuggler's boat.
* The Strange: Necuratu and shadowcasters in Gloaming feed on both vampires and werewolves, caring nothing for the struggle between Law and Chaos.
* The strangeness of a plane that turns into a tank is somewhat mitigated by the canonical existence of
* The Stranger, and he doesn't believe he brought any harm to his captives since their memories are frequently reset.
* The Stranger Beside Me starts with Ted Bundy arriving in Florida after escaping prison.

* The Strangerers, the aliens try to pay at a shop using a small can of oil.
* The Stranger: His death is not depicted, but Meursault knows he's going to be executed at the end.
* The Stranger. His lack of socially appropriate emotions is the real crime rather than an actual murder because the society he's in doesn't care that an Arab man was killed.
* The Stranger. His main worry isn't that he will be executed but that it will be public.
* The Strangerhood has Durnt running with giant scissors. He impaled Sam's gall bladder with them.
* The Strangerhood, ignorant of the coming depression, ends up going back with plans to make millions on asbestos.
* The Strangerhood it's revealed that Nikki's name is actually pronounced Nik-kay.
* The Strangerhood mini-series "The Pitch" was done like this, as Sam's interaction with the focus group was being recorded for a "documentary style reality show sitcom".
* The Strangerhood that Tovar had a twin, created by an accident with the time machine splitting his molecules into two. Sam the scientist describes them as "One was pure evil. The other, pure moron."
* The Strangerhood, the Mysterious Voice has a delivery truck drop off a new pair of pet fish for Sam as soon as he suggests getting some. Sam lampshades it with a remark of "That was fast", but it's most likely the Voice planned that from the start since he planned for the fish to die too.
* The Stranger: Mersault thinks that nothing really matters, so he does pretty much anything people ask him to.
* The Stranger : one of the points used against the main character in his trial is the fact that he didn't cry at his mother's funeral. He argues that it is hard to cry for a woman who lives a long happy life and then dies peacefully.
* The Stranger. Plus his lack of angst over his own impending execution.
* The Strangers. A couple is threatened in their home by three masked assailants.
* The Strangers are a group of people who terrorize a pair of suburban homeowners while hiding their faces behind a white doll mask, a pin-up girl mask, and a white sack.
* The Strangers by two young door-to-door evangelists, identified as Mormon in the credits.
* The Strangers character is going to scream and show that she's still alive. Adding yet another disappointment to an already subpar picture.
* The Strangers is Pin-Up Girl telling Dollface, "It'll be easier next time."
* The Strangers murders. The similarities are slight. The only thing that has a real basis in reality is that it's based on a burglar technique where they knock on a random door, and if no one answers, they break in and steal stuff — but no serial killer was caught doing this to find victims. Some have suggested as inspiration the 1981 Keddie murders, where a family of three and a friend were brutally murdered in a Northern California cabin, which remains a mystery to this day.
* The Strangers. Somewhat justified in that, under normal circumstances, they never interact with awake humans.
* The Strangers: The crux of the film is a home invasion by a masked trio, one of whom (credited simply as The Masked Man) combines a suit and tie with a burlap sack, with a smile drawn on in marker, over his head.
* The Strangers: the two main characters, terrorized in their home by masked invaders, are hiding behind a makeshift barricade in a back room with a shotgun, waiting in terror for their pursuer to appear in the doorway... and when someone finally does, the male protagonist shoots immediately, blowing the head off of— his best friend Mike who has come to pick them up.
* The Stranger-style contest to see if they could make a decent meal out of the junk provided.
* The Stranger was a direct-to-video series starring Colin Baker (who played the Sixth Doctor on the show) and Nicola Bryant (Peri Brown) as "The Stranger" and

"Miss Brown", respectively.
* The Stranger Within when you know what happened to Barbara Eden's own child.
* The Stranger, without a verse in a song about the Seven: there's a lot off about "him". Appropriate for the Faith of the Seven's incarnation of Death and the unknown. May or may not wear the other six as "faces". May or may not actually be the Many-Faced God also found in Braavos.
* The Strange Secret of Bruce Wayne", Hugo Strange is about to auction off a videotape that reveals Batman's secret identity to the Joker, Two-Face, and the Penguin. As he's about to ask for bids, the Joker can be seen munching on some popcorn.
* The Strange: The scarbacks of Mesozoica sometimes ride mammoths when they hunt.
* The Strange Thing About the Johnsons since he was a teenager, to the point where his father dies after trying to escape the abuse.
* The Strange Thing About the Johnsons. While the sexual abuse is not played for laughs, one would wonder how an audience would react if the son was raping his mother.
* The Strange World of Gurney Slade featured Anthony Newley as a man trapped inside of a TV program.
* The Strangler of Blackmoor Castle carves the letter "M" on his victims' foreheads.
* The Stranglers' "Golden Brown", a baroque composition that was completely different from the band's earlier punk rock sound.
* The Stranglers had no particular commitment to any one style. Their roots were actually in folk rock, but they abandoned that with the emergence of punk/new wave.
* The Stranglers have a very paranoid release called "The Gospel According to the Men in Black"
* The Stranglers: Keyboardist Dave Greenfield was autistic, though his diagnosis was not made public until after his death.
* The Stranglers, was nearly 40 when the band came to fame, making him far older than most of his contemporaries (and the rest of the band). He's still playing with them at the age of 76, despite serious health issues which mean he can't play a full set any more or tour outside of the UK.
* The strapline to a story about Sideshow Bob's prison pardon reads "#1 Local Issue".
* The Strategic Arms Limitation Talks between the United States and the Soviet Union. "You know, we really only need enough nuclear weapons to totally obliterate each other
* The Strategic Operations supplement offers players the ability to do aftermarket refits, and can significantly revamp a mech in so doing. There's also a quirks system which can represent both common features of a design or specialty add-ons to a particular mech.
* The Strategic Tactical Advanced Alien Response (STAAR) in the light gun game
* the strategies and ruses he devised. Several of his sub-commanders also qualify.
* The Strategist are used to figure out where and how to best utilize them, while one or both of Clint and Natasha will go high and keep an eye on the battlefield to direct their allies.
* The Strategist, so his lack of combat ability isn't really his fault.
* The Strategist who competently institutes major logistical reforms and frequently negotiates treaties, alliances, and loans. Some fans chalk this divergence all up to not spending enough time being mentored by Qhorin Halfhand in Season 2.
* the strategy of the UNS specifically required the death of thousands, if not millions, of neutral human civilian scientists. And they couldn't even do that right, the nanotech weapon they use wasn't ready and its malfunctions compromised the mission (not that the abysmal response by management helped). Even the justification for all that turned out to be wrong, the alien artifact they were after turned out to be nothing like what they expected (or rather speculated, since the dig had only just started) and their interference ended up rendering the artifact useless to them. They literally decided that a device they knew almost nothing about was worth committing a massacre over for reasons to cross it?

* the strategy was to land in the Kingdom of Two Sicilies and cause a pro-Italian Unification insurrection, as tried by Carlo Pisacane a few years earlier resulting in
* The Stratford Festival: Quite a few of the actors listed here got their start playing roles in Stratford Festival productions. It's also the second central nexus for this trope.
* The strawberriers were just a portion of the pay. Fresh berries and fruit aren't that expensive in established worlds, but in space protein rations are the way to go.
* The Strawberry Alarm Clock. "Birdman Of Alkatrash" was its original A-side, but radio DJs preferred the flip-side instead.
* The Strawberry Blonde, Hugo hires Biff for a well-paying but do-nothing job in which all Biff does is sign contracts he doesn't understand. It turns out that Biff is Hugo's fall guy in case the authorities ever catch on to Hugo's fraud and graft. They do, and Biff goes to jail.
* The Strawberry Blonde, set at the beginning of the 20th century, Amy strongly implies that she likes to have sex with men, much to Biff's horror. Later, she recoils in fear when Biff takes her seriously and starts kissing her in the park, revealing that she made it all up.
* The Strawberry Blonde, Virginia fends off Biff's persistent entreaties for another date by claiming her cousin just arrived unexpectedly from Scranton. Finally she agrees to go on a date with Biff three weeks from Tuesday — only to marry on that day Biff's evil rival Hugo.
* The Strawberry Epidemic is about a tapeworm epidemic caused by eating tainted food (the titular strawberries) at a church function.
* The Strawberry Shortcake parody people launch a genocidal campaign of dehumanization and consumption of the Sockbat race.
* The Strawberry Shortcake, the girls survive a crazy ride down a hill on a leaf (an attempt to catch up with their friend), and Blueberry Muffin, who had been opposed to riding the leaf in the first place, is the first to admit how much fun it was.
* The Strawbs live number entitled "Temperament of Mind", performed on solo piano during the Wakeman era, could accurately have been called "Rick does something awesome".
* The Strawbs specialised in folk-rock, mostly based on timeless poetic themes, historical events or personal experiences. The majority of their songs originated from frontman Dave Cousins, who sang lead vocal on all but a few. "Part of the Union", by far and away their biggest hit ever, was a topical pub-rock anthem that took the rise out of the militant workers who were butting heads with the UK's employers and government at that time. It was written by Rick Hudson and John Ford and performed with John Ford on lead vocals. The huge success of this Black Sheep Hit was one of the main factors in Hudson and Ford's departure from the group, and also resulted in it being excluded from the playlist entirely when they took their next album on tour. (However, Hudson, Ford and PotU were all eventually returned to the fold.)
* TheStrawhatNO!, after Thorn gets lost in the Lakebed Temple, BigTUnit passes the time by asking the others, "Anyone remember pogs? Because I sure don't."
* TheStrawhatNO! - Let's Play team made of the same core trio as TheMidnightFrogs
* the Straw Hat Pirates. He is the Straw Hat's third mate, strategist, communications officer (shared with Soundbite), and public relations officer.
* The Straw Hat Pirates' main "crimes" against the World Government are protecting themselves and their friends from pirates and corrupted members of the Government. Usopp even lampshaded it during the Fishman Island arc when he, Brook, Nami, and Zoro took King Neptune and his soldiers hostage, remarking that they wouldn't have done so if the latter hadn't attacked them first. The only actual crimes Luffy has ever committed are infiltrating Impel Down and later orchestrating a prison break—otherwise he's almost squeaky clean.
* The Straw Hat Pirates tend to be treated like this. They do a lot more good than harm, but still get chased out of places due to technically being pirates amidst a

series of bad coincidences.
* The Straw Hats are seen as a whole crew of Wild Cards by the world at large. There are certain unspoken rules that pirates are expected to follow. The Straw Hats do not follow them. When Zoro almost attacks a World Noble (the penalty for which is being hunted down by a Marine Admiral), a bystander notes, "I heard the Straw Hats were crazy, but..." Most pirate crews are motivated by money or power. The Straw Hats do whatever amuses Luffy and legitimately don't care what the consequences are. This has led to them taking down three of the
* the Straw Hats are the first people she's met since the destruction of Ohara who haven't tried to use her, kill her or turn her over to the Marines.
* The Straw Hats as a group have reached this status by the time they enter the New World, with other pirates being fearful and awestruck by them.
* The Straw Hats defeat Gecko Moria and retrieve everyone's shadows on Thriller Bark, which results in a several-days celebration with their new allies.
* The Straw Hats encounter the big drop on their way out of Skypiea. Cross, Conis and Su all see it coming.
* The Straw Hats gain a second one in the Whole Cake Island arc when Jimbei (a Fishman) joins. Jimbei being a Fishman on an (almost) all-human crew is actually an important plot point for him, since his dream is to improve relations between Fishmen and humans.
* The Straw Hats spend a whole day of sailing from Punk Hazard to reach Dressrosa. Doflamingo as well as his two underlings manage to do that journey in one or two hours.
* The Straw Vulcan will proceed to disturb everyone with doomsaying that their current plan "only has a 10% chance for us to succeed", and then the emotional protagonist proceeds to disprove him by saying "
* The Stray Lamb, T. Lawrence Lamb's life is thrown out of kilter by a mysterious little man magically turning him into various animals, which enables him to approach the object of his affections and to rid himself of his adulterous wife.
* The stream gobies of Hawaii are small fishes that, while they swim normally, also ascend waterfalls to reach their breeding pools. They cling to the rocks behind the falling water with their mouths and a set of modified pelvic fins that form a suction-cup disc.
* The streamline school of design during the Art Deco period in the 1930s was built on this. Many railway engineers disliked streamlining because it didn't do much for performance, unlike the mechanical improvement under the surface.
* The streetcar/tram system in Würzburg, Germany has a chorus of little kids announcing the next stop. Downright creepy, not to mention rather difficult for non-native speakers to understand.
* The Street Fighter, and ends up by throwing him about all of six feet down to a lower deck. The henchman's head reacts to contacting the said deck by exploding violently in what looks like it took a full gallon of red poster paint to achieve.
* The Street Fighter and its sequels both have examples from characters with otherwise perfectly good grammar on par with the Japanese characters (and even then the only part that's grammatically incorrect is "As Confucius say").
* The Street Fighter and its sequels portray the Yakuza as the main villains.
* The Street Fighter badass with absolutely no qualms about killing opponents in bloody and painful ways.
* The Street Fighter dark antihero, and when the sister gets out of this, she is very much pissed at Terry and goes after him for revenge.
* The Street Fighter defeats the final villain, stumbles to his feet on the brink of death, lurches off balance, and then the film freezes frame, with no indication whether he lives or dies. Subsequent sequels, however, clear that question up.
* The Streetfighter, Kunigami holds Kimiko hostage near a carousel. When Terry shows up, Kunigami strikes her with a death blow, only to revive her when Terry surrenders the blackmail tape he wanted. The two fight after Kimiko flees the scene.
* The Streetfighter's character emerges victorious but grievously wounded from his final battle. After staggering to his feet, he begins to lose his balance and the

film ends in freeze-frame. Of course, the fact that the character appears in sequels makes his fate a tad less ambiguous.
* The Streetfighter, shortly after being double-crossed by the Owada clan, Terry Sugury intercepts a group while disguised as a highway patrol officer. He directs them to pull over in a car crushing lot and then reveals himself. He then sends a lone assassin, Wolf, back to the Owada clan alive to tell the patriarch that he should fight Sugury for the money he had stolen.
* The Street Fighter's Last Revenge, Terry deals with a Yakuza Mook in a mariachi costume in this manner after a fight that leaves one table knocked over, a brick wall mildly crumbled, a casket's lid shattered, and the casket itself in poor condition by the time the mariachi finds himself inside the oven.
* The Streetfighter stupid to provoke him into killing you (just ask King Stone and Jadot).
* The street mutant Liv finds in the second chapter has a gecko-like body and the ears and fur of a cat.
* The street races in GTA Vice City can be made much easier by simply killing all of your opponents in the opening seconds with a tank cannon shell.
* The Streets - "Dry Your Eyes" alternates between the verses - begging her not to go - and the chorus - encouraging the narrator to let it go and accept that it's over.
* The Streets of San Francisco (the end credits for each episode are displayed in front of a helicopter shot going away from the Golden Gate Bridge). That said, occasionally an episode has the odd scene set elsewhere ("Flags Of Terror" has its first scene in Japan, and "Till Death Do Us Part" begins in New Jersey and the Midwest before arriving in San Francisco).
* The Streets of San Francisco - where Karl Malden played the old, experienced cop vs the young loose-cannon Michael Douglas 15 years before Mel Gibson made Danny Glover feel too old for this shit.
* The Street Sweeper is a broom wielded as a quarterstaff that can cause confusion in enemies and strip them of positive buffs.
* the Streib -inducing whir of surgical implements, needles, drills and such bearing down toward the victim's face, from the point of view of the victim.
* The Strength in Weakness, last names have gone out of style due to the war, with few people keeping them.
* The strength of both is demonstrated by Charlotte Katakuri who despite being three times Luffy's
* The Strength of Ten Men: They're as strong as multiple men put together.
* The strength of the werewolf curse can be affected by how its victims are treated immediately after the bite. If they are treated badly, then the curse is strengthened, but if they are shown love and friendship, it is weakened. After a short time, the curse "sets" and its strength then shall be its strength thereafter.
* The Stress mechanic means that characters consistently acting in ways they struggle with start suffering psychological breaks, beginning with 'coping mechanisms' and can end with them basically coming apart at the seams. So it turns out, it's important to look after your mental health. You can go against the natural grain, but don't expect to keep it up for long periods without also finding ways to let steam off.
* The stress of a high-intensity position such as, say, being President of the United States (especially during the
* the stress of being Ladybug and the new guardian of the Miraculous, and having to keep it secret from everyone she cares about, gets to Marinette so much that she gives up and fills Alya in on the truth.
* The stress of command finally gets to Optimus Prime during the first season finale of
* The Stress of Her Regard appear to be this trope, although it's slightly too early in history for the characters to describe them in terms of modern chemistry.
* The Stress of Her Regard includes some of the traditional variations, including a woman inviting her ex-husband in not knowing he's been vampirized, and a woman

inviting her dead son in even though she does know what he's become.
* The Stress of Her Regard (Polidori's niece), Lizzie Siddal Rossetti, and Algernon Swinburne.
* The Stress of Her Regard. She later comes to accept that he is innocent of the crime, and for years they work together (and pass for) brother and sister. When at a later point they have to pass as husband and wife, there are complications.
* The stress of the masquerade getting in the way is part of the reason Thrix is the
* The Stretchers is not only the brains behind the De-Dizzler 3000 which cures the Dizzies of their condition but also your source for ambulance upgrades. Captain Brains is a villainous example, having the technology behind the Dizzying pandemic in the first place.
* The Strex Family has an entire group of them — the "reverseverse Strexes"'s raison d'etre is basically "steal everything in sight".
* The strict definition of "air ace" is "a fighter pilot who has shot down a certain number of enemy fighters" (usually 5).
* The Strictest School in the World and sequels include Lal Singh, "a mysterious and heroic butler."
* The strictness is also analogous to the Napoleonic era 'rules' of both armies having to fight by standing directly across from one another then firing. ANY other form of combat is going to wreck that army's day, since they're overly specialised in handling a single format.
* the strict weight guidelines when she puts on a couple of pounds after breaking her leg,
* "The Strike" also features a variation of this trope. George hands out cards for donations made to "The Human Fund" to his co-workers so he can get out of buying them gifts. Unfortunately, he also mentions the past, which includes the celebration of Festivus, and George having to pin his father in the "Feats of Strength" which he hates. This intrigues Kramer and easily gets George's father Frank to revive the holiday and a celebration is hastily arranged on the 23rd of December. When Mr. Kruger finds out that "The Human Fund" is a fake charity, he is invited to the festvius dinner where he is nominated for the Feats of Strength but passes. Guess who does the Feats of Strength?
* The Strike Gundams' and Impulse Gundam's standard armaments include a pair of anti-armor combat knives stored in the hip portions of their armor. A pair of rocket-propelled ballistic knives (the "Stiletto") can be found in the same place on the Earth Alliance's mass-produced Dagger-L's and Windams, and a trio of those can be found on the shoulders of the Blu Duel. As the Strike Gundam's pilot, Kira makes use of the knives numerous times, while Mu La Flaga, as the
* The Strike Team can be seen as the poster boys for this trope, with the added twist of half the team (Curtis Lemansky and Ronnie Gardock) being good cops who fell in with the wrong crowd and largely stayed in the shallow part of the corruption pool, and Vic Mackey and Shane Vendrell, who killed fellow police officers in order to cover their own asses when they were in danger of being exposed. They also sell drugs they get from buy-busts, use torture to interrogate suspects and protect drug dealers they can control, all in the name of "keeping the peace". David Aceveda's description of him isn't the page quote for nothing.
* The string bass player wasn't very good; in fact, his jazz technique was entirely off-base.
* The Stringini Bros. have a song entitled "Dora No More" which describes Dora being mauled in various ways.
* The String of Pearls, in which he's just a Hedonistic sociopath out to profit - in every unspeakable way possible - from his victims.
* The String of Pearls (the very first Sweeney Todd story), Sweeney Todd takes Tobias Ragg to Fogg's Asylum in order to remove him as a witness to his dastardly work, going to Mr. Fogg in order to commit him while Tobias is too unconscious to meaningfully consent (since Tobias had fainted after Sweeney's latest round of threats and terrorization). Tobias has to escape the asylum in order to return to London and help Mark take Todd down.

* The string quartets provide further examples. Although all of the last five are regarded as the crowning achievements of his post-Symphony No.9 years, the most frequently performed are Op.130 in B-flat major (with, at its heart, a Cavatina sent into space on the Voyager Golden Record; the original finale was the celebrated "Grosse fuge"), Op.131 in C-sharp minor (a seven-movements-in-one homage to Beethoven's love of opera), and Op.132 in A minor (again, featuring at its heart one of Beethoven's most beloved slow movements, the "Heiliger Dankgesang"), all of which tend to overshadow the just as beautiful Op.127 in E-flat major and Op.135 in F major. And in the shadow of all five is the other "late Beethoven" quartet, Op.95 in F minor ("Serioso"), a glorious foretaste of things to come from the master.
* The strip also toyed with the idea in another series of strips with the same setup but different punchlines. The setup: Mario stomps a Goomba, and his distraught family rushes over to grieve. In one punchline, Mario realizes what he's done and is later shown attending the dead Goomba's funeral; in another, he gleefully mows them down for the 1-Up.
* the strip "AR&R" threatens the staff of a hotel with holy vengeance for this offense.
* The striped marsh frog makes a popping sound similar to the sound Donkey makes in
* The strip for 2015-02-01 reveals that Nietzsche's "When you gaze long enough into an abyss, the abyss also gazes into you" originally had a long follow-up about the abyss wondering why you're looking at it.
* The strip from November 8, 1992 featured a joke about Garfield getting ready for bed and being unable to get to sleep. On February 9, 2017 (Twenty five years later!) Garfield remarks "Sometimes I can't sleep...I think it was November 8, 1992"!
* The strip has quite a few, actually: Saint Lisa, Mopey Pete, Boy Lisa (or Duhrin), Cancerdeathville, etc. Even the author himself, Tom Batiuk, has a few with "Tombat" and "Batominc" (as in "BATOM, Inc.") being the most popular. In fact, nearly everyone and everything has a fan nickname - an inevitability when the only readership a strip has are people intent on mocking it relentlessly.
* The strip has several recurring female characters, but after the Supreme Court declared male-only clubs unconstitutional, a series of strips dealt with the necessity of introducing a regular female character. ("Nothing's more 'male-only' than Bloom County! We've GOT to introduce a WOMAN!") Eventually, Ronald-Ann was created as a regular.
* The strip in question is entitled: "Technically, the 'Fish' Version is a Subset of This One."
* The strip itself was born from a rejected strip from Bill Watterson, whose cast included a younger brother with a stuffed tiger. He was told these two were the strip's strongest characters and to develop them. Watterson thus cut the rest of the cast and reworked the strip to star those two.
* The strip-mined entrance to Erebus constructed by Gargarensis in Iolchis
* The strip that introduces Liechtenstein shows that she used to have long twin braids before cutting her hair to resemble her brother Switzerland more.
* The strip used to have Alphonse the depressed porcupine do this, but author Stephen Pastis discontinued the character because of too many
* The stripy yellow and blue background to the Detective's portrait was the pattern of his tie in his first revealed design, from before it was reimagined as the paisley, potentially animate
* The Strokes in their native US: "Juicebox", which only peaked at #98. (In the UK, in contrast, it was one of 5 Top 20 hits, peaking at #5.)
* The Strokes most well known song. Those honors likely go to "Reptilia" (#19) and "Someday" (#17).
* The Strongarm also has another brother, the Disruptor, which has a fixed cylinder instead of a drop cylinder, but allows you to reload mid-fight without taking out the cylinder, making it more
* The Strong Arms of the Ma", Moe attempts this after Marge gets involved in a bar fight. Moe sets fire to the bar and Lenny points out that he needs to have

insurance to get the money.
* The Strong Bad email "movies" ends with Strong Bad firing a bazooka in a theater out of frustration at the other patrons. Cut to him typing:
* The Strong Bad Email "virus" pulls one of these, when Strong Bad's Compy 386 gets almost 400,000 viruses at once, causing the H*R universe to deteriorate slowly into madness. When multiple in-animation windows of old-design Homestar pop up saying "Making. Out. With. Marzipan. Is. Totally. Awesome!", one physical browser window (that you have to click the "X" on the menu bar to close) also pops up in front of the animation, with the same old-design Homestar saying the same phrase.
* The Strongbottom Family, all of whom are royalty from the Iron Asses of Wales and are related to Chef Pee Pee. Naturally, this would raise a lot of possibilities. What sort of antics would Junior get up to with the sisters? What sort of development would Chef Pee Pee go through with his father? Where did Stacy learn
* The Strong brothers' parents have been mentioned a few times, including an old birthday card that their mother made Strong Bad write for Strong Sad (the only physical evidence). We never see either, and in fact the Brothers Chaps themselves stated point-blank that they had
* The Stronger Evil appearance is explained as a result of constant use of dark magic draining and twisting his body.
* The Stronger Evil comes to an end — after Shendu has been pounding him into the pavement for a few minutes, he takes the bloody mess that's left and rips it in half.
* The Stronger Evil, controls the elements of the natural world and she is responsible for every extinction event in the Earth's history, which she inflicts when she decides it's time to reshape the planet and make way for new life to grow. To that end, she cares nothing for the beings currently living in the world when she has decided to reshape life in the bigger picture.
* The Stronger Evil reacts this way when Valerie asks if their binding can be undone.
* The Stronger Evil shared Uncle's belief that Oni weren't real until Tarakudo's entrance. Valerie Payne notes the irony of a demon hunter raised by a Japanese family with history of hunting demons not believing in Japanese demons. Nat defends herself by saying that there haven't been reports of any Oni for a thousand years.
* The stronger the mage, the less effort they have to put into the actual act of spellcasting. For example, Demona has to cast spells by chanting in Latin, Puck can work magic in English but has to use rhyming verse, and Oberon can knock out a whole city just by yelling "Sleep!"
* the strongest enemies in the game, more easily obtainable and have more durability.
* The strongest evidence supporting the theory that Hooded Justice and Captain Metropolis are alive and well is in Chapter 1, page 25, middle-left panel. In the restaurant, two men are holding hands and are the focus of the panel. The main characters, Dan and Laurie, are in the background. This technique is sometimes used elsewhere in the work, for example, page 14 of chapter 10 where the intent is to transfer the reader's attention from the main characters to a new character (in this case, Roy Chess). The men resemble older versions of Hooded Justice and Captain Metropolis, assuming Justice is the strongman. A final detail is their bow-ties. Their ties have green markings on them, making them resemble domino masks. While the other indicators are rather vague on their own, the addition of the bow-ties seal it for some. And given that Hooded Justice and Metropolis died in ways that leave bodies difficult to identify, were gay lovers, and resemble the drawn men who steal the focus of the panel, it could be true. If you really want to get crazy, Laurie's dialog ("Me and Jon? Oh, yeah yeah, everything's fine. Couldn't be better.") that is present in the panel could be juxtaposed purposely with the men and the relationship of HJ and Nelly. Laurie and Jon's relationship is public, with no privacy, physical intimacy or affection, while HJ and Nelly's was secret and private, and the two men are obviously very intimate with each other. Or it's just a load of crap.

* the strongest living creature on the planet so that he can't just go and solve all the story's problems by himself.
* The Strongest Man in the World. In the climax, Dexter has to power it up with his strength formula in order to return to the weight-lifting competition.
* The Strongest Man in the World's hapless college student and his friends discover a combination of chemicals and breakfast cereal which produces temporary super strength.
* The Strongest Man in the World was released in 1975, a year after Joe Flynn's death.
* The Strongest Man in the World, when attempting to clean his glasses after they got fogged up after he eats some of the strength formula-laced cereal.
* The Strongest Suit of super-corrosive liquid. Although to be fair it is colorless rather than green or yellow, and doesn't bubble or fume.
* The Strongest Suit, the Playing Cards themselves, who are human-sized and anthropomorphic. This is not truly the case in-universe however, as they are a legitimate sapient species rather than normal cards brought to life.
* The strongest weapons in the game are the Savage Lynel varieties. Of course, the only places to get these weapons are by defeating high-level Lynels, who are
* The Strongman: Circus performer whose physical might is practiced for the entertainment of others.
* The Strongman: People who show off their incredible strength for the entertainment of others.
* The Strong Silent Type", after Chris' "intervention" for his drug addiction (where he gets the crap beaten out of him) he is taken to the ER. Tony explains to the nurse that he sustained his injuries "slipping off the kitchen counter while spraying for ants". Off her skeptical look, Tony elaborates, "Well, he was wearing socks".
* The "strong" villains are always large and muscular (e.g. the Rhino) while the villains who have other powers are slimmer (e.g. the Chameleon.)
* The strong-willed Courtney eventually develops a degree of resistance to the curse unbeknownst. This resistance, however slight, plays a pivotal role in her eventual deliverance form the curse.
* The Structural Formula Of First Love when Chisato finishes high school.
* The structure of the Jedi Order resembles many monastic traditions, from those of Christianity to Buddhist and Taoist orders, including the requirement of celibacy (Jedi can't marry or have children, nor fall in love). The Force, in so far as it is a non-anthropomorphic godless cosmic force, likewise reflects Eastern beliefs (similar concept of the Chinese Chi and Hindu Prana). The ins and outs of "Forceism" can be found in detail
* "The Struggle for Trost" arc: Eren and the 104th Cadets are caught up in the middle of a Titan attack in the district of Trost, what follows next is the struggle of the Garrison and Cadet branches to defeat the Titans, as they are eventually saved by
* The struggle of Men against the said Archangel due to the same war.
* The "Struggle" portion of "Perfect Struggle 2017" was dedicated to
* The Struggle Within has Stephanie, who chases you around for much of the first part of the game. To a lesser extent, her sister Ashley, whose still-living arm can be found on the dining room table and the rest of her body scattered across the house, and their brother Michael, who also stalks you in a suit of armor.
* The strumming becomes trickier if you use a pick, or if you actually strum with your hands (as opposed to gripping onto the strum bar).
* The Stryker - being an eight-wheeled gun platform - isn't too likely to get confused for a tank, but the same probably couldn't be said for the M2/M3 Bradley and Linebacker IFV/CFVs. They're armor plated, have a gun turret, tracks, but their primary function is
* The Stub Gun is more of a subversion. It's enormous energy output makes it
* The Student Council's plan to deal with Jeff, who has gone berserk and gained super-strength, during chapter 5 involves meticulous planning and Serge doing a front-flip...at which point, instead of using it as wind-up, he lands and does a

normal throw. Max even yells at him for the waste of build-up.
* The Student Prince an Arthur/Merlin fic - unless you assume that their previous incarnations were also in love with each other.
* The Student Prince, but he gets protective when Lady Viva acts rudely to Merlin, promptly turning her down and shutting her out of their room.
* The Student Prince has "Deep In My Heart, Dear," reprised in all four acts.
* The Student Prince in Old Heidelberg, crown prince Karl Heinrich is forced to marry a foreign princess, which means he must give up the simple barmaid that he's fallen in love with.
* The Student Prince in Old Heidelberg is set in an obviously Germanic little kingdom called "Karlsberg" around the beginning of the 20th century.
* The Student Prince in Old Heidelberg, Prince Karl Heinrich goes back to his old college after becoming King and finds out that nothing is the same anymore. The students no longer come to the beer hall where he used to hang out and have fun, and his old frat buddies now behave towards him in a stiffly correct manner, now that he's king.
* The Student Prince just for Merlin's sake, his feelings for Merlin definitely plays a role in his decision and it is a major step in moving their relationship forward.
* The Student Prince moment, just as the titular prince is about to defy his father and marry the commoner he's fallen in love with... he learns his father is dying. He agrees to marry for diplomatic reasons, and takes up the crown, but goes to see his true love once more before he does.
* The Student Prince. Neither can work up the courage to ask the other out for a long time, both of them thinking the other is out of their league.
* The Student Room that considers anything below an A* a fail - even though the official passing grades are A* to C for GCSE and A* to E for A-level.
* The students' activities at the ABC Cafe halt when Gavroche tells them Gen. Lamarque is dead.
* The students in a college class conspire together to alter the behavior of their professor without his knowledge by using operant conditioning. They set a series of small progressive behavioral goals, and whenever the professor does a desired behavior, they reward him by looking as if they are paying rapt attention to him, while when he is not doing the desired behavior, they act bored and like they are not paying attention. Over the course of several weeks, they manage to condition the professor to give his lectures while standing on top of the overturned trashcan.
* the student was trying to tell the principal that there was an insane student who was a drug addict wanting to kill him. He had been banking on the principal acting on the information and having the drug addict student sent to detox and thus prevent the attack.
* The Studied Target class feat also allows a character to mark an opponent to gain various bonuses against them.
* The studies of Ivan Pavlov have become famous for demonstrating this in dogs. He would ring a bell every time that food was served to the dogs, and eventually the sound of the bell would connect instantly to the idea of food being brought; hence, when he rang the bell, the dogs would salivate more and expect the food to be brought out even if there wasn't any.
* The studio also mandated that the runtime be under 100 minutes which is what made a lot of it incoherent. The short run time was mandated because they needed to rush to get it converted to 3D in time to meet the lucrative Independence Day weekend release.
* The studio blew most of the budget filming the opening sequence in the Southern Water Tribe (Greenland) causing the rest of the movie to be filmed inside and not look as good.
* The studio won an Emmy for its live-action/animated take on the story ''Jack and the Beanstalk." It was produced by and starred Gene Kelly.
* The Stuff) as they strut down a catwalk, holding containers of the eponymous food.

* The Stuff is basically Horror Hunger: The Movie. A gooey, marshmallow-like substance is found bubbling up from the very bowels of the earth. It tastes great and has fewer calories than ice cream and other sweets, creating a massive market demand. Unfortunately, it turns out the Stuff is actually a living parasitic organism that makes anyone who tries even one bite crave it non-stop. After becoming "Stuffies," they eat ungodly amounts of the goo and try to force others to indulge in the Stuff; once they've fully incubated their dosage, it hollows them out and explodes from every orifice in their body, leaving behind horrible empty husks.
* The Stuff noted that New World Pictures expected a straight horror movie, and when they didn't get that still marketed it as such, giving no hint to its comic elements.
* The Stuff of Legend also has this as its premise, being about a group of toys fighting their way through a fantasy world (in which they become what they were toys of) in order to rescue their owner, who has been kidnapped by the Boogeyman.
* The stuff that happened to Silver Spoon at the camp, including bullies burning her teddy bear in a campfire and leaving her tied to a tree in the woods, were
* The stuff Trent Boyett had on his person when he first arrived in juvenile hall: a pack of crayons, safety scissors, a marble, and a switch-blade knife with "Kill all betrayers" written on the blade.
* The stuff worn by ravers can easily be mistaken for space clothes. In fact, the labels of some rave-clothing producers such as Cyberdog even have small notes saying it is "Suitable for Terrestrial wear".
* The Stunticons of all groups pull this in the course of the original
* The Stunt Man Action-Comedy-Romance-Thriller-Drama. The studio had trouble marketing it because it didn't fit into one particular genre.
* The Stunt Man is made of this trope. The movie is about an intense director who constantly uses enforced method acting on his actors, sometimes with dangerous consequences.
* The Stunt Man It isn't made clear why Cameron is running from the police in the first place.
* The Stuntman movie, the director character has a hovering cool chair (suspended by a crane) he uses to pop in and out of scenes.
* The Stunt Man: While doing a stunt involving falling through a window into a room, the hero falls on top of a nude woman on a bed, who is actually a stunt woman placed there to break his fall.
* The Stupendium, London-based nerdcore musician, artist, and YouTuber, publicly came out as pansexual on May 24, 2021.
* The Stupendium - Nerdcore rapper and songwriter making songs mostly about video games. He is most famous for his music videos and satirical commentaries baked into his songs.
* The Stupid Adventures of Taco-Man has an episode which revolves around Taco-Man taking out a poorly drawn counterpart of his known as Toco-Man.
* The Stupid Cupid", Daffy is hit by a giant arrow from Cupid, which hits him with such force that he ends up with his beak stuck through a board. He struggles to lift his arm just to burble his lips.
* The Stupiders, we are told that everyone has at least one problem or quirk, but what exactly those problems are is left up to the reader to discern.
* The "stupid questions" man, who opened every commercial with, "Does switching to GEICO save you 15% or more on car insurance?
* The Stupids like this foiling an arms deal between corrupt military officials of multiple nations. The family patriarch Stanley Stupid alone manages to inadvertently defeat at least three assassins.
* The Stupor Salesman there is actually an explanation: he is wearing a bulletproof vest.
* The Sturmgeschütz III or StuG III assault gun was Germany's most-produced fully-tracked armored fighting vehicle in World War II, based on the chassis of the Panzer III medium tank. Originally the StuG mounted a low-velocity 7.5 cm StuK 37 gun for shooting high-explosive shells; it was controlled by the artillery, and

used as an infantry support weapon. During the War with the Soviets the Germans changed its emphasis towards being a tank destroyer, up-gunning it with the high-velocity 7.5 cm StuK 40. It was cheap and easy to manufacture because of its turretless design, and it enabled the Germans to keep using the production lines for the Panzer III chassis even after the Panzer III tank was phased out. The Stug III remained reliable and effective all the way to the war's end.
* the Sturm-Und-Drang phase of the Enlightenment and Romantic era, and the Reunification of Germany.
* The Stuxnet worm is a bit of a special case, as it was not only designed to cause the system to fail but, well,
* The St. Valentine's Day Massacre in the Screen Actors Guild regulations would get him paid for five weeks of work. He took the small role and the big paycheck instead.
* The St. Valentine's Day Mix-Up. When Gemma discovers that a Valentine's card from Duke has Fluff Catt's name inside it, she goes absolutely berserk at him and throws him into the Spaceport duck pond. She finds out later that the card for Fluff was actually from DC Bones, who had asked Rekki to pass it on to Fluff but had forgotten to sign it with his own name.
* The Styrics have many common traits with Jews: largely without a homeland, persecuted and frequently slaughtered by Elenes for no very good reason, plus they eschew eating pork. However, their actual theology is polytheistic, and their relationship with their gods is more personal than that of Judaism.
* The subcutaneous transponder ("Patterns of Force"), which gave the ship the ability to lock onto and beam up the landing party if they were out of contact. Its actual purpose in the plot was to give Kirk and Spock a Cool Escape, rather than pull the whole
* The subgenre of "Nukige" (抜きゲー), literally meaning "Fapping Game", is basically this with the flimsiest of plots to set-up intercourse.
* The subject behind episode "Brian's Got a Brand New Bag", where Brian is ridiculed for dating a 50 year-old woman instead of the hot bimbos he usually goes after. She didn't look 50 though, at least not until after she broke her hip.
* The subject of Ane Brun's "Don't Leave" requests this of the narrator, who assures the subject that this was never their intention.
* The subject of any number of philosophical papers from the classic "
* The subject of Jens Lekman's "A Postcard to Nina", except the tension is because he doesn't want to reveal that he's
* The subject of oneprize winner. Parent is doing planet names with kid. Gets to Uranus. Kid keeps replying "my anus".
* The subject of "Tequila Sunrise" is on a long bender because his love interest isn't interested in him.
* The subject of the Carl Perkins song "Everybody's Trying To Be My Baby",
* The subject of the Hanged Man Social Link is a troubled-yet-adorable 8-year-old girl whose parents are going through a divorce. Once you reach a certain stage, she decides that she's going to get married to the protagonist when she's old enough. Neither you nor the protagonist have much say in the matter, but when her father finds out about this "marriage promise" in the epilogue of the game, he's none too pleased about the matter and tells you to stay away from his daughter.
* The subject of the song, "You Gave Me A Mountain" written by Marty Robbins, made famous by
* The subjects must be better known by their nickname than by their given and surnames.
* The subjects of most male body fragrance commercials become this. Such as the guy in
* The subliminal message song, which sounds like a love song... at first.
* The Submarine and the Ikaruga are actually two separate ships, despite the common misconception. The Ikaruga, rather, is actually built from scratch with the Gawain's weapons tacked on.
* The submarine captain credited with sinking the largest enemy tonnage ever was

Lothar von Arnauld de la Périère, scion of a Huguenot noble family driven from France by Louis XIV. During World War 1 he sank 194 allied ships totalling 454,000 tons. He was known for taking care to do his best to stop ships before sinking them in order to allow the crews to get into their lifeboats. The highest number of ships sunk was credited to Otto Steinbrink, but his 202 sinkings "only" totalled 232,000 tons.
* The "Submarine" ending plays it perfectly straight, with every other Nonary Game participant dead and covered in blood, before you get knifed
* The Submarines' ''You, Me, and the Bourgeoise''. The song is about the emptiness of commercialism and how we should focus more on love and less on stuff. Of course, Apple may be fully aware and just thumbing its nose at us.
* The Submissive Alice, Alice returns from her adventures in Underland and wonders if the whole experience might have been a dream. This lasts until she takes a shower and discovers that her pubic hair has been replaced by a fine layer of white feathers.
* The subordinate's head also barely moves a few degrees. There's no way Sebacean necks are so fragile. They're supposed to be
* The subplot in the first few episodes in which Cromartie, the main Terminator pursuing the Connors, gets blown up and has to rebuild himself with a different face (as seen in the page image for
* The subplot of an episode revolved around the team trying to figure out whether a Japanese assistant is a man or a woman. It is debated at some length before Angela figures it out in her own way.
* The subplot of "Days of Wine and D'oh'ses" features Bart and Lisa trying to take a prize winning photograph. When Bart states people only care about photos of celebrities looking horrible, Rainier Wolfcastle walks out of the Kwik-E-Mart looking fatter than usual and gorging on junk food. He claims he's preparing for a fat secret agent role. Several seasons later, he's obese again and stuck at the same fat camp as Bart in "The Heartbroke Kid."
* The subplot to "The ABC's of Beth" revolves around Jerry dating a Krutabulon warrior priestess named Kiara, and his struggles with wanting to break up with her. Rick offhandedly reveals in
* The Subservient Chicken is a viral advertising site by Burger King that proved surprisingly effective.
* The subsidiary units to DV-5 are not given the same diaphragm and programming for inflection. When Powell and Donovan interview a "finger", its answers are given by rote, without enthusiasm or interest.
* The Subspace Emissary, a sidescrolling action-adventure game contained within Brawl, may fall under this trope. Also, SSE itself ends
* The Subspace Emissary's Worlds Conquest is a multiverse of all the video game settings the author can think of.
* The Subspace Emissary's Worlds Conquest long story about two warriors and their quest to stop an ancient evil from destroying the world.
* The substance called protodermis was first introduced as a rare material that living beings were made out of. Matoran villagers would mine it. Falling into its liquid form had the ability to transform characters into more powerful forms, which is how the Toa became the Toa Nuva. Later, it was explained that
* The Substitute 4: Failure Is Not An Option sees former ex-soldier Karl Thomasson (Treat Williams) return to teach at a military academy and dismantle a white supremacist cult in the school.
* "The Substitute" has Screech attempting to woo Lisa with some Shakespeare-esque poetry, which ends with "So you may dip your French fries in my face".
* The Substitute. The bad guy becomes so terrified that he poops himself.
* The subtitles for the anime give the TSF pilots naval ranks, with Yuuya and his squadron members being said to be ensigns. Leaving aside that this seemingly underranks everyone in the main cast except Yuuya (who is a rookie, though a talented one, at the start of the series) and possibly Yui Takamura,
* The Subtle Art of Not Giving a Fuck ideal number of children in a family, and pretending that a single family could precisely match that ideal).

* The Subtle Blade he can rip a man's heart out so quickly that he can show it to the victim while it still beats. Artemis isn't remotely impressed and kills him with little effort.
* The Subtle Knife, one of the first things he does is undress and go swimming in the ocean.
* The Subtle Knife, seems like this at first, as the Spectres in Cittàgazze target adults and leave them as mindless zombies, so that a city is found completely empty except for a few scavenging children. However there are still a fair number of adults around, but as they're hugely vulnerable and often have to go into hiding, society can barely function.
* The Subtle Knife trilogy, there's a world in which there are soul-eating 'spectres' that only target adults. At one point the heroes are in a city only occupied by children, although it turns out that most of the adults left, rather than being caught by the spectres, and will return once the spectres move on.
* The Suburban Book of the Dead third person prose and first person monologue.
* The Suburban Jungle had MegaHugeConGloMaCo, which was acquired by Amalgatronix Corporation. From the FAQ:
* The Suburban Jungle" in order to give Mikey and Wally some time to talk things out alone.
* The Suburban Jungle's Tiffany Tiger employs a cardboard cutout to take her place in the office while she pursues her modelling career at a shoot.
* The Suburban Jungle, Yin (a panda) calls a psychic hotline, and the seer screams at her to get out because there's a tiger in the house. Yin calmly (albeit with aching ears) informs the hysterical woman that Tiffany is her roommate.
* The Suburban Legends have a song called I Want More, which contains the line "It's not cool to play ska music", among others.
* The Suburbs," reflecting Win Butler's youth in that ultimate suburb—The Woodlands, Texas).
* The subversion comes after that, where we see her in a football jersey holding a
* The subversion is subverted in the episode "Together Forever", wherein it appears that it actually is his middle name.
* The subversion is that it was planned; he sends Harvey to his death, but really was in on the entire trial being a set up for a surprise birthday party.
* The subversion of a "release the dogs" moment. Setting dogs on abused factory workers? Not funny. Dropping dead dogs on said factory workers, on the other hand...
* The subversion of this trope is most noticeable in the disaster episodes such as Year of Hell, where the ship demonstrated special energy conservation modes, Voyager being seen in extremely poor condition with life support restricted to only a small part of the ship and very strict rationing - all unnecessary items were fed back into the replicators in order to be converted to useful supplies. Additionally, in one episode Voyager is pulled into some sort of void from which there is no way to escape. There are certainly
* The subway system, which appeared suddenly and mysteriously. This one is more ambiguous, since the Man in the Tan Jacket,
* "The sub-zero heroes are back, on an incredible adventure... for the ages." —
* The succeeding bailiff was Florence, played by Florence Halop; but Halop passed away after one season and thus her character shared the same fate. It wasn't all that surprising, considering the ages of both actresses. In fact, there were whispers and jokes that both actresses had fallen prey to some sort of "Night Court curse," and this is said to be one of the reasons that series creator and executive producer Reinhold Weege decided not to bring in a third elderly actress and instead replaced Halop with Marsha Warfield, who was only 32 when she began playing Roz Russell. In fact, the producers knew Florence Halop would not be around for Season 4; the ep "Flo's Retirement" was their way of preparing viewers for this.
* The Success Mode of the 2007 version also had something similar, with the monsterous "Champion Rings" team. If you go up against them in Season 2, your best friend comments that nobody on the team stands out, since they're all ridiculously

strong. In Season 3, they gain
* The success of NY Knicks (now Houston Rockets) player Jeremy Lin has resulted in several puns based off his name, most notably "Linsanity." For example,
* The success of Starbucks in the UK when it opened its first branches there in the 90s owed a lot to another recent US import - prestige American comedies that played in an extremely popular Friday night block. The biggest hit was of course
* The success of the Pittsburgh Penguins' 2008 Winter Classic throwbacks, which became
* The success of the Sega Saturn in Japan tends to be attributed to one man:
* The success of Windows 7 — which featured only minor changes — was largely due to being released three years later, when every new computer on the market was more than capable of running it smoothly
* the success rate was extremely low in situations where grammar was important, indicating very poor ability to grasp grammar.
* The Succubi avert this trope. They appear as floating human females with pinkish-red skin and transform into monstrous demons in battle, using
* The Succubi harvest worlds by drilling into the core of a planet with the Apocalypse Cores on their
* The Suck Cannon sucks in enemies or crates and lets you use them as ammunition.
* The Suckers (1972), a big-game hunter invites employees from a modeling agency to his estate, where he hunts them.
* The Suckers plot, but the hunt does not start until the 50 minute mark. The preceding time is spent watching the interactions of deeply uninteresting characters who have a lot of sex. The non-professional nature of the cast does not help.
* The Suckers, Vandemeer drops his knife when he is tackled by George. Baxter is able to reach it and cut through his bonds while George and Vandemeer are fighting.
* The Suckers, Vandemeer uses Cindy's body as 'dead bait' to lure Baxter and Barbara into a position where he can trap their feet in a snare.
* The Suckers Vandemmer declares that a hunter has to know how to skin his prey, and announces he intends to practice on Barbara. He has cut her top off and is holding the knife threatingly in front of her face when he is tackled by George.
* The Suckling: These are aborted fetuses resurrected by radioactive waste, who become ravenous monsters that can use their umbilical cords as weapons.
* The Sucklord (born Morgan Phillips), a New York-based pop artist, manufactures unlicensed action figures that are styled after cheap bootlegs. “Instead of hiding and glossing over the suck factor, I decided to market it as a feature of the product,” the Sucklord said in an interview.
* The Sucky Outdoors" when confronted by bears, the first one a very convincing disguise of Izzy, the second a genuine one.
* The sudden appearance of the Prydwen and the Brotherhood of Steel in
* The sudden death to avoid being seen by the clients. The subplot ends, however, on a heartwarming (but still funny) note from her former lover Bert Cooper: "She was born in 1898 in a barn. She died on the 37th floor of a skyscraper. She's an astronaut."
* The sudden introduction of cave-dwelling monsters has resulted in some viewers theorizing that Sarah suffered a psychotic break from the stress of being trapped underground, and is actually killing her friends. The evidence consists of the trauma Sarah suffered in the car crash that killed her husband and daughter, and the fact that she is seen taking pills before leaving the cabin. Admittedly, Sarah
* The suddenly dramatic and shocking ending of "Reckoning Ball" is followed by the relaxing, lighthearted comedy of its sister episode, "Clubbed".
* The Sudden+ option. Initially, some players would drape a towel over the screen to cover part of the note lanes, in order to force themselves to focus on only the most imminent notes. (There was already a "Sudden" option, which would cause notes to be invisible until about halfway down the screen, but it wasn't adjustable whereas a towel was.) This led to the introduction of Sudden+, which puts a static "Lane Cover" image on the screen covering just the top portion of the lane, and each player can individually adjust how much of the lane it covers. The image

itself is also selectable from a few dozen options, most of which are based on songs in the game, but as of
* The Sudet crisis of 1938. In the crucial days following a secret summit between Chamberlain and Hitler, the Czechoslovak government gained complete control over the Sudet territories, disarming the Nazis and dissolving the local Nazi party. By September 18, the Prague government had the upper hand, while the Nazi leader Konrad Henlein had to flee prosecution for high treason. Three days after
* The Suez Crisis was a military victory but political failure for Britain and France. When Egyptian President Gamal Abdel Nasser nationalized the Suez Canal, Britain and France sought to retake the canal by having Israel capture it and then the two European nations intervene under the guise of peacekeeping. While the British, French and Israeli military forces soundly defeated Egyptian military forces, the ruse was revealed to the public and they subsequently lost the political goodwill from the international community. US President
* The Suffering, according to many theorists throughout the two games - human or otherwise.
* The Suffering allows you to start from the good or evil ending, and beating the game allows you to choose which to start from on future playthroughs. Which ending you begin from does have an effect on what happens in the rest of the game.
* The Suffering and has his eye on the main character. Even worse, at one point he appears to audibly fantasise you as a child... specifically as a little girl.
* The Suffering and it's sequel. Sometimes nearby phones ring. Don't answer. Don't even pickup the non-ringing ones.
* The Suffering and its sequel. The cameras are in on the scares. Sometimes they will only work until the proganist checks out the feed and sees something scary. Then static.
* The Suffering had a particularly sinister example, being partly a horror game set in prison. The game has an insanity meter that rises as Torque takes damage, when filled the player can choose to temporarily transform into The Creature until the meter is depleted. The more the player transforms, the more likely they will get the evil ending (amongst other factors). So if you're literally gunning for the good ending, you'd want to ignore than Insanity meter altogether, right? Well, hope you don't mind gruesome images and loud screams to randomly cover your television screen with anywhere from 10 seconds to 5 minute intervals, only ending once the Insanity meter is no longer full. Just try not to take damage at all!
* The Suffering had Slayer, Burrower and Arsonist Captains, which required the use of Torque's monster form to be destroyed.
* The Suffering has Torque, a con, trying to survive on an prison-island full of monsters. He has the ghost of his dead wife trying to help from the other side in many varied ways. She wants him to survive the night but help others along the way. Other entities do similar, but with the hopes Torque will go evil. Torque will meet a cowering guard and his wife says "He needs help!" and a demon voice says "It will be easier if you kill him."
* The Suffering his transformation and the weird attacks he uses while in the form of the monster: it's all just him slaughtering people with his bare hands. This becomes very obvious when other characters react with surprise at how many enemies Torque killed while transformed, but never seem to notice any physical change.
* The Suffering, IE the room full of Rorschach ink blots all over the wall, along with a dead guard on a couch with some strange device on his head that seems to have popped his eye out.
* The Suffering, in addition to scripted scares, you get sudden, short and completely random flashes of scary images accompanied by a high-pitched scare chord. It happens frequently in the later parts of the game. The result is that you are afraid even if you are backtracking or just standing on a spot with your character.
* The Suffering is a cross between psychological and physical horror. While you will be fighting inmates, guards, and wretched abominations, you will also encounter horrific hallucinations and the ghosts of Carnate Island's insane and psychopathic residents.

* The Suffering is a very interesting take on this. As a prison executioner, he made an entire career murdering people in different ways, but he stated that he was the only one focused enough to get the job. In fact, he was so focused that he gassed himself in the chamber, just to have knowledge of both sides of the "experience".
* The Suffering is one of these. It even gets lampshaded by a pot-smoking corrections officer:
* The Suffering Particularly when they drop their disguises and transform into charred, giggling corpses.
* The Suffering provides an entertaining little documentary on haunted prisons as a little extra you don't even have to unlock!
* The Suffering. Then, the final boss proposes to "cure you"—and it sort of works. In the sequel, you can transform without harm, even if you're playing as a good guy.
* The Suffering, the personification of all those on the island that were burnt at the stake. Lampshaded by Consuela, who notes that burning was non-existent among Puritans in other parts of America.
* The Suffering. The protagonist finds a prison guard who had somehow just been bisected horizontally. A mercy bullet is a good thing right now.
* The Suffering: Ties That Bind a one-hit-kill weapon, uses up a weapon slot, and melee combat with the later enemies in the game is kind of suicidal.
* The Suffering: Ties That Bind at his head point-blank, with predictably gory results.
* The Suffering which symbolises execution by decapitation not only has forearms replaced by blades, but the legs below the knees too. Don't ask how it manages to maintain balance when running.
* The Suffering who manifests from old film projectors. Much creepiness ensues, including having to destroy the projectors to stop him from reviving certain enemies.
* The Suffering. Why are those malefactors suddenly appearing and murdering everyone on the island and in the city?
* The Suffering wrecking havoc on the darkest, most horror-ridden structures and settlements of man? Check. The opportunity to lay waste to them with machine guns and grenades? Check.
* The Suffering, you're on an island overrun by hideous monsters. In the sequel, you're back in your hometown—and the monsters have followed you.
* The Suffragette: Feminist activists who fought for the right of female citizens to vote in elections.
* The Suffragette: Women fought for their suffrage. After decades of peaceful activism like petitions and public appeals, Suffragettes stepped up their game with civil disobedience, vandalism like destruction of property and so on.
* The Sugar Bowl casually takes off her top inside her apartment, despite Tuca and Bertie being in her presence.
* The Sugar Bowl mouth falls open in shock. Francine closes it for him.
* The Sugar Bowl, Tuca borrows some sugar from Bertie's boyfriend Speckle which turns out to actually be the ashes of Speckle's grandmother. The results are then baked into a cake which Speckle ends up eating.
* The Sugar Bowl", Tuca's journey to Bertie's apartment is done in the style of an 8-bit video game.
* The Sugarhill Gang, Big Bank Hank brags about having a color TV, which is decidedly unimpressive by modern standards. Color TVs were already common in the late 1970s.
* The Sugarhill Gang bragged about owning "a sunroofed Cadillac". Nowadays, a sunroof is actually considered behind the times, being displaced by the glass roofs, and Cadillac does not have the prestige it had in the 70s.
* The Sugarland Express are petty criminals who fall into this by accident when they panic and steal a car after a cop pulls them over, then panic again and kidnap the cop.
* The "Sugar Lump" is a perfect cube the size (and mass) of a small moon. A

character walking across one notes that as you walk toward one of the corners, the flat "ground" under you increasingly seems to tilt until it seems like you're walking up a 45 degree incline. Once you reach the edge the gravity makes it feel like you're on top of a mountain sloping down on all sides.
* The Sugar Plum Fairy speaks with a female voice (as opposed to male one).
* the suggestion than the rest of Mexico. Also, as recently as the 1980s the annexation of Baja California was proposed as a means of alleviating Mexico's foreign debt owed to the United States.
* The suggestion that one might occasionally have to subsist on recycled human is one of the
* The suicidal "Jeri" androids in Episode 3 have no apparent physical capabilities beyond those of humans. One kills itself just by walking into a river to drown! It's a little unclear if the robot geishas in the very first episode had superhuman strength or not. They had their hostages pinned down in submission holds which would be difficult to break out of in either case. However, they certainly weren't bulletproof.
* The Suicide Exhibition begins a series depicting WW2 in which an alien menace is attempting to infiltrate and subvert the Earth's civilisation during the war, with Alastair Crowley's cult worshipping them and the Nazis trying to weaponise them; their main weapon is the Ubermensch, created from humans infected with an orange fungus.
* The suicide girl strips. She usually stops because a guy jokes about raping her corpse,
* The Suicide Machines the whole time ("You won't lay down, you'll hardly sit / I give you a bath when you smell like shit, but you don't mind..."). The joke is made more obvious by the music video, which follows the antics of a fursuited human behaving like a real dog.
* The suicide of Lane Pryce. After a season of discussing the faulty electrical system of SCDP's prospective client Jaguar, Lane's wife gets him one shortly after they win the account. The
* The Suicide of Rachel Foster was a neat mountain hotel in its heyday, accommodating hikers and skiers alike. However, since Rachel's death 10 years ago, it doesn't fare well financially, leading to its slow deterioration. The second floor experiences serious water damage, and an entire wing lacking windows because of an aborted renovation, making that part completely falling apart. To add to the creepiness of the place, the hotel has recently closed down due to the death of the owner, making Nichole being alone in the whole building (or not, but the alternate scenario is probably even worse).
* The suicide of William Kogut in San Quentin Prison in 1930 when he fashioned a pipe bomb out of a pack of playing cards, a hollow wooden bed leg, and some water.
* The Suicide Shop because of the scene where Marilyn Tuvache dances in the nude while her younger brother Alain and his friends watch outside her window.
* The Suicide Shop has Marilyn Tuvache pregnant with the child of her lover Ernest near the end of the book.
* The Suicide Shop, where life has become so meaningless, are rampant. And suicides become so normal that no one bats an eye when they happen, or even when they discover that a friend wants to kill themselves. And the happiest and most colourful place of all is, of course, the suicide shop.
* The suicides of Hitler and Eva Braun, Mr. & Mrs. Goebbels and other Nazi bigwigs in
* The Suicide Squad, an actress who was unknown outside of her native Portugal.
* The Suicide Squad an explanation in his ear; he's not amused and shock-prods Harley until she passes out.
* The Suicide Squad are introduced into the first few minutes of the movie and promptly killed off.
* The Suicide Squad: Bloodsport's bracers include an extensible cable apparatus that he uses to help climbing, notably when trying to infiltrate the palace. He also uses it when Jotunheim is crumbling around the Squad to break his fall, although he still gets slammed into a wall, and the steel tip embedded in concrete

can't support his weight for long.
* The Suicide Squad: Bloodsport spends half of the movie like this, reacting to every spot of bad luck or bizarre idiosyncrasy of his teammates with deadpan resignation.
* The Suicide Squad escapes captivity and goes on a rampage, leaving the Squad members to throw everything they have at it.
* The Suicide Squad in as little clothes as possible, as there's a close-up of his crotch in the underwear.
* The Suicide Squad: Just as the Squad is about to raid the presidential palace to free the captured Harley Quinn, Rick Flag hears "What are you guys doing?" and does a double take upon seeing... Harley Quinn, free as a bird.
* The Suicide Squad less immediately ridiculous "The Detachable Kid" (TDK for short). It's still bad enough that Rick Flag and Harley Quinn immediately mock it. His real name was also changed from "Floyd Belkin" to "Cory Pitzner". These were likely done due to a combination of the character being an adult member of the Suicide Squad instead of a teen member of the Legion and the fact his creator, Gerard Jones, plead guilty to owning child porn.
* The Suicide Squad man/shark hybrid descended from an ancient shark god who likes to kill his enemies by eating them. Physically, he is easily the toughest member of the Suicide Squad in the film, able to withstand a ton of gunfire and get back up, and also the most dangerous in hand-to-hand combat.
* The Suicide Squad, on what is theoretically an infiltration mission, and not bothering to check whether Weasel could swim before having him jump from an airplane over the ocean.
* The Suicide Squad, TDK's abilities to detach his arms and slowly float them over to the enemy is played for comedy for how ineffective it is.
* The Suicide Squad. The film only reuses four characters from the original movie. One of the original characters dies before the opening credits and another dies at about the midpoint. It follows a new story and new team. The events of the first movie are never mentioned.
* The Suicide Squad: There are shots where the audience sees from Polka-Dot Man's point of view and how he literally sees everyone as his abusive mom.
* The Suicide Squad. The Squad capture The Thinker when he comes to a gogo bar he regularly visits, but then soldiers enter the bar to conduct a search, so they have to hustle the Thinker at gunpoint out the back via the strippers dressing room. Despite his peril The Thinker has a big grin on his face.
* The Suicide Squad, this is implied to be deliberate disassociation rather than actual callousness.
* The Suicide Squad when Blackguard panics about being seated next to Weasel, who he's scared is a werewolf, Flagg is quick to reassure him.
* The Suicide Squad when Bloodsport and Peacemaker begin to one-up the other’s attempts at stylish kills.
* The Suicide Squad. When Bloodsport is visited by his daughter in prison, she confesses that she got arrested for shoplifting a TV watch. Bloodsport tries to give her advice on how to steal better under the watchful eyes of the security guards, which leads to them having a shouting match because she wants him to be a better parent instead.
* The Suicide Theory, Percival desperately wants to die, but keeps surviving his numerous suicide attempts, going so far has to hire a hit man, Steve, to off him (he survives three further attempts by Steve to fulfill that contract). Steve tries to convince Percival that as he is essentially invincible, he can do whatever he wants without any lasting consequences at all, but Percival isn't convinced, and his many attempt to die leave him looking increasingly chewed up throughout the movie.
* The suit also somehow prevents headcrabs from latching onto his head and turning him into a headcrab zombie even though it doesn't have a helmet.
* The Suite Life Movie, when the twins do things to hurt themselves in order to harm the other, Zack gives himself a wedgie that Cody also feels.
* The Suite Life of Zack and Cody - Actual Closet variant, completes the homage by

