* The placebo effect can happen even when people are TOLD it's a placebo!
* The placebo effect is the real life equivalent of this. This is generally attributed to the nervous system and the immune system being interconnected, and the idea that the immune system can be activated in a specific part of the body. The effect is strongest when treating symptoms with a strong mental component, like pain and nausea.
* The Place Inside the Storm is a robotic cat. He's programmed to behave almost exactly like a real cat, except that he can talk.
* The Place Inside the Storm, most people have biosensors implanted in their wrists that serve as ID cards. Tara keeps hers covered to avoid detection, and it ends up being destroyed when she's injured.
* The Place Inside the Storm, Tara's bed is on a platform that was raised from the floor with bacterial carbon frame construction.
* The Place Inside the Storm: When Tara was younger, her dad would occasionally cook real food, but now her family almost exclusively eats instafood except when they eat out. She doesn't like the taste at all.
* The placement of these bollards in front of federal buildings became standard practice after 9/11.
* The placental birds are another group of changelings that pass their early larval stages inside the mother, attaching to the wall of the uterus and continuing much of their development within, until the young born live in a much more developed and independent state, often precocial at birth.
* The Place of the Lion, the higher reality of Platonic archetypes begins bleeding through into our world, replacing all the mundane examples of each Platonic Form. So, for instance, the titular Lion, which represent Power, starts draining all the strength and energy out of everything near it.
* The Place Promised in Our Early Days is set in an alternate 1999 where the Soviet Union never dissolved and it and the United States partitioned Japan after World War II. The short film itself released in 2004.
* The Place Promised in Our Early Days is so tall it surpasses clouds and mountains. Built in Hokkaido, it is visible from Tokyo on a clear day. That's a distance of more than 800 kilometres as the crow flies. For Europeans, that's more than double the distance between London and Paris. For Americans, that's one-fifth of the way between New York and Los Angeles.
* The Place Promised in Our Early Days off the end of an abandoned pier by Hiroki. Just as they are mostly safe and jubilating over the successful rescue, the rest of the dock gives way and dumps both of them into the ocean.
* The Place Promised in Our Early Days starts off as just her playing in the classroom, but shifts to the full version of her theme tune after the first verse.
* The Place Promised in Our Early Days starts off in fairly desolate Aomori, at the northernmost tip of Honshu, and though a mid-film sojourn to Tokyo is indeed important, it goes back to Aomori for the climax.
* The Place Promised in Our Early Days: Ulita consider themselves a liberation front fighting to free Hokkaido from Union control and reunite Japan, but many others see them as terrorists.
* the place to order warships from. British made warships were made with a combination of a experience and some of the most advanced cutting edge naval tech in the world. Better yet, they would sell anything to just about anyone with the cash.
* "the place where there is no darkness") is considerably cleaner and better kept-up. The Party knows where to spend its money.
* The Placidus masks that switch dreamers between placid and lucid dreams in
* The Plague: A disease, either lethal or extremely dangerous, poses a threat to society or even the world at large.
* The Plague: An outbreak of a deadly infectious disease that spreads until it reaches epidemic or pandemic levels.
* The Plague Dogs has the two protagonists swimming out into the ocean, trying to reach an island. While it at first seemed that there was likely no island at all, the film gives just a tiny bit of ambiguity to their fates by having the fog clear

during the credits to reveal that there was in fact an island, albeit a distant one.
* The Plague Dogs is an antagonistic (and downright evil) example. He uses underhanded means to get info, falsifies it when it suits him, spreads panic, and gets the army sent after the protagonists.
* The Plague Dogs reads "Escape to a different world and share the adventure of lifetime"), despite showing things like starving to death, while having crazy hallucinations and trying to avoid being shot.
* The Plague Dogs revolves around two dogs who escape an animal research lab.
* The Plague Dogs, the author's previous work, which seems to exist for just this reason.
* The Plague Dogs Which is just a little ironic since there is plenty of gore and horror to be had in the whole story.
* The Plague due the the plague. Initially he goes to great lengths—first speaking with officials, then coming in contact with the shady underworld—to get out of the city, but at the last moment he changes his mind and decides to stay behind and help the other protagonists in fighting the plague, because he couldn't be happy outside with the consciousness that others are still suffering behind the city walls.
* The Plague, due to bubonic plague. The novel explores the psychological effects on the people within, who become pretty much depressed and gloomy.
* The Plague is a particularly strong example; she's been killing people for the Entity since the days of ancient Babylon, making her several millenia old.
* The plague is known as Hinamizawa Syndrome. It's been what's driving characters to paranoia and murderous tendencies. For example, in the first arc, Keiichi hallucinates normal conversations as being suddenly ominous and threatening (such as imagining the opposite party as their eyes dilating and speaking unemotionally), and it culminates with him killing his friends out of the belief he was protecting himself from them. Normal things like Rena seeing him at the grocery store and not saying hi, or giving him spicy riceballs, are perceived as being threats on his life. Keiichi thinks Rena is stalking him, and with the riceballs, he hallucinates that there's needles.
* The Plague Star) derelict starship automated to bombard a planet with bioweapons.
* The Plague that wiped out the rest of humanity. He injects Carter, Yoshizumi, and those who flee for areas that are safe from the missiles but still contain the eponymous deadly virus.
* The Plague. They later recovered this plague and plotted to use it against the inhabitants of the surface as Dominion, their "Holy Plague."
* The Plague which details a outbreak of the disease in the French Algerian city of Oran.
* The Plain Doll, together with the fact that she towers over them a lot.
* The Plain Janes by Cecil Castellucci and Jim Rugg has an unconscious character to whom the main character talks and (after moving away) sends letters.
* The Plains of Passage rather than of women being inherently unfit to rule). The chief, Attaroa, was insane, murderous, and sexist, to the point that all the males were slaves kept in a giant pen in the middle of the camp, half-starved, denied medical care, and often worked to death. The population was dwindling because Attaroa didn't let the women have sex with the men, assuming they'd give birth only to girls as a result, and even threatened to execute women who gave birth to boys.
* The Plains of Passage, we are introduced to Jerika (East Asian), the second wife to Jondalar's (European) father Dalanar, and their daughter Joplaya, and Jerika's father Hochaman.
* The Plan a really good alibi (with juicy little details, like Natalie's supposed neighbour greeting him as he leaves "her" apartament) - only to mop everything up later and pretend it never happened.
* The plan descending into silliness as more and more condiments get roped into the plan:
* The Planechase game mode uses Planes which apply a global effect to all players. Naturally, different environments benefit various decks differently, and players

have the ability to roll the planar die for a chance to switch to a different random plane... or trigger a spectacular effect tied to the plane itself.
* The plane conversation between Bruce and Alfred is changed to how the former made a promise to Superman on his grave to gather the metahumans together, as atonement for his actions that resulted in Clark's death.
* The plane didn't use to be that way; in fact, there are still remnants of the wilds on Ravnica, most of them in Ravinca's expansive and poorly explored Undercity or in ruined and overgrown areas of the world-city, and are primarily the home of the Gruul Clans and some members of the Selesnya Conclave.
* The plane of Amonkhet has two suns. The "normal" sun moves around the day as one would expect, but the
* The plane of Amonkhet is home to a thriving mummification industry, much of it performed by other mummies. This is partially because the dead keep rising on Amonkhet, and rising as a docile mummified servant (represented by some of
* The plane of Innistrad is home to vampires, werewolves, demons, zombies, ghosts, geists, and all sorts of nasty things; while the human government dominate the pastoral province of Gavony, the deep forests of Kessig are dominated by werwolves and denizens of the wilderness, the mountains of Stensia are ruled by vampires and seaside Nephalia is the realm of
* The Plane of Mirrors is a variant Transitive Plane, where the right magic lets users step through a looking-glass into a corridor of mirrors leading to other places, possibly on other planes. There are two quirks: first, the mirrors in each "constellation" are linked in some way, either by maker, material, etc. Second, setting foot on the plane creates an opposite-alignment
* The plane of Rath, an artificial plane created by Yawgmoth (yes, that's the same guy who runs Phyrexia) as a forward base for attacking the plane of Dominaria. The entire plane is made of "flowstone", a semi-intelligent rocklike material that can be commanded to take any shape or form. It contains such lovely locations as the Death Pits of Rath, the Furnace of Rath, and the City of Traitors. It is also (probably) the original home of the slivers, a species of vicious, predatory, vaguely insectoid creatures with a hive mind that not only allows them to share thoughts, but also
* The Plane of Shadow: Basically a dark and spooky mirror of the material plane, where light and dark have been inverted.
* The Plane of Shadow, or Shadowfell, is a monochrome land with a pitch-black sky, and depending on the edition it may serve as a bleakly-depressing afterlife. Its terrain is roughly analogous to the Material Plane, so that if you cross to it from a city you may find yourself in a dark and ruined settlement, complete with shadowy inhabitants whose twisted features are recognizable as your friends and loved ones. Things get more fluid the further you go, and you might find a shadow castle where none stands on the Material Plane, or an old battlefield instead of a dungeon - these "shadow mirages" are thought to be the result of influence from
* The plane of Shavarath has quite a few locations that resonate with this theme, too. For example, Nullius Terram is a blasted landscape resembling a WWI battlefield, while the Forest of Shadows is Eternal Fantasy 'Nam.
* The plane of Zendikar, due to its high levels of wild, chaotic magic, has a weird shifting gravity that makes floating continents not uncommon. Most of its land cards show chunks of the plane's landmasses floating high above its surface, sometimes with waters flowing off their sides. Zendikar also held
* The plane of Zendikar is permeated with active, chaotic magic that constantly alters and reshapes its landscape. Archipelagos of floating islands are particularly common, but also present are things such as kilometer-high cliffs rising from the seas and forests of trees large enough for regular-sized forests to grow on their branches.
* The planes of Shadowmoor and Innistrad — both based on horror themes, fairytale horror in the first case and
* The planeswalker card type had a similar rule to the legend rule, only it refers to a planeswalker's subtype; if a planeswalker entering the battlefield shares a subtype with one already on the battlefield, both are sent to the graveyard. This

is because there are no generic planeswalker cards; each represents a specific character, and the subtype indicates which character is represented. This means that two planeswalker cards that represent the same character without being the same card still destroy each other. For example, a popular strategy to combat
* The Planetary Caretakers, being aliens, have strange-sounding names that, nevertheless, carry their point of keeping Planet from Transcending in memor of their destroyed homeworld (e.g. Tau Ceti Memory, Hymn : Modulation, Adapt to Live, Home : Hearth.
* The Planetary Council can also decide to melt the polar ice caps, causing global warming
* The Planetary Usurpers are the other side of the coin, being warriors by nature they have appropriate base names (e.g. Courage : To Question, Strafing Run, Tusk and Claw, Salt : Wound, Tau Ceti Mantle).
* The planet Barrayar is described in similar fashion. The capital of Vorbarr Sultana is a mishmash of old and new architecture, while newer cities like Hassadar are pure Space Brasília.
* The planet-bound Exodites are essentially Wood Elves; they live off the land, have a harmonious relationship with their planets, are not as advanced as the Craftworld or Dark Eldar, and don't really get involved in fights unless the place they live in is threatened. They aren't as prominent as their fantasy counterparts, probably because they can't really get involved in the galactic struggle. So,
* The planet-cracking Colossi could be said to have these, though they're remarkably short-ranged for such an endeavor. But if you're willing to use mods, the Gigastructures mod offers perhaps the ultimate example of a wave-motion gun in the Nicoll-Dyson Beam: An entire young
* the planet descriptions, so they may be more like regional alliances.
* The planet Eden in the episode "The Way To Eden". Looks beautiful, but beware of differing chemistry; the fruit is poisonous and the grass has acid for blood.
* The Planeteers don't take well to any member of the team being threatened, especially
* The planet Eldritch, which used to belong to the C'tan-serving Necrons, now a dead world after being subject to Exterminatus.
* The planet Eve offers an odd example. The liquid majority of the surface is identified as 'Explodium Seas'. While splashed down in it, rocket motors cannot be shut off.
* The Planet Express crew in general; the main delivery crew is a good hearted yet goofball kid from the 20th century, a selfish robot who spends his time drinking booze and making wisecracks, and a social outcast cyclops who tries to be professional, maybe a little too much. The rest of the company is a nutjob century-and-a-half-old mad scientist, a Jamaican paper-pusher who likes to limbo and fill out forms, a ditzy clumsy Chinese girl from Mars, and a lobster alien who has neither social graces nor an accurate idea of human anatomy, despite being the company doctor for humans.
* the planet Fenris, are either native creatures, actually the degenerate descendants of the planet's first human colonists after generations of ill-conceived canine/human gene splicing experiments to try to survive the harsh frozen wastelands of Fenris.
* The planet Gamma Trianguli VI in "The Apple", including plants that throw poisonous thorns, rocks that act like anti-personnel mines and directed lightning strikes.
* The planet Gor itself can be considered an example, since the Priest-Kings (the
* The planet Hnyxx is more than 90% covered by water and has several water-dwelling races (Ocean Planet).
* the planet in both the ending of Xenosaga and beginning of Xenogears is in fact Earth, which was lost to mankind in in 2510 AD. Mind you, in both cases humanity is in the far flung future. Xenosaga as a series ends in 7020 AD. whilst Xenogears starts in 17,230 AD if the math is right. Either way, you have a ultra civilization dealing with "just still getting there."
* The planet in "Time and Again" used rotations, intervals, and fractions. And

Hindu-Arabic numerals.
* The planet is rapidly overrun within a few hours near the end of the game.
* the planet. It's what opened the time gates, leading the heroes to eventually defeat Lavos.
* The Planet Jackers. The entire race of beings throws planets into their dying sun, using planets as
* The planet Kibou-daini means "Hope #2", number sign and all — it's a very formal and technical form in Japanese and isn't usually seen out of signs and manuals. This is because there are multiple worlds called "New Hope" or the equivalent, and the two is required to distinguish it from the others.
* The Planet Killer, basically a Black Stone Fortress that Abbadon The Despoiler got a hold of, whilst there are many ways to blow up a planet in the 41st Millennium, this is considered one of the most efficient. Also unlike other examples of super-ships built around a single
* The planet known in the modern day as Moraband is not nearly so eldritch as either of the two above, but it makes up for that by being absolutely
* The planet Komarr, whose inhabitants seem to either be shrewd businesspeople or scholars. There are some
* The planet Krieg suffered five hundred years of nuclear war when its governor tried to secede from the Imperium, leaving the world so toxic that
* The planet Krieg went through a rebellion that resulted in five hundred years of civil war and the self-inflicted atomic cleansing of its surface. To atone for this lapse in loyalty, the Death Korps of Krieg now commits to the bloodiest sieges and most horrific meat grinders in the galaxy.
* The planet Langara prior to "Homecoming" was engaged in a cold war between the three dominant superpowers. When two of those superpowers ally in "Shadow Play," the third, Kelowna, launches a preemptive strike with a naquadria bomb. This terrifies all combatants enough to prevent further hostilities until
* The planet Lorwardia was introduced with just enough information to suggest that it's the
* The planet Marinus (also from the mind of Dalek creator Terry Nation) from
* The planet Mars, where Michael Valentine Smith is raised by Martians in
* The planet Nocturne was a frequent target of Dark Eldar raids until the superhuman primarch Vulkan came along and decided to fight back. Inspiring the natives humans, ordinary people who up until then had given up fighting in favor of hiding to give their super-advanced, nigh immortal and better-equipped tormentors such a beating that they never came back.
* "The Planet of a Pint Sized Room" is an exact doppelganger of early-60s Tokyo complete with a college-aged
* The planet of New Muscovy, which includes the land of New Austria and the city of New Prague. There's also Novy Petrograd (New St. Petersburg), the capital of Rochard's World. These are mostly justified, since most of these planet's inhabitants were transported there suddenly.
* The planet of Perlia got a "speedbump's speedbump" in the form of the Planetary Defence Volunteers, established by
* The Planet of the Apes. Also in the original book the humans run around nude rather than clad in skins (which no doubt was done to get the film past the censors).
* The planet of Utapau is run by two different native species, the tall, humanoid Pau'ans and the short, turret-eyed Utai. Additionally, the Amani — aliens resembling humanoid flatworms with short legs and long, slender arms — also immigrated to Utapau at some point and live in primitive, tribal societies in its grasslands, separately from the high-tech Pau'an and Utai society in the planet's giant sinkholes.
* The planet Prypiatos has two distinct subspecies: the underground Prypiatosian-A that absorbed only limited amounts of radiation behind lead shielding that enabled them to generate it while the Prypiatosian-B remained on the irradiated surface and absorbed and mutated so much as a result of exposure they constantly crave it.
* The planet Refuge in the short story "In The Service Of The Sword", set in the

same universe, played it much more straight. Due to low-tech of its inhabitants, this star system was used as a staging base by the
* The planet Saturn's blink-and-miss-it appearances in the Underworld refer to the Roman god Saturn and to medieval cultures' reinterpretation of him as a fallen god and the marker of the great divide between life and the unknown, like how Saturn is the farthest planet visible by eye.
* The planets Caprica and Gemenon are part of a double-planet system, orbiting
* The Planets Edward has an automail arm and leg, while she falls for the partially-blind Roy when he turns up at her house needing an automail arm.
* The planet Serenno is a giant county and during the Prequel Trilogy is ruled by Count Dooku. Dooku was originally a Jedi Master but resigned in order to inherit the throne, which was a convenient cover for his disillusionment with the Order. It's never explained whether the Counts of Serenno have any nobles above or below them (interestingly, Count is an intermediate rank), though it's possible "Count" was chosen because Dooku was played by
* The planets in our solar system are traditionally named after deities in the Roman pantheon, and it zigzags between this trope and
* The planets in the Rigel system: various episodes mention 2, 3, 4, 5, 7, 10 and 12.
* The planets in the Vega system are named Padraic, Mona, Noaille, Aloysius, Boniface, and Cuthbert.
* The planet Skaro — a delightful wasteland which experienced a nice long NBC campaign by two opposing sides, leaving it essentially a polluted, radioactive stone quarry and hideous monsters living in the lakes. Also, there are the
* The planets of New Dresden and Novy Kurdistan appear in the second book.
* The planet's only native intelligent species, the Serioli, tend to agree with the Easterners and call them the "Old People."
* The planet's original name is Lagash, but for this novelization, the planet is named Kalgash.
* "The Planet Splitter". The doctor at the orphanage does one when he sees Superman (as a baby) swinging from the ceiling light. The orphanage director does one when he comes in and sees Superbaby lifting the doctor in the air.
* "The Planet Splitter": When Wendy, Marvin, and Wonder Dog are surprised by Doctor LeBon's assistant aboard the space ship, Wonder Dog jumps into Marvin's arms.
* The Planets that he has a fear of fire. When he isn't in control of it, it frightens him.
* The Planets: Winry realizes that she's fallen for Roy right in the middle of performing surgery on him. She lampshades the inappropriate timing of the epiphany.
* The planet Tatooine has several native species seen being used as mounts or for haulage: Tusken Raiders favour the bantha,
* The planet turned inside-out and all but five people on the planet were wiped out and replaced with demons before you enter a single battle.
* The planet Uranus actually spins on its side, so one pole actually remains in constant darkness for almost half a year. That's half a Uranian year, which is around 42 terrestrial years.
* The planet Vashti is located in a binary star system, and both suns shine down on North Station.
* The planet Vostroya managed to pull this successfully during the Horus Heresy, declining to send troops to fight Horus in order to continue producing weapons. They paid for this
* the planet was habitable but the leader of the planet was keeping this information hidden from everyone else.
* The planet Zayth has been left scarred, barren and borderline unlivable by millennia of warfare, strip-mining to feed the wars, and the ceaseless movements of the cities themselves. Its people are now reduced to living in hive-ships, tracked megalopoli carrying ridiculous amounts of (occasionally starship-scaled) weaponry, used to battle other hive-ships for Zayh's dwindling resources.
* The plane Zendikar is this. Zendikar is a world where D&D-style adventuring

isn't the path to wealth and glory, but survival. Full of ancient ruins filled with booby traps, with variable gravity, a land that is itself alive and cranky, and a chaotic force called the Roil ripping through and randomizing the landscape... well, let's put it this way — the largest center of civilization on the whole plane is a city of vampires.
* The Plan he demands to know what she's up to, but she convinces him that she's actually seeking revenge on her husband for the above-mentioned infidelity.
* The plan includes a deception, and the planner's allies aren't in on it so that
* The Planiverse goes further, positing an entire 2-dimensional universe with its own physics, chemistry, and biology. Circular planets orbit circular suns, and life exists on the "surfaces" (i.e. circumferences) of those circular planets. Some of these life forms even build 2-dimensional houses for themselves.
* The planktonic humans from the short story "Surface Tension" — genetically modified descendants of a crashed colony vessel, whose survivors deemed the planet unlivable by anyone larger than a water flea — believe they live in a complete universe bounded at top and bottom. In fact, they live in a puddle, and the "space expedition" they launch only travels to the next puddle over.
* The planned "Data Protection Agreement" between the EU and the US. The goal is to grant US agencies legal wholesale access to data on European citizens (suspicious or not, nevermind).
* The Plan, neither able to ever gain an advantage over the other. The Daleks realize that they need Davros to find them a way past this block, and the Movellans realize that the Dalek task force sent to the desolate Skaro must be there for some ancient, hidden thing of great importance to the current situation and set out to stop them. Upon learning what the Daleks' plan is, the Movellans want the Doctor to give them the ability to carry out an Indy Ploy just like the Daleks want Davros to do for them. Fortunately, the Doctor and the humans the Daleks brought as slave labor manage to not only destroy both of them, but capture Davros for trial.
* The plan only failed because the victim, unbeknownst to Mini, had a gun with him and shot back in self-defense. This created the crucial piece of evidence which let Phoenix prove that someone else WAS in the room at the time of the killing.
* The plans of the being that killed the Father Latios and tried to destroy Altomare, as well the Father Latios' own revival and his efforts to stop his mortal enemy and reunite with the Eon twins.
* "The Plan": The victim - a swim coach at a military academy - is revealed to have sexually abused his students.
* The Plan. This conspiracy dissolves and reforms based on the First Foundation fears of being controlled by the Second Foundation.
* The plan to get the DeLorean up to 88 MPH with the train. They have only one shot, and Doc clearly states that after they pass a certain designated point, "it's the future or bust".
* the plan to seal Zamasu away with the Mafuba (Evil Containment Wave) failed because Goku suddenly became Forgetful Jones.
* The plants always burp after sucking in a sock. Fluffy also says "Ex" afterward because Norman tried to teach him to say "Excuse me".
* the plants themselves when they switch from daytime photosynthesis to nocturnal aerobic respiration.
* The Plant That Ate Dirty Socks: At the start of the series, Michael's half of his and Norman's room is this trope. Described as looking like a junk heap, it's so bad that "When [he] was forced to make his bed, first he had to find it."
* The Plant That Ate Dirty Socks: In book 6, Norman and his friend Bob decide to make popcorn, but can't find the top to the popper. They decide to start running it anyway, and a massive mess ensues when they can't find the top, or an alternate covering, in time.
* The Plant That Ate Dirty Socks in the very first book, all to the same person. First, when Michael (the very messy owner of the title plant) is bribed to clean up his room, he really just shoved everything in the closet; his younger brother Norman finds out the hard way when he opens the door to find one of his hats and gets buried in an avalanche of junk. The second time, when he opens the door to

search for missing socks, Norman is fully expecting this trope, but is only buried in junk up to his knees. The third time, he's trying to find his Super Splasher Water Blaster to water his plant and gets completely buried again (much to his annoyance, as Michael had told him he'd tossed most of the junk in their room out the window).
* The Plant That Ate Dirty Socks: When the family gets an answering machine in book 5, Norman and his friend Bob start calling from Bob's house and leaving silly messages, then rush back to hear themselves on playback. After their parents put a stop to this, Dad teaches Norman how to record an actual message so he won't use it as a toy anymore... only for Norman to secretly rerecord it, except this time he sings it to the tune of "Camptown Races". Mom and Dad aren't pleased, but at least one caller compliments them on having a song on the machine.
* The plan ultimately turns on the Predacons when Rhinox gets sick of being an
* The Plan, we see that the titular plan of the Cylons unraveled because so many of them fell in love with humans and switched sides.
* The plasma cannon/drill of the motherships in the first film, which is only discovered when Russell Casse makes his
* The plasma rifle launched a ball of blue plasma about the size of a fist that enveloped and instantaneously vaporized the victim (rather than just burning a hole the size of the projectile).
* The Plasmatics is remembered for is lead singer Wendy O Williams being the original inventor of the duct-tape pastie.
* The Plasmatics: They enjoyed blowing up cars during their stage shows.
* The Plasmatics were known for using and listing chainsaws and machineguns as instruments
* The Plastic Age. Eventually, she dumps him so that he will focus on school again, telling him upfront that this is her motive.
* The Plastic Ono Band's "Don't Worry, Kyoko (Mummy's Only Looking For a Hand In the Snow)", the B-side of "Give Peace a Chance," starts with Yoko sounding like a car engine trying to turn over followed by no other lyric except "Don't worry" repeated over and over.
* The Plastic People of the Universe, a Czech underground band named after
* The plastics industry supplies an aversion. Manufacturers and distributors of plastic resin routinely use the word "natural" to describe materials with no added colour. Outsiders might raise an eyebrow at phrases like "natural polystyrene," but this is done without intent to mislead — people who buy natural polystyrene know what the local meaning of the word is.
* The plastic surgeon in the music video for TLC's "Unpretty" has this as their slogan. Needless to say, that particular facility cares more about its bottom line than its patients. For example, a girl is shown having (perhaps botched) breast implants
* The plate glass windows of Doc's office have also been emergency egresses (and ingresses!) to the point where Doc's got a "wall and window man" on call.
* "The Platform Classic": During the race, Griff Halloran is forced to bail from his racer this way after he misses the reignition ring at the end of the gliding section and his ship heads for the ocean.
* The platforming sequences are sometimes seen as unnecessary or too easy, or
* The Platform, meaning those who waste or outright destroy food to spite the remaining prisoners are always given the most access to the food first, ensuring the lower levels are always starving.
* The Platinum sets had "the SP deck", filled with Supporter and Trainer cards that required the usage of SP Pokemon in your deck. They were always better than non-SP versions of the same card (example: Bebe's Search and SP Radar, Poketurn and SP Turn). It's supreme card quality made many SP decks incredibly powerful and popular, but it had one weakness: all of the SP Pokemon were Basic Pokemon. Thus, it's counter was born, the Machamp Take-Out deck. And since Machamp's weakness is Psychic type Pokemon, there was
* The platonic and routine headbutting between victorious hockey teams and their goaltenders.

* the platonic ideal of their respective foods. Jarlsberg's cocktail-making abilities, on the other hand, are far more limited and pretty much an alcoholic version of this trope, leading to combinations like sauerkraut and lager or rum and nacho cheese.
* The platonic version occurs in the first film, after Manny has just rescued Diego from death at the lava fields.
* The Platoon of Power Squadron), Pyrokinesis, uh... sobering people up (while being drunk himself, might we add), and probably lots more. Getting control over his powers can be really difficult at times, and he's been known to accidentally use his powers in his sleep.
* The Platoon of Power Squadron, Virginia is so opposed to the idea of having powers, she tries to get a friend to come up with a cure not only for herself but for her to slip into the drinks of her other super-powered friends. Jonas isn't very eager to use his powers either, saying that Donald's whole "Fate gave us these powers for a reason so we have to experiment with them and save everyone and be heroes!!!" mentality rubbed off on him to the point where he lost control over them enough to use them in his sleep.
* The Plato Papers. American. 1809-1849". They believe that the inscription stands for "Eminent American Poet", indicating that "Poet" was a title given to historians as well as the writers of verse. It was a gloomy age — corroborated by other information that people of our time were obsessed with "webs" and "nets". They also uncovered an (ancient to them, far future to us) statue of a goddess inscribed with a map of the London Underground, from a time when the city of London was worshiped as a deity (none of this gives away any plot, by the way). The book works the other way around, as well, showing how different our conception of "reality" is from what is known in this far future time.
* The platypus is an odd animal, even among the grab-bag of evolutionary oddities that make up the ecology of Australia. Possessing a duck's bill, a beaver tail, and otter-like feet, it further distinguishes itself by being one of only five species of mammals to lay eggs. Beware the male ones, though, as they produce a venom that causes excruciating, intractable pain in humans that lasts for weeks, and is noted for not responding to analgesics like morphine. This venom is not actually fatal - but a dose of morphine that
* The playable characters also fall under this, since gameplay forces them to adhere to the rules of the court system, which insist on providing evidence to back up
* The playable factions get this to a degree but the worst offenders are The
* The playable Inklings (both male and female) wear a mix of shorts and whatever top they are equipped with, all of which are sensible for both genders. The
* The Playa delivers one to Tanya after having her lead him to where Johnny Gat is being held in
* The play also has an offstage subversion: Buckingham relates to an angry Richard how he completely failed to engage a crowd to accept Richard as king, with even the people he'd planted in the audience to cheer him not helping at all.
* The Playboy of the Western World by John Millington Synge, Pegeen Mike falls in love with Christie Mahon, despite knowing little about him, because the one thing she thinks she knows inspires her to imagine him as an adventurous, romantic figure, the "playboy" of the title. When it turns out that the one thing isn't true, she turns against him. The irony is that, partly inspired by her interest in him, Christie has blossomed over the course of the play into just such an adventurous, romantic figure as she imagined — but she doesn't realise this until it's too late to get him back.
* The Playboy of the Western World, Pegeen Mike rejects Christy Mahon in the end. It's not a downer ending for him, though; he gets so much else that he's got a good chance of getting over the rejection — whereas she regrets her decision deeply as soon as it's too late to take it back.
* The Playboy of the Western World takes place over the course of a single night and day.
* The Playboy of the Western World. The second was that one character has a line

about "a drift of females standing in their shifts".
* The "played for comedy" flatline, as described in the introduction, is actually quite a common occurrence. The electrodes can easily slip off the skin, and since the regular beep volume is usually turned down low, nobody notices the irregular signal on the monitor until the flatline beep (or alternative alert) sounds. So there are many false alarms. It's not uncommon for an annoyed patient ostensibly hooked up to one of these to buzz for a nurse because the flatline tone is interfering with their sleep/TV show/whatever.
* The played straight component of it includes the fact that it has a bar, spa, fighter hangar, and marine detachment.
* The play ends right after one of the candidates for the throne provides much-needed help for a pressing issue neglected by his rivals and is welcomed by the people needing the help accordingly. The long-term consequences of providing that help turn out to not all be positive in canon.
* The play ends with Abigail Williams running off with Mercy Lewis after stealing her uncle's fortune; the epilogue notes that, "The legend has it that Abigail turned up later as a prostitute in Boston." In reality, this is at most an unconfirmed rumor: nobody actually knows what happened to Abigail, who disappears from all historical records after the end of the Trials. Mercy Lewis did go to Boston, but it was to live with a relative; there's no indication that her departure was abrupt or secretive the way the fictional character's was, nor is there any reason to think that Abigail went with her.
* The Player: A Hollywood movie poking fun at Hollywood, even with collaboration of A-list actors!
* The player also has an opportunity to arrange someone else's marriage in order to end a war, but said person will not be very happy if she does.
* The player can accept a mission to raid a convoy hauling weapons in
* The player can acquire a summon that calls a being known as Bahamut ZERO, a gigantic flying dragon that bombards its targets from space with a giant beam of destruction.
* The player can also deploy this to a degree; if a guard spots the player and doesn't move, the guard will approach in an attempt to arrest you. At any point the player can shoot and kill the guard. This is typically used to move a guard to a more favourable position to kill and hide them.
* The player can also invoke this when Leliana first claims that she is acting on a vision from the Maker.
* The player can also uncover some additional examples of this as the game progresses. For example, Mike can dig up evidence that a semi-anonymous US Senator wants to arrange for a war in Central Asia or the Middle East (he doesn't terribly care where) so he can sell off a few thousand artillery pieces manufactured by a company that he owns but are being left unused. There's also evidence of war profiteering, where the aforementioned arms company wants to sell weapons to both China and Taiwan, but give them weapons with different ammunition specifications, so they have to keep buying separate weapons' packages.
* The player can become one of these and its sequels, if they're so inclined.
* The player can choose Marty's alias in 1931, all of which are names of famous fictional characters from around the 80's:
* The player can choose to initiate a Type 3 when a man's leg gets trapped. Especially notable because not only are you the one to do it, it's rather realistic, being incredibly gory, and even with you brandishing a fire ax, it takes four swings to make it all the way through, the receiver passing out from shock
* The player can do this as well. If you hold up a store with an empty gun,
* The player can encounter Drizzt Do'Urden (a huge figure in the Forgotten Realms setting) in the both games in the series. They can even recruit him and his party to help take on Bodhi and her vampire army in the second game.
* The player can get into a completely optional little argument with an official on the way in; it's pretty clearly lampshaded when Legion says that the "geth do not infiltrate", the customs clerk (whose job currently includes
* The player can join the Ziguranth faction and gain the antimagic skill tree, but

can no longer use any magic, runes, or arcane items. Oozemancers start as members of the faction.
* The player can make characters give each other collectables as gifts, in order to increase their affinity. The affinity can be raised or diminished based on how much the character that receives the gift likes it, and the gifts logic actually follows the character's personality as written. For example, Dunban hates fruits (which he voices several times) and Sharla loves them, so giving fruits to Dunban will make the player gain little or lose affinity while giving them to Sharla will increase it.
* The Player can serve as this to any primitive, pre-spacefaring species you encounter in the galaxy, with options including
* The player can toss just about anything out the airlock in the game
* The player can type a number of answers for different choices, including the nonsensical. For example, after
* The player can use this trope with regards to Safiya in the sequel as well, despite the fact that she is of a sect of wizards noted for their brutality, political scheming (read: assassinations and shadow wars), and immorality. Yet the player can completely trust her from the outset (not like you have any choice).
* The player character and her partner Rick have evolved into a rare opposite-sex version of the trope in the final installment of the
* The player character and (in the third game) her partner are both this, separately and together, in the
* The player character at the same high-standards high school who occasionally offers political insights in surprisingly erudite terminology... but is late to class the first day because she had to go hunting for breakfast, and didn't finish the summer reading assignment.
* The player character can have this sort of relationship (albeit a platonic one) with Serana if the
* The player character canonically starts as an already experienced hero who loses all their stuff when the game begins. The first chapter is set inside an evil sorcerer's lair filled with deathtraps. An entire chapter is set inside Underdark, with quests consisting in cleaning Mind Flayers' and Beholders's dungeons, while Drows are the main antagonists, and during this chapter, the party's home is inside a Drow city. A part of the game's story is about fighting a clan of vampires.
* The player character can speak almost every alien language, so you get subtitles even for what the Jawas on Tatooine are saying. Nevertheless, even subtitled, their syntax is rather strange.
* The player character gets put on the receiving end of this trope in the
* The player character gets to meet the wizard who nearly destroyed (accidentally) the Netherese Empire in
* The player character has the option of being this (especially as a human or dwarf noble).
* The player character him/herself can actually be this as well. There are a handful of party members whom the Exile can train in the ways of the Force. It's most noticeable with Handmaiden, since
* The player character him/herself can create a similar phenomenon in the
* The player character invokes a forging scene every single time he has to create or temper a sword in
* the player character is actually Revan, the one who previously defeated the Mandalorians in war.
* The player character is a small child but can take on monsters much larger and stronger than themselves. Admittedly, it's all-but-outright stated that this is because monsters have less to worry about from physical harm than they do the
* The player character is old enough to be the parent of a teen and some younger kids, meaning they're probably somewhere in their thirties or forties.
* the player character is revealed to be another Moon Cell NPC falls into this category.
* The player character, Karl, an American soldier is dressed in German gear (as a sniper this is very useful) in

* The player characters are "Shadowrunners" — mercenaries assembled on-demand like a
* The player characters do speak occasionally, as gathered from NPC's responses. Based on the
* The player characters in both games are also this. While they take part in events of the anime/manga, it's largely to make sure things go as they should be. The time patroller is mainly taking part in a plot that largely goes well beyond the scope of what Goku and the others are dealing with.
* The Player Characters in most roleplaying campaigns, if only by virtue of being the main characters and with each being a player's own persona, form a tightknit brotherhood. Usually players will be friends out of character. So characters might gladly argue with, mock, or even steal from, each other but then, as soon as one is attacked, even by somebody the other characters previously liked, the group as a whole will plan, plot, and scheme. Eventually wiping their attacker from the face of the planet, destroying people, governments, maybe even whole planes of existence, all for the sake of a single friend.
* The player character theoretically becomes one of these in the appropriately named
* The player character to Aribeth, and possibly a different player character again to Aribeth as her third love in
* The player character, Trigger is assigned to three different squadrons over the course of
* The Player contains over 50 cameos of famous Hollywood stars, all playing themselves.
* The player could actually become a remnant soldier in the online mode of the game
* the player discovers that they're Darth Revan, reprogrammed by the Jedi, aside from being angry to Bastila because she hid the truth, the player can later further go into villainy (especially if previously light side centered), and gives alternate responses from main quests, where Revan can tell Uthar Wynn on Korriban that they're Darth Revan, and he decides to pledge his allegiance to him
* The player does this to a pair of Pfhor Enforcers in one level of the
* The Player dubbed "The Player" and betting on whether or not he would succeed or fail in stopping criminals... or just be killed by them. They go through them quickly.
* The player, enemy soldiers, and aliens. This is the full list of everything that
* The player gets an opportunity to have his own How Did You Know? moment in the (chronological) beginning of
* The player gets a regular paycheck from their organization, SeeD, which is based on their SeeD rank. This works fine, until about halfway through Disc 2 when the player is made the commander of Balamb Garden. You would think that this would give you a pay raise. But no, your rank doesn't so much as rise a single level when you are promoted, and it is still possible to be
* The Player had a former Witness Protection officer go into private business creating false identities with the assistance of an insider in a government records facility who entered fake births into the system which would form a basis for the new IDs. The inside man was given away when it was noted how people connected with the forger seemed to have been born in a small rural county which just happened to have the records facility.
* The player had the option to choose Tidus's name in the first game, and it's never spoken aloud (due to that being the first voice-acted game in the franchise). In this, the characters won't refer to him by name. Rikku will only say "him" or "you know who", and Yuna's narration addresses Tidus personally so she will just say "you".
* The player has obviously the possibility to embody the trope against his companions, not only by abusing game mechanics against them but even story-wise by choosing determinate paths! The first example is right at the beginning if the player chooses to leave behind his caged former companions, instead of rescuing them. But probably the most blatant example is hijacking Anomen's path to

knighthood by leading him into bad deeds, giving evil advice, and maybe even blaming him for the inevitable consequences of such behaviour.
* The player has the option to heckle Snowdrake, who makes bad ice puns while he attacks. (His dad doesn't approve, either.)
* The player, however, can also themselves choose to embrace the trope, by ignoring the wackier dialogue choices and actions, and trying to adhere to regulations. This causes the game to designate the Player Character as a "Boring Cop", and notes that this kind of behavior can not come naturally for someone with his colourful past and current looks. The game will also note that the Boring Cop persona is just another one of your unhealthy coping mechanisms and does nothing to actually help you behave like a normal human being - internalising the Boring Cop identity will make the game congratulate you on now being both mad
* The Player insists that the main character gets acquitted, but too late. By the end of the movie, however, it's changed to an ending where the acquitted is (ridiculously) saved.
* The player is able to obtain Smough's Hammer, a gigantic hammer wielded by one of the bosses in Anor Londo. The head of the hammer alone is large enough to fit a full-grown man inside.
* The player is also capable of doing this in the Sequel, in the mecha fight against Charlie MacDonald.
* The player is cast in this role in the "Knight of the Rose" table of
* The player is entirely incapable of falling off of anything. Then again, they can't jump, either.
* The player is given much more freedom on certain nights where originally they only had the option to go to sleep, which allows faster Social Stat increases or more chance to make consumables for dungeon crawling.
* The player is presented with this choice again early on in Episode 5.
* The player is rescued by and subsequently joins Mengsk's "Sons of Korhal," portrayed by the Confederacy as terrorists. In later missions, you will engage in what can only be described as acts of terrorism against your own kind, and Mengsk is eventually proven to be out to make himself
* The Player Is the Most Important Resource: Video game characters state that they need the players.
* The player is treated to some dialogue and a boss battle while Sora's world is ripped to pieces by the Heartless, and finally everything
* The player is usually the only human ever mentioned, though you've been transformed into a Pokémon.
* The player may select a nickname for their character's confirmed love interest to use in
* The player must shoot the ball into one of three baskets where a snake is hiding to charm it, or else they will get bitten.
* The player Neopets. They appear to be adults and can get jobs, but there's a Random Event where they lose teeth, and when a Draik is hatched from an egg, it still looks like an adult. There are Baby pets, but this is merely one of the
* The player of course has the option of being one, if they choose a female
* The Player of Games, at one point, the main character is forced to bet his reproductive organs on the outcome of a match and his AI companion assures him that the Culture has no intention of letting such "advanced biological equipment" fall into a potentially rival civilization's hands (the reverse engineering possibilities would be disastrous). If it came down to it, they would simply evacuate him as soon as he lost and face the political/military consequences.
* The Player of Games, during the championship match of which he dopes himself up to his hair follicles with a cocktail of potent cognition-and-perception modifiers, spending the weeks-long title game secluded in a haze of drugs and games theory, unsure if he is holding his own or merely so blasted and burnt out that he can't see that he's already losing.
* The Player of Games, having fairly standard planetary ecosystems and landforms. She was also a big fan of volcanoes.
* The Player of Games lowered intelligence for non-apices. The apices are very much

on top and exercise crushing sexual discrimination against both other sexes: sexism here sees females as passive incubators and domestics, males as workhorses and disposable soldiers. Notably, more females than males appear to compete in the Azad tournament.
* The Player of Games Mawhrin-Skel, and those two sniping insults at each other about their respective ages, there's also Gurgeh's own musing about the age of Chamlis and how long the drone's been living on Chiark.
* The Player of Games novels, sex changes bear very little relationship to contemporary gender reassignment surgery. It isn't even really surgery, since you start it yourself and it's a from-the-ground-up-genes-and-all conversion into an opposite gender (in every sense) version of yourself.
* The Player of Games, the Azad have three sexes, a male, a female, and an intermediate 'apex' that takes the seed of the male, everts the organ and deposits the fertilized fetus in the female, who also contributes genes.
* The Player of Games, though - since the apexes are the dominant gender on their world, they are given the pronoun of the dominant gender on whatever world the story gets translated to.
* The player's allies have found a way to discreetly eliminate some enemies, without the
* The players are sent to retrieve a farmer's pigs in return for a sword. Instead of fighting the goblins that have stolen the pigs, they set a siege and wait until the goblins have run out of food and surrender, thus totally ruining the adventure the
* The Player satirized Hollywood's crushing effect on the visions of individual artists as well as the kind of people that environment attracts.
* The player's avatar is based on a picture the game takes of the player. The AI can recognize when the player is
* The Players Club, Blue, the local DJ at the stripper club the protagonist, Diana, works at comes to pick her up for a date. While he waiting for her to get ready, he meets her dad who just happens to be practicing his marksmanship with a gun. As you can imagine, the scene is far from comfortable to Blue.
* The player's companions seemingly survive the initial event, but wind up stranded on an apparently uninhabited planet. In addition, only three (seemingly randomly chosen) characters are definitively shown to survive.
* The player's farewell to Nines Rodriguez in the Independent ending of
* The player's first meeting with Tiera in the fan module Shadowlords arc has him getting her out of some trouble with the local police.
* The players from the range of third-voted out to right before the merge are pretty much living props at the reunion. Yve perhaps got this the worst in
* The Players Guide To SISU features Veitsi, a Paladin who leans toward the warrior side.
* The Players Guide To SISU, Sisukas, a bandit leader, returns after being killed in the first battle. Thus far, the means of his return haven't been specified, but there's apparently a specific god whose clerics could do it.
* The Player's Handbook 3 for 4th Edition includes Skill Powers, such as "Snap Out of it", which is pretty much this trope.
* "The player sitting east gets double points and pays double points." The East seat player actually gets 1.5x the points if they win the hand, and pays double if and only if someone else wins via
* The players move their pieces absurdly quickly, especially since they don't use a clock. There are variations of chess which greatly limit the amount of time a player has to make a move (such as blitz chess, where a player is given ten minutes of total time, and most moves are made in less than ten seconds). But in fiction, that's never what's supposed to be happening.
* the players obviously denied this. Modern teams occasionally pull some spectacular trick skating out to gain popularity with the audience before the match or during half time, but these days matches are totally unscripted and often about ten times more brutal as a result. Modern roller derby matches are regularly promoted and described as "bouts".

* the players of any table top game? A necromantically-inclined PC may even reanimate their body as an undead meatshield.
* The players on the heroes' team, however, are battle-hardened people with lethal superpowers themselves. The captain of the opposing team, Razor, is so powerful that he inflicts
* The players practice with Swingball toys, and swing the bats like swords or baseball bats. The German bowler windmills overhand, then stops and throws the ball underhanded.
* The player's ship manages to crash-land near a conveniently-placed (and always secret) base no less than
* The players themselves are also the ultimate authority on their side of the field and have the power to back it up. A massive assault on a player with tons of monsters can be casually dismissed by some of the most trivial spells in the game. Even
* The players themselves are a straight example of the trope. The more bizarre and massively destructive an event gets in their game, the more cheerful and congratulatory the forum responses will be for achieving it. There's a reason the game motto is
* The players themselves could be a form of this. Raid dungeons consist of a group of 10, 25, or 40 players. Many of the raids feature the raiders as a small but powerful strike force clearing the way for the standard soldiers to get through.
* The players themselves keep to this trope. When some players decided to roleplay as Intaki separatists, they named their alliance the Intaki Union.
* The players use various focusing devices before they can fully control their powers. This isn't outrightly stated, but by comparing
* The player takes out bombers or other aircraft on the ground from time to time. Attacking ships at anchor also shows up occasionally.
* the player, this will never occur to the player until the game is ready to reveal the twist.
* The player turns into one if you equip the Neptune's Shell and enter water, allowing you to move through it as if it were air.
* The Player, which has movie executive Larry Levy suggest that studios "eliminate writers from the artistic process" and instead take movie stories from newspaper stories.
* The Player who have been tapping into human communications since long-distance communications started are described as so ridiculously powerful that the Game is necessary as a way for them to relieve their boredom and blow off steam, otherwise they would indulge (more) in diversions such as assassinating world leaders or starting wars.
* The playground version was in turn featured in the Dreamworks movie
* The Playhouse's character smashes his flask on the floor and writes, "I resolve never to drink anymore." After he realizes he's been dealing with not one girl, but two, he hastily appends the words, "but just as much."
* "The Play". Lateral after lateral allowed Cal to win the 1982 Big Game with no time left on the clock, with the final receiver even having to run through the Stanford marching band to reach the end zone.
* The Playmates' "While the Record Goes Around" begins with "When the rec-(click) when the rec-(click) when the rec-(click) when the record goes around", imitating a broken record. The same "skipping" line is repeated near the end, then the song fades out with "around (click) around (click) around (click)". This fits the narrative of the song, which is about a couple dancing while the same song plays over and over (presumably on an auto-changing record player):
* The play shows the dynamic between Forrest and Macready as a relatively friendly rivalry, with Forrest even helping to hide Macready from the rioters. In reality, though
* The play's next case is when Sakura Oogami dies. This means that she dies before Celestia and Hifumi Yamada, who die in the game's third case, while Sakura dies in the game's fourth case.
* The Playstation 4 console: the controllers have a strip on top, and a triangle

on front, that is illuminated with leds that change colors depending on programmed actions in the videogames.
* The PlayStation 4 was released in the US and Europe on November 15th and 29th 2013, respectively, while its Japanese release date was pulled back to February 22nd a year later. This can be explained because of the early release date of the anticipated European game
* The PlayStation line as a whole has the "confirm" and "cancel" buttons traditionally be depending on what region console you have. For Japan-region consoles, O is to confirm and X is to cancel, derived from the idea that "O is yes, X is no". However,
* The PlayStation port of the first game added two characters (Ayane and Bass Armstrong) that didn't exist in the Saturn port. It also overhauled the graphics and had a new BGM. These were all later backported to the arcades as
* The play Sylvia, by A.R. Gurney, has a character named Leslie, a person of indeterminate gender, that asks the other characters to assign gender roles to him/her when they first meet.
* The Play That Goes Wrong: Adjusting for the ratio of women to men, the female characters get just as beat up by the set (and each other) as the guys do.
* The Play That Goes Wrong, and the real draw is to watch the chaos unfold around the hapless dramatists as everything that can go wrong within a theatrical production does go wrong.
* The Play That Goes Wrong begins with Trevor broadcasting some disparaging remarks about the play across the theatre before Chris desperately signals him to turn off his headset.
* The Play That Goes Wrong, Dennis tries to act out the response she needs to give for a question he asks:
* The Play That Goes Wrong have a tendency to indulge in this, with Max and Sandra being the worst offenders.
* The Play That Goes Wrong is a comic disaster that unfolds in real time.
* The Play That Goes Wrong. It doesn't help that, due to various disasters and some incompetence, this reveal is made two times before it's supposed to be.
* The Play That Goes Wrong: Max really, really doesn't want to kiss Sandra. When Trevor ends up having to read Florence's lines, though, he's much more enthusiastic.
* The Play That Goes Wrong pointing out said ledger is sticking out from under the couch does not help.
* The Play That Goes Wrong; Sandra turns it up to eleven by playing even her "hysterical episodes" seductively. It goes even past that when Trevor, forced to read Florence's lines, starts fake-grinding on the Inspector as a "hysterical episode".
* The Play That Goes Wrong, she is reading her lines from the script, leading to such readings as:
* The Play That Goes Wrong, the back flat falls around Annie, leaving her standing in the window.
* The Play That Goes Wrong when Annie as Florence loses her script pages and Dennis tries to act out the response she needs to give for a question he asks:
* The Play That Goes Wrong when Sandra returns midway through Act 2 and attempts to take her part back from Annie.
* The Play That Goes Wrong. When the female lead Sandra is knocked out, the stage manager Annie is shoved on to the stage with a copy of the script to take her place. Needless to say, she starts reading the stage directions out loud, and ends Act 1 by shouting "Blackout! Intermission!"
* The playwright Moliere sometimes named characters after the original actors that played them.
* The playwright's script, written by hand in a cursive script, depicted life in an era when government-issued scrip had ruined the economy.
* The Pledge is based on this premise, with the detective's obsession with his last case eventually driving him insane.
* The Pledge, when the author attends a literature conference and stumbles across

the protagonist's former senior Detective, who leads him to the protagonist himself (at that point of time an elderly, demented filling station attendant), and only then reveals to him who the protagonist was and why he ended up that way, thus setting the actual story in motion.
* The plight of bees worldwide has led many to speculate on how hard it would be for us to pollinate all the plants we rely on without them.
* The plight of those who are natural soldiers versus the concept of peace is one of the oldest and most important themes in the series. Solid Snake is loath to admit it even under the most excruciating duress, but he loves battle, and while his enemies often seek the proliferation of worldwide conflict for the benefit of natural-born soldiers like himself, he has a selfless moral instinct which forces him to stop them at any cost. In a meta sense we as players participate in this contradiction by playing the games because we enjoy and pay for simulated violence, yet portray characters who strive to prevent conflicts. The secondary plot line of the series follows the journey of his father, Big Boss, which sees him face the same quandary yet reach a completely different conclusion, choosing to fight because it's all he really has in his life and can't see any other alternative, nor does he think he needs a reason like following orders or wanting to stop the bad guys.
* The plot addressed this twice; once when Logan and Frances are watching the infants be implanted with Lifelocks, and later when Logan and Jessica meet the old man and are amazed that he not only knew who his parents were but was raised by them. It's not specifically stated, but the implication seems to be that all babies are conceived in vitro. When Logan 5 points out Logan 6 to Frances, he openly states he has no idea who the mother is, and seems to imply that he's the father.
* The Plot Against America: Evelyn and Bengelsdorf turn into this near the end of the show to explain what happened, causing disdain or sadness from other people.
* The Plot Against America: Evelyn is clearly much younger than Rabbi Lionel Bengelsdorf (the actors are fourteen years apart, though he looks older on the show). Nobody really comments.
* The Plot Against America Like in the book, it's left unknown if that's true or simply an excuse she cooked up herself.
* The Plot Against America money to make even more money. He's a jerk, but he also believes that riches are the only way that a Jew has to protect himself in a gentile world.
* The Plot Against America: President Charles Lindbergh and Rabbi Bengelsdorf use benign rhetoric and naming conventions to obscure their true intention of stripping American Jews of their cultural identity because they're seen as aliens who are not American enough. Bengelsdorf runs Lindbergh's "Office on American Absorption," tasked with "absorbing" Jews into American society, even though they're already Americans. An initiative to indoctrinate Jewish boys by sending them to live on Midwest farms is called "Just Folks."
* The Plot Against America was only too happy to oblige. Her character ultimately says it to the rabidly antisemitic Henry Ford.
* The Plot Against America: When Henry Ford makes an antisemitic remark to Evelyn and Rabbi Bengelsdorf, the demure Evelyn snaps back a Yiddish curse, "Gay kocken offen yom!" She later admits to Bengelsdorf that she doesn't actually know what it means. He whispers the translation into her ear, which makes her smile incredulously, but the audience doesn't get to hear. It means, "Go shit in the ocean!"
* The plot arcs of each game have a few coincidences, but are usually explained as the long-term plans of people involved with the cases. Not so with the events of
* The plot before the core arcs questioned the existence of a 19th person, the events of the series were built up for 19 years, and the core arcs themselves revealed that
* The plot begins with Trixie being lost in the Everfree Forest for weeks. The series later showed that Trixie actually went drifting and ended up working on the Pie's farm for a while.
* The plot comes to a halt as the scene takes its spot in the running time. There

can't be any
* The Plot Demanded This Index - Something happens to push the story because logic can't.
* The Plot: Dianna replaces the batteries of her family's carbon monoxide detector with dead ones and then makes sure her and her daughter's rooms' windows are open. Sure enough, her parents asphyxiate.
* The plot features a recall election in Gotham City as a major plot point and released close to election season in America, so many critics and pundits couldn't help seeing the movie as a commentary on all that. Director
* The Plot Gods made a decision that she claimed made her cry while writing the deaths of
* The plot involved a kidnapping for a hostage exchange; he planned to help Quiller foil the kidnapping, only to kidnap Quiller as an alternate hostage.
* The plot involves finding out why the Northuldra and the residents of Arendelle broke out into a fight 34 years prior, even when Arendelle built a dam to bridge them to the Northuldra's forest as a peace offering.
* The plot is driven around a young woman who's frustrated because her fiancé won't marry her until the Dow Jones Industrial Average rises above 1,000.
* The plot is driven by Elizabeth's ability to create tears to alternate dimensions. This manifests as a core gameplay mechanic where the player can ask her to summon allies, ammo, cover, or distractions from an alternate reality on command.
* The plot is kicked off by Elle being dumped because she wouldn't be the right kind of trophy wife. Her boyfriend Warner plans to become a senator and therefore needs someone "serious". In fact Elle appearing to be a
* The plot is recycled in another episode (with an emperor, this time). Fortunately, the confusion gets cleared up at the end.
* The Plot, Jacob is drugged by his wife Anna and then given a lethal overdose. Anna then reveals herself to be Dianna, Evan Parker's sister upon whose life his story and later Jacob's book Crib is based on.
* The plot kept getting slower and slower and slower over the course of ten books, with books 8-10 representing the lowest point, though Book 11 had as much actual plot development as the previous three combined, and the last three books (completed by
* The plot kicks off with Shouta's discovery that his classmate Ichigo wears diapers. While no explicit agreement is made between them, Shouta keeps quiet about it and frequently covers for her when a situation stands to embarrass or expose her.
* The plotline for that episode involves the Halliwell sisters being sent to 17th century Virginia to protect one of their ancestors. To ward off a mob, Phoebe uses her levitation powers to fly toward them while seemingly riding a broomstick. As she told her sisters, "I'm embracing the cliche."
* The plotlines of the SMP itself cover some extremely heavy topics, including and not limited to war, mental health, trauma, death, abuse, suicide, cults, etc. However, almost all of the series also takes place in Minecraft, making it inherently goofier than a series with such dystopian and dark themes would otherwise be.
* The plot of "Deception" by Blackalicious. A guy from the streets becomes a rich and famous rap star and ditches his former crew, then gets replaced by the next big popular star that comes along and plummets back down into poverty, while all the people he abandoned during his rise to stardom point and laugh at him as he falls. The
* The plot of "Defence" also mirrors that of "Pro Se" in the original Law and Order, although the mentally ill defendant here is much
* The plot of Elizabeth George's "I, Richard" revolves around the protagonist discovering proof that Richard sent the Princes away for their own safety.
* The plot of "Hands on a Desk Chair" kicks off when Oprah is forced to leave Precinct 13579 on a top-secret mission and doesn't bother to name a stand-in

Director in the meantime. Orchid, Olympia, Otis, Ocean, Coach O, Oona and Owen fight over who gets to be the stand-in Director while Oprah is gone, and by the end of the episode, Orchid is deemed the winner — but it doesn't last long, as Oprah comes back a minute after the agent sits in her boss's chair.
* The plot of "High Maintenance" kicks off when, after hearing O'Mary's and Obby's suggestion that he and Olympia should switch jobs for a day, Otis shuts them down and says that Oprah would never agree to it...only for the Director to have all four of them switch uniforms and departments and state that she would
* The plot of "Mr. Monk and the Big Reward" borrowed so liberally from
* The plot of one episode has Homer destroy a scarecrow, gaining the loyalty of the crows it was meant to get rid of. They proceed to serve him loyally and possibly killed a few people until they nearly kill Maggie by accident. After that Homer tries to get rid of them, but they turn on him and hurt his eyes.
* The plot of Phoebe losing her active powers during season six was set up to save the money needed for the wire work used to make her levitate.
* The plot of season 1 is kicked off when a group of three street thugs, Dante Chapman, Shameek Smith and Chico Diaz, attack a gun deal between men working for Cottonmouth and Domingo Colon, planning to steal a large amount of money. Things go bad, a gunfight breaks out, and everyone from both gang factions gets killed. Shameek, getting greedy, shoots Dante dead rather than split the money three ways. Before he dies, Dante calls Tone to rat out Shameek and Chico. Shameek is tracked down within a day, and Cottonmouth beats him to death in retaliation. The next day, Luke tracks down Chico as a favor to Pop and hopes to negotiate a deal with Cottonmouth to let Chico off the hook if he gives back the money. However, Cottonmouth's henchman, Tone, decides to go after Chico and shoot at him in Pop's Barbershop. He only succeeds in wounding Chico and killing Pop, but gets back the money. Killing Pop gets Tone himself thrown off a roof by Cottonmouth, and also sends Luke on the warpath. Finally, Chico is strangled to death by the corrupt Detective Scarfe a day later as the last link to the heist.
* The plot of season 1 is kicked off when Wilson Fisk has Karen Page framed up for murder when she attempts to blow the whistle on corrupt activities at Union Allied.
* The plot of Season 2 Episode 7 is kicked off by both Dib and Tak's teams trying to stop Zim from siphoning cosmic energy to use in future plans. After the resulting trip to a
* The plot of "Silence in the Library" is resolved by an unusual variation in which the Doctor gets the
* The plot of "The Beast and the Prince", the book that shows up in Episode 13, is strikingly similar to Hans Christian Andersen's version of
* The plot of the episode "For Want of a Boot". Hawkeye needs a new pair of boots. Supply sergeant Zale will send in the requisition form if Hawkeye can arrange for a dentist to fix his teeth. The camp dentist Captain Futterman won't do the work unless Hawkeye gets him a three day pass to Tokyo. Before Colonel Blake will issue the pass, he wants Major Houlihan to stop complaining to the Army brass about him. Margaret agrees to not send in a negative report on Colonel Blake if Hawkeye will throw a birthday party (including a birthday cake) for Major Burns. Corporal "Radar" O'Reilly will get the cake if Hawkeye can get Nurse Murphy to go out with him. Nurse Murphy agrees to do so in return for a hair dryer. Corporal Klinger wants a Section Eight discharge (which must be signed by four officers) for his hair dryer. Unfortunately Hawkeye can't get Major Burns to sign, so in turn each person in the chain refuses to cooperate, causing the deal to collapse.
* The plot of the episode "Inferno" revolves around a character finding the titular videotape (whose full title was
* The plot of "The Fairy Godmother" kicks off due to a failed Cinderella: Elena has the abusive step-family, the work ethic, and the beauty; but she's in her twenties and the prince is only 6! Fortunately, the vortex of Traditional power that is trying to make this work has other uses: It can be refined and redirected to give Elena the magical oomph to function as a Godmother.
* The plot of the fic revolves around Ash becoming Erika's student. To go along with this, he must

* The plot of the first game ultimately revolves around preventing a war between the city-state of Baldur's Gate and the nation of Amn. The tensions leading towards war are being
* The plot of the folk ballad "The Outlandish Knight" and its variations: "For six pretty maidens hath thou drown'd here/the seventh hath drownéd thee"
* The plot of "The Kidnapped Prime Minister" (1924) was reused in "The Girdle of Hippolyta" (1939), with the victim changed from a male politician to a young schoolgirl and a corresponding change of motive.
* The plot of the quests "The Elder Kiln" and "The Brink Of Extinction" is the player saving the Tzhaar race from going extinct. The Tzhaar are a race of creature made of living volcanic rock that pass their memories to their offspring when they reproduce, but recently they have only been able to create Ga'al, which are Tzhaar born without memories, and without the ability to pass their memories to their offspring, they fear that their culture will die. In "The Elder Kiln" they want to try fusing the remains of a dead Tzhaar to a Ga'al to give it memories. This reveals the horrifying truth that dead tzhaar remain
* The plot of the series finale involves two near-misses on this: a battered woman whose boyfriend keeps violating his restraining order, and a
* The plot of the story is that the Daltons have been informed that they will inherit a fortune from their recently executed uncle if they kill the judge and jury who ordered his hanging. Conditional wills cannot require the heirs to commit a crime in order to inherit.
* The plot of the third book relies heavily on the assumption that the Soviet Union is still around in the 22nd century, and has enough clout that the Council of Worlds (a successor to the UN) granted it and China their own colony on Mars to spread communism. The Soviet Union ceased to exist in 1991. The last book, written after the Soviet Union's demise, retroactively places a lampshade on this, claiming that in recent years, there have been Russians pining for a return to communism, and the Mars colony was an attempt to siphon those agitators away from Mother Russia.
* The plot points about Bane pitting Gotham's lower classes against the well-off and those in power has been interpreted as being in reference to the Occupy Wall Street movement, though whether the film is meant to be either for or against OWS or free-market capitalism differs wildly depending on who you ask.
* . The plot points are introduced and wildly discarded, except it's acknowledged and played for laughs by the characters. Characters have, more than once, decided to "wait out" a current turn of events or attempt to ignore a twist with the knowledge it will just go away when the author gets bored.
* The Plot Reaper: Character dies so they won't stand in the way of the story.
* The plot revolves around the concept of implementing randomly-assigned handicaps before each bout, which would
* The plots always seem to demand readily available precogs, most of whom just have to paint (with white out eyes), and some of whom just get odd dreams which is as easy as shooting another scene and screwing with the filter.
* The plot starts when the male and female lead win the in-game characters of the male and female lead from the original
* "The Plotters" is a spoof of a Dennis Spooner-era historical, and incorporates
* The Plucker, the two protagonist dolls (living dolls; some are creepy, some are not; the book is illustrated) are shown at the end asleep leaning on one another.
* The Plumber Knight Returns has been retired for twenty years, having been living under the assumed name of Michael Camborelli. The series depicts him coming back out of retirement to fight off a street gang known as the Goombas.
* The Plumber Knight Returns: Mario has goggles as part of his new costume, but only puts them on while suiting up, wearing them around his neck otherwise.
* The Plumber, who wants intricate characters with deep, complicated backgrounds and motivations, and expects exploration thereof.
* The plunder at Ismaros is rewarded by storms that blow the crew off course.
* The Plushie paint brush makes a Neopet look like a living stuffed toy.
* The Plus One Of RWBY thrown out. Her line "I'm not perfect, not yet" is

considered a heinous act of arrogance, and causes the "hero" to go into a psychotic rage and considers killing her for it justified (he doesn't do it, but acts like not killing her is showing restraint and mercy)
* the Plutarkians too use Line Infantry, but are supported by Heavy Infantry and liberal amounts of Artillery and tend to fight only defensive battles (offensive operations are carried by their Indigs allies, plus Exotic Infantry hired on specific occasions);
* The Plutonian could pick up. In those 10 minutes, a sonic virus was released that turned hundreds of children into walking skeletal corpses. This, as much as anything, contributed to his going insane.
* The Plutonian) into an area that nullified both their powers, assuming this trope would let him win because he had a backstory as a mundane and the Plutonian didn't... only to find that the Plutonian was entirely capable of fighting unpowered, and getting his ass handed to him. Possibly Max is exaggerating for effect, or perhaps he qualifies himself.
* The PMC Moss Green looked down on a Legitimacy Kingdom force because they were soft from only supporting Objects while Moss Green had been trained to fight actual soldiers in the Northern European Restricted Zone, where Objects are forbidden to enter by international treaties. Their commanding officer is enraged when some of her soldiers are killed by Quenser, viewing it as undignified. As far as Quenser can tell she doesn't really view him or his unit as human beings due to this trope.
* The PMRC also helped lots of musicians through their successful push to have "Parental Advisory" stickers, nicknamed "Tipper Stickers" on music albums, which helped let people know exactly which albums were cool and had the
* The Pocalypse was perfectly willing to ignore the distress calls sent by the main characters because they got the missions he wanted. When this is revealed, he just attempts to kill them.
* The pocketwatch had become a rare sight by the end of World War I as men started wearing wristwatches instead. By
* The pocket watch of the conductor in "The Polar Express" states whether or not the train is late.
* The podcast DWO WHOcast spent one episode pondering why it was that the Doctor's boots changed into brogue shoes when he regenerated from the Fourth into the Fifth Doctor (which out-of-universe was just a straight
* The podcast host Kaneda gave several details about the game (including the theme, designer, and unusually high amount of Limited Edition models) prior to its reveal.
* The podcast's version of vampires (humanoid creatures with long tongues for sucking blood that have mild hypnosis powers and little to no conscious thought outside of that regarding feeding).
* The podcast was inspired from a segment on the hosts' other (and since ended) podcast
* the Pod (which is large enough to carry half a UNSC base), the stealth-capable Owl, the cargo-carrying Darter, and the FTL-capable Condor.
* The Poe Detective Agency series by Brian Yansky, the main character's love interest Julia is a zombie. The novel also mentions that he had sex with a number of other zombie women before.
* The poem "A Nauseous Nocturne" does this throughout without breaking style somehow:
* The poem "Christmas Thank Yous" by Mike Gower has the author writing tactful thank you letters to all the relatives who sent him unwanted gifts, concluding with a sincere letter to his Grandad saying that he's
* The poem "Cietrzew" ("The grouse") by the Polish poet Stanislaw Baranczak is about the titular bird lamenting that no Polish poet seems capable of finding a rhyme to his name. Naturally, the poem itself includes several different ones.
* The Poem of the Cid as having a magnificent beard, as befitting an archetypal badass.
* The Poem of the Cid on the exile and redemption of El Cid Campeador, (very) loosely based on his real exploits.

* The poem "Old Christmas Morning" by Roy Helton has Lomey dropping in to visit Sally Anne. It isn't daylight yet, and Sally Anne wonders why Lomey is out so early. Lomey's answer is that she's been to visit her husband's grave. Sally Anne's husband, Taulbe, had killed him. The poem turns creepy when Lomey confesses to having seen Taulbe along the way and, her husband's rifle in hand, she killed him to avenge her husband. But as he fell, he got in a last shot and took her down with him. Sally Anne's visitor is in fact the
* The poem "Poltava" offers a particularly twisted example, though the exact age gap is left unstated, other than "significant".
* The poem "Problems with Hurricanes" by Víctor Hernández Cruz suggests that the biggest danger people face from hurricanes is the chance of being lethally impacted by flying fruit.
* The poem "Sheridan's Ride" somewhat exaggerates Sheridan's contribution to the victory over Jubal Early's forces; many of Sheridan's forces had been routed by Early's, and he did rally them to counterattack, but some forces had pulled off this trope and were ready for counter-attack without him. (Probably wouldn't have been as crushing.)
* The poet Dorothy Parker is a well-known example and by her own admission. Even though she became famous through her poems and essays, she loathed the actual work of writing (“I hate writing, I love having written"), and no doubt her alcoholism and bouts with depression made the writing process even more difficult for her.
* the poet is having a bit of a panic attack, he notices a young woman looking at him compassionately from a window. The poet is moved to tears by this look and even begins to feel Love in his soul for the first time since his lady's death.
* The poet Julia Ann Moore, widely considered the American counterpart to William McGonnagal], is reported to have responded to a review calling her "semi-literate" with "The Editors that has spoken in a scandalous manner, have went beyond reason".
* "The" poet Michael Field (actually two women, Katherine Harris Bradley and Edith Emma Cooper).
* The poet Pam Ayres wrote a poem about DIY going very wrong, with a repeated caustic line which her father often used: "You might as well have left the job alone". The poem ends as follows:
* The poet Stevie Smith was female (originally named Florence). It's also been known as a shortening of Stephanie, as in
* The poets who frequent Raguenaus company claim to love Raguenau’s poetry, but they only want to leech him off.
* The Poet that the FBI is hunting turns out to be one of the FBI agents.
* The Pogues. A lot of his songs make heavy reference to alcoholism, in all its various forms.
* The Pogues as a sleeve design. This refers to a wreck involving a French troopship, so has no relevance to the title.
* The Pogues blended Irish traditional music and punk as what became the first example of Celtic punk, a style taken up by Irish and Scottish inspired bands in both Britain and North America.
* The Pogues censor it, they were hit with backlash and reversed it within the day.
* The Pogues centered around an Irish couple who emigrated to New York City.
* the Pogues' "Fairytale of New York" - she was hired as a guide vocal before the band was to dub another singer's vocals in. This never got to happen, as they quickly fell in love with MacColl's performance.
* The Pogues: "Fiesta", about partying in Spain, has lyrics in English with inserted Spanish phrases. The last verse is entirely in (rough) Spanish (with one Italian line). It contains enigmatic mentions of one "Cait O'Riordan" and an "Costello el rey del America". O'Riordan was The Pogues' first bassist, until she ran off to marry Elvis ("The king of America") Costello.
* The Pogues follows the crimes and arrest of a highway-robbing drunkard.
* The Pogues have a track called "The Old Main Drag", which is an unrepentantly brutal and candid look at type 2, with a special emphasis on low-rate transgender prostitutes.

* The Pogues' (sensing an Irish theme yet?) "Body of an American", as excellently used in
* The Pogues, Shane MacGowan does both the male and female parts in "The Gentleman Soldier". His female voice is of the screechy, Pythonesque variety.
* The Pogues' song "Small Hours" has one: "Now that you're alone with me — Close the door and turn the key — We'll stay up late and watch TV..."
* The Pogues used to be one of these, but then his lifestyle caught up with him. Today, he's seen as a walking cautionary tale. Other Celtic Punk bands carrying on in The Pogues' footsteps, however, are all about this trope.
* The point-and-click adventure game leaves out Rufio's death and you can see him alive and well on the ending screen.
* The point-and-click aspect leads to a prevalence of "examining" objects similar to Wasteland. Therefore, even if the character sprites are the same, a player can tell the difference this way. Upon examining two men in leather jackets, you might see this:
* The Point "And needless to say, business was brisk, and the competition was...competitive."
* The point behind Angel and the gang being recruited to run LA branch of Wolfram and Hart in Season 5 is basically this troope, even if they insist that they did so to do good. It is strongly implied (and occasionally stated more or less explicitly by several characters) that the Senior Partners want Angel (and his friends) to willingly choose the evil side for "good" reasons.
* The point being that women should join the Army to build the demographically-diverse force necessary for modern low-intensity conflicts.
* The point is emphasized by the contrast to the earlier episode "The Train Job", in which the trope is initially averted — the plucky heroes are quite blasé about the fact that they are committing crime for no reason other than their own pecuniary gain — but then subverted when they then return the stolen goods when they discover them to be medicine that is sorely needed on a poor planet.
* The point is made that in small-town Australia there isn't much to do except belong to funny clubs.
* The pointless hoarding of evidence against oneself even when there's absolutely no need to do so;
* The "Point Lookout" DLC features a feud between the ghoul Desmond and the
* The Point Man was entered into stasis at around 16, and taken out and trained when he was physically in his late 20s. It's hinted (but never made clear) that he
* The Point Men: Fast Eddie, Sal Rinauro, Mike Kruel, John Walters, Josh Daniels
* The Point Men: Lit, Mellow, Yeyo, Krazy K, Deranged, Hijinx, Angel Dust
* The point of dropping leaflets is to break morale and bring about surrender. Well, that and telling the enemy how to surrender without getting mistakenly shot.
* The point of learning War charms is so that you can have your own Badass Army. With the right combination of charms, you can have an army made of 'mere mortals' who can take on the Dragon-Blooded, will not be demoralized when fighting horde upon horde of undead, and even shake off supernatural influence that will shatter the mind of normal people.
* The point of pairing soldiers with A.I. was to create an unstoppable super soldier. They got what they were aiming for in
* The point of the experiment is that if a normal and intelligent human playing the part of an AI can Hannibal Lecture you into letting it out, then a super AI could definitely do it. The exact details are always censored, but it has been strongly implied that most winners playing the role of the AI in the experiment did exactly that. Many of the Gatekeepers have needed a lot of emotional support afterwards, the originator stopped running the experiment, and many Gatekeepers were unwilling to ever perform it again.
* The point of the mock Christmas Carol "The Restroom Door Said Gentlemen" by The
* The point of the Pre-Raphaelite Brotherhood was to do this for classical art.
* The point of the rings is to bind the Ring King to his wives so that he can receive power from them and fight the Abyssal beasts; the closer their bonds, the

more powerful he becomes. A quick kiss before a battle gives him an energy boost, and sex supposedly gives a permanent boost to his power. The problem is that Sato is in love with his first wife Krystal above all others, and refuses to touch any of the other girls first—despite the fact that his relations with Krystal
* The point of the setting is that there are no good guys, and the Imperium is the perspective of the human factions. Individual
* The point of the song "I Dreamed I Saw Joe Hill Last Night", as recorded by Paul Robeson, Joan Baez, and others.
* The point of the story is to teach a lesson about racism and jumping to conclusions. There are, however, some versions featuring a white man. In these cases, the joke centers on the man (naturally) wearing old clothes to do the yard work.
* The point of this being to show the "good old days" preceding the Dark Times of the Empire. This goes back to Star Wars' fantasy roots. Star Wars is, ultimately, Space Opera. The fantasy end of Science Fiction.
* The points are worth a lot more in the first Harry Potter book — Harry and company are mortified at the prospect of losing 50, let alone 150 points, but in a later book, Snape docks 50 points with only a passing mention.
* The points because if JD had just swallowed his pride and asked someone what was going on, nothing would have happened to him.
* the point that he can't get a word in. her immediate reaction is to declare the whole thing a mistake and drag Amy home. Only intervention from Penny keeps her from doing so.
* The point thirteen and a half minutes into Part 1, where a long, mellow Hawaiian-guitar-like sequence is interrupted by a horrible, raspy guitar. And, of course, the sinister voice of Vivian Stanshall appearing out of nowhere to speak the words "Grand piano" after 20 minutes of pure instrumental.
* The point where Spike calls Xander a 'glorified bricklayer'. Also relevant for the big fight against Glory. Or the message the First Slayer gives Buffy back at the end of season 4.
* The point where the films completely shook this trope off was when
* the point where they begin to outshine the fighters in combat, and most of the high level, high damage spells tend to be fire.
* The pointy-haired boss punished Wally's lack of performance, by forcing Wally to watch him eat!
* The Pointy-Haired Boss uses insane troll logic on several occasions. On
* The Poison Apples. He's in his fifties and his second wife is in her twenties.
* The Poison Apples loves India and everything and anything related to it. Much more than her husband, who is actually from India, or her step-kids, who have Indian heritage. She studied in India, became a yoga teacher, changed her name to an Indian name, had a big Indian wedding even though her husband was ambivalent about it, wears a bright pink sari as casual everyday wear and decorates her entire house with Indian decorations.
* The Poison Apples: Molly Miller would be this in her family. Once her father remarries after his divorce, her little sister gets close to their stepmother and their relationship suffers as a result.
* The Poison Apples. One stepmother only acted this way because her stepdaughter's poorly handled reaction to her engagement to her husband, another is 100% sweet and endearing to her stepchildren, and the third one is almost completely cold and cruel to her eldest stepdaughter.
* The Poison Belt of the title, but it turns out to be entirely harmless and no one dies.
* The poison dart frog poison kills in less than 3 seconds; it has to get in the blood though, so contact itself probably won't kill you. Unless it's the
* The Poison Dart Frog's poison was stated to be lethal enough to one-shot any attacker that hit it. The trouble is that the frog
* The poison finally O-shiga lives long enough to explain to Ienari that it was a plot she and his wife Shigu cooked up in revenge for...
* The Poisoning were planning to commit suicide together, and the girl was trying

to buy sleeping pills pretending they were to sleep better. The suspicious pharmacist replaced them with laxatives instead, and the suicide went... unexpectedly. Both survived, though in agony.
* The Poison Master and space travel can be done by alchemically-powered devices.
* The Poison Master averts this: the Master Ari Ghairen modifies his own body with spider and snake genes to be both resistant and toxic, in an effort to keep up with the cold war in his Guild.
* The poison might actually be explainable if true, that said - it was apparently baked into a cake, which caused it to
* The "poison mist" used by many wrestlers, especially in Japan. According to Japanese
* The poisonous essence that regularly expands and shrinks the playable area in
* the poisonous gas, and utterly afraid of Sebastian at the time makes this example especially jarring.
* The poisonous gas that regularly advances and shrinks the playable area in
* "The Poison Sky". During UNIT's assault on the Sontaran facility, Colonel Mace comes up behind Commander Skorr and bellows, "You will face me, sir!", then puts three in his chest the second he turns around.
* "The Poison Sky" has Colonel Mace call a "Code Red Sontaran" when they find out about their presence.
* "The Poison Sky" only for another character to take his place, Martha immediately hugs him. Donna whacks him on the arm before she does the same.
* The Poison Sky", shouting out to his opponent before shooting him dead:
* "The Poison Sky": Sontaran General Staal averts this, noting that it's unwise to reveal strategy to the opposing party.
* "The Poison Sky": Sylvia Noble smashes the windshield of her car with an axe she has in the house because of burglars as her father's been trapped inside because it's being controlled by the Sontarans.
* "The Poison Sky": The Doctor gives his coat to hospital gown-clad Martha, whose clothes were stolen by her clone. Donna says it's a good look for her, leading to this exchange:
* "The Poison Sky", they start off looking like this when the Sontaran army uses a field that makes copper-jacketed bullets expand inside guns to jam them. A fair number of UNIT troops are thus slaughtered when their guns fail. UNIT, upon being told this, gets steel-jacketed bullets and teaches those arrogant bastards that the human race is not to be messed with. The Sontarans' claims of "sport" aside, clearly they aren't that used to their prey fighting back.
* "The Poison Sky": UNIT have been forced from the ATMOS factory by the Sontarans. Then Colonel Mace calls in the Cavalry in the form of the flying aircraft carrier, Valiant.
* The poisons Yoshimune's older sisters were given also took effect pretty quickly, although it took them hours to die.
* The Poisonwood Bible by Barbara Kingsolver: at one point, an American missionary in Congo ends up with tree sap on his arm and forehead, but pays it no heed. A local tells him "That tree, it bites", a warning he can't make sense of. The next day, he wakes up with a severe skin irritation where the sap was.
* The Poisonwood Bible comes from an example. Missionary Daniel Price tried to say "Jesus is precious" in the local language, but it came out as "Jesus is poisonwood."
* The Poisonwood Bible, Leah (a white girl who came to the Congo with her missionary family) ends up marrying Anatole (a black citizen of the Congo). There are a lot of awkward moments, to say the least, over Leah's skin color, as she is the minority in the country where she lives, and because her race defines her as a citizen of an imperialist country.
* The Poisonwood Bible, she's forced to talk and starts acting more normally, much to Rachel's surprise.
* The Poisonwood Bible the people he's preaching to, and never considers that maybe a different audience would require a differently-tailored message.
* The Poisonwood Bible, this frequently comes up in arguments between the pro-

colonialist Rachel, and her sister Leah, who is married to a (mostly non-violent) freedom fighter.
* The poison you are given in the Hound Pits Pub is activated by movement, not time - so the closer you get to your bedroom, the hazier your vision gets, with Corvo passing out when he reaches his room. Of course, this means that the player could stay in the Hound Pits for ''hours'' and suffer no ill effects
* The Pokédex also states that Vaporeon's "cell composition is similar to water molecules. As a result, it can melt away into water." A cell is a lot more complex than a three-atom molecule. Even if we assume this to be a mistranslation that should read something like 'its cells are composed mostly of water', then we (and everything else alive) could too.
* The Pokédex entry for Escavalier says it flies around at high speed. Its base speed is
* The Pokédex - Extended Fanon Edition and documents the creatures as if writing a scientific article about real-world animals, dealing their biology, behavior, reproductive habits, diet and depiction in human culture.
* The Pokédex interface and physical design has increasingly gone this way from Generation V onward.
* The Pokédex, which is devoted to providing information about
* The Poké Doll is a brightly-colored toy that will distract wild Pokémon and allow the player to run away from them. In
* The Pokémon anime takes this a step further. At various points we've had (human) psychics,
* The Pokémon Kirlia and Gardevoir can both be male despite appearing to wear a tutu and a ballroom gown, respectively. Gen IV introduced Gardevoir's
* The Pokémon Squad, a comedic fanfiction series that hit this mark on January 18, 2020.
* The Pokémon Squad: A lot of the cast retains these qualities.
* The Pokémon Squad. Barney Frank also used to be like this for Bart. Hell, he even used to be strangled!
* The Pokémon Squad gang) or the countless number of one-shots throughout its run.
* The Pokémon Squad Japanese cousin visits him in the episode "Bānī to Tomodachi", he tries to learn Japanese in order to talk to him. Naturally, due to using Google Translate and Yahoo Answers to learn, this backfires spectacularly.
* The Pokémon Squad Movie", respectively) also have Q&A sessions at the beginning.
* The Pokémon Squad, pretends to only speak Swedish to drive away Jehovah's Witnesses, and uses his skill in Japanese to his advantage while on a heist to retrieve an ancient artifact.
* The Pokémon Squad: RM is often confused for a flat-chested woman because of his long, blonde hair and effeminate looks/behavior.
* The Pokémon Squad, saying that he hates the show but doesn't harass people for liking it.
* The Pokémon Squad, there are some good examples in both the mansion and the Yaoi House:
* The Pokémon Squad was cancelled, June (who was fourteen at the time) was so upset, that she started smoking and drinking. At her age of twenty-five in the fanfic series, she is a full-blown alcoholic, smokes constantly, and in the episode "The Future is Evil", she starts pole-dancing at nightclubs.
* The Pokémon Squad was initially targeted at a younger audience. As RM got older, the series also began to aim at a more adult audience. In turn, the humor became noticably raunchier (which was outright admitted in the second Q&A session), while becoming less off-the-walls.
* The Pokémon Squad when it was becoming apparent that he was nothing more than a one-joke character.
* The Pokémon that is best known with this ability is Lucario, a Fighting type who is able sense and use aura. Its most famous attack is

* The Pokémon themselves would count as well, since they're somehow able to communicate fluently with each other despite their dialogue consisting only of the names of their given species — combined with lots of animal noises for Pokemon species this is appropriate for in the original Japanese. (Even in the English version they sometimes make animal sounds-for example, Tepig "oinks"-but it's much rarer.) In one episode where Ash became separated from their Pokémon, the Pokémon spoke to each other without any trouble (complete with subtitles in the dub).
* The Pokémon They Carried bears the nickname of "Black Blade".
* The Pokémon They Carried is known by the soldiers as "The Marionette".
* The Pokémon Trading Card Game then introduced Pokémon-SP, none of whom needed to evolve (and thus could function as a single card in the deck, as opposed to Pokémon that evolve, who need at least 1 card for each stage of evolution) and could power up using Trainer cards, which shifted it back toward low-Pokémon, very high-Trainer decks. The card designers are aware of this, however, and have successfully made popular not only Energy-intensive decks via Energy accelerators, but Pokémon-intensive decks through mechanics introduced in later generations like Pokémon Lv. X, Pokémon-EX, and Pokémon BREAK cards that use up more Pokémon cards in a deck but are incredibly powerful.
* The Pokémon Trainer also does this during Subspace Emissary gameplay, and in large scrolling multiplayer stages. The Trainer himself trails his Pokémon at all times. However, he doesn't follow its movements over
* The Pokèmon They Carried vehicle that weighs about 130 tons and carries a 105 mm smoothbore gun and is bristling with 30 mm autocannon. As a tradeoff, it is insanely slow with a top speed of twenty five miles per hour.
* The Pokemon canon does not portray Pokemon battling as especially risky; while by any human standards they would seem highly dangerous, the worst that happens is that they "faint", they can always be brought back to full health, and the subject of Pokemon death is in the anime usually never associated directly with battling, or at most only with trying to battle rampaging legendary creatures, while in the games it's implied most Pokemon deaths occur in the wild, with the villain teams being the only ones to intentionally kill monsters. A lot of Pokemon
* The Pokemon in that don't have formal names are all technically examples of this. For instance, Ash has a Pikachu named Pikachu.
* The Pokemon themselves also want worthy trainers to raise them for fighting — the main reason wild Pokemon confront trainers is because they want to prove themselves to anyone who might be willing to capture and train them. They also do it to make sure that said trainer can handle them. Pokemon are by and large peaceful, but they are spirited competitors.
* The Pokrovsky Gates: "My name is Konstantin, which is Classical for "steadfast".
* The Polar Bear campaign, famous as an early — thus strikingly unique — mainstream use of CGI.
* The Polar Express added action scenes of the protagonist sledding down the top of the train and working to get the train back on the rails before ice on a frozen lake broke beneath it.
* The Polar Express becomes a runaway on glacier gulch when the throttle lever breaks off.
* The Polar Express: Both the boy and the girl are probably round about ten, but it's hard to tell. Billy is shorter than them, so he's possibly younger, but he's obviously not a preschooler. Sarah, the boy's sister, is also ambiguous, although she's probably older than two.
* The Polar Express, but later became a modestly popular Christmas standard that is still being played on the radio and covered by other artists to this day.
* The Polar Express by the dirigible that hauls Santa's sack of gifts to his sleigh knocks the star off the Christmas tree in Santa's courtyard. A team of elf skydivers drop from the dirigible to catch it in midair.
* The Polar Express does this to try and wake himself up on top of the titular train. It doesn't work, and he tries to wake up by throwing snow in his face, then

burying his face in the snow. Both don't work.
* The Polar Express. Even when he reaches the North Pole which is full of elves and an entire Christmas town he has a hard time believing Santa is in charge.
* The Polar Express has the mysterious hobo who sits on the roof of the train. He claims to be the "king of the North Pole" but is obviously not Santa, he says, "Interesting" when the boy says that he doesn't believe in ghosts, and at one point, he vanishes into thin air.
* The Polar Express: In Freeform airings, the parts where Hero Boy first encounters the Hobo and when the Conductor explains the first gift of Christmas are cut entirely.
* The Polar Express in prime time. Whatever the intention, this is an extremely surprising decision.
* The Polar Express is a hobo who Hero Boy meets when crossing the roof of the cars. The Hobo turns out to be a spirit who can de-materialize at will, while Hero Boy has to quickly duck inside the train when it approaches a tunnel only an inch taller than its own roof.
* The Polar Express occurs when the hobo removes his freshly-cleaned socks from the kettle.
* The Polar Express, Santa's "Naughty or Nice Department" watches over children with a grid of surveillance cameras.
* The Polar Express, the credits list the main characters as "Hero Boy" and "Hero Girl".
* The Polar Express, though they're poorly played out. The voice acting for some of the characters isn't so great either. The worst part of the game has to be the timespan; it can be beaten within a few hours or less, one sitting and it makes you feel you're missing out.
* The Polar Express where the ticket conductor notes that the boy didn't get his photo taken with a department store Santa.
* The Polar Express: While not in the movie proper, there's a boy named Billy who claims Christmas "doesn't work out" for him. It's implied to be because he's poor and can't afford to have a happy Christmas.
* The Polaron Bombardment Kit Module also performs a similar function, having your orbiting ship fire several shots at the area targeted. Also defies the rules of structural integrity if used inside.
* "The Polearm Shop" has a snake slither in in the last two panels. The entire strip is an homage to
* The Polearm Shop. More general armories are also shown, but one strip has Roy go to a Polearm Shop. It's a reference to the "
* The pole dancer, who was a Pole by virtue of her birth in Warsaw, took an informal poll from her spectators as to how many liked her new thong.
* The Poles attempted this as well, but was sadly averted. At the conclusion of Operation Bagration, the Red Army had dealt a killing blow to the Wehrmacht and pushed all the way to the gates of Warsaw. Seeing this, the Polish Home Army believed the liberation of their city was at hand. However, they didn't realize that the Red Army had exhausted their offensive abilities and Stalin had no intention to allow a Poland with close ties to the West to exist in his sphere of influence. By the time the Soviets entered Warsaw in January 1945, the Home Army had been wiped out and the city had been flattened.
* The police actually arrange for Kaiju attacks and the like to happen on a regular basis, possibly to conform to pop culture expectations of Tokyo being a disaster magnet. Apparently it's good for tourism.
* The police also sometimes hires them for training the recruits. This tends to only be the case with non-violent criminals, however - thieves, pickpockets, burglars, and frauds.
* the police and ambulance show up after Steeljack brought down the villain, and the Honor Guard took him away. The EMTs treat Steeljack, and a policeman fills him in on what the Honor Guard has done.
* The Police and thought it was a love song, when it's actually about a guy stalking the woman who scorned him.

* The police are honestly concerned that arresting the villain will backfire, because:
* The Police came about when Copeland heard "Roxanne" and decided the band should have a more "romantic" image instead.
* The police carry riot shields with the word "SUBMIT" painted on them. When we see their shift change at one point, it involves cleaning the blood off.
* The police charge into Comic Book Guy's place and see him and Mrs. Skinner having sex — Eddie promptly vomits at the sight, and Lou reassures him "It's okay, you wouldn't be human if you didn't react like that."
* The Police, considering all the ways such a device can break the viewer's privacy.
* The Police, constantly-phoning mother has driven him mad, ends with manic cries that turn into laughter.
* The police did come out in full force when demonstrating proper police procedure in the Police Car Special. There was also the Bonneville episode, where Richard and Jeremy are stopped by a policeman after loudly revving the engines on their muscle cars (they do it specifically to set off car alarms, and the police officer is portrayed as being completely in the right and refuses to believe that they were "Just fooling around").
* the police didn't believe Machi was able to fire a revolver capable of breaking a grown man's shoulder, Daryan was using his job as a detective to manipulate the investigation) which forces one to wonder how many other holes might be the result of similar mistakes or cuts.
* The Police do this all the time. I can't, I can't, I can't stand losing, I can't, I can't, I can't stand losing...
* the police failed to help them, the couple took revenge by tracking Sneed down and shooting him to death in his car.
* The police games in the episode "The Great Wall" is said to be a tie between Station 4 and Station 5 going into the final event (a tug-of-war between both teams). One of the men on the Station House 5 team loses his footing, giving Station House 4 a brief shot at winning, but Murdoch is distracted by seeing a clue that solves the murder case he's been investigating and Station House 5 wins the event.
* The police had a plan to roll up the villain's whole operation, which the hero
* The police handcuff a deaf man with his hands in front since handcuffing him with his hands behind his back would be akin to gagging him.
* The police handle McNinja's less-than-legal vigilantism by instantly pardoning him if he returns to his office and calls "Base!"
* The Police hated each other so much that they frequently had physical altercations backstage. The final straw came when they couldn't agree on which drum machine to use for a session (drummer Stewart Copeland had broken his collarbone in a horseback riding accident and was unable to play drums). Andy Summers saw Sting and Copeland arguing about this one morning, so he left and decided to skip most of the day. When he returned to the studio in the late afternoon, his bandmates were still having the same argument, as passionately as they had in the morning, without either of them ready to give in.
* The Police in the hopes that somebody will find him. A year later, he's surprised to see "a hundred billion bottles washed upon the shore" with similar messages inside.
* The Police into the mainstream, and influenced a plethora of later artists across genres.
* The Police is a darkly humorous example. It's implied that he won't go through with it, though.
* The PoliceIt's gotten to the point where some people have inverted it, thinking that they are the first to bring up the stalker angle and that it's unintentional on The Police's part.
* the police may start looking at you, and a careless but true remark may wind up being exactly the thing needed to make you a prime suspect whose fate is in the hands of prosecutors and investigators who, being only human, are very fallible.