having their mother open the door so that everyone tumbles out.
* The Suite Life of Zack and Cody: A few episodes has either Zack and/or Cody in a dress, and they do look pretty convincing.
* The Suite Life of Zack and Cody, a hawk steals a ring a man was going to use to propose to his girlfriend with. Unfortunately, the man complains that because he earned it from a salary. The girlfriend is not pleased and breaks it off.
* The Suite Life of Zack and Cody. Also, Mr. Moseby, who is black, is seen as a rich man. Most blacks in the Revolutionary War were slaves, but it is possible he was a freeman.
* The Suite Life of Zack and Cody a mall security guard refuses to believe that one of the twins' friends actually is a prince and says "And I'm the Queen of Sheeba". The prince, being incredibly naive, believes her and refers to her as "your majesty" for the rest of the episode. She thinks he's being a funny boy smart aleck until she learned the truth. He even promotes her to his cabinet at the end.
* The Suite Life of Zack and Cody: Appears in a prehistoric setting when the twins travel a bit too far back in time.
* The Suite Life of Zack and Cody, Arwin screams hysterically whenever the word "bowling" is said in front of him. It is eventually revealed that he was once a star bowler and even won a trophy for it. But a head injury inadvertently inflicted on his mother prompted him to relinquish his love for bowling ever since.
* The Suite Life of Zack and Cody as president. She outlaws cellulite and being heavier than a certain weight.
* The Suite Life of Zack and Cody break in the final episode of the series.
* The Suite Life of Zack and Cody by Talking Lightbulbs, in the manner of a typical frame-lit vanity mirror.
* The Suite Life of Zack and Cody Carey gives us this little anecdote.
* The Suite Life of Zack and Cody, Carrie apparently escaped from a date once by going to the bathroom and escaping out the window.
* The Suite Life of Zack and Cody: Cody discovers this about a certain undead creature in the most inopportune way possible.
* The Suite Life of Zack and Cody, Cody gets frightened in a supposedly haunted room and leaps into Maddie's arms. Maddie promptly drops him. When he tries it again with London later, she doesn't even try to catch him.
* The Suite Life of Zack and Cody courtesy of Zack. Their mother is not amused. The second time gets Zack grounded and removed from the bowling team despite him being the star player.
* The Suite Life of Zack and Cody: "Doin' Time in 2330." After Zack and Cody deliberately skip out on their punishment to take part in London's web show (along with The Cheetah Girls, Chris Brown and Maddie), Carey snaps, to some degree.
* The Suite Life of Zack and Cody: Done intentionally in the episode "Have A Nice Trip". To prove that a guest was lying about having been hurt by Zack, the twins enlist Maddie's help as a fake hotel masseuse, who, among other things, uses burning hot rocks as part of the massage, all in an effort to make him admit his injury is fake.
* The Suite Life of Zack and Cody embodies every characteristic of the dumb blonde apart from the actual hair color while Maddie is a good student, very logical, and has the most common sense out of all the characters. One episode features an alternate reality where things in the hotel are swapped around with Maddie being the heiress and London being the candy counter girl. Here, the trope is played straight with Maddie, so much that she makes Zack and Cody's London look like a genius.
* The Suite Life of Zack and Cody episode "Arwinstein", Zack and Cody stumble upon a secret laboratory in the hotel, where Arwin created and then hid away his monstrous robot. When the twins ask about it, he attempts to deny that the room even exists.
* The Suite Life of Zack and Cody episode "Cody Goes to Camp", when London is driving slowly with Zack, Maddie, and Muriel on the interstate, they get pulled over by a cop and is given a warning because London is still learning how to drive. But when Muriel starts driving really fast and they get pulled over by the same

cop, Muriel and London makes up the excuse that Zack recently ate some bad chili cheese dogs and he needs to go to the hospital which the cop believes because this happened before.
* The Suite Life of Zack and Cody episode "Midsummer Nightmare''. A heated argument breaks out during this routine.
* The Suite Life of Zack and Cody episode "Team Tipton". Maddie, Zack, Cody, Esteban and Arwin.
* The Suite Life of Zack and Cody episode "The First Day of High School", Cody says "kudos" to the school bully, who answers, "What did you just call me?"
* The Suite Life of Zack and Cody fanfic "Zoey 1803" has a last name version with Zoey Martin played by Meaghan Martin.
* The Suite Life of Zack and Cody features Zack getting beaten at mini-golf by Ella. After asking Mr. Moseby to train him and winning the rematch, he becomes quite arrogant.
* The Suite Life of Zack and Cody had a Check reference from the dog Ivana was supposed to mate with, but she went with Scamp.
* The Suite Life of Zack and Cody had Sister Dominique showing her a camp brochure with a waterfall and various other natural wonders...then the camp turns out to be horrible (they once had leech cobbler as a meal and are across the road from a slaughterhouse).
* The Suite Life of Zack and Cody has an alien say "Boy, humans are ugly!"
* The Suite Life of Zack and Cody has Cody suggesting writing a one of these to the city council in order to prevent a park from being bulldozed.
* The Suite Life of Zack and Cody has Leo, a rich, lecherous, certifiably-insane old-timer, played by Rip Taylor, who took lessons at Esteban's dance school, and was constantly hitting on Carey, and Shannon, his private nurse.
* The Suite Life of Zack and Cody has London and Mady go to a Catholic School. The nuns there always wear their hats, even when hiking through the woods in tracksuit or coaching the volleyball team.
* The Suite Life of Zack and Cody has Maddie trying to hold down a date on a hot day and keeping her hair from frizzing up. It turns out that the date has his own problem, in which he, in London's words, "sweats like a donkey in a sauna."
* The Suite Life of Zack and Cody has no problem being constantly affectionate to the boys in public and generally tries to get involved in their social lives, ignoring their embarrassement of her.
* The Suite Life of Zack and Cody, he got his kiss from her. One of the most memorable moments is in the episode "A Prom Story" where they shared a prom dance.
* The Suite Life of Zack and Cody: In "Ask Zack", a girl Zack was dating does this exact trope before scolding him.
* The Suite Life of Zack and Cody: In "It's a Mad, Mad, Mad Hotel", as the Tipton guests and staff fight with each other over a treasure hidden in the hotel, Arwin randomly shouts "DOGS HAVE CLEANER TONGUES THAN PEOPLE!", making everyone pause for a moment and take a step away from him.
* The Suite Life of Zack and Cody: In one episode, London is staying over at Maddie's and is shocked to discover that she sleeps in a pull-out bed. She later ends up trapped between the wall and said bed.
* The Suite Life of Zack and Cody: In one episode, Zack and Cody cut school and go to the mall where they enter a contest. Cody doesn't want to use their real names though so they come up with aliases. Cody enters under the alias "Wing Lee". What alias does Zack enter under? "Cody Martin". The alias works until their mom finds out.
* The Suite Life of Zack and Cody: In "Summer of Our Discontent", Zack receives several hanging wedgies from his classmates at summer school for being perceived as a nerd.
* The Suite Life of Zack and Cody: In "The Arwin That Came To Dinner", the twins are trying to help Arwin after his mom moved out of the house, and they find a collection of owl statues that look like they are staring at you. The twins decide they have to get rid of them because of how creepy they look. Zack decides to find a new home for them, and places them in Mr. Moseby's office. Mr. Moseby sees the

owls, and he's freaked out.
* The Suite Life of Zack and Cody is a hotel lounge singer, hardly a secure job to begin with, and she manages to keep the job in spite of Zack and Cody's disruptive and destructive antics.
* The Suite Life of Zack and Cody. It's presented as one example among many of her frivolity and status as a wealthy hotel heiress.
* The Suite Life of Zack and Cody. It's revealed that he has extremely unrealistic ideas of what will happen to him if he doesn't ace every class. In a nightmare sequence he's made to be the janitor of a "Big Snooty Ivy League College" due to not acing Wood Shop. As he hysterically claims to his mom when she thinks he's putting too much pressure on himself:
* The Suite Life of Zack and Cody. Just watch the episode "Orchestra" and you'll see what we mean.
* The Suite Life of Zack and Cody London dates the dumb lifeguard Lance for a few episodes. The smart Maddie used to have a crush on Lance too, before realizing he was a waste of time.
* The Suite Life of Zack and Cody, London gets her tongue stuck a frozen smoothie that Zack had stuck on a popsicle stick.
* The Suite Life of Zack and Cody: London Tipton is often referred to as the "airhead heiress" who, depending on the episode, may not know what a book 'is'' let alone how to read it, or be capable of doing anything for herself.
* The Suite Life of Zack and Cody, Maddie falls for a rich guy and attempts to look and act rich so he will like her.
* The Suite Life of Zack and Cody, Maddy works at a fast food restaurant to supplement her income from the Tipton candy counter in one episode. London briefly joins her as an employee, then buys the chain in order to get back at the overbearing manager.
* The Suite Life of Zack and Cody, many times in the earlier episodes. However, they haven't used it as much now that the one twin is clearly thinner and slightly taller than the other one.
* The Suite Life of Zack and Cody of Cody's girlfriend Barbara stomping on his foot, causing him to do the hop, every time he was more overly-academic than her (ex. winning a competition or taking more AP classes). By the end of the episode, she tries to do it again, only to end up doing the hop herself because Cody was savvy enough and wore steel-toed boots.
* The Suite Life of Zack and Cody (off-screen). Soon, Tippy comes from behind, shoving Cody forward and — well you can guess what happens from there.
* The Suite Life of Zack and Cody of Zack's to have a French girl he's got the hots for but who is only interested in Cody to break up with him, as all of the translations are insults.
* The Suite Life of Zack and Cody. One twin had to convince the babysitter they were both in the bathroom while the other was sneaking off for the latest Wacky Hijink.
* The Suite Life of Zack and Cody season 1 "Dad's Back", when Carey gets mad at Kurt for making their home a mess and letting Zack and Cody watch a horror movie:
* The Suite Life of Zack and Cody seems to think that rich people are above the law. One of her fellow airheaded rich friends responds to a saying her dad said ("There's two things rich people never do: Apologize and pay taxes") with this:
* The Suite Life of Zack and Cody", the cast investigates a purportedly haunted room in the Tipton and attempt to contact the ghost of a woman who died in there. It takes a spooky turn when the cast minus Zack disappears during the séance and Zack gets scared out of his mind, however it's later revealed to be nothing but a prank on him in revenge for all the pranks he's pulled.
* The Suite Life of Zack and Cody: The main plot of "Big Hair & Baseball", in which Mr. Moseby becomes a pariah after catching a baseball and causing the Boston Red Sox to lose, is an obvious rip on the Steve Bartman fiasco.
* The Suite Life of Zack and Cody, there was the episode "Twins at the Tipton" where Maddie and London double date with twins and Maddie goes out with the nerdy twin. He starts saying all of this gross trivia at the dinner table, including that

it takes "3 hours for meat to move through your intestines so the bile can churn up the gastric acid." Maddie then replies that she'll have a salad.
* The Suite Life of Zack and Cody: The Tipton Hotel staff and the main characters are shooting a commercial for the hotel, when London, the star, missteps and rams into one of the dancers.
* The Suite Life of Zack and Cody" The tourists all run away, as Cody shrugs it off saying, "I guess it was bouncy."
* The Suite Life of Zack and Cody the twins start a pie-throwing fight, with some flour, an egg and flying emotions.
* The Suite Life of Zack and Cody: Tipton Trouble, "The best way to beat that game is to eject it and physically destroy it."
* The Suite Life of Zack and Cody to be nice, until the absence of her father among other things changed her.
* The Suite Life of Zack and Cody to create a romance with Maddie. London's reaction?
* The Suite Life of Zack and Cody to win the prize money so he and Zack can buy bikes.
* The Suite Life of Zack and Cody uses wipes while inside the Tipton. These wipes consist of boarding the Tipton elevator and going to the floor where the next scene is (Floor 23 is the boys' room).
* The Suite Life of Zack and Cody where Cody lies to Mr. Moseby as to why the twins were standing in the hallway.
* The Suite Life of Zack and Cody, where some of the main cast move to a cruise ship to attend a special school.
* The Suite Life of Zack and Cody, where the current group of characters are huddling to discuss if they should get a newcomer involved in finding a treasure in the Tipton, whilesaid newcomer is only a few feet away..
* The Suite Life of Zack and Cody who simply doesn't understand that you're not supposed to treat people that way.
* The Suite Life of Zack and Cody, Zack accidentally causes slight damage to the wall of another suite. When he and Cody are punished to fix it with Arwin, he misunderstands Arwin's instructions and manages to damage the wall so badly, it breaks through to the other side where the girls' soccer team are. He, Cody and Bob proceed to make two more holes in the wall and spy on the girls, getting poked in the eye and even more trouble with Mr. Moseby for it.
* The Suite Life of Zack and Cody Zack and Cody are looking to find the food critic who constantly wears disguises. They find an asian man with a grey beard and assume he is the critic, so they try to vacuum the beard off, but after discovering the beard's real and the vacuum can't be turned off, Cody goes to get the scissors and starts walking. Zack tells him to hurry, but Cody says he can't because mom said not to run with scissors.
* The Suite Life of Zack and Cody, Zack and Cody's divorced parents, Carrie and Kurt, are on good terms. They only really fight when Carrie calls Kurt out for his overly slack approach to parenting.
* The Suite Life of Zack and Cody, Zack and Max accidentally hold hands when they reach for the same slice of cake.
* The Suite Life of Zack and Cody, Zack asks Bob to help him sabotage Cody's date with a French girl and keeps trying to convince him that they are not a date.
* The Suite Life of Zack and Cody. Zack calls up the school that he and Cody goes to and "disguises" his voice as his mom, while it is obvious that they taped his mom's voice for the scene and he is lipsynching.
* The Suite Life of Zack and Cody, Zack dreams that he and all his friends were the ones that participated in the titular event. In this dream, the cast is talking about the skyrocketing taxes, only for Maddie to exclaim that she may not afford the down payment on her used horse. Then she gives us this tidbit:
* The Suite Life of Zack and Cody, Zack has to fill in for his brother for an interview when Cody accidentally dyes his hair red and is too embarrassed to show himself to the interviewer. He tries to act out the words to tell Zack what to say, but he ends up misinterpreting every signal that Cody sends out to him.

* The Suite Life of Zack and Cody, Zack has to pretend to be Cody for an interview and Cody (who can't be himself after accidentally messing up his hair and not wanting to be embarrassed) stands from behind trying to signal his brother over what to say. It didn't go well.
* The Suite Life of Zack and Cody: Zack is persuaded to take tomboy Max out on a date. She appears at the restaurant in a nice dress with her hair done up and Zack's jaw drops.
* The Suite Life of Zack and Cody: Zack is ten minutes older than Cody and often ventures into this territory when he picks on Cody, such as calling him nerd-related names, stealing his money, and locking him outside the hallway wearing only a towel.
* The Suite Life of Zack and Cody. Zack (the slacker doofus) gets the result of "millionaire". Cody (the studious dork) gets "custodial engineer". Cody's even in the fantasy to sweep up....
* The Suite Life on Deck. After sneaking out on a date after curfew, Cody and Bailey run towards each other in slow motion on the sky deck... and accidentally bump into each other the second they make contact.
* The Suite Life on Deck after Zack found the crown of Zaria and it started vibrating. Zack used its vibrating to try to get Cody out of his bad mood, only for Cody to swat it away
* The Suite Life on Deck, although he left the series later on and Maya fills the role after he leaves.
* The Suite Life on Deck and arguing over who should get the last wish. When London claims that Bailey should get it and calls her "the most beautiful girl in the world", Bailey immediately realizes she is dreaming knowing that London would never compliment her.
* The Suite Life on Deck as a scam to get girls. However, Mr Moseby finds out and forces them to throw a real beauty pagent as punishment as well as appointing them judges of the contest.
* The Suite Life on Deck at the end of season two, they weren't so much ending their relationship as putting it out of its misery.
* The Suite Life on Deck: Bailey realizes she is dreaming when London calls her "the prettiest girl in the whole world" and tries to pinch herself to wake up, naturally finding that she can't feel anything in a dream.
* The Suite Life on Deck, Bailey's ex-boyfriend Moose is entirely unaware that Cody a) has feelings for her and b) sees him as a romantic rival. Throughout the episode he is kind to Cody, doing things such as thanking him for trying to make Bailey feel less homesick and being reluctant to arm wrestle him for fear of injuring him. Cody, on the other hand, continually tries to show him up to impress Bailey, only to fail at every event, which Moose sees as fun competition.
* The Suite Life on Deck created a vacancy by bribing her roommate to quit the program, so Bailey became her new roommate instead.
* The Suite Life on Deck episode "London's Apprentice," when Kirby Morris shows Mr. Moseby a bag (he thinks is) containing a million dollars, Moseby's first instinct is to invoke this trope:
* The Suite Life on Deck example in Zack Martin, who early in Season 3 fell head-over-heels for the new girl Maya, and vowed to reform his womanizing ways for her sake.
* The Suite Life on Deck]] features the fictional European country of Liechtenstamp in it's first season.
* The Suite Life on Deck focuses constantly on Cody, while his twin Zack is the comic relief. And it also focuses a lot on Bailey, Sometimes even more than Cody.
* The Suite Life on Deck, George plays London's future descendant. When the spaceship is attacked by hostile aliens, he says "Oh, my! How many times do I have to go through this?"
* The Suite Life on Deck had an episode that put the main characters into different fairy tales. They had fallen asleep in class and the fairy tales themselves were all just dream they were having.
* The Suite Life on Deck had Cody trying to impress Bailey at the school dance yet

failing, and suddenly getting stuck in a time loop because of lightning striking the ship as it crossed the International Dateline. The loop is solved when Cody manages to slow down the ship's speed.
* The Suite Life on Deck had the owner of the ship drugged and sent in a balloon. And then later someone got away in a plastic bubble. The plastic bubble was a giant beach ball rolled off stage with nobody in it, and the flying balloon appeared to be done with a blue-screen chair and with characters looking up a lot and voiceover.
* The Suite Life on Deck has an incident where Cody translates some hieroglyphs as instructions to free Bailey from a curse unleashed by a crown. "...that or a recipe for fish tacos".
* The Suite Life on Deck, he and Zack had encountered a woman's ghost at the Tipton hotel. Lampshaded by Zack when he points this out to which Cody dismisses that experience as them being "hormone-crazed 12 year old boys seeing women popping out of a lot of places".
* The Suite Life on Deck, he fabricates the excuse that he was caring for Bailey, who'd injured her ankle. This leads to Bailey reluctantly faking an injury, and eventually the entire student body of Seven Seas Highs being drawn into a web of lies that is increasingly complex and ridiculous. It all comes crashing down the next day when Cody misses yet another assignment, having been too busy maintaining the farce.
* The Suite Life on Deck. He's put on hold overnight and wears a headset so that he can perform his duties on the ship while holding. The call is eventually answered by Zack and Cody, who are visiting a call center while the ship is in port.
* The Suite Life on Deck: "I'm tired of you always putting me down, being rude to me, and putting live poisonous animals under my pillow while I sleep."
* The Suite Life on Deck, Kirby joins Ms Tutwiler's class because he never finished high school. Unfortunately, he becomes too stressed out to take the final exam, and Zack and Cody must find a way to prepare him so he can graduate.
* The Suite Life on Deck" Le Pétomane-style after eating the Mexican buffet. When his sister shows up, she clears the deck. "I've been holding that one in since I got on the boat!"
* The Suite Life on Deck, London does this in an attempt to thwart Zack, Cody, Bailey, Marcus, and Kirby's standoff for the whales in the engine room. Marcus was the only one fooled.
* The Suite Life on Deck: Maddie's kiss to Zack allowed him to do an overkill of noodle-whacking towards the prince, enough for the prince to surrender and run home crying for his mommy!
* The Suite Life on Deck". Marcus says something along the lines of "Why do we have to wear these outfits? And the guys in red always get killed." Then a guy in a red shirt opens a hatch and gets sucked into space. Marcus replies "See?"
* The Suite Life on Deck, Miss Tuttweiler says that London won Senior Prom Queen, and in the series finale, it's confirmed that London was held back at least twice.
* The Suite Life on Deck. Models come on the boat in one episode, so Zack suggests to Marcus they throw a party. Marcus's response:
* The Suite Life on Deck, Moseby and London, on separate occasions, tell a joke (or perhaps two different jokes with the same punchline) whose punchline is "Nougat!" Apparently, the guests find it hilarious, leaving the audience to wonder what was so funny.
* The Suite Life on Deck, Mr Moseby learns Zack and Cody have enrolled in the on-board school. His response is to scream, run, and throw himself overboard. Carey comments with complete sincerity that he took that better than she thought he would.
* The Suite Life on Deck: The studious twin Cody is paired with Bailey who is just as smart and nerdy as he is.
* The Suite Life on Deck, they had an episode where Cody and Bailey were taught to have fun by Mrs. Tutweiler (they had come into to class on senior skip day and Mrs. T had had it with their interrupting her reading of a romance novel). Of course, this being the 3rd season, Cody and Bailey took it as an opportunity to

hurt each, then their teacher, and finally after the game, they analyzed the science behind it.
* The Suite Life on Deck until Zack in desperation said he wanted to go out with her.
* The Suite Life on Deck, upon learning Zack, Woody and Marcus set up a fake beauty pageant, Moseby punishes them by making it real. At first, the boys are ecstatic, before being told that they have to do the setup and cleanup all by themselves and aren't allowed to flirt with the contestants.
* The Suite Life on Deck was absent from 9 episodes: "The Mommy and the Swami", "Mom and Dad on Deck", "The Wrong Stuff", "Splash & Trash", "Cruisin' for a Bruisin'", "Any Given Fantasy", "My Oh Maya", "Das Boots" and "Computer Date". Doc Shaw was absent from 4 episodes: "Seven Seas News", "The Silent Treatment", "Rat Tale" and "So You Think You Can Date?". Phill Lewis was absent from 16 episodes: "International Dateline", "Flowers and Chocolate", "Boo You", "Shipnotized", "The Wrong Stuff", "Kitchen Casanova", "Family Thais", "Goin' Bananas", "Can You Dig It?", "Marriage 101", "Seven Seas News", "The Silent Treatment", "Rat Tale", "Senior Ditch Day", "My Sister's Keeper" and "Frozen". This makes Dylan and Cole Sprouse the only cast members to appear in every episode across both shows.
* The Suite Life on Deck: Was Mundane to start with, but then you get plotlines like sentient robots who created themselves trying to take over the ship, having to travel into the future to prevent the ship from an alien invasion, and having to fend off an ancient curse put on you by a dead queen's crown.
* The Suite Life on Deck. When Zack asks Moseby how long will he be there, Moseby tells him that it's permanent, or until Zack graduates, but since he never will it might as well be permanent.
* The Suite Life on Deck where Cody was raised by their father and Zach was raised by their mother.
* The Suite Life on Deck where Zack and Cody desperately try to prevent their parents from living on the ship with them in fear of being embarrassed all over the world.
* The Suite Life on Deck where Zack, Cody and Bailey put on white paint and pretend to be greco-roman-esque statues. Points for the fact that they interact with their teachers and Mr. Moseby and no-one notices.
* The Suite Life on Deck without Arwin, Carey and Maddie, though they have made appearances from time to time,
* The Suite Life on Deck, Zack Cody London and Bailey are running to safety when they hear an alarm about the ship sinking and seemingly fall overboard. However, they realize they are actually in a hot tub and that the alarm was just a drill.
* The Suite Life on Deck, Zack wins a coupon to a dinner for two for his girlfriend Maya (who is out of town at the moment) only to find out that it expires tonight and ends up taking Woody instead.
* The Suite Life series is shown to get terrible grades often shows poor general knowledge. His mother seems amazed he somehow passed history after he thought President Lincoln lived in Gettysburg and died at the movies (he refers to him as that Abe guy with the beard and the hat.). However, he's probably as smart as his overachieving twin brother Cody, but often lacks proper motivation and would rather coast through life than put in the work. He has been shown when putting in the effort to be an excellent student in even English which he failed. Part of the problem is that Cody is so smart that Zack feels that no matter how good his grades are or how well he does on an assignment, he will always be overshadowed by what his genius brother does.
* The Suite Life where Mr. Moseby knocks the same woman's wig off by accidentally hitting her with a pillow. She's wearing a different wig the second time and turns around to exclaim, "You again!"
* "The Suit on the Set": the characters return to L.A. to consult on a film, where they
* The Sultan of Sulu, Judge Advocate Pamela Jackson has Hadji read out to Ki-Ram the penalty for failing alimony payments in an Arkansas law book. Hadji accidentally starts reading out Pamela's recipes (which she had been filing in

there).
* The Sumerian demons Inanna and Ninlil also rely on blood magic (referred to as sanguimancy in-game). While Inanna uses the blood of Innocent people bound to torture wheels, Ninlil has herself locked within an Iron Maiden to spill as much of her own blood as possible.
* The "Summarize Proust" sketch has one entrance being a choir. They start singing, "Proust, in his first book, wrote about, wrote about," only to be cut off by the contest's buzzer before being able to say exactly what Proust wrote about.
* The Summation entirely and goes straight to pointing and saying "Him."
* The Summation, screaming, and it transitions to him behind bars. Cue credits.
* The Summation: When the detective does a speech about how they solved the mystery.
* The Summation while drunk, having accidentally drank an alcoholic wine (which he believed was non-alcoholic.) It goes about as smoothly as you'd expect.
* The Summer 2013 promo for Cartoon Network is one minute of surreal versions of the then-current shows and characters.
* The Summer 2021 series, where all six episodes were recorded from Broadcasting House in London with a virtual audience, had Jack Dee open each episode by describing it as being "part of London's _____ district", and explaining they were in an empty theatre, which was "nothing to do with Covid regulations, just (explanation which was usually something insulting the teams)".
* The Summer Before the War, Daniel proposes to Celeste after she became pregnant from a rape. Having a child out of wedlock was extremely shameful in the time period.
* The Summer Before the War takes place in a British town just before World War I.
* The summer camp where the scout troop jamboree is held is named Camp Site. McQueen reflects that this is better than the runner-up names, which included several variations on warnings like "Camp This Is Where You Die", and one name that features a double entendre about pegging.
* The Summer Islanders treat love and sex as a worship to their gods, meaning everyone is encouraged to have lots of sex with many different people. Prostitution is a widespread custom even among the nobility, and those who are the most "
* The Summer King Chronicles: Aesir gryfon in the Dawn Spire live in a strict Tier system that they inherit from their parents. Gryfon can move up a rank by accomplishing certain deeds. Your tier decides many things, including how high up your den is.
* The Summer King Chronicles: A gryfons breed is distinguished by their coloring: dragon-blooded Aesir come in reds, golds, oranges, and greens, Vanir come in greys, whites, browns, and blacks, and Dawn Spire Aesir come in greys, whites, browns, blacks, and shades of red.
* The Summer King Chronicles is a story about a young griffon who is at the age of maturity. Like others his age, he undergoes an initiation hunt. There he meets a female wolf who changes his world. Unlike with many depictions, the series depicts griffons as being more like actual animals than superpowered mythical beings.
* The summer of 1944 effectively sealed Germany's defeat. First came the D-Day invasions, when American, British, and Canadian troops landed on the coast of Normandy. The short-sighted micromanagement of the German Army by Hitler caused vital Panzer divisions to not be moved to the battle, allowing the Allies to establish a firm beachhead that soon became impossible to dislodge. A few weeks later, the Soviets launched Operation Bagration, which smashed the Wehrmacht's Army Group Center in Poland and wiped out divisions that Germany could no longer replace. These simultaneous battles shattered German morale, leading them to realize that defeat was inevitable.
* The summer of 2012 saw the Encore movie networks become addicted to the
* The Summer of Love was a worldwide catastrophe that sparked tremendous conflict and civil war. It is feared that, if it is allowed to occur, the Second Summer of Love could mean
* The Summer Of Massacre is a fat, deformed and seemingly supernatural man who raped and impregnated a teenage girl, and has been stalking her ever since.

Because, as he puts it, he's always wanted a son who he could "scare the living Hell out of!"
* The Summer of Sangaile: 17. It's Sangaile's age, plus recurring in several other ways.
* The Summer of Sangaile: Neither of Sangaile's parents seem to realize, or perhaps care, that she cuts herself.
* The Summer of Sangaile (queer female main character, lesbian supporting character; subject matter includes LGBT youth, queer female romance)
* The Summer of Sangaile: Sangaile has sex with Saulius, a male friend of Auste, early on. She doesn't seem to be very into it, however, only having enthusiastic encounters with Auste. It's left unclear why she even did it, as there was no buildup before the act.
* The Summer of Sangaile: Sangaile means "with strength". However, Sangaile is pretty quiet and passive, while noting her mom said she didn't really deserve her name. A major part of her arc includes growing strong and thus fulfilling it.
* The Summer of Sangaile: Sangaile meets Auste in the first scenes, becomes friends with her, then they get involved and their relationship remains core to the rest of the film.
* The Summer of Sangaile somewhat, since Auste is simultaneously much too casual about things such as Sangaile self-harming, and pushes her to fly in spite of having vertigo. Even so, she helps Sangaile overcome her issues.
* The "Summer of the Shark" in 2001 is often cited whenever this trope is brought up. During the summer of 2001, the media became focused on
* The summers between the high school years in the early seasons. The dominant one is the (in)famous "red K summer" between season two and three, which involves Clark on red kryptonite, which stripped his inhibitions and turned him into an amoral party animal, while Chloe visited him and tried to get him home. You could probably guess
* The Summer Sun Setback": Early in the episode, Chrysalis comes up with a plan and whispers it to her allies as the camera fades out. The audience only knows that they plan to use Twilight's friends to set up a distraction so as to break into the archives, but not the details. The plan works.
* The Summertime War is your average colonial war between Europeans wanting to exploit the land for profit, and the indigenous tribes who are in the way.
* The Summerween Trickster from "Summerween" is actually composed of "loser candy", all the Halloween candy that no one wants and throws away.
* The summonables are quite strange, in that you can assemble a (human) Skeleton from the corpse of any monster, up to and including giant spiders, pygmies, ghosts, small rat-like creatures, swarms of locusts and
* the summoned dream of an ancient, lost technological civilization created to preserve its people in the face of a war of extinction.
* The summoner Belgemine, who tests Yuna's progress throughout the game, later reveals that she is an Unsent during a sidequest.
* The summoner can change the Material they use by knocking more Petals into Spots. Doing so is necessary because different Materials have different strengths and weaknesses. Additionally, the Material's strength is proportional to the total number of Petals in Spots.
* The Summoner Trilogy and cradling him as he bleeds out; when he ends up surviving she apparently realizes her feelings for him are definitely not platonic, as she lightly kisses him after.
* The Summoner Trilogy, and the only way to advance up the social ladder is by having magical talent.
* The Summoner. You fight through a reality-bending Escher twister full of demons in search of a power-mad sorcerer, who keels over in two or three hits on Normal difficulty. The weakest super-unique creature in the game, hands down. Only the non-boss uniques in the first act are squishier.
* The Summoning, Claire is attempting to summon a demon, and needs troll fat to do so. She's inadvertently summoned some wish-granting clowns instead, and when they insist on granting her wish, she wishes she could get some troll fat. They proceed

to hand her a crudely-drawn map to its location (and she notes that her wish phrasing need work).
* The Summoning series, where any native of Earth summoned to Amee must eventually face the Snap — the call of Earth — and choose to either return home or stay forever.
* The Summoning. To most people, it resembles a person or creature that they associate with resurrection or immortality — very often Jesus — but its true form is a monstrous, withered horror that only resembles a human in general shape.
* The summon Onni sends to the crew long-distance in Chapter 13 is implied to need a source of fire to be able to show up at its destination. The hint towards this is that it shows up via Emil's flamethrower.
* The Summons, a convicted killer escapes and kidnaps the Chief Constable's daughter, demanding that his case be reopened. When he is finally cleared, he is not charged with the kidnapping.
* The summons are Disney characters from other worlds, mostly worlds that don't appear in the game. Some of them change the gameplay temporarily when summoned, like
* The Summon the Dastardly Filingricerixersifed spell summons a powerful psionic monster to help out but ages the caster by one year.
* The Sum of All Fears, a 700-page book, the first 500 pages are devoted to the miserable personal life of the main character. Then the action starts.
* The Sum of All Fears after introducing himself are "I wrote the book they ignored." Things get even more contentious between him and the film's director as the movie progresses.
* The Sum of All Fears an atomic bomb is smuggled into the U.S. by a group of German neo-Nazis, who expect the Americans to blame the destruction of Baltimore on Russia, leading to a war that would destroy or cripple both nations, leaving a power vacuum in which a new Reich can arise. (In Tom Clancy's novel, the villains were not Nazis but Palestinian extremists.)
* The Sum of All Fears, as a combination of job stress and drinking too much.
* The Sum of All Fears. A television in the Baltimore hospital that is hit by the nuclear blast is screening a live report of the President's emergency evacuation from the stadium (where the bomb is). The screen goes white a fraction of a second before the blast wave hits.
* The Sum of All Fears at the film's climax, when the President is contemplating a very real retaliatory strike in the aftermath of a nuclear detonation at the Super Bowl, and is seen going through the same procedures as in the beginning of the film.
* The Sum of All Fears, but with considerable changes to the plot; among others, this trope is not present in the book, where the villains were overall more realistic, and Arab terrorists rather than Nazis.)
* The Sum of All Fears English, there's no reason for Jack to speak Russian.
* The Sum of All Fears had terrorists detonate a nuke in the US, in the hopes of provoking a retaliatory strike against Russia, and ultimately an all-out nuclear exchange with the idea of wiping out the "Greater" and "Lesser Satan".
* The Sum of All Fears have several False Flag operations going, first trying to frame the Russians for nuking Denver, and starting a shooting war in East Germany, and when that falls through, blaming the Iranians (who in this case actually had nothing to do with it) for being behind the whole thing.
* The Sum of All Fears HQ joked that the relatively new (at the time) Command Center was made so that the actual place matched up with the common Hollywood depictions of the facility, which were better than the original structure.
* The Sum of All Fears is used in an attempt to defend the ship from a missile attack.
* The Sum of All Fears. It gives a detailed description of what happens during the escalation to DEFCON 1.
* The Sum of All Fears, the villains are attempting to provoke a war between the USA and the Russians by detonating a nuclear bomb at the Super Bowl, and by

instigating another attack; in the book, East Germans disguised as Russian commanders get the Russian tanks to fire at the American tanks near Berlin, in the movie, a well-bribed Russian air force general instructs his air wing to attack a US aircraft carrier. Jack Ryan and John Clark have to find out what really happened before one side starts nuking the other.
* The Sum of All Fears, the villains try to get the two world superpowers, the U.S. and Russia, to destroy each other.
* The Sum of All Fears, using a nuke to kill one man. Turns out to be the right call since Iran wasn't actually behind the nuclear attack at the Super Bowl.
* The Sum of All Fears was aware of this, with the main villain changed from an East German to a neo-Nazi.
* The Sum of All Fears, when Bill Cabot remarks how their nuclear emergency drills always include the Russians as the enemy.
* The Sum of All Fears when one of the Russian scientists decides to opt-out. The villain's butler first helps him put his jacket on, then strangles him with his own scarf right in front of the other scientists before any of them can have second thoughts.
* The Sum Of Our Sins It is told that the royal sisters' normal, tall, sparkly forms are this. Twilight reaches this form when she is in a fit of rage after finding out Rainbow Dash had been absorbed by the God's Sin. Turns out in this universe every race can ascend to a higher form, if they just break their body's magical limits. It's also worth mentioning that the Rainbow powers are used like this.
* The Sun Also Rises. Jake Barnes is very much in love with Brett Ashley. She even reciprocates! However certain practical (and metaphorically mental) issues preclude any consummation.
* The Sun Also Rises was an account of life experiences while living in Spain after WWI.
* The Sun & Moon arc has an episode where Ash and his classmates (and their Pokémon) actually play baseball.
* the Sun and a giant space crab, who have the 'tragically'-impossible dream of being together due to the differences in their castes, and they enslaved, oppressed, and abused all of humanity in an attempt to overcome boundaries
* The sun and stars are not mundane balls of flaming plasma and gas, but are instead holes punctured in the fabric of reality by Magnus (the et'Ada of light and magic who served as the "architect" for Mundus) and the Magna-Ge (his lesser et'Ada followers) as they fled Mundus during its creation. The holes lead to Aetherius, the realm of magic, and through them, magic flows into Mundus (which is visible in the night sky as nebulae). The Yokudan/Redguard tradition offers another theory, stating that the stars were placed in the sky by Ruptga, the "Tall Papa" and
* The Sun and the Moon. Every other moon we observe is given a name, but the Earth's moon is just called the Moon, and our solar system's sun is simply called the Sun. Sometimes people will refer to them as Sol and Luna to make it clear which sun or moon they're talking about, but those names are simply "sun" and "moon" in Latin.
* The Sun At Night, a dog from space who can speak human languages, and wears a high-tech suit with a blaster mounted on its back.
* The Sun at Night stars a heavily armed cybernetic talking dog from space who aids a rebellion against the Soviet Union.
* the Sunbeam Tiger and the Opel GT from the original. (The Karmann Ghia shows up with the Tiger in the earlier museum scene, alongside props like the shoe phone and the portable Cone of Silence.)
* The Sunbury Lunatic Asylum in Victoria, Australia. it was originally opened in 1864 as 'The Sunbury Industrial School' which was developed to educate and house destitute children. Orphans were sent there and boys were expected to learn a trade and girls were forced to do housework. In 1879, it became the Sunbury Lunatic Asylum, which stayed open until 1985. It was unoccupied until 1999 when it was purchased by Victoria University. The campus closed in 2011. Parts of the massive property are still used as a primary and specialist school, a radio station, and a

theater company, but the rest of the former hospital remains abandoned.
* The Sunbury Pump House, near Shepperton Studios, Surrey, provided interiors for
* The Sun Crusher, an indestructible supernova-causing superweapon which would qualify as a Spaceship Sue if such a trope existed, was captured, shiny and barely used, by the New Republic in Kevin J. Anderson's
* The Sun Crusher is actually aversion. It had only one prototype because it was ludicrously expensive. The prototype eventually gets dumped into a black hole, pretty much the most decisive way there is to destroy something. The secret base at which it was designed and built is destroyed, and most likely the plans are lost with it. Most of the design team is killed, and the only survivor
* The Sunday Philosophy Club. Isabel is only in her forties, though, but is definitely nosy enough. One review has even described it in terms of tea and coziness.
* The Sundering a great deal. There does seem to be a link to plants, but this isn't really explored in any depth.
* The Sundering. Satoris and his followers are just as capable of feeling and understanding love as any other being, they just happen to have made different choices.
* The Sundering Tolkien's world, except told from the side of the Dark Lord.
* The Sun Dog, a character thinks that a toy (not exactly a doll, but a stuffed panda, that talks) that her niece has is very creepy, and imagines that one day, it will say stuff like: "I think tonight after you're asleep, I'll strangle you to death" or "I have a knife".
* The Sun Dog (it's established that doing so is not entirely voluntary). Three guesses what ends up happening.
* The Sundowners: Paddy takes an appreciative glance at curvaceous Ida as she's undressing and says "You're built the way a woman ought to be built." He then compares her favorably to all the "sheilas" in town who are unattractively skinny.
* The Suneater. A Nahute is a drone shaped like a mechanical snake and capable of limited flight. The superstrong Cielcin can throw them at great distance and while the initial throw usually sets off the shield, attacking Nahutes have a good chance of not setting off the shield. On a successful attack, they latch on to the victim and can easily chew through the ceramic-titanium armour on a human to burrow inside for an agonizing death. A huge drawback is that the rare human with a cybernetic link can hack and disable Nahutes.
* The Suneater and the Empire does a treacherous attack during negotiations to successfully cripple the Cielcin.
* The Suneater for bombarding enemy positions and the colossi also double as shielded, heavily armored large-scale troop transports.
* The Sun Eater from them, called Chimeras. The Chimeras have an adamant, further enhanced strength and speed plus a number of built-in weapons. Then there are 6 special Chimeras...these are the Vayadan. The 6 Vayadan are further enhanced (the first one encountered was 30 feet tall and a living siege engine that could tear through fortress walls) and directly serve the Cielcin's "King of Kings" as its bodyguard and generals.
* The Sun Eater series by Christopher Ruocchio has the main hero Hadrian understand a passage from their sacred histories "...and the daughters of Columbia seduced the kings of the Earth". Columbia is the first American A.I. and her daughters are next generation A.I. To help sell other countries's governments on the adoption of A.I., these next-gen machines had holographic avatars of flawlessly beautiful naked women made of white light who offered gifts of more advanced technology and seamlessly efficient government.
* The Sun Eater series, regular soldiers are only allowed to carry ceramic blades for their swords. Ceramic blades are still extremely sharp but they can't match the High Matter swords restricted for nobile use. High Matter is a somewhat unstable substance that can alter shape when an electrical charge is run through it — in swords High Matter becomes a constantly wavering blade that is a single atom thick and can cut through almost anything.
* The Suneater, the 2nd book of the series, has a character Suzuha give Hadrian

some information about her famous father Kharn Sagara. She mentioned that in the distant past humanity created A.I. and it reached a point where they far exceeded human intelligence. The A.I. created star killing weapons far beyond human capacity - weapons that created cold, weapons that actually destroyed matter and weapons that tore the fabric of reality. Her father Sagara, liberated humanity and is the sole keeper of these weapons.
* The Suneater, the protagonist Hadrian Marlowe is killed by a Cielcin Prince. In the fight he gets his right arm and head cut off. But the enigmatic aliens, the Quiet, capture Hadrian's consciousness and yank a Hadrian from another timestream to house the consciousness. This Hadrian only has his left arm cut off and he stabs the prince in the back. Later Hadrian is disturbed when he finds his amputated right arm in a lake and he disposes of it, otherwise there's nothing wrong with Hadrian. Many did witness Hadrian killed the first time and they give him the epithet "Halfmortal", forming a cult around him.
* The Sun Eater who control interstellar trade and the Holy Terran Chantry, who control the usage and allocation of technology and are backed by the Inquisition. After that it's the nobility and below them, their retainers. Finally there's the serfs. Nobility can live for centuries because of genetic engineering, one of them (who's father owns the empire's largest source of uranium) is disturbed to see a mining representative who looks old at 40. The rep is complaining because their radiation suits are old and leaky, and their machines are mostly broken so they're reduced to using pickaxes.
* the sun is about to undergo a shift, becoming deadly to humanity as it is now. The mutated form will survive. Instead of being the usual Downer Ending
* The Sun Is Also A Star: Daniel and Natasha have this in many ways. He is more likely to go with his feelings, and also believes in things like fate. She is more intellectual, disbelieving in that idea because there isn't scientific evidence of it. Even so, she's charmed by him and his bet that he can make her fall for him within an hour actually works.
* The Sun Is Also A Star: Daniel's father is unhappy with how his sons are more individualistic than traditional Korean culture advocates. This is illustrated by the fact that the Korean family names come first, then the individual one.
* The Sun Is Also A Star: This roughly describes Daniel and Natasha's views. He believes in fate and just going with your feelings. She believes you should analyze things and go by what science shows to be true. Despite this, they both find each other attractive, and seem to learn from each other.
* The Sun is not the most erudite of newspapers in Britain it tends not to focus much on this sort of journalism, however one stand-out incident came from a March 1986 issue with the headline "FREDDIE STAR ATE MY HAMSTER!". This "story" has followed Freddie Star around since.
* The sunlight adds a sense of realism often found in documentaries, where mankind's brutality doesn't wait for dusk, as often seen on the news. (This is especially true for battles, which are often fought in broad daylight.)
* The sunlight illuminates the ugliness and gore in shocking detail and clarity.
* The sunlight is used to defuse the horror in a non-horror story, especially stories aimed at children, often failing for the above-listed reasons.
* "The Sun Makers" disguised as a human) gloats about how he intends to end the revolt the Doctor has stirred up. The Doctor is currently being held at gunpoint by a guard.
* The SunMakers-ny". Later, he offers the Doctor a raspberry leaf as a rare treat.
* "The Sun Makers" revolves around a fascistically evil and abusive tax collection regimen.
* "The Sun Makers": The Company, which makes planets like Mars and Pluto habitable for humans — and then runs the population into the ground through taxation. When the Doctor compares them to an invading army, their leader cheerfully admits they've done that, too, but found economic imperialism more efficient.
* "The Sun Makers": The Others threat to burn the Doctor with a red-hot iron.
* "The Sun Makers" was filmed in the real-life deep air raid shelters of London.
* The Sun Makers when a minion puts a gun to his neck. His reaction is a bored,

"Oh, it's you again." He turns back to the villain, and then the gun suddenly registers. "What'd I say?"
* The Sun Makers, when Leela is captured and sentenced to death by "steaming".
* The Sun - models who pose fully nude. Plenty of these models go on to become celebrities in their own right because of this.
* The Sunne in Splendour, Edward's children with Elizabeth judged illegitimate and their uncle Richard offered the crown.
* The Sun now as the title character, Nick Jarvis, retired years ago and is now a manager.
* the Sunnyside daycare toys dancing; it is implied that once they got rid of Lotso, they could all enjoy the place without fear of reprisal from him. In turn, several of the toys, including former minions of Lotso, were having a big dance party, with "We Belong Together" playing. A happy ending indeed.
* The Sunny Side Up Show had photos and videos, artwork, messages, online games, and birthday cards all submitted by viewers via Sproutonline.com.
* The Sunny Side Up Show, which would focus on a different theme each week.
* The Sun Over Breda. The promise of plunder drives many of the soldiers, especially as the Spanish Crown rarely bothers actually paying their wages. However, they're also expected to operate under various rules of conduct and are often denied the right to plunder (especially as the Crown hopes to hold the conquered lands, not just pillage them) and must pay civilians for food. As a result many of the men are on near-starvation rations except for the rare times they're allowed to plunder, and often had to resort to mutiny to get paid.
* The Sun. Remove it from its location at the center of the solar system, and the Earth will no longer be inhabitable by living creatures.
* The Sunset Company's victory also sees them conquering Myr and purging most of the old aristocracy in the process of freeing all the slaves. Those who survive, either by fleeing or having been coincidentally elsewhere at the time, regroup and establish a
* The Sunset Limited are set over an ominous sequence of shots of a scary and apparently deserted (but real) subway station in Harlem.
* The Sunset Limited, White claims to see the world as it truly is "without dreams or illusions" and suggests that anyone who sees the world in the same way should wish to die as soon as possible.
* The Sunshine 60 skyscraper in Ikebukuro, which has many stores of all kinds: an aquarium, an observation deck, etc.
* The Sunshine Boys (of which he had no part in the adaption process) ... created a pilot based on the movie/play in which Vauldvillian Partners Al Lewis and Willie Clark stir up trouble in the Actor's retirement home they are sent to.
* The Sunshine Boys, Willy Clark claims that words with a "k" in it (like "Alka-Seltzer", "chicken", and "cupcake") are always funnier than words without (like "tomato").
* The Sun Shines Bright, he felt was a film he achieved what he wanted to. Another obscure title.
* The Sunshine State. Teenage Darryl is warned by his girlfriend Sandra's father that "he'd been in the Army during the war" (the war in question being the Vietnam War) and that if Darryl "got fresh", dad might have to hurt the boy. Later when he's alone with her, he jokes about the warning, theorizing that her dad (described as "round, well-padded, balding, and genial" earlier in the novel by Darryl himself) had probably been a cook or a file clerk. She hastily corrects him:
* The Sun's not there. And as the Tumor explodes, the Green Sun forms out of it. Meaning, the characters got tricked into creating the very thing they meant to destroy, unwittingly helping create
* The Sun's Solar Orbiter), none of them had or ever will come as close as the Parker Solar Probe.
* The Sun Sword. For many, that means being able to kick ass. Morretz is at least a bit capable of pulling this off for The Terafin, and Avandar Gallais is this to the nth degree, to the point where many have trouble understanding what the hell he's doing serving Jewel. Including Jewel, often.

* The Sun Sword high priestess, who is also her daughter (the father being an unspecified mortal).
* The Sun Sword. The feminine version is "Serra", and commoners regardless of gender are "Serafs".
* The Sun, which they tied to the murder of a toddler by two boys. Hypocritically, however, they had no problems publishing topless pictures of sixteen and seventeen year old girls in their popular "Page Three" section from 1970 up until 2003, when a change in the law banned topless pictures of anyone under eighteen.
* The Super 6 DePatie-Freleng's first TV series, had Granite Man whose physical structure made him virtually invulnerable.
* The Super 6 qualifies as a super zero with his unimpressive physique.
* The Super 6) sport Lantern Jaws of Justice. The only one who doesn't is the scrawny Super Bwoing.
* The Super 6) was a chinese stereotype,particularly when he went "Confusion Say . . ."
* The Super-Adaptoid can copy the powers of any superhuman it fights. In the
* The Super Adventure, introduces the White Bull Kingdom, the Black Bull Kingdom, and the Yellow Bull Kingdom, all kingdoms of bacteria who are engaged in a war in the body of Mr. Slowy's snail friend.
* "The Super Batman of Planet X!" does this for the Batman of Zur-En-Arrh. In the comics, the only details revealed about him were that he was an alien scientist named Tlano who was inspired to become a superhero after observing Earth's Batman. The cartoon actually shows his personal life and gives him a love interest, supporting cast, and even an
* The Super Bowl LIII halftime show playing "Sicko Mode" instead of "Sweet Victory" as everybody requested while also giving the
* The Super Bowl's current proximity to Valentine's Day actually has worked in the favor of online floral clearinghouse Teleflora, who in 2009 and 2010 made commercials with "bad box" flowers berating the recipient with how much of a cheapskate the flower-buyer was. The 2010 commercial featured
* The Superboy identity originated with Conner Kent/Kon-El, and in turn passed to Jon Kent, Dam-El, and Van-El.
* The supercomputer TORQ-III from the episode "Day Of the Machines" is described as a "machine that can build other machines." When
* The Super Cops Play It To A Bust and end up falling onto this same threesome, without interrupting events much then either.
* The Super Cops who turns out to be an undercover agent for the Knapp Commission into police corruption. The protagonists in turn try to arrest him for conspiracy to frame them. Turns out they were both tape-recording each other, and the police brass avoid embarrassment by promoting all concerned.
* The Superdictionary: In the entry for "judge", the judge pronounces the Penguin guilty. Juries pronounce people guilty, and judges only give the sentence (except if they have a bench trial, where the defendant waives their right to a jury, which rarely happens).
* The Super Failio Cousins, Pencil did this when Macaroni got past her and Mollipop in Mario Kart Wii (Macaroni was a fail back then).
* The superflu as "the last magician of rational thought" (!) and he gives an impassioned defense of the concept that they should not be so quick to recreate the technological civilization that created things like nukes and bio-engineered germs in the first place.
* The Super Foonly F-1, whose famous application was rendering the CG in
* The Super Friends has several episodes set on alien planets based on periods of Earth history. Texacana is a wild west planet, Camelon is a medieval planet, and Zagdad is an Arabian Nights planet.
* The Super Friends versions of Hawkman and Hawkgirl are often mocked for having the ability to fly... on a team with an overfilled
* The Super Galaxy Dai-Gurren also has something akin to a hyperspace drive. Its guidance and power requirements are taken care of by the main character's flaming awesomeness (read:

* The Super Game Boy right before she summons the Genie. Nothing wrong here... except for the caption describing the scene: "Wario has succeeded! He triumphed over the pirates and stands in front of the Genie. He is now going to get his reward, but what will it be?" Either the wrong screenshot was used in this instance, or the writer has mistaken Captain Syrup for a genie, since she's standing next to the lamp in the screenshot.
* The supergenius (you can probably count on one hand the number of times his name ISN'T prefaced by that) Dr. Vegapunk did it.
* The Supergirl from Krypton: After crashing into a dirigible and falling through a ceiling, Kara -a teen owning strange and overwhelming powers and stranded in an alien world inhabited by people talking an unknown language- pulls her knees up, wraps her arms around her legs and cries.
* The Supergirl from Krypton and Amazon Artemis train in a sword match overseen by Wonder Woman.
* The Supergirl from Krypton, Big Barda stabs Stompa from behind with her halberd.
* The Supergirl from Krypton, Darkseid forces Superman to fight her cousin. In order to gain the upper hand, he has to use a kryptonite ring, although it also hurts him.
* The Supergirl from Krypton, Darkseid wants a real powerful Female Fury to slay his enemies, so he kidnaps and brainwashes Supergirl.
* The Supergirl from Krypton, Diana takes Kara with her to train her because the young Kryptonian has great powers which she doesn't know how to make use of.
* The Supergirl from Krypton Harbinger's duplicates surround Superman to keep him contained. Superman spins around and punches them all at once.
* The Supergirl from Krypton insists over and again that he is taking his cousin Kara home with him.
* The Supergirl from Krypton. In the first chapter, a random guy harasses Kara. She shoves him away and he goes flying and crashes into a pile of boxes. Later on, a Doomsday clone punches Superman so hard that Kal-El goes flying. And Darkseid does this to Batman several times during their fight.
* The Supergirl from Krypton, Kara clings to her cousin, wraps her arms around him and weeps after being freed from Darkseid.
* The Supergirl from Krypton replaces her modest outfit with black, tight leather clothes which show her figure off.
* The Supergirl from Krypton scowling and frowning. Given that Superman is gushing all over a strange, superpowerful girl who has appeared out of nowhere claiming to be his conveniently amnesic cousin only to be kidnapped by Darkseid shortly after, all of which sounds like a transparent set-up to him, he has little reason to crack a smile.
* The Supergirl from Krypton: Shortly after emerging from her pod, Kara is shot by several cops. Naturally, the bullets bounce off.
* The Supergirl from Krypton's parademons tries to stop him by kamikazing against his body. Superman just ignores their relentless assault as continuing his march forward.
* The Supergirl from Krypton: Supergirl's rescue party use a mother box to reach Apokolips, and later Superman uses another to go from the Sun to the Wall Source.
* The Supergirl from Krypton Superman and Wonder Woman argue because Clark wants to take his cousin back home whereas Diana argues that she must remain in Themyscira. Kara breaks in to remind them that she is standing there.
* The Supergirl from Krypton, Superman flies from the Arctic to Gotham within seconds.
* The Supergirl from Krypton. Superman grabs Darkseid and flies into the Sun, but he doesn't intend to hurl Darkseid into it -the Lord of Apokolips would survive- but getting a power boost which allows him fight Darkseid.
* The Supergirl from Krypton, Superman's cousin who had just arrived on Earth. It was ultimately subverted as Superman pointed out that 1) It was Krypto's job to protect the Fortress of Solitude, and 2) He hated everybody.
* The Supergirl from Krypton: Superman tries this movement during his battle against Darkseid.

* The Supergirl from Krypton. This was very brief, but during that time she wore, essentially, skintight red-and-black pants and a black bra.
* The Supergirl from Krypton to a stretcher as he examines her. The young Kryptonian shatters the metal cuffs as soon as she wakes up.
* The Supergirl from Krypton wanders confused into an alley, and is spotted by three workers. One of them mistakes her for a prostitute and reaches for her. Kara grabs his hand and accidentally crushes two fingers of his.
* The Supergirl from Krypton wanders confused into an alley, having just woken up from her rocket, and is spotted by three workers. One of them mistakes her for a prostitute and decides to play Lothario only to have his hand crushed and be slammed through a wall. The second tries to help his friend. The third wisely proclaims he's not with the other two and offers her his coat.
* The Supergirl from Krypton, when Superman and his companions travel to Apokolips to rescue Kara, Batman rigs five hundred Hellspores to blow up unless he inputs the deactivation code. One of them is able to blow a hole down to a planet's core leaving a firepit. Five hundred of them would turn the planet to ashes.
* The Supergirl from Krypton -who had previously kidnapped her and brainwashed- leaves her alone.
* The Supergirl from Krypton, Zor-El engraved on his daughter's rocket the next inscription:
* The Supergirl Saga abilities. However, such did not turn out to be case with that version of Superman, thus Supergirl remained frozen until the present day of 1988 in the mainstream DC Universe.
* The Supergirl Saga are shown to be this when faced with death by that world's Green Kryptonite radiation. General Zod is ready to throw Quex-Ul under the bus to save his own skin, and Zaora is left pathetically begging for her life, promising to show pleasures to Superman for her freedom.
* The Supergirl Saga comic book titles in 1988, The Pocket Universe Superboy's secret lab is discovered by Lana Lang accidentally touching a brick in the wall of the Kents' house's basement.
* The Supergirl Saga criminals goes from boastful and proud to begging for her life when Superman subjects her to fatal radiation exposure of Green Kryptonite to execute her for her crime of genocide. She ends up dying along with General Zod and Quex-Ul, the latter of whom strangled Zod as they both died together.
* The Supergirl Saga criminals who communicate to him through the device.
* The Supergirl Saga force to keep them at bay — by burrowing their way to the Earth's core, destabilizing it to the point of causing hot gases to erupt and destroy the Earth's atmosphere, instantly killing everybody except those in Lex Luthor's Smallville citadel.
* The Supergirl Saga spends much of the second part telling Superman how his world got to the broken state it was in at the present time: that he had accidentally let loose the Phantom Zone criminals who terrorized and devastated the Earth, turning most of it into a lifeless husk with only Lex Luthor and those in his resistance force living in his Smallville citadel as its only survivors.
* The Supergirl Saga when dealing with three Kryptonian criminals who had already killed every other person on the planet. There was no way to turn them into the authorities since they had already killed the authorities (and everyone else). This eventually caused Supes a mental breakdown.
* The Super Globetrotters and whatever he wanted could be found in that 'fro.
* The Super Globetrotters episode "The Super Globetrotters vs. Bwana Bob".
* The superheroes and villains Skechers created based on their shoes... which then spawned a
* The superhero files in the DVD extras include the heroine Stormicide, who seems to have largely resigned herself to the jokes that inevitably come from having gas-related powers.
* the superhero game, and more than a few shed these when he shows up back in his prime, spoiling for a fight.
* the superhero game: Jason Todd's favorite superhero growing up was Wonder Woman, and he instantly had a crush on her kid sister Donna Troy (the then-Wonder Girl)

during his first visit to Titans Tower with his older brother Dick Grayson. The crush faded after his first death, and when the two met again they instead developed a solid friendship that didn't evolve into an actual romance until they were both middle-aged.
* The superhero genre is an eclectic mix of various genres like science-fiction, detective fiction, mythology etc., but there are some characters that stick out. In the
* The Superheroics of Haruhi Suzumiya, Bakugou grows increasingly angry during the elementary school sports festival as Midoriya and Haruhi continue to upstage him in every event. It gets to the point that during the relay run, he uses his Explosion Quirk to beat Midoriya to the finish line when he realizes he can't catch up to him just by running, but since Quirks aren't allowed during the competition, he's immediately disqualified and victory is awarded to Midoriya's team.
* The Superheroics of Haruhi Suzumiya waiting for his friend Kacchan to come back.
* The Superheroics of Haruhi Suzumiya, who loves to act and talk perverted things about his wife just about the entire time. She mostly takes it in stride, but is not above chewing him out or even stomping her foot on his if she thinks he's going too far.
* "The super hero movie to end all super hero movies. Hopefully." —
* The Super Hero Squad Show: Abomination, in response to being compared unfavorably to a dog, digs a huge pile of dirt and covers Reptil, Wolverine, and Thor in dirt to the point only their eyes are showing.
* The Super Hero Squad Show after a fractal-powered MODOK takes over the Legion. Complete with running up a lot of steps.
* The Super Hero Squad Show, and plumbing supplies. Cue volley of kitchen sinks hurtling through space.
* The Superhero Squad Show as a friendlier and more laid back character than other incarnations, a strong contrast from the mindlessly destructive and perpetually angry brute he's usually portrayed as.
* The Super Hero Squad Show episode 1602 due to the fact that a) it's a pretty dumb show, b) Thor used his hammer which he cheated with by breaking Abomination's sword.
* The Superhero Squad Show episode "Blind Rage Knows No Color" has Thanos making Hulk suffer nightmares so that he goes on rampages in his sleep. The Hulk's nightmare at one point has people laugh at him while he's in his underwear.
* The Superhero Squad Show episode "Days, Nights, and Weekends of Future Past!" had Falcon and H.E.R.B.I.E. end up in an alternate reality where Scarlet Empress (an older Scarlet Witch) has taken over the world with an army of Sentinels. The heroes encounter an elderly Magneto who frequently falls asleep before finishing his sentences.
* The Super Hero Squad Show episode featuring Chthon (a grey, wrinkled, vaguely demonic man with claws, pointy teeth, and glowing eyes)...
* The Superhero Squad Show episode "Mother of Doom", Doctor Doom's mother gets back at her son by posting embarrassing pictures of him on Maskbook, which are unseen by the audience.
* The Super Hero Squad Show episode "Mysterious Mayhem at Mutant High": The Ringmaster has a divining rod that can find fractals.
* The Superhero Squad Show episode "Revenge of the Baby-Sat!" had Doctor Doom gain control of time and use his newfound power to rapidly age Thor and Ms. Marvel.
* The Superhero Squad Show episode "The Ice Melt Cometh", Pyro comedically exclaims "Mommy" when he realizes that he's about to be hit by lightning from Thor.
* The Superhero Squad Show had this in the episode "This Man-Thing, This Monster!", where Iron Man worked with the Supernatural Hero Squad (whose members included Werewolf by Night and Man-Thing) and fought against Dracula and an army of Living Mummies. Cameos are also made by Frankenstein's Monster and the Zombie.
* The Super Hero Squad Show have a boyfriend in space: Captain Marvel.
* The Superhero Squad Show, his choice of numbers leaves a lot to be desired.
* The Super Hero Squad Show: In "Days, Nights, and Weekends of Future Past!", H.E.R.B.I.E. sneaks Falcon and Magneto into prison by pretending to be a Sentinel

and marching them up to the doors of the prison.
* The Super Hero Squad Show: In "The Ballad of Beta Ray Bill", Bill uses a Viewmaster to show Thor the history of his people. However, one of the slides shows Bill on holiday, riding a surfboard in a Hawaiian shirt.
* The Super Hero Squad Show: In "The Ballard of Beta Ray Bill", Thor at one point declares that he will prove himself a true warrior by fighting naked. When bystanders are disgusted, he says he meant fight without weapons.
* The Superhero Squad Show is sometimes used as an example of the Disney/Marvel merger ruining Marvel forever, but it began production before Disney bought them.
* The Super Hero Squad Show reuses the same footage whenever the characters hero up, usually just cutting it to remove any heroes that aren't there.
* The Super Hero Squad Show second versions in one: Magneto thinks Scarlet Witch is enduring a horrible ordeal aboard the SHIELD Helicarrier. We cut to the Helicarrier with Scarlet Witch saying "I can't endure this horrible ordeal any longer!" It turns out she's on the couch with the other heroes watching videos about funny pets.
* The Super Hero Squad Show Skrulls never figured out how to make string cheese.
* The Super Hero Squad Show, the Hulk is... about as bad with doors as the other versions. At one point, he's told to use the door, so he rips the doors off of their hinges, and smashes them to pieces. Afterwards, he decided he preferred his way.
* The Superhero Squad Show, the two-part season two premiere "Another Order of Evil" ends with M.O.D.O.K., who is narrating the events of the episode as a bedtime story to Abomination, remarking what a loser Doom was. Doctor Doom happens to be cellmates with M.O.D.O.K. and Abomination by the end of the episode and indignantly points out to M.O.D.O.K. that he's sitting right here.
* The Super Hero Squad Show to have a gag removed from her mouth by magically removing the mouth from her face. She escapes his clutches and, still sans mouth, returns in a later episode, "When Strikes the Surfer!" where she has her face restored to normality by Molecule Man.
* The Super Hero Squad Show too which they use to stop the Wrecking Crew. The Blob eventually drops the Fractal after realizing staying so small and losing his powers did nothing to hinder the Squaddies.
* The Super Hero Squad Show turns out to be this in Season 2, turning the person who holds it evil. Turns out one needs the Infinity Gauntlet armed with the six Infinity Gems to be able to hold the damn thing without it possessing you.
* The Super Hero Squad Show, which was published months before the show even premiered.
* the Superhuman Registration Act. On a more mundane level, he struggles to ease himself into Japanese amenities like public baths.
* The Super Inframan has Giant Arms! No, really, just Giant Arms! Roger Ebert has fun with this in his review:
* The Super Inframan! Inframan struggles to fight the giant monster for some time before suddenly remembering that HE can grow to 50 feet tall! Which he does, and then defeats the monster.
* The Super Inframan: Inframan vs. the Spider Monster, round 2. Inframan wins by reducing Spider Monster back to regular size, then crushes Spider Monster with his foot.
* The Super Inframan referred to them in his review of the film as "giant arms."
* The Super Inframan: The Demon Princess' lair has booby-traps which shoots sub-zero blasts that freezes their targets in an instant, but preserves their bodies without any visible damage. She usually use this method to have victims frozen alive to be brainwashed, and in the climax of the film managed to capture the titular hero by blasting him with an ice trap. However Inframan managed to unfreeze himself before the brainwashing can be carried out, just in time for the finale.
* The "Superior Firepower" doctrine is a combination of Powerhouse and Balanced: it gives attack and defense bonuses to basically all units, and its split allows you to either focus on further improving your ground units, or giving more synergy with Close Air Support. The United States starts with this doctrine.

* The Superior Foes Of Spiderman. Issue #7 in particular is focused around The Beetle's childhood and origin story.
* The Superior Foes of Spider-Man. Ostensibly it serves to help people who want to get out of the supervillain business move on with their lives. In reality most of the people in it are only there because of court-mandate and still commit crimes when no-one's looking. Notable members include Boomerang, Grizzly, the Looter, and Mirage.
* The Superior Foes of Spider-Man that the group inadvertently causes a full-on gang war.
* The Superior Foes of Spider-Man then proceeds to close the door behind him right before the boomerang comes back at him.
* The Superior Foes of Spider-Man, Tombstone was disappointed that his daughter Janice wished to become a costumed supervillain rather than be a mob lawyer since he felt the latter was more profitable and in his eyes equivalent to legalized crime. Nonetheless, he didn't stop her but told her that she had to support herself if she wished to pursue supervillainy.
* The Superior Foes of Spider-Man was originally only planned for a 12-issue miniseries, but the book proved so unexpectedly popular and well-received that Marvel extended it. Several solicitations for the series lampshaded this, one of which even used the term Sleeper Hit.
* The Superior Foes of Spider-Man, where the Looter attempts to revamp himself as a hip and edgy criminal who's packing heat and doesn't take shit from anyone, only to make himself look like a moron.
* The Superior (Someone the captain reports to, usually not a regular crew member. Is often concerned with the more political aspect of things, especially in regards to a governing council.)
* The Superlinear drive works on the principle that the fastest path between two points is a straight line. The superlinear drive finds the straight line, then it finds an even straighter one to travel, thus allowing
* The Superman Adventures: In Issue #53, upon realizing Granny Goodness is behind the trap for him, Mister Miracle says "Ask a silly question, get a silly villain!".
* The Superman Adventures: In Issue #53, when an Intergang member disguised as a pizza delivery kid is stopped, Jimmy jokes that "it's the Intergang guarantee— If your target isn't dead in thirty minutes, you don't pay!".
* The Superman Adventures is just fast enough to save the victim before the gas gets to him.
* The Superman Adventures "Multi-Face" when he disguises himself as Clark.
* The Superman Adventures shows up to rewind time, allowing Superman to work out the chain of events and prevent it from happening.
* The Superman Adventures: while she and Jimmy are covering one of Superman's battles, Lois remarks that the populace is treating it "like a cheap prize fight" only to murmur, "Ooh, good one" with the next punch.
* The Superman/Aquaman Hour of Adventure have the eponymous Saturnians as fish people.
* "The Superman Curse" either are unable to get serious work after they stop playing the role, have horrible tragedies occur in their personal lives, or both. This also applies to other cast members of any adaptation.
* The Superman identity passed from Clark (with his death) to Conner. When he died, Jon took up the identity, and at some point after Jason's death in their timeline, Jon and Dam-El began sharing the Superman mantle.
* The Superman's descendants’ weakness to saltwater, originally stemming from pollution, was retconned to be caused by a hex put on them by Hecate.
* The Superman Servant is defeated when Element Lad makes Gold Kryptonite to strip him of his powers, and Timber Wolf crushes him.
* The Super Mario Bros Ice Capades. The one where the bros defeat enemies with what look to be semi realistic bazookas.
* The Super Mario Bros Super Show!, a blatantly obvious parody of... well, you know. While there, Toad reunites with his grandfather, and the four heroes escape the prison with him.

* The Super Mario Bros Super Show! actually transforms into the titular Koop-zilla and starts destroying the city, and as a result, Mario also becomes a giant just so he can stop Bowser, causing the city to be destroyed even more. A later episode called "Karate Koopa" also takes place in Sayonara, except that instead of a large, technologically-advanced metropolis, it's now a small Japanese fishing village, and Bowser is now a samurai. By the way, Sayonara means "goodbye" in Japanese.
* The Super Mario Bros Super Show! and some other Mario adaptations, Bowser was called by his Japanese name, King Koopa, even though the games always used the name Bowser from day one.
* The Super Mario Bros. Super Show, and the Marios wear themselves out trying to keep the infant royal under control until they find a way to age her back to normal.
* The Super Mario Bros Super Show! but there is no romantic implications between them in the cartoon. Then again, the games can be ambiguous about this at times, too.
* The Super Mario Bros. Super Show cartoon off on the fact that they were intended for children; however he does comment that just because something is for kids doesn't really give its makers an excuse to be lazy with it.
* The Super Mario Bros Super Show! cartoon. One incident is particularly infamous because Luigi has Mario's hat and Mario has Luigi's voice.
* The Super Mario Bros Super Show! episode "Do You Princess Toadstool Take This Koopa...?" has Koopa squeezing into a tuxedo only to have a button pop off and hit Mouser in the face.
* The Super Mario Bros Super Show! episode "Princess, I Shrunk the Mario Bros.".
* The Super Mario Bros Super Show! episode "The Adventures of Sherlock Mario", the gang (Mario, Luigi, Toad and Princess Toadstool) are captured by "Professor Koopiarty", Bowser's Sherlock Holmes-themed alter ego for the episode. They get tied up and subject to this, Koopiarty taunting them with "In a few moments, you'll be sliced salami!" as he starts the blade.
* The Super Mario Bros Super Show! episode "The Bird!" Luigi refuses to hike up a snowcapped mountain. Mario decides to leave him be, mentioning that Luigi should watch out for any polar bears lurking nearby. Luigi, slightly more afraid of being eaten than being crushed in an avalanche, follows after the gang.
* The Super Mario Bros Super Show! episode "Trojan Koopa". Instead of a horse, Mario, Luigi and Toad build a giant wooden statue of King Koopa himself, banking on his ego to take the bait. Adding to the trick is that earlier they grabbed two of his Troopas and sent them out to sea with a dummy to make it look like they were giving up.
* The Super Mario Bros Super Show! for Luigi's personality in newer games as well.
* The Super Mario Bros Super Show! - Goal: For Mario and Luigi to get back home to Brooklyn. While this was mentioned as the reason the four heroes were traveling all over the vast multiverse, it's not a frequent topic of discussion in most episodes.
* The Super Mario Bros Super Show! had episode-specific eyecatches for its first few weeks.
* The Super Mario Bros Super Show! had one episode where the President ate a pizza at Mario and Luigi's place (No, really). He said it wasn't good. It was GREAT!
* The Super Mario Bros Super Show! has a scene in which Mario and Luigi try to learn karate and fail miserably... so the martial arts master trying to train them makes up a plumbing-themed martial art called "Plumb Fu", which they master immediately.
* The Super Mario Bros Super Show! - has never seen any home media release, excluding the episode "The Unzappables", due to its live action segment, "George Washington Slept Here", having the same licensing issues.
* The Super Mario Bros Super Show!: In "Koopa Klaus", King Koopa wears a Santa outfit and calls himself Koopa Klaus. He then traps Santa's workshop in ice and abducts Santa in an attempt to ruin Christmas for everyone.
* The Super Mario Bros Super Show!: In "Little Red Riding Princess", King Koopa wearing a scuba suit attempts to kidnap Princess Toadstool. However, she escapes easily by releasing the air in his tank, causing him to expand rapidly and float

upward.
* The Super Mario Bros Super Show!: In "Princess, I Shrunk the Mario Bros.", Mouser calls for his mommy after being shrunken and put in a fishbowl by Waldo the Wizard.
* The Super Mario Bros Super Show!: In "The Bird! The Bird!", a mother Birdo snatches Toad, thinking he's her lost baby, and takes him out for a flying lesson. As Toad plummets to the ground, he gets the idea to use his mushroom cap as a parachute.
* The Super Mario Bros Super Show!: In "The Great Gladiator Gig", Mario and Luigi are running away from mooks and jump into a horse drawn chariot, but the horse refuses to move. Mario gets it to run by dangling a bag full of hay from a sink pipe. When the mooks almost catch up to them, Mario throws the pipe and the bag at them to slow them down. At this point, the horse angrily stops, which throws the bros out of the chariot. The horse, which had seemed like an ordinary animal until this point, angrily says it won't help them without food. Left with no choice, the bros run.
* The Super Mario Bros Super Show!: In "The Koopas Are Coming! The Koopas Are Coming!", everyone expects Redcoat Koopa's army to attack at dawn and prepares accordingly. At one point, Koopa gets impatient and decides to catch them off guard by attacking in the middle of the night, but gives up on it because it is too dark to see.
* The Super Mario Bros Super Show! is a great meme in Brazil. One of the most prevalent ones is in the episode "Two Plubers and a Baby", while in the original Toad says to Baby!Peach: "Please, stop crying" and "Bet it will keep you quiet", in the Brazilian dub he says: "Pelo amor de Deus, para!" (For God's sake, stop!) and "Se Deus quiser agora ela cala a boca" (By God's will, she'll shut up).
* The Super Mario Bros Super Show!, King Koopa instigates a feud between the fathers of said couple in order to make a fortune supplying the two with his arsenal.
* The Super Mario Bros Super Show!, like in "Robo Koopa" when the title villain pushes over an electronic tower to crush the heroes. When viewed without commercial breaks, the tower looms at the audience twice in a row!
* The Super Mario Bros Super Show!: Luigi does this to Mario in "A Basement Divied".
* The Super Mario Bros Super Show!, Mario and Luigi have a chance to return to their home in New York. They end up going back to the Mushroom Kingdom however when they realize that King Koopa would seize the opportunity to cause trouble (once in the Mushroom Kingdom and once in their own world). Also both times, they offer the Princess a chance to go with them, she firmly declines due to her responsibility to her people.
* The Super Mario Bros Super Show!, Mario and Luigi's instructor at the Plumbers' Academy was one of these. His name was Sergeant Kooperman, and judging from his voice, he's apparently the Earth version of Bowser.
* The Super Mario Bros Super Show!, Mario gets his mind swapped with that of Frank N. Stein's monster. It's not exactly the best dub job out there, but they did follow the trope. A knock on the noggin with a hammer for each of them is enough to swap them back.
* The Super Mario Bros Super Show! parody, he's renamed as "Marzan" until he gets his memories back.
* The Super Mario Bros Super Show! (partly live-action): 65 episodes (52 Mario, 13 Zelda) over one season.
* The Super Mario Bros Super Show! plays with this: Mario receives a letter from one "Roxanne", reminding him of "his promise" made 15 years prior. Mario and Luigi are both assuming it's along the lines of this trope, but at the end it's revealed that Roxanne is already married with five kids; Mario's promise was instead to sell her plumbing supplies at wholesale price.
* The Super Mario Bros Super Show!'s current canon such as Tweeters, Albatosses, Trouters, Flurries, Mouser, Tryclyde, etc.
* The Super Mario Bros Super Show!: "Star Koopa" spoofed these with "Lightplungers", as in lightsabers whose hilts looked like tiny plungers. The beams

functioned more like batons as they do not cut anything. Instead, they electrocute whatever they hit.
* The Super Mario Bros Super Show! started every animated segment with Mario's "Plumber's Log", setting up the exposition.
* The Super Mario Bros Super Show! that turns anyone who falls into it into a baby (which happens to Princess Toadstool, and later King Koopa himself in the episode). King Koopa's Goo Goo Ga Ga Koopa alias has him dressed in a bib, a bonnet, and a diaper, despite him being his normal adult age (at least until he falls into the fountain near the end of the episode).
* The Super Mario Bros Super Show!. The gang is trying to sneak into King Koopa's castle, prompting this exchange:
* The Super Mario Bros Super Show!, the Mario Brothers' space ship does this as it heads towards planet Quirk at the beginning of the episode.
* The Super Mario Bros Super Show! used live-action wrap around segments, though the main segments were animated.
* The Super Mario Bros Super Show!) was something like "Ping-ping pear... wing-wing wear... make old Mario... Re-a-pear!"
* The Super Mario Bros. Super Show was the one eating. Luigi was merely holding his salami sandwich while he turned his music page.
* The Super Mario Bros. Super Show were always foiled because the heroes just happened to be around whenever he carried out his plan. If Koopa ever went back and tried again after the heroes left he could have succeeded.
* The Super Mario Bros Super Show! where the good guys found themselves getting stuck in quicksand. In a strange mistake in relation to the games, they apparently forgot they had the ability to hop out of the quicksand and needed to be rescued.
* The Super Mario series has character designs which just don't make sense in three dimensions.
* The supermarket chain Waitrose was started by three men — Waite, Rose, and Taylor. Taylor left after a couple of years, and the business was renamed after the remaining two.
* The super-maximum-security prison that other super-villains are sent to isn't like this, but
* The Supermen has stated on Tumblr that Wesker is bi and was in a relationship with William Birkin. So far this has never been mentioned in the story (partly because Will has been dead for over ten years at the time it's set) but apparently it will be relevant later.
* The Supermodel Amy Love and later the just-model Santana Garrett have drifted into this area. You'd think it would be hard to make an admitted torture session or the threat of ripping someone's head off sound free of malice but they've done it.
* The Supermutant Radio station broadcasts a human woman promising that if humans come to Shaw School Place they'll be helped and
* The Supernaturalist) can be any colour, depending on what chemicals are in the atmosphere at the time.
* The Supernaturalist — okay, in his early twenties — but as he was a naturally-immature adult he occasionally cracked.
* The Supernaturalist qualifies. The institute gets the money for the boys' maintenance by making them test all kinds of products.
* The Supernaturalist, the world drinks sim-coffee, the smog is always heavy, and the sky is never blue unless you fly out of the atmosphere (it is instead colored according to the chemicals in the smog). Also, there are no whales.
* the supernatural rats that have stalked him since he murdered his wife finally get around to devouring him
* The Supernaturals' "Smile" features a bouncy melody, goes "Smile! Smile! Smile! Smile!", and is very often taken as an upbeat, happy song. Despite the fact that anyone paying attention to... well, almost
* The superpowered Charmer has several already-prepared charms she carries with her; one is a 'golem charm' that she has apparently used in self-defense class.
* The superpower fell sometime ago, and the story may be about the attempt to restore it.

* The superpowers in this setting are divided into three categories, and one of those categories is Zoanthropy, aka the ability to turn into animals and in-between forms. One of the protagonists is also a werebeast... a
* The Super Powers Team: Galactic Guardians saw Superman receive a space-burial after deadly exposure to Kryptonite.
* The Super Powers Team Galactic Guardians's Seeds Of Doom on Earth and toss them into the sun.
* The Super Powers toy line from the 80s and the Total Justice toy line from the 90s had comic book mini-series as tie-ins.
* The Super Saiyan 3 transformation. It is only attained by Goku harnessing the unlimited energy supply of the Otherworld, and he can never sustain it for very long in the physical world because of its massive energy consumption. This is a major factor in his fight against Kid Buu, where he can match Buu's power but can't maintain it for long — eventually being rendered unable to power up due to the strain, losing all his remaining energy, and downgrading into a heavily weakened normal state. As of
* the Super Saiyan of legend, which renders Vegeta (usually beyond stubborn) near-catatonic in his presence. In the original story, it takes the combined energy of the heroes channelled into Goku to defeat him. All of this is after a hellacious beating of all our heroes (that's Super Saiyan Gohan, Vegeta, Trunks, Goku, and Kami-Fused Piccolo for those wondering).
* The Super Saiyan state acts like this without proper training. The transformation occurs in a moment of pure rage, and the resulting personality shift leaves the Saiyan struggling with an overwhelming anger. In the Cell Saga, Goku and Gohan train in order to resolve this issue, making Super Saiyan as natural and comfortable as possible so they can maintain it without extra effort as well as retaining their own personalities.
* The Super-Secret Secret Squirrel. That episode was a love letter to this trope.
* The super-secure panic-room penthouse doors will open themselves if you cut a completely random wire behind the wind turbines. Why the heck these two systems would be remotely related to each other is anyone's guess.
* The Supersizer from "Fitness Crazed" gives its wearer a very muscular physique, which then turns into a large lump of mass in the wearer's body.
* The Supersizers Eat, Giles's character offers Sue's character a Pop-Tart, and she assumes he's calling her one.
* The Supersizers Eat, the characters played by Giles Coren and Sue Perkins are husband and wife. However, the Regency episode makes their characters brother and sister. Sue lampshades this by suggesting that Giles's Regency character has incestuous feelings for hers.
* The "Super Skill Shot" (holding the left flipper, then performing a
* The Super Skill Shot requires holding the left flipper button before plunging, then shooting the right ramp right after.
* The "Super Skill Shot" requires holding the left flipper, plunging soft enough to get the ball to the
* The Super Skill Shot requires immediately shooting Avengers Tower after launching the ball, awarding a minimum of 500,000 points, 5 seconds of ball saver, and (once per game) a lit Mystery award.
* The Super Skill Shot requires launching the ball and making three sequential shots to immediately start a mode (or immediately get some Foundry equipment if one is already lit). There are three potential final shots, each of which starts a different kind of mode: Missions, Encounters, and
* The Super-Skrull, who has copies of all of the Fantastic Four's powers, has no problem using his flames to kill since he's a soldier in an alien army. He's also used Reed Richards' stretching abilities (considered by far the weakest of the four in terms of combat power) to turn himself into
* The Super Smash Brothers: Debuted in 2006, arrived in CHIKARA in 2007.
* The Super Smash Brothers of Canada's International Wrestling Syndicate are fan boys of Nintendo video games, especially the eight bit ones.
* The Super Smash Brothers - Player Uno/Evil Uno, Stupefied/Player Dos

* The Super Smash Brothers: Signed with AEW in 2019, wrestling as The Dark Order before its expansion into a full-blown stable. Now wrestling as Evil Uno and Stu Grayson.
* The Super Soaker CPS 2000 was the most powerful toy watergun ever released under the Super Soaker brand. It allegedly caused eye injuries when a target was shot in the face at close range, so it was subsequently redesigned to be less powerful and had warning stickers applied all over it telling the user to never aim it at anybody's face. Even the nerfed version was powerful enough to have recoil, though.
* The Super Speedy Cider Squeezy 6000", Flim spits his cider in his brother Flam's face when he hears they no longer have the upper hand in the cider-making contest.
* The Super Speedy Cider Squeezy 6000" shows Applejack's learned her lessons when she readily accepts help from her friends in a desperate situation.
* "The Super Speedy Cider Squeezy 6000" wasn't aired in the UK, due to cider more commonly meaning hard cider there, causing some confusion for viewers who only watch the show on TV when Flim and Flam reappear in later episodes.
* The Super Speedy Cider Squeezy 6000", when debating on whether or not to agree to the Flim-Flam brothers' offer. The brothers somehow manage to sneak themselves in the huddle.
* The Super Speedy Cider Squeezy 6000" when it looks like the Apples have lost their farm.
* The Super Starr Chronicles's fourth chapter, Clara Creed hints that alongside the X-Men, several new superheroes have also debuted (mainly the Marvel heroes of the Silver Age), implying a new age of heroes is rising.
* The super strength is explainable, since the girders Bender is designed to bend are enormous and (obviously) made of thick metal. The stretching arms and legs presumably assist in this. Though why a bending unit would require a hammerspace chest cavity is anybody's guess.
* The super sweet, motherly, tearful, and humble farm lady Ukraine comes off as
* The super-team "The Civic-Minded Five" is made up five superheroes of varying levels of competence. Jungle Janet, a
* The super-villain Bakuda goes on a "recruitment" spree for her gang — the Azn Bad Boys — by implanting these in numerous citizens of Brockton Bay.
* The supervillains The Twin Terrors get stronger as they get closer together, with energy powers when they are next to each other. At a distance, they seem to be ordinary Exemplars. Next to each other, they out-powered Lancer.
* The Supervillainy Saga for other villains. Gary, himself, is hilarious throughout his evil plans.
* The Supervillainy Saga, Gary Karkofsky is considered to be this. It's not actually true as he's learned to use his powers quite imaginatively. However, it's implied that he actually doesn't know his upper limits and often stumbles onto more power than he knew he could throw around.
* The Supervillainy Saga, he's also got many friends on both sides of the superhero/supervillain divide. As a result, he may side with one group or the other depending on his feelings at the time.
* The Supervillainy Saga.org itself gets a few shout-outs in the book.
* The Supervillainy Saga. Protagonist Gary Karkofsky is a wannabe supervillain for virtually his entire life and finally becomes one after getting a magic cloak. He proceeds to become involved in all sorts of criminal activity and fighting fellow supervillains. By later books, he's immensely rich but also has suffered numerous personal tragedies.
* The Supervillainy Saga seem to be solely based on the fact he finds being a costumed criminal interesting. His wife and other supers call him out on this several times, especially since he can (and occasionally does) use his powers for good but chooses not to.
* The Supervillainy Saga superheroes, he's actually got durability as one of his superpowers. It means he's a decidedly "un-squishy" wizard despite the fact it most often is used to allow him to survive the beatings he gets.
* The Supervillainy Saga, the protagonist Gary Karkofsky a.k.a Merciless: The Supervillain without Mercy has a magical hooded cloak. He is often described as

looking like a "Discount Walmart Sith Lord."
* The Supervillainy Saga this is one of the powers of Gary Karkofsky a.k.a Merciless: The Supervillain without Mercy. It can be averted by magic or certain technologies. Generally, Gary relies on it to avoid getting the crap beaten out of him.
* The supervillian mercenaries Gregor the Snail and Shamrock are seen as part of Faultine's crew in the beginning, but there's no hint of romance between them. By the time of Faultline's Interlude around the midpoint of the story, however, they're seen holding hands and are implied to have become a couple offscreen.
* The supervirus Daemon has this as her entire purpose. She infects the entire Net and once her personal clock runs out she self-destructs and in sixty seconds everything infected by her gets destroyed as well.
* The supervisor of a construction site leaves the site every day at exactly 11 AM and returns at exactly 1 PM. Because of this, the workers start taking advantage of this with a longer lunch break. One day one of the workers decides to spend his break getting busy with his wife, but when he returns home, he finds his wife already in bed with someone else: the supervisor! The guy quickly leaves before they notice him and returns to work. The next day, the supervisor leaves at the usual time, but when the workers all leave to take their early lunch, the guy just stays there and keeps working. One of the other workers comes up to him and asks, "What the hell are you doing? The supervisor's not here, so we can leave early." The guy shakes his head, "No way.
* The suplex head asplosion is one of the most gratifying ways to kill an enemy in the game.
* The supplemental comics reveal Soldier seems to be a fan of the technique, trying to snap a messenger's neck through the door, and successfully killing a lawyer,
* The supplemental information also makes clear that new agents are intentionally given the Noisy Cricket on its maximum setting to teach them about not seeing things as they once did.
* The supply sergeants of an air cavalry unit in Vietnam ran a black market providing the men with army issue equipment for personal use. Whenever a helicopter was shot down, they explained away the missing inventory by listing the items as having been lost with that aircraft. At one inspection of the books from the higher ups, five tons of equipment was reported to have gone down with one shot down UH-1 Huey. The Huey has an overweight load of one ton.
* The supporting cast gives another example: Casey Jones, the badass street-fighting vigilante armed with
* The supporting characters conspire to have Beatrix and Benedick overhear them talking about how each is crazy in love with the other in order to get the two to fall in love. It works, sort of.
* The supposed dullness of Canadians, at a time it would have otherwise been a discredited stereotype, was one of the sticking points in Petey Williams's interactions with
* The supposedly dead Anna Sheridan returns at the end of Season 3. In the season finale "Z'ha'dum", it is revealed that she had been used as
* The supposedly unassailable Inferno fort presents in the last mission of Haven campaign. The growth of creatures in this fort greatly exceeds that of player: for example, player can buy 2 Archangels in a week, while in this fort several Archdevils appear EVERYDAY. But this fort can be taken through a loophole in game mechanics: on each creature's week several of the named creatures spawns of the map and through Diplomacy you can take them in your army. While the growth in the fort is astounding, it is arithmetical. On the other hand, the growth of creatures on the map is geometrical (and higher the difficulty, faster the growth), so it is possible to build an army which can take the fort. Unfortunately (or fortunately considering the following events), it is impossible to proceed on the plot once you've done that.
* the suppression field goes down — Kleiner suggests via broadcast that, while the Citadel's reactor is going critical, "now would be an excellent time for

procreation" for those who are out of the city.
* The suppression of dissidents that occurred during our World War I is slightly worse, resulting in the arrest of socialist politicians, and even respected statesmen like
* The Supremacy Affinity mainly uses robots. CNDR are defensive garrison troops, CARVR are offensive Stormtroopers, SABR are
* The Supremacy faction is especially guilty, as the victory condition associated with them involves
* The Supreme Court's power of judicial review (i.e. deciding whether or not a law is constitutional) is not enshrined in the Constitution, but was established in 1804 via the landmark decision
* The supreme irony is that Fortean even to the very end was blissfully unaware that Ross was Red Hulk meaning he was serving a
* The Supremes, and others. While none became a true hit, they're still fondly remembered today. Pepsi also did something similar as part of their "Pepsi Generation" campaign.
* The Supremes, in which the singer has felt the stigma of being a "love child" all her life, and doesn't want to go all the way with the man she's addressing out of fear of conceiving another love child.
* The Supremes' "Love Child" is about a woman who doesn't want to have sex, because she felt the sting of being born out of wedlock, and doesn't want to risk getting pregnant and having her child go through the same thing.
* The Supreme Sword of Light requires completing at least one stage of the Bonus Dungeon. Its ingredients include the basic Sword of Light along with the Sword of Kings. It has a small chance of removing the target's buffs on hits and can cure all status effects when used as an item. It can only be used by the Luminary.
* The Sure Thing). And Gib thinks of "The Sure Thing" as just a beautiful girl he is guaranteed to have sex with until he meets her and realizes she has a much more boring personality than Allison.
* The Sure Thing. Gib and Alison have lost all their money and are stuck in a rainstorm, trying to break into a locked trailer for shelter, when Alison remembers a credit card her father had given her. But then she remembers something important:
* The Sure Thing: Gib is teaching Alison to shotgun a beer. He looks into an imaginary camera:
* The Sure Thing: In the penultimate scene, Gib finds out that Alison broke up with her fiance and she finds out he hasn't slept with the titular "Sure Thing". Cut to the roof where Gib had taken Alison earlier in the movie. Gib and Alison are kissing. The movie ends here and it is obvious that the two are now together.
* The Sure Thing: Prim, somewhat anal-retentive Allison falls for goofy, madcap Gib.
* The Sure Thing uses this bit three times. Only once, though, do both characters make it through the night in the bed.
* The surface of Saleucami is dominated by forests of coral-like plants in tapering, conifer-like shapes and tall, horsetail-like stems. In "
* The Surfaris: #2 in August 1963, #16 in July 1966 and #110 in August 1970. The follow-up, "Point Panic", did chart at #49, but that one is largely forgotten outside the surf rock fanbase.
* The Surfsiders were a group of studio musicians hired in 1965 to rush out an album of
* The surge of adrenaline that occurs when someone is terrified can override the usual safety limits that stop us from contracting more than about 1/3 of a muscle's myofibrils at a time. This increases strength enormously, but at a cost: neither muscles nor tendons can tolerate such extreme tension without risk of injury, meaning that someone who
* The Surgeon. Dr. Catherine Cordell gets into her car, intending to return to the hospital to tend to a patient. But when she calls the hospital from her car phone to verify some information, she's told that a previous call originated from that very same phone. Her attacker lunges at her from the backseat...
* The Surgeon, first book of the "Rizzoli & Isles" saga by Tess Gerritsen has

interludes with the killer's thoughts. This is done in some of the other books in the series as well
* The Surgeon Of Death." Which is odd, to say the least, looking at him. He has the power of the Ope-Ope Fruit, which allows him to cut anyone or anything within a certain range and rearrange the pieces as he sees fit. People don't die when cut up this way, allowing him to extract organs, remove poison, and even attach new body parts without putting the person in question at risk. Smoker even compares the power to that of being placed on an operating table.
* The Surgeon's Stories) the character of Father Hieronymus, who is a very stereotypical instance of the trope. He carries a dagger concealed in his crucifix and tries to murder king Gustavus Adolphus, recruiting the young noblewoman Lady Regina (whom he serves as confessor for) to aid him.
* The Surgeon they're searching for was kicked out of medical school when his anatomy professor discovered him masturbating over a female cadaver.
* The surgical masks might seem like this, but surgical masks are worn in Japan by almost everyone fairly often. It's not too rare to go to school and see at least half your class with a mask. The pads, well, there has been at least one Tumblr post hoping for something like that. "I can get through this day! I have dinosaurs in my pants!" (Or, in this case, Pokemon). Remember that most girls are still kids (12-ish is fairly common) when they get their first period.
* The surname Lamphere is a double example, as its spelled "Lamp-Here" but pronounced "Lamp-Fear".
* The surprised look is because it's their first job ever. The comedy comes from the fact that Janice had just assured the client
* The Surprising Adventures of a Glaceon in Unova talks like this a lot.
* The Surprising Adventures Of Munchausen includes several sequences where you have to manipulate objects to perform a chain of events resulting in such feats as shooting a duck and then having it land on your plate fully cooked or filling all of the glasses in a tavern with beer within a minute.
* "The Surrogate": A woman becomes a surrogate to a family via a private medical facility. She joins a support group for surrogate mothers there and becomes suspicious. Standard
* The Surrogates has a variation. People feel safe when they only interact with the real world through the titular robotic avatars: if it is destroyed, it is merely inconvenient. The discovery that someone has been remotely killed "through" their surrogate shocks the police and kick-starts the plot.
* The Surrogates is definitely noir and cyberpunk, as well as the movie adaptation.
* The Surrogates is revealed to actually be a woman. Both of them masqueraded as a person of the opposite gender to get ahead in their respective fields.
* "The Surrogate" takes place at some point after May 2002, then one year into the future.
* the surveillance room was recorded by two fish who appeared out of nowhere and run away when noticed.
* The Survey Corps, including the other Titan Shifters join forces to fight against Eren and the Rumbling, to save the world from his mad plan to destroy all life outside Paradis.
* The Survival Game in Skypiea is a struggle between three factions; the Straw Hats, who want the gold, the Shandians, who want to reclaim their homeland, and Eneru's minions, who want to see who is worthy to go to Endless Vearth. The Ordeal of Iron features Zoro and Gan Fall vs. Wyper and the Shandians vs. Ohm and the Enforcers vs. a giant snake that swallowed Luffy, Nami, and Aisa.
* The Survivalist artist. His companions think it's suicide, but Rourke points out there's a difference between drawing down on a timer and dueling someone who's shooting back at you. Sure enough, Rourke wins.
* The Survivalist by blowing up the town. Unfortunately by the time Rourke finds out the truth, the lonely woman he's staying with has drugged and tied him up so she won't die alone.
* The Survivalist network to help John Rourke find his wife and children. Rourke starts to write out a description, only to rewrite it when he realises that words

like "beautiful" or "cute" are too vague and subjective to be helpful.
* The Survivalist series by Jerry Ahern. John Rourke and Paul Rubenstein stop at an abandoned trailer-truck for supplies, only to get arrested for 'looting' by a self-styled vigilante militia who are ready to execute them on the spot until Rourke guns half of them down and makes the rest walk back to their base.
* The Survivalist series is about a war set in the future. References are made to past wars particularly the Cold War during the 1980s.
* The Survivalist, set in a United States occupied by Soviet forces. The Soviets invade Pakistan, then when faced with a US ultimatum decide to launch a first strike attack.
* The surviving scientist realizes the immorality of such a device and walks away, but the heroine feels guilty and decides that she has to atone for what she did, and enters the machine.
* The surviving Starks cannot go back to Winterfell after it is taken over by the Ironborn, and then their treacherous vassal the Boltons. They have been scattered into the four winds, anyway.
* The surviving X-Men hold a funeral at the mansion for all those who died in
* The survivors also note that their catastrophe isn't particularly cozy except compared to the slow or quick deaths of almost everybody else. One person is grateful to be carrying buckets of milk on a yoke across her shoulders — 80 pounds total per trip — because she was carrying them at the ends of her arms — through more than one pregnancy — for years after the catastrophe hit because making a carry yoke was #1,032 on a looooong list of urgent priorities.
* The survivors are basically camping out in the open, on top of a hill, with almost no fortifications, and are
* The Survivor's Club has both David Price and Ron Viggio. David is a serial yourapist and murderer of children, who was imprisoned before the series began. Viggio is a serial rapist of adult women, who asks for David's help in devising a foolproof way to prey on women; they settle on leaving another man's DNA at each of the crime scenes, framing him for Viggio's rapes.
* The Survivors members of that species from existence. He seemed to be genuinely struggling with guilt over his act, and had gone into self-imposed exile in the ruins of the destroyed colony. Captain Picard said that the Federation had neither the power nor the authority to judge the alien for a crime of such magnitude, and the Enterprise continued on its way.
* The Survivor song "The Search Is Over" is about this trope. In the end, the guy realizes that the perfect girl for him has been there
* The Survivor, Vermoulin and McCabe plan to detonate a suitcase nuke and then blame it on terrorists. Vermoulin thinks this will alert the United States to the danger of terrorism. McCabe wants to start Armageddon.
* The Susano'o Unit serves as this for multiple people. The unit is a mechanical suit of armor that requires whoever enters into it have their soul installed into it, not their body.
* The suspect claims it is his first time in the victim's house, but when a doorbell rings, he knows to answer the back door. (Because nobody can
* The suspect in question was an armed cop killer who had shot a police officer six times, before shooting him twice in the back of the head killing the officer. And had just pointed the stolen officer's sidearm at the SWAT team.
* The suspect is an emotionally-distant teenager who committed a murder and took credit for two others
* The "Susquehanna Hat Company" routine has Costello's character wandering the streets trying to deliver straw hats to the titular hat company, only to find out that every person that he meets for one reason or another has the hat company as a
* The Suzuki sisters, too. Older sister Ayako is a soft-spoken and mature
* The Suzuki Swift car had a series of print adds in the UK with the theme "Time for a Swift exit." One of these showed a weedy tattooist realising that he has tattooed "
* The Svengali: A manipulative, controlling mentor that exploits their student for their own gain.

* The SVU are hunting a suspect who kidnaps teenage girls and dresses them up to his ideal girlfriend. A long time ago he took in a teenage girl because she looked like the one he liked but left her when she grew too old for him.
* The SVU episode "Redemption" opens with a jury finding a man not guilty of raping his granddaughter despite said granddaughter's testimony, Stabler's testimony, and the fact that the victim and the defendant had the same sexually transmitted infection. Even by his standards Stabler is not in a good mental state for the rest of the episode.
* "The SVU's Longest Day pt.2" Asuma waits for Noa at a ramen noodle stall and ends up meeting Kai. It isn't until hours later, when he sees Kai's picture during a news broadcast, that he realizes he'd seen the leader of the rebel army that was currently laying siege to Tokyo.
* The Swag Life Of Justin Yargenschmargol doesn't have much of an agenda other than just making sure he's the swagiest dude around.
* The Swag Life Of Justin Yargenschmargol full stop. It's the whole point of its creation.
* The swales in "That Leviathan, Whom Thou Hast Made" by Eric James Stone have a third, "neuter" sex which facilitates reproduction but does not contribute its own genetic material to the offspring.
* The Swamp area in the first was not only filled with wild zombies, it was also where the
* The Swamp Critters of Lost Lagoon contains quite a few furries, which is envitable given it focuses on characters played by people in animatronic animal costumes.
* The Swamp Critters of Lost Lagoon is technically a secular series, the show's official website does offer various merchandise that have religious themes.
* The swamp dragons, the jargon used, and the people who breed them are a spot on caricature of horses and "the horsey set" who breed them.
* The swamp-dwelling Gungans also have frog-like characteristics, such as webbed hands and feet, a broad mouth with long sticky tongue, and an amphibious lifestyle. Boss Nass, their green-skinned, overweight leader, looks particularly toad-like.
* The Swamp Fox: A young man named Gwynn works his way into Marion's brigade wanting revenge on Marion, whom he thinks killed his father. He only finds out that he's wrong when he sees Marion's wrists, which don't have scars like the killer's. The real killer was Amos Briggs, a Tory sympathizer, and after Gwynn is put in the brig temporarily, Briggs is caught and thrown in, leading to Gwynn killing him.
* The Swamp Fox had an episode where Marion dressed as a Redcoat to try and free an arrested Mary. But it backfires and they both need the brigade to break them out of jail.
* The Swamp Fox had one of these, with Marion trying to prevent his girlfriend's house being burned down by ordering some of the group, who were members of his militia, to stand down and leave.
* The Swamp Fox has a scene of this in the episode "Tory Vengeance". Marion's nephew, "Young" Gabe Marion, is flogged by Col. Townes in an attempt to force him to disclose the location of Marion's base. Marion storms the place with his brigade and rescues Gabe, only for the boy to be shot moments after he's freed from the ropes.
* The Swamp Fox: Mary was arrested for treason and told she'd be released after attending one. Marion sneaks into the ball in a redcoat uniform and tries to sneak her out. They both get caught, although they both escape soon after.
* The Swamp Fox to give him a chance to drag the villain he captured out the door of a Tory tavern.
* The Swamp Fox used stock footage of the horse chases in the pilot and a couple later eps in several other eps.
* The Swampling King genuinely kill any highlanders they find in the Swamp—but again, that's because the highlanders do the same to them.
* The swamps and backwaters of the Lower Planes achieve depths of foulness well beyond any mortal wetland. A sterling example of this is Bzuulzeel, a festering backwater of the River Styx where Ghlaunder, the mosquito god of parasites, disease

and pollution, makes his home. Besides Ghlaunder's own vast form, Bzuulzeel is home to swarming clouds of pestilence-carrying insects, demons of filth, mud and pollution, fiendish vermin and animated masses of swampy, tainted water, all eager to feed on or infect any living thing they meet.
* The swamps of Aurelia are dominated by animal-like trees with mobile roots, hearts, and red parasols instead of leafy canopies, over an understory of giant mushrooms.
* The swamps of Dathomir are dominated by trees whose trunks grow as gnarled and branchless arcs from whose tips dangle large red pods hanging from long, thin tendrils.
* The swamps of Nyissa both use and avert this. When the main cast goes through them, they're hopelessly depressing, sinister, astonishingly dangerous, and full of a variety of narcotic compounds and poisonous plants. Later, they pick up a Nyissan ally, the eunuch Sadi, who is perfectly fond of his homeland and disheartened when they come across a cursed swamp. When asked why, he explains that a swamp is green and verdant with life, but that
* The Swan, a succession of three unimportant characters are mentioned by their full names. Soon after this, the mother of a principal character Peter Watson is merely referred to as "Mrs Watson".
* The Swan featured a group of women undergoing radical changes with plastic surgery and the series finale put all the women in a pageant. Said pageant had an evening gown round, swimsuit round and lingerie round.
* The Swan Maiden" features three dragons which can transform into giant snakes or fire-breathing turtles.
* The Swan Maiden" folktale, the huntsman and the maiden remain married for seven years until the maiden gets her dress back and flies away.
* The Swan Maiden", the male lead simply picks an apparently abandoned dress that he finds lying on the ground by the lakeside, he willingly hands it over when its owner appears to demand her property back, and he asks the woman if he can help her out.
* The Swan Princess: After Princess Odette is kidnapped, Prince Derek becomes determined to find her. Once he does, he plans to break the spell on her by making a vow of everlasting love.
* The Swan Princess, albeit because he thinks he's a Frog Prince who needs a kiss to turn back to his non-existent human state.
* The Swan Princess, Bromley cheats twice, first playing chess with Derek and again during the training session with the musicians, and he still loses both times.
* The Swan Princess, by the time they were teenagers, Derek's friend Bromley teased him about being jealous of Odette, and the villagers and the servants were singing about how they can't wait to see the wedding.
* The Swan Princess climax. Plus the animation is still pretty consistent across all three films. The latter two CGI sequels on the other hand...
* The Swan Princess (comic sidekick Bromley trying unsuccessfully to attack various small animals) and drama (Derek trying to kill the transformed Odette, because an animal that "is not what it seems" obviously could disguise itself into something like a swan...).
* The Swan Princess, Count Antonio is eventually revealed to only be pretending to be affable, he caused the dam's destruction in the first place and that he intended to take all the money that was being raised to repair damages for himself.
* The Swan Princess demonstrates this with Puffin, who rolls up the feathers on his wing as if they were a sleeve when he recovers from Odette removing the arrow that was stuck in it, then later is shown covering himself in embarrassment when all his feathers fall out during the "No Fear" musical number.
* The Swan Princess; Derek and Bromley practice archery by tipping their arrows with bags of paint.
* The Swan Princess, Derek and Odette are betrothed as children by their parents and forced to spend every summer together. This leads to a musical montage of them growing up hating each other, until one summer (having grown up), they realize that they've actually fallen in love.

* The Swan Princess, Derek makes a vow of everlasting love to who he thinks is Odette, but is actually Rothbart's henchwoman in disguise. That vow was the only way Derek could free Odette from Rothbart's spell that turns her into a swan during the day, and when he makes it to the wrong woman, it dooms Odette to die. Made more painful in that the real Odette, in swan-form, is just outside the window and trying to get his attention from making the mistake.
* The Swan Princess films use this, since its director, Richard Rich, was a former Disney animator.
* The Swan Princess film, while Derek is swinging over a deep pit in a swamp, Knuckles cuts the vine and Derek falls in. Knuckles then just sits and watches as Derek pleads for his life, all the while being swallowed alive by the bog. Fortunately for him, Odette (now in swan form for the time being) shows up and pulls him out just before he can go completely under.
* The Swan Princess her father. Also, she doesn't exactly wait for Derek to show up and does everything she can to try and let him know where she is and what he has to do.
* The Swan Princess II. She doesn't even stop when Clavius turns her into a bunch of different animals.
* The Swan Princess in 2012. It is completely CGI and features a new voice cast.
* The Swan Princess is similar to what Facilier does to the main characters.
* The Swan Princess. It starts out with the two main characters being introduced to each other as children, both of them despising the other upon sight, and goes on to show them growing up, eventually falling in love. All the while their respective parents and kingdoms sing about how their arranged marriage is so perfect...especially as it could result in lower taxes!
* The Swan Princess. It then gets deconstructed as Derek wants to marry her straight away. Odette then asks him if her beauty is all that matters to him, to which he replies "what else is there?" so Odette calls off the marriage. Derek essentially has to spend the rest of the film proving that his love for Odette is based on more than just noticing how she filled out.
* The Swan Princess movies that has power of granting perfect mastery of all three disciplines of mystic arts — Creation, Change and Destruction.
* The Swan Princess, Odette has braided pigtails during the tomboyish phase of her childhood.
* The Swan Princess, Odette tries to use the excuse not on the prince himself, but on her father to delay leaving for the prince's kingdom.
* The Swan Princess orders instead of his. She also keeps complaining about how it's her birthday. She doesn't even stop when Clavius turns her into a bunch of different animals.
* The Swan Princess, Prince Derek and Odette's younger selves were voiced by the ten-year-old Adam Wylie and the nine-year old Adrian Zahiri.
* The Swan Princess Rothbart confine Princess Odette within a well, as transforming her into a swan hasn't stopped her from contacting Prince Derek. With Odette out of the way, Rothbart moves to foist his henchwoman, disguised as Odette, upon Prince Derek. Once Derek proposes to the counterfeit Odette, Rothbart will have the leverage he needs to usurp the kingdom.
* The Swan Princess Rothbart explodes after he is killed when Derek shoots him in the heart with an arrow in his great animal form.
* The Swan Princess Rothbart kidnap Princess Odette, and transform her into a swan to preclude escape. Nonetheless, Odette in swan form manages to attract the notice of her rescuer, Prince Derek. Seeing that Odette is too clever to be allowed freedom, Rothbart confines her to the bottom of a well, where she won't have enough wing clearance to attain flight.
* The Swan Princess series switches over to Odette and Derek's adopted daughter Elise.
* The Swan Princess sidekick Bromley, instead of a princely retinue or regiment of knights.
* The Swan Princess", so many times, Jean-Bob finally grabs Puffin's beak shut and threatens to tear it off if he says it again.

* The Swan Princess taking on an evil wizard or witch who is threatening his lover and/or his kingdom.
* The Swan Princess, Tamara hates the closet because it smells like dead armpit. With how many people Critic's killed, they probably would know what that smells like.
* The Swan Princess that has attacked him. Derek has to figure out what he means by himself, eventually finding a book that describes shapeshifting in the library.
* The Swan Princess that he is a cursed prince. He gets briefly turned into a prince from a stray bolt of magic in the second movie.
* The Swan Princess, the only way to break Odette's curse is to make a vow of everlasting love and prove it to the world. Prince Derek does this by defeating Rothbart so that she could live as well as asking for her forgiveness and telling her the reasons that he loves her.
* The Swan Princess there's Queen Uberta and Lord Rogers. There's also some hints at Queen Uberta/King William but King William goes and dies.
* The Swan Princess. The titular protagonist gets turned into a swan and can only turn back if she's on a lake when the moon appears; the villain of the first movie can voluntarily turn into a monstrous chimera.
* The Swan Princess "This Is My Idea", until it gets to the time when the actual plot begins. In the Russian dub of the song, Odette has a deeper voice starting from her preteen age, and in her mid-teens, she sounds fully like her adult self.
* The Swan Princess: Towards the end, Rothbart has Odette locked up as a swan in a dungeon, and turns Brigit into a look-alike of Odette, sending her to trick Prince Derek.
* The Swan Princess turns into a swan every day (but can regain her human form as long as she's on the lake when the moon rises). Being a swan does allow her to actually escape from her prison undetected and try to find help — as well as being pretty handy for combat. She's able to do many things she couldn't do as a human. It's sort of acknowledged in the first sequel — she's permanently a human but voluntarily changes herself into a swan, recognising that it has advantages and that her husband needs help.
* The Swan Princess when Derek can't think of anything to compliment but her beauty—but once she gets captured by Rothbart the two act like they're engaged again, their conflict forgotten except for a throwaway line at the very end of the movie.
* The Swan Princess who doesn't want to, so Odette says "Our team is shy one green web-footed volunteer!" and Speed steps on his foot so he can't get away.
* The Swan Princess with Jean-Bob, a frog who only thinks that he is a prince when in actuality, he is not.
* The Swan usually had each contestant getting some form of breast augmentation.
* The Swan, which took ordinary-looking women and gave them plastic surgery to bring them closer to mainstream notions of conventional beauty, made use of Groove Armada's "If Everybody Looked the Same", oblivious to the meaning of the song's refrain "If everybody looked the same, we'd get tired of looking at each other".
* The Swap. When their bodies change due to using magical phone totems to make a text message, their body-swap does not switch the voices, but it does switch their thoughts.
* The Swarm, a pathetic-looking iridescent space shrimp with adorable little kicky legs that giggles about taking over the universe. Even the Doctor seems to find it a real disappointment, complaining that it's a "pathetic crustacean" and rolling his eyes.
* The Swarm features a sea dwelling hive mind of single cell organisms known as the Yrr. It is suggested that the Yrr remember events from millions of years ago either by actively coding memories into their DNA or membranes/proteins or by acting somewhat like a huge brain i.e. defective cells within the neural network are constantly replaced with new cells which are given information from other neural network cells that have yet to be replaced in order to maintain memories.
* The Swarm had a bunch of killer bees turn a nuclear power plant into a nuclear bomb in less than a minute, somehow.

* "The Swarm" had the ship confronted with a vast swath of hostile territory that would take too long to go around lengthwise, so they shoot straight through the narrowest point and hope no-one notices. Simply going around it on the z axis at said narrow point is never considered.
* The Swarmlord is the most advanced, most intelligent Hive Tyrant to ever exist. It's tactical and strategic genius is such that, during the Tyranid's assault on the Ultramarines homeworld, the monster consistently outfoxed the Ultramarines, who are known to be the best Space Marines in terms of adaptability, tactics, and strategy. The Swarmlord is functionally immortal, for each time it's body dies, it's mind is reabsorbed into the Hive Mind so it can be respawned into a new body wherever it is needed anywhere in the galaxy. In this way, it has accumulated eons of combat experience, quite possibly making it the most experienced military leader in the galaxy.
* The Swarm of War, after the first planet is conquered, about a million humans are allowed to survive because the Swarm needs workers to build machines, as well as psykers.
* The Swarm of War, Alena was incorporated into the Swarm when she was about five. She is currently an adult with the title of "Queen-consort of the Overmind"... which chapter 60 shows to be no formality.
* The Swarm of War, at the end of the first arc the Overmind rules the planet, but cannot expand beyond until he consumes enough of the Warp Storm surrounding it to clear the way. It takes decades, but of course there isn’t much to tell about.
* The Swarm of War is called the Overmind's Queen-consort. Chapter 60 shows it's more than just a formal title.
* The Swarm of War. That’s a ten thousand years old Badass with knowledge and power only surpassed by the Greater Daemons and Primarchs… and he barely manages to flee.
* The Swarm of War, the first arc has: 1)The King’s Army. 2) The Loyalist Space Marines and Duke Verin’s forces. 3) Judanus with his Chaos Marines and cultists. 4) Bugklaw with his Orks. 5) The Swarm.
* The Swarm of War, the first story arc takes place on a planet ruled by the descendants of a crashed warship's crew. It is mentioned a couple of times that they have conquered some locals.
* The Swarm of War, the new Overmind inroduces Spylings, who are capable of consuming a human brain and then taking over from inside the empty skull - with all of the target's memories, of course.
* The Swarm of War, the Overmind avoids absorbing Chaos Space Marines, despite the usefulness of the Gene-seeds for his plans.
* The Swarm of War turn out to be largely corrupted by Chaos. Later, during a battle between the King’s Army and the Chaos, forces led by the Loyalist Space Marines attack and wipe out the Chaos… and then the other side; due to the King refusing to recognize the Space Marines as his superiors, his kingdom is branded as heretics.
* The Swarm of War, what used to be James (and is now the new Overmind) and its transformed human servants care little for humanity.
* The Swarm, regardless of whether or not they pose any actual danger to the cast.
* The Swarm, though in that case it's because they are so xenophobic no-one knows what they call themselves.
* The Swastika (a widely used good-luck symbol until hijacked), the hammer and the sickle, the red star, the circled A...
* The Swazi lilangeni is an accidental version; despite having a different design, it has exactly the same composition and shape as a pound sterling coin. It only has a face value of around 10p (depending on the rate of exchange) and can be passed off as pound coins to people who aren't paying attention (or machines).
* The Swear Jar: Putting money in a jar every time you swear to try and break the habit of using profanity.
* The Swear Jar: Someone puts money in a jar to curb their swearing habit.
* "The Sweaters" turns the show in a parody of sports movies, specifically
* The sweaty villain, who reeked because he hadn't had a shower in days, decided

to wreak havoc on the city by wrecking its skyscrapers in a reckless manner.
* The Swedish-American colony in Jerusalem, which sparked Selma Lagerlöf to write her novel
* The Swedish army is probably somewhat less badass than most of these examples. Still, they deserve an honorary mention, since part of the basic training of every Swedish soldier involves being
* The Swedish automaker Volvo led a much quieter revolution in cars than many of the other examples on this list: namely, they always led the charge in implementing new safety features. Laminated safety glass? First introduced to automobiles on the Volvo PV in 1944. The three-point seatbelt? Volvo engineer Nils Bohlin invented it, and then Volvo made it standard on all their cars in 1959 and proceeded to offer the design to all automakers for free in the interest of safety. Crumple zones, rear-facing child seats, airbags, even when Volvo didn't outright invent a new safety feature they were always among the quickest adopters, leading everybody else to follow the example they set. There's a reason why the National Highway Traffic Safety Administration, when formulating the US' standards for crash tests (another field where Volvo was ahead of the curve), bought a number of Volvo 240s and used them as the benchmarks.
* The Swedish Chef is often this way, such as when he makes chocolate mousse by rubbing chocolate on a moose, and his "chicken in a basket" involves him bouncing a chicken and then throwing it through a basketball net.
* The Swedish Chef's intro in the movie - as the cook for the island's natives. The cast justifies this by saying, "Well, how
* The Swedish comic-book series "Det nya folket" takes place during the stone age and depicts the conflict between the Neanderthals and the new Cro-Magnon humans. The latter refer to the Neanderthals as "trolls" while the former call the Cro-Magnon "almost-humans".
* The swedish company Krisprolls was made very famous in France by its late 90's advertising campaign, which told of one Swede's struggle to eat Krisprolls toasts behind his wife's back. The ads ended either with said wife catching him red-handed (uttering a suspicious "Ingmar...") or with her
* The Swedish dub casted several children and teenagers between 11 and 16 as the digidestined, with the exception of Joe who was played by an actor in his late 20's. The Digimon were all voiced by experienced voice actors.
* The Swedish ISP Telenordia used this to promote their faster service. In their ad, a girl just met a guy over the internet, so she tries going to his website to get an idea of what he looks like just before going out to their first date. The page's main image of the guy loads so slowly that it's only reached his beautiful eyes before she has to leave, but it's clear that he's a handsome guy. Once she gets out the door, the picture finishes, and it's revealed that the beautiful eyes belong to a wall poster, while the page's owner (the guy she's dating) is the morbidly obese slob sitting on the couch under it.
* The Swedish Jonas Gardell made a point about this in his book About God, where he commented upon the fact that God showed a weird favoritism for younger sons, for no particular reason. It may have tied into favoring the humble, though, as the youngest son would inherit the least.
* The Swedish king Gustavus Adolphus, The Lion of the North, revolutionized warfare in the 17th century with both strategy and organization. He instituted permanent units, assigned a fixed chain of command, and established a philosophy of cooperation among all combatants. Instead of independent action by many different parts, the entire Swedish army now united to fight as a single team. Gustavus's use of supply lines and bases and his integration of infantry, cavalry, and artillery enabled him to form the first truly professional army in military history. Among the many people who studied him as a role model to follow militarily were Napoleon, who quite obviously is another example of this trope.
* The Swedish language retains the old Germanic meaning for the word. Swedish word
* The Swedish plans against ground invasion relied on Finnish tactics. Just like the Soviet's overwhelming advantage in tanks was cancelled out by forcing them into narrow roads which were the only way through the forests so the Finns only faced a

few at any one time, the famous Swedish S-Tank was designed around that strategy: a low profile that made it hard to hit, a fixed gun designed to deal with tanks forced into narrow forest roads, and the ability to drive backward just as fast as forward (and a second driver specifically for that task) so the tank could engage an enemy force, then quickly scoot back to another position and do it again.
* The Swedish princess says this to Valentine when he first reveals his plans to her.
* The Swedish right used to be quite fond of these kinds of statements. Just from the 1928 election to the second chamber of parliament: "You who vote for the 'Workers Party', your vote goes to Moscow!" "MEN OF THE DALES! Your forefathers have once saved Sweden from the danish tyrant. Repeat your great feat once again: Every vote on the 'Workers Party' stands for the destruction of society and the introduction of Bolshevism. SAVE THE FATHERLAND!" "You who vote for the 'Workers Party' vote for the confiscation of private property. YOU will lose your savings!" "A Vote for the Freeminded Peoples Party might promote incompetence — a vote for the Workers Party might be for a communist — vote with The Liberals."
* The Swedish Ship Götheborg. She is a modern replica of an 18th Century East India-man, built and crewed mostly by volunteers. She sailed from Sweden to China and back again, a trip that took almost two years and has since been sailing all over Europe. The rigging is one of the most accurate copies in the world and the only lines (that's a rope to landlubbers) that are not made of natural fibers are the mooring lines and a cable for the Man Over Board boat (a requirement by maritime law).
* The Swedish singer Roger Pontare is notable for his very deep voice both when talking and singing.
* The Swedish song "I Lågornas Sken" (In the Fires Light) by Nordman is about a young girl judged to burn at the stake.
* The Swedish Vittra, however, were much more unpredictable than the Nisse/Tomte. They looked like and behaved like regular humans, but they lived "underground". They were just about as likely to bless humans and give them riches and fortune for little to no reason as they were to curse them to
* The Swedish word for "compartment" is "fack", and yes, it's pronounced exactly as "fuck". Other things are "kant" ("edge", pronounced "cunt") and sex being the same word used for the number six and intercourse. So if you ask a Swede how many they have of something, and they answer "Jag har sex" ("I have six/sex"), try not to laugh too much.
* The Sweeney, as the Flying Squad were actually the Metropolitan Police's specialist armed robbery taskforce.
* The Sweeney, episode "Night Out": the following exchange takes place between Jack Regan (a cop) and Iris Long (a "working girl") while awaiting the arrival of an armed gang:
* The Sweeney: He's a tough, no-nonsense, bends-the-rules older cop who's quick-witted and with an eye for drink and the ladies! He's a younger, more inexperienced cop who wants to follow the rulebook yet respects his older partner! They fight crime!
* The Sweeney, Inspector Regan's reading of the rights generally summed to four words, usually accompanied by one last punch, kick or headbutt:
* The Sweeney movies, the Flying Squad takes a shortcut through a room, interrupting a couple having sex there. When the man threatens to put in a complaint, John Thaw's character shuts him up by asking whether the girl he's with is of legal age.
* The Sweeney, whose portrayals ranged from "contemptible but necessary" to actually fairly sympathetic. Of course, one of the show's central themes was that the cops and the cons weren't that different.
* The sweeper was a central defensive role (often with two other central defenders in front of him) meant to cover situations where the opposition would fire the ball over the head of the defense to chase. Changes to the offside rule and the introduction of single forward formations rendered this position effectively obsolete. It was eventually replaced by the idea of a "sweeper keeper". With teams

using the offside trap to push opposition forwards well up the pitch, the goalkeeper can be required to use their speed to run well outside of his penalty area to "sweep" balls over the top like the old central defensive sweeper did, while also being a traditional shot saving goalkeeper.
* The Sweeper when Mark's mom gets shot, an closeup shot of the blood splatter on the TV can be seen.
* The Sweet Death has a very strange example: the victim had survived an attempted murder at the hands of his cheating wife and her lover but was so crippled that he could only blink. So, when he accidentally met Diabolik, he asked to be mercy-killed and avenged. After securing the loot, Diabolik killed him and framed his wife and her lover in a way that would lead them to get sentenced to death and executed.
* The Sweetest Apu", Homer and Marge are worried about Apu and Manjula's marriage, when Marge has an idea.
* The Sweetest Apu" when Marge finds out Apu is cheating on his wife. Homer insists that they tell Krusty, because "that guy's hilarious!" Homer then tells Krusty right as he's drinking a big mug of coffee. Krusty reacts by... swallowing the coffee, and saying "That's sad. All those kids..." Marge later reminds Homer that off-camera, Krusty is "a desperately unhappy man."
* The Sweetest Fig; among other things, he walks his dog Marcel in his underwear without noticing.
* The Sweetest Fig and the Eiffel Tower sagging over like a deflated balloon.
* The Sweet Hereafter, and subverted in the sense that it was clear this was to be a last resort and his chances of performing it successfully were minimal.
* The Sweet Hereafter: in the original novel by Russell Banks, Mitchell Stephens clearly comes across as one to many of the townsfolk. However, his reasoning is more complex: he's a shark in court, going after what he perceives as huge, uncaring entities who try to cut costs, in order to make it more expensive for them.
* The Sweet Hereafter says he knows he comes across like this, but he doesn't care - his real goal is to make lawsuits so costly for corporations that they'll take the time and spend the money on safety, instead of cutting costs and putting other people at risk.
* The Sweetie Chronicles: Fragments. Cue total silence and Mrs. Cake asking the obligatory "Are you sure?"
* The Sweetie Chronicles: Fragments: each of Twilight's fragments was placed in a different universe, which Sweetie Belle must then travel to and collect.
* The Sweetie Chronicles: Fragments happen) but only they remember it happening, so, to the fragment, it's as though they just walk in and win.
* The Sweetie Chronicles: Fragments. She gets better when Twilight uses her soul to bring Sweetie back to life.
* The Sweetie Chronicles: Fragments: Twilight Sparkle gets turned to crystal after the magical time-and-space thing she's experimenting with explodes.
* The Sweetie Chronicles: Fragments, while they're at the castle, we have this little bit of description:
* The Sweet's "Ballroom Blitz" mentions this about the man in the back. "As a matter of fact, his eyes are as red as the sun." He's responsible for it turning into the titular ballroom blitz.
* The Swell's combined form in the Season Eight issue "Swell" (made up of all the individual Vampy Cat Play Friends).
* The Swell Season, it reached #61 on the Hot 100 and also peaked at #8 in Canada and #2 in Ireland. The duo never had another charting hit again, and only released one more album before disbanding in 2011.
* The swimmer Aoi Asahina is such a Passionate Sports Girl that her title is
* The Swimming Pool Library, are full of attraction, sex and relationships between older and younger gay men.
* The swimsuits that Senna models in an early scene are definitely better adapted for flaunting it than for swimming, though that could be classed as
* The Swindle, and if you don't get to the escape pod quickly enough, you die.