* The police officer ("De Champetter") in the Flemish comic strip "De Lustige Kapoentjes" is morbidly obese and often tricked by either the children protagonists ("De Lustige Kapoentjes") or the teenage delinquent (Flurk). Partly subverted though, since he does get his comeuppance regularly.
* The police offices constructed in Union Station, Los Angeles for the filming of the movie still stand today, in use as station offices. The crew was able to get a little bit of a discount if Union Station officials agreed to keep the set for practical use after filming was over.
* The Police". On top of that, a CD compilation of Klark Kent material, released in 1995 was named "Kollected Works". And to top that all, his private little recording label is called "Kryptone Records."
* The police outside the warehouse with the thief that killed uncle Ben were led by Captain Stacy. He will appear as a full character later on, as well as his daughter Gwen.
* The Police, respectively. In their native UK, they had 5 big hits at #1 ("Every Breath", "Message", "Don't Stand So Close to Me", "Walking on the Moon", "Every Little Thing She Does Is Magic"), leaving only "Roxanne" (#12) displaced.
* The police rounded up a demonstration which went haywire. And you were just accidentally there? Tough luck.
* The Police, since some of its members are actually of Afro-Caribbean descent, and the other members grew up amongst them.
* The Police's "Next to You". Love makes you sell your possessions and contemplate theft, apparently.
* The police sometimes use this tactic to nab suspects. In one case, a woman hired a contract killer (actually an undercover cop) to kill her husband. The police then faked his death, providing photos and "evidence" in order to fool the wife into incriminating herself.
* The Police song "Don't Stand So Close to Me" is about this. Sting had previously been an English teacher.
* The Police song "Too Much Information", oddly enough, is a subversion of this trope — it's about someone who simply has too much knowledge in their brain.
* The Police's Roxanne. Essentially telling a prostitute to not be a prostitute.
* The police station setup for "The Prison Break" heist concludes with the station team getting rid of their evidence, their stolen police car, by dousing it in gasoline and setting it on fire.
* The Police's video for the 1986 version of "Don't Stand So Close To Me", as by that point the band members were constantly fighting.
* The police theme ends in the prologue when the Bishop backs up Valjean's alibi.
* The Police. The narrator is in love with a girl, but can't work up the courage to tell her. (Also "De Do Do Do, De Da Da Da". Same narrator, I guess.)
* The police vehicle driven by Big Bossman in the funeral scenes is a replica of the Bluesmobile from
* The Police War, Police inspector Marie Garcin is shown to keep her weapon at hand even while she showers.
* The police will be accused of having a double standard if they ignore the hero's questionable methods.
* The Polish army has a very specific two-finger salute, one very similar to the one used by the Scouts, which was so exotic to some foreign officers during
* the Polish dub replaced "orange" with "nawias" (which means "bracket"), a similarly difficult word to rhyme.
* The Polish edition of the French channel Canal+ likewise used to feature that kind of gag dubs in between
* The Polish held the Germans for three days, September 7-10. Yes, outnumbered that much, they brought Blitzkrieg to a halt for nearly half a week. And they would have held longer, finally surrendering their last bunkers
* The Polish Home Army, a militia formed by Lech Wałęsa after he secretly returns from exile during
* The Polish "Krówka" brand of caramel sweets packages their products into wraps with a picture of a cow, as "krówka" = English "little cow".

Unfortunately, when they entered the Indian market, they discovered that the Hindi wouldn't eat food with such packaging, as cows are believed in India to be sacred. Because of that, the company changed the packaging to single-color green. Unfortunately, in India green is the sign of mourning.
* The Polish Legions of the French Army were formed after the Polish state was divided between Austria, Prussia and Russia in 1795, and the page quote is from a song originally written for one of the Legions, which later became the anthem of Polish patriots and then the restored Polish state. Their aim of restoring their homeland, which came to a transitory fruition of a sort with the founding of the Duchy of Warsaw in 1807, which in 1815 became a new Kingdom of Poland ruled by Czar Alexander I, auguring a new era of national struggle. But even after 1807 many Poles continued to serve in the Imperial French Army in the four infantry regiments of the Legion of the Vistula and a number of regiments of lancers. A squadron of Lancers of the Guard even accompanied Napoleon to exile on Elba. Ironically, in the course of their service the Polish Legions often fought against other people fighting for
* The Polish/Lithuanian name "Grażyna" was invented by the poet Adam Mickiewicz for his narrative poem
* The Polish/Lithuanian name "Grazyna" was invented by the poet Adam Mickiewicz for his narrative poem
* The Polish lullaby "Był sobie król" tells the story of a king, a pageboy and a princess, who lived happily together until they were
* The Polish Officer asks a former detective for advice on how to be a fugitive.
* The Polish poet Julian Tuwim wrote a series of limericks where he found rhymes for some of the most unrhymeable words in the Polish language (such as
* The Polish short story "Koła na piasku" by Adam Pietrasiewicz parodies this: a human and an alien talk to each other friendlily by radio before realizing what the other is. They immediately proceed to follow the "standard first contact procedures"; the human draws a Pythagorean triangle, while the alien draws some squiggly lines. They then go back to their vehicles and complain by radio that they can't comprehend what the other one drew (and none of them knows math very well, so they don't even know what they drew, only that they were told to draw them).
* The Polish song "Zegarmistrz Swiatla Purpurowy" got a lot more hits from non-Polish viewers after it was featured in the
* The Polish submarine ORP Jastrząb ("Hawk") was escorting an Allied convoy to Murmansk when on May 2, 1942 it was attacked by Allied surface ships. Five crew members were killed and 6 others wounded. The submarine was severely damaged and was scuttled at sea. To this day there is dispute among historians as to who was really at fault for the friendly fire incident.
* The Polish swearword of choice is very often "kurwa" (meaning "whore", but contextually the same as "shit" or "fuck" in English), and is vulgar enough to be censored on TV. Poles wanting to avoid offending delicate sensibilities often use "kurczę" which means "chicken".
* The Polish used to be the butt of many jokes ripping on their supposed lack of intelligence. However, once Polish-Americans settled in, they assimilated pretty well, even taking top-level positions in the US government - Zbigniew Brzezinski comes to mind. Recently, Polish-American and American Jews of Polish descent are often portrayed as smart - for instance Howard and Bernadette on
* The Polish word "wichajster" means a thing that either has no name or a thing whose name the speaker doesn't recall (it usually refers to a machine or part thereof, or some sort of gadget, but anything can be described by the word). And "wichajster" is pronounced exactly like "Wie heißt er", which means "what's his name" in German.
* The Polis Massans who assist Padmé in childbirth talk like overblown "General Hospital"-style soap opera characters.
* The Political Officer: A politician oversees the country's military and ensure their subordination to the civilian government.
* The Political Officer in "Voices of Authority", leading to one of Ivanova's best ever

* The political satire group Capital Steps wrote a song entitled "Welcome to the State of Arizona" (Sung to the tune of "Hotel California") centering around a man in a large coat being confronted by a police officer at the border. Then the man casts off his coat to reveal that he's a Navajo, and proudly states that
* The political scientist and strategic analyst Edward Luttwak published a book called
* The politicians in the ancient Greek and Roman democracies may have been even more extreme. Unfortunately, for the most part, all we have are the texts of their speeches. There are some descriptions of speeches, however. In particular, we know that Late Republican Rome (around the 1st and 2nd centuries BCE), the most popular speechmaking style, especially in the courts, was the "Asiatic," which called for long speeches with florid language and hand gestures, overemphasized speech, and
* The Polity as a benevolent dictatorship. Even then the other characters in the series come in a rather wide variety of colors.
* The Polity books follow in this regard, being mostly benevolent rulers who plan for the long term but involve humans as their agents. The AIs do have a tendency to fight amongst themselves on rare occasion, and then there is Erebus.
* The Polity features the Cassius Project, humanity's first attempt to construct a Dyson Sphere. One of the subplots kicks off when an antagonist tries to sabotage its construction.
* The Polity "kill-or-be-killed" mindset. Members of the species are cruel to those weaker than themselves and maim or even eat their own children. They are just as sadistic when they go to war with humanity, they barely made it past introductions during their first meeting with humanity before suddenly launching a sneak attack and trying to abduct as much of the crew as possible to eat.
* The Polity novels include two different implants that serve this function: Augs (the standard brain implants wore by everyone) provided instantaneous translation of recognized languages, while the more advanced Gridlinks actually downloaded the language directly into the user's head, essentially making them native speakers of it.
* The Polity novels: Jain tech is an organic thing and can grow living ships.
* The Polity novels, where they are called "Hard Fields". Unlike most representations of Force Fields, hard fields do not protect against physical force without cost, but instead transfer all the force to the shield generator- hopefully located well away from whatever the field is protecting.
* The Polity of the Polity could even begin to imagine what comes after the singularity... when you have near infinite patience and are effectively immortal, there's no need to go blindly rushing into the unknown without some very, very serious thought. Where's the rush? It is said in a footnote in one of the novels that the Singularity came and nobody really cared. The majority seem to enjoy being human.
* The Polity: Polity war ships are commanded by AI's and one of the older ships also has a human captain who is wired directly into the ship and in a sense is the ship.
* The Polity series follow in this regard, being mostly benevolent rulers who plan for the long term but involve humans as their agents. The AIs do have a tendency to fight amongst themselves on rare occasion, and then there is Erebus.
* The Polity: This is pretty much what the Polity is — it's autocratic but fairly benevolent.
* The Polka Dot Door, is another kid-show example. Justified in that the character was played by one of the show's two hosts, so naturally only the other host could interact with him.
* The Polka King (a documentary) document the rise and fall of Jan Lewan, a Polish singer who, after defecting to the U.S., formed a polka band and became hugely popular on the Pennsylvania polka circuit, making money not only from his concert tours, but from a gift shop, a travel agency, and a Ponzi scheme. His downfall starts when his wife Marla enters the Mrs. Pennsylvania beauty contest and wins, sparking a controversy when the judges all claim that they didn't vote for her. Jan was discovered to have disappeared from the audience for a short period of time

during the contest, and this triggers speculation that he may have bribed the organizers of the pageant into giving his wife the title. Marla is eventually stripped of the title, though she refuses to return her crown and continues to claim she won fair and square. After this, the Pennsylvania SEC catches up to Lewen's Ponzi scheme, and it all goes downhill from there.
* the polling industry actually launched an investigation, leading to another refreshing aversion in a province that desperately needed it.
* The Pollution result on the 1st Edition Campaign Events Table saw sections of the
* The Pollyanna: A character who remains optimistic in spite of the misfortune they endure.
* The Pollyanna and far more delusionally optimistic than manga!Hayate, although subsequent seasons followed the manga more closely and Hayate is noticeably bitter and cynical but nevertheless puts up with everything the universe throws at him with little more than a sarcastic jab.
* The Pollyanna: Character who forever has a optimistic disposition on life.
* The Pollyanna female characters who are more varied in personalities than they used to be, (and of course, not all shows portray women in this manner, anyway).
* The Pollyanna: I don't care if I've been embarrassed, humiliated, or downright abused! They can't do anything to keep me from being happy again!
* The Pollyanna, then it's likely that he'll be seen as "Gay" or "Prissy".
* The Polly Star special" in reference to a certain luchadora fond of the insult to injury.
* The Polo family had the patronage of the papacy which thought they might be able to find a potential ally against the Moslems.
* The Polyjuice potion is a less heinous form of this. It's used to replace someone, but whoever you're impersonating has to be alive when you take their hair or other part, so you have to keep them alive if you want to look like them for more than an hour. In practice, it's Capture And Replace.
* The Polyjuice Potion temporarily transforms the user's body to look like someone else. We first see it in
* The Polyphonic Spree is basically a small indie rock orchestra with a choir of varying size on vocals, the sheer number of people it brings onstage is one of its trademarks.
* The Polyphonic Spree was formed by a few members of cult post-grunge band Tripping Daisy after the death of guitarist Wes Berggren and are much more well known than their parent band. One of the few members of Tripping Daisy that didn't join the Polyphonic Spree was Ben Curtis, who later formed the Secret Machines with his brother (and later left to form indie band School of Seven Bells).
* The polysexual flag, similarly to the pansexual flag, has a pink stripe representing attraction to women, a blue stripe representing attraction to men, and a green stripe representing attraction to non-binary people.
* The Pond: An American and British term for the Atlantic Ocean, commonly referred to when localizing for these regions.
* The Ponds Institute. Models with fluorescent white labcoats Do Science with computer graphic displays.
* The Poneglyphs — stone monoliths which tell the forgotten history of the world. (It was rumored that one in specific tells of an ambiguously-described superweapon known only as Pluton. It may be an example of
* The Ponies and Giants Arc features these. The ones the Mane Six meet are friendly, and have formed an adventuring party on a quest in the lands of "tinies".
* The ponies are slow to realize the danger of the Parasprites in the episode "Swarm of the Century" because they're so caught up in how adorable they are. Fluttershy even starts the problem over again after the other four think it's over because she
* The ponies based on Katie Cook, Andy Price, and his wife from Issue #1 of the
* The ponies get confused by Ki Seong's name and call her "Tea Song" instead.
* The ponies have been on the brink of extinction on numerous occasions. Equestria only exists in the first place because a horde of monsters that

* The ponies themselves are a species of basal ungulates with short muzzles and big ears, as well as legs still ending in five digits tipped with hoof-like nails and with some limited mobility (explaining their in-show ability to hold objects with their hooves). Pegasus wings are reimagined as lobed wings of skin supported by elongated fingers like a bat's.
* The Pontiac G6 suffered an extremely ill-considered marketing ploy in which the entire audience for an episode of
* The Pony Earthverse has turned this into a running gag; whenever characters talk with their ponies for the first time, they end up with a pillow in their mouth.
* The Pony of Shadows, a creature of legend and the main antagonist of "
* The Pony", Penny sticks her eye through the receiver to check on Gumball and sticks her lips through the mouthpiece to kiss him.
* The Pooch and the Pauper when a con artist who specializes in inventing fraudulent dog breeds is asked the name of one of his "exotic" breeds and his eyes fall on an assortment of teas before he responds that the dog is called a Darjeeling Orange Pekoe.
* The Poof Point. They don't recognize their kids, and when told of what happened, they spend a few minutes examining the wonderful technology of 2001. The father even expresses his disbelief that "silly Billy Gates", whom he tutored in calculus, is partly responsible for that.
* The Poole family, aka FarDrivingClan. They made a point of seeing Vicky on every one of her US tours, even if it meant driving across several states to see her, and were therefore featured in her tour diaries often, and over time she became good friends with them. She named the
* The Pool, it is to be expected. A specific example would be the very first death, which is followed by the victim's corpse being dropped into a pool, spreading blood in the water.
* The Pool of the Black One", Conan encounters giants, only a little taller than human, but murderous.
* The Pool of the Black One", the ship finds an island, and the crew eats a strange golden fruit, which puts them to sleep so quickly that some are still holding the fruit they were eating.
* The pool on Tofu's origins reached over $5,000, which is impressive even by "minions betting on a man of mystery" standards. Pebbles lost that one.
* "The Pool Shark," a country song from 1970 and the only No. 1 hit in the career of truck driving country singer Dave Dudley. Although the titular antagonist isn't all that bad, he does hustle a young, hard-luck truck driver (the song's protagonist) out of $187 and his wedding band through a series of pool games, then reveals he had gotten rich off of hustling others when he is seen leaving in a Cadillac with a beautiful young blonde.
* The Pool. The fact that he wears nothing other than black and the entire movie takes place inside a darkly lit pool building at night accentuates the white rubber mask.
* The Pool with a Body Of Bodies dwelling in the eponymous pool of the story. Its form is made up of bits of everything it consumed in the past, including a few unfortunate people. The ending has two children approach the pool...
* The Poopsmith's demotion is, if possible, even more evident than Pom Pom's, as the Halloween cartoons just might be the only time he's seen
* the Poopsmith with a "multi-function dragon", but accidentally hits the scale marked "instant death". Right before the dragon keels over on top of him, the Knight sarcastically remarks "Ooh yeah, this is gonna be awesome."
* The Poop That Took a Pee was implied to only be successful because no one would admit that the book wasn't as 'good' as the previous work.
* The poor boy is quite literally being smothered in the process, as the girl is
* The poor country vet James Harriot vs. rich Richard Edmundson for the hand of Helen Alderson in
* The poor female lead of "Object of My Desire" by Dana Rayne. Truly,
* The poor guy and rich girl mutually fall in love, and neither one cares about their differences in wealth. People around them, however, do and conspire to

interfere with True Love.
* The poor guy and the rich girl fall for one another, but he doesn't know she's rich at first. When he finds out, he's either intimidated by her wealth once he finds out, or else doesn't think he's good enough for her. As before, she doesn't care about such things and has to convince him that he's the one she wants.
* The poor guy falls for the rich girl, even though he knows that she's out of his league. Undaunted, our hero engages in some
* The Poor Little Rich Girl (1917): "Wuxtra! Wuxtra! Panic in Wall St.!" Used as exposition to indicate that the rich girl's father is having some problems with his investments.
* The Poor Little Rich Girl then appears and lures Mary back to the side of life.
* The Poorly Chosen One: Unfortunately, they totally failed to achieve their great destiny.
* The poorly written author's notes at the beginning of each chapter in
* The Poor Man's Atomic Bomb (biological, chemical, and radiological weapons)
* The poor Namekians get a bit this as well, Vegeta refers to Piccolo as "Green Man" frequently and
* The poor play of the Houston Rockets basketball team in 1982-83, which enabled it to choose Ralph Sampson first in the following year's NBA draft, drew enough suspicion to be parodied in the newspaper comic
* the poor RED Medic gets dragged into a suicidal charge by the Soldier. This goes as well as you'd expect.
* The popcorn/coke glass is suddenly spilled to kill the attempt. When it's coke, Alice frequently quits to go to the restroom (and not come back before the end of movie) while Bob is thinking "
* The Pope (besides the removing the roof bit — which was too expensive — and the political pressure — which he couldn't control but could rely on anyway, replacing them with a confiscation of whatever income they were supposed to receive during the election).
* The Pope channel will cover the reaction and (if necessary) the funeral. Then the news channels begin to hype up the conclave by profiling every papal candidate, putting up a picture-in-picture camera of the smoke stack on the Sistine Chapel, and debating what color the smoke is. When the decision is made, every network promptly drops everything again.
* the Pope from Muddy Mudskipper, gives Ren and Stimpy free Powdered Toast, and takes over for the President when he gets injured. A sequel episode was later made, "Powdered Toastman vs. Waffle Woman", which didn't feature Ren and Stimpy at all.
* The Pope. He gives you missions for little to no reward and excommunicates you if you don't do them. He also excommunicates you if you go to war with another christian faction even if they attack you. You also cannot permanently satisfy him at all.
* The Pope John Paul the First. Or recently abdicated Juan Carlos I (John Charles the First) of Spain.
* The Pope Must Die... newly elected Pope... being plotted against). The "t" was added to the cover art as if cut from a magazine. No dieting happens in the movie.
* The Pope Must Die when the dying Cardinal Rocco asks for absolution for his sins. When asked what they are he replies that since he doesn't have a lot of time, if you can think of it, he's done it.
* The Pope Of Greenwich Village, Eric Roberts' character has his thumb cut off by Mafia boss "Bed Bug Eddie".
* The Pope Of Greenwich Village three burglars do this to a Mob business. The one who set it up knew beforehand; the other two didn't.
* The Pope. Played straight in the Anglican Church however, where all bishops (including the Archbishop of Canterbury, the primate and head of the Anglican Communion) don purple.
* The Pope's one is not as bad as the others, as he's smart enough to do it on targets that are far away from him and without the psychic powers you'd need to counterattack while staying in a well-guarded location.
* "The Pope Song", he inverts this, with a lyric that is mostly obscenity but

occasionally bursts out with far more sophisticated language:
* The Pope tends, in modern times, to be this ("Catholic" means "universal", after all, and the papacy is one of the few truly international offices in the world): Italian is required (since the Pope is the bishop of Rome and Vatican employees are mostly Italians) and so are pretty much Latin (official language of the Catholic Church) and French (language of the Vatican diplomacy) and Spanish and English will probably become more and more indispensable as the most common language among Catholics (South American Catholics who don't speak at least some Spanish are rare), and *the* international language respectively; other European languages (German for Pius XII and Benedict XVI, Polish and Russian for John Paul II, etc) are a plus. Averted in the case of Pius X (coming from a poor Italian family he only knew Italian and Latin) and the current Pope Francis (he only knows Spanish and Italian and only uses the latter in public appearances, a far cry from his two immediate predecessors).
* The Pope to give his blessing to their efforts. The up-frontness came a bit later.
* The Popeye short "Rocket to Mars", released the year after the war was over, had Popeye battle an impending Martian invasion. On the way to Mars he passes a planet shaped like an eight-ball, with Emperor Hirohito behind it, a
* the Popplers themselves, as they are actually the young of the sentient, not to mention angry.
* The Poppy War the Nikara Empire and the Federation of Mugen, the author has jokingly said that "Any resemblance to real-life countries is mere coincidence" (But we can clearly see a fantasy version of both from China and Japan)
* The "Pop Rocks and Soda" myth was Enforced in an episode where an angry mob was chasing Homer out of a candy convention. He takes a can of Buzz Cola, pours in a package of "Pop Rox", shakes them together and tosses them at the mob, yelling "
* The pop song "Undercover Angel" by Alan O'Day, although it could also be
* The popstar Britney Britney. Not very smart and she's also easily brainwashed.
* The Pop-Tarts commercials, which draw heavy influence from (but are not made by)
* The populace of the water-world Mon Calamari live in giant floating cities. One half is above water for the Mon Cals and air-breathing visitors, one half underwater and flooded for the Quarren.
* The populace seems to think that it might be magical and harm only bad kings. Joffrey gets stuck with it when he's at his most arrogant and bratty after the Battle of Blackwater (and goes crying to Mommy). Also, Jaime mentions that Mad King Aerys always has scabs from sitting on the Iron Throne. Both, of course, are awful rulers, so the assumption is that the throne is rejecting them. Of course, it could also just have been a really bad idea to create a chair out of swords.
* The popular aquarium fish Siamese Fighting Fish got its name from the popular sport in Thailand (and other Southeast Asian Nations) of placing two males in one bowl and watching them battle.
* The popular "Beatie" adverts for British Telecom (later BT) from the late Eighties to the mid Nineties was criticised by elderly Jewish women, who felt the character was not a good depiction of them. This is despite the fact that actress Maureen Lipman, who played the character, is Jewish herself.
* The popularity of a certain "surrealistic realism" can elicit this response from certain Italian progressive rock album covers of the early 70s. Most notable candidates:
* The popularity of coming out at the same time, despite being a critical and financial success elsewhere.
* The popularity of formations with a fullback and a winger on the edge of the playing space have destroyed formations that only have one wide player on each side, the flamboyant "wingback" of South America is dead in modern football, as allowing a team to overload one defender with two wide attackers is suicidal.
* The popularity of ninja in Western media may have started with the
* The popularity of Shadow and Tikal together comes down to their clashing personalities. Shadow is a dark, brooding character while Tikal is a caring martyr who died centuries (if not, millennia) ago.

* The popularity of State Farm's "Jake from State Farm" ad lead to Jake himself (khakis and all) becoming the insurance company's mascot.
* The popularity of superhero movies versus the relative obscurity of the comics they were inspired by was
* the popularity of the name "Elsa" went up over 240 spots in the U.S.
* The popularity of the series in Britain means that episodes are rerun on several channels, often in the daytime, and the daytime screenings are noticeably edited for gore and violence.
* The popularity of the show and bronies made its way outside of the Internet to the point where most retail stores are now selling brony related merchandise. Some bronies love this while others hate it.
* The popularity on PC may also be due to the fact that the trial version only comes with that map. Most also run a "no 'Shees" mod (a mod that removes the Covenant Banshee with its twin plasma cannons and insta-kill Fuel Rod Gun) or at least have rules against using the Banshees.
* The Popularity Poll arc uses this in full force, with the characters getting into a war over their popularity rankings in the latest Shounen Jump character poll and their current ranking inexplicably being displayed as a tangible number next to them at all times. Otae even jumps out of the panel/screen and goes after the
* The popularly of the Renault Clio ads starring a woman named Nicole and her Papa caused many babies to be named "Nicole".
* The popular mod NPC Project also lampshades this if you have Kivan in the party, as after the fight he will remark how they had no guilt except being just "evil creatures" by default who accidentally were on the path of the party.
* The popular paring of Jade/Davesprite (originally Jadesprite/Davesprite) was acknowledged in a lategame scene...
* The popular phrase referring to a need for a speedy escape is "Time to get the hell out of Dodge!" - a reference to the long-running radio (and later
* The popular recurring Cactuar enemy stands in a particular pose supposedly inspired after a Japanese EXIT sign, but some Western players think it looks more like a swastika.
* The popular third party Psionics system for Pathfinder includes the Vitalist, a
* The popular UK singer's only Top 5 hit stateside was her #3 hit "Bang Bang". However, since it
* The popular version of "One Night in Bangkok" was not performed by
* The popular Vocaloid song "Kokoro" is about a female android (portrayed by Kagamine Rin) who receives a "heart", allowing her to feel emotions.
* The population of Britain (and various other European countries) apparently do quite well against the zombies, despite the lack of privately owned guns. Instead, they hole up in old castles and use the medieval weaponry in them. The quiet, middle-aged, academic type interviewed in the book is carrying a
* The Pork Chop: This duo plays with this trope, alternating between the roles of Straight Man and Wise Guy after every punchline is delivered.
* The Pork Futures Warehouse, which allows people to trade in pork that doesn't exist yet. So they built a warehouse to store it until it
* The Porkolator in Hexen will only turn lesser enemies into pigs; it will not affect bosses.
* The porn director Dave Lodoski specialises in fetish films featuring women drowning in quicksand; in every film the victim's last words are invariably, "This sucks SOOOOOO bad!"
* The Pornomancer magnet. He doesn't have to look for sex, sex goes looking for him.
* The Porsche 356 defined what a sports car would be into the next century, with its focus on light weight and a streamlined body to produce high performance. Its mounting of the engine in the rear (a trait lifted from the Volkswagen it was based on) also turned out to have a remarkably positive effect on the car's balance and handling, and the layout would soon be imitated in the '60s and '70s by Lamborghini, Ferrari, and its more famous successor, the Porsche 911.
* The Porsche 928 was planned as a 911 replacement, but ended up being a more

luxurious alternative to it.
* The Portable Door (and subsequent novels). Considering the entire place pretty much is having fun keeping him thinking he's insane due to all the crazy things happening, he doesn't really fall into this trope as much as sink horrifyingly into it as it slowly closes its inky black waters around him.
* The Portable Door by Tom Holt. A door-shaped sheet of something that can be rolled up, but when put against a wall will open to the desired location.
* The portable hole. Was it a portable hole, or portal? We will never know.
* The Portal, Alex doesn't realize that he's become a dragon until his friend, who has also been turned into a dragon, tells him to look at his hand.
* The Portal, Alex has been friends with Thomas Smith since Grade 7. When they were about 10 years old, they went to a summer camp together.
* The Portal: Blizzard, who is actually a human turned into a dragon, holds his right front paw out to Storm the Wind dragoness to offer her a handshake, but when he sees her looking at his paw with a confused look, he lowers it thinking she's unfamiliar with the concept of handshakes.
* The Portal, Cynder blames herself for the creation of the Dark Ones.
* The Portal does this when he first sees that he has become a dragon. He does calm down after a while and soon grows to like his new body.
* The Portal has Blizzard get stabbed by Zobek's tail and brought to the infirmary. The good news is that Blizzard doesn't die from his injuries. The bad news is that he has now been infected with Zobek's power which will slowly turn him into a Dark One.
* The Portal has Thomas Smith who unwittingly enters the Dragon Realms and becomes a Dragon. Understandably, he takes a while to get used to his new body. Things get even more complicated when his best friend, Alex also suffers the same fate.
* The Portal: In chapter 17, a heavily injured Blizzard says this to Static when the latter rushes to help him.
* The portals were, effectively, guiding points for hyperdrives. Activating a hyperdrive without a set of gates to guide it would result in a
* The Portal: The main character, Thomas Smith, is nearly 16 when he is pulled into the Dragon Realms.
* The Portal Thomas Smith, being a human in a blue dragon's body, has a lot to learn about living in the Dragon Realms.
* The Portal, Thomas Smith pushes a strange button which causes him to fall into the basement where he finds the portal to the Dragon Realms.
* , the portal to another world is not so much a tunnel as a picture frame. Jonas still crawls through it though. Also, when he first finds the portal it's covered with a blanket which forms folds that Jonas has to spread open when he peeks through it.
* The Portal when his friend points out that he's not wearing any pants after being transformed into a dragon.
* The portal which opens between our world and the world where fairy tales are real in
* The Portal: Zobek delivers one of these to Blizzard before their final battle.
* The port city of Vritannis is a powerful city state that grew wealthy from international banking and trade, so that it becomes the natural staging area for the armies of the Holy Alliance. The Kushan invasion makes its great walls, moat, and adjacency to the sea seem like good investments, although they would have been screwed anyway without the arrival of
* The Portias Spider hunts other spiders. One of its tactics is to grab an insect and throw it into another spider's web. While the other spider is busy biting and wrapping up the insect, Portias attacks it from behind. It will also attack two spiders in the middle of mating. Better yet, this is only one of many tactics the spider will use. It tailors its strategy to each individual victim, and they
* The portion of Mozart's "Requiem" that talks about the souls of the damned.
* The portion of the FCC's decency regulations regarding language could be viewed as doing this for broadcast television.
* The portion of the population who are resistant or immune to hypnosis (leaving

aside, for the moment, the definition of "hypnosis"). Illusionists generally have a few tricks to weed those people out when they ask for volunteers.
* The Portland Trail Blazers, who even have the problem of being the only major league team in Oregon,
* The Portopia Serial Murder Case) did begin as American computer games.
* The Portrait of a Lady: None of Isabel's refused suitors get over her in a tiniest degree even years after she's married. They include Caspar Goodwood who was refused several times, Lord Warburton, Ralph who didn't even try to propose to Isabel, even though he adored her.
* The Portrait of a Lady: The 1968 6-part mini series based on the Henry James novel.
* The Portrait of a Lady, who retains a childlike innocence and devotion to her father despite being fifteen when she is introduced. Her naiveté is a cause of some annoyance to Henrietta Stackpole, who finds her "incomplete".
* The portrait of Ariana Dumbledore in Aberforth's home leading to the Room of Requirement. This last didn't exist until Deathly Hallows
* The portrait of Julia Stone in E. F. Benson's "The Room in the Tower" is creepy even before the reader discovers that
* The portrayal of the mass-produced models of the YF-19 and -21 is also somewhat realistic, as both prototypes performed
* The portrayal of this trope in fiction largely comes from these fields, in which someone speaking as tersely as possible without sacrificing precision can sound extremely long-winded, even mystical, to a layperson. This backfires to those versed in any of those fields, however, to whom this kind of longwindedness is associated with novices who don't yet understand that this will only highlight their inexperience, or with studies with a high emphasis on language itself - you know,
* The portrayals aren't always positive; the deeply religious Markab race die out in their entirety because they cling to their beliefs rather than embracing science, and a young alien boy is killed by his parents in season 1, because they believe a simple surgical procedure (to remove a pulmonary cyst that is slowly choking him to death) has turned their child into a soulless monster.
* The Portsmouth Sinfonia was an orchestra founded in 1970, made up of people who didn't know how to play their instruments (it was even one of the requirements — they would allow musicians to join, but on the condition that they were unfamiliar with the instrument they chose). They were tasked to play well-known songs, and
* The Portsmouth Sinfonia were an unusual British orchestra co-founded by legendary avant-garde musician Gavin Bryars that allowed anyone to join their ranks and specifically those with no previous musical experience whatsoever (or if they were already musicians, they were assigned an instrument completely unfamiliar to them). The group started as an experimental performance art ensemble, but eventually built up enough a following over the course of the 1970s to score a genuine UK Top 40 hit with "Classical Muddly", a parody of the then en vogue pop-classic medley craze. Shortly after its 1981 release, the Sinfonia disbanded.
* The Portugal team has been this recently, with players like Cristiano Ronaldo, Deco, and teams like Porto running the Champions League. The national side especially failed to win the 2004 European Championships, at home in the final, and against Greece, but still lost. This may count as a
* The Portugese Man O' War is a jellyfish-like colony of microscopic organisms. The main "body" consists of an air-filled balloon that sits on the water's surface and has a flat section on top that it can extend to act as a sail.
* The Portuguese gain double the 'resource diversity' bonus from their trade routes, and are the only civ that can construct the feitoria, a fort/trading post that can force city-states to share their luxury resources with Portugal.
* The Portuguese man-of-war and its relatives are very strange because they blur the line between a single organism and a colony of multiple organisms. They are made up of zooids, which are neither animals nor organs, but something in between. Different types of zooids work together work together like the different organs of

a body, but in several ways they act as though they are separate creatures, such as being able to asexually reproduce to add more zooids to the whole.
* The Portuguese man o' war is a jellyfish-like organism whose body is actually a group of multiple colonial organisms that are fused together and function cohesively as if they were a single animal.
* The Portuguese Man o' War is one of a number of creatures in the order
* The Portuguese Man o' War looks like a floating jellyfish, but is, in fact, a colony of four organisms known as polyps. Its tentacles can grow to twenty metres in length (ten is the average) with a sting that can be very painful. Definitely not something you want to get tangled up with, especially since Portuguese Men o' War are most commonly found in large groups.
* The Portuguese word "Cega" (pronounced exactly the same as "Sega") means "blind" (female form).
* The Porygon family provides an extreme example, since Porygon itself was a standalone creature in
* The Poseidon Adventure (2005) — remake of the 1972 disaster classic
* The Poseidon Adventure featured this as the way the band of survivors was rescued.
* The Poseidon Adventure: Rogo won't listen to Robin Shelby when Robin says he knows Broadway leads to the engine room and that the engine room is the best place to try to get out from because the hull is thinnest there.
* The Poseidon Adventure, ten people start the journey from the main dining room to the engine room. Only six make it all the way to the end.
* The Poseidon Adventure "The Morning After" is sung by Carol Lynley's character Nonnie, but Lynley's voice is dubbed over by singer Renee Armand.
* The Poseidon Adventure, the survivors have to contend with this after the ship flips upside down.
* The Posh Breakdown of the Gorilla Who Refers To Himself as an Ass in this manner.
* The Posh Mothershuckling Dangle Donger Hour, vulgar, and just plain weird.
* The position had previously been retired in honor of Lou Gehrig, who served for four and a half seasons before he was forced to retire due to his illness. George Steinbrenner unretired the title for Thurmon Munson, and it was awarded intermittently after Munson's death.
* The position of black sheep rotated around the Stark family a lot. Robb, Sansa, and Bran were the definite white sheep, but there was also Arya, who totally refused to adopt traditional female behavioural norms and was prone to asserting her own beliefs and opinions, and foster brother/hostage Theon who never challenged Ned's authority or misbehaved while Ned was looking (most likely because he was too scared to confront Ned directly) but was by far the most destructive, reckless and poorly-behaved when Ned wasn't looking. He also doesn't seem to particularly well-liked among his foster siblings and did and said things that would be completely acceptable in his birth culture (for example, boasting about hypothetical rape and murder) but were totally unacceptable and creepy in the culture of the North. Rickon is too young to be an official black sheep but is characterised as being wild and prone to violence in both the television series and books, so he would have likely taken up this position had his family unit survived long enough.
* The position the soldier holds is way below their pay grade for examples of this.
* The positive responses didn't last long after his return, though - by his first post-return pay per view match, he was already getting mixed reactions leaning towards boos. That being said, by the end of 2019, it has mostly mellowed out for him. Much like Cena, Joe Anoa'i is respected by fans as they do see strides in his workrate and mic skills, and it also helps that he isn't force fed in the main event as much as he used to be.
* The Positronic Man", some of the names change, although they're supposed to represent the same characters. George Martin is called George Charney here, keeping his father's last name instead of his mother's. This has a direct effect on the Feingold law firm, which becomes Feingold and Charney instead of Feingold and Martin. When meeting representatives of US Robots for the first time, robopsychologist Merton Mansky is replaced by robopsychologist Merwin Mansky.

* The Positron Rifle can manage just two shots in the available time and needs to be
* The Posleen invasion was lead off by kinetic weapon strikes on planetary defense centers and various pyramid structures around the world (due to a resemblance to similar structures set up by the Posleen, who consider them important).
* The possessed doll in chapter 13 never harms anyone, was only trying to entertain his owner, and killed himself so that the
* the possessed Liezerota to kill herself to destroy Void Dark's dark essence. This ends Void's reign of terror, but leaves Killia distraught over losing the woman he loved a second time.
* The Possession: '70s and early '80s religious and adult-driven horror.
* The Possession, Juliet Snowden and Stiles White, over director Ole Bornedal (who's name is basically buried at the end of the trailer).
* The possession mechanic is re-introduced with the 7th edition Psychic Discipline Malefic Daemonology, which allows you to possess the caster with a Greater Daemon. Because Greater Daemons and Daemon Heralds are also characters, this can result in a loop of a Daemon possessing another daemon, even letting the same daemon possess him/herself to regenerate all lost wounds (but this will make them lose any upgrades you purchased initially).
* The Possession. Notable for being based on Jewish folklore instead of using a Christian demon.
* The Possession of Michael King does it intentionally to himself to protect his daughter.
* The Possession of Michael King has a classic version, a funeral director who conducts rituals to speak with the dead at night.
* The Possession of Michael King has the protagonist vomiting black goo when the demons thwart his suicide attempt via swallowing pills.
* The Possession of Michael King starts as a documentary by Michael to disprove the supernatural, and ends up being a warning left to not meddle with such forces.
* The Possession of Michael King, the camera will devolve to static or pixelated images or make sudden jumps in the scene when aspects of the demon come out. Unusual for the trope, the characters note it when reviewing the footage and don't immediately discount it as "camera glitches".
* The Possession, where it's the mother Stephanie who is the skeptic. She thinks that Clyde's claims about demons and the dibbuk box are just more BS to cover for his bad parenting.
* The possibility of a relationship between Cain and Colonel Kasteen was mentioned by Cain, but neither pursued it as it could have given rise to the type of problems seen in the description (
* The possibility of a robot war and the supposed inevitability of it could be said to be a central theme of the third game. Much philosophizing is done as to how the fundamental natures of both organic and synthetic beings affects their interactions.
* The possibility of a "vacuum decay" event is this. The Higgs field that permeates the universe is at a state of stability referred to as a "vacuum", but if it is a false vacuum — meaning that it can still potentially lose energy — then a sufficiently high amount of energy could create a bubble of energy that expands at the speed of light, causes the rest of the Higgs field to turn into energy as well, and completely changes the laws of the universe as it travels.
* The possibility of the protagonist's public beheading is a large part of the plot of Albert Camus's
* The possibility was invoked by Dr Johnson when he stated, "When a man is tired of London, he is tired of life." (Parodied with the
* The possible inspiration for Jenka and Fust can be found in one of Kaja Foglio's other comics,
* The possible patron saint of this trope is the bubble spaceship from
* The Possibles. This counts even to Kim's known extended family such as
* The possible tendency toward assuming something is religious in nature is referenced and lampshaded in the

* The possibly most obvious case of side effects within the games are those displayed by Jin Kisaragi while under the influence of Yukianesa. Sure, he's still a cynical, rude
* The Possiltum military seen in the early novels is underfunded and undertrained, so it's
* "The Possimpible": Nexus between the Possible and the Impossible. When questioned on it Barney claims that making up words shows "vision and creativity - 'visiativity'".
* The post-1877 compromises between the Federal governmnent and the South
* The post-Advent Children FFVII-games use this style in their cutscenes. Vincent can indulge in
* The Postal Service Alternative chart, but it wasn't their Platinum-certified single "Such Great Heights" or its two equally well known follow-ups "We Will Be Become Silhouettes" and "The District Sleeps Alone Tonight". Instead, the song was their one-off reunion single "A Tattered Line of String" from 2013. The three songs didn't become alternative radio standards until years after their release, and their popularity is why "Tattered" even charted in the first place. "Tattered" has since faded into obscurity while the other three songs, and "Such Great Heights" in particular, continue to be massive radio recurrents on the format.
* The Postal Service's "We Will Become Silhouettes", a song about a nuclear holocaust. Apparently, green energy and atomic super weapons go hand in hand.
* The Postal Service. The Postal Service's "Such Great Heights" and "The District Sleeps Alone Tonight" have now become regular fixtures on most those stations' recurrents playlist.
* the post-apocalyptic remains of a planet they believe to be Earth, whose inhabitants also had a culture resembling 2000s America.
* The post-break eyecatch has silhouettes of Tuxedo Mask and Sailor Moon beneath a large roman column, accented by red rose petals, as the Earth hangs in a white sky with the series logo at right.
* The post-credits scene has Shredder escaping the ruins of Ace Chemicals Jokerized.
* The post-Dark Cybertron comics see another realignment after Megatron's defection to the Autobots. Multiple, competing factions of Decepticons roam the galaxy. Starscream attempts to consolidate control over Cybertron and annex the lost Cybertronian colonies. Organic led galactic governments also threaten Cybertronian and mechanical life across the galaxy. And the Functionist Council, previously destroyed by the Great War, is given new life and free rein over a newly created parallel timeline. Galvatron leads the "main" Decepticon forces.
* The poster boy for Defanged Horrors would certainly be Koh the Facestealer, a massive centipede demon that steals faces. The
* The poster boy for this trope, however, is the head of the Uchiha clan, good ol'
* The Posterchildren with Jenny Chambers. Her powers open a portal over her abdomen so she can't wear anything over it if she needs to use it.
* The poster for Book 1 depicts the Gaang down the front, with Zuko, the
* The poster for the 2004 Toa Metru set-line shows a Vahki enforcer robot watching over the assembled Toa Metru heroes. Its prototype teaser pic meanwhile shows a mysterious shadowy figure, later revealed to be a prototype for the toy of Krekka, a character
* the posters had the main character shining a flashlight through the ears of his entire family.
* the poster, though it fires non-lethal gas shells rather than grenades.
* The post-finale comics somewhat reduce some of these issues. While
* The post-game essentially drops the player back to a save-state made around the midpoint of the game, which means that the game not only remembers the equipment state of your characters but also whether or not you consumed any seeds or had any hard-to-obtain items equipped at the time.
* The postgame sidequest for Ali, one of the supporting characters in
* The postgame Star giving awards, in which players get free Stars for various 'achievements' such as landing on the most happening spaces or moving the most

spaces. In
* The Postman: 8. The Holnists have 8 harsh laws they abide by, and every member is branded with the number on their arm. In the finale, it becomes a plot point when Shakespeare shows he was also forcibly inducted this way, with the right as a result to challenge Bethlehem for the leadership under those laws.
* The Postman Always Rings Twice (1946) also had this as a plot element. Both films were based on novels by James M. Cain.
* The Postman Always Rings Twice (1981) respectively, two of the most sexy women of their time.
* The Postman Always Rings Twice: A woman and her lover kill her husband and get away with it.
* The Postman Always Rings Twice. He manages to get the protagonists acquitted - though he knows that they're guilty of murder - just to win a bet with the prosecutor.
* The Postman Always Rings Twice. She's married to an old Greek man named Nick who owns a diner. When Frank, a young drifter, gets a job at the diner, Cora starts a passionate affair with him, and together they conspire to kill Nick.
* The Postman Always Rings Twice to the reader. Now that mail carriers don’t come to the door at all, let alone ring the bell—not so much.
* The Postman: Around the midpoint of the film, Abby and Shakespeare's romance begins to take over.
* The Postman" as failing to sit down when ordered to because there weren't enough chairs. We see this demonstrated when the poor fool who had failed to gets killed by General Bethlehem. This may seem short-sighted to kill useful men, but it does instill quite strong obedience through fear.
* The Postman books which seemed to romanticize the fall of civilization, with Brin noting pointedly how bad a life like that would be, and everything we'd miss.
* The Postman: Borderline. The Holnists are a survivalist cult founded on the teachings of an author of trashy self-help books, who they worship as a near-deity.
* The Postman Fights Back a really tough fight before getting defeated.
* The Postman, General Bethlehem is about to execute two of the Postal Carriers when he realizes their example will just make things go on:
* The Postman: General Bethlehem states he was a copier salesman before the war.
* The Postman (he could have said he'd been "just a kid" at the time for instance, which she took literally).
* The Postman: Holnists, who firmly believe that the strong should rule the weak, the only possible law is the law of the jungle and idealistic principles are only good for fools.
* The Postman is asked by a young husband to impregnate his wife after it is established the Postman doesn't have any inheritable diseases.
* The Postman liked the movie, feeling it really captured the spirit of his book in spite of the changes. He had looked on in dismay while numerous scripts had changed the story's message completely, and was glad when Costner took over, rewriting it into one he liked.
* The Postman of the Holnists, and says he'd be made a baron. Knowing Gordon's principles, he even says that he'd be able to treat his serfs compassionately if that's his wish. Gordon flatly rejects this however.
* The Postman pulls one of these when a village refuses to open its gates to his army. He doesn't take it well.
* The Postman's director's commentary on, she says "Poor Kevin Costner, he tries so hard...", which prompts the response of "Aw, thanks, you're sweet to say that.", revealing that he was standing in the TV the whole time, also asking if she can get him a sandwich (no crust).
* The Postman: The first characters to die are left unnamed, or only get named in the credits.
* The Postman: The Holnists base their leadership on this. Any member can challenge General Bethlehem to be the new leader. The last man who did got both his tongue and balls cut off. However, it's used by the Postman at the end.
* The Postman: The Holnists, who are racists, set up a feudal system and have their

leadership based on who's the strongest.
* The Postman. The protagonist finds a heavy box in an abandoned house and hopes that it's filled with canned food, ammunition and/or medical supplies and not useless gold hoarded by a short-sighted pre-Apocalypse citizen.
* The Postman: There’s some of these at Corvalis, although they aren’t nearly as advanced as they try to get the outside world to think.
* The Postman: There are some hints of what happened, but it is never made clear exactly what.
* The Postman: This appears to be how the Holnists get most of their soldiers, as seen at the beginning (it contrasts with the book). It also neatly explains why they happily join the Postman at the end.
* The Postman Tom Petty, mayor of the small post-apocalyptic settlement of Bridge City, Oregon.
* The Postman: We never learn anything about Shakespeare's aside from his birth date at the end and how he was just a child when the war happened, even his real name. The memorial just says "The Postman".
* The Postman: Woody, Ford, and Clark are the only people of color with speaking parts in the film, and only a few others are even shown.
* The Postmodern Adventures Of Kill Team One protagonist never seems impressed, and is usually bewildered by the terrified reactions of the normal people around him.
* The Postmodern Adventures Of Kill Team One. Some characters have superpowers, and a werewolf features prominently in the series continuity (but there are no such things as vampires).
* The Post-Modern Prometheus", Dr. Pollidori is a classic mad evil scientist fand thus fits this trope perfectly. When Mulder and Scully ask him why he would create a deformed fly with legs growing out of its mouth, he answers simply that because he can. He admits that this work could be done theoretically on humans, too, but that it would go against every scientific convention. However, it's revealed at the end that he conducted do experiments on people as well.
* "The Post-Modern Prometheus", which was a deliberate deconstruction and
* The Postmortal) charts the logical consequences of an entire society achieving biological immortality without bothering to change in any other way, including widespread ennui, environmental degeneration, and massive political upheaval.
* The Post Office Tower (now known as the BT Tower) is the home of WOTAN, the giant computer and creator of the
* the Post-Scratch Dignitary often talks about ambitions of Condesce or Jack Noir, but while he respects ambition, he really doesn't care to scheme with or against anyone.
* the post-Scratch Guardians presumably having the same names as the pre-Scratch Kids, and Rose and Dave's iterations have the same "titles" as their guardians in the Beta Session, meaning there are 2 Mom Lalondes and 2 Bro Striders. Also, a third set of Dersite Agents was introduced, which means there are three separate characters running around, all named Jack Noir.
* The post-scratch session's, were major (and tantalizing) spoilers, especially when the logs on the left-hand side of the page regularly indicate their actions.
* The post-series manga, Mobile game XDU and official artwork Additonally confirm Hibiki and Miku are an official couple to the point of Hibiki presenting Miku with an Engagement Ring upon their Graduation.
* The post-Shura arcs are a more conventional example of a postscript season, as there are no more major martial arts factions after Kaioh is defeated and the manga becomes more around Kenshiro acting as a force of nature for the characters and situations surrounding him. It's for this reason that the anime series never adapted these later chapters.
* The post-war galaxy is this too, since there are hundreds of different factions vying for power in the vacuum caused by the Covenant's collapse.
* The post-war period also gives us a nice subversion; the UNSC and the more friendly post-Covenant factions, namely the Swords of Sanghelios, have actually been cooperating on a number of technological projects, including those pertaining to the Forerunners.

* The Pot and the Kettle that the woman was his fiancee, and set up an elaborate charade to make it seem as if they had fallen in love without realizing each other's identities.
* The Pot Boiler. On Wouldby's suggestion, all of them turn on Sud and shoot him.
* The potential diplomatic immunity of Kio's house being the Catian embassy is brought up in two instances later. Once, when Eris wants to mate with Kio despite being underage by Japanese law, and another time when Manami wants to shoot off guns in the yard. Both times, Kio puts the kibosh on it because he's not okay with either.
* The Potion of Glibness, which Elan claims he bought while they were separated despite it never being mentioned before. At least he and Hinjo went to several island states giving him plenty of opportunity to buy it. This too is a parody of the tendency of gamers to squirrel away random potions and other single-use magic items that they promptly forget about, then somewhere down the line get into a situation where they suddenly remember that they have this thing that might actually be helpful.
* The potion to vanquish Belthazor — a power upper-level demon (and his
* The Potter And The Mould possessed limited shapeshifting abilities which allowed him to turn his hand into all sorts of useful doohickies, from a crowbar to a screwdriver to an indestructible container for some pretty powerful acid.
* The Poughkeepsie Tapes carries out a large proportion of his crimes in one of these.
* The Poughkeepsie Tapes in order to frame a cop, who is found guilty and executed. The true killer then makes it clear the day after the execution that the cop was innocent.
* The Poughkeepsie Tapes is a horror movie in this style. In a rare example for the horror genre, this was made to look like an actual documentary, rather than just shaky cam.
* The Poughkeepsie Tapes when Tim goes into his girlfriend's dark kitchen, turns on the light, and sees the killer's plague doctor mask in the glass.
* The pound is both a unit of weight and a unit of mass. In some engineering contexts the pound is used exclusively to refer to weight, even though legally the pound is defined as a mass unit.
* The POV character in Dead or Alive's "Far Too Hard," who comments that he is "fascinated with the profile in [his] mirror" and ruefully notes that you should "never, ever
* The POV singer of "Love Me Dead" by Ludo is clearly experiencing this trope.
* The powdered seashells start out being used as soap, but they end up as a key component for gunpowder and later the sulfa drug.
* The Powder Kegs were a group of hunters known to be fond of explosives and
* The Powder Mage Trilogy are ordinary people warped with sorcery into nigh-invulnerable juggernauts of destruction which can take on entire squads of infantry and are designed specifically to combat the titular Powder Mages. They are however not very intelligent and can still be taken down by a lucky shot to the eye or just by being swarmed and stabbed to death. The later books also give us black wardens, who were instead created from Powder Mages and possess much of their abilities, making them even deadlier.
* The Powder Mage Trilogy as their powers let them turn a musket ball into a miniature guided missile with an incredible range. However, a master like Tamas can simply toss a sack full of musket balls into the air and give each individual ball the same momentum as if was being fired from a gun. Depending on how he times it, it will have the effect of a giant shotgun firing dozens of large pellets at once or the effect of a machine gun firing them in quick succession. So you get the effect of a modern machine gun using just blackpowder and lead balls but with no actual firearm present.
* The Powder Mage Trilogy embodies this trope to the fullest. Anybody who has ever tried his cooking can attest that the man is nothing short of a god in the kitchen. Not only that, but he also seems to be capable of conjuring food seemingly out of thin air in large enough amounts to feed an entire city.

* The Powder Mage Trilogy serve as this for the Kez army. They are ordinary people warped with sorcery into nigh- invulnerable juggernauts of destruction which can take on entire squads of infantry and are designed specifically to combat the titular Powder Mages. They are however not very intelligent and can still be taken down by a lucky shot to the eye or just by being swarmed and stabbed to death. The later books also give us black wardens, who were instead created from Powder Mages and possess much of their abilities, making them even deadlier.
* The Powder Mage Trilogy Taniel and Ka-Poel finally become a couple after the former finally realises how he feels about his companion.
* The Powder Mage Trilogy. They also serve as officers. For example, Tamas, one of the main characters and a powder mage, is Field marshal of the entire army. Knacked, another set of magic users, also serve in the military but are treated as normal soldiers.
* The Powder Toy has caustic gas, which dissolves everything it touches and is sometimes used in bombs.
* The Powder Toy has this. It's pink, dissolves everything, and it's flammable.
* The Power: Allie fatally electrocutes her foster father the latest time he rapes her.
* The Power: Allie learns to heal many ailments using the Power, and uses physical contact to do this.
* The Power), and all the ensuing gender norms were upended by the shifted balance of power.
* The Power and assorted male personal servants who she publicly humiliates just because she can.
* The Power and the Glory (1933): Tom and Sally were once deeply in love but later, after they've become rich and Tom has become a great businessman, their marriage has descended into sniping. Sally begs Tom to take her on a trip to Europe so they can re-connect, but it's too late; Tom has fallen in love with Eve. Tragedy ensues.
* The Power and the Glory: After Tom executes a hostile takeover of another railroad, the railroad's former owner basically throws his sexy daughter Eve at Tom out of desperation. It works, as Tom dumps his age-appropriate first wife Sally and marries Eve, who is young enough to be his daughter. Terrible tragedy ensues.
* "The Power and the Passion": the viewpoint character in this Pat Cadigan short story is a violent, criminal sociopath who liked doing terrible things to people and is fine with doing them to vampires instead. Among his gifts for this task is — he claims — that one monster has an easy time recognising another on sight.
* The powerbase is counterbalanced by the "thrall": a celestial also gains whatever flaws, vulnerabilities, and beliefs her worshippers think she has. Hephaestus's worshippers believe that he is crippled after being thrown off Mount Olympus, and so he is crippled. The Norse pantheon's worshippers believe that they will die if they don't get Idun's apples once a year, and so it becomes true. If a god's followers were convinced that he was a womanizing asshole, he would become a womanizing asshole.
* The Power Broker is mostly set in New York City and the metropolitan area: its subject, Robert Moses, spends much of his childhood in Manhattan, and the peak of his career is his three-decade domination of the city.
* The Power Broker: The parkways Moses built so that the increasing amount of city dwellers with automobiles could get to the state parks he built on Long Island help turn Nassau County from potato-farming country into today's suburban sprawl after World War II.
* The Power can also be used to do this in general, as a jolt of electricity to the heart will kill many people, with it indistinguishable from a normal cardiac arrest.
* The power does not cooperate with them or refuses to work properly because they aren't
* The Power: Early on, some people burn girls with the Power as witches. Sister Veronica at the convent also proposes doing so, but she's killed before anything can happen.

* The Powered Guardian released by Kotobukiya is a mecha designed to be piloted by
* The Power: Five thousand years after the Cataclysm which ended civilization (one just like ours, aside from the Power existing) the majority are skeptical that patriarchies ever existed, ignoring and reinterpreting archeological or other evidence which shows it did. They also don't know what the "bitten fruit" symbol means (Apple's logo) that is found on some ancient artifacts, used as a base (old iPods repurposed).
* The powerfully corrupting effects of the Dark Side of the Force feature in
* The powerful mage Cendrillon automatically loses her powers at midnight or sunrise, similar to her namesake: Cinderella.
* the powerful vibrations could also satisfy lower parts than usual, Hitachi embraced the image and never looked back.
* The Power Group city guards reflect the groups' general attitudes: the Guardians guards are smiling, obedient, heavily armed, and very military-like, while the Circle guards are laid back and lightly armed.
* The power-hungry Queen Brahne, who never truly loved her daughter Garnet and only wanted the powers of the eidolons that Garnet had, even going as far as to try to kill her once she had them forcibly extracted (the fact that Brahne had been manipulated by the evil Kuja towards this end didn't do much for poor Garnet's
* The power in its current state is incomplete and must be made whole. Sometimes, this requires the acquisition of a
* the powerless kids get to hang out with the all powerful grown up heroes
* The Power: Many of these attempt to explain what happened when the Power emerges, among them UrbanDox, an online blogger. He blames this all on a secret cabal within the government planning to kill off most men, roping in the Zionists too.
* the Power Nine. However, all three cards were so horrible to play against that they're one of the few cards that don't involve ante or have the "Conspiracy" card type and yet are banned in all formats.
* The Power of Acting: A character whose acting abilities can fool anyone.
* The Power of Apathy: Not caring about things makes me powerful. Whatever.
* The Power of Bessapara, distributes the drug to her female soldiers, while Roxy Monke uses her distribution of Glitter to become one of the most powerful crime bosses in Europe.
* The Power Of Darkness, Masochist takes such a bath at one point in the story just because he likes it.
* The Power of Five... and a bunch of others at unspecified locations.
* The Power of Five books can do this. They all meet in their dreams before any of them meet in real life.
* The Power of Five. Everything is perfectly in order. Say what you want about the formula of Anthony Horowitz's writing, that was a freakin' creepy scene.
* The Power of Five is pushed into a tub of incredibly concentrated liquid boric acid at a nuclear power plant. By the end of her ordeal, there is nothing left of her.
* The Power of Five: Jamie, at least, feels this way about Scott's death.
* The Power of Five, Mrs. Deverill falls to her doom when she is pushed by Richard off a railing into a tank of acid.
* The Power of Five: One of the things required to open Raven's Gate is Matt's blood, exactly the reason why he was adopted by Mrs. Deverill.
* The Power of Five: Several of Holly's fellow villagers, such as Sir Ian Ingram and the Flint's, aren't killed onscreen during the massacre, although it's heavily implied she was the only survivor.
* The Power of Five: The Gates that keep the Old Ones at bay are kinda cool, once you look past how terrifying the entire concept is.
* The Power of Five, when the village council is voting about whether or not to turn Jamie in for the reward (with three votes against, two for and two undecided) when The Traveller arrives. He gives a speech about the anarchy of society he witnessed outside the village and why they shouldn't remind the outside world that they exist by contacting anyone. One of the people who hadn't voted yet reluctantly agrees and casts the deciding vote in Jamie's favor, but the other undecided

council member contacts the police anyway, bringing the Chaos-Following policemen to the village.
* the power of flight, they realized that it was easier to animate Superman simply striking a dramatic pose and levitating into the air than to animate him going through the motions of crouching, jumping, and landing on the ground. Hence, it was decided that Superman could fly—an idea that proved so popular that it was integrated into the comics.
* The Power of Friendship: A character's friendship with others is their greatest strength.
* The Power of Friendship: A hero can defeat a bad guy with companionship as his/her strength.
* The Power of Friendship and succeed against all odds). Once they actually join the ND? Relegated mostly to background status and barely getting more voice time than the (canonically much less skilled) average Joe in the New Directions, with Rachel still being worshipped as the true coming of show choir-Jesus by all characters.
* The Power of Friendship, or, rather, "Pride goeth before destruction, and a haughty spirit before a fall"?
* The Power of Glass: If hyalokinesis is used to make reflective shields of glass or mirrors
* The Power of Hate: Fast, easy, and seductive, but destructive to those who use and indulge in it.
* The Power of Hate) locked behind something that permanently skews the sanity of its user to be either more naive or more vindictive, depending on the chosen variant.
* The Power of Hate to go after the Cooper family and wipe them out out of sheer envy, which has gone on for at least over three thousand years. By around 1994, he ends up destroying the Thievius Raccoonus to prove that the Cooper family were nothing without it.
* The Power of Language — A frequent subject of poetic reflection.
* the power of leaning", since that was the only thing he had to do to read minds. Not coincidentally, it saw plenty of use.
* The Power of Legacy: Lying about a dead person so that people will remember them fondly.
* The Power of Love famous individuals from their own time period, when they were still alive.
* The Power of Love going against absurdly long odds for the sake of some girl and succeed, it's obvious there's got to be some kind of equalizer.
* The Power of Love: If one's love is strong enough, it can drive one to accomplish feats that are literally impossible otherwise.
* The Power of Love in a supplementary speech made by Nero to Sanctus, right near the end of the game.
* The Power of Love is Goku's secret weapon. Remind him his loved ones will suffer if he doesn't get back up, and he'll find hidden reserves of strength and deliver a curb stomp to the bad guys.
* The Power of Love — Discord, and many ponies he absorbed) does absolutely nothing to the rainbow-powered Mane Six.
* The Power of Love" shot to #1 in successive years (in the former case, 28 years to the day after the original version hit #1), and a cover of "One Day I'll Fly Away" in the 2016 ad brought that song back into the public consciousness 36 years after its initial release
* The Power of Love: The heroes' love for each other lets them overcome their trials.
* The Power of Love. They feel someone they love can't make it without them, or needs protection.
* The Power of Lust: Sex or sexuality empowers or inspires someone to succeed.
* The Power of One fits this trope, though Peekay's experience is worse than most because he's English.
* The Power of One. He is distinguished by the traits of extreme generosity and a

love for people of all types of races, but he rarely passes judgment on others.
* The Power of Rejection, and eventually becomes one of the most powerful villains in the series.
* The Power of Rock, has a grotesque scar stitched across her face to close the wound, and then marries a rock musician and becomes a sleazy teenage mother.
* The Power of Rock, Joshua destroyed the walls of Jericho with music.
* The Power of Rock the enemy to death with their daemonic, spiky guitars and superhuman strength.
* The Power of Seven attracted to any of them (albeit aided by the bond that some of the girls have already established with him).
* The Power of Seven depicts the moments when Luna, Hermione, Susan and Demelza in particular realise their feelings for Harry to varying extents (Ginny was obviously already dating him, Katie was already aware of an existing attraction that she hasn't defined as 'love' even before the idea was presented to her, and the exact moment when Fleur defines her feelings for Harry hasn't been presented);
* The Power of Seven features a gender-inverted version as Fleur tends to carry Harry in this manner, such as taking him to her bedroom after they first have sex in a corridor.
* The Power of Seven focuses on Harry having to become this during his sixth year after he learns about his status as a horcrux, as Hermione finds a ritual that will purge the horcrux from him if he forms a soul bond with seven witches. In the course of the fic, he bonds with Ginny, Hermione, Luna, Demelza Robbins, Susan Bones, Katie Bell and Fleur Delacour in that order.
* The Power of Seven, Hermione determines that the horcrux in Harry can be destroyed if Harry forms a spiritual bond to seven witches. When analysed from a certain perspective, each member of the subsequent 'harem'- Ginny, Hermione, Luna, Demelza Robbins, Susan Bones, Katie Bell and Fleur Delacour- is in some way symbolically 'connected' to one of Voldemort's horcruxes;
* The Power of Seven notes that Fleur's initial attraction to Harry is based on his ability to shrug off her casual allure and treat her like just another girl rather than an irresistible sex object. By contrast, although "love" isn't exactly the right term, Fleur's mother Apolline becomes overly interested in having at least one sexual encounter with Harry just because he's the first wizard she's ever met who was able to resist her advances, after she's had various short affairs in the past just because she can.
* The Power of Seven, this basically applies to Hermione's plan to negate the horcrux in Harry without just killing him; she, Ginny and five other witches will perform a ritual that will spiritually bond each of them to Harry with the intention of essentially negating the horcrux in his head by exploiting the power of love. Hermoine had to seriously dig to come up with the basic idea for the ritual, and even then had to do a lot of magical math to complete it. Such a bonding has never actually been done, remains largely theoretical, and they have no idea if it will even work, what the side effects might be, how the bonds might change as more and more are added, what precisely the bonds are capable of doing... There are a lot of variables in play, but when the alternative is letting Harry die, none of the girls are willing to consider that option and most other figures in Harry's life accept this when faced with such an alternative.
* The Power of Seven to find loopholes to justify Harry's actions to wizarding society beyond 'saving his life'.
* The Power of Seven, where circumstances have led to him forming a 'harem' of seven witches. While Harry isn't a 'control freak' in the sense that he 'needs' to control everything, characters note that he has lived his entire life with other people making decisions for him and causing him various degrees of pain. As a result, his relationships with Katie Bell and Demelza Robbins in particular help him cope with his lack of control; Katie is a more experienced lover who is able to 'domme' Harry in a subtle, nurturing manner that encourages him to accept her authority without forcing him to obey her, while Demelza's absolute surrender of control to him helps Harry feel like he can cope with the burdens placed on him.
* The Power of Shazam! Annual #1, the Aberrants are considered non-believers and

dangerous rebels by the Science Council because they reject science and embrace magic. Led by Matriarch, the Aberrants' goal is to change the government through peaceful means. Matriarch is disgusted when she discovers that Dash Noir has been using violence to achieve their aims.
* The Power of Shazam! Annual #1, the city on Binderaan where CeCe Beck lives is located inside of a dome.
* The Power of the Daleks" audio reconstruction, with narration provided by the Fourth Doctor, he audibly cringes when recalling his decision to go around wearing the First Doctor's clothes, even though they no longer fit him:
* "The Power of the Daleks", ends with the TARDIS fading out next to the crushed remains of a Dalek... and as it does so, the eyestalk rises to watch it disappear.
* "The Power of the Daleks" loses his marbles when he learns that the Doctor was right about the Daleks all along.
* "The Power of the Daleks", there is a short scene of the Daleks agreeing that (despite the massive army of hundreds and hundreds of Daleks that they have built) they will travel around only in groups of three. This obviously saved the BBC a lot of money on building Dalek props.
* "The Power of the Daleks"), this has the effect of making it ambiguous as to whether the Doctor is still the Doctor.
* "The Power of the Daleks": Those who forget history are doomed to repeat it—unless the Doctor arrives in time.
* "The Power of the Daleks" uses the sabotage version when the Doctor discovers that the communications room of the colony has been destroyed. Though the Daleks may not be responsible, as there's a revolution brewing on the colony.
* The Power of The Dark Crystal that was originally intended to be a movie.
* the power of the Dark. The Darkwraiths are three-dimensional shadows with six red eyes, capable of thinking and possessing a variety of abilities.
* The Power Of The Dog is a Western, set in Montana and filmed in the Otago region of New Zealand.
* The Power of the Dragon Father is a Set artifact that combines every Dragon themed artifact. On top of the bonuses provided by said artifacts, it also adds +6 to all stats, and grants units in the hero's army immunity to all level 1~4 spells. While this means they can't be buffed with spells it also means they can't be debuffed, and the only spell that can even hurt them is the fifth level Implosion.
* The power of the Elder Scrolls is so great, their truths so irrefutable, that not even the machinations of a
* The Power of the Equinox: After Twilight Sparkle transforms into Dimmed Star, she makes it clear to everypony that she's no longer to be called by her old name. This is even before she comes up with her new name.
* The Power of the Equinox as she continues laughing, stopping only when her throat has melted away.
* The Power of the Equinox, desperate to keep his crime a secret, chases after her with the intention of killing her.
* The Power of the Equinox, has black sclera, and her pupils are both formed out of three glowing teal dots that are situated in a triangular pattern.
* The Power of the Equinox) is on the verge of killing Princess Cadance in hateful fury, unaware that the Cadance who imprisoned her in the underground caves is an impostor. Wanting to die with happy memories in her mind, Cadance starts reciting the song she and Twilight used to sing. Dimmed Star stops in her tracks and continues the song, after which both mares finish it in unison. This leads to Cadance realizing that the monstrous mare who almost ate her is actually Twilight, and Dimmed Star learns that she's been dealing with an impostor of her former foalsitter.
* The Power of the Equinox, one of the guards' father, Business Savvy, is dead-set on seeing to it that she'll be locked up for life. After that fails and Dimmed Star walks free, two of his fellow council members, Hasty Vote and Wind Rider, convince him to help them in dealing with his son's killer.
* The Power of the Equinox. Rainbow Dash lampshades this trope to Spike by saying that Twilight has "pulled a Nightmare Moon".

* The Power of the Equinox. Sadly, his wife's gambling debts led to him becoming an alcoholic and forget his love towards both her and Scootaloo.
* The Power of the Equinox the hallway in which Dimmed Star appears as a creepy moving stain, the sleep-deprivated maid falls asleep in the gardens. When her boss Peach Seed finds her, he wakes her up by splashing her with water from a nearby pond.
* The Power of the Equinox Vibrant Glow. After Brutus enrolled in school and sat next to Vibrant, he attempted to move his seat closer to her just to have a better look at her textbook. While doing this, his hoof grasped ahold of hers while it was resting on the desk. They both blushed, and more so when their teacher told them to focus.
* The Power of the Equinox: When Dimmed Star and Spike first go to Zecora's hut, Dimmed Star hits an invisible barrier that flashes in golden light, but Spike isn't affected by it. Zecora is revealed to have put around her home a protective ward against Dimmed Star who's been lately hunting animals in the Everfree Forest.
* The Power of the Equinox: When Dimmed Star wakes up in one of Canterlot's dungeons, she whispers to herself "Ooooh, anypony get the number of that train?"
* The Power of the Equinox: When Pinkie Pie startles Dimmed Star at Sugarcube Corner, the latter rotates her head a full 180 degrees to look at the pink mare who's directly behind her. She then turns the rest of her body around.
* The Power of the Mind Remus referred to Sirius as "special" while apologizing for his behavior to a Muggle salesclerk. Harry later asked if there was any truth to that because Sirius was the biggest man child he'd ever met.
* The Power of the Press'' Hermione shakes Harry awake shortly after discovering some interesting information.
* The Power of the Press, in which a very young Douglas Fairbanks Jr. plays a cub reporter who finds himself investigating a murder mystery and a corrupt mayoral candidate.
* The Power of the Press: The mortally wounded DA manages to tell Jane that the folder has evidence against Blake, but doesn't tell her what it is, leaving Jane and Clem to figure out what in the collection of photos and press clippings is significant.
* the power of the Ripple to block the resulting pain and heal himself.
* The Power of the Sun) against Apollo. Not only does it power Apollo up, he takes control of it. Both combatants then comment on what a stupid idea that was. After Apollo's divinity is negated by the Warrior Authority, the Stallion is able to hurt him.
* The Power of the Sun (as well as subspecies of whatever other races have them.)
* The Power of the Sun. She wants nothing more than to protect others and honor the glory of the sun, spreading its light and guidance to all.
* The power of the Tempestar ends up bringing the characters from Void's video games to life in
* The power of this trope might reach its penultimate level in the first episode of
* "The Power of Three" has one early on about the millions of mysterious black cubes that have appeared all around the planet.
* The Power of Three" he tells a levitating alien cube that earth and its people are precious to him and that he will defend them to the death, if need be.
* "The Power of Three", is very much this, as she has been pivotal in reshaping UNIT as a military organization led by scientists. Her father, Alistair, taught her that "science leads", something he said he learned "from an old friend". When she joined UNIT, she dropped the name Lethbridge so she would rise in the ranks on her own merits without any favoritism.
* "The Power Of Three" lampshades and deconstructs this trope when the Doctor finally learns just what Rory and Amy do when they're not with him:
* The Power of Three" opens with millions of small cubes suddenly appearing on Earth one day. They remain dormant for a year, then they suddenly activate and cause one-third of humanity to go into cardiac arrest.
* The Power of Three" when the Doctor confronts the Shakri, who believe that to

maintain "The Tally", humanity must be wiped out:
* "The Power Pirate". After Wonder Dog blows out a light bulb (?), the others laugh at him.
* "The Power Pirate": When Wendy, Marvin, and Wonder Dog are trapped in a dark room and a door suddenly opens, Wonder Dog jumps into Marvin's arms yet again.
* "The Power Pirate". Wonder Dog does one in disbelief when Marvin starts boasting about his brain power.
* The Power Player Super Joy is a Famiclone shaped like an N64 controller. The second controller is a Sega Genesis controller.
* The Powerpuff Girls’’ he is easily the least intelligent member of the gang.
* The Powerpuff Girls #18 (DC, Oct. 2001): "The Trouble With Bubbles" has Bubbles running away from home after Townsville and her sisters berate her for missing her cue in a battle routine against the story's monster. Bubbles returns home for her prized toy Octi and sees on TV the resuscitated monster handing Blossom and Buttercup their collective butts. Suddenly feeling needed (everyone says without Bubbles to help, all is lost), our blue-eyed little heroine flies in to best the beast.
* The Powerpuff Girls (2016) allegory, though people on the staff have clarified that it wasn't intended to be.
* The Powerpuff Girls (2016) and used mostly for quick gags. This makes the series unappealing to both new fans who don't understand the references and old fans who don't like the new tonal and stylistic changes.
* The Powerpuff Girls (2016), Buttercup grows an impressively long mullet that drags on the ground even when she's flying. Her inability to take care of it ends up attracting the titular super lice.
* The Powerpuff Girls (2016) by revealing that Bianca is lactose-intolerant.
* The Powerpuff Girls (2016)" centers on an inversion where the girls have to use each others' skills for three separate obstacles in which the other could've easily dealt with.
* The Powerpuff Girls (2016) constructs with little to no mention how they could.
* The Powerpuff Girls (2016) episode, "Our Brand Is Chaos", Bubbles and Buttercup are a dollar short to buy a bobsled they want. HIM offers to give them a dollar... at the expense of something precious they care about.
* The Powerpuff Girls (2016) episode Rainy Day, Blossom is seen dancing while dressed as a flapper.
* The Powerpuff Girls (2016) episode "The Stayover" starts like this with Blossom and Buttercup recovering from a candy-induced sugar rush hangover and trying to find Bubbles.
* The Powerpuff Girls (2016) features an episode in which Bubbles is distraught over having taken a bad school photo. Her sisters try a number of things to cheer her up but she keeps having accident after accident., resulting in her face becoming more disfigured. After leaving the dentist's office, Bubbles says she's starting to feel better but her horribly disfigured face doesn't sit well with a large group of students on a passing school bus, the last of which screams "KEEP DRIVING!! FOR THE LOVE OF HUMANITY, KEEP DRIVING!!"
* The Powerpuff Girls (2016) Fuzzy Lumpkins gets sucked through a portal via an evil tiara. After the tiara is destroyed he returns and says that he's seen things no man should ever see.
* The Powerpuff Girls (2016) gives Blossom a crush on a boy named Jared Shapiro. He's around her age, goes to her school, is nerdy, and likes her but can't tell her... That's about all there is to Jared Shapiro.
* The Powerpuff Girls (2016)" has the girls at a mini golf course where a mechanical mascot goes on a rampage in Townsville when Buttercup takes her winning golf ball with her.
* The Powerpuff Girls (2016) has too many animation errors to count. Also on at least one occasion one of the girls spoke with the wrong girl's voice.
* The Powerpuff Girls (2016)), however the reboot is more ambiguous. They are in an elementary school and their class teaches elementary level subjects however their

kindergarten teacher Ms. Keane is still their teacher. Their classmates look older than six, many of the students outright look like middle schoolers, and in one episode the girls were teased by classmates for "looking like babies". They sound older and act older but still use the same designs they did when they were five. According to one episode the girls have had five Picture Days, which pins them around ten or eleven years old. However, their classmate Princess is explicitly six. It's made even more confusing when a fourth Powerpuff Girl named Bliss appears who is explicitly a teenager and looks taller and curvier than the others.
* The Powerpuff Girls (2016): In "15 Minutes of Fame" Bubbles creates an energy projection in the form of a giant mouse wearing a top hat and diaper to lure a giant sabertooth tiger. The tiger attacks and rips off the diaper:
* The Powerpuff Girls (2016): In "Man Up 2: Still Man-ing", Buttercup stops Manboy's weaponized lawnmower by clogging the exhaust pipe with a bottle cap, which makes the engine explode.
* The Powerpuff Girls (2016) is a lot more fluid and energetic compared to the actual cartoon.
* The Powerpuff Girls (2016) is based on writer Jake Goldman. The character was actually created as a good-natured joke by the artists at Shaprio's expense. The writer decided to go along with it and voice the character as well, in addition to putting him in episodes he writes.
* The Powerpuff Girls (2016). It was never officially stated if the reboot was canceled, but the toys didn't sell well.
* The Powerpuff Girls (2016) often likes to make butt jokes, such as calling Bubbles a "wimpy butt". It may or may not be a pun on the first four letters of her name.
* The Powerpuff Girls (2016), one villain is a gnat who was bitten by a radioactive man. He then turned into an abnormally large, lumpy-looking humanoid/gnat hybrid.
* The Powerpuff Girls (2016): Parodied in "The Long Skate Home". Bubbles is hit in the face with a ball and collapses, then starts moaning that she's cold. Blossom tells her to zip up her jacket. She does so and recovers.
* The Powerpuff Girls (2016) phone) was replaced with a smartphone. This means that the girls can be called even when away from home.
* The Powerpuff Girls (2016) rated TV-PG might have something to do with it.
* The Powerpuff Girls (2016) received an A+ too due to the teacher being under mind control. People getting grades they didn't earn and the thought that she didn't deserve her grade are too much for her.
* The Powerpuff Girls (2016), such as taking place in the 2010s instead of the 2000s. For example, there are episodes explaining why the girls attend a new elementary school instead of Pokey Oaks and why Ms. Bellum is no longer assisting the Mayor.
* The Powerpuff Girls (2016) that could be considered a prototypical version of this style.
* The Powerpuff Girls (2016)" was held back several months in America because it was themed around winter. In the UK, it aired in July.
* The Powerpuff Girls #20, "Bow Jest" (DC run) has Blossom's psyche and confidence shattered when she loses her hair bow. Mojo steals it, thinking it possesses some type of power if losing it can turn Blossom into a sobbing mess. Suddenly, Bubbles (of all people) clocks Mojo, slams the bow back on Blossom's head, and dresses her down:
* The Powerpuff Girls #27 (DC run) is "Bless This Mess," which has the girls grounded to their messy, toy-strewn bedroom until they clean it. Every time they do, Him makes it messy again.
* The Powerpuff Girls #29 (DC run) had "Helliday" which had Him creating a Christmas-like holiday in Townsville in which everyone (except Buttercup) is highly involved.
* The Powerpuff Girls #60 (DC run, "The Purple Pages of Peril") has a menacing hand emerging from a book and trying to pull Blossom in by her foot. Bubbles and Buttercup strain a sinew to keep her from being yanked in.
* The Powerpuff Girls #62 (DC run): "Brat Trap" has Princess Morbucks holding a

rally for materialism at Townsville Mall, giving her money to the kids so they can spend it on bling. The girls intercede, and Bubbles takes the stage:
* The Powerpuff Girls #66, "Rain, Rain, Go Away," has a sea monster making everyone do a rain dance from a pop song that everyone (except Buttercup) likes that makes Townsville flooded. To make the flood recede, the girls play the recording of the song backwards and blare it from two large speakers.
* The Powerpuff Girls acquires powers like the heroines' several times over the course of the series, by various means. She fails to beat them every time, but never learns a lesson about it.
* The Powerpuff Girls after his softball team wins a game. He is then sent off to jail.
* The Powerpuff Girls after the girls defeat Mask-scara ("A Made Up Story").
* The Powerpuff Girls after their game of "tag" rent Townsville asunder.
* The Powerpuff Girls aired a promo about the episode "Buttercrush" which involved a brief one-off relationship between Buttercup and Ace
* The Powerpuff Girls "All Chalked Up'' likewise used a variation of the "aggressively nice" option when Him tries to use Bubbles naivety to his advantage.
* The Powerpuff Girls: All three of them but most noticeable, Buttercup.
* The Powerpuff Girls already, the fight ends up demolishing near all the city in the process and, as a result, the townsfolk demand the girls never touch the thing again.
* The Powerpuff Girls: Although all three sisters are the exact same age due to being created at the same time, Buttercup often behaves as one to Bubbles, or even to Blossom on occasion.
* The Powerpuff Girls. Although he's not much of a badass and his 'stache is pretty much taken for granted.
* The Powerpuff Girls," a mysterious little figure starts to grow until it becomes unmanageably monstrous. The girls can only defeat it by renouncing their lies and telling the truth. First implemented in issue #21 of the comic book ("Big Fish Story," DC run) in which the little fish the Professor caught grows with the girls' lies as it is manipulated by Him.
* The Powerpuff Girls and a security blanket. Buttercup needs to be thoroughly convinced she can fight without the blankie after it's misplaced. Once she is, she gives it up and the girls' father Professor Utonium snatches it up claiming it had recently helped him create his newest invention.
* The Powerpuff Girls and carved her name on the Permanent Naughty List.
* The Powerpuff Girls, and casually revealing to the public gathered that Bubbles was wetting the bed until recently.
* The Powerpuff Girls and cause it to spill inside the pot is anyone's guess.
* The Powerpuff Girls, and is not above crippling the bad guys. "Makes Zen to Me", for example, has her brutally beating Fuzzy Lumpkins to the point of crippling him and leaving him in a coma, and although she had no knowledge of this, she willingly goes for a dinner without a hint of remorse. Yes she fights evil as much as her sisters but a disproportionately big part of it amounts to the pleasure that she gets from brutalising characters that she can get away with and still be classed as a hero, seeing as whenever she gets carried away even her teammates aren't safe from her bullying tendencies, especially Bubbles. And that's the people she actually cares about. She does seem however to also have a genuine dislike towards most villains (with the exception of Ace whom she considers following), so there is some sense of limits in her character.
* The Powerpuff Girls And it's off to the slammer the Smiths go (again, in the husband's case).
* The Powerpuff Girls and nearly forced to marry him. After the Professor is saved by the Powerpuff Girls, he writes on his notepad "Lumpkins are, above all, stupid" and as a sidenote "never speak of this again"... and then eats it. He gets really mad when the Girls mention it about 10 seconds later.
* The Powerpuff Girls and one for its own. The first comes midway though the story when Bubbles accidentally splashes some Antidote X on a revived Butch. This negates the murderous tendencies that came from being killed and revived when the Puffs

were recreated. but Bubbles goes into shock when she realizes in the first story they managed to subdue Buttercup that way and Buttercup was trying to warn them before she was killed again in hopes of fixing the problem. But that pales in comparison to the ending, when it looks like they had stopped Boomer from activating his doomsday machine, but he remains alive long enough to turn it on and kill everyone on the planet. Some last-minute actions by the Professor allowed Bubble to be revived but she now the last living being alone on Earth.
* The Powerpuff Girls and placing the needle on the spinning CD. A continuous scratch is heard.
* The Powerpuff Girls and repeating it. Ending with him dropping the artifact that turns people into dogs...and he repeats it on a videotape.
* The Powerpuff Girls and takes place in the mid 2010s (but Princess just turns six on one episode).
* The Powerpuff Girls: An episode features a con-artist "director" allegedly making a movie about the girls. (The initial broadcast of this episode was suspiciously close to the release of the actual movie.)
* The Powerpuff Girls: An episode has Princess Morbucks getting hit by a de-powering ray because she's too evil to simply fly out of its way.
* The Powerpuff Girls, an example being "Sun Scream", when we get seven closeups of Blossom's pulsating sunburn skin while she's crawling across the bed.
* The Powerpuff Girls: a one-off villain who despises humanity and has a device that let him control roaches. He appears at first to be an ordinary man (with antennae), but he turns out to be a roach in a robot human suit.
* The Powerpuff Girls, a pack of squirrels raise a ruckus after the Mayor builds a statue over the spot where they'd been burying their acorns. Bubbles, who can talk to animals, is unable to sort things out because she had been rendered mute after a bee she nearly swallowed stung her in the throat.
* The Powerpuff Girls, a powered-up and gigantic Mojo offers this to the girls, after manipulating them, trying to get them out of the way and realising, after they demonstrated their powers, that this is the only way to avoid ending in the wrong side of their fists. Naturally, this being an origin movie, they refuse.
* The Powerpuff Girls are bound to go through this now and again, especially between Blossom and Buttercup. "Octi Evil" and "Three Girls and a Monster" are prime examples.
* The Powerpuff Girls), a ridiculously muscularly-drawn alien shapeshifting dragster appears, who introduces himself as "Breaker of men! Taker of worlds! So step forth and bring thy manhood against mine own, and let us see who has the upper hand upon the measuring stick!"
* The Powerpuff Girls as a female lumpkin makes Fuzzy fall madly in love.
* The Powerpuff Girls as a zombie to exact his revenge and selects out Blossom, to whom the little girl bore an uncanny resemblance.
* The Powerpuff Girls ask aged superhero Captain Righteous and his sidekick, Lefty, to go back into crime fighting against the equally-aged Ministry of Pain. All involved ended up in the hospital with broken hips.
* The Powerpuff Girls. As she repeats to herself "It's not real", the dolls come closer to her bed each time she opens her eyes until they're looming over her.
* The Powerpuff Girls, as the populace hates them for wrecking the city; after Mojo's army of monkeys take over, even the Professor doubts them. The girls eventually return to show what they're capable of when Mojo threatens the Professor.
* The Powerpuff Girls, as they appeared in the one-off special "Dance Pantsed," underwent a bit of a change in appearance. Their heads were almost square with rounded corners and their eyes didn't taper to the sides of their heads. Even Mojo Jojo looked ragged and emaciated.
* The Powerpuff Girls attempt to join a superhero league in "Members Only," only to be turned away even after they've proved themselves worthy simply because they're girls.
* The Powerpuff Girls: At the beginning of "The Rowdyruff Boys", a montage of Mojo Jojo getting defeated and thrown in jail shows him getting his mugshot taken.

* The Powerpuff Girls: At the start of "Helter Shelter," the Professor's loud and protracted yell of "BUUUUBBBBLES!!!!" goes all the way into outer space, where the girls are repairing a spacecraft.
* The Powerpuff Girls, at which point the Mayor barges into his old office and ends up challenging Fuzzy to a wrestling match.
* The Powerpuff Girls" because he's so evil the other characters can't bring themselves to say his true name. After that, his name is apparently actually Him.
* The Powerpuff Girls because of cable, but he's more honest with the Girls.)
* The Powerpuff Girls Before that, she deduced that the Puffs' counterparts' new weakness was that "whenever their masculinity is threatened, they shrink in size." Masculinity threatened, indeed.
* The Powerpuff Girls' Best Rainy Day Adventure Ever" when the girls drag him into playing Bubbles for their little game.
* The Powerpuff Girls), Blossom is shown to be staring at a certain place after she pulls Brick's pants down in an effort to embarrass him. She's just hovering there, smiling and blushing...
* The Powerpuff Girls, Blossom smacks a prisoner's head back and forth, in the expressed hope that "maybe — this will — teach you to — leave jail — before you've — paid your — debt to — society!" The Professor, currently in the role of the super-powered "PowerProf" and in a particularly overbearing mood, takes the prisoner and tries to correct her technique, saying that "It's — all in — the wrist!" while doing the exact same thing.
* The Powerpuff Girls, Blossom takes umbrage at losing the role of Juliet in a school play of "Romeo and Juliet" to Bubbles and being consigned to playing a rock. However, she is assigned as Bubbles' understudy. So Blossom eventually tricks Bubbles into a closet and locks her in it. From the episode "A Star is Blossom."
* The Powerpuff Girls: Blossom usually acts like the calm and mature leader of the girls, but there are times where she actually acts her young age, like in “Rainy Day Adventure”, where they all play inside on a rainy day, and Blossom does quite a good Mojo Jojo impression.
* The Powerpuff Girls, both on the show ("Simian Says") and the comic book ("See You Later, Narrator").
* The Powerpuff Girls "Bow Jest," has Blossom losing her hairbow during the girls' battle with Princess Morbucks. Her eyes well up with tears, then she freaks out before going after her bow.
* The Powerpuff Girls broadcast of the series, but it was shown as part of reruns later.
* The Powerpuff Girls. Buttercup defeats the dragon with refreshed breath and comes to her senses.
* The Powerpuff Girls, Buttercup slices a cyclops monster in half, and its two halves then hop away.
* The Powerpuff Girls: Buttercup tends not to mince words. If she has something to say, she'll say it. Take for example the episode "Odd Bubbles Out" where Bubbles is excited and Buttercup asks her why; Blossom says the former has been talking about it (a visit from her unicorn friend, Donny) for weeks, to which Buttercup responds that she usually just tunes Bubbles out.
* The Powerpuff Girls but the ending reveals he has a clone and his memories were stored, so he was essentially revived as well.
* The Powerpuff Girls cadence as Mojo Jojo's dialogue, and is mostly only known to people through the "40 Cakes" meme.
* The Powerpuff Girls can apparently speak pretty much any language. This isn't limited to human languages, either.
* The Powerpuff Girls (Cartoon Network Starring #1) was an issue length commercial for Mostess Snack Cakes, a spoof of some of the genre's serious superheroes shilling for Hostess in 70s comics.
* The Powerpuff Girls climaxes in a final battle between the girls and a monstrous Mojo Jojo (who had become monstrous from Chemical X), as the girls, defeated and captured, are entreated to join Mojo as the outcasts Townsville saw them as and as

he himself saw until the girls reach an epiphany that they have to fight what Mojo has become.
* The Powerpuff Girls comic drawn by Christopher Cook called "Powerbuff Girl" where Bubbles embarrassed her sisters by going through a nudist phase. The comic includes a scene of Bubbles insisting on staying naked while helping Blossom and Bubbles confront the Rowdyruff Boys and Mojo Jojo (who are easily defeated by the shock of Bubbles appearing nude in front of them), plus the three girls are all forced to take on a trio of naked criminals called the Mean Streaks while in their birthday suits because of a swarm of moths eating the clothes of everyone in Townsville.
* The Powerpuff Girls comic, the Amoeba Boys find an overturned truck of mattresses and attempt this crime—even though there's another overturned truck full of money right next to it. The truck driver doesn't even mind because he's hauling the mattresses to the dump anyway.
* The Powerpuff Girls complete series DVD set has the never-seen-in-the-United-States episode "See Me, Feel Me, Gnomey".
* The Powerpuff Girls compulsively repeats his statements, with each repetition sounding more like Spock Speak as he dredges the depths of his mental thesaurus.
* The Powerpuff Girls could easily end the planet if he wanted to. He chooses his schemes based on tearing down the morality of the Girls, especially Bubbles, and admits defeat even when he doesn't have to, if the plan fails.
* The Powerpuff Girls. Co-writer Jake Goldman is the voice of Blossom's love interest, Jared.
* The Powerpuff Girls created a bunny lady scientist with a pretty dress and combat boots.
* The Powerpuff Girls created, only to find it was Ms. Keane's creativity assignment for the class—which the girls receive a failing grade.
* The Powerpuff Girls creates things like a supersuit or a giant robot or a car that can turn into a giant robot.
* The Powerpuff Girls' dad, Professor Utonium, sometimes falls into this.
* The Powerpuff Girls (DC Comics, Oct. 2001) dealt with a monster caterpillar with a wrestling get-up. Blossom and Buttercup have to wrap it up in adhesive tape (Bubbles was too busy protecting a butterfly from getting its wings wet), which in turn transforms the caterpillar into a monster wrestling butterfly. Blossom and Buttercup get their clock cleaned by the winged beast—Bubbles runs away from home after the scorn heaped upon her for not participating earlier.
* The Powerpuff Girls, dealt with a family of giant one-eyed alien chickens who land in Townsville for a picnic, unaware there are living creatures underclaw.
* The Powerpuff Girls decide to create a fourth sister, this trope fully comes into play. The creation of the Rowdyruff Boys is sort of an inversion of this, isn't it?
* The Powerpuff Girls, denying that he's like that at all. Of course, his words say differently:
* The Powerpuff Girls depicted Mojo Jojo being in prison next to a burly prisoner. Cue announcer going "Love is in the air, can't ya just smell it?" in addition to another point where Mojo Jojo is transformed into a dog and in a cell with a larger dog seductively going 'Wuff'.
* The Powerpuff Girls depicts a Christmas-like holiday that Him is orchestrating. Buttercup is the only person not buying into it.
* The Powerpuff Girls", Dick Hardly, an old friend of the Professor's steals the Chemical X formula to make his own versions of the girls to market as superheroes. However, Hardly skimps on the materials and the more he makes, the more deformed and less like the originals they become, and it's said in the episode they only live a couple of hours.
* The Powerpuff Girls discover they have the power to communicate with each other in their dreams.
* The Powerpuff Girls do this. In "Tragic Marker" (issue #45), Mojo Jojo uses a magic marker to alter things by changing their labels, so he turns a stop sign into "stomp," after which the Monty Python foot comes down on the girls. It releases the girls after Bubbles tickles it with a feather. In "The MP3" (Cartoon Network Block Party #23), the Micro-Puffs' mischief causes Blossom to grow giant size. She

defeats the Micro-Puffs by trapping them under her foot.
* The Powerpuff Girls do this on occasion, most notably with Mojo Jojo in "Forced Kin" as they must come up with a plan to stop an alien power from taking over Townsville.
* The Powerpuff Girls do this when they try to stop Mojo Jojo from taking over the world with an Anubis head:
* The Powerpuff Girls) eats the sausages when they try to attack him and the girls.
* The Powerpuff Girls enemies the Gangreen Gang pelt a bunch of kindergarteners in a game of dodgeball, taking advantage of the fact that the girls are not allowed to beat them up at school. Ms. Keane manages to find a loophole around this by telling the girls to go outside and "play dodgeball" as well.
* The Powerpuff Girls episode "A Very Special Blossom". She steals a set of golf clubs to give the Professor for Father's Day then tries to frame Mojo Jojo for it. When the jig is up, we see her in an orange prison suit performing community service.
* The Powerpuff Girls episode "Birthday Bash" everyone is about to sing the song. However, they are quickly stopped by Bubbles shouting "No singing!", because the Girls are in a hurry to get to opening their presents.
* The Powerpuff Girls episode "Boogie Frights" after being scared by Buttercup.
* The Powerpuff Girls episode "Bubble Boy" has Rowdyruff Boy Boomer captured by the girls. Bubbles impersonates him and infiltrates the Rowdyruffs in a bid to capture the other two. It's a nine-day wonder that Butch and Brick didn't catch on to Bubbles' noticeably higher voice and lighter eye color.
* The Powerpuff Girls episode "Buttercrush", Ace and Buttercup have fun this way on Big Billy's stomach.
* The Powerpuff Girls episode "Cat Man Do", Professor Utonium has this reaction after the Girls snap him out of his trance. They don't disillusion him.
* The Powerpuff Girls episode "Cat Man Do". The girls are awaiting the Professor's decision on whether they can keep the cat. The Professor enters the scene and says, "We can keep Kitty!" Bubbles starts bawling instantly and the other two are complaining before they realize he said yes.
* The Powerpuff Girls episode "Collect Her" features a negative example in the from of Lenny Baxter, a fan who spent much of his spare time collecting Powerpuff memorabilia. When Lenny finds out he has obtained every known piece of merchandise, he goes insane at the prospect of not being able to add more items to his collection, leading him to steal the girls' personal belongings and, eventually, kidnapping the girls themselves.
* The Powerpuff Girls episode "Criss Cross Crisis" has many different body swaps going on, but eventually everyone seems to be back to normal... except that at the end, it turns out Bubbles' body was still swapped with the Narrator.
* The Powerpuff Girls: episode "Daylight Savings", Bubbles stops an alien from abducting a cow.
* The Powerpuff Girls episode "Forced Kin" after he single-handedly defeats a giant alien trying to conquest mankind only because Mojo didn't want to be usurped.
* The Powerpuff Girls episode "Him Diddle Riddle," one of Him's riddles requires the girls to head for Chinatown and answer a ringing pay phone in a three-minute timeframe without flying. Blossom has the three split up and take the most convenient route to the phone with the first there to answer it. Blossom hitches a ride with an 18-wheeler, Bubbles takes a bus then a pony, and Buttercup takes the subway.
* The Powerpuff Girls episode "Him Diddle Riddle" when her SAT score comes up a measly 10. At the end of the episode, the girls manage a weak "Say what?" when they find out that as a penalty for not solving all of Him's riddles, the Professor has to pay... full price for a pancake breakfast.
* The Powerpuff Girls episode "Hot Air Buffoon", the Mayor becomes convinced that he shouldn't just rely on the girls all the time. He decides to fight crime using a hot air balloon and one of these.
* The Powerpuff Girls episode "I See a Funny Cartoon in Your Future" has the villainous medium Madame Argentina being introduced this way.