* The Swindle are robots, starting with mechanical English bobbies and getting weirder and deadlier from there.
* The Swindle mean they can be anywhere from "one bomb away from the outside" to "nested at the heart of a nigh-impenetrable labyrinth".
* The Swindler's Swamp is an exceptionally dangerous area, even to Hunters. The Swamp's entire ecosystem has evolved around deceiving and eating humans, with such friendly wildlife as "man-faced apes" which go out to masquerade as humans and lure them back to the swamp. Swindler's Swamp is used as staging ground of the second phase of the Hunter Exam that Gon and company take. The goal is simply to reach the other side. Everyone who reached this phase is a 1 in 10000 badass. Out of a group of a few hundred, only
* The swing classic "Sing, Sing, Sing" was made famous by Benny Goodman and his Orchestra but it was originally a song with lyrics sung by Louis Prima.
* The Swinger. Later on, Tony Franciosa takes Ann-Margret to a sleazy motel and chases her around the bed, trying to force himself on her.
* The Swinger, the lecherous head of "Girl-Lure" Magazine tries to seduce Ann-Margret's character with an office much like this.
* The swing has become a favorite spot for Castle and Beckett; they are seen on the swing again in the Season 7 finale "Hollander's Woods",
* The Swinging Cheerleaders, a '70s exploitation comedy, averted this. Cheryl "Rainbeaux" Smith neglected to tell anybody involved with the production that she was five months pregnant. Never mind that her part called for several topless scenes and that her character was a virgin.
* The swing is revisited in the Season 5 finale "Watershed" and the Season 6 premiere "Valkyrie", as the site where
* The swing motif in the film is a little more bizarre than that: it shows up repeatedly during several of the more psychedelic sequences, and the
* The Swirling Eddies, all the songs are either deliberately bad (like DeGarmo and Key's "God Good, Devil Bad" performed as if they were recovering from head injuries) or wildly out-of-genre (like a lounge jazz version of DC Talk's "I Luv Rap Music").
* The Swirling Eddies, or like Christians waiting and hoping for Jesus' return.
* The Swiss Air Force during World War II did this a lot, as planes from both sides of the war (mostly Allied bombers) would attempt to cross into neutral Switzerland rather than risk bailing out over or crashing in enemy territory. What planes actually made it down to the ground in one piece were often repaired and repurposed to intercept
* The Swiss Alps are rigged to blow up with a Dead Hand, should the country ever be invaded. Though there's little reason for anyone to bother. Still, were this ever to happen the dirt and rock blown into the atmosphere would plunge the world into darkness for days and likely cause crops to fail worldwide. Also not a true Dead Man's Switch, as it does have to be armed by the Swiss military first.
* The Swiss Criminal Code prohibits fare evasion by using forged tickets, old tickets, wrong tickets, etc., but does not cover fare evasion by not having a ticket at all. So the Swiss Supreme Court ruled that using public transportation without a ticket at all was not a crime, because that specific case should have been such an obvious one to forbid when legislating fare evasion.
* The Swiss Family Robinson back in Switzerland, and visited his congregation in their homes, including helping them out with their work while he talked with them.
* The Swiss Family Robinson: Ostrich jockeys have races in Arizona every year.)
* The Swiss Family Robinson. They had a water-cooled "fridge", and a waterwheel-pumped system to deliver it.
* The Swiss Family Robinson, using a banana and the family's pet monkey.
* The Swiss Guard both plays this straight and subverts it. The official, well-known uniform is colorful as a peacock. The work uniform is much more practical.
* The Swiss mercenaries of the 15th century deserve an entry of their own. For a long time, it was an established truth that the only force capable of beating Swiss pikemen was an equal or greater number of Swiss pikemen. The first national army to ever beat a force consisting only of Swiss mercenaries was a French army that

outnumbered the Swiss force 15 to 1... And had
* The Switch after Wally is revealed to be the donor for Cassie's pregnancy.
* The Switch counts two Joy-Cons as separate controllers even if used in tandem or put in a Joycon grip controller. While this is usually not an issue as most games only allow up to 4 players, in games that 8 players are a possibility like
* "The Switch" ends with two of the three characters permanently swapping their body with the other's, but everyone gets to live with the aftermath of said body-swapping.
* The Switch prioritizes the microSD card for downloads if one is inserted. This by itself is a small if noticeable annoyance for those who prefer to use the internal storage for patches and DLC for their games, but what makes it even more tedious is that the console does not let the user move data between the two destinations in the settings
* The Switch's kickstand, while useful in a pinch if you want to play two-player games with someone in portable mode, only has one very upright position, making it uncomfortable to look at the screen unless whatever surface it's on is almost at eye-level, and if you're at a dining room or coffee shop table, it most certainly will not be. Also, since the charging/USB-C port is on the same side as the kickstand, you can't use the Switch in stand mode and charge at the same time, unless you invest in a third-party stand that allows access to the port.
* The Switch's voice chat has been heavily criticized for requiring a smart device to use, a bit of a baffling decision considering that the
* The switch to the Batpole doors was hidden inside a bust of Shakespeare in Bruce's study. But why this bit of secrecy when the bust sat next to the clearly visible Batphone?
* The Swollen Eyeball Network - a group of conspiracy theorists who communicate mostly via webcam (in silhouette with red eyes).
* The Sword: After three demigods kill Dara Brighton's parents and sister in search of the titular mystical sword, she finds it and sets out to use it to avenge the death of her family.
* The Sword and Hammer abilities also do this. Kirby's attack whilst dashing with the Hammer has him spin horizontally and with both Hammer and Sword, attacking whilst in the air makes Kirby spin around. (Sometimes, the spinning maneuver is given to the Cutter power instead.)
* The Sword and the Fish, where after slowly making their way through several screens of very tough monsters, the party is confronted with the entrance to a large dungeon. They figure they can be clever by just going around and using the back entrance, which indeed takes them right to the boss, who complains about how they completely avoided all of his lethal traps and mazes. Later, though, it's revealed that the front door to the dungeon led to an empty room with no enemy encounters which led directly to the boss chamber, meaning that sneaking around the back way actually forced the party to fight more enemies than they would have if they had taken the front door.
* The Sword and the Flame variant where this applies in spades — literally, as turning a card tells you whether one of your units has just met Livingstone, been attacked by a lion, or heard drums that cause you to lose a turn in fear.
* The Sword And The Rose, Princess Mary Tudor (sister of Henry VIII) unsuccessfully attempts to run away with Charles Brandon rather than be married to the aging King of France. It should be noted that the film is historically inaccurate; the real Princess Mary did in fact elope with Brandon, but not until after she had married King Louis and nursed him through his final illness.
* The Sword and the Sorcerer circuit, and by then sword and sorcery films were dying down in Hollywood in favor of superhero titles.
* The Sword and the Sorcerer do it first. Cromwell killed Talon's father Richard, who happened to be his arch-rival.
* The Sword and the Sorcerer: Evil sorcerer Xusia's tomb is built from human faces, which come alive during his awakening ritual, shortly after the movie's opening credits. This can be seen in the video example "Wall of Faces".
* The Sword and the Sorcerer, the hero is armed with a triple-bladed sword that can

shoot two of its blades.
* The Sword and the Stone the curse "Castor and Pollux blow me to Bermuda!" is more effective than planned.
* The Sword as all the injuries that the eponymous magic sword healed her of come back once she has lost the sword. Since dying means that she gets to be with her family again after having killed the elemental demigods and saved the world, it's not really such a sad ending.
* The Sword-Edged Blonde can't remember doesn't mean that she can't be found by someone who hates her from her first disastrous attempt.
* The Sword-Edged Blonde, one of the Eddie's old mercenary comrades is now head of law enforcement in a city where Eddie needs to find a certain criminal. They naturally help each other out, but don't end up fully in accord — there's a supernatural aspect to the criminal which Eddie doesn't want to reveal. The friend indicates that he'll probably get over his irritation eventually, but right now, it would be best for Eddie to leave town.
* The Sword-Edged Blonde, when the queen is accused of murder, the detective protagonist recommends that the king sentence her to public humiliation while the detective tries to find the person who framed her.
* The Swordfish had the advantage of being so slow that an attacking fighter had to slow to almost stalling speed to be in with a fleeting chance. It was also surprisingly manoevrable: this combined with its exceptionally slow airspeed allowed it to evade fighters moving four times more quickly but which could not stunt as well. These factors also explained the survival of Gloster Gladiator biplane fighters in the air battles over Malta.
* The Sword Interval, the Famorian civilization, realizing that their world was beyond saving, stored all their collected knowledge about the events leading to this apocalypse in a vessel capable of surviving the end of the world, to be found by the inhabitants of the next world to be born in its place...Earth.
* The Sword in the Stone (1939) has a set of dishware that talk and clean themselves. Chapter 3: "At this all the china and cutlery scrambled down off the table, the cloth emptied the crumbs out of the window, and the napkins folded themselves up. All ran off down the ladder, to where Merlyn had left the bucket, and there was such a noise and yelling as if a lot of children had been let out of school. Merlyn went to the door and shouted, 'Mind, nobody is to get broken.' But his voice was entirely drowned out in shrill squeals, splashes, and cries of 'My it is cold,' "I shan't stay in long,' 'Look out, you'll break me,' or 'Come on, let's duck the teapot.'" Expanded on in the Disney animated film based on this work.
* The Sword in the Stone adapts a fairly dense 210-page book into an 80 minute movie with lots of musical numbers eating up its runtime, so naturally much of the book was left out. Major subplots like King Pellinore chasing the Questing Beast and Arthur meeting Robin Hood and Morgan le Fay for the first time got removed entirely, Merlin turns Arthur into only three different animals rather than six, and all of Sir Ector and Kay's character development was dropped in favor of making them a Disney-typical abusive family.
* The Sword in the Stone, and is defeated by Merlin in a hilarious wizard's duel.
* The Sword in the Stone, as Merlin is going on to Wart aka. King Arthur about the legacy he will leave, he notes that "they might even make a motion picture about [Arthur]".
* The Sword in the Stone because he doesn't comprehend why she's acting "funny" around him. Justified, as he's a boy who is barely about to reach puberty and seems to have never interacted with girls his age, while the girl squirrel isn't even of his species. He does, however, realize he broke her heart when he turns back to human form.
* The Sword in the Stone continuously pursues Wart to try to eat him, not just as a human, but later when he's turned into a squirrel. In every case, the wolf's plans are comically foiled by his bad luck.
* The Sword in the Stone despises anything pleasant (such as flowers and sunshine) and tries to murder Arthur just because Merlin sees something good in him.
* The Sword in the Stone different voices: one prepubescent, one with an obvious

crack, and one at a post-crack stage. The sudden switches between them can be a bit jarring to say the least.
* The Sword in the Stone exist in the animal kingdom (he has transformed himself and the boy into fish for the day), but that among humans it's counterbalanced by the potential of the weak to use their "intellect" to outwit the strong. When they get attacked by a gigantic fanged pike, Merlin has Arthur prove his point by using a discarded arrow to jam the bigger fish's mouth open, distracting it from biting down long enough for Arthur to escape.
* The Sword in the Stone fanworks where the girl squirrel becomes a human, she usually retains her squirrel level of hyperactivity.
* The Sword in the Stone is an old ugly witch but for about half a minute, she uses her magic to transformation in a beautiful young curvy version of herself and then promptly transforms back to her old self, proclaiming she prefers looking ugly. Most fans disagree, which is why the majority of fan content features her beautiful version.
* The Sword in the Stone is in lust with Wart. She stalks and repeatedly touches him after he explicitly tells her, "No." She chases after him when he tries to run away, and he becomes so desperate to be left alone he resorts to begging Merlin to be turned back into a human in order to escape her. Merlin only complies when he gets his own female squirrel stalker after him, because he thought Wart's situation was amusing.
* The Sword in the Stone is one of these. In that film, he's a powerful wizard who uses magic to teach science to young Arthur.
* The Sword in the Stone: Merlin blasts away to Bermuda. When Wart asks if Merlin ever comes back, Archimedes only answers, "Who knows? Who knows anything?"
* The Sword in the Stone, Merlin comments that there are all different types of underwater environments, each with their own challenges. Though we never see any of them, knowing Merlin, it's probably true.
* The Sword in the Stone: Merlin has an owl named Archimedes that has the ability to speak and human-level intelligence. In fact, he's arguably the smartest character in that film. Archimedes is characterized by being grumpy and sarcastic, but he has a good heart.
* The Sword in the Stone. Merlin uses his "Higitus Figitus" spell to put his belongings in a traveling bag. After a sugar bowl cuts in line, it stops the other items behind it from moving forward and they run into it.
* The Sword in the Stone owns a whole house of animate furniture, most prominently the tea set with the insolent sugar bowl. He also magically animated a castle's worth of things to clean themselves.
* The Sword in the Stone received two Finnish dubs; once in 1965 and again in 1993. Interestingly, Kauko Helovirta voiced Merlin in both dubs. Also, Archimedes is a female in the 1965 dub.
* The Sword in the Stone. Sir Bart, the knight wearing all black, was shown to be scary, but when it was spread and challenged that Wart (Arthur) had pulled the sword out and put it back; he was the most reasonable and vocal about giving him a chance to show everyone he could do it again.
* The Sword in the Stone: Sir Ector does this when Sir Pellinore tells him that the winner of the New Year's events wins the throne of England.
* The Sword in the Stone, Sir Grummore and King Pellinore have a rather lengthy one following a battle, first about whether Pellinore said "Pax" or "Pax Non," and then about whether or not he's a cad; a bit later, about him being a cheat. The whole thing continues on and off for about a page.
* The Sword in the Stone, sneezing, she emits fire from a monstrous sneeze that forces Arthur and Archimedes to duck and cover.
* The Sword in the Stone, something sounding like "Chicoo". This seems to be what squirrels chirp to refer to loved ones, meaning she's likely calling him something like "darling" or "beloved".
* The Sword in the Stone tells Wart that love is a powerful force after a lovelorn female squirrel becomes heartbroken when Wart is transformed back into a human.
* The Sword in the Stone: The film is somewhat notable for the scene in which a

female squirrel, who had fallen in love with Wart in his squirrel form, becomes heartbroken when she discovers he's really a human. Feeling sorry for her, someone wrote a fanfic in which Wart convinces Merlin to turn her into a human and help her adjust to her new life. The character, often called Hazel, is pretty popular in fan works.
* The Sword in the Stone. The one that flirts with Merlin playfully tickles him.
* The Sword in the Stone, though it’s still considered to be the weakest film out of the canon’s Golden and Silver Ages.
* The Sword in the Stone threatens to turn Archimedes into a human if he doesn't obey. Archimedes claims he wouldn't dare.
* The Sword in the Stone Wart spends time as Sir Kay's squire before pulling the sword from the stone. In fact, Squire is the highest rank Wart can attain since as far as anyone knows he is not of knight-class birth.
* The Sword in the Stone: When Mad Madame Mim turns into a warthog to scare Wart. It works.
* The Sword in the Stone. When she wraps her tail around him and kisses him on the lips three times, he wipes his mouth, throws her tail over her head and pushes her. She chirps in an excited, flirtatious way suggesting this trope.
* The Sword in the Stone won't hesitate to attack a predator ten times her size to protect Arthur.
* The sword is the umbrella's true form, a fact which remains recognizable to a human until sometime in his 30s.
* The sword Kamimura uses to sever Oran's chip-implanted hand and therefore save him in the
* The sword made by Domingo Montoya for the six-fingered Count Rugen and wielded by Domingo's son
* the Sword of Allah, is considered one of the greatest generals in history. He never lost a battle in his long career and repeatedly defeated the Byzantine and Sasanian Empires, two of the greatest powers in the world at the time.
* The Sword of Change, a magic blade that can mutate its victims into masses of random
* The Sword of Creation (aka the Realm Defense Grid). Once fired up you can use it to obliterate entire armies of powerful supernatural monsters. It does also chew up the landscape though, so it is not fit for everyday use.
* The Sword of Crota was capable of draining the Light of Guardians it killed, resulting in their permanent end.
* The Sword of Discord grants its user tremendous power, but also drives them to homicidal madness and fury.
* The Sword of Doom, a remarkably grim and nihilistic samurai movie, has the (anti)hero cornered, fighting, probably doomed — and then the film ends in mid-slash on a freeze frame. The reason for this: a sequel was intended but never filmed. (But given the general aura of nihilism in the film, this no-ending actually works better than one more definitive.)
* The Sword of Doom more remaining), he is clearly starting to feel the effects of his wounds. The film ends with a freeze-frame as he lunges into yet another swordfight. Supposedly this movie was to be the first in a trilogy that was never made, and further installments would have resolved his fate more conclusively.
* The Sword of Doom rarely concerns himself with the effects his actions have on others. This results in an ever-growing list of people who want him dead.
* The Sword of Doom sees Ryunosuke Tsukue steadily gaining new injuries to different parts of his body, affecting his speed and fighting style.
* The Sword of Doom, when Hama is pretending to be her husband Bunnojo's sister to Ryunosuke, she tries to cover her slip-ups this way. It doesn't work.
* The Sword Of Etheria, the tutorial asks you to perform a knockback attack, however it fails to tell you that the attack requires you to have stunned the enemy for it to work until after it is attempted. The dialogue changes if the player succeeded in their attempt, acknowledging their success and then explaining the technique in case the player stumbled on the correct answer.
* The Sword of Gryffindor, impregnated with Basilisk venom, is mentioned a few

times.
* "The Sword of Kahless" Jadzia, Worf, and Kor encounter a narrow ledge while working their way to the surface from the Hur'q treasure room. Kor falls down but grabs hold of the edge, and the others pull him back up.
* The Sword of Mars. Rumored to be made out of meteorite iron and was a grave marker of the previous owner. While it stood in the ground it was struck by lightning.
* The Sword of Might, one of two weapons that could be used to create a new Captain Britain, now used by Brian Braddock, now Captain Avalon.
* The Sword Of Rhiannon Martians, but a million years ago Mars was much warmer, with extensive oceans.
* The Sword of Shannara fantasy novels that weren't written by Tolkien could also go on to sell zillions of copies.
* The Sword of Shannara figure is somewhat of an annoyance to him and not actually necessary. He IS sorcery.
* The Sword of Shannara has the evil advisor Stenmin, who drugs and manipulates the usurper Palance Buckhannah while his brother Balinor is away on the quest.
* The Sword of Shannara is considered far too similar to LOTR to even attempt.
* The Sword of Shannara revolves around this trope. Various groups of people see either science or magic as the cause of the downfall of society. They then fight and destroy each other.
* The Sword of Shannara's works (later books in the series less so), but his elves and dwarves get along quite well and have for centuries, thank you very much. Also, Brooks' dwarves have a morbid fear of being underground, to the extent that a given a choice between sleeping outside in the rain and sleeping in a cozy, dry cave, the typical dwarf is going to wake up wet.
* The Sword of Shannara Trilogy the poison from the Creeper-like monster is described as purplish in color.
* The Sword of Shannara. Unlike other examples what seems to be his body does surface, but we never get a good look or description.
* The Sword of Shannara with Amberle and Eretria. He and Amberle are deeply connected, and he is left devastated when they don't work out (though the reason they don't work out isn't the usual sort). He goes on to marry and have children with Eretria.
* The Sword of Sharpness is another magical blade that, as its name implies, is
* The Sword of Swords: The titular sword, made centuries ago by a rare enchanted metal, can create powerful winds with a single swing.
* The sword of the famed alchemist Paracelsus, which supposedly contained Azoth (a cure-all) in its pommel, and a gem containing an imp that could be sent out to wreak havoc.
* The Sword of Truth, Adie never declines the verb "be". It is a trait of her home language. Others from the same land were shown to speak in a similar manner, but occasionally use ordinary grammar.
* The Sword of Truth books contain several examples. The most powerful spells in the book require special signs drawn in powdered herbs, bone, blood, and, for the most powerful spells, sorcerer's sand (crystallized wizard bones from 3000 years ago). It is stated that in the last case, even the smallest mistake cannot be corrected and means death. At least one wizard family lived in an entire palace built as a magical sign. There is also a form of magic where an artist uses various shapes, formulas, and such in conjunction with a painting of a person in order to place curses on them.
* The Sword of Truth, events and plots of the entire series are a result of the direct influence of the events in the Great Wizard War that happened over 3000 years ago.
* The Sword of Truth flirts with this trope. Every book, he spends his time working himself into a more and more impossible situation, only to casually brush it aside at the climax.
* The Sword of Truth. Goodkind didn't see the need. He drew the map himself, updated it once for the second book, and never changed it again even when the story

went way beyond its borders.
* The Sword of Truth" have an enemy soldier tortured to death after he gives them the information.
* The Sword of Truth. It helps that his sword can magically cut through anything.
* The Sword of Truth. Kahlan is immediately mistaken for a whore. Not wanting to cause bloodshed, she merely pretends to have a day off with Richard being hired by her.
* The Sword of Truth makes light "webs" (spells) these are epically destructive often manifesting in the form of large explosions.
* The Sword of Truth, most mind-controlled to be with him. Demmin Nass is especially nasty, as his victims are young boys (who he murders afterward).
* The Sword of Truth needs it to in a given scene, even if earlier information has suggested that magic can't work that way. One of the clearest examples is the Mord-Sith's method of capturing wizards. They are able to steal any magic used on them and use it against the wizard, including protective spells. Despite this being established, the wizard Zedd later states that the Mord-Sith are not a threat to him because "I have protection." The strong implication is that he has a protective spell that prevents them from stealing his magic, but this would be impossible as they could steal the protection spell as well. It's just one of many examples.
* The Sword of Truth nothing more that a Bling of War, but in his case, it is a sign of discipline. His army does lose to the other in the end, but they fight well enough for the surrendering soldiers to be accepted into the enemy forces.
* The Sword of Truth, of course. And his half-sister thanked her allies for doing it, because they can't show mercy to their "enemies".
* The Sword of Truth, particularly when the latter begins to take precedence over the fantasy elements.
* The Sword of Truth potential that Richard's gift has been blocked or restricted by taking a hostage on a regular basis.
* The Sword of Truth powers no longer need time to get recharged, they require no sleep, feel no pain, can throw around lightning... very few survive once they are done.
* The Sword of Truth rather than having some magical ability that allows her to break an illusion like many of the other examples.
* The Sword of Truth series: Richard's magic, a lot of the time. Being a War Wizard, Richard's magic tends to do whatever the plot requires of it, without Richard understanding what he's doing, or how he's doing it.
* The Sword of Truth series (there was a major magic disruption a few thousand years ago). Commonly called "skips"; whether Rowling's later use of a similar term is accidental is unknown.
* The Sword of Truth series. They're only about man-sized, and can only seem to carry skinny teenage girls, or wizards using magic to make themselves lighter.
* The Sword of Truth series when Kahlan tells him she doesn't love him in order to save his life by forcing him to leave with a priestess of the light, Verna. Later on, Richard breaks out of his depression when he does the same thing to his pet Gratch and realizes Kahlan was doing the whole thing for Richard's sake.
* The Sword of Truth. Skintight leather suits coming in brown, red, or white. At one point Richard sees one naked and notes the only difference is color.
* The Sword of Truth, the Mud People have gold treasuries (and possibly mines) on their territory, but consider it worthless because it's too soft for spears.
* The Sword of Truth, there are a few of these scattered around the world, often by the wizards from the Great War. The Dream Caster's Wise Man (a hereditary position) and his last-second replacement; (his granddaughter, slightly averting this trope) are a good example: they keep one of the "Central Sites", a scattering of library/bomb-shelter/safehouse/crypt things.
* The Sword of Truth, there is an (almost impenetrable) great barrier around a region called "The Midlands", which is the central geography of the story.
* The Sword of Truth, the Seeker is described as being "...a person who answers to no one but himself; he is law unto himself. The Sword of Truth is his to wield as he wishes, and within his own strength, he can hold anyone to answer for anything."

* The Sword of Truth: The seventh book has a wizard activating an ancient spell in the middle of the enemy camp. The results are quite nuclear, and cost the enemy about a million soldiers.
* The Sword of Truth upon themselves with it. One Imperial Order member later explains they use magic to eliminate it.
* The Sword of Truth, where towers composing an ancient barrier are built at seemingly random distances from each other, from several yards to several miles. As a sorceress explains, power lines in the earth itself were used to choose the spots.
* The sword Silverlight, or it's upgraded form Darklight, are required to kill the demons Delrith and Agrith Naar and tormented demons. Silverlight and Darklight are also extra effective against other demons.
* The swordsman's technique Tempest. The swordsman makes a rolling leap through the air, twirling their sword around like a giant human rotary saw. Ruca, the main character of
* The swords of Cohen the Barbarian and his Silver Horde may look all worn and notched, but that's just because
* The Swords of Ditto almost immediately after their arrival in the throne room.
* The Swords of Ditto for a second or two, but they will otherwise come out of it unharmed once they break free.
* The Swords of Ditto Mormo on the final day, some of the townspeople will give you free items. You will still, however, have to pay for items from the stores.
* The Swords of Ditto, you can put a "Kick Me" sign on enemies to make other enemies target them instead of you.
* The swords of Japanese swordmakers, like Masamune and Muramasa, are treated like this.
* The Swords of Justice's former signature moves (Before it was also given to Aegislash) Sacred Sword and in the case of Keldeo, Secret Sword, look like this.
* The Swords of the Cross have this as one their abilities—they can shut down hostile magic and effectively level the playing field between a Knight and their opponent. This effect is so potent that it is able to shut down the raw psychic willpower of the
* The Sword Stained With Royal Blood starring Yuen Biao and Danny Lee. An over-the-top remake of the older Shaw Brothers film of the same name.
* The sword still saw plenty of use, at least for cavalry and officers, well into the 19th century. When most firearms were single shot, mechanically unreliable, and/or difficult to reload,
* The Sword's "Warp Riders" is a tribute to the sci-fi novels of the 1940-70's. The lyrics tell the story of an archer banished from his tribe, a
* The Sword, the Ring and the Chalice, she initially presumes he's a spoiled, pampered brat as he was living in the prosperous country of Mandria while she and the rest of the people suffered under the cruel rule of Dain's uncle. What she doesn't know is that Dain's sister and adoptive family were killed and he suffered through starvation, beatings and discrimination and only very recently learned of his heritage. If not for certain circumstances, he would have remained a beggar. His friend Thrum coolly points this out to her when she makes such accusations towards Dain.
* The sword Wado-Ichi-Monji seems to fill this role for Zoro. It used to belong to his childhood friend Kuina—she died very young, so he carries it for both of them.
* The sword was also largely just a diversionary tool, as most shields are set at a rate where the cutting speed of a sword would be repelled. So the point of swordfighting was actually to trick the opponent onto falling onto your knife, or making a misstep long enough for you to make a slow cut with your knife.
* The Sword where the band members fight some evil robots in a post-apocalyptic desert.
* The Sword Worlds, from where the titular Space Vikings came from, are straight-up feudal with each planet either ruled by a king or split between several independent continent-sized duchies, which are divided up into a range of smaller

estates down to baronies of farms or factories.
* The Sworn Sword" by George R.R. Martin, Lady Rohanne (a.k.a. the Red Widow) will lose her lands if she doesn't remarry by deadline.
* The Sworn Sword. Much time is spent by Dunk, Egg and Ser Bennis in training the villagers in use of arms for a proposed battle against the Webbers of Coldmoat despite many of them never holding a sword in their life. In a thorough deconstruction of the trope, Dunk decides that these villagers will get butchered since the time window is too short to be trained properly and he decides to resolve the conflict himself before it spills into bloodshed.
* The Sworn Sword, Ser Duncan (6'11") has a flirtatious relationship with Lady Rohanne (4'11") Webber, who is rather short. It's social status, however, and not height, which gets in the way.
* The Sydney Scroungers, Seiko and Miranda's first meeting involves her coming back to her apartment... and finding him passed out bleeding on the couch. Rather than calling the cops or taking him to a hospital, she decides to patch him up and ask him some questions instead.
* The Sydney Scroungers) to the point where they rushed into a combat situation to rescue his boyfriend.
* The Sydney Scroungers universe, a cult of Kaiju worshippers who believe the Kaiju have been sent to punish humanity for their sins.
* The sylph manage to fulfill both ends of the spectrum. Friendly Sylph are relatively harmless and enjoy the company of mortals who can comprehend their rather odd traditions, and also enjoy playing harmless pranks like leaving gifts of fruit in weird places to people they like. Tempered Sylph are much worse, very territorial, they usually don't leave Larkscall, but when they do it's usually to play very cruel, spiteful pranks that could harm or even kill mortals. They also constantly encroach the untempered Sylphs of Little Solace to try to bring them under Ramuh's thrall.
* The Sylvester and Tweety Mysteries episode "Blackboard Jumble", Granny is at one point seen with a "Kick Me" sign on her back.
* The Sylvester and Tweety Mysteries episode "Curse of De Nile". The word "behind" is represented by an image of a mouse grinning while exposing his butt.
* The Sylvester and Tweety Mysteries episode "Moscow Side Story" had Tweety inform Sylvester that Granny would wash his mouth out with soap after hearing the cat say "bolshoi".
* The Sylvester and Tweety Mysteries episode "Moscow Side Story", the Borscht Belt turns whoever wears it into a comedian.
* The Sylvester and Tweety Mysteries episode "Rasslin' Rhapsody" where Granny tumbles the Crusher through the ring; it was believed that he passed through the center of the earth to China but he actually landed in a post-Soviet Union Europe country instead.
* The Sylvester and Tweety Mysteries: In the episode "A Chip Off the Old Castle", Sylvester gets a plummet perspective when holding on to Granny's plane flying in the air. Showing his feet dangling over the buildings and clouds below, causing him to be sick when he witnesses the drop below.
* The Sylvester and Tweety Mysteries in the episode "This is The Kitty". When Sylvester refuses to spit out Tweety, Hector and the Jack Webb stand-in respond by yanking Tweety out, inadvertently removing Sylvester's brain as well in the process. After having his brain removed, Sylvester just stands there drooling.
* The Sylvester and Tweety Mysteries now that Italy has switched to Euros and lire can't even be used.
* The Sylvester and Tweety Mysteries: Pepe Le Pew stole all the perfume of Paris and replaced it with his own smell. When caught, he said he'd not reveal it's hidden at the old chocolate factory.
* The Sylvester and Tweety Mysteries sightings, he is sentenced to 200 hours of community service working as a costumed carnival mascot. He ends up enjoying it so much that he signs up for even more hours of community service.
* The Sylvester and Tweety Mysteries, Sylvester tries to shoo the cat fish away and believes to have done so until he sees the school of dog fish behind him.

* The Sylvester and Tweety Mysteries, there was an episode featuring a Swedish lawyer named Pjerry Nelson, who was voted as most likely to become an ambulance chaser.
* The Sylvester and Tweety Mysteries when he swallowed a portable radio, and a broadcast of a police drama scared crooks Rocky and Mugsy, who had kidnapped him, into thinking their getaway shack were surrounded by cops.
* The Symbionese Liberation Army was mostly hippies, inspired by their "Field Marshal Cinque" to get into premeditated murder, bank robbery, and most infamously, the kidnapping of Patty Hearst.
* The symbiote also makes this offer while simultaneously trying to drive Peter across the
* The symbiote itself was bred to be an Agent of the Cosmos — a member of an order of noble warriors dedicated to maintaining peace across the universe — but was corrupted into a bloodthirsty predator by its first host.
* The Symbiotes, or Klyntar, are a species of amorphous, shapeshifting parasitic entities — of which the most famous members are
* The Symbiote, the symbiote was portrayed as having its own, extremely aggressive personality, which was starting to overwrite Peter's as the bond grew stronger, and all adaptations since have taken this up.
* The symbol of the Bordurian regime is "the whiskers of Kûrvi-Tasch", a stylized representation of the dictator's moustache. It's absolutely all over the country, from flags and official buildings to military rank insignia, hotel lamps and car radiators. This goes as far as written and spoken Bordurian, which uses a circumflex shaped like a curved moustache.
* the symbol of the Proletheans, and it appears on characters aligned with them. So far, it has been seen on Helena (carved onto her knife), Tomas (engraved on his ring), Maggie Chen (branded onto the back of her neck), and Mark (on his belt buckle). One of their communes also bears it on a signpost.
* The Symbol of the Unconquered, Barr and Tugi enlist the Ku Klux Klan to drive Eve off her land.
* The Symbol of the Unconquered, Hugh Van Allen is afraid to confess to Eve because he thinks she's white. When she reveals that she's a light-skinned black woman at the end of the film, Hugh is elated and kisses her.
* The Symbol of the Unconquered: Upon accidentally revealing to his girlfriend that he's black, Jefferson gets so mad at his mother that he strangles her and throws her to the ground.
* The symbol of the Vehicons, an oddity among Transformers insignias for not looking like a face of any kind, gets a note in the grand finale when Knock Out ruminates on its symbolism — not a face, but a stamp, representing the lifelessness the Vehicons bring.
* The Sympathizer — a South Vietnamese refugee is actually a spy sending reports on the anti-communist refugee community to Hanoi
* The Sympathizer: South Vietnamese anti-Communist expatriates living in California after the fall of Saigon decide to raise an army to reconquer their homeland (briefly seeking recourses from another South Vietnamese officer who refused to flee with the Americans and have also been fighting a minor guerrilla war) . It's made clear that they are driven by unhappiness over their newly reduced status as refugees in the United States. Their tiny little band is wiped out as soon as it crosses the Mekong River from Laos into Vietnam.
* the symptoms listed, she replies that sometimes you only have six out of seven and that "six out of seven isn't bad".
* The Synapsifier, Dr Shekt's device, is removed from the story. Dr Shekt is now one of the scientists who worked directly on the virus, all
* The Synchro arc focuses on the City faction: it is controlled by head of security Jean-Michel Roget, and the City's council. The council wish remain neutral in the war, while Jean ultimately plans an insurrection to seize control over the city for his own ambitions, while fighting off Academia to keep himself in power. The Lancers have to bring him down, restore the council's power and form an alliance with them to fight Academia.

* The Syndicate; arms dealing is his legitimate business and he owns Powder, a "designer gun store" (whatever that means).
* The Syndicate, a wiseguy who blends his illegal dealings with his legitimate casino operations. When rival wiseguy Tony Gold wants to set up shop in Vegas, Berengetti orders him out of town, alluding to the "understanding" he and the other local casino bosses have with the authorities. So long as Berengetti and the other bosses only act within certain unwritten boundaries, the authorities leave them alone. In turn, Berengetti and the other bosses also get to take steps to "protect" their local market from outside competitors like Gold.
* The syndicated, early 50's series "I was a Communist for the F.B.I." features this. Based on the real-life work of undercover agent Matt Cvetic (played in the series by
* The syndicated version of "Day of the Jackanapes" has Marge's comment about it being "
* The Syndicate. He tried leaving after he met Julia, but his fellow teamsters felt that he would be too much of a risk if he ever got it in his head to squeal on them.
* the Syndicate, Lucy starts calling herself Scarlett Overkill. As she points out, the original Scarlett is dead, so the name is up for grabs.
* The Syndicate. Of course, since they are a fairly wide-spread race with no central government that may just be different groups.
* The Syndicate's government has an unfortunate habit of needing to process everything through extremely precise means, and then debate it heavily, before they do anything. This earns them a lot of derision from the Irkens.
* The Syndicate's lab before the age of 18, she must be one in her preteen years.
* The Syndicate thugs catch him and begin torturing him with a hammer, taking out his toes one by one. What does Porter say after they smash his first toe and start lining up a second?
* The Syndicate tries to encourage its members to follow 'The Code of the Honorable Outlaw', a simple set of precepts which amount to "keep it business, not personal". While few actually follow it explicitly, really blatant rulebreakers can end up losing Syndicate protection, or even being targeted by them.
* the Syndicate Worlds, which belongs to the commander of a small taskforce that the Alliance Navy would probably entrust to a Captain.
* The Synthesis Ending, where Shepard jumps into and is vaporized by the massive energy stream in the center of the Crucible. This results in an energy wave firing from the Crucible that basically rewrites
* The synthesizer manufacturer Moog rhymes with "vogue." Robert Moog pronounced his name as in original German, "mowg". This is used as a
* The synthesizer, while ubiquitous in music from the 80s to today, was controversial in its earlier years. Since one keyboardist can now sound like a full orchestra, there was concern over synths putting session musicians out of their jobs. There was also the misconception that they require no skill or talent, even though they require piano skills and knowledge of how to tweak the sound, especially in the early days of synths. Queen once boasted on their album cover that they don't use synths, even though they ended up using them towards the end of the 80s. The British Musicians' Union even attempted to ban the synthesizer.
* The Synthetic Dawn DLC added Machine Worlds as a terraforming option for robotic empires. They are entirely uninhabitable by organic populations, and any that are still on a planet when it is terraformed to a Machine World die instantly.
* The Synthetic Dawn introduces machine empires as playable races, with the explanation that they won their respective wars with their creators before developing faster than light spaceships. They come in multiple flavors; the default is just another empire with mechanics similar to a hiveminded race, one kind wants to kill all organics everywhere, one wants to assimilate all organics into cyborgs, and one wants to relegate organics to lives of leisure while the robots run things and do all the actual work (in which case they didn't overthrow their masters, their masters just lost interest).
* The Synthetic Mask augmentation places a layer of vat-grown human tissue over a

synthmorph, for people who want the benefits of a robotic sleeve without the social stigma.
* The Syreen get in on this in the first game, wiping out Hierarchy colonies and making off with their residents to replenish their own ships' crews.
* The Syreen in Star Control are this in general. Their planet was struck by a natural disaster
* The Syren Plant of Kashyyyk can take at least two humans (or a human and a wookie) at a time.
* The Syriac Military Council and the Guardians of the Dawn in Syrian were paramilitary coalitions that while have consistently clashed against ISIS, have also backed different sides of the war — the Guardians are pro-Assad, while the SMC are parts of the Syrian Democratic Forces.
* The Syrian Army itself found itself on the receiving end of brutal sieges by
* The Syrian Civil War has become one of these. The Government and allies, Rebels, the Islamic State of Iraq and Syria(ISIS) and Kurdish groups are in a war against each other
* The Syrian Civil War, in particular, saw the worst of the sieges after the Syrian Army instituted a tactic known as "Kneel or Starve" in which the army would surround an Opposition-controlled town or city and bomb it to submission, with surrender either entailing "reconciliation"
* The Syrian War sees a lot of these types from both sides of the conflict. The foreign religious fighters don't care about the common Syrians' struggle to improve their country, only that the Assad 'infidel regime' to crash and burn. The USA initially backed the Syrian revolutionaries because they are useful in destroying Russian influence, but seeing that the only ones with real power are said religious extremists,
* The system also introduces the concept of divergent tech levels, with the notation "TL('x'+'y')"
* The system here was basically written so this trope could be had fun with; in the show's setting adding some kind loophole to spells makes them stronger, so wizards from ye olden times dealt with their requirement of a weakness by making their loopholes seemingly impossible... but modern technology can do quite a bit of things that were considered impossible centuries ago.
* The System is a civilization controlled by the three powerful defense computers of the three inhabited planets of their solar system, which built the starship DSV-1. The System was administered by Altas (either cyborgs, androids, or augmented humans) and black-armored guards that appeared to be cybernetically augmented humans. There were also thousands of human slaves, descendents of the people who had built the computers that had taken over their civilization.
* The system is capable of forcing the car to continue moving when the driver attempts to stop. This caused test driver María de Villota to crash into a stationary truck, suffering serious injuries that may have led to her death 18 months later.
* The system is tested frequently — in fact, at least once a month — and has been for a long time. Much of the pop-culture awareness of the system derives from these tests, particularly their admonition that "this is only a test" and that if this were a real emergency, the broadcast would include important instructions. These tests also introduced viewers to the
* The System Lord Ba'al may be the only Goa'uld with a sense of humour. He will occasionally crack wise and make flippant remarks.
* The system of debtors' prisons in England during the Industrial Revolution. They were notoriously corrupt, and while the truly broke had to beg passersby for food (meals weren't included unless you could pay the guards), wealthy and well-connected inmates had furniture and meals brought in from outside, got drunk, had prostitutes brought in at all hours, and generally enjoyed a standard of living that only the landed gentry could afford.
* The Systems Alliance attaches small nuclear bombs ("small" in this context being
* The system's surprise success was pushed by more casual games such as
* The system was also spoofed by Stephen Colbert in the opening on one episode of

* The "Szerer cycle" written in the early Nineties by the Polish author Feliks W. Kres. No fantasy races, but there are sapient cats and vultures, magic (for the most part) takes the form of learned mystics who can once-a-lifetime bend the world to their will or magical artifacts that can be loosely described as leftovers of creation, war with the local flavor of Orcs is a constant low-intensity conflict waged from frontier keeps, the whole world (which is a small continent) is ruled by a single empire loosely patterned on Rome.
* The T-1000 that pursues Kyle Reese and Sarah Connor in 1984 impales a cop while going after Reese, then tries to go after Officer O'Brien, who is only saved when Sarah arrives and intervenes.
* The T-1001 model is a slightly more advanced "liquid metal" version who
* The T-1 Typhoon that was left in the desert after Zenna and George were attacked by TumTum Tribesmen ended up having a brief but important role in driving an invading army of Mutant Dinosaurs out of the Dino Attack Team's camp on Adventurers' Island.
* The T-3000 in 2017 does off several cops in its pursuit of Sarah, Reese, and Pops.
* The Tōtsuki Reformation Arc is considered this for a number of reasons. Among them is the tone of the arc being too serious for a manga relying on over-the-top cooking competitions, but without any actual depth to it. Having basically every character aside from Erina, Soma and their fathers fall
* The T-47 airspeeder was originally built as an industrial cargo handler, using its magnetic harpoon and tow cable to control repursorlift cargo modules. They're better known as the Rebel Snowspeeder, as the Rebels, strapped for resources as usual, armed them with light laser cannons and used them as recon and light attack crafts. They used it almost everywhere they had a base, but the use on the icy world of Hoth is the most famous instance due how
* The T-51b Power Armor in Fort Constantine, which the player helps Mr. Crowley gain access to in the quest "Shoot 'Em in the Head".
* The T-800 cuts the skin off his arm deliberately to prove to the Dysons that he isn't human.
* The T-800 is pitched through a plate glass store window by the T-1000.
* The "T-800 types" are huge and musclebound, while the "T-1000 types" look moreso like a
* The T-80U, the top variant of the T-80 tank, was, during its time, the Soviet Union's answer to the best the west offered. With Heavy Explosive Reactive Armor panels, or Kontakt-5, covering most of the tank's frontal armor, the T-80U was an exceptionally tough target to kill, and a fast moving one at that. Its 1G46 fire control system was not as good as those on the western tanks, but was still able to get the job done, able to fire APFSDS rounds at a range equal to M1A1s and Leopards, albeit with slightly less accuracy.
* The T-888 Terminator called "Cromartie": In the first episode he was shot multiple times, run over by a car, had a live wire shoved into his neck, is blown up as the same car that ran him over exploded and ripped in half by a terminator-destroying gun. He reactivates himself eight years later, dresses up like a post-apocalypse survivor (complete with gas mask), gets its head back, steals medical supplies, gets a scientist to help him
* The Taalo in the games' backstory as well, though they were living rocks rather than specifically crystals. Their unique physiology is what enabled them to make friends with the
* The Taalo leave behind a device that prevents evil alien mind control. This is instrumental in saving the galaxy.
* The tabard Jon wears is evocative of this trope. Played more straight after he's elected as Lord Commander of the Night's Watch.
* The Tablecloth Hour by Taito dedicated to letting players simulate this trick.
* The "Tablet" modern-day sidequest has numerous emails about Abstergo Entertainment products in development; specifically mentioned are "Murder in the Levant", "Washington and the Wolf", and "The Liberation of Lady Aveline". These are all levels on the (fake) level select screen that greets you when first playing

Assassin's Creed: Unity.
* The tabletop game Captain Sonar has two teams each controlling a sub and attempting to locate and sink the opposing team.
* the tabletop RPG of a tabletop role-playing game. It's an early draft, so it also has commentary from Harry and Bob scribbled in the margins (much of it telling him to cut top-secret information that Harry doesn't want getting out).
* The tabletop version of this class, along with the Half-Dragon racial template, has the wings be not quite perfectly formed on smaller creatures — they're not "draconic" enough. Flight is only possible for size Large creatures or larger with this template or class, contrary to physics. There are, however, feats that allow such creatures to fly; one such example is "Improved Dragon Wings" from
* Theta Brynton is ruled by a number of noble houses that have a tendency to treat their subjects, and many off-worlders too, like slaves, even if they aren't actually slaves (and many are). The novel starts on board a passenger ship carrying refugees away from their latest civil war.
* The T-Abyss virus works this way, with some of its victims being corrupted so badly they don't even realize they've been mutated. The Comms Officer, now a horrific monster called a Scagdead, continued to radio for help and pleads "Please stop I'm human" as it tries to kill you.
* The Tachikomas mention that nothing can be taken for face value, since it's so easy to falsify any form of data — even
* The Tachikomas sing a children's song as they're being packed up and sent to the laboratory for formatting and disassembly. They think it's a happy song, and tell Batou as much. Problem is, the song is actually "Dona, Dona," a horrific Yiddish song written in 1941, about a calf being taken to slaughter and told to accept his fate without crying.
* The tactically sound but morally questionable strategies employed by Richard's armies on his instructions.
* The tactic is also used in the new Stardust cycle to capture one of the enemy's
* The tactic of attacking at or just before dawn was apparently such a standard part of Native American warfare that
* The tactic of buying a name from another company to use for your company is used quite a lot by companies. It pays to have an older more established name for your company, so much so that many companies will buy defunct brands or buy dying competitors and take on their brand.
* The tactics the 9/11 hijackers used to seize control of the planes fall into this category, even if you're not counting increased paranoia around airports making it unlikely that any repeat performances would even make it to the plane (several of the hijackers had been flagged as suspicious, but lax security meant they got through anyway).
* The tactic was used (or attempted) against U-boats fairly regularly in
* The "tad ridiculous"ness is why the game became free to play —-
* The tag children singing "Kagome, Kagome" around Miku in the first
* The Taggerung, Gruven, attempting to lead the hunting party, has just been told that the Taggerung is probably headed north. Much to their amusement, he tells them to break camp and starts marching south.
* The Taggerung) that Ruggan Bor must beware of Redwall. This is exactly why Bor does not listen to her and consequently gets his ass kicked several chapters later.
* The Tag is Abed giving one of the other cameras a pointed look, making it a curious example, since it applies both to his in-universe documentary and the episode itself.
* The tagline for the show and movie says their goal is world domination, but despite that, they never really try to capture and control anything more than simply blow it up.
* The tagliney prophecy which drives the action of this animated Science-Fiction film makes use of it: "In a thousand years, Gandahar was destroyed. A thousand years ago, Gandahar will be saved."
* The Tag rap the biological classification of human beings with a remixed "Africa". While the song is catchy, there are two minor mistakes when the last 's'

is dropped from Primates and Sapiens.
* The Tag showed her still walking around in a daze a week later, holding her cheek and wearing a huge dopey grin on her face.
* The tags under the strips note strips in which Rudy's age is mentioned. He's aged six years between
* The Tag to the Season 8 episode "The Time Travelers" involves Neil and Josh doing a barbershop sextet rendition of Billy Joel's "For The Longest Time" (with their eponymous time-traveling selves, that is).
* The Tag with and dressed the same as Jeff. Annie apparently wanted in on the gag too, but got stuck in traffic and arrived just after the joke had ended. The joke had apparently taken months to prepare.
* The Tahar Caliphate appears to be an analogue to the Moors at first, given that they have hostilities with the Hispanic inspired nations (Ducado de Sangre Valiente and Povos de Hispania). On a closer examination of their unit roster, their army appears to have a heavy Indian influence, given their access to
* the Tailed Beasts are composed of the fragmented chakra of an Eldritch Abomination.
* the tailed beast sealed inside him it's shown that his village thinks quite favorably of him now.
* The Tailor Of Enbizaka, aside from building off of the song it's named after, features large elements from the Japanese folktale of Momotaro, with the primary character being born from a tree, meeting 3 friends who symbolize the animals Momotaro befriends, and going to a place called Onigashima and dealing with a demon there.
* The Taint, although the reader knows exactly what went on — Sam got a little drunk and a whole lot concussed, and Fitz put her to bed, undressed her down to her underwear, and got in bed with her naked, and in the morning claimed they had wild, amazing sex and is very hurt that she doesn't even remember. Somehow, she eventually forgives him.
* The Tainted Grimoire, after all that happened during the Grazton arc, Clan Gully took a much needed break during the arc's conclusion.
* The Tainted Grimoire arranged for Micaiah to be poisoned resulting in a miscarriage and Micaiah becoming infertile.
* The Tainted Grimoire, Clan Gully may be the main characters but they are not the only ones the story focuses on.
* The Tainted Grimoire commits a series of betrayals. First was betraying a good guy to the bad guys, then betraying the bad guys to get help from other good guys to save the good guy he himself betrayed and finally, in a misguided attempt to make sure everyone comes out alive, betrayed the other good guys to the bad guys.
* The Tainted Grimoire: Duke Reighlard is described as merciless and he is trying to gain control of St. Galleria and the vast natural resources at their disposal so he can achieve dominance.
* The Tainted Grimoire: Eden is a massive Bangaa. He is also the Lord of Camoa and one of the members of the Coronet.
* The Tainted Grimoire, Ensei is this sometimes, like when he eats so much food at public restaurants which usually earns stares from everyone else. His daughter Kanin is unhappy about this.
* The Tainted Grimoire. For example, when an underground sport was causing harm to civilians, he took measures to minimize the harm and in the process, also turned it into a legitimate sporting event.
* The Tainted Grimoire has not been known to have actually said anything yet.
* The Tainted Grimoire has, on at least one occasion, checked Luso out when he was training, in just swimming trunks.
* The Tainted Grimoire. He has, however, been shown slowly adjusting as he learns about the world he is in.
* The Tainted Grimoire is said to be this by Sasasha. An example includes his reaction to learning his daughter Kanin is going on a date. It is exactly what you'd expect from someone labelled overprotective.
* The Tainted Grimoire, is skilled in magic and provided a temporary place to stay

for Clan Gully.
* The Tainted Grimoire is this through and through. Even if he feels following the letter of the law is morally wrong, he'll still do it, albeit reluctantly.
* The Tainted Grimoire: Kanin and Maria when they see Auggie's pet Dreamhare.
* The Tainted Grimoire Luso, and to a lesser extent Hurdy, get things they don't know about explained to them by other characters.
* The Tainted Grimoire, Luso and Villi would unwittingly be roped in as dance partners for Kanin and Adelle when they get Cheney to teach them how to dance.
* The Tainted Grimoire, Luso takes him on alone and the rest of his group moves on.
* The Tainted Grimoire makes a living as a streetear. He is on good terms with the protagonists.
* The Tainted Grimoire. Thankfully, Judgemaster Cid was able to talk him out of it by going over how flawed that line of thinking is.
* The Tainted Grimoire, The climax of the St. Galleria arc takes place at a major wedding.
* The Tainted Grimoire, there is Luso, other members of Clan Gully have joked about it.
* The Tainted Grimoire. This is because Clan Gully and many of the people they meet do a lot of traveling.
* The Tainted Grimoire, this is part of the plot of the St. Galleria arc.
* The Tainted Grimoire to have Luso get Parivir clothing when he actually becomes a Parivir. The author worked this into the story in Chapter 65.
* The Tainted Grimoire was not revealed as evil to Clan Gully until later.
* The Tainted Grimoire was to try and save Cid. Ewen had him killed for that.
* The Tainted Grimoire, Whisperweed is used as phones, two way radios and speakers because of its unique ability to transmit sound.
* The Taio Cruz song "Break your Heart" has the line "They call me heartbreaker-" which is sometimes replaced with the station the song is on, for example, "It's 107.9!" When it is replaced, the song doesn't make much sense.
* Theta is widely regarded as the safest region of PATHOS-II, containing most of the base's residential and medical facilities; in the wake of the apocalyptic impact event, many workers from across the base were moved to Theta - especially once the
* The Taiwanese girl group 4 in Love have the stage names Rainie, Windie, Sunnie and Cloudie.
* The takahē is a species of goose-sized flightless bird native to New Zealand which was originally known from fossils, before a living specimen was discovered (but not before being killed and eaten) a few years later (the native Maori had known about the birds for centuries of course). Then it was considered extinct again by the beginning of the 20th century, before being re-rediscovered alive again in a remote mountain valley fifty years later. Nowadays, a couple hundred of the birds still exist and their population continues to grow.
* The Takeaways had a song called "Singing in the shower." about a man who tries singing in various places, but this turns out to be his only option.
* The takedowns got so out of hand that at one point, a developer tried to claim a
* The Take instead and the suspect breaks down, saying he was beaten by a policeman as a youth and is still traumatized by it.
* The Taken King class, which enables them to throw exploding hammers for their super.
* The takeover of the Fathers, who warped everyone's memory but his, tried him sorely. Especially when Drom mentions that they have
* The Takers by Jerry Ahern. The hero and his old flame end up in the shower and the following suggestive dialogue occurs.
* The Takers get caught in quicksand while wading through a swamp on a Caribbean island.
* The Takers homage by Jerry Ahern. She uses guns when necessary, but prefers a knife.
* The Takers: Lampshaded in the Jerry Ahern novel where the hero Josh Culhane (a writer of action adventure novels) witnesses his brother shotgunned off the road.

* The Takers — as it turns out, the base's defense system is also in full working order...
* The Takers — as it turns out, the base's self defense system is also in full working order...
* The "Take the Subaru" commercial style stunt. The lone African-American teenager at the end asks if he could go out in the rain, his mother approvingly tells him to take the Subaru.
* The "taking advantage of gullibility" thing: Jerry tells Elaine that the original title for Tolstoy's
* The Taking, but has enough typically "monstrous" features such as bulging red eyes and huge claws to overlap solidly into this as well.
* "The Taking" by Dean Koontz features an audio recording from the International Space Station, wherein the astronauts discuss how a strange craft seems to have docked with them, and whether or not the inhabitants might be peaceable, right up until an entity boards the station. The audio ends with
* The Taking has been animated by a malevolent force and is able to creak and close its doors at will with the intent of trapping anyone inside. There's also a constant whispering noise coming from the walls. After they escape, Molly looks back and is surprised to see that it's not doing anything outwardly strange.
* The Taking is a massive bug hiding in a church basement whose features are a mashup of insects, spiders and scorpions. It drags one guy into its lair and messily kills him in the shadows followed by spearing another guy on its stinger.
* The Taking of Pelham One Two Three because his constant acts of violence got in the way of their racketeering — because knowing that Grey was going to brutalize them whether they paid or not, the people just decided to not pay anymore.
* The Taking of Pelham One Two Three by Lt. Garber because of his long hair.
* The Taking of Pelham One Two Three rather than be captured, claiming that the man who killed him is a hero for doing so.
* The Taking of Pelham One Two Three's safety systems eventually stop the train without harm however.
* The Taking Of Pelham One Two Three, the criminals hijack a subway train, and demand that all of the signals all the way to South Ferry be set to green. The train then rolls through every signal and station, at speeds exceeding 80 miles per hour. Note that the train does stop when it gets to South Ferry as it is going too fast for the turn and trips the overspeed control. However it's interesting that it never tripped any overspeed control along the way.
* The Taking of Pelham One Two Three, the police car carrying the ransom money crashes on the way to the hijacked subway train. With no time left to spare before the hijackers kill a hostage, Garber manages to do some quick thinking when he realizes that the hijackers, who are underground and only in contact with the outside world through his dispatch terminal, don't know that the car has crashed.
* The Taking of Pelham One Two Three, the subway's digital speedometer makes a series of increasingly faster beeps when shown on screen, despite it being established there's no beeping noise when the trains are driven normally.
* The Taking of Pelham One Two Three through an automated phone service that couldn't understand his Scottish accent no matter how slowly he talked.
* The Taking of Pelham One Two Three train are actually a plot point. The police believe the Dead Man's Handle will prevent the villains jumping off the train while it's moving, but they've actually rigged up a system to hold down the lever. Later as the train appears to be careening out of control, it's eventually stopped by the safety devices built into the track.
* The Taking of Pelham One Two Three train for ransom. The police are wondering how the criminals intend to get away, and suggest they might try jumping off while the train is moving. The dead-man's handle is explained; however the criminals rig up a construction that holds down the lever for them.
* The Taking passes overhead. Nothing seems to be unusual about what the music boxes are playing, but the sound of all of them playing at once is described as discordant and unsettling.

* The Talandri are an entire caste of craftsmen, with different occupations done by specific sub-castes.
* The Talarians, in the episode "Suddenly Human", are basically "I Can't Believe They're Not Klingons". They have similar martial traditions and concepts of honor. Interestingly, in an earlier episode, Klingon renegades were found aboard a Talarian ship. The Talarians even look like Klingons, with ridged scalps instead of foreheads.
* The Talbot Chronicles series into a film noir setting. A good fit, as Talbot's whole bag has always been existential angst.
* The Tal'darim faction of Protoss have this as standard policy. A Tal'darim can challenge their direct superior to ritual combat called "Rak'shir". There's an interesting twist to it: the supporters of either combatant can indirectly aid them by lending psionic energy to them. So the winner will not only be the stronger combatant, but one who has more capable allies. This is meant to ensure that
* The Tal'darim splinter faction continue to worship the Xel'Naga, viewing any interference with their sites as desecration. Specifically, the
* . The tale has the Emperor meet her, be taken by her beauty, and marry her - only to have her get revenge and denounce his cruelty for entombing her late husband in the wall.
* The Talented Mr. Ripley, he kills his friend and takes his identity for a while.
* The Talented Mr. Ripley is much better known than its four sequels (though some of them have been made into movies too).
* The Talented Mr. Ripley, though the existence of sequels implies that he got away with it.
* The Tale of ALLTYNEX (1996), meaning that retroactively, the series was still released in straight chronological order.
* The Tale of ALLTYNEX of course focusing on the malevolent A.I. Alltynex.
* The Tale of ALLTYNEX series uses this in all three games in various shapes and forms. A special note goes to the ZODIACs, whose laser blast sometimes cover the entire screen.
* The Tale of ALLTYNEX trilogy mostly uses organ, but in its sadder moments the series whips out the piano.
* The tale of a much-admired socialite who cut a swathe through high society before being unmasked as sixteen crows wearing a trenchcoat.
* The tale of Columbus trying to prove that the Earth was round was spoofed in an ad for Hamlet cigars: It turns out that the world
* The Tale of Despereaux. Although the movie does state that the princess was partly at fault, for being rude to Mig and flat-out screaming at Rascuro when he tries to apologize.
* The Tale of Despereaux the rats throw Despereaux to a chained up cat, fortunately Roscuro manages to rescue him, by claiming he wanted to eat him himself.
* The Tale of Donovan Graham like the heroic paladin everyone thought he was, which earned him sainthood as the patron saint of guerrillas and just causes.
* The tale of Gagagigo, one of the very few instances of continuity within the
* The Tale Of Gaven Morren has more than a few Überwald leanings.
* The Tale Of Gaven Morren that represent the city's long and sordid history.
* The Tale of Genji: Hair down to the ground is the norm in Heian Japan, but Ukifune, the heroine of the final love triangle, has a particularly memorable head of hair. One young man falls desperately in love after one glimpse of its magnificent black cascades.
* The Tale of Genji: Heian gallants were quite capable of falling in love with a girl's handwriting or even a description.
* The Tale of Genji includes a number of references indicating that the narrator is relating a true story and that she is merely describing this story to others. For example, at the end of chapter 4:
* The Tale of Genji: In Japan, studying this is a standard part of the high school curriculum. A few anime have shown high school students wrestling with it.
* The Tale of Genji, is almost enough to sway the protagonist to infidelity. This is an exaggeration of how important calligraphy was in the Heian era...but not a

big one.
* The Tale of Genji: Prince Genji is always in the market for an addition to his (long) list of lovers.
* The Tale of Genji: The Uji chapters skip forward about twenty-five years and are about Genji's son and his peers (as the opening chapter says right off, Genji's dead). Since the Tale is often considered the first Novel (or at least the first psychological novel), it just goes to show.
* The Tale of Gentle Jack and Lord Bumblebee. Spirin's paintings take what the text would seem to indicate is a fairly bland fairy tale involving magical beings who shift between somewhat insect-like humans and somewhat human-like insects from one moment to another, and plunge it straight into an industrial-sized tank with human faces leering in place of compound eyes and mandibles, monstrous bee-knights impaling their enemies on the lance-like stingers springing out of their faces and dying as the ants drag their dismembered bodies down into the eternal darkness under the earth to be fed to the larva...
* ''The Tale of Harvey the Hare'' the story's protagonist of the same name appears to be doomed until he finds a loophole in the prophecy that has sentenced him to death.
* The Tale of Hodja Nasreddin (the legendary Nasreddin is a mullah, but here he is described as a mischievous vagabond). In one chapter, he tells the usurer Jafar that he is a powerful (and expensive) healer, but his healing won't work if Jafar or anyone in his family thinks of the red monkey (and he describes it in excruciating detail). His clan spent much of the following night arguing about who was the first to think the forbidden thought.
* The Tale Of Lord Barleycorn lost its lifeblood when the lumber mill was closed and is slowly falling apart into physical and financial ruin. Most of the ponies have left, while those who've remained mostly don't have anywhere to go or else can't afford to leave.
* The Tale of Lost Time is that you won't notice your own aging if you waste your time pointlessly.
* The Tale Of Magic. It takes place when the main characters’ grandmother was a teenager.
* The Tale of Norna-Gest and lighting the candle, letting it burn down so he can finally die.
* The Tale of Norna-Gest, Gest was cursed by an ill-tempered norn to live no longer than the candle that burned beside his cradle. Fortunately, one of the other norns put the candle out before it burned away, which mean that Gest was immortal so long as the candle was kept safe.
* The Tale of One Bad Rat: Flashbacks are used several times in the story, especially the first half, to show significant events in Helen's life before she ran away. One example is how she adopted her pet rat.
* The Tale of One Bad Rat has gorgeous images of the Lake District of England, and had its genesis as a celebration of the landscape.
* The Tale of One Bad Rat is trying to come to terms with having been molested by her father as a child.
* The Tale of Orpheo's Curse are Type 1s who avert non-proactive bits for the most part. Most of the time, they tell the main characters everything they know about the curse, in plain language; unfortunately, they're still studying the curse and only have limited information. They do tend to be cryptic about immediate puzzles, though.
* The Tale of Peter Rabbit shows Peter and Mopsy, Flopsy, and Cottontail as older children (possibly in their teen years), judging by their voices.
* The Tale of Peter Rabbit Trope which had also been made popular by Bugs Bunny.
* The Tale of Scrotie McBoogerballs, and that there aren't any hidden morals or messages in it.
* The Tale of Scrotie McBoogerballs, even after the kids explicitly tell them that it is nothing more than a string of gross-out attempts on paper, and that there is no actual story in it.
* The Tale of Solaron, he continuously spouts innuendo whenever he talks to a lady

for more than ten seconds at a stretch.
* The Tale of Solaron is a paladin of Pelor and plays it straight, being honorable and brave in the face of danger, though it often blinds him to subtleties and complicated motivations.
* The Tale of Solaron Solaron is this all the time. He continuously spouts innuendo and seductive subtext whenever he tries to come across as charming. And he has no idea he's doing it.
* The Tale of Squirrel Nutkin: In this tale about a tail, Squirrel Nutkin has his tail bitten off by Mr. Brown, the owl.
* The tale of Stingy Jack stated above, who tricked himself out of Heaven and Hell alike and was doomed to wander the world forever with a hollowed-out turnip lantern to light his way. An early form of the story in print can be seen here as
* The Tale of Styrbjörn" has his fleet burnt after sailing up the Fyris River to Uppsala to challenge his uncle Erik for the kingship.
* The Tale Of The Bamboo Cutter, but elements from other myths have crept in over time as well, including European (the Scarlet sisters, both vampires), Irish (Sekibanki, a dullahan), Greek (Clownpiece, a lampad), and Chinese (Chang'e, who has yet to be seen but lives on the moon).
* The Tale of the Bamboo Cutter has Princess Kaguya, whose extraordinary beauty drives a significant part of the plot. Five princes and eventually the Emperor of Japan himself ask for her hand in marriage.
* The Tale of the Bamboo Cutter story, with Princess Kaguya (who came from the moon) being an Ancient Astronaut.
* "The Tale of the Captured Souls" (Season 1 Episode 7) features Peter who uses a machine to take life force from other people, and even animals, to stave off the effects of aging. The protagonist saves her parents by sabotaging his lab and giving back the life force he took from them, ultimately forcing him to spend his last remaining moments as a helpless, lonely old man.
* "The Tale of the Curious Camera": The gremlin has been vanquished from both the eponymous camera and a camcorder, but then its
* The Tale of the Five can live to be thousands of years old and can remember clearly enough to calculate their ages by counting sunrises backwards. Furthermore, they also inherit the memories of their ancestors, although those memories tend to fade over a large number of generations as they're spread over a progressively larger number of descendants.
* The Tale of the Flopsy Bunnies Flopsy Rabbit is married to her cousin Benjamin Bunny.
* The Tale of the Great Bunny is given a wishing egg, which is purple, and has the power to grant wishes (provided they're not selfish ones).
* "The Tale of the Hatching": One of the alien reptile eggs is still intact, and begins to hatch.
* The tale of the Long Night, which lasted an entire generation, happened in the midst of a very long winter. The purported instigator of this event, the Others, are believed to come from the
* "The Tale Of The Many Faces" was all about people wearing masks, and asked the question "Is it our masks (faces) that define who we are?" The villain in the episode stole girls' faces and wore them to keep herself young. The girls' faces she stole were left with fish lips and white eyes, so they were given masks to cover up their ugliness.
* "The Tale Of The Night Shift" had a basement in a hospital in which loads of nurses, doctors, and patients were attacked by a vampire. The vampire villain of the episode kept his coffin down there because he figured people were too scared to go down there and destroy it.
* The Tale of the Princess Kaguya: Averted with Kaguya's father, who does indeed want the best for Kaguya, including the highest-ranking husband possible.
* The Tale of the Princess Kaguya. Even though the film was a box-office failure, it received critical acclaim. Not long after completing this film, Takahata retired and eventually died of lung cancer on April 26, 2018.
* The Tale of the Princess Kaguya, the titular princess becomes intangible when the

Emperor gets a little too close.
* The Tale of the Three Brothers," one brother gets a magic stone that can bring his loved ones back from the dead. He brings back his girlfriend, but she's sad and cold, and doesn't seem like she belongs. Eventually, the guy commits suicide so he can truly join her. Harry actually uses the stone, but with much better results, since he never intended it to be permanent but merely to conjure the souls of his loved ones to stay with him as he marches to his death.
* "The Tale of the Time Trap" has Belle, who loves to make wishes as disastrous as possible. "Someone once wished for an exciting voyage; I gave them the
* "The Tale of the Unfinished Painting" has a witch as an artist who traps people in paintings - and then displays them in a gallery as her own work.
* The Tale of Two Sisters, found across much of Europe, is usually some variant of this: Two sisters loved the same man, who was engaged to the younger. The older one arranged to have her drown so she would inherit the engagement. The body of the younger girl is found by a bard (who may mistake her for a swan) and uses her bones or hair to make a harp or fiddle. The bard is invited to play at the older one's wedding and brings along the instrument, but before the ceremony starts it sings out what happened in the girl's voice. However one Gaelic version removes the animated instrument by having the married sister compose and sing the song while the tide rises around her, which the other hears and later sings to her stepchildren, and the widow overhears her.
* The tale of Urashima Taro: he spends a day in the underwater palace only to come back up finding out decades have passed in his absence and his mother passed away from age long ago.
* "The Tale of Watcher's Woods" features a trio of Wicked Witches haunting the titular woods. It turns out they were three little girls who got lost in the woods while camping.
* The Tale of X-9", X-9 says that this is why he survived longer than the other X-units, seeing as the Emotion Chip inside him gave him a sense of self-preservation that let him run when he knew he was in danger. As he explains it, "The other X-units, they didn't care. I cared."
* The Tale of Zatoichi Continues. Needless to say, there's little love lost between the two.
* The Tales of Alvin Maker and the thirteenth child of a thirteenth child. It's strongly implied that Jesus Christ was the last Maker. But there is no mention if Jesus had six sisters and six brothers, or if he got his power a different way, say being the child of a virgin. Similarly, it's strongly implied that Alvin's powers are beyond the magic seen in the world and that they go into holy as well. Alvin even faces a whispering corrupting force called the Unmaker.
* The Tales of Alvin Maker books all include a map of the wildly alternate early-19th-Century North America in which the novels are set.
* The Tales of Alvin Maker is like this when she first appears in the second book. When Taleswapper asks her mother about Peggy, she tells him she's gone too cold for anyone to tolerate her. He carefully refrains from telling her that ice can only be thawed with warmth and then proceeds to get smiles and laughs from Peggy in private.
* The Tales of Alvin Maker (the Unmaker) primarily acts through possessing water for some reason. Apart from simply drowning people, at one point it froze the water, causing a knot to form in a particular tree, causing a weak point in a particular log, causing a building to collapse on the hero.
* "The Tales of Ba Sing Se" consists of six short tales focusing on one character (or two, in one tale) each, including the tales of
* The Tales of Ba Sing Se," he gets two key moments that highlight this aspect of his personality: First, he sings "Leaves from the Vine" to help calm down a fussy toddler; later, he advises a group of kids playing earthbender soccer to own up to their accidental destruction of a window (though when the irate homeowner reveals himself, Iroh retracts this statement and tells the kids to retreat).
* The Tales of Ba Sing Se was completed. So the Iroh segment of "Tales" carried a dedication to Mako at the end. Oh, did we mention the segment itself was about Iroh

going to mourn his dead son on said son's birthday?
* The Tales of Beedle the Bard, and eventually, he killed both her and himself.
* The Tales of Beedle the Bard be killed if they lost their wand. Specifically, it was stated that the ones most at risk were young magical children who hadn't yet learned to control their abilities. In his annotation to "The Wizard and the Hopping Pot", Dumbledore notes that during the European witch hunts, witches and wizards considered using magic to help Muggle neighbors like "volunteering to fetch the firewood for one's own funeral pyre".
* The Tales of Beedle the Bard features a muggle king who bans all use of magic — except for himself, not realizing that he can't learn magic. This makes him an easy mark for a charlatan pretending to be a teacher of magic.
* The Tales of Beedle the Bard from the "seventh book of the biography of Harry Potter".
* The Tales of Beedle the Bard gives us "The Warlock's Hairy Heart". A young warlock cuts out his own heart and stores it in a case so he might not ever feel such pesky things as emotion, rather than immortality. Dumbledore's notes draw the comparison to Horcruxes and state that it would be impossible outside of a fairy tale.
* The Tales of Beedle the Bard has a story about a wizard who believed this, and therefore removed his own heart.
* The Tales of Beedle the Bard - the students playing "Amata" and "Sir Luckless" had been dating until "one hour before the curtain rose," at which point "Sir Luckless" dumped "Amata" for the girl who was playing "Asha." The two actresses began to duel and the resulting disaster is why Hogwarts no longer does school plays.
* The Tales of Beedle the Bard, the warlock believes that Love Makes You Dumb, so he performs dark magic to prevent this from happening to himself. It didn't end well.
* The Tales of Beedle the Bard tries not to love by removing his own heart. When he tries to love again...
* The Tales of Hoffmann, there are four characters: Lindorf, Coppelius, Dr. Miracle, and Dapertutto. They are all played by the same bass-baritone, and are, quite literally, the incarnations of evil.
* The Tales of Paul Twister, the local name for bears translates to "walking horror."
* The Taliban are this in Afghanistan and Pakistan. They enforce what they say is Islamic with an iron fist and draw their allure from promises of martyrdom and heaven (in a country where death is never far away), money (hundreds of dollars in a country where 2USD a day would be good money), and nationalism (in a country that has been seemingly invaded and occupied by every ambitious state in history). They are notorious for not only their brutality, but also for being very tough to extirpate.
* The Taliban was notorious for banning any work of art considered contrary to the values of their particular brand of Islam. At its worst, from 1996 to 2001, the Taliban banned all movies, television, and non-religious music, as the regime deemed any sort of artistic or literary depiction of
* The Talisman/Amulet of the Wild item summons Furbolgs (bear-men), either up to three ordinary ones or a single high-level one.
* The Talisman at first. However, the truth is slightly more complicated and involves alternate realities.
* The Talisman commits suicide by stabbing himself in the brain through his nose.
* The Talisman, co-written by Stephen King and Peter Straub, had two of these, one at the start where Lilly slowly died of cancer and then one at the end where the Talisman was held.
* The Talisman, during the part of the book that takes place in the Sunlight Gardener Home, rulebreakers are sometimes locked in a refrigerator-shaped container simply called "The Box".
* The Talisman. Given Jack Sawyer's experiences in Hollywood, as well as his mother's reputation as Lily "Queen of the B's" Cavanaugh, Jack spots similarities

between New England and the ominous Point Venuti in Northern California, remembering that if any scenes on the beach needed to be filmed in the Northeast climate called for in the former, places like the latter would be employed.
* The Talisman has a sequence narrated from Wolf's POV while in his feral form.
* The Talisman in the Territories, Wolf starts casually playing "pocket pool" in his overalls while explaining his role as shepherd.
* The Talisman in "The Territories", you can flip into their mind when you travel between worlds. But if you don't, like Jacky, whose Twinner was murdered as a child, you remain yourself.
* The Talisman is a place where there used to be a lot more magic. Wolf can only detect the dying remnants when he makes some medicine for Jack out of weeds.
* The Talisman is differentiated from his friends and partners by his ambition.
* The Talisman: Most aristocrats in the Territories are either evil or cowed into submission. The worst is Morgan of Orris and those working directly for him.
* The Talisman probably qualifies, with boys who don't love Jesus enough being beaten, locked in a tiny shed, or even killed. Inspired the Ash song "Jack Names The Planets".
* The Talismans of Shannara features the Mirrorshroud, a cloak which makes the wearer appear to be someone the beholder trusts when worn
* The Talismans of Shannara). While Famine, War and Death are humanoids, Pestilence is just a swarm of infection-spreading insects moving about in a vaguely humanoid shape.
* The Talismans of Vaul (aka the Blackstone Fortresses), six gigantic Space stations equipped with
* The Talisman, someone will switch minds with and take over the body of their double from that universe. ...unless they don't have one (as is the case with Jack, the protagonist), where they disappear from their home world and appear in the other.
* the Talismans tearing out of her body when she intercept Raven's separation spell
* The Talk and was honored to be in that episode with her fellow co-hosts.
* "The talkative and party-loving (81 year old) Benjamin Franklin..."
* The [T]alk command, normally used for bribing the opponents or requesting help from allied ships, gives astonishingly appropriate answers when used on odd targets:
* The Talk: Considering the proliferation of the Internet and other knowledge resources, this scene usually cannot be taken seriously by writers or audiences, unless it's in a period drama or coming-of-age story set before the Information Age, or if it's regarding a family with sheltered children. And even then, the "talk" itself might be either vague or incomplete on the parent's part, or the parent might be so jittery about giving the talk that they avoid it altogether. Alternately, the father glibly and eagerly goes into great detail on sex, either out of his own odd sex tastes or to deliberately disgust his son into celibacy.
* The Talk for moms. With six women instead of five. In the middle of the afternoon. In Los Angeles.
* The talking cats (Luna, Artemis, and Diana) all behave as familiars.
* The Talking Cricket is more personable and cheerful than the stern, serious one of the book.
* The Talking Dog, in which Mickey tries to save Pluto when he is picked up by Pete for a "talking dog" ventriloquist act.
* The Talking Heroes line includes Cyclops, The Hulk, Magneto, The Punisher, Spider-Man, Venom, and Wolverine with large metal boxes worn on their backs.
* The talking horses ("Houyhnhns") domesticating humans ("Yahoos") as farm animals. Also, the horses had a strict hierarchy based on color... with the darker ones in charge.
* The talking instead of fighting is ludicrous from the get-go and only gets worse. The first few battles probably would've been over in seconds if someone was
* The Talking M & Ms in commercials for M & Ms Chocolate Candies
* The Talking Parcel, Ethelred is prone to blushing whenever Penelope praises him.

On one especially memorable occasion, he goes "as red as fourteen pounds of overripe tomatoes".
* The Talking Parcel of Mythopoeia, this is the default means of producing many common items: bottles and corks are each plucked off their own respective tree, for example. The main characters' guide finds the real-world version of a "cork tree" rather ridiculous by comparison.
* The Talking Pets are actually an intelligent species, the Dnyarri, who have been genetically altered to remove their higher brain functions. The Ur-Quan really, really
* The "talking to a tombstone" trick is one of the most ubiquitous in
* The talking tub/box commercials for Parkay Margarine ("Butter!"). It eventually comes to where the tub/box contradicts whoever's in the commercial when they mention butter ("Parkay!").
* The talking wells often try to tempt the party to jump into them. This sometimes results in a secret treasure room, but can also result in the party falling to their deaths.
* The Talladega Prison Rescue. Prisoners took over the prison and took hostages. The FBI responded by calling up the HRT and SWAT teams, who then stormed the building. The death toll of the raid was... zero. Not one hostage, FBI Agent, or prisoner was killed.
* The Tall Blond Man with One Black Shoe, an innocent man is tagged as a spy by a government guy to distract another government guy. As he walks though the airport, agents are secretly taking his picture - but since he's eating a chewy candy that's stuck in his teeth, every shot of him has his face oddly contorted.
* The Tall Blond Man with One Black Shoe. As her superiors watch on closed-circuit tv, she goes to change, and he kicks back on the couch with a cigarette, which he promptly drops underneath him - as he flails around manically to retrieve it he hits a switch which opens the couch into a big comfy bed. His watchers admire his smooth technique.
* The Tall Blond Man with One Black Shoe finds the dead bodies of four agents in his flat and runs out. When he wants to show the evidence to François, all the bodies are gone.
* The Tall Blond Man with One Black Shoe — parody of Stale Beer.
* The Tall Blond Man with One Black Shoe) smoldering in an ashtray blows up, and all four men gun each other down.
* The Tall Blond Man with One Black Shoe spy meets her intended conquest at her door in a black dress that conceals everything from her neck to her wrists to her feet. Then she turns around, and her back is completely bare, down to butt-cleavage.
* the Tallest after going through the titular Florpus. The last time we see them, they're stuck in or passing through a hellish-looking dimension surrounded by flames and screaming. Even if they make it out to the other side, who knows how long that would take?
* The Tallest, as per canon, regularly boss around and torment their underlings.
* The Tallests are seen as worse than Zim, being a pair of petty, self-serving, and egomaniacal
* The Tallest, the leaders of the Irkens, send Zim to "invade" an uncharted area they assume has no planets in it, inhabited or otherwise, because they don't want him
* The Tallest ultimately feel this way about the entirety of Season 1's
* The Tall Guy demolish a flat the first time they have sex. Not that there's any fight involved, they just lose control a bit.
* The Tall Man actually came before Slender Man, but don't expect any of his fans from /x/ to hear a word of it.
* The Tall Man, not to be confused with any of the other Tall Men. Incidentally, this name was chosen by the town in which the film takes place, and those involved don't seem particularly fond of it.
* The tall tales of Pecos Bill catalogue his many outlandishly improbable accomplishments, such as eating dynamite and lassoing a tornado.

* The Tall Trees area in the northeast is populated by large grizzly bears. While not invulnerable (as with every animal, you can kill and skin them), they can fuck your shit up quite easily. Whether or not they're more dangerous than
* The Talmud. Although primarily devoted to discussion and clarification of rabbinic law, it also contains practical wisdom sayings; a guide to dream interpretation; folk remedies for various diseases; instructions on amulets and other means of protection from evil spirits; and various biographical, geographical, historical, and other anecdotes.
* The Talmud and eat it, presumably without the need for ritual slaughter. One hopes that unlike the more famous one, this one wasn't made of clay.
* The Talmud as eunuchs, which came in handy to discredit charges of sexual immorality that they faced at one point.
* The Talmud because of his Torah learning. Rabbi Meir, his loyal disciple and friend, vows that after his own death he'll make smoke rise from Elisha's grave, as a sign that he's successfully brought him to Gehenna so that Elisha can be punished and eventually redeemed. After Meir's death, Rabbi Yohanan vows in turn to rescue Elisha from Gehenna and bring him into the World to Come. Sure enough, after Yohanan's death, the smoke ceases from Elisha's grave, because "not even Gehenna's gatekeeper could stand up to Yohanan".
* The Talmud has forgiven your sins—i.e., you're "bare" of any—but dreaming that you're naked in the Land of Israel means that you're lacking in good deeds instead.
* The Talmud Kamtza, a mortal enemy. Bar Kamtza thought that the other man wanted to make peace, and so came to the party, where he was ordered away. Trying to save himself from humiliation, he offered to pay, first for his own portion, then for two, and eventually for the entire party, but the host refused to listen and kicked Bar Kamtza out. Bar Kamtza therefore hatched a plot which ended in the enemy king coming to Jerusalem, the Temple being destroyed, and the Jews being sent into exile.
* The Talmud of different ways to interpret dreams, almost all of which are positive.
* The Talmud, there were four famous rabbis who were exposed to the mysteries of Creation: Ben-'Azai, Ben-Zoma, Elisha' ben-Abuya, and 'Akiva ben-Yosef. The first died, the second went mad, the third became an apostate (due to misunderstanding what he saw), and only the fourth one remained faithful.
* The Talmud, which states that deceiving someone by using this is as bad as flat-out lying.
* The Talon Gates were created in the aftermath of the first Planeswalker Duel on Dominaria, from the loser's corpse. It allowed planar travel to some extent, but there aren't many details on exactly how it functioned. It's beleived to at least have allowed consistent travel between
* The Talon Mercs that hunt down the player should he/she have good karma as well, they have black clothing.
* The Talon of Horus opens with the nascent Legion completely annihilating the Canticle City by the way of throwing a kilometers-long ship at it from orbit. Khayon takes his sweet time observing it and notes, among other things, that the entire city is engulfed in a miles-tall layer of dust and smoke and that the entire continent shakes.
* The Talon Saga: Revolves around the war between a secret dragon organization masquerading as humans and a religious order who hunts said dragons.
* "The Talons of Weng-Chiang", laughing maniacally as the man dies in agony.
* "The Talons of Weng-Chiang": Magnus Greel attempted to stay alive by draining the life essence out of young women. Leela only just avoided suffering this fate.
* "The Talons of Weng-Chiang": Magnus Greel has a melted, spaghetti-like face due to a mutation caused by primitive time-travel technology.
* The Talons of Weng-Chiang", Magnus Greel, is a 51st Century war criminal from World War VI.
* The Talons of Weng-Chiang" makes fun of the word itself: the Doctor claims that it translates from Greek as "This bath is too hot."

* The Talons of Weng-Chiang noted, the side-characters Jago and Litefoot fulfill the story's role of Watson - Jago behaves as the traditional film depiction of Watson being a pompous, boisterous, easily puzzled sleaze while Litefoot behaves as literature's Watson being a quiet, calm, observant gentleman.
* "The Talons of Weng-Chiang" says rather a lot about her (she does, however, survive).
* The Talons of Weng-Chiang story, had an evil puppet controlled by Magnus Greel.
* The Talons of Weng-Chiang territory, but there's more. To complete the illusion, a nearly immobile life-sized giant rat was built. It looks jarringly different from the real rat and is the exact opposite of threatening. This trope is in fullest effect in the cliffhanger where the camera dramatically zooms in to the cute rat plushie while the tense music reaches a crescendo. Tom Baker famously referred to this episode with, "The BBC is very good at period dramas but very poor at giant rats."
* "The Talons of Weng-Chiang". The title villain uses an unspecified knockout drug on a cloth to capture Leela, and she goes down fast... but she has enough time to tear the villain's mask off. Given the time period, it was probably either chloroform or ether.
* "The Talons of Weng-Chiang"; though he doesn't try to hide his identify from Chang, to whom it makes no difference anyway as Greel has risen him up from his humble life as a Chinese peasant to someone who performs before royalty.
* "The Talons of Weng-Chiang", when Leela gives away her clothes and is given a dress by Jago to replace it — and when the Doctor sees her in it, he's actually left speechless in mid-word. Then he suggestively offers to buy her an orange.
* The Talos Principle: Alexandra Drennan, the researcher who left the audio recordings.
* The Talos Principle: At the entrance of World B, you can find a terminal with a document telling about the Library of Alexandria and the Oxyrhynchus Papyri: many important documents were lost forever when the former was destroyed, while many trivial documents were recovered intact in the latter. The document points out the importance of ensuring our important documents are preserved. Immediately after that, the first terminal you find has a transcription of a song's extremely silly lyrics, and is even completely readable, as opposed to most others documents in the archive, which are either lost to corruption or with missing fragments.
* The Talos Principle: Both the red pressure plates and the purple containment fields are composed of these.
* The Talos Principle, but you can find him giving one to what he seems to think is empty space. He says he wants you to avoid the tower because, if you reach the top of the tower, the simulation will end, and he wants the simulation to continue for all eternity.
* The Talos Principle: Can be discussed with Milton, who may ask you if having your brain cells slowly replaced with microchips that perform the exact same functions as the cells they're replacing would, at some point, cause you to stop being human. It's left up to the player how they respond to this question.
* The Talos Principle. For example, the Egyptian set is mostly the same.
* The Talos Principle: In the music at the temples in areas A and C (the latter of which is the same music as on the title screen).
* The Talos Principle. It eventually becomes apparent that the entire game world is one vast test to ensure the completion of this goal: the player character solves puzzles in order to prove logic and abstract thinking, but can only escape the simulation by willingly defying a direct command from an established authority, something a mere robot could never do.
* The Talos Principle manages to ask this question two ways, and answer it literally:
* The Talos Principle: Most puzzles feature at least one of these. They appear as blue barriers and can be deactivated pointing a jammer at them, putting some weight on a nearby pressure switch, or pointing a laser of the appropriate color into a nearby receiver.

* The Talos Principle prefers to remain serious almost all the time, yet occasionally (if you look) descends into silliness with gleeful abandon, mostly in the various text logs you can find, though occasionally elsewhere.
* The Talos Principle, the order the robots are encountered is predetermined. Regardless of which order you choose to complete the puzzles, the first robot you free will always be the same, as well as the second, the third, etc.
* The Talos Principle: The overall thrust of Alexandra's voice messages.
* The Talos Principle: The point of the protagonist's existence and the world it inhabits. The goal of the program is to have the nameless protagonist evolve from a basic AI to a full-fledged artificial consciousness. You're playing either at or near the end of the process, depending on your choices at the end.
* The Talos Principle: The sigil colors indicate both their purpose and the approximate (but by no means accurate) difficulty in acquiring them.
* The Talos Principle: The terminals and Alexandra's recordings comprise the bits and pieces of the story.
* The Talos Principle, two of the three endings can be considered this. After completing all the basic puzzles and unlocking the (definitely non-golden) Eternal Life ending, you have to solve two different sets of puzzles (which overlap in that you have to get to the top of the tower for both) in order to unlock one of the two other endings. One is called Free Will, which involves one hard, timed puzzle at the top of the tower. In this ending, you finally fulfill the plan of the creators of the simulation, making this narratively the golden ending. The other, Blessed Messenger, requires finding all the stars and solving some extra puzzles, making it the most difficult to achieve, thus it is the golden ending gameplay-wise.
* The Talos Principle: While the end of world has come and gone, records encountered during the course of the game indicates it was not the horrifying event it could have been. Humanity's death was slow, but failry painless, with much of the world able to go on as normal even as the population dwindled. We even had time to create a thorough record of our culture and construct an heir apparent to inherit the world and preserve our legacy.
* The Talos Principle who spent their time trying to reverse-engineer human culture using the few tidbits of information available to them.
* The Talos Principle. Your goal is to achieve full artificial consciousness capable of betraying Elohim, while Elohim is in charge of maintaining the virtual world you're running around in, making sure everything runs smoothly, as well as guiding you. Milton's purpose is to challenge the A.I.s, including you, on their beliefs.
* The Tal Shiar (Romulan), has a reputation for being one of the most efficient organisations in the entire Alpha/Beta Quadrants. Not many organisations have a better reputation. It's considered dangerous enough for the Dominion to target for being wiped out as a prelude to invading the Alpha Quadrant.
* The Tamam Shud Case. The body of a still unidentified man was found in the Somerton Park beach, South Australia in 1948. The name comes from the fact that a scrap of paper with the Persian phrase "tamám shud", meaning "ended" or "finished" was found in the back pocket of the man's trousers. Among the man's possession was also found a text that resembled an encrypted message which has yet to be deciphered or interpreted in a way that satisfies authorities on the case. Fairly recently (read: 2017) evidence was found that might identified the man as one "H. C. Reynolds". An ongoing DNA test might finally solve this mystery.
* The Tamanous organization runs "fetus farms" in which female captives are impregnated and later harvested of their fetuses. The fetuses are used as a source for fetal tissue transplants, stem cells and so on.
* The Tamarisk Hunter: Most if not all of the water in the Colorado River belongs to California, meaning that states and people farther upriver have no water.
* The Tama Zoo in western Tokyo, Japan getting in koalas as a gesture of goodwill from Australia caused a surge in demand for media about koalas, which lead to the productions of
* The Taming of the Shrew at face value rather than trying to read subtext into it, this is where Kate ends up. She gives an earnest and unequivocal speech at the end

in which she says that wives should obey their husbands and submit to their will.
* The Taming of the Shrew, Baptista wants to marry off his daughter Katherine (the eponymous shrew) before allowing anyone to pursue his younger daughter Bianca. So Bianca's suitors enlist the help of Petruchio to woo Katherine, which he does with much enthusiasm.
* The Taming of the Shrew being presented to a drunkard named Christopher Sly, who is being fooled into thinking he is actually a rich and prestigious man as a prank. After the initial set-up, this is never brought up again. Some versions of the story have him appear at the end, planning to go home and deal with his own shrewish wife in a similar way to the story he just heard (though due to his drunkenness he just remembers it as a dream).
* The Taming of the Shrew, Bianca falls for her tutor Lucentio, who took the job in the hope that she would.
* The Taming of the Shrew: Bianca's father will not allow her to get married, not due to any objections with her suitors, but because he swore not to let her marry until her older sister Katherina is married.
* The Taming of the Shrew, Bianca's many suitors need someone brave enough to marry the shrewish Katherine so that Bianca will be eligible for marriage. When they decide that, in rides Petruchio, who thinks that a beautiful, rich wife sounds fantastic, and finds the idea of "taming" her to be thrilling.
* The Taming of the Shrew could be argued to be an example of this, as Kate 'defeats', or at any rate sees off all other potential suitors until Petruchio manages to break her through sheer horrendous treatment and stubbornness.
* The Taming of the Shrew is an iconic example. Petruchio solves her problem by feigning it himself, thereby giving her a taste of her own medicine.
* The Taming of the Shrew, is explicitly Commedia, down to the costumes and presentation style.
* The Taming of the Shrew: Katherine has deep seeded jealousy of her younger sister, Bianca. Bianca's the most popular, the most vyed after, and their father's favorite. Also, all of these things are just putting more and more pressure on Katherine to get married (which she does NOT want to do).
* The Taming of the Shrew mentions a man who doesn't want to go home because he can't control his wife. The main plot of the play...
* The Taming of the Shrew, Petruchio kidnaps Kate after their wedding ceremony. It's really more for show than anything else since she was going to go with him anyway, but she still doesn't enjoy it.
* The Taming of the Shrew, Petruchio orders his servants not to let his wife, Kate, eat or sleep. Kate begs their servant Grumio to give her food. Grumio pretends to use this so that he can follow Petruchio's orders.
* The Taming of the Shrew, Petruchio was a rare Western media example of a heterosexual crossdresser.
* The Taming of the Shrew, smashes her lute over his head, and chases him off.
* The Taming of the Shrew that leaves the two main characters ready to live as real partners? It's further confused by the framing device of the story being told just to screw with a random stranger.
* The Taming of the Shrew, the turning point comes when Kate submits to Petruchio and agrees with his insistence that it's 7 am and time to go out, when it's really no later than 2 am. Shortly thereafter she agrees with his insistence that the sun is really the moon and that an old man passing them on the road is really a young maid. Kate gives Petruchio no trouble thereafter.
* The Taming of the Shrew, Tranio, a servant disguised as his master Lucentio, publicly courts and becomes engaged to Bianca Minola to get her other suitors out of the way. Meanwhile, the real Lucentio, disguised as Bianca's tutor, is privately winning her heart and arranging an elopement.
* The Taming of the Shrew we have Gremio and Grumio. Good luck remembering which is which.
* The Taming of the Shrew, while others (including the Elizabeth Taylor/Richard Burton film version) have Kate catch on to what's happening and only pretend to go along with the scheme.

* The Tampa Bay Buccaneers original creamsicle-orange jerseys. Perhaps it's not a coincidence that within a decade of ditching them, they won their first Superbowl and ended their run as the NFL's officialy
* The Tampa Bay Rays, who entered MLB as the Devil Rays in 1998, introduced uniforms in 2012 that are meant to show how the team might have looked if they existed in 1978. They cribbed heavily from the San Diego Padres of that era with contrasting raglan sleeves, front cap panel, and even the way the team name is styled on the front of the jersey.
* The Tamuli after he has befriended 90% of the cast, and after he saved their lives in a pitched battle.
* The Tamuli are a deconstruction: beginning as a breeding experiment within the Tamul race, they eventually became so fierce and belligerent that they had to enslave themselves to others so they wouldn't fight to self-destruction.
* The Tamuli exaggerated version of the Spartans. Convinced they were the world's greatest warriors, their reliance on massive slave labor kept them from expanding very effectively, and elevation of training exercises to more of a performance art than a martial art landed them in trouble when their enemies started to develop new tactics. Having inferior magic was the nail in their society's coffin. Only the fact that their mindless devotion to their god made him stupendously powerful saved them, but they stagnated and remained in the bronze age indefinitely until they were useful only as tools in a more cunning villain's plans.
* The Tamuli in order to curtail a Troll invasion, the Bhelliom decides to curb bloodshed by creating a humongous escarpment to separate them. The trolls quickly find ways around this.
* The Tamuli, instructions to Sparhawk from Ehlana's kidnappers include a lock of her hair as verification.
* The Tamuli, it's revealed that the government of a continent-spanning empire that covers nine countries and cultures has a very relaxed approach towards people who try to raise rebellion against the empire. Their view is that people get pissed for a reason, and the leader of the current rebellion probably knows what the problems are. So they ask him if he could do a better job of running his region; upon the inevitable 'yes', they put him in charge as governor and let him handle the headaches. He either A) fails and is miserable in a hard job with the populace hating him, or B) does a good job and straightens things out. The Tamuli Empire sees it as a win/win situation for them.
* The Tamuli, Khalad posits that they could easily kill each messenger without reprecussion, and are probably confusing the enemy by not doing so.
* The Tamuli: Late in the series, the heroes realize that the Cynesgans are taking orders from Cyrgai. They also realize the large quantity of smoke coming from the chimneys of the Cynesgan embassy in Matherion is the same color as that produced by burning paper. But by that point there's a telepath among the heroes, so destroying the records doesn't help the Cynesgans.
* The Tamuli, so naturally it's mentioned at one point that they consider everyone else to be non-humans. In a bit of a twist, though, they've long since sold themselves as slaves to the Tamul Empire, because without an external interest directing their warlike tendencies they would quickly devolve into constant civil war.
* The Tamuli, the Emperor of the Tamul empire has nine wives, one from each kingdom that makes up the empire. He and his first wife were married when they were children.
* The Tamuli the trope. Ehlana's bodyguard Mirtai once explains that, had she not been "owned", she would have been honour-bound to kill every man who insulted her by letting his shadow fall on her, among many other incomprehensible offenses.
* The Tamuli they are still able to perceive the actions of the people around them in real-time. How is this paradox reconciled? Because the Troll Gods think that it works that way.
* The Tamuli to kidnap Sparhawk's wife. Seeing as 1) Sparhawk has a handful of assorted gods who like him and are willing to help him out, and 2) there's nothing in the world he loves more than his wife, this can only be considered a Very Bad

Idea in the long run.
* The Tamuli, when Mirtai is discussing past events, she refers to the revenge she took on the two men who killed a previous master: she disemboweled them (non-fatally), pulled out a few handfuls of innards, then set the building they were in alight. They didn't manage to get everything back inside in time to flee.
* The Tamuli, when the normally restrained Sir Bevier goes undercover at the villain's camp as a mercenary. He attempts to appear "dangerously competent", but his stage training takes over and, as a result, he ends up looking like a homicidal maniac and leaves the entire camp terrified of him.
* The Tamuli, where the Atan race were originally a subset of Tamuls, who were bred for strength and size. After a thousand years or so, they had become so fearsome that they threatened to kill off themselves over minor feuds, so a system of cultural slavery was introduced, so that every Atan would only take orders from a Tamul official or other duly appointed authority (this mostly boils down to the Atans asking permission to avenge a perceived slight, getting a no, and going back to what they were doing before).
* The Tamuli who seem to have no gender hangups. Anyone who reaches adulthood is expected to be a competent soldier, and their king and queen hold roughly equal status.
* The Tangerine Bear: where the dog Virgil is chasing Tangie for breaking a vase. He is chasing after him and is running towards the camera and his nose fills up the screen.
* The Tangerine Bear: Where the dog Virgil is chasing Tangie for breaking a vase. He is chasing after him and is running towards the camera and his nose fills up the screen.
* The Tangled Princess Bride. A broken hearted Rapunzel kisses a prince under a love spell and the total lack of love in the kiss is what breaks the spell.
* The Tangled Strings of the Marionettes ballet/ritual suicide that they resort to extreme body modification to make themselves nimble enough to perform the moves. As the title suggests, they only have limited success.
* The Tangled Web with a highly influential father. Luke lasts about a day before it becomes real.
* The Tang Mo are a race of "monkey folk" who hail from the continent of
* The Tank Alignment Chart, where the axes are Structure and Doctrine.
* The Tank does this in the opening cinematic, either knocking aside, crushing or ripping apart any zombie unlucky enough to be between him and the survivors he's trying to kill, even though the other zombies are trying to do the exact same thing.
* The Tank guard helmets seen throughout Series 8 are exact replicas of Hudzen-10's helmet from Series III's "
* The tank itself was initially considered this, to the point that the first one not only were armed with
* The Tanner hates his job, his life, and his village and only wins if he gets killed.
* The Tantalese royal family is descended from the hero Addam who saved the world five hundred years ago. Much of the country's identity is built around this, to the point that a few shops stock Addam's historical favorite foods.
* The Taotake are a nomadic seafaring people who place an immense degree of value on discovery and exploration. They're not considered truly adult until they discover and name something that no Taotake did before, and sail across every sea in Golarion as they explore and map out every corner of the world.
* "The Tape" is a video full of sketches and videotaped pieces made by Darwin, Gumball, and other students of Elmore Junior High.
* The Tape Knew You Would Say That after a historical recording proves that a major facet of dwarf life is completely wrong:
* The Tape Knew You Would Say That: A person is able to accurately respond to another person's statements even though they're just a recording and aren't really around to hear what the other person is saying.
* The Tape Knew You Would Say That, involving two ladies watching the television:

* The Tape Knew You Would Say That: Someone talks to a recorded message from someone and the person in the video or recording is able to accurately respond to the statements even though they're not really around to hear what the other person is saying.
* The Tape Knew You Would Say That: This is basically how TASes are built. Each one is a list of what buttons to press at what time (somewhat like a player piano roll) and, since all of each game's randomness depends on what the player does and how much time has passed since the console was turned on (aspects the TAS effectively controls), every game is extremely predictable.
* The Tape Knew You Would Say That with Lois to avoid her finding out that he's gone. Eventually, the tape says "If you haven't figured out this is a recording yet, please flip the tape over to Side 2".
* Theta Phi Alpha, a women's fraternity (sorority), uses the penguin as its mascot.
* The Tap Water Awards were a series of awards given out from 2001 to 2006 by the Edinburgh Festival Fringe in Scotland for theatre, comedy, dance, storytelling, and Arabic poetry in contrast to the Perrier Awards, named after the brand of mineral water owned by Nestlé, the subject of a long-running boycott over its marketing of infant formula in the developing world. The Tap Water Awards ended after Perrier withdrew its sponsorship from what are now known as the Edinburgh Comedy Awards.
* The Taqwacores about a then-fictional Muslim punk scene. The idea struck the fancy of a number of punk-minded Muslim kids who proceeded to actually bring the Taqwacore scene into existence.
* The Tar-Aiym Krang was published, breeders already saw this as a negative trait for mastiffs even then, and most mastiffs today are calm, good-natured, and easy-going animals.
* The Tarantino Variation which is three men, each holding a gun to another's head. Then they realize they need to kill the person holding them at gunpoint, and switch, all the while bantering — it's quite funny. The play ends with them each having one gun on each of the other men, walking off to lunch together.
* The TARDIS also translates anything in a classical language (for example, the
* The TARDIS always arrives at the exact right time for the Doctor to become embroiled in the plot of the week.
* the TARDIS". As a slight twist, the body snatcher stuffs the original inhabitant into a specially prepared brain-drained slave, not its old form.
* The TARDIS, being a shapeshifting living sentient timeship (internally, anyway, the pilot can change "desktop skins", but the external appearance of the Doctor's TARDIS is permanently
* The TARDIS' chameleon circuit is a great example. The BBC didn't have the technology in 1963 to make the spaceship invisible, and didn't have the budget to actually show it transforming into things that weren't 1963 police boxes. As you know, this resulted in one of the most iconic science fiction spaceships in the whole of the genre.
* The TARDIS console changed quite a bit over the years, sometimes from episode to episode. Especially a problem during the '80s years — there were times when someone put the panels on in the wrong order, which meant that
* The TARDIS did have "seatbelts" in one Colin Baker episode, but it's best not to mention them. (Trying to plausibly fit seatbelts in a control room with
* The TARDISes are literally aeons ahead of any other ship type anywhere,
* The TARDIS exterior also varied between model and prop and fluctuated from story to story. The "Police Telephone" plaque and the St. Johns Ambulance seal appeared, disappeared, and switched sides, and the plaque changed colors and even wording. The lamp on the top was missing in at least one episode. (Some of the interior and exterior variations are documented
* The TARDIS has been hinted to have an impressive library of its own, which is finally seen properly in the episode "
* The TARDIS has had many features used over the decades that were completely forgotten soon afterwards: it can drift back to its owner if separated from them in

time (
* The TARDIS has what could be considered a type of Red Alert, the cloister bell, which rings to signify a galactic disaster, i.e. the end of the universe. In the new series, it has also been used to signify a serious threat to the TARDIS.
* The TARDIS herself seems to have safeguards in place that prevent this. It's been shown that when she
* The TARDIS is at the very least the size of a city but is likely infinite, and shifts around from time to time depending on its own whims. We spent very little time there in the old series, only visiting some corridors ("played" by an abandoned hospital) and a handful of rooms. Even in the new series, we rarely see much further than the main control room — we've seen some corridors, a swimming pool, a wardrobe, a library and part of its processors, but not much else. Most of what we know about its insides comes from the dialogue and from the
* The TARDIS is kind of a subversion of this. It's obsolete by the standards of Time Lord technology, yes, but it's still an insanely powerful and infinitely reconfigurable dimensionally transcendental time (and space) machine... but it also quite often looks like it's either
* The TARDIS is practically the embodiment of this trope. It's a clapped-out old relic locked into one appearance, the last of a model which was junked by its creators centuries ago, and which is in places held together with paper clips and hope. Nevertheless, it still manages to be the most powerful ship in the universe.
* The TARDIS is sometimes shown spinning while in the process of travelling through the Time Vortex (after dematerializing and before rematerializing).
* The TARDIS. It's a self-aware, sentient, intelligent being, and yet the Doctor has the power to make it go away to die a slow, lonely death (
* The TARDIS itself is an example since it was an outdated model on its way to being decommissioned when the Doctor stole it (mostly on the suggestion of his future companion Clara). The Master even calls it an "overweight, underpowered museum piece" in "
* The TARDIS journeys are instantaneous or spend a few seconds in the Time Vortex at most,
* The TARDIS only ever materialized in place in the early days because they didn't have the budget to show their space ship traveling in space (except for a few times) or actually flying. The new series has fixed this somewhat and we've gotten many more scenes of the TARDIS flying, including one where it speeds along next to a car on a highway. The writers do note that that sort of thing "puts a strain on the engines", thus explaining the rarity.
* The TARDIS prop itself is a convoluted example. Originally, the TARDIS design was meant to mirror the MacKenzie-Trench Police Call Box of 1923, which by the early '60s was a common sight on London streets. However, with the advent of communications technology, police boxes became less and less common, the last (save a few left standing either from historic preservation or through apathy) being dismantled by the late '80s. By that time, people who had never seen the MacKenzie-Trench Police Call Box only knew the blue box as the TARDIS, and by the 21st Century, a British court had taken the trademark rights for the box away from the Metropolitan Police and awarded them to the BBC, who were actually doing something with it. Both they, and many, MANY, determined fans, have built many TARDISes, real in all ways save the understandable lack of being "bigger on the inside," and even a British newspaper heralded the decision of a British town to sell its remaining police box with a headline announcing you too could own your very own TARDIS.
* The TARDIS seems curiously attracted to whatever interplanetary incident happens to be most dramatic,
* The TARDIS usually simply "materialises" at one location or another in space and time (sometimes even where it's meant to). It's also been observed to fly in normal space
* The TARDIS was originally going to be a big, magnificent vehicle. Except the show lacked the funding, so they said that it can disguise itself as anything it wants. Then
* The Targaryens and Martells feuded for years, until a marriage alliance finally

ended the feud. This, however, only fueled the animosity of House Blackfyre until it rebelled against their Targaryen overlords and kin.
* The Targaryens are also an example of this trope as they're the last dragonlords fleeing the Doom of Valyria. Their rag-tag fleet found that the land they sought safety in, was also ripe for conquest.
* The Targaryens believed in the Prince That Was Promised, a hero from their family line who would revive the dragons. Jaehaerys Targaryen married his sister and forced his children to marry each other because a woods-witch prophesied that the Prince would come from their line. Rhaegar Targaryen was heavily invested in this prophecy, initially believing he was the Prince but then comes to believe that it was his son Aegon. Aemon Targaryen believes that
* The Targaryens, due to their obsession with blood purity, would marry their siblings - or cousins if they did not have a sibling to marry. Viserys I married an Arryn cousin, while his daughter Rhaenyra married her uncle Daemon and had three children with him, including Viserys II, from whom the current generation of Targaryens are descended. Around the Dance of the Dragons, the Targaryen intermarriages with each other and their relatives the Velaryons makes for a very
* The Targaryens see themselves as this. They were the ruling house of the Seven Kingdoms for three centuries, before they were deposed during Robert's Rebellion and House Baratheon replaced them as the new royal house. The few surviving Targaryens fled into exile. Currently based in Essos, House Targaryen seeks to retake the Seven Kingdoms from House Lannister, who formally replaced House Baratheon as the royal House following the destruction of the Great Sept of Baelor.
* The Targaryens themselves are merely the only survivor of forty dragonlords, the nobles who presided the Valyrian Freehold. They were also far from the most powerful,
* The target locator, with which you can designate targets for artillery.
* The Targetmasters (at least, the ones that weren't old figures given a new gimmick) followed a similar convention, in that the Autobots were named for accuracy (Crosshairs, Pointblank, Sureshot) and the Decepticons were named for
* The target of the heist in "Trash" is a valuable antique prototype laser. When the time comes, though, Inara tries to shoot her, fails, instead pulling out her own piece. Though logically, a display piece wouldn't be kept loaded in the first place.
* The Target Painter, which instead calls a bomber that cruises across the sky and sends dropping bombs exploding in a straight line.
* the target spots them and they end up simply tackling him and tying him up.
* The Tarka Imperium is an oligarchic monarchy with a caste system stratifying its society. To be more specific, the oligarchic system effectively comprises three different forces: The Nine Emperors, who govern separate polities; the Supreme Commander that heads the military caste; and the police caste, who have a strong rivalry with the military caste, and whose support any strong emperor or supreme commander needs to have.
* The Tarka. Their logic goes that you can only gain honor in battle by winning, and if you're losing your best option is to cut and run in an attempt to come back another day. If you commit yourself to a last stand not only do you prevent yourself from erasing the stain on your honor later, you're also making the opponent gain less honor from his victory by lessening it at the cost of your own life.
* The Tarkin family provides a very dark example, as family tradition requires that the kids are brought in the wilderness every dry season to learn survival and be toughened up, making them formidable enough that Wilhuff (the most famous member of the family) can brag to be one of the few people to have beaten
* The Tarkin Particularly since about half of these have characters popping up to exclaim that this superweapon is worse than the Death Star, omg!
* The Tarot Cafe, Pamela's mother (a midwife) was accused of witchcraft after the baby she was delivering and the child's mother both died. She confessed to witchcraft just so that she could plead for her daughter's safety and was burned at the stake. Pamela was later accused of witchcraft because she could see the future

and because she rejected a creepy old priest's advances on her. Because she'd been exposed to the blood of a dragon, she was immortal and survived. A later story has her kidnapped by a group of religious fanatics who use her tarot cards as proof that she's a witch and try to kill her. Seeing as she's immortal, they don't succeed.
* The Tarot Cafe's angelic (and previously female) lover reborn. It seems to help them reconcile after being estranged in their first focus story.
* The Tarot Cafe The beginning of the series also has Pamela and Ashes.
* The Tarrasque has this ability. The only way to defeat it is to beat it into unconsciousness and then use the most powerful spell in the game to make sure it doesn't wake up. (Good thing it sleeps 99% of the time.) And as of Fourth Edition, the Monster Manual implies that the only real way to kill the Tarrasque for good is to send it into space. Reducing its HP to 0 just sends it back to slumber beneath the earth. Second Edition required the Tarrasque to be reduced to -50 hit points, requiring the use of +1 or better magical weapons, then a Wish spell or equivalent to be used wherein you wished for the Tarrasque to never return. Depending on your DM at the time, sending it into space may be a lot easier.
* The Tarrasque is designed to be the most powerful monster in the world - it's huge, it's strong, it regenerates any damage quickly, and it can't be permanently killed outside of a
* The Tarrasque is hyped to be the biggest, baddest, toughest monster in the game, often rumoured to be the cause of why so many powerful empires are no longer around. Too bad that for its 3rd edition incarnation (and others),
* The Tarrasque: regeneration 40, magic-reflecting carapace, 840 hit points (this in a game where even the luckiest — as in, win the lottery several times — non-epic
* The Tarrasque was created as basically the single most powerful monster in the world that didn't live in another world. It was essentially Godzilla for D&D.
* The Tarr., creating a clone that is completely unrelated to the victim.
* the Tarr, either by spraying them with water from your Vacupack or throwing them into the Slime Sea.
* The Tartaros Arc, similar to the Phantom Lord Arc, sees Fairy Tail going to war against the dark guild Tartaros, which is made up of the
* The Tarterian Depths of Carceri, a prison plane for the multiverse's worst exiles, betrayers, and the deposed.
* The taser device used by the police sends out massive amounts of electrical voltage to incapacitate and stun a subject, though using it on someone with a medical condition could injure them or even outright kill them. The
* The taskbar on all Windows products is at the bottom of the screen by default, and almost everyone keeps it there. One Microsoft Blog post spoke of the advantages of having the taskbar on the side in Windows 7, but since the vast majority of users kept theirs at the bottom in prior versions, changing the default would cause major
* The "Task Forces" (a chain of missions that, once started, you can't do any other missions without abandoning) quite often turn into tests of endurance. Positron's task force was one of the first ones made, and is notoriously long and tedious. The later ones are notably shorter and more varied. The "old" task forces were designed with the mindset that a group of people would be willing to spend
* The task itself is completely pointless make-work, like digging a bunch of holes and then filling them back up again.
* The Task, which is arguably "Reality of the North". Even once it was moved to Prime Video with a correct title, the misspelled title card remained.
* The Tasmanian Devil gobbles down an assemblage of dynamite Bugs passes off as Wild Turkey Surprise. Result - a second of distension,
* The Tasmanian devil population is in danger because of the devil facial tumor disease, a contagious cancer passed around by their face-biting habits. Their faces suffer gross deformation which damages their skull and ultimately starves them to death.
* The Tasmanian Devil (Taz), Taz can and will consider making a meal out of any of

the other toons that cross his path, be they man, bunny, duck, or otherwise.
* Theta starts on board a passenger liner carrying refugees from the latest war between Brynton's houses.
* The taste of dung is occasionally described as 'nutty' for whatever reason, such as in this example from
* The Tatami Galaxy has had very different reception from people who viewed it when airing and those who marathoned the whole thing in one go.
* The Tatami Galaxy rating, likely to do with a scene of a rock-climbing wall full of fake breasts.
* The Tatami Galaxy (released by Funimation) — It recieved a French dub, however.
* The Tatami Galaxy started with two guys who were interested in the same woman and has since been passed on through generations of Kyoto University students. By this point, the pranks are highly elaborate and cunningly planned.
* The Tatar Cavalry Regiment was a Polish unit of Muslim soldiers, members of the small Tatar community which had lived in Poland and Lithuania at least since 15th century. In order to find more recruits, the regiment issued an appeal to the Tatar population, calling them to arms in the name of Allah and under the green banner of the Prophet.
* Theta the preeminent religion on Jale's homeworld believes that if you lose any parts of your body in life you lack them in the afterlife as well. She's not religious but still a little disturbed when one of her crew (from a more "pragmatic" culture) decides to replace his crippled arm with a prosthesis instead of waiting for them to find a hospital that might be able to salvage it.
* The Tatmadaw has a history of being involved in coups ever since Myanmar won independence from the British. The recent involvement of Myanma troops in a coup was in February 2021 when they overthrew the Myanma civilian government.
* The Tattered Prince gets his name from the elaborate cloak he wears. Its pieced together from scraps of the banners of armies he's defeated and surcoats of men he's killed, all of the colors clash and it resemebles a patchowrk quilt. He wears it over plain, but elegant armor and he says his appearance is so plain and forgetabble he's totally anonymous when he's not wearing it.
* The Tattered Prince is a mercenary leader known for wearing a cloak stitched from rags of cloaks of his defeated enemies.
* "The Tattletale", where Cindy seeks attention by ratting out her siblings. Mike and Carol counsel her several times on her behavior and warn her to stop. In the end, Cindy doesn't want to rat out Tiger when he swipes out a claim voucher that would allow Alice to pick up her stereo. (The subplot saw Alice enter a jingle contest for an electronics store, and she won.) It is unknown if other more serious instances where Cindy would be expected to tell the truth — i.e., witnessing the mailman behaving inappropriately with one of her sisters — but suppresses it for fear of being punished by her parents, were considered for this episode. This episode was filmed in the fall of 1970 and the network likely would have been nervous about airing such a plotline in a family-friendly time spot, hence the seemingly awkward subplot using the by-now nearly forgotten Tiger (in his last appearance, after making sporadic appearances over the previous year or so).
* The Tattoo), and most of their interactions there are Ham-to-Ham Combat.
* The tattoo style "Trash Polka": The artists who created the style initially called it "Realistic Trash Polka" because the style combined photo-realistic images with text and abstract strokes (or "trash") in an organized way, like a musical composition (or a "polka"). "Realistic" was dropped from the name because they thought it sounded like they were "setting rules" for the style.
* The Tau also qualify — they believe in the power of logic and science, and refuse to believe in the idea of the truly supernatural, even after repeated battles with
* The Tau also suffer from this quite heavily: they are absolutely sure of their own victory due to their technology and ideology...without realizing that the Imperium and Eldar are still more advanced, and were even MORE advanced at the height of their power; needless to say, there is a reason the Imperium and Eldar

both have a practically Luddite mentality.
* The Tau apparently have an equivalent to sepukku that leaves onlookers splattered in blood and quite shaken, and whoever was at fault restored in the Ethereals' eyes.
* The Tau are actually fairly practical (at least in comparison to the other races), the only real problem being their
* The Tau are all about this, to a point where they can be a Deconstruction. Everything they do is for "The Greater Good": they don't love in the romantic sense (they breed by eugenics with couplings determined by genetic analysis), they will throw themselves into a meat-grinder knowing full well they will die, and even their leaders will sometimes carry a bomb to blow themselves up all for the Greater Good.
* The Tau are almost restrained by comparison, their symbols appear on one shoulder pad of their infantry and the doors of their tanks.
* The Tau are also Scary Conquistador Aliens in that they have expanded rapidly by colonising new planets, whether or not those planets were already inhabited. Any existing inhabitants will either voluntarily submit to the Greater Good, or they will be made to do so.
* The Tau are a special case. In the 35th millennium they were stone age hunter-gatherers and an Imperial Explorator discovered them. The Imperium planned to exterminate the primitive Tau and colonize their homeworld but the colonization fleet was destroyed by a warp storm, which protected the Tau from further interference. 6,000 years later the Imperium is little different but the Tau have an interstellar empire and many technologies that are more advanced than Imperial tech, though they don't have teleporters and their FTL method is orders of magnitude slower.
* The Tau are convinced that the Tau'va, or "Greater Good", is the best basis for a culture. This has ended badly for them on multiple occasions, as they've misinterpreted aliens fighting for their own reasons as coming to their aid - leading to unfortunate experiences like hiring Dark Eldar mercenaries or trying to throw a thank-you party for the
* The Tau are currently on the ascension of their first empire, although there's little information on what came before it.
* The Tau are more known for their power at long-range combat, but they have produced a few skilled close-quarters combatants.
* The Tau are relatively benevolent, by the setting's standards. Their society is actually far less oppressive than that of humans, and their brand of assimilation consists of converting surrendered enemies to their ideology (which may feature brainwashing if they do not convert willingly) and giving them a place in their society. Of course in any other setting they'd be at best
* The Tau are specifically presented as an underdog faction who can't match either the numbers of the Imperium or their most extreme powerhouses (Space Marines and the like)—but they have still managed to defeat Imperium forces on many occasions due to fighting more intelligently, using maneuver warfare and modern tactics and communications against the more ponderous formations and protocols of the Imperium.
* The Tau are the most notable, however. The pulse weapons favored by the Tau are technically uses ammunition that starts off as solid-state, but transforms into plasma as it leaves the barrel. They hit less hard than traditional plasma weapons, but have much greater reliability and range, and still have significant stopping power; even the lowly pulse rifle is superior in range and firepower to almost every other basic small arm in the galaxy (including the Space Marine bolter, which fires
* The Tau are willing to share their advanced plasma rifles with some of their auxiliaries, though of course they don't give them the tech to build them.
* The Tau, as the youngest major species in the setting, must have a lot of these, although it's only the wars after they've "discovered" a populated planet that get much attention.
* The Tau Cannon fires somewhat slowly, but does a lot of damage. This gets

magnified if you use the charged shot. Just before obtaining it, you can overhear a scientist and a security guard getting reduced to
* The Tau can't really go into the Warp because they have no Psykers - they have no means to truly access it beyond "skimming" the divide between the galaxy and the Immaterium (whatever that means), and they wouldn't be able to navigate through the Warp even if they got there. And it turns out, even for the unpsychic Tau, being lost in Hell is a
* The Tau can upgrade their Battlesuits with a support system known as a multi-tracker, allowing them to fire a pair of weapons.
* The Tau castes are also racially defined, and are thought to have their origins in the distinct varieties/subspecies that made up the Tau race before the Ethereals united them. The Fire Caste are the largest statured and most aggressively-minded, for example. Air caste are the most extreme, having hollow bones and weaker muscles due to living almost exclusively in space; according to some lore, before space travel their ancestors had limited flight capabilities.
* The Tau don't fully use the Warp for their FTL method, but only "dip" into it for a speed boost. This means transit is a lot safer for them, but as a result their empire is quite compact and positively tiny compared to the sprawling Imperium of Man.
* The Tau do... something... to their officers who somehow fail the Greater Good, implied to be a form of seppuku.
* The Tau, due to lacking a strong Warp presence, don't have psykers, and thus no analogues for the Imperial Astropaths and Navigators. This leaves them with very limited access to the Warp, and next to no way to explore its nature and applications. Despite having advanced technology otherwise, the Tau are very primitive when it comes to psychic and warp-based technology, including their FTL drives. The Tau are restricted to the "shallows" of the Warp, "skimming" it instead of immersing their vessels any "deeper" (apparently
* The Tau Empire as a whole have a very peculiar naming convention for their citizens, using [Caste]'[Rank] [Sept they were born in] [Defining traits]. For example,
* The Tau Empire avoids targeting civilians of the worlds they conquer, by logical extension that they are one of the few races that seek to subjugate other peoples rather than annihilate them.
* The Tau Empire has undergone several spheres of expansion and stages of technological progress, but inhabits a tiny sliver of space in the Galactic map. Whilst they have triumphantly seen off the Imperium in the Damocles Crusade, it is openly stated that this is only because the Empire of Man has much bigger, scarier things to deal with, and chose not to waste any more resources on what essentially amounts to a somewhat overly large splinter in their little toe.
* The Tau Empire have four castes loosely based on the four Hindu Varnas but with elemental
* The Tau Empire. Imagine a tiny, multi-cultural alien empire that holds up a belief called the Greater Good, promoting peace and co-operation between all races. Now, put them in one of the biggest and scariest
* The Tau Empire's Cadre Fireblades tend to be Sergeant Rocks. They are high ranked Fire Warriors who declined the chance to pilot Battlesuits, usually either because they understand the practicality of having a commander fight with the infantry or simply because they prefer to continue to fight with the lower ranked Fire Warriors.
* The Tau Ethereals are running by hiding the existence of Chaos (and the reason Farsight rebelled against them), explaining all instances of Chaos as insane humans (technically, they're not wrong) and daemons as remarkably unpleasant aliens. However, since they also have little to no knowledge of the Warp, no psykers and naturally high Warp resistance, it leads to situations like the one where the Tau defeated a Slaaneshi warband led by a champion and believed they had defeated Slaanesh hirself (from the band's warcries), unaware of the difference in killing a Champion of Chaos and killing his patron god.
* The Tau Fire Caste might qualify, being an entire group raised from birth for

combat and having strong martial discipline, but in contrast to the other races they are somewhat of a subversion of the archetype. For example, they attribute no dishonor to a sensible strategic retreat, and consider a "glorious last stand" to be the last resort of an inept commander. They do have pride and honor, just of a form unusual in the setting. Put into perspective: Imperial Guardsmen usually get their training around their teens. Tau Fire Warriors train constantly to become warriors, starting from childhood, and are expressibly forbidden from entering any other vocation. Fire Warriors never retire and fight until they die, although Shas'O generals are eventually presented with retirement, but are still expected to serve as military advisers.

* The Tau have a British Empire sort of deal - they'll hire anyone from the worlds they've conquered, but colonials will get a bit of a rough deal.
* The Tau have Commander Farsight. He and the forces under him broke away from the Tau Empire and formed their own faction, the Farsight Enclave, because they refused to go along with the
* The Tau have developed limited AI for their drones, which pisses off the AdMech to no end because they don't follow any of their theology and yet work.
* The Tau have far Eastern influences, and their architecture is influenced by their philosophy, giving their ships, architecture, armor, and vehicles no hard angles and smoothed, curved surfaces. This design philosophy tends to be passed over for many heavy Battlesuits (combat platforms which are
* The Tau have it as potential rule for their leader characters, allowing them to deep strike without the chance of scattering off target. This is the signature tactic of Commander Farsight, who'll drop in with a dozen other battle suits obliterate everything in sight.
* The Tau have little to no Warp presence, meaning they have no psychics and therefore no way of being influenced by the Warp. Unfortunately, early information on the subject was interpreted to mean that the Warp
* The Tau have practically no psychic presence. While they don't necessarily hunt down or encourage psykers, they don't have much actual understanding of them beyond what they find in other species (their FTL doesn't use the Warp, unlike the other factions, and thus they believe daemons to be another hostile species of alien). They are the faction that puts the most trust in science and technological advance as opposed to the dogma found in most other species, and consider the Warp to be something that can be
* The Tau have the friendliest First Contact policy, trying to negotiate with minor species and try to bring them into their stable of client species. Some species simply prove too aggressive and have been exterminated as a matter of pragmatism.
* The Tau have the Manta Missile Destroyer, which (as the name implies) fire missiles, but that secondary to its other roles. It functions as a small starship, a super-heavy atmospheric flier, long range heavy fire support platform, and most prominently a rapid-deployment airborn assault and carrier for troops, tanks, and battlesuits.
* The Tau have the Orbital Strike ability, which fires a single massive beam on one point, which then spreads out. In
* The Tau have very advanced weapons technology (they can give every footsoldier a plasma weapon, something the Imperium can only give out to the most deserving of the elite, and even then the gun is worth more than the soldier and is likely a millennia-old relic kept in working condition by religious ritual), but anything to do with the Warp (such as long-distance space travel, teleportation, psychic powers, and daemons) is beyond them (they have no Warp presence for Chaos to corrupt, so the idea of humans falling to Chaos or daemons eating ships in the Warp seems far-fetched to them).
* The Tau however play the trope straight. Their Pulse Rifles fire bursts of magnetically-accelerated plasma, making them among the deadliest weapons fielded by any army's basic infantry. But their most dangerous weapons are
* The Tau initially only fielded relatively tiny Mini-mechas in the form of Battlesuits; one-pilot mechas roughly 10-12 feet tall to carry heavy weapons on an infantry scale. They scoffed at the idea of Imperial Titans, whom they thought that

the huge amount of resources and manpower to keep one of those things running proportional to just, say, bring a massively huge gunship or artillery is just ludicrous and chalked it up to Imperial Propaganda. One Damocles Gulf War later they realized the humans
* The Tau initially saw humans as a subversion of this, and considered Imperial soldiers to be badly-trained, poorly motivated, and ill-equipped. Then they found out those had been planetary defense troops, not the actual Imperial Guard. Then they learned that the Imperium they had been fighting was not the same size as the Tau Empire, but dwarfed theirs by several orders of magnitude - in
* The Tau, look at the other races of the 40k'verse, shake their heads with a sense of disappointment and sadness over their foe's refusal to join them, then begins the shooting phase with at least 8+ marker lights (laser designators, which Imperium of Man have taken to calling Valkyrie's Marks). This simply is the precursor to the oncoming storm that begins with squads firing twin barrel plasma projecting "Pulse Rifles" and Ion based weaponry, before it ramps up with a
* The Tau may be the most "hopeful" or "positive" civilization in the setting — as long as you ignore the concentration camps, the fact that their race has been
* The Tau may be the only army with a unit for whom this is the specific job: Pathfinders have a special ability to mark targets, which will increase the damage done to them by any other units. Unfortunately the Pathfinders themselves are rather weak and the target-marking ability requires them to get within grenade range, so getting them back out of harm's way can be tricky.
* The Tau, meanwhile, do make extensive use of artificially intelligent robot drones for both combat and labor, but while they're quite a bit smarter than anything we have when it comes to operating independently, none shown so far has anything resembling a personality.
* The Taung Child, the fossilized skull of an early hominid, was discovered to have been killed by an eagle.
* The Tau, often affectionately referred to as "Blue Space Commies", are mainly Socialist Conquistadores with a rather large helping of the
* The Tau, one of the most technologically advanced races of the game, tend to focus their battle strategy around Battlesuits. Their Shas'O Commanders are often given the most advanced Battlesuit tech the Tau Empire has to offer. And yet, two of of the best HQ choices are the extremely cheap points cost wise Ethereal, and Cadre Fireblade. The Etheral has little combat ability, and while they can fight in Close Combat, you really don't want to have them anywhere near it. The Fireblade wears the same Combat armor as the regular Fire Warriors, and carries a Pulse rifle, and both may have two drones with them (Likely shield drones for extra survivability). Both have buffs that are given, to units they are near to, or with. Namely, the Ethereal's Storm of Fire buff, and the Fireblade's Volley Fire. When their per-requisite conditions are met grant an additional shot to Pulse Rifles, and Pulse Carbines, to any unit they are close to, or joined respectively. For way less points than every other unit option available for the Tau, these two HQ choices suddenly turn your Firewarriors and Pathfinders and into terrors of the battlefield, shredding apart infantry with massed amounts of fire from their basic weapons.
* The Tau, on the other hand, avert this entirely; as the naive upstart race they are constantly updating and upgrading their technology, seeking alliances with other species and generally acting entirely counter to the tone of the setting...unless you are foolish enough to get in their way.
* The Tau play this much straighter, as their homeworld is called "T'au."
* The Tau practice this trope on a racial level: Parents are preselected based their genetic qualities, mate, and then their child is sent to the education center for indoctrination. The parents take no part in raising it, but some take an interest in their progress.
* The Tau qualifies as well. They've done battle with the forces of Chaos, including daemons, but the Tau's lack of psychic power and their minuscule Warp presence mean that they view such foes as exceptionally unpleasant aliens. This

leads to a funny moment in the
* The Tauren and Draenei both seem to be overwhelmingly honorable on a cultural level and have often been accused of being this (
* The Tauren have the vicious, xenophobic Grimtotem and Bloodtotem tribes and high-ranking members of the Twilight's Hammer (such as Warmaster Blackhorn, a boss in the Dragon Soul raid.)
* The tauren's culture is inspired by Great Plains Native American tribes such as the Cheyenne and Dakota. Their buildings are made of animal hides, and many of their cultural aspects are directly lifted from Plains Natives, such as the dead being cremated, and one quest involves helping a young man
* The Taurian Concordat with the Inner Sphere for the next five centuries.
* The Tau rival the Eldar in shininess, but their two most common auxiliaries, the Kroot and the Vespid, are decidedly not shiny.
* The Tau's belief in The Greater Good. It's heavily implied their tolerance for other cultures and liberal ideology will lead to the extinction of their species, especially in a universe where
* The Tau seem to exhibit divine worship of their Ethereals, but that is more obeisance to their leaders than religion; they otherwise have no belief in anything "magical" or "supernatural", including the very real daemons and other things that inhabit
* The (Tausenigann) Ob'enn even more so. In fact, their entire culture is like this. And they're not the only ones, the robots in Book Three are this, and possibly the Tohdfraug (though Petey's press-ganging scheme redeemed them quite a bit). Also, Kowalski from the UNS, who claims his conscience is vestigial and is in charge of the vilest wetwork the UNS has to do.
* The Tau's Fire Caste (the military). There are only two ways to get out: death, or by opting to take a third "trial by fire" (the first two are given to all Fire Warriors), after which they are allowed to become military advisers instead of continuing to fight.
* The Tau's "Greater Good" philosophy is utterly alien to humans, because the Tau actually will fall back and stop contesting an objective if it becomes obvious the resources tied up could be put to better use elsewhere, because while every Tau is ready to sacrifice himself for the, well, Greater Good, Tau commanders look for strategies that involve minimal loss of life for their army (and in fact, glorious last stands are kind of looked down on among the Tau, because a commander who let the situation degrade so badly without evacuating clearly wasn't that much of a commander).
* The Tau Shas'Os. In Tau culture, there are only two ways to retire from the field: Ascending to become a Shas'O and remaining in the rank for four years...or going to the grave. The Shas'Os lead entire armies of fire warriors from the frontlines, with a minimum of 12 years of constant fighting required to ascend to the rank, and so every single Tau who manages to ascend to that rank is a Four-Star Badass by design. The fact that they get
* The Tau skirt the border between hyperspace and subspace, having not mastered the technology for a full translation into the Warp, "skimming" the border between space and Warpspace instead. This means that while they're safe from the stuff lurking in the Warp, their FTL is something like five times slower than Imperial Warp travel.
* The Tau special character Darkstrider is similar. He's certainly brave and talented, and has a long list of battlefield successes attributed to him, but he refuses to move beyond the rank of a Pathfinder team leader. Given the Fire Caste's views on tradition and deference to authority, this is grounds for insubordination and termination, but because he's so good at what he does, they overlook it and allow him to stay in his unit.
* The Tau take a much more realistic approach, using electronic warfare and other high tech devices to help screen their ships.
* The Tau take pains to avert this, and their Greater Good philosophy honors all roles as equals, from the farmers and builders and scientists of the Earth Caste to the bureaucrats and merchants of the Water Caste. Of course, the ruling Ethereal