* The Powerpuff Girls episode "I See A Funny Cartoon In Your Future," Madame Argentina applies pins to the keisters of three Powerpuff voodoo dolls.
* The Powerpuff Girls episode "Members Only," after the girls are rejected by the Association of World Super Men, they leave begrudgingly, but not before Buttercup says to Major Glory, "You got your underpants on the outside!" (to which he embarrassingly covers up)
* The Powerpuff Girls episode "Members Only," Major Glory calls the girls Blaze 'em, Kaboodles and Butter Dish.
* The Powerpuff Girls episode "Mime for a Change" makes great use of this when Rainbow the Clown loses his color and is turning all of Townsville grey and silent.
* The Powerpuff Girls episode "Mommy Fearest", after the girls are grounded by the Professor's new girlfriend Ima Goodlady, Blossom gets a call from the Mayor saying that Sedusa is robbing him of his jewels. There, Blossom puts the pieces together about this coincidence and deduces that the two of them are one and the same and it was all part of Sedusa's scheme to keep them away while she committed crime.
* The Powerpuff Girls episode "Mommy Fearest" had Ima Goodlady planning to ground the Powerpuff Girls forever so she can commit more crimes. But the plan failed when the Professor found out that she is really Sedusa, and the Professor tells the girls to call the police and states that the crook will never deceive them again.
* The Powerpuff Girls episode "Mommy Fearest" has Sedusa doing this to the girls while disguising herself as a woman (Ima Goodlady) that the Professor goes ga-ga for... (much to the Mayor's dismay as he turns his back against her by un-grounding the girls and throwing her boot-ay in jail where she belongs). Sedusa returned but disguises herself as Sara Bellum's evil twin in the episode "Something's a Ms." (a parody of "Something's a Miss"), not knowing that the girls and Sara Bellum accidentally discover her evil scheme of ruining/destroying someone else's house and wind up getting caught by the police (well, actually Sedusa).
* The Powerpuff Girls episode "Moral Decay". After Buttercup accidentally knocks out one of Bubbles' teeth, she finds out that it becomes money when it's left under a pillow. Buttercup spends the next several scenes trying to knock out another of Bubbles' teeth.
* The Powerpuff Girls episode "Nano of the North", the titular girls have to fight off a swarm of carbon-eating nanobots that are attacking the town.
* The Powerpuff Girls episode "Nuthin' Special" examines and parodies this. To defeat (or rather aid) a flaming Spanish-speaking monster squirrel, Blossom uses her ice breath to extinguish the flames, and Bubbles uses her bilingual talents to communicate with it. Buttercup feels left out as she had no special power to offer in the situation. She spends most of the episode trying to find her own power but Blossom and Bubbles duplicate her time and again. Having had enough, she defiantly sticks her tongue out, curling it as she does. This throws her sisters, as they attempt to curl their tongues (as do everyone else in the city) with no success. Buttercup is overjoyed at this, in spite of everyone—even the narrator—thinking it's stupid.
* The Powerpuff Girls episode "Octi Evil" has the narrator commenting on a quiet evening at the Utonium household. This is followed by Blossom angrily shrieking "SHUT UP, BUTTERCUP!!!" as she and Buttercup lock horns with each other.
* The Powerpuff Girls episode "Ploys R' Us" the girls' room is constantly flooded with toys, which come from a sleepwalking Professor. When the Professor asks to come in the room the girls frantically try to hide all the toys, with Bubbles stuffing a bunch in the closet. As the Professor enters an avalanche of toys comes out and he demands to know where they came from. The girls claim they're presents from the city for always saving the day. The Professor is satisfied with that answer and leaves.
* The Powerpuff Girls episode Power Prof, Utonium joins the girls in crime fighting, and the narrator names this trope.
* The Powerpuff Girls episode "Reeking Havoc": Last time Professor Utonium concocted his chili for a chili cook-off, the Hazmat units had to be called in and cordon off the home.
* The Powerpuff Girls episode "Superfriends" when the girls meet their new neighbor

Robin Schneider and tell her that the Professor (whom she meets) made them by accident:
* The Powerpuff Girls episode "Sweet 'N Sour", the girls are being ostracized for targeting a trio of very cute animal criminals.
* The Powerpuff Girls episode "The Bare Facts", centered around the Mayor and told mostly from his POV (at least camera-wise) aired on January 20th, 1999. January 20th being the date most U.S. presidents are inaugurated.
* The Powerpuff Girls episode "The Boys Are Back In Town", after getting sick of being beaten by the recently-resurrected Rowdyruff Boys, Buttercup punches Butch, causing him to bite his tongue.
* The Powerpuff Girls episode "The Headsucker's Moxy", the girls fight "the Robbing Leech" (a pun on Robin Leach) who uses his lamprey mouth to suck knowledge from peoples' brains in order to steal things. He's defeated after he tries this on The Mayor of Townsville, whose brain is a more perfect vacuum than the Leech's.
* The Powerpuff Girls episode "The Mane Event", as the girls wake up from their sleep, we get to see Blossom with her hair down.
* The Powerpuff Girls episode "The Mane Event" when she goes into self-imposed seclusion after Bubbles and Buttercup butcher her hair and the subsequent laughing at her from everyone—even the monster the girls have to fight.
* The Powerpuff Girls episode, the Narrator ended up sounding like Bubbles at the end.
* The Powerpuff Girls episode "Three Girls And A Monster" has Bubbles stepping up to the plate to defeat a monster (asking it politely to leave, and it complies) because Blossom and Buttercup are too busy having a classic "Brains Vs. Brawns" argument with each other.
* The Powerpuff Girls episode "Town n' Out", this happens to Bubbles as the girls walk home through Citysville.
* The Powerpuff Girls even has a fan-following on deviantART. One artist, teacupballerina, draws a lot of pictures about this ship.
* The Powerpuff Girls, even when the three latter villains didn't commit any crimes at all. The girls never catch on, but the other villains figure it out and don't take kindly to the Gangreen Gang's shenanigans.
* The Powerpuff Girls exhibits this whenever Him (a crossdresser Humanoid Abomination) shows up.
* The Powerpuff Girls explained, they switched outer "layers" rather than their entire bodies being swapped.
* The Powerpuff Girls faced in their animated series, returns in "Undead Kola" (DC run, issue #58) with a zombie army fueled by a soft drink they obtained after raiding a soda delivery truck.
* The Powerpuff Girls featured the Sandman as a villain who puts everyone in the entire world to sleep. The girls defeat him in this crazy and disturbing dream sequence...thingy featuring chickens, a praying mantis, and trippy oil projector backgrounds.
* The Powerpuff Girls featured the Smith family, one member of which was their angry teen son Bud. The first episode, Bud's entire appearance consisted of him yelling something typically teenagerish at his father, such as "I hate you!" and "No one understands me!" The second episode, which features the entire family as villains, provides every member of the family with a motivation for why they hate the Powerpuff Girls — and Bud's is "I hate everything!"
* The Powerpuff Girls featuring the Whoopass Girls. And instead of the Professor accidentally spilling "Chemical X" into the formula, he accidentally opens "a can of whoopass".
* The Powerpuff Girls fight a monster without their powers, Bubbles throws apples at him.
* The Powerpuff Girls, finds his apartment building surrounded by an angry mob (some wielding torches) demanding the release of the Powerpuff Girls, and remarks, "Well, paint me green and call me Frankenstein... they're on to me!"
* The Powerpuff Girls fly around in the background beating up a guy dressed as the orange fish monster with the many eyes. You know the one.

* The Powerpuff Girls focused solely on the girls inventing their own adventures to keep them occupied on a rainy day.
* The Powerpuff Girls for the Rowdyruff Boys. They also don't technically appear in "West in Pieces" as their colonial counterparts appear instead.
* The Powerpuff Girls frequently visits this territory, sometimes with an overnight bag in hand.
* The Powerpuff Girls from a monster not much taller than her in "Cover Up".
* The Powerpuff Girls had "Impeach Fuzz," in which the Mayor loses his job as Mayor of Townsville to Fuzzy Lumpkins. When Fuzzy puts on the Mayor's prized hat, the two fight it out in a wrestling ring.
* The Powerpuff Girls had the mayor listening in on the Professor and Ms. Keen flirting with each other for hours because he couldn't bring himself to interrupt despite the fact that he needed the girls to save the day.
* The Powerpuff Girls had the Professor taking the girls camping in the same area as Fuzzy Lumpkins and his three nephews. The Professor does his best to get the girls to relax despite Fuzzy's antics. This includes showing them the tree he planted as a child. While he's reminiscing, Fuzzy cuts it down for, what else? A toothpick.
* The Powerpuff Girls had the "Wondrous World of Wonderful Whimsical Willy", basically an Aesop episode to teach children not to believe everything they see on TV. Near the end however, they seem to realize that they are encouraging kids against watching THEIR show, and the episode ends with the girls asking the viewers to trust television in a zombie-like manner.
* The Powerpuff Girls had two Halloween stories: "Trick Or Beatings" (issue #31) had the girls framed for Halloween pranks staged by the Gangreen Gang, and "Halloween Hiding" (issue #67) had the Gangreens hiding out from the girls at a Halloween dance party.
* The Powerpuff Girls had, well, a number of different cereals combined into one brand: "Lucky Captain Rabbit King Nuggets". The mascot for this brand seems to be a mash-up of Lucky the leprechaun, the Trix rabbit, Captain Crunch and King Vitaman.
* The Powerpuff Girls hardly ever leave a building besides their own house by a door or even a window. Lampshaded in the first regular series episode.
* The Powerpuff Girls has a cameo of both Craig and Lauren in the office that Mojo shows the girls at the climax of the film. They're the ones that are just out of the door.
* The Powerpuff Girls has a direct line to the girls from his office. He usually calls if it's serious, but once in awhile it'll be for something quite mundane, like opening a pickle jar.
* The Powerpuff Girls has Blossom breaking down the girls' battle with Mojo Jojo to a mathematical science. The letterer in error put in "sine" and "cosine" as "sign" and "cosign."
* The Powerpuff Girls has Bubbles. She is even described as "the joy and the laughter" in the end credits theme song, though the extended intro to the reboot have the lyrics "Bubbles: She's bright as the sunny day".
* The Powerpuff Girls" has the Gangrene Gang inadvertently gain superpowers when the girls zap them with heat vision after they had raid a convenience store, giving them the properties of what they eat. Ace gets ice due to eating ice cream, Snake stretching power from eating taffy, Arturo super speed due to drinking coffee, Grubber belching power from drinking soda and Billy a rock due to eating rock candy. However, it only last until they get a collective stomachache and have to use the toilet. Since they -ahem- "emptied" the contents of their stomachs, they likewise lose the powers.
* The Powerpuff Girls has the girls' apologies for ruining Mojo Jojo's restaurant business twice making the front page of the Townsville Times.
* The Powerpuff Girls has the hair bow, though she and her sisters are all in dresses, and all look like little freakish bigheads, as do the Rowdyruff Boys, and the counter-Blossom has the baseball cap tell.
* The Powerpuff Girls has their special phone number. He rings them up any time some horrible menace is threatening the City of Townsville. Or he needs a jar of

pickles opened or something.
* The Powerpuff Girls has the Micro-Puffs (mischievous dimensional sprite versions of the girls) brainwashing Bubbles and Buttercup into thinking they're the leader of the team. It doesn't work on Blossom, since she's the leader already. She gets some help from (of all people) Mojo Jojo.
* The Powerpuff Girls, has the Pokey Oaks kids under the influence of Sedusa's hypnotic cosmetics. Buttercup is the only child not taking part with the cosmetics, but the others march towards her zombie-like entreating her to join them {"Glitter Girlie...one of us...").
* The Powerpuff Girls" has Townsville undergo a massive heatwave, later revealed to be caused by a giant flaming meteor hurtling towards the city (which everyone refers to as a "giant fireball.") Blossom, having sworn off using her newly-found ice breath power, initially doesn't want to use it to try and save Townsville, but gives in and uses it, turning the giant fireball into a giant iceball, which the girls are able to easily pound into snow. A humorous exchange from the Mayor and Miss Bellum during this near-disaster...
* The Powerpuff Girls has training simulators for situations of varying severity levels.
* The Powerpuff Girls have a de facto race after Bubbles is taunted by her sisters as being a slowpoke in a game of tag ("Big Fish Story," DC issue #21). When Bubbles tags Blossom , she does so with such force that they both crash into the home's front door, just as the Professor is about to open it.
* The Powerpuff Girls have a good laugh after viewing Mojo Jojo's baby photos.
* The Powerpuff Girls have a "Substitute Creature" that covers for Ms. Keane. They think he is evil because he is a monster and fear the worse. It turns out he is a nice guy and sets the girls straight.
* The Powerpuff Girls have the Rowdyruff Boys, a team of male counterparts created by Mojo Jojo out of snips, snails, and puppydog tails. They love causing mayhem, mischief, and chaos.
* The Powerpuff Girls, he ends up living on the streets carrying a sign that says "Lost Townsville, Needs help".
* The Powerpuff Girls. He's simply yanking the girls' collective chain without them knowing it.
* The Powerpuff Girls He tosses it aside to make room for a trophy he won in a chili cook-off.
* The Powerpuff Girls. He tries to suck out information from the Mayor's noggin, but finds none.
* The Powerpuff Girls, HIM could do that in the middle of a test of logic puzzles and get away with it.
* The Powerpuff Girls Him once gives the girls such a test in a challenge, and although Blossom and Buttercup take the test seriously, they fail as a result. Much to the shock of Blossom, Buttercup, and Him, Bubbles passes, and it turns out she filled in the bubbles in the shape of a flower.
* The Powerpuff Girls: Him tricks Bubbles with one of these in "All Chalked Up". Clever — who would suspect a place like this of secretly being the creation of an evil, manipulative demon?
* The Powerpuff Girls home, which is better than most) but in the next scene, when she and Mojo are watching the heroines' birthday party in the common room, she has the other inmates waiting on her hand and foot.
* The Powerpuff Girls, however, as she was able to use her charms to coerce the Gangrene Gang into working for her.
* The Powerpuff Girls, however, he eats a cold turkey sandwich with the patch on it.
* The Powerpuff Girls how to commit crime. Of course, the girls end up getting arrested for it.
* The Powerpuff Girls if they don't get money. So Bubbles robs the banks herself.
* The Powerpuff Girls. "I have the most powerful power there is! Cold, hard cash!"
* The Powerpuff Girls (illustrated by Christopher Cook), where Bubbles goes through a nudist phase and her sisters Blossom and Buttercup are forced to take on the Mean

Streaks naked because of moths eating the clothes of everyone in Townsville. Before confronting the Mean Streaks, Buttercup covers herself using Blossom's bow and Blossom covers up using her long hair. The Mean Streaks manage to use Buttercup and Blossom's modesty against them when Les Playdoctor uses a knife to slash off Blossom's bow and Buffy the Wardrobe Slayer forcibly ties Blossom's hair up with chains, but the two end up deciding that stopping the criminals is more important than covering up their nudity after seeing Bubbles fight the crooks nude without any concern of being uncovered and proceed to stop hiding and start fighting back against the Mean Streaks.
* The Powerpuff Girls impact shots, with green goo and teeth flying everywhere.
* The Powerpuff Girls, "Impeach Fuzz": Local redneck, Fuzzy Lumpkins becomes the mayor after the Townsville residents get tired of The Mayor's constant rambling. Fuzzy degrades the mayor's office into a a pig farm, demeans Ms. Sara Bellum, and leaves The Mayor an apathetic hobo. The Mayor's response to Fuzzy Lumpkins becoming mayor and tarnishing his position: "I don't care." Mayor's response to Lumpkins wearing his hat: Challenging him to a wrestling match.
* The Powerpuff Girls in 2002, when their own movie was about to be released.
* The Powerpuff Girls in "A Sticky Situation" (their Whoopass Girls short), "Something's A Ms." and "Stray Bullet."
* The Powerpuff Girls: In "A Very Special Blossom", Blossom finds a set of Pro Excellence 2000 Golf Clubs in a ruined shop. Unable to resist her temptation, she steals the golf clubs to give to her father, Professor Utonium, for Father's Day. Not only does she get her father in trouble with the police, but she herself gets stuck with 200 hours of community service.
* The Powerpuff Girls: In "A Very Special Blossom", Blossom steals a value set of golf clubs to give to the Professor on Father's Day. She learns the consequences of her actions when she gets a call from the Professor, who had been accused of the theft and is now behind bars.
* The Powerpuff Girls in behavior). In both cases, the romance was simply a means to an end, with the man being a pawn in the woman's schemes, and the love is over within 7 minutes of episode time.
* The Powerpuff Girls: In "Boogie Frights", as the Professor steps in when Buttercup scares Bubbles with a story about the Boogie Man.
* The Powerpuff Girls: In "Bubble Boy", after capturing and imprisoning Boomer, the girls disguise Bubbles as Boomer and plant her among the Rowdyruff Boys in order to trick them into getting captured.
* The Powerpuff Girls included this trope, but any horror was pretty much passed over for a gasping gag; plus, occurrences like villains breaking into your house and pretending to hold a stuffed octopus hostage are pretty normal in Townsville.
* The Powerpuff Girls: In "Cop Out", Mike Brickowski, disgruntled ex-cop, who blames the Powerpuff Girls for his firing (ignoring the fact that he did absolutely nothing but sleep and eat donuts), gets enraged when the news presents a story on the girls and tosses his TV out the window.
* The Powerpuff Girls: In "Daylight Savings", the Professor institutes a 7:30 curfew for the girls, giving all the villains and monsters a perfect opportunity to wreak havoc on Townsville. He tries to get his mind off of the temptation to lift the curfew by watching TV, but every channel is news about how Townsville is getting destroyed. The Professor finally finds solace in the time channel... where he realizes that he forgot to set the clocks back an hour, leading him to realize the girls have time to save the day. The trope is finally inverted when he flips through the channels again to hear that things are getting back to normal.
* The Powerpuff Girls: In "Daylight Savings", the Professor sets a 7:30 curfew for the girls, allowing Townsville's villains to rampage through the city with the girls unable to stop them. The reluctant Professor tries to get his mind off of it by watching TV, but every channel is reporting on the destruction the until he finally finds solace on The Time Channel...where he finds out that he forgot to set the clocks back for Daylight Savings. After finally getting the girls out of bed and sending them out to save the day, he goes through the channels again, now reporting on how things are getting back to normal.

* The Powerpuff Girls. In her first appearance, she posed as a woman named Ima Goodlady (the words "I am a good lady" mixed together). She also disguised herself as Ms Bellum and disguised Ms Bellum as herself.
* The Powerpuff Girls: In "Knock It Off," Professor Dick Hardly is selling his PPG clones under the name "Powerpuff Girlz X-treme," even going as far as calling Chemical X "Chemical X-treme."
* The Powerpuff Girls: In "Little Miss Interprets", the girls overhear the Professor ranting about how poorly me made three cakes intended for a party he's throwing for them; from what they hear, they believe that he wants to get rid of them and make new Powerpuff Girls from scratch. Things get more intense when they hear the Professor talking to other characters, and they assume that they're in on it.
* The Powerpuff Girls: In many episodes, the jail bars are clearly wide enough for the villains to escape through, yet they never attempt to do so.
* The Powerpuff Girls in "Monkey See, Doggie Two", when Mojo Jojo steals the Anubis head for the second time and replays clips from the last episode of the effects of the head's magic in countries around the globe.
* The Powerpuff Girls: In "Moral Decay", Buttercup upon learning that the tooth fairy gives you money for teeth at first tries to knock off more of Bubbles' teeth and repeatedly says "sorry" after each attempt.
* The Powerpuff Girls. In "Nuthin' Special," Buttercup tries to find her special power and does a sonic scream. She is matched by Blossom and Bubbles. The Townsville folk seem to be more interested in this sibling contest than in the collateral damage it's causing. Bubbles as well, when she's upset. "HE'S MAKING NEW POWERPUFF GIRLS!!!"
* The Powerpuff Girls in one episode when they refused to put on sunblock, saying it was for geeks. Now, since they are nigh-invulnerable it's not inconceivable that the sun wouldn't harm them. However, the girls end up going into space to stop a solar flare from destroying the city and thus end up with sunburns. They were in so much pain they could barely move, let alone fight. At the end of the episode, two criminals suffer this after they also declare sunblock to be for geeks.
* The Powerpuff Girls, in spades. She wants to be a Powerpuff Girl but only because she sees it as a status symbol. She lives the old adage "money talks, b.s. walks."
* The Powerpuff Girls: In "Stuck Up, Up and Away", Princess plummets down after the girls destroy her flying power armor, but Blossom catches her by her shirt just inches from the ground.
* The Powerpuff Girls. In "Telephonies," the Gangreen Gang makes prank calls to various different Townsville citizens. Lil' Arturo pranks Professor Utonium, by telling him that he just won a ten-million-dollar sweepstakes and asking him to remain on hold, which the Professor does for the rest of the episode, despite Arturo hanging up.
* The Powerpuff Girls in that Mojo Jojo, the primary enemy of the girls and formerly the assistant of Utonium, was responsible for accidentally adding Chemical X into the formula that created the girls. Mojo Jojo fits the trope in another way, as he created the Rowdyuff Boys without any help from anyone. (Later, after they are brought back to life by Him, he competes with the other villain for their affection; each villain tries to prove that he is more evil than the other to win them over.)
* The Powerpuff Girls: In "The City Of Frownsville," the ep's villain, Lou Gubrious, sets a crying ray on Townsville, making everyone cry tears heavy enough that it threatens to flood the city. The girls—crying their eyes out as well—attempt to make the people laugh. Approaching mic:
* The Powerpuff Girls: In the episode "A Very Special Blossom", the Professor is put in jail when found with the Pro Excellence 2000 golf clubs stolen from the golf store. Blossom was the one who stole them but claimed Mojo Jojo sold them to her; she had previously told her sisters that she found them.
* The Powerpuff Girls, in the episode "Bubblevicious", Mojo Jojo zaps Bubbles with a laser, and she breaks free of her restraints and promptly beats the living crap out of Mojo.

* The Powerpuff Girls: In the episode "Keen on Keane", the girls try to set up Professor Utonium with their teacher Miss Keane on Valentine's Day. It works, but things take a turn for the worse when they spend too much time on the telephone, leading to the Mayor being unable to reach the girls to save the day.
* The Powerpuff Girls: In the musical episode "See Me, Feel Me, Gnomey", a gnome takes the Girls' powers to take the evil out of the city. Later, they regained them after learning that the gnome was feeding off the wants of the people to thank him from that point on and forcing them to worship him. They fought him later, winning by singing about how everything needs its opposites and chasing him off the edge of a giant vine. He then went into a non-singing speech saying "As I descend to the Earth, and I view the universe above me, I realize that life revolves, evolves... and dissolves, completely around the opposites. Therefore, I conclude... that I cannot... exist, in my Utopian... mind." When he hit the ground, all the lines became white and the colors became black, and he exploded.
* The Powerpuff Girls in the What a Cartoon! pilot "Crime 101". After the Powerpuff Girls rob a bank just to show the Amoeba Boys how, the Judge nearly sentences the girls to one million years in Townsville Correctional Facility until the Amoeba Boys take the blame.
* The Powerpuff Girls into a giant mono-bot and gain the upper hand. But since the "giant" mono-bot is only three inches high, Professor Utonium steps on it.
* The Powerpuff Girls: In "'Twas The Fight Before Christmas", the protagonists are preparing everything for Christmas with the Professor doing the tree. When it's time to light up the tree, the lights initially turn on then start turning off and on again. By the time the girls go to bed, the Professor is still trying to get them to work properly.
* The Powerpuff Girls involved "The Ministry of Pain", a supervillain team that used to terrorize Townsville but are now mostly harmless because they've become old and feeble. They're still as evil as ever, though, and Blossom tells her sisters that they won't fight them because they're old. The Girls are forced to recruit the two retired superheroes Captain Justice and Lefty who fought the Ministry back during WW2, with the entire group of old people ending up hospitalized from minor injuries because their elderly bodies couldnt handle the strain.
* The Powerpuff Girls involves the head honcho of thing that go bump in the night, The Boogie Man, launching a giant disco ball into space to block out the sun so all the monsters can come out during the day and party ALL NIGHT LONG!
* The Powerpuff Girls involves The Mayor calling the Powerpuff Girls to open his pickle jar for him.
* The Powerpuff Girls Ironically, a monster attacked at that moment of the strike. The girls had to coach the town in defending themselves...and was responsible for pre-party cleanup afterwards.
* The Powerpuff Girls is a mastermind as she's the smartest, but her dominant and somewhat self-absorbed personality sometimes makes her come off as a headstrong leader.
* The Powerpuff Girls is a talented and intelligent scientist. As a dad to three superhero little girls, he's a well-intentioned if addled buffoon.
* The Powerpuff Girls, is cartoondom's equivalent of Metropolis, Gotham City and Marvel Universe New York rolled into one. You'd have to wonder why people want to live in a city where the criminals only take a break from their activities whenever they need to run away from the giant-sized monsters that are regularly rampaging the city.
* The Powerpuff Girls is Cathy Cavadini's only major animation role, though she's had supporting parts in other shows, games, and films.
* The Powerpuff Girls is known for delivering a lot of puns, but they're mostly said by the narrator.
* The Powerpuff Girls, is played as one even though she doesn't marry the Professor; however, her reign of terror is short-lived after the girls realize she is Sedusa after she steals the Mayor's jewels. They remove her disguise, then fight her; when the Professor appears, Sedusa uses the Ima voice without the disguise and the Professor gets the girls to phone the police.

* The Powerpuff Girls is possibly one of the kindest and most fatherly characters here- although in one episode he realises that pretty much everything good he ever invented was by accident, from the eponymous girls to Sloppy Joe's.
* The Powerpuff Girls: Issue #50 (DC run), "Deja View" puts the girls in Viletown, an alternate universe Townsville where their hero is the noble chimpanzee Jomo Momo (alternate Mojo Jojo). The girls are imprisoned by Jomo, who doubts their word that they are heroes in their world. Jomo tests them:
* The Powerpuff Girls is taken to a new level when it revealed early on (and mentioned several times afterward) that Mojo could actually be considered the girls' true father, since he was directly responsible for their creation.
* The Powerpuff Girls is that along with there being less action overall, when there are fight scenes, the Powerpuff Girls' punches are too slow and don't really have much impact.
* The Powerpuff Girls is this to a ridiculous extent, and arguably a deconstruction. Due to her being so spoiled, her father just gives her money so he won't have to put up with her behavior. Also, she has bad social skills, making it so difficult for her to make friends her age. The fact that she becomes a supervillain simply because the Powerpuff Girls rejected her desire to join their team (merely because she's jealous of their superpowers — something that she doesn't have), and even temporarily bribed her way into becoming mayor to legalize crime, doesn't help much.
* The Powerpuff Girls. It ended with them falling into a swimming pool.
* The Powerpuff Girls it would be. Keane and the Professor is one of the most popular pairings in the series.
* The Powerpuff Girls: "Keen On Keane" has the Professor and Ms. Keane on a date arranged secretly by the girls at a kids' pizza restaurant. The waiter, dressed in a dog costume, looks like he'd rather be dead.
* The Powerpuff Girls late in its run. It was unsurprisingly not well received, and it wasn't long before the show was cancelled.
* The Powerpuff Girls, led by Blossom, install an army of children to fight the alien menace—by eating them (episode "Beat Your Greens").
* The Powerpuff Girls, Lenny pays $ 17.99 for one of the items he bought for his collection.
* The Powerpuff Girls like Mojo Jojo and other one-shot villains. However, what he lacks superpowers he makes up for in cruelty and malice.
* The Powerpuff Girls. Many can speculate as to why, but it's probably no small part due to it being one of the few shows with G-rated ass-whooping on Cartoon Network at the time.
* The Powerpuff Girls, "Mask Scara," fly around giving horribly trashy makeovers to everyone in Townsville as well as some of the billboards. Not as uncanny when it's supposed to be funny, but still really, really ugly. In fact, according to her backstory, she used to be CEO of a cosmetics company that promoted a look like this, and it was a fad for a while, but she thought it would last more than it did, and after the fad became passé she was out of business.)
* The Powerpuff Girls mode, where she beat up a guy for stepping on a single blade of grass, and another guy for littering, before his wrapper touched the ground.
* The Powerpuff Girls, Mojo is trying to relax but is constantly being accused of random calamities by the girls. In one instance, he had been reading a mystery novel called "Blackmail" and predicts, having gotten to page 392 where Detective Winterbottom is about to make an announcement, the blackmailer of the story is the no-account cousin Amelie.
* The Powerpuff Girls, Mojo Jojo becomes enraged that an alien villain is destroying the city and doing so many of the evil things that he wanted to do. In the end, he ends up defeating the villain, but then hates it when the townspeople praise him for being a hero.
* The Powerpuff Girls: Mojo Jojo. He would always be the butt of jokes, and he never wins. But in real life, fans love him due to how funny he is. And let's not forget how he speaks. Being the villain who appears the most, he's obviously the one who takes the most damage.

* The Powerpuff Girls, Mojo Jojo once did a cooking sequence where he threw knives into the air and caught them after working on some food.
* The Powerpuff Girls", Mojo Jojo teaches the whole town to speak like he does. The simple, straightforward word is intentionally neglected in favor of over-eloquence. Example from the Mayor, calling about a bank robbery:
* The Powerpuff Girls, "Mojo's Day Off," had Mojo Jojo trying to relax but he is persistently interrupted by the girls who think he's responsible for some random evil in the city. In one segment, he's in an easy chair reading a murder mystery novel and comes to the part where the murderer is revealed when the girls crash through. Blossom, having read the novel herself, proceeds to spoil the denouncment.
* The Powerpuff Girls: "Monkey See, Doggie Do" showed a cop nodding off on late-night duty, muttering "Hands in the air" in his sleep.
* The Powerpuff Girls Movie, after Buttercup knocks out gorilla Rocko Socko, the Talking Dog appears and urinates on the gorilla's metal glove.
* The Powerpuff Girls Movie aired these commercials on practically every commercial break when the movie came out.
* The Powerpuff Girls Movie. Before becoming heroes, their game of tag renders Townsville asunder ("Bug-eyed Girls Destroy Townsville" reads the headline of the Townsville Times). Even when they attempt to do something good, they are seen as pariahs.
* The Powerpuff Girls Movie, Bubbles's crayon drawing of the Professor and the wanted poster of him and the girls, were the winners of a contest Cartoon Network held in conjunction with its production.
* The Powerpuff Girls Movie. Despite heavy promotion on Cartoon Network, it bombed at the box office. Home video and showings on Cartoon Network and Boomerang helped it gain a strong audience.
* The Powerpuff Girls Movie did with the rest of the budget is anyone's guess — it sure didn't go towards promoting the film.
* The Powerpuff Girls Movie: Giant Chemical X-fueled Mojo Jojo topples off a skyscraper and onto a puddle of Antidote X, returning him to his regular chimp size. The girls are about to take it as well, feeling that Townsville would like them better as normal little girls. Townsville votes otherwise.
* The Powerpuff Girls Movie, Hacha Chacha's plan for world domination involves littering the city with banana peels so people will slip on them.
* The Powerpuff Girls Movie in space. They end up fulfilling the trope more properly.
* The Powerpuff Girls Movie, Mojo Jojo takes the girls to the zoo where he has the girls strategically posed for pictures in front of monkey cages so he can fire special probes into their fur for his later plan to rule Townsville.
* The Powerpuff Girls Movie movies were also released this way as well.
* The Powerpuff Girls Movie of Professor Utonium being thrown in jail.
* The Powerpuff Girls Movie reserves its credits for the very last page.
* The Powerpuff Girls Movie that explains why the people of Townsville despised the girls at first and show Mojo Jojo as a legitimate threat rather than a comic foil.
* The Powerpuff Girls Movie, the girls are, upon their creation, obviously capable of furnishing their bedroom and making sandwiches. But they're not sure—or are oblivious—exactly as to what their powers entail, so their game of tag trashes the city. It's only after they become pariahs in the eyes of Townsville and when Mojo Jojo threatens the Professor do the girls realize what their powers are for and how to use them.
* The Powerpuff Girls Movie, the girls play a game of tag that ends up destroying much of Townsville. After they stop playing and realize what they have done, the camera pulls back to show the skyline in ruins, with the top one Space Needle-like tower breaking off and falling over.
* The Powerpuff Girls Movie, they warn of "non-stop frenetic animated action".
* The Powerpuff Girls Movie to keep them at bay that's much more effective.
* The Powerpuff Girls Movie wanted it to be PG-13. He and the studio compromised on a PG.
* The Powerpuff Girls Movie when hiding from their problems on an asteroid. They

try to ignore the screams of the Townsfolk, which their super-hearing allows them to hear through space (somehow). Ironically, at the time, the town was being attacked by hordes of evil simians.
* The Powerpuff Girls. Ms. Bellum believes the girls are innocent, so they break out of jail and battle their imposters. Of course they have to go back to jail for breaking out.
* The Powerpuff Girls. Naturally Santa rectifies this mistake, with some help from the PPG, of course.
* The Powerpuff Girls. Naturally, the aliens (and probably some viewers), were absolutely horrified by this.
* The Powerpuff Girls: Near the end of "Stray Bullet", Blossom and Buttercup's attempt at speaking Squirrel ends up gibberish:
* The Powerpuff Girls: "Not So Awesome Blossom" has the dad and sisters of said Powerpuff held hostage by Mojo Jojo, who will spare their lives if Blossom pledges her devotion and servitude to him. But, in contrast to earlier when she couldn't do anything right, Leader Girl has a trick or two up her sleeve.
* The Powerpuff Girls of all things, due to Ace of the Gangreen Gang temporarily replacing the band's bassist Murdoc.
* The Powerpuff Girls of Satan (except in the original script, in which he was directly Satan) with pincer hands in place of goat hooves.
* The Powerpuff Girls of the girls, having their "joy and the laughter". Don't think for a second, though, that she cannot be hardcore. Mojo Jojo learned that the hard way.
* The Powerpuff Girls: One of Him's riddles to the girls (episode "Him Diddle Riddle") is to pick which of two Ms. Keanes who are suspended over a vat of boiling acid is the real one. Blossom asks which of them would say was the real one, and each giving a different answer. Blossom instantly deduces through analysis which is real Ms. Keane (the one who said "She would say she was the real Ms. Keane," but Blossom actually chose the other. She was so confident and convincing that Him gave it to her anyway.)
* The Powerpuff Girls on Fuzzy for her meat hair, there's a bit where Fuzzy is walking cheerfully down the sidewalk and gets tripped by Bubbles.
* The Powerpuff Girls on his face when he saw a picture of Bubbles shooting out her heat vision is priceless.
* The Powerpuff Girls, only for Buttercup to shoot her down by saying "Not that Koos jerk!"
* The Powerpuff Girls. On two different occasions, she's tried to seduce Professor Utonium and the Mayor of Townsville. Almost literally in her third appearance as the animators added fangs to her teeth.
* The Powerpuff Girls our carrot-topped little champion feels that she can't do anything right, runs away from home, and eventually gets a job at a place called Hot Dog On A Skewer. The customers obviously see Blossom as inept in that job as she, being the only employee seen, cannot do three things at once (the capper having her throw a mustard bottle to the ground in disgust and having it squirt in her face).
* The Powerpuff Girls ousted from office by Fuzzy Lumpkins. He beats him in a wrestling match to regain control. Granted, this was Fuzzy's idea.
* The Powerpuff Girls, Past!Utonium randomly mixed chemicals while goofing around in science class and accidentally set the school on fire.
* The Powerpuff Girls pilot "Meat Fuzzy Lumpkins" has Bubbles going postal on Fuzzy after his meat gun turns one of her pigtails into a chicken leg.
* The Powerpuff Girls play a Scrabble-type game in "Super Scramble" (DC issue #64). The words they create are types of monsters that Him manifests as threats to Townsville.
* The Powerpuff Girls "Power-Noia", but she eventually overcomes this.
* The Powerpuff Girls, "Power Picnic," features a family of giant one-eyed alien chickens who arrive on Earth in their flying saucer which is (what else?) an egg.
* The Powerpuff Girls. PPG animation director Randy Myers explained tongue-in-cheek that the staff was simply burning off what they called their "jump the shark"

scripts just to meet series quota.
* The Powerpuff Girls presents the up to the minute time. This reminds the Professor he forgot to set the clocks back, so he can sends the girls back out to save the day.
* The Powerpuff Girls = pretty stupid. All three combined just led to a normal beatdown.
* The Powerpuff Girls: Princess Morbucks bribes the Mayor of Townsville to give her his job. He turns down $1 trillion, then $5 trillion, but accepts a roomful of Turkish Delight candy.
* The Powerpuff Girls product received mixed reviews and made less money than any other movie of its year.
* The Powerpuff Girls) removed the color from the traffic lights. In "Him Diddle Diddle," they had to save another school bus from falling off a cliff.
* The Powerpuff Girls repeatedly describes the foiling of his plan from "Monkey See, Doggie Do" as "The dogs, the biting, the dropping."
* The Powerpuff Girls revival episode "Somewhere Over The Swingset" had the girls entering an alternate world Townsville where everything is 50's sitcom perfect and every line is met with canned laughter/reactions. The girls even want to know where the laughter is coming from.
* The Powerpuff Girls Rule! fixes the entire world to become a utopia, he and the girls make up to one another for their past quarrels. While saying goodbye, he briefly tickles them as they leave.
* The Powerpuff Girls ruler who makes the world a much better place to live. However, after fixing all of the world's problems, he has nothing left to do but just sit at a desk all day in total silence. Finding this far too boring, he promptly returns to his usual villainy.
* The Powerpuff Girls Rule They also appear in Blossom's dystopic vision under her rule.
* The Powerpuff Girls saw its final comic book appearance under DC Comics in July of 2009 in issue #59 of Cartoon Network Block Party (its final issue as a singular title was issue #70 in January 2007). IDW revived it in September 2013.
* The Powerpuff Girls: Sedusa once traded clothes with Miss Bellum and claimed to have captured "Sedusa" to trick the girls, who fortunately didn't believe Ms. Bellum would single-handedly defeat Sedusa. Ironically, the real Ms. Bellum shows that she can still at least take on Sedusa long enough to figure out how to free the girls from her trap.
* The Powerpuff Girls Sedusa Tries to take up a 50's housewife disguise and uses the name "Imma Goodlady" in an attempt to woo the professor and infiltrate the girl's family
* The Powerpuff Girls, seeing as she represents the Spice aspect of Professor Utonium's original recipe.
* The Powerpuff Girls set up a date between the Professor and their kindergarten teacher in "Keen On Keane."
* The Powerpuff Girls set up their dad (Professor Utonium) on a blind date with their teacher (Ms. Keane) in " Keen on Keane."
* The Powerpuff Girls, she's the only one not posing, instead looking grumpy and having her mouth washed with soap.
* The Powerpuff Girls She struggles to say it the first time though it's still enough to get his attention and she's able to much better apologize to him.
* The Powerpuff Girls shows would be produced under the Cartoon Network Studios name.
* The Powerpuff Girls show them fighting with each other, then making up. The best example is an episode where after arguing the whole time, Blossom and Buttercup unite to save Bubbles (after sharing a friendly smile).
* The Powerpuff Girls's of pairing the Powerpuff Girls with the Rowdyruff Boys, but they have more than their fair share of fans.
* The Powerpuff Girls' Spear Counterparts, the Rowdy Ruff Boys, are another rare male example. Skirts and hair ribbons become pants, shorts, hats and ponytails between the two genders.

* The Powerpuff Girls special "Dance Pantsed", after the girls get a hot new dancing game, Mojo Jojo sends them a fake sequel that turns them into evil cyborgs. This being Mojo, he also outlined his plan on the back, which is how the Professor finds out what happened when the Girls are gone.
* The Powerpuff Girls special "Twas The Fight Before Christmas", Princess tampers with Santa's naughty and nice lists so he would grant her wish to be a Powerpuff Girl for Christmas. He ends up removing her flight suit when he realizes he's been tricked, causing Buttercup to comment that she didn't know that he could give kids superpowers. Santa replied that no one had ever asked him before.
* The Powerpuff Girls speech that cheeses Blossom off enough for a fight.
* The Powerpuff Girls spores that left all the adults incapacitated, leaving the girls and the kids to confront the green threat. As part of their vegetable motif, the broccoli king rides a carrot-shaped mount.
* The Powerpuff Girls story "Big Bubbles' Blues" (issue #61, DC run). Earlier on in "Blowing Bubbles" (issue #9), the sugar in Bubbles' gum and the Chemical X in her bloodstream cause her to grow as well and giving her the adhesive properties of bubble gum.
* The Powerpuff Girls story "Drama-O-Rama" (DC, issue #48) has Sedusa staging a reality TV show in Townsville so she can rob the city blind while everyone hams it up for the cameras. A bank of TV monitors shows a number of Townsville notables doing their thing for the cameras; Charlie Chaplin is on one of the monitors.
* The Powerpuff Girls story "Drama-O-Rama" (DC issue #48), Sedusa stages a reality TV show in Townsville, knowing that everyone will be so busy hamming it up for the cameras that she'll be able to rob the city blind. The Powerpuff Girls are not immune—Blossom proudly announces that she is a drama queen, although she gets pre-empted by Bubbles and her crying.
* The Powerpuff Girls story "Everything Must Go" (DC issue #44) has Mojo Jojo holding a yard sale of all his weaponry. The girls start answering calls to calamaties caused by people not knowing how to properly use the weapons they bought. They confront Mojo about it, but he's merely conducting a yard sale under the "supply and demand" dichotomy. It's not his fault people are misusing the stuff.
* The Powerpuff Girls story "I Green Of Genie" gets superpowers from a girl genie (from a magic lamp they find in a dump) which they use to overcome the girls. It looks like the girls are finished until Big Billy, who was sad because his power was being overly stinky, wishes things were back to normal.
* The Powerpuff Girls story "Micro Managing" (DC run, issue #68), Blossom recruits Mojo Jojo to help her defeat the Micro-Puffs, who have brainwashed Bubbles and Buttercup into thinking they're the leader of the team. It ends with Blossom and Mojo shaking hands in the pulsating hearts panel.
* The Powerpuff Girls story "Micro Managing" (issue #68) had the Micro Puffs (tiny, mischievous sprite avatars of the girls) brainwashing Bubbles and Buttercup in their sleep into thinking that each other is the leader of the Powerpuffs. It doesn't work when Micro-Blossom tries it on real Blossom, since she's already the leader. When this argument of power control interferes with crime fighting, Blossom seeks Mojo Jojo's assistance.
* The Powerpuff Girls story "Monkey Business," Townsville is enjoying a bowl of chili at Mojo Jojo's restaurant. Blossom causes a panic when she mistakes everyone farting for a gas leak.
* The Powerpuff Girls story "No Business Like Snow Business" (issue #39, August, 2003) has Mojo Jojo creating snow in the summertime after cornering the market on winter goods.
* The Powerpuff Girls story "Pizza My Heart," Buttercup has an obsession with garlic. It manifests itself so hard that during a fight with Mojo Jojo, she starts seeing everybody as cloves of garlic. She sees the Mayor's sash as a slice of garlic pizza and tries to eat it.
* The Powerpuff Girls story "Pizza My Heart" (DC run issue #39). She puts copious amounts of garlic on practically everything she eats, causing her breath to make everyone in Townsville—even the monsters—reel in disgust.

* The Powerpuff Girls story "Powerpuff Picasso" (issue #15), the picture Bubbles drew at school is noticed and hailed by an art critic and put on exhibit at the museum. At the end, after numerous attempts to do so, Bubbles explains to everyone that the picture was upside down. Upon turning it right way up, the picture is passed off as bland and uninteresting.
* The Powerpuff Girls story "Smart And Smarter" (Cartoon Network Block Party #59). She's facing off against Mojo Jojo, who uses his heat ray to counter Blossom's ice breath. Blossom then produces static electricity from her hands, not noticing that the trail of melted ice had trickled to her foot which subsequently electrocutes her. The end panel has her burnt to a crisp and rather befuddled.
* The Powerpuff Girls story "The Trouble With Bubbles" (DC issue #18), the girls do a group hug after defeating the monster lucha libre butterfly.
* The Powerpuff Girls story "The Trouble With Bubbles" (issue #18, October 2001) had Bubbles running away from home after being scorned upon for missing her cue in a battle against a monster caterpillar with a wrestling motif. The caterpillar turns into a butterfly and proceeds to mop the floor with Blossom and Buttercup. Bubbles returns home to retrieve her toy Octi and sees her sisters getting pummeled. Feeling she's needed (the Mayor even says without Bubbles, her sisters and Townsville are doomed), she flies off to the rescue, with the news reporter stating the only hope left is "that wrestling is fake."
* The Powerpuff Girls: Subverted when Mojo Jojo whispers a plan to defeat an alien invader. Although it initially works, its eventual failure leads to him having a break down that fuels an unstoppable beatdown of rage against the enemy.
* The Powerpuff Girls supposedly wrote the "City of Clipsville" episode, which featured one "skit" with the Girls as teenagers dating the Rowdyruff Boys, because he didn't like how overused the plot was becoming in fanfics and wanted to show how absurd it was. The episode actually became one of the most popular in the show's run.
* The Powerpuff Girls': Taken to ridiculous lengths in an episode where a rivaling villain reanimates a mammoth (which appears as comically large as any city-destroying monster) to cause destruction in Townsville. To stop it, Mojo Jojo instructs the girls to leave a large hunk of cheese to attract the town's mice and scare the mammoth off. And you know what? It works!
* The Powerpuff Girls Tess for this live appearance and cannot defend herself or fight the monster. When the girls renounce their fandom of Tess, the Professor gives them a little lesson in what really matters.
* The Powerpuff Girls thanks to the Professor's latest invention gone wrong.
* The Powerpuff Girls that attack Townsville from time to time. Turns out they do it for the honor of fighting the Girls.
* The Powerpuff Girls) that should be continued on the next girl, and she's taller than many of the villains on the show.
* The Powerpuff Girls that the real reason the episode got banned was because of what the network perceived as religious imagery — they claimed the metal beams in the destroyed buildings looked too much like crosses, and one of the hippies looked like Jesus. However, the episode can be seen on the complete series DVD set for the show, as well as on digital download and some streaming services (HBO Max doesn't have the episode).
* The Powerpuff Girls that THOUSANDS OF INNOCENT PEOPLE ARE DEAD, but the few times that the actual damage is addressed, only the damage to property is mentioned, often by an official. In the latter case, it is all but stated that lots of people died, and the show does often show people and monsters dying.
* The Powerpuff Girls: The 2016 episode "Fashion Forward" has the criminal duo the Fashionistas marketing a new bandanna. The Professor forbids the girls from having one, but Blossom secretly does. When she puts it on, she falls under the Fashionistas' hypnotic control.
* The Powerpuff Girls, the class hamster gets flushed down by Mitch, the schoolyard bully. In the sewer, the hamster gets exposed to chemical waste and comes back a mutated monster out for revenge.
* The Powerpuff Girls, the decrepitly old Captain Righteous and Lefty are brought

out of retirement because of their reputation in the past of being the only ones able to stop the Ministry of Pain. The Ministry themselves are also decrepitly old and have gone senile. They could have easily been stopped by the Powerpuffs, though Blossom insists that Righteous and Lefty be allowed to do it because the girls needed to respect their elders.
* The Powerpuff Girls The designs used were heavily based on unused redesigns that Craig made early in the show's development, in response to test audiences had a very negative response to the characters.
* The Powerpuff Girls; the episode "Best Rainy Day Adventure Ever" is actually considered by fans one of the best PPG episodes ever.
* The Powerpuff Girls: The episode "Meet the Beat-Alls" has the girls being easily defeated by the villains by simply getting zapped by lasers and crushed by a rock; despite all this, they suffer no fatal accidents and come out completely undamaged.
* The Powerpuff Girls", The Gangreen Gang tricks Blossom and Bubbles into going on a conveyer belt, where Snake drops old cars on them and crushes them into cubes. This results in Blossom and Bubbles being encased in the cubes with only their heads sticking out, and they remain this way for the rest of the episode, even when Buttercup apologizes and hugs them at the end. It's not explained how they were freed from the cubes afterwards.
* The Powerpuff Girls, the girls becoming as bad as the villains they fight over a candy addiction.
* The Powerpuff Girls the Girls if they don't use his Dynamo invention to stop the Giant Fish Balloon Monster; they reluctantly obey him, destroying the Giant Blowfish Monster and damaging most of Townsville in the process.
* The Powerpuff Girls, the girls' ill-fated attempted at making a new sister. Same dress design, has a B name, and like the others has her own design color... but is also mentally handicapped and is very physically deformed.
* The Powerpuff Girls. The girls left them sunscreen, but just like everyone else, they deem it to be "for nerds" and prefer to burn in the sun.
* The Powerpuff Girls, the Girls mostly just take on different monsters.
* The Powerpuff Girls) the good Professor (and everyone else) to dine. Of course, this leads to everyone else eating quickly while a nervous Utonium eats as slowly as humanly possible.
* The Powerpuff Girls: "The Mane Event" had Bubbles and Buttercup accidentally ripping off a tuft of Blossom's hair from the back. In trying to fix it, they wind up lopping off Blossom's hair almost completely.
* The Powerpuff Girls, the Mayor decided that he was relying on the girls too much and took matters into his own hands by patrolling the city in a hot-air balloon and punishing any criminal he sees with a spring-loaded boxing glove. Unfortunately, his behavior soon devolved into this trope, forcing the girls to set him straight.
* The Powerpuff Girls, The Mayor is startled awake and shouts, "My life is a lie!"
* The Powerpuff Girls, then his beautiful new neighbour. He freezes on stuttering "I, I, I" until the girls come to his rescue.
* The Powerpuff Girls: The opening of "The Bride Of Mojo Jojo" (issue #24, DC run) has Mojo, not wanting to be a party of one for Valentine's Day, going to a video dating service. Needless to say, he is not successful.
* The Powerpuff Girls (the original one from 1998) was always rated TV-Y7 for fantasy violence (FV). When the DVD of the original series came out, it was branded "PG" for the inclusion of the Whoopass Girls short.
* The Powerpuff Girls the Professor invented a thing called Beebo that ate everyone because it thought it had too.
* The Powerpuff Girls the Professor sets up a curfew for the girls as they have to be in bed by 7:30 PM. When he watches the news it all features Townsville being attacked by everything the girls would handle but tries to ignore all of it because of the curfew. Only when he sees a channel reporting Daylight Savings Time ending and noticing he forgot to set the clocks back does he finally get the message and let them save Townsville.
* The Powerpuff Girls the real Mojo suggests this to Bubbles before she declines, going on a long speech in a manner similar to himself. Keep in mind she refused not

because he's evil, but because she thinks she's the real Mojo.
* The Powerpuff Girls The Smith family do this with their mini-van-turned-supervillain-mobile chasing the girls and the professor throughout the Utonium house.
* The Powerpuff Girls. The theme song says she is "the joy and the laughter". The burglar robbing the Utonium home in "Burglar Alarmed" even calls Bubbles a cutie upon seeing a photo of her.
* The Powerpuff Girls, the titular characters and Princess Morbucks have both spent time in a jail for adult males despite them being little girls.
* The Powerpuff Girls, the titular girls are five year olds (physically, chronologically they're younger) who regularly fight villains and save their city.
* The Powerpuff Girls the titular girls lose their powers if they come in contact with Antidote X.
* The Powerpuff Girls. They can defeat a muscular and super-intelligent talking monkey, several large criminals, the finest in technology and human advances that money could buy, an extremely muscular (and kinda fat) pink hillbilly monster who's only truly terrifying when he actually does flex his muscles, several giant robots, monsters, genetic mutations, and even Satan himself. Keep in mind that we're talking about three kindergarten girls.
* The Powerpuff Girls. They have no secret identities and everyone knows where they live. They could have been de facto identities in the episode "Super Zeroes", where they assume the persona of their own pseudo-superheroes (Blossom as Liberty Belle, Bubbles as Harmony Bunny, and Buttercup as Mange).
* The Powerpuff Girls, thinking he's being fired because the Chief wants to downsize because of them. After trying and failing to get rid of them (and his plan foiled by more honest cops) he claims this was a story of a "good cop gone bad", But as Blossom puts it:
* The Powerpuff Girls, this explicitly comes up in "Members Only". The girls are not allowed to join the Association of World Super Men because they're girls despite besting the heroes at all the initiation tests. "Mascumax" then pummels the heroes, but the girls defeat him. He leaves crying that he lost to little girls. The association members state that the girls are now their heroes.
* The Powerpuff Girls, this happens in the episode "Telephonies" when Mojo Jojo, Him and Fuzzy Lumpkins beat up The Gangreen Gang, resulting into one of these.
* The Powerpuff Girls: This happens to the Professor in the episode "Shotgun Wedding". After being chased by Fuzzy Lumpkins, Professor falls into Fuzzy's home covered in mud and a vase of flowers and set of curtains fall on him leaving him looking like a female of Fuzzy's species.
* The Powerpuff Girls this is subverted, except for one cop named Mike Brikowski, who, after being fired, manages to get Blossom, Bubbles, and Buttercup in a trap made of an air tank filled with knockout gas, a crane, reinforced chains (made by Mojo Jojo), and a vat of acid within the police impound. His own fellow officers bust him.
* The Powerpuff Girls to a football game in "Anything Boys Can Do, Squirrels Can Do Better" (Cartoon Network Action Pack #1). After Bubbles is sidelined following a rather vicious hit from the Rowdyruffs, Twitchy (the squirrel Bubbles rescued in "Squirrely Burly") fills in and runs rings around the boys.
* The Powerpuff Girls to be made into issue #50 of the PPG comic book.
* The Powerpuff Girls to do with the bullying, and proceeds to rampage through Townsville.
* The Powerpuff Girls to punishing imagined crimes to finally even outright destroying Townsville in an attempt to save it.
* The Powerpuff Girls trying to beat him, and was probably glad for the excuse to go.
* The Powerpuff Girls turn the girls into dogs, thus preventing them from biting his butt (now protected by a metal plate, one would think that doing either of those things cancels out the usefulness of doing the other, but whatever) and making him break the magic idol he was using, they weren't very good precautions. He forgot that, since the girls aren't transformed, they can foil his plans in the

same way they foil all his plans; by beating him up.
* The Powerpuff Girls, underlighting was used for the streaks the girls left behind as they fly away, and for when they use their heat vision.
* The Powerpuff Girls until the Professor created the girls and they became its resident superheroes.
* The Powerpuff Girls (usually the leader Blossom) call out group attacks like Acrobattack, Cherry Bomb, and Furious Flaming Feline, obviously so the others know what attack they're using.
* The Powerpuff Girls variant, by having the girls speed up time and give up fighting crime to become air-headed teens, as have the Rowdyruff Boys.
* The Powerpuff Girls was affected. It really hits when the girls went to see the Professor; imagine all the love a parent has for their children magically swapped with hate.
* The Powerpuff Girls was a huge fan of the Powerpuffs who was jealous that they wouldn't let her join their group. She responded by using her money to get her own suit built with the same powers and became a super-villain dedicated to defeating the Powerpuff Girls. She's been a pretty formidable opponent in some episodes.
* The Powerpuff Girls was a large floating sphere completely covered in eyes. It could also shoot lasers from any of them. Hence, it effectively shut the girls down in combat as any attempt they made to get close resulted in the monster spotting her and zapping her. Conveniently, Blossom's poorly-cut hair made the monster laugh so hard, it shut all of its eyes, allowing Bubbles and Buttercup to damage it.
* The Powerpuff Girls) was loosely adapted into the episode "Neighbor Hood".
* The Powerpuff Girls was put on sale the same day as the movie release (July 3, 2002). An unmade episode, "Deja View", was published as issue #50 of the comic.
* The Powerpuff Girls was recorded in Burbank in front of a live studio audience," with canned laughter and applause over it.
* The Powerpuff Girls was to have an alternate reality episode, "Deja View," half of which was supposed to be in CGI, but it went over budget and was facing a tight deadline. The original story outline was given to DC Comics for issue #50 of the PPG comic book. It had the girls sucked into a vortex and winding up in Townsville's alternate counterpart Viletown and the girls' alternate counterparts, the Powerpunk Girls rending Townsville asunder.
* The Powerpuff Girls website for some time, which uses the phrase "Girl Power!" whenever the girls have the upper hand.
* The Powerpuff Girls we get to see a septic tank truck that reads "Bob's Septic World - We're full of it!"
* The Powerpuff Girls (well, in the show and anime at least, the comic may avert this).
* The Powerpuff Girls were created by Professor Utonium with "Sugar and Spice and Everything Nice" mixed into a vat; when he accidentally spilled in Chemical X.
* The Powerpuff Girls were flying all over the place in this one…
* The Powerpuff Girls were made from Sugar, Spice and Everything Nice. And a bottle of Chemical X.
* The Powerpuff Girls. When a villain uses the old "Prepare to meet your maker!" line, they retort "You leave the Professor out of this!".
* The Powerpuff Girls when Big Billy bludgeons him with some paintings, putting his head on a horse, a snake, and a fat lady.
* The Powerpuff Girls. When Fuzzy breaks a string on his banjo, he concedes defeat to Blossom and leaves the golf course with his house.
* The Powerpuff Girls when he has to babysit them. He professes to be "the best chef in Townsville", yet despite amazing the girls with knife-based stunts, they hate his food.
* The Powerpuff Girls when he's threatening the girls, even in scenes where they're not outside and there can't be any wind.
* The Powerpuff Girls: When Mojo Jojo starts teaching a linguistics class, he hears everyone and tells them that based on what he's already heard he isn't impressed.
* The Powerpuff Girls when the girls confess to letting the professor sleep walk when they thought that the Mayor and Townsville police department had killed the

professor, because they loved the toys so much.
* The Powerpuff Girls, where a little girl pushes Mojo, causing him to drop his ice cream cone. He's about to flip out until the melting ice cream helps him break his writer's block and come up with a new plan to fight the girls.
* The Powerpuff Girls, where despite being uninterested in academics, she's smart enough to be in advanced math classes with minimal effort.
* The Powerpuff Girls where the whole world has gone to "Heck". The girls unleash a full assault, only for Him to pop back up and ask if they're finished.
* The Powerpuff Girls where three criminals get out of prison thanks to three conveniently placed man-sized Powerpuff Girl disguises within the jail cell. "This is going to be harder than I thought."
* The Powerpuff Girls which lead them to believe that everyone in Townsville is plotting to kill them.
* The Powerpuff Girls which used pulsating hearts (the standard ending title card for each episode). Also, Blossom's ponytail barrette brandishes a heart on it.
* The Powerpuff Girls which was aired outside the United States), the franchise is actually 20 years old since it was introduced on November 18, 1998.
* The Powerpuff Girls. While all the girls are the same age, Bubbles acts the youngest.
* The Powerpuff Girls, who almost never gets mad. Blossom is somewhere between them personality-wise, but she also is the most intelligent one.
* The Powerpuff Girls who, as we have established above, has a high-pitched nasally voice. Mojo Jojo is voiced by Enrique Cervantes, who has a very deep and energetic voice unlike the deep but lower voice of the original language.
* The Powerpuff Girls, who normally speaks in a creepy falsetto voice. But when he gets serious/angry/just wants to be extra dramatic, his voice goes from high-pitched to really deep and growly.
* The Powerpuff Girls, who tries to play a CD on an old-fashioned record player (and proceeds to mistake the horrible scratching noises that ensue for "techno music").
* The Powerpuff Girls. Why? She was protecting a butterfly from getting its wings wet from the water of a busted fire hydrant. Bubbles is dressed down for it that hurts her feelings so much she runs away from home.
* The Powerpuff Girls with Boomer (the dumbest of the The Rowdyruff Boys) and thinks he's cute.
* The Powerpuff Girls with brain-breakingly bad physics had them going so fast that relativity started working backward and they ended up in the future. Then they somehow got back by going just as fast in the other direction.
* The Powerpuff Girls with every other recurring villain in the series.
* The Powerpuff Girls with the announcer entreating us to not miss the next episode to see what happens. After an ersatz commercial with the Mayor and Miss Bellum, the episode continues.
* The Powerpuff Girls, with various characters from other CN shows watching the three girls fly with anticipation, the clips ending with #CNPPG.
* The Powerpuff Girls work puts a strain on their friendship with their new neighbor Robyn. Their conversation at the end of the episode illustrates the trope almost better than Lovelace's poem:
* The Powerpuff Girls (yes, even the Villains of the Week) fighting to the get the Key to the World. The girls try to stop them, but once they get the key they become mad with power and start planning what they would do if each of them ruled the world and start fighting for the key themselves.
* The Power Rangers are all used to sitting together, so when Tommy and Katherine are on a date in one episode of
* The Power Room in Cloudrunner Fortress is filled with gas until you place the three Power Gems on their pedestals. At least you can leave if you need to.
* The powers of Alchemy and its derivative Psynergy, which were secrets kept by the Adepts in
* The powers of Chaos are almost always referred to by their fearsome and elaborate titles and monikers in lieu of their actual names, as people are rarely

comfortable with carelessly invoking the names of beings like them.
* The Powers of Harmony ability granted to her by the Element of Laughter, she goes out of her way to put it to good use.
* The Powers of Harmony: Each Element of Harmony has a particular color attached to it:
* The Powers of Harmony: Each Element of Harmony has been attributed to a natural element:
* The Powers of Harmony has the War of the Sun and Moon, the conflict between Celestia and Nightmare Moon, which in this story is presented as having lasted several years. There are a few flashbacks to it, but for the most part it's offscreen.
* The Powers of Harmony, he can break the barrier over the Gate of Tartarus whenever he wants. Such a thing will obviously kill him, but he uses it as an ultimatum to control Blair and the other Echoes.
* The Powers of Harmony Io and planting evidence that made each side think the other was responsible. Celestia and Luna eventually exposed the truth, but the war has left deep distrust between the two types of dragons ever since.
* The Powers of Harmony likewise has this as one of the abilities granted to the Bearer of Magic.
* The Powers of Harmony) — Ophiuchus and Cetus are also the names of constellations (the Snake and the Whale, respectfully) considered in some circles to be the unofficial thirteenth and fourteenth Zodiac symbols.
* The Powers of Harmony: One of the abilities of the Element of Laughter is to invoke this trope to the bearer's advantage or that of their allies. Inversely, it can also be used to cause your enemies bad luck.
* The Powers of Harmony rather than waste energy fighting her for control (as long as she stays the dominant party).
* The Powers of Harmony. Shining actually points out that everyone else will be upset with them, but Luna views it as a necessary evil.
* The Powers of Harmony: Twilight of course, thanks to her intellect combined with the combat training she receives from her Guards.
* The Powers of Harmony, Twilight Pulls an interesting take on this. The alarm goes off, so she throws it out the window hard enough for it to fly for hundreds of yards. It hits one of her bodyguards.
* The Powers of Harmony... until she realizes it's corrupting her and fights it, which causes her to pass out.
* The Powers of Harmony went on hiatus for two years due to various issues in the author's real life. The first chapter posted after the hiatus ended has Rainbow Dash, whose group is waiting to meet the dragon lord Bahamut, complain how it feels like they've been waiting for years.
* The Powers of Harmony. With the rest of the heroes on the run, the two of them are thus free to carry out their plans without suspicion.
* The Powers of Pain: Were split up in WWE in 1990, briefly reunited in WCW in 1995-1996.
* The powers of the Mangekyo Sharingan have a drawback that they blind the user and take an assload of chakra to use. The latter doesn't affect Sasuke as much as it affects Itachi, who with his low chakra reserves can only use the MS three times a day if he doesn't want to die. Only way to get rid of the drawback is an MS transplant, which gives the user the Eternal Mangekyo Sharingan-which only Sasuke and Madara have. Itachi doesn't have the drawback as an Edo Tensei due to unlimited chakra and regeneration.
* The powers of the Valkyria and their ragnite lances take on the same strategic importance as weapons of mass destruction such as the atomic bomb did in World War II, with the major powers racing to obtain them first in order to gain an overwhelming advantage.
* the powers that be actually realize the importance of letting that music play, specifically rebroadcast it across the world, including using mobile vehicles to get the sound out to third world countries and to the non-human life on the planet, and in the end, it's insinuated humanity will be just fine. Even those who are too

old/decide not to mutate will live... indoors and underground.
* The powers that be at Mattel must have a short memory due to how many
* The power strip that serves as the central station shows Radio Shack's stylized "R" at every outlet.
* The Power, Tatiana doesn't need two male bodyguards who most women could probably overpower on their own, but they do make for nice eye-candy.
* The Power That Preserves series) Lord Foul's army of monsters does this to Revelstone.
* The Power That's Inside calls this out when Ash mentions he doesn't want to be the one to save the world as it always ends up in a near-death experience for him. Pikachu ends up being the Chosen One.
* The Power the chemical could so drastically alter the biology of cisgender female humans—and also some intersex males—is neither explained nor particularly relevant to the plot. However, it is theorized this might have just activated dormant genes too.
* The Power: The segment of the story set in Saudi Arabia mentions that women there aren't even allowed to drive. This law was repealed in 2017, a year after the book came out
* the power to alter reality at will, generally in limited areas or in ways relating to their attunement.
* the power to make any woman fall in love with him that looked him in the eye. Now he cannot go out in public without getting accosted by girls and women, and even wearing sunglasses only has limited success in keeping them away.
* The power tool manufacturer Stihl, knowing the reputation of their most famous product, made
* The power vacuum in India following Subhas Bose's takeover and subsequent death results in several of his lieutenants fighting to take his place, while also dealing with uprisings by the Sikh population, loyalists of the ousted Prime Minister Nehru, and the Communist Party of India.
* The Power violent, inherently nurturing etc. or a patriarchy ever existed, as it takes place in a future matriarchy.
* The Power Vision talent allows espers with osmoses to see if a person has power points and, if so, roughly how many.
* The Pozo-Seco Singers were a Texas country-folk trio with a couple of minor hits in the 1960s. After they broke up, group member
* The PPC Headquarters. It is unclear whether it is just a confusing maze of a building or whether it can actually move around, but thanks to the Laws of Comedy, one of the only ways to find the place you are trying to go is to distract yourself and not think about it. However, it "was" built by alien plants, and they seem to be able to navigate it just fine.
* The practical difficulty with cloning Jesus of Nazareth - even if the technology was advanced enough to do this - would lie in getting a tissue sample allowing DNA to be retrieved. However,
* The practical gift could also be a cry for help from one partner or team member to another.
* The practical gift could also be a subtle dig if the giver is a bit of a
* the Practical Incarnation and the Paranoid Incarnation, it's unlikely that the Nameless One would be able to achieve his goal at all.
* The Practical Incarnation was a good enough liar to fool an oracle, repeatedly.
* The Practical Princess and Other Liberated Fairy Tales, he returns claiming to have done them, her practicality tells her that he's lying and how to prove it.
* The Practical Princess and Other Liberating Fairy Tales, the title character and three other knights went off to rescue the emperor's daughter from Brasilgore the Enchanter. Somewhere along the way, they rescued a girl named Victoria from a castle guarded by a giant. She was, of course, later revealed to be the emperor's daughter. When Philbert asked why she didn't happen to mention that Brasilgore the Enchanter was a giant she said "You didn't ask me."
* The Practice, a client in one case is a small-time thief who accidentally killed a man by hitting over the head too hard while trying to mug him. The victim

happened to be a rabbi. The client was petrified with fear that he'd be charged with a hate crime and didn't seem to be able to understand that the homicide charge was much more serious.
* The Practice: After Lindsay Dole's murder conviction had been overturned, she decided to start her own legal practice instead of resume her work at Donnell, Young, Dole and Frutt. Later on, Bobby Donnell left the firm to start another practice and the firm was renamed Young, Frutt and Berlutti. Later on, when Alan Shore and Sally Heep were fired from Young, Frutt and Berlutti, Sally suggested to Alan the idea of starting their own practice but he rejected the idea. After Alan's successful lawsuit for wrongful termination of employment, Jimmy left the firm to start a new practice.
* The practice also suits underground rappers who manage to produce music videos. Prime examples are Madvillain's
* The Practice, a man kills his wife. His son, trying to protect him, claims he attacked his dad and the gun went off accidentally. When the man is acquitted, the DA has the son arrested for felony murder. The dad then confesses to the killing but is protected by double jeopardy, so the judge puts them both away for 20 years for perjury.
* The Practice between characters Helen Gamble (played by Lara Flynn Boyle) and Richard Bay(played by Jason Kravits), who received the kiss from her.
* The Practice, Bobby discovers that his and Lindsay's last client, a murderer acquitted on a technicality, was in cahoots with the cop who arrested him. He can't rat out his own client, so he leaves a message for Lindsay, "forgetting" that her roommate DA Helen Gamble always checks the messages first. He then argues that he never intended to convey this information to Helen and she shouldn't be allowed to act on it, knowing the judge will rule against him.
* The Practice dealt with a man who shot and killed his adulterous wife and her long-term lover. Eventually his lawyers find out that he's the son of a Croatian diplomat and therefore has immunity. Deconstructed in that, while the judge does resentfully dismiss the case, the murderer is immediately escorted out of the courthouse by Federal agents and put on the first plane to Croatia.
* The Practice, especially the ones who either committed vigilante killings or were insane at the time of their crimes (basically, on this show, the more sympathetic and/or innocent a defendant was, the more likely they were to be found guilty).
* The Practice example is generally a subversion as the witness they accuse is almost never guilty and the tactic is really just a ploy to create reasonable doubt for clients that they know ARE guilty.
* The Practice had an episode involving a case about this. It was very vague about whether or not they actually had sex and who was the aggressor was, which was part of what the case hinged on. In the end, it showed the mother sleeping peacefully and the son watching her, implying he was in love with her.
* The Practice has an episode that is presented from the camera of a documentary film crew as the cast struggles to get a death sentence overturned for a client.
* The Practice have no shortage of easy-on-the-eyes characters. (Neither do any of his non-legal shows, for that matter.)
* The Practice have this reputation among other lawyers due to their somewhat sleazy tactics and their willingness to represent (often successfully) clients with fairly shaky claims, e.g. suing a carnival clown for fat shaming. They're a much more sympathetic version than usual, and one of them says that, while their nuisance lawsuits may seem frivolous or silly, they matter to the people who file them.
* The Practice in "Burnout" by a man who drugged her after taking a case where a young woman alleged not being hired as a result of being a rape victim. At first she claims to have gotten over it, but later breaks down in conversation with Lucy, who counsels rape victims.
* The Practice in context, but even with him it's more a matter of method, as deep down he cares as well.
* The Practice: In one episode, a company hires Lindsay to represent them when a potential customer sues them for discriminating against Arabs. Lindsay and the

plaintiff find themselves alone in an elevator and remain silent. Justified because she's not supposed to have any conversations with the plaintiff without the latter's lawyer being present.
* The Practice: In "The Cradle Will Rock", DA Walsh has this exchange with a female lawyer:
* The Practice, in which Bobby Donnell is so exhausted due to lack of sleep that he can barely stay awake in the courtroom. Opposing counsel says something ridiculous that the judge (and by this point, the audience) would reasonably expect Bobby to loudly object to. The judge looks at Bobby, who is dozing off, waits a beat, and just says "Sustained" anyway.
* The Practice) is shown as attracted to Lucy, who's around a decade older than him. He even asks Lucy on a date. She politely declines and explains she's too old for him.
* The practice is usually associated with children, but it's also quite common in adults with autism, who may experience
* The practice of "controlled burning", containing wildfires by setting smaller fires to use up the fuel and oxygen so the big fire can't spread, is a literal example of fighting fire with fire.
* The practice of crafting a story behind the toys has clearly caught on, as two of Lego's current flagships are
* The practice of "gishiri cutting," which is performed in parts of Africa for therapeutic reasons (although there is no evidence that it
* The practice of misdemeanor citation/"notice to appear" exists in some areas of the US (specifically where there is not enough room in jail for petty shoplifters or ticket scalpers or people with small amounts of drugs or disturbing the peace, for example, or where people who have committed such crimes are obviously not frequent offenders/not a danger to others/stable enough not to flee). In practice, this is similar to a traffic citation, except that you
* The "practice" of paying artists in exposure (mainly thinking that the sheer prestige and reputation you get will be adequate) is a very large problem for artists today, leading to a movement from other artists about them being paid what they're worth. This has led to a variety of jokes like either turning in a blank page (since you're not being paid you don't have to give any work) or saying "Exposure is something you die of."
* The practice of pederasty, common among Greeks of the time, goes obviously unmentioned.
* The practice of personifying ships and other forms of transportation goes back so far it's definitely
* The practice of referring to the first carrier of a new disease as "
* The practice of series creators voicing main characters is a growing trend for
* The practice of SWAT teams in the USA is to shoot any dogs, peaceful or otherwise, for fear that they may attack anyone else. While the reasoning is understandable, if a bit grim, this has unfortunately resulted in several victims of swatting (i.e. innocent people whose homes were deliberately falsely reported as the site of a situation requiring SWAT intervention) losing their pets.
* The Practice of this plot (such as it was) was that the thief was much more concerned about being tried for a hate crime (and thus being labeled a racist by the media) than the actual "murder" part of the accusing.
* The practice of throwing shoes as a form of heckling (common in Arabic and similar Middle Eastern cultures, as the bottom of one's foot is considered the most ritually and physically unclean part of one's anatomy) preceded and followed him. Numerous people around the world have thrown shoes at people they despised from Israel to Taiwan. Perhaps somewhat fittingly, some of al-Zaidi's critics threw shoes at
* The practice of throwing things at despised public figures dates back further than anyone can remember. According to the ancient Roman biographer and historian Suetonius, when Emperor Claudius had some trouble supplying Rome's granaries at one point (when famine and storms disrupted their supply lines), an angry mob of hungry Romans gathered and furiously pelted him with stale bread crusts. In response to

this crisis, he immediately enacted laws insuring grain ships against loss and granting the suppliers with various tax advantages in order to
* The Practice played this straight: a man actually helped the man on trial for murdering his wife get off, then hired someone to shoot him on his way out, because he wanted him dead, not in prison.
* The Practice: Skip's mother assumes Lucy is a slut who seduced him and inspired his wire fraud to pay for an engagement ring, without any evidence, since she apparently can't fathom that her son was capable of this otherwise.
* The Practice, the defendant turns out to have gotten set up, as he insisted, by the real killers.
* The Practice. Walsh then offered Beck a deal: if he pleads guilty to illegally possessing a gun, he gets six months for that and it'd be officially declared he was justified about shooting the cop. Beck accepted the deal.
* The Practice were defending a client, and it wasn't going so well, they would explicitly switch to "Plan B", namely accusing someone else, usually a grieving relative of the victim, of committing the crime. Used as a transitive verb, e.g., "We're going to Plan B the brother." The phrase was used so often, many witnesses were aware of Plan B and would anticipate it, and the firm was sued for doing it. By contrast, Plan A "Establishing the State did not meet their burden of proof" was only described once (when they were being sued for Plan B).
* The Practice when the defendant nearly immediately afterward admits to his lawyers that he did indeed do it, if for no other reason than to prove to his fellow homeless amputees that they are capable of defending themselves.
* The Practice, where some of the protagonists often represent murderers and drug dealers using questionable methods.
* The Practice: While prosecuting Russel Bakey, Helen Gamble considers it odd his record doesn't have even a speeding ticket.
* The Practice who used a successful insanity defense some years ago hires Lindsey to help him get declared sane and released from the institution he is now in.
* The Practice, with him browbeating the nebbish store clerk who saw his client, a very wealthy woman and kleptomaniac, stuff a scarf into her purse:
* The Praetorian Guard are essentially the British Army of the Zulu Wars
* The Praetorian Guard regiment is a homage to the soldiers of the British Empire who fought at the battles of Isandlwana and Rorke's Drift in 1879, as depicted in the classic war film
* The Praetorian-prefect named Marcus Opellius Macrinus was informed of a prophecy from an oracle that he would become the emperor. Luckily for him, he got the information before the sitting emperor (the, quote, "Common enemy of mankind"), Caracalla, since if he didn't he would most likely be executed as a possible threat. Since the emperor would inevitably find out sooner or later, his hand was forced so as to actually assassinate Caracalla and he ended up as the new emperor after the Guard proclaimed him such. Not that it made much of a difference since he would also be the first emperor to die before entering Rome. For this reason, making prophecies about the imperial succession was usually a crime punishable by death.
* The Prague Cemetery hoaxter LÃƒÂ©o Taxil, who features in this historical novel.
* The Prairie Natty Bumppo, now an old old man, sits in state in the Native American village, petting his dog, Hector, and remarking that Hector is awful quiet nowadays... not realizing that Hector is dead and that the villagers, out of respect for him, have had Hector stuffed without telling him.
* The Prankmaster, a genius prank caller who when challenged by Mordecai and Rigby, sends them back in time to
* The Prankster: Became popular archetypes in animation from the World War II era onward.
* The Prankster: Someone who plays practical jokes on others for their own amusement.
* The Prankster When the two declare a prank war, they shake on it, leading to them both being shocked by the other's joy buzzer.

* The Praxis War is a Klingon civil war, kickstarted when more reactionary forces led by House Duras rebel against the more progressive regime of Chancellor Azetbur.
* The Prayer by German psychedelic trance duo Electric Universe. It invokes the feeling of cosmic horror by mixing an actual Hindi prayer with exceptionally dark trance samples.
* The prayer can take on a distinctly creepy tone all by itself if you think about it the wrong way-in the
* The Prayer Warriors, a character can be killed off one chapter and somehow come back in the next chapter.
* The Prayer Warriors, after converting, is so overwhelmed with remorse for his past sins that he whips himself.
* The Prayer Warriors as a surviving member of the royal family and a villain; the author even puts a parenthetical note regarding the latter that says "please do not get him confused with William in my other story".
* The Prayer Warriors, but doesn't know who it is. It is later revealed that God told Jerry this in a parenthetical note, but not only is it said to have taken place before Percy's attack, God never mentioned the identity of the traitor.
* The Prayer Warriors, but Michael decides to focus more on converting them this time.
* The Prayer Warriors, Carter Kane decides to help William against Horus because Horus is ordering Carter to go to America against his wishes. Carter says bad things happened to him in America, but refuses to elaborate.
* The Prayer Warriors, Dumbledore has the author's brother, Noah, executed for serving both God and Satan (the former was most likely put in to give Dumbledore a reason to execute him, and the latter was given as a reason for the author to demonize Noah).
* The Prayer Warriors, Ebony gets three out of four of the keys- killing Harry Potter and Ron Weasley, and converting Hermione- while by contrast, Michael gets his off Ebony's corpse after she's killed by Hogwarts, thwarting his attempt use her to get close to Dumbledore).
* The Prayer Warriors fics made a token effort to include the entire main cast of their respective works, even if they weren't in character.
* The Prayer Warriors get married and consummate their relationship, but by the end, three chapters later, Draco is abruptly married to Hermione.
* The Prayer Warriors give their dead Christian burials, but leave the bodies of their enemies to rot.
* The Prayer Warriors. Granted, the author's saying this comes off as less of a surprise than most examples of this, given his hatred of liberals and Obama, but it's still fairly jarring compared to the previous items.
* The Prayer Warriors" Grover is killed by being stabbed in the throat.
* The Prayer Warriors has the author bashing his critics, often saying that they will go to Hell for "mocking" him.
* The Prayer Warriors have no qualms with wanting to wipe out all their enemies, since their version of God told them to do so, and they don't believe their enemies are humans, anyway.
* The Prayer Warriors, having joined the Prayer Warriors on their quest to kill the Greek Gods, kills Zeus after declaring that he is not his father- God is- in order to avoid committing the sin of patricide. Canonically, Poseidon is Percy's father, but Percy kills him later that chapter, so this still counts any way you look at it. Thalia, Zeus' daughter, helps kill Zeus in a flashback to the retconned version of the scene.
* The Prayer Warriors in The Evil Gods Part 1, Percy escapes with "a cloud of smoke cause by witchery."
* The Prayer Warriors is emphasized a great deal in the story, but it clashes heavily with the fact that the Prayer Warriors at one point wished that Osama bin Laden was killed at birth and then later wished that Molly Weasley would have a miscarriage.
* The Prayer Warriors is killed about 3/5 of the way through that installment, and the remaining chapters deal with the effort to defeat Stalin.

* The Prayer Warriors is rather fond of American automobiles, as he frequently talks about characters using them, and goes into great detail about the cars they're driving.
* The Prayer Warriors, Jerry has this to say about his girlfriend, Mary (emphasis added).
* The Prayer Warriors, Jerry, the main character, realizes that there is a traitor among the Prayer Warriors, and spends the next few chapters trying to figure out who it is. It's revealed, midway through this process, that God told him that there was a traitor the night before the attack, but God apparently neglected to mention who the traitor was.
* The Prayer Warriors. One is carried by Ginny, another by Ron, a third by Harry, and a fourth by Hermione. It's unclear who has the fifth key, since after the fourth key, the Prayer Warriors break into Dumbledore's office and kill him.
* The Prayer Warriors only to find that Stalin misspelled it "Satan Town", although this is quickly forgotten about.
* The Prayer Warriors say that whoever does not wish to accompany them into Hell to kill Hades does not have to do so.
* The Prayer Warriors, since he is said to have created the false gods and had a hand in the rise of communism in Russia, but hardly ever appears.
* The Prayer Warriors site for all of (his) followers to see (his) victory."
* The Prayer Warriors, Voldemort appears in a single scene, establishing himself as an enemy to both the Prayer Warriors and Hogwarts, and blackmailing Draco into killing Michael with the threat of killing Ebony so that he will be able to continue to fight against Dumbledore. It would have been more interesting to have an additional opposing faction, but Voldemort is never seen again.
* The Prayer Warriors, who's wielding a club; Jerry gets in two direct hits whereas Grover only gets one, and Jerry's second hit kills Grover.
* The Prayer Warriors, who wasn't there in the original version, stabs Zeus in the back while Percy stabs him in the heart.
* The Prayer Warriors written by Thomas are chock-full of embarrassing spelling errors, unbelievably awkward dialogue, heavy-handed and rather disturbing preaching, and just plain lazy writing. The chapters written by Ebony are... kinda okay, with a little less religious themes, slightly improved spelling, and actually listening to bad reviews instead of just screaming about the fires of Hell. The chapters written by Thomas are a lot more fun to read because of this.
* The PR department may have come up with the tagline after they found out that parents put bandaids on their children without applying Neosporin.
* The pre-1995 format was less of an example that it initially appears— there were slightly more points available than in the earlier rounds, and potentially a back-runner
* The pre-90's series fall somewhere between a Stage 1 and Stage 2 in the United Kingdom, but Stage 0 elsewhere.
* The pre-9/11 episode "Road to Rhode Island" has Stewie distracting the guards at an airport security check by singing and dancing so that his bag (full of weapons) goes through the x-ray undetected. Upon picking it up, he says "Let's hope Osama Bin Laden doesn't know showtunes!" As he walks away, Osama shows up using the same technique. The Osama scene is cut from the later airings and the Volume 1 DVD, but is intact on the "Freakin' Sweet Collection" DVD.
* The preacher is commencing his sermon when a bundle of dynamite is thrown through the window:
* the preacher prays to God that something will happen to separate the woman from her husband and make her stay on the island. but the preacher blames himself (because he prayed to God to do something to separate the woman from her husband) and falls into despair.
* The pre-break eyecatch has the series logo against a baby blue starry sky, with the earth below it. At right, in pastels, a reverse painted silhouette of Sailor Moon is tangled in draped ribbons, along with the moon and inner planets.
* The Precarious Ledge: A character moves along a very high ledge to get from point A to point B.

* The preceding novel has Ryan attempt to invoke Section 4 when he, as Deputy Director of the CIA, states that the President is not acting rationally and strongly implies that he's having a nervous breakdown.
* The precincts or the Chief of Detectives usually bring Major Case in on the case. It's true that Major Case generally investigates theft & kidnapping, but the Chief of Detectives may assign cases to any unit. Sometimes the murders are connected to crimes within the purview of MCS. And the MCS
* The Precious One Gilbert indulges in fine wines, fine clothes and fine high-performance vehicles for when he feels like harassing members of Orland Colon's family. And he seems to speak many languages, which makes them relatively easy to find even outside of Puerto Rico.
* The Precious, Precious Car: A jerk has a car which he loves and absolutely refuses to let anyone touch. It will either be stolen, destroyed, or both.
* The Precious, Precious Car — If someone who owns a nice car acts like a jerk, the car will be borrowed without permission and/or broken.
* The precise birth date of the late Taliban emir and founder Mohammed Omar is uncertain, though variously estimated anywhere between 1950 and 1966. An offical biography released by the Taliban dated his birth at 1960, though specific detail are still quite lacking. Not helping matters is that Omar was born in a remote Afghan villiage that never kept reliable records.
* The precise mandate of posting rear units to shoot retreating troops was at the very least disliked by commanders for wasting their manpower on not fighting the enemy, and the requirement was withdrawn after three months.
* The precise rules that magic and other powers operate on is never discussed in much detail, but there are ways to break the rules. Such "Balance Breakers" range from simply being obscenely powerful, to a supposedly uncontrollable
* The Precision Aim (Trick Shot) is a sniper shot performed with any gun that can take someone out at long ranges with pinpoint accuracy.
* The precogs themselves, who float/are submerged in a pool of pale liquid...
* The pre-Columbian "golden flyers" are known to be stylized depictions of flying fish. The program only showed the most stylized, leaving out those that were undeniably
* The pre-crisis comics said that the warp-drive on the rocket that Superman used to get to Earth created a "space warp" between Krypton and Earth to
* The precursor civilization who used golems for literally everything only ever used wheels as children's toys. They never even invented basic
* The Precursors founded the first empire, created all known life in the galaxy, and may have been (
* The Precursors had their own network of portals (which the PDA describes as "miniature phasegates") on 4546B's surface, allowing them to quickly move between their various facilities. By the time the protagonist crash-lands on the planet, they're inactive, but most can be restarted from the Primary Containment Facility.
* The Precursors have been established to be millions of years old, but
* The precursors to the Court's modern robots are part this and part golem as well. Kat does what is effectively
* the Precursors (while talking through their floating hologram thing) offer to turn Jak into a Precursor. However, Count Veger shows up with a gun and demands that he be turned into one instead. You can guess what happens. While this may be an example of Literal Genie at first glance, keep in mind that during this scene, no one.
* The Predacon army that Shockwave was cloning would have likely made the Insecticons look like houseflies by comparison, if the few that eventually surfaced are anything to go by. However, after seeing how fully the first specimen exceeded expectations, Megatron pulled the plug on the project out of fear they'd eventually wind up threatening the Decepticons as well.
* The Predacons seem to operate on this principle — when Optimus Primal is kidnapped by the Vok,
* The Predator also gets really manly, no matter if again the cast doesn't compare to the original and even has big roles for a woman and a child. Blood, explosions,

swearing, tasteless dialogue, all a man craves!
* The Predator fallacy, and secondly that the characteristics of the condition (troubled social interaction and impaired communication skills) work precisely against what evolution stands for (better adaptation to the environment and better chances to survive and reproduce, which in humans is parallel to social functioning, and humans are social animals - romance is one thing autistic people notoriously struggle with).
* The Predator gives us this gem: "...the dumbest motherfucker I've ever met. Ha ha. I mean, a Ranger sniper tripping a wire sensors? He's gotta be... Creating a diversion!" Cue a Ranger sniper.
* The Predator movie, including a group that was literally going to the loony bin.
* The Predator opens right away with the aliens, but goes on with this trope when the main character is put on a bus on the way to the loony bin with some traumatized and insane soldiers.
* The Predator, seeing such a contradictory rewrite of a central piece of lore did not sit well with the fans.
* The predators of Eden resemble blue-furred primates, but with the elastic feeding arms of a cuttlefish. Their prey resemble a cross between a rabbit and a moth.
* The Predator's vision modes are similar in that humans give off body heat while synthetics and xenomorphs have detectable electrical fields.
* The Predator to unlock the Predator spaceship by saying he doesn't think Rory can do it. Rory proves he's smarter than the G-Man gives him credit for.
* The Predator, where a kid even goes trick or treating with the title alien's mask.
* The Predator: While chasing the Predator at the dam, Casey jumps from a catwalk on to the passing bus, and balances on the roof, attempting to get a bead on him. Later, McKenna, Nebraska and Nettles jump on to the outside of the Predator ship as it is taking off.
* The predecessor of the above is the wood chipper and several similar pieces of farm machinery. Until safety devices were mandated in the 1980s for these, there were regular accidents involving
* The predecessors of the Zone Trooper armor and the Wolverine are the Mobius suit and the X-O Powersuit, respectively. The former was built by Dr. Ignatio Mobius during the First Tiberium War mainly to protect the wearer from exposure to
* The predecessor to the Pentagon (headquarters of the US Department of Defense) was a series of temporary buildings built in World War I. Part of the reason the Pentagon was built was to avoid building more permanent "temporary" buildings.
* The PreDespair Kids. Besides that, the anons sometimes bring up events or ideas that have yet to, didn't, or couldn't occur as a result of the changes, and are thus treated like alternate universes and timelines.
* The PreDespair Kids on the blog. She also really likes sex. At one point, she suggests that Kazuichi build a robot duplicate of himself... because she likes the idea of a threesome.
* The PreDespair Kids since he was very young. But he has absolutely no combat skills whatsoever.
* The PreDespair Kids, which are annoyingly prevalent on Tumblr thanks to dataminers, until he plays the game for himself. Since the western release is confirmed for this year, he's calculated the hiatus should end sometime between March and July. Small updates, however, are also possible.
* The prediction for the gift is to buy her a bouquet. The puzzle solution notes: "It seems reasonable that a florist would want the man to buy another bouquet right?"
* The prediction of a future one occurs in the second podcast episode (for the record, they only used it twice in the end.)
* The predictive Stand, Thoth, predicts specific events in the near future. No one, not even its user, can stop those events from happening, but they're always vague enough for
* The Predictomancer Marie Lavraie suddenly goes from only seeing the vague

outlines to second-to-second predictions when she's in combat allowing her side to effortlessly defeat their foes. When questioned about this, she explains that it's only possible in the rare battles Fate decides are actually important.
* The Preds were just getting recognized by the Red Wings as genuine rivals (after Nashville won
* The preeminent crime lord is the Deacon, who dresses and acts like, well, a deacon. It's not a disguise, however, but simply part of his motif.
* The Pre-Fall Eldar Empire committed so much hedonistic depravity that they squicked the Chaos God Slaanesh into existence. Imagine the Dark Eldar if they were the undisputed rulers of the galaxy instead of a bunch of pirates hiding in the Webway.
* The pre-fall Eldar make many appearances, where they demonstrate quite clearly why their empire will one day give birth to Slaanesh.
* The Prefect is to enlist another super intelligent AI who is merely bad, insane and bent on vengeance ..maybe.
* The Prefecto Prep students are sore losers after being beaten at football by the ACME team in "
* The Prefecture Magisterium is an internal Admech State Sec that serves as a cross between Inquisitors of the
* The preference is also sometimes motivated by the sheer number of magical things which can interfere with clockwork and gunpowder in the setting. With a tension weapon like a bow, or a simple lever like a club or blade, you'll at least know your weapon has been sabotaged by a mage spell or werewolf gift before you rely on it to fire in a dangerous situation. Many even prefer bare fists when they don't have claws, simply because hexing someone's actual body is very difficult.
* The preferred/default stick layout also can vary between regions, with the above example layout (called mode 2) being common in North America, while European modelers will more commonly know mode 1 (left stick is yaw/pitch, right is roll/throttle). Other modes also exist. Add to that wildly inconsistent programming interfaces (even among the same manufacturer) and different styles of auxiliary switch arrangements.
* The preferred method of hitman Sean Callan in Don Winslow's "The Power of The Dog". He sticks with a .22 pistol as his weapon of choice, since he knows the .22 load is powerful enough to pierce the skull, but not exit it. That means the bullet rattles around the skull like a "pinball", shredding grey matter the whole time. Combined with his habitual
* The preferred method of the demonic space entity known as the Obsidian Lord, the true
* The preferred way for many fire departments to deal with acetylene tanks (and some other compressed gas cylinders) in a fire is, in fact, to shoot them to
* The prefix e- for computer-related things will get you ridiculed now. Only email and perhaps ebooks can really get away with it. Perhaps this is because
* The pregnant cat had her stomach sliced open and the fetuses spilling out
* The Pregnant Man was one of the recurring characters on the Australian sketch comedy programme
* The Pre-Hawkworld version of Hawkman/Katar Hol. First appeared in February/March, 1961.
* The Pre-Hawkworld version of Hawkwoman/Hawkgirl/Shayera Hol. First appeared in February/March, 1961.
* The prehistoric caves of Altamira in Spain were discovered by a group of children who were playing near its vicinity.
* The prehistoric Ghost Rider is a caveman who rides a woolly mammoth
* The prehistoric monster story also played with the unreality by having hyper-rational
* The Prehistory of The Far Side had a bunch of comic sketches that were never submitted to newspapers for whatever reason. One of these had a bunch of doctors performing surgery. The head surgeon stops and says "Wow, halfway through the procedure and suddenly I'm drawing a complete blank. In fact, I think I'm an ice cream man."