Caste can be considered more equal than others.
* The Tau tend to rely heavily on mobility to cover their frailness in close combat, though their primary emphasis is on picking their enemies apart with superior firepower.
* The Tau tend to see everything in terms of cost/benefit analysis for their civilization as a whole, and will readily retreat and give ground when they judge a fight's cost to not be worth its potential gains. For instance, they may concede entire frontier worlds to Imperial advances, reasoning that, if the humans are willing to enter expensive meatgrinder wars for a few strategically worthless balls of mud, then they're welcome to keep them, and the the Tau can send their resources to deal with more important matters until the Imperium's watch eventually slackens and the Tau can come back and claim their old objectives for a much smaller cost. To the Imperium, who bitterly holds onto even the most unproductive human worlds to the last as a matter of honor, this philosophy comes across as extremely perplexing.
* The Tau tend to use their Kroot allies and other alien auxiliaries as this, but not to soak up enemy gunfire, rather to meet or counter-charge an enemy assault, since the Tau
* The Tau themselves seem to fulfill some of the functions of dwarves in the 40K Verse. They are shorter and stouter than humans, they have a weak presence in the Warp (meaning they're not very magical), they have a highly ordered and stratified society, and a strong warrior culture... At least when it comes to the Fire caste. And only when compared to other Tau, who are largely peace-loving and lack any aggressiveness. Their technology is also far beyond the Imperium's in many cases, with sleek
* The Tau tried to create a pilot suit that would allow for better reflexes in battlesuit combat. Unfortunately, few pilots survived the experience without their brains frying.
* The Tau use a form of population control, in that all pairings are determined by examining genetic potential and then getting the parents to mate. The offspring will not be raised by the parents but the caste-wide educational system (though parents often take an interest). Tau society functions on
* The Tau were on the receiving end of this against Imperial Titans, being
* The Tavern Brawl (rotating gamemode with special rules) Blood Magic did this for ALL spells. It lead to a rather fast meta with most games ending on the first or second turn.
* Theta vs Pi 7 this is the whole idea of the Delta Guards. One attacks you then as soon as it's defeated a new one comes out in a different colur.
* the taxation on taxes to manifest in the form of IRS agents screaming "grab grab grab", leaving them with technically (after inflation) less money than what they used to buy the house.
* The Taxi: A taxi cab is used as a mode of transportation for characters.
* The taxi driver from "Bail Out" threatened to sue Harvey's driver. But he's not your standard fool, considering the following
* "The taxi has some kind of problem with the steering, probably dead pedestrians lodged in the mechanism."
* The Taxxons have tried some desperate things to cure their hunger: they were
* The Taxxons, man-sized (or bigger) alien creatures resembling fleshy centipedes and with a ravenous appetite (to the point where they'll eat
* The T-Bones had a #3 instrumental hit in 1966 with "No Matter What Shape (Your Stomach's In)", whose melody came from an Alka-Seltzer jingle. The album of the same name that followed also included a cover of the "Chiquita Banana" song (see above), an original based on a Granny Goose potato chips commercial ("What's in the Bag, Goose?") and "Sippin' 'n' Chippin'", a cover of the jingle for Nabisco's Sip 'n' Chip cheese snacks which was issued as the follow-up single to "Shape" and was recycled as the title tune of the next album, which in turn featured covers of "Cinnamint Shuffle" (Clark's Cinnamint jingle, which began life as Herb Alpert and the Tijuana Brass' "The Mexican Shuffle") and "Forty Five" (Colt 45's jingle).
* The TBS show ''Tush', which was modeled loosely on SNL, routinely did a parody

commercial or three per show.
* The t'ca (giant methane-breathing snake-worms) give birth if subjected to enough psychological stress. They also have five brains and their
* The TCG itself gets toned down. In the OCG, it happens quite frequently that decks can heavily OTK. To prevent such very fast aggressive decks being played in the TCG they get banned or limited right before they get a release. A good example of this would be Temple of the Kings. A card that was
* The TCG uses art from the IDW comics (which can spoil some plot points, such as
* The TDWT finale uses exactly the same format (list of "GASPS!" and then a
* The teacher asks the class to produce a word that starts with the letter "A"; Vovochka happily raises his hand and says "Asshole!" The teacher, shocked, responds "For shame! There's no such word!" "That's strange," says Vovochka, "the asshole exists, but the word doesn't!"
* The Teacher from episode 4 tries to demonstrate the variety of options on the internet, but there are only three things to do. It doesn't stop him from repeating the three options ad nauseum to the point that it ends up corrupting the digital world.
* The Teacher From The Black Lagoon, a rather peculiar picture book, sums it up in four sentences:
* The teacher Mr. Nagy is renamed to "Mr. Meisner". His role is mostly the same, trying to humiliate students by reading their secret notes aloud. Only instead of a note by Rose and Lissa (as in
* The Teacherof All Things has Taichi's yellow cloak in the original V-Tamer story. He returns to the Digital World with his cloak when he once again takes up the mantle after his brief retirement.
* The Teacher of All Things Hiroaki Ishida and his camera crew all do this with a Champion Digimon.
* The Teacher of All Things: MaloMyotismon uses his Illusion Mist attack to trap the Digidestined in their own personal fantasies.
* The Teacher of All Things takes place in the Adventure time line the above holds. However we also get another plot point for the time curve, six months—the time from the events of V-Tamers to the events of the story—in the human world is equivalent to 2000 years give or take.
* The teachers at the Guild sometimes send students after Vimes to teach them humility. Most of the traps that Vimes has set to them are potentially very lethal — for example, loose roof-tiles on greased rails, placed where a hapless Assassin will fall onto an spiky, ornamental, but more importantly,
* The teacher's lounge offers "coffee-flavoured beverine" with "creamium".
* the teachers wanting students conversing and playing tech-free playground games in their free time to do things like frame staff and ruin their lives with things like out-of-context photos.
* The Teahouse of the August Moon as a captain of the occupation forces, tasked with Americanizing a Japanese village and ending up romancing the geisha Lotus Blossom, played by Machiko Kyou.
* The Teahouse of the August Moon is about the comedy that ensues after a green American officer is sent to a small Okinawan village in 1946 to oversee reconstruction.
* The Teahouse of the August Moon, Sakini notes that in Okinawa, things like nude statuary are quite taboo, but people of mixed-sex bathing together in public is no big deal, while in America it's exactly the opposite.
* The team chosen to travel to the Lost City of Faust includes Trixie and Ruby.
* the team determine that Deborah Vanderhey is responsible for the death of her granddaughter as part of a long history of domestic abuse that was covered up by her family's lawyers and doctors, the judge informs Deborah that while she cannot charge Deborah with anything as the statute of limitations on her crimes has expired, she is certain that the woman will be tried in the court of public opinion.
* The team developing the game said it was cancelled for very different reasons, simply put there were

* The Team estimates that he's been alive for a thousand years and his only complaint is a student putting too much Lit Crit and not enough History in their paper. He's had numerous paramours over the ages. He's also so patient that he's perfectly willing to wait for a human he doesn't like to die of old age.
* The team fall under the category of this trope because they are all heroes (at least by series 2), and get roughly the same amount of screen time.
* The Teamfight Tactics autobattler spin-off mode featured Star Guardians as a trait in the cosmos-themed Sets 3 and 3.5, with Poppy, Zoe, Ahri, Syndra, Neeko, Soraka, and (in Set 3.5) Janna all being part of the trait. When active, the trait granted mana to all other Star Guardians when one Star Guardian cast their spell, and could be granted to any champion with a Star Guardian’s Charm item.
* The team from the Republic of Militaria. "Worm! American football is
* The team gets a few more super losers in their own series: The Grapplah, a loudmouth with a grappling gun; Powertool, an overweight guy with a
* The team has a Wraith Hive ship with damaged weapons and needs to disable a Wraith cloning facility on the planet below. Originally, their plan is to either steal or overload the ZPMs powering the facility, but an attacking Hive ship encourages them to use their captured Hive ship to disable the facility a little more...
* The team has to have been active in their current league for at least 40 years.
* The team is going over the plan when one of the main characters hands to the other a note that reads "Keep talking". The rest of the team does so while Stavros sneaks over to the door catching the eavesdropper and pulling him into the room. It's the first sign that things may not be going as planned.
* The team is split into two groups. On the one side, you've got Coulson, May, and Ward, three professional SHIELD agents who are used to giving and taking orders. On the other side, you've got
* The team is stuck in a collapsing cavern, with things about to get worse. Cid mutters to himself something along the lines of "Lady Luck, don't give up on me now." Cue the reaction above when
* The team learns from Lord Shojo that Xykon is planning on controlling the Snarl, a god-killing monster born of godly bickering that sealed into the planet.
* The team of Allied commandos assigned to blow up the Nazi cannons on the Greek island of Navarone in
* The team of ARC troopers managed this because they were Super Soldiers themselves (to a much milder degree than Greivous, sure, but there were a lot more of them than there were of him). They held him at bay with impressive amounts of
* The team once encountered a subversion of this situation. They had two people who knew exactly how to disarm the bomb, unfortunately it was so poorly made that disarming it would take longer than they had left.
* The Team Rocket trio has a tendency to launch into these, occasionally to the point of being physically 'pun'-ished by other characters, including themselves. While normally kept to a humorous minimum, this reached extremely irritating levels in the English dub of the
* The Team Rocket trio, in certain situations. Go after a group of WILD Remoraid to send to HQ? Ten thousand volts and a one-way ticket to the stratosphere. The
* The Team Rocket trio make rather a production of their entrances, going beyond a simple catch phrase to several catch sentences. More like a catch poem, really. It gets hammier and hammier with each season. They even did a Karaoke-style song once to introduce themselves. They do it so often that in
* The Team Silent games tend to be liked universally among series fans. Every game since has been controversial to some extent, but
* The team's later acquisition, a Tiger(P), could most charitably be described as
* The team's main vehicle, The God Phoenix, has a rather poorly thought out weakness in that all the team's sub-vehicles have to be docked for the God Phoenix's weapons systems to work. While that kind of weakness would make sense to create the plane's Fiery Phoenix effect since it's an exotic weapon system, to have it affect the regular weapons seems too much. Even worse, Galactor learns about this weakness and the visual clues for it and wastes no time to take advantage of

it.
* the teams pull off a better plan to fool Ironwood and get into Atlas' vault without surrendering Penny. Helping things here is having the assistance of Emerald, Winter and Marrow
* The team's Quantum Realm suits were revealed well in advance thanks to them appearing in all sorts of action figures and promotional images. The directors attempted some light damage control by claiming that the toys may not be accurate, but the suits ended up being confirmed by the second trailer anyway.
* the team's ruthless "no matter the cost" attitude will bring about a Bad Future for Wolverine to finally realize and accept the mistakes he's made.
* The team's second mission, the one where Blink is made team leader, runs headfirst into this problem again, since they're at a version of the trial of the Phoenix. Only this time, the Phoenix really
* The team starts with four guys, then adds Miss Martian and Artemis Crock. This becomes the status quo for the bulk of the first season. This trope was so enforced in the minds of its demographic that rumors that another female team member (either Wonder Girl or Secret) would be joining the cast launched much speculation that either Artemis or Miss Martian would be outed as The Mole, die, or otherwise leave the team.
* The Team to ignore the laws of physics and just do what looked coolest.
* The Team up to search the city, Kyon gets paired first with Mikuru and later with Yuki. Haruhi declares, "Kyon, this is not a date!"
* The Team Wannabe: A character who wants to be a member of the group, but is only ignored by the team because they find him annoying.
* The team were ordered by their commanding officer Morrison to rob the bank of Hanoi as part of a secret mission, but was then killed in an artillery strike and since the mission wasn't public knowledge the only people who knew the Team weren't just bank robbers were the Team themselves.
* The Tea Party and Occupy Wall Street can be thought of as Romantic movements. In terms of actual ideologies, the Tea Party is more romantic, with its strong love of the past and traditional values. While Occupy Wall Street has been likened to the Hippie movements of the 1960's, its criticisms of capitalist accumulation, tax breaks, unemployment are far more specific towards economic inequality than the vague invocations of "free love", as noted by Noam Chomsky. Both are critical of states, but each have opposing attitudes towards capitalism.
* "The Tea Party" chapter, in which a bunch of a women are invited for a tea party at the Moriarty manor, and all of them drool over the
* The tearing of the fabric of the universe that occurs at the end of "
* The tearjerker of "Twisted Sister" is followed by "Cover Up", an episode about Buttercup trying to overcome the reliance of a
* The Tears of Gaia: Star Swirl admonishes the Mane Six for starting up a snowball fight in the middle of their quest... until he gets hit with one, and immediately joins in on the fun.
* The Tears of Gaia. The dragon Tharos had a spell placed on him that granted him Resurrective Immortality. He can't die, but sees this as a curse, as he's forced to live with the shame of all the times he's been defeated.
* The Tears of Gaia what it really is, they get the hell out of there.
* The Tease: A character (usually female) constantly teases their love interest by acting flirtatious or dressing in a manner that drives them crazy.
* The Tease: Prone to tempt someone sexually with no intention of satisfying the desire aroused.
* The Teaser, Amy's boyfriend finds her lying partially in the bushes, begging for help: her body obscured from the waist down. When he tries to lift her up, he disocovers that she has been cut in half at the waist, and all of her intestines spill out on the ground.
* The Teaser at the scene and the suspect was framed by the FBI, and after her staff review the files and uncover the malfeasance, Liz gets her to agree to return home in exchange for a new trial (at which she is presumably acquitted).
* The Teaser episode "Athens" has a bit where a bureaucrat touring Cyber Command

asks about security procedures, for instance what if somebody loses their ID or has it stolen. Their IDs are biometric scans of their hands, leading to the following exchange:
* The Teaser episode "The Haven" (and the complete apathy of other characters alerted by an AI to the incident) kicks off the plot. It comes complete with chest-clutching, pained moaning, and protracted flailing.
* The Teaser example. Agents J and K follow a young couple into a Tunnel of Love ride at an amusement park, and they have to save the young lady by killing her boyfriend (who was really a Tresfin alien disguised as a human); as he doesn't "break hearts", he eats them.
* The Teaser. For example, issue #5 starts with Woody, Quantum, and Amy working together as a tightly-coordinated counter-terrorism team to stop a criminal called Othello. In reality, it's a dream induced after Quantum was accidentally blasted off of a building in the previous issue.
* The teaser for the second movie shows Misato slapping Ritsuko across the face during a heated argument. Nothing remotely close to this happens in the movie.
* the teaser for the third movie was included in the final film, as the script was heavily rewritten during production.
* The Teaser gets cornered by Deacon on the edge of a cliff. With nowhere else to go, she jumps off the cliff. She misses the river and smashes into the rocks beside on the bank (not that landing the river would have helped given the depth).
* The teaser of "Baby Steps" reveals that when D.W. Read goes on a car trip with her family, it's a constant litany of "Are we there yet?" and when she bakes cookies with them, it's "Are they done yet?"
* The Teaser of the sequel episode "The Origin of Species", they are absorbed by the ship, effectively killing them, as they possess a genetic disease.
* The Teaser on board, fights his way to it and steals it just in time.
* The Teaser reveals a significant amount of detail about the outcome of the incident.
* The Teaser, Sanchez attempts to escape from Bond and Leiter in a light plane, and the two spies chase him in a Coast Guard chopper. Once they catch up with him, Bond lowers himself down and hooks the Cessna onto the helicopter. The more powerful helicopter is able to drag the Cessna back to Florida.
* The Teaser - Short cold opening used at the beginning to establish a show
* the teasers set to "The Chipmunk Song", has Alvin doing this, successfully.
* The Teaser, the theme music is briefly played diegetically with a "cheap radio" effect added to it, before the normal title sequence with the usual theme begins.
* The teaser trailer movie, starts with the following text: "IT'S A NEW WORLD" "WITH NEW ENEMIES" "AND NEW THREATS" "BUT YOU CAN STILL DEPEND" "ON ONE MAN". James Bond walks behind the words "ON ONE MAN", shoots out the A, the E and all three Ns, then shoots half of the M so it looks like a 7. The remaining Os merge with the half-M to form a 007.
* The teaser trailer starts with a museum tour guide telling visitors that the
* The Teaser underneath; but then Arthur's head pops up from in his shirt, revealing that was another prank.
* The teaser uses one when it reaches the point mentioning that Sunset Shimmer is part of the "band".
* The Tease toward Shirou most of the time, but in the "Unlimited Blade Works" route where they actually do become a couple, she gets easily flustered and embarrassed whenever Shirou shows affection for her.
* The Teblor are a Proud Warrior Race, and Karsa starts as one of the proudest. Even as he moves away from their customs, he doesn't lose his relish for combat, though he is not averse to learning from other people and cultures as time goes on.
* The tech expert in “The Brother in the Basement.” He helps Angela go through a suspect’s computer but is really distracting everyone to try and keep them from realizing he’s the killer.
* The tech level of Remnant is extremely impressive in most respects, with holograms, massive flying airships, combat androids, etc. However, the setting has a

* The Technarchy's version, the Transmode virus, transforms living flesh into technology and allows them to feed on 'life-glow', and is also capable of resurrecting the dead - most notably, during the
* The Technical Commentaries fit this trope so well that much of their information overrides canonicity in the eyes of fans. The best example is the class name of the Star Destroyers from the original trilogy. Canonically, they're Imperial-Class according to the EU, the official website, and
* The Technical Faction.. May overlap with the Elitists or Guerrillas.
* The technique is also used several times throughout the series. Shinji in the bath in the second episode, and most strikingly in the Mindrape sequence, where it's all scribbled words related to
* The technique is demonstrated for Charles Bronson's KGB protagonist using the phrase "Cleopatra says there will be snow from the west." This is the scene being spoofed in the first
* The technique known as Instant Transmission is not only literal teleportation (to somebody's location, specifically), it's also normally not used like this trope as it's usually used for long-distance travel (up to and including different planets and even the afterlife). This is because Instant Transmission requires locking onto a target and concentrating first before it can be used, which over short ranges is usually slower than just flash stepping. One memorable moment where it
* The technique Madness Buff boosts some of the user's stats at the cost of its HP.
* The Technis Imperative is the rare crossover event where no one actually dies, and it can even be argued that by the end of it, the result was actually negative one deaths, as Cyborg returned.
* The Technocore is interesting in this respect. While they're incalculably more advanced than humanity it turns out that
* The Technocracy originally formed when a group of wizards decided to create a form of magic that was egalitarian and available to all, reduced the power of evil monsters, and was safer for ordinary people. Some players think they eventually
* the technological peak and instead turned to a simple life of mysticism. Not that they gave up their scientific knowledge, they just didn't use it unless they had to.
* The technology is also literally an enforced level, as the ultimate source of mechanics guild tech was broken into levels which the founders of the guild chose which to stay at.
* The technomages play the trope straight, creating volumetric displays with no visible emitters, possibly crossing the line into
* The Technomancer. Interestingly, the achievements for romancing Amelia and Niesha are both named after puns that refer to their respective backstories, whereas the achievement for romancing Lucky is simply titled "Soulmate".
* The Technopriests, Albino and his siblings Almagro and Onyx were all conceived when their mother Panepha was gang-raped by Ulritch the Red and his pirate crew. She spent years amassing a fortune for the sole purpose of buying a ship and hiring a crew of mercenaries to hunt down and slaughter Ulritch and the other pirates in revenge.
* The Technopriests, Panepha openly favors Almagro over his siblings Albino and Onyx, mainly because Albino is, as his name suggests, an albino and Onxy has red skin and four arms.
* The TEC's Novalith Cannon. The best way to describe it is that it does to planets what nuclear bombs do to cities. A single hit will depopulate all the but the most heavily populated planets. For those, you need two missiles. Oh, and there's fallout.
* The Tectonese can also get their freak on for fun with just the two of them, but if procreation is the desired result they require a member of their specialized "third gender" to act as a catalyst. The third gender seems to pass for male (though perhaps a bit shorter and less bulky on average). Couples made of a female and a third genderer require a male surrogate to help conceive. How and whether

LGBT couples factor into this is not explored.
* The Teddy Bear (and its Borg version) may qualify for this, since they don't actually do anything except block hits and get the stuffing knocked out of them. And you can name them endearing names.
* The teddy-bear cholla, a cactus native to the deserts of the American southwest, from a distance looks as cute and fuzzy as the name implies. Those fuzzy-looking spines, however, frickin' mean business! Entire segments of the plant will break away and cling to their victim like a gigantic, vampiric cockleburr. This is also simultaneously the teddy-bear cholla's main defense against herbivores and their primary form of reproduction (in that the segments sprout as soon as they're removed from their victim). They tend to grow in patches, making large swaths of the Sonoran Desert impassable. The cactus is so devious that locals like to repeat an old wives' tale that claims plants are able to reach out and stick passers-by, which, by the way, inspires its other common name of "jumping cholla."
* The teddy bear from the first episode, "TeddyGozilla", might also count... until it is possessed by XANA.
* The Teddy Grahams mascot is a teddy graham. Smiling sweetly, as if to say that he wants to be eaten
* The Teddy Ruxpin fanbase contains a good amount of furries. The show's animated series spin-off,
* The Ted Knight Show, getting manicured, finding the right boutonniere, and otherwise thoroughly dandifying himself—only to get get mudsplashed on a streetcurb by a passing New York City cab.
* The Tedral "companies" are the remnants of a people whose homeland was conquered. They became mercenaries to get the land back, but over the years, the goal went from
* The teenage boy whom House yells at to wash his hands after going to the bathroom in the episode "Kids" is
* The teenage Dillon used to babysit a little boy named Julian. When Julian turns up to visit in the present,
* The teenage employee in this Not Always Working anecdote had apparently never heard of mechanical watches, despite working in a department store's jewelry department, before attempting to pry the back cover off one, because she thought it needed a battery replacement.
* The Teenage Mutant Ninja Turtles (red = Raphael, blue = Leonardo, purple = Donatello, orange = Michaelangelo.) In the TMNT's case, these accessories do not serve as identity concealers (it's rather hard to disguise a giant humanoid turtle as anything else) so much as badges of their Shadow Warrior vocation.
* The Teenage Worrier mentioned that part of Letty's movie about war was a montage of child soldiers which she planned to set to a creepy distorted nursery rhyme soundtrack, but couldn't choose between "Humpty Dumpty" or "Twinkle Twinkle Little Star"
* The Teenage Worrier's Christmas Survival Guide, Letty asks to borrow a dress of her mother's to wear to a Christmas party, but the dress turns out not to belong to her mother, leading to an argument between her parents over whose it is (though it is suggested her dad isn't really cheating).
* The Teenage Worrier's Guide to Life: Letty's mother disappears, but the family finds a note from "Neville" (the name of her ex-boyfriend) agreeing to pick her up. It turns out Neville is the husband of someone she was visiting to discuss a business venture, but she'd accidentally left his note to her on the table, rather than the note she had written for her family.
* The Teenage Worrier's Worry Files, Letty meets a man named David who is a cross-dresser. She discovers letters between David and her father, describing plans to go on a trip together; and believes they are having an affair. David was actually helping him research for a new novel about a cross-dresser.
* The teen example is justified; teens can cook, clean, hold down a job, drive, and care for younger sims; the social workers don't
* The teens casually use the word "muggle" to refer to their non-magical families,
* "The Teeter-Totter Caper", at the end of 1971, when Bobby and Cindy —

already having not been invited to their Aunt Gertrude's wedding — want to help their older siblings but are told to stay out of the way. (The older siblings telling Bobby and Cindy to go away because they're being annoying isn't seen on camera, but it is referenced by the downbeat pair of youngest siblings.) Mike tells the two that perhaps there are times where their help isn't necessarily needed or wanted and they should find something to do, leading to the main plot of the youngest Brady siblings setting out to prove they
* The Teeth of the Tiger, before leaving office Ryan creates a stack of pardons with the names blank, for use by the organization he sets up for covert action against the United States' enemies when the official government agencies are either incapable of acting for whatever reason.
* The Teetotaler: Someone who abstains from drinking alcohol. While there can be secular motives for teetotalism, many people do so because their religious beliefs frown upon getting intoxicated.
* The Tehran Contract by Gayle Rivers and James Hudson. The mercenary team hired to get some upper class Iranian teenagers out of the country quickly make it clear who's boss. The first person protagonist concludes that their snooty attitude actually makes things easier, as the mercs don't have to empathize with the teenagers — they're just a package that has to be delivered.
* The Telegram Man (2018) has the title character delivering telegrams to isolated Outback farms, a job that makes him quite popular as the bearer of news from the outside world...until World War 2 breaks out.
* The telegraph-age. So the modern age of free speech and long-range communication is more like a return to normality than a revolution.
* The Tele is actually an upgraded version of the Broadcaster of 1948.
* The telepathic mutants who recall this prophecy are acutely aware of the past and the future, to the point where their language has no present-tense verbs, and instead use past- and future-tense verbs simultaneously. Example; instead of telling the hero "I am your friend," a mutant says "I was/will be your friend."
* The teleportation pyramids are inventory items that are activated to teleport without any sensory effect whatsoever and without breaking stealth or invisibility. However, they can only teleport to another pyramid.
* The teleporting magician, Bonny de Famme, turns out to be half of a pair of identical twins: Bonny de Famme and Betty de Famme. They have identical looks, but very different personalities.
* The Telescope. That was when people realized the show wouldn't be yet another adult animated sitcom where conflicts were resolved in 22 minutes.
* The televised gladiator combats in the very next TOS episode to air, "
* The televised live musical was inescapable during the '50s, but died out by 1960, with the last one being a remake of
* The television career of popular UK comedy duo Vic Reeves and Bob Mortimer revolves around deconstructive parodies of light entertainment. Reeves' career began in comedy clubs as a surreal exaggeration of the kind of versatile all-round entertainers who had flourished in the 1960s and 1970s, a la Bruce Forsyth and Des O'Connor. This continued with
* The Television Ghost is the only thing its star George Kelting even appeared in.
* The television in Calvin's house has occasionally had thought bubbles of its own, which no-one else seems to notice.
* The television series often adapted stories in a different order to that in the books, which often had the effect of disrupting story arcs and requiring plotlines to be rewritten. Notable examples include Percy describing his charge through a great flood years before it happens, or Gordon and Thomas taking over a decade to get back home from the mine.
* The television shows of Gerry and Sylvia Anderson's production company, which at first were
* The Tellarites are the same way. They are often abrasive and insulting. Courtesy is viewed as dishonest and an attempt to conceal something. But if you start insulting them back, they will immediately like you and even offer you a drink.
* The Tellarites, one of the founding members of the Federation. They had a fierce

rivalry with the
* The Telling. Although the book doesn't take place on Earth, the main character is a Terran, and through her we learn that in her time, Earth was both an ecological and social mess.
* The Tell-Tale Heart. Animation is kept to a bare minimum (a flitting moth, some creeping shadows), letting the moody backgrounds, camera effects and narration do most of the heavy lifting.
* The Tell-Tale Heart hides the body of his victim under the floorboards.
* The Telmex long distance ads, featuring a man saying "CALL HIM!" ("¡HABLELE!") in a ludicrously overblown Monterrey accent (which, for the record, is equivalent to Texan/Deep South).
* The Telnarian Histories series). They're along the lines of "He had a dog. Well, not a dog as you know it, but it's the closest equivalent in your ecosystem, so we'll call it a dog. It had the usual seven flippers, but only three of them were orange..." (Note: We made up the flipper part. The descriptions in the books are much more serious.)
* The Telnarian Histories. The setting of the novels is a galactic realm closely parallel to the later history of the Roman Empire and its wars with Germanic barbarians. The ruling family of the empire is human, but extraterrestrials exist, while individuals pursue destinies of freedom and slavery. As such, gladiator revolts play a significant role.
* The Telos Novella "Time and Relative" has a pre-series First Doctor making racist comments to Susan about "singlehearts", meaning humans.
* The Temiskaming & Northern Ontario Railway (TNOR) was renamed the Ontario Northland Railway due to its reporting name being confused with the Texas & New Orleans Railroad, a Southern Pacific subsidiary.
* the Temmie faction and Flowey, with the Temmies viewing Flowey as a rival and Flowey implied to have done not-so-nice things in the past.
* The Temperance Social Link involves you befriending a recently married young woman named Eri and helping her overcome her difficulties in bonding with her stepson, Yuuta. Late in the link, Eri complains about how Yuuta's reputation as a bad student and troublemaker causes problems for her. No matter what choice you choose, Eri gets more upset and bursts into tears, at which point Yuuta runs up, says "D-Don't bully Mom!" and punches your character hard enough to knock him to the ground. That act helps Eri realize that Yuuta's actually a good kid who cares about her, enabling them to finally start bonding.
* The Tempest (2010) to kill her husband despite "knowing that others of my sex have burned for far less".
* The Tempest and Prospero can sometimes become a woman named Prospera as well; this last one has the greatest impact as Prospero and his daughter Miranda are two of the main characters and the relationship between them changes when it's a mother and daughter rather than a father and daughter. Other roles that have gotten get this treatment include Antonio (thus becoming Antonia), Adrian, Sebastian, and Francisco.
* The Tempest asks the audience for applause and cheers to provide the wind that will blow his ship home.
* The Tempest at least, and he never demonstrates any kind of supernatural abilities (although his mother, who died before the start of the play, is described as a powerful witch).
* The Tempest has a line that is frequently misquoted as "the stuff that dreams are made of." He is actually talking about the transience of human life, and the line goes: "We are such stuff / As dreams are made on, and our little life / Is rounded with a sleep."
* The Tempest is only mentioned in the stage directions. Keep in mind that, in Shakespeare's original staging, Ariel would likely have been played by a boy either way...
* The Tempest is said to take place over the course of approximately 3 hours, which is barely longer than its running time.
* The Tempest. Not content with taking control of Ferdinand's body and forcing him

to do manual labour before he's allowed to woo Miranda, once they are engaged Prospero gives Ferdinand a very hefty lecture about how he's not allowed to sleep with her before marriage. Which he also mentions on a couple of other occasions. And summons a whole load of spirits to act, sing and dance a big masque, the message of which is also that Ferdinand isn't allowed to sleep with Miranda before marriage.
* The Tempest. Of course, this is mostly to do with the fact that she was raised on a desert island and was apparently unaware of the existence of humans other than her father until well into her teens. When Ferdinand turns up, she immediately falls in love with him.
* The Tempest, Prospero could be considered one in his fierce protectiveness of Miranda.
* The Tempest, the story of Caliban becoming a servant of two sailors mirrors the relationship between Prospero and Ariel.
* The Tempest to end his exile from Milan. 'Heroic' because all he wants is to get his home back and teach his evil brother a lesson. No one gets hurt, not even the evil brother, and almost all of them go back to Milan as more or less friends.
* The Temp is played by an American (and Dagless mistakes him for one), but a poorly written speech given as he was dying reveals the Temp to be from Bermuda.
* The Templar Order exists to carry out the Chantry's (church's) will using military might. They're trained to be skilled at fighting mages, in order to ensure that all mages in the chantry's territory (they intend to become the main religion of the world) are aligned with the chantry. By
* The Templars, and include a cadre of famous historical figures to claim membership amongst their ranks.
* The template can also be adapted to produce "lavaborn" creatures. Guess where they swim around.
* "The Temple" has the last surviving crew member of a German U-Boat,
* The Temple", is supposed to be the log of a German submarine commander found in a bottle washed up on the Yucatan peninsula.
* The Temple of Artemis at Ephesus was destroyed twice. First, it was burned to the ground by some idiot named Herostratus in 356 BC. The guy's self-proclaimed only goal was
* The Temple of Atal'Hakkar (aka Sunken Temple) has the first bonus boss in the game: The Avatar of Hakkar. You need to complete a quest chain to access him, too, and he's actually harder than the dungeon's final boss, Eranikus the Dreamer.
* The Temple of Doom and just being generally mean-spirited, squicky and not in style with the other films.
* The Temple of Doom Wu Han tries to assist Indiana during a standoff, but one of Lao Che's goons shoots him when champagne bottles are being popped open.
* The Temple of Kukulcan pyramids are like this, beacuse why demolish or repair such a structure when it'd be much easier to simply build a new pyramid on top of the old one?
* The Temple", the last two survivors of a German U-Boat crew find a sunken city they believe to be Atlantis. The story ends with the Captain (now the only one left) donning a suit and entering the titular ruins, not expecting to return.
* The Temple, where the narrator is trying to tell his story while constantly pointing out that much of what he is writing is probably just delusions brought on by madness.
* The Temptation of Christ doesn't actually contain the temptations of Christ, which are relegated to three different spots in the background. Instead, the foreground contains a leper healed by Jesus talking to a Jewish priest, perhaps to represent the continuity between Mosaic Law and Jesus's teachings.
* The Temptation of St. Anthony, St. Anthony's horror in this vision being him attempting forgo the sins of the flesh in-favor of his piety.
* The Temptations deconstructed the previously romantic view of being a runaway in "Runaway Child, Running Wild".
* The Temptations - "Don't Send Me Away" and "(I Know) I'm Losing You".
* The Temptations of Christ is a stand-in for Christ. His interaction with a Moses-

looking Jewish priest emphasizes one of the larger themes of the Sistine Chapel's artwork, that the Old Testament and New Testament are continuous with each other.
* The Temptations of Christ, subtly demonstrating Satan's role as a deceiver.
* The Temptations' "Papa Was a Rolling Stone". The group's singer Dennis Edwards even got angry at songwriter Norman Whitfield because the song opens "It was the 3rd of September [...] The day my daddy died" (Edwards' father had died on that date), thinking that Whitfield was getting too personal. Edwards, like most people, was at the time unaware that the song was not written with him in mind and was in fact first recorded by lesser-known Motown artists The Undisputed Truth.
* The Tenant has the camera descending into the hero's mouth as he screams in his hospital bed.
* The Tenant (in both the Roland Topor novel and the Roman Polanski film) is mercilessly tormented by his neighbors to comedic effect.
* The Tenant of Wildfell Hall, as Lord Lowborough discovers too late. Gilbert warns Frederick Lawrence that Jane Wilson is not to be trusted before he can choose a similar fate.
* The Tenant of Wildfell Hall. He asked, she said maybe, and her mother just ran with it.
* The Tenant of Wildfell Hall: Helen and Huntingdon's marriage. Huntingdon associates love with complete submission and compliance, Helen associates love with trying to improve her husband's faults. At first this only causes a few spats, but later Huntingdon starts going out of the way to be horrible just to spite Helen and Helen stops giving him any affection and encouragement at all. It's more Huntingdon's fault than Helen's, but after a few years their marriage crumbles completely.
* The Tenant of Wildfell Hall, Helen enters into her marriage with Arthur looking forward to changing and redeeming him, only to find that it's not that easy. She ends up thoroughly miserable, and in fact leaves him (an unspeakable move at the time) to rescue their son from his influence. This is also played straight in the same book: her friend is miserable in her marriage, but her husband is willing to change, and with a few points from both his wife and Helen, he shapes up into a very considerate partner.
* The Tenant of Wildfell Hall. Helen muses at one point that her husband might be a better man if he didn't have so much free time.
* The Tenant of Wildfell Hall. Helen thought Huntingdon was a better man than he was and that she could change him. Huntingdon thought Helen would be more submissive and docile.
* The Tenant of Wildfell Hall: Millicent Hattersley, best friend of the heroine.
* The Tenant of Wildfell Hall. Mr. Boarham is a particularly interesting case as he would probably have been a better husband for Helen than Huntingdon, but he's still entirely unappealing.
* The Tenant of Wildfell Hall, she hears two of his friends complaining how "that woman" is civilizing and moralizing him — and she gets an unexpectedly affectionate welcome when she surprises him outside. Then she learns that he thought she was someone else, and "that woman" is the Other Woman.
* The Tenant of Wildfell Hall. She writes to Helen that she only said "maybe," but her mother has already started the wedding planning and it's too late now...
* The Tenant of Wildfell Hall, the good ones are happily married with large families and the bad ones are either dead or miserably alone.
* The Tenant of Wildfell Hall, who brags to his wife about his sexual conquests.
* The tenants, particularly Yuki, frequently dress up as women for various convoluted reasons in
* The Tenant, the protagonist (played by Polanski) learns that the previous tenant of his apartment had committed suicide by throwing herself from the apartment window; he becomes convinced that his neighbors are trying to force him to re-enact her suicide. By the end of the film, it is unclear how much of what we have seen has been the product of his descent into madness.
* The Ten, a room full of presumably squatting junkies are laying around, with a strange xylophone piece as the score. As the camera pans back a bit further, it

turns out one of the junkies is playing a xylophone.
* "The Ten Claws": The brothers wound the mysterious creature that killed the town drunk and barely escape with their lives. However, neither of them know that the creature is the grandmother who stays in their house, and it's uncertain whether she'll decide to attack again.
* The Ten Commandments (1956). The tenth plague that kills all the firstborn in Egypt is depicted as this.
* The Ten Commandments, as the one surviving male baby Moses is secretly adopted by the pharaoh's own daughter Bithia to actually grow up to make the prophecy come true.
* The Ten Commandments but one of particular note is film bad guy Ian Keith who appears at the very beginning as Pharoah Rameses I, whose decree to kill all Hebrew male babies in order to prevent the one from growing up to deliver his people from bondage starts off the film.
* The Ten Commandments, but the huge buildup in the first two hours of the film was abruptly derailed when Moses is exiled halfway through the film and gets foisted off on a princess from the desert. The emotional tension when he eventually returns to find Nefretiri married to his adopted brother is minimal. Nefretiri serves very little purpose in the overall film, and her one or two important actions could easily have been accomplished without the romantic tension, fluff, angst, and generally useless buildup that added an hour of length onto the already-four-hour-long film.
* The Ten Commandments depicted the angel of death as a sinister green mist that descends from the sky and then spreads over Egypt.
* The Ten Commandments. First Seti chooses Moses as his heir and states his name will be on all buildings in the empire while Ramses' will be nowhere. When Moses is revealed as Hebrew, Seti reverses the situation and orders Moses' name wiped from everything and makes it illegal to speak his name.
* The Ten Commandments has a scene where Ramses tries to explain away the Plagues as natural phenomena. To paraphrase, he tells Moses that red mud seeped into the Nile River, causing the frogs to leave and the cattle drinking from it to sicken and die, whose carcasses rotted, attracting rats and bugs that spread disease. Then there's the matter of burning hail from the sky...
* The Ten Commandments: has Jannes the High Priest of Egypt, as played by Douglas Dumbrill, for although he is loyal to the pharaohs he serves, he clearly has his own agenda, and it is his advice at the beginning of killing the Hebrew male babies that endangers the hero Moses.
* The Ten Commandments has, quite literally, an epic (indeed, Biblically Epic!) ham fight between Yul "As it is written so let it be done!" Brenner and Charlton "Let my people go!" Heston. The high water mark of classic Hollywood hamminess? And then Anne Baxter enters the fray and nearly outdoes both of them.
* The Ten Commandments, he dropped the modern story entirely and made the whole movie about Moses.
* The Ten Commandments, it is Rameses II's first-born son Prince Amun who clearly is not only rude and spoiled, he has the nerve to kick Moses' staff that he used to demonstrate God's power by turning into a cobra, thereby insulting both Moses and God. This is clearly so we don't mind too much what happens later to the princely brat when the Death Angel comes calling...
* The Ten Commandments moment of realization before he's strangled to death.
* The Ten Commandments: Played with. The prediction at the beginning by the High Priest of Egypt is taken seriously enough by his Pharoah to call forth a decree to kill all Hebrew male babies to prevent one from growing up to lead his people to freedom. It doesn't work however...
* The Ten Commandments, presumably so we don't feel too bad when the little brat dies.
* The Ten Commandments skips the whole "wandering in the desert for 40 years" part, which admittedly wouldn't make for exciting filmmaking, opting to make Moses 40 years older when he returns from the mountain.
* The Ten Commandments that it created a sense of continuity unintended by the

producers.
* The Ten Commandments. The Egyptian Air Force also helped to create sand storms for the film with their fighter jet engines.
* The Ten Commandments, the Israelites spend forty years wandering through the wilderness before they reach the Promised Land. The film cuts all that out to avoid having to age up the actors (and cast all the new characters born in that period).
* The Ten Commandments themselves. Aside from slight differences in dividing up the commandments between the original Hebrew and subsequent Christian versions, there are a few cases where people have deliberately tried to mistranslate or misread earlier versions, such as with the Commandment "
* The Ten Commandments, the sound version. Baka intends to kill Joshua this way after Joshua attacks him to free his girlfriend, but Moses intervenes and kills Baka before he can finish.
* The Ten Commandments, though we are not told specifically, during the interlude between Moses being quietly adopted by Bithia, the daughter of then ruler Rameses I, it is implied that her father must have died during that period, because thirty-something years later we see that his son Sethi is now Pharaoh. And when Rameses I is referred to, it is generally in the past tense.
* The Ten Commandments, to save Joshua, the result of which is her marrying Dathan.
* The Tendō Sisters are a fairly gentle example of the "constant teasing" variant, with Nabiki as the prime instigator.
* The tendency for people in Slender Man stories to film everything is called out by another character when it's pointed out in-universe that the protagonist has no plan beyond "film everything and see what happens." Not only does this not really give them any answers, it ruins the lives of everyone around him over his insistence on doing it. Given what happens to the characters throughout the story,
* The tendency for this kind of behavior in radio soap operas was famously skewered by
* The tendency in Hispanic countries to uses names with a 'Y' somewhere, usually substituting 'J' if at the beginning of the name, and 'I' or the 'LL' sound if in the middle or at the end. The fad was so bad in Caribbean countries in general that Cuban dissident blogger Yoani Sanchez named her blog "Generación Y (Generation Y)", not only as a pun on "Generation X", but to point out the whole generation of people born from
* The tendency of anime characters to befriend their enemies is parodied by
* The tendency of having fantasy races look like different types of white people is a descendant of this trope.
* The tendency of influential and brilliant mathematicians to die young is discussed in G. H. Hardy's essay,
* The tendency of SF authors to prophesy future inventions is one of
* The tendency of the fandom to refer to the Power Coins by their totem animal rather than their color has absolutely no basis in the series itself, and its earliest known use was in the fanfics of
* The tendency reaches its apex in the infamous "What If Frank Castle's family was never killed?", in which Frank Castle's family surviving and him never becoming the Punisher results in... Frank Castle's family being killed and him becoming the Punisher.
* The tendency to present cases out of chronological order comes to a head in
* The Tender Tale of Cinderella Penguin is an animated short that tells a pretty standard story of Cinderella—except all the characters are penguins. It's very silly.
* The Tendo family, Ryoga, Shampoo and her grandmother, Mousse, Ukyo, Konatsu, and Nodoka in
* The Tendo Sisters. Akane devolves into a paranoid, smash- (or rather,
* the Tenebrae is always fairly thin, but in some places they overlap; at Os Reges Point, the worlds almost coexist, and Seraphim Row is in constant danger of falling into the Tenebrae.
* The Tenets of Futilism ends with a predator drone killing the protagonists months after they take over Alcatraz Island.

* The Tenets of Futilism has Sasha's father, Chris. While his effects upon his daughter's personality and beliefs are immense, he's dead before the opening of the novel and is described only through said daughter.
* The Tenets of Futilism Her dad loved her. Her mom didn't, and she returned the sentiment. That being said, she did listen well when her father told her he was far from perfect and shouldn't be idealized.
* The Tenets of Futilism picks up a rather unusual set of beliefs about halfway through the novel. She even starts a cult. Her partner, Joe, is heavily hinted to not share in her beliefs, and only pretends to out of love.
* The Tenets of Futilism Sasha and Joe seem perfectly able to have conversations in noisy, crowded areas without speaking loudly or whispering into each other's ears.
* The Tenets of Futilism, Sasha never quite recovers from having her arms and stomach cut up by cultists. Even after the wounds close and scar, she still occasionally feels pain in them.
* The Tenets of Futilism: The final chapter ends with the protagonist and her family dying after months of hiding out on Alcatraz Island. Their cause of death? Missile fire from a predator drone sent by the American government.
* The Ten'Gewek have the same problem but worse. Corti discussing their biology note that they
* The ''Ten Little..." book series by Mike Brownlow teaches small children to count using a child-friendly version of this trope. It starts with ten little characters (princesses, pirates, monkeys, robots, etc.) and they all go on an adventure and find themselves being trapped, left behind, or taken away somehow, one-by-one, counting down from 10. As expected, all characters come back in the end, however.
* The Tennant of Wildfell Hall is titled "The Double Life of Helen Graham".
* The Tennessee Boot match combines it with two out of three fall, though it can become two out of four falls. Each fall or submission forces the loser to remove a boot and the bootless wrestler loses.
* "The Tennessee Waltz" by Patti Page, from 1950. The song was issued that October, with
* the Tenno were the child survivors of an accident in the Void that left them with powers. The Orokin initially considered killing them but decided to turn them into child soldiers to fight the Sentients instead. Oh, and because that wasn't enough, the Orokin executed their surrogate mother as well. No wonder the Tenno decided to wipe them out.
* The ten Orders of the Knights Radiant gained their powers from bonding with
* The Ten-Percent Solution", the Museum of TV and Television has a display of the Three Stooges' skeletons, with Curly's bones in a box.
* The Ten Plagues of Egypt decides to have a go with this trope. After He turns the Nile river into blood, frogs and flies swarm in abundance, disease runs rampant, the weather takes a turn for the worst, livestock rapidly die off and grain stores become contaminated, and thousands drop dead more or less overnight.
* The Tenrou Island arc introduces Mest Gryder as Mystogan's apprentice, despite not appearing alongside him or even coming to Edolas. It is then revealed that he is Doranbolt,
* The Ten-Seconders: After Malloy is made into a God by the Fathers, he tries to repair the damage to Earth by bringing everyone who has already died back from the dead. It only revives their bodies, as the people become drooling vegetables without any autonomy.
* The Ten-Seconders: Kane tries this on Malloy when he's become a God himself. Malloy just shrugs that he shouldn't have bothered trying to take him out with something as pitiful as bullets.
* The Ten-Seconders's body, Harris tells him that they better fast-track their escape from the compound—he just noticed Arachne's body starting to remerge.
* The Ten-Seconders: Sort of. The "Fathers" of the superhero-esque Gods live in a spaceship big enough to easily engulf Planet Earth.
* The Ten-Seconders: The Disciples, humans whom the Gods have experimented on. While they have their own powers, they're nothing compared to the actual Gods.

* The Ten-Seconders to humanity are in fact only the rebellious children of a truly godlike race of aliens who created them for their own experiments. The comic eventually concludes that none of these entities are really gods, just more powerful/advanced ones.
* The Ten-Seconders: Watchtower kills two of his fellow gods by decapitating them. Harris even notes that it's starting to become a signature move for him.
* The Ten-Seconders who enjoys raping women and implies that he uses his power to make it as painful as possible.
* The tensions among the group members were not kept secret from the public as was heard on
* The tensor field is actually shown in action in the climatic battle in
* The Tentacle does the opposite. It lassos an enemy and drags the Beheaded into melee range.
* "The Tentacle King" — and this now appears to be entirely correct.
* The tentacles of octopuses function much like independent organisms, each having its own neural ganglia that operate almost as separate brains. When foraging, each arm probes the seabed for food independently of the other seven, to such a degree that they can even exhibit distinct
* The Ten Tailed Beast is stated to be a mindless entity of destruction in
* The Ten-Tails has the ability to assimilate every living thing to it once the Infinite Tsukuyomi is cast. Humans caught in it are very slowly drained of their selves until they become Kaguya's White Zetsu soldiers.
* The Ten-Tails, in frustration and having gathered more chakra, prepares a Tailed Beast Bomb similar to the aforementioned bombs, but as large as itself. Its explosion engulfs an entire sea.
* the Tenth Doctor" after a traumatizing encounter with a voice-stealer.
* The Tenth Doctor and Rose. She manages to spit it out, but he gets interrupted. Ouch.
* The Tenth Doctor became the Eleventh the same way the Third had become the Fourth, by absorbing a critical amount of radiation.
* The Tenth Doctor constantly ruins his own life due to the size of his Nightmare Fetish.
* The Tenth Doctor gets in at least one of these per season. Often combined with a
* The Tenth Doctor has one with his archnemesis, the Master, in "The End Of Time". Then the Master goes back to trying to kill him. It's very deliberately done to show that they
* The Tenth Doctor is also like this. He's handsome and charming, with many eccentric quirks and a fun, bouncy personality. Underneath that, though, Ten is
* The Tenth Doctor is confident and cavalier on the outside, but he suffers from survivor's guilt and verges on self-loathing on the inside.
* The Tenth Doctor makes a point of offering most of his enemies a peaceful resolution if possible. Woe betide them if they refuse... "No second chances. I'm that sort of a man." In his tenure as the Doctor, exactly one villain ever took him up on this. Still, he's often inconsistent and generally never stops trying to get the enemy to come over to the light.
* The Tenth Doctor manages to shut down the entire clockwork army in
* The Tenth Doctor more or less says in "The Satan Pit" that he doesn't believe in God or any sort of higher power, or at least he's never run across anything to convince him that such a power exists. Given that he's run into various super-powerful "god"-like beings, such as Sutekh, Fenric, and the White and Black Guardians, that's quite a statement.
* The Tenth Doctor plays it straight against the Yana Master, mostly due to their extreme age gap, but once the Yana Master regenerates into the much younger Saxon Master, they are more or less completely even in both charm and looks in general.
* The Tenth Doctor runs all the way across the Library and down to the core of the world to save River Song.
* The Tenth Doctor says "That's impossible" far too many times for someone who's seen what he has.
* The Tenth Doctor's fondness for Converse All-Stars helped contribute to their

surge in popularity around that time.
* The Tenth Doctor's reaction to having his hand cut off is a mildly annoyed "You cut off my hand!" Of course, he immediately proceeds to grow himself a new one, which probably accounts for his lack of concern (though you'd think it would still hurt).
* The Tenth Doctor's season finales always end with a really sad and heartfelt scene as he bids his companions farewell, only for a comical
* The Tenth Doctor staggers down the hall with an unconscious Martha in
* The Tenth Doctor's throwaway line about marrying Queen Elizabeth is explained in
* The Tenth Doctor tends to go glassy-eyed for a few seconds when he's unexpectedly kissed — see
* the Tenth Doctor. Ten's reaction shows that he's fully aware it's this trope. Wilf offers to stay in the chamber instead, since he's an elderly man who doesn't have much life left anyway, but of course the Doctor would never kill an innocent man to save himself.
* The Tenth Kingdom, the heroes have the evil Huntsman at their mercy and Wolf is preparing to kill him when Virginia stops him. Wolf correctly points out that this will only leave him to follow them and that she would regret the decision. This leads to pretty much every reversal the heroes face for the rest of the story.
* The Tenth Line: The Princess was almost one of these before she escaped:
* The Ten Thousand by Harold Coyle features a fully-integrated 21st century US Army conducting an evacuation through a hostile Germany. In addition to a female President, one of the combat viewpoint characters is a woman commanding a company.
* The Ten Thousand by Harry Coyle has US forces evacuating through a hostile Germany.
* The Ten Thousand involving a US armored corps that suddenly finds itself deep in enemy territory when a resurgent Germany turns hostile.
* "The Tenth Planet", and returns with a more mercurial but also quirkier personality and much, much better social skills. The "change" process is apparently very traumatic (production documents reveal he was reliving all of his traumatic memories during the process) and it takes him quite a while to come to terms with who he now is.
* The Tenth Planet has a starship captain wake up after 5,000 years to find himself on the last spit of human civilization: a colony on the eponymous planet, called Minerva, where nearly every aspect of living is strictly controlled by the government.
* "The Tenth Planet" has a whole episode where the Doctor is unconscious due to Hartnell being ill. This has the lucky effect of foreshadowing his regeneration at the end of the story.
* The Tenth Planet" sees the Sixth Doctor heading off the titular attack before it affects the Mondas attack...
* The Tenth Planet, set 5,000 years in the future, one character recites "The legend of the Jesus Freak", a garbled and mish-mashed version of Christian beliefs, which includes, among other things, "the Jesus Freak" (which is a reclaimed perjorative for an annoyingly devout christian) resurrecting by giving himself a brain transplant.
* The Tenth Planet that had replaced most of their human bodies with machinery - the Cybermen.
* "The Tenth Planet", (which introduces the Cybermen), the main villain is an American general who is a perfect Ripper type. He wants to destroy the Cybermen's planet with a planet-busting "Z-Bomb" to avenge his own son and is ready to disobey orders to do it (the Doctor realizes that doing nothing is the better course of action; and most of the story is his companions trying to stop the out-of-control general).
* "The Tenth Planet" with no emotion who can't even be fought back against and the only hope is to survive until they all die. Very, very suspenseful.
* The Tenth Planet", with surgical-like cloth masks, black voids for eyes, and jaws that, when they talk, just lock open without moving for the duration of their speech.

* The Tenth Planet" would poke fun at this in one scene.) Though Polly serving coffee is little more than a front; she's actually trying to get Dr Barclay on their side so it's more of "not trying to arouse suspicion".
* The tenth season subplot where Sam and Rebecca attempt to conceive a baby together was intended to work
* the tenth season) the Simpsons would only hire him whenever they needed a lawyer, even when they clearly knew the law better than he did. It might just be because he's extremely cheap.
* The tenth through fourteenth men were all examples of sentience briefly re-emerging from the ecosystem of animals that evolved from the ninth men on Neptune. The fifteenth men manage to restore civilization to humanity though.
* The Tenth Victim) and its sequels feature a world where this has been legalized, as long as the participants agree to take turns being hunter and victim.
* The Tent Lovers, Anne Jones and James McCardell, whose tent is ripped away from them by Max driving by, revealing them fully naked and going at it in
* the tent peg, full sources for which are scarce on the web a decade and a half later, but the full thing was circulated around the same time as the original Renewable Airforce memo.
* The tenure of University of Virginia president Teresa Sullivan has been mired in tragedy. She came into office as the university was reeling from the murder of a lacrosse player. Shortly afterwards, she was the target of a coup attempt. The 2014-15 school year saw it get worse, with another young woman being killed by a man tied to another murder at Virginia Tech, a now-debunked article from
* The Tenure Turbulence", where he whines about his parents not getting him seat-warmers with the BMW they bought him for his birthday.
* The Tenzings . A number of whom became great climbers including Tenzing Norgay.
* The Tercentenary Incident by weighing the effects of murdering one man against the deaths of billions by inaction.
* The Tercentenary Incident the President who had been killed, and the one in hiding had been the robot.
* The Tercias Title belt feud between Los Rabiosos and Legio in The World Wrestling League started as merely
* The terentatek that attacks Jaune in "Fear" has claws which can rip apart an armored human as if they were made of tissue paper. A single slash is all it took to destroy Jaune's
* The te reo Māori dub adds Māori voice actors Jaedyn Randell (Moana), Piripi Taylor (Maui), and Amanda Ashton (Sina) to the original Māori cast members.
* The Teresa Knight Trilogy Andre, whom Teresa explicitly identifies as the "feminine" partner in the relationship.
* The Teresa Knight Trilogy (bi female main character, bi female supporting character, lesbian supporting character, queer female romance, gay supporting characters, queer male romance)
* The Teresa Knight Trilogy: Hooking up with Ayako makes Teresa realize that she's bisexual. Although she had sexual fantasies of women before, it just didn't sink in. She put that down to pent up sexual energy rather than specific attraction.
* The Teresa Knight Trilogy: Minor characters are often also described nude and or having sex, not just the protagonist.
* The Teresa Knight Trilogy: No one realizes that Carl was gay (or at least bi) until it came out after his death, given his style was just like his straight counterparts.
* The Teresa Knight Trilogy: Teresa has lots of relationships like this, and often sees friends/acquaintances of hers who are also her casual sex partners.
* The Teresa Knight Trilogy: Teresa has tons of sexual encounters in each book. The very first one even segues to her having sex almost immediately.
* The Teresa Knight Trilogy Teresa looking into blackmail and an ordinary murder leads her to discovering an international conspiracy by corporations smuggling coltan mined inside the Democratic Republic of Cargo by forced child labor that's connected with brutal rebels who have committed countless atrocities.

* The Teresa Knight Trilogy: The first book involves a blackmailer inside exclusive sex gambling clubs in Britain whom Teresa is hired to track down.
* The term "Bangsian fantasy" comes from the works of early 20th-century author John Kendrick Bangs, whose
* The term "battle royal" refers to a fight in which three or more combatants fight until only one is left standing.
* The term "Bazooka" for rocket launchers began as a reference to their visual similarity to the instrument of the same name. Now, the name has become far better known for the weapon, with the instrument itself largely unknown.
* The term "Caste" is typically used to describe where an Exalted's talents lie, rather than their prescribed role; there's nothing stopping, say, a martially-minded Dawn Caste from picking up Sorcery. The one person who takes it most seriously is the Deathlord Walker in Darkness, who expects his Abyssal Deathknights to fulfill every aspect of their assigned Castes. This is something of a problem, as he'll except a Daybreak Caste who's skilled in necromancy and necromancy alone to also be a loremaster, assign control of his armies to a warrior Dusk Caste despite the fact that he's insane, or expect a Moonshadow Caste who was a gladiator in life to serve as the best ambassador to the dead.
* The term "chairman" comes from a time when all the members of a committee, save for the most important one, had to sit on benches. The most important one got a chair, which, when everyone else is sitting on benches, seems pretty cool all by itself.
* The term "cooties" originated from the first World War when the soldiers had to spend hours upon hours in trenches infested with body lice, rats, and other gross things. They called the body lice "cooties".
* The term "doujinshi" is applied to fan-made works of all kinds, including hentai doujinshi (or H-doujinshi for short). However, a great portion of non-Japanese readers are under the impression that
* The term "FNG" is used in real militaries, in either a weird kind of
* The term for this in political science is Multi-Polar System, although that does not quite mean that nations are superpowers
* The term 'fragging' refers to dispatching an unpopular military officer with a fragmentation grenade. The reasoning was that bullets could be traced to individual rifles, but grenades could not, and would destroy other physical evidence. Apparently the process was that a verbal, informal mention of difficulties with an officer would be made. The next step was to place a grenade pin on the officer's pillow or another conspicuous place for him to find. If the message still wasn't coming across, a real grenade WITHOUT a pin would be placed in the general vicinity of the officer. In addition, apparently, the standing orders for a squad in Vietnam if their officer was killed was to return to base. Soldiers on a suicidal or otherwise dangerous mission sometimes were able to figure out the math on that one. They would skip the buildup with particularly incompetent, glory-crazed, or just plain abusive officers; if you were a big enough dick to your men or senselessly jeopardized their lives enough, odds are that a live grenade would just suddenly materialize in your tent and explode out of the blue, and no one would have any insight into how it happened.
* The term has also been used positively, along with spawning several slam parody bands with an exaggerated "wigger" aesthetic, including New Yorkment, FrogKill, Publikk Enema and
* The term "humanoid" refers to anything relatively human-shaped (bipedal, upright, two arms, one head), including
* The term "idiolect" merely refers to the manner of speaking that is unique to an individual.
* The Terminal comes from the fictional East European country of Krakozhia. Though the Krakozhian language is actually Bulgarian.
* The Terminal Experiment as they escape onto the internet and one starts killing people.
* The Terminal Frank Dixon, the Field Commissioner at the airport, seems bent on setting him up to fail, so he can deport him for entering the country as an illegal

immigrant. Viktor is adamant to stay and follow the law, and the trope is averted when the people working at the airport start to warm up to Viktor.
* The Terminal Guardian, a recurring enemy that you encounter guarding each one of Tokyo's Terminals, as well as the Terminals in the final dungeons. His disguise depends on where you fight him, and the demon(s) he summons depends on how many times you've encountered him so far. His dialogue will always match his current disguise-demon combination, even unlikely combinations, such as encountering him for the first time in his "Intuitive Man" disguise (which he wears in the final dungeons). What's more, every single one of his lines is
* The Terminal is based on the urban legend of a foreign national who's forced to live in an airport due to a bureaucratic screw-up. Notably, this is one of a few urban legends that's true.
* The Terminal Man, Harry Benson receives a brain implant to control his psychomotor epilepsy, which caused him to severely beat two people during seizures. The implant induces euphoric feelings by running a current across a grid of electrodes on his brainstem. His doctors then realize that Benson might be psychotic. Before too long his subconscious mind learns he can induce seizures by assaulting people, triggering the "pleasure" shock originally meant to halt the seizures. Things go downhill from there.
* The terminals are frontends to an archive meant as another case of this, preserving as much of human culture as its creators could get hold of, in the hope that some future intelligence would find it.
* The Terminal there was a whole row of tourists wearing Disneyland t-shirts, Frank Dixon finds this suspicious and has security to look at them, the next scene shows the security guards chasing down the tourists.
* The Terminal, though quite a few reviewers later admitted that if she's like that, he's better off without her.
* The terminal velocity is actually dependent of not only the gravitational acceleration, but also drag. Mathematically the terminal velocity is expressed as v = sqrt(2mg/ρAC) where m = mass, g = gravitational acceleration, ρ = air density, A = area of the free falling body and C = drag coefficient. The terminal velocity of a human being on free fall in stable spread eagle position is 54 m/s (180 ft/s). A skydiver will attain that in twelve seconds.
* The Terminal: Viktor Navorski's passport is no longer valid because, while he was on a plane, a revolution occurred in Krakozhia, his fatherland. That means he's trapped in the airport because he can't enter the US without a valid passport, but he also can't be deported, because the nation he was a citizen of no longer exists.
* The Terminator, a frightful metallic-sounding droning theme plays as the Terminator prepares to shoot Sarah Connor in the night club.
* The Terminator after seeing a burning metal skeleton in a nightmare. He couldn't get the necessary budget, so he decided to move the action into the present (saving lots of money on the sets) and clothe the robot in human skin (saving lots of money on animatronics). The rest is Future History.
* The Terminator after seeing what T-800 has done to Sarah's roommate Ginger and her boyfriend Matt.
* The Terminator and isn't the only survivor. The first film also evokes the trope in other ways - she has a best friend who's killed while having sex with her boyfriend.
* The Terminator and Sarah Connor ends with Sarah, who has been stabbed through the leg by shrapnel, crawling painstakingly slowly through a delivery shaft, "chased" by the barely functioning remnants of the Terminator after a bomb has exploded whilst attached to it.
* The Terminator and the human soldier who's been sent to protect the robot's target.
* The Terminator - apparently due to the artist not quite timing the loop properly, but having the effect of giving the song a strange, inhuman lurch that fits the theme perfectly.
* The Terminator aren't so improbable with a literal grip of steel and a CPU brain.
* The Terminator as well as a tragic Love Story with a hint of War film.

* The Terminator before becoming his biological father by time traveling and impregnating John's mother.
* The Terminator Decoupling enabling him. This is possibly a reason he's so reluctant to spend time with them, even moreso than the other characters and their respective relatives.
* The Terminator didn't have the inscription, but Sarah glances at her driver's side mirror just as the T-800 fires at her reflection, shattering it.
* The Terminator episodes Ellison wrote, and following a lawsuit, this disclaimer was created.
* The Terminator explosion but a progressive series of them from back to front. You still have to assume that for some odd reason the truck would do that in the first place but no laws of physics appear to be violated. It could be that fuel truck's tank usually comprises of many smaller compartments (to counter the effects of inertia during acceleration and braking) hence could explain the progressive explosions. Almost all fuel trucks do indeed have several compartments in the fuel tanks for safety.
* The Terminator gave us a glimpse of the future where humanity is being hunted down by SkyNet.
* The Terminator goes hunting for Sarah Connor through the precinct station when he notices the electrical closet. The Terminator switches off the power, plunging the building into darkness, a tactic to make it harder for Sarah to escape, and easier for the Terminator to massacre the police opposition.
* The Terminator had Kyle Reese's robot-run concentration camp barcode which had been burnt into his arm via laser. From his description of the place, fading with age was pretty much a non-issue.
* The Terminator had Sarah Connor falling in love with her rescuer from the future.
* The Terminator] Ha-ha, fooled you, you're talking to a machine!" The last time we hear this message, Sarah Connor really is talking to a machine as the Terminator has just killed her roommate who made the message.
* The Terminator has Sarah and Kyle Reese making love to a piano version of the theme.
* The Terminator has three Brazilian Portuguese dubs: Croma (over-the-air TV), Dublavideo (for Flashstar's DVD release), and Alamo (for MGM's DVD release, plus most later broadcasts and streaming).
* The Terminator, he naturally didn't let this stop him chasing Sarah Connor.
* The Terminator, in all of the movies, takes plenty of face damage to show off the cybernetics underneath.
* The Terminator injure himself quite badly, but the drugs prevented him from feeling any pain from it. Naturally the real reason is that the Terminator possesses a steel skeleton that is much stronger than any glass.
* The Terminator in order to blend in with the rest of society, but changed his mind when he met Arnold and felt that he was in the presence of "a living machine".
* The Terminator is a tiny example of this. "Hi! (beat) Ha, ha, fooled you, you're talking to a machine."
* The Terminator is averted, it's meant to show the moment of climax when their entwined fingers relax, given that Sarah Connor being impregnated is a crucial plot point.
* The Terminator is coming from a dead animal's corpse. The robot responds rudely and resumes its chase against Sarah and Kyle.
* The Terminator is on fire when he punches through the windshield of the heroes' getaway car. Granted, he isn't human, but a literal killing machine, but it's still made of plenty of win.
* The Terminator, John Connor would not have been conceived if the T-800 hadn't traveled back in time and attempted to kill Sarah Connor, while Skynet wouldn't have been created if T-800 hadn't traveled back in time and attempted to kill Sarah Connor. Thus, Skynet created both itself and its greatest enemy.
* The Terminator kills two other women named Sarah Connor before targeting the future mother of John Connor. He had no idea what Sarah Connor looks like or exactly which one he's after, but does know what town Sarah will be living in, so

he just goes through the phone book and ices each one on the list. The police quickly figure out his pattern because of this.
* The Terminator: Kyle Reese crouches down and fires his shotgun at the gas tank underneath a car in a vain effort to slow down the T-800.
* The Terminator, Kyle Reese gently strokes Sarah Connor's hair and watches her while she's sleeping in his arms.
* The Terminator, Kyle Reese kidnaps Sarah Connor to save her from the eponymous killing machine.
* The Terminator: Lt. Traxler gives one to Det. Vukovich when he starts telling an unnecessary story to Sarah in the Police Station while they are explaining how the Terminator could have done the things she said it did.
* The Terminator, only for them to all die in the massive shoot-out halfway through the movie.
* The Terminator, Reese shoots the T-800 several times with a sawed-off shotgun when it tries to move in on Sarah in TechNoir. Shortly after it hits the floor, its fingers twitch, offering the audience their first clue that the big scary guy isn't human.
* The Terminator, Sarah Connor is pregnant with her son; preventing or ensuring this was the whole point of the plot.
* The Terminator, Sarah Connor's best friend and roommate Ginger Ventura has sex with her boyfriend Matt Buchanan, then goes to the kitchen to eat something in the middle of the night. The T-800 Terminator breaks into the apartment at the same moment, and, with horror, she watches her boyfriend crash through the wall followed by the T-800, who shoots her dead thinking she's Sarah.
* The Terminator Sarah Connor's hair is immaculate at the end of the film, despite having been at ground zero for two explosions, being chased all night by a Terminator, and all the other damage she suffered.
* The Terminator, Sarah narrowly escapes being noticed by the Terminator when she knocks a water bottle off her table at the TechNoir night club.
* The Terminators: Army of Legend and the Terminator Militia. The Second Civil War spans two volumes, one of them surpassing quadruple digits in its page length. Even after the conclusion of the war, its effect still radiates even far in the future of the storyline.
* The Terminators Army Of Legend, a realm that lies between the two Capstone Universes, the home of the mystical Beams—and where the Alpha Breaker is currently wreaking havoc.
* The Terminators: Army of Legend as Alex responds to this trope directly.
* The Terminators: Army of Legend, a supercrossover military series, features the protagonists' capital of New Alexandria being subject to innumerable battles throughout the Second American Civil War. In at least two of these battles they managed to lose the city to enemy forces before abruptly taking it back.
* The Terminators: Army of Legend gives us Archdemon Deitus the Immortal, the fallen son of fallen Archangels Messorem and Vitam, the incarnations of Death and Life respectively. Although he doesn't make his grand appearance until well into the multi-volume series, he's hinted throughout as being in control of every other antagonist.
* The Terminators: Army of Legend, supersoldiers General "Necro", General Mason, and the "Shade King".
* The Terminators: Army of Legend to be an "idealized" version of the author, Sir Areis Lionheart.
* The Terminator's voice was dubbed by Ryuzaburo Otomo, while in the latter two he was replaced by Tessho Genda. All four dubs are included as part of Fox Japan's Blu-ray release.
* The Terminator than a typical blockbuster action flick the franchise would be known for.
* The Terminator, the damn thing keeps crawling after Sarah with murderous intent, and as it's being crushed in a hydraulic press, it claws at her with its metallic skeletal hand to the very last.
* The Terminator, the infiltrator terminator in Kyle's flashback of the future is

played by Franco Columbu, Schwarzenegger's bodybuilding partner and longtime friend.
* The Terminator theme were done by Brad Fiedel hitting the microphone with a frying pan.
* The Terminator. The movie ends with a pregnant Sarah debating whether to tell John that Kyle is his father; she knows the future is going to be rough for humanity but also that she can guarantee their victory over Skynet.
* The Terminator: The police officer takes a swig out of a coffee cup: "That coffee's two hours cold." He shrugs and takes another sip, then: "And I put a cigarette out in it." This followed by a flat stare and another shrug.
* The Terminator, there's a news broadcast about a killed Sarah Connor. When Sarah is fetched from the restaurant, the newscaster conveniently adds "To recap:" and then repeats the entire story.
* The Terminator: The T-800 is effectively immune to conventional gunfire, being able to walk through an entire army of police officers armed with automatic weapons. High impact weapons like shotguns can knock it off of its feet for a few seconds, and precise shots can hinder its more delicate mechanisms, such as when Kyle shoots it in the eye and the arm. In the former case, the flesh covering of its eye was damaged—which obscured its vision and compromised its human disguise, and in the latter case, the mechanisms that moved the fingers were misaligned, but were easy to reset back into place. A homemade pipe bomb placed in its torso was able to blow most of the machine to bits.
* The Terminator, the T-800 knows exactly how to find his target, disguise, weapons etc., while Reese seems to be simply lucky. However, at one point the Terminator asks for a "phased plasma rifle with a 40-watt range" at a gun store.
* The Terminator: The Terminator requests a handheld plasma weapon at a gun shop, which the salesman brushes off as a joke. He then proceeds to rob the gun store of a number of conventional modern weapons. Being from the future, he probably wasn't making it up. The energy weapons seen in the future segments may or may not be examples; it isn't specifically stated.
* The Terminator, the Terminator starts his epic rampage through the police station by crashing a car through the front desk.
* The Terminator they do develop a relationship over the course of the film.
* The Terminator: This is how we get our first look at the T-800's real body. The endoskeleton emerges from the inferno after losing its flesh covering in the tanker explosion.
* The Terminator timeline, where she was raised by a T-800 from the age of 9, she doesn't sport her '80s waitress hair and instead has a 2010s ponytail.
* The Terminator to get justice for the officers who were killed on that night.
* The Terminator, "Total Challenge" - which kinda fits "recall", but not in the memory sense that it's used in the title).
* The Terminator until he breaks into a clothing store where he gets the rest of his clothes.
* The Terminator wanted to dub himself, but it was refused because his Austrian accent makes him sound like a hick in that country.
* The Terminator. When Kyle Reese manages to blow up the fuel truck that the eponymous cyborg is driving, the ensuing fireball burns away the Terminator's clothing and flesh, revealing the metal skeleton underneath. The metal is also shown to be a very strong futuristic alloy.
* The Terminator when Sarah Connor is trying to call the police from Tech Noir. When she finally gets through to Detective Traxler, she begs him not to put her on hold or transfer her to another department.
* The Terminator when the naked big guy wants clothes. They're lucky that the Terminator in question just let them live. Well, mostly.
* The Terminator. When the T-800 assaults the police station, Sarah Connor hides in a room under a desk. Then we see a shadow approaching the door, the camera closes up on the door handle getting turned. Then the window gets smashes in. But it's not the T-800 but Reese.
* The Terminator where Kyle Reese has his hands cuffed behind his back. When the

policeman guarding him is distracted by gunfire as the Terminator tears up the police station, Kyle knees him in the stomach, kicks away his gun, and takes the keys off his belt.
* The Terminator you can see a large chunk of the Terminator move slightly, then WHAM! right as it sits up and starts to chase her once again, barely moving using its only other arm.
* The terminology, unsurprisingly, is less confusing in Russian than English (seeing how that was the actual language of the USSR): a (People's) Commissariat was originally an organizational level of government, the same as "Ministry" which it replaced (due the popular connection with the ministries of the failed Russian Imperial government), or "Departments" in America. Since English-speakers can live with multiple meanings for both words ("Ministry" also means "Church" in many English-speaking locales), so too can Eurasians: a Military Commissariat was a Military
* The term is also used tongue-in-cheek to refer to "Revenue Protection Officers" on UK railways, the people who check tickets and issue fines for evasion. They are almost universally seen in pairs, wearing long black coats (more following the "bouncer" image than a Man in Black proper) and
* The term "iso" has been added to both tons and rems (a measure of radiation). Iso means "equal" or "homogenous", suggesting that it's either meaningless (e.g. 6,000 isorems means 6,000 rems), some weird "equivalent to that much as far as we're concerned" shorthand taking into account bizarre
* The term 'Jaychand' predates the above by about seven hundred years in northern and western Hindi speaking regions. Maharaja Jaychand notoriously refused to send help when the Rajput king Prithviraj Chauhan was attempting to repel an invasion by the Afghan Muslim warlord Muhammad Ghori. Jaychand’ s reason for betraying Prithviraj was due to the latter eloping with his daughter. This betrayal resulted In Prithviraj’s death and Ghori gaining a strong foothold for what would eventually become the Muslim conquest of Northern India, culminating in the establishment of the Delhi Sultanate.
* The term "Living Fossil" is used to describe species that are ancient lineages that haven't changed much over millions of years and have survived a few extinction events. Usually they also have no close living relatives.
* The term "MEQ" is a shorthand for "Marine Equivalent", which is usually used in Mathhammer (speculative calculations for listbuilding) to gauge whether or not a list is good enough. The non-marine equivallent is "GEQ" (which stands for Guard Equivalent) and is often considered to be secondary to MEQ-based calculations.
* The term MIRV stands for "Multiple Independently-targetable Reentry Vehicle" and is used to describe short-range to ICBM class nuclear-tipped missiles that contain a single first stage with multiple warheads that will detach after launch, shortly before impact. (Reportedly the Trident II is capable of carrying at least 12 warheads per missile.) The contrails in
* The term "New Media" itself was first used in the late 1990s by media companies to describe their then-new divisions producing or repackaging content for the Internet. It's been 15-20 years since then, during which time the Internet has for some of them become the dominant or even only medium.
* The term "normies" can be found in many parts of the internet to refer to sites (or parts of certain social networks) that don't really have their own distinct internet subculture.
* The term "Operator" has popped up frequently. Three major characters have the name, and another term for godmodding, or at least a technique similar to it, was revealed to be called "operating."
* The term "organic" is perhaps the most egregious version of this. While it does have a meaning, technically speaking, it provides absolutely no benefits whatsoever — numerous studies have proven it is not healthier, it is not more nutritious, it isn't tastier, and it is actually
* The term "Pachyderm" originated as a taxonomic order that included elephants, rhinos, and hippos, which were all grouped together essentially for having superficial similarities such as being huge, aggressive, and having thick wrinkled

gray skin, until it was
* The term "painted lady" was an old euphemism for a prostitute, which people of the time would've associated with moral degradation. It died once
* The term Parshendi is more or less a slur as well. The humans on the planet have parshmen, a related parsh people who act as as highly obedient servants, barely able to speak or think for themselves. The humans essentially view and treat them as (highly valuable) animals rather than people. Upon first meeting with the Parshendi they could see they were obviously related, so the name they gave them literally means "parshmen who can think". None of the human characters seem to think that the term is offensive, and several even seem to expect the Parshendi to be flattered by the fact that their cousins are considered such valuable slaves. It turns out the term is actually
* The term "pecking order", in fact, originates from hens. Yes, even female
* The term "port" tends to be misused in gaming circles, often conflating it to refer to versions which do not share the same code and/or assets with the original platform release.
* The term "Qunari" isn't even the name of their race, but, rather, it refers to anyone who follows the Qun. The name of their race
* The term "ransom note effect" is used to describe the result of using too many fonts, particularly if they clash with each other or are just plain ugly in their own right.
* The term "shooting brake" is now making a comeback, on which the definition is generally accepted as a type of station wagon that has a coupe-like roofline, with only two doors instead of five. The common belief was that the term was just an archaic name for the more familiar station wagon or estate, but nobody realizes that term originated from roofed carriages that are normally used as hunting vehicles, complete with storage for guns and ammunition. Only after the rise of motorized vehicles did shooting brakes evolve into customized wagons used for hunting towards the present form.
* The term "social justice warrior" mockingly refers to this trope among internet users, stereotyped as
* The terms used to describe ships and their commanders follow Air Force conventions. For example, when hailing another vessel the commander might introduce themselves as "General Hammond of the Earth vessel
* The term "top-grain leather" can be confusing to some. One might assume that "top" means "best", but it actually means it only uses the top of the hide (the other half is turned into suede). While top-grain is still higher quality than the aforementioned "genuine leather," the highest quality grade of leather is full-grain leather, which uses the entire hide.
* The term "tragicomedy" was originally coined to describe plays that started out like tragedies but ended with redemption and reconciliation instead of
* The term "unlimited bandwidth" that internet and cellular phone service providers love to advertise has gotten a lot of bad flak because people have found out yes, there is actually a limit to how much bandwidth you can consume from your provider before they start taking punitive action. Perhaps it was "unlimited" when speeds were so slow you couldn't manage to breach it even if you constantly were downloading something.
* The term "waldo", an informal name for remote manipulator devices, comes from a
* The term was coined. It crops up over and over again there, in several forms:
* The term was first coined by the Romans to describe gladiatorial fights involving three or more combatants who would fight until one remained standing or alive. Such battles were considered brutal even by Roman standards, such that early Christians such as Clement of Rome and Ignatius actively campaigned against it to no success.
* The term was the reason the Japanese female soccer team gained the
* The term "word salad" was coined to describe the rambling incoherent writings and speech of schizophrenics, which can be very disturbing to read or listen to.
* The Terracota Army actually used to have real weapons. Some were recovered from the soil, but most were stolen in the meantime.

* The Terraforming Candidate worlds are Barren worlds that once supported life, but for whatever reason, no longer do. As the name suggests, terraforming them is a possibility.
* The Terran and Vasudan ships initially have no deflector shields, and the shielded Shivan fighters are nigh-invulnerable to their weapons. Fortunately, observation of Shivan technology allows the good guys to develop both shields and more effective weapons in short order. However, shields do not work in subspace, and the Shivans share this disadvantage. But it comes up exactly
* The Terran capital ships actually fire a directed nuclear blast, basically Casaba Howitzers (see Real Life). The Yamato cannon creates a containment field, detonates a "small nuclear bomb", focuses the detonation, and uses it to propel a jet of plasma.
* The Terran Confederacy was this in all but name, as well as lacking a single ruler. Their most famous acts are nuking a planet for some of the citizens speaking out against them and sending assassins to decapitate a family. No wonder many humans actually welcomed Mengsk's new government.
* The Terran Dominion, ruled by Emperor and former terrorist, Arcturus Mengsk.
* The Terran Empire is something that no-one in their right mind would have trusted in - not after a couple of centuries of utter brutality.
* The Terran Empire put their symbol not only on the uniforms, but also in seemingly every corridor on their 23d-century starships. Compare that to their Federation counterpart across the mirror, who are so frugal about it at the time that it took until the movies to show us what the Federation's symbol actually
* The Terran Hegemony was this in the lore's backstory. It possessed a meagre 95 worlds compared to the five Great Houses' hundreds of worlds each and therefore appeared as a tiny dot in the middle of five large realms on maps of the Inner Sphere. However, the Hegemony's worlds were the ones first colonised by humanity as opposed to the much-later colonised ones held by the Great Houses, giving the Hegemony a population and industrial base equal to several of the Great Houses combined and the best universities and development labs in the Inner Sphere. The Hegemony would leverage their technological and industrial might to serve as mediator between the Great Houses, eventually leading to the formation of
* The Terran mercenary battlecruiser is stated to be from the early days of the Confederacy. There seem to be some inconsistencies about the latter's age, but we're probably talking about a century or more.
* . The Terran-Minbari War started when a Terran Alliance ship panicked and killed a Minbari leader, but during a prisoner interrogation, Matriarch Benezia tells a Minbari commander that, by that logic, the killing of an Asari matriarch who was trying to negotiate a peace between Terra and Minbar should justify the Asari wiping out the Minbari. After all there are individual Asari who have been alive since before the last Great War, so by the Minbari's logic, they are an older, wiser and superior race, and therefore there's all the justification they need. The Minbari commander starts to realize how stupid their holy war has become.
* The Terrans also get a bomber unit, the Banshee, and the new fighter unit is a
* The Terrans also have a space gun, capable of shooting halfway across a star system and can
* The Terrans did this to the Vilani fleet at the climax of the Intersteller Wars in
* The Terrans rely on good-fashioned MREs, Carbocakes, and Vita Kai (a block of concentrated vitamins).
* The Terran Treaty Organization and Shield Alliance ambassadors to the Deltan Union retreat to a bar together after the Deltans decide to join the Pact of the Raptor instead of either of their respective blocs.
* The Terraprisma is one of the most powerful summon weapons in the game, but since it is only dropped by the
* The Terra Queen, an evil overlord that comes out to rule the demented planet of Terra Cruentus every 15 years during the "Season of the Queen", served as one of the main characters of
* The Terrence & Phillip Show, but when the show makes a risque joke,

well...guess.
* The Terrible Privacy of Maxwell Sim, Jonathan Coe appears as himself, to inform a very disappointed Maxwell that he is a fictional creation, before extinguishing him with a click of his authorial fingers.
* the terrible rail-shooter he's reduced to chanting "HE'S A MAN, NOT A GOD!" after hearing it one too many times.
* The Terrible Secret of Animal Crossing, the protagonist finds himself on a bus to a camp under strange circumstances, and bit by bit, the secrets of the camp's much-too-happy exterior finally come to light. Even the final chapter is aptly named, "All's Well That Ends."
* The Terrible Shotgun" To reiterate, under the right conditions this weapon can be more powerful than a nuclear explosion!
* The Terrible Terrors, big-headed tiny dragons that act like house cats.
* the terrible things the ritual requires to be done makes it a prerequisite.
* The Terrible Truth About Third Grade instead. When her teacher finds out about this, she excuses Babette from having to do regular homework and gives her the alternative assignment of writing her own story and presenting it to the class.
* The Terrible Underpants, Wanda-Linda has to wear a pair of underpants that she hates because they're too big and there's a cordial stain on them.
* The Terrifics remembers what happened in the failed branches, a fact which disturbs him and, in the good end, leads to him deciding not to use the sphere again.
* The Terrifying Presence perk makes this even easier by giving additional dialog options for certain encounters which can send the enemy running or paralyze them with fear.
* The terrifying Reebok adverts, with an over-sized beer gut chasing a guy down the street; "Belly's gonna get ya!".
* The territorial system had made many promoters well off. The rise of the
* The Terror, as originally Gustav was later supposed to die in it, but the script was changed so he was attacked by a falcon and fell of a cliff instead.
* The Terror, attacks the blind from the side and kills the expedition commander.
* The Terror by the mutineers, but leaves a note on his chest saying he took poison and anyone who eats his body will die. No-one dares do so.
* The Terror, despite all the crews trials and tribulations, the majority of them die off far from home and in various horrible ways. The sole survivor is then forced to settle down with the local Inuit, avoiding searchers out of guilt.
* The Terror Dream and its source narrative. She explores in detail how the trope influenced some of the media images and political attitudes with which America responded to the tragedy.
* The Terror emphasize it, which suits Fitzjames' blustering self-appointed hero status.
* The Terror ends with a title on black reading simply "FOR MARCUS", a reference to series composer Marcus Fjellstrom, who died while the show was still in production.
* The Terror features one attempted mutiny and two that actually get off the ground, as the chain of command breaks down in the Arctic cold.
* The Terror He alone survives amongst a native arctic tribe until the rescue party finally arrives, but he opts to have the chief of the the tribe tell said rescue party that nobody survived. His naval career was already at a dead end before the disaster because he's Irish and has no chance of making flag rank, he has zero chance to be with the woman that he loves, he failed to save anyone from his command or any of his friends in spite of his own best efforts, and he has nothing but disgrace waiting for him back home, so he opts to live out his life with the natives, whose culture he feels more at home in.
* The Terror, Hickey cuts his throat with a hidden knife. Being naked meant he didn't get blood on his clothes, and the dancing kept him from freezing in the Artic cold.
* The Terror HMS Terror through the Arctic pack ice, battles a demonic polar bear, and discovers the Northwest Passage.
* The Terror: Infamy, Amy Yoshida was consumed with revenge against Major Bowen and

got it, but admits to Yamato-san that it only left her empty. He tells her that it was him or her, and that she did the only thing she could.
* The Terror: Infamy that haunts the other main characters throughout the series.
* The Terror, involves the Baron opening a floodgate to let the sea into the crypts below the castle, drowning himself and anyone who is with him.
* The terrorist attacks by the Syrannites (a xenophobic sect that hates anything that deviates from Surak's teachings) get serious enough that the Vulcan government invokes the clause in the TeTO charter that revokes a religion's protected status if that religion is a public threat. As this has never been done before and sets a dangerous precedent, the TeTO general assembly is hesitant to do this, and the motion barely passes.
* The terrorist attacks on September 11, 2001 are usually called "September 11th (terrorist) attacks", the "9/11 attacks" or simply "9/11".
* The terrorist group Red Bamboo is treated as a minor antagonist in a few
* The Terrorist, in retaliation for his sending an Indian Peacekeeping Force (IPKF) to Sri Lanka in support of the Sinhalese government the LTTE were fighting, and alleged atrocities committed by them against Tamils in the conflict.
* The terrorist leader in "Sacrifice" is first seen in her cabin muttering to herself as she types up their manifesto. The walls are covered in newsletters and pictures of Sharon Valeri.
* The terrorist lowered his gun, handed the boy a Mars bar, and said "Forgive me, we are not monsters" before leaving.
* The Terrorist: Malli gets pregnant by having sex with a fellow cadre just once without meaning to (for bonus points, it's right before he dies)
* The Terrorist: Malli, though pregnant, doesn't stop her suicide mission, and thus takes her unborn baby away to death with her.
* The terrorist organization The Many Arms of Death have such a plan in place for Batwoman in
* The terrorists are also aware of when the satellite passes over and make sure they're inside a tent at those times, so Jack Ryan has to get his CIA superiors to change the orbit of the satellite to catch them unawares.
* The terrorists hold the planes hostage in the air by shutting down the lights at Dulles Airport. Given the amount of time and fuel the planes are depicted as having, they could have easily made it to dozens of other civilian or military airports. Any of the
* The terrorist threatens to continue cutting them off one-by-one, but when the president doesn't give in, he decides she's not going to break and orders him killed, but he gets rescued (though not before getting shot.)
* The terrorist van exploding could be explained from the large number of explosives it was carrying. One has to remember that that van DID shoot at the harriers with a Stinger. Odds are, there may have been more explosives in the van.
* The Terror it's not clear if the monster slaughtering the explorers is just a combination of sleep deprivation, denial, stupidity and a bear or if it is actually the spirit Arctic.
* The Terror — exploring the Arctic, on a partly scientific expedition. They quickly become stationary when they get frozen in the ice.
* The Terror of Tiny Toon) for making a lot of people think Plutonium is a glowing green rod. So much so that a lot of people are surprised that Plutonium is actually a silver-gray metal that glows red or orange. Radium is the material that glows green, and even then it doesn't glow green on its own: as it decays it releases ionizing radiation which excites fluorescent chemicals to cause the glow.
* The Terror of Tiny Toon", when Lisa and Bart try to escape from Itchy and Scratchy, they get into a police car only to find the latter two in the front seat. While trying to dismember the kids with a chainsaw, Itchy accidentally cuts off Scratchy's arms. Scratchy isn't terribly bothered and just says "It happens" when Itchy apologizes, then drives the car with his mouth.
* The Terror of Tiny Town: Angry because Haines hit her and neglected her in favour of Nancy, Nita plants explosives in his cabin.
* The Terror of Tiny Town, Bat Haines frames Buck lawson for the murder of Tex

Preston.
* The Terror of Tiny Town: Bat Haines is attempting to manipulate Pop Lawson and Tex Preston into a range war, so he will be able to easily acquire both properties afterwards.
* The Terror of Tiny Town, Bat Haines rustles Pop Lawson's cattle and leaves behind a branding iron to make it look like it was the work of Tex Lawson.
* The Terror of Tiny Town, Bat Haines tells Nancy that Tex has been murdered before anyone except the murderer could have known that he was dead.
* The Terror of Tiny Town, Haines tells him to get it over with and shoot him. Buck instead says he'll even the odds and throws away his own gun. A drawn-out fistfight follows.
* The Terror of Tiny Town is a 1938 Western movie with an all-midget cast.
* The Terror of Tiny Town: There is a live penguin in the barber shop of a tiny settlement in the dusty West. Its presence is never explained, or even commented on.
* The Terror of Tiny Town: When Nancy goes charging out of Buck's jail cell, the door hits Otto in the face, knocking him over.
* The Terror shows the Baron descending into the crypts, and being startled by a bloody corpse that falls out when he opens a door. The scene is never explained or even referenced again in the movie.
* The Terror. Sir John Franklin (portrayed as generally affable but incompetent) tries to do this to a wounded Esquimaux who's been brought on board the ship.
* The Terror: The infamous real-life Franklin expedition run afoul of an Inuit spirit called Tuunbaq, which takes the form of a gigantic polar bear with a long writhing neck. The men assume it to be a normal polar bear until it starts killing them and butchering their bodies (including their commander, Sir John) in ways a bit too intelligent for a normal animal. For example, it takes two crewmen, cuts them in half, and then places the upper part of one man onto the lower part of the other. Oh, and it also sucks out their souls.
* The Terror. The monster rejects the soul of dying mutineer Cornelius Hickey in distaste, as he's too evil.
* The Terror, which has no plot connection, turning the collection into a genre anthology of supernatural horror stories set during real historical events.
* The Terror wistfully considers wearing a Renaissance-style costume gown to the expedition's morale-boosting carnival and admires the effect the dress has on him while holding it against his body, but ends up settling for the more plausibly deniable choice of dressing as Britannia, the patron goddess of the British Empire- still technically crossdressing, but less overtly because Britannia herself is depicted in masculine armor over her dress.
* The Terry Tate commercials manage to include an awful lot of bawdy humour, including Terry's repeated
* The Tertiary, Quandary, and Quintessential Phases of the radio series (based on the later books) also came after his death (though Adams had planned for radio versions of them, even recording himself playing Agrajag).
* The Tesseract, one of the six Infinity Stones, generates essentially limitless amounts of energy and has been used to open portals to other worlds. It is also extremely volatile, the first of the aforementioned portals was completely accidental, which (seemingly) killed the
* The tesseract-thingies during the "beyond the infinite" sequence from
* the Tesseract. While a number of characters agree that it was good he stepped in to protect her, they question his methods, particularly because they dented the White Council's ability to use this themselves to protect humanity.
* The Test (2012) the protagonist hires a rich and handsome actor to hit on his fiance, to prove that she truly loves him and she's not after his money.
* The Testament of Dr. Mabuse. In this story about the rise of the Rothschild family to success in the face of antisemitism in the early 19th century, the most viciously antisemitic character is Count Ledrantz, a German. And just to make the parallel more clear, Count Ledrantz organizes an antisemitic pogrom in Frankfurt, with Germans throwing rocks through the storefronts of Jewish businesses.

* The Testament of Dr. Mabuse, Lohmann entirely fails to prevent Dr. Baum from setting fire to the chemical works, which Dr. Mabuse's notes predicted would kill thousands of local residents with poisonous fumes. Possibly averted since both Lohmann and Baum spend some time chasing each other around the burning works with no kind of protective equipment, and don't suffer anything worse than brief coughing fits.
* The Testament of Dr. Mabuse made a similar analogy, comparing Berlin's underworld to the Nazi Party.
* The Testament Of Jessie Lamb, in a world where a disease kills every single pregnant woman in a slow and painful way, Jessie Lamb decides that she wants to volunteer for carrying a frozen fetus that has been vaccinated against the disease, to term. Which means that she will lie in a medication-induced coma for nine months while the disease destroys her brain, then be allowed to die, while her child might possibly live. She does it so that mankind can live on. Her name is also quite symbolic.
* The Testament Of Jessie Lamb, Jessie wants to make a heroic sacrifice. Her father kidnaps her and keeps her imprisoned in her grandmother's empty house to avoid that. She doesn't see it as kind, but most parents would likely agree that it is for her own good. (She is not the only one who can make the sacrifice, it is possible that science will find a solution that requires no sacrifices, and the thing she wants to avoid isn't "everyone dies" but just "no new babies are born".)
* The Testament Of Mary was born, he did not come back from the dead, and all of his followers are morons for thinking he was some kind of messiah. At one point Mary also pulls out a knife and threatens to murder some of those followers in their sleep. It was nominated for three Tony Awards, and critics expressed confusion when it ended its run early, having only played for about five months. Apparently, viewers who might have been interested in a religious story didn't like the implication that their holy figure would have wanted to stab them to death.
* The Testament of Orpheus, has come unstuck in time and is flitting around different eras at random. It's a metaphor for the timelessness of poetry and art. When he meets a scientist in 1959, Cocteau says he had to invent cigarettes in 1770 because he needed a smoke.
* The Testament of Orpheus. They put him on trial for seeking to reach another world through his art.
* The Testament of Sherlock Holmes takes place in an abandoned funfair, now full of Moriarty's goons.
* The Testament of Sherlock Holmes, the early stages of the game introduce a nasty poison that causes the victim to go literally insane with rage.
* The Testament of Sister New Devil and consents. In the anime adaptation, their relationship only goes as far as steamy makeout sessions and foreplay. In the light novels, he finally takes Chisato's virginity towards the end of volume 7 and regularly has sex with her, from then on.
* The Testament of Sister New Devil and that she now exists solely for his pleasure.
* The Testament of Sister New Devil: Basara actually kicks out Mio and Maria, his newly adopted stepsisters, after finding out they're actually a demon lord in training and a succubus. They try to brainwash him into leaving his house, but it doesn't work. After he learns more about their past, however, he changes his mind and instead tries to protect them from the rival demon faction trying to kill her.
* The Testament of Sister New Devil: Being a Speed Type fighter, Basara Toujou can close most gaps near-instantly.
* The Testament of Sister New Devil but all the guys in the school as well.
* The Testament of Sister New Devil by rubbing her backside against his crotch and faintly smirks upon feeling him get an erection.
* The Testament of Sister New Devil Chisato. Each of them becomes pregnant and will eventually give birth to his offspring, once the protective barrier around each embryo expires. The barrier also ensures that the girls can continue to have as much sex as they want in the meantime, without risk of miscarriage.
* The Testament of Sister New Devil consists of five girls who all are able to grow

more powerful by committing various sex acts with him. Three are contracted in master-servant contracts to him, which results in his and their powers increasing whenever he "forces them to submit". One is a succubus whose power is directly drawn from lust and the satisfaction of said lust. The last is a spirit summoner who has to use dark spirits in the nether realm, and her access to those spirits increases as she becomes more familiar/comfortable with her weaknesses and desires, again through sex acts.
* The Testament of Sister New Devil for the contract the hapless male hero accidentally makes with them.
* The Testament of Sister New Devil, Mio does this to Basara shortly after they first meet. He accidentally walks in on her in a restroom, and puts his hand over her mouth to prevent her from screaming and making things worse. After she calms down, he takes his hand off, and she slaps him.
* The Testament of Sister New Devil: Mio inherited a tremendous amount of demonic power from her father, but she's been aware of it for less than a year and isn't particularly adept at using it.
* The Testament of Sister New Devil OVA, Maria tricks Basara into eating Mio's panties by rolling them into balls to look like dumplings and putting them in soup. When he finds out, he beats her up. The only consolation is that Maria used her magic to make the panties digestible.
* The Testament of Sister New Devil, predictably, Basara has much romantic and sexual tension with his new sisters Mio and Maria. But in reality, they are actually the new demon lord and her assistant respectively. But even after finding out, he still does what he can to protect them from demons and others that want Mio dead. And Maria, being a succubus, naturally likes to tease him.
* The Testament of Sister New Devil seem to have some interest in Basara, the protagonist.
* The Testament of Sister New Devil. She teases Basara with this initially, but then reveals that she's actually wearing clothing underneath.
* The Testament of Sister New Devil taking other men's slaves and using the agony and discomfort of the contract to break their minds until they enter a vegetative state and can be sexually abused at will.
* The Testament of Sister New Devil then tries to force the two apart, and Basara is instantly hated by all the guys at the school because the two girls are considered to be untouchable idols, and yet both of them seemed to be fighting over him.
* The Testament of Sister New Devil, Yahiro Takigawa, a boy at Mio and Basara's school, mentions befriending the latter because he found it amusing how he instantly became hated by all the guys at school due to being fought over by Mio and Yuki, another girl in his class that seems to be a childhood friend and like Mio, is considered an untouchable idol by the boys. When Basara asks if that wouldn't be a problem for him as well being associated with him, Yahiro casually mentions throwing him under the bus if it ever came down to it.
* The test doesn't so much test intelligence, but similarity to humans; it tests how well the computer can pretend to be a human. Through the
* The test goes on to show the elements reacting to Aang's presence- i.e. rocks move towards him, water falls into a perfect circle, etc. The scene is infamous for making very little sense, because it doesn't explain why the elements don't do it all the time, suggesting that Aang did it on purpose, allowing himself to be captured.
* The Test, Hisao proposes to his girlfriend Lilly a few days after she reveals she's pregnant.
* The test is referenced directly when Dirk accuses the responder of failing it deliberately.
* "The Test" turns the show in a sitcom, and a bad one at that, when Gumball decides to change his ways, the group's lives are shifted so now the show is a sitcom with Tobias as the main character.
* Thetes wrote him in as the token Royal Navy officer, Lt. Dick Player.
* The "Tet" space station, and the "Odyssey" (for how little time it appears on-

screen, anyway) in
* The Teutonic Knights in medieval Prussia: a northern nation known for being extremely pious and militant that, although nominally a monarchy, is effectively ruled by the order of the Grey Wardens. In addition, the Anderfels language displays a strong German influence, as evidenced by place names such as Hossberg, Kassel (the name of a real city in Germany), and Weisshaupt (German for "Whitehead").
* the Tevinter Imperium, and it could cost the Inquisitor goodwill. He's especially unhappy when the Inquisitor uses his influence to help Dorian get an amulet back, as he's afraid people will assume Dorian's merely cozied up to him to use his power for himself.
* The Tevinter Imperium is an ancient Magocracy based on Rome and Byzantium, with the Tevinter equivalent of the Roman Senate chosen from the Circle of Magi with the Grand Enchanter (Leader of the Circle) becoming The Archon (Tevinter equivalent of Emperor) after the death of the previous Archon. We have yet to actually visit it and it's a
* The Tevinter Imperium runs on this principle according to Fenris from
* The Tevinter of course consider themselves to be Pro Human. It's just that their interpretation of the Chant of Light's decree that "magic is meant to serve man not rule over him" is that the Magisters are
* the Texan forces would not have been able to capture him at the Battle of San Jacinto and force him to sign the Treaties of Velasco recognizing Texan independence.
* The Texas Chain Saw Massacre (1974): A hitchhiker travels with the group for a bit and start talking about his family who worked at the old slaughterhouse. He borrows Franklin's pocket-knife and cuts himself, then takes a Polaroid picture of the others and demands money for it. When they refuse to pay, he burns the photo and slashes Franklin's arm with a straight razor. The group forces him out of the van and drive on. It then gets worse when, later in the film, we find out the hitchhiker is Leatherface’s younger brother Nubbins, and he decides to exact some payback on Sally with aid from both Leatherface and the family’s patriarch Drayton.
* The Texas Chainsaw Massacre 1974 burst through the painted glass of the window to find that it's actually daylight outside, and that the killers are going to continue mutilating her as she runs into a public area where others gawk in horror at the mayhem.
* The Texas Chain Saw Massacre (1974) credited the graphic coverage of violence by San Antonio news outlets as one inspiration for the film and based elements of the plot on murderer Ed Gein. The idea of using a chainsaw as the murder weapon came to Hooper while he was in the hardware section of a busy store, contemplating how to speed his way through the crowd.
* The Texas Chain Saw Massacre (1974). Each successive victim heads in looking for the others. Easiest massacre ever!
* The Texas Chain Saw Massacre (1974) has Leatherface kill two of his victims with a sledgehammer. Ironically, he kills more people in the movie this way than he does with a chainsaw (with which he kills only one person).
* The Texas Chain Saw Massacre (1974); however, the murderous family's house is so far removed from civilization that it is only discovered by accident. In one of the later films, it is further mentioned that the bodies of their victims are buried in mass graves, which do break down and cause an extremely dangerous substance to form that can be fatal on contact. This detail is ignored in most other instances of this trope.
* The Texas Chain Saw Massacre (1974) makes jerky from the flesh of Leatherface's victims and sells it to unsuspecting travellers.
* The Texas Chain Saw Massacre (1974), no crazy angles, just... a quick death.
* The Texas Chainsaw Massacre 1974 rating based on the strong menace throughout and disturbing subject matter. Several minutes had to be cut just for the director to get an R rating.
* The Texas Chainsaw Massacre 1974. Sally does this not once, but twice in the

third act.
* The Texas Chainsaw Massacre (2003), he murdered the original Sheriff when he tried to take in Leatherface after his first murders and stole the lawman's uniform to lure in more victims.
* The Texas Chainsaw Massacre (2003): Leatherface has a disease that makes the skin on his face decay. it's only seen briefly in profile, but it isn't pretty.
* The Texas Chainsaw Massacre (2003). Most other cops who have appeared throughout the series are usually depicted as dumb and incompetent, or are just faceless victims.
* The Texas Chainsaw Massacre (2003) remake. Erin has no trouble getting past a barbed wire fence while Leatherface trips and gets tangled in it.
* The Texas Chainsaw Massacre (2003) remake reveals that the residents of the town are completely aware of Leatherface and his family's murderous and cannibalistic tendencies, but don't do anything out of fear of retribution. At one point, after the heroine escapes from the Hewitt family lair and makes it into a bar in town, the patrons stop her from calling for help and bring her to the pursuing Leatherface.
* The Texas Chainsaw Massacre (2003), the protagonists pick up a bloody female straggler who appears to be in shock. She warns them that they're going the wrong way (the route she was fleeing from). But they ignore her ramblings and try to calm her down. She then proceeds to shoot herself in the mouth, rather then go back to where she came from.
* The Texas Chainsaw Massacre (2003), the sheriff played by R. Lee Ermey admits that he likes to fondle the corpses of pretty girls that he finds at crime scenes.
* The Texas Chainsaw Massacre (2003) when her rescuers accidentally lead her right back to them.
* The Texas Chainsaw Massacre 2, a character gets his face cut off with an electric carving knife.
* The Texas Chainsaw Massacre 2) before running him through with a chainsaw.
* The Texas Chainsaw Massacre 2 live in a kind of a run down theme park.
* The Texas Chainsaw Massacre 2, the eldest brother of Leatherface's twisted family is known around the county for his amazing chili.
* The Texas Chainsaw Massacre 2, where the family treats the corpse of one dead family member as if it's still alive; they even turned the body into something akin to a puppet so it can be carried around.
* The Texas Chainsaw Massacre, and they check off every box on the list of hillbilly stereotypes.
* The Texas Chain Saw Massacre — Horror series. 5 films and a remake series of 2 more since 1974.
* The Texas Chainsaw Massacre series is known for the trope, being that the infamous family of the films makes and sells barbecue from human flesh, often forced upon captives.
* The Texas Chainsaw Massacre Special escapes from the lunatic Hewitts and ends up floating down a river on a tree trunk. As she promises to herself to clean up her act, she suddenly starts screaming when she comes across a waterfall. But it's not the small drop that terrifies her, it's the chainsaw-toting Leatherface, who is waiting for her at the end of it.
* The Texas Chainsaw Massacre: The Beginning, but plans to flee to Mexico instead.
* The Texas Chainsaw Massacre: The Beginning does this with the rebooted version of Leatherface, when he kills a fleeing woman by hiding in her car and surprising her. Which is actually rather incongruous, given that Leatherface is approximately 12 feet tall and built like a linebacker.
* The Texas Chainsaw Massacre: The Beginning. It turns out she's had her teeth and tongue removed offscreen.
* The Texas Chainsaw Massacre - The theme of corporate and non-profit cannibalism is addressed on varying levels in every movie.
* The Texas Chainsaw Massacre, while Nubbins likes to terrify and unsettle their prey before he captures them.
* The Texas Chainsaw Massacre who sends him out to cut people up with a chainsaw

and make meat of them.
* The Texas Chainsaw Massacre, who wears a variety of masks made of human skin to hide his deformed face.
* The Texas Department of Transportation distributed a bumper sticker with the slogan, "Don't Wreck Your Life", as part of a campaign promoting safe driving. Old 97s drummer Philip Peeples put the sticker on the band's touring van, but ripped out the word "don't", inspiring their album title
* The Texas Motor Speedway race is signed as the Dickie's 500 (now the AAA Texas 500), but there are a few glaring inaccuracies to any NASCAR fan: one, the race ends in the day time, when both Texas races (spring and fall) end under the lights (the spring one is a Saturday night race; the fall race starts in the late afternoon and ends just past sunset). Also, the NASCAR on FOX crew is shown commentating for the race, when at the time of filming, and in the present day, it would have been the NASCAR on NBC team (or, from 2007 to 2014, the NASCAR on ESPN/ABC team) who would be covering the race. FOX covers the spring Texas race.
* The Texas Rangers, sad to say, entered this territory from 2010 to 2012. Consecutive American League pennants (2010 and 2011) and no World Series title. In 2012, they were forced to play in a wild-card play-in game after losing the American League West division chase to a team that took over first place for the last day of the regular season-the Oakland Athletics. And then, the Rangers lost *that* wild-card game to the Baltimore Orioles.
* The Texas Rangers, seeking their first championship in forty years of existence (fifty if you count their previous 10 years as the Washington Senators), led the St. Louis Cardinals three games to two, and led 7–5 in the bottom of the ninth inning. With two outs and two runners on base, David Freese fell behind the count 1–2, leaving the Rangers one strike away from victory and a championship. Freese hit the ball over Nelson Cruz's head and off the right-field wall for a two-run triple to tie the game at 7.
* The Texas Revolution featured American militia regiments joining the young Army of the Republic of Texas. Santa Anna (dictator of Mexico at the time) regarded them as pirates and mercenaries as they had no claim for fighting, and this led to the most notable massacres of the time aginst both the American volunteers and the white Texan settlers.
* The Tex Avery Cartoon "Batty Baseball" has a pitcher use a bowling ball to knock down the player at bat, catcher and umpire; there was even a pin reset to put them all back in place.
* The TeXbook, Exercise 27.5, instructs us, "Find all of the lies in this manual, and all of the jokes." Its answer in Appendix A: "If this exercise isn't just a joke, the title of this appendix is a lie."
* The textboard 2channel (not to be confused with Futaba, a.k.a. "2chan" to English speakers) is the Japanese cousin of 4chan, and like 4chan have different nicknames for users of different subforums. The most famous is "VIPPER" (in all caps) for frequenters of the "VIP" subforum, 2channel's equivalent of /b/. A user of 2channel in general is called "neller" ("ねらー"), short for "2channeller."
* The textbook also includes math-related pictures of dogs drawn on the pages.
* The textbook example is probably the Battle of Otumba (1520). The Spanish and Tlaxcaltec survivors of the Noche Triste were moving west to Tlaxcala when they were cornered by an Aztec army that, according to the
* The text of the second demolition order is pretty much the same as the first, run through a simple substitution cipher, but with a few amusing differences. Anyone got a bar code scanner to check out what names are signed?
* The Texts Of Festival is set in a post-apocalyptic world where the survivors believe rock lyrics are the fragments of holy texts.
* The text stories exclusively posted on the Transformers Club website featured an arc where a large instability in the fabric of reality caused the Gobots universe to start slowly fading away. The Gobots discover that this is happening because an unexpected splinter
* The text suggests that this is a big part of Lorenzo's interest in marrying

Jessica. Depending on the production, it may be more or less obvious.
* The textures and other graphical effects are subpar, looking more like a
* The Tezuka Zone, wherein Tezuka Kunimitsu doesn't move one step from wherever he is standing, and all balls, no matter how they are hit, are attracted to him.
* The Thai military has been involved in at least 20 revolts against the government, the first one in 1932 which resulted in the abolition of absolute monarchy and installed a constitutional monarchy.
* The Thalmor. In one quest you even interrupt an in-progress interrogation, which is about as unpleasant as you'd expect.
* The Thalmor of the Aldmeri Dominion in general despise humans in general, and cannot handle the thought of one of them having ascended and sharing a seat in the pantheon with the eight other Divines.
* The Thals are an interesting subversion. They initially mutated into creatures similar to the Daleks, but where the Daleks "stabilized" and stopped mutating the Thals continued, eventually coming full circle, mutating back into basically their original form.
* The Thals are mutants, too. It's just that their mutations were beneficial, making them healthy and beautiful.
* The Thamarite cults are a weird blend of theistic and LaVeyan Satanism, with a vaguely-Objectivist moral philosophy, emphasis on magic, and worship of the Morrowans' Satan equivalent (and Morrow's twin sister).
* the than its siblings. Judging by some descriptions of The Luggage's trip around the Counterweight Continent, it can also mate and have children.
* The "Thanks a lot, Citibank!" commercials featured wives or mothers of celebrities (Richard Simmons,
* The Thanksgiving cartoon "Fall Float Parade" cut to a similar card, with a turkey instead of The Cheat, when the Marshie balloon crashed into the hosts' booth (and, presumably, broadcast equipment).
* The Thanksgiving episode involved an evil pie maker named Sour Sam, who bakes a bunch of "crabby apple pies," that causes anyone who eats them to act like grumpy jerks, and the only thing that snaps them all out of it is a young boy's speech about what Thanksgiving is all about.
* The Thanksgiving Play by Larissa Fasthorse, children's theater director Logan gets a special grant to hire a real LA actress (presumably one that's actually Native American) to consult on how to write a politically correct play. But the one she hires (via Skype), Alicia, is white but adjusts how she looks in photographs so as to get cast as different ethnicities, such as Jasmine in Aladdin. She wore braids for her "Native American" photo.
* The Thanos Imperative (and turned into hideous tentacle-beard monsters in the process) and got too full of its own version of life and started to invade other universes to spread.
* The Thanos Imperative seems to suggest that his predecessor didn't make it. A few years afterwards, that Nova ultimately did come back.
* The Thanos Imperative, they are now intent on corrupting the rest of reality.
* the that are a part of the country. Later advertisements mention "other conditional promotions" for the archipelagos instead.
* THE that nobody's mentioned him (and the other Earthbending fighters) yet!
* The thaumometer, which measures a magical field in "thaums". Mind you, this is just a perfectly sensible piece of equipment for a wizard on a world run by magic.
* The "The 2800" arc uses this to answer the question of what exactly happened to the 2,800 Dominion warships the
* the theater troupe's play is a vamp, and is the role that the heroine is constantly trying to score.
* The theater troupe stopped dead in its tracks when a battalion of 400 troops marched into the audience.
* The theatre lobby/waiting area for "It's Tough to be a Bug" in Disney's Animal Kingdom features posters for shows which have played in the theatre previously including "My Fair Ladybug" and "Beauty and the Bees," the implication being that in the universe of "A Bug's Life," they have their own versions of popular shows

and movies.
* The Theatre Phantom will often haunt a place of entertainment, with live action theaters being the most commonly used as the character's stomping grounds because the Phantom can potentially harm the people who attend, as well as damage the establishment's revenue and reputation. Sometimes, they aren't associated with a single location at all.
* The theatrical cut of the film depicts the throne as passing directly from Baldwin IV to Guy. In reality, the King's young nephew was his successor, and it was only after the child's premature death that the throne reverted back to Sibylla to choose the next King. Scenes depicting this part of the story were written and shot, but were cut from the theatrical release for time; this arc is included in the director's cut.
* The theatrical trailer has the camera fly into Ramone's throat as he's singing, revealing the film's title inside of him, and soaring back out.
* The Thebaid’’: A few world-ending events in Classical Mythology, namely the Great Flood and Phaethon's solar joyride, are explained by Jupiter as failed attempts to wipe out all of humanity's guilty souls. Unfortunately, evil so pervades the world that no amount of flood or fire could secure earthly justice.
* The Thebaid’’: One of the mercenaries tries to surrender for Tydeus, only for a javelin to fly into his mouth and cut out his tongue. He bleeds to death from the mouth and falls to the ground.
* The Thebaid’’: Polynices and Eteocles are driven to wage war and kill each other each other due to a curse put on them by their father, the intervention of Jupiter, and their hunger for the throne. Of the two, Eteocles is the more like Cain since he betrays the other first, by denying Polynices his promised year as king. That said, Polynices isn't as innocent as Abel despite all his brother's villainy. He manipulates the people of Argos to die on his behalf and although he's the protagonist, he's the protagonist of a tragedy, so that's actually points against him being some innocent Abel.
* The Thebaid’’: Prophecy tells the Argives that their princes will come in the guise of a lion and a boar. It is no coincidence that Polynices and Tydeus are fighting while wearing the skins of those two beasts. Even when they ditch the skins for armor, the two are still consistently compared to a carnivorous lion and a wild boar and sometimes the comparisons are swapped to show the new brothers influence on each other.
* The Thebaid’’: Tydeus walks into the palace of Argos shining with the joy of victory, so absorbed in pride that he barely notices the excruciating pain of all his bleeding and pulsing battle wounds
* The Thebaid admits he'd rather tell about noble Emperor Domitian. and The narrator mentions Domitian was so noble that he stayed on Earth to help Rome when he could have left to become a god in Heaven. Problem is, that story is really hard to tell, so the narrator settles on talking about Thebes.
* The Thebaid: All of the men of Lemnos had their throat slit in the middle of the nights by their wives and daughters who were furious at the men for abandoning the island to wage some foreign war. The only girl who doesn't partake in the massacre is Hypsipyle, who sneaks her father out of the island.
* The Thebaid: An epic poem about the war between the sons of Oedipus.
* The Thebaid, Antigone does her best to keep her brothers from committing fratricide despite their political ambitions. She nearly succeeds in getting Polynices to reconcile with his brother, but the Furies intervene and keep him on the path to damnation.
* The Thebaid describes the climax ("brothers crossing swords") and the whole rest of the work builds up to the lethal duel between Eteocles and Polynices, the sons of Oedipus.
* The Thebaid emphasizes his diminutive stature whenever he can. Every character Tydeus fights is taller than him, but his size disguises gigantic strength and unbeatable endurance that lets him win every fight. The guy can lift boulders or demi-gods over his head and throw them like a javelin and still have energy to fight forty soldiers in the dead of night.

* The Thebaid, Eteocles and Polynices renounce their father, kill each other and destroy huge swaths of their home in their attempts to take the throne of Thebes. Thebes isn't even a rich, beautiful, or even decent city, so their hatred for each other is based on nothing more than a desire for control.
* The Thebaid glosses over the Theban war that every book before and after it focuses on in favor of detailing a bunch of races, wrestling matches, and other games. No one dies and there's some fun racing and low-stakes fighting, all thanks to the god of war procrastinating.
* The Thebaid: In the final book, the funeral fires of Oedipus' sons inherit the hatred of their corpses and battle each other in a ungodly display.
* The Thebaid: Juno's objection to Jupiter is reverent, sure, yet its pretty suspicious that she mentions five different women Jupiter cheated on her with. Even as Juno calls her husband "Most Just of the Divinities," she finds a way it make it clear that she is tired of him punishing evil while never addressing his own sluttiness.
* The Thebaid: Mars' chariot can fly through heaven as quickly as Jupiter's lightning; its speed also leaves behind streaks of fire through the sky that make a pretty good omen that war is coming.
* The Thebaid: Most of the gods are horrified to learn that the people of Thebes and Argos will be massacred in a great war and lobby to stop it. Most except Jupiter, who orders his lessers to carry out the decrees of Fate or suffer the wrath of his thunderbolt. Unable to challenge the king of the universe, all the unhappy gods can do is delay the inevitable:
* The Thebaid, Neptune causes an earthquake that rocks all of Nemea just so that his son can win a horse race.
* The Thebaid Parthenopeus is eager to go to war against the corrupt cesspit of Thebes despite not even being able to grow a beard. His mother notices he's left too late to stop him and even with the patronage of Diana, he does not return from the war unscarred.
* The Thebaid, people do so much evil that even the gods can't possibly keep up to date with every crime committed. Even flooding the whole world and letting the sun-chariot set the skies aflame can't kill enough people to get rid of every villain. If the word of the gods won't convince readers, then the history of incest, murder, envy, and betrayal that defines Thebes should get that theme across enough.
* The Thebaid riding towards Olympus just after finishing a day of destroying cities and slaughtering foreign nations by his lonesome.
* The Thebaid, the daughter of Oedipus rebel against Creon in order to bury her brother, but unlike in that play, Theseus and the army of Athens arrive to set Creon straight.
* The Theban Sacred Band (a homosexual warrior fraternity) at the Battle of Chaeronea did
* The The era The The melded with Williams' country tunes from the 1940s and 50s was a hard sell to the thin overlap in the Venn diagram of the artists' fanbases, while many others had no idea what to make of it. The punny title and silly cover art didn't help, and the album found its way onto "worst albums of the 90s" lists. However, it was well-received by some, particularly those already familiar with Williams but not The The (including Williams' daughter) and opinions of it have skewed a bit more positive over the years.
* The theft of Khura'in's national treasure and the murder of the guard looking after it in
* The the Kh-35 anti-ship missile (nicknamed "Harpoonski" for its suspicious similarity to the American Harpoon missile) is an example of a missile that was required to have two different reporting names, since it has both air-launched and ship-launched versions, since air-to-surface missile reporting names have to start with "K" and surface-to-surface with "S". The air-launched type is the AS-20 "Kayak", while the surface-launched one is the SS-N-25 "Switchblade".
* The theme for the Getimian Caste marks also changed in development; initially, they were trigrams, in keeping with their Taoist themes, then the alchemical symbols for the seasons, before their final and official theme, the astrological

symbols for the asteroids Ceres, Juno, Pallas and Vesta.
* The theme music played while talking to people without their own theme, from Justice for All onward, is actually called "Eccentric".
* The theme of Pride/Vanity as an engine of destructionruns all through the plot of
* The theme of social stifling and small opportunities for women is now a more general one about the difficult economy and slim job and field opportunities.
* the theme parks (at least much as they can achieve with the budgets they are given). Many of the "authentic-looking" props in period-specific areas like Frontierland and Main Street, USA are actually authentic antiques, not replicas. "No one will ever see it" is not considered a good enough excuse to skimp. The policy is to create something that Walt Disney would approve of, and he was such a stickler that he would rather indefinitely postpone the opening of an attraction than let it open before it was perfect.
* The Theme Park Version theories occasionally take the existence of fairy tales using this trope as a proof of extra-terrestrial meddling.
* The Theme Park Version: "The Puppet Master's Regime" might be excused by the fact that the story is being told to us by a modern college student, telling us what he finds significant, even if the events primarily take place in the 1920s and 1930s. The views on pedophilia are more- or- less correct (age of consent laws developed in the 19th century), but no one ever seems to comment on the pedophile being a homosexual.
* The theme recurs in Season 5, when breaking people out of prisons has become the protagonist's forced
* The themes of lack of communication between band members and their wives are equally explored on albums like
* The theme song composer for several TV series produced by Ziv in the 1950s was, according to BMI's publishing records (he was never credited on-screen), one "Ray Llewellyn". This was actually a pseudonym shared by several composers who worked for hire at Ziv under a buyout contract (Ziv would buy the rights for the compositions and keep the royalties). The actual composers possibly included David Rose (for
* The theme song is sung to the tune of the sea shanty "Blow The Man Down", and has become more popular than the original song.
* The theme song of Hisako, incorporates some childlike chanting to terrifying and badass effect.
* The theme song of the show, "We Are The Crystal Gems", also counts—especially the extended version.
* The theme that plays over the ending sequence. A slow, low, heartbreaking piano plays the game's leitmotif as you see the
* The theme tune begins with "He's gonna take you back to the past / To play the shitty games that suck ass":
* The Thenardiers themselves also get this treatment. As the above poster mentioned, they're the only truly bad people in the musical—everyone else is fighting for
* The Thenns are characterized by their bald heads and scary, ornamental scars that make them look
* The Theocracy: A government run by priests and clergymen through religious laws, as opposed to a secular state.
* The Theocracy: A system of government run by priests who rule through religious laws, as opposed to a secular government.
* The theocratic Covenant are waging a campaign to wipe out all humans, due to their leaders declaring humans a heretic species. As it turns out, the war is simply the Covenant Hierarchs' attempt to cover up the fact that humanity, not them, are the designated "Reclaimers" to the
* The The only thing funnier than the failed intro itself were the candid reactions of the other wrestlers present, captured on audio for all eternity.
* The Theorem of Narrow Interests: By narrowing your fanfiction search to certain interests, the harder it will be to find one that's good.

* The theoretical concept of "Mathhammer" is built on this, usually comparing several types of units within a certain points limit in the scenarios they were built for and seeing which one is more cost efficient. This usually means that most players would build their army not with the best units in the codex, but with the cheapest ones that can pack some sort of heavy firepower (such as the Meltavets, who dies faster than any other anti-tank squad, but can kill way more in the small time frame that they're alive, at least statistically).
* The Theorists discovered their show was a rip-off and quit en masse, forcing its cancellation.
* The Theorists existed or that their show was a direct clone of the hit American show.
* The Theory and Practice of Oligarchical Collectivism) since they have the resources to create them in the first place, but that will cause hierarchical society, which is based on widespread repression, poverty, ignorance and blind faith to the Powers That Be, to fall apart. War has superseded its former meaning of conquest and has evolved into an excuse to waste resources, decrease living standards, and create intense feelings of constant danger and fanaticism, feelings which have long been associated with loyalty to a group.
* The theory has been somewhat debunked regarding Stonehenge. A man working by himself is building a replica in his backyard using nothing but simple machines (mostly levers). He has proven that aliens didn't
* The Theory of Everything in 1984, lost the ability to speak in 1985, and separated from Jane in 1990, only reconciling with her after his divorce from Elaine Mason in 2006.
* The Theory of Everything: Made in 2014, the last quarter of the film is set mostly in this decade and concludes in 1989.
* The Theory of Interstellar Trade", exploring the implications of special relativity for trade between different planets. In addition to the generally ridiculous premise, it includes quite a few deadpan one-liners like: "These complications make the theory of interstellar trade appear at first quite alien to our usual trade models; presumably it seems equally human to alien trade theorists."
* "The theory of natural selection doesn't explain the origin of life." This is actually true, but it's also completely irrelevant. Natural selection applies only to living systems, not nonliving matter. Even people who should know better (such as Sir Anthony Kenny, in his history of Western Philosophy) have used this line as an equivocation.
* The theory of the evolution of species by natural selection was first formulated by
* The theory of the four humours is that every person's being is composed of various amounts of four fundamental elements added together, usually with one dominating. Hippocrates actually expanded the theory to medicine and the idea that this applied to the physical body as well as the mind lasted well into the middle ages:
* The theory that a quantum black hole was the cause of the event is near-proven in
* The theory that humans are the diplomats of the galaxy can be seen as
* The the post-Super Genesis Wave universe, only video game instances were canon until
* The Thera eruption, which wiped out the Minoan settlements on Santorini some 3600 years ago, and possibly caused a tsunami that destroyed coastal communities and agricultural areas on Crete 200 km away. This eruption might have been the basis for the Atlantis myth.
* the. There are sometimes others—Overlord, Arcee, Starscream, Grimlock—but they're more often notorious. Only Optimus and Megatron are universally respected and/or feared.
* The there's Cell: "Ow, my ass-butt!" and "Ow, my beak-mouth!" The first one follows him commenting: "Might be a slight pain in the ass, but-" before getting cut off by an attack from behind.

* The Thermians don't just lack the concept of fiction; it becomes the
* The Theropod sub-family of Bird Wyverns have eight large monsters that have the same basic concept (an oversized
* The Thessaliad, in which Dream's murderous ex-girlfriend Thessaly deals with new problems brought on by a ghost named Fetch.
* The Thessaliad, Thessaly talks her way past a Sphinx and an axe-murderer, distracting the former long enough to escape on a train and distracting the latter long enough to cast a shrinking spell on him and then cleave his head in two.
* The The Super Mario Bros. Super Show, used frequently as a vehicle in the Mushroom World. One peculiar example featured a biplane with magic carpets for wings.
* The "The" Title Confusion: Trouble with how to alphabetise titles that start with the word "the".
* the. The USA isn't alone in this regard, China and Iran are also trying to block internet, albeit to a far greater extent.
* The Thick of It and attack dog whom Malcolm uses as much by reputation as by actual force. More than once he has convinced someone to get motivated by threatening to call Jamie over.
* The Thick of It and back again so violently you wonder he doesn't give himself whiplash.
* The Thick of It" being a major plot point, but that's par for the course.
* The Thick of It doesn't see his family much. Considering what his only distraction is, one supposes he really doesn't do much beside work. He's not happy about it.
* The Thick of It-educated posh boy Olly sometimes tries to put on a humourous Jafakean accent. The effect is ludicrous:
* The Thick of It, friendly versions — such as Malcolm's suggestion to Bono that he go and contract AIDS getting turned into a 'radical new proposal to increase AIDS awareness', and 'fuck off and die, pal' becoming 'have a fucking great day, pal'. However, when he sends the draft of a foul email to Sky News presenter Adam Boulton to Sam, it gets returned saying that there's 'nothing wrong with it', so Malcolm sends it as is.
* The Thick of It had Malcolm Tucker coin the word "Omnishambles" which ended up being used by real politicians before eventually entering the Oxford English Dictionary. This baffles the writers to no end.
* The Thick of It has the unfortunate combination of a desperate urge to not seem glum or smug and the comedic timing of a deathwatch beetle. In the first series, Olly is the one who takes on this role, as he constantly attempts to prolong jokes and, as is usually the case in real life, ends up killing them stone dead. By the time the specials role around he's even lampshading it:
* The Thick of It he reverts to his usual intimidating self. His PA Sam's happy face says it all.
* The Thick of It: "I categorically did not knowingly not tell the truth, even though unknowingly I might not have done."
* The Thick of It is a political media strategist, who seems to have absolutely no communication skills, and whose speech consists entirely of buzzwords and nonsense. In the penultimate episode, it's revealed that he isn't doing this on purpose, he really thinks he's speaking in plain English, and using simple words and clear phrases requires real physical effort on his part.
* The Thick of It is played by Samantha Harrington; it's possible that the character is named after the actress, since this isn't uncommon in supporting roles on semi-improvised shows.
* The Thick of It: Julius asks him to hold up his fingers to count something and while he's talking, Glenn slowly lowers his fingers except for the middle one and keeps flipping the bird to Julius's face for a while.
* The Thick of It" line. Then Nicola declines to enter a lift with him on the grounds of claustrophobia.
* The Thick of It: Malcolm started simply as highly-strung and terrifyingly funny, but his characterization eventually developed into this as the series progressed.