* The Prehistory of The Far Side — for instance, playing fetch with the dog using him as the stick, making him ride in the trunk of the car, putting bars on his bedroom window, and dangling him over the alligator pit at the zoo.
* The Pre Hollywood Era: A Useful Notes page for the time when American movies existed, but they weren't being made in Hollywood (which existed but was only a small village) yet.
* The "pre-human sentient species" thing is played up to eleven with Aboleths from
* The pre-launch event of the second expansion involved an infection that would turn player characters into zombies that were hostile towards everything but each other. You can use this opportunity to kill characters that were otherwise unattackable to both factions.
* The Premature Burial ends with the main character seeing his worst fears realized.
* The Premature Burial! He took her home and nursed her back to health, and they left France for America together. Later, when they return to France and he's challenged by the banker, Julien legally gets to keep her as his wife, because of the unusual circumstances and the decades that had passed.
* "The Premature Burial" However, the story scared readers so much, caskets were built with a button that could be pressed to cause a flag to pop up in case someone was indeed buried alive!
* The Premier Athlete Brand didn't take their losses too well, except Mr. A's because they began to
* the premier Baroque artist, innovative for his use of tenebrism in his works. He only lived to be 38.
* The premiere episode of the 1985 version was the apocalyptic "A Little Peace and Quiet", which at the end features a live announcer trembling through an EBS alert, losing his attempts to keep calm as nuclear war breaks out between the Soviet Union and the United States. Unlike
* The premiere episode "Tourist Trapped" ends with Mabel getting a grappling hook after Grunkle Stan allows the kids to pick any item of their choosing from the Mystery Shack's gift shop, which was originally a gag highlighting Mabel's
* The premiere for the second season gives us the cloud city of Cloudsdale crumbling apart in a vision caused by Discord as he presents Rainbow Dash with a
* the premiere. It's just that the dead was talking back. In his mind.
* The premiere of the episode "Ganmo's Perfect Rakugo Theater" of the 1988 incarnation of
* The premiere of the new show featured the premier stating the premier reasons why the reform was necessary.
* The Premiership (and watching all the advertising in between the games, of course).
* The premise for the entire plot edges on the unfeasible, if only because the personnel details of a junior enlisted Marine would be so far below the paygrade of a full-bird colonel running an entire base that it wouldn't be worth his time and effort to get involved in them directly
* The premise for the third continuity: the entire team is like this. It also pops up in other continuities, in particular for most versions of Cosmic Boy.
* the premise is each chapter shows a different alternate reality, and in all of them Shinji and Asuka get together.
* The premise is that Natasha Kerensky inherits command of the Wolf Dragoons.
* The premise itself is very much Team Enlightenment. Gozer isn't beaten with mysticism or magic. Knowledge, courage, and technology will suffice. Gozer represents the romantic view, with its ancient past, the terror dogs, the symbolism pulled from myth, and its mystic plot to return via an over-convoluted fertility rite.
* The premise of 1987 interactive fiction Knight Orc. The protagonist thinks that he is a normal
* The premise of a computer being downloaded into a guy's mind makes no sense whatsoever, and when that computer is upgraded to make him magically learn kung fu, all plausibility goes flying right out the window but Chuck can kick people in

face, so who really cares?
* The premise of "Homer the Genius" is that Homer is an idiot because he has had a crayon lodged in his brain since he was a child. Marge at one point questions Dr. Hibbert how this could have gone undetected, given how often Homer's skull has been x-rayed over the years. Hibbert replies that his thumb must have been accidentally covering up the crayon every time he held one of the x-rays in the past.
* The premise of season one is that Herrick wants his faction to grow large and powerful enough that he can give up on the Masquerade and just rule humans directly.
* The premise of the board game Mwahahaha is to collect the items needed to activate your
* The premise of the books is that someone has discovered a way to make "Powereds" (people suffering from
* The premise of the film is that humanity has discovered the technology to freeze everyone's age at 25 and now live on internal "time-clocks" which expire after a set period, and people who don't work or don't buy units of time die. The extremely wealthy can purchase enough units of time to indefinitely remain the same age for years (or even decades) - in the film's trailer, a man introduces his wife, daughter and mother-in-law, all of whom are the exact same age.
* The premise of the Joan Baez song "If I Knew" which is a hippy love anthem from a girl to boy who will not hunt innocent wild animals or destroy rare flowers; not for money and not for love. And she loves him even if he is '
* The premise of the manga. One of the girls heavily regrets something and causes a time-loop, until Kyousuke and the girl figure out what the exact reason for their regret is, ending the loop. These are pretty simple, with the longest being Hiyori Izumi's, which lasted for 4 days.
* The premise of the movie (and the book). If the amber-preserved blood was any more than 1 million years old, the DNA would have been irrecoverably decomposed, no matter what it was preserved in. Cloning extinct species from before 1 million years ago is impossible. Also, if the DNA were available, we have absolutely no idea how to turn that DNA into a viable dinosaur egg. You'd need complete information about how the oviducts of that particular species operated even to get started, and we don't even have any fossils of dinosaur oviducts, let alone a clue as to their gestational duration, average internal temperature, etc.
* The premise of the movie, with everyone's minds being some sort of control center manned by five characters representing five emotions (Joy, Sadness, Anger, Fear, and Disgust), poses a question, what would the inside of your favorite fictional character's mind look like while following the movie's rules? Who would their dominant emotion be? What would their core memories be?
* The premise of the series is that the original Starfleet crew is blended with the absorbed Maquis, and three members of the main cast receive their positions following the catastrophe that created that situation. The EMH gets promoted to the status of
* The premise of the series "The Happy Bureaucracy" is that nuclear war wiped out all of the USA government... except the IRS, which still collects taxes, the apocalypse be damned. Most of their "audits" result in death of the taxpayer.
* The premise of the show, on the other hand, plays this trope straight, as Jérémie is willing to risk the life of thousands of people by playing heroes with his friends rather than just sacrificing Aelita to save millions. Still, from some perspective, leaving a 14-year-old girl to her death to save many isn't moral either.
* The premise of the song "Better Version of You" by Paul and Storm is the parents informing The Unfavorite that his unborn sibling will be the favorite.
* The premise of the song "Earth's Fire Breathing Daughter" by Leslie Fish. The titular sort-of-demigoddess entity buys a house in California with her coven and start enacting pagan rites. Neighbors complain and send the police after them on false drug charges. She triggers an earthquake and mudslide that kills the entire police force and destroys all the surrounding houses, while of course leaving hers entirely intact. (They deserve it.)

* The premise of the very first Miss Marple story "The Tuesday Night Club" —
* The premise of the "Wedgie Fever" sketch is that a contestant on the titular game show receives an increasing painful hanging wedgie for every trivia question he gets wrong.
* The premise of this trope for Michael Jai White above also applies to
* The premise of youtube series Henry Tumbleweed involves a trio of con artists breaking into the main character's house dressed as monsters in order to convince him that he is insane, and needs the help of an expensive psychiatrist, who is actually one of the con artists in disguise.
* The Premium and Limited Editions also have a Double Super Skill Shot accessed by holding
* The prep for one version of the final heist involves stealing a train to transport the loot (which consists of
* The prequel book to Kyril Bonfiglioli's "Charlie Mortdecai" series
* The prequel comic "Homecoming" starts with a naked Mercy (who was going for a run as a coyote) fighting off a renegade werewolf pack, armed with only a wrench.
* The prequel expands on this a bit. For instance, Conacht knows from the book that he'll come back as Balor and has his lieutenant hide all his magic items. It doesn't tell him the lieutenant will come back as Soulblghter and just hand them back. He also twice has world-changing magic items built according to instructions he got from the Codex prophesying he would have them made.
* the prequel happens, which means you need to feed them in order to keep their Health and Stamina up as well as grooming them to keep them clean (which affects stamina). You also need to strengthen your bond with your horse by praising and petting them in order to increase their stats as well as unlock new moves, tricks or abilities for them to do.
* The prequel novels establish other ranking systems used prior to that one. The original League of Nobles titles in the Armada were Supreme Commander (Field Marshal), Primero (General/Governor), Segundo (Colonel), Tercero (Lieutenant Colonel), Cuarto (Lieutenant), Quinto (Sergeant), and Sexto (Corporal). Presumably, other titles to fill in the gaps also existed, but the books never mentioned them. During the Butlerian Jihad, a system similar to the one used by the Sardaukar was estalished. Key differences included the title of Supreme Bashar (Field Marshal), the rank of Bashar being the equivalent of a General, Burseg being a Colonel-equivalent, and the addition of the rank of Bator (Lieutenant Colonel). The rank of Immenbrech is also mentioned as being used during and after the Jihad and is a rough equivalent to a Sergeant.
* The prequel novels make it clear that this is one of Polgara's general rules of thumb for midwivery: find the father a time-consuming task to do
* The prequels also emphasize this aspect by having many humans engage in hand-to-hand combat with machines. Why? It's never made clear, as the machines don't have
* The prequels also occasionally reference "unionized insectoids" among the factions that supported the Separatists, especially those that work in arms production. Although these groups seem to be defined more by their species' traits than by any economic arrangements.
* The prequels and EU offer some subversions, species that evolved to breathe ammonia or methane instead of oxygen.
* The prequels depict the romance between Jedi Knight Anakin Skywalker and Padmé Amidala, whose lack of Force powers makes her the equivalent of a Muggle.
* The prequels diversify the cast, perhaps most notably by revealing that
* The prequels' droid control ships are a literal example of the "blow it up and the
* The prequels give us another example with the people of the planet Naboo, who are essentially
* The Prequels have Obi-Wan to Qui-Gon in Episode I and then Anakin to Obi-Wan in Episodes II and III (despite being Anakin's mentor and superior in the Jedi Order).
* The prequels have two instances of a Jedi vs an evil non-Force user:
* The prequels kinda did both: Humanity became decadent and over reliant on

machines, so a small number became disgusted and built themselves into immortal cyborgs and conquered the human race.
* the prequels powers are awakened while she's being tortured by the Cymeks. The resulting mental blast is several orders more powerful than that utilized by the other Sorceresses of Rossak and literally disintegrates her body. Fortunately, she uses her new powers to create a better body for herself atom-by-atom.
* the Prequels were an allegory has repeatedly explained is impossible (the principal details of the storyline were written in the 1970s, before either of those subjects existed).
* The prequels weren't the first time the Jedi were Frontline Generals. During the Sith Wars of 4,000 and 1,000 BBY (seen in the
* The prequel trilogy, although a bit more low-key, draws on aspects of the American Civil War, with the antagonists' side being called a "Confederacy", which utilizes slave labor and is mostly rebelling for economic reasons. The character of Senator/Chancellor/Emperor Sheev Palpatine also draws on
* The Prequel Trilogy (and thus the entire saga) has Viceroy Nute Gunray, who, in contrast to the galaxy-spanning ambitions of the Sith, is simply a
* The Prequel Trilogy (as well as a few early Expanded Universe works) introduced the idea that "Darth" is an honorific title used by the Sith Order (roughly akin to "Sir" or "Lord"), and that the Sith choose new names upon joining the Order to signify
* The prequel trilogy has Anakin Skywalker, a former slave turned Jedi Knight, falling in love and marrying Padme Amidala Naberrie, a former Queen and now Senator of Naboo. Their marriage is secret, and of course, it does not end well.
* The Prequel Trilogy makes it clear Obi-Wan Kenobi is the hero, not Anakin Skywalker. Obi-Wan is constantly praised as the ideal Jedi and a stalwart defender of the innocent, while Anakin has his own fair share of issues that keep him from achieving his heroic destiny.
* The prequel trilogy showed Anakin Skywalker to be this towards his son Luke. Both are raised on desert planets, but whereas Luke had a happy family life on a farm with loving parental figures, Anakin was born into slavery with just his loving mother. Luke didn't really angst over the death of his family (he was upset, but since they
* The Prequel Trilogy takes it a step further: the Republic doesn't even
* The prequel trilogy tells the story of the Clone Wars, the destruction of the Jedi, the creation of the Empire, and the rise of both Darth Vader and Palpatine, all of which had been alluded to but never fully explained. Dissatisfaction with how some or all of those stories turned out accounts for a good portion of the prequel hate.
* The prequel trilogy turns the aesthetic around, since it takes place over the last generation of the Republic, amid the seats of planetary or galactic power, resulting in far cleaner and tidier sets and
* The Pre-Raphaelite Brotherhood was eaten up with this trope. Dante Gabriel Rossetti married his model Elizabeth Siddal, but also had an affair with another model, Jane Burden, who married another artist, William Morris. Rossetti also had an affair with Annie Miller, a barmaid and the fiancee of artist William Holman Hunt. Hunt took her back, but finally broke off the engagement when Annie became involved with the 7th Viscount Ranelagh. Annie Miller ended up married to Ranlagh's cousin while Hunt married Fanny Waugh, and after her death, remarried to Fanny's sister Edith. His colleague, the sculptor and poet Thomas Woolner, had also been in love with Fanny Waugh; he married Alice Waugh, the third sister of Fanny and Edith. Meanwhile, John Everett Millais fell in love with Effie Gray, who was still a virgin despite being married to critic John Ruskin. They wed after she left Ruskin.
* The pre-rendered backgrounds only allowed for fixed camera movement in the older games for the Playstation (and this was the case for many other PS1 games at the time). Many argue that this techinical limitation actually added to the scary atmosphere compared to the later games, as the player usually cannot see what is attacking them from certain areas. This applies similarly to the
* The pre-retcon timeline is this for Terezi. She spirals downward into self-

loathing after
* The Prescious One booked a flight from Puerto Rico to Florida for the purpose of
* the pre-scratch version of The Handmaid, is from "Alternasia", which is this to Japan.
* the presence of a certain character is inherently a twist, this can be ruined on websites that feature character tags on fanfics.
* The presence of an ejector seat was not considered when armour plating was added. (See also, head trauma.)
* The presence of a twin-tailed comet is often seen as an omen to the people of The Empire, due to the legend that their founder Sigmar's birth was heralded by it's appearance. This is not always seen as a
* The presence of both Seath the Scaleless and Patches the Hyena (as well as some other recurring characters and elements) seem to indicate that
* The presence of fellow Mega Corps the Techno Union and Banking Clan in the Separatist army suggests that maintaining a giant army of killer Deathbots is a standard business practice in the
* The presence of human remains in homemade fishing lures — specifically, bits of tissue, bone, and hair from the known victims of a serial murderer — is the smoking gun which convinces the Behavioral Sciences team that
* The presence of Jinzo and/or his enhanced version, Jinzo-Lord, on the field renders all trap cards useless.
* The presence of quarians and geth in multiplayer regardless of any installed DLC or player choices implies the ending where Shepard brokers peace, which requires Legion survive to this point and Tali to both survive to the ending of
* The presence of the Dark makes the setting into this. In humans, it manifests as the Dark Sign, a curse which leaves the victim in a state of undeath, slowly losing their memories and becoming Hollows. For gods or those without the Dark Sign, they become monstrous entities. Anyone who could have done anything to stop the tide is either dead, mad, or both.
* The presence of the Judeo-Christian God and His Son Jesus Christ are treated like this by the Only Light subsect in the
* The presentation and names ("Council Legion of Merit", "Service Star") of the games' achievements suggest that they are actual awards presented to Shepard over the course of the game, which would mean a quite hefty medal case for them, too.
* . The presentation goes... poorly, partly due to the audiences' visceral reaction to the tree itself and partly from carnivorous species resenting what they feel to be ponies attempting to push their own cultural maxims onto them.
* The Present Day, making him at least 75 years old and still a working detective for a state police agency. Mayor's website gleefully lampshades this:
* The presenters allegedly have a pact that, should any of them die, the others will appear at the beginning of the next episode, make a mournful comment, and then say "Anyway..." and cheerfully continue with the show.
* The presenters even seem to try to fit Clarkson, Hammond, and May's positions (one said to be slow, etc.), and it's so forced it's almost painful.
* The presenters spent an entire series mocking the forthcoming Dacia Sandero before it had even been finished. By the start of the next series, Renault had not only delayed the UK release of the model, but also of the whole brand's (while the official reason was because of the greater-than-anticipated demand in Continental Europe, one can't help but wonder why Renault would release that statement when they did). But Season 14 has May drive the Sandero in Romania, and he liked it so much that he wanted to take it back to the U.K. with him (before
* The Presenters tend to be a mixture. Jeremy is quite strongly Romantic but has some Enlightenment moments, the ever-practical James is strongly Enlightenment (but is himself not immune to Romantic harkens), and Richard is perhaps the most firmly Romantic of all.
* The Presents Were Never from Santa source of all those useful things you got.
* The Presents Were Never from Santa: What does "valid authority" mean?
* The Pre-Sequel! continues this tradition with Wilhelm as The Enforcer, Athena as The Gladiator, Nisha as The Lawbringer and Claptrap as A Mistake.

* The Pre-Sequel has Athena, who was a former Crimson Lance assassin. She comes with a ballistic shield called Aspis that she can throw like Captain America. The Pre-Sequel takes this trope another step, being set on Pandora’s moon, with the opening cinematic being the Vault Hunters as a
* The Preservers, who transported endangered cultures to pristine worlds.
* The preshow in the now-defunct "Le Visionarium" (the original Timekeeper) in Disneyland Paris started with a
* the presidency terms did the tradition finally become legislation, with the 22nd amendment limiting presidents to a two-term maximum.
* The President, and since abandoned place are preferred it turn out to stay abandoned once targeted.
* The president back then was the president, the popular music of those times were all the rage..."
* The President got his in the first season episode "Let Bartlet Be Bartlet", when he endangered his own re-election to take a stand on issues like campaign finance reform.
* The presidential election in the middle of the fifth season (released in 2017) firmly weds it to the previous year's real-life presidential election, with the fictional FBI director stating that the bureau "would never involve itself in a presidential election" while all but staring to the camera.
* The Presidential Guard in Greece is very similar to the Queen's Guard. Ceremony purposes? Check. Historical outfit that is wildly out of place in the modern era? Check. Complete refusal to leave their post until relieved even when their guard post is on fire and their
* The Presidential Guard of Gabon was staffed until the late 90s by veterans of the French Foreign Legion, particularly the disbanded 1st Parachute Regiment. One of them, Louis-Pierre "Loulou" Martin, served President Omar Bongo from 1967 to 1993.
* the President is shot as it would have been a relatively simple matter for the VP and a majority of the Cabinet to invoke this while the President was incapacitated.
* The president of a planet that has just discovered a possible world-ending catastrophe is approaching, gives a speech about perseverance that ends with "And if our world should endure for a hundred million years, it will always be known that this was our finest hour." Alex Benedict is an archeologist/treasure hunter and is the only member of the cast familiar enough with history to realize that he is cribbing, and who from.
* The President of the Terran Federation has denounced the illegal drug Shadow as a threat to all humanity. Turns out it's being harvested on a planet protected by his personal security force. By controlling the drug trade, the Federation dominates both the legal and illegal parts of society.
* The president of the United Federation was slim and brown-haired when introduced in
* The President of the United States is addressed as Mr. President, a tradition started by George Washington in lieu of more grandiose styles of address. They are also often "President [Surname]" even after their tenure in office has ended.
* The president of the USA stands up after a 9.5 magnitude earthquake near the White House where the refugees are (to be exact, at North Chesapeake Bay)... only for a tsunami to wipe out the White House.
* The President's Analyst - American spy Don Masters and Soviet spy Kropotkin are two among many trying to find and capture the fugitive psychiatrist. They're good friends, and the latter makes a bet with the former on who'll find him first.
* The President's Analyst - during production, J. Edgar Hoover apparently expressed his disapproval of the portrayal of his agency, the FBI (and his own proxy character), so they changed the name to the FBR (Federal Board of Regulation), along with the CIA, now the CEA (Central Enquiries Agency) - footage already shot has obvious overdubs for the name changes. A disclaimer at the film's beginning heavily lampshades this.
* The President's Analyst features the Central Enquiries Agency (CEA) and the Federal Board of Regulation (FBR). They're ostensibly on the same side, but it's

hardly apparent.
* The President's Analyst) first meets love interest Nan (Joan Delaney) in a NYC art-movie theater - now she's first seen in bed with him. Later, as he checks to see whether or not he's paranoid thinking he's being watched by spies, he gets them to expose themselves, and finds Nan is a spy too - a missing scene has him hallucinating disembodied floating eyeballs, including two looming out from her face.
* The President's Analyst from 1967 defined the cultivated image of the G-man early on, showing them as suit-and-tie and hat-wearing, quick to kill, unquestioning drones, all shorter than their stunted leader whose grudge against the title character was based on moral differences. Most other spy agencies fared little better: a major scene has spies of all stripes sneaking up on the analyst in a grassy country meadow. All of them, from FBI men to African agents with tribal face scars, to a Genghis Khan-looking Asian, wearing the same regulation black suit and tie (only a Russian agent has the sense to dress like a farmer).
* The President's Analyst from 1967 the title character is abducted in a phone booth under the noses of the two American and Russian agents trying to secure his safety. The American concludes the booth (and all the phones in the country) were tapped; the Russian incredulously replies "Don! This is America, not Russia!"
* The President's Analyst from 1967, where TPC (which literally stood for "The Phone Company") controlled virtually everything, and didn't care who knew it.
* The President's Analyst has the stand-in agencies FBR and CEA in uncooperative corners over the title psychiatrist, more so when he drops out and goes missing. When a KGB agent suggests he may have to eliminate some FBR agents pursuing him, his CEA friend voices no problem with it.
* The President's Analyst—Dr. Schaefer is captured by good-natured Russian spy Kropotkin. Schaefer works his way out of a forced defection by engaging Kropotkin in friendly conversation, learning Kropotkin's KGB father had arrested his mother in a Stalin-era purge.
* The President's Analyst - near movie's end, the good guys have stormed the headquarters of The Phone Company. Finding themselves facing the company's blandly cheerful president, they're surprised to find he's an animatronic figure.
* The President's Analyst, pursued by foreign agents wanting to tap his mind, and domestic agents who, because he knows too much, want to bring him in or kill him.
* The President's Analyst's character visit an avant-garde movie house. The film is a string of random, squalid imagery that repulses the small audience who all walk out, leaving him and a young lady who grows to share his enjoyment of it. The director angrily confronts them, stating it was meant to be offensive.
* The President's Analyst - Severn Darden plays a sympathetic KGB agent with an accent like a toned-down Mischa Auer (comic actor known for "Mad Russian" roles) - when we first see him he is speaking in Russian with a superior.
* The President's Analyst: Sidney Schaefer believes he will not be allowed to resign since he knows too much about the president. After a paranoia-induced dream, he deserts and is pursued by people who want him dead or captured.
* The President's Analyst, the title character's job stress takes a turn for the worse when returning home one day, he finds the head of the No Federal Agencies Were Harmed "FBR" informs him they removed his live-in girlfriend, citing national security as he talked in his sleep. Needless to say, he's quite upset that they know that fact.
* The President's Analyst was being filmed, the FBI, not pleased with their portrayal, threatened massive tax audits on the director/writer. After renaming the pertinent intelligence agencies, he added the opening disclaimer:
* The President's Barber''), a simple barber who is caught up in an espionage plot and is hired to be the official barber of President Park Chung-hee. While cutting his hair Han-mo inadvertently sends Park into a rant about intellectuals. He was also present at Park's state visit to America.
* The President's Barber, Han-mo scrapes the paint off of a portrait of President Park as a cure for his son's paralysis and stores it in a small container. Unfortunately, he is pursued by the former President's men so he eats the container

so nobody would ask questions. This causes him a lot of pain afterwards as he has to excrete the container and wash it so he can get the paint out.
* The President's Daughter, protagonist Meg's mother is elected the first female President of the United States. The teenage Meg, frustrated at one point with the constant surveillance, dodges her Secret Service bodyguards and sneaks off for a bit, accidentally creating a massive panic. When she's recovered after a short while, her younger brothers ask if she's grounded, and their parents (rather cheerfully) assure them that "Meggie is grounded until she's fifty."
* The President's Daughter when she's handcuffed in the middle of nowhere. She ends up smashing her own hand to bits with a rock in order to escape. Did I mention that she's already had her knee smashed before this as well?
* The President should have a guard posted outside her quarters 24 hours a day, but Yorick is able to leave and wander the Pentagon freely despite being the most secret object in the building.
* The President Show had a "Make America Great-A-Thon" hour-long special in early April 2018, drive to fund the Mexico border wall...and infrastructure...and whatever else Trump wanted when he got bored with the current focus.
* The President's Keepers came out in late 2017 and was an exposé on then-president Jacob Zuma and the alleged corruption he and many of the ANC party was involved in. Zuma and his loyalist criticized the book and proposed banning it (which isn't allowed by the post-1994 South African constitution). This caused the book to not only get sold out for several printings but anti-Zuma people began spreading the book illegally through social media. The publication of the book and its spread through social media was a major blow against Zuma, and eventually, he had to resign as president.
* The President's Last Bang, a dramatization of the assassination of President Park Chung-hee, takes place over less than a day, the afternoon-evening-night of Oct. 26-27, 1979.
* The President's Last Bang, Army Chief of Staff Jeong Seung-hwa can't get past the gates leading to to ROKA headquarters due to the MPs not recognizing him out of uniform. Which leads to this hilarious exchange.
* The President's Last Bang, in which agents of the Korean Central Intelligence Agency assassinate President Park Chung-hee. After giving his men shoot-to-kill orders, Chief Agent Ju explains that "This is a real situation."
* The Presidents of the United States of America). At the time of their release, the two songs had roughly the same popularity, but only "Peaches" was eligible for the Hot 100. Averted on the Hot 100 Airplay chart, where "Lump" outpeaked "Peaches" by 16 spots, and on the alternative chart, where "Lump" was their only #1 hit.
* The Presidents of the United States of America on the album II. It features Chris Balleau's son talking about a dream he had where he met Magic Johnson.
* The Presidents of the United States of America that's the subject of "Mach 5".
* The President's son Jerry is poisoned with a bacterial strain of meningitis which kills him.
* The President Vanishes, written in 1934, a consortium of business leaders is actively pressing Congress and the President to join the war in Europe, simply because of the business opportunities it will provide.
* the President who introduced it became president — was thwarted by the program's growing popularity.
* The Presidio (while quite sloshed), talks about how he moved to America with his father when he was ten, and fell in love with the country from the moment he saw the Statue of Liberty. He loved his new homeland so much, he joined the Army in order to protect her.
* The press release. The record label asked Chuck Klosterman to write a biography and won him over by promising that he didn't need to listen to the album or talk to the band at all. Chuck leaped at the opportunity and wrote a nonsensical parody of the hagiographies that normally pass for band biographies.
* The Prestige, Alfred Borden's adulterous affair with Olivia is mostly summed up in a single shot of the two sitting in bed while he twirls his wedding ring around his fingers.

* The Prestige, all so a certain magic trick's mystery is never figured out by anyone. This also results in a failed marriage for Borden, leading the wife to commit suicide.
* The Prestige, although that doesn't have anything to do with the plot (apart from being awesome).
* The Prestige, Angier and Borden were on friendly terms at the start of their careers. They both have a love and appreciation of magic, Angier was far more stable and Borden not as obsessed with secrets. But then, things went wrong and their friendship was destroyed after Julia's accidental death.
* The Prestige are very dedicated to creating and performing acts of magic. Part of the reason Angier wanted to steal The Transported Man trick is that it would make a great show. Borden was constantly shown trying to push the limits of the art of magic.
* The prestige classes Daggerspell Mage and Daggerspell Shaper, arcane caster/rogue and druid/rogue hybrids, respectively, that gain special abilities when wielding daggers.
* The Prestige Class Kensai forms a bond with a specific weapon strong enough to imbue it with magical powers. There are also ceremonies that most any character can undergo to magically/spiritually bond with the weapon of their choice. Not to mention Intelligent Items, which, being sentient, can actually form friendships with characters.
* The Prestige, had this reaction to seeing the movie: "'Well, holy shit.' I was thinking, 'God, I like that,' and 'Oh, I wish I'd thought of that.'"
* The Prestige is practically witchcraft even by modern day standards.
* The Prestige: Ricky Jay, the film's magic consultant, is cast an incompetent stage magician.
* The Prestige Robert Angier (aka The Great Danton) performs a trick in which he falls through the stage floor and is supposed to fall onto a cushioned bag, except in his latest performance, the bag had been pushed to the side and Danton hits the concrete floor instead.
* The Prestige Robert Angier does this to Alfred Borden's assistant, both for revenge, and to keep him busy digging instead of going after him.
* The Prestige. She only has a few scenes but it was her accidental death indirectly at the hands of Borden that started the bitter rivlary between Angier and Borden.
* The Prestige, starting with Angier craving justice when, thanks to Borden's incompetency, Angier's wife drowns playing an assistant in a water tank trick. Escalating in one-upmanship, the two frequently seek to better and ruin each other's magic career, which even leads to Angier pushing his assistant Olivia to infiltrate and woo Borden to have a means of striking at him:
* The Prestige This is pretty rich when you consider what Angier's been up to.
* The Prestige, with the added twist of (sort of) not actually being dead.
* The (presumably male) artists of the German Fantasy tabletop roleplaying game
* The (presumably temporary) Batcave was accessed by... unlocking a storage container on a condemned piece of Wayne Enterprises property. To put it mildly, this is the least dramatic thing in the movie.
* The presumed-extinct thylacine (a dog-like marsupial predator from Australia) is thought to have been able to open its jaws up to 80 degrees.
* The preteen Jonathan Joestar and Dio Brando in the first episode of
* The Pretender and the evidence was stolen. After Dylan didn't show up for school that day, Peter panicked and faked his death to buy more time to figure out his next move. Luckily, Jarod manages to expose the firm's activities and reunite the family.
* The Pretender, and then escape just before his former captors at The Center find him.
* The Pretender Becoming Him, because he's afraid that once he starts thinking like a homicidal psychopath he won't be able to stop.
* The Pretender by Jarod to the Centre operatives chasing him both to mock them and to leave clues that their superiors were up to shenanigans behind their backs. Done

more often in the first couple of seasons... later on, Jarod simply calls them to tip them off about their employer's latest wacky hijinx.
* The Pretender did this in the second and third episodes involving Argyle. Both episodes start with Jarod and Argyle in some predicament, then go back and show how they wound up there.
* The Pretender does some pretty dark things to the people who hurt the blameless victim of the week. These often involve making them believe they will die painfully.
* The Pretender, episode "Collateral Damage", Jarod hacks into the villain of the week's Swiss bank account to confirm that he's been receiving payoffs from a drug cartel.
* The Pretender episode "Meltdown", which ultimately reveals that the television in question has been rigged as part of a sting operation to receive specially tailored fake news broadcasts originating from the next room.
* The Pretender, episode "Ranger Jarod": Jarod and Nia admit their feelings for each other in a cabin lit by a wood fire. When they start to act on their feelings, the camera pans away to the fireplace.
* The Pretender had a coroner using an autopsy table to prepare fugu, prompting Jarod (who was working as a fellow coroner in this episode) to ask, "Gunshot wound to the gill?"
* The Pretender had Jarod as a school teacher. To help a student who was being bullied, they prepared a laxative brownie, knowing the bully would take it from the kid and eat it. They also locked all of the porta-johns on the playground except one, so the bully would have to use that one - which they had rigged so the door would fall off while he was in there.
* The Pretender had to wheel an oxygen tank around with him wherever he went.
* The Pretender: In "Hazards", psychiatrist Sydney, in an unusually good mood, tells the standard psychiatrist light bulb joke. ("One. But the light bulb has to want to change.")
* The Pretender institution, claiming he tried to kill himself. This is followed by the psychiatrist in question ranting and raving about not being crazy.
* The Pretender). It's such a simple thing, yet so easy to overlook, that Mr. Lyle can't help but smile.
* The Pretender, Jarod is recaptured by the Centre and subjected to electroshock torture by Mr. Lyle.
* The Pretender, Jarod tries to help a man who collapsed in his room. He dies and Jarod discovers the man was a hitman. Jarod borrows his identity for a while in order to help the people he was hired to kill.
* The Pretender main protagonist has been known to do this several times. In fact, nearly every profession he learns is from something only slightly related.
* The Pretender. Makes her entrance stomping out a cigarette on an oil tanker, shoots at the good guy a lot, has UST with him, and regularly growls at and intimidates most men within range.
* The Pretender movie "Island of the Haunted" has an especially frustrating example of this where Ocee (a blind old woman) interrupts a special moment between Jarod and Miss Parker. Fans were not pleased.
* The Pretender. Near the end of the episode, he uses his cigar to light the fuse on a diversionary explosion, then throws it away and is cigarless thereafter.
* The Pretender presumably has to forge any and all documentation he uses to establish himself in each new identity. Only rarely does this come up in the series — for example, when he's working as a paramedic and a hospital bureaucrat complains that he can't get ahold of Jarod's tax forms. It is alluded to in the series that his personas are temporary at best and would not stand closer scrutiny. He only has to pass the initial check, find what he is looking for and then leave. He does his research in a very low key position and only then assumes the high profile persona needed to accomplish his mission. Once he 'saves the day' he has to leave really quick before he is stopped or the bad guys find him.
* The Pretenders' "977 (New Version)" for those who pre-ordered "Break Up The Concrete" from iTunes.

* The Pretenders: "It's a drug, like any other". The song is about a manipulative lover using withdrawal to control the singer, who realises this but can't do anything about it.
* The Pretender's Jared occasionally used a cover identity of "Jared Earp, U.S. Marshal".
* The Pretenders' "Watching the Clothes" falls pretty squarely in the "just bored" camp.
* The Pretenders, who shot himself up with heroin in the tub, then passed out and drowned.
* The Pretender: The Centre won't accept Jarrod's resignation although he doesn't exactly try and stay below the radar after he escapes. Plus he was never an employee, only a company asset.
* The Pretender. The protagonist's first name is always Jarod, but his last name varies from episode to episode.
* The Pretender) to a man, apparently as an acknowledgement that it's not worth the effort of giving them real names.
* The Pretender, when he watches Rachel transform into an eagle, he gets waaaaay too into it.
* The Pretender when she dislocates her own thumb to allow herself to slip out of a set of handcuffs.
* The Pretender who gets recruited by Jarod to help him for the episode.
* The Pretender with him. The boss mentions the last member of the team is a one-armed safecracker, due to arrive by bus that day. Jarod intercepts the safecracker at the bus station, tells him the police are onto him, takes his tools, gives him a wad of cash and a new target (The Centre), then takes his place on the job.
* The Pretender would face this kind of challenge when he went undercover as a shady occupation like hitman or bank robber. He'd always find a way to finesse the issue until he could bring the actual criminals to justice.
* The Pretty Cure McLaughlin Club, as its author explicitly puts himself in the role of the unnamed moderator.
* The pretty grim Italian Fairy Tale "The King of the Beasts", the titular, apparently-human king is actually a cruel cannibal who turns people into large animals and occasionally turns them back into humans to eat them. At one point the protagonist enters in his private room and found it full of dismembered arms, legs and still living heads constantly lamenting their condition.
* The Pretty Guys Are Stronger: The pretty effeminate dude is actually the strongest and toughest one of the bunch.
* The Pretty Guys Are Stronger: Think pretty boys are pansies? Not these guys, they're tanks compared to the more monstrous looking fighters.
* The Pretty One, complete with a lonely circle of folding chairs in a gymnasium, and the standard introduction.
* The Pretty One, Laurel attempts this after her sister, Audrey, dies in an accident and a mixup ensures that everyone thinks Laurel was the one who died.
* The Pretty Reckless, as well as the song "Heaven Knows" on the same album.
* The prevailing academic consensus claims that Taoist alchemists in 9th Century China tried to create a potion of immortality using sulfur, saltpeter, and charcoal; while the potion failed, they invented something very useful - gunpowder.
* The prevailing religion of the world is Andrastianism, which centers around this trope. According to the church's beliefs, Andraste was, several centuries prior to the games, a mortal woman whose purity and sweet singing attracted the attention of the Maker, the creator god who had turned his back on humanity when they committed the mortal sin of trying to break into his realm. Andraste's goodness induced the Maker to ask her to be his bride; she agreed, but only after the end of her mortal life, as she was already married to a regular man and she didn't want to forsake him. She effectively spent the remainder of her (not very long) life waiting to ascend to his side, and in the meantime got to work on persuading humanity to embrace his worship once more.
* The prevalence of disasters centred on New York and Los Angeles are
* The prevalence of such cards and strategies which can turn an apparent lead or

advantage around in an instant usually cause experienced players to pretty much expect that the other player may pull this, to the point where any lead or impending victory usually means little until the game is actually won.
* The prevalence of this trope in violence-based games is lampshaded in the
* The previews for episodes 14, 19, 22/22', and 25 feature a lot of rapidly cycling images.
* The preview trailer for The Sacrifice DLC shows Zoey handing over a sword to Louis, despite the fact that you can never give weapons to another player in game unless you use a mod.
* The preview trailers for Krieg the Psycho, the sixth confirmed playable character in
* The previous arc had already left the manga with a mixed reception, but it was immediately followed by the even more poorly received Les Cuisiner Noir Arc, which introduced a group of
* The previous DM erased all of Trishia's memories (which he created in the first place) and made her Dwarven Defender 00 (D.D.) so she could serve the next
* The previous Earth Kingdom Avatar, Kyoshi, is the only Avatar who’s confirmed to have been a mother. She also had a ferocious reputation as a
* The previous edition, 3.5, had allowed many third-party companies to publish and use much of the intellectual property, including the mechanics, of
* The previous entry on IWGP fan votes doesn't mention who the number one contender to Okada's belt was for a reason. No Limit were once among New Japan's most popular
* the previous game's makes his appearance in this game, he goes along with this narrative by battling the player in a giant concert stadium.
* The previous generation characters (Lily, Snape and the Marauders) had
* The previous generation of House Tully only had Catelyn and Lysa since their
* The previous governess of the novel's two children was apparently a great believer in this trope, making up all manner of monsters to threaten Twyla and Gawain into proper behavior. Susan finds it exasperating to no end, having to beat these prohibitory monsters into submission once she becomes their governess.
* The previous installment's aesthetics continue, though Maliwan is the only faction focused on and their sleek lines are rapidly covered with
* The previous Iranian government (led by infamous president Ahmadinejad) was notorious for this. In a very obvious example, they reported the unemployment to have decreased by 50% while other independent sources suggested otherwise. Later it was discovered that they had changed the definition of an "employed" person from "one working at least 20 hours a week at a paying job" to "one working at least 2 hours a week". By removing the "paying" condition and cutting the time to one-tenth, they had managed to include people doing a variety of voluntary works and kids helping in family businesses a couple of hours each day (and still only managed to reduce the unemployment percent by 50% which goes to show how messed up their work was).
* The previous iteration of the game, Tales of Middle Earth, featured the sorcerer class, which gets more spells and magic power than other mages can ever dream of but also suffers up to a 50% HP cut.
* The previous Legate Joshua Graham, also known as the Burned Man, was also horrifically terrifying in battle, though his poor understanding of warfare leads him to be more of a General Ripper.
* The previous lord of the city kept all of the backstabbing, ninja-assassin-happy aristocracy from killing him by pretending to be senile so that they instead played an elaborate game to attempt to influence the old man into ruling in their favor.
* The previous mode of locomotion, the Starslip Drive, worked by inputting the destination and flipping you into an alternate universe where you were already there.
* the previous movie, Goofy is initially in catatonic shock when he discovers that Max had been manipulating him into going to Los Angeles, which gives way into legitimate anger when Max wastes a second chance to prove himself worthy of trust.
* The previous night, Nanase tries to wake up Ellen by rubbing her nose with her

fairy tail. The resulting sneeze is off-panel, but was apparently messy enough for Nanase to need a bath in the sink.
* The previous season finale and the season opener destroyed all of Hank and Deans backup clones, allowing them to finally start aging and developing their own personalities After this season, the show became more character-focused and starts setting up ongoing story arcs.
* the Prevue Channel channel) used to play Muzak while it scrolled through the TV listings available from the viewer's cable or satellite provider.
* The Prevue Channel showed a rolling scroll of TV listings, run by the viewer's cable or satellite provider using an
* The Prevue Guide, which was an auto-scrolling Cable TV schedule listing grid in network form, was nothing if not hypnotic, especially for its synth music and cheesy ads. It also boasts a
* The pre-war T4 program, in which Hitler officially authorized the euthanasia of disabled individuals, had been instructive to him: once news of the program had come out, there was outrage among a sufficiently large segment of the German population about it. After that he made a point of not
* The Prey after she steps on a snare. As she is pulled up in the air, she swings headfirst on to a tree.
* The preying mantis lady in the episode "Teacher's Pet" could be considered a sort of succubus.
* The Prey loved his axe so much that he provided the previous page quote.
* The P.R. Girls, Sue, who is the head of the department of public relations for a major Hong Kong hotel, is woefully called upon by a Chinese girl who keeps saying, "Oh, Miss Sue!" This causes people to give her the nickname "Missue" which she hates.
* The price and difficulty of importing foods is highlighted in one second-season episode when Garibaldi tries to obtain certain Italian ingredients (olive oil, garlic, butter, and anchovies) for a
* The Price Is Right (1972-present) is a more tricked out version of a 1950s game show of the same name. The original was mainly limited to bidding on prizes, while the current version used that as a launching pad for a wide variety of pricing-related games.
* The Price Is Right. A big prize is locked behind a vault and contestants have to use 3 numbers on the vault by guessing the price of a small item. (Ironically, one contestant who the game in the 80s was a locksmith and another was a police officer.)
* The Price Is Right, a contestant stood to win bonus money by selecting which out of three glasses of champagne was most expensive through tasting each. At the end of the show as host Bill Cullen says goodnight, he tosses one of the glasses over his shoulder and it shatters against the turntable wall behind him.
* The Price Is Right, a contestant that loses their pricing game still has as good a chance of making it to the Showcase as one who wins. However, turn order in the Showcase Showdown is determined by previous winnings, and going last is a significant advantage, since you know exactly what you have to get to win, and you win by default if your opponents both go over before your turn.
* The Price Is Right and as a companion piece, no less), the connection may become clearer once again.
* The Price Is Right, and there was one instance when someone who bid $69 got on stage because everyone else overbid.
* The Price Is Right, announcer Rich Fields inhaled helium before reading the prize copy as part of a Showcase skit. He then did it again for his signoff.
* The Price Is Right, Bob Barker told the contestant that the number blocks that they had to push into a box would go to China.
* The Price Is Right by pricing various items in his house, and picks up the vase... with predictable results.
* The Price Is Right (Check Game and Credit Card) have been "withdrawn". Although neither game has been played in years, the staff has not officially declared either game retired — but then again, they're also making no claims of either game

coming back. So as far as they're concerned, both games may or may not be retired. Check Game returned in 2013.
* The Price is Right Decades (you have to beat a preset "leader", and are forced to go again if you tie on the first spin).
* The Price Is Right did it with the Showcase game at the end of the show.
* The Price Is Right: Drew Carey has been known to do this on occasion when throwing a Showcase Showdown segment to commercial; usually this will be the first one, right after the ticket plug.
* The Price Is Right, Drew Carey often refers to Rachel, the model who usually stands next to the car, as "Crazy Rachel".
* The Price Is Right fan forum golden-road.net. The forum was once so popular that several staff members posted there, even former producer Roger Dobkowitz.
* The Price Is Right forced it off the air for repeatedly breaching the prize limits.
* The Price Is Right: From 1956 to 1961, they used "Sixth Finger Tune", which was taken from a stage show called "Six Fingers For A Five-Fingered Glove".
* The Price Is Right from 1986 to 2003, had previously attended a taping of the show in its early years to seek advice from original announcer Johnny Olson on how to find work as a television announcer.
* The Price Is Right from NBC to ABC in 1963, a celebrity was employed to play for members of the studio audience on the nighttime show. The daytime show began employing celebrity players in March 1964. Recently on the current show with Drew Carey, celebrities were used on special shows to help contestants win their pricing game.
* The Price Is Right hallmark that died off in the late 90s. The show also began swapping out old-fashioned game show props (trilons, eggcrate displays, etc.) for modern tech.
* The Price Is Right has several games where contestants can keep risking their luck for a bigger payout or stop and walk with what they won. There have been many times where the audience pleads with the contestant to stop, only for the contestant to keep going and lose everything. Other times there will be contestants that will listen and quit early to keep what they won.
* The Price Is Right have retired various pricing games due to various staff members disliking them. Victims of this include Add 'em Up, Buy or Sell, Give or Keep, Joker, and Telephone Game (actual quote from a staffer: "It was lame!").
* The Price Is Right included cents in their retail prices. The contestants' bids did not reflect this unless the item up for bids—a light bulb, a pair of kids' roller skates, et. al.— required it (such an item would lead to a big bonus for the winner).
* The Price Is Right in Season 37 right after receiving foot surgery. He spent these episodes walking with a cane, also coming up with various methods to keep himself off that foot whenever possible (such as the models carrying him out on the first Item Up for Bids, and/or handling props on the pricing games so he doesn't have to walk over to them). In Season 40, shoulder surgery led to him spending several episodes in a sling.
* The Price Is Right, insists that his name be kept out of contention for Outstanding Game Show Host when the Daytime Emmys are handed out.
* The Price Is Right instead said that it was part of a corporate policy that they didn't want announcers appearing on-camera anymore. In reality, Rod's disappearance was mandated by host Bob Barker (who was also executive producer at the time) after he and Rod had a salary dispute. The non-appearances continued through the rotation of substitute announcers after Rod's death and well into the era of his successor, Rich Fields. Drew Carey took over as host in season 36 and about one year later, Rich started appearing on-camera (as does his successor, George Gray), throwing that "rule" out the window completely.
* The Price Is Right is shown an hour earlier actually got to see it. For that matter the first playing of "Vend-O-Price" was missed by everybody for two different special reports: one for the Pope's visit to the US on the East Coast, and one for the resignation of John Boehner on the West Coast.

* The Price Is Right (it was a demo to US state lotteries to base their own game shows off of).
* The Price Is Right—offered a kitchen sink from the H.R. Schriner Co. A legitimate prize worth about $450, this had a teakwood base with cabinet space below the sink basin, and counter space was included. (Schriner also had a burner base that was sometimes a prize.)
* The Price Is Right once offered a trip to "Boguslovania" as an April Fools' gag showcase.
* The Price Is RightOne frequently cited example occurred on the June 1, 2011, episode, where a contestant playing the Race Game — where the objective is to match four price tags with their correct prizes in a 45-second time frame and correct any mistakes if time allows — was told by Carey to "throw" the tags in front of the prizes she thought they matched. Carey meant, "place them quickly on the podiums, because you have just a short amount of time to play this game," but the contestant literally interpreted the instructions and threw the price tags on the floor in front of the prizes. When confusion reigned, it was ultimately decided that the contestant should be given the benefit of the doubt and was given all four prizes.
* The Price Is Right : On one episode of the syndicated night-time series in 1976, host Dennis James yelled out "THERE GOES FRITZ" after the contestant lost at Cliff Hangers when the mountain climber when tumbling over the cliff, not realizing that model Janice Pennington's husband Fritz Stammberger had disappeared while mountain climbing in Afghanistan. This upset Janice so much that she ran off and remained backstage crying as she did not appeared on camera for the rest of the episode.
* The Price Is Right on the site Golden-Road.net chime in on broadcast recaps using cutesy nicknames for the show's pricing games ("Clocky" for Clock Game, "Baggy" for It's in ihe Bag, "Cliffy" for Cliffhangers, etc.).
* The Price Is Right premiered in 1956 to universal critical lashing, equating it to the end of civilization as we know it. Almost 63 years hence, critics still can't touch it.
* The Price Is Right presents seven $1 bills to the contestant who must predict each number in the price of a car with $1 deducted for the difference in each number.
* The Price Is Right pricing game "1/2 Off", there are 16 boxes, one of which has $10,000 in cash. A player can remove half the empty boxes at a time if they can correctly determine if certain prizes are listed at full-price or half off, and narrow down to the box containing the cash.
* The Price Is Right remained steady. NBC announced the show's end in mid-May, only for CBS to renew it the next day. After NBC's last show on June 30, the show took a two week hiatus before premiering on CBS July 17; Bob Goen was chosen as the new host on July 7. The show's subsequent ratings never approached that of the NBC era, even after hopping back there in January 1991, and it was cancelled September of that year.
* The Price Is Right: Seasons 37-39 were accused of this, not entirely with the prizes offered but prizes being offered pretty much only as "show" and the pricing games themselves set so hard that, short of a lucky or exceptionally skilled contestant, nobody would win it.
* The Price Is Right: Several pricing games – those involving the pricing of groceries or small items – have this clause if the contestant is wrong with all questions or fails to meet any conditions on his/her given choices (usually three), and the contestant had to earn all picks. A few examples:
* The Price Is Right: Several pricing games during the Drew Carey-era have had these:
* The Price Is Right simply for an Audience Match answer being revealed.
* The Price Is Right than NBC was willing, so the game lived on from a new network.
* The Price Is Right used to limit contestants to one appearance in a lifetime on the show, whether they played a pricing game or not. Since Drew Carey became the host in 2007, however, contestants can return 10 years after they first played, which such contestants often reference on their t-shirts and/or when they chat with

Drew after getting out of Contestant's Row.
* The Price Is Right: Various showcase skits, including "The Models Babysit (model's name)" and "TPiR Nursery", where the spoiled child(ren) pout and cry for items... which of course were prizes in the showcase being bid on.
* The Price Is Right was created way back in 1956 by Bob Stewart, who infrequently turned up, notably on the nighttime show, to assist in staging merchandise the contestants were bidding on.
* The Price Is Right were introduced when R. Brian DiPirro took over as director. They're usually themed after the pricing game or prizes being offered. Among the more notable:
* The Price Is Right wheel is not beeping when it spins. The host (Bob Barker/Drew Carey) would have the audience beep for the wheel.
* The Price Is Right when four contestants are required to bid on an item to determine which of them will play the next pricing game. One typical action is for a contestant to bid one dollar, in the hopes that most of the other contestants will go over the actual retail price and they'll win by default. Another trick usually employed by the last contestant to place a bid is to give a figure one dollar higher than what they think is the best bid, with the intent of beginning just one dollar closer than their opponents.
* The Price Is Right, where the winner could be seen in a party scene in the episode shown later in the day.
* The Price Is Right). While the first version was released in 2008, the graphics and music heavily suggest it was two years late.
* The Price Is Right while very few of the original eps of the others exist.
* The Price Is Right would dictate that the next person bid $X+2 or $2.
* The priceless Fairy Castle dollhouse assembled by Hollywood actress Colleen Moore is an invoked example: the professional architect who designed it wanted its layout to be whimsical, not functional. This includes
* The Priceline Negotiator went down in a fiery explosion but somehow managed to come back.
* The price of contracting with the Shinigami is that your soul will be consumed and reside permanently within its stomach. This prevents the contractor from ever moving on to the Pure World.
* The Price of Flight in the air and on the ground for a week. She emphasises the lack of sleep, impossibility of getting much more than a cursory wash, the constant vigilance, and the death of comrades she will never see again.
* The Price of Flight of the time, if necessary, they are a combat Air Force. Their principal weapon in air fighting is the directed fireball. Air witches receive a thorough training in generating fireballs and in accurately aiming them as air-to-air missiles — fireballs can also be employed for strafing surface targets, with a devastating result.
* The Price of Flight sees Captain Olga Romanoff in charge of the Ankh-Morpork City Air Watch. She discharges her duties conscientiously but misses the old days when the Air Watch was much smaller and she was just a lance-constable.
* The Price of Freedom are American freedom fighters who wage a guerrilla war against the invaders.
* The Price of Freedom. If that's what communists did, wouldn't the Nightie Knights have switched their burning crosses for red flags long ago?
* The Price Of Magic takes place after Harry's death, and stars him in a romance with Snape.
* The Price Of Milk) skinny-dips in a vat of milk with his girlfriend.
* The Price Of Oranges rhyme, he responds with the rest of the verse. The dealer thinks it's this trope and takes offense.
* The Price of the Stars, Beka Rosselin-Metadi is targeted by assassins and has to fake her death to throw them off. She then creates a cover identity for herself that is as different as possible from Beka Rosselin-Metadi in several respects, including presenting as male.
* The Price of the Stars, while making the getaway from their rather messy kidnapping, star slingshot included to reach jump speed.

* The Price of the Wish, both Death and Fate make a non-speaking appearance.
* "The Price of Tomato Juice". Radar discovers that Colonel Potter loves tomato juice. Requisitions officer Major Burns refuses to order any unless he gets a pair of nylons. Corporal Klinger has a pair, but won't give them up unless he gets a two day leave in Tokyo. Colonel Potter agrees to give Klinger leave, but the commanding general in Tokyo wants Major Margaret Houlihan to go to Tokyo to be with him. Luckily the Major is entirely willing to cooperate.
* The Price, the main character realizes that the creature coming for them is the Devil because it has red eyes. While he's looking through night vision goggles.
* the price whether they are Orks, Humans, Eldar, whatever. It is the most efficient way to go about doing things and anyone who has played for a long time will have closets full of hoarded spare parts that they can cobble together into just about anything.
* The pricing of wands is confusing, however. Despite their importance, wands are not expensive items; Ollivanders sell them at 7 galleons apiece, which is the equivalent of £34.51. Unlike houses, wands last for a
* The prickly pear cactus was this in Australia for a time. Originally introduced as an effective and self-repairing barrier for large cattle stations it eventually grew out of control and choked off the fields it was meant to guard. It was finally brought under control by the introduction of the Cactoblastus moth which eats it (and unlike the infamous cane toad, local insect eaters will eat them just as readily as native insects). A rare case of introducing a species to Australia that actually
* The Pride. Harry Potter, Hermione Granger, Ron and Ginny Weasley, Neville Longbottom, Luna Lovegood, and Jasmine Kenway. The next generation of badasses, the include the strongest Veela in all of existance, the Princess of Johto, several future Gym Leaders, the brightest girl in her generation, the greatest hacker in all the world, and Harry Potter the Master of the Deathly Hollows himself.
* The Pridelands due to time and troubles implementing four-legged characters.
* The Pride of Parahumans, parahumans were made to mine asteroids when baseline humans wouldn't sign the legal waivers. After they obtained human rights and became independent many parahumans still pursue that profession. Protagonists Argentum, Aniya, Cole, and Denal are freelance prospectors at the start of the novel.
* The Pride of Parahumans: The Ceres Directorate doesn't even recognize the right to self-defense, Vesta does but the law there is practically feudal. The protagonists were Cerean until they splattered a wanna-be pirate who was attacking them. It hurt that he was related to an executive, so they moved to Vesta.
* The Pride of Parahumans the protagonists' ship uses coilguns to deflect meteors because "hitting a stray rock with a fast-moving iron slug tended to get it out of the way a lot faster than melting it with a beam of concentrated light." Also, they're cheaper.
* The Pride of Parahumans the titular beings are produced by printing transgenic stem cells over a titanium alloy skeleton.
* The Pride of Parahumans was intended to be an anarchistic utopia without police, but after the life support systems started breaking down from neglect a number of "Protectors' Guilds" emerged to try and bring order to the chaos. Now they run the asteroid along almost feudal lines.
* The Pride of Parahumans who have in essence carved out petty fiefdoms in the various habitats.
* The Pride of the Yankees born!", whose comedy Lou Gehrig says he will look forward to watching. When Jay attempts to set the record straight, his show is pre-empted.
* The Pride of the Yankees plays Lou Gehrig in one of the most popular sports biopics ever made.
* The Pride That Never Was, Shani and Kovu are love interests despite being first cousins once removed.
* The Pride victim has her nose cut off (to spite her face) and has a bottle of sleeping pills glued to one hand and a phone to the other, giving her a choice between committing suicide by overdose or calling for medical attention but living

with a permanent and obvious disfigurement. She chooses the former.
* The Pride, where Owen's parents tried to have him "cured"... because he was obsessed with becoming a superhero, even before he discovered that he had superpowers. Surprisingly, they had considerably less of a problem with the fact that he was gay.
* The Priest and the Acolyte and lived a quiet and apparently blameless life, well-liked by his parishioners.
* The priest from "Demonology" could also count, since he was killing the men believed to be responsible for the death of a fellow priest and close friend of his.
* The priest's ability Mind Control is essentially this, except temporary. Very few priests lorewise display the ability to do it so it clearly takes a high power level to pull off successfully. Theoretically it could be permanent: but doing that on an unwilling target would require absurd amounts of power.
* The priests of the city of Lhauric ride razorcats, huge tiger-like beasts with spikes growing from several parts of their bodies.
* The Priest, the Scientist, and the Meteor has dinosaur ghosts out for revenge, because humanity didn't share its ice cream with them.
* The Priest, the Scientist, and the Meteor has dinosaur ghosts who have seized control of a meteor and are planning on crashing it into Earth... in revenge for humanity not sharing its ice cream with them.
* The Prima Donna: An overbearing, egotistical, and entitled actor/actress.
* The Primadonna egotistical, always expecting others to bow to her demands.
* The Prima Donna - In a series with an actor as the protagonist, they may be another actor as an antagonist.
* The Prima Donna, so falls under this until her change from the spirits.
* The Prima Donna: You bozos aren't anything special! Only I am because I'm the star of the show!
* The Primal Order is a "capsystem", a set of rules that can be applied to any RPG system, that outlines how to play deities, and is often considered the best god RPG system around.
* "The Primal Solution", a novella by Eric Norden. The central character somehow takes over the body of a young Hitler. After tormenting him for a while, the protagonist prepares to force Hitler to commit suicide. However, Hitler reasserts control just before throwing himself into the river. In shock over the whole experience, he wonders why the protagonist, who had identified himself as Jewish, did these horrible things to him. In a combination with the
* The Primal Solution in the Vienna of the early 1910s. Resolved to force Hitler into suicide, the vengeful professor can't resist humiliating him first and forcing him to drink sewer water in front of surprised passersby, before making him jump into the Danube - but in the moment before drowning, Hitler regains control of his body and returns home shaken. The Professor is trapped inside Hitler's mind, but is able to "hear" him think "The Jews? Why did the Jews do this to me? I have never harmed them!". Able to access Hitler's memories, the trapped Professor suddenly realizes that until this moment the young Hitler had not at all been an anti-Semite and was in fact on good terms with some Jews. Only because something inexplicable had entered Hitler's mind - something which totally hated him and was implacably bent on his destruction, and which identified itself as being Jewish and acting on behalf of all Jews - did he become the genocidal Hitler known to history. Never daring to tell anybody of this presence in his mind, for fear of being considered insane, Hitler would gradually develop the idea that only by killing all Jews would he be free of that haunting presence. In short, the very act intended to avert the Holocaust ends up being its direct cause.
* The primal spirit appears as a giant Hyena and the Soldier looks like Faith in BDUs and a ponytail.
* The Primal Zerg that remain on Zerus, unlike the Zerg that were integrated into a
* The Primarch Ferrus Manus killed a silver dragon in a lava flow and the dragon's metallic skin fused to his arms, covering them with living metal. With his iron

hands he could forge weaponry by working the metal with his 'bare' hands and never needed gauntlets in battle, since his hands were already invulnerable. His Space Marines, the Iron Hands legion, have developed a habit of intentionally replacing parts of themselves with cybernetic augmentations in homage to him. However, Ferrus didn't like his metal arms, precisely
* The Primarch Lorgar of the Word Bearers was described as such by fellow Primarch Roboute Guilliman.
* The Primarch of the Emperor's Children, Fulgrim, is a consummate Master Swordsman in keeping with his perfectionism. Both times he dueled a fellow Primarch he has come out on top: Ferrus Manus lost his head and Roboute Guilliman got a
* The Primarchs. All of the above? Derived from the Primarchs' genetic material. And they were created from the Emperor's genetic material. While the details of their biology remain unknown, the Primarchs' and the Emperor's superhuman abilities are signs that beneath the surface, their bodies were
* The Primarchs, grown from the Emperor's own genetic material, were meant to be his greatest generals who would aid him in galactic conquest. The Chaos Gods threw a monkey wrench into that plan by scattering them across the galaxy, denying the Emperor the chance to raise them all himself and exposing them to radically different upbringings. The Primarchs' gene-seeds in turn are used to transform ordinary humans into Space Marines.
* The Primarchs Rouboute Guilliman and Alpharius clashed over their respective legions' approaches to waging war. The Ultramarines favoured a sophisticated centralised command and control structure, with lots of discipline and professionalism, adoption of carefully considered battle plans, and an aversion to civilian casualties. The Alpha Legion couldn't be more different: a decentralised command which made them immune to the
* The Primarchs were this for the Legions under their command. Though most of the Loyalist Primarchs were definitely this trope (Mainly Sanguinius and Vulkan), the only Traitor Primarchs that seemed to have any sort of care for their Legions were
* The "primaries", so-called because they're the primary weapons of the ships. When some new (readily portable) tech comes along, those become the primaries and the former primaries become secondaries (or tertiary, and as far down the list as you care to go before they're no longer worth the mass/space to take along). The culmination of this (which happens even before they start throwing planets around) is the one-shot primaries, which are the strongest beam weapons available deliberately overloaded so that they emit one unbelievably strong pulse before exploding. This was initially developed by some Boskonian genius who realized that trading one gun and its crew for one enemy ship and
* The Primaris Marines engineered by Cawl have three additional organs. They have metal coils that reinforce their sinews to enhance strength, a brain implant that improves the performance of the other implants (which is actually half of the original God-Maker organ the Emperor used in the creation of the Primarchs — the plans for the other half were destroyed), and a heart implant that pumps the Primaris Marines full of stimulants when they are on the brink of death to jumpstart repair of bone, muscle, and tissue.
* The Primaris Marines introduced in Eighth Edition were created to aid the Imperium in its darkest hour. The Space Marine creation process was modified by Archmagos Cawl to include parts of the Custodes' creation process. The Primaris Marines have three additional gene-seed organs: metal coils that enhance their strength and endurance, half of the same "God-maker" organ that was used to create the Primarchs, and another organ that pumps them full of stimulants when they are near death. They are also overall bigger, stronger, and faster than baseline Space Marines.
* The primary aspect of the Ancients non-interference pact is long as there are no ascended powers being used. That seems reasonable. Yet when
* The primary bestiary in the sixth dungeon, Fire Sanctuary, consists of dark-purple versions of enemies (Cursed Spume, Dark Keese, Dark Lizalfos), while the boss Ghirahim (
* The primary campaign setting, Golarion, has different nations that could be

considered a
* The primary difference is in the definition of "necromancer". Wizards excell in manipulating energy and making living things dead or dead things deader. Clerics are better at raising armies of darkness and sweeping the world with a zombie plague.
* The primary example is Robin Brooks and Liz Warner. Though Liz eventually admits that she always knew that her relationship was Don was really a rebound after
* The primary example is the title character himself, Aruto Hiden. After being told that the Zero-One System has been taken as far as it can go, Aruto sits down and designs a brand-new belt, resulting in his upgrading to Kamen Rider Zero-Two.
* The primary Human warships seen fit squarely within this trope, with the minor exception of the
* The primary kaiju home world and setting for the Godzilla series in
* the primary lens of a huge gravitational telescope. This idea is called a solar foci telescope.
* The primary motivation behind the first battle with Melody is Clive's speech on true beauty. In the battle, she will
* The primary point of any of Cain's altruistic acts, heroics, etc. are to stop Guard units he is leading from shooting him in the back (as happens to other Commissars). Or so he insists, anyway.
* The primary purpose of those pits was to catch rainwater to prevent it from ruining the tombs, by the way. Catching graverobbers was just a side benefit.
* The primary reason for this is the practical impossibility of capturing ships in the game. The pirates are pretty much limited to blowing their prey up and then scavenging the debris for anything of value. Most of the valuable cargo is destroyed in the process. The only reason piracy is even viable in the game is because you have no fuel, maintenance or living costs so your only expense is cheap ammo.
* The primary skill shot is the "F" in the F-A-R-T drop target bank, complete with a huge "Skill Shot" light pointing to it. It begins at 500,000 points and increases by 250,000 points each time the player can accomplish this per game.
* The primary style uses sprite sheets that give the main characters a
* The primary villain of the series, Megabyte, tries repeatedly to take over Mainframe, but never succeeds (though he does come close.)
* The prime culprit in the tabletop game itself is possibly the Eversor assassin, whose
* The prime directive is handled differently by many people in the Federation. Generally, it's accepted as an underlying principle for self-determination (the Federation does NOT interfere in internal wars or politics of other civilizations, even if their own interests are at stake). But in the field and on the front-lines, it is commonly believed that, like principles such as "do not lie" and "do not kill", there are situations where morality calls upon one to violate one principle to uphold another (such as helping evacuate people from a pre-warp planet doomed by natural disaster when they call out desperately for help). The theory in the instance of people actually ASKING for help is that it's OK to provide limited assistance in a life-or-death situation, but it's not OK to make global changes in their culture that go beyond making sure they don't all die. Even then, it's best to do it in such a way that they won't realize that outsiders did it.
* The prime example of this was Herman von Strab, Overlord of the planet of Armageddon. An
* The prime example that the whole series explores in his descent to murder and monstrosity is
* The prime example would be the Klingons. They talk a lot — an awful lot — about how they are a
* The Prime Material Plane: Also alternatively known as either the Prime or the Material Plane, this is the "normal" reality, the mundane level of existence where all of the various setting worlds take place, the physical universe. The setting
* The Prime Minister and I, Da-jung envisions her, the PM, and the assistants all tied together and hauled into jail for being in a contract marriage.

* The Prime Minister and I. Rather than asking the Prime Minister newsworthy questions, she asks him what kind of underpants he wears and his favorite flavor of ice cream then writes an Article tentatively titled, "The Prime Minister Who Wears Briefs".
* The prime minister of the Seven Kingdoms is called the Hand of the King.. He is supported by a "small council" (privy council) of officials such as the "Master of Coin" (treasurer), "Master of Whisperers" (spymaster), and "Master of Laws" (attorney general).
* The Prime Mover Driver and the Forklift Operator both have the same scream. This was from
* The Prime Mover, where Jimbo uses his ability to move the dice as Ace pleases.
* The Prime of Ambition. A to-do list promising reanimation of the comic in the first days of October appeared only 16 Sep 2011 It wasn't, but at least to-do list got regular updates.
* The Prime of Miss Jean Brodie has only one Scottish actor in the main cast - Gordon Jackson. Maggie Smith, Pamela Franklin and Celia Johnson are all English but speak with Scottish accents. Robert Stephens, who plays Teddy Lloyd, keeps his English accent.
* The Prime of Miss Jean Brodie (the stage and film adaptations change things to a more linear structure). The protagonist is a respected teacher at a conservative school with her own special club of girls she motivates. Although the headmistress tries to dismiss her, Jean Brodie is almost untouchable. She also has two men pining after her. But, due to her own arrogance and desire to teach what she wants, she ends up wrecking her students' lives - she grooms one girl to have an affair with a teacher, one ends up running off to Spain and dying in the Civil War, and another eventually dies in a fire because she's too emotionally stunted from the bullying she received. Jean's faithful pupil Sandy eventually betrays her and she ends up dismissed, and her two suitors end up with other women - fed up of her mind games.
* The Prime of Miss Jean Brodie, the title character actually grooms one of "her" students (Rose) for an affair with the school's art teacher (Mr Lloyd). It is ultimately another student (Sandy) who takes this teacher for her lover.
* The Prime Sentinels are like this. While other types of Sentinels are stock
* The Primes of Sanctum use a similar process, but take it to straight-up
* The Primettes were conceived by Motown Records founder Berry Gordy Jr. as the distaff counterpart to The Primes. The bands were later renamed
* The primitive Argentinian theropod Herrarasaurus from the Late Triassic Period could be considered one of the Ur-Example of dinosauria.
* The primitive Ostron tribes of Earth worship the Unum, a powerful intelligence who resides in the Orokin tower in Cetus. What exactly the Unum is remains unclear, but her power is very real, and she prevents any violence in Cetus.
* The primo example is P'Gell. Her usual modus is to find a shady rich guy, work her wiles, get married to the same, and have the guy either disappear or get busted.
* The Primordial Autochthon, on the other hand, serves as a pocket dimension outside of Creation (he sided with the gods, so he escaped mostly unscathed). He serves as home to the Alchemical Exalted, beings created from the
* the primordial Mesopotamian Goddess of Chaos who wants to exterminate all life so she can go through the experience of giving birth to all life once again.
* the primordial race of demons spawned by the Abyss eons before life arose on the Material Plane, tend to be this due to how twisted, horrifying and alien their forms are to more recent lifeforms.
* The Primordials, and the various beings that were once Primordials (the Yozis and the Neverborn), who pre-date Creation and all of the concepts that make it up, since they're the ones who, well, created everything. Among the Primordials, Oramus predates even his own existence. To be more precise, he is the prototype and represents the
* The Primordials technically can't suffer from this, if only because of
* The Primrose Path, about a teenage girl sexually abused by her rabbi.

* The Prince (2021). It eventually released on July 29, 2021, after Prince Philip left the American public conscious.
* The Prince advises not to do this more than once. As it foments rebellion.
* The Prince & Me the scene where Julia Stiles's character is giving an oral presentation and in the middle of it realizes her love for… well… the Prince.
* The Prince and his three attendants, one of whom is named Schlorb, crash land on a planet. Tek Jansen arrives (and to clarify arrives means appear out of nowhere with a time machine) from the future to protect them. Then a second Tek Jansen arrives from further in the future and shoots the first Tek Jansen. Tek explains that in five minutes the first Tek would have eaten a couple of berserker berries, gone insane, and attacked them. He then eats the berries and goes insane. A third Tek Jansen arrives from sometime and shoots the second Tek. He says that Schlorb explained everything to him, but does not remember when. A fourth Tek arrives from the future and sends the third Tek into the past because Schlorb has an important message for him. A fifth Tek accidentally arrives naked with some lady on top of a console. The fourth Tek leaves (and to clarify leaves means disappear with the time machine) with them. A sixth Tek walks on screen with two clean shirts and does not recognize the Prince or his attendants. A seventh Tek arrives and shoots the sixth Tek because one of the shirts had too much starch in it. The seventh Tek is then eaten by a slime monster. An eighth Tek arrives in some sort of armor and asks if he was eaten by the slime monster yet. The kids say yes and Tek leaves frustrated. A ninth Tek arrives and says that he is pretty sure that he needs to take Schlorb into the past, and proceeds to do so. A battered tenth Tek arrives and warns the kids to stay out of caves, then leaves. An eleventh Tek arrives and says he knows of a great cave that they can camp out in. A twelfth Tek arrives, shoot the eleventh Tek, hands the group an egg beater, tells them to hand it to the next Tek that appears, and leaves. The Prince points out that this is pretty fucked up. A thirteenth Tek arrives fighting a giant egg. Tek grabs the egg beater and leaves, still fighting the egg. A fourteenth Tek arrives and explains that all this time travel has opened a chrono-rift in the space-time continuum. He is going to go fix it, but he wants the kids to do exactly what the next Tek tells them to. He leaves. But then a large group of Teks arrive all pointing in different direction. They proceed to fight each other, and the episode ends on a cliffhanger. You got all that?
* The Prince and the Dressmaker: A story about a prince who likes to dress in beautiful dresses, the main character describes himself as sometimes not feeling like his assigned gender, subject matter includes gender non-conformity, gender dysphoria, gender euphoria, gender fluidity, transphobia, coming out, LGBT acceptance.
* The Prince and the Pagoda Boy because his barbaric ways are only suited to wartime. As such, he opts to keep the nation in a state of perpetual war so that he will remain in power.
* The Prince and the Paunch DLC adds a number of new variants beyond the ones present in tabletop sources, such as swarms of quick but fragile Arachnarok hatchlings, an Arachnarok mount for goblin great shamans, and fiery variants of Arachnaroks and spider riders that can join Waaagh! armies started near volcanoes.
* The Prince and the Pauper. A beggar boy and a prince have a chance encounter and decide to switch places for a short while.
* The Prince and the Pauper also traces Miles Hendon's line to its eventual demise.
* The Prince and the Pauper. Cue howls of laughter from everyone present, instant loss of respect, and abject humiliation.
* The Prince and the Pauper Goofy, disguised as an executioner, inadvertently knocks out a weasel guard with his axe while trying to save Donald and the Mickey look-a-like. The weasel guard babbles, "Thank you, I had a lovely evening," and kisses Goofy before passing out.
* The Prince and the Pauper named Tom Canty and Prince Edward VI of England.
* The Prince and the Pauper of Edward realizing he needs to help the poor is only sparingly touched upon in adaptations, whereas the main theme of "laws benefiting

the wealthy would be significantly unfair to those who lack the wealth to influence the government" is touched upon even less often.
* The Prince and the Pauper: The prince-as-a-pauper's friend, Miles, gets punished with these.
* The Prince and the Pauper: This happens to Goofy when he is about to free the Prince and Donald from prison. Trouble is, the key was already in the lock, and once Goofy removes it, he has to find it again. When the guards start closing in, Donald grabs the keyring and puts the right key in the lock.
* The Prince and the Pauper when the Prince (dressed in pauper's clothes) tries to stop a food vendor to give the hungry people food.
* The Prince and the Showgirl king plots with the Germans to oust the pro-Entente prince regent, an action that might spark world war. Fortunately, an American showgirl is there to mend the relationship between the prince regent and his kingly son, thus putting an end to the plot.
* The Prince and the Showgirl takes place against the backdrop of the 1911 coronation of King George V. The rising tensions in pre-WWI Europe are a frequent plot point.
* The Prince and the Showgirl, the titular prince is the prince regent of a fictional Balkan country called Carpathia.
* The Prince berates Ophelia (or, rather, all women) for being false in various ways, and through makeup:
* The Prince Commands, the protagonist (after many adventures) settles down to his new life in Morvania upon learning that he and his last living relative had had a misunderstanding and that he was welcome to stay.
* The Prince complains bitterly about the Italian system of relying on mercenaries for war. One of his specific criticisms was that your average Italian mercenary group was almost entirely cavalry, because mounted soldiers were perceived as more elite. The fact that they could charge more for cavalry probably helped too.
* The Prince. He doesn't want the feud to tear the city apart and is doing everything he can to keep the two sides from going too far.
* The Prince is an evil overlord's guidebook for being a tyrant and a puppy kicker, when in reality, the point that Machiavelli was trying to make with the book was that a ruler should in all situations strive to be an unfettered pragmatist, who maintains their power at all costs and Machiavelli outright discourages unnecessary cruelty as this would eventually lead into retribution from the populace.
* the prince is cursed as a small boy to be unable to marry anyone but the heroine, so he tracks her down.
* The Prince of Atlantis. All Atlanteans have long left Earth behind to find a new home among the stars, but Prince Akata is still around to protect Atlantis and its technology, and with that Earth itself.
* The Prince of Atlantis to make incredibly destructive bombs that resemble nuclear warheads.
* The Prince of Central Park. Protagonist Jay-Jay is subjected to another bout of his abusive foster mother's anger, when she returns home having failed to pick up a guy at a bar. She then passes out drunk, and he quickly gathers up his things to run away. In order to make it impossible for himself to return, he pulls off her blonde wig and rips it to pieces, scattering the locks around her unconscious body. (She wears wigs just for easy hair color changes, not because she's bald, but it's still this trope because he does it to humiliate her.)
* The Prince Of Death. Justified: because he is undead his wounds never heal and he has to be sewn back together.
* The Prince of Egypt, a chariot race between Rameses and Moses hits a scaffolding being used by workers, not only causing the loss of the nose but getting a smile painted on.
* The Prince of Egypt: After he finally gives Moses his permission to take all the Hebrew slaves and leave Egypt, Ramses immediately breaks his word after becoming overcome with rage and grief over his son's death, and tracks down Moses and the slaves, appearing on his chariot with his entire army, shouting for them to kill the Hebrews. Only God’s pillar of fire temporarily stops them, after the fire

disappears and Ramses sees the parted water, he angrily pulls out his sword and starts screaming for the murder of them as he rides into the sea. Also at the end, after the waters sweep away his entire army and he’s stranded on a rock, he can only shout Moses’s name in anguish.
* The Prince of Egypt, after Moses returns from his self-imposed exile for accidentally killing an Egyptian foreman, his adoptive brother Ramses, now Pharaoh, pardons him of his crime.
* The Prince of Egypt, a highly regarded and heroic figure in modern Egypt, being portrayed as an antagonist in the film.
* The Prince of Egypt and resembles the adult coloring books that became popular decades later.
* The Prince of Egypt, and since Moses's birth mother Yocheved never appears again after his infancy, we can assume she died offscreen some time before the young adult Moses finds his birth siblings.
* The Prince of Egypt: At the beginning of the movie, during the song "Deliver Us", the Hebrew slaves are being forced to construct a huge statue of the Pharaoh. Near the end of the movie, at the end of the song "The Plagues", the statue collapses. God is more powerful than any Pharaoh.
* The Prince of Egypt, at the deaths of all the firstborn Egyptian sons. After Rameses finally grants the Hebrews permission to leave (while mourning over his own son's body), as Moses walks back to the Hebrew dwellings amid the echoing sound of bereaved mothers' cries, he is overcome with grief and collapses against a wall, sobbing.
* The Prince of Egypt by his mother Yocheved, accompanied by young Miriam and Aaron. Miriam even gets a solo in the song. We also see toddler Ramses, who is with the Queen when she finds Moses.
* The Prince of Egypt), can easily be seen as a reason why the movie sticks to biblical tradition.
* The Prince of Egypt, cutting back just in time to see their tails vanish into its mouth.
* The Prince of Egypt distinguishes the ethnically Egyptian and Hebrew characters by character design. The Egyptians have darker skin than the olive-toned Hebrew characters.
* The Prince of Egypt: During their chariot race at the start of the film, Ramses and Moses drive into a construction area at one of the main temple complexes in Memphis, causing some damage (including inadvertently breaking off the nose of a colossus of Ramses' father, Seti).
* The Prince of Egypt ends with Moses returning to the children of Israel with the Ten Commandments in hand. Anyone familiar with the story of Moses (or at the very least, the Charlton Heston version) knows what happens next. He smashes the tablets in anger at seeing the Israelites having built the golden calf to worship, and sends the Levites to kill 3000 people. Unless you believe it was the second time around, which is happier (and suggested in the storybook/coloring book which posits the scene as taking place "Years later") but still pretty bitter. This isn't even the half of it. The group of Hebrews being led out of slavery toward the hope of the Promised Land? Apart from Joshua, none of them will be allowed entry into it. Their pride, stubbornness, and lack of faith results in them being sentenced to wander in the desert for forty years until that generation dies out. Even Moses will never get to enter it while he's alive, although his bones are eventually buried there. One can only hope that this movie's version of the story, with its liberties taken, would have things go better overall... On the historical side of things, Rameses' thirteenth son and successor Merneptah will wipe out the tribe of Israel decades after.
* The Prince of Egypt features a dream sequence that plays out in the form of an animated mural, drawn in the exact style used by ancient Egyptian painters.
* The Prince of Egypt has a montage of Moses building a new life among Tzipporah's people after fleeing Egypt set to the song "Through Heaven's Eyes", which also includes him falling in love with Tzipporah and marrying her right at the end of the song. It's a particularly beautiful sequence considering that their

relationship, while sweet, is not really central to the story of the film.
* The Prince of Egypt hit a scaffolding during a chariot race that happens to be holding the sculptor working on the nose.
* The Prince of Egypt is a deconstructed version. Despite following the traditional pattern and Moses explicitly declaring "I am a sovereign prince of Egypt/A son of the proud history that's shown," the song implies that he is beginning to doubt his identity and the life that he thought he knew.
* The Prince of Egypt is God's Chosen One, but he is forced to be the instrument of the 10 Plagues of Egypt. This pits him against his once beloved brother and old home, and he's very unhappy to have to bring destruction in God's behalf to a place he once loved and getting entirely innocent people killed in the crossfire.
* The Prince of Egypt is one long version of this, sung by Jethro to Moses to knock him out of his depression.
* The Prince of Egypt, Israeli singer Ofra Haza sang the lines of "Deliver Us" in 18 out of 21 different languages.
* The Prince of Egypt: It seems like Seti I will be the pharaoh Moses must step up against to free the Hebrews, but he dies offscreen halfway through the film and his son Rameses inherits the throne.
* The Prince of Egypt, Moses goes into self-exile after he accidentally killed an slave overseer. He ran away into the desert and remains there for years until God from the Burning Bush tells him to return to Egypt to free the Hebrews.
* The Prince of Egypt, Moses has a hieroglyphic-depicted nightmare of himself being in the village where the Hebrews reside and he sees the Egyptian guards taking the newborn sons away from their mothers. He also sees his biological mother and siblings running to the Nile while hiding from the guards. He follows them and he sees his mother putting a baby in a basket. That baby is him, and he realizes the truth about his true heritage. Then, he runs away from Egyptian guards who are chasing him and he falls down into the crocodile-infested river along with the newborn infants.
* The Prince of Egypt, Moses returns the ring back to Ramses when he refuses to free his people and that Moses must carries on God's mission, even if it means breaking their brotherhood.
* The Prince of Egypt, Moses tries to comfort the grieving Ramses. Ramses swats his hand away demanding that Moses leave.
* The Prince of Egypt, Pharaoh Seti had his guards go to the Hebrew village and take away the newborn baby boys from their mothers. Then they would drop them in the river where the crocodiles ate them. It was depicted in hieroglyphs when Moses found out the truth of his heritage.
* The Prince of Egypt: Pharaoh Seti I is a stern father and ruler, though he is shown to genuinely love his wife and sons — being harsh towards Ramses in order to prepare him for the burden of ruling — and care deeply about the future of his empire. However, he sees nothing wrong with using the Hebrew people as slave labor or with having ordered the massacre of newborn Hebrew children at the beginning of the film, remarking to Moses — who had narrowly escaped being a victim of that massacre — that they were just slaves in an attempt to comfort him.
* The Prince of Egypt, Pharaoh Seti I is the main villain during the first half and the man directly responsible for the massacre of Hebrew slaves that led to Moses coming into his care, but he dies offscreen during Moses' exile and it's ultimately Rameses who takes center stage as the antagonist.
* The Prince of Egypt, Pharaoh's priests rely on magic tricks to simulate magic powers. Obviously, Moses (via God) was able to do what they pretend to do and more.
* The Prince of Egypt. Queen Tuya is a loving mother to both Ramses and Moses and doesn't care at all that Moses was a Hebrew child that washed up in a basket. On the other hand, from the perspective of the Hebrew slaves, none of the Egyptian royal family is particularly sympathetic or kind.
* The Prince of Egypt, Rameses and Moses were raised as brothers. They became enemies when Rameses was Pharaoh and Moses returned from hiding to free the Hebrews from bondage.

* The Prince of Egypt, Rameses remains firm on not freeing the Hebrews out of fear of weakening Egypt. That attitude causes God to send the plagues and as a result, Egypt gets severely weakened.
* The Prince of Egypt, Rameses tries to make Tzipporah his concubine and calls her a "desert flower", but Tzipporah almost bites his hand off her face, thus making Rameses scared of her and calling her a "desert cobra". He would then offer her to Moses, who would later free her and meet her again in Midian, her homeland, and they would get married.
* The Prince of Egypt, Ramses and Moses race their chariots through the monument construction grounds, causing a worker to hack off the Sphinx's nose.
* The Prince of Egypt, Ramses finds Hotep and Huy hiding behind a curtain applying ointments and medicines to their boils. Ramses flips the table and orders them to get out, implying that they're being fired.
* The Prince of Egypt: Ramses promises to let the Hebrews go if Moses stays with him as a brother once more. The Hebrews throw a dance to celebrate, before learning that their troubles have only begun...
* The Prince of Egypt, Ramses tells Moses he can do this for him after Moses accidentally murders an Egyptian slave overseer. Moses is dealing with some serious angst right now, though, and leaves anyway.
* The Prince of Egypt respectively, have their funny moments. Neither of the two Pharaohs that they work for do.
* The Prince of Egypt. She instead of Aaron is with Moses in the staffs-to-snakes scene.
* The Prince of Egypt, she recognizes him and hisses an angry "You!" before letting him plummet back down into the water.
* The Prince of Egypt shows Rameses and his priests initially viewing the Hebrew God with careless contempt. Then the Plagues start.
* The Prince of Egypt: The Angel of Death manifests in this manner before descending to Earth to bring about the 10th plague (the death of the firstborn Egyptians).
* The Prince of Egypt, the child-killing would have been practically impossible to avoid; but still, they do quite a good and discreet job of showing it.
* The Prince of Egypt; the last we see of him is after his army is swept away by the waves. He survives and is stranded on a rock in the middle of the ocean cursing Moses. We don't know if he'll make it back to shore and live to his historical counterpart's old age, or if he'll eventually starve to death or be swept away by the tide.
* The Prince of Egypt, the same woman could easily be the daughter of Pharaoh X and the wife of his successor, Pharaoh Y. Thus, identifying her by her relationship to a Pharaoh depends on which Pharaoh is the point of reference.
* The Prince of Egypt, the wandering in the desert, and omitting the ending where Moses dies on the Promised Land's doorstep.
* The Prince of Egypt the work they do, and even thanks Moses for giving it to them...but it's clear he's only saying it to keep his sister and himself out of trouble, as he knows that complaints will get them physically punished (or far worse).
* The Prince of Egypt, Tzipporah is first introduced in an outfit with a midriff-baring top. She wears a different outfit that averts the trope for the rest of the movie.
* The Prince of Egypt Unsurprisingly, they're married before the end of the song.
* The Prince of Egypt, when Jethro is singing to Moses about true value.
* The Prince of Egypt, when Pharoah Seti I orders the massacre of the Hebrew boys. We see the Egyptian soldiers bursting into a woman's house, shoving her aside, and raising their swords above her baby son's crib, before an immediate hard cut to the soldiers calmly walking out of the house, past the sobbing mother.
* The Prince of Egypt, where it seems both sides' gods are real, but the Hebrews' is much more powerful.
* The Prince of Egypt, with a bright flash that keeps the audience from seeing what actually happens. They also move impossibly far in parts of the song when the

screen goes dark for an instant, but that could just be musical convention instead of in-universe magic, or they could have employed body doubles. They also apparently summon floating glyphs and control flames with gestures during the same number. Earlier on, their presentation of Tzipporah in tribute to Rameses wouldn't be out of place in a modern magic show, apart from how "the Midian girl" is tied up for real. Them turning water into blood looks more obviously fake, though: they just add some powder that gives it a reddish tint. Of course, the point of the demonstration was to make Moses look like a deceiver. Overall the simplest explanation is that they are pure fakers, but it leaves open the possibility that they have some actual powers as well.
* The Prince of Egypt, with Moses as the protagonist and Miriam as the tritagonist.
* The Prince of Egypt, with one of her sisters commenting at one point, "That's why Papa says she'll never get married." She warms up to Moses and the two are wed at the end of the "Heaven's Eyes" montage.
* The Prince of Egypt. Without realizing it, he tried to outshine his father's legacy even in something as extreme as mass murder.
* The prince of Elfheim is victim to a cursed slumber placed by Astos, king of the Dark Elves; another elf in the castle mentions that Matoya is capable of curing the affliction.
* The Prince of Fire claims to have existed since the beginning of time. Which makes sense, since he's essentially
* The Prince of Midenhall, who is your party's most powerful physical fighter, literally jumps from his throne and sets off on a quest to defeat Hargon when he hears Moonbrooke has been destroyed.
* The Prince of Orange is the closest the Netherlands has to Royalty in
* The Prince Of Ponyville: Blueblood, whenever possible. Cloud Kicker and Rarity both get a chance to partake, as well.
* The Prince Of Ponyville: Chrysalis chews no small amount of scenery. Subverted by Bank Ledger, who is described as monotone and utterly bland.
* The Prince of Slides was the one who established the American monarchy after the colonies achieved their independence from the British Empire and that he reigned as the first King of the United States with Sally Hemmings as his queen. The evidence for this is the recently deceased King Thomas and the fact that Danielle's title Duchess of Hemmingshire.
* The Prince of Tennis active and skilled tennis player he needs to have quick energy.
* The Prince of Tennis are sometimes seen bandaging up their injured teammates.
* The Prince of Tennis, aside from the gravity- and physics-defying shots the characters use.
* The Prince of Tennis, as well as Munehiro Kabaji (6'3) and his (unnamed) older sister...
* The Prince of Tennis constantly brags to his fellow freshmen that he has "two years of experience" in tennis. In truth, he's a less than average player and more often than not fails to provide useful information during games, other than some basic rules, key words, and basic stuff.
* The Prince of Tennis father Nanjirou also wasn't a meddling, smartass slob. He gets along better with his mother Rinko, even if he whines about how she cooks too much Western food for his taste.
* The Prince of Tennis has a baseball episode, featuring all the characters in chibi form.
* The Prince of Tennis has a few of these moments, which are literally Gamebreaking Injuries
* The Prince of Tennis has several characters do flash-step techniques, most notably the entirety of Hiba's team.
* The Prince of Tennis has the main character drinking Ponta, though in the original manga it was actually Fanta.
* The Prince of Tennis has two: Ojii, the Rokkaku coach, and Banda Mikiya aka Banji from Yamabuki. Taro "Itte yosh" Sakaki of Hyoutei is still a bit young compared to them, but he's heading there.

* The Prince of Tennis have an ability referred to as State of Self-Actualisation (Muga no Kyouchi), which allows them to subconsciously replicate any techniques ever witnessed. Some other characters, while not possessing Muga, can also duplicate their opponents' moves, giving them a mental edge.
* The Prince of Tennis have cheerfully latched on them, and no one can blame them.
* The Prince of Tennis. He is extremely powerful, able to curb-stomp a bloodshot Kirihara using even greater violent play than him. However, he lacks stamina and defense. Considering this it comes as no surprise that Devil Akaya completely trashes him in a matter of minutes.
* The Prince of Tennis her own pupils when in really high spirits, both in the Jyousei and the Senbatsu arcs.
* The Prince of Tennis is known for eating Wasabi rolls, and drinking Innui's ghastly sports drinks without much hassle.
* The Prince of Tennis likes this one a lot — the main character never suffers from it, but Tezuka does, and there's at least one minor character with a super special tennis move that will mess him up if he uses it too often. Then there's the character who winds up in the hospital for reasons unrelated to tennis, but even he works himself to the point of collapse on the courts before admitting (or finding out?) that there's anything wrong with him.
* The Prince of Tennis never ever loses her smile, her stubborness, and her will to support Seigaku and her beloved Ryoma through thick and thin. An Tachibana from Fudomine is somewhat more serious, but she's not to be trifled with either.
* The Prince of Tennis not caring if the child was around when he was drunk. Kevin openly tells his teammate Billy that his father is a worthless person and that's why he wants to beat Ryoma, to not be like his dad.
* The Prince of Tennis occasionally wears his tennis club uniform outside of his training classes and matches, but he is almost never seen without his team's cap, unless he is going to school.
* The Prince of Tennis, on the team of Rokkaku, Amane "David" Hikaru is frequently kicked for making many lame puns. Many people know him as "that pun guy" instead of his real name.
* The Prince of Tennis, Ryoma Echizen wears black shorts as opposed to the customary white shorts. Tooyama Kintaro also wears a leopard print tank instead of the uniform shirt.
* The Prince of Tennis: Ryoma's rivals often comment derisively on him being just 12-to-13 years old and in his first year of junior high. And they end up losing to him soon.
* The Prince of Tennis: Several characters are considered some of the best tennis players in the series (Tezuka, Yukimura, Ryoma), but ultimately the title falls to Ryoma's father Nanjiroh.
* The Prince of Tennis specials, the punishment that Ryoma and his teammates would face for losing or slacking during practice was to get their faces doodled on.
* The Prince of Tennis stereotype. Not that Sakuno isn't a good chef, but Tomoka is mentioned to be the one with better cooking skills.
* The Prince of Tennis (the ones who show up at Nationals, not the team from the Junior Senbatsu arc of the anime). Their playstyle is extremely violent, and they openly ridicule the Japanese team they play against, and Japanese tennis in general. Of course, the Japanese team was losing on purpose, and they win by a large margin once they begin playing seriously. Then they mock the foreigners' arrogance... in (equally broken) English.
* The Prince of Tennis: There are at least five males playing up the Meganekko type. Three of them are Oshitari, Inui and Tezuka; their seiyuus even have a musical trio named "Meganes".
* The Prince of Tennis, there are exactly two (perhaps three) instances in which Tezuka Kunimitsu can be seen smiling: one is after a very symbolic match with his best friend Fuji Shusuke, the other is after his team has just won the National Tournament against the supposedly-unbeatable Rikkaidai. The last one, Inui Sadaharu even felt necessary to get on tape.
* The Prince of Tennis, the sports anime genre has been a staple for over half a

century now. Having so many subgenres and approaches, the scene has multiple codifiers.
* The Prince of Tennis which can use his sixth sense to play tennis while copying everyone's special moves, and is unbeatable even when he suffers from memory loss.
* The Prince of Tennis (which means that subordinates will surpass, defeat and take the place of their superiors... similar to putting fools in their place, in a way).
* The Prince of Tennis. While he doesn't quite "disintegrate into a pile of gloop", the most antisocial member of the team attempting to play with a cat while still coming off as intense and a little scary was hilarious in its own right.
* The Prince of Tennis, while Yuuta Fuji plays against Ryoma Echizen, team manager Mizuki, determined to win at any cost, tells Yuuta to focus his attacks close to Ryoma's left eye (where he had suffered an injury in a previous match). Yuuta refuses to do so, and decides to end the game fairly.
* The Prince Of Thorns and restricted Necromantic ability. In the second book, he learns that this corruption makes him less and less human and brings him closer to being assimilated by The Dead King, the most powerful necromancer who has already subjugated most others.
* The Prince Of Thorns — "the builders" were us, before we nuked each other and lost most of our knowledge.
* The Prince Of Thorns this is how basically all of Jorg's plans go. In the second book this is enforced; mind readers are spying on him, so whenever he has a good idea or sets something up he puts the knowledge of it into a magical box that removes it from his memory. The echo of the idea remains so that when it's time to put it into effect he knows to retrieve it from the box.
* The Prince of Winterfell" featured nothing on screen either, though Qhorin Halfhand talks of his adventures and the death involved.
* The prince/princess of Miscellania that you court will respond to various emote actions; the "Blow Kiss" emote is the only one required to court them, but they will react appropriately to dancing or threats.
* The Princes abandon both their marriages and are seen with Snow White and Sleeping Beauty at the end. Given their womanising ways and the fact that they don't grow as characters, it's possible they'll get bored with these women too.
* the Prince's heart is tainted by the Raven's blood, which causes him to become evil
* The Princes in the Tower. Despite the most popular theory about their disappearance being that
* The Princes of the Air can't afford real flight training, so they learn to fly spacecraft by playing simulator games. They don't rely on the games alone, though; it's mentioned that they read up on what the games have left out and make a point when playing of practicing all the things that would be necessary in a real ship regardless of whether the simulation includes them.
* The Princes of the Air has a longevity treatment which is only available to the rich and powerful. When we first meet the protagonist, he's running a con where the bait is illicit access to the longevity treatment.
* The Princes of the Air has some unique features which form the basis for an exciting action sequence.
* The Princes of the Air: One of the planets visited by the protagonist is an ocean world with no dry landmasses, so the people who live there have been modified to be able to live underwater.
* The Princes of the Air, Queen Rachel is the feudal overlord of multiple star systems. There's a movement to have the monarchy replaced by a republic, which it eventually turns out the queen herself is secretly one of the leaders of, having come to the conclusion that it's what's best for her people.
* The Princes of the Air, the protagonists run a variety of cons, at first for their own benefit and later as loyal if unconventional servants of Queen and country.
* the prince's respect. However, he's still miffed that he didn't get a rematch against Adhemar, who had beaten him in the first tourney.
* The Princess 99 (c. 2009) takes place in 1924, in New Orleans... but with

wizards!
* The Princess 99 when you consider that the setting is based of 1920s New Orleans but isn't set on Earth.
* The Princess and the Bear, the animal magic brings all the dead soldiers on the protagonists' side back to fight.
* The Princess and the Bounty Hunters", when the trap Princess Mira designs fails, she's the last survivor among the villains, she's hurt, and Jack is unharmed. She considers continuing the battle... but then decides against it and drops her weapon, realizing she can't win. Unlike the others, she lives.
* The Princess and the Dragon, Jean Claude possesses a sword forged from the scales of a white dragon which can cut through almost anything, including other dragons' scales.
* The Princess and the Frog accidentally smacks his Pa in the ears while trying to get Naveen and Tiana.
* The Princess and the Frog, actually does not mention Ray the firefly's death at all!
* The Princess and the Frog. A deleted scene has him discuss the trope with Ray:
* The Princess and the Frog: After Tiana and her mother clean up the warehouse and leave, a small marble column falls over.
* The Princess and the Frog, after Tiana and Naveen have both been transformed into frogs and landed in the Louisiana swamp, Naveen explains why he has no money, even though he is a prince.
* The Princess and the Frog: After Tiana kisses Naveen after he's first transformed and gets turned into a frog herself, she struggles out of her dress, then looks up at him wondering how he got all the way up there. It's not until Tiana sees herself in the mirror that she realized she turned into a frog.
* The Princess and the Frog, After Tiana realizes that she had made enough money to start her own restaurant for being a waitress at another, said restaurant's owner actually drops a fried egg from a spatula.
* The Princess and the Frog, and it's implied that due to Big Daddy's age and size, it would have been the perfect crime because everyone would have thought it was a heart attack.
* The Princess and the Frog, and popular enough to be elected King of Mardi Gras five years in a row.
* The Princess and the Frog and turned into a frog. Tiana even lampshades how stupid Naveen was to trust him:
* The Princess and the Frog, an elderly firefly turns on her light by clapping.
* The Princess and the Frog: A newspaper dated 1926 is printed in Times New Roman, which would not be designed until six years later.
* The Princess and the Frog as Dr. Facilier is being dragged away by his "friends" some of them take the form of voodoo and rag dolls.
* The Princess and the Frog, a witch doctor who was responsible for turning Prince Naveen into a frog and has made deals with his "friends on the other side".
* The Princess and the Frog, black Tiana gets together with dark-skinned Prince Naveen, even though her friend Charlotte, who is white, was interested in him.
* The Princess and the Frog Bonus points that neither of them knew that that would happen.
* The Princess and the Frog, but then later decides against this and works for a living in Tiana's restaurant after they are married).
* The Princess and the Frog by Charlotte at the end who, upon Tiana's marriage to Naveen, asks how old his brother is. Cut to her dancing with Naveen's very much younger brother, who replies, "Seven." How does she respond? "Well, I've waited this long!"
* The Princess and the Frog card and turn him into a frog (and does). Disney sure does use a lot of these!
* The Princess and the Frog causes this to happen to a redneck that captures Tiana. He places himself on the guy's head, and lets the other two rednecks in the canoe see him. As the two raise their clubs...
* The Princess and the Frog, Charlotte adds a fake one in one of her vainer and

sillier moments.
* The Princess and the Frog, Charlotte asks Big Daddy to tell Tiana the big news about Prince Naveen being a guest in their house, but she is so excited that she keeps blurting it out before Big Daddy can get a word in. She also keeps him from enjoying the beignets he ordered.
* The Princess and the Frog: Charlotte has wanted to fall in love with a prince and become a princess since she was a little girl.
* The Princess and the Frog: Charlotte La Bouff and her father visit Duke's cafe to share the news with Tiana that Prince Naveen is coming to New Orleans and staying at their mansion. Charlotte, in her excitement, keeps interrupting Big Daddy until he shoves a beignet into her mouth so he can finish telling Tiana for her.
* The Princess and the Frog, Charlotte shrieks "Cheese and crackers!" at one point. This is well known among more prudish folk as a way of saying "Jesus Christ!"
* The Princess and the Frog: Childhood best friends Tiana and Charlotte refer to each other as "Tia" and "Lottie" respectively.
* The Princess and the Frog. Despite his well-known reputation as a womanizer, he seems to respect women for the most part.
* The Princess and the Frog dish-dashes as part of her work, as seen early in the movie during the number "Down in New Orleans".
* The Princess and the Frog does one when Louis has an overblown reaction to being pricked by a thorn.
* The Princess and the Frog does something similar, ending with the heroes as small business owners in mid-1920's USA. The Great Depression started in 1930.
* The Princess and the Frog, Dr. Facilier tells Naveen he needs "the green" to continue living the easy life. When Naveen accepts, he gets turned into a frog (who is green).
* The Princess and the Frog: During a trolley ride, a guy sitting next to Tiana tries to offer her a flower but, while he's distracted picking the flower, she leaves her seat and he mistakenly offers it to the guy on the other side.
* The Princess and the Frog: Eli La Bouff is shown sternly telling young Charlotte that he won't be playing "Mr. Pushover" for his spoiled daughter anymore — then he produces a then-puppy Stella.
* The Princess and the Frog. Even Facilier's tendency to call them his "friends" when they're anything but friendly fits this. It's a polite name which avoids angering them in the way that a more accurate name might.
* The Princess and the Frog features TV host and comedian Luca Laurenti as Ray.
* The Princess and the Frog, flashing back to when he first tried to play that trumpet for humans. The response that he got wasn't quite the applause he was expecting.
* The Princess and the Frog for added effect. Naturally most of the soundtrack is jazz-based.
* The Princess and the Frog: Gender Role Reversal; Tiana is a low-class working girl with the skills to know how to travel while Naveen is a spoiled prince. Over time they fall in love and Naveen is willing to forgo returning the human form and restoring his wealth in order to marry Tiana. However, he is captured by Faciler’s demons in the middle of the night, and Tiana thinks he has left her in favor of Charlotte. Ray corrects the misinformation, and she rushes to save him, and they live happily ever after.
* The Princess and the Frog gives an example of the real-life conditions causing this trope in the description. Tiana is negotiating a real estate deal with the Fenners, and the shorter of the two eats a banana peel and discards it carelessly on the ground. No-one slips on it, however.
* The Princess and the Frog goes into death throes when he gets a single bur in his finger.
* The Princess and the Frog has a bob, but Tiana's hair is slightly longer. Still shorter than the typical princess though.
* The Princess and the Frog has a grand time playing with this. Charlotte adores the fairy tale and wishes that she could find a frog prince, while Tiana finds the entire thing disgusting. Later, when Tiana meets the transformed Prince Naveen, she

is visibly creeped out and none too impressed with him. She doesn't fall in love with him (or he with her) until both have transformed into frogs.
* The Princess and the Frog has a variation — while the montage is definitely one of these for Tiana and Naveen, the song itself (Ma Belle Evangeline) is about Ray's love for Evangeline.
* The Princess and the Frog. He really doesn't care if he lies, cheats, or steals to get what he wants.
* The Princess and the Frog. "I know some day, we gonna be together forever..."
* The Princess and the Frog. In a variation, it's her friend Charlotte who expresses this. It also happens near the beginning of the movie. Tiana had previously only worn her work clothes. It also leads to her being mistaken for a real princess by the titular frog.
* The Princess and the Frog initially grants a man a full head of hair, but it quickly spreads to the rest of his body. In this case, it's not a potion but a magical powder Facilier blows in his face.
* The Princess and the Frog in the film to pay them off and save his own skin.
* The Princess and the Frog in the mold and spirit of its Renaissance fairy tale musicals.
* The Princess and the Frog is an only child, and shown to be her daddy's darling as a young girl; as an adult, she still keeps his picture close (it's suggested he died in the war).
* The Princess and the Frog is because the hand-drawn films were rated G, while the CGI films were rated PG, and thus audiences believed that the CGI films would have more adult appeal in them than their hand-drawn counterparts.
* The Princess and the Frog is incredibly resourceful, clever, and observant. She's also an African-American brunette.
* The Princess and the Frog; it's obvious to the viewer that Tiana achieves her goals with hard work, sacrifice, and dedication to her dream, but every character in the movie that knows about Tiana's father constantly links her success to his influence, including Tiana herself. Eventually this is even added on to as shown at the end when she finally does set up her restaurant it is shown to be green and frog-themed and named "Tiana's Palace", clearly based off of her experience as a frog that she spent with her prince. In an earlier scene where she imagines her restaurant, it is done up in the yellow style her father had planned on using.
* The Princess and the Frog Lawrence into a copy of the prince for his own ends.
* The Princess and the Frog, likewise, Tiana is possibly the only person besides the King and Queen of Maldonia to confront Naveen about being a lazy womanizer. Of course, unlike his parents, she also takes time to teach him how to take care of himself which is a bit more effective than cutting him off and saying "You're on your own".
* The Princess and the Frog line is because the "Frozen" toyline is still selling so well.
* The Princess and the Frog, Naveen asks why he's never tried to play jazz.
* The Princess and the Frog Naveen decides to propose to Tiana. The obstacles he faces are that he is broke since being cut off by his parents, and he is currently cursed into the form of a frog. But it's Mardi Gras, and he is able to fashion a ring out of a pearly bead and a bit of wire. This attempt at a proposal fails, but it's a Disney movie - they get their happy ending.
* The Princess and the Frog, Naveen doesn't realize that Facilier and Lawrence were only using him to trick Charlotte into marrying Lawrence (disguised as Naveen) to get all Charlotte's money until the near end of the movie.
* The Princess and the Frog Naveen ready to marry Charlotte. She runs into the French graveyard and sits down on a tombstone, completely depressed.
* The Princess and the Frog: Naveen ultimately decides to go through with his marriage to Charlotte on the condition she gives Tiana the money needed to finally buy the restaurant she's dreamt of having, even though he's come to love her very much. Tiana turns down his attempt, deciding her dream wouldn't be complete without him in it.
* The Princess and the Frog, no-nonsense waitress and he's a fun-loving, lazy

prince.
* The Princess and the Frog not just with his eyes, but also with the skull mask that he wears during the last part of the song. There is a big firework display that ends with the screen going black except for the mask and his eyes, and then the mask disappears, followed by his eyes.
* The Princess and the Frog now transforms into a frog, as well. They both are in frog form most of the movie.
* The Princess and the Frog opens with Tiana and Charlotte as little girls, hearing the story of... well, guess.
* The Princess and the Frog, part of the plot involves Naveen's servant Lawrence passing as him. This is done thanks to a talisman that lets Lawrence look just like Naveen, but needs a drop of Naveen's blood once a day or so to continue working. However, Naveen escapes early in the movie and the bad guys spend some time trying to find him.
* The Princess and the Frog). Plus, it hosts no less than four musical numbers, all positive in nature (three upbeat songs — including a rousing gospel number — and a lovely moonlit ballad).
* The Princess and the Frog power behind Facilier. Facilier himself clearly plans on being this once Lawrence marries Charlotte and takes over Big Daddy's role as head of the city's most influential family. Which would make the spirits the man behind the man pretending to be another man...
* The Princess and the Frog Prince Naveen is apparently unable to take care of himself, whereas Tiana is tough, hardworking, and a great cook. This is debatable, though, since he does play the ukelele and speak French. The implication is that Naveen is a smart guy and can pick up on stuff, but his lifetime of hedonism made him unwilling to exert the effort to do so. Tiana, meanwhile, is forced to have a strong work ethic to get through her lower-class life.
* The Princess and the Frog, Prince Naveen takes all of three seconds to acquire a(n all-female) fan club upon stepping off the boat in New Orleans.
* The Princess and the Frog: Prince Naveen takes offense at being called a philandering bum who spent all his time chasing chambermaids in his ivory tower:
* The Princess and the Frog, Ray the Firefly has fallen in love with the Evening Star, whom he calls Evangeline.
* The Princess and the Frog, Ray the firefly mistakes a star for another firefly named "Evangeline" and falls in love with it.
* The Princess and the Frog: Ray the firefly takes on a pack of shadow monsters and also is critical in enabling the defeat of the buffoonish hunters. Louis the alligator is useless against both opponents, being late to one fight and running from the other.
* The Princess and the Frog revolves around this (featuring the song "When I'm Human").
* The Princess and the Frog's death is surprising (but not to me)ly clean considering he was slapped to the ground and then stepped on by Dr. Facilier, as when Louis finds him all the damage that seems to have been done is some bruising and a black eye. If someone would do this to one of his species in real life it would be quite messy.
* The Princess and the Frog, she along with Naveen gets tossed around for laughs, fall over, all kinds of the sort of goofy situations one could stick into a swamp setting.
* The Princess and the Frog. She's very sweet and kind, but on the other hand, she's not too bright and easy to fool; when hiring Tiana, she hands her a wad of cash.
* The Princess and the Frog, so her toys and costumes were the most sought out (getting massive markups on secondary markets).
* The Princess and the Frog squees over a newspaper report that Prince Naveen is coming to town, complete with clutching the newspaper to her chest and leg-flailing.
* The Princess and the Frog, starting around Naveen and Tiana's dance during "Ma Belle Evangeline". Yes, Disney loves this trope.

* The Princess and the Frog starts saying that is a pity he cannot fulfill his dream of playing jazz in the river boats, and that maybe if he wasn't a gator, it may be possible. After a few seconds, Louie says that he could ask to become human, with Naveen calling him a genius for "getting" that idea.
* The Princess and the Frog, starts "sweatin' like a sinner in church" when she gets nervous and/or anxious about something (such as when it seemed like Prince Naveen wasn't going to show up to the party she and her dad were throwing at their estate).
* The Princess and the Frog, the animation crew also took great pains to make the sinister Doctor Facilier quite charismatic and attractive as well, to explain how he could lure in unsuspecting victims. And then Ray the Firefly is drawn to resemble an inbred hillbilly but is still one of the most insightful and helpful characters.
* The Princess and the Frog, this is how Tiana teaches Naveen how to mince.
* The Princess and the Frog, this may have been done to avoid controversy since he was engaged to Princess Aisha, the token dark-skinned fairy. Judging by his parents, many fans think he was meant to be Indian-coded.
* The Princess and the Frog, Tiana and Naveen meet minutes after he arrives in New Orleans. He tries to woo her, but she ignores him and he moves on, even saying "Eh...". He fails to recognize her when they meet again at the party, though.
* The Princess and the Frog: Tiana and Naveen while dancing on the balcony of Tiana's Palace.
* The Princess and the Frog Tiana in the end, and manages to make Tiana look annoyed a few times doing so. Tiana did admit that she thought the fumbling around was cute.
* The Princess and the Frog: Tiana is shown to have kept the medal her late father earned in WWI, and the fine-dining advertisement flyer that he used to show her his dreams for his restaurant. Eudora also brings Tiana her father's gumbo pot as a present to commemorate her buying the property for her restaurant, since she is working to fulfill what was originally his dream.
* The Princess and the Frog: Tiana's a relatively poor woman who dreams of carrying on her father's dreams and owning her own restaurant, whilst Naveen is the rich prince of a made-up country with a league of fangirls and media attention. Something of an inversion, as it's the upper-class Naveen who has to "win" the lower-class Tiana, and he's been cut off from the family fortune in any case.
* The Princess and the Frog: Tiana's father died while fighting in World War I, and she keeps his Distinguished Service Cross (the U.S. Army's second-highest award after the Medal of Honor) next to his photograph.
* The Princess and the Frog: Tiana's first attempt to destroy Facilier's talisman by throwing it to the ground backfires, as it lets his shadow catch the talisman. In response, Facilier transports them both to a graveyard, turns her back into a frog, then pins her to the ground with his cane. What does Tiana do? Take advantage of her frog-form's long tongue and much smaller size to grab and smash his talisman before he can do anything about it!
* The Princess and the Frog: Tiana squinting one eye when she cringes. Anika Noni Rose also asked if she could be left-handed like she is.
* The Princess and the Frog, Tiana's vision of her restaurant in "Almost There" is done in the same Art Deco style (inspired, according to the director's commentary, by Harlem Renaissance artist Aaron Douglas) as the picture she carries with her.
* The Princess and the Frog to break the $200 million mark domestically.
* The Princess and the Frog used the word as well in the above song lyric.
* The Princess and the Frog was deliberately designed to be this to avoid upsetting any minorities. Since he was going to marry the first black Disney princess it would either tell people Disney didn't believe in mixed race marriages or were cheating their fans out of a black prince. Henceforth, he is a thoroughly ambiguous mish-mash from his name, the native words he uses, his skin, his hair, his eyes, etc. When we see his parents at the end of the movie, they both have white hair from age, but that doesn't offer much in the way of clues, either.
* The Princess and the Frog wears a purple vest that exposes his belly.

* The Princess and the Frog wedding happens in the swamp while they're frogs, but once they become human again, they have a more standard ceremony in a church.
* The Princess and the Frog: When Naveen crashes Charlotte's wedding, she exclaims "Cheese and crackers!"
* The Princess and the Frog: When Ray tells Tiana and Naveen that they've been going the wrong direction to Mama Odie's, and the frogs glare at Louis.
* The Princess and the Frog, when Tiana and Naveen meet the alligators, we get this:
* The Princess and the Frog: When Tiana is refused by the contractors from the construction of her future restaurant.
* The Princess and the Frog where Facillier manages to pull this trick on Naveen using their shadows.
* The Princess and the Frog, where Naveen and Tiana almost kiss... Then Tiana pulls away when she remembers Naveen is supposed to marry her best friend.
* The Princess and the Frog whether this trope was played straight or not.
* The Princess and the Frog, which is the first in a whole series of original fantasies.
* The Princess and the Frog. While a lot of Tiana's hardships come from her being poor, there are a good many implications that she also has to fight against prejudice for being black and female. One of the most noticeable is when the owners of a mill Tiana wants to buy casually dismiss her getting upset over being outbid, telling her "A woman of your... background, you're better off staying where you're at." While the exact meaning of the sentence is ambiguous enough that it could be interpreted a few ways, her reaction would tell anyone who knows about black rights at that time period what they were implying.
* The Princess and the Frog. While his claim of having had thousands of girlfriends is most likely an exaggeration, he certainly does seem very popular with the opposite sex during his intro in "Down in New Orleans".
* The Princess and the Frog who frequently preaches about how working hard is the only way to achieve your dreams. The climactic confrontation between Tiana and Dr Facilier is actually the first time these characters meet in the whole film.
* The Princess and the Frog, who provides the page image is very much this. Despite being a 197 years blind lady, her powers are strong enough to defeat Dr. Facilier's shadows, that came straight from hell. She has a lot of spunk and personality, can sense things like that Tiana was falling in love with Naveen before her and can use her gumbo to see things that are happening far away.
* The Princess and the Frog, who starts out as Naveen's put-upon servant and then becomes the Shadow Man's (at first reluctant, soon eager) villainous sidekick. No matter who he ends up working for, though, the film makes it clear that Lawrence is always pushed around because he's too meek to stand up for himself.
* The Princess and the Frog with Dr. Facilier and the Shadow Men, Charlotte is happy to kiss Naveen, both lean in and pucker, and just before their lips can touch... the clock strikes midnight.
* The Princess and the Frog with the realtors. In the costume party scene, they announce Tiana that they are selling the sugar mill Tiana wants to buy, and are very condescending towards her in a combination of racism and sexism at the idea of a black woman running a restaurant.
* The Princess and the Goblin becomes Prince Froglip in the adaptation.
* The Princess and the Goblin Curdie rushes to get a sword from the weapons room. It's extremely obvious which weapon he's going to pick up because of this trope.
* The Princess and the Goblin: Prince Froglip genuinely loves his mother.
* The Princess and the Goblin: The goblins have very vulnerable feet and can't stand singing.
* The Princess and the Goblin. They freak out when they hear people sing. At least it's a nice song.
* The Princess and the Goblin when Irene's caretaker, Lootie, starts calling after her, which reveals to Curdie that Irene is a princess — she hadn't though to say and he hadn't thought to ask.
* The Princess and the Pea and assumed her rightful place as the princess.

* The Princess and the Pea. He tried to lead Rollo into it until Fearless set it off.
* The Princess and the Pea. She even manages to befriend a bear and name him Balthazar.
* The Princess and the Pea The very gullible crowd actually believes him and tries to kill her.
* The Princess and the Pee, a small princess wants to stop wetting the bed so she can sleep in the top bunk and see the fireflies.
* The Princess and the Pilot when up against a patrol of Amatsukami airships.
* The Princess and the Pirate, Bob Hope finds himself in a local bar, in a pirate town, so dangerous that he sees a man being killed because his shadow falls on someone. The killer then takes a liking to him and invites to drink a HUGE pitcher of ale - OR ELSE! This is a town where no one stops a man from dumping his victim's body in the harbor because "He has a permit" and his landlady tells him that, yes, there used to be a competing hotel but it burned down "suspicious like" while lighting her pipe with a comically oversized match.
* The Princess and the Queen, with the body of King Viserys, who is left to rot in his bedchamber for days, denied last rites and any sort funeral preparations so the Greens can secure his son's succession over his older sister.
* The Princess And The Warrior psychiatric nurse Sissi is knocked down by a truck and has her life saved with a tracheotomy done by ex-soldier turned criminal Bobo Reimer. She becomes obsessed with tracking him down, convinced that they are destined to be together.
* The Princess And The Warrior) throws a toaster at him. He instinctively catches it, and both stare in shock at each other for a moment before the fugitive leaps up with murder in his eyes.
* The Princess Bride actually does both: during the ceremony, Humperdinck urges the slow-talking priest to hurry up and get to "man and wife." But after Westley rescues Buttercup, Westley says the marriage isn't official because she didn't say "I do."
* The Princess Bride after losing a sword fight and losing Vizzini, thinking he'll never be able to kill the six-fingered man now.
* The Princess Bride: After the Man in Black defeats Inigo, Inigo begs for a quick death... but is knocked out with the hilt of the sword.
* The Princess Bride all the way through the book Inigo has been practicing his speech. After a huge buildup, when he finally gets to deliver it in the climax to his lifelong search, honing his sword skills for the battle of his life, his enemy runs away like a little girl. Of course, Inigo then chased Rugen down, and then repeated the speech several times with increasing volume as they dueled.
* The Princess Bride and Billy Crystal in one film. It's as beautiful as it sounds.
* The Princess Bride and character Inigo Montoya. As the quote at the top of the page shows, Inigo is out to kill the six-fingered man who killed his father, and wants him to know who he is when he kills him. This happens in the film just like in the book when he finally encounters Rugen in the finale. Inigo begins repeating it, first barely louder than a murmur because of his injuries. He soon progresses to nearly screaming it. This leads to Count Rugen "beginning to experience a decline of nerve."
* The Princess Bride, and equivalents to those scenes are present in the real life novel as footnotes and forewords. The book actually had its roots in something Goldman made up for his two daughters as a bed time story.
* The Princess Bride... and he includes the first bits of it, resolving the cliffhanger ending of the original book (while providing a new cliffhanger).
* The Princess Bride and kills his enemy. What's less credible is that an hour or so later he seems to have got all better.
* The Princess Bride and struggles against extreme pain and weakness for the sake of rescuing her from the grisly fate that would await her, were he to allow himself to succumb.
* The Princess Bride, and the only thing everyone in all the layers of the book agree on is a triumph of Surrealism: "True love is the greatest thing in the world

except for cough drops." It doesn't get more postmodern than that in a novel.
* The Princess Bride. As in the film, she's more or less resigned to the whole thing because her true love is dead, but the circumstances and length of the engagement are somewhat different. It's a bit more complex in the book, since in order to be eligible to wed the prince, she has to be made a princess and sent to royalty school. The people have no idea that Buttercup is actually one of their own; they're simply told that Prince Humperdinck is betrothed to "Princess Buttercup of Hammersmith," with Hammersmith being a minor 'lump of land' attached to the kingdom of Florin.
* The Princess Bride: At the film's climax, Inigo has Rugen on the run, but the Count eludes him briefly by running into a room and locking the door behind him. Inigo, in a full panic that Rugen might get away, starts running and ramming himself against the door, trying to break it down, and screaming for Fezzik to help him out. Fezzik calmly walks up, stops Inigo from hitting the door, and punches it off its hinges with one fist. Then calmly turns and walks away as Inigo resumes the chase.
* The Princess Bride beat all the best, but every single time the best is stated to be at some form of disadvantage (using the wrong sword, specialized in fighting groups, etc.). Being second best at everything works if you are never on even footing.
* The Princess Bride became the man he is now is left to the imagination, given only a few lines with a broad picture that he knew he would have to rely on his mind rather than his physical power; though the reader may expect it, there is no "VIZZINI".
* The Princess Bride bombed at the cinema (mostly due to terrible marketing), but thanks to VHS and cable it became well known as a great movie.
* The Princess Bride Both ultimately fail, which turns out to be for the better.
* The Princess Bride, but since it causes intense pain to the victims at various settings, it qualifies as the trope.
* The Princess Bride, Buttercup gets made princess of a tiny area so that Prince Humperdinck can marry her. This also puts her socially above Westley who used to work as her farmhand before becoming a pirate captain.
* The Princess Bride, Buttercup is forced to marry Prince Humperdinck. At first, she's resigned to go along with it, but she eventually plans to kill herself after the ceremony. That is, assuming her groom doesn't do her in first.
* The Princess Bride, Buttercup's parents were described as having this type of relationship, to the point that when her father died and her mother almost immediately followed, it was believed to be the sudden lack of opposition that killed her.
* The Princess Bride. Buttercup swore "I shall never love again" after Westley was killed by pirates. She was going to marry Prince Humperdink, but she didn't love him, and it didn't matter to him that she didn't love him because he planned to kill her and frame Guilder.
* The Princess Bride, certain lines ("Dream of large women") were added to the film.
* The Princess Bride claims to be "abridging" the original novel, he often cuts out chunks of what he claims are very boring pieces of narrative. The timeskip comes when Buttercup, having agreed to marry Prince Humperdinck, must go through a few years of royalty schooling in order to become a princess. Goldman says this is terribly dull and so he boils it down to simply this: "What with one thing and another, three years passed."
* The Princess Bride claims to be "the good parts version" of an earlier novel by Simon Morgenstern, turning what was a digression-laden, politics-heavy slog into a fun action-adventure story. In fact, Morgenstern and his unabridged novel are entirely fictitious. This setup allows Goldman to lampoon such authors as Victor Hugo and his ilk. The film distills the story even further, into its purest essence.
* The Princess Bride) climb on top a wheelbarrow and then sets the giant on fire. The image of a ten-foot tall floating man on fire claiming to be the Dread Pirate

Roberts who leaves no survivors is enough to scare the sixty men guarding the gate. Fezzik at least has a holocaust cloak which supposedly prevents a person from burning to death and even then it doesn't make it pleasant.
* The Princess Bride. Count Rugen: "You've been chasing me all these years only to fail now? I think that's the worst thing I've ever heard... how marvelous!"
* The Princess Bride death. Failing to accurately determine which of two glasses contain poison, he begins to laugh and boast about his brilliance in "figuring out" where the poison was, only to immediately stop laughing and keel over.
* The Princess Bride ends with one that was apparently the best since the invention of the kiss.
* The Princess Bride ends with the heroes riding off into the sunset, leaving off the book's more ambiguous ending in which they are slowed down by various mishaps and the villain is shown to be on their trail. Then again, so did the book, kinda. (See the Literature section for details.)
* The Princess Bride ends with Westley, Buttercup, and crew on the run from Humperdink's forces.
* The Princess Bride, every Dread Pirate Roberts makes his fortune and retires; Westley has reached this stage and wants only to settle down with Buttercup.
* The Princess Bride everything in just as much detail as she unpacked, before leaving and never being seen again. Indeed, the whole premise of the book is that Goldman published the "good parts version" because the original was so very long and tedious.
* The Princess Bride feature a preview chapter of a prospective sequel at the end, a sequel which the author has never quite gotten around to writing.
* The Princess Bride, Fezzick revives Inigo from a drunken stupor by shoving his head into buckets of cold and hot water.
* The Princess Bride, Fezzik sobers up Inigo by alternately shoving him face first into tubs of steaming hot and ice cold water until Inigo is awake enough to tell him to stop.
* The Princess Bride first playing the Grandfather, and later playing the Grandson.
* The Princess Bride, five-year-old Fezzik's father has a hard time teaching him to defend himself. But when Fezzik finally does hit him, he breaks his jaw.
* The Princess Bride for teaching as though bouts would take place in a ballroom, and when Inigo is badly wounded by Count Rugen, it's this training and experience he calls on to see himself through it.
* The Princess Bride for the first time, but some of the cynical zingers are retained and given to characters in the inner story: Westley says "Life is pain... anyone who tells you differently is selling something" when he's angry at Buttercup for (he thinks) abandoning him, and Miracle Max, who's become very cynical after his mistreatment by Humperdinck, gets the line about True Love being the greatest thing in the world except a good sandwich.
* The Princess Bride has a variant. Wesley wears himself out just climbing up to where Inigo Montoya is waiting for him, so Inigo (who wants to defeat Wesley in a fair fight) politely waits for him to catch his breath before their fight, and they have a chat about Inigo's origin story.
* The Princess Bride has Prince Humperdinck try to start a war with a neighboring country by staging the kidnapping and murder of his fiancée and blaming it on them. It's stopped, albeit the Dread Pirate Roberts' attempt to stop the war be purely coincidental to rescuing Princess Buttercup.
* The Princess Bride has the bride-to-be almost becoming the victim of a False Flag Operation when her fiancé, evil Prince Humperdinck, hires agents to pose as enemy soldiers and murder her. This, so her death can be blamed on the neighboring country of Guilder, whom the Prince wants to go to war with.
* The Princess Bride has this. In the novel it's simply so lightly packed that you fall into it like it's not there.
* The Princess Bride has this with Westley and Buttercup. Buttercup's personal growth from stuck-up brat to more deserving of the Bright Lady title is much more prominent in the book.
* The Princess Bride, her hair length is never specified, but at eighteen the

narration mentions it's never been cut. For most people, that would be butt-length or thigh length. Long enough to sit on.
* The Princess Bride, he throws her into her room. Then he races down to where her true love Wesley is being tortured, and sets the torture device on maximum, almost killing him.
* The Princess Bride "inconceivable", meaning impossible to imagine, to refer to things that are simply improbable or unfortunate, until Inigo Montoya finally calls him out on it. Technically, Vizzini is using hyperbole rather than outright misusing it, but his use implies a lack of imagination more than the craziness of the situation.
* The Princess Bride). In his notes on Count Rugen, he notes "Has a goatee! Should be fun when others don't believe Jim that he's evil."
* The Princess Bride, Inigo does this with his sword during his fight with the Man In Black. The Man in Black then sees him and raises him with his own sword.
* The Princess Bride, Inigo has been working as a mercenary with Vizzini and Fezzik, fighting to the death in all sorts of situations and places. As a result Inigo has both the training and experience to better deal with such obstacles.
* The Princess Bride, Inigo Montoya fulfills this role rather well to the Man In Black/Westley. At first he is arrogant and apprehensive of Westley's skills, but eventually goes on to be a faithful right-hand man and gains a deep-set respect for his skills to the extent that he believes that Westley is capable of anything (which essentially turns out to be the case).
* The Princess Bride, Inigo Montoya goes for what has arguably become the most iconic example of this trope ever, when he found Count Rugen at the climax of the film.
* The Princess Bride: Inigo Montoya has spent his life training in sword fighting to avenge his father. He even has a catchphrase he plans to recite to the killer
* The Princess Bride, Inigo prays to his late father to guide his sword — then successfully divines the entrance to the Pit of Despair.
* The Princess Bride, Inigo spends many years trying to become a Master Swordsman. When he's finished his training, he's actually graduated to the even higher level of "Wizard." Even still, the Man in Black defeats him.
* The Princess Bride: In the beginning, Buttercup was haughty and arrogant (mostly due to her thinking her beloved Wesley is dead), but she grew into her role later; Wesley being her Knight.
* The Princess Bride in the Fire Swamp. He cleverly uses one of the fire spurts to set the ROUS ablaze and distract it, allowing him to finish it off with his sword.
* The Princess Bride in the process that led to his "editing" the book.
* The Princess Bride, in which Westley, Inigo Montoya, and Fezzik are enthusiastically sent off by Miracle Max and his wife, Valerie, to storm Humperdinck's castle.
* The Princess Bride is an expert tracker, and manages to correctly interpret Wesley's adventures while rescuing Buttercup.
* The Princess Bride is entirely fictional but claims to have been based on a previous work by someone named S. Morgenstern. This has caused a great deal of confusion with some people even telling William Goldman, the true author, that they remember reading the original book when they were young.
* The Princess Bride is fond of the word "inconceivable" to explain things that should not go wrong but inevitably do.
* The Princess Bride is forced to marry Humperdinck when she thinks Westley is dead. Fortunately, he shows up to rescue her. Twice.
* The Princess Bride is framed as a book being read by a grandfather to his sick grandson. The grandfather's elisions and commentary mirror the editorializing done by "editor" William Goldman in the original book.
* The Princess Bride is much darker than in the film. After being attacked by a trio of R.O.U.S.es, Westley begins packing mud onto his wounds, lest more of the creatures smell the blood and come after them. He screams at Buttercup (to pull her out of her shocked stupor) to help him. As they continue their journey, she asks about his wounds.

* The Princess Bride is odorless, tasteless, and causes nearly instant death from a dose small enough to avoid detection by the victim in a single glass of wine.
* The Princess Bride is pretty much a textbook example of Good Scars: two straight, clean lines, one on each cheek. They were given to him as a lesson by the man who killed his father in front of him when he was a child. It should be mentioned, however, that Inigo starts off as an antagonistic mook, having been hired by Vizzini to help kidnap Buttercup, and in the book, Inigo's scars are described as two vertical lines that cross over his eyes (the Six-Fingered Man was apparently skilled enough to miss the eyes themselves) and continue down almost to his jaw.
* The Princess Bride: It's got slapstick for the kids, clever dialog for the adults, romance for the ladies, action scenes for the guys.
* The Princess Bride. Its setting, which is "before Europe" but "after America", is a good indicator how seriously it takes itself. And "after Paris", which is lampshaded by both the editor and Goldman in one of the asides.
* The Princess Bride just happens to be "the biggest and the strongest", and is almost apologetic about the fact that he doesn't even need to exercise to be able to defeat anybody in a fight. However, during his fight with the Man in Black, he realizes that years of exclusively fighting groups have left his one-on-one game very rusty.
* The Princess Bride just wouldn't carry the same sense of dread with it that makes him so effective as a pirate.
* The Princess Bride led Inigo Montoya to the Pit of Despair. Or perhaps the spirit of Inigo's father really was guiding his sword to the entrance.
* The Princess Bride. Massive and strong (he doesn't even work out!), but a gentleman who will go easy on because "...I just want you to feel you're doing well." After he teams up with Wesley he just uses his size for intimidation purposes, and later keeping Inigo from getting into too much trouble.
* The Princess Bride master swordsmen in the Man in Black and Inigo Montoya, who have a memorable duel. The film also name-drops a number of historical fencing masters during their duel, while they're commentating on (and complimenting) each other's skills.
* The Princess Bride — but at the same time, the book spoofs the hell out of it by talking about ideas like "the most beautiful woman in the world" and "one of the best kisses ever" as if these are fairly objective things determined by expert opinion.
* The Princess Bride — the original has been "living like a king in Patagonia for quite some time."
* The Princess Bride, Miracle Max and his wife are borscht belt-style characters, with their shrill bickering, haggling over money, complaining, and Yiddish accents.
* The Princess Bride, Miracle Max promised that the miracle pill he made for Westley would last for a full hour. It's only after our heroes have left that he realizes that he messed up the proportions of ingredients and if it lasts for forty minutes, it'll be a miracle. This is what causes Westley to collapse during the confrontation with Humperdinck. This was altered in the movie because to do it the grandfather would have to give timestamps.
* The Princess Bride. Miracle Max uses a bellows to allow a mostly dead Westley to reveal that his motivation for living is "true love".
* The Princess Bride. Oddly enough, Capoferro is well regarded today but was largely ignored during the Renaissance when he was active.
* The Princess Bride of annotations in which the "editor" recalled being read the book himself as a boy.
* The Princess Bride, of course). An object placed on top sinks instantly to the bottom. Fortunately the events required to create this dry quicksand are highly unlikely to occur in nature.
* The Princess Bride of the lack of any odor and the fact that a man obviously was killed by a fast-acting poison beside it. He says "Iocaine, I bet my life on it.", meaning he couldn't decidedly identify it, but given the circumstances and evidence, made an educated guess.
* The Princess Bride of the story, while in the movie it was at the end.)

* The Princess Bride. One belonging to the villain himself, no less. You'd think Humperdinck insisting at length that they're powerless would prompt her to go in for a stab.
* The Princess Bride paragraph which states that as the heroes ride into the sunset, Inigo's wound reopens, Fezzik takes a wrong turn, Buttercup's horse throws a shoe, and Humperdink is hot on their trail.
* The Princess Bride: Prince Humperdinck calls his stepmother "ES", short for Evil Stepmother, because when he was a child he used to think that all stepmothers are evil. She's actually stated to be the most beloved person in the kingdom, and she and Humperdinck have a very good relationship — the name is more of an endearment than anything.
* The Princess Bride Prince Humperdinck sets up a booby trap on a door knob when he plants a deadly spider nearby so anybody who opens the door will be fatally bitten. The trap fails when Fezzik panics about the possibility of a trap and simply runs through the door, smashing it off the hinges.
* The Princess Bride. Princess Buttercup gets kidnapped by Vizzini, nearly eaten by the shrieking eels, is the oblivious target of a murder plot, gets set on fire, falls into a sand trap, and nearly gets maimed by a rodent of unusual size. At one point she even contemplates taking her own life.
* The Princess Bride received a new 2-Disc DVD, fans could choose between two gender-specific covers: the pink "Buttercup Edition" with a cutesy synopsis on the back, or the aquamarine "Dread Pirate Edition" with an action-packed synopsis. Later, the first Blu-Ray came with a compromised cover: The bottom half featured Buttercup with Wesley, while the top had Buttercup with the Dread Pirate Roberts.
* The Princess Bride regarding the Dread Pirate Roberts being Westley.
* The Princess Bride. S. Morgenstern is not real, and there was never a European country called Florin. But Goldman's comments and backstory are pretty convincing...
* The Princess Bride sneaking up on him and Buttercup but denies their existence because he doesn't want her to panic. Immediately after he says that, one of the oversized rats attacks them.
* The Princess Bride's trademark writing style: he makes two pages of buildup seem like half a book's worth.
* The Princess Bride." That is until Montoya is having none of Count Rugen's deterrence, thus screaming from the top of his lungs much to the Count's annoyance.
* The Princess Bride: The attraction that sparks the jealousy is one-sided, but Buttercup first realizes that she's in love with Westley when the Countess Rugen starts ogling him.
* The Princess Bride the author states that the original book that he is summarizing the boring parts of contains twenty-three pages of a character packing her hats for a trip.
* The Princess Bride (the book, not the film). Prince Humperdink informs his head of law enforcement Yellin of a plot by nearby Guilder to assassinate his bride-to-be Buttercup. The problem is, there is no plot. It's just an excuse for Prince Humperdink to murder his bride and go to war with Guilder. As such, Yellin can find absolutely no evidence of any plot and feeling himself incompetent at his job, hands in his resignation. Prince Humperdink refuses to accept his resignation, however, because he needs Yellin to rule Guilder after the war is over. As such, he confesses his true intentions to Yellin, who graciously accepts the Prince's offer to rule Guilder in his name.
* The Princess Bride: The Dread Pirate Roberts is a mysterious and terrifying pirate who has long terrorized ... some maritime province.
* The Princess Bride the Dread Pirate Roberts made himself immune to at least one poison, foiling Vizzini's "I know you know I know" reasoning with the poisoned wine and knocking Vizzini out of play.
* The Princess Bride. The footwork is actually pretty accurate to real fencing.
* The Princess Bride: The King Bats. They're one of the few things of which Fezzik is actually afraid.
* The Princess Bride. The movie adaptation, however, plays this trope straight.

* The Princess Bride, the narrator believes beauty to be completely objective. There is a #1 most beautiful, #2 most beautiful, and so forth. The very first sentence is "The year that Buttercup was born, the most beautiful woman in the world was a French scullery maid named Annette." Buttercup starts in the top twenty, but after the removal of a few at the top and a life-changing experience, she becomes #1. So she would be World Class beauty.
* The Princess Bride: The whole concept of "The Dread Pirate Roberts" relies on this trope. The current Dread Pirate Roberts is usually quite nice and may not have killed anyone at all.
* The Princess Bride they demand the key to the main gate from a man who says he has no such key. Wesley turns to Andre the Giant and tells him to tear his arms off. The gatekeeper pulls out the key. "Oh you mean THIS key."
* The Princess Bride, this sequel was mentioned in the epilogue and was "having trouble getting published due to legal problems with S. Morgenstern's estate". An address was also listed that readers could write to for information. This was of course, completely fictional since S. Morgenstern is an alias made up by the REAL author, William Goldman. Still, people who wrote in got a sample chapter (which was simply published in later editions). In 2007, Goldman stated he actually wanted to write it, but was having trouble coming up with ideas. Nothing has been heard since.
* The Princess Bride to be spared, with a simple a polite "please, I have to live". (Roberts had been more used to shameless and pitiful groveling, and sincerity was new to him.)
* The Princess Bride to fend off the ROUS with a stick, but fails utterly. She's not much better at most other points in the story either, and the one time she does something reasonably useful ("Do you promise not to hurt him?") everyone yells at her for it.
* The Princess Bride, Vizzini is clever, but frequently verbally abuses Fezzik and Inigo. On the other hand, Fezzik is by no means smart but makes up for it in sheer friendliness.
* The Princess Bride - Vizzini kidnaps Buttercup in an attempt to kill her and start a war between two countries. He's poisoned about midway through the movie, and it's later revealed he was hired by Prince Humperdinck, the true mastermind of the plan.
* The Princess Bride. Vizzini orders Fezzik to kill The Man In Black with a boulder to the head while he's not looking; Fezzik, thinking it's unsportsmanlike, disobeys him and fights the Man In Black in a wrestling match instead.
* The Princess Bride. We hate Rugen, but we feel contempt for Humperdinck.
* The Princess Bride, we have the Dread Pirate Roberts, where the previous Roberts handed the title over to another when he wanted to retire. And so forth — there have been about half a dozen Dread Pirate Robertses by the time of the book.
* The Princess Bride, Westley gently reproaches: "Death cannot stop true love. All it can do is delay it for a while." Buttercup takes this to heart, and through the rest of the film remains calm and secure in her conviction that, no matter the situation, Westley will always come for her.
* The Princess Bride, Westley is being tortured by Count Rugen. When the evil Prince Humperdinck pushes Rugen's device to its maximum power, and Westley starts screaming, the camera cuts to the countryside, again to the castle, and again to the village beyond, where the townsfolk look about, wondering where the scream is originating from. It's a plot point, in that Inigo and Fezzik start looking for Westley because of the scream.
* The Princess Bride, Westley is subjected to this at one point by Count Rugen, the six-fingered man of Inigo Montoya's past, who considers himself a "scholar of pain." He decided to test out a machine that can sap the life out of his victim, which of course is rather unpleasant to Westley. However, it's small potatoes compared to when Humperdinck gives the machine a spin, since he decides to take it up to fifty years, torturing Westley to near death.
* The Princess Bride. When Buttercup asks Humperdinck to promise he'll return Westley to his ship:

* The Princess Bride, when Buttercup tries to swim away from the ship, Vizzini warns her that, unless she comes back immediately, he will cut his arms and legs and draw blood into a cup and throw it into the water "and sharks can smell blood in the water for miles and you won't be beautiful for long." She doesn't, he does, the sharks go mad, and the narrator interrupts to say that, of course, Buttercup doesn't get eaten at that time. (The movie replaced the sharks with shrieking eels.)
* The Princess Bride, when Count Rugen (the Six Fingered Man) briefly has Inigo at his mercy after hitting Inigo with a throwing dagger, the sadistic Rugen takes obvious pleasure in the chance to gloat over a seemingly helpless Inigo.
* The Princess Bride, when his wife is provoking him by reminding him of his treatment by Prince Humperdinck.
* The Princess Bride, when Humperdink charges into the Pit of Despair and cranks Rugen's life-sucking machine to its maximum setting.This causes Inigo to say "Fezzik, you hear? That is the sound of Ultimate Suffering".
* The Princess Bride when Inigo and Fezzik are reunited, Inigo wants to find Vizzini and have him plan a way to break into the castle, so that he (Inigo) can kill Count Rugen. However, Vizzini is dead. Then Inigo realizes the Man in Black must have out-thought Vizinni, and "a man who can do that can plan my castle onslaught any day!"
* The Princess Bride, which featured a super-quicksand called "lightning sand," which is dangerous because its grains are so small that you fall straight through it. At least as dangerous (in the novel, at any rate) is the way the stuff gets into your lungs.
* The Princess Bride, which has a preview of a sequel that was never supposed to be written.
* The Princess Bride, which makes no attempt to make the (fairly limited) magic "make sense".
* The Princess Bride: While Count Rugen isn't technically a scientist in the modern sense, he does treat torture as a science, having built a complex machine for "sucking the life" from his victims x number of years at a time. After he sucks a year of life out of Wesley he even asks Wesley how it felt, for the sake of his "research".
* The Princess Bride, who wants Buttercup to marry him instead, knows he is doomed to failure as long as Westley is alive because of this trope.
* The Princess Bride, William Goldman, the author, has a MAJOR role in the story (or at least plays an author named William Goldman...).
* The Princess Bride: "You are using Bonetti's Defense against me, eh?" "I thought it fitting, given the rocky terrain."
* The "Princess Celebration" line of the main toyline, which was released Seasons 3 and 4, shortly before the release of the first
* The Princess Diaries and also on numerous VHS, DVD (not counting the 2-DVD special edition and its sequel) and Blu-ray Disc releases).
* The Princess Diaries, Anne Hathaway describes what her perfect first kiss will be like.
* The Princess Diaries, as Queen Clarisse and her Head of Security Joe get married instead after several decades of hiding their feelings.
* The Princess Diaries - at the end of Mia's makeover Gretchen and Helga are holding up pre-makeover pictures of her and pull them apart to reveal the new Mia. The makeover is easily the most remembered part of the film.
* The Princess Diaries at the time, it's entirely possible that the film is more true to her life than she realizes.
* The Princess Diaries: Bland Perfection leaning towards Let's Call The Whole Thing Off. When Mia calls off the wedding at the very last minute, Andrew is perfectly understanding about it, and he's only worried about what his mother's going to think.
* The Princess Diaries but has absolutely no people skills. Whatsoever.
* The Princess Diaries." Earlier, Joe turned down Mia's request to take the Genovian flags off the limo he was driving, on the grounds that they allow him to

park anywhere.
* The Princess Diaries, excerpts of which were included in the tenth book. Then the author published the whole thing as a standalone book.
* The Princess Diaries first book, Mia has had a long-time crush on Josh, the popular jock. Once she is exposed as being a princess, he asks her out. Cue reaction. Of course, he only did it to get 15 seconds of fame as Mia's boyfriend, and Mia realises this and breaks up with him.
* The Princess Diaries for boys watching as well, giving them someone to relate to.
* The Princess Diaries had sung in public, or on-screen since she had throat surgery in 1997. She reportedly nailed the song on the first take, and brought tears to the eyes of the crew present.
* The Princess Diaries has a downplayed variation, in which Mia has to pick her future groom from a slideshow. Among the pictures shown were those of a then-single Prince William, who was just there to be eyecandy, and this guy:
* The Princess Diaries). He only pretends to like her once she finds out she's a princess.
* The Princess Diaries. However, she breaks the kiss in pure shock and they both fall into the fountain as they continue bickering.
* The Princess Diaries, ignoring the nice guy entirely until the inevitable fallout.
* The Princess Diaries is an Ordinary High School Student who turns out to be a princess of a minor European principality.
* The Princess Diaries mentions this trope several times, such as in the fifth book, when Mia explains why she's so excited about prom:
* The Princess Diaries Mia gets two lady's maids who do this frequently until Mia exasperatedly tells them to stop it. She also does this when dancing at a ball in the first movie.
* The Princess Diaries, Mia has tendencies toward this (and later writes romance novels herself) but a lot of it comes from being friends with Tina Hakim Baba, who is explicitly stated to think this way throughout the series.
* The Princess Diaries, Mia is at a completely different end of life and the political spectrum from her Grandmere, and the two often fight because of that. Nonetheless, Mia is comforted when she bemoans that her boyfriend doesn't appreciate prom and Grandmere immediately understands.
* The Princess Diaries. Mia is subjected to an enforced makeover to take her from the awkward geeky girl she is to looking more "appropriate" to the role of Princess of Genovia.
* The Princess Diaries, Mia returns home after being humiliated by her supposed "friends" and she cuddles with her mom in a position like this and cries.
* The Princess Diaries Mia's mom marries her math teacher Mr. Gianini.
* The Princess Diaries: Mia's mother starts dating her math teacher, much to Mia's disdain. She warms to their relationship eventually, and they have a baby together by the sequel.
* The Princess Diaries, Mia's mum starts dating her geometry teacher, and eventually marries him, making him her stepdad. In something of a reversal, she initially finds it most embarrassing seeing him around the house, as it feels very weird to see a teacher comfortable in her home space like that, but it certainly makes things more awkward at school, too.
* The Princess Diaries Mia Thermopolis, however, could never get away for being stupid (which wasn't a very trendy thing to be for a Disney Princess with a heart of gold).
* The Princess Diaries: Michael and Mia have to resort to sending anonymous love letters and replying via a computer program in order to get their feelings out in the open.
* The Princess Diaries, Michael because of feeling the constant need to prove himself "worthy" of dating a princess, Mia due to her low self-esteem for dating an attractive genius who is her best friend's brother.
* The Princess Diaries movie, Mia and her would-be paramour end up in a water fountain as she's trying to fend off his advances. As luck would have it, this is

in the middle of a formal event. As she approaches her grandmother:
* The Princess Diaries) or between France and Spain (like Andorra) in the movies where it's a Kingdom. It's pretty nice, if a bit dull.
* The Princess Diaries's character) had a big aforementioned incident while partying at the beach with Josh Bryant (her high school crush) just as Lana reveals her shocking truth to the news by showing her private parts (while getting dressed in a tent). Vice Principal Gupta shooed them away and brought her home to her mother (saying "my foot didn't even pop" while crying/comforting her).
* The Princess Diaries series; Mia encounters this situation with her Secret Snowflake Tina, but manages to get her a last-minute gift that's both heartfelt and appropriate.
* The Princess Diaries's granddaughter wanted to actually see the castle. So Disney bought stock footage of a European castle with the Genovia flag added in.
* The Princess Diaries. The sequel plays it for laughs when Lily has to dress up for Mia's wedding.
* The Princess Diaries: The tiny European kingdom of Genovia (a stand-in for Monaco).
* The Princess Diaries to sign on as Grandmere, and they wanted to beef her role up. When Meg Cabot heard they were planning to cast her, she responded "kill the dad!"
* The Princess Diaries trying to explain better ways to lure Louie back home. Her mother's point is that, since Mia knows in advance that she has a scheduling conflict between her royal duties and a prearranged date with her boyfriend, she should begin hinting that something might come up, that maybe they should reschedule, so that she's not either leading him on or hurting his feelings by bluntly telling him she can't make it. Mia tries it, but finds it isn't her style.
* The Princess Diaries was given a song that had been written specifically for her limited range, so that she could have her first musical number since the surgery that damaged her vocal cords. The cast and crew were said to be in tears during the filming.
* The Princess Diaries. When Michael asks Mia, newly crowned as princess, why she picked him, she tells him, "Because you saw me when I was invisible," referring to the fact that Michael was one of the few people who cared about Mia from the start, even when most of her peers looked down on her, rather than just becoming interested after she was revealed to be a princess.
* The Princess Diaries when the Queen invents the "Genovian Order of the Rose", after spotting a sign for Rose Street, to get Mia out of a spot of trouble with a police officer.
* The Princess Diaries, where Mia's mother was just a casual mistress of the prince.
* The Princess Diaries (which is a Disney movie aimed at pre-teen girls, just so we're clear), there is a scene where Mia and her best friend Lilly are looking at prospective princes. Mia remarks that one prince shown is cute, to which her bodyguard Joseph replies, "His boyfriend thinks so too." Mia and Lilly's reaction is... enthusiastic.
* The Princesses of Heart (Alice, Jasmine, Snow White, Belle, Cinderella, Aurora, and
* The princess finally tells the secret to the man she loves, so he uses the ancient trick of discarding one lot; that is, he takes out a rock and throws it into the river. A red is left in the jar, so naturally, the guy pulled out the white one.
* The Princess from "The Iron Stove" mixes this with some sprinkles of
* The Princess in the Pigpen, he replies, "And I'm the king of England." She is shocked at his gall and threatens to have him hanged for treason.
* The Princess Lylia smuggles fine cigars, wine, and pornography to her favorite cousin Cullen in
* The Princess Mayblossom", where the titular princess kills an ambassador who is trying to kill and eat her. Once the ambassador is dead, she realizes that he was the only other person on the island with her (the two were stranded there, and

could not find a way out), breaks down in tears, and contemplates her fate. Luckily, she is rescued not long after.
* The Princess of Cleves, which he called a 'farce, comedy, tragedy, or mere play'.
* The Princess of Melvales is a great beauty who is also spirited and compassionate enough to approach the king about him having his youngest son unfairly executed.
* The Princess of Moonbrooke is the party's weakest fighter but she is a good mage.
* The Princess of Themyscira, while evenly matched at first, still ends with her beaten into unconsciousness and needing to be saved by Soarin'.
* The Princess of Themyscira, with the next couple of chapters being spent showing her backstory and how he ended up there.
* The Princess of Themyscria revealing to Hippolyta that Ares opening a portal to Tartarus has created a crack in reality that Apokolips can take advantage of.
* The Princess on the Glass Hill, and so can ride up the hill as a knight.
* The Princess on the Glass Hill, Boots claimed that nothing happened during the nights he watched over the field.
* The Princess on the Glass Hill" could be won only by a man who climbed the hill.
* The Princess Planet is definitely the jerkass type (she's also on the Literal Genie page, mind). Fortunately, Christi is very smart.
* The Princess Planet often have whole strips devoted to Princess Christi and other princesses trying to outdo each other by showing all ever weirder Mix-and-Match Critters than the other.
* The Princess Princess is also named Lyanna Stormborn, further confirming this.
* The Princess Series, Danielle ("Cinderwench") is often underestimated because she has no obvious skills or magic. However, she can speak to animals and strongly persuade them to agree with her. Beyond that, animals simply like her, and will help her out even if she doesn't ask for (or want) their help.
* The Princess Series — by Jim C. Hines. It's basically the Disney princesses meets Charlie's Angels
* The Princess Series- possesses an enchanted glass sword as the final gift from her mother's spirit, capable of cutting through anything apart from Danielle's own flesh.
* The Princess Series, Talia is skilled in hand to hand combat and can use many weapons well, but knives tend to be her primary weapon of choice.
* The Princess Series. Talia (Sleeping Beauty) kisses and awakes her openly showing her love for Snow White for the first time. Snow is a major flirt who is blind to Talia's true feelings. Talia seems to realize it wouldn't work out so tells Snow that she just used a spell to wake Snow.
* , the princess's feelings are not touched on until his brothers kill the prince who abducted her, but then she weeps bitterly.
* The Princess' Skirt for the day and she would have to use the stairs, all the 10th grade boys stormed out of their classrooms so that they can have a peek on Akane's panties.
* The Princess That Wore a Rabbit-skin Dress by Marie Campbell). The protagonist's stepfather tries to force her to marry him
* The Princess, The Stray Cat, and Matters Of The Heart. In the sequel, Euracia says that she's 10,000 years old, and is likely not kidding!
* The Princess Thieves, After robbing the Marquis of Cheswick, Robin and Oberon loose the watchmen by disappearing into the thick, London fog.
* The Princess Thieves, Gwen holds Robin's hand to get him to stay when she is lying down in Scarlet's room, leading to their first kiss.
* The Princess Thieves Princess Gwendoline's fiancée, Aaron, refers to her as "sweet pea."
* The Princess Thieves takes place on the same Earth, dealing with what has happened to Victorian Britain.
* The Princess Thieves where all the characters, despite most beings from other dimensions, speak with British and American accents.
* The Princess Wei Yang: Thirty-six-year-old Wei Yang time-travels into the body of

her thirteen-year-old self.
* The Princess Wei Young: Chiyun Rou, the real Wei Young's stepmother, is responsible for Wei Young's death, and makes repeated attempts to kill or disgrace Xin Er.
* The Princess Wei Young has a variant. Xin Er pretends she doesn't care about Tuoba Jun to save the Li family, because if the "witchcraft" incident was revealed it would mean the entire family's execution.
* The Princess Wei Young: Tuoba Jun and Chang Le promised to get married when they're grown up. After they grow up Tuoba Jun no longer wants to marry Chang Le, but she still wants to marry him.
* The Princess Wei Young: Xin Er pretends to be Wei Young. She's helped by the fact none of the Li family have seen Wei Young for years, but some of them still suspect she's an impostor.
* The Princess Wei Young: Xin Er's family and the real Wei Young only appear briefly. Justified, since their deaths set off much of the plot.
* The Princeton Review set of standardized test books has a light tone of explaining subjects compared to other textbooks while getting the points across.
* The Prince warns against using hired troops on the basis that mercenary troops are undisciplined, disloyal and poorly motivated, and prone to turning against you.
* The Prince was originally going to have more screen time, but he could only appear for brief moments throughout the film as the animators found him difficult to draw.
* The Principal and the Pauper. Then-showrunners Bill Oakley and Josh Weinstein have defended the episode, as well.
* The Principal Boy roots of the character; in the nineteenth century, putting an attractive actress in a mock-medieval doublet and hose was the only way of showing off her legs without causing a massive scandal.
* The Principal Girl hilarity, a boy may be cast in this role, but even with a girl it works. Friendly gay jokes are a bit of a tradition in the panto.
* The Principality of Liechtenstein has been described as the last functioning remnant of the
* The Principality of Seborga has a curl similar to North Italy's, but it has a more rumpled and bent appearance.
* The Principality of Zeon and its successor movement Neo Zeon from the UC
* The Principality of Zeon), the truth of the matter is Side 3 was already an independent republic under the previous founder Zeon Zum Daikun, the same man that the Zabis (specifically the patriarch Degwin) assassinated to subvert the Republic of Zeon into a totalitarian absolute monarchy. Overall, the Principality of Zeon is definitely the "evil empire" of the Gundam universe, in spite of having legions of diehard fans that would say otherwise.
* The principal reason was the constant redistribution of land between various lords, barons and magnates after the defeat of their faction in one rebellion or another.
* The Principal, till Rick catches one of Victor's punches in his hand and says, "My turn."
* The principle holds even for more practical tanks. T-34 and the Sherman were only marginally larger than the Panzer IV, yet they weighed nearly 10 tons heavier. The Panther was yet again somewhat larger than the T-34 and the Sherman, but heavier still by more than 10 tons. Many German generals thought the advantages of the larger Panther were not worth the penalty imposed by the heavier weight. Guderian in particular believed that the long-cannon Panzer IV was the best tank Germany produced during the World War II; despite the fact that it was more or less an even match for the Shermans and T-34s, it was an absolute workhorse in the German Army and was
* The principle of cosmophysicism is the idea the universe has a mind divorced of theism.
* The Principle, says she was misled about the actual content of the film and never would have participated if she had known.
* the principles of historical research - most notably, the reliance on and

preference for primary sources, combined with the rigor of Thucydides' logical methodology.
* The print comic also features a straight example in the Gauntlet of Supremacy. It renders its wielder immune to harm, fires powerful energy blasts, and gives the wielder
* The printing of Thassa's Oracle in Theros Beyond Death in early 2020 threw the competitive Commander community into a state of panic due to the card being the final piece of the puzzle that decks abusing the interaction between Flash and Protean Hulk needed to assert total dominance over the format. Flash was already infamous for being a problem card in other formats (most notably Legacy, where it has been banned for more than a decade), and this was widely viewed as the final nail in the coffin for Flash... by nearly everyone
* The print version of Book 1 features a new, print-exclusive prologue, explaining that the story takes place in the world of a popular roleplaying game — though they can't say which one because it would be a trademark violation. Cut to a panel with players at a table suggesting they play three
* The prior games seemed to imply that the Brotherhood's many foibles are the result of generations of buildup and mysticism, but
* The Priors could also ham it up occasionally, especially when quoting the Book of Origin.
* The Priory of the Orange Tree, especially the England analogue of Inys.
* The Priory of the Orange Tree: Is about humans who hate dragons and humans who worship dragons.
* The Prismatic Sphere spell is normally stationary. If it can be made mobile (perhaps by modifying it so it can be cast on a movable item/creature) it can be touched to an opponent, inflicting a variety of massive types of damage on the victim.
* The Prism Idol Trainees in the fourth ending theme were chosen via the Dream Girls Audition. They also played roles in the anime.
* The Prism Pentad use a large axe made of steel as her favourite weapon.
* The Prisoner (1967), a bizarre combat sport involving contestants wrestling on trampolines and trying to throw or push each other into a swimming pool while wearing pseudo-Japanese costumes.
* The Prisoner (1967) about a village used to house POWs who knew too much.
* The Prisoner (1967). After being gassed in his flat, Number Six wakes up apparently still in his bedroom. When he opens the blind on his window, he sees the Village outside.
* The Prisoner (1967) bid farewell by saying the phrase "Be seeing you" after forming a monocle over one's eye with the thumb and the forefinger, with the rest of the fingers extended diagonally above the forehead.
* The Prisoner (1967) doesn't carry any adverts, this can cause issues when BBC programmes are repeated on commercial channels such as UK Gold, which do. Early on it was common to have eyecatches specific to the programme (usually a screencap with the programme title and channel logo) but more recently they tend to use generic eyecatches which just have the channel logo.
* The Prisoner (1967) episode "Many Happy Returns". One morning Number Six wakes up and finds the entire Village deserted except for a cat.
* The Prisoner (1967) episode "The Girl Who Was Death" was a tall story with Number Six after an archvillain and his rocket poised to destroy London, which was disguised as the Beachy Head lighthouse.
* The Prisoner (1967) fell apart in a heady mix of paranoia, backstabbing, and accusations of people spying on each other in real life. Many observers considered this an example of this trope.
* The Prisoner (1967) from fans who hounded his home looking for answers and clarification.
* The Prisoner (1967) gets more bizarre over time until the last episode leaves viewers utterly dumbfounded.
* The Prisoner (1967) - Goal: Escape from the Village. Achieved at the series end. Or is it? Also, McGoohan's repeated return to the village is, arguably, one of the

themes of the series.
* The Prisoner (1967) had the No. 2 of the week, who tried the scheme of the Week to attempt to break No. 6. (There were a couple of returning No. 2s with new schemes.)
* The Prisoner (1967)". He's long since learned that his fellow citizens will immediately tattle on every action of his. But if he does random things for no reason, the other Villagers have nothing to report. But Two can't accept that. They must all be in cahoots with Six!
* The Prisoner (1967). He wakes up in The Village, where the series is set.
* The Prisoner (1967)" includes being shipped in a wooden box from Poland to London.
* The Prisoner (1967): In the end, everyone goes crazy, wears weird costumes, and sings Dem Bones all day long. Would have been the Trope Namer if Gainax wasn't so infamously divisive at endings.
* The Prisoner (1967) in which Number Six is a sheriff throwing down his badge, instead of a secret agent throwing down a letter of resignation.
* The Prisoner (1967) is a powerful Supercomputer that apparently knows everything, and can answer any question given to it. Except Why.
* The Prisoner (1967). McGoohan always denied it while other people involved in the show supported it, in what was probably a deliberate attempt to screw with the fans some more.
* The Prisoner (1967) — Martini flavor, but gives a hangover worse then any flavor of beer (stale or otherwise), or (for that matter) any alcoholic beverage period (red wine and tequila included). Also, it feels like someone dropped a tab of LSD into the glass.
* The Prisoner (1967) never uses a gun, until the events of the final episode push him too far. (Some believe the character is the aforementioned John Drake.)
* The Prisoner (1967). No ifs, ands, or buts about it. Listen to the man give an interview and you'll be amazed at just how much the lines blur.
* The Prisoner (1967)". Number 6 escapes the Village on a raft and encounters a fishing boat whose crew steals his belongings. He ends up fighting them and eventually captures them.
* The Prisoner (1967), Number Six's front door seems to know when he's entering or leaving his home. Of course, he is living in a panopticon.
* The Prisoner (1967): Number Six wants to escape The Village. The new Number Two wants to keep him there.
* The Prisoner (1967): Oddly enough, this is Number 24's excuse when Number 6 calls her for help in "The Schizoid Man". She comes anyway.
* The Prisoner (1967) officially resign, in the sense that his crossed-out identification picture is shown being placed in a filing cabinet labelled RESIGNED. So technically he's not working for them anymore ... but he's not working for anyone else either, and it's possible that (along with preventing him from revealing sensitive information) was the whole point.
* The Prisoner (1967) parody, where Number Six as a secret agent is being given his instructions from an LP in a record store.
* The Prisoner (1967): Patrick Mc Goohan's Lotus Seven, which, apart from the opening title sequence, only appears in one episode in the series.
* The Prisoner (1967) pursues his quarry through an amusement park, breaking up a fashion shoot a couple of times - the photographer is not at all amused: "'Ere, wot's yer game, Sherlock Holmes?! You'll never pick up yer teeth with a broken arm! I'll tear off yer leg an' I'll beat you over the 'ead with it!"
* The Prisoner (1967)" screws with Number Six's sense of identity by secretly conditioning him to alter his reactions, then introducing an Identical Stranger who's been trained to react the way Six is supposed to.
* The Prisoner (1967) seemed to make extensive use of Portmeirion, the location filming had been restricted to just a few weeks early in the production, and later episodes were mostly studio-bound. The directors nonetheless gave the impression that most of the series had been shot on location by carefully rationing the existing footage.

* The Prisoner (1967) several different side characters in various episodes are seen wearing the same number badges. This was due to a simple budgetary reason as they reused the same limited pool of printed badges throughout the series. At the same time, it is perfectly in line with the spirit of the series that people would come and go and the numbers be reassigned.
* The Prisoner (1967) "Shattered Visage" answers this with another question: "does the existence of Number Two imply the existence of Number One?"
* The Prisoner (1967), since the overlords at The Village know nearly everything about the Prisoner and can accomodate him almost immediately. They know how he takes his tea, what foods he likes, and so on, and regularly give him exactly that.
* The Prisoner (1967) spikes, land mines, and poison-laced exploding candles.
* The Prisoner (1967) spy spoof episode "The Girl Who Was Death", the title character Sonia, having failed to kill Number 6 with various elaborate death traps, finally decides on the direct approach, escalating from a machine gun to hand grenades and mortars before finally drawing a bazooka on him.
* The Prisoner (1967). The desk it faced had several phones and a set of controls.
* The Prisoner (1967), the mysterious Village is surrounded by unclimbable mountains to the north, and the sea to the south. On several occasions, the eponymous Prisoner attempts to escape by boat, but he always ends up getting caught.
* The Prisoner (1967), though, any connection is kept as ambiguous as possible.
* The Prisoner (1967)", turned out to be quite prophetic with regards to the rise of digital culture and the Internet; it just does so involving a computer the size of a room that spits out printouts.
* The Prisoner (1967) under surveillance...especially when he believes he isn't.
* The Prisoner (1967) used establishing shots of the Village. Towards the end of the series, when money was beginning to run out and access to Portmeirion (where the series was filmed) was minimal to non-existent, the Village would be represented entirely by stock footage, all other scenes being shot indoors and often requiring the story to be taken out of the Village setting by various means.
* The Prisoner (1967) where Number Six tampers with the bad guys' old-timey WWI-era grenades (the ones with a baton-like handle used to hurl a can-shaped charge) so the explosives ended up in the handles.
* The Prisoner (1967), while still answering to the unseen Number One.
* The Prisoner (2009): Loose remake of the Patrick McGoohan 1960s original.
* The Prisoner, as a means of identifying the conspirators behind the assassination of President Santiago.
* The Prisoner. As the game begins the player is assigned a three-digit number and told never to reveal it to anyone in the game. The game then proceeds to trick the player. Notoriously, a simulated game crash would randomly occur, generating the error message "Syntax Error in XXX", with the 3 digit code being the XXX. Users familiar with the BASIC source code would usually type "List XXX" to see what the error was, not knowing the game was still running. This was actually a clue, as one way to win the game was in fact to go into the source code to look for information on beating the game. Any wonder that the CIA reportedly used the game as a training tool?
* The Prisoner, complete with farcical trial scene, seesaw-camera-chair, and use of the phrases "Who is Number One?" and "Be seeing you".
* The Prisoner episode "The Schizoid Man". It's unclear whether the title refers to the Prisoner himself or the doppelganger who is brought in to gaslight him; indeed, this exact uncertainty is the whole point of the episode.
* The prisoner in the court scene during the beginning of the first chapter is pleading for Harren Hoare to spare him, or to allow him to join the Night's Watch. It only makes Harren punish him more severely.
* The Prisoner of Limnos when Penric twice uses his sorcerer's version of a shaman's geas to convince guard dogs that he's actually their best friend. The first time is with the huge mastiffs guarding the Xarre estate, and the second time is with fluffy little dogs of the Lady's order on Limnos who are trained to sniff out males.

* The Prisoner Of Second Avenue gets a bucket of water dumped on him twice by his upstairs neighbors.
* The Prisoner of Zenda, a descendant of said Crown Prince's illegitimate son.
* The Prisoner of Zenda, after the heroine marries the king, and the heart-broken lover leaves, it recounts how every year, the new queen would send him a messenger, telling him of her.
* The Prisoner of Zenda although, in this case, they are distant cousins who have never met.
* The Prisoner of Zenda by Anthony Hope, and its various film versions; Douglas Fairbanks, Jr. being the most stylish.
* The Prisoner of Zenda category (his parents were technically married, but since his mother was a commoner, he is only a prince because people are too polite to rub his face in it), and his duchy (which is ruled from the capital, no less) was a creation of his father's hoping that being the second-most powerful noble in the kingdom would soothe his anger at being passed over for the throne in favor of his younger half-brother Rudolf (it didn't)
* The Prisoner of Zenda however is considered a better Flavia than Madeleine Carroll.
* The Prisoner of Zenda. The girl is expected to marry the actual king instead of his decoy double (with whom she's fallen in love).
* The Prisoner of Zenda was inspired by the events of Royal Flash as told by our hero to Anthony Hope.
* "The Prisoner" (S10, Ep22). The Stynes learn where the Men Of Letters bunker is, break in, and douse gasoline everywhere they can. Unfortunately for them Dean returns, and the Mark of Cain makes him stronger and less merciful than ever.
* The "prisoners" line probably stems from the opening scene featuring Romulans instead of Klingons. The KM test is in Gamma Hydra near the Neutral Zone — near the Romulan Empire in TOS. Also, the Klingon Bird of Prey in
* The Prisoner. The kicker is that if you pay attention to it in terms of themes, rather than plot, it's not without meaning. It's just... very peculiar in how it communicates those themes.
* The Prisoner the previous year and never returned them. When he sees her again, he is literally speechless. A flashback much later on shows that the younger Nico had shorter hair, glasses, and a much more conservative wardrobe.
* The Prisoner where part of Number Six's problem is that the Village is rife with spies and hidden surveillance. As the show progresses, he learns first to hide intentions from their gaze, and eventually to twist these measures to manipulate his jailers.
* the prison escapes of Victor Dashkov and Rose (on separate occasions), and to infiltrate guardian-protected locations. All for good causes though, they are not villains.
* The prison in "The Boiling Rock" is obviously intended for Firebending prisoners — it has several rows of refrigerated "coolers" used as punishment for Firebending. Once it is dismantled, the cooler's insulation makes it an ideal boat to cross the lake that surrounds the prison, which is heated to boiling temperatures by the volcano beneath it.
* The prison once got a guard dog that prevented the prisoners from stopping, leading to the prison having to order more rocks.
* The prison ship that just so happens to find a Star Destroyer infected with a in solitary confinement.
* The prison variant is discussed during one of Tony's therapy sessions with Dr. Melfi. Turns out you get a pass on that in the Sicilian mafia, but actively seeking out men outside of prison is crossing a line for them.
* the private but ridiculously wealthy Duke) left to form the Atlantic Coast Conference.
* The Private Diary of Elizabeth Quatermain celebrating the Christmas festivities.
* The Private Diary of Elizabeth Quatermain grows seriously ill and falls into a coma. Her love interest takes a seat next to her bed and will not leave.
* The Private Diary of Elizabeth Quatermain her own birthday at one point, has the

same birth date as the author because "I'm not using it very much just now, so I let her borrow it."
* The Private Diary of Elizabeth Quatermain. The first time he covers her with his coat; the second time he carries her to her own bed.
* The Private Diary of Elizabeth Quatermain. Unaware that she did so under duress, he spends the day drinking himself stupid until Tom comes along to drag him out of the bar.
* The Private Diary of Elizabeth Quatermain: When arguing with your love interest about how you knew someone else was faking his affections for her, it's very easy to lose your cool.
* The Private Diary of Elizabeth Quatermain, when the title character kisses her self-appointed protector on the top of his head out of gratitude. He's stunned into silence.
* The Privateer having a starship's position be given away by somebody aboard dropping something.
* The Private Life of Don Juan features Rodrigo, a young man who is trying to copy the real Don Juan but can't even manage to get over a lady's balcony without tripping. The first time he's challenged to a duel by a jealous husband, he's killed.
* The Private Life of Don Juan is feeling his age, complaining about his aches and pains and how he can't always get it up. He confesses to his doctor that "Nowadays when I sit down to a quiet game with a lady, I'm no longer sure of holding the cards."
* The Private Life Of Samuel Pepys: "I'm accused of spying for the French, and taking bribes. I never spied for the French!" (A slight variation, in that it IS the most serious charge he objects to.)
* The Private Life of Sherlock Holmes into removing the first and third segments, completely cutting Inspector Lestrade (played by George Benson) and other characters played by the likes of Noel Johnson, Nicole Shelby, and David Kossoff from the movie.
* The Private Life of Sherlock Holmes is probably the defining version of this trope. In this film, the Great Detective's brother, Mycroft, is directing top-secret development of Britain's first submarine in Loch Ness; an attached prop monster head keeps the local gentry fooled into thinking it's the beastie.
* The private SpaceX Dragon, a capsule with a capacity of seven currently intended to fulfill a NASA contract for shuttling astronauts (taking over part of the old role of the Shuttle and relieving pressure on Soyuz) and (in an automated configuration) supplies (relieving pressure on the automated Russian
* The Prize Fighter with Don Knotts and Tim Conway. Tim is Don's coach and tries to make Don drink raw eggs. Don demands Tim drink the eggs first to prove that it works and Tim ends up making scrambled eggs.
* The Prize Pest (1951), Porky scares Daffy with a monster costume. When Porky sees himself in the mirror, he leaps up in terror out of the costume, clinging to a chandelier.
* The Prize Pest has Porky offering a cigar to Daffy to appease him so he won't turn into the schizoid monster he pretends to be. He accidentally gives Daffy an exploding cigar.
* The prize probably goes to Head Chef Streusal, however, one of Big Mom's first allies. He has the power to turn anything he cuts into food. This is demonstrated when he uses his sword to start slicing up a log, with the slices becoming prepared ham steaks for him to eat. Put to an interesting test when he cuts up the crumbling castle of Whole Cake Island, turning the stone walls to actual cake and saving his crew from being crushed under the rubble.
* The Prize Puzzle, a round where a contestant wins a prize simply by solving the puzzle, is hated by most, if not all of the show's more dedicated fans for two reasons. First, the value of the prizes (they start at $5,000 since 2007, but are usually over $7,000 now)
* The Prize Winner of Defiance, Ohio constantly has a smile on her face and supports her family almost exclusively through winning contests for jingles, since

her husband is an alcoholic who spends most of his money on booze.
* The Probability Broach, several animals were discovered sapient and intelligent but devoid of speech, dolphins among them. The problem was easily solved with a special artifact. We even see a Dolphin scientist working in his tank.
* The Probability Broach the governments and militaries of the world are much weaker, so are unable to subsidize much of anything. In fact, in the back story a sort of airborne militia try to use zeppelins in combat and are pretty much all shot down, lampshading the uselessness of these aircraft as air superiority fighters.
* The Probability Broach, though what catches his eye is that everyone is armed to the teeth.
* The (probable) crowning example would be the so-far only seen Tausennigan "plate-class" ships, which includes the species (apparent) flagship
* The (probably hallucinating) main character of the play "The Actor's Nightmare" is referred to as George Spelvin.
* The Probe-U-Later, which is often described as being exceedingly painful to go through. What its procedure entails is alluded to by Bender in one episode.
* The problem beings due to "the Marvel Method" by which Stan Lee would outline a rough idea or sketch which artists then elaborated into full scripts which they broke down into the artwork and then returned to Stan who filled in the dialogue, captions, and other text (at times following the suggestions of the artists who left notes). Lee officially was credited as sole writer but in practice, the artists (Kirby, Lee, Romita Sr. and others) were all co-writers doing part of Lee's job while Lee didn't do any of theirs. They were paid artist fees for their writing duties while not having any rights and privileges to their work, or access to original artwork. In the case of Kirby, his four children would eventually reach a settlement with Disney/Marvel in 2014 for undisclosed terms just days before the Supreme Court was set to hear the case.
* The problem can vary between breeds. It's a common problem with Bloodhounds because they love to track. Some sighthounds such as Greyhounds are usually easy to walk, however they tend to be a "flight hazard" if they catch wind of small animals due to their strong hunting instincts. While Samoyeds and Siberian Huskies are very friendly and easy to train, because they are sled dogs bred they don't mind pulling and can easily drag around an off-guard owner
* The problem comes in when speaking to her captive, Lasarra, who reveals she is one of many colonists who were trying to terraform the planet to make it hospitable to Protoss when you showed up and murdered a bunch of colonists. Unfortunately, she still threatens Kerrigan with the Golden Armada, so big surprise when Kerrigan destroys the only chance of their vessel reaching the Protoss. Kerrigan was no longer the Queen of Blades, so it's highly likely that had the colonists simply backed off and allowed Kerrigan to escape without incident, they all wouldn't be dead, but they immediately assumed Kerrigan was there to kill them and kept threatening her.
* The problem has been endemic long enough in the comics industry to make famous one particular work offering a way to patch it: "
* The problem here is returning to the capsule design, which does look more primitive than the kind of mini-shuttle concepts that were being mooted a few years ago.
* The problem in the law student's homework was so tortuous that he found resolving it quite torturous and fantasized about committing tortious acts on his professor's car.
* The problem is also compounded by Takara attempting to stuff everything (bar the Unicron Trilogy and
* The problem is compounded because the ancient language used to cast magic is also a
* The problem is enhanced by the possibility that the defenders may be intercepting and corrupting messages. If it's merely a question of messages getting through, sensible organisation should only require a couple of confirmations before further messages become irrelevant.

* The problem is he neglected to seal them properly and they disintegrated!
* The problem is nearly every piece of supposed evidence in support of this thesis is mangled, misused, and thoroughly abused, including many whose history is not only known but in direct contradiction of any possible Chinese involvement - including a tower in Boston built by one of the founding fathers of the city which somehow became Chinese. Perhaps the strangest nonsense is that he relies on a major east-west Pacific current travelling the wrong direction, despite having been a submarine captain who sailed the area, and where such information is central to the job (though he
* The problem isn't that the two sides don't understand each other; ironically it's that they're too similar, so both sides know that the other will look for any advantage to insure the survival of their own species, even if that means wiping out the other.
* The problem is resolved, but the ship does not go forward for unrelated reasons, often the result of one of the two characters dying. Bob tells Alice he's in love with her, but Alice does not feel the same, for reasons unrelated to either's personal situations.
* The problem is so bad that "Megas" all over the place that run much of the world in the place of national governments, partly because political corruption and corporate capture are quite commonplace. The Triple-As don't do much
* The problem is that "dankte", meaning "thanked", sounds pretty similar to "dunkte", meaning "dunked", leading many kids to remember the old joke of Jesus being the first basketball player in the most inappropriate moment.
* The problem is that the Avengers for a long time did not have a regular cast and roster. The first ten issues or so of the comics had repeated defections. The Hulk left the Avengers early and was a member of the team for exactly two issues, and unlike other team members did not rejoin for over 40 years after quitting (the team which Hulk had a longer membership in was
* The problem is that there are several mixtures that match the description of the original Greek Fire, and it's very possible one of them
* The Problem of Cell 13. A detective bets his friends that he can escape from a maximum security prison. He does, of course, using things he conveniently finds in his cell. When asked what he would have done if those items had not been there, he smugly states that there were two other ways out. (It is never stated what they were.)
* "The Problem of Cell 13", a man imposes a challenge onto himself to escape a prison cell within a week. That is to say, he asks someone to lock him in the cell purely to prove that he can escape it.
* The problem of changing stations is handwaved by him being able to do so using different pieces of metal as an antenna. The plot of the book gets kicked off when he tries using a chain-link fence as one huge antenna and picks up a transmission from the eponymous aliens.
* The problem of leeching is a specific example of the "free rider" problem in economics, where people use a resource without contributing in turn, leading to overconsumption or underprovision.
* The problem of paying for commissions was specific to the British army, and political appointments were really more something that applied to republics and parliamentary systems, e. g. the United States in the 19th century. In autocratic monarchies, although officers tended to be recruited mostly from the nobility, there actually was quite a bit of competition among them and it generally was possible to maintain a certain level of competence (let's not forget: Napoleon was a product of the officers' schooling of Louis XVI's army). But there were different types of problems, namely that some people would be pushed forward by personal connections to the monarch or those close to him (Villeroi had been raised together with Louis XIV as a boy, others were helped by the influence of a king's mistress like the Marquise de Pompadour) and that the very top positions would usually go to monarchs or their relatives.
* The Problem of Susan, the elderly professor recalls having to go to the school where her relatives, victims of a terrible train collision, were taken after death,

to identify them, and says Susan of the Narnia books must have gone something similar as well.
* The problem of this happening is why British generals of World War One stayed behind the lines in chateaux (to which the phone lines from their brigades, divisions, etc. were connected). In the absence of battlefield voice radio, the further forward they went, the less influence they had over their entire commands. The other factor was that too many good generals got themselves killed early going forward to check out the situation for themselves. The dearth of talent had terrible repercussions later.
* The Problem of Thor Bridge, but it turns out the victim was drugged with morphine instead of Holmes' habitual cocaine, and it's a murder disguised as a suicide disguised as a murder.
* "The Problem of Thor Bridge". Villain sets up the evidence to frame her rival for murder, then figures out a way to shoot herself and hide the gun. Of course Holmes discovers the one subtle clue that gives the game away. Most probably a
* The problem persists in the 2nd Mother's Day one-shot, when Vivio teases Fate about how often she is absent from her life (prompting Fate to angst that Vivio will no longer consider her one of her mothers), such as when she canceled a parental visit day for school due to
* The problem robot (to provide conflict) would seem to be "broken", showing
* The problems drive away the unburdened partner or the one that has gotten over his or her problems. Alice realizes that she cannot help Bob deal with his issues and goes out with David instead, even while Bob claims he is willing to get together with her.
* The Problem Solverz and many of its episode titles. Interestingly, "Zoo Cops" is an exception to this. And bizarrely enough, Problem Solvers is actually spelled correctly in the pilot (just not in the title).
* The Problem Solverz and obtains every Little Explorer badge in order to get the badge for her.
* The Problem Solverz does this a lot, mainly when attacking. He also does it after trying the "slightly off" root beer and pizza pancakes in "Fauxboro".
* The Problem Solverz episode "Badcat", the gang is in disguise to sneak into Bad Cat's casino. When they're allowed in, Roba keeps saying how he feels so loved and wanted, which causes Horace to shush him in order to stay incognito.
* The Problem Solverz episode "Problem Solverz Academy". He gives high school social ranks to the trainees, making Roba the cool kid who doesn't have to work, Alfe obsessed with the military, and Horace a super dork with giant glasses.
* The Problem Solverz have brightly colored eyeshadow and facial markings.
* The Problem Solverz In short, TV show production just doesn't quite work that way.
* The Problem Solverz is supposed to be part human, part dog, and part anteater, although he doesn't really resemble any of those.
* The Problem Solverz so can get Nina's last badge for flag communication. When she gets the badge, it turns out that the scouts were actually planning an alien invasion, and the Solverz have to stop them.
* The Problem Solverz, with its brightly-colored animation and strange character designs. The pilot episode "NeonKnome" is the epitome of weird.
* The problem was that entering a guilty plea lost all your property as well as the excommunication and whatnot, and it also entailed signing a confession which would be used to prosecute your family and friends.
* The Problem We All Live With: The marshals escorting Bridges are only seen from the shoulders down, emphasizing them as representative of an institution and her as the focus of the painting.
* The Problem With A Poo" when Mr. Hankey gets the children to practice the Christmas pageant before Halloween and while the City Council is cutting the budget due to his offensive behavior.
* The Problem with Fighting Death: If you punch out death, it'll be furious eventually when you die.
* The Problem with Fighting Death: Screw over the Grim Reaper, and he'll ensure

that you suffer for it.
* The Problem with Licensed Games received significantly better reviews than the movie it was based on (although that was not the most popular spinoff of the film overall; see the Film section above).
* The Problem with Pen Island, a good number of Twitterers were instead invited to Su's Anal Bum Party.
* The Problem with Pen Island: Because website URLs do not have spaces between words, certain website names can be misread as something else.
* The Problem with Pen Island: When words are strung together in a web address, it looks like a separate, usually dirty, phrase (e.g. "pen island" becomes "penisland").
* The Problem With Popplers creatures other than their own species apart, but seeing as Lrrr did indeed only figure it out when he used his glasses to get a better look, it seems bad eyesight may be at least partially to blame.
* The Problem With Purity: Remus Lupin is in a meeting where he has to be polite to Severus Snape. When Lupin's first reaction to Snape's entrance is a growl, first Hermione then Tonks slap the back of Lupin's head to remind him to behave.
* The Problem With Purity separate the tables in the Great Hall from each other if they were activated. She's tempted to activate the wards just to see them working, but has enough sense to restrain herself.
* The problem with systems designed to respond in the event of a decapitation strike is making sure they won't respond unless there is a decapitation strike. Since a decapitation strike is generally intended to paralyze the target long enough to ensure total defeat before it can organize a coherent response, this makes the window for the system to correctly detect and respond to such a strike very small.
* The problem with the NFL is the amount of nitpicky rules that the human refs are supposed to take into account along with the general vagueness of a lot of rules coupled with the limitations of the review system. For many years, the official NFL rule book was not available on the internet (
* The procedure Mo was put through and that Amy is nearly subjected to is referred to as "dissection", which while understandable in non-doctor Mo's case is rather less so when coming from Malohkeh, since he was actually
* The process by which Darth Sidious takes control of the Galactic Republic in the
* The procession before the actual funeral. Headed by the Chicago Emerald Society Marching Band in full Scottish/Irish regalia playing 'Balmoral' on bagpipes and drums, then two fire trucks converted to hearses carrying the caskets with the crew members of Engine/Ladder Company 17 in dress uniform marching alongside, then the family members of the fallen firefighters walking after the fire trucks, then the senior commanders of the Chicago Fire Department and
* The Procession of Simulacra, "Science never sacrifices itself. It is always murderous." He didn't think science was inherently bad, despite that quote.
* The process is duplicated on Atlantis in the next season, this time using a matter bridge to extract power from an alternate universe instead of their own to get around the instability. It technically worked, but that universe complained about their near-annihilation and it was shelved.
* The process is still going on — consider all of the increasingly dated
* The process of akumatization seems to require the target to feel intense emotions of anger and hurt, so several of the akumatized villains are people who were angry over the mistreatment of their loved ones (love interests, family members, or close friends), or were in emotional pain because they were betrayed by someone they loved. Lê Chiến Kim felt betrayed because his crush rejected his romantic advances and humiliated him, Sabrina Raincomprix felt betrayed because her best friend was angry with her and wanted to terminate their friendship, and Chloé Bourgeois felt betrayed because the hero she idolized rejected her genuine efforts to help with a case.
* The process of assimilation into the Borg Collective also "benefited" from this treatment, especially in
* The process of "cyber-conversion" (and the state of existing as a Cyberman) is

so painful that they have to have all emotions and pain receptors turned off. A common way of defeating them in the revival is to find a way to turn their feelings (emotional and/or physical) back
* The process of issuing citations for motorists caught by automatic speed traps is almost entirely automated, with OCR software comparing the license plate to the local ownership database and then sending a summons to the relevant address. On at least one occasion this has resulted in a sumons being sent to the owner of a car that was being towed by a recovery vehicle at the time, leading to much negative press as well as a sharp rebuke from the judge, so most police forces require a clerk to review all auto-generated summons before dispatch.
* The process of transforming into a headless horseman also gives the victim an overpowering craving for
* The Proclaimers in the video for "There's a Touch", who walk away only moderately harmed from falling a lethal height off a building, getting hit by a car, and having a helicopter land right on top of them. One of them has his trouser leg set on fire at the end of it, but he continues walking away ignoring it.
* The Proclaimers, it became a worldwide sensation, flying all the way to #3 in the US.
* The Proclaimers' song "The Light" is a scathing condemnation of the real-life examples of this trope from a moderate Christian perspective, with lyrics such as "I believe in God alright/It's folk like you I just can't stand."
* The Proclaimers was uncertain what the word "haver" meant, and threw out "babbling out nonsense words?" as a wild guess. Then the dictionary definition was displayed.
* The Proclaimers - "What Makes You Cry?": the guy questions why his ex-wife doesn't seem so broken up by their divorce and suspects it's this.
* The Procuraptor in the library can take a lot of damage, which forces you to use the rocket launcher. Even then, you can't damage it in its normal state, but shooting it with any weapon (even the revolver) will cause it to enter a vulnerable state during a few second where you can actually damage it. However, since this is not obvious, you can waste a lot of rockets by using them during the first state. If you didn't find enough rockets, expect a very long fight as you'll run out of them and have to resort to the shotgun.
* The Prodigal Daughter, seeing how far she's willing to go to save Marla helps him accept her as a captain.
* The Prodigal series. Unbeknownst to them, Jake is Lydiann’s blood nephew — being the biological son of Lydiann’s (unwed) sister Sadie, who was then adopted by the Masts.
* The Prodigal was unharmed by gunfire, but not to the swing of an axe.
* The Prodigy features a creepy little girl playing a Xylophone to bookend the piece.
* The Prodigy has a note sung by Shahin Bada (and almost certainly stretched out digitally) that lasts for 63 beats at approximately 132bpm, making it just under 30 seconds.
* The Prodigy how he was dissed by passersby: "Who do you think you are, the Firestarter?" and his awkwardness in knowing how to reply. ("But I AM the Firestarter....")
* The Prodigy: In recent years, they've taken to calling their fans Warriors.
* The Prodigy seem to like this trope a lot. Songs include "Fire", "Firestarter", "Fuel My Fire", "Spitfire", "The Heat the Energy" and "World's on Fire". In the same let's-burn-the-world vein you could probably also include songs like "Molotov Bitch" and "Hotride".
* The Prodigy's "Smack My Bitch Up". The reveal is at the end when the camera (from a first-person perspective) looks at a mirror. Before this she went to a bar, got drunk, beat up patrons and groped hot girls before returning home and passing out in front of a mirror.
* The Prodigy's song 'Breathe'. Flickering lights, rats, giant centipedes, hair growing from the walls and even the band themselves.
* The Producer has a giant yellow P for a head, which all of the idols and

Puchidols treat as utterly normal. It's the fact that he'll pull on a human mask to meet outsiders they find weird.
* The Producers about to begin, everyone else turns on him and pounds him mercilessly.
* The producers actually deliberately let some bad people through, even encouraging them, so they can have the audience laugh at their
* The Producers (albeit on a much smaller scale). For obvious reasons, the latter is only watched by film students and neo-Nazis.
* The producers also initially claimed back in Season 2 that Bennet, Mohinder, and Ando would remain normal humans and not receive superpowers. Season 3 pretty much threw that out the window with regards to Mohinder (who gets Spider powers) and Ando (who can now shoot Hadokens!). The only non-powered human left in the main cast is
* The Producers and kept on the sidelines. Since having an explicitly gay character was more accepted in 2005, Brooks felt like it made more sense for him to play Hitler.
* The Producers. And the entire audience is indeed on the verge of doing it right after the end of the opening number, which is a cheerful celebration of the Nazis overrunning Europe. Then "Hitler" himself appears on stage...
* The Producers and then congratulates himself on his skillful determination that it is indeed the quick-burning fuse that wouldn't afford them enough time to leave the building. Naturally, they don't get out of the building before the bomb detonates. (They live though.)
* The Producers and turns it into a musical, complete with goose-stepping chorus girls.
* The Producers as the most tasteless topic for a musical he could think of. Influenced by Lenny Bruce's 'How Hitler Got Started'/'Hitler and the MCA' bit. Not to mention the author of the play who, when confronted said "Who are you? What do you want? My papers are in order. I was only following orders. I love my adopted country!"
* The Producers begins with an unnecessarily long sequence where Bloom engages in a lengthy conversation with Bialystock in order to illustrate how slimy Bialystock is followed by an equally lengthy exposition about how the Broadway scam is supposed to work. On the other hand, it has some of the best lines of the movie ("My blanket! MY BABY BLUE BLANKET!").
* The Producers. But one lone audience member begins to clap— and is promptly rounded on and pummeled mercilessly by the rest of the audience.
* The Producers. But what was intended as the final nail in the coffin, has no effect...
* The Producers: "Creative accounting." In widespread use during the sale-and-leaseback frenzy of the late-1980s boom, a process which like so much accounting at the time, had the actual effect of converting equity into debt, to be serviced by future revenue streams already allocated to other purposes.
* The Producers, dancers march in a formation resembling a swastika (but overhead, like the typical Berkeley shot).
* The Producers director play him in the stage version (where the character's name is "Adolf Elizabeth Hitler").
* The Producers director Roger deBris (played by Gary Beach) speaks in a light, cultivated voice most of the time. Until he summons his production team to meet Leo and Max, when he bellows like a longshoreman, losing his posh accent in the process.
* The producers estimated that they needed to build at least nine ships for the second season of
* The Producers, Franz Liebkind's exit line when he gets arrested was going to be, "I get vun phone call, ja? Does anyvun know ze area code for Argentina?"
* The Producers had him screaming "I'M HYSTERICAL". Which his character is.
* The producers had the foresight to introduce Sisko as a Commander, just so he could have a dramatic promotion to Captain later on. By the end of the series this trope still applies, since he's doing the jobs of pretty much the entire admiralty

and representing the Federation during planning with their allies. Kira Nerys also had a promotion in-series, from Major to Colonel. In her case, it was a promotion in the Bajoran militia, rather than Starfleet. Kira was also temporarily given the rank of Commander in Starfleet (which is technically lower than her Bajoran rank, but given Starfleet's far greater size, power, and importance, it's effectively a promotion anyway), when she was sent to Cardassia as part of a covert team and assisted the Cardassian underground against the Dominion, since working with a Starfleet officer is politically more palatable to them than working with a Bajoran soldier.
* The Producers has "The King of Broadway." Though in this case, it's more of an "I used to be" song. This song doesn't appear in the film adaptation of the musical, however.
* The Producers in 1967, wrote the book and lyrics to the 2001 stage musical then produced and wrote the screenplay to the 2005 musical movie.
* The Producers (in crime) on Broadway. Near the end, it even has Leo testifying in court to what a great friend Max has been to him.
* The producers intended to cast only British actors as the Hobbits as
* The Producers. In the musical, Franz Liebkind is chosen to play Hitler, but Roger De Bris is the one to perform the role onstage after Franz breaks his leg.
* The Producers: In the original movie, when Leo Bloom stands up at their trial to speak in Max Bialystock's defense, he starts by listing all of Max's faults and shortcomings. "Stop helping me," Max says.
* The Producers it's said that Adolf Hitler's middle name was Elizabeth, which also turns out to be the middle name of the transvestite director.
* The Producers, Leo interrupts Max "feeling up the old lady", but Max has to prompt him to fulfill this trope.
* The Producers, Max and Leo (along with some random drunk) sing "By the Light Of the Silvery Moon."
* The Producers, Max Bialystock reminisces about once being "the king of all Broadway" rather than, as now, a producer of serial flops. (But then the chorus responds with "We'll believe you - thousands wouldn't.")
* The Producers: movie about a musical (1968) → Broadway musical (2001) → movie of the musical (2005).
* The Producers Movie about a musical —> Musical —> Movie adaptation of the musical
* The producers never said that the show would never have time travel. They once said that the then-ongoing Season Two had no time travel — and it
* The Producers often does with prejudices and stereotypes) is debatable.
* The Producers respond this way while taking the Siegfried Oath (while Franz isn't looking).
* The producers said Sylar had lost all his stolen abilities, but the last episode of season 2 showed him using telekinesis. Season 3 shows him retaining other powers... all while official canon and
* The Producers's characters first meet. Mostel goes on a screaming rampage and Wilder has a panic attack.
* The Producers takes objection to an auditioner's version of a song and gets up on stage to do it right. He's cast as Hitler on the spot. When he's injured shortly before the play opens, the director steps in to play the role.
* The Producers, the character LSD pulls a banana seemingly out of nowhere after performing his audition and begins sucking his thumb. Where the banana came from in those skintight pants is best left unexplored.
* The Producers. The opening credits even freeze frame on one of them.
* The Producers: There are two cardinal rules to being a Broadway Producer...
* The Producers, throwing a bouquet of flowers to the director/star of "Springtime For Hitler" during the curtain call.
* The Producers, "'Til Him" is a touching song about Leo and Max's friendship. When it gets to Max's part of the number, he is accompanied by a swelling chorus of little old ladies until he tells them "Please, don't help me".
* The Producers. "'Til Him" is one of the most touching (and funny) love songs ever

sung by one straight man to another.
* The Producers to the point it resulted in a successful Broadway adaptation which was itself adapted into a film.
* The Producers, when Franz is pointing a gun at Max and Leo, Max quips to Leo "Remember when I said I'd tell you when we were in too deep? We're in too deep."
* The producers would later kill Angela off by having her drowning to death offscreen for the 17th season.
* The product description of Nestlé's "Buncha Crunch" candy is "Bunches of crunchy milk chocolate."
* The product in question is called vesicare and the product helps with bladder leakage.
* The production company American High was created to make modern-day versions of the teen comedies of
* The Production Curse: A work is hit with problem after problem during production.
* The Production Curse being mistaken for the body of a Munchkin actor hanging himself).
* The Production Curse: Strange disasters which may involve bad things happening to the cast, crew, or set of a production.
* The production had no choice but to change the costumes. Nick Meyer wanted something more
* The production staff is also typically the best-selling boys' toyline in America; so it's often a big deal when it's outperformed, as other examples of this trope can prove.
* The production team admitted that they struggled to make the Scarecrow look scary. Many of his intial looks failed largely because of how cartoonishly skinny Crane was, making him look out of place when compared to the other more realistically proportioned characters. They would tinker with his design throughout the show's run until they suceeded in
* The production team and writers seemed to invoke this trope willingly for
* The production tried to get actual Junker Ju 87 dive-bombers for the film, but it was deemed too expensive to make surviving Stukas airworthy.
* The product page of Apple's second generation iPhone SE, which has the same A13 Bionic chip as the iPhone 11 line, says "iPhone 11 Pro called. It wants its chip back."
* The product placement for U by Kotex feminine hygiene products is relatively subtle in Season 1 of
* The Professional), an assassin befriends a 12-year-old girl, who demands that he teach her how to kill. In the American theatrical release, he gives her some lessons, but she never participates in an actual murder. In the overseas version, she helps kill at least a dozen people, making her instant rehabilitation at the end a little dubious.
* The Professional are hard-pressed to explain the brutal gun fight that stirred the plot into action, but nobody ever questions why they were there in the first place, and they are never seen pursuing actual police work throughout the film.
* The Professional confirms that this was intentional since they wanted to give it some humor to keep it from being too bleak.
* The Professional from smoking cigarettes to openly cursing at her half-sister and Leon as well as having a sexual interest in the latter.
* The Professional has Norman Stansfield kill Mathilda's stepmom with his shotgun while she's bathing.
* The Professional he has placed one of the bad guys in there instead.)
* The Professional in its final moments: Mathilda is at the Spenser School, which is (according to an overheard conversation) supposed to be in Wildwood, New Jersey. However, the final moments of the film show that it overlooks the Hudson River and Manhattan. Wildwood is in fact an oceanfront community near the tip of Cape May, over 150 miles away from New York City. (The scene was actually filmed at Stevens Institute of Technology in Hoboken.)
* The Professional is kicked out of his hotel after a thirteen-year-old Natalie Portman tells the clerk that the two of them are lovers.