It soon becomes apparent that jokes come out of him constantly in all situations, he doesn't care whether or not they make people laugh, and it's entirely a cover for a yawning pit of stress and existential horror.
* The Thick of It Malcolm that a disgraced former MP is here to see him, Malcolm rounds on Ollie, delivering him a metaphor about how when the Queen's butler sees a cockroach in the kitchen, he steps on it and she never knows. When Malcolm does eventually go and speak to the MP, he treats him with weary contempt rather than his characteristic foul-mouthed ranting, suggesting he finds him beneath even a bollocking.
* The Thick of It - Malcolm Tucker invokes this at one point when summoning Nicola to his office.
* The Thick of It of Malcolm and Jamie has been referred to as a Bad Cop/Bad Cop double-act.
* The Thick of It one with "blinky dork" Ben Swain. Jamie calls his nervous blinking "epilepsy of the eyes."
* The Thick of It. Over government policy. "Have some fucking chow mein!"
* The Thick of It ("quiet Bat-people") being broadcasted out of context across all of the papers. Another one corners Nicola attempting to get a shot of her next to a protester in a pork chop costume. Another one gets a shot of two Coalition politicians standing on children's play equipment at a party conference, attempting to get signals on their phones, but instead looking like they're playing like kids on the day a significant disaster happened. These all happen in one season.
* The Thick of It speaks his mind...because he knows full well that he's the smartest man in his field, and he's so valuable that his bosses would never dare get rid of him.
* The Thick of It specials, Robyn and Terri have a squabble... while Jamie chants "fight, fight, fight" and starts pushing their jackets off their shoulders.
* The Thick of It speech to the entire department, he specifically singles Emma out as a "standard-issue insipid posh bitch."
* The Thick of It states when threatening to subsume DOSAC and put them in charge of the tea run that "I like mine (tea) weak and white, like my men" then again, she was there in her 'angry capacity'.
* The Thick of It, Stewart Pearson asks his colleagues for "thirty of your Earth seconds" before making an announcement. Though strictly speaking Stewart's not an alien, just an obnoxious PR hack.
* The Thick of It Team Dad. The scariest, most abusive one imaginable.
* The Thick of It that any of the characters would allow it to be made - the politicians attempting to control the media forms a huge backbone of the theme, and the 'documentary' constantly displays them to be the ineffectual, foul-mouthed hypocrites that they are not allowed to be.
* The Thick of It Tom Davis, whose social skills are so lacking that the press officers doubt that they should let him out in public.
* The Thick of It. Unfortunately for her, she's so inept, he doesn't notice. This is not surprising as Terri is inept at everything.
* The Thick of It was filmed twice, once as scripted followed by an improvised version. The finished programme used material from both takes.
* The Thick of It. Well. He's working for the Secretary of State for Social Affairs and Citizenship, she's working for the shadow Dosac secretary. But then their bosses know about their relationship and his at least actively encourages it -just so Olly can leak policies to Emma, or know of hers. It also works the other way round. However, it's not clear that they actually even like each other...
* The Thief and the Cobbler, after launching himself with a javelin (and missing his target) he falls onto various clotheslines donning, among other things, some cartoonish undergarments and three pairs of shirts.
* The Thief and the Cobbler, all of the One-Eyes (an evil race that plans to destroy an idyllic Golden Land) have a single, big red eye.
* The Thief and the Cobbler "Am I Feeling Love?" This inconsistency is most likely due to the particularly lazy rehashing of the script.
* The Thief and the Cobbler animation. As a result, the animation varies wildly in

quality from scene to scene.
* The Thief and the Cobbler: At one point the Thief sees a bottle filled with jewels. Unfortunately, the jewels are too big for him to get past the opening. He won't let go of the diamond, even when the palace guards have him surrounded.
* The Thief and the Cobbler, CinemaScope had long been discontinued in favor of the more modern Panavision lens.
* The Thief and the Cobbler, during Zigzag's death scene, he falls into a pit and is eaten alive by a pack of crocodiles; we see him as a silhouette and a pair of eyes being munched by the crocs' teeth until all that remains is his still-talking head, which is then eaten by his pet vulture (also not shown).
* The Thief and the Cobbler explains that the safety and balance of the Golden City depends on three golden balls perched on top of a minaret. News of an invading army comes just as King Nod discovers that the balls are gone, but the defeat of said army only seems to be incidental to the Thief finding and "returning" them.
* The Thief and the Cobbler, finally decides the balls are more trouble than they're worth and lets Tack have them, walking off in a huff.
* The Thief and the Cobbler freakout. Zigzag tries to console Nod by reminding him that the kingdom is safe as long as the three golden balls are on top of the minaret, but when the Thief steals the balls, Nod's anxiety skyrockets even further.
* The Thief and the Cobbler. He has blue skin and six-fingered hands, and apparently doesn't need to sleep to sustain his life (the whole point of a deleted scene being that he finds humans foolish to "sleep their lives away" while he "is quite awake"). On top of that, he has very long, coiled feet that spring outward as he walks.
* The Thief and the Cobbler masters. To Williams, money was no object: if it could be animated, it would, whether or not it was relevant or cost-effective.
* The Thief and the Cobbler, Mighty One-Eye dies falling to his death from atop the cliff overlooking his warmachine.
* The Thief and the Cobbler out of the projector as it is rolling, rolls it up and runs off into the now blank screen. Gives new meaning to the term "scene stealer".
* The Thief and the Cobbler's character is speaking in rhymes, he is called by Price, to which he answers "But you've been dead for a couple of years !". Cue this dialogue (quoted broadstroke).
* The Thief and the Cobbler steals them back from the Thief and is attempting to use them in his own plot, he says "Now that I have the balls, I'll go see the King."
* The Thief and the Cobbler subverts it. There are elaborately shaded roses, scenes moving in 3D and way too many details in the climax which all look like they required computer animation - but were all entirely drawn by hand!
* The Thief and the Cobbler: Tack and the Thief go down the banister of a labyrinthine staircase in the Sultan's palace.
* The Thief and the Cobbler, Tack ties one of the bandits' shoelaces together when he picks him up by the legs.
* The Thief and the Cobbler. The Cobbler has his own trade, but Princess Yum-Yum laments the fact that her father won't let her help out with anything.
* The Thief and the Cobbler The names of Zigzag's minions are Tickle, Slap, Gopher, and Goblet. Some of the brigands are also called Hoof and Hook.
* The Thief and the Cobbler: The opening has the Thief opening woefully poor Tack's wallet in his sleep, only for a few moths to fly out.
* The Thief and the Cobbler, the Thief, while trying to pole-vault up to the palace's minaret, gets bounced around by awnings like a pinball. After sliding safely onto the ground, he slurs, "Well Marv, this concludes our pole-vaulting event, and now let's move on to the floor exercises..." before fainting.
* The Thief and the Cobbler, the titular thief's first attempt to break into King Nod's palace bring him in the royal toilet. While trying to get out he accidentally pulls the rope and is flushed back into the castle moat.
* The Thief and the Cobbler. Things made to glow this way include the golden balls, all fire, beams of light, Zigzag's flashy smoke bombs, brightly lit areas, and many

more...
* The Thief and the Cobbler versions — the army especially sounds just like an average crowd.
* The Thief and the Cobbler, who else but the Thief? He steals pretty much everything he can possibly get his hands on and tries to steal several things he shouldn't even try to get his hands on. At the end of the film, he also steals all the letters from the words "The End", and then goes on to steal the film strip itself.
* The Thief and the Cobbler. Yes, he literally steals the film right off the projector.
* The Thief and the Cobbler: ZigZag has one directed at his bird: "Oh Fffffffffffffffffff... phido!"
* The Thief and the Cobbler, Zigzag hops in pain after stepping on one of Tack's tacks.
* The Thief and the Cobbler: Zigzag tries to have Tack beheaded, and later has him thrown in the dungeon and tries to feed him to his pet vulture Phido, purely because he stepped on a tack that Tack accidentally dropped in his path.
* The Thief has the main character pulling a fast one on the mob boss who’s blackmailing him and getting stabbed and left to die in an alley. He does have one more trick up his sleeve, throwing a coin to get the attention of a passerby, but the novel ends before the reader can find out if it worked.
* The Thief implies that Gen wrote the book chronicling his adventures at the request of his sovereign.
* The thief is revealed to be a girl, upon which Ratchet comments "Whoah! He's... a she!"
* The Thief: Katya and Toljan pretend to be married so they can get a room in a communal apartment in 1952 Russia.
* The Thief of Bagdad (1924), the thief magically gets into the palace and falls in love with the princess, leaving without taking more than a token. Then he disguises himself as a prince and tries to win her, and gives that up because it's lying. He is in despair until receiving the advice to become a prince to win her. He then sets out to win her properly.
* The Thief of Bagdad (1940). Ahmad, the male lead, wears an open vest for most of the movie, but it can't really compare.
* The Thief of Bagdad (1940) has overtones of this — he's given a mechanical woman as a gift, who dances seductively in front of him, and when she goes to embrace him, "she" stabs him in the back.
* The Thief of Bagdad (1940), he's still stuck on the deserted island. Thankfully, he has more wishes.
* The Thief of Bagdad (1940) Jaffar has a mechanical flying horse, and uses a clockwork dancer named the Silver Maid to stab the Sultan to death.
* The Thief of Bagdad (1940): Jaffar, starts out as an Evil Vizier, although he does wind up usurping the throne rather early in the film.
* The Thief of Bagdad (1940) to a sultan who liked mechanical toys. When he went to embrace the dancing girl robot, it stabbed him.
* The Thief of Baghdad. Due to his actions, however, the aliens get upset and leave Earth, never to return.
* The Thieftaker Chronicles is a thief taker, a kind of bounty hunter paid to retrieve stolen property in times before modern policing.
* The Thieftaker Chronicles is still in full effect, characters with magic are referred to as witches by the ignorant regardless of their gender.
* The Thief Taker General is really good at this. In the Prologue, you are spotted by the Thief Taker General on the roof during the ceremony. In Chapter 2, as soon as you break the vault and get the ring you came for, the Thief Taker General comes through the door. He will come after you both in the Keep's vault and when stealing the Primal Shard on the Baron's Mansion, though he shows signs of expecting you.
* The Thief: Toljan telling Sanya to get Toljan's belt causes Sanya to wet himself in fright. As it turns out, Toljan, somewhat surprisingly, never does beat the boy.
* The Thief Who Couldn't Sleep Mustafa, thinking Evan doesn't speak Turkish makes

remarks such as "Your mother loves to perform fellatio upon syphilitic dogs" and "Your mother spreads herself for camels."
* The Thief Who Couldn't Sleep series, had his "sleep center" destroyed by a piece of shrapnel in the Korean War. This means he never has to sleep again, so he learns as many languages as he can through Berlitz tapes (to help with his globe-trotting espionage activities.)
* The Thieves Guild Diary gives a list of approved alibis, one of which is "I was committing another crime for which I have already given an alibi".
* The Thieves' Guild Diary illustrates the section on "Conflict Resolution" with three guild members, each pointing a weapon at one of the others.
* The Thieves Guild Diary to it for the amusement of the crowd that forms.
* The Thieves Guild operates interestingly and has played a background but persistent role in several books. It's a bit like an insurance agency crossed with a protection racket. You pay a fee to the Guild a few times a year and they're bound by contract not to mug/rob/steal from you. The more you pay, the better the contract. Simple ones include muggings that leave you with a few bruises, and high-tier ones see a thief politely tip his hat, flash his license, accept a coin, and walk away. The Guild offsets these structured crimes by coming down very,
* The Thieves Guild questline also allows you to do this; when you reach a certain rank you can bribe guards for half the normal price for bounties.
* The Thieves in the head once he has disposed of the Hong Kong police inspector.
* The Thieves, Pepsee and Julie are both expert safecrackers. Pepsee favours the drills and other gadgets, while Julie likes to feel the tumblers with her fingers.
* The Thieves, Wei Hong has several cops on his payroll. One reveals his presence by betraying his colleagues at a vital point during the climax.
* The thieves who stole Nathan Ledfield's treasures from the museum that was to house them are never caught.
* "...the thigh bone's connected to the backbone..." [Also nope, there's a little thing called a
* The thin bedroom walls (and the requisite banging) were one of the reasons Commander Murray was so keen to move out of his parents-in-law house in
* The Thin Blue Line and Dr. Watson ("sometimes there's months between cases - what do they do then?"). The somewhat old-fashioned Fowler is horrified.
* The Thin Blue Line case of Randall Adams, framed by the Dallas police for the murder of one of their own by a teenage boy.
* The Thin Blue Line had a guy being arrested after confessing to the crime the team was investigating. When he is interrogated, he confesses to the crime...along with several others...and starting WWII...
* The Thin Blue Line had the police being worried about a possible outbreak of football hooliganism due to a London team playing the local club. In arresting various troublemaking elements, they end up locking up the entire local club.
* The Thin Blue Line had two officers investigate a man who had the curtains closed for a few days, causing neighbors to be worried about him. Since he was hiring prostitutes, he thought the police officer was one of them, and was better choice than the nurse.
* The Thin Blue Line has Grim wanting to join a secret society called the "Todgers". He proudly rattles off a list of why he thinks they are better than the Freemasons, including better costumes and ceremonies — until Fowler chips in with "... and better nepotism."
* The Thin Blue Line has Police Inspector Fowler paired with live-in girlfriend Sergeant Dawkins. Although given Fowler's outlook on his duties however, this is not a major issue. At one point he offers Dawkins some advice, half now (as her senior officer) and half when he is on break (as her boyfriend, as he is not being paid to advise people as their boyfriends and so cannot due so during work hours.)
* The Thin Blue Line, Inspector Fowler attempts to find someone who can replace Constable Habib in the upcoming trivia contest. He resorts to the perps in the detention room. Fat chance.
* The Thin Blue Line, Inspector Fowler says this while pretending to be a pizza delivery boy so he can gain access to a bank where robbers are holding people

hostage.
* The Thin Blue Line is a bit luckier: in the annual Peter Pan performance at Christmas, he always gets the part of the crocodile who swallowed a clock. Tick. Tock.
* The Thin Blue Line made such a convincing case of Randal Adams being framed for murder by the police and the District Attorney that he was exonerated and released.
* The Thin Blue Line. Of course, this is modern-day London, so an ethnically diverse workplace makes sense.
* The Thin Blue Line. Randall Dale Adams is falsely labeled as a sociopath for showing "no remorse" for the crime; his lawyer argues that he naturally wouldn't feel remorse for a crime he didn't commit. Harris, on the other hand, genuinely seems to feel no remorse for any of his crimes, as noted by even his friends.
* The Thin Blue Line's town had the slogan "It's not as bad as you think".
* The Thin Blue Line when it turns out to be requests for drinks from a pizza place. "Tango. Tango. Lilt and a Fanta."
* The Thin Blue Line. When the criminals in a bank robbery demand a pizza, Inspector Fowler dresses the part to deliver it himself, saying "Pizza delivery! If it's not hot, there's a fifty pence refund on your next purchase of diet Coke, usual restrictions apply".
* The Thin Blue Line with Grim's group, "The Todgers", an exaggerated expy of the Masons whose rituals involve wearing a dress and kissing a frozen turkey's bottom.
* The Thin Dead Line", there was this reaction to learning that Gunn's plan to expose (zombie) cops who were attacking people was to go videotape them attacking him.
* The Thin Formerly Green Line changed their uniforms to dark blue, partly on the urging of the European Union to make all European police uniforms dark blue.
* The Thing (1982). Although there's a good chance he was right to act so crazy. At first, anyway.
* The Thing (1982): Although they don't react to the Thing immediately, the dogs eventually rouse themselves and start growling and snarling at the newcomer, despite its (initially) normal appearance.
* The Thing (1982), a remake of the above, the American crew of Outpost 31 pretty much collectively shits their pants when they realize how smart the eponymous Thing is. Everything from destroying blood samples to leaving false evidence as who has been impersonated to picking off the smartest members of the camp who could come up with ways of identifying it, culminates in trying to shut off the power so it can freeze again for a rescue team to discover it, while at the same time killing its human enemies in the brutal Antarctic winter.
* The Thing (1982) are the only survivors, with their fates looking equally bleak.
* The Thing (1982): A strange alien found in the artic with the ability to mimic any living creature. Whether it intended to go to Earth in the first place is unclear. It still threatens to take over.
* The Thing (1982): Both Fuchs and Nauls die offscreen. Only Fuchs' burnt corpse is found.
* The Thing (1982) both to stop his research and to stir up distrust and paranoia among the remaining humans.
* The Thing (1982) creates its notorious sense of paranoia from this, though in this case it isn't so much "anyone could have committed the murder" as "any one of twelve men could in fact be a hostile shape-shifting alien capable of creating a perfect copy of people that it kills". Naturally, a good chunk of the plot is simply driven by the guys trying to figure out who to trust.
* The Thing (1982) ends with the two surviving heroes still stranded in Antarctica, unsure of whether the other is actually an alien.
* The Thing (1982). Even when the protagonists have finally worked out who's an alien and who isn't, events serve to split them up again, so when that person reappears, so do the old suspicions.
* The Thing (1982) find out what happens to Mac, Childs, and Nauls, but it's strongly implied that they all die. That is one ambiguous movie.
* The Thing (1982). Garry (the station commander) was tied down in case he was one

of the Things. He has just been proved to be human and not a Thing, but he's still annoyed.
* The Thing (1982) has a character who serves this role appropriately named "Windows" (possibly a nickname meaning "window to the outside world"), although a dead radio made it impossible for him to ever contact anybody.
* The Thing (1982) has a particularly infamous scene where a man's arms are suddenly bitten off by the titular monster. For two shots that each lasted only a few seconds, there was an actual amputee standing in the actor's place wearing a mask in his likeness.
* The Thing (1982) has Blair give more details about his discovery as well as the fact there is still cellular activity within the remains...
* The Thing (1982). Helicopter pilot MacReady leaves an Apocalyptic Log to warn the eventual rescuers about the title monster.
* The Thing (1982) infected or are they still human? To this day fans still debate on these questions and more.
* The Thing (1982). It infects a host, slowly replacing them from the inside out until none of the original remains, becoming just the form of a new "colony" of Thing cells.
* The Thing (1982), MacReady and the rest of the U.S. number-31 crew go through this after Garry shoots the last of the Norwegians from Thule station.
* The Thing (1982)... making it a novel based on a film based on a short story (ignoring the previous film version of the short story which had little to do with the original).
* The Thing (1982) one, not the space carrot), provided it has biomass to feed on. The kicker? It only needs a single cell to consume you from the inside out.
* The Thing (1982), sealed in a block of ice until some ill-advised Norwegians dig it out.
* The Thing (1982)'s eyes were also cast in shadow while everyone else's reflected light, and in the original script the pre-reveal dog thing's eyes were "black orbs".
* The Thing (1982), so the only sure way to destroy it completely is with fire. But even then, it's not even particularly flammable. Fire is the only way to do it, but it's still not a very good way.
* The Thing (1982) strategy so it can pick off the camp one by one. Every time it is forced to reveal itself, it only manages to kill one or two people before being quickly immolated or blown up. It's made quite clear that if not for these circumstances (or if it were to get out), this trope would be very much averted.
* The Thing (1982) surprises the humans, and the first time it reveals its ability to take human form, is when a doctor trying to electrically resuscitate a collapsed comrade has his arms bitten off when the Thing opens its chest into a toothy maw before he can zap it further.
* The Thing (1982)'s version speculates that, facing defeat, the Thing might simply return to the ice and await the next group of suckers to uncover it.
* The Thing (1982) that spreads its cells to others makes it that much worse and nearly impossible to kill.
* The Thing (1982): The alien has knowledge of advanced technology, as evidenced by its flying saucer (and its attempt to build another ship with scrap parts). More importantly, it can shapeshift into virtually any organic form and spread itself to take over and replace other life forms, to the point that all the humans on the arctic base realize that letting this single specimen into the wider world would be an extinction-level catastrophe for all life on Earth.
* The Thing (1982): The eponymous entity takes this to its logical conclusion, with every single portion of its body, even a few drops of blood, being capable of functioning autonomously.
* The Thing (1982). The plot becomes just as much about making sure it never leaves as about the science crew's fight for survival.
* The Thing (1982), The researchers at Outpost 31 turn on each other when they realize the alien could imitate anyone. Paranoia and intense tension build up, resulting in one of the most bone chilling endings ever made.

* The Thing (1982), the so-called "Thing" is an organic variant that gruesomely assimilates living tissue.
* The Thing (1982): The titular antagonist is the living embodiment of this trope. It's a microscopic organism that replicates other life forms at a cellular/genetic level as it consumes the host, leaving behind a perfect imitation with all of the memories, personalities and abilities of the original - with the additional drive to infect other hosts and spread.
* The Thing (1982)Thing absorbs several people and gathers all its biomass into a twisted amalgam as a last-ditch survival effort.
* The Thing (1982). Though, then again, the time lapse of his assimilation is ambiguous; the alien itself may have been the one to do all these things.
* The Thing (1982) to avoid being burned with the rest of the body, grows legs, and walks away.
* The Thing (1982) with a defibrillator, forcing the Thing to transform and blow its cover in order to stop the painful electric shocks.
* The Thing (1982) works. Specifically it's a shapeshifting alien that eats animals (dogs and humans in the movie) and then mimics their appearance and memories to become an exact replica.
* The Thing (2002) continues from the first film after a rescue team is sent to investigate the remains of Outpost 31, then later runs into even more aliens at different research outposts and covert military bases across the continent.
* The Thing (2002): Unsurprisingly, the U.S. army wants to weaponize the Thing. Colonel Whitely event shoots Dr. Faraday when he objects, though it's implied that he was already infected by that point.
* The Thing (2011). By the time things start going wrong, the same storm which disrupts Window's communications is approaching (though sabotage is also a possibility, as the alien has had time to take human form).
* The Thing (2011) does this; its arms drop off and scuttle about assimilating people. This only happens once, and may be a response to its body being fatally injured.
* The Thing (2011). During the helicopter ride at the beginning, Carter, one of the pilots, waves at passenger Kate to put on the headset next to her so that they can talk clearly.
* The Thing (2011), especially in the 2011 movie where they're used to kill as well as assimilate humans.
* The Thing (2011): In a polar research station filled to the brim with Norwegians, of course the Americans are the heroes.
* The Thing (2011), in February after the last flight out before Antarctic winter leaves.
* The Thing (2011); it shows how the monster was first discovered and what it did to the Norwegian base.
* The Thing (2011). It was initially advertised as a remake until viewers saw that the plot points indicated that this took place prior to the events of the 1982 film and it's mostly confirmed by the ending.
* The Thing (2011). One character hides from the Thing in a storeroom, protected only by a pair of swing doors. All he can do is stop them moving, in the hope that the alien monster won't realise someone has gone inside. It doesn't work.
* The Thing (2011), one Thing diagonally opens its ribcage into a snapping mouth while attempting to kill a female protagonist.
* The Thing (2011) prequel. Kate survives her encounter with the alien, but she's effectively left stranded in Antarctica so it's anybody's guess if she truly survives or not.
* The Thing (2011) where it can be incinerated within the stainless steel walls without burning the entire base down (that comes later).
* The Thing (2011) while being something different? A great prequel that does a good job connecting to the Carpenter film, a cheesy monster film? A cheesy generic monster movie that fails to capture everything of the Carpenter film? A thinly-veiled remake of the Carpenter film?
* The Thing (6'0) and Alicia Masters (5'4) when Johnny (5'10) asks how Ben and

Alicia manage a sex life. He then explains that he's only asking out of concern that Alicia might one day be killed in a "rock slide" and runs as Ben comes after him.
* The thing about the Sentinel bots in the MU is that their behavior is actually
* The thing about this (and a large part of her contribution to the Leveson Inquiry) is that while half the press condemned her for doing anything not sweet and innocent, the other half had a
* The thing about whole wheat (or whole grains in that matter) is that they may have more nutrients than refined grains, but they contain phytic acid, which interferes with the body's ability to absorb many useful minerals. For some, eating whole grains raw may do more harm than good compared to eating refined grains, unless they are properly prepared (soaked, fermented, etc,.) One detrimental effect of phytic acid is tooth decay, which is made worse by the sugary toppings of most doughnuts and pop tarts.
* The Thing: a tabletop adaptation of the film (cover pictured above).
* The Thing certainly resembles a Golem after his exposure to cosmic rays, being a giant, strong rock-man and all that. Bonus points for also being Jewish.
* The Thing from Another World (1951), in an awkward romantic moment, a military officer lets a woman tie him to a chair after she claimed he was too handsy last time. He has already slipped out of his bonds by the time she confesses to things and says she would never have said them if he wasn't tied up.
* The Thing from Another World (1951). The search team position themselves around the edge of the crashed 'aircraft' under the ice and realise they're forming a perfect circle, whereupon they become quite excited at having "finally found one".
* The Thing from Another World, a Geiger counter is used to herald the title creature's approach.
* The Thing from Another World, but it's implied at the end that there's more of those things out there, and they may come attack again at any time.
* The Thing from Another World, centers on a conflict between the scientists and the military over how to best deal with the alien creature (which is a more conventional monster rather than a shape-shifter).
* The Thing from Another World cuts off his arm with a machete to keep himself from being infected.
* The Thing from Another World, focusing on a research team answering the S.O.S, finding the frozen remains of the Thing, bringing it on their ship and naturally all hell breaking loose.
* The Thing from Another World is a complete moron who continues to insist in the face of increasingly overwhelming evidence that the alien the base is dealing with is an intelligent and peaceful being, and repeatedly endangers everyone's lives trying to communicate with it.
* The Thing from Another World is probably the film that popularized the "hunted" variant of this trope, although that particular film actually had a pretty low body count (the only casualties being a few minor characters who are killed off-screen).
* The Thing from Another World. Marco asks Tom who he's texting, and he replies with "your mom". Ax starts a tangent about how he recognises that form of humour, until Marco says that Tom was being literal.
* The Thing from Another World of the wildlife has been assimilated and it won't be long before they've spread all over the planet.
* The Thing from Another World's film. How directly Hawks was involved in production has long been debated, even by people who actually worked on the film.
* The Thing from Another World that amidst the in-fighting over what to do about "The Thing" (protect the world by destroying it or try to communicate with and understand it) he just wants to get a photo of the monster (and repeatedly joins several armed searches for the Thing solely for this purpose). He does still get to say the memorable final words of the film, though.
* The Thing from Another World that will kill everybody that gets in arm's reach) and aim to kill it first.
* The Thing from Another World, the eponymous invader gets doused with gasoline and set ablaze; like the Freddy Krueger example above, he/it continues to run amok.

Especially notable in that this was the first time the stunt was attempted for a movie.
* The Thing from Another World, the protagonists attempt to light The Thing on fire. Unlike the Carpenter film and the original short story, the Thing just charges out of the room, setting it ablaze in the process.
* The Thing from Another World the scientists find that their reanimated alien is a plant, not an animal. A reporter finds the idea of an "intellectual carrot" mind boggling but is told there are plants on Earth (like the Telegraph Vine and the Century Plant) that have a "kind of thinking". He's also told that intelligence in plants is older than "... the animal arrogance that ignores it." Of course, the chief scientist keeps saying the alien is wiser than us, confusing intelligence with wisdom.
* The Thing from Another World, they barricade a door against the monster, but the door opens the other way.
* The Thing from Another World was set in Antarctica. There are two Antarctic research stations seen in the remake. One is the Norwegian post which discovered the alien spacecraft embedded in the ice crust. The other is the American post which adopts a sled dog that had been fleeing Norwegian commandos. The dog later turns out to be an evil, pleomorphic alien. While trying to learn more about their foe, the Americans visit the Norwegian post, which is found to be a thoroughly burnt and ravaged ruins.
* The Thing from Another World, which it actually is and all the other characters note), and pulls a number of dastardly acts in an attempt to understand it (and make contact with it).
* The Thing From the Grave": When Stacy screams for help as Mitch prepares to murder her, Devlin's hand bursts up out of the shallow grave where Mitch buried. A series of intercut shots then show Devlin hauling himself out of his grave and coming to rescue Stacy.
* The Thing goes back and forth on the issue usually presenting himself as someone who has adjusted to the condition and enjoys the benefits, but sometimes something happens to remind him that not everybody accepts him.
* The Thing, has a unique take on this trope. While he is bulletproof, it's been mentioned on many occasions that while a small number of bullets (no matter what the caliber or even if they're armor-piercing) is no problem, the heavy and sustained automatic fire could chip away at his armor sufficiently enough to allow bullets to start getting through. Then, as Ben puts it, he'd be in for a bad case of bleeding.
* The Thing has repeatedly been restored to his human form over the years, but, either due to the cure not taking, or him needing to regain his powers for some reason, the poor guy always reverts back to the old rockskin.
* "The Thing", has the protagonist struggling to rid himself of a !!!, which is drummed over every time it is mentioned.
* The Thing he gets into an exchange like this involving the words "We" and "Oui". He mentions the trope namer.
* The Thing human. All the other men and all the dogs are killed; as for the Thing itself, there's really no way at all to be sure if it's dead for good, or if anyone else will be stupid enough to defrost it again if it's not.
* The Thingies With Drawings Inside Squares And Circles, But On The Internet
* "The Thing in Mrs. Faversham's Attic"; a nice old lady hires them as the haunting in her house (which had been going on for 70 years) suddenly became more and more aggressive. It turns out that Mrs. Faversham’s father invoked an
* The Thing, in which a rescue team investigates what happened at outpost #31 and encounters a Thing plague.
* The thing is that the protagonist is in a trap from the start, there are supernatural forces at play which he makes the mistake of underestimating from the start. His wife has an irrational fear of death (by which I mean she can't even stand to
* The thing is, the two guys in question are 1) werewolves, and therefore have super strength, and 2) moving so fast that every time she attempts to stab Liam,

she has to pull up fast so she won't stab
* The Thing like the highly educated man that he is, along with being overshadowed by his super-genius former classmates.
* The Thing once met a future version of himself who easily overpowered him. His future self noted that Ben will never stop getting stronger.
* "The Thing on The Doorstep": Ephraim Waite's wife is heavily implied to be a Deep One - or at least, have some Deep One blood. Their daughter is Asenath, who is "dark, smallish, and very good looking except for over-protuberant eyes".
* The Thing on the Doorstep" is based on this concept: A man's wife is, in fact, his father-in-law, who now has designs to retake a male body.
* The things listed above are the exceptions to the rule — K-F Drives are 98% safe, as long as the capacitors don't blow. However, the understood mechanics of jump travel are almost as bad as the parts that aren't understood. Every single time a ship jumps, heat is manifested at the destination prior to the ship showing up. The more mass being jumped, the longer and hotter. It basically builds from the time the ship starts its jump to the point it emerges. Contrary to popular belief, jumping isn't instantaneous. Although still faster than light speed there
* The Thing's Mego toy counterpart does this, and similar pranks, on a regular basis in
* The Things They Carried is a defense against fear, but he's probably lying again to save his ass.
* The Things They Carried. Soon after, Tim himself is shot and nearly loses his leg because Rat's replacement forgot to treat him for shock. Tim is rather bitter about this. Tim learns that the new medic is actually a nice guy who was simply inexperienced and cracked under the pressure of combat. Tim comments that if he could only bring himself to hate the new medic, he could also forgive him.
* The Things They Carried stars a fictionalized version of himself leading him to put a disclaimer in the book that it's a work of fiction as many other characters are also named and based off his own squad mates in Vietnam.
* The Things They Carried Tim O'Brien's semi-autobiographical novel features the story of Timmy and Linda, quite possibly the saddest story in a novel centered around The Vietnam War.
* The Thing. Super-strong & nigh invulnerable. Sure he's not the best looking guy around, but despite this he's had several women attracted to him, Alicia Masters, Thundra, the second Miss Marvel, heck even Tigra seemed interested in him. Boo-hoo, poor Ben.
* "The Things You Don't Mean" has a rather hilarious moment at 1:18 where a kitten walks onto the set in the middle of the video and starts batting at the scenery. You have to wonder who didn't make sure that the cat couldn't get in while they were filming it...
* The Thing That Couldn't Die back in the 1500's. It was dug up centuries later by a bunch of dim-witted ranchers and was able to manipulate anyone it made eye contact with. Only after it had been reattached to its body could it be destroyed. Tom Servo showed during the host segment of this film that he too possessed such a talent.
* The Thing That Couldn't Die. When she falls under the undead sorcerer's power, she switches to a black dress with significant cleavage. (No one seems to notice this drastic change in her personality).
* The thing that dug the flying boats in wasn't the development of a jetliner — these still needed long paved runways — but the improvement in airport infrastructure. After WWII, with its ever-increasing speeds and number of planes, most significant airfields in the world acquired paved runways and observation radars, which finally allowed the safe and efficient usage of long-range airliners, and the developments in long-range bombers during the war had directly translated into airliner development. In fact, the second jet airliner in the world, the Soviet Tu-104, was essentially a civilian version of their first jet strategic bomber, Tu-16, and they later did the same trick with the turboprop Tu-95/114 combo.
* The thing that made Final Fantasy X different from the other Final Fantasy games

(besides the Sphere Grid system) was the ability to switch Yuna's seven guardians between the three battle line spots to the four reserve spots. Even though the cast have valiantly fought together side by side in cutscenes, if the three main battle contenders are KO'ed, then it doesn't matter how strong or healthy your reserve members are,
* The thing that prompts his rant? When he enters the room...she is LITERALLY the only person who does not stand to greet the President, showcasing a complete and utter disrespect for him personally and his office. So he proceeds to show her none as well.
* The Thing That Shatters The Sky offers to provide the Torqeltones safe harbor on the moon in gratitude of his liberation so they can live in happiness as his plans destroy the World. He seems unphased when they talk of choosing to fight him instead, telling them to weigh their options carefully and consider whether the glory of taking down a void god is worth the perils of facing one.
* "The Thing That Should Not Be" is also inspired by one of Lovercraft's
* The thing that the character must keep secret isn't something they have in common with family members
* The Thing That Would Not Leave: A guest overstays their welcome, much to the dismay of their host.
* The Thing That Would Not Leave: A guest who proves annoying because they overstay their welcome and refuse to go away.
* The Thing That Would Not Leave. He hasn't even taken an official position in the Incubi hierarchy despite being more than qualified to be a Hierarch. He shows no ambition whatsoever and exists solely to kill. Nobody knows anything concrete about him, though rumors abound that he is actually the fallen Eldar Phoenix Lord Ahrha.
* The Thing). To add to the bleak tone, all three of the survivors across both films were last seen in a position where they could have easily frozen to death (assuming none of them were assimilated by The Thing beforehand).
* The Thing. To hide and hunt efficiently, the Thing orchestrates paranoia to the heroes, causing them to accuse each other for being the alien menace.
* The thing was, at that time (namely late-Fifties) The Soviet Air Force lacked both the planes and missiles that were able to reach the altitude the American spy-planes were routinely operating at. Building speed in a level flight and then trying to hit them (either with guns/missiles, though the earlier Soviet AAMs weren't very good too, or simply ramming) with a climbing attack was an only realistic way to bring them down. The matter was made moot in 1960 when the first Soviet high-altitude SAM, S-75 "Dvina" came online and brought down Gary Powers' U-2 in the incident mentioned above.
* The Thing well, but it makes Ben feel more comfortable when stepping outside. Also, everyone on Yancy Street loves the big lug so much they just go along with it.
* "The thing with no name" that resides in a lake inside a cave where the Truffle Trolls live in
* The thing with the ring. Why be so incredibly stupid that you can't figure out that maybe the ring won't flush? Why be so completely irrational after planning something for so long? And why didn't she
* the thin H line,ype" and thanking him for the compliment. She continues in this vein when he calls her a bitch:
* The Thinker loves reminding Barry and Team Flash of how every failure they've experienced at his hands.
* The Thinker Statue is used as the murder weapon in both case 1 and 2 of the first game. Also the fact that the statue is secretly a clock comes up in both cases as well (you nail two criminals when
* The ThinkGeek website recently invoked this trope on their newly released "
* The Thinking Ape Blues features an alternate universe in which zeppelins are frequently seen in the sky.
* The Thinking Machine abducts his muse and imprisons her in a padded closet where he attempts to asphyxiate her with chloroform.
* The Thinking Machine abducts the woman who was his muse when he learns she does

not return his love.
* The Thinking Machine'. After nearly being killed in "The Problem of the Deserted House", he remarks:
* The Thinking Machine and is able to deduce his patient's name, address and profession; that he smokes; that he is wearing his clothes for the first time that winter; that he was widowed a few months earlier; that he kept house then; and that the house was infected with insects. After the narrator professes his astonishment, Van Dusen explains that the name, address, and occupation he got from the man's business card, which he read while he was unconscious. The other facts were actual deductions, however.
* The Thinking Machine: As the title implies, "His Perfect Alibi" involves a murder where the murderer has constructed what seems to be an airtight alibi making it impossible for him to have committed the crime, despite all of the other evidence pointing to him. It falls to Van Dusen to work out how he did it.
* The Thinking Machine: Averted in "The Ghost Woman". A cracksman jumps through a closed windows anfd vanishes into the night. However, Van Dusen notes the amount the amount of blood on the broken glass, and states that one cannot crash through a closed window and fall 20 ft. to the ground without sustaining serious lacerations and injuries. He reasons the man would have had to seek medical attention, which is how he locates him.
* The Thinking Machine: "His Perfect Alibi" features a rare variant in the which the victim manages to actually write down the name of his killer before expiring. However (as might be guessed from the title), the killer has a seemingly perfect alibi that makes it physically impossible for him to have committed the murder.
* The Thinking Machine. However, the parrot had belonged to a misanthrope and constantly swears and is insulting. After a few days with the bird, the normally even-tempered Van Dusen hands it back to its new owner with the warning that if he ever sees it again, he is going to kill it.
* The Thinking Machine: In "Convict #97", a convict escapes by forcing his twin brother to take his place on the cell. Van Dusen works out what has happened because the brother's have different shoe sizes.
* The Thinking Machine: In "His Perfect Alibi", a murder is committed and every single piece of evidence—including a dying declaration by the victim—points to one man. However, that suspect has the seemingly airtight alibi of having been in a dentist chair having a tooth extracted at the time of the murder. It is up to Van Dusen to work out how someone could seemingly be in two places at same time.
* The Thinking Machine: In "My First Experience with the Great Logician", the narrator accidentally poisons himself by smoking a cigar he stored in a jacket pocket where, several months earlier, he had carried a packet of insecticidal powder. Some of the powder had leaked and coated the tip of the cigar.
* The Thinking Machine: In "The Great Auto Mystery", a woman is found stabbed to death in the front of an open-air automobile. It is ultimately revealed that woman was not the one everyone thought she was, that the death was really suicide and that one of the passengers knew the truth but could not say anything as it would have raised a large number of awkward questions.
* The Thinking Machine: In "The Lost Million", a bitter old hermit tells his heirs before he dies that he has hidden his fortune where they will never find it. The only clue is the old man's parrot, which constantly swears and spouts random calculations. Van Dusen takes the parrot and, by writing down everything the parrot says, works out the numbers are actually a set a measurements. The old man had repeated them over and over when planning the hiding place, and the parrot memorised them, and was repeating them randomly. Once Van Dusen places them in the correct order, he just has to deduce the starting place.
* The Thinking Machine: In "The Problem of the Deserted House", criminals rent an old, abandoned house and, over the course of several months, construct a tunnel from the cellar to a bank vault (crossing a subway tunnel in the process), so they will have the secret passage in place with a shipment of several million dollars in gold arrives.

* The Thinking Machine, is a university professor who solves 'impossible' crimes that are brought to him by his journalist friend Hutchinson Hatch.
* The Thinking Machine stories; giving Van Dusen someone to explain his brilliance to. In the radio adaptations, his role is expanded and he becomes the narrator of the stories, much like the original Watson.
* The Thinking Machine: This is proposed as a solution to the vanishing of Baby Blake in "The Disappearance of Baby Blake". Van Dusen shoots the idea down by pointing out that no eagle found in the local area would have the strength to lift a two year old. Of course, the real solution turns out to be stranger (and even less likely).
* The Thinking Machine, Van Dusen acquired his nickname when he defeated a Russian grandmaster despite never having played a game of chess just by reading the rules and then applying pure logic.
* The Thinking Machine', was an early American imitator of Sherlock Holmes.
* The Thinking Zombie Claktor Bloodfist has this quality, which it presumably received by rolling it on the random undead generation tables.
* The "Think! Mark! Think!" meme got a lot of people interested in watching
* The "Think Tank" may also be a jab at Warner Bros. When Warner Bros. launched the Warner Animation Group in 2013, it was described as a "think tank for animated films."
* The Think Tank). They are also the most brilliant minds of the pre-war world, responsible for game-breaking technologies and many of the Mojave's most horrifying mutant creatures. A good portion of New Vegas' DLC couldn't have happened without them, and other characters make it clear that they are no less dangerous for their deteriorating sanity.
* The thin line between special operations and terrorism is a key theme of
* The thinly-veiled Church of the One God in the works of V. Ivashchenko is most often of the "divine vs. arcane" variety.
* The Thin Man: A son talking to reporters calls his missing father a "sexagenarian." The reporters protest, "We can't print that kind of language!" The confused son asks why they can't print that his father is in his sixties.
* The Thin Man background, but happily follows Nick into the private eye's Stale Beer life.
* The Thin Man, early in the movie the odd watchchain of The Old Professor was pointed out. That same watchchain was later used in an effort to frame the Old Professor by leaving it at the scene of a murder. (But the Professor's alibi was solid — at that point he had been dead for over a month.)
* The Thin Man example of this trope: Nick was a working-class detective when he married high-society heiress Nora. Their vastly different backgrounds occasionally impact the plots.
* The Thin Man Nick Charles solves the mystery by this method. In the first movie, by his own admission, he hadn't quite sussed who the murderer was; he'd ruled out most of them, so he laid out the facts until one of the remaining suspects fit, and made an accusation.
* The Thin Man) out of a sticky situation. She's not too happy when she comes to, but she lets him off the hook when he explains. Then they have a drink together.
* The Thin Man series: He's a former private detective! She's a wealthy socialite! They Fight Crime! (Between drinking binges, that is.)
* The Thin Red Line (1998), one of the protagonists (Private Bell) tells anyone around him how he really loves his wife (and so won't cheat on her with the local Ladies of Negotiable Virtue). In a (possibly unintentional) hilarious moment, about halfway through the film, he then receives a Dear John letter from his wife about how she's found a new love.
* The Thin Red Line (1998) the antagonistic Lt. Col. Tall orders a suicidal attack, because the battle offers perfect opportunity for promotion.
* The Thin Red Line, although several other NCOs (e.g. Bell) qualify as well.
* The Thin Red Line arc downplays this a bit, as the military response Gordon Brown orders, while belated, ultimately does stave off the spread of the infection and manages to quarantine Nottingham successfully.

* The Thin Red Line as Lieutenant Colonel Tall. They don't come much more grizzled.
* The Thin Red Line: due to experiencing "combat numbness", people fail to feel anything for the suffering of their fellow men.
* The Thin Red Line) had their screen time drastically reduced to one or two scenes each.
* The Thin Red Line how lucky the younger officer is to have a war upon graduation from West Point because the Colonel has "worked, slaved, eaten untold buckets of shit to get to where [he] is now!"
* The Thin Red Line is a pre-Vietnam example — a rather slow-witted yet ambitious soldier who seems to take pleasure in doing horrible things to the enemy.
* The Thin Red Line: Private Ash refers to being shot in the knee this way.
* The Thin Red Line secretly brews "swipe", an alcoholic drink made of canned fruit. When discovered, he's forced to teach the trick to the rest of the C Company, which leads to everybody getting staggeringly drunk.
* The Thin Red Line: Sgt. Welsh spends several seconds watching the peacefully sleeping Witt, betraying that he does harbor affection for his men and is not as cold-hearted as he seems.
* The Thin Red Line suffers a nervous breakdown after all his men die in battle.
* The Thin Red Line the amoral Dale is motivated by his desire to become a sergeant (this aspect of his character is absent from the 1998 film).
* The Thin Red Line (the James Jones book that Terrence Malick's famous film is based on) discusses this notion and has several examples among its cast of characters.
* The Thin Red Line. The jungle is beautiful, oppressive, and indifferent to the sufferings of the soldiers.
* The Thin Red Line: The very last scene shows a coconut sprouting on the beach.
* The Thin Red Line when Sergeant Keck grabs a grenade hanging on his webbing, only to realise to his horror that he's only holding the pin. The grenade explodes before he has a chance to correct his mistake.
* The Thin Red Line whose gruffness and aloofness effectively mask the compassion he feels for his men.
* The Third 2nd Live which ended with the announcement of the band's new name.
* The third act of the Bounty Hunter storyline has the player's rep sheet being filled with enough fraudulent crimes to make them the Galaxy's Most Wanted, making them unhireable save for a particularly ruthless Sith Lord. Granted, the player is already a war criminal by that point, but the events basically pin them as (and force them to become) terrorists.
* The third act originally featured a long sequence (described as "a film within a film") where various characters reunited during the final battle amid the ruins of the Avengers Headquarters and formed a plan to attack Thanos' army. This was cut on the basis that it would have padded out an already-long movie.
* The Third Age prior to the main events of the books is a three-thousand year version of this. The Last Alliance defeat Sauron at the end of the Second Age, but Isildur fails to destroy the Ring, which leads to the estrangement of Elves and Men and his untimely death, which itself causes the split of Arnor and Gondor. Arnor ends up fragmenting into smaller states and slowly being gobbled up by Angmar, with the Elves only helping when it is destroyed, while Gondor spends centuries fighting the Easterlings, Haradrim, and itself, leaving it a shadow of its former self by the time Sauron rolls round again.
* The third and final commercial shows a broadcast of a man bungee jumping over a river before his head is bitten off by some hungry crocodiles as the cameraman once again cracks up.
* The third and final time, when the tour bus begins to descend back to Bikini Bottom, it runs over a lifeguard's foot. Just as Patchy is about to catch up, the lifeguard accuses Patchy of running over his foot and stops him.
* The third and fourth seasons, produced in 2001-2003, were intentionally designed and animated in the style of a 1960s
* The third and sixth season premieres feature Buffy's friends attempting to keep Sunnydale's vampire population in check on their own while she was off

* The third are the Dark Iron Dwarves, who have grey skin and red eyes and were until recently enslaved by a massive fire elemental (that they summoned in a failed attempt to destroy the other two clans). They're pyromaniacs with strong magical abilities and were written as
* The third are the Mylings, the ghosts of children murdered by their mothers or caretakers. If one hears the cries of a Myling but chooses to ignore it, the Myling will exact its revenge... all it really wants is to be reunited with its mother, though. That said, it's not unheard of for them to murder their mothers once reunited with them.
* The Third Battle of the Piave, also known as Battle of Vittorio Veneto from the site of the decisive breakthrough, was the last stand of the entire Austro-Hungarian Empire, as they offered a formidable resistance even as the nation they were fighting for collapsed under the weight of the battle.
* The third Black Knight, Dane Whitman, ends up having two different squires:
* The third Black Knight Dane Whitman's first squire, Sean Dolan, suffers from this. As himself, he's a normal human
* The third book also shows that members of the Inquisition are able to appeal directly to either the Light or the Dark (depending on what kind of Other they are) for a temporary boost in power, if necessary to carry out their duties.
* the third book, bad guy Gasher does it to Roland when the Gunslinger comes to rescue Jake.
* The third book has a number of non confrontational Screw You, Elves! Where the main character comes to disagree with certain things he learned form the elves in the previous book (vegetarianism and atheism, respectively).
* The third book has been written. However, since it has been so long since the first two, Baen wants to re-release the first two before publishing books three and four.
* the third book only says, "Is that what you think happened? Oh, my, Mr. Dresden, do you have a surprise waiting for you."
* The third book reveals that Skulduggery has uncool cars stashed all over the place. This suggests that he is either very fond of his car (and doesn't want to drive it into situations he knows will be dangerous) or it gets damaged a lot.
* the third book, Ron ends up getting detention from Professor Snape, after critizing Snape for calling Hermione a know-it-all when she answers a question. It is mentioned that everyone in class has called Hermione a know-it-all at least once, and Ron calls Hermione a know-it-all about twice a week. But they all understand that it's far worse when a teacher does it.
* the third book, Ron's family winning a large cash prize in a contest run by the paper is the leading article. Granted, the newspaper would want to toot its own horn, and they'd probably mention it somewhere on the front page, but that's still not enough to make it the leading story. Especially considering that barely a month earlier, a teacher lost his memory, a student nearly died, and a prominent citizen lost his position on the Hogwarts Board of Governors. And all this under suspicious circumstances, in a children's school which most wizards consider to be the safest place around. You'd think they'd at least have pointed out that one of the kids featured in the article was the girl who almost died at Hogwarts.
* The third book's heroine, Tamiko, attempts to take a sort of medium path between Tsumiko and Kimiko, making her a middle-of-the-road Reaver, who didn't know she had any powers, but also has strong and unbreakable ties to her family, and is a take-charge kind of person forced to play a more passive role. Considering all three characters originated as
* the third book) suggests that maybe Hagrid could fetch them all some drinks. Hagrid, who's over the moon about Buckbeak escaping, is happy to comply.
* The third brother is the All-Death. He is the death caused by what is beyond human control such as natural and supernatural disasters or magical beasts.
* the third "Cell vs." video during the pre-fight banter) on his knees for no reason while twitching and mumbling to himself.
* The third challenge was a long distance race around the world. It started in Beanotown, travelling south and across the English channel, through France,

Germany, and shortly afterwards passing through Transylvania (during the Hallowe'en 2013 edition of the comic). At this point, Billy and Billie were still level.
* The third chapter doesn't even have that, the main source of tension coming from Macy's insecurity about her place in her adopted family, which she projects onto the new ambassador.
* The third Chapter has the twist that Sparkling Justice is none other than Reyes, the Ultimate Fencer. Apart from being a practitioner of a sword-based martial art, like
* The third chapter of the manhwa and the last one-third part anime movie of invokes this. A young fisherman finds Munsu and tells him that a miracle-working physician in his island village is experimenting with the dead. Munsu and Sando investigate the matter, and find out that this is true. The twist comes when Munsu tells the young fisherman to kill his beloved sister, which he tearfully does...the illusion comes crashing down, and it turns out that the physician zombified the population of the whole village, who died when a plague swept over the area, and covered it with mandrake-induced illusion. Said young fisherman finally realizes that he is not the sole survivor, but
* The third chapter's protagonist was just Torneko in the Japanese version and just Taloon in the NES version's localization, but this trope no longer applies to him in the DS remake, in which he's referred to as Torneko Taloon.
* The Third Chimpanzee, a "mildly polygynous species", which is suggested by our type of sexual dimorphism. To put us in perspective, gibbons are one of the most monogamous primate species. They often mate for life, and adultery is rare among those who do. Because there isn't much need to physically fight or compete for mates, male and female Gibbons are so alike in size and appearance that it's difficult to tell them apart. On the other end of the scale, elephant seal males are much larger than the females, and the dominant males are the ones that round up the lion's share of the females into their harems and keep other males away through superior strength. It's a winner-take-all system, because having the strongest males hog all of the females means that most males in a given generation don't get to mate or pass on their genes. Human men are, on average, just a little bit bigger than women. This suggests we are not quite as monogamous as gibbons, but still much more so than gorillas or elephant seals whose sexual dimorphism is far more extreme. Because human offspring require so much parental care compared to other animals, a human male has to invest a lot of resources into taking care of his children. This makes supporting more than one set of wife and kids too burdensome for those of ordinary means, but the creation of hierarchical societies based on agriculture allowed certain individuals to become more prosperous than the rest and therefore support multiple wives and their children. For this reason, polygamy is a sign of status in many cultures where it is practiced.
* The Third Chimpanzee, Jared Diamond details research on subconscious selection for appearance similarities in mates. He notes that the relative length of the fourth finger has higher correlation in married couples than whether they have the same religion.
* The Third Chronicles of Thomas Covenant natures make him batshit insane and potentially as harmful as any of Lord Foul's minions.
* The third Clayface, Preston Payne wears a suit of armor that gives him superhuman strength and keeps him from touching people when he's wearing his gloves.
* The third cousin, Professor Vic Chalker version, he gave it enough power but forgot to waterproof the suit. He fatally electrocuted himself after he took the suit out in a rainstorm.
* The Third Cyrus patches a call through to Kia, whom the protagonist is currently speaking to.
* The Third Degree and Harry Enfield. "So well done, York, for giving us a humorous icon whose long-running double act has provided decades of national amusement. And Harry Enfield's very funny too."
* The Third Degree bonus for the don if the student can't answer. It's like [something asymmetric or unequal to do with the subject]."

* The Third Degree is an axe that copies damage against an enemy to the Medic healing them or vice versa.
* The third DLC for it, the Brigmore Witches, has a Non-Standard Game Over of its own in the final mission.
* The Third Doctor and the Delgado Master invert it. While both are reasonably attractive and sophisticated older men, the Delgado Master is far more smooth and charming than the Third Doctor, who by comparison can often be awkward and off-putting to the people around him. This is best seen in “The Time Monster” serial, in which the Master easily charms a woman into falling in love with him
* The Third Doctor comics did this twice over — first the Second Doctor suddenly appears, and then he turns out not to be the Second Doctor at all, but his believed-dead human
* The Third Doctor faced The Master in literally every one of the five stories in season 8.
* The Third Doctor had Venusian Aikido, and once sung a Venusian lullaby (consisting of made up words sung to "God Rest Ye Merry Gentlemen"). Given that the Venera 7 probe had already confirmed that Venus wasn't capable of supporting any form of humanoid life, it's obvious the writers just stuck the word "Venus" in there with no more thought than usual for this trope.
* The Third Doctor, in the middle of a sword fight with The Master, calmly pins his opponent to the wall by holding his sword point to his throat, then calmly eats a sandwich as he remarks about how violent exercise makes him rather famished. During all this he's basically treating the Master like he's little more than an amusing distraction at best.
* The Third Doctor pulls this stunt on feminist reporter Sarah Jane Smith the
* The Third Doctor regularly wore a badass Inverness coat, and some badass opera cloaks, too.
* The Third Doctor seems to particularly like Venusian culture; a master of Venusian lullabies, Venusian hopscotch and Venusian aikido.
* The Third Doctor shows off at one point by "speaking" in the Delphon language, which uses only eyebrow twitches.
* The Third Doctor sings in the hospital shower in his first appearance in
* The Third Doctor's more aristocratic bearing was retroactively applied to the character, playing up the idea of him having been a "Lord of Time" more seriously than the first two Doctors really ever seemed to. The Third Doctor tells stories of having been an aimless, unhappy aristocratic child on a boring, yet beautiful world. We're introduced to the Master, a fellow Time Lord who wears a dark jacket, a
* The Third Doctor spent his life exiled to Earth by the Time Lords and working as an agent in a
* The Third Doctor's relationship with Jo Grant had shades of this. Their relationship was never quite romantic, but he did seem awfully disappointed when she ran off and married a man she described as a younger version of him.
* The third edition sourcebook "Robots" includes rules for creating biological androids using biotech. This sourcebook also includes rules for combining traditional robots with biotech in the form of living flesh and intestinal power convertors.
* The third edition's shift of focus from gritty future-noir to transhumanist adventure actually makes it closer to
* The third episode begins with Eikichi dreaming about being a teacher, whose class is mocking him for still being a virgin. When he wakes up, his friends all laugh at the thought of him as a teacher.
* The third episode, "Justice is Blind", features Jack and Trixie doing multiple weeks of stakeout on a man's wife and her lover. The husband, after great reluctance, asks for photographs of the affair to have solid proof. When they do just that, Jack and Trixie see the lover depart but not the wife. After several hours Jack goes to check and discovers the wife murdered. It's not long before Jack realizes that the whole thing was a set-up by the husband, meant to use the photographs Jack and Trixie took of the lover leaving to frame him for the crime.

* The third episode of features a scene where Len, portrayed by karate champion Matt Mullins, trains on a rooftop. Although it makes sense for the character, the scene has absolutely no plot relevance. Looks good, though...
* The third episode of Season 3 sees Matt interrogate Fisk's crooked lawyer by
* The third episode of the expansion's Nightelf campaign involved finding the current "evildoer" inside a complicated (but still pretty linear dungeon) then escaping before the timer runs out, using the main character's blink ability, which allows her to teleport short distances and even go through walls, as long as the destination was previously revealed. during the escape only, a hidden room is revealed, right next to the entry hall. The player can blink into the room, then through the wall, skipping almost half the dungeon.
* The third episode: Optimus leaves Arcee in charge of the team (including the humans) while he and Ratchet leave on a mission. Arcee promptly goes off on patrol with Bumblebee and leaves Bulkhead in charge. Repeat until there are only two kid sidekicks left in the entire base.
* The Third Eye function as Licht's three top lieutenants in the first saga. Among them, Rhya is the most functional one, as Vetto and Fana are insane due to the Reincarnation Magic not being complete at the time they were revived.
* The "Third Eye" technique practiced by Retina and Tiza turns their own aura into an additional eye with which to see the world. It also works on ambient
* The third features improved armor and strength and energy weapons (this to correct the flaw that cost him the 2.0,
* the third film as an amulet on Kai's waist, effectively proving his fate.
* The third film by having the imperiled protagonists on a shark-watching trip. Their boat capsizes, and thanks to to all the chum that their tour guides threw in the water to attract the sharks, they now have to contend with a myriad of them hovering around.
* The third film has the previously unmentioned Don Altobello who is not simply an important mafiosa but a
* The third film introduced the idea that mechanical Terminators are fueled by nuclear power cells, which have the ability to cause an atomic explosion if ruptured or overloaded. This was met with derision because it raised questions about why the
* The third film is almost worse about this — one of the foreign spies suffers
* the third film of the series: to take everything that is not nailed down in the apartment.
* The third film pulls a switcheroo. Siri seems more innocent and reserved when compared to Hedda, who rips off her top and goes skinny dipping with boys. None of this stops Hedda from being the true Final Girl, though she herself doesn't make it out alive.
* The third film reveals that the Library is actually thousands of years old and that
* the third film that actor's character missed the Zeppelin. They planned to have a fight in the third film, and from the looks of it they were going to subvert this trope by giving the guy a glass chin. (There's some footage in the "Stunts of Indiana Jones" special on the DVD.)
* the third film, the villain Kane awakens after centuries of slumber and quickly assimilates into the modern world, aided in no small measure by his magical powers.
* The third film, this happens to Arab, when sticking her head out of the tent.
* the third film. This means that his brother is named Dru Gru. Sheesh!
* the third film will always be haunted by the most traumatic moment of her life.
* The Third Floor Flat: the murderer was apparently in love with his new flame, the wife refused a divorce.
* The Third Galactic War between the Sith Empire and Republic after that faction is defeated takes place almost entirely off-screen, with the player character only involved in strategically important but small scale skirmishes.
* The third game actually refers to the player character as The Lone Wanderer after his escape from Vault 101.

* The third game adds another variant of San Dimas Time. In the first and second games, you return to your time period of origin mere moments after you left. In the third, you seem to return to the home period roughly as much after you left as you spent in the past, given how events progress.
* The third game allowed the player to sell weapons to "everyone", (presumably the black market) which would lower relations with the superpowers. The fourth game didn't give you an option on where one could sell the weapons too, but making assault weapons or landmines would end up in the wrong hands, which would also upset the global powers.
* The third game also had a moment: if neither Tali nor Garrus was romanced and both survived the suicide mission in ME2,
* The third game also had a number of alleged cars, including the Fiat 131 Abarth, the aforementioned Datsun 510, the 1969 Toyota 2000GT, the Porsche 914/6, the Lotus Elan Sprint, and the Alfa Romeo Giulia Sprint.
* The third game also reveals that the Protheans were not very nice, yes they kickstarted the technological development of some species, but they were massive
* The third game (and the film, covered above) introduce the Skipper Missile, a powerful, very annoying and thankfully rare anti-capital ship weapon. It travels under cloak, only becoming visible for a few seconds to check and correct its course before cloaking again, causing it to 'skip' in and out of sensor detection. This is actually a plausible way of using a cloaking device, given the assumption that the technical issues behind making one have been solved. However, given that the Kilrathi have been fielding Strakha stealth fighters for a game and a half now, and their sensors are clearly capable of allowing things to fly around without dropping out of cloak, the plausibility seems more like a lucky incidence of
* the third game as in previous games, but the mummified corpses of small dogs.
* the third game, Atlas returns as a gun manufacturer with their new niche being that their bullets can track and home onto targets.
* The third game carries on this tradition in a near a fashion that is straight and grim, depending on the person this could be shocking truth or Narm worthy Wangst.
* The third game cut it down to six units, though at the same time it changed most regular units to squads of 10 or more people, resulting in somewhat more realistic fights.
* The third game deconstructs this, as by now everyone knows the horrible atrocities that happened at the pizzerias. But
* The third game features big green spiders in the Mushroom Speedway level. (These spiders are harmless.) One of them also appears as a boss in the second Sparx level.
* The third game follows suit. For instance, Varric can ask Solas which of the Inquisition's upper ranks is the toughest while one of them (Cassandra) is also in the party. "That doesn't rule you out, Seeker."
* The third game forgets about some working civilisation - after three years have passed, full scale war between the Unitologists and Earth Government has begun, and worse, the Unitologists are winning. Even the task force retrieving Isaac refers to themselves as "Earthgov's last battalion", which means that this conflict is likely coming to a (bad) end. In the first mission, the player gets to look into this war - essentially urban warfare combined with Unitology-caused Necromorph outbreaks, and this is implied to happen all over the colonies.
* The third game goes further with the aversion, in having its laser weapons be true hitscan beams, while the two previous titles had them fire the more "traditional" slow-moving bolt of energy.
* The third game had the Rift Inducer, which shot out a black hole that was an insta-kill to any small or medium-sized enemy. In "A Crack In Time" however, it was changed to summoning an
* The third game has a more complex system, with each planet having a certain temperature and atmospheric pressure, and each species having a different preferred value for each. Instead of having a few discrete states, terrforming is a continuous process of slowly moving each along the scale towards your sweet spot.

Gravity is also important, but the effects of it being too high or too low are countered by specific buildings and technology rather than being included in terraforming. Since an empire can contain several different species, it could be tricky to know exactly what conditions a planet is being terrformed at any given time, and this could change as population growth and migration change the demographics.
* The third game has no such time limit until the final part of the main quest. It is very easy to get caught up in exploring and doing sidequests right from the moment you leave the vault, to the point which the player can hit the level cap before really beginning the main quest.
* The third game has Sly trying to break into his family vault and reclaim his family legacy.
* The third game has the Fury, a deranged cosmonaut whose life goal seems to be to set the world on fire. The Pain and The Fear probably also count.
* The third game has Toramaru, who initially says his position is "anything but goalkeeper." His stats are also fairly even across the board, except his Kick stat is slightly higher and also grows a bit faster as he levels up. However, the story eventually reveals that
* The third game have larger, non-squadmate related roles, but the rest serve only as cameos.
* The third game in the series introduces Prof. Zero (known as Dr. E. Raser in western Wibble Wobble) and his
* The third game in the series takes earlier concepts further, increasing complexity by giving all European civilisations two or more (up to five) unique units, removing or replacing basic units for specific civs, providing each civ with a more powerful mainline upgrade for some basic units, and adding a variety of bonuses, gimmicks, etc. to each civ. Further, the game introduces the Home City feature, allowing for even more unique bonuses and technologies to be applied on the fly. The two expansions add three civilisations each, and all of these are entirely unique, sharing no units with any other civ (although there are some similarities). There are also variety of gameplay gimmicks implemented according to civ-grouping (for instance, the Fire Pit for all Native Americans, Wonders and Rice Paddies for all Asians) and individual civilisation (as the system in the base game
* The third game introduces Andrei Harkov and Marcus Burns, both playable characters complete with briefing screens bearing their names... and both never appear again after their first mission. Harkov is shot dead by
* The third game introduces the ability to do this with trees instead of just buildings. However, your first controllable character, Haytham Kenway, can't do it, despite being trained as an Assassin. Only his son Connor can, since he couples the Assassin training with his skills gained growing up in a Mohawk tribe. However, at least one other character is shown to be able to do this, namely Myriam the Huntress. Later, she gets pre-wedding jitters and runs away by effortlessly navigating tree branches... in her
* The third game introduces the Doog (dogs, obviously), the Lk (more mushrooms), the Owa (jellyfish), the Ploxis (rats), and the Vyro-Ingo (crustaceans).
* The third game lets players go the distance for "funnel" builds with the addition of the Builder Parts mechanic which allows you to add additional parts and weapons to any part of the body. This of course includes funnels and the base game allowing you to add regular funnels or Cherudim's shield bits and with DLC later adding AGE-FX's C Funnels and Arche Gundam's GN Fangs as well as Woundwort's Composite Shield Booster as a wire-tethered
* The third game makes curing the genophage a plot point. You can either do exactly that, or sabotage the effort.
* The third game makes this a plot point, as both Roger Bacon and Sgt. Kato use it in a fundamentally different way and don't make monsters: Roger tries to revive Alice, Yuri's lover, but her soul simply doesn't return and the body crumbles, while Kato merely makes a clone of Lt. Col. Kawashima in Ouka.
* the third game mode. The catch to unlocking this sword is that you need to play the second DLC (which has a pretty high level requirement) and do a bunch of pretty

simple missions.
* the third game, Nyreen's ex-turian military, and always thinks about the little people ("she oozes virtue"). It ended when they realized it couldn't work unless one of them changed, and Nyreen didn't want that to be her.
* The third game revisits the car chase and bridge holdout of the first game in the mission "Iron Lady".
* The third game rule it, is meant to give false hope to commoners that their families' lot in life could improve if they sire a mage. But 99 times out of 100, they'll just end up glorified desk clerks, which may be a step up from being a mud-farming peasant, but they'd still be far from calling the shots.
* the third game's ''Citadel' DLC, Shepard uses Joker as bait when CAT6 starts shooting up the sushi restaurant by telling him to go warn the crew, then grabbing and killing the first merc who sees him to acquire a weapon. Joker is pretty furious about it.
* the third game's comic, when Naked Snake realized that The End just deposited him to a place far from his fighting ground.
* The third game's DLC has Ledo's Great Hammer, which ranks as the second heaviest weapon in the entire franchise. (The first place spot goes to the Smelter Hammer in the second game, which
* The third game started with the Sarif building being attacked by hostile mercenaries and supersoldiers.
* the third game that the times it's not used can be counted on one hand. An entire thousands-strong fleet does it in formation at one point.
* the third game, the fifth trial involves the group confronting the supposed mastermind behind the killing game. Those who are familiar with the series will expect that there will be a sixth chapter, and there is.