* The Professional. It's also a mixture of Criminal Procedural and Thriller.
* The Professional Killers when they gun down a man who matches the description of their target as he gets off a train. It turns out their target had never got on the train and the man they killed was senior sheriff's deputy.
* The Professional, Léon's only friend has been a small houseplant, which he carefully waters with a squirt bottle and sets outside his windowsill each day. He says he likes the plant because it has "no roots," like him.
* The Professional, Leon does this to a mook riding the elevator with his strangling cord in a quite famous scene.
* The Professional: Leon explicitly postulates that the better you are, the closer you can get to your victim: sniper rifles are for beginners, and only a real pro uses a knife.
* The Professional: Leon is shot by corrupt cop Norman Stansfield but is able to kill him with a grenade before he dies.
* The Professional: Leon is the only person to treat Mathilda with kindness besides her deceased little brother. In fact, this is what led to him allowing her to live at his apartment after her family was killed by Stansfield and his crew.
* The Professional. Leon knocks off the Fatman's henchmen one by one — point blank headshot, garrote from the ceiling panel, pulled over the stairwell by a necktie, numerous shootings behind sun shades — without anyone (the guards or viewer) ever laying eyes on him. "Those fuckers blocked both the exits," mutters the Fatman, when seeing Tonto hanging by the neck on CCTV. Finally, the Fatman ends up with a knife to his throat, produced by Leon's disembodied arm out of the shadow. Leon then reveals himself and makes the Fatman call the number of the man who's hired Leon to intimidate him into leaving town.
* The Professional, Leon uses two pistols when attacking the ESU officers sent by Stansfield to kill him and Mathilda.
* The Professional, Mathilda insists that at the very least he share the bed with her and not sleep on the couch. Leon is justly cautious, but nothing untoward happens. In the US cut they just wake up in bed together with no explanation.
* The Professional Mathilda Lando snags them (and his knit cap) when she goes to commit an assassination of her own, apparently in hopes of channeling some of his badassitude.
* The Professional — in the uncut version, she even asks him to be her first lover, but he refuses.
* The Professional. Most of the film was shot on location in the Big Apple except a few apartment sequences (which were actually a hotel in Paris) and the final scenes in the New Jersey town of Wildwood which were actually filmed at the Stevens Institute of Technology in Hoboken.
* The Professional of him, played by the same actor. But along the project León and Victor ended up diverging, so while they're both extremely skilled hitmen, Victor is a lot more mature and cold while León is more child-like and humane. Besson describes Léon as "Victor's more humane and principled American cousin".
* The Professional, prototagonist Mathilda, bent on revenge, walks into DEA headquarters as a 12-year-old food delivery person with a bag of guns. She gets past security, at least.
* The Professionals, a comedy series about a tech support company that kills people.
* The Professionals and bribery to arrange for several jurors to sway the others.
* The Professionals, are visibly working-class, streetwise and prepared to bend the rules on their assignments. And they drove Ford coupés rather than Aston Martins or Ferraris.
* The Professionals. At the end of the episode it's even suggested that the dignitary was a fake as well.
* The Professionals because I was born tall, dark and beautiful... and engagingly modest of course." He's tall, has dark hair and a troubled past as a mercenary in Africa.
* The Professionals. Bodie and Doyle lampshade this trope after capturing a hitman

who refuses to say who employed him. So they take the hitman to the business of an East End gangster whose brother he killed and handcuff him to a lamppost outside. "Oh he won't kill him. But he'll wish he had." The hitman wisely decides to talk.
* The Professionals: Bodie is a former mercenary. This provides the basis for the plot in a couple of episodes.
* The Professionals, but by handing it over to a foreign agent the politician will be committing treason and thereafter be under the KGB's thumb.
* The Professionals. CI5 used the former Wembley Palace of Engineering for training, and of course, scenes take place in the usual unused warehouses, derelict dockyards and decommissioned WW2 airfields.
* The Professionals. CI5 use just the kind of tactics condemned by numerous Royal Commissions into police conduct, but it's OK because they only use them against bad guys. They draw the line with assassination and planting evidence (except in minor cases to pressure a criminal) presumably because such tactics would make the audience a bit nervous. Their limits are probably best lampshaded in an episode where Bodie and Doyle investigate a town where the police have been using extralegal means, such as planting evidence and beating up members of a gay rights group. Bodie and Doyle eventually gain evidence of the latter, and when the main culprit decides to murder them to avoid prison, another officer steps in and stops him, as murder is going too far.
* The Professionals. Cowley says of a KGB opposite number whom they've just killed; "Terkoff. He was a good man." As his partner has just been shot by Terkoff, Doyle angrily points at where Doyle is lying and snaps, "Yeah? Well, there's a better man back there!"
* The Professionals episode "Involvement" features Doyle's girlfriend wandering into the top secret security organisation CI5 and eavesdropping on an interrogation.
* The Professionals from start to finish. A crowning example is the scene where Fardan rescues Dolworth from some Mexican bandits:
* The Professionals. In "Fall Girl", Bodie has been framed for a political assassination, and is hauled into the local nick by Special Branch. A three-way argument over this trope breaks out, with Bodie demanding his phone call (so he can tell Cowley where he is), Special Branch refusing until they have his fingerprints (which they intend to plant on the crime scene) and the desk sergeant refusing to hold Bodie incommunicado without authorization. Eventually they allow Bodie to make the call in exchange for his prints.
* The Professionals. In "Heroes", the robbery of an armoured car is actually the cover for a political assassination. Turns out a controversial American politician was being smuggled out of the country disguised as a security guard, but those after him got wind of it.
* The Professionals. In "Old Dog with New Tricks", a nurse is taken hostage by a lunatic armed with a hand grenade with the pin removed. Bodie and Doyle make a reckless bid to free her because the longer he holds down the safety lever, the more cramped his hand will get.
* The Professionals. In "Stakeout" the lads are disarming a crude home-made atomic bomb with the help of its builder, who's decided he doesn't want to die for the cause after all. He's just removed the detonator with 30 seconds to go when he forgets which wire he's supposed to cut (it's red, naturally).
* The Professionals is hired specifically because the teams needs an explosives expert.
* The Professionals of their boss George Cowley to the airport after she's survived an assassination attempt, and she begins to say, "Tell George I..." before being drowned out by a police siren. She doesn't repeat herself, and the two debate afterwards what they should tell Cowley. They decide not to mention the comment.
* The Professional, Stansfield appears from behind to kill Leon when he reaches the entrance of the apartment complex.
* The Professional. Stansfield calls him "Blood", and another character calls him "Willi".
* The Professionals. The components of Doyle's car are set to fail one by one as

he's going down a hill. Justified though as the killer isn't trying to fake a car accident; he's just playing with Doyle before he kills him.
* The Professionals. The fake suicide version opens the episode "Everest Was Also Conquered" when a whistleblower to an impending corruption inquiry gets thrown out the window by her police protection detail, who've been bribed or blackmailed into the act.
* The Professionals when a detective friend of Doyle times a narcotics bust at a strip club so he'll be in the dressing room when the girls come offstage.
* The Professionals" when our heroes find the Docklands are being redeveloped.
* The Professionals) will be sent anywhere from one curl to pretty much all of his hair.
* The Professional, the adolescent Mathilda has a crush on her savior and mentor, Leon. The original cut of the film makes her crush less innocent, and she actually propositions him for sex.
* The Professional was released to commemorate its 10th anniversary which restored those previously deleted scenes into the 2-hour running time. Nowadays, it is considered to be the superior version of the movie by most critics and viewers since it delves more into the personal life of Leon and Mathilda.
* The Professional) while listening to Beethoven. Even when he learns about the death of his second-in-command Malky at the hands of Leon he is rather nonchalant about it.
* The Professional who trains to become a killer to avenge her family.
* The Professional with two of its main characters Leon and Tony as members of the organization
* The professor actually looks forward to them. According to him, the last invaders made all the smartest humans "
* The Professor has a "Coolometer" which measures the popularity of the subject in units of
* The Professor is a linguist and anthropologist who made the first studies on the languages of werewolves, lizardmen, and other species. He's mostly a background character, though, since his injury is the reason Hakaba is sent to continue is work in the first place.
* The professor's retort, if someone is around to say it to the original storyteller, goes something like "I've been doing this for twenty years. Either we have a coincidence, or 1/20 of a god."
* "The Professor," the holographic advisor system installed in the captain's cabin aboard
* The professor who created Miko looks almost exactly like Miko's mother.
* The "Professor Wikipedia" sketch seems to parody the problems relying on information from Wikipedia has. Namely: the fact that Ryan Seacrest contains many of the elements necessary to facilitate a chemical reaction. The guy who coined the word "enzymes" was widely believed to be a total badass, and in 1908 won the Nobel Prize for Mustache. Also, Amir only wants to know about cunnilingus. Though you can tell that Jeff seems to know a fair bit about the culture on Wikipedia.
* The Professor) without her realizing it. He says that if Lucy were really lying about Narnia, she would have hidden for a long time before trying to sell the story, rather than claiming to have been gone for hours when only a few seconds had passed.
* The Profiler: A police detective who is in charge of identifying possible suspects in a crime.
* The Pro from Dover, in their field, whatever that field happens to be.
* The prof Wizgiz, as the professor of Metamorphosymbiosis, is able to shape shift his body into form he requires.
* The Progenitor Chronicles: After the MC and Rebecca become a couple at the end of Volume II, their relationship is just treated as a constant while the fic focuses on the main plot.
* The Progenitor Chronicles become a couple at the end of Volume II, 12 years after they first meet. It's justified in that when they first meet, the main protagonist is 10.

* The Progenitor Chronicles): The MC falls into this right after his first kiss with Rebecca.
* The Progenitor Chronicles: The protagonists look at Terragrigia being destroyed a second time by the Regia Soils as their helicopter flies away.
* The progenitor of Earth-like life is a type of alien called a "Lilith," while the progenitor of Angel-like life is a type of alien called an "Adam." Many copies were spread throughout the known universe in order to seed life toward an unknown purpose.
* The Progg, however, is claimed to be a mutant baby Mamuta by the end credits.
* The progression of Lindesfarne Dewclaw and Fenton Fuscus through their relationship to marriage.
* , the Pro Hero starts to see him as a potential successor wants to find out who he really is, but the hospital staff refuses to give out any of Deku's personal information due to dealing with crazy stalkers in the past.
* The Projected Man, Crow and Tom Servo claim to have invented a "projector" (i.e. a teleporter) but it actually just burns everything they're "projecting". Crow and Servo insist on demonstrating the device with some of Mike's most prized possessions. Mike eventually catches on and tests the device on one of Servo's prized possessions instead.
* The Project Freelancer Saga of his team, but then he had Epsilon implanted, which gave him all the memories of the Director's crimes and a second-hand mental breakdown, leading to the cold and vengeful character who debuted in season 6.
* The Project Freelancer Saga, the presence of a leader board in the project meant that the Freelancers spent more time acting like competing individuals instead of a proper squad, which is part of the reason why the group fell apart.
* The Project Hate MCMXCIX, but in actuality the song is about a person devouring the soul of another and using their body as a puppet.
* The project itself is called the Alan Parsons Project after the head researcher. Scott mentions that it's the name of a band, but Dr. Evil doesn't get the reference.
* the Project Laz'R'Us — experimental nanomachine-based. Tagon specifically calls this a "runt super-soldier".
* The project was canceled shortly thereafter, with instructions to throw out all the code and start from scratch. From the ashes rose the phoenix that is today Access.
* The project was later added upon by Alphynix, adding long-necked brontolphins and herbivorous dolphalopes, and a further installment introduced the beaked dolphins with bird-like bills, which included mole-like burrowers, azdarchid-like ground hunters and even a gliding arboreal species.
* The proliferation of 3.5 sourcebooks brings quite a few of these. There's the Frenzied Berserker, who is capable of ignoring any amount of negative hit points while raging — but the full effects are applied immediately when the rage ends. The Corrupt and Sanctified spells, which are extremely evil and good respectively, take a toll on the caster; the most powerful ones cost the caster's life, in more or less painful ways — generally "more" for the evil ones. Then there are the Epic spells; creating one is a fairly involved process that includes determining the difficulty for the spell. The difficulty can be lowered significantly by including a "backlash" that hurts the caster.
* The proliferation of ROMs and ISOs available for older consoles, (SNES, Genesis, NES, N64, PSX, etc.) can allow a one to lose themselves in thousands of free games on a computer, and to a lesser extent handhelds and smartphones.
* The prologue and all flashbacks are animated traditionally in a style resembling
* The prologue is set 16 years before the main story starts and focuses on Bill and Barry Heterodyne, who have only been seen in flashbacks (and alluded to by storytellers) in the comic.
* The prologue mission is in a cold environment, possibly Siberia or Alaska.
* The prologue of the first book features one of those two cases, and where it happened became a volcano known as Dragonmount.
* The prologue with kid Ella was longer, with a scene of she and her mother saving

a bird and her mother giving her a longer dying speech.
* The Prom, and "Simply Love", a new song played during the end credits.
* The Prom Emma and Alyssa, are often shipped together by fans. Their strong friendship, physical comfort with each other, and goofy antics (including a tendency to kiss each other in public for fun), as well as both actors confirming their bisexuality, have not gone unnoticed by fans.
* The Prom has been met with mixed reviews, although it did receive seven Tony nominations.
* the prominence of females. Females tend to get skintight bodysuits instead.
* The prominent female examples start off with Erina whose the pure and kind childhood friend
* The Promise (2016) actually is (she's a US citizen, as her parents moved there when she was four). However, most of the Turks really are played by actors at least ethnically Turkish.
* The Promise (2016): Many of the Turks are shown to not all be on board with the Armenian genocide and do what they can to stop it. Three notable examples include:
* The Promise (2016) uses dynamite to blow up a Turk who killed another prisoner, killing himself in doing so.
* The Promise after they shared a few conversations, in the hopes that maybe the comic was leading in a different direction.
* The Promise: A verbal, visual or conceptual Chekhov's Gun where a promise is made and later comes up. Whereupon the promiser will be required to act; or, in unlucky cases, the promisee.
* The Promise: A very important promise is made. Maybe it's kept. Maybe it's broken. Maybe it causes a whole lot of trouble.
* The Promised Land movie, Holly's backup disk is a four foot tall floppy disk.
* The Promised Land TV movie finally showed us Rimmer in black and white during a power saving mode.
* The Promised Neverland, and must outsmart the careful planning of their "Mom" and caretaker Isabella, a genius in her own right, to escape.
* The Promised Neverland an Emperor upon asking what they think of him.
* The Promised Neverland are what someone has to pass through if they want to make a deal with the nameless demon god.
* The Promised Neverland, as the title implies, is all about finding a promised land - in this case, one where children aren't eaten by alien monsters.
* The Promised Neverland: A very rare example of a (non-romcom) shōnen with a female protagonist. Also pretty horrific.
* The Promised Neverland chapters' worth of story - and the ending was viewed as lackluster. The fact that the manga itself went through criticisms of this trope as it went on didn't help either, since it meant that the anime, which had the chance to try and rectify that, made the criticism worse.
* The Promised Neverland: Demons feast on humans to retain their sanity, but can permanently increase their intelligence if they eat the brain. Naturally, the demon nobles maintain a stranglehold over 'premium', well-educated brains.
* The Promised Neverland is a hunting ground for the demon elite. These rich demons have grown tired of eating farm meat and long for the days where demons hunted humans freely. So they kidnapped children from the farms and placed them in Goldy Pond: a place where every few days the demons come and hunt down this free-range meat. However, Archduke Leuvis insists that even this is not exciting enough for him, like "hunting rabbits." Then Emma came along...
* The Promised Neverland is one of the three top scorers at her orphanage and can beat both of the other two at footraces. She still can't beat them at tag, though.
* The Promised Neverland, primarily because of being used to treating his many, many wounds.
* The Promised Neverland. She's supposed to be one of the smartest kids in the orphanage, but is still a bit behind the other two when it comes to analysis power.
* The Promised Neverland that the two of them are on equal footing in terms of strength, intelligence, weaponry, etc. After the humans' escape, they run into a pair of demons, Sung-Joo and Musica, who don't eat humans due to their religion,

who help them get to safety. Although Sung-Joo's motives are to make humans wild game again, and thus be able to eat them. (Their religion requires them to eat wild food.) Musica's assistance is more sincere, and it's implied that she's never had human meat.
* The Promised Neverland, the characters' skins can range from white to various shades of brown. While characters like Phil or Zack fall squarely into this trope, others like Sister Krone or Pepe are more unambiguously African black − the authors have admitted that it was intentional in the former's case, to make her look more distinct.
* The Promised Neverland the children escape, not just themselves. Norman and Ray, while not completely insensitive, appear more coldly rational most of the time.
* The Promised Neverland. Then, after managing to flee the place, they have to outrun the demons secretly running the orphanage of Grace Field, where children are raised without knowing they're cattle that will be eaten by the demons. To do all this, they are desperately alone and have to contend with adversaries that are bigger and stronger, meaning that flight is their only option. In Volume 6, they meet the first friendly faces of the story: Mujika and Sonju, two demons that are part of a small cult that doesn't eat humans due to a religious taboo. Thanks to the help of their allies, they manage to outrun their pursuers and to learn survival skills necessary to survive. Then in Volume 7 the kids are finally in a secret hideout safe from the demons and, in spite of the hostility of the other adult survivor they met there, they are shown being able to finally relax.
* The Promised Neverland the one he told Don about, but rather the one he told Ray that he told Don about, meaning that Ray is the traitor. Naturally, this blindsided almost the entire fanbase.
* The Promised Neverland. The three main characters, Emma, Norman, and Ray, are this trope.
* The Promised Neverland: To initiate their plan of escaping the farm, Emma cuts off her right ear holding the tracking device and tosses it in a fire to distract Isabella. Afterwards, she covers the wound with hair decorations.
* The Promised Neverland were made uncomfortable by her less-than-flattering depiction as a black woman, with her cartoonishly grotesque features, expressions and somewhat animalistic demeanor in some scenes that are seen as reminiscent of old racist caricatures.
* The Promised Neverland when she collapses a few hours later due to an infection and spends several days recovering.
* The Promise, has this plot hook as its central premise, so we'll finally get some closure.
* The promise is made between Ryouta and Chika when they are children in
* The promise of a coming of angels that will touch the bodies of the dead to transform them into heavenly beings that are reborn in paradise doesn't sound so bad by itself. It's only when you realize that these "angels" are giant alien bats that will jam an arm-long spine into your skull and
* The Promise of Joy. The Soviets and Chinese work together against the U.S. throughout most of the book, but near the end they start a limited nuclear war with each other.
* The promo animation for Hahli Inika had her running through a field of bear traps.
* the promo art, Bridget does not actually identify as female. As far as he's concerned, he's just a boy in a habit who carries around a teddy bear and a yo-yo and really wishes people would stop thinking he's a girl.
* The promo for "Brake My Wife Please" features a line not heard in the final episode.
* The promo for "Large Marge" included scenes of Marge's breasts giving Bart confused feelings.
* The promo pics showing Susan in the clutches of the Voord (a monster they were hyping up as a new mascot in the vein of the Daleks) are
* The promo spots for NFL Network, before its launch, did this sort of thing, but instead of having ordinary people, it had half the head coaches in the NFL (i.e.

recognizable figures) saying "I guarantee / guarantee / I guarantee / that you are going to love it."
* The promoter, Dallinger, just wants the ad to list the three bands' names. However, he runs into problems immediately when he tries to communicate this to the editor, Higgenlooper.
* The promoters state that the whole point of the handicap gimmick is to make the handicapped fighter lose, allowing them to fix the fights. If every fight was determined by a randomly-assigned handicap, no one would bother watching. It defeats the entire point of athletic competition. This is to say nothing about how unlikely it would be that gamblers and gambling institutions would ever buy the chicanery in the first place.
* The promotional video entitled Galaxy Rangers (which can be seen on the DVD boxset) done by Saban in 1992 as a proof of concept for Bandai (which is believed by some to be made up from footage from an attempt at making Bioman with Zyuranger footage being swapped in.) Zack (played by actor Miquel Nunez Jr.) is classified as green (on screen at least) and Trini is played by a white actress.
* The promotional video for Orange Range's "O2" (the first opening of the second season of
* The promotional video for "Plastique" by Plastikman is pretty much just a video of his logo dancing, flying around, and so on.
* The promotion hides the identity of the stage magician they use to hand out the supposedly random handicaps. In reality, all officials participating in a fighting event need to be properly licensed by the athletic commission, which would make their identities public knowledge.
* The promotion plays a dance beat during the fight, to which the entire crowd chants "Kapow!" like some sort of cult ritual. UFC events don't play music during fights, and audience participation musical numbers are not an MMA tradition. The closest you might get is the occasional soccer chant among fans of a particular fighter.
* The promotion was also seen as controversial because it allowed every pawn to be promoted into a queen. Since the queen was the king's wife it would mean that a king could have more than one wife and the idea of even someone being able to have more than one wife was considered to be a perverted thought at the time as people were firmly rooted into Christian faith.
* The Promposal: Asking someone to prom in the style of a marriage proposal.
* The Prom unhappy when Principal Hawkins and Emma attempt to stand up to her.
* The Prom", when Xander tells the others he's taking Anya to the prom:
* The Prone are introduced as unintelligent thugs who kill whatever they're pointed at without question. Later in the story we learn that this is only half their race: the Cavern Clan are the ones you've been fighting, while the Tree Clan are much more friendly and readily make friends with humanity. While primitive, they are surprisingly reasonable and have a much deeper culture than just "War is good!" Even the Cavern Clan gets some characterization, when you meet one team of Cavern Prone who are
* The Pronghorn antelope has a misleading name, but it's not related to true antelopes. They are closer to giraffes of all things.
* The pronoun is part of a relative clause — "Mary bought all that cat John gave her's siblings, she liked it so much," or even "No child of ours's house will ever have mice."
* The pronunciation of Mowgli's name is entirely wrong — the first syllable is supposed to rhyme with "cow," as Kipling himself suggested, rather than with "crow," as Disney's version does.
* The proof is in how many times the series has been released on home video: VHS (both edited and uncut), uncut DVD singles (including boxsets), edited and uncut movie DVD singles, mini-DVD and Game Boy player (DBGT only) Ultimate Uncut singles, Season boxsets, Dragon Boxes, DBZ Movie double-features, movie boxsets, DBZ Kai, DBZ Blu-Ray, and there's sure to be more to come!
* The propane convention episode has a mother covering her child's ears when Hank goes on a drunken rant denouncing Buck Strickland as a "bastard".

* The prop department accidentally wrote Thomas Riddle's name as "Thoms Riddle" on the Riddle family gravestone.
* The Propeller Shakespeare Company, an all-male Shakespearean troupe based in England, did this to remarkable effect in their production of
* The Proper People explored the abandoned Cincinnati Subway in one episode.
* The Proper People have a particular sad piano piece they use fairly often over cinematic montages of the abandoned areas they explore.
* The Proper People venture into this, when at least one of the hosts will express admiration for the ornate or unusual architecture featured in their urban explorations, and lament that most modern architecture feels "disposable".
* The proper Solar Flare technique is first used by Tien in the martial arts tournament, with Goku blocking it by stealing Master Roshi's sunglasses. Goku himself uses it on multiple occasions thereafter, usually prefacing it with, "Sorry Tien, I'm using your technique!"
* The Property of Hate does this every so often. One of the characters, Melody speaks entirely in musical notes. Another character, Dial has an old microphone for a head.
* The Property of Hate: When your friend has a tv for a head you can skip the marker completely.
* The prop for Picard's family album had an invitation for his Starfleet graduation ceremony that told him to RSVP through Starfleet Internet.
* The Prophecies Begin pets and urban strays is because they don't follow the code. The series climaxes with the titular Warriors fighting off a horde of untrained strays/Soldiers through superior tactics and experience.
* The Prophecy 3: The Ascent after being shot by a blind man Danyael wakes up locked in a body storage locker in the Morgue.
* The Prophecy all angels (who are definitely badass) wear some kind of longcoat. It is interesting that the type of garment reflects the personality of the wearer: benevolent Simon is shown in gray woolen greatcoat, relentless Uziel wears black duster, silver-tongued Lucifer is portrayed in a slick coat while psychotic Gabriel prefers an unbuttoned cassock.
* The Prophecy are out to destroy humanity because humans have usurped the angels' place in God's affections, and the demons want to destroy humanity because... well... they're demons. God himself is never encountered on-screen, but the angels still loyal to him don't seem to care much about humanity, generally being content to either sit on the sidelines while humanity suffers or focus only on fighting Gabriel's angels.
* The Prophecy defeated The Second City Saints for the tag team titles at
* The Prophecy. Gabriel and a segment of angels are outraged God gave "talking monkeys" a soul.
* the prophecy has been tampered with by Ruin, the primordial god of entropy and destruction, who wants to trick the Hero into freeing him.
* The Prophecy has Mary, the young girl at the heart of the film, make some crayon drawings after the soul of a colonel with a very shady past is stored in her body to keep it from the other side. They involve things like barrages of gunfire and civilians impaled on stakes.
* The Prophecy have a fondness for standing on the backs of chairs, railings... anything that looks cool.
* The Prophecy II: Satan decides that Gabriel would cause too much trouble in Hell and kicks him out. "Only room for one of them."
* The Prophecy II while she is miraculously unharmed. (Well, relatively.)
* The Prophecy of the Stones girl, but in reality is a wise sorceress and the oracle. However, when she is asked questions she doesn't want to answer, she switches back to her childlike state and happily sings prophecies to herself.
* The Prophecy of the Stones. Literally every action taken by the protagonists is to fulfill their role as foretold by the eponymous prophecy.
* The Prophecy of the Stones seems to be leading up to this but the ending reminds us that evil cannot be permanently defeated.
* The prophecy rhymes... supposedly: "When Adam's flesh and Adam's bone, Sits at

Cair Paravel in throne, The evil time will be over and done." Susan calls this out in the movie ("You know, that doesn't really rhyme.").
* the prophecy says THE valonqar, not HER valonqar - which means the prophecy may actually refer to some other.
* the prophecy that caused Voldemort to kill Lily Potter could have also caused him to target Neville instead of Harry, meaning that if he'd done so, Lily would still be alive. Neither Neville nor his parents even knew about this, nor would they have been able to influence Voldemort's actions if they had.
* The Prophecy (who's creepy enough even when he isn't acting) as the Archangel Gabriel.
* The Prophesied Chosen One, and attempts by either heroes or villains to derail it will likely backfire and cause the prophecy to come true anyway. Issues with free will and the having your life inescapably mapped out for you may also crop up.
* the prophesied Green Ninja. He later loses most of the Golden Power to the Overlord and shares the rest of it with the other ninja, leaving him with just Energy.
* The Prophet: Almitra's mischief and constantly stealing doesn't delight her to the Baker or the other townsfolk.
* The Prophet: Almitra was close to her father. And his death not only left her in grief but also led to her muteness.
* The Prophet can cause an earthquake to deal damage in a wide radius to buildings, as well as cause a firestorm that deals damage over time and spreads to nearby buildings.
* The Prophet: For all of the Sergeant's buffoonery he is still a threat and when a riot breaks out, his first instinct is to reach for his gun and to open fire on the civilians, an act which Mustafa manages to stop.
* The Prophet gets an update as well: his Hurricane (mobile anti-ship spell) is replaced with a
* The prophet Isaiah named his younger son Maher-Shalal-Hash-Baz, which means "spoil quickly, plunder speedily," again to foretell Judah's coming doom. His older brother Shear-Jashub ("a remnant shall return") lucked out and got a happy prophecy.
* The Prophet of Regret is far too self-serving and bloodthirsty to regret anything. His former title, Vice Minister of Tranquility, completely contrasts that he's about as confrontational as the Elites/Sangheili he pals around with, to a level unique among San'Shyuum.
* The Prophet of Regret is hot-headed, stubborn, and impetuous; the only thing he
* The Prophet of Truth is a blackmailer. He blackmailed the other two into taking power alongside him and blackmailed his way into power in the first place. He's also a
* The Prophet of Truth's entire base of power stems from a lie which could break the Covenant apart and has caused billions of deaths, alien and human. He himself was well-aware of this, and named himself Truth after his ascension
* The Prophets (aka wormhole aliens) on the same show have a little more meat to their claims. They live beyond linear time, which at the very least puts them in the
* The Prophets did this to Sisko's biological mother, Sarah, in order to ensure his existence. Once the Prophet left, she ran off.
* The Prophets themselves subvert this too; most of them seem to have had genuinely no idea that
* The Prophet: The production's defining aspect. The film contains numerous segments where the animation shifts to a variety of new styles, each directed by a guest animator. It's all set to music or Mustafa's narration.
* The Prophet: The young Almitra and clearly older Mustafa form a quick friendship upon meeting each other.
* The prophet Tiresias was (in one version of his story) transformed into a woman by the goddess Hera as punishment for killing a pair of mating snakes. After spending seven years as a woman, he encountered another pair of snakes at the same spot and (either by killing them or leaving them alone) was changed back into a

man. In some versions of the story, he continued to change sexes every seven years for the rest of his life. As a result of Tiresias's unique experience, Zeus and Hera later called upon him to settle an argument over which gender experiences more pleasure during sex (as he alone had experienced it from both perspectives). Tiresias sided with Zeus, stating that women enjoy it more; Hera's response to
* The Prophet: While Mustafa is a warm man he's also a very reserved one. All of his dealings with the people are kind, honest, and dignified; he's even patient with the Sergeant. With the Commandant, however, he has harsher words towards and it's clear that underneath his pleasantries he hates what the Commandant stands for.
* The Proposal and avoid being deported to Canada. They become a real couple by the end of the film.
* The Proposal) and leaves the towel outside the bathroom when she showers. She tries to get it, but their dog stands outside the door and starts barking loudly. She manages to trap the dog in the bathroom, only to bump into a naked Andrew who was also about to take a shower.
* The Proposal and Wonder Woman as Sandra Bullock. Bullock was linked to the Wonder Woman role for a while.
* The Proposal: An uptight woman pretends that she is going to marry her relaxed male assistant.
* The Proposal: Because the family thinks that they're engaged, they are given a room with only one bed. It goes without saying, in-universe, that Andrew takes the floor.
* The Proposal, Bullock says a line something like "If you don't go along with this, everything you've been through, all those late-night Tampax runs, will have been for nothing."
* The Proposal' characters are posing as a couple, and try to act as if they were just spooning.
* The Proposal is a little different, in that Sandra Bullock's character entered the country legally on a work visa, but now she faces deportation because her visa has expired.
* The Proposal: Margaret asks her employee to marry her quite out of the blue, so that she can stay in America. After some time, he agrees.
* The Proposal. Margaret is about to be deported so she convinces a co-worker to be her fiancé. He barters with her and gets a publishing deal out of it.
* The Proposal, Margaret makes a nude run for the wardrobe from the shower. Andrew is also naked, getting ready to take a shower of his own. Neither is looking and they walk into each other at a fast pace. He ends up on top for her:
* The Proposal. Of course after the tearful departure and as she was packing up her office the guy managed to catch up to her and propose for real.
* The Proposal. She was making a nude run for the wardrobe and he was... good at timing (who takes off their clothes, while listening to music, while standing up OUTSIDE?). They're both not looking and walk into each other at a fast pace with the response "Oh my god, why are you naked?" "Why are you wet?!"
* The proposals to mine helium-3 in space fusion reactors that produce more power than they consume.
* The Proposal, they wind up developing genuine feelings for each other and she calls off the sham wedding.
* The Proposal: This movie tries to trick you into thinking that Bullock's character, Margaret, is the stuffy, uptight one, and Reynolds' character, Andrew, is the comic relief. However...
* The proposed and occasionally fan-preferred alternate, much more humane and less grimdark solution to the same problem the Sabbath battles are stated to be created to counteract, combining in some ways with
* The proposed "hyperloop" transport systems turn this up to 11, with the prospect of cross-country New York to LA trips being executed at 4,000 miles per hour, going from city to city in 45 minutes... which may be less time than it takes you to get from the station to your final goal.
* The proposed Molten Salt Reactor design uses fuel that has to be in a melted

state for the reactor to work, and keeps the core from draining by constantly cooling a flattened section of pipe to keep a plug of salt frozen so that if power to the reactor's building is lost, the plug of salt melts and the fuel-salt drains into a passively-cooled drain-tank that's configured to prevent nuclear fission from happening, averting this trope in the simplest possible way: powering the safety system entirely by the force of
* The proposed project to recycle Russia's typhoon-class subs as cargo ships, due to
* The proposed TV adaptation would have added two extra regular characters, Sean Flynn and Katrina Finch, who would join up with the rotating cast of each episode. Only the pilot was ever made though, so they're both one-shot characters after all.
* The Proposition, although he's more of a Whipping You To Death Judge.
* The Proposition are a perfect example of an evil version of this trope. Arthur considers all of them to be brothers, including the ones who aren't his genetic brothers, one of whom is even of a different race. He truly loves them all, and has not a single cruel word for any of them. When told that his youngest (genetic) brother has found a girl and wants out, he is completely supportive. And if you're not his brother, you're liable to get shot, knifed, kicked to death, robbed, or possibly raped.
* The Proposition, beats up prisoners, discriminates against Irish people, is a bit blunt on the whole imperialism thing, and doesn't trust his wife with information that might upset her. The thing is, it's all out of a misaimed sense of duty and chivalry, and he's not really a bad guy, underneath it all.
* The Proposition features a realistically stomach-churning sequence where a prisoner is sentenced to a hundred lashes.
* The Proposition, The Burns Gang infiltrates the police station by having Two-Bob put on full traditional Aboriginal dress and war paint while Sam and Arthur steal police uniforms and drag him into town as their prisoner.
* "The proprietor drew a gun on me, but I gave him the slip and hid in the foothills." (the proprietor draws a picture of a gun on the narrator's shirt, the narrator gives the proprietor a slip (as in a lady's undergarment) and then runs into a bunch of hills with pairs of feet sticking out of them upside-down)
* The prosecusiton brings forth charges against "The Powers That Be". All kinds of
* The Prosecuting and Defense Zircons introduced in "The Trial," are often paired together. Their
* The prosecuting attorney repeatedly uses the phrase "beyond a shadow of a doubt". However, that is not the standard of proof, because nothing can really be proven beyond a
* The prosecution submits the case of extra-dimensional aliens seen in
* The prosecution would like to submit to the court the cases of a number of humans in
* The prosecutor in Bree's murder trial is willing to blackmail Renee with having her fiance deported in order to extract a testimony against her best friend.
* The Prosecutors, a courtroom drama about a wheelchair-bound female prosecutor.
* The prosecutors often don't provide a motive for why the defendant would've committed the murder, instead just using the evidence and testimony gathered by the police investigation. Sometimes, when the real murderer is caught, you don't learn their motive until after they're arrested and you're waiting for the judge to give the Not Guilty verdict. At other times, you have to provide a motive (and evidence that supports said motive) for the person that the defense attorney is accusing of being the real criminal.
* The prosecutor Winston Payne, and later his brother Gaspen, also fulfill this role as
* The prose Expanded Universe has also implied that the films featuring
* The prospective market is not enough to justify the cost of a dub. (Dubbing is expensive!)
* The prospective wind farm planned for a few miles offshore of Cape Cod has run into this among its many, many public relations problems. It's not so much the issue of a curse they're worried about as it is the protests of living Native

Americans. This is not, incidentally, an example of Native Americans practicing burial at sea. The wind farm is to be built on a shoal that's all that remains of a peninsula where the Wampanoag buried their dead that began to sink beneath the waves about six thousand years ago. To the Wampanoag, this is like building a power plant on top of Stonehenge.
* The prospect of generating energy with black holes is brought up several times in
* The prospector who first discovered what would turn out to be the Comstock mine sold the rights to Comstock. Once somebody thought to test the tailings for
* The prostitute Shae was sexually abused by her father who also treated her like a kitchen wench.
* The protagonist Abdel Adrian is initially more like the opposite, because instead of starting out as a novice just out of his childhood home like the
* The protagonist, Agent York, has a small scar on his cheek that he got when (in his own words) he "arrested a
* The protagonist (a Harder) starts suspecting the existence of these bootleg devices when a space liner explodes. While it looks like a typical malfunction (and it is), he does find it strange that a full third of the passengers have cancelled their tickets several days before boarding. It turns out they all have these devices.
* The protagonist, Alto, heavily plays with this trope. At the start of the series he gets a VF-25F, a pretty bogstandard version of the VF-25. Then, after staying behind to
* The protagonist arms dealer Yuri Orlov doesn't instigate any wars, nor does he care about the outcome, he simply provides weapons to those who do. He points out that he doesn't put a gun in anyone's hands and force them to shoot.
* , the protagonist attempts suicide with a gun equipped with a timing mechanism: a wind-up toy attached to the trigger by a cord, that will roll off the table and yank it. When circumstances intervene, he must catch the toy to prevent the gun going off, which isn't easy as he'd handcuffed himself to a chair in case he lost his nerve.
* : The protagonist attempts to learn this combat style, his desire is to do this with two replicas of the Master Sword. Some other characters like Lyn and Roy also display this skill with both Sol Katti and Mani Katti.
* The protagonist bodyguard and his charge are dropped to a planet in an outdated emergency landing pod. Said pod is described as "useful to deliver some non-fragile goods or passengers suffering from excessive optimism". They land safely and
* The Protagonist, but she still takes action alongside her students in battle.
* The protagonist buys so many cans/packages of the product that it fills his house.
* The protagonist chooses to bunt to advance the runner. The runner does not stop at third, but continues to home. The fielding team chooses to throw the hitter out at first rather than ensure the runner does not score the walk-off run and end the game. It is completely nonsensical for a team to sacrifice the game in order to make an out.
* The protagonist Clémentine is renamed Adèle after her actress Adèle Exarchopoulos because the director included scenes where the actress wasn't acting for the camera and was being called by name by the crew, feeling it was very natural and suited the movie.
* The protagonist describes her boyfriend as a "really smart, but stupid, jock".
* The protagonist differs from real sea sponges given that he has a face, limbs and internal organs.
* The protagonist does, however, have a fairly clearly defined personality; it's just that his/her lines have no voiceovers, probably due to the fact that he/she
* The protagonist doesn't get the prize he wanted, but instead... a month's/year's/lifetime's supply of the product.
* The protagonist endures the trials and learns to be a stone-cold realist, discarding conventional morality without becoming outright villainous. Defining term:

* The protagonist Eragon brings this trope up in the second book, claiming to be "uncomfortable with the idea of prying into people's secrets ... secrets that they have every right to keep to themselves". He shortly thereafter learns to use this power for good.
* The protagonist even compliments the killer for his clever plan, and suggests a way to put it in action to the same effect in their next lives, with one less murder: make his murders in points A and B, and then wait for him in point C, midway on a straight line from A to B.
* The Protagonist faces this again when a certain demon demands that he kill Jack's Crew for their crimes. The hero can either agree to kill them (even though they're already brain dead), let Zelenin kill all the demons with the Hymn, or just kill the one demon making the offer.
* The protagonist gets another one near the true ending of the game when
* The protagonist goes to extreme measures to acquire yet another pack of the product when he finds out he has exactly 9,999 coupons and needs 10,000 of them.
* The protagonist has many times shrugged off injuries that would ordinarily be debilitating and mortal, because his power ring allows him to suppress pain nerves and rapidly rebuild his body.
* The protagonist, Hei, could also count as one of these, given the emphasis in the final episode of the first season on how he pretends to be the amoral, badass Black Reaper, but is actually a sensitive guy who is haunted by all of the killing and dubious acts he has to do.
* The protagonist herself is one of the best examples of the crossover between this trope and
* The protagonist himself betrays the girlfriend in the "Psychopath" ending, where he says he was killing the students of his own will. Averted in the other endings where he is a
* The protagonist himself starts off the game tied upside down by his feet and needing to escape from the chainsaw-wielding Sadist, though he manages to free himself with the help of a convenient knife nearby.
* The protagonist Hinata Shouyou’s birthday is June 21st, the longest day of the year. His name means “sunny place” and he has a sunny personality with bright orange hair and warm brown eyes.
* the protagonist in that the area was mostly vacant and the act was only intended to fool someone who might see him from a distance.
* The protagonist in the Marty Robbins ballad "El Paso", revealed to have died in his lover's arms after being shot in a gunfight.
* The protagonist Iris is considered a huge radical for using her own money to fund mandatory primary education, an agricultural college and a university to increase social mobility to simulate the economy and end economically disruptive farming practices. Her company is considered quite revolutionary for having paid paternal leave and allowing women to work even if they got married and had children.
* The protagonist is actually a sympathetic, though highly reluctant, interrogator in the
* The protagonist is an outsider, wondering what kind of bizarre secret the
* The protagonist is a special kind of Nephilim known as the Redeemer, prophesied
* The Protagonist is more comfortable in men's clothing and continues to wear her costumes.
* The protagonist is never given an age but is explicitly referred to as a child and their sprite
* the protagonist is randomly hit by a bus. The kids spend the rest of the episode trying to get it changed back.
* , the protagonist is shocked when a guy named Cruelheart turns out to be abusive.
* The protagonist is unimpressed by Green Lanterns like Hal Jordan using giant boxing glove constructs. It actually does make some sense for Green Lanterns, though, since they need to be able to focus on every part of the construct, so simple can be best. Paul still considers it to be a sign of a rookie (or, in Alan Scott's case, damaged equipment).

* The Protagonist, it was always expected and assumed for Hinata. At one point he admits to his teammate Suga that he never had a two digit score in his quizzes.
* The protagonist Izuku Midoriya himself. Unlike his classmates, who had their Quirks since they were toddlers and thus had a lot of time to learn how to use them, Izuku only received One for All recently. Much of the beginning of the series is him figuring out how to use his god-like strength without literally destroying his body from the stress.
* The protagonist, Juan Rico, is sentenced to five lashes for a training cock-up that would've gotten teammates killed in combat. Unlike Hendrick, though, he is deemed salvagable and given these lashes as an administrative punishment, designed to disappear from his record after he graduates boot camp. It helps that, when asked if he
* The protagonist loves the neighbor but they don't love the protagonist back. (Possibly because they're unaware of the crush.)
* The protagonist mentions that, by law, every Spesh has a right to remove his or her specialization. However, in practice, this never happens. For one, each Spesh loves his or her job. And two, many changes are simply irreversible.
* The protagonist of Brian Keene's short story "The Garden Where My Rain Grows" suffers from this problem. He can get sad over the deaths of loved ones, but he's never been able to cry. Not before the apocalypse
* The Protagonist of Devil Survivor 2 is this as well, but his dialogue options are often expressive. He's more silent in the anime adaptation, where he's named Hibiki Kuze, than he is in the game!
* The protagonist of E. F. Benson's "The Room in the Tower" has increasingly ominous dreams about paying a visit to... someone, who keeps sending him off to sleep in that room in the tower. Then, one day, he gets an invitation from a chum, and things go
* The protagonist of Gerard Klein's short story "Jonah" was born and grew up in zero-g, and is very lonely.
* The protagonist of "No End House" goes crazy after the horrors of going through all nine rooms. Just to twist the knife further,
* The protagonist of "Obey Me," Jinyoo, develops a crush on the girl he's imprisoned alongside, Hanya, while they're both imprisoned and tormented by Jinyoo's
* The protagonist of the 1940 story "The Whispering Gorilla" is a man trapped in the body of a gorilla, but retaining human intelligence. He gets away with it by pretending to be wearing a costume.
* The protagonist of the 1952 short story (quite possibly making it the origin of this idea) and 2003 film
* The protagonist of the "Dragonland Chronicles" album trilogy of the Swedish
* The Protagonist of the movie is a 701 attempting to lead a normal life, but is called back into action when his fellow 701s begin taking down gangs all over Hong Kong and begin to cause trouble for the police.
* The protagonist of the same series, Bean, was originally going to subvert this trope, as he was afraid of passing on his genetic condition and his lover, Petra, is fine with this. However, various factors, including the aforementioned Anton, convince him to do his reproductive duty and he and Petra eventually have eight children via in-vitro and the last book of the series has a subplot of them having to retrieve seven of them, which have been implanted in other women by Bean's enemy, Achilles. They manage to find six of them, and the eighth one is eventualy found in
* The protagonist of the series, Hiccup Horrendous Haddock III, loses his left leg after
* The protagonist of "The Story Of Willy" by King Missile has this perspective on the impending apocalypse ("Today is a special day, the last day of planet Earth, and I'm going to enjoy myself"). Even when he finds his friend Bob has committed suicide, he resolves to wait until Bob's wife gets home and take her out dancing.
* The protagonist of the third game, Adam Jensen, looks to be continuing... sorry,
* The protagonist of "Vegetables" fantasizes about his boorish co-worker

electrocuting himself by drooling into a power outlet.
* The protagonist prefers five-pointed stars, but states that he's used to amateurs using triangles because they're easier to draw.
* The Protagonist rescue Christy is a convenient way of forging a relationship with someone who already had a boyfriend. This probably has something to do with said boyfriend fleeing by himself, while the protagonist sticks around to help her.
* the protagonists accidentally caused on their world. He is quick to notice he was used to the child version of her and forgot how beautiful she was as an adult.
* The protagonists are equally vague. You look like children but are implied to be adults (they live on their own, pay mortgages, and drink coffee), though at least one letter implies you're not an adult yet.
* The protagonists are facing an angry mob like this in their own house.
* The protagonists are unrepentant and hypocritical murderers, there's no point in the people who die learning last-minute lessons (or die for
* The protagonists' base also upgrades throughout the series: first is the captured Dai-Ganzan (repainted red, given a new control watchtower and a team flag, and renamed Dai-Gurren), then the Arc-Gurren (and
* The protagonists Black and White and the Dusk and Dawn brothers in
* The protagonist's companions become pretty useless. The worst might be Jaheira, who's plummeted into
* The Protagonist serves as a linguist and cartography expert who directs the expedition to find the lost continent of Atlantis and has light brown hair to match.
* The protagonist, Setsuna, is put into a dream world where Sara is not his sister but his girlfriend, his best friend Kira is a happy intellectual big brother figure, the guys
* The protagonist's guardian, Sojiro Sakura, is pretty cold and hostile towards him at first, mostly limiting interaction with telling the protagonist to not cause any trouble for him or his business. This is reflected by his Confidant link being extremely slow to rank up compared to the others and outright locks at a certain point in the story. After you
* . The protagonists, Houarn Pogamm and Bellah Postik, are first cousins through their mothers.
* The protagonist, Simon, averts this trope by actually wearing his goggles to protect his eyes and provide illumination while digging underground tunnels. It is worth mentioning, however, that Simon wears the goggles on his forehead at all times, even when not underground, and even
* The protagonists interact with several "fangless" vampires, who intentionally pull their canine teeth so they can't feed on humans. Anna is weapons-grade adorable, while her adopted sibs Jiji and Clara are only fractionally less cute.
* The protagonist's late mother's body gets subjected to various indignities in Joe Orton's farce
* The protagonists live on "Earth Bet", regarded as something of a hellhole by the inhabitant of "Earth Aleph" (albeit an interesting one to some people) because they suffer frequent
* The protagonists Lone Starr and Barf need '1 million spacebucks' to get out of a debt with a creature called 'Pizza the Hutt' in a situation clearly meant to mirror Han Solo and Chewbacca's within
* The protagonists manage to push open doors weighing several tons simply by going through the
* , the protagonist's memory of school is of his triumph at athletics.
* The protagonist, Snow, also uses this trope interestingly. At times he mocks her with his sexuality (such as when she falls face-first onto his crotch and he tells her that "you don't have to do that, a simple thank-you is enough") but at other times he seems distinctly uninterested in her as a sexual being (such as when he's looking at her leg wound and saying "ew! yuck!" even though it's on her thigh, practically in her crotch).
* The protagonists of the first chapters are three friends with what appear to be a deep friendship. The first to wish, Rikako, wishes that Yamaguchi, the boy her

friend Ai likes, would like her back: it's granted, only for Ai to neglect their friendship and Yamaguchi later admit he used to like
* The protagonists of the second chapter, Misa and Akio, are dead and have separately wished themselves back to life, with both wishing only themselves back alive because the shock of death made them forget the other died with them. Both have to kiss the person they love before midnight to make it stick-And while Akio loves Misa, Misa has a crush for another boy, and Akio decided to not tell Misa he too was dead. In the end Misa finds out that Akio's dead too and his condition to return to life, so she kisses him... And the 'Angel' keeps them alive
* The protagonists spray "Canada sucks!" and other anti-Canadian insults on the side of their truck and are pulled over by a member of the Ontario Provincial Police who then — because Canada is officially bilingual — forces them to also spray it in French.
* The protagonists think they're experiencing this trope when they are arrested in Omashu.
* The protagonist's time travel suit has "Yellow" (50%), "Orange" (25%), and "Red" (Critical) alert levels as its energy supply depletes.
* The protagonists unwittingly help famous bank robber Babyface Nelson in
* The protagonists were given amazing shapeshifting super-phlebotium by an alien who crashed in their hometown and hoped they could prevent the alien invasion he died trying to stop.
* The protagonists (with the exception of Kakyoin) also dismiss the idea of a baby having a Stand, despite the fact that not only can children develop Stands (as Polnareff can attest to) but a baby having a Stand is apparently more ludicrous than an
* The protagonist Takumi Fujiwara is an 18-year old who has been drifting through the dangerous mountain passes of Akina since he was
* The protagonist, Taylor, after she takes on the hero identity Weaver and joins the Protectorate. Understandable, considering that as Skitter, she led a group of teenage supervillains in conquering a city, humiliating the heroes at every turn.
* The protagonist tells his friend of a strange person standing completely still outside their house, and is told to not let anybody inside. Moments later, a video shows that this person went from standing like a statue, to knocking incessantly at the front door and even going so far as to jiggle the knob. This event leads the protagonist to stay hidden in their bedroom for two days straight.
* The Protagonist). Then, he became the winner of the All-Japan Martial Arts Tournament at age 18, and the Team Japan leader at age 19. The rest is history.
* The protagonist, Tsubasa Ozora, straddles the line between this trope and
* The protagonist uses a glowy sword because the power source is leaky. (
* The protagonist uses the mystical area behind the eponymous location in
* the protagonist was apparently conceived during the Time of Troubles
* The Protagonist, Yuya Sakaki averts this trope. Aside that he uses them to hide his feelings, they protect his eyes when he is riding into bushes, puddings or other nasty things. In the Synchro Arc, he uses his goggles whenever he's in a Riding Duel.
* The protected person is normal, and the protector is not... and the main reason the protected is even in danger is that someone is hunting the
* The protective charm Lily inadvertently invoked when she sacrificed herself to save Harry was old magic powerful enough to deflect even the Killing Curse, a curse that normally can't be blocked by magical means.
* The Protectorate and the Wards are national organizations, technically operating under the PRT,
* The Protector class (actually called Paladins in the Japanese version). They can equip the heaviest armor and most of their abilities revolve around protecting the rest of their party from harm. Their offensive power is decent at best compared to other classes, being bolstered by a
* The protector fails to protect the protectee, resulting in the latter's death. This will be their
* The Protector. He eventually turns the tables with elephant bones applied to

joints.
* "The Protector of Concord Dawn" with an asteroid field trailing behind it in its orbit.
* The Protectors ended just like that. The heroes failed, and Earth was destroyed.
* The Protectors has everyone including its universe killed off with a bang - literally.
* The Protectors of the Light work together for the first time in the endgame of
* The Protectors originally had Tony Curtis in mind to play the guest role of Harry Rule's friend, nightclub pianist Zeke Daley — but Shane Rimmer, who wrote the episode (though better known as an actor, he also scripted episodes of Anderson shows), wound up playing Zeke instead.
* The Protector steals a speedboat to escape him, he goes to the nearest one to do this. Its owner tells him to get lost instead, and he has to commandeer it at gunpoint.
* The Protectors when he triggers a switch on it's side, allowing him to execute sneak attacks.
* The Protestant churches in the USA (be it Baptist, Lutheran, Calvinist, Methodist,...) also get a lot of negative attention in the media, especially since many of their most fundamentalist and controversial preachers like Pat Robertson, Jerry Falwell, Jimmy Swaggart, Ted Haggard, Jim Bakker, Oral Roberts, Fred Phelps, Peter Popoff, etc. cause enormous damage to the reputation of American televangelists both in the US and abroad. To the public, it may often appear that virtually all of them are
* The Protestant variety shows up on the episode "That Woman". When a high school student confesses to her youth minister (the leader of her chastity club, ironically) that she's having sexual fantasies about him, he encourages her to sit and tell them to him, with her back turned to spare her embarrassment. His tone of voice as he listens to her makes
* The protests in Libya developed into a full-blown revolution, which overthrew the Libyan government. Given its efficacy in Vietnam in the 60s, and the fact that it resulted in regime change in three countries this year, this makes the present trope seem a very effective form of protest.
* The Proteus Operation and realizes that time flows differently between the time periods.
* The Proteus Operation starts in a world where, due to help from time-travelers, the Nazis and Japanese had won the war. Now, thirty years later, North America and Australia are the only parts of the world outside of their control.
* The Proteus Project, among others, work with time travelers to ensure a Nazi defeat (in the travelers' timeline they won).
* the Prothean Archives). While you and your teammates have an assortment of powers that should slow down or stop that boss enough for you to easily catch up, none of them have any effect.
* The Prothean Beacons, which can range in size from slightly taller than a human to nearly a hundred feet.
* The Protheans by those who came after them. However, they also strongly resembled the Aztec.
* The Protheans seem to be comparable to current species in starship technology. The Prothean flagship, the Penumbra Apex, has a main gun comparable to the Geth dreadnought.
* The Prothean VI Vigil has been around for at least 50,000 years, most of those spent entirely alone. In
* The Pro, the eponymous character is a new superhero on the ersatz Justice League.... and a career prostitute with a kid. Spectacular levels of gag-a-maggot self-justification abound. A typical example of the writer's thoughtful social commentary includes gems like:
* The Pro, the villains are named after grammatical terms (The Noun, The Verb, The Adverb, and The Adjective), because all the other names were taken.
* The protocol droid turned bounty hunter (really!), 4LOM (seen briefly alongside the other bounty hunters in

* The Protocol on Blinding Laser Weapons, Protocol IV of the 1980 Convention on Certain Conventional Weapons, was issued by the United Nations on 13 October 1995. It came into force on 30 July 1998. This bans weapons that cause permanent blindness. Blinding as an incidental or collateral effect of the legitimate military employment of laser systems, including laser systems used against optical equipment, is not covered by the prohibition of this Protocol. It also defines blindness as an irreversible and uncorrectable loss of vision which is seriously disabling with no prospect of recovery. Serious disability is equivalent to visual acuity of less than 20/200 Snellen measured using both eyes. So "minor" permanent damage is not covered. Temporary damage is also not covered.
* The Protocols of the Elders of Zion, and is still believed to be real by many people even today.
* The Protoculture are shown to be have been able to project large-scale barriers without the overload problem the
* The Protomen all have codenames and stage makeup, present themselves as dissidents living in the dystopian society described in their music, and never give out-of-character interviews or news posts.
* The Protomen at the very end as the hero's sacrifice turns out to be in vain.
* The Protomen called "The Father of Death" Dr. Wily, tricks Dr. Light into committing terrorist acts and sending Joe to destroy his tower. Turns out Wily had a second control tower located in a fortress and he was only waiting for Dr. Light's attack to give him an excuse to deploy his robot army and declare martial law.
* The Protomen, comes to the early realization that the convenience provided to mankind by the worker robots he provides will eventually make them dependent on him.
* The Protomen committed, and even using his acquittal to convince the populace that the justice system has failed them, eventually leading to them handing over more and more power to him until he becomes an unstoppable tyrannical dictator.
* The Protomen concept albums, with a focus on tragedy, the psychology behind fascism, and robot destruction.
* The Protomen, Dr. Light is framed by Wily for his beloved Emily's death. Wily himself remarks that this accusation, "whether truth or lies, gets said all the same" and will shape the public's view of the man. The court declares Light to be not guilty (not that that stops him from beating himself up about it) and yet Light is lead out of the courthouse through a horde of enraged citizens, all baying for his blood. This is what drives Light into exile, and paves the way for Wily to set up his totalitarian regime.
* The Protomen, Dr. Wily is very much this. The people follow his every word, even trying to lynch Dr. Light when he tells them to.
* The Protomen). Female lead The Gambler (the voice of Emily, Light's love interest) and lead guitarist Sir Robert Bakker (who are married in real life) formed the center of the Nashville-based, dinosaur-centric band 'Happy Birthday Amy'. Before that, The Gambler and lead singer Panther were also in yet another band together. Not to mention fourth drummer The Reanimator and second guitarist Cobra T. Washington, who also perform as part of Nashville metal band 'Destroy Destroy Destroy'... The band is like a supergroup composed of members from all across the Nashville indie music scene, fighting in an all-out last-ditch effort to save music from itself.
* The Protomen had an early demo of "Breaking Out" leaked by a fan. The recording of a recording was of such poor quality that the band released the demo as a free track, in much better resolution.
* The Protomen had a sweet handlebar moustache that was accentuated by facepaint.
* The Protomen in their live performances; during a show in Portland, OR, for instance, KILROY declared that the audience is the best they've ever played for, then added "Just don't tell Richmond, VA that we said that. It would make things awkward."
* The Protomen is a goldfish for the fallen Proto Man. In a way, Proto Man could be seen as a variation — the son Dr Light never had, since Wily murdered his

girlfriend.
* The Protomen one-liners, since the track is about Megaman slaughtering Robot Masters. An actual quote from the song is: "Send me the best you've got / Send me your strongest machines / The fight my brother fought / Here, now, will end with me". Also, after he actually trashes the first wave of robots he's not nearly satisfied so he says: "All you wounded!—those of you who can— / Pick yourselves off the ground / Hurry back / Tell your leader you'll need more men" as he prepares for the second wave.
* The Protomen on the Mega Man mythology, is similarly set in the year 200X.
* The Protomen released a white vinyl record roughly one year prior to releasing their Act II CD with the single "Father of Death". The other side contained a remixed version of "No Easy Way Out" from Rocky IV.
* The Protomen's Act I, Dr. Wily orders the robot army to kill the crowd. In live performances, he sometimes says the line verbatim.
* The Protomen's first album is simply called The Protomen. After Act II: The Father of Death came out, it retroactively became Act I: Hope Rides Alone.
* The Protomen's rock opera Father of Death, says this trope word for word.
* The Protomen that he's led out of the courtroom and past an angry lynch mob calling for his death.
* The Protomen. 'They say, this city, she's been dead for years now, so death is not something that scares me. There's worse things than death here.'
* The Protomen with Gatling guns for arms in artwork and live performances, as opposed to the plasma cannons they have in the games.
* The Proton rocket. Most launchers launch satellites. This thing launches space stations, or at least modules thereof.
* the Protopets are weak to water since the Thermanator has no other uses but melting ice and freezing water, and it doesn't solve any puzzles or help with traversal in this room, unlike every other time you used it before.
* The Protoss are relatively normal biologically in comparison, but that's not saying much in light of the above. They've got digitigrade legs, and
* The Protoss are telepaths; presumably the (Terran) listener hears in whatever language they know. Note, however, that they
* The Protoss campaign begins with them attempting to retake Aiur, but they are derailed as Amon corrupts the Khala, taking control of many Protoss through it.
* The Protoss Empire was a version of this; according to the first game's manual, they "ruled" hundreds of planets, but what that really meant was that they declared themselves the protectors of hundreds of pre-spaceflight planets inhabited by hundreds of different species. Due to their
* The Protoss, especially Fenix. Only the Dark Templar seem more down-to-earth. This might be because most of the Protoss characters encountered and played in the game are members of the Protoss' warrior-caste (The Templar), StarCraft being a war game. Members of the civilian/artisan/scientist/laborer caste (the Khalai) and the clergy/government caste (the Judicators) justifiably don't make much of an appearance.
* The Protoss have no need for drop pods, because unlike the Terrans or Zerg they can simply teleport Warp Gate units to any location within the psionic matrix of a Pylon or Warp Prism. Despite this, during Legacy of the Void Talandar can be deployed to the battlefield via speed, not teleportation. His landing deals significant damage to anything too close, being enoguh to destroy tanks unlucky enough to be under him.
* The Protoss Photon Cannon certainly fits compared to other turrets. It's not as good at anti-air as a Terran Missle Turret or as good at dealing with multiple foes and anti-ground as a Bunker. It can't relocate like Zerg Spine Crawlers and Spore Crawlers. But it's the only turret that can attack air and land units while also functioning as a detector.
* The Prototype boss on the penultimate floor of the Administrator's Tower
* The prototype Gelgoog is slightly more powerful than the mass produced version (usually shown via higher health and other stats), but is otherwise exactly the same as the mass produced version. The ace customs versions, however, are often

much more potent.
* The prototype of the M247 Sergeant York self-propelled anti-aircraft gun suffered a case of
* The prototype Pegasus is inferior to the White Base, which is treated in-game like an
* The prototype Spinal Tap seen on Rob Reiner's 1978 ABC special look dramatically different from their 1984 counterparts, particularly Nigel, who has much longer hair and glam-ish makeup. However, it can be argued that this was simply a different era of their career than what was seen in TIST, and their looks matched their preferred style at the time.
* The prototype, the Sadalsuud, was positively spartan — it just had the mandatory two beam sabers and the Revolve Bazooka, a primitive revolver/rocket launcher.
* The prototype versions of some machines like the Gouf or Dom are actually inferior in some regards to their mass produced brothers due to being testbeds for new technology rather than being combat models.
* The prototype was assembled by Phantom Blot in jail from various devices he had convinces the director to let him build, and, after being powered by lightning, is used to break out. Also serves to
* The prototype worked for reasons they have never been able to figure out or duplicate.
* The prototype YF-23 Black Widow had secret red markings painted on it made to look like the "hourglass" on a black widow spider. These were actually red markings painted on sharp edges on some of the aircrafts hatches, supposedly as a safety measure, but in reality a way to apply this trope even though they were supposedly forbidden from doing so by the Air Force.
* The prototypical rabbit character who eventually became Bugs Bunny was named "Happy Rabbit". No documentation at Warner Bros. indicates that this name was ever used.
* The Proud Elite: I'm handsome, fit, intelligent, sophisticated, and rich! I also don't like low-life losers such as yourself!
* The Proud Elite: I'm handsome, fit, intelligent, sophisticated, and rich. I also don't like low-life losers such as yourself.
* The Proud Family actually sports a small bit of hair sticking up in her hairdo.
* The Proud Family always falls asleep while watching wrestling or when she is supposed to be chaperoning Penny or babysitting the twins. Turn it off and she immediately wakes up to tell you to turn it back on, then goes back to sleep once it's back on.
* The Proud Family, a sassy black version of this trope. She even wrestled professional wrestlers.
* The Proud Family as minor characters with jobs like bodyguards and security.
* The Proud Family: Dejenay wants to buy a soda because of a $50000 instant win sweepstakes going on. Penny Proud gives her a reason not to: "It's the difference between watching a movie, and watching Leave It To Beaver, without the sound." And it turns out that the bottle Dejenay was going to buy contained a $50k prize.
* The Proud Family, Dijonay exchanged families with the Chang Triplets, and their father immediately chewed her out for having a B in math. "'B' means 'better work harder to get an A'!"
* The Proud Family episode "Love Thy Neighbor", babies BeBe and CeCe amuse themselves by bouncing on Felix's belly.
* The Proud Family episode "Pulp Boot Camp" Penny wants to go undercover as a bad girl for a journalism assignment. She figures the best way to do this is get sent to detention. She tries graffitiing lockers, drawing funny mustaches on school photos, and even pulling the fire alarm with a bunch of signs pointing to her. None of these work, but walking in late to class finally does.
* The Proud Family Even when he's not doing that, he's just a plain egotistical jerk who's not a nice person to be around.
* The Proud Family features a starving Oscar and Felix imagining each other to be burgers and hot dogs. They also attempt to eat a bowling ball that they believe to

be a cherry.
* The Proud Family for the school newspaper, and is sent to a boot camp style reformatory.
* The Proud Family had an episode against music piracy that heavily was based on Napster. By the time the episode came out, Napster had been killed off.
* The Proud Family had Penny briefly date a secret admirer who used a wheelchair. She ditched him soon after realizing he was actually a mean-spirited jerk who used his disability to take advantage of people's emotions.
* The Proud Family had "Smack Mania 6: Mongo Vs. Mama's Boy". Oscar is shooting a Proud Snacks commercial with his favorite wrestler Mongo. Mongo, however, gets sick after eating the snacks and can't defend his world heavyweight championship, demanding that Oscar fill in for him. Oscar, being the pathetic weakling he is, get thrashed in the ring and has to be saved by Suga Mama. From that point on, Oscar becomes the famous "Mama's Boy". Until Mongo returns to action that is.
* The Proud Family had this where the failed rival in question was one of the protagonist's teachers (the resulting couple being her grandparents).
* The Proud Family, has a plot about genetically engineered peanut people, a long way from the mundane plots the series began with.
* The Proud Family has Marsha Mitsubishi, who very clearly hates her job and frequently comments about it on air.
* The Proud Family has several episodes that use the same clip of Trudy trying to make a souffle, but then it collapses. As you'd expect, it is often used in scenes where someone (usually Penny and her friends or Oscar) is making a lot of noise and Trudy is supposed to notice or react to the noise, while giving her a reason to also be angry if she's supposed to be in that scene.
* The Proud Family has some at the end of the episode "The Legend of Johnny Lovely".
* The Proud Family in the episode "Diary of a Bad Girl" was that her mouth was full of the cookies she stole, when he sarcastically asked, "Got no milk?"
* The Proud Family involves Oscar standing in for the heavyweight champion, who got sick from eating Proud Snacks. Oscar, of course, stands no chance against his opponents and has to be saved by Suga Mama, and becomes known as "Mama's Boy".
* The Proud Family, it starts with them childless, though she reveals she is pregnant. They decide that if it's a girl then Josephine "Josie" Rhea Fenton, if a boy then Neil Martin Fenton.
* The Proud Family, LaCieniga is obviously Hispanic, and takes after her mother (who has dark skin). Felix also obviously looks pretty Hispanic as well (but is lighter), but his father Papi is white and could pass for being white European. There was actually a bit of debate where people assumed that Felix's mother was Hispanic and that he's only half Hispanic. In reality, there is such a thing as being "white Hispanic" and Papi most likely is.
* The Proud Family: Nubia is the only member of the Gross sisters who talks while the other two don't even make a single sound in the whole series.
* The Proud Family of the show, as aside from having the worst luck of having her friends ditch her whenever she's in a pickle, she also ends up on the receiving end of slapstick in roughly 70% of the episodes.
* The Proud Family, Oscar and Felix pass out straws to decide which pair will have to climb a nearby mountain. Oscar intends for Felix to give the shortest straw to Suga Mama and Papi, but Felix mishears him and gives them the longest straws, leaving him and Oscar with the shortest two.
* The Proud Family, Oscar takes his family out camping using a fairly state-of-the-art RV, and his mother Suga Mama remarks that with an RV so big, it's barely roughing it. It escalates when their rich neighbors the Boulevardezes are camping adjacent to them. Their campsite is a massive collapsible mansion.
* The Proud Family: Penny and her friends ended up suspended from school the day after Valentines Day because of a graffiti mark on the school with Penny's name on it, which neither of them actually painted on. As they were unwilling to admit to their parents that they had gotten suspended from school indefinitely until they found the true culprit was exposed, Sticky instead had created a fake call from the

principal regarding them winning an award (which as the last scene revealed, was fake from the start) in place of the suspension call to hold the parents off until they caught the culprit responsible (a crippled student who is later revealed to not be a nice kid) and thus got back to school. It bites them in the butt later on.
* The Proud Family, Penny and Sticky get into one of these because the former (begrudgingly) wanted to assist the latter in gaining back Dijonay's affections for him.
* The Proud Family Penny had a budding romance with a Chinese-American boy, only to discover that his parents had arranged for him to marry some girl whom he'd never met. The boy thinks it's no big deal since they wouldn't get married for years anyway, but Penny refuses to be "the other woman." The issue is resolved when the boy meets his fiancée; the two immediately hate each other so much that the whole thing gets called off.
* The Proud Family: Penny Proud and 15 Cent are in together alone, and 15 decided to call it a night. Penny takes this opportunity and gives him a big kiss.
* The Proud Family, Penny's cousin wants to take her driving, so they make a cardboard copy of Oscar. It works... until his head gets knocked off by a passing car.
* The Proud Family, Penny thinks that Oscar is seeing a woman named Debra. It turns out that not only was Debra Trudy's college roommate, she was also the one who introduced Oscar and Trudy to each other.
* The Proud Family pretty terrible things to Penny, but most of the abuse Penny faces comes from her peers rather than her parents.
* The Proud Family reel in "The Legend of Johnny Lovely", when she yells at Bruce Smith (the show's creator) to draw her a dressing room, where she can go sulk. He draws a trailer for her, only for her to demand a bigger dressing room. Bruce draws one big enough to fill a two-story building, which Penny promptly skates inside.
* The Proud Family refuses to curtsy to her partner during a ballroom dancing class, "Because it signifies subservience."
* The Proud Family regarding BB and CC's baptism. After both Trudy and Oscar's respective families left due to disagreements, Trudy exiles him to the tent (the family was forced to sleep in a tent due to Oscar inviting his family over so he'd have backup against Trudy's family, and thus occupying all the bedrooms and possibly all of the sleeping areas, period). It gets worse in that, when Trudy sarcastically hopes that there is no rain that night, it was raining, and Oscar also ends up being a victim to a skunk attack.
* The Proud Family since Suga Mama's doting resulted in Bobby not doing anything with his life, being unemployed (though trying and failing to become a singer), unmarried and still living with his mama while Oscar at least has a job, his own house, a wife and children.
* The Proud Family). So Trudy, wanting to cheer up Penny and entertain her guests, delivers this priceless gem:
* The Proud Family, the one where Penny plays on the school football team, single-handedly turns the homecoming game from a blowout loss into a game they have a chance to win...and drops the ball on the final play.
* The Proud Family "The Wizard." He is the frequent victim of cartoon-slapstick mishaps. His mother, the "cool" grandmother Sugar Momma, insults him constantly. And to top it all off, many episodes portray him foolishly overprotective of his daughter Penny.
* The Proud Family they have Wizard Kelly products. Most everything is sold under the name of Wizard Kelly or Wiz.
* The Proud Family Trudy, Oscar, and Sugar Mama take the twins to the zoo for the first time and Oscar has a few mishaps happen to him, including getting beaten up by a vengeful elephant he use to pick on when he was a kid, and accidentally making a gorilla sick after offering it some Proud Snacks.
* The Proud Family, two food fights occurred in the episode where BB and CC got baptised. The first was when the two families were dining at the Red Clam (they were dining there because Samo and his brother ended up eating all the food on the table while the families were in prayer), where, after the seafood came down on the

dining family (apparently this happens a lot in that restaurant), the two families (the Prouds, and Trudy's family) ended up having a huge food fight, while the families were bitter towards each other. Penny and Trudy attempted to stop them. The second time was at the end, where Samo and his brother inadvertently caused it when fighting over mashed potatoes. This time, it was a bit more friendly in nature.
* The Proud Family when it turns out that Johnny is a genuinely rude and horrible person who intentionally uses his disability to his advantage to make people do things for him. Eventually, Penny has enough and tells him to take a hike.
* The Proud Family, where Oscar says they shouldn't bother sitting down 'cause they're just gonna stand up again before revealing something exciting.
* The Proud Family where Penny learns about intolerance and gives a speech, but we never learn who did it or how the family reacts.
* The Proud Family with Suga Mama still inside. When they get the house back down offscreen, Suga Mama lambastes Oscar in a high-pitched voice.
* The province of Mousillon in Bretonnia is a dreary swampland where most of the people died in a plague years ago, and the survivors spend their days catching frogs and snails, tending to skinny goats, rebuilding their homes or grave robbing. A lot of the dead don't even need help getting out of the grave. The previous lord of Mousillon was murderously insane and never pulled up the visor of his helmet for some reason. The rest of Bretonnia has pretty much abandoned the place.
* The Proving Trail, the Yant Family has spent three generations trying to kill their distant cousins over a disputed inheritance. Shortly before being murdered, the main character's father writes in a letter, "At last count there were thirteen of them and but three of us." It's unclear who the third member of his side of the family is, but his son kills about half of the Yants in self-defense over the course of the book.
* The Provisional Government, also called the Blues, lead by John L. Lewis. A coalition of liberals and democratic socialists, they control the upper Midwest, upstate New York, western New England, and the West Coast, with their capital in St. Paul, Minnesota.
* The Provisional Government planned to recruit several more such units, including the awesomely named Women's Black Hussars of Death Squadron. None had seen combat when the Bolsheviks took over.
* The Provo Sergeant to the recruit, as he cannot disobey a direct order, but following that order will bring the horrific fury of a Provo Sergeant upon his tender head. This became a semi-official means of justifying the Provo Sergeant imposing a bollocking and a severe physical punishment, generally heavy and/or degrading PT.
* The Pro with The Grammatical Team of Grimness, a villain team consisting of The Noun, The Adjective, The Adverb and The Verb.
* The Prowler (1951) opens with a peeping tom peering through the bathroom window as Susan prepares to take a bath. This event kicks off the entire plot, and Webb later uses the existence of this prowler to murder John and make it look like an accidental shooting.
* The Prowler (1951), Susan is pretty much convinced that Webb murdered her husband John, but is in denial about it. However, when Webb slips and mentions the exact amount of John's life insurance policy, she can can no longer lie to herself and has to acknowledge that Webb's act was premeditated.
* The Prowler (1951), the uncredited voice of radio announcer John Gilvray heard throughout the film is actually that of uncredited screenwriter Dalton Trumbo (Trumbo being blacklisted in Hollywood at the time).
* The Prowler (1951), Webb and Susan are having an affair, but Susan soon ends their relationship, choosing to remain with her husband, John. However, Webb's obsession with her continues to grow, until he begins plotting to kill John and cash in on his life insurance policy.
* The Prowler (1951), Webb and Susan travel to the ghost town of Calico to allow Susan to give birth in secret. It is her that the denouement of the film takes place.

* The Prowler (1951), Webb was a star high school basketball player who got a college scholarship but lost it after a violent argument with his coach. He has been stewing in a sea of bitter resentment ever since.
* the Prowler is a repeated, discordant screech/roar, underscoring the impression of a high-tech predator implacably chasing its prey.
* The Pro Wrestling Hall of Fame: The Tag Teams were the last team from the territorial system to make it to the national level.
* The Proxy and sponsored by Alienware that ran from the 8th to the 17th of March in 2012.
* The "proxy" variant also makes it useful for criminal shows, as it is not only a disease but a crime.
* The PRT deliberately avoids telling Wards about certain aspects of the job, like access key classes, access to the garage, and certain secret passages in the building, in order to encourage them to ask the right questions instead of waiting for information to be given to them. Besides, it's all there in the PRT informational app; they just need to
* The Prussian army executed a good one after the battle of Ligny, which enabled them to decisively join the battle of Waterloo two days later. As an added bonus, they managed to do it in a way where the French lost contact with them so they had no idea where Blücher's men had gone.
* The PS2 (and PSP)'s line-art, and the PS3, PS4 and PS5's much rounder line-art,
* The PS3 rerelease has two different Mystic Arte cut-ins for Kratos, depending on what costume he's wearing when he performs it.
* The PS3's infamous North American launch ads were not much better, which featured such sights as an exploding Rubik's Cube and a sentient baby doll.
* The Psalms of Isaak Gods, though these were so ancient that little knowledge remains of them other than the name.
* The Psalms of Isaak, the most powerful and destructive spell ever created, is said to be a product of Blood Magick.
* The pseudo-medieval band The Lost Boys disguise one of their covers as "
* The pseudonyms Carolyn Keene and Franklin W. Dixon will always be associated with the
* The pseudoscience of racialism is founded on the idea that the various ethnicities of the world are genetically distinct human subspecies (which isn't actually true; modern humans are a pretty genetically uniform creature, physical differences are limited to such things as relative bone density). While racism, the belief that one or more of these groups are "superior" or "inferior" to one or more others in some vague, undefined way is a separate idea, the two groups do overlap much more frequently than either would have you believe.
* The Psijic Order is one on their home island of Artaeum. They are governed by a magical council led by the Ritemaster (or Loremaster in some sources). The oldest monastic group in Tamriel, the Psijic Order is a secretive
* The Psi Lords of Takis have an unusual variation of this going on in the
* The Psionic Minmax intends to do this to every version of his party that has entered the maze, creating holes that Ret Gone anything that falls into them. It quickly turns out that while people will have no memory of the object thus removed, they can notice something's going on. As "our" Minmax starts throwing his clothes into the hole, Kin considers the unlikelihood of someone going on an adventure without shoes or pants, and realizes what it must be doing. Kin realized that, while she could not remember Minmax ever having pants, she had no idea what he looked like without them, so he must have had them.
* The psionic powers, present from the first edition but more formalized in the second with
* The psionic powers "Recall Agony" and "Recall Death" cause the target to see into the future – specifically, to witness a possible future in which the target dies horribly. This can cause the target to die horribly.
* The psionic prestige class Elocater gains the "Accelerated Action" ability at tenth level, which gives them five extra rounds each day that they can make use of whenever they want. It is perfectly possible to use them all at the same time,

getting six rounds of actions in one shot.
* The Psionic Resonator from the two part TNG Gambit episode was an ancient Vulcan weapon that could use telepathic energy from Vulcans to kill others who had aggressive thoughts. It could be defeated by not having aggressive thoughts, which is why its use was discontinued. Vulcans learned to suppress their emotions.
* The psionics in AD&D used a spell-point system even when the actual spellcasters use
* The psionic version: the Pyrokineticist. Always chaotic, rarely good, invariably fire-heavy. They are so fire-happy that a prestige class prerequisite is "must have set fire to a structure of any size simply to watch it burn".
* The Psion's Blade. A large +5 sword in Yaga Shura's lair. While there are a number of +5 weapons by this point, this weapon requires no investment like the other swords. It also gives Mind Blank, preventing the wielder from confusion, charm, or anything like that, which is by far the most annoying status effect in the game.
* The PSP games used limited, motion comic-style animation in the cutscenes as a stylistic choice.
* The PSP version has a class dedicated to this, the Terror Knight. They're an interesting mix between The Cowl and The Dreaded. They wear thick, heavy black-colored armor with oddly protruding spikes to inflict fear, and use a mix of dark magic spells to cripple their opponents and lower their resolve to fight. They do have the power to back it all up as well, but you can very much play the class without them hurting a fly.
* The Psychedelic Furs' only top 40 hit was "Heartbreak Beat" (#25) but "Pretty in Pink" (#41), "Love My Way" (#44) and "The Ghost in You" (#59) are probably all more well known.
* The psychedelic properties of LSD were first discovered through something similar to this.
* the psychic imprint of the Clockwork's dead creator, merged with the Clockwork network somehow.
* The "psychic link between comic author and parallel world" paradigm was also used in the
* The psychic paper was explicitly devised by Russell T. Davies to facilitate this; it can show whatever the person holding it wants the person reading it to see, meaning that the Doctor can explain what he's doing in the room where he shouldn't be or why he might have been found over a corpse quickly and bluntly without having to hold the plot up however many episodes until it all got sorted out.
* The psychic warrior power Dimensional Slide from the Expanded Psionics Handbook is basically a Flash Step, though it is limited by your range of vision within its own range (Which, sadly, is at most a few hundred feet, requiring being a 40th level psionic character.) If you blow the power points, it manifests as a move action. Combined with a few feats, it could be done as an
* The Psychlos don't fight in the conventional sense. They teleported nerve gas drones all over the world. Presumably, human forces didn't even have a chance to fight.
* The Psychohistorians entries show how these adventures are seen one thousand years in the future.
* The psychological and emotional ramifications are explored in third game. Essentially, they're both scared children running from something far more powerful than them and either becoming obsessed with that (or similar) power or lashing out mindlessly in fear.
* The psychological horror book "Frozen Charlotte" by Alex Bell features a collection of creepy dolls.
* The psychologist Richard Wiseman has studied luck and discovered it's mostly down to interpretation. If someone who thinks they're
* The Psychology of Computer Programming tells of bosses who find indecipherable complexity a sign of genius and simple and elegant solutions just dumb luck.
* The Psychopath: or other sadistic criminal, or (more likely) an angry average Joe

who'd eventually lash out violently once all that bitter hatred boiled over.
* the Psychosis Crawler. The abundant space in the vat and the card's flavor text imply that more than one brain might find its way into that jar.
* The Psycho Soldiers team is formed by Athena and Kensou (both around 18 years old) and their master Chin (an old man). Later on they are joined by Bao, who is 12.
* The PT Cannon wasn't originally designed as a weapon. They salvaged a second PT engine (FTL drive) and attached it to the ship, basically to make it more powerful and faster. In desperation during a fairly hopeless fight, they decided to have the two engines focus opposing PT fields (warp fields basically) on the same area of space, literally folding space around anything in the area and crushing it out of existence, similar to what a black hole does.
* The PTL scandal could have its beginning linked to a 1980 scandal involving a sexual encounter between PTL founder Jim Bakker (who was temporarily separated from then-wife Tammy Faye) and a young church secretary named Jessica Hahn (depending on whether you believe either Hahn's account; accusing Bakker of essentially date-raping her, or Bakker's version, stating the sex was consensual and possibly an attempt at revenge due to Tammy Faye's infatuation with music producer Gary S. Paxton). What got the Charlotte Observer's attention was initial concerns of financial misdeeds such as the $1,000 lifetime partnerships for their Heritage USA theme park, along with later revelations that $265,000 was given to Hahn as "hush money" to keep the incident quiet.
* The Ptolemys of Egypt were great proponents of this. A rather famous one, Cleopatra, was a big fan. Her father and grandfather had also done it. Though Cleopatra had more reason than most: her brothers kept trying to take away her power. Ironically though, Ptolemy I is a notable aversion. Although he was Alexander the Great's elder half-brother (or at least claimed to be, which is how he became Pharaoh) he is not a suspect in Alexander's early death.
* The Publeoans traditionally live in villages, each of them being a multi-storied mud building surrounding a plaza.
* The Public Control Department (PCD) in the 1970s BBC dystopian drama
* The Public Enemy depicts Tom Powers and Matt Doyle rising up the ranks of a bootlegging operation in Chicago in the 1920s before a gang war erupts and Matt ends up dead with Tom hospitalized.
* The Public Enemy. Grunge wasn't even particularly good in the ring. Rock was decent, but no better than decent.
* The Public Enemy - Johnny Grunge (Michael Durham), "Flyboy" Rocco Rock (Ted Petty)
* The Public Enemy There are two guys named Patrick, but most of the time they're called Paddy Ryan and Pat Burke, so there's no reason to get confused.
* The Public Enemy was hired to play Matt Doyle, his friend. However, once director William A. Wellman got to know both of them and saw Cagney in rehearsals, he realized that Cagney would be far more effective in the star role than Woods, so he switched them.
* The Public Eye plays Bernzy, a 1940's tabloid photographer. At one point someone mentions that guys like him always carry a pin in case they find an abandoned baby. They stick the baby with the pin before taking the picture because the newspapers pay extra for pictures of crying babies.
* The Public Eye...whereupon a stray bullet kills the hitman before he can fire.
* The "Public Interest defence" built into the UK's Official Secrets Act, which at least theoretically guarantees immunity from prosecution for anyone leaking classified information to the press
* the public is really interested in them and wants to hear them talk;
* The public of The Burgundy Theater invokes this trope about Montfleury's
* the public outcry against this interview was so ferocious that many actually came to Rocker's defense, surmising that he was just a blunt man with poor social skills, and not a monster.
* The Public Security Division and the Kerberos Unit have an intense one going on in

* The published script to their stage show includes a tongue-in-cheek footnote remarking that they are only too aware that rap as a signifier of youth and coolness was hopelessly cliched even back when the "Othello Rap" was originally added in 1987, but they keep it in because it's consistently one of the most popular parts of the show with audiences.
* The published version of the script includes several footnotes along the lines of "At this point Adam very often rambles for a minute or more about current events, weaving a conspiratorial tale of nuclear fallout, corrupt politicians, debauched evangelists and/or whatever bug he has up his butt at the time", or noting a punchline as the default joke if the performers can't pull anything better from recent headlines.
* The Puchuus in the anime are cute mascot characters whose faces become Gonk (resembling scarred, haggard manga assassin
* The Puddle Jumpers could also act in this manner, although that is not their primary purpose.
* "The Puerto Rican Day" reveals that Jerry has a traffic nemesis, "Maroon Golf," who refers to Jerry as "Black Saab" when they hurl taunts at each other.
* The Puerto Rican versions of the World Wrestling Council and (later) International Wrestling Association are bizarre examples, as they collectively had one of the most badass women's divisions in the world. One of WWC's top baby
* The Puffer kittens (SCP-2558-J) are this, because of their cuteness and effect it has on the staff the actually have Euclid classification.
* The "Puff" ground to air missile deployed Kevlar streamers which snagged and fouled the propellers of prop-driven aircraft. Probably inspired by the
* The Pulaski axe Knock-Knock is arguably the most powerful non-DLC melee weapon in
* The pulley system Senku makes to lift the tree off Kohaku in their first meeting becomes the basis of the first wheeled cart.
* The pull Luke has with Misty Knight from their work on Cottonmouth and Diamondback is how he's able to convince her to stash Claire Temple, Colleen Wing, Malcolm Ducasse, Trish Walker, Foggy Nelson, and Karen Page in her precinct when the Hand begin targeting them.
* "The Pull". The story stops before we learn the fate of the characters because, ultimately, their survival should not be reassuring when countless others like them are still in peril.
* The Pulse, but not to an extreme degree. Jessica's enhanced genetics mean that she ends up delivering a healthy, full-term baby at only six months.
* The Pulse Hammer, an Aramid Ballistics product. This is a two-handed hammer. The default Pulse Hammer deals Plasma damage (meaning it'll burn enemies to ash though it does less damage against Mantisaurs) though it can be upgraded with mods to do different damage types.
* The Pulse. He's only in a few issues, but it was his final unmasking.
* The Pulse. Kidder showed the dangers of being an intrepid reporter; her obsession with superhero stories got her killed.
* The pulse machine guns equipped on the Striders and Gunships don't disintegrate their targets but their impact does release a small amount of the particles that come off disintegrating targets, implying that they still work by disintegration, but on a much smaller level.
* The Pulse, Norman Osborn's lawyer tries to pin the near-death of a group of NYPD officers and civilians on Spider-Man.
* the pulse rifles fire ammunition that would rupture the cooling system for the nuclear reactor in which the Aliens are hiding makes it clear the gun has been in Hicks' family for centuries, but it's not entirely clear whether pump-action shotguns are still made in the 22nd century; indeed, the novel has one of his squadmates straight-up ask him whether he found the gun in a museum.
* The Pulse so she can have a baby (thanks to the person in charge of a hospital freaking out and thinking Jessica was going to give birth to a mutant). When he mentions that he helped give birth to the Scarlet Witch's children, Spider-Man replies that it has to go better than that did. Strange and the Avengers side-eye

Spidey before he realizes he just put his foot in his mouth, stating that it was so much clever in his head before he actually said it.
* The Pulse staffer and dropped her body in the water from hundreds of feet in the air, their mental images range from the highly unlikely (Iron Man, Hulk) to the probably not (Vulture) to the downright ludicrous (Stilt-Man).
* The Pulse Tract and R'lyeh Text count even more so. The Pulse Tract incarnates a god form the soul of the earth, one which very nearly destroyed all of Shanghai and subjected the our hero to
* The Pulverizer/Mutagen-Man story arc. It doesn't help that the show seems to forget about him from time to time. Even when Donatello finally develops a cure, he doesn't once mention using it on Timothy.
* The pumphandle slam seems to be the designated finisher for midcard monster heels (
* The Pumpkin Karver: Director Robert Mann voices a radio DJ in the opening.
* The Pumpkin Karver is murdering everybody while Alec's vengeful ghost torments Jonathan.
* The Pumpkin Plants in Something. Even though they are just as dangerous as a Pirahna Plant, they look quite silly.
* The Punch And Judy Man features a climactic pie fight, but it escalates too quickly to generate the right comic effect.
* The Punch And Judy Man, set in a seedy English seaside resort, has a scene where Hancock's title character is shaving just before performing at an important reception at the town hall. His faulty electric shaver shorts out some of the town's illuminations, causing them to spell out insults.
* The punchline of "It Hits the Fan" (in which the word "shit" is repeatedly said uncensored):
* The punchline "Rectum? Damn near killed him" is almost never given a setup and doesn't really need one.
* The punchline shall suffice: "Good luck, Mr. Gorsky!" (/s/flying pigs/man on the moon/)
* The punchline "... that's no kindergartner, that's my wife!" was a running gag on
* The pun doesn't fit the tone of the work, and making the joke explicit would cause
* The pungently orange-scented solvent popular under various trade names as a household cleaner is the D-enantiomer of the hydrocarbon limonene. The R-enantiomer is also a solvent that can be used as a cleaner, but smells of pine. Upon learning this, some people suddenly realize the true but often-overlooked fact that pine and citrus are very similar scents. Well, often overlooked by everyone except chefs and bartenders—why do you think (piney) rosemary goes so well with lemon on chicken and fish, or why citrus is so often paired with gin (whether it be lime juice in a gimlet, a lime wedge in a G&T, or a lemon twist in a martini)?
* The Punisher (1989) had the title character pulling up on his motorcycle outside a CES sign, which any Australian of the time would recognize as the Commonwealth Employment Service (the govt organization that handed out dole payments). Ironically the service was privatized some time ago, so anyone watching it on DVD now would likely not recognize it.
* The Punisher (1989) kills some criminals with knives with skulls on them to let others know that he's responsible.
* The Punisher (1989): Lady Tanaka abducts the children of New York's mob bosses to make them sell their territory to the Yakuza.
* The Punisher (1989). Mafia boss Franco and the Punisher are going up into a skyscraper to confront the Yakuza. Franco stops the elevator with the lift key for a moment to ask why he's driven to kill so many people. "Revenge has its limits." The Punisher just replies, "Maybe I haven't reached it yet."
* The Punisher (1989), only to murder everyone who surrenders to save their kids' lives.
* The Punisher (1989) spent two years on the shelf before going to video.
* The Punisher (2004), after the title character kills an entire mob family, he

purposefully sets off a chain of bombs around a parking lot that creates his skull emblem.
* The Punisher (2004) came back after having his head reattached and his skeleton augmented with powerful metal alloys (he also received a pair of breasts due to hormone injections, which he took in stride by actually dressing up like a woman on occasions).
* The Punisher (2004) film is almost bloodless, the only exceptions being himself (though he obviously survives), his father and several goons. In the director's commentary, Jonathan Hensleigh explains that watching over two dozen innocent men, women and children being brutally gunned down would have been even harder to watch had blood packs and squibs also been used.
* The Punisher (2004), Frank Castle and his darling wife Maria share a lovely scene on the beach at night. Come on, tell me you know what happens next.
* The Punisher (2004), Frank Castle was an FBI agent, and years before that, a Delta operator in the Gulf war.
* The Punisher (2004) he confiscates from some punk who was harassing his neighbor. Every weapon is shown beforehand either in a montage or as part of a scene.
* The Punisher (2004). He doesn't believe her when she brings this up, thinking she's tarnishing his friend's memory, and kills them both, only to be horrified when he discovers the truth from Frank later.
* The Punisher (2004) Howard Saint has the body of his associate Quentin wrapped in a carpet when he confronts his wife Livia over her supposed infidelity.
* The Punisher (2004), the Punisher is visited by an assassin while drinking coffee in a small diner who seems to be a Johnny Cash impressionist. Harry Heck opens the large guitar case he brought with him, but it actually contains a normal guitar rather than a weapon. He sings a song with lyrics that just barely veil why he has come here. Afterwards, he and Frank talk, and both go their ways (until a later scene, when they actually fight to the death).
* The Punisher (2004) was originally going to feature David Lieberman, alias Microchip, the Intel man. He was written out as director Jonathan Hensleigh had an intense dislike of the character.
* The Punisher (2017) are handed over in exchange for Frank Castle and David "Micro" Lieberman surrendering themselves. To deter them from trying anything, Sarah and Zach are made to wear a jerry can of fuel each, which is then punctured, leaving a trail of fuel as they walk. Frank warns Micro not to freak out as the villains are just doing this to intimidate them—sure enough when the fuel trail gets lit, all Micro has to do is tear off his jacket and extinguish the flame.
* The Punisher (2017), as well as all of the mercenaries except Russo.
* The Punisher (2017): Billy Russo, after leaving the Marines, started a military contractor firm called Anvil, and he recruits former soldiers to serve as his operatives and do wetwork for Rawlins.
* The Punisher (2017): Billy Russo sports a retractable blade on his right arm, which we see him use to kill Colonel Bennett and Sam Stein.
* The Punisher (2017) but since Frank's character is driven by the memories of his dead wife and children, a kiss would be awkward to say the least.
* The Punisher (2017), during Billy Russo and Krista Dumont's intimate scene, she bites his shoulder and encourages Billy to squeeze her scars to inflict pain on her in return.
* The Punisher (2017): Frank Castle and Billy Russo served in a Marine Corps black ops unit in Afghanistan that was secretly smuggling heroin back to the United States inside the corpses of KIAs. The second episode of season 1 sees Dinah Madani having a conversation with her partner while walking around the reflecting pools at the 9/11 Memorial, even namedropping the attacks and peoples' resilience to bounce back after such major losses.
* The Punisher (2017): Frank Castle married Maria because he knocked her up and she didn’t want to get an abortion.
* The Punisher (2017): Frank Castle regularly takes meals at these sorts of diners throughout the city. David first makes contact with him by calling one such diner

while he's taking breakfast the morning after killing some Gnucci lackeys who were trying to hurt Donny.
* The Punisher (2017) has the least presence of law enforcement of any kind. The only time we see the NYPD appear is when Ward gets arrested after Harold frames him for drug possession.
* The Punisher (2017). Her husband Houshang Touzie appears in the season 1 finale as Dinah's father to provide Frank with medical treatment.
* The Punisher (2017). In "The Dark Hearts of Men", Frank Castle storms Billy Russo's hideout only to find himself in a dark room where he's then disoriented by strobe lights, then ambushed and captured.
* The Punisher (2017): In the first episode of season 1, Lance, one of Frank Castle's colleagues on the construction site is in debt to a Gnucci loanshark who is threatening to break his legs and take his car. He recruits some buddies of his and Donny Chavez (a newcomer that has taken a liking to Frank) to rob a mob poker game with about $70,000 in cash on hand. They figure it'll be easy money as the only armed resistance they'll face is a single guard at the door (the guys running the game figuring that their reputation will deter would-be thieves). The robbery goes bad as the inexperienced Donny drops his wallet (which he brought along for if they got stopped by the police), causing the mobsters to see his driver's license. This prompts Lance and the others to take Donny back to the construction site with the intention of killing him in the cement mixer so he can't be tortured into giving them up, but Frank happens to be there and kills them all before rescuing Donny. He then goes to the site of the poker game, and kills the Gnucci boss and his associates as they're preparing to go after Donny. Frank is caught by Micro on a surveillance camera while leaving the crime scene afterwards.
* The Punisher (2017): In the season 1 finale, Billy Russo visits Curtis and tries to make him betray Frank. He accepts Curtis's offer of coffee, following Curtis around as he opens up the blinds in his living room/kitchen. Just as he's about to reach for the coffee mug Curtis is holding out to him, Russo puts together he's being moved to be taken out by Frank with a sniper rifle, and dives for cover just as Frank fires his first round through the window. In a matter of seconds, Russo also gets out his own gun and begins shooting at Curtis.
* The Punisher (2017): In the seventh episode of Season 1, Dinah Madani realizes her office has been bugged as that's the only explanation for how Gunner Henderson got tracked down and killed so quickly by Rawlins's commandos (as he overheard her talking about him with Sam Stein). After an hours long search, she and Sam find the bug, and decide that the best course of action is to stage a conversation that leads Rawlins and Billy Russo to think Madani is setting up a sting to bust Frank Castle as he meets with a gun buyer at an abandoned warehouse. Actually, it's a sting to capture them, but it goes badly as Russo recruits some private military contractors to come with him to the meet. It ends in a fatal shootout with Russo's men all being killed, and Russo killing five DHS SWAT officers (including Sam).
* The Punisher (2017) journalist who denounced Lewis on the radio. The attempt is thwarted by Frank Castle, who rescues Karen from Lewis before escaping from police. In the process of stopping Lewis, he and Dinah Madani also learn that Frank's best friend Billy Russo, who is heading Senator Ori's security detail, had betrayed Frank's family and killed Madani's partner Sam Stein.
* The Punisher (2017) opens with Frank Castle trying to live a normal life after hunting down the people responsible for the murders of his wife and children. When a construction worker he befriends is in danger after a heist gone wrong, however, he goes back to doing what he does best; playing judge, jury, and executioner.
* The Punisher (2017)" owing to the number of women Russo has bedded with his good looks.
* The Punisher (2017) sanctioned by William Rawlins to take out Frank, who he thought had leaked a tape of the torture of Ahmed Zubair.
* The Punisher (2017) that the whole shootout was a smokescreen set up by federal operatives seeking to kill Frank for threatening to blow the whistle on war crimes he witnessed in his tour in Afghanistan.
* The Punisher (2017): The final episode of season 2 shows Frank fully embracing

his Punisher persona, unleashing wanton street justice on some gang members.
* The Punisher (2017) they've had sex, but that's because her son asked if they were planning on getting married.
* The Punisher (2017): To lure Frank Castle out of hiding, some of Billy Russo's men disguise themselves as police officers to abduct David's family. They succeed in grabbing Sarah and Zach, but Leo manages to avoid detection.
* The Punisher (2017): Used three separate times. The first is by David Lieberman, who rigs his base with cameras that will send their feed directly to multiple news outlets if he doesn't input a code and complete a retinal scan every three hours - He does this so that if he is murdered, either by Frank or the various government agencies that are after him, the details of his death will be made public. The second is by Lewis Wilson, who uses a more traditional setup with an explosive vest when he attempts to assassinate Senator Stan Ori and takes Karen Page hostage. The third is by Lieberman again, using a modified version of his first setup, to blackmail the villains by making their actions public if they do not comply with his and Frank's demands. However, this one turns out to be a trick, as he had already given Homeland Security all of the information by the time Rawlins and Russo found out about the switch. He keeps the charade up to give him and Frank some leverage over the bad guys, who had taken his family hostage.
* The Punisher (2017) was very aware throughout filming that Frank Castle should not come off as a completely admirable hero, and in a few scenes convinced the writers to more clearly play up his darker nature.
* The Punisher (2017): When Billy Russo's men track Frank Castle to David's compound, Frank surprises them by decapitating one of Russo's men, then strapping a grenade to the head before throwing it as an explosive.
* The Punisher (2017): When Frank realizes that the man who just set off bombs across New York City is Lewis Wilson, a member of Curtis's support group, he tells David that the bomber is "Lewis and he drives a cab", asking him if he can find him in a database. David points out that this is not a lot to go on. Frank then gives additional details, such as his age range, ethnicity, and his status as an Army veteran, which David admits narrows it down.
* The Punisher (2017), when Micro gets jealous over his wife and Frank, Frank tells him about him and his own late wife, and how he never wanted to be with anyone else, finishing, "I don't want your wife," which heavily implies that even with Maria dead, he won't want any other woman either.
* The Punisher (2017), which makes one speculate who would've played Sam Stein if that had happened.
* The Punisher (2017): William Rawlins has managed to escape prosecution for the war crimes he committed in Afghanistan thanks to his rise to being the Director of Covert Operations for the CIA. In turn, Billy Russo has managed to also escape persecution for his role in these war crimes thanks to his pretty face and good charisma when it comes to schmoozing politicians.
* The Punisher 2099 had a whole collection of women turned to statues with his molecular engineering powers. Each of them is a different material, you know, so it doesn't get boring. Gold, diamond, that sort of thing. He calls it the "Endymion Room", after a poem by John Keats about eternal youth and beauty (more or less).
* The Punisher 2099. Punisher called up his tech guy, and after some research he came upon a hypothesis that a particle accelerator might actually be capable of destroying souls. So the Punisher threw the guy inside one and switched it on. Seems to have worked.
* The Punisher 2099, "SlimSynth Burgers. Food so good, you'll think it's real!"
* The Punisher acknowledges that killing is what he is good at. In Jason Aaron's MAX run, part of the reason he could not adjust to life after he left the military was that he had honed his skills as a killer; he knew no other way of life.
* The Punisher: After defeating Billy Russo and killing the other members of Operation Cerberus, Frank Castle is officially let off the hook by CIA Deputy Director Marion James and his records are expunged, with Frank now free to live his life under the new name "Pete Castiglione".
* The Punisher, all works show it was losing his family that made him nuts.

Whatever the case he is a combination of the Jingo and the Broken Soldier, to the point where he regrets not having someone to kill, or even having a wife and kids in the first place (though this can be interpreted as if he didn't they wouldn't have been in the park, they wouldn't have been killed and that he wouldn't have turned into the sociopath he is today.)
* The Punisher: Almost any recurring villain has this in one form or another, and sometimes the feeling is mutual.
* The Punisher, always getting sent to the same prison, and takes out the criminal (and the criminal's bodyguards, tough guys who want to show off, rival prison gangs, prisoners he runs into on the way, and his cellmate) before breaking out of the prison.
* The Punisher: Among Barracuda's many, many horrible deeds, there was the time Ebbing paid him to ensure his peace and quiet. Two convicts who'd been bothering Ebbing were later found with their eyes plucked out, their testicles in each other's eye sockets, and their eyelids sewn up. Their eyeballs were never found, and they were still alive after that.
* The Punisher and electric chairs are just a sampling of what to expect.
* The Punisher: A new (non-Hitler) Hate Monger appears as the leader of a racist organization. The Punisher infiltrates the group, but discovers that his final initiation is to beat a Hispanic reporter investigating the group to death. Unfortunately, by then he's succumbed to the Hate Monger's Hate Plague and he goes through with it. Doubly unfortunately she was the girlfriend of the Punisher's current tech guy. Needless to say, there was a falling out and a rare bout of guilt for Frank Castle.
* The Punisher: A non-celebrity version with Chuck Self, a smarmy journalist using Soap (Frank's informant on the police force) as a hostage in order to follow him on a night of killing criminals, hiring two thugs to kill Soap if they don't get a text from him every hour. He very quickly finds out he's in too deep, and after getting shot in the hand, the ass, and losing his tongue, he ends up in a woodchipper feet-first when it turns on (none of which were even Frank's doing).
* The Punisher appears where he looks at the mess you made and, visibly shocked, says "I need a drink."
* The Punisher approach to the Negative Zone and beyond. Garth Ennis writes the character as 100% aware of this, often repeatedly stating that his only reason to continue living is to punish those worse than himself.
* The Punisher" arc), the latter is a complete reboot set in its own, new "grittier" reality with no superhero characters (although some characters from other Marvel comics, like Microchip, are roped in - albeit with a more "realistic" spin).
* The Punisher arc where Frank chased a lead by infiltrating a "ninja training camp" in (an admittedly well-hidden location in) Kansas. He gets sidetracked by an 'authentic' ninja forcing him to help her take down the camp for fraudulent claims of being affiliated with her father.
* The Punisher, as his Frank Castle identity is public knowledge. And yet, he can still regularly just walk down the street so long as he's not openly brandishing weapons or wearing his trademark skull.
* The Punisher, a shotgun blast blew one of his ribs clean out (!) and he kept on fighting.
* The Punisher. At the end of the issue, after their adventure, Punisher has an internal monologue where he muses about just how violent, unstable, and overall crazy Elektra is. He then asks her out on a date (although this happens in the final frame, so we never know if she said yes or not).
* The Punisher: At the end of the Kriegkopf arc, Castle shows up unannounced at an unnamed Washington politician's office. Frank tells the guy to knock it off ("it" being the nuking of Europe) and leaves a bullet on the desk.
* The Punisher back to his senses with six words: "Do you want to be me?"
* The Punisher: Basically the entire game up until the final level is this. All the levels are a series of flashbacks told by Frank to Detective Martin Soap and Lieutenant Molly Von Richtofen in an interrogation room in Ryker's Island Prison.

* The Punisher became their don. Because he uses an axe alongside with his mutant powers, he has gained the nickname "Hatchetman", which he resents.
* The Punisher because he's that far gone into his campaign of revenge.
* The Punisher bit of hatred for — especially human traffickers who sell sex slaves.
* The Punisher: Born that he keeps as "souvenirs". And that's not even getting into the part where they tried to gang-rape a female enemy (though Frank stops this before it can really get ugly and later kills the guy who came up with the idea).
* The Punisher: Born. The story takes place in a base filled with Marines who are amoral washouts, depicted as either apathetic or cruel, run by incompetent commanding officers. As a Marine, Frank Castle was shown to be addicted to combat, willing to indirectly kill a General in order to keep his firebase (and therefore his war) going. Overall this depiction certainly doesn't sit well with the brave, heroic image the USMC typically has.
* The Punisher: Born with these. The vast majority of the Marines are depicted as either clear-cut psychopaths, amoral conscripts, or jingoistic sociopaths — half of whom are implied to be addicted to heroin — with a commanding officer who is alcoholic, broken and knows full well that the war is a lost cause. With the young narrator of the story Stevie Goodwin explicitly stated to be an unwilling conscript who wanted nothing to do with the war and whose only desire is to return home safely, but at the same time realizes that sticking with Frank Castle and his platoon is his best bet at getting home in one piece, as Castle is the only competent higher-ranking Marine in the whole outpost.
* The Punisher can do, is to toss his shotgun, assault rifle, or machine gun at an enemy who will reflexively catch it, distracting him. The Punisher will then either stab the guy in the face, or shoot him in the head with a handgun.
* The Punisher (Capcom), the Continue screen shows your character receiving CPR. The only true salvation in this scenario is the quarter in your pocket.
* The Punisher (Capcom), you will get a game over after losing enough "lives". During the countdown (the time left to insert another quarter), you will actually see a medic performing CPR on your character. Insert a coin before the time runs out and you are back to full health. Amazing how pushing on someone's chest for ten seconds can magically make the hundred bullets lodged in their flesh disappear...
* The Punisher christened himself with this moniker after Frank Castle threw him through a glass panel and reduced his face to a jigsaw puzzle-like mess of scars.
* The Punisher comic, one of Frank's enemies digs up Frank's family and urinates on the remains. When Frank finds out he goes on a rampage.
* The Punisher commonly uses this to extract information he needs, though he recognizes that it doesn't always take. He also tries not to drag it out, since he prefers his revenge cold.
* The Punisher could be said to have jumped, at least from an in-universe perspective.
* The Punisher dashes Detective Soaps hopes when she reveals she's a lesbian. It also turns out that the whole reason she's such a pariah at the NYPD is because she turned down the commissioner's advances while unaware that she was within range of a microphone.
* The Punisher) defeated when Frank manages to trip his morbidly obese neighbor onto him and weighing him down for twenty minutes. His second, final death is better, dropped out of a plane while chained to a nuclear bomb, laughing all the while.
* The Punisher does this in pretty much any media he appears in. Though just a human, still in great shape.
* The Punisher event, he lets them know that the building they are in is fitted with explosives, and in his left hand is a dead man's switch which will make them go if he is killed. He then proceeds to start shooting, and there's nothing that the criminals can do to stop him.
* The Punisher event, several criminal enterprises set out independently to get him, turning the town into a war zone.
* The Punisher Eventually, they escape, setting fire to the place in the process,

with the cult's leader remaining to die in the flames.
* The Punisher exemplifies this trope. He fights vampires and ninjas with the same stoic frown he has when fighting petty thugs.
* The Punisher featured a convention of every newsworthy terrorist organization of the time. Their brilliant plan was to switch targets, so some survivalist militia would bomb the Vatican on behalf of Hezbollah. Apparently all those Catholic IRA members were cool with this.
* The Punisher film versions slap the skull front and center on his chest, however.
* The Punisher, for example, doesn't count: he's more of an anti-hero than a hero.
* The Punisher: Frank Castle does this often spray-painting his trademark skull on the chest of the unfortunate mook.
* The Punisher. Frank Castle dressing as Santa to gun down mafiosi? Two years in a row? Awesome!
* The Punisher: Frank Castle has adopted a nocturnal lifestyle, as most of the drug dealers, rapists, parole violators, pimps, and mob goodfellas he targets tend to operate at night and are easier to hit then. He spends the day sleeping, eating, patching himself up, hitting the gym, and honing his fighting and marksmanship skills.
* The Punisher: Frank Castle has been known to use a fake ID to enter crime scenes and get firsthand information before the detectives arrive.
* The Punisher, Frank Castle may even be punishing himself for failing to protect his family.
* The Punisher: Frank Castle returned from the Vietnam War, only looking forward to enjoy the rest of his life raising his family... until said family was murdered during a mob shootout, driving Frank to start murdering criminals.
* The Punisher: Frank does not like it when other people go around killing criminals. Usually justified as those other vigilantes not putting in the extra effort it takes to ensure there are no civilian casualties.
* The Punisher. Frank is giving his all, and The Russian is just laughing it off
* The Punisher Frank is investigating a pair of cops, and meets with his police contact Soap. Soap tells him in no uncertain terms that while he'll help him take down criminals, if he does anything to harm either cop he will do everything he can to bring Frank down. Soap tries to dramatically leave, but Frank calmly reminds him that they're meeting in his car.
* The Punisher, Frank is seemingly executed in an electric chair, only to have his death faked by a mafia family who have their own plans for him. Frank's arch nemesis Jigsaw dresses up like him and goes around killing anyone who had anything to do with the sentence. When he finds out that Frank's alive, he's initially overjoyed. Then he realizes that he killed all those people for no reason, and rages at Frank for making a fool out of him.
* The Punisher: Frank once runs into villains who took to modifying taxis with booby-traps that would horribly kill the driver. When he realizes this, he switches cars with the bad guys pursuing him, who forget whose car the remote activated...
* The Punisher, Frank uses his reputation as much as guns to aid in his never-ending quest to kill criminals. It's not that he spares them so they can be afraid, more that keeping targets paranoid and terrified tends to make them turn on each other.
* The Punisher, freely takes weapons, money, and vehicles from the criminals he kills.
* The Punisher game from 2005 begins with a monologue about how even though the politicians have tried to clean up the city, all they succeeded in doing was pushing crime to other neighborhoods.
* The Punisher George Prufrock was exposed to an artificial virus which quickly mutated him into a man-eating monster. After several battles, Prufrock learns of a scientist named Lamar Kwiat also suffering from the virus and tells Kwiat what is in store for him if he lives. In a combination of acceptance and driven to suicide, Kwiat agrees it would be for the best if Prufrock ate him. Prufrock does so. . . along with everyone else in the hospital.
* The Punisher has both the hero and the bad guys able and willing to use

Bulletproof Human Shields.
* The Punisher has Frank allow himself be captured by a gang to lure out a reclusive gang boss so he can take him out.
* The Punisher has him narrate how devastating a single flashbang grenade is to the senses. The next panel shows him dropping three at once through a skylight on some mobsters.
* The Punisher has his share of brutal kills, but the one that takes the cake is actually his own
* The Punisher has one, though his face is completely mangled from the time one of his bombs exploded in his face.
* The Punisher has Saracen, a mercenary terrorist from the Middle East as one of his recurring enemies in the Marvel Universe. He was purely money-motivated, however, and at one point rather cheerily brushes off a client's comment about how "un-Arab" he comes off as after Saracen mentions that he has only one wife to whom he is completely faithful.
* The Punisher has the Punisher reveal that he had a tracking chip implanted into his neck, so that his sidekick Microchip would always be able to find his location.
* The Punisher, he breaks this rule (on a corrupt cop), but by then it's past the end, as his age finally catches up with him and regular gangs actually start getting the better of him.
* The Punisher. He still continued fighting criminals, but now at his "family's" interest.
* The Punisher hired them to steal a hyperdrive device. This ended up as one of the most humiliating moments in Castle's life, as Molly "Princess Powerful" Hayes defeated him with a single punch.
* The Punisher his captains, underlings, and anyone remotely important in a single room... then Frank shows up, M60 in hand.
* The Punisher. His psychosis got worse after he was brought in for the Great Crusade, and by the time of the Heresy he had so much blood on his hands he felt he had no choice but to turn.
* The Punisher hoping to go out guns blazing, or he has already adopted the mentality that every scumbag he kills saves many other people in the long term, so there is no way in hell he is going to stop or going to let anybody stop him as long as he is still breathing.
* The Punisher, if the Punisher lands a headshot, Fury says, "Way to make it messy, Castle."
* The Punisher: In an early story, a mob boss routinely mistreats his underlings, including killing them. When he and another mook open a door to find an explosive with only a few seconds left, the mook tells the boss he's been with the boss' wife for the past two years.
* The Punisher, in his 30-odd years of punishing (racking up something in the order of 2000+ bodies, it's estimated) has never killed an innocent. It's reasoned that Frank's whole schtick is that he's a phenomenally well trained, extremely diligent US Marine, who makes damn sure everything's in place before he starts his "work".
* The Punisher. In other words he was Marine, Navy Seal, Army Special Forces and SAS all rolled into one.
* The Punisher in particular seems to depict him as at least in his mid-50s. Later comics tend to quietly ignore or retcon the Vietnam thing to justify drawing him as a man of forty at most.
* The Punisher is an operative who started in WW 2 with no explanation for why he never ages). However, villains from the first verse (the Russian and Elite's son) made cameo appearances in the MAX continuity.
* The Punisher is a normal guy (albeit an ex-Marine) with a burning desire to kill criminals and somewhat dubious sanity. Despite this, he is often depicted as effortlessly outwitting, humiliating or beating up other super-powered characters who should logically be far more than he can handle. That said, it's zigzagged in that some stories have shown him being beaten up or humiliated in turn.
* The Punisher is attempting to infiltrate a South American drug cartel. He is handed a rifle and told to shoot a captured DEA agent. The Punisher instead tries

to turn the gun on the drug boss, only to find it has been rigged not to fire.
* The Punisher is just below the surface, with the criminals now operating out of sight of the general population.
* The Punisher is often described as having more guns than some small nations.
* The Punisher is probably one of the manliest of all Marvel's heroes. Badass? Check. Brooding? Check.
* The Punisher, Jigsaw's real name is John Saint rather than Billy Russo.
* The Punisher: Just about every depiction of Frank's tours in the Vietnam war show US forces at their worst: troops are openly getting high, equipment never gets replaced/gets sold on the black market, and going out on patrol seems entirely optional.
* The Punisher) just don't get when they try to reason with him. He also doesn't go after members of the judicial system unless they're actually corrupt or heroes unless they get in his way (and even then, it's only until he can escape them, and never lethally).
* The Punisher kicking him in the nuts notwithstanding. Having lost his own kids in his tragic backstory probably has something to do with that.
* The Punisher Kills the Marvel Universe has Frank Castle murder several members of the X-Men and the Avengers after their battle with the Skrulls and the Brood unintentionally kills his family. He ends up having his bail paid by a man named Kesselring, who is part of an organization of people indirectly harmed in superhero brawls and obsessed with getting even with the heroes who indirectly harmed them. The organization gives Frank the proposition to murder all superhumans on the planet, which Frank is all too willing to go along with because of his grief at his family's demise. He eventually murders Kesselring after tiring of his mission and calls out the rest of the organization for letting their pain run way past its course, which is definitely hypocritical for him to say since he let the loss of his family drive him to indiscriminately massacre all the superhumans on Earth.
* The Punisher Kills the Marvel Universe. Several X-Men are shot dead by Frank Castle after apologizing for an alien fight that killed his family. Then the killings continue...
* The Punisher Kills the Marvel Universe, the heroes are eliminated in no time flat, leaving Frank to detonate the C4 in the Hulk's guts. The pain is such that he has no choice but to revert to Banner. And then he kills them all.
* The Punisher MAX adds an undercurrent of this to every story, but the Slavers arc displays it most prominently. In that arc, Frank Castle battles against a disturbingly realistic group of sex slave traffickers from the former Yugoslavian territories. They kidnap young women from Eastern Europe, rape them repeatedly until they break their spirit, and then force them into prostitution. The arc ends when Frank Castle kills the leaders of the US part of the ring, knowing both that he can’t truly stop the operation since the true leaders lie far beyond his reach, and that he cannot help the women that he freed from them to remake their lives, with the last page depicting Viorica, the woman who alerted The Punisher about the ring and herself a victim of them, having a PTSD attack in her job as a waitress.
* The Punisher MAX. All of whom are trying to get their hands on Frank with the intention of either killing him or recruiting him.
* The Punisher MAX, and Frank feels a little like her prisoner, but Jenny does nothing to stop him and the reason he can't leave is his gunshot injuries, and he patiently listens as she describes what was done to her, and sympathy for what was done to him. Jenny then has two requests: his shirt and jacket so she can become The Punisher and kill the women who hurt her, and that he stay until she finishes it. Frank feels more and more like he's trapped, and that Jenny would stop him even if he could leave, before passing out and ending up handcuffed so Jenny can show him how to torture criminals.
* The Punisher MAX, and the art style makes it look like his eyes have gone completely black.
* The Punisher MAX, and the boss starting to get a bit too independent for his liking caused him to think up a murder plot that backfired horribly (the don

survived, but Frank's family was caught in the crossfire). Frank doesn't even get to kill the consigliere himself, the don was already finished with him by the time Frank has killed the other goons.
* The Punisher MAX, and then posts the film. The Punisher goes on an even bigger slaughter than usual, leaving one survivor to tell the authorities he'll calm down when his family is reburied. The Mayor meets with his staff. The bad news is every criminals' lawyer is raising hell "They know they can't indict my client so instead they throw him to the Punisher", trying to arrest Castle can lead to loss of innocent life, successfully arresting him will lead to more deaths in prison, but they can't give in to his demands without being accused of giving in to terrorism. The good news? Crime's down.
* The Punisher MAX arc of the same name are hardened soldiers/war criminals from the Bosnian war. The fact that they've actually had to fight for their lives puts them above the average Mafia goons and even have Frank on the ropes for a while.
* The Punisher MAX, Barracuda loses all the fingers on his right hand (but not the thumb) just past the knuckle when he first attacks Frankp. He's not too bothered by it until Frank tells him he can't get them reattached because he put them directly on ice, killing the nerve endings.
* The Punisher MAX begins and ends with a man on fire. Also, the arc "The Slavers" ends with one.
* The Punisher MAX by having Frank Castle take out a mob boss who had clocked at a hundred (he's basically a vegetable at this point but mobsters don't get that old by being nice). His widow makes an appearance in one of the final arcs, and she's a real nasty piece of work as well.
* The Punisher MAX, Castle curses 'Cuda out calling him a "fucking Army puke".
* The Punisher MAX comic. Leon Rastovich was part of a child pornography ring that was busted. He turned over on a lot of his partners for a lighter sentence, but no matter what the prosecution offered him, he never turned on his mother, who was suspected of involvement.
* The Punisher MAX dealt with Frank's difficulty adjusting to civilian life, including a fellow soldier saying he couldn't imagine Castle taking his kids on a family picnic.
* The Punisher MAX. Despite Nick Fury calling them out, not one of them shows a sign of remorse.
* The Punisher MAX explicitly runs on real time since it exists outside of the mainstream Marvel Universe.
* The Punisher MAX family, none of the five capos are willing to give him the time of day until he desecrates the remains of the Punisher's family to make himself a target for the vigilante. Following that, two of the capos support making Nicky their boss, one (Joey Picardi) opposes this idea, and two are undecided but are poised to follow Joey. Joey is killed by Nicky's bodyguard during a bathroom break, and the opposition to Nicky disappears.
* The Punisher MAX, Frank Castle's last Vietnam deployment ends with him as the sole survivor of Firebase Valley Forge, surrounded by the corpses of all his comrades and the hundreds of Vietcong who overran the base. The Vietcong directly around him have all been beaten to death with the butt of his gun. None of the soldiers who show up to "rescue" him are particularly surprised at what he eventually becomes.
* The Punisher MAX, Frank kills a black inmate and carves a swastika on his face, planting the warden Leonard's nametag on the corpse. When the warden shows up to investigate the murder, he immediately realizes his dilemma: he physically wasn't there that night... because he was having sex with a neo-Nazi inmate.
* The Punisher MAX: Frank's assassination of the centenarian Don Cesare at his birthday party (along with a great deal of the Cesare capos and soldiers) sparks multiple mob wars over the course of the series, all of which he does his best to encourage as it's less work for him.
* The Punisher MAX getting ripped apart by the mob of freed villagers.
* The Punisher MAX, having ascended through the ranks entirely through mundane service. By the time the comic takes place, the Generals end up opposing Frank

Castle for the sole purpose of saving their own asses from the massively bad decisions they've made throughout their careers. There's even a scene where Nick Fury whips the head general half to death with his belt for his stupidity during one military operation. The entire group is eventually slaughtered by Castle.
* The Punisher MAX. He only addresses the missile's proximity by saying they won't go off short of another nuke.
* The Punisher MAX" Here Frank still goes to war on criminals with increased brutality, but the "Punisher" name is meant for himself, punishing himself for his failure by fighting a war he knows he'll never win.
* The Punisher MAX in an attempt to get the Punisher angry. Cut to a shot of him watching it on TV in a diner that shows it definitely got him mad.
* The Punisher MAX: In O'Brien's redebut after the first arc, a fellow inmate makes an attempt on her life. O'Brien survives without a scratch only to see her assailant dropped her shiv and that it's covered in blood. Curious, she picks it up, walks just outside her cell, and sees she just got framed for the murder of a guard.
* The Punisher MAX is only there because his father is a general. Unusually for the trope, he's entirely aware of how out of his depth he is for everything.
* The Punisher MAX. Oddly enough, the husband is apparently impotent so he forgives her (although the jealousy manifests when he has her one-night-stands murdered), he's completely oblivious to her latest affair, and actually commits suicide when he finds out. The wife and her lover are eaten by sharks.
* The Punisher MAX of the PIRA and their American supporters is well-known, and the protagonist is The Punisher... yeah, it doesn't end well.
* The Punisher MAX Pittsy, who shoots him point-blank in the chest with a shotgun.
* The Punisher MAX series, a giant black war criminal who speaks entirely in gangster slang, and has swear words stenciled on his gold teeth.
* The Punisher MAX shows the story from the POV of an arsonist, being pursued by the Punisher through Manhattan. It never once gave the Punisher's perspective; he was presented as simply an unstoppable force that the criminal just couldn't get away from.
* The Punisher MAX's "Kitchen Irish" arc, Maginty kidnaps a rival gangster, has him extensively dismembered while he's still alive, and sends each piece in a separate package to his wife. We're shown all the gritty details, including Maginty furious about how much Fed Ex charges for same-day delivery. The wife isn't really fazed, for the record.
* The Punisher MAX, starting with the rat-faced guy running the gas station.
* The Punisher MAX that he had sex with a man causes him to jump out of a helicopter.
* The Punisher MAX The agent is next seen clutching his bloody groin with one hand and holding a blood dripping paper cup in the other.
* The Punisher MAX). Then the warhead deactivates and the engines turn off, allowing the three to bail out and parachute to (relative) safety.
* The Punisher MAX. The very first arc involves him killing the centenarian mafia don Cesare, which has recurring effects for the rest of the series.
* The Punisher MAX to be allowed to return to the lifestyle Harry offers.
* The Punisher MAX to break Frank out of prison (so Frank can kill the convict's brother's murderer).
* The Punisher MAX. To explain why, the general had put together a cell of middle eastern terrorists and sent them on a plane, which they were to hijack. The plane was then blown up by the Russians, killing the US funded terrorists and the innocent people aboard. Don't worry, he and his associates get a better punishment for it later.
* The Punisher MAX version of Bullseye used to be a military lawyer who'd never fired a gun before suddenly disappearing for several years, and upon his return, had become a deranged assassain who's bodycount would put most armies to shame, and thats not even touching the atrocities he commits even when no one is paying him. Exactly what happened to turn him into this is unknown, while working for the Kingpin, a lawyer finds the army files on Bullseye, but mentions that most of the

info has been blacked out or redacted to hell, and what little info is there makes no sense.
* The Punisher MAX, where Elektra walks into a mob meeting and slices some goombahs up. One loses his ears, the other his tongue, and the third his eyes, and they put their hands to where the wounds are.
* The Punisher MAX where Wilson Fisk utters this to newly hired hitman Bullseye. More or less summing up his first impressions of him.
* The Punisher MAX: While Frank never directly fights any terrorists, terrorism influences several arcs:
* The Punisher MAX Yorkie Mitchell in the Afghanistan arc, when he has no hesitation when ordered to execute rogue CIA agent Kathryn O'Brien. (Although he later changes his mind when Frank asks him to let her go as a favour.) When one of his men expresses misgivings about killing a woman in cold blood, Mitchell tells him that her gender doesn't change the fact that O'Brien is a cold-blooded professional killer like the rest of them, who doesn't deserve any special mercy because of it.
* The Punisher miniseries. It had all been a ploy by Olivier, a demon kicked out of hell, and Frank has been unknowingly committing numerous sacrifices in his name for years.
* The Punisher nature of the legal system here), leading to Frank occasionally getting deliberately arrested and sent to the same prison so he can do some cleaning.
* The Punisher never gets over the murder of his wife and children (no matter how many criminals he kills).
* The Punisher of motherfuckers, I expect to get paid on time, not still be waiting for my money a week later.'' The person he was speaking to ending up getting fed to a Great White Shark.
* The Punisher: One story had Kraven the Hunter II create a zoo of animal-themed supervillains, like the Rhino and Vulture.
* The Punisher opens with Frank visiting one, and coincidentally meeting an old Vietnam War acquaintance there. Said acquaintance turns out to be a villain of the story.
* The Punisher origin came when his family was killed in a botched mob hit during one of these.
* The Punisher: Purgatory was the retcon that Frank Costa was really a demon named Olivier put into the body of a stillborn baby and that he orchestrated the events that caused Frank Castle to become the Punisher so Castle could be one of these for him, building an army of those Castle killed.
* The Punisher' rebooted series has Frank blowing up a car with nothing more than a few handgun bullets. At least it pays lip service to reality by having him almost empty his clip with direct hits to the tank while his internal monologue hoped for one to spark.
* The Punisher's as the Punisher was meant to be a violent vigilante and a representation of the failures of the justice system.
* The Punisher's Battle Van, which causes Micro no end of grief when he has to get another one kitted out.
* The Punisher, setting mooks aflame with the flamethrower isn't one hundred percent effective; they panic and run amok, sometimes into you. Ouch.
* The Punisher's few recurring foes, is so named because the Punisher threw him face-first through a plate glass window, leaving him with a massive amount of patchwork scars across his face. Making it worse is that he was previously renowned as incredibly handsome.
* The Punisher's Franken-Castle storyline, is out to kill every single monster on earth after his family was killed by werewolves.
* The Punisher show him the bullets that killed her, which aren't the ones he used. He gets the body autopsied to be sure and then goes after the killers, completely out of his funk.
* The Punisher skins the faces off of his slain victims and mounts them on plaques.
* The Punisher's Nemesis Barracuda is the same. Shortly after meeting the

Punisher, 'Cuda gets the fingers on his right hand chopped off, his eye stabbed out, and his teeth broken, not to mention later shot in the chest and hurled off a boat into
* The Punisher special, where a serial killer says "I like that. Being called 'God'."
* The Punisher's Penance Stare, under the reasoning that Frank doesn’t feel guilty about his innumerous murder cases; it was against unrepentant criminals and the like so for Frank it was justice at work, not a collection of sins. That contradicts many instances where the Penance Stare is said to work on absolutely any living being who has ever sinned, taking a life regardless of the motivations behind it, i.e.: Galactus can be affected by the Penance Stare even if he is a natural force of the universe who doesn’t consider his planet-sized killings as something evil.
* The Punisher's Plan B is to break out the M-60, the flamethrower, the Claymore mines, etc.
* The Punisher's response to a group of misguided vigilantes' offer to make him their leader?
* The Punisher stories acknowledge that he's in his late fifties. He is still a bigger badass than anyone else he faces.
* The Punisher story has him fight a druglord who keeps a shark in a huge aquarium in his office. Naturally, the glass is broken during the firefight and the druglord gets eaten.
* The Punisher storyline: a reporter is giving an interview on the actions of another killer who has shown up at the same time as the Punisher's return, only for said killer to walk up, shoot the guy she was talking to in the head, then give his own interview before running away. The scene then cuts to two secondary characters watching in a bar taking bets on whether or not the reporter pukes on camera (she does).
* The Punisher. Subverted, as Frank has been around the block numerous times and knows the score.
* The Punisher suffered a psychotic break and began dispensing his brand of lethal justice for such heinous crimes as littering and jaywalking.
* The Punisher suffers misfortune after misfortune throughout his time in the series. Miraculously enough, he also survives all of it in one piece. He ultimately becomes one of the very few Punisher characters who leaves the series with his life and sanity intact.
* The Punisher: Suicide Run event, Frank knocks him out so he won't be in the line of fire.
* The Punisher: Suicide Run, Rosalie utters a soft but firm "No" when her men urge her to send assassins after Frank during a rare period where she's trying to avoid making him angry at her. When they persist, she repeats the word much louder and throws a wet sponge at them.
* The Punisher: Suicide Run storyline, the Punisher has just finished killing all the heads of the big Mafia families from around the world (again). He is helped by the fact he's carrying a dead man's trigger in his left hand, connected to a huge bomb in the otherwise empty building. But wait... there's one guy left. A jerk-ass nobody who runs some gangs out of New York. The punk points out it's just him and the Punisher and maybe both could walk away. Nope. No deal. BOOM.
* The Punisher that in Vietnam, Frank started to love combat and killing people, with the death of his family possibly being only the spark that caused his killing.
* The Punisher that plague specific suburbs. In "Six Hours To Kill", he ends up in Philadelphia, and claims he hates the place.
* The Punisher: The End, where after a nuclear apocalypse, the Punisher and his sidekick venture out of a bomb shelter when the radiation has gone down enough for him to make it to the people responsible. He kills them, then his sidekick (who was actually a murderer), and then dies.
* The Punisher, then pushes said neighbor on top of him while he was writhing on the floor in pain.
* The Punisher: The Platoon: Cuong is second in command of a frontline military

unit, and when asked what his good points are, Colonel Giap merely says that Cuong loyally follows his orders and that Cuong's father is a general.
* The Punisher, though they understandably get very little development before their grisly deaths.
* The Punisher to bite down on the pin (as he's driving) before throwing the grenade. It looks painful, but not permanent (then again, being the villain of a Punisher comic, he doesn't enjoy their use for very long).
* The Punisher to infiltrate a criminal's party (well, not so much partners as blackmail her into it by taking the notebook where she writes down her connections). The story is told from her perspective, and she recalls her youth raising dogs from which she learned to fit people into two categories: dogs and wolves. At the end of the story, she puts Frank in the "lions" category.
* The Punisher video game, Grand Nixon Island has a gondola ride to a Boss Fight, while sniping bad guys along the way. Don't find all the snipers? They'll plug the machinery and you are going for a fall to the bottom of the valley.
* The Punisher video game has a level set in a zoo. You can reenact several of the deaths in the story, as well as some new ones like letting a thug killed gouged by a rhino, or tossing one into a tank of electric eels.
* The Punisher vigilante he's notorious for being, Frank was a veteran in the United States Marines Special Forces; for heroism in the line of duty, he was decorated with numerous medals, including the Purple Heart. The brutal attack that killed his family caused him to desert just hours before he would be awarded the Presidential Medal of Freedom.
* The Punisher, was originally a handsome mobster named Billy 'The Beaut' Russo until he had a run-in with Frank Castle. Castle left him alive to send a message to organized crime after knocking him through a glass window pane, an act that reduces Russo's face to a jigsaw puzzle-like mess of scars.
* The Punisher: Welcome Back, Frank arc, Soap persuades Frank to rescue a capo held hostage by South American narcotraffickers, as only his authority can prevent a brewing Mob War from spilling into the streets and harming innocents. Frank agrees, and once the mob boss is back in New York, he calls a meeting to discuss how to get back in the game instead of attacking each other for money and territories: killing the Punisher. Frank then calls the mobster, asking if he ever questioned Frank's motives. That is, less "prevent a mob war" and more "have all the Mafia leaders in the same room at the same time". Cue Frank, holding a belt-fed machine gun.
* The Punisher: Welcome Back, Frank, blowing and shooting them up with a reckless abandon that led the Punisher to kill him after it became obvious that Payback barely cared about collateral damage, at one point shrugging off the fact that his rampages had resulted in the deaths of at least four innocent people with what amounted to "they died for the greater good."
* The Punisher: Welcome Back, Frank by throwing hot pizza in his face.
* The Punisher: Welcome Back, Frank is...a baseball cap. But he has also hired a prostitute to pretend to be his "date," which probably did much more to throw off any idea that he was The Punisher (he also sat with his back to his target).
* The Punisher: Welcome Back, Frank, Mr. Payback is introduced shooting up a board meeting after listing the crimes the executives were guilty of. What he didn't know was that he accidentally killed an innocent cleaning lady during the attack, putting him on Frank's list.
* The Punisher: Welcome Back, Frank Trade Paperback, he actually kills a copycat vigilante for not taking the same precautions and accidentally killing an innocent.
* The Punisher: Welcome Back, Frank uses the Empire State Building to make high-altitude street pizza.
* The Punisher went through this once. While chasing a mob goon across rooftops, both of them end up crashing into a ring where they're forced to team up to survive. At the end of the story, the thug thinks he has won Frank's respect, but the next day, Frank tracks him down and kills him.
* The Punisher when one guy has to relate how the Punisher escaped a trap.
* The Punisher, where a mob boss is about to beat a disloyal underling to death with a baseball bat... while said underling is tied to a chair.

* The Punisher, where he's so convinced that he's the scariest thing in New York that he completely misses the winged monstrosity that flies up behind him and nearly takes his head off.
* The Punisher, which killed his entire family as collateral damage in a drive-by shooting.
* The Punisher, who just had his entire family wiped out by criminals.
* The Punisher, who kills every criminal he comes across. Notably, in his comics, most of the villains he kills are the lowest of scum that humanity has to offer. The overall result is that the rest of the superhero community doesn't like him (especially Daredevil), but keeps him around and respects him because he serves as a reminder of what they could become if they cross the line.
* The Punisher with a big glass wall behind his desk. You have all of three guesses as to how the druglord, the glass and the shark ended up at the end of the story.
* The Punisher, Wolverine and the majority of the Avengers and New Avengers, just to name a few examples, in
* The Punisher" Zinn and a mook are reviewing security footage of Frank mowing through his gangsters:
* The punishment for counterfeiting money in Colonial America was to have your ears cropped — that is, have the fleshy bits around the "shell" sliced away. (You also got branded on the temple.) Ouch.
* The punishment inflicted by Nagi to Evangeline herself: "damning" her to
* The punishment is deconstructed in the episode "Passing Through Gethsemane" when one of an order of monks living on the station is horrified to find out he's actually a convicted serial killer who was mind-wiped and reprogrammed with a personality inclined to do service. When his detention center had a fire he got lost, and eventually found his way to the monks.
* The Punishment Is the Crime: People punish themselves by committing immoral deeds.
* The Punishment: It's revealed Wheatley was eating toothpaste before he was reunited with Chell.
* The PunishmentPunishing someone by turning them into a supernatural creature of darkness.
* the punishment she gave to the Red Queen shows the extremes she can get into.
* The punishment turned up again after the comic made the transition to
* The pun is in the middle of a song, poem or other rhythmic verse, where using it fully would break the meter.
* (The pun is that "zhui hui" (a mock Chinese name) means "chew a dick" in Russian and "zhui sam" means "chew [it] yourself").
* The punk band "Redd Kross" started life as "Red Cross", with the expected symbol as their logo... until
* The Punk Hazard also introduced the concept of artificial giants. Dr. Vegapunk was trying to find ways to make ordinary humans grow to giant size, but failed in doing so. His
* The Punk Hazard arc adds a new roster of monsters: Centaurs, satyrs, dragons, a harpy and a
* "The Punk-Rock Ragdoll" Heidi Lovelace who are much bigger than they are.
* the Puppeteer", as she considers it too childish, but everyone who's heard of her uses the nickname, including her boss.
* the puppeteer him/herself). Lastly (and most rarely), it's just the puppeteer, which mostly happens on Muppet fansites (though even then it can slip into the second type).
* The Puppeteers had been a space-faring race for close to a hundred thousand years by the time mankind landed on Earth's moon.
* The puppet for Nadine Morano also frequently use crude language, and is nicknamed "the UMP's fishmonger".
* The puppet for Thierry Roland, the late soccer commentator. Mocked in a sketch suggesting that he is afflicted with
* The Puppet is a mime-like animatronic who is controlled by a music box. It plays with this trope, however, because it seems very different from the other

animatronics. Some speculate that it isn't a robot at all, but none know for sure what it really is.
* The Puppet is only ever referred to as "it," and Mangle is never referred to as a specific gender, though like with Toy Bonnie, the redesign compared to the original Foxy gets noted
* The Puppetmasters aliens decide they quite like this aspect of human culture, and decide to liven things up by giving the bull an even chance by having one of them take over the bull so it's as smart as the matador.
* The Puppet Masters all the time, as it is a defense against the aliens. The aliens use, if you haven't guessed, the infiltration method.
* The Puppet Masters, based on the Heinlein book, revolves around this. The creatures from Titan are small and weak and require a host to survive for any length of time outside their crash-landed space ship. They can also utilize dogs and cats, but only temporarily. Titans also absorb memories and skills, and can pass their knowledge to each other through their nerve tendrils.
* The Puppet Masters more vulnerable to it than humans are. After the disease is unleashed, a military man in the area admits that he and his men are "sick as hell", but are now free.
* The Puppet Masters. The Boss makes Sam and Mary go undercover as brother and sister, precisely because he knows that their relationship will have a lot of sexual tension that needs to be kept under control (and he somehow knows this even though Sam and Mary haven't met).
* The Puppetry of the Penis — "The ancient Australian art of genital origami".
* "The Puppets" had Mighty Flyz, a parody of 90s flying toys. When Darwin activates one, it cuts through a fan, a lightbulb, and a ladder before flying out the window and hitting some power lines, a tree, and a bird.
* The Puppini Sisters’ “Jilted” is about learning from the experience of being, yes, jilted, and gaining a spine as a consequence.
* The Puppini Sisters is loaded with homages to old, poorly-made horror films, complete with bad effects and silly screaming expressions.
* The puppy Fenrir jumps on him and knocks him and Mariel down. He ends up lying face down on top of her.
* The puppy Fenrir jumps on Taro and knocks him down, causing him to fall face down on top of Mariel. They end up in an
* The Puppy's Wish: Birki's mother gives Anja rides on her sleigh and it's stated that one day Birki will too.
* The Puranas often mention that in the days of the yore, it was usual for humans to live for thousands of years. When humanity first came to existence, the average lifespan was a 100,000 years.
* The Purchase Price, Joan and Jim finally kiss and (it's implied) consummate their marriage in the last seconds of the film.
* the pure white of the garment was supposed to communicate their honesty.
* The Pure Wrestling Association in Canada had Jay Jackal, Maximus Steele and PD Flex, three men who called themselves "The Juggalo Nation".
* The Purge, addressed the issue head-on by throwing the spotlight onto the Purge itself, telling stories from both perspectives (those reveling in the anarchy, and those trying to stay alive) and going much deeper into the causes and consequences of the event. General consensus is that the sequel was what the original film should have been.
* The Purge, also wear masks and helmets that are usually less outrageous-looking, but no less frightening.
* The Purge: An organization decides to eliminate every single member who dissents with them.
* The Purge: Election Year he purges the first victim of the night, after which he seems a bit TOO excited, sharing a moment with Minister Owens. After this, however, he goes back to being completely stoic, even when bullets are flying around him.
* The Purge: Ethan Hawke's character works for a company that sells advanced security systems that will essentially put homes on lockdown during the 12 hours of

crime. However, it becomes apparent through the course of the film that while the system is strong enough to cause opportunistic criminals to seek easier prey, it won't stop a determined group from breaking in.
* The Purge even establishes that this has caused a rise in "murder tourism" where foreign psychopaths travel to America to indulge their fantasies.
* The Purge for the franchise also include "Release the beast in our souls" and "God Bless America", to further play up the religiousness of those in favor of it.
* The Purge from a road-rage incident. He and his wife were driving on the freeway when a drunk driver cut them off nearly killing them. After both cars stopped, the other driver's lack of remorse enraged DeMonaco enough to engage in a fistfight and police eventually had to get involved. After the incident was over, DeMonaco's wife turned to him and commented how great it would be to have one free murder a year. He felt bad admitting this because she's normally a "sweet woman".
* The Purge has a truly haunting one given the subject matter it is broadcasting;
* The Purge. It is said that Mussolini's power was backed by "the bludgeon and castor oil". In lesser quantities, castor oil was also used as an instrument of intimidation, for example, to discourage civilians or soldiers who would call in sick either in the factory or in the military. Today, the Italian terms ''manganello e olio di ricino" (bludgeon and castor oil), even used separately, still carry strong political connotations. These words are still used to satirize patronizing politicians, or the authors of disliked legislation. The metaphoric meaning is "to choose between coercion or abuse".
* The Purge — Action Horror series, including five feature films and a tie-in tv series.
* The Purge: More serious crimes (called "R-level" felonies) are now punishable by death on the next Purge. This was apparently the result of a fictional Constitutional Amendment (and possibly the Purge itself too), along with restricting accuseds' rights to due process. As a result, there is greater deterrence for crimes committed outside the Purge itself (in real life, the US Supreme Court has ruled that only offenses resulting in death can be subject to capital punishment, necessitating such an amendment).
* The Purge: Most of the violence in this film and its' sequels takes place at night, despite the Purge itself being a 12-hour period which would naturally have some daylight time involved. Of course the Purge is by design scheduled to encompass mostly the nighttime hours, when citizens would be more comfortable releasing their predatory instincts and committing acts of violence.
* The Purge pay because at least during those 12 hours it's true. The government covers up their agenda by telling the public it's to vent their anger, but really it's a social darwinistic measure used to attack the poor and homeless so as to help the elite rich get even richer.
* The Purge: The announcement made by the government to the people about The Purge makes it sound like it's just a minor, adjust-your-clock event. This contrasts starkly with the home invasion that occurs later on.
* The Purge (the first film, but not the franchise in general, which is more straightforward action-thriller)
* The Purge). The government either doesn't believe them or actively tries to cover it up, with Adams being murdered and the radio show Riviera appears on trying to slant the arguments against her.
* The Purge, the Sandins have a security system which covers all exits in metal plating, meant to protect them from the lawless anarchy of Purge night. When a murder squad of preppy kids shows up demanding a homeless man their son let in, James Sandin has to admit that the security system is only meant to ward off the riff-raff. These kids, heavily armed and with numerous vehicles, are able to tear the plating right off the walls.
* The Purge: The youngest Sandin kid is asking his parents why they don't kill during The Purge. He thinks it's a game and doesn't quite realize yet that it isn't.
* The Purge Troopers are this to the Inquisitorius made up of both clones and non-clones alike.

* The Purge: When a villain takes over a big company or government, the first thing he does is start ordering the deaths of quite a lot of people.
* The Purge, where a group known as the New Founding Fathers have taken over America and made crime legal for 12 hours out of the year, they also passed laws that exclude them from being targeted by the annual anarchy they've created.
* The Purge: While most people take advantage of the Purge to loot and murder, the first season has a group of four women called the Matron Saints who save women from rapists and abusers on Purge night, and then brand said abusers foreheads.
* The Purge will wear a mask that's not only intimidating, but sometimes badass and cool in design as well.
* The Purified are humans who have transformed their minds and souls into spiritual entities that can exist separately from their bodies. Their physical bodies can always be regenerated by their spirit forms, and their spirits can also regenerate from apparent destruction. If their spirit form's
* the Purifiers launch an assault on the Morlocks' sewer lair, having been led to believe that it's a terrorist staging ground, rather than a refugee camp.
* The purplebloods are the most homogenous group among the trolls, but only because they differ so much from every other group: They are pretty much through the bank killer clowns and members of a religious juggalo cult.
* The Purple Dragons tried to break away from the Foot, until gang leader Hun returned to stop it, due to his
* The "Purple Drank" craze, a mix of alcohols and cough syrup (soda and candy can be added). Not surprisingly a similar drink had been created a few years ago known as a Flaming Homer (a mixture of all left over alcohol in your cabinet and cough syrup, which is then lit on fire). Purple drank is typically Sprite and prescription-level cough syrup, used because it contains high levels of codeine.
* The Purple Heart, which is based on the fates of the eight pilots who took part in the "Doolittle Raid" in 1942. The eight were captured and put on trial by the Japanese - however, their true fates were not known until after the film was made. The film alters the names of the pilots and implies that they will all be executed (which no doubt seemed like the most likely outcome at the time); in reality, however, only three were executed and one more died in captivity while the other four were eventually released after the war.
* The purple martin is the largest North American swallow, formidable enough to dogfight birds of prey in defense of its breeding colonies.
* The Purple Monster Strikes (1945, Republic) — mostly notable for being the last Republic serial to exceed 13 chapters.
* The Purple Rose of Cairo, albeit in a 30's movie theatre. The black-and-white character in the film-within-the-film turns to color as he approaches his admirer in the audience, and later vice-versa.
* The Purple Rose of Cairo is the tale of a film character named Tom Baxter who leaves a fictional film of the same name and enters the real world.
* The purpose of a monster heel is often to create a wrestler who appears to be invulnerable. That is, the hapless opponent (almost always a jobber or a low- to mid-carder) will try out damaging moves, but the monster heel will brush them off and not even so much as be fazed. Of course, then the monster heel then brutally beats his opponent into submission. The end result, as always, is to eventually create a matchup with the organization's lead face or champion, wherein the Nigh Invulnerability trope begins to fade.
* The purpose of Reaper Indoctrination is to turn its victims into this. It's revealed to have happened to most of Cerberus in the third game, as well as the leaders of the Batarian Hegemony; the former disrupting
* The Pursuit of Diarmuid and Grainne to elope with his lord's fiance, but given that Finn was going to assume that he did regardless, he might as well.
* The Pursuit of Happyness, Chris Gardner relates that, as a teenager, he often had unwanted erections at completely random times. One particularly embarrassing one happened while he was about to help up an elderly woman he used to take care of.
* The Pursuit of Happyness, when Chris Garner has sold all his scanners and is having a moderately fine life, then the government seizes the money from his bank

account for unpaid income taxes, leaving him broke and homeless.
* The Pursuit theme from the first game is so beloved that it returns in
* The Puscifer song "Rapture" deals with a sense of hatred based on this.
* The Pushcart War. At least one reader read the book as a kid and didn't realize it was fiction because by that time the dates in her copy were fifteen or twenty years in the past.
* The push for more "feminist" fairytales generally supposes that all heroines wind up getting rescued by a
* The Pussycat and the Expert Plumber who Was a Man. The cat is one of the few examples to actually realize he misjudged humanity (well, a few of them, anyway).
* The Puzzle Lady is about a crossword puzzle writer who solves murders.
* The Puzzle Place, Ben chews out at least two characters while he's trying to work out a puzzle. They visibly shrink as he yells at each one.
* The Puzzle Place episode "Dancing Dragon", centering around the Lunar New Year, was part of the regular episode rotation for that show.
* The Puzzle Place, in which he cried so much one day when Babe the Blue Ox got sick that his tears formed the Great Salt Lake.
* The Puzzle Place, Leon brings a package of popcorn, but when he turned it on to pop it, it doesn't pop. Later after they left, Sizzle and Nuzzle come across it and it finally starts to pop....and pop.....and pop; getting much bigger than the pets. Eventually, it explodes and rains popcorn all over the room.
* The Puzzle Place. One of the characters is named "Leon MacNeal", and is played by Noel MacNeal.
* The Puzzle Place that girls can enjoy spooky things just as much (and be just as good at scaring people) as boys.
* The Puzzle Place their maturity is more at a middle school level. In one episode, though, Leon has a line about Julie not having finished the third grade, which obviously implies that they're about eight.
* The Puzzle Place. When the whole gang sings songs together, her singing is perfectly fine, but when she tries to show off her voice it becomes this trope.
* The puzzles featured in the "Detective Barawa: The Jewel Resort Incident" can be
* The puzzles have a lower number of consonants than most other puzzles, especially with otherwise-multiple consonants being intersected and counted as one instance, often resulting in lower payouts.
* The puzzles set by Leonardo da Vinci on the Vatican Library door in
* The PV for Niru Kajitsu's flower song "Shama" has protagonist Clay Pool fall in love with a seductive prisoner named Kalmia. Kalmia convinces her to break her out of jail—Clay is smart enough to know that she's being used and smart enough to know that she'll never get anything in return for helping her, but she still does it anyway because Kalmia was another lonely spirit and because
* The Pylons and Matrix Tables in the original series (and the rest of
* "The Pyramid at the End of the World": A budding romance gets interrupted by the UN Secretary-General seeking the Twelfth Doctor to handle the latest end-of-the-world crisis.
* "The Pyramid at the End of the World" aliens called the Monks, arrive on Earth in a 5,000-year-old pyramid that appears out of thin air in the middle of a disputed region in Central Asia.
* "The Pyramid at the End of the World": Courtesy of the antagonists, a USAF bomber and a Russian submarine sitting undamaged on the ground outside the titular pyramid, in the middle of Central Asia.
* "The Pyramid at the End of the World" has a quite impressive inversion where guest ally Erica is played by dwarf actress Rachel Denning, despite absolutely nothing about the role requiring a non-average height.
* "The Pyramid at the End of the World": The colonel in charge of the American military contingent is wearing the rank insignia of a four-star general.
* "The Pyramid at the End of the World": The colonels in charge of the American, Russian and Chinese military contingents attempt to do this to the Monks. The Monks realize their consent is not pure because they have this gambit in mind and vapourize them.

* "The Pyramid at the End of the World": The Doctor walks out of his TARDIS to find that it's been loaded onto a UN aircraft flying to the crisis area. When he asks how they got his TARDIS out of the room it was stored in, as the windows aren't big enough, he's told: "They are now."
* The Pyramid at the End of the World when it dawns on him how to figure out which lab the Monks are watching.
* The Pyramids are a perfect example of this. When they were originally constructed, they were covered in limestone and gold, so they would have been sparkling white with a gold tip. But they're always sand colored in shows. The gold was actually stolen in the meantime, as was the limestone (which was used for many buildings in Cairo).
* The Pyramids of Giza and Mesoamerica, the Roman Coliseum, Stonehenge, and the Great Wall of China, among others, have survived for thousands of years, but not unscathed. None of them are intact due to multiple natural disasters and plunderings by people carrying off souvenirs or reusing their materials for other local building projects. The Great Pyramid of Giza is the reigning champion for MDR; it is approximately 4,573 years old and has only lost its funerary contents, limestone casing, and a bit off the top during the millennia.
* The pyramids were often targeted by thieves for the incredible amount of wealth stored in there. Tutankhamen's tomb is famous for being one of the rare exceptions since by then the Egyptian kings had switched to the more hidden and easily guarded caves in the Valley of Kings, the smallest and most easily overlooked (and even so, that particular tomb was robbed twice). None of the pyramids has anything worth stealing left in it.
* The Pyrates not only of pirate tropes (as the title suggests) but also some of the other staples of the period (i.e. Charles II and Pepys appear briefly as characters).
* The Pyro is revealed to be one in the "Meet the Pyro" promo video. Everyone, even his/her/its own team is terrified of the Pyro, and for good reason - the Pyro is an absolute lunatic perpetually surrounded by fire and death. In-game, the Pyro specializes in shock assaults that disrupt the enemy with fire and knock-back airblasts, sowing confusion and panic.
* The Pyromancer Class gives the player a Pyronomicon of their own- a nod to fans of the Mad Pyromancer. It is stated to be a lesser, "second edition" version of the Pyronomicon.
* The Pyromania Update added the Hitman's Heatmaker as an alternative for the Sniper's
* The Pyro's "BarbeQueQ" achievement is awarded if a player you are Dominating ends up leaving the server you are currently playing in.
* The Pyro's fire was at first supposed to obscure the victim's screen, but as it is now you can barely make out the flames around the screen edges. In fact, if it weren't for your character's aim shaking and some rather loud exclamations of "I'm burning! I'm burniiiing!"
* The Pyro's Homewrecker deals double damage to the structures built by opposing Engineers as well as the before-mentioned Sappers on ally Engineers' buildings.
* The Pyro ups the ante even further; even his allies, including the mentioned RED Spy, are terrified of him
* The Pythagoreans of ancient Greece were notorious for their belief that the entire universe constitutes a time loop from its beginning to its end. Once, a member of their audience stood up during a public lecture and loudly exclaimed, "You are seriously suggesting that one day I will sit here another time and listen to all that crap all over again?"
* The "Qaanol Maneuver", named after its inventor, involves using an absurdly fast ship to draw the enemy's fire while your escorts make the kill.
* "The Q and the Grey": The weapons used by the Q look like Civil War era firearms, but are in fact so powerful that the kickback alone can destroy entire star systems in neighboring dimensions.
* The Qatari national handball team for the 2015 World Cup. The team consists of three Montenegrin, two Bosnian, one Spanish, one French, one Egyptian, one

Tunisian, and a Cuban player with their 6 Qatari players. It is possible to buy a national team, it seems.
* The QB cone made the game damn near unplayable on the PC version. Previous installments had the player aim with the mouse and throw by left clicking while using standard WSAD keys (and those directly around them) for moving the QB. However, once the vision cone was implemented, you still aimed with the mouse but needed to press a separate key on the keyboard in order to actually throw the pass to that receiver. Trying to do that while moving your QB away from pressure seemingly required a 3rd hand. It's little wonder that the PC version of the game stopped being made shortly thereafter...(The PC version would make a comeback for
* The QB Kneel play allows a leading team to waste the last 2 minutes of a half. Prior to 2011, it was technically allowed for the QB to not actually touch the floor with his knee as a form of fakery to get a cheap pass off. This was patched after one too many paranoid defenders flattened QBs that were actually intending to kneel, so any use of the kneeling motion now counts as taking a knee even if the knee doesn't touch the ground.
* The Q can choose to have sex by touching fingertips, but being nigh-omnipotent that's not saying a whole lot we don't already know from the "omnipotent" label.
* The Q Continuum episode "The Last Outpost") was caused by an omnipotent being that Q unleashed. This would answer the question of why a technologically advanced civilization with the power to move entire star systems could have been taken by surprise by a supernova.
* The Q Continuum from accuses humanity of being a "grievously savage" 'child' race, and says they must be removed to make room for more "worthy" species.
* The Q Continuum is a "crippled" energy being, meaning it can't go faster than light-speed under its own power, which is why it hasn't simply tried to leave for Andromeda (that, and it's insane).
* The Q Continuum is going through under Riker's command in Picard's absence.
* The Q Continuum). One of the latter supercharges the meteor and hurls it at female!Q. Fearing for her life, Q hurriedly creates a temporary wormhole in the meteor's path, not thinking about where the rock ends up. After the battle, the Continuum learns about the destruction of the dinosaurs and, as punishment, charges Q with protecting Earth and any lifeforms that evolve on it.
* The Q Continuum take this trope full circle. They were hinted to have been the result of this in
* The Q Continuum trilogy, it's revealed that The One (as he is called) really does believe He's God (and yes, He insists on capital "H"). This is despite the fact that the Q Continuum pretty much wiped the galaxy with Him and trapped His head at its center.
* The Q Continuum trilogy, mainly by inciting war between the outer planets and youths and the elders and the home planet.
* The Qemists, due to the latter being featured and remixing many of the former's songs.
* The Qin Dynasty lasted less than 15 years, but it formed the very foundations of Chinese society, and governance to which future dynasties would base and modify their rule on. They also started the project of building the Great Wall of China and formed the concept of a unified China.
* the Qin empire that ultimately led to the end of the Qin Dynasty and the establishment of the pan-Chinese Han Empire.
* The qiraji and some silithid have a sort of amalgamation of Egyptian and Mesopotamian architecture (most of the Silithid live in enormous hives).
* The Qirex Prototype ditches the use of normal weapons for a special self-reloading Minigun that can deal even more damage than the Plasma Bolt. A full clip can destroy even the sturdiest crafts in the game.
* the QI scoring system comes up. A few minutes of banter later, Stephen reveals that Bill has got 3 points already for that joke.
* The Qowat Milat is an all-female sect. On rare occasions, the warrior nuns may teach a man their ways (such as Elnor), but even after he completes the training, he can never be higher than

* The Q-Teez, an all-female j-pop group of young red pandas, who only speak Japanese, in
* The Quaddies are a people specifically engineered for zero gravity. Most noticeably, they have a second pair of arms where their legs should be, to allow them to climb instead of walk around the spaceships. Their bones are altered to prevent deterioration, and their pelvic arches have been modified for ease of giving birth in freefall. Normal humans shunned them so they fled and set up their own society after the invention of artificial gravity precluded any real need for their services. They're different enough genetically that they cannot reproduce with "downsiders" without the help of a laboratory.
* The Quaddies are closer to the straight example. However, though they would not be capable of resisting a determined attack they have no qualms about using force to defend themselves.
* The Quad of University College London (UCL) is often used (particularly in
* The Quake games were this, for a while, with Quake 1-3 having nothing on common but a name for marketing purposes. That ended with the back-to-back releases of
* The Quakers have no formal clergy, believing that no one has the authority or right to intercede between you and God, including at your wedding, where they believe it's best to make your vows directly to God in front of witnesses but with no human third-party effectively giving you permission or approval. This didn't jibe with the religious establishment originally surrounding them in England or the New World, so, unsurprisingly, they once faced a lot of persecution for such practices, with courts refusing to recognize their marriages, declaring their children illegitimate, etc. Well, William Penn was a Quaker, so when he founded the British colony now known as the Commonwealth of Pennsylvania, he was able to make it legal for two people to marry with witnesses only, no officiant required. (
* "The Quake Threat". After Birdman destroys several of Dr. Kiroff's robots:
* The qualities of the voices are different in translations. For instance, ironically enough, in German, Vox is completely human-sounding while the HEV suit is given a monotone that not even Vox has in English.
* The Quality Cafe, an out-of-business cafe that's used exclusively for movie and TV shoots.
* The quality of Canadian resources has been celebrated since the nation's inception. The whole country was basically founded on the quality of Canadian beaver pelts, turned into fancy hats, and later, Canadian trees were said to form every mast in the Royal Navy (the Navy had been sourcing its masts and other shipbuilding materials from the Thirteen Colonies or Scandinavia, but when that relationship
* The Quality of Life", a test is created for the exocomps to determine their sentience as follows: 1. Send an exocomp to complete a repair. 2. Simulate a systems failure that would result in damage to the exocomp if it was real. 3. If the exocomp ignores it and fulfills their programming, it's just a machine. If it abandons the job to save itself, it's alive. 4. Recall the exocomp and evaluate the results. The experiment fails (i.e. the exocomp keeps working and is "destroyed"), and is repeated 34 more times just in case. Then a distraction causes Step 4 to be delayed. This time the exocomp wasn't ordered to return, revealing the truth. The exocomp knew the failure was an illusion, so it finished the job and then turned off the alarm caused by the "failure." The exocomp is alive.
* "The Quality of Life"), the Federation having officially recognized them as a sapient race in the meantime.
* "The Quality of Mercy" involves a serial killer who has murdered a number of people on the station, including a security officer, for which Garibaldi wants him
* The Quality of Mercy is not Strnen. The cover shows one monkey sitting by one typewriter.
* The quality of the animation and coloring jumps considerably higher for the final episode of
* The quality or durability idea is in many cases completely mythical. As materials and precise manufacturing improve, something doing the same job may be able to keep doing it much longer with less maintenance. It wasn't until the 1980s

that cars gained a 6th digit on their odometers because that was when they started regularly lasting past 100 000km/mi.
* The Quandary Phase had a cameo by David Dixon, the TV Ford Prefect, as a Greenpeace volunteer, who Arthur (played by Simon Jones on radio and TV) insisted he'd met somewhere before.
* the Quantium-40 necessary for jump drives as gods, took offense at the Minbari and others getting them to leave the galaxy and decided to exact retribution...
* The Quantum Enchantment trilogy and its sequel by Kim Falconer uses the 'many-worlds' concept as a plot device. Working from memory, there is a dystopian Earth a few hundred years in the future, and a completely separate world where magic and the like are common place. Throughout the series, the characters manage to get themselves lost in the 'corridors' between the worlds, often returning to what would be their home but for some sort of twist — a battle was won instead of lost, time flows in a different direction, person X never existed. It gets somewhat confusing after a while.
* The Quantum Thief abounds and those who still care for flesh bodies have to be constantly wary of being trampled by gods and giants.
* The Quantum Thief, acting as observers on all Sobornost ships so that inter-Founder conflicts don't get in the way of larger Sobornost goals.
* The Quantum Thief, but he still compulsively pickpockets people around him to stay in shape. At times it's actually useful.
* The Quantum Thief diamond brains of the Sobornost upload collective. Meanwhile, Earth has been taken over by out of control nanotech, which absorbs and contains human minds, but doesn't give them embodiments, resulting in centuries of sensory deprivation, and most often insanity. Finally, a rival upload collective, the Zoku, imprint their minds on quantum states of matter that can't be copied, embracing the unpredictability principle of the quantum mechanics that the Sobornost abhor.
* The Quantum Thief, Mieli, has a warm, human personality who cares deeply for her maker. Her mind is based on an imperfect upload of a dead ancestor's personality that Mieli's people, the Oortians, preserve for this purpose.
* The Quantum Thief. Notably the society of Oubliette on Mars is resistant to most transhuman technologies, being built on the ideals of privacy and individuality, yet from the reader's perspective it's still filled to the brim with transhuman technology designed to ensure this state of affairs. For starters the citizens all have a specialized privacy sensory organ called Gevulot through which the majority of their communication takes place.
* The Quantum Thief, Pixil openly admits that at least a part of why she's dating Isidore, from outside her weird high-tech enclave where people think of everything as a game to the point of wanting to keeping score in every activity, is because it upsets her relatives. He later realises it's only been a kind of game for him as well, though for different reasons.
* The Quantum Thief that hallucinates being a human society, as if the encryptions were to be removed, everybody would share all their thoughts and memories.
* The Quantum Thief the old "Mr." and "Ms." honourifics have been replaced with a simple "M." in the Oubliette colony on Mars.
* The Quantum Thief the Zoku call their rivals, the Sobornost, as well as anyone else who devotes their life to an abstract ideal "meme zombies", while the Sobornost, who have a massive bone to pick with the Uncertainty Principle, itself, refer to the Zoku as "quantum filth".
* The Quantum Thief, though rather than slang, it's meant to represent new technical terminology that always pops up with new innovations. It rarely gets explicitly described, leaving the reader to deduce what a Gevulot is, what Gogols are, or how a Vir differs from a Realmscape. The matter is complicated even further by that some groups use different words for the same concept. The people of Sirr, for example, call Spimescape "Athar", and describe it in almost religious or magical terms.
* The Quantum Thief to one extent or another. Just because these people embrace the ways of the past doesn't mean it's past from the readers' perspective.
* The Quantum Thief-trilogy features Metacloaks used to hide objects in outer

space. It's implied that they only work in 180 degree radius, directed at the target their users wish to hide from, and consume immense amounts of energy. Still, it's rather impressive that they apparently even hide the gravitational effects of planet-sized Gubernyas that collapse unstable miniature black holes as their method of propulsion until they're right on top of the enemy, astronomically speaking.
* The Quantum Thief-trilogy seeks to absorb all existing minds into itself in hopes of eliminating all death and uncertainty from the universe.
* The Quantum Thief upload collective completely focused on bettering themselves in all their abilities, often acting as mercenaries to this end. They utterly denounce all ideologies or codes beyond victory and increase of skill for their own sake, and call those who are guided by ideals "meme-zombies", and treat them like plague-bearers. The reason for all this is the fact that they descend directly from 21st century MMORPG raid guilds!
* The Quantum Thief, war is literally a game to the Gun Club Zoku, because Zokus see all life as a series of games and pick their specialization based on their personal interests. Uncommonly for this trope they are for the most part decent (post) human beings; they just love to see stuff blowing up in new and exotic ways. If they lack an actual enemy, they arrange harmless miniature play-wars among themselves. With lovingly handcrafted nuclear weapons.
* The Quantum Thief, which could result in another wrench thrown in Sobornost's plans — maybe.
* The quarantine precautions taken at worldwide scale to curtail the spread of the
* The quarian fleet is a good example of an entire fleet of ships that have been constantly patched up for the last 300 years by quarians who lived on them for generations after they were driven off their homeworld by the geth. Centuries of maintenance have turned most quarians into engineering geniuses. Young quarians on their Pilgrimage try to find a ship, any ship, even one that every other race would write off as a wreck, fix it up and get it flying again.
* The Quarian Migrant Fleet is under perpetual martial law, but each ship has an elected council that sends representatives to the Conclave.
* The quarians and their robotic creations, the geth, fought a brutal war which resulted in the quarians being kicked off their homeworld and forced to travel the stars in a massive migrant fleet. The geth also attempted to destroy the Citadel with the aid of an
* the quarians and the Wehrmacht provisional government reluctantly come to terms that they cannot spend the next few decades hunting down and killing the fleeing Nazis. So instead they make a deal with the highest ranking Nazi they permit to escape justice: They will be free to run so long as they make themselves useful to their bottom line. The Third World suffers for it.
* The Quarians are the only other race in the verse to have marines. In their case, it is the Migrant Fleet Marines. The geth technically count as well, since
* The Quarians' decision to shut down the Geth (a series of robots they created) once they began to approach artificial intelligence plays very well into the abortion debate.
* the Quarians declare war on the Geth: she sticks with and defends their opinions despite them putting their entire race in jeapardy and Tali offering a much simpler solution.
* The quarians don’t believe in gods, but they believe in souls and hold their ancestors in a reverence which sometimes enters into ancestor worship (or was implied to have happened in the past). They in turn are held in near-religious reverence by the robotic Geth race they created, which is made fairly awkward by the way their mutual history includes multiple attempts to wipe each other out (originally triggered by a Geth asking "Does this unit have a soul?") A splinter Geth faction worship the Reapers instead, as a pinnacle of machine existence; the Reapers (who suffer species-wide denial that they
* The quarians have extremely weak immune systems, and their enviro-suits filter out pathogens and germs that could make them sick. Brief exposure to outside air can, at the very least, cause fever, coughing and congestion. Worse, it can cause delirium and death.

* The quarian species were originally represented in the first game by one individual, who spoke with a suspiciously Eastern European accent. In the sequel, we are introduced to multiple other quarians. While some share the Eastern European accent of the
* The quarians (pictured) are a wandering species and after centuries of living in sterilized environments they lost most of their immune system, thus they always use enviro-suits, to protect them from disease or infection, when dealing with other races.
* The Quark II computer produced by the original WayForward Technologies in
* The Quarl is a feline as large as a tiger, with incredibly keen senses of smell and hearing. It is vicious, cunning and totally without fear, and is known for stalking its prey for days.
* The Quarray Eels strike again with Maud seemingly unaware of the danger while in one's mouth in a later episode.
* The Quarterback cheerleader girlfriend for one of the school "losers", and after a couple of seasons manages to regain his status. Rallies the football team, the glee club, and the school.
* The Quarterback: I'm the star quarterback of the football teams who loves to get along with everyone around me, especially my wonderful fans.
* The quarterback position in American football and the pitcher position in baseball are
* The Quarterback: The effective captain of the school's football team who is usually nicer than his teammates.
* The Quarter Finals Begin", Chris plans to bust Ian out of City Hall and Nostalgia Bot (aka Nosty) welcomes him. When Chris asks where to find Ian, Nosty tells him that Ian is in his office, and then Chris deactivates Nosty by twisting his head around to ensure no one saw him.
* The Quarter Guy list as "420 Blaze It Heatnix" in the subtitles... while describing how horrible the aforementioned Maverick and his stage were.
* The Quartermaster General of the Union Army was a fellow named Montgomery C. Meigs,
* The quartermaster will mistake any elf for a servant. Even if the elf is wearing face markings that designate him/her as one of the elves who swore never again to submit to human authority, or, more interestingly, wearing an outfit and a weapon that suggest that he/she is a mage. He backs down fairly quickly though, and seems incredibly embarrassed once he realizes his mistake.
* The quartet playing in the Ed Sullivan Show in 1964, and being announced by Ed Sullivan with the phrase: "Ladies and gentlemen: THE BEATLES!", cue to girls screaming.
* The quartet spends the entire episode waiting for their table to be available at a Chinese restaurant. Just after they leave...
* The quartzes at the Human Zoo look to him as a little brother and respected leader because he sees their worth and trusts them, unlike the harsh and caring Holly Blue Agate.
* The Quartzes under her command don't seem to be much better; several of them are defective and they have
* The quasi-improv theater group Sound and Fury used this trope in "Cyranose," while Cyranose is trying to distract De Guiche by pretending to be a lunatic:
* The quasi-religious organization The Word of Blake is derisively called "toaster worshipers" both in and out of universe as a reference to their obsession with Star League technology. They don't quite worship tech, but it's close.
* The Quatermass Conclusion featured a children's nursery rhyme containing seemingly innocent lyrics that indicate that the terrible inexplicable events occurring in the film have happened before.
* The Quatermass Experiment, apparently in reference to its BBFC X certificate (the film is nowadays rated PG).
* The Quatermass Experiment begins transforming into a monster, he absorbs a potted cactus into his alien-growth-infested arm. Next time his arm appears on screen, it's mutated into a lumpy fingerless mass with protruding cactus spines all over

it.
* The Quatermass Experiment of three astronauts, and Quatermass convinced them to commit suicide to keep the creature from reproducing via thousands of infectious spores.
* The qubo channel ad aired every break on the Saturday morning version of the block.
* The Quebec 24-hour convenience store chain Couche-Tard raises some eyebrows if you don't speak French. It merely means "go-to-bed-late" or more idiomatically, "night owl." Although it's been buying up convenience store chains across English-speaking North America, there's more than one reason it generally leaves them with their original branding.
* The Quebec-born Fabulous Rougeau Brothers (Jacques and Raymond) took a
* The Quebecers tried this once. The obviously fatter Pierre was quickly called out on it by the referee, despite scrunching himself down as small as possible to look more like Jacques.
* The Queen Bee's eyes, body shape and outfit are recycled from Eva's concept design, while her name, "Heather", was originally given to the loner who would eventually become
* The Queen Bee, who's arena is to the right of the exit to the mountain top.
* The Queendom of Sol by fax, and so has their body reset to a healthy 25 on pretty much a daily basis.
* The Queen had Maisy in her nest of names, and the King had Sidney. Each time, the Herald is asked by someone (a little girl for the queen, and the entire chorus for the king) to confirm that, yes, that is one of their names. And when the King and Queen are alone together "Maisy" and "Sidney" are the names they use for each other. It's very endearing.
* the Queen. However, she doesn't come across as strictly villainous because her targets are mostly asshole victims.
* The Queen in the short story "A Woman's Work" is the head of an aggressive empire that ruthlessly conquers and spreads. She orders people killed with a mere gesture (including a princess who refused to marry her son), kills off heroes trying to stop her, and is quite willing to have her son be a target for assassination instead of her. However, since she provides universal education and health care, a sound economy, a healthy population, and employment training, and doles out praise and rewards when it's earned, her people and army absolutely love her.
* The Queen is a dark variant. When she makes the decision to have Spider-Man serve as her "mate" she's made the decision
* The Queen is a dialogue and mood driven character study, and got a PG-13 rating. No sex, no violence. But there's a lone f-word buried in the dialog so deeply it's easy to not even notice. Not that the movie really appeals to anyone under the age of 13. Similarly and for the same reason, it was rated 12 in the UK.
* The Queen is basically about British Reserve encountering the modern age.
* The queen is locked in a room. Mirtai, a warrior giantess, smashes through the heavy wood door easily. She comments that many old doors have wood rot after so long, making them fragile, subverting and discussing the trope.
* The Queen: Made in 2006, set during the aftermath of Princess Diana's death in August 1997.
* The Queen Mother, on the bombing of Buckingham Palace: "Finally. Now I can look the East End in the face."
* The Queen of Air and Darkness riffs on this trope by having telepathic aliens on a frontier world use the legends of Faerie against the human settlers, right down to kidnapping children to use as changeling warriors.
* The queen of all offensive tentacles however, is Kimberry, better known as The Sea That Marched Against The Flame. She can create tentacles out of any liquid, including
* The Queen of Attolia, Eugenides spends a large portion of the book angsting before returning as an even more badass thief.
* "The Queen of Blades" was the title taken be Aeneria Eldanesh during the War in

Heaven and it remains a title that she alone may hold to this day.
* The Queen Of Cats La Felina in the Apocalypse Wrestling Federation. Able to go entire matches taking virtually no offense from opponents only to lose in the end.
* The Queen of Eddis. They find it funny when others imagine them in love.
* The "Queen of England," in a hot sauce ad: "Frank's Red Hot. I put that shit on everything!" The brand frequently uses innocuous little old ladies as spokespersons for the tag line, but Her Royal Majesty is probably a crowning example.
* The queen of Estgloria instead of a long, drawn-out and painful assassination.
* The Queen of Extalia conned everybody into thinking she is a god, though she eventually confesses to the ruse. Part of the trick was that she could see into the future and predict when people would die, and fooled everyone into thinking she could
* The Queen of Fables is so delusional that she believes Superman is
* the Queen of Genovia herself, though it's implied that they've been in love with each other for years, long before Mia entered the picture.
* The Queen of Hearts: After her parents died, Elsa would often drink wine, sometimes even whole bottles.
* The Queen of Hearts. Everyone seems to know about this, except for Elsa and her sister Anna. It turns out the rumor was accidentally spilt by her biological father's sister.
* The Queen of Hearts filled up the hole until it was to his armpits before adults stopped them.
* The Queen of Hearts, so the next morning she's too disheveled to do anything but dress in the bare minimum.
* The Queen Of Ieflaria: Esofi doesn't trust this new "science," especially superstitious tales of tiny monsters called "bacteria," and mentions that they might have to burn down the hospital for blasphemy. Adale, while far from a scientist herself, is well aware of the benefits of science (in particular, there hasn't been a plague in Ieflaria in a hundred years) and tries to talk her down.
* The Queen Of Ieflaria: It initially appears that Esofi is a pampered but kind politician while Adale is a rough and tumble warrior. In reality, Esofi is a highly trained battlemage who personally killed quite a few dragons, while Adale is a spoiled rich girl who does nothing but party with her friends.
* The Queen Of Ieflaria worried about the heir of two women. The problem is that you have to want the Change for it to stick; actual transsexuals are easily able to Change permanently, but there is some doubt whether either Esofi or Adale will be able to maintain it long enough to produce an heir.
* The Queen of Snow and Queen of Sunrise are personifications of winter and spring respectively. The former once tried to
* The Queen of Spades happens and their relationship, as well as their lives, ends in tragedy.
* The Queen of Storms allowed herself to be consumed by her hatred for the Darkness, ascending into a living tempest of rage that eternally ravages the heart of the Darkness. She grants mortal and Princess alike access to battle magic of unparalleled power, and can manifest her magic through them to produce effects far beyond what her followers could achieve on their own. But if you flee from battle or show mercy to any creature tainted by the Darkness (even a Darkened who was tainted against their will, is still trying to fight it off, and could be saved), you lose access to the Queen's gifts and can only regain them by filling your entire health track with at least bashing damage, putting you on the brink of death. Furthermore, when you use many of the more powerful Storms charms or when the Queen manifests power through you, you take damage that cannot be prevented and that resists healing by magic. The Queen can and has killed her own followers this way.
* The Queen of Sunshine and Bright Things and want to dethrone her. A few days in a cell usually fixes the issue, at least until the next attempted resistance starter pops up.
* The Queen of Sunshine and Bright Things is a Maleficent/Aurora-centric coming of age story about Aurora growing into adulthood from age 16 to 26.

* The Queen of Tears somehow (it's implied to have involved the sacrifice of the rest of her kingdom), transported her capital of Alhambra into the heart of the Darkness and transmuted it into a nigh-impenetrable fortress. But to keep it protected from the Darkness, Alhambra must be illuminated by special magical lanterns that are powered by leaching the very possibility of goodness and hope from the real world.
* The Queen of The Damned. A bunch of boys and girls who are just entering puberty, and no adult supervision? And yes, that was the official reason for the lack of girls.
* The Queen of the Dead are implied to all reproduce this way. Gothel is essentially a clone of her mother Manea while her two sisters, Primrose and Hazel,
* The queen of the trolls, Her Imperious Condescension, flies around the universe in her ship greeting new civilizations with politeness. She then leaves and sends a portion of her vast army to annihilate her new acquaintances. And then once she signs on with
* The Queen of the Underworld, Persephone, was just as feared as her husband, Hades, was. There's a reason she was sometimes referred to as "dread Persephone".
* "The Queen of Wrestling" Sara Del Rey, July 31, 2011, was called "the upset of the year" and portrayed as the "reason" why Claudio left CHIKARA for WWE.
* The Queen of Zeal and the people who have magic live in luxury while everyone else lives in a dirty cave. She awakens Lavos while trying to drain its power for her own use, after banishing the three wise men who tried to warn her of the inherent danger of doing so. She is even willing to sacrifice her own daughter to gain more power. How much of her personality is herself and how much is due to her spending time with Lavos (an interstellar
* "The Queen", realizes that Teyla is intentionally trying to get as many Wraiths killed as possible. In the end, Teyla's Hive only survives because the rest of the team sabotage the other Hive. Teyla then turns to Todd and berates him for questioning her tactics. Said tactics were, apparently, straight out of 18th century (minus Darts) without even any maneuvering or volleys.
* The Queen's Consort: Every few thousand years, the darkness arrives with the intent of swallowing the world. At that time, every fairy out there comes to the Standing Stones and uses magic inherent to them and prevents this apocalypse.
* The Queen's Consort is the King of Thieves, Rapunzel's human husband and the only human member of Fey royalty as a result.
* The Queens Cross by William Schoonover (a fictional biography of Queen Isabella of Spain), a Castilian queen who is having an affair with a nobleman takes the garter off her own leg and slips it onto her lover's arm before he enters the list, causing a minor uproar.
* The Queen, set in 1997, features a Nokia 6210 mobile phone and lots of cars that postdate the film's setting.
* The Queen's father, George VI (as Albert, Duke of York) joined the Royal Navy and eventually was assigned as a turret officer on the battleship
* The Queen's Fool portrays Lord Robert Dudley as this. He rides to battle in the war against France to show the Queen his loyalty after he loses all his lands. He also remains respectful towards Hannah after she refuses him, and remains cool with his wife when she accuses him of cheating on her.
* The Queen's Fool portrays Queen Mary I of England as this. Although the book tries to portray her as somewhat more sympathetic, it doesn't try to hide her being a religious fanatic who burned a lot of people accused as heretics.
* The Queen's Gambit: Beth displays her genius at chess when she is only eight years old. When she starts playing in tournaments as a teen, she's still referred to as a child prodigy.
* The Queen's Gambit follows Elizabeth "Beth" Harmon as she goes from a newly-orphaned 9-year-old to a professional chess player in her twenties.
* "The Queens Gambit Job" contains this reference to just how many plans Nate usually works with:
* The Queen's Gambit when they were younger. When she comes back outside and rejoins Jolene in the car, Beth starts sobbing, and Jolene pulls her into a hug.

* The Queen shows the numberplate on the Range Rover as having the new style 'Charles Wright' font, which was introduced in September 2001 (the film took place in 1997).
* The Queen since that is obviously the expected etiquette for women meeting the Sovereign of Britain. In fact, when she meets the mourners of Diana in public, the fact she encounters a whole line of Britons including women eager to curtsy to her, it's a welcome sign that she still has their respect.
* The Queens Knickers, the narrator is a schoolboy who somehow knows about the fact that the Queen is wearing her everyday knickers to school and he says to her, "Your Majesty, don't worry about your knickers. Nobody can see them anyway."
* the Queen's Latin to evoke the similar stereotypes embodied by the Spartans and Scots in their respective cultures.
* The Queen's Mercy are a religious group of magical individuals that believe that all non-magical humans are lesser than them and therefor deserve to be killed and/or enslaved by them. This even includes humans who gain magic but were not born with it like Anna and Rapunzel.
* The Queen's Museum and Other Fanciful Tales has the Fruit of the Fragile Palm. It's similar to a coconut, but the inside is so delicious that it's worth as much as diamonds or pearls.
* The Queen's Museum and Other Fanciful Tales, short story "The Christmas Truants". The boy Tomtit does one of these while the title characters are trying to escape the castle of a band of robbers.
* The Queens Nose, when the wise old uncle comes to visit, he gives the annoying and snobby older sister Melody some fancy clothes and a bundle of money. To the younger sister Harmony (who is his favourite niece) he gives... an old 50 pence piece, of the same year as her birth. She soon discovers that this particular 50p is magical and grants her ten wishes.
* The Queen's Pardon-ruled planet with thousands of enslaved spacers, Alexis points out the Accords when told that, if it comes to it, the pirates are willing to bombard the planet to subdue any uprisings. The more senior officer she's working with wryly responds that pirates aren't exactly known for following the law.
* the Queen spent there after Prince Albert died (Balmoral Castle had been Albert's personal project before his passing).
* The Queensryche song "The Mission" from Operation:Mindcrime: "I talk to shadows from a lonely candle/recite the phrases from the wall/I can't explain this holy pain". Many of these phrases and words are shown in the video for "Breaking The Silence" from the same album.
* the Queen's succession (1837), coronation (1838), marriage (1840), Diamond Jubilee (1897), and eventually her death (1901). Since then, she has had this impact on the name in the Anglosphere more broadly; before her reign, "Victoria" was a Latin name, but thanks to her it's seen as one of the most quintessentially English names out there, and has been a perennial favorite.
* the Queen's testimony implies the rachni are a naturally peaceful species who only went to war because of Reaper indoctrination
* The Queen's Thief he can't steal, except, it is said, himself out of a prison.
* The Queen's Thief injured by his time in shackles in Sounis' prison, and this becomes a problem on at least one occasion in the novel. Later justified when his wrists are bound too tightly with rope; when Pol cuts off the ties, he immediately starts massaging Gen's wrists and hands to restore circulation.
* The Queen's Thief is an example. Not only does he have "a sense of honor as wide as a river," but he actually spends quite some time hoping that his armor is shiny enough for the King's critical eye.
* The Queens Thief steals the king's seal; by the end of the series he steals peace, time, a queen, and three countries.
* The Queen's Thief The fifth book introduces the Namreen, loosely based on the Immortals of the Achaemenid Empire, who are the personal guards of the Persian-esque emperor and pose the greatest threat to the protagonists for most of the book.
* The Queen's Thief, the king has just outmaneuvered a scheming noble:

* The Queen's Thief: The titular thief makes it clear early on that while he has a propensity for overreacting and dramatics he's usually using them for misdirection, which is why the reader should cue in earlier than other characters that his injury when attacked at court is actually quite serious when he complains about it loudly and at length but hides it from his aides and wife while leaving the room.
* The Queen's Thief this trope. Not only is the main character a master of this art, so is his love interest.
* The Queens' Wing can be a pretty effective Thread-fighting force in the
* The queen test-fires her lover's gift — an arquebus — on an initially live prisoner.
* The Queen that has been Flanderised by the press, she's still made no secret of the fact that she dislikes dressing up in the full regalia. Mostly because it's very heavy; for instance, the royal crown apparently is so heavy that it will give the wearer a headache if it is worn for too long.
* The Queen uses one to set off an explosion that collapses a mine (and allows her to escape the soldiers in the ensuing confusion) in the
* The Queen was known for doing stunts like this; he wanted R ratings for his films even though the content of some of them often didn't merit it, so he threw in some F-bombs.
* The Queen Who Fell To Earth is unlikely to ever be finished, as the author announced that he had been diagnosed with lung cancer in February 2016 and then stopped updating. Apparently, he passed on in April that year.
* The Queen Who Sought a Drink From A Certain Well" was cursed into that shape. He had to have the heroine obey him for a whole night and then cut his head off to free him.
* The Quest: Archetypically — the character leaves home voluntarily or not, and pick up something to search for on the way if they don't have it already.
* The quest chain to get the optional skin for the Retribution paladin artifact in Legion (Corrupted Ashbringer) is nearly identical to fan speculation about how to get the Ashbringer in vanilla (only a corrupted version of the sword existed in-game at this time). Players speculated endlessly about how you might acquire it. Blizzard compiled all this speculation and turned it into an actual quest chain in Legion.
* The "Quest Clear" screen of almost all battles has an updated equivalent exclusively for Arcarum, a "Victory" text which is also more saturated and has more frames.
* The Quest for Karla: George Smiley's wife Anne is an example of the unfaithful type.
* The Quest For Saint Aquin of protagonist, a priest, notes the priest's attraction when he insists on going back to a bar with an attractive waitress.
* The Quest for Saint Camber, Morgan gazes on the unconscious and frail Nigel, dressed in Haldane red court robes with one of the state crowns on a pillow above his head. Suddenly, Morgan vividly imagines himself standing in the Haldanes' royal crypt gazing down at Nigel's body on his funeral bier.
* The Quest for Tanelorn in 'higher powers' in the first place that's holding mankind back from realizing its true potential.
* The Quest for the Holey Grail, Harry and his friends still attend Hogwarts, despite logically being in their thirties.
* The Quest for the Princess Ponies – Part 4" ends with everyone having a good laugh once the bushwooly who got lost in the desert arrives, hands over the locket, and starts chowing down on the party food.
* The Quest for the Silver Empress magazine: One of the NPCs is "Rabid" Grawulf Thornal. Thornal is a criminal who killed the son of a noble during a robbery, resulting in a 5,000 gold piece price on his head.
* The questionable actions of Shining Armor, The Mane Six, and Celestia that were taken during first part of the second season finale had garnered a bit of fuel, having writers insert bitterness into Twilight
* The Question, as Moore noted in interviews, was Ditko's self-created audience-friendly whitewash of

* The Question a vigilante, though it changes color from nondescript brown to vibrant blue when the Question goes into action. He uses special laundry detergent which, combined with the gas he uses to make his mask stick, reacts chemically and makes his clothes change colour.
* The Question conspiracy theorist Rorschach. Then of course there's the second Question.
* The Question Gotham and Bludhaven. The FBI yearly analysis lists Hub City's police department as the most corrupt department in the country, and even the honest cops currently trying to improve the department have a bad history; the current straight-arrow chief only became a crusader for integrity because of what he encountered when he was out shaking down local criminals and businesses for the bribes they owed him.
* The Question. He's a straight-up ace detective and lacks the gadgets and powers of the two above. He's also been referred to as the world's second greatest detective.
* The question "How many angels can dance on the head of a pin?" has never been the subject of serious theological debate. The first known mentions are from 17th-century Protestant writers who used it as an example of medieval scholastic theologians pondering absurd and useless questions. Basically, it started as anti-Catholic propaganda. There
* The Question is looking at a locked glass door to a building with a key card lock. After a few seconds of inspecting the lock intently, he simply walks off screen, comes back with a potted tree, smashes it through the glass door, and calmly walks in. All the while humming a pop song stuck in his head. What ups the funny is the fact two other people snuck in by creative ways such as disguises and swiping the key card.
* The question is never answered in canon, though it looks like the VILE perspective is
* The question is of course not why we haven't found them - the question is why they aren't here. Even assuming faster-than-light drives are impossible, an advanced civilization should be able to colonise the whole Milky Way over the course of a couple million years.
* The question is posed in "Valerie 23" when the protagonist gets involved with a
* The Question, it's a running gag for Victor Sage to have a snappy response when someone notes he has no face (the desired look of his special mask) such as "Dang those safety razors, you really have to watch them."
* The Question. It was a bog-standard old-school Beetle, but modified so that, under the bonnet, there was a honking great V-8 engine...
* The Question miniseries had him talking to "the spirit of Metropolis", who would answer with seemingly-coincidental snatches of conversation from the people in the street.
* The question of motor skills is lampshaded in Manny's conversation with a short-tempered clown:
* The question of the Abrahamic God's possible existence (or at least the existence of an all-powerful creator deity) is brought up in the Stargate Universe spin-off series in several episodes such as "Faith" were the crew find a star system with a paradise planet that should not exist there due to it's age not matching it's state and the fact that the Ancient Seed Ships didn't detect it when passing through the location. It was revealed to be created by an extraordinarily advanced race of beings (who may or may not be Ascended Beings) between the time Seed Ships passed through and Destiny arrived which is give or take 2000 years. Some characters believe the aliens are a higher power or God or both and choose to stay with no proof one way or the other.
* The question of whether or not the Balrog had wings is a contender for the fan wank debate to rule them all. The wording in the original book and elsewhere in
* The Question once fought a drunken, insane department store Santa. Comic writer Denny O'Neil seems to have some issues with Santa. (He's written several of these stories.)
* The Question on those who caused the pain he saw every day in the ER. A man who

scalded his newborn baby was boiled alive, for example.
* The Question's presidential campaign (harkening back to the parallel universe from "A Better World", in which Luthor had become President and killed Flash as part of his plans):
* The questions Tom and Eva have been asked in interviews include what Jake's favourite foods are, what Marco was like as a baby, and how it feels to be forced to attempt to murder one's family.
* The Question (then came to this universe, imprisoned the League, and impersonated them to take over that world as well). Question's solution: go kill Lex himself (using his tie). After all, Supes is the ultimate good guy, and Question's a confirmed loony conspiracy nut. (Unfortunately, the real conspiracy Question uncovered in the process of confronting Lex was a bit more than he could handle.)
* The Question to kill him, closely after which, the Flash is dragged back from the speedforce.
* the question until the tiger went back into the trap to show him, and they left him there.
* The Question, Vic Sage, died from lung cancer due to his lifelong smoking.
* The Question, was an emergency room physician who was disgusted by some of the deliberately inflicted injuries he saw in his ER. He donned a costume and used his medical expertise to inflict similar injuries on those responsible.
* The Quest of the Princess Ponies, Part 1" when he takes a shortcut they proposed and they become lost in the middle of the Jewel Desert.
* The Quest of the Princess Ponies, Part 2", when the heroes are sneaking around the walls of Lavan's chambers, the bushwoolies' sneezing alerts Lavan to their presence and allows him to find and defeat them.
* The Quest of the Unaligned get this as one facet of their earth magic. Though this power is often used to promote the growth of crops, limited numbers of aretzes (and the fact that they are primarily healers) mean that a lot of ordinary agriculture is needed as well.
* The Quest of the Unaligned, having extreme trouble staying focused on any one thing and having a tendency to act on a whim without really thinking.
* The Quest of the Unaligned is a partial example. While the nobles are nobles because of their magic, and the unaligned form the royal house because they have even more magic, peasants who happen to be born with magic are still looked down on by the nobles. On the other hand, peasant mages are still greatly respected by other peasants, to the degree where a mage is considered more important than the village headman.
* The Quest of the Unaligned is that she's the only one with whom he can have an intelligent (or even intelligible) conversation.
* The Quest of the Unaligned). Noble mages wear white robes with trim in their element's color, while the unaligned royal house wears white robes with gold trim.
* The Quest of the Unaligned properties (allowing its wielder to parry spells as though they were physical objects) and may have other magical properties.
* The Quest of the Unaligned repeatedly insults Laeshana, calling her entire family traitors for moving to Tonzimmiel and rubbing in that Ruahkini is the royal councilor while Laeshana is only a peasant.
* The Quest of the Unaligned, the hero starts the book as a ninth-level security chief in the First Tonzimmelian Security Force, which appears to be a cross between this and a police force.
* The Quest of the Unaligned. The scene where Alaric and Laeshana have to cut their way through a swarm of these things is one of the book's tenser moments.
* The Quest of the Unaligned, these are called duels of power, and have the slight quirk that the rules are enforced by the magic of the world itself, and so are physically impossible to break. As there are only three such rules (1. If the challenger has a genuine grievance against the challenged the duel cannot be refused. 2. If you are in a duel, you can't use magic on someone outside of the duel, and if you are outside of a duel you can't interfere. 3. Duels end only through death or unconsciousness), this is generally not a problem.
* The Quest of the Unaligned, Tonzimmiel's energy shield, which strips anyone

crossing it of magical power, is a large part of why nobody in the city believes in magic.
* The Quest of the Unaligned, we get this great line "Alaric had always planned on getting married eventually, of course. But his criteria for potential spouses had always included things like being... someone he actually knew and liked, for starters."
* The Questor Tapes, about an android with incomplete memory tapes who is searching for his creator and his purpose.
* The Questport Chronicles, but he oscillates between being mildly useful and incredibly annoying.
* The Questport Chronicles do this: one transforms into a dragon, the other into a vicious demon.
* The Questport Chronicles have these; apparently natural for two of them. The third was given wings through a spell.
* The Questport Chronicles in-universe, he's actually more this trope, especially with regards to the Secret Keeper and the Queen of Rogues and Robbers.
* The Questport Chronicles is or where he came from. No one had heard of him until after the cataclysm.
* The Questport Chronicles, is turned into a dragon by an evil wizard. He doesn't seem to mind.
* The Questport Chronicles — has been called away on "mysterious business" and is absent for the entire quest. None of the other characters comment on it.
* The Questport Chronicles submits to demonic possession so that the heroes can have a guide to lead them through an alternate dimension filled with demons.
* The Questport Chronicles subverts this with the ruler of the titular village, who is shown to be quite a fair and competent ruler.
* The Questport Chronicles tends to skate over any violence during the (frequent) fight scenes, unless the injuries are relevant to the plot.
* The Questport Chronicles. The blacksmith's death in a plague is what catalyzes Gawain to seek adventure in Questport.
* The Questport Chronicles: The Master of Darkness, one of the most powerful sorcerers in the world, is also utterly insane. It's implied that part of this is due to returning from death.
* The Questport Chronicles. They neglect to make him promise to bring them back...
* The Questport Chronicles to buy her companions some time to start the spell that will imprison the monster. She actually manages to hold her own.
* The quest "Temple at Senntisten" begins with Azzanadra trying to gain permission from the Digsite administrators to restore a long-abandoned temple of Zaros. You have to convince the administrators that Azzanadra's human disguise is a respectable archaeologist and worth entrusting with the project by...
* The quest "Temple of Ikov" quest has you choose whether to protect the Staff of Armadyl or steal it and give it to the bad guy. When the developers made the sequel quest, "While Guthix Sleeps", they realized the plot sort of hinged on the bad guy having the staff, so everyone who chose to protect it received a note from the guardians that it had been stolen by somebody else.
* The quest that follows indicates that your alcohol-fueled adventure led you across the breadth of Skyrim.
* The Quest: The character leaves home, voluntarily or not, on a big adventure to recover something or search for someone.
* The quest to reclaim HK-55 as a companion begins with a cutscene of HK gunning down every other droid in the testing chamber, as panicked technicians run to and fro, until the Outlander arrives and surveys the scene with HK and the lead tech standing amidst the devastation as one burning droid in the background slowly collapses.
* The quest "Wang Dang Atomic Tango" has the owner of the Atomic Wrangler Casino hiring
* The Quest, who starts out being very harsh with the Paladins (contestants) but gradually warms up to them.
* The queue music for Splash Mountain includes an instrumental version of "Sooner

or Later", the
* The quevari appear as normal, pacifistic human beings most of the time, seemingly untouched by the evil that surrounds them. Until the three nights of the full moon that is, when every man, woman and child turns into a bloodthirsty killer. They've learned to block out what they do when they change, and never speak of it (even to travelers).
* The Quibbler, which he figures is the reason why Luna had it upside down when they first met.
* The Quick and Dirty Life of Fritz Fargo is about five feet tall and therefore at least one head shorter than most of the other characters. However, he tends to dominate most of the people he knows with sheer force of personality. Played more straight in his relationship with Seth, who's his manager as well as his boyfriend, much older, very controlling, and probably about a foot taller than him.
* "The Quick and the Blue" has Quickman becoming increasingly aware of how boned he is, but
* The Quick and the Dead a splode, but what's left can't be structurally sound.
* The Quick and the Dead as they begin their final duel, revealing that she is the young girl who was forced by him to accidentally shoot her father years earlier.
* The Quick and the Dead before the chime, and to listen for it and start drawing then, since it's too close to the chime for anyone watching to tell the difference.
* The Quick and the Dead, Cort is forced into public gunfights with a single bullet in his pistol. When his first shot injures but fails to stop Spotted Horse, he pleads with the audience for someone to find him a second bullet. The blind boy digs one from an ammo box by feel and tosses it to him, allowing him to finish off Spotted Horse before the wounded man's wild shots can connect.
* The Quick and the Dead: Cort starts out this way, a somewhat awkward, hapless preacher who initially seems to be way in over his head when he's forcibly entered into the quick draw competition. He refuses to participate and repeats over and over again that he won't draw... until the clock strikes the hour and he's shot his opponent without even seeming to realise it.
* The Quick and the Dead Dred, who's burst into the saloon after her. The murdered drink is immediately avenged by the quick-shootin' Lady.
* The Quick and the Dead, Gene Hackman's character doesn't think he's been shot until he sees the hole in his shadow.
* The Quick and the Dead hat, and leaves him shackled to a wrecked wagon in the middle of the desert.
* The Quick and the Dead, Herod is the mayor of a small town because he has the most hired muscle on his side and he is nigh unbeatable in a gunfight.
* The Quick and the Dead, is heartlessly gunned down when the two of them duel.
* The Quick and the Dead is hosting, as well as competing in, a gunfighting tournament. One of his opponents is Ace Hanlon, a man with a few tricks, but whose guns aren't quite as quick as his mouth. As their fight is about to begin, they have the following exchange:
* The Quick and the Dead is kept shackled between duels. Before his second-round fight, he can be seen ripping the cuffs of his shirt out of the bloody welts left on his wrists by the shackles.
* The Quick and the Dead is this, mixing card motifs, gun tricks, and lots of pompous boasting.
* The Quick and the Dead of twenty seconds to get out of town, Herod takes a rifle from one of his bodyguards and calmly shoots Ratsy in the back as he is still running.
* The Quick and the Dead tears off his clerical collar. "Welcome back, killer."
* The Quick and the Dead. The entire movie centres around a quick draw competition, so the entire cast is filled with gunslinger. While most are Quick Draws, Cort and Ace are also Trick Shots.
* The Quick and the Dead, the Kid works a day job as the town's gunsmith.
* The Quick and the Dead. The Lady wakes up on a bed in the Kid's gunshop and the Kid says he won her in a poker game. The Lady isn't fooled, saying the last thing she remembers is the Kid passing out from too much booze.

* The Quick and the Dead, the second of which is a headshot, and even then it briefly looks like Spotted Horse is going to come back for more before he stays down after all.
* The Quick and the Dead to gain an advantage on Herod, who cannot be beaten in a straight fight by anyone except for Cort, who is handcuffed most of the time and unwilling to kill except to save his own life.
* The Quick and the Dead was translated as Faster than Death, which makes little sense.
* The Quick and the Dead, we see the little blind kid smiling and pouring red ink on the ground.
* The Quick and the Dead: When Lady first arrives at the saloon, the bartender tells her "Whores next door" without turning around. She quickly corrects his misapprehension by kicking the chair he is standing on out from underneath him.
* The Quick and the Dead: When the Lady wakes up in the Kid's shop with no memory of how she got there, the Kid claims he won her in a game of poker. As the last thing she remembers of him puking and passing out behind the saloon, she is pretty sure he is lying.
* The Quick and the Dead, who must ultimately take the cheapest and ugliest gun in the store.
* The quickling, an evil fey creature, is a monster version: very few hit points and an extremely short lifespan, but capable of giving the Flash some serious competition in a sprint. Don't even bother rolling initiative for this one.
* The Quicksilver Sash and the Mercurial Scimitar also erase all debuffs from you, and Banshee's Veil can block one spell entirely.
* the Quidditch World Cup, Hamakaze batted away a ball of Veela fire that was headed for their group, with a look of absolute determination on her face.
* The Quiet American begins with the narrator discovering the other main character, Pyle, is dead.
* The Quiet American feels about the whole thing. (As the page quote notes, this is symbolic of the state of the world at the time, with the older European powers trying to hold on to their empires while the idealistic but naive Americans try to interfere, with neither side giving much thought to what the people of the third-world countries actually want.)
* The Quiet American, in which the foreign correspondent is a vacuum cleaner salesman in pre-Castro Cuba.
* The Quiet American is largely about the rivalry between a young American man and an older British man for the affection of a Vietnamese girl. This soap-opera takes place against the backdrop of civil conflict in 1950s Vietnam. It's also symbolic of the conflict—the aging European powers losing their grip on the world, the idealistic Americans trying to make a difference and not entirely understanding what they're getting into, and the Third World, caught between them.
* The Quiet American: The bombings Pyle orchestrates are blamed on Communists to justify further American involvement. The same may also be true of the village massacre earlier.
* The Quiet Deviless is a charming devil who wants you to sell her your soul, but if you are
* The Quiet Duel has Dr. Kyoji Fujisaki, a man so incorruptibly pure that he is even able to overcome the emotional challenges of contracting syphilis from another patient and does not give in to the corruption.
* The Quiet Earth (a 1985 sci-fi film from New Zealand), Joanne serves Zac breakfast in bed, wearing an apron. When she turns to leave, we (and Zac) see that she is not wearing anything else below the waist, causing him to spill hot coffee on himself.
* The Quiet Earth, almost all of humanity disappears, leaving the handful of survivors with everyone else's stuff.
* The Quiet Earth, a scientist who was working on Project Flashlight. A malfunction caused almost everyone on Earth to simply disappear. He goes a little crazy in the first part of the movie, but after meeting two other survivors he tries to destroy the laboratory where the experiment took place so it can't happen again. It does

anyway.
* The Quiet Earth. He gets better after encountering two other survivors.
* The Quiet Earth (see the illustration) ends with Zac on an alien world, or radically changed Earth, immediately obvious because of the weird clouds and ringed planet rising in the sky.
* The Quiet, Elisha Cuthbert's character has an incestuous relationship with her father.
* The Quiet Game: Trying to make a kid or a chatty person be quiet by making it into a game.
* The Quiet Man adds the ability to restore voice and sound to the game on the second playthrough as "The Quiet Man: Answered" (the game was, to represent the deafness of the protagonist, muted aside from low bassy noises to indicate punches)
* The Quiet Man also plays an Irish-born American - though of course his character's accent has faded from years in America.
* The Quiet Man has the rivalry between Sean Thornton and Will Danaher come to a head, and the two combatants prepare for a slugfest. Danaher makes a show of raising his arms and announcing to the crowd, "Marquis of Queensbury! Marquis of Queensbury!" meaning that he intends to fight in accordance with the rules of boxing, as set forth by the Marquis of Queensbury. Sean Thornton, wanting to signify the same intention, mimics Danaher's performance. Thornton barely gets his hands down when Danaher wallops him with right hook that sends Thornton reeling.
* The Quiet Man. John Wayne's character killed a man in the ring and swore off boxing forever. He also decides that money is simply not worth fighting over, after all, what good does it do to die or live with killing someone else over money? Because of this belief, he refuses to physically fight for the dowry his Irish wife should inherit, not fully understanding the importance of it to her as a symbol. If not for this, the cross-country donnybrook with his churlish brother-in-law would have probably happened in the first reel, instead of the finale.
* The Quiet Man, never speaks. In this case, it's justified because he's deaf and communicates via sign language.
* The Quiet Man Sean Thornton and Mary Kate Danaher are caught in Irish ruins by a storm, and have their first close hug.
* The Quiet Man stereotyping, but it's considered a classic in Ireland. Helping matters was that it was the first big-budget Hollywood film to be shot there, features mostly Irish actors (besides Victor McLaglen and Ward Bond) and has the Irish language spoken on-screen. It's frequently played on television around Christmas in Ireland.
* The Quiet Man Thornton and Danaher end up in a bar where they stop to have a shot of whiskey and each politely offers to pick up the tab. This soon turns into an argument and they end up fighting again.
* The Quiet Man: When Sean Thornton and Mary Kate Danaher finally (mutually) decide to accelerate the socially prescribed and glacially slow courtship routine in turn-of-the-century Ireland, they seize their chance to be alone together and escape from their matchmaker-cum-chaperon Michaeleen Og Flynn on a tandem bicycle. They are overtaken by a torrential downpour and take refuge in the ruins of an old stone church, where both of them get soaked and have their first dramatic kiss (whereupon it immediately thunders, a metaphorical indication of "you shouldn't be doing that").
* The Quiet One: A character who doesn't talk as often as the other characters.
* The Quiet One: A character who does speak, but not as much as the other characters.
* The Quiet One has one of these of the focused and serious variety on her face when she enters her rarely seen secondary "serious mode" personality. Subverted in that she's usually the smiling, cheerful and talkative type character otherwise.
* The Quiet One; however, when she starts speaking, she doesn't stop, especially when explaining something scientific.
* The Quiet One: Just because they don't say much doesn't mean they don't have anything nice to say.
* The Quiet Ones an experiment where a group of parapsychologists attempted to

create an artificial poltergeist through expectation of human will. The results the participants reported, much of which were undocumented to begin with, were exaggerated for the movie; Also, the characters and circumstances were fictionalized, and the setting was moved from 1970s Toronto, Ontario to 1970s Oxford, England.
* The Quiet One's Van Fanel quickly picks up the habit of screaming bloody murder during anything resembling a serious fight.
* The Quiet One: They don't say much, often tend to not get involved in conversations with others.
* The Quiet One. Unless pretending to be stupid involves doing something that's funny, you won't get much screentime by staying out of harm's way. That being said, if you can convince the players in control that you're not a threat at all (e.g. Natalie White, who played this to perfection), they'll take you to the end under the assumption that you're no trouble to beat.
* The Quiet One who wants nothing more than a quiet, unexciting summer, and will go out of her way to try and get the duo caught by their parents.
* The Quiet War controls South America and, in theory North America as well, although most of North America is, at best a frontier, at worst complete wilderness. The European Union and Pacific Community are also mentioned as major powers but not how big they are.
* The Quillan Games series features the territory of Quillan, in which the Blok corporation, which started as a general store, evolved until it completely controlled the territory, and produce everything, from food to buildings to artwork, on the planet. If it doesn't have the name "Blok" on it, it probably doesn't exist or is boarded up underground with a factory or concentration camp built over it.
* The Quiller Memorandum (film and novel). Quiller finds a bomb tucked under his car, rigged to detonate as it hits the ground when Quiller drives off. Because he's under surveillance and wants to fake his death, Quiller places the bomb on the hood and starts the engine, hoping the vibrations will make it slide down the hood and fall off. However nothing happens after a while and Quiller worries that the bomb has become stuck; he's going to check when the garage blows up in his face.
* The Quincies are dominated by the number 5. Their cross motif is a five-pointed cross that can appear in both pentacle and pentagram formation. There are also special attacks that utilise five Seele Schneiders to pull off. Later on, they reveal they've designated five Special War Potentials that they take very great interest in (Ichigo, Kenpachi and Aizen are quickly confirmed, Yamamoto is quickly excluded, the identities of the remaining two are not revealed for a long time).
* The Quincies hunt Hollows and hate Shinigami. That hasn't stopped Yhwach forcibly enlisting Hollows and attempting to recruit Shinigami to their ranks. Although some Arrancar accepted the offer, no Shinigami so far has. The Quincies themselves are a diverse group that comes from all over the world.
* The Quincy have a preference towards cladding themselves in all white. The
* The Quincy use technology to aid them the most, in the form of VTOL craft and tanks that can fire Quincy arrows for use in Hueco Mundo, etc.
* The Quinn/Finn/Rachel love triangle had Rachel and Quinn alternating the role of runner up. The most notable instances were in season 2. Finn and Rachel broke up, leading to him and Quinn getting back together with Rachel still pining for Finn. Then Finn dumped Quinn because he was still in love with Rachel, making her the runner up.
* The quintessential example, and one that was parodied at the time the game came out, is
* The quintessential new Russian joke about a Zaphorozhets and a New Russian's car is as follows:
* The Quintessential Phase had Sandra Dickinson voice Tricia McMillan (Trillian's
* The Quintessential Quintuplets, and he accidentally crashes into her bossom. Unusually for this trope, she doesn't seem to mind too much.
* The Quintessential Quintuplets, and he compliments both dishes equally, and in a later chapter he eats some croquettes that Yotsuba thinks look more like stones and

doesn't find tasty at all.
* The Quintessential Quintuplets, and Itsuki is left wondering if she might have fallen for him as well.
* The Quintessential Quintuplets. And of course, there's the fact that they begin to compete amongst each other for the affection of Fuutarou once they start developing feelings for him.
* The Quintessential Quintuplets), and once she learns the truth she feels conflicted. It's not until Chapter 59 that she finally realizes she can't separate one from the other and accepts she fell in love with Fuutarou.
* The Quintessential Quintuplets (and took a photo of him sleeping to blackmail him over it).
* The Quintessential Quintuplets. As children they were so alike it was but impossible to tell them apart, but by the present time they've all diverged in personality and appearance:
* The Quintessential Quintuplets: As the Nakano sisters were all nearly held back a year before transferring schools, leading their father to hire a private tutor out of desperation to help whip the five of them into shape; which is where Fuutarou comes in.
* The Quintessential Quintuplets attempt this at different points with the male lead:
* The Quintessential Quintuplets: At the end of the anime's first episode:
* The Quintessential Quintuplets, because she wants to show Fuutarou that she can improve and make him happy, with no thoughts at all to her established interests in history).
* The Quintessential Quintuplets begins with Fuutarou and one of the Nakano sisters marrying. It then goes back to just before their first meeting in high school and the story is about how they get together, with the complication that the sisters are identical quintuplets so the reader isn't sure which one's the bride.
* The Quintessential Quintuplets can easily induce this on anyone who meets her, but especially on Itsuki and Yotsuba.
* The Quintessential Quintuplets does this while asking him to dance with her by the bonfire.
* The Quintessential Quintuplets: During the "Seven Goodbyes" arc, Itsuki explains to Fuutarou that, while she and her sisters are well-off now, before their mother married their stepfather they used to be as poor as him.
* The Quintessential Quintuplets: Fuutarou finds himself on the giving and the receiving end of this trope. First, he does it to Itsuki as he declares himself her tutor and that they're "partners", and later he receives it from Ichika when they're hiding in an alley from her manager.
* The Quintessential Quintuplets: Fuutarou has been the top student of his school for a long time, until a guy named Yuusuke Takeda finally scores higher than him (due to him being busy tutoring the Nakano quintuplets). Fuutarou doesn't even know who Takeda is, since he never bothered to check the names below his own ranking, much to the latter's chagrin. Later however he does acknowledge Takeda as a rival, and the two seemingly become friends while forming a group for a school trip to Kyoto.
* The Quintessential Quintuplets: Fuutarou Uesugi can't help but be somewhat disappointed when, during the final exams, he doesn't get full 100 scores like he usually does, partly owed to his helping the Nakanos. His grades are still pretty high (over the 80s, and the teachers know he could have scored higher hadn't he been too tired to leave a few questions unanswered.
* The Quintessential Quintuplets: Fuutarou Uesugi is a straight-A student whose physical capacities are below average, to say the least. His father Isanari, however, has a muscular physique that suggests he regularly exercises.
* The Quintessential Quintuplets has a brief non-romantic example in Chapter 37. Yotsuba has decided to take Fuutarou on a date during Thanksgiving Day, and they just happen to run into Fuutarou's little sister Raiha (who's hanging out with Itsuki). The two briefly start pulling on Yotsuba's arms, and the manga even lampshades the situation calling it "Uesugi sandwich".

* The Quintessential Quintuplets has numerous examples, being about a group of identical quintuplet sisters who are identical save for their hairstyles and hair decorations. It's taken to an extreme when all but one of them is late for school. Yotsuba, the only one who made it on time, makes up an excuse to leave and the other four sisters disguise themselves as her to get in under the watchful eye of the student counselor. Said counselor is left confused as to why the same girl is leaving and returning so many times.
* The Quintessential Quintuplets: Ichika's room is, in the words of her sisters, "a disaster zone". When Fuutarou enters it for the first time, one of his first questions is how someone could live in that dump. Later when they move to a more modest apartment, her section of the bedroom also starts looking like this.
* The Quintessential Quintuplets instead of Ichika's. Naturally Fuutarou has a minor freak out when he wakes up in the morning and finds Miku sleeping next to him, but thankfully the others never find out.
* The Quintessential Quintuplets. It gets to the point they all invite themselves to the honeymoon to stay together.
* The Quintessential Quintuplets, lists the qualities she likes of him without hesitation when asked).
* The Quintessential Quintuplets: Male lead Fuutarou Uesugi stands 5'10" over the Nakanos' 5'3" at the start of the story. Though the gap is later a bit closed since the quintuplets grow a couple of extra inches by the time they start their senior year in high school.
* The Quintessential Quintuplets. Nino confesses to Fuutarou that she loves him in Chapter 59, but due to the noise of the bike they're riding and the wind, he doesn't hear her. In the next chapter, when Nino realizes he didn't hear her confession, she repeats it to his face without a shred of hesitation.
* The Quintessential Quintuplets of all people steals the moment when she notices a bit of cream on his cheek and kisses it off for him. Naturally the others react with varying degrees of shock at her unexpected boldness.
* The Quintessential Quintuplets romantic interaction with him, acting more like a platonic friend.
* The Quintessential Quintuplets), she's moved to tears when he tells her the story of his first love and even tries to comfort him saying that there must be someone for him out there, believing that for everyone in the world there must be someone who will love them.
* The Quintessential Quintuplets. She's well aware of her family's financial state, and she handles the cooking and housework (despite her young age, she's actually very good a it). Her brother Fuutarou comments that she often holds back on asking for things she wants, and he actually spends his first tutoring paycheck on taking her to an arcade simply so she can act like a child for once.
* The Quintessential Quintuplets. She then accidentally dislodges a stack of books from a shelf and he jumps to try and shield her, and ends up falling on top of her. To make it worse, Itsuki is there to take a photo of the scene.
* The Quintessential Quintuplets, Shimoda is left with a rather big bill to pay after Itsuki leaves.
* The Quintessential Quintuplets: The Nakano sisters all contrast themselves one way or another. Here are some of the most notable dynamics:
* The Quintessential Quintuplets: The Nakano sisters' birthday is on May 5, that is, the fifth day of the fifth month.
* The Quintessential Quintuplets the real Miku was in love with him and she would never say that.
* The Quintessential Quintuplets: The story had the trope being played and flipped around quite a bit, since almost every girl had something to be considered "the first" in their relationship to male lead Fuutarou. In order:
* The Quintessential Quintuplets: When the Nakanos visit Fuutarou in the hospital, Ichika and Miku decide to attempt this, with Miku even saying "AAAAHHH" as she tries to give him a bun of bread. Comically, Fuutarou ends up holding two buns in his mouth at the same time.
* The Quintessential Quintuplets where they start playing on the swings. Fuutarou

manages to do a full turn, which makes him laugh out loud. Yotsuba's thoughts then reveal all she wanted was to see him smile and happy.
* The Quintessential Quintuplets: While on the way to a school camp, Fuutarou and the Nakanos get stuck in the middle of traffic, so to pass some time they play a game where one person hides all but one finger behind their other hand, and the rest have to guess which finger they're holding up (with each finger named after a different sister). Fuutarou guesses that Nino is holding up her namesake (index) finger. Nino cheerfully informs him that it was actually the Miku (middle) finger, making sure that the back of her hand is facing Fuutarou when she does the reveal.
* The Quintessential Quintuplets while sitting on a bench. Ichika takes pity on him and lets him rest on her lap as reward for everything he did that night. A later chapter shows that she even snapped a photo of this, which she uses to blackmail him into getting her sisters' emails.
* The Quintessential Quintuplets: While they're not completely unsympathetic, the Nakano quintuplets are at first primarily characterized as a group of lazy idiots who bring most of their problems upon themselves.
* The Quintessential Quintuplets, Yotsuba is the most athletic among her sisters, with both the basketball and track teams wishing to recruit her full time, but she has also the worst grades of all.
* The Quintessential Quintuplets: Yotsuba Nakano, the fourth amongst the titular quintuplets, also the most athletic of them. Both the basketball and track teams want her to join full time.
* The Quintessons have diverse body types by caste. Judges have five faces, but no actual 'head', just a balloon-shaped body. They have no arms or legs, and instead get around via hovering on an beam of "energy" at the bottom of their body. If they do need to carry something, they use the thin tentacles that surround the beam of energy Prosecutors and Scientists have similar features but have thicker green tentacles, additionally having only one head on a humanoid torso. Instead of arms, they have at least three thick green tentacles on each "shoulder". Others have more humanoid bodies, but are the exceptions to the rule. In their initial appearance, in
* The Quintessons revive Optimus Prime as a zombie to destroy the Transformers, but his original personality starts to resurface, and he launches himself to the sun in a spaceship to stop their plot (he didn't get there, though his eventual return was
* The Quintessons themselves, or at least the ones who were personally around before they lost Cybertron (e.g. the three-face who built the Transorganic energy-leech) also qualify.
* The Quinx Project, an attempt to create superior Ghoul Investigators through implanting a modified ghoul organ into a human host.
* The quirky American ice cream manufacturer Ben & Jerry's has made
* The Quirky Tale of April Hale by Cathy Octo, the titular protagonist April Hale speaks like Yoda when she's nervous.
* The Quisling arc has two cases of this. First, a group of surviving National Guard personnel are deliberately approached by Oliver shortly after he
* The Quisling, as in their normal states they're blind, powerless slugs. There is even a faction of Yeerk society that disagrees with the morality of taking hosts forcibly, and will only infest the willing, who act as an underground resistance movement.
* The Quisling: Someone betrays the rest of his kind to side with the invading forces.
* The Quisling: Someone decides to pledge allegiance to an invading force, selling out their own country or world.
* The Quisling: The puppet leader of a collaborationist government, appointed by a foreign military occupation. Often the first against the wall when the revolution comes.
* The Quiz Broadcast (remain indoors) also has a sudden death round, but the third contestant, Unknown Male 282, promptly screams and drops dead before it even begins. Evidently, the show does not operate under the same rules as

* The Qunari are a civilization of tall, muscular, brown-skinned humanoid
* The Qunari are sort of a mix of medieval Muslims (due to their position as a major religious rival to the other dominant religion in Thedas) and the Moors that ruled Spain and Northern Africa (due to their firm but rather lenient occupation of Spanish-based Rivain), with a religion
* The Qunari as a whole are incredibly manly, standing over 7 feet tall and going anywhere bare chested, with red warpaint and a permanent scowl on their faces. Entering their camp is like walking into a gym and a biker bar at the same time.
* The Qunari engage in this occasionally, being experts in willful ignorance. If anyone mentions Qunari soldiers who happen to have lady-parts and identify as women for example, the Qunari will claim that said soldiers are
* The Qunari have a form of caste system as their religion prescribes distinct roles to members of the race that are inseparable from their personal identity. As far the Qunari are concerned, if you reject your given role you reject your identity and might as well be dead. They are utilitarian and believe that individuals are essentially tools with assigned functions, a sword cannot become anything other than a sword and a warrior cannot become anything other than a warrior. Roles are assigned at a young age based on the child's abilities and inclinations, not based directly on birth; that said, the caste that directs breeding and rears children has had some limited success in creating specialist bloodlines.
* The Qunari have a similar notion: "Outsider" in their language is "Bas". It can also mean "Thing". The name "Qunari" actually means "follower of the Qun", with the Qun being their religion; like with the elves, they take the distinction quite seriously but everyone else treats it as just a name for the race.
* The Qun resembles Confucianism with its dedication to societal order above all else, and each member fulfilling a designated role in that society.
* The Quorum Derek Leech is something inhuman that walked out of the polluted slime at the bottom of the river Thames fully-formed. He's close enough to human that most people don't notice anything odd about him, except perhaps the fact that he's continually chewing on something — which is because his teeth are always growing and need to be continually worn down. He also eats really weird things from time to time, because he can't get sick and he has no sense of smell or taste.
* The Quorum: The best and longest-lasting romantic relationship in Neil's life comes to an abrupt end after he steps into a pub for a quick drink with an old friend, only for a series of unfortunate accidents to result in him faceplanting into a compromising position with a young lady just as his girlfriend comes in to see where he's got to. She refuses to believe that it's just an accident, and in a way she's right: the whole thing was carefully orchestrated by the old friend, for an ulterior motive Neil doesn't find out about until much later.
* The quote at the top is from the pilot, where he has mixed in the above with more than a bit of bullying after the murderer becomes wise to his
* The quote for this trope is provided by the song "I Loved Her First" by Heartland which is about a father who is giving away his daughter
* The quote is a slightly truncated version from the storyline Batman got the ring, "Dark Knight Over Metropolis". In it, Superman and Batman work together to try to figure out why a homeless man was found dead with Lex Luthor's old Kryptonite Ring. Batman ultimately pieces together that the ring was actually in the possession of a woman who became manically determined to prove Clark Kent and Superman were one and the same and was killed by a bunch of random muggers, which lead the homeless man to take the ring. Batman initially kept the ring, but gave it to Superman at the end, only for the Man of Steel to return to Batman and give him the ring, feeling that he could trust Batman with such a dangerous weapon.
* the quote seems all but apocryphal, with Gates even stating in a 2001 interview "Do you realize the pain the industry went through while the IBM PC was limited to 640K?" while adding that IBM's RAM had to be pushed up from 512K following much pressure from software developers.
* The quote "That which does not kill you only makes you stronger" or a paraphrasing thereof is usually attributed to

* the Quozl, whose ability to offer violence is bound by very formal doctrine, intend to use humans as warriors to fight in their stead, should the need appear—indeed, they believe they've enslaved
* The Qur'an (4:23) describes in detail which relatives men are forbidden to marry: mothers, daughters, sisters, aunts, nieces, foster mothers, foster sisters, mothers-in-law, daughters-in-law, and stepdaughters unless the men haven't had sex with their mothers. Note that cousins are not mentioned, hence why cousin marriage is permissable in Islam.
* The Qur'an actually credits crows with teaching humans how to properly mourn and bury their dead.
* The Qur'an (among whom are Alexander the Great and Cyrus the Great), being asked to protect a people from their enemy, the Ya'juj and the Ma'juj (Arabic names of Gog and Magog, but as peoples instead of individuals). He does so by building an exceedingly tall wall entirely made of iron, with a massive iron gate that's difficult to open.
* The Qur'an, but the story is even shorter than in the bible and doesn't actually give the two brothers names. In this story, The Prophet was told to tell the early Muslims about 'the two sons of Adam'. After his sacrifice was not accepted, the Cain figure told his brother that he would kill him. The Abel figure replied that God would only accept the offerings of people that listened to him and that a murderer would go to Hell burdened by his own sins and those of their victim (the victim would be forgiven as a result of his unjust death). This version of Abel also refused to "stretch out my hands to kill you, even if you stretch out yours to kill me", and said that he feared God and would rather his brother burn in the fire for murdering him than sin himself. Cain was prompted by his 'wicked soul' to kill his brother, and instantly became a lost person for that act. Since he had no clue what to do with the body, God sent a raven to dig up the ground and show Cain how to bury his brother. Cain was mortified and guilty because of the fact that the raven (who had buried another raven) knew what to do, but that he couldn't even give his brother a proper burial. Cain lived out the rest of his life tormented by regret and guilt. This story was meant to explain why Muslims shouldn't murder anyone.
* The Qur'an explicitly forbids to call martyrs dead because "they are alive with their Lord, receiving provision".
* The Quran, in comparison, explicitly says that punishment is proportional to sin, with hell split into many different levels according to severity of sins, and some punishments are only temporary. Heaven also contains multiple levels with those people who did good in life rewarded in descending orders.
* The Qur'an invites them over, then calls him in while they're cutting fruit. Multiple injuries ensue.
* The Qur'an, Islam's holy book, is quite detailed on Hell and describes it as a physical place of burning, torture, and punishment for sins by angels. The Hadith and Islamic literature go into further detail about the layers of Hell and which types of sinners go where. Hell is said to be guarded and kept, not by Satan, but by an angel named Maalik, an angel of punishment who has not smiled since Hell was created. According to most views, Hell is usually not eternal (unless God decides so, of course) but is more like a prison sentence, where sinners are punished by angels to cleanse themselves of their sins and then are permitted entry into Heaven. It is also often believed that nearly everyone (with the exception of children, martyrs, etc.) will experience Hell as no human is without sin.
* The Qur'an is to Muslims what the Bible is to Christians or believe that Islam is similar to Christianity in practice and institutions. In actual practice, Islam in multiple societies tends to be far looser in doctrine and practice, having little in the way of organization and centralization common even in Protestant sects. As such there are not many Muslim adherents who have read their Holy Book all the way through.
* The Qur'an. Like any other example from other religions on this list, it contains the guidance and directives on how to live your life; and its historical narrative of religious figures again partially overlaps with the aforementioned Talmud and

Bible. The Hadith contain Muhammad's life and teachings, including everything that has become Islamic Law. Depending on the edition, commentary, or translation, it could be three, six, nine, or even fourteen volumes!
* The Qur'an — to the point where the latter prophesies that Lahab will eventually burn in hellfire as an unbeliever. Of course, Lahab not believing in such things is unmoved by such a threat. The IST / Catch-22 comes when some use this passage to reason that Lahab could have easily have proven Muhammad's prophecy wrong and thereby scored further points by simply converting to Islam — as it would thereby let him avoid going to hell (as according to Islam). Yes, Lahab ought to have debunked the teachings and inspiredness of Muhammad by accepting the teachings and inspiredness of Muhammad, according to the rules as dictated by teachings and inspiredness of Muhammad...
* The Qur'an nor Muhammad ever said anything about martyrs receiving the company of 72 virgins in paradise. The idea was first written down by a commentator 200 years after the death of Muhammad. And some scholars now think the word he used meant "grapes" or "raisins," not virgins.
* The Qur'an." Not only is killing allowed as punishment for murder but also for those who commit "mischief in the land". And for the extremists, all misbelievers are committing mischief. They're also going by the older meaning of "mischief", which is far less light-hearted than what is meant today.
* The Qur'an: One verse mentions the story of Abrahah, a general marching with his army of war elephants to destroy Kaaba, the Islamic holy site. They were thwarted when God sent a flock of birds carrying brimstone from Hell, pelting Abrahah and his men to death.
* The Quran shows what happens when you have two different individuals with the same name and then confusing the two. The Quran doesn't mention personal names a lot, especially women, who are generally referred as "[insert name here]'s wife/sister/mother" or "the woman [who did] this [insert event name here]". However, Jesus' mother, as in the Virgin Mary, is not only named (in its Arabic form, Maryam, obviously), but gets
* The Qur'an's lifetime and was only codified by his successors. Final canonization was done during the reign of caliph Uthman (644-656 CE).
* The Qur'an's story about the Virgin Mary, named "Maryam" in Arabic, she has a brother named Harun ("Aaron") and a father named Imram ("Amram")...just like the Old Testament's Miriam, who would also be called "Maryam" in Arabic. Of course, a Muslim would argue that this is a coincidence or the case of purposefully naming one's kids after revered historical figures, while non-Muslims generally argue that Muhammad heard the stories of both "Maryams," mistakenly thought they were the same person and then re-separated the stories later when he realized his error.
* The Qur'an (surah 12): When Yusuf (= Joseph in the Bible) is the slave of a rich Egyptian (only referred to as Al-´Aziz, "Mighty One"), the wife of his master tries to seduce him. Yusuf refuses her and tries to run away, and as the wife is trying to hold him back, she rends his shirt from the back. Her husband comes by and she explains the situation as Yusuf trying to assault her. However, 'Aziz does not believe her, because he notices that Yusuf's shirt is torn from the back, not from the front. As a result, 'Aziz' wife is mocked by the other women of the city for being attracted to a slave. She retaliates by inviting the other women to their house so they can see Yusuf themselves, with the effect that all of them now want Yusuf. Yusuf again rejects them and is eventually thrown into prison on account of the scorned women (although the Quran does not say under what accusation he is imprisoned). More so than the Biblical account, the Quran is somewhat sympathetic to 'Aziz' wife because it makes clear that Yusuf is incomparably beautiful, and that Yusuf is also attracted to her in turn and rejects her only because adultery is a sin. Yusuf even prays to be thrown into prison because he fears otherwise he might eventually give in to seduction.
* The Qur'an then verily Allah is an enemy unto the infidels." According to commentators, Jibril and Mikail are apart because they are the most important angels.
* The Qur'an). Unlike the Bible, Iblis is explicitly described as being responsible

for goading Adam's wife to eat the forbidden fruit, as he had vowed to tempt humanity following his expulsion.
* The R40 tour took place in the late spring and summer of 2015. As predicted, 40 and the usual suspect 2112 became arc numbers.
* The Rabbit Factory he reveals that he took his bowling ball out to the shooting range and used it as a target.
* The Rabbit Listened, the young boy Taylor's jaw drops in shock and upset after a flock of crows unexpectedly knocks down the amazing block tower he created.
* The Rabbit Miraculous can be used to travel through time. However,
* The Rabbitray, encountered in the starting area, is the basic form of a number of species of poisonous, jellylike ray- or skate-like creatures, including the Jellyray (found in several deep biomes), the Ghost Ray (found in the Ghost River), and the Crimson Ray (found in the different
* The rabbit's constant failures have made fans depict him as becoming violent, sadistic, and lethal, after being denied the cereal for so long. One video, "Silly Kids, Trix Are For Rabbits" depicts the rabbit being denied the Trix for the umpteenth time, and sadistically kills both kids, ending with an inversion of the old tagline, and a maniacal laugh.
* The Rabbit Who Ate Las Vegas": Face carries Amy over the threshold of a hotel room while they're masquerading as a honeymoon couple. He sets her down quickly once the bellhop leaves and remarks that it's no wonder that he never married.
* The Rabbit with the Checkered Ears, colloquially known in English as "Bunny in the Suitcase"
* The Rabbit with the Checkered Ears features no spoken dialogue (except the odd unintelligble whisper).
* The Rabbit with the Checkered Ears, some of the cookies are attracting the attention of the local bird population, but not enough to break the trail.)
* Therac-25 The Therac-25 disaster is used to demonstrate several basic design principles:
* The Raccoon City Police Chief: "But you're not leaving my town! Everyone's gonna DIE!".
* The Raccoons, as the series started out very uninspired and cartoonish, but shifted gradually to more serious, realistic and story-driven.
* The Raccoons, Bentley is recruited as a computer technician for Sneer Industries by the Pigs, only for them to sabotage his work when they get jealous at how well he's doing. Sure enough, Bentley is fired and is moaning how his career prospects are ruined while Bert and Cedric can't get a word in edgewise of how no future employer is going to pay attention to a mishap that happened to someone as a child. Regardless, Cyril finds out the truth and Bentley is exonerated with an even stronger lock on a job with Sneer Industries when he is older.
* The Raccoons, Bert acts like a child, but he also seemed to have graduated school and works as both a professional journalist and paperboy.
* The Raccoons drew their characters in adult situations, put the drawings on the walls of the Hinton Animation Studios, and later even created print collections for themselves entitled "Off the Walls" vol. 1, 2 and 3.
* The Raccoons episode "Surprise Attack!", where Cyril Sneer mistakes plans for a surprise party as a plot against him.
* The Raccoons for the backstory of the three main Bachelors involved; Bert Raccoon (bought by a little girl for a picnic), Cedric Sneer (bought by his girlfriend) and Cyril Sneer (bought by the reporter he was trying to avoid).
* The Raccoons had the same recycled close-up shots of the main characters (including Mr. Knox, Lady Baden-Baden and Bentley) talking, even after switching from Atkinson Film-Arts to Hinton Animation Studios at the start of season 2.
* The Raccoons, he even designs a solar-fueled car and his father's mansion security system.
* The Raccoons: In order to cheat Cyril Sneer out of half of Sneer Industries, Sid Leech posed as Cyril's long-lost brother Simon.
* The Raccoons in the fandom, and naturally has gained a lot of fanart from furries.

* The Raccoons in the river. It's then that he realizes that the gem was not stolen but knocked in an aquarium, and was rendered invisible by water refraction, same as Cedric's lenses.
* The Raccoons is a terrible trumpet player, but everyone is to polite to tell him.
* The Raccoons is sometimes this; he is not so bright nor is he so dumb.
* The Raccoons, Lisa is often frustrated by her younger brother Bentley's obnoxious behavior in Season 5.
* The Raccoons made for Boomerang only covers 33 episodes (All episodes of Season 1 and 2, all episodes of Season 3 except for "The Chips Are Down")
* The Raccoons' premiere episode for season 2 "Double Play" where Bert and Cedric competing for entering a professional baseball team, the Mammoth Mudhens. Bert's team playing them is called the Evergreen Giants.
* The Raccoons", when Lisa asks Bert if he wants to have a soda with her at the Blue Spruce Cafe, Bert's usually bent nose straightens itself out as hearts fill his eyes.
* The Raccoons, which used the song as its theme tune. Unfortunately, the footage used is from the special "The Raccoons and the Lost Star", which predates the writing of the song (let alone the recording of this version in 1987) by about two years.
* The Raccoons, who were the original owners of Bruu, though not long after the humans were phased out entirely. Though since they never actually interacted with the anthropomorphic animals they may not count for this trope.
* The race between a Mercedes-Benz and a cruise ship was their longest yet, running over 1300 miles and ending the day after it started.
* The race from Heathrow to a ski resort in Switzerland between a new Ferrari and a series of forms of public transportation. Notable for having one of the closest finishes on the series.
* The Race have a procedure for removing someone from a position of power that's remarkably similar to an impeachment vote; one of them lampshades its resemblance to the "snout-counting" that they hold in contempt. They seem to justify it to themselves that they are counting the snouts of those who have the proper authority, not just the general public at random.
* The Race is about a coast-to-coast airplane race taking place when fixed-wing aviation is in its infancy (1909). One of the entrants has just left her husband and the protagonist must protect her from him during the race.
* The race known as the Shi'ido can shape-shift into humanoids of any species, including specific individuals, as well as animals of various sizes.
* The race of humanoids that evolved from Lister's pet cat discovered his plan to move to Fiji (which they called Fuschal) and open a hot dog and doughnut stand, and built an entire religion around it. They near-obliterated themselves in a holy war over what colour the
* The race of Ice Warriors, originally native to ancient Mars, consider it the ultimate disgrace to remove their armored body-suits. Thus, the Eleventh Doctor knows the situation has become
* the Race's culture expand their worship of their Emperor (and past Emperors) to include veneration of certain important other figures from their history, who are granted the saint-like title of "Most Loyal."
* The Race's Empire controls mainland Latin America, Africa, the Iberian Peninsula, Poland, Australia, and all of mainland Asia aside from Indochina and the USSR.
* The races of giants in are bound by a caste system called the Ordning, which is rather unique in that it measures status on an individual basis; there's a large-scale Ordning ranking all the Giant breeds, but a Giant's loyalty to their tribal superiors always supersedes loyalty to other Giants, no matter how high on the Ordning they may be.
* the races of Men, but they've still got enough spirit left to fight off the Aldmeri Dominion and keep Skyrim from fully seceding.
* The Rachael Ray Show has been running since 2006, outlasting the combined ten-year run of the three daytime talk shows that preceded it (eponymous shows hosted

by Rosie O'Donnell, Wayne Brady, and Tony Danza).
* The "Rachel" cut, the flat, straight and square-layered hairstyle worn by
* The Rachel Maddow Show used it more than once to reference uses of fear in politics.
* The Rachni, an alien race the player can save or doom to extinction,
* The rachni are a sentient, if extremely alien, species of insectoids who were thought to be actually extinct; you have the choice of either
* The Rachni communicate telepathically and refer to it as "singing", and colors also appear to be part of their language. The only way they can communicate with other species is by [[spoiler:possessing recently dead, about-to-die.
* The Rachni Queen encountered during the first game also counts. She remembers the fall of her race and was their last hope for survival. Her drones have been severed from her and driven insane; she remains the last hope of the Rachni, and you get to choose between letting her live (the Paragon option), and killing her to end her species for good (Renegade). As usual for this series, the Renegade option has no real gain, depriving you of an ally in
* The rachni queen is a member of a race famous for bringing the galaxy to its knees in a scuttling tide, who claims she wishes only to live in peace, far away from the rest of the galaxy.
* The Rachni Wars deserve an honorable mention. They begin at roughly 1 AD, and the galaxy is on the back foot until the discovery and uplift of the krogan in 80 AD. It's not until 300 AD that the rachni were declared extinct.
* The racial face morphing scene in the music video of "Black Or White" and the (often ommitted) scenes afterwards where he dances in a back alley, hits a car with a crowbar and changes into a panther.
* The racist asshole sheriff was forced by Jesse's voice-of-God command to "go fuck himself", and committed suicide after he severed his penis and, well,
* the racist Chancellor Neighsay is truly touched when the non-pony students he'd locked up freed him in an Enemy Mine.
* The Racket (1928), has a war between rival bootlegging gangs as a plot point.
* The Racket-Rotter Chronicles/Horror (Arc 3), and is now currently a sort of horror/friendship hybrid (Arc 4).
* The Racket-Rotter Chronicles: In a late chapter of Arc 1, an inebriated Silver attempts to do this to Shark.
* The Racket-Rotter Chronicles, The Builder subjects Silver to one in Arc 3, after slashing her neck. She is then left to die with only her (presumably) stillborn child for company.
* The Racket-Rotter Chronicles with the main cast going on their road trip naked. Harwood also uses nudity early in Arc 6 to mess around with his new neighbors.
* The Radar exist and actively censor content. Self-censorship does not count. Post-censorship, such as by advertisers on a webcomic, also does not count.
* The Radha Krishna Temple on underground, college and community radio stations, and in hippie shops and bookstores.
* The Radiant Car Thy Sparrows Drew-like cannon, and her B&W newsreels of alien worlds shown in silent movie theatres.
* The Radiant Dawn, "cavaliers" ride on undead horses, donkeys, and other animals. They serve as psychic conduits to allow the generals and necromancers to control the "mindless" undead.
* The Radiant Dawn, Dawn is seen as a divine being by the space-faring Wutner.
* The Radiant Dawn has several types of undead. "Mindless" are the basic undead unit that shamble forward and attack on sight. "Cavaliers" are undead that use zombie beasts as mounts and serve as an extension of the psychic command that generals have over the mindless. "Generals", along with antagonists Aaron and Stacie, are intelligent liches that exert psychic control over other undead. "Necromancers" are a specific type of general that can raise corpses as mindless and can open portals between places in the world.
* The Radiant Dawn has the cult of Tyadrig, an evil demon lord whose goal is to slay Jehovah, the Christian God. The cult seeks to summon Tyadrig to Earth, but to do this, they have to annihilate all non-cult humans because hostile sentience on

the planet interferes with the summoning ritual.
* The Radiant Dawn has the Wutner, a species of blue-tinted stocky humanoid aliens with hooked claws.
* The Radiant Dawn has Tyadrig, and his Dragons Aaron and Stacie Murphy by proxy. They seek to eliminate humanity because "the human sentience interferes with summoning rituals of the caliber required to summon Tyadrig to Earth".
* The Radiant Dawn. He is a lich knight serving the demon lord Tyadrig. She is a warlock of the same demon lord. They seek to destroy humanity to serve their demon lord and summon him to Earth.
* The Radiant Dawn, High Priestess Amynta did this when Athens was under siege by the Romans. Knowing that the Solari would not be able to break the siege, and that her and her sisters would all perish in the battle, the Solari statue was imbued with Apollo's power. The titular hero opened it and claimed the power for herself, becoming the first Solari High Priestess in two thousand years...right in the middle of the zombie apocalypse.
* The Radiant Dawn mixes science fiction (the alien Wutner race), urban fantasy (the guns used by the defenders to protect the fortress), and fantasy (the magic used to raise the undead/Dawn's shield).
* The Radiant Dawn sets up for a potential sequel involving the alien race aboard the orbiting ship.
* The Radiant Dawn's Rick Sylvan. Among other things, Rick repairs and boosts the signal of the comms array, crafts a superweapon to be powered by the titular hero, reconfigures a radar array to do things radar arrays aren't normally capable of, and hacks the US government's defunct satellites to redirect the superweapon blast.
* The Radiant Dawn, the Murphys and their acolytes seek to summon a demon lord to Earth, but find themselves unable to. The thing holding them back? Human sentience. The ability of human minds to think at high levels prevents the summoning ritual from working by interfering with the magical energies that must accumulate to do so.
* The Radiant Dawn. The ships themselves are only designed to go one way, though the orbital craft has a tractor beam that can lift them back off the planet's surface.
* The Radiant Dawn. The Wutner craft orbiting Earth has been doing so since at least the beginning of the zombie war. The aliens aboard have been listening to us with advanced devices, and as such have decoded our language and developed programming for their universal translators.
* The Radiant Dawn? The zombie apocalypse, then, is merely a means to an end for the acolytes.
* The Radiant Dawn when Dawn used it, but from a different reason than expected — Dawn locked herself in a chamber that got superheated while she expended all of her magic to do as much damage as possible.
* the radiators of the APC's were filled with alcohol instead of water.
* The Radiators (US) (named for the movie)—in the early days, they'd start up an actual chainsaw when performing the song live. (Which got them thrown out of a club or two.)
* The Radiators (US) that their song "Suck the Head, Squeeze the Tip" is about eating crawfish the traditional Louisiana way.
* The Radical has the combined powers of all other alter-egos of Captain' Trips, thus making one of the most powerful aces. He's also, depending on where you stand, a
* The radio adaptations in the mid-2000s had novelty ringtones instead. Not quite as dated yet.
* The Radio City Christmas Spectacular. The Rockettes. It just wouldn't be the same without their famous routine with eye-high leg kicks in perfect unison in a chorus line, which they include at the end of every performance.
* The radio commercials on classical music stations are rather different than regular radio commercials, such as having British guys telling you where you can get thirty percent off handwoven Persian rugs.
* The Radio Demon. He arrived as just a rank and file damned soul in Hell. And in

disturbingly short order, toppled powerful demons who had been ruling for centuries. The entire underworld is rightfully wary of getting his attention.
* The Radio Dies First: A two-way radio is put out of commission to allow the plot to proceed.
* The radio drama sequel subverts this trope (read: Maria follows him), showing that a year later, Alucard and Maria are living together.
* The radio edit of Ice Cube's "You Can Do It" blanks out the word "ass" in the chorus and replaces it with the sound of a whip cracking and a woman moaning - sounding way more sexual than the original words...
* The radio episodes "Mr. Boynton's Parents" and "Former Student Visits", suggest Mrs. Boynton has very definite ideas as to the type of woman M. Boynton should marry . . . .
* The Radio Lady who speaks to you during the "Shoot-em-up" minigames of
* The Radioland Murders before some (but not all) of the titular hits. Appropriate since this was a homage to the radio era.
* The Radioland Murders, during which the female lead realizes anew just how many common points the two share. (As she saves his butt repeatedly.)
* The Radioland Murders — even better on second viewing, because some of it is delivered in such an offhand way.
* The Radioland Murders, Page boy Billy Bennett accidentally runs into the WBN women's dressing room, with lots of topless women. He is thrown out bodily.
* The radio never knew what the castaways would say, but seemed to know when they were listening. The announcer would always begin the exact story they wanted to hear the moment they turned the radio on, and remain silent just long enough for them to discuss each item.
* the radio series left the planet (at least until the end of the series, when the alternate and all other Earths are simultaneously destroyed).
* the radio stations series is the witty banter. Good news? It's actually witty. Bad news? Eventually it runs out.
* The radio version also mentions that Marvin, the Paranoid Robot, who, due to copious amounts of time travel, ended up
* The radio version of Lily Allen's "Alfie" lets her mention her brother's "lazy arse" but transforms "smoking weed" to "smoking ..." and "high on THC" to "high on ...". It's not even a positive portrayal of drug use and seems especially bizarre.
* The radio version of the 30 Seconds to Mars song "From Yesterday" suffers from this as well.
* The radio voice during the sound test says that some areas of the dream "may not be suitable for children or those of a nervous disposition." And they mean it.
* The radish strip has a real-world explanation (the artist/"Gabe" was screwing with the author/"Tycho"); most fans assumed that since the strip was about the guys confronting Div over his alcoholism, it was a representation of how drunk he was.
* The Radium Murder Case tells of a murder exposed because, according to the investigator, the poison used would instantly knock out the victim upon contact with the tongue. In this case, the poisoning was openly stated but the perpetrator attempted to claim the poisoning as a suicide.
* The Radix by A. A. Attanasio introduces the slang term "jooch" which means to trick, con or deceive.
* The Radix: During a dangerous car chase, Brynstone gets a call from wife who wants to tell him their daughter said her first word.
* The Radix: Edgar Wurm made a fake Radix. Initially he just wanted to show Brynstone what to look for, but later the fake played a significant role in the story.
* The Radix has two: one in Prince Zaki's residence, another in Carl Jung's castle.
* The Radix: Hunting for Wurm, an escaped asylum patient, Adriana Borjia interrogates Cori. After Cori says "I didn't see him", Adrianna smiles and says: "I never said the patient was a man". It isn't considered "him" is often the default, or that it wouldn't be a bad guess to assume that someone able-bodied enough to escape an asylum would be a man...

* The Radix: Instead of a petty bookcase, Prince Zaki uses a terrarium full of scorpions.
* The Radix was a leader of a cult that searched for the Radix, a miraculous plant that belonged to Jesus Christ.
* the Raelians, who believe that Jesus and all other prophets were in fact human emissaries of the highly advanced race of aliens, the 'Elohim', who created humanity.
* The Rafale fighter plane. Consistently touted by French aviation fans and a few others as close, equal or better than the F-22 despite the disagreements of the foremost authorities on the matter and even a number of French politicians and defense experts. Has been the focus of a major PR campaign in weapons sales by Sarkozy after no foreign sales ten years after going into production to no result, and looks to see either no sales ever or half a squadron's worth of planes. In early 2009 France itself cut production, amidst governmental backroom beatings of the Dassault Thales' managerial staff. Contrast with the highly successful Mirage series, compare with LeClerc.
* the RAF bombed the city centre just to embarass the Germans. Quoth Churchill: "We were disappointed not to be invited to the proceedings, but decided to make sure we were not forgotten."
* The Rageaholic Franchise and Hideo Kojima in general. But this extends to pretty much anyone who enjoys things he doesn't like, the list of which is extensive.
* The Rageaholic who mainly reviews newly released video games, but also reviews movies, TV shows, music, and comics.
* The Rage: Carrie 2, starts with a scene of Rachel's mother trying to "protect her from demons" before Rachel is taken by social services and her mother is taken to a mental hospital.
* The Rage: Carrie 2 (which actually isn't as bad as one would expect), the protagonist's friend commits suicide by jumping off of the school roof. She lands on an unfortunate student's car.
* The rage-husks in "Hate" are plant-zombie-creatures created by the power of a demon.
* The Rage in Placid Lake. Placid is cornered on a rooftop by a group of thugs. The scene then cuts to him recovering in a hospital bed, leaving the audience to assume they assaulted him. The end of the movie reveals that he jumped.
* The Raging Goliaths, also from Borderlands 2, have quite a few of these.
* The Raging Grannies: A bunch of 60+ women who dress up outrageously and sing mildly ribald protest songs on street corners to protest the government, corporate corruption, and waste.
* The Raging Tide or The Black Doll's Imbroglio's non-linear story uses the Choose Your Own Adventure technique.
* The Ragman's Son, but had no scenes together. Bizarrely, when Corey died, his widow asked Douglas to give the eulogy, as they both came to Hollywood at the same time.
* The Ragwitch as the Ragwitch resumes Her interrupted reign of terror.
* The RAH Band's "Clouds Across The Moon" is about an interplantary phone call from (presumably) Earth to Mars, and the technical difficulties such a thing entails.
* Thera hit the world, afflicting the planet with storms, frosts, and disease, and the Romuli Emperor sent the Legions to purge the city Slavos lived in as a plague was starting to spread. Slavos unified the gladiators and citizenry and destroyed the Legions, then contained the plague, and created a new nation.
* The Raid 2: Berandal, where undercover cop Rama spends three years in prison establishing himself as a thug named Yuda and befriending Uco, the son of the local crime boss. The word "berandal" basically means "thug".
* The raid also had a vital strategic effect. Japan's home defense fleet was very weak, so they recalled a fleet that was heading for the Indian Ocean. This gave the Royal Navy a much-needed breather to regroup and regain its strength in the Pacific.
* The Raid by pulling him right out a window, bringing both of them crashing down

the fire escape. Rama lives by using the other guy to break his fall but emerges in worse shape than at any other point in the movie.
* The Raider, a wolf-riding orc wielding a BFS with Siege damage. This makes them inefficient at line combat (and are actually weaker than a grunt), but their ability to bring air units to ground keeps them useful (not to mention their Pillage ability helps them literally pay what they cost to build). The Fel Orc Raider has Chaos damage and is a full-blown
* The Raider is this, relying on his strength and his hand blasts in combat. He makes up for it by being
* The Raiders are of the first kind. They were a recurring threat for the first half of the first season, but bit off more than they could chew when they tried to raid the station directly and lost all their fighters before being
* The Raiders have bounced around the West over the years (started in
* The Raider, the most powerful and notorious villain in the world in
* The Raider, through the use of 23rd-century technology, can easily mask himself even as people smaller than himself.
* The Raid: It seems that every single petty criminal inside the slummy apartment run by a drug lord that the movie takes place in is well versed in martial arts. It just so happens that the protagonist is better at them.
* the raid on Kaido's island involves a massive army attacking a place with only two relatively small entrances. Though Law's short-range teleportation allows splitting up a third way. Law and Kin'emon also recognize that since the Straw Hats (especially Luffy
* The Raid Redemption with a gun and then immediately casting it aside in favour of hand-to-hand combat, explaining that he finds guns too impersonal, "like ordering fucking takeout"..
* The Raid, the entire movie is basically people shooting or beating other people.
* The Raid. The heroic Officer Rama has a pregnant wife who appears briefly at the beginning and then is gone from the rest of the movie. Knowing this makes us care more about what happens to him and a later scene has him drawing the strength he needs to keep fighting from his love for her.
* The Raid, the main characters have to take down an entire apartment building full of gangsters, which leads to plenty hallway fights. One of the main fights involves them slashing their way through bad guys with machetes.
* The Raiju, or "Thunder Beast", of Japanese mythology was a wolf-like creature said to appear during lightning storms and literally ride the lightning. It is often described as a companion of Raijin.
* The Raikage, a mixture of the Kool-Aid Man, the Hulk, and a pro-wrestler poured into the mold of a giant ninja. The fact that he is frequently shirtless certainly doesn't hurt. Also his brother, Killer Bee, who not only fits all of the above but also appears to be a refugee from the Wu-Tang Clan. Killer Bee isn't his nickname, it's his actual name. The Raikage's is either Killer A or Killer E, depending on the translation.
* The Rail Driver kills you instantly, and enemies using it will only miss once. Luckily, it's every bit as deadly in
* The Rail Nomads are a group of tribal Native Americans who live in train cars and worship John Henry as well as Choo Choo Charlie from old Good & Plenty candy commercials.
* The Railroad are also clearly based after both the Underground Railroad of American history and the CIA during the Cold War.
* The Railroad is one of the few factions that make the distinction between synths and the Institute, while everybody else fears both. Except for a few ignored voices, the Institute simply regards them as tools, ignoring just how much they've pushed themselves to create a perfect copy of a human from scratch.
* The railroad made putting reserves into battle a practical possibility in the nineteenth century. Prussia gained an advantage over its enemies by realizing first that its soldiers no longer needed to march until they reached the actual battlefield and thus unseasoned reserves had a chance of getting into action without falling by the roadside (as a result of disease and general sluggishness).

* "The Rail Tracer Covertly, Repeatedly Slaughters Inside the Coaches" (Episode 6)
* The Railway Children, accompanied by scary music, before slapping him hard.
* The Railway Children from her. She very understandably faints after it's all over.
* The Railway Children. In fact, this was such a big secret at the time that she wasn't allowed to smoke or drink off the set during filming, or for quite a while after that to keep up the pretense.
* The Railway Children played the mother. She had previously played the eldest daughter in the 1970 film and the 1968 TV series.
* The Railway Children, Ruth does this (to a crescendo of scary music) just after she has been drenched by a bucket of water balanced on a door.
* The Railway Series. Afterwards, he is sent off to be overhauled and comes back good as new, and has gained Sir Handel's respect.
* The Railway Series, and is the driving force for many accidents in the series.
* The Railway Series are all based on stories of real incidents on railways.
* The Railway Series, but Christopher Awdry has not yet completed or released it.
* The Railway Series by the Rev. Wilbert Awdry is still being continued even after his death in 1997, the torch having been passed to his son Christopher Awdry. The quality remains good, as Christopher (whom the stories were originally created for) has the same innate grasp of the series as his father and is dedicated to making sure it remains high-quality children's literature.
* The Railway Series days was particularly so, with a hobby of quietly creeping up on dozing big engines, waking them up suddenly, and then running off laughing. And in general, they all love pushing other engines' buttons and winding them up.
* The Railway Series didn't really have a single "Main character", instead being an ensemble based anthology series. Thomas the Tank Engine didn't even appear until the second book, but it didn't stop people from referring to the series as "The Thomas Books" (possibly because he was the sole focus of two of the first four books in the series). As a result of the television series, Christopher Awdry was constantly being pressured into writing more Thomas-focus stories and books.
* The Railway Series: Edward, Toby, Skarloey, Rheneas, Duke. All of them but Toby were built in the nineteenth century, and all are still in active service. Skarloey and Rheneas would currently be 146 years old. Also applies to Sir Topham Hatt I and Sir Topham Hatt II during certain parts of the series' timeline. Out-of-universe, applies to the original author, the late Rev. Wilbert Awdry, and his son Christopher Awdry who is the current author.
* The Railway Series every engine in the original ensemble had a volume to themselves. More than once in some cases, like Thomas.
* The Railway Series, exists for the first fourteen books by Wilbert's son Christopher. It has since been rendered dated by the publication of a new book in the series.
* The Railway Series features several incidents of runaway trains, mostly involving a steep incline, due to either a broken coupling on a train going uphill or the weight of the train overcoming the force of the brakes heading downhill. Justified as the trains in question didn't have automatic braking systems, only handbrakes on individual vehicles.
* The Railway Series) frequently utilized these sorts of punishments onto the locomotives for their bad behavior.
* The Railway Series has Duke in an intergeneration friendship with both Falcon/Sir Handel and Stuart/Peter Sam, the 2 younger engines even dearly nicknaming him "Granpuff" as a result. Seems to imply a grandfather/grandson relationship going on there. Aww.
* The Railway Series has Falcon and Stuart (later Sir Handel and Peter Sam respectively), nickname Duke 'Granpuff' "because he's so wise and kind". Though never stated, the aforementioned nickname sounds a lot like 'Grandpa', so it's very possible that the two younger engines look up to Duke as not only a mentor, but a grandfather as well. Fanwork also takes this a step further, with Duke calling Sir Handel and Peter Sam by their Mid Sodor names as nicknames.
* The Railway Series, he's much more pompous and arrogant, has a low opinion on

Sodor's engines, and often makes remarks to rile up Gordon, his brother.
* The Railway Series. His companion, The Fat Clergyman, is Wilbert's friend the Rev. Teddy Boston.
* The Railway Series, his stay actually causes his paint to be ruined far beyond what the rain would have done, thanks to soot and dirt from the tunnel roof.
* The Railway Series, or the character actors for those who grew up with the later CGI episodes.
* The Railway Series points to border him as a Likable Moron himself).
* The Railway Series, spent roughly four years "mapping" the Island of Sodor, which in the books, takes the place of the real-life Walney Island. The end result is a plausible world with a realistic railway network.
* The Railway Series story of Henry pulling the Flying Kipper, a set of points were frozen stuck by icy weather and a corresponding semaphore signal was supposed to be signaling the train to stop. Snowfall forced the signal to move down to "all clear" resulting in Henry's train to be switched to the wrong line and crash into another train. This was a real-life problem with lower-quadrant (down=go/up=stop) semaphores in British railways at the time which later resulted in them converting to upper-quadrant (up=go/down=stop) to fix this.
* The Railway Series: The plot of "Thomas and Bertie" (Train vs. bus) and "Percy and Harold" (Train vs. helicopter).
* The Railway Series: The Reverend W. Awdry and his brother gave the Island of Sodor not only a thoroughly detailed map but a complete history going back centuries.
* The Railway Series. Thomas easily recognizes the car and alerts his crew, who throw a message to the signalman, who calls the police and arranges a roadblock to catch the idiots (which he helps by shutting the gate of the level crossing).
* The Railway Series": Toby, Trevor, Stepney, Oliver, Gordon (who was almost dumped into the sea by Bill and Ben), Duke, and several other minor characters were all literally saved from scrap.
* The Railway Series was a nickname given to Sir Topham Hatt. This nickname was inherited by his son Sir Charles Topham Hatt, and later by Charles' own son Sir Stephen Hatt.
* The Railway Series was in at the time, it must have been a brave man who dared to drive it.
* The Railway Series was that most of the female characters were coaches, while all of the male characters were engines (meaning that the females were incapable of doing anything unless they were being towed along by a male).
* The Railway Series was the railway's centennial celebration of the original author's birthday.
* The Railway Series when his ego escalates to the point of playing a humiliating trick—which backfires horribly and leaves poor Thomas shunned.
* The Railway Series, with smart, hardworking engines such as Edward, Toby and Duck always having the last laugh on arrogant, reckless ones such as Henry, Gordon and James.
* The Rainbooms are trying to buy time for Twilight to write a counter-spell to the Siren's magic by advancing through the Battle of the Bands:
* The "Rainbow Boys" sport different colors and hairstyles, many of which follow the "generic spiky-haired anime boy" cliché… except for Ryuto, whose hair defies all logic and sense. It looks like the top of his head is on fire. He's really a
* The Rainbow Bridge to Asgard (taken from mythology) is often used in Marvel's
* The Rainbow Cadenza by J. Neil Schulman takes the slogan "Make love, not war" to its dystopian conclusion. In a society where men vastly outnumber women, the latter are conscripted into brothels (with accompanying propaganda and social/legal pressure) under the rationale that male aggression needs to be diverted into sex rather than fighting. Those women who refuse can legally be hunted down, raped and killed.
* The Rainbow Cadenza is a libertarian sci-fi novel by J. Neil Schulman where men outnumber women seven to one, and all women are drafted into prostitution for three

years. This happened due to a number of long wars in which more men were created (via chemicals which affected the gender of the sperm) than women.
* The Rainbow Connection, Stormy goes around killing others with a katana. She's quite adept at using it.
* The rainbow crystals and associated youma appear earlier than they did in the anime.
* The Rainbow Fish is about sharing, but many pundits accused it of being socialist propaganda written to turn children against traditional American values.
* The "Rainbow Stairwell" requires the player's deck to contain six cards of each color — one such card must cost one mana, another two, and all the way up to six.
* The Rainmaker and its film adaptation, in the form of a complicated scheme to get a potential juror who is unsympathetic to the protagonist's case dismissed from the jury pool.
* The Rainmaker by John Grisham has examples where lawyers creep around accidents, and hospitals to pick up insurance cases.
* The Rainmaker end with Starbuck's promise of rain in twenty-four hours coming true after he admitted it was all a con.
* The Rainmaker into amorality: early in the discovery process, protagonist Rudy finds out his phone has been bugged, and suspects that it was done by the defense in his case. He quickly finds out that anything he says on the phone (such as the test case, where he tells his partner that his client wants to settle for a specific amount even though she has no intention of settling) is quickly relayed somehow to the defense team (in the test case, he gets a call within a few hours offering to settle for a little more than the amount he claimed in the call to his assistant). It's never clear if the defense team bugged the phone or the defendant did, but it's clear that the defense team is willing to use the information gained either way, which doesn't make the defense look good at all (and lets Rudy play them for complete fools during jury selection).
* The Rainmaker, Kelly (Claire Danes) was charged with murder after she took the rap for Rudy Baker killing her abusive husband with the same bat he had been using on her. She's released because it was, with either person, a clear case of self defense.
* The Rainmaker qualifies except for one thing: he hasn't managed to pass the bar exam.
* The Rainmaker, Rudy discovers that the opposing legal team have tapped his phone. Instead of removing the tap, he stages a fake conversation which leads his rival to accuse one of the jurors of conspiring with him, thus making his rival look foolish and removing a potentially troublesome juror.
* The Rainsdowne Players is a casual RPG about a struggling theater troupe, and naturally one of the minigames involves having to dodge things thrown by an unruly audience, including (but not limited to) tomatoes, bottles, and dead fish.
* The Rainsverse features Chroma's "stormcrows", bird-shaped constructs of animate lightning magic used by the psychotic alicorn as scouts and sentries.
* The Rainsverse, King Sombra's alicorn magic has a definite crystalline theme to it.
* The Rainsverse, the Elements of Harmony provide their Bearers with very nice all-weather cloaks in colors matching the Elemental gems.
* The Rainsverse, the fall of Roam has split Equestria into four major successor nations (the Heartlands under King Sombra and Queen Chrysalis, the Lunar Kingdom under Princess Luna, the Solar Prelate under Princess Celestia, and the Crystal Empire under Princess Candence), and an unknown number of minor polities.
* The RainWing tribe sets some ground rules for their new refugees/war captives: they can eat anything in the rainforest except for sloths. Sloths are cute, and a lot of RainWings keep them as pets.
* The Rain Within - "Innocent", "Small Precious Lights", "Violet Glow"
* The raised platform holding the desk serves a similar purpose: observant viewers will note that
* The Raj, and named in contrast to "Old" Delhi (the pre-British, Mughal part of

the city). Since then Delhi's massive urban sprawl has dwarfed both parts, and both are subdivisions of the much larger Delhi National Capital Territory.
* The Raj, since both are known less for judging and more for kicking ass.
* The Raj) was a nobleman's sport for ages. It was fairer than many as it was carried out with lances rather than missile weapons and wild boars were known for their ferocity; many were injured during boar hunts. In some ways it was practice for cavalry warfare.
* the Rakata devastated it with an orbital bombardment and the others descending from the survivors on the surface, making the three species very close evolutionary cousins.
* The Rake (2018) is explicitly compared to this early in the film and we see it functions pretty much the same as a spiritual entity that attaches itself to a victim and forces or drives it to do horrible things before it can physically manifest.
* The Rake: Hostel: A music box version of the popular Christmas carol Silent Night begins playing within the first two minutes, stopping right as the Rake makes its first appearance.
* The Rake of folklore, as it is described as slipping into bedrooms at night and watching the sleepers or leaving inexplicable slashes on their arms.
* The Rake's Progress, Baba the Turk's aria of rage is interrupted in the second act, when Tom pulls a wig over her face. She resumes singing it in the third act immediately after the wig is taken off.
* The Rak'Gol have primitive but functional spaceships, cybernetic enhancements and advanced weapons... and no one can figure out
* The Rakkor are definitely meant to invoke the idea of the Spartans, from their reverence of war to their armor and weapons. The tribe's former name, Stanpar, was an anagram of the word 'Spartan.' Following the
* The Rakshasas were among the most monstrous, being multi-headed, fanged or tusked giants who preyed on mankind and were expelled from Brahma's realm after he created them on accident and was nearly devoured by them in his sleep. Yet they also studied vigorously, meditated, grew gardens and developed a sophisticated society during the time they ruled on Earth called Lanka. Ravana from the
* The Rakyat have a legend about a warrior cutting off a giant's head with a knife to create their island.
* The Rally spell will turn neutral targets into allies for the duration of the spell.
* The Ram-Augmented Interstellar Rocket, or RAIR. This starship uses the Bussard scoop to collect the interstellar medium not as fuel, but as simple
* The Ramayana's Kishkinda section focuses on Rama and Lakhsmana's search to find the kidnapped Sita, as well as the army they assemble along the way. Since Sita's abductor could fly, the quest takes several months.
* The "ram brake," or magnetic sail. Conventional rockets not only need to spend fuel to speed up, they need to spend fuel to slow down. Even if it's impossible to scoop up the interstellar medium without inducing drag, you can still
* The rambunctious Kamina steals the Gurren and, confident that he has access to new powers, attempts to combine with the Lagann as the head. It fails pathetically and hilariously. They eventually get it to work through determination.
* The rambunctious, unintentionally-violent Tigger is primarily a Pulcinella figure.
* The Rami Johnson Trilogy Jake Hibbertson tries to coerce a key witness in his brother's assault trial to recant his earlier police statement that he saw the brother attack a young boy unprovoked. It doesn't work, though, as the witness gets served a subpoena that'll essentially force him to be at court to give his testimony anyway.
* The RAMJAC Corporation is a fictional multinational conglomerate, or
* The Rammstein song "Sonne" is supposedly about a boxer friend of the band's nicknamed "Der Sonne" (The Sun). Some lines in the song roughly translate to light shining from Der Sonne's hands that can burn and blind you, and when the light breaks out of his fists, it hits you hotly in the face, hard in the chest, causes a

loss of balance, knocks you to the ground, and that the world will then loudly count to ten, implying Der Sonne had KO'ed his opponent. It's a more
* The Ramones" and "Poison Heart" (#2 and #6 at the Modern Rock charts).
* The Ramones are the most famous example, all of the members adopting the family name "Ramone" when none of them were actual relatives.
* The Ramones are the only related artist listed. If you click on the Ramones link despite the fact that you'd only have to do a minuscule amount of scrolling to get there manually, it redirects to a special page that consists of a brief tongue in cheek message chiding you for laziness, ending with a link back to the Joey Ramone review.
* The Ramones' "Do You Remember Rock N Roll Radio?" laments the rock stations of the 70s straying away from the genre's roots.
* The Ramones had goofy semi-hits like "Today Your Love, Tomorrow the World" and "Kommando" that traded on Nazi imagery. A few listeners didn't get the joke, and didn't realize that Joey was Jewish.
* The Ramones, is a live album of their final show. Recorded in Los Angeles in 1996, it was the last time the band played together. By 2014 all of the four original Ramones (Joey, Dee Dee, Johnny, and Tommy) had died.
* The Ramones' originaly drummer was Tommy Ramone, but Marky Ramone is arguably the more well-known.
* The Ramones played to Mr. Burns on his birthday. Just 15 seconds, and just the "Happy Birthday to YOU!" chorus, and they left the poor old man trembling and angry.
* The Ramones songs about similar topics and wore the same leather jackets and ripped jeans. This was also a decision on behalf of Joey, who suffered from OCD and needed things to be the same.
* The Ramones song shows the band in animated form, intercut with scenes from the actual cartoon.
* The Ramones, styled after Seal of the President of the United States, and designed by Arturo Vega.
* The Ramones that brings back anyone buried there. The singer follows his friend Victor in one night, and is unpleasantly surprised to find out that Vic's actually a dancing skeleton.
* The Ramones the mouse explodes. Later, at a Ramones concert, a mouse tries to get in. The bouncer refuses, saying it might explode, until the mouse shows it brought a headset to protect itself.
* The Ramones tries to disguise the shortest (Tommy is standing on a ledge) and tallest members (the enormous - 6'6"! - Joey is slightly contorted).
* The Ramones' video for "I Wanna Be Sedated" entirely consists of the members sitting around a dinner table while a party featuring nuns, acrobats, ballerinas, monsters, cheerleaders, clowns, doctors, fetish nurses, and smoking schoolgirls goes on behind them. They never take notice of any of this.
* The Ramones, which is actually about abusing the insecticide DDT as a drug. You get the brain damage without the docility, it seems.
* The Ramones, while at the same time packing a punch, making what little time the music was playing worth it.
* The Rampage of Haruhi Suzumiya, and its anime adaptation. See the Anime section for more details.
* The Rampaging Fuckers of Everything on the Crazy Shitting Planet of the Vomit Atmosphere
* The R&B song "Kansas City" mentions the 12th Street and Vine intersection which no longer exists in that city due to redevelopment. In its place is a park with a commemorative plaque and parking spaces painted like piano keys.
* The Ramrodder, after claiming Tuwana as his squaw, Brave Eagle hangs her from a tree, strips her naked, and savagely flogs her.
* The Ramrodder is found next to Cochina's body, Rick is accused of her rape and murder. He surrenders himself to the tribal council in an attempt to clear his name.
* The Ramrodder, Tuwana and Lucy get into a rolling-on-the-ground, hair-pulling

catfight over Rick.
* The Ramtop Mountains has a naming convention in which a child is named by whatever the priest doing the ceremony says, regardless of whether it was intentional or not. This has resulted in names like James What The Hell's That Cow Doing In Here Poorchick (known as Moocow Poorchick to his friends). Even royalty is not immune, with at least one of Lancre's rulers being named King My-God-He's-Heavy the First and most recently, in
* The Ranch: Beau and Maggie have been separated for many years, but never got around to signing divorce papers. Beau lives on the titular ranch, while Maggie lives in a trailer near the bar she owns.
* The Ranch given up on football, but three concussions, a bad shoulder, and possibly a bad knee have killed his shot at the NFL.
* The Ranch, Rooster is repeatedly shown to be a quite competent rancher when working on his father's privately-owned cattle ranch, but when he's offered a job running a ranch owned by a large cattle firm, he quickly finds himself in over his head. He thinks he can behave like he did when his "boss" was also his father, and thus ignores emails, lets paperwork pile up and deliberately ignores a timeline the company puts in place for tagging the cows because it would interfere with his planned ice-fishing trip that weekend. Unlike a lot of other examples here, he ultimately does lose the job.
* The Ranch that appears to be stillborn. Not only does he bring the animal back to life, but he's also so good the calf is brushed and dried of all the birth goo coating it to that point!
* The rancor. If you actually want to kill it, it's harder than many boss battles... and when you do kill it, another one replaces it. So you'll end up avoiding it anyway. Its powers of following you are less impressive, as it gets lost and can't fit under doors.
* The "Random Access Memorabilia" storyline uses a nanite-based version of this, corrupting genetic engineering done to add variety to some members of over 950 million wormhole gate clones (
* The random encounter Atavaka is a unique High Atma depicted as powerful as some of the bosses.
* The randomized guard dialogue can get schizophrenic about this — various achievements
* The Randomverse contains multiple roleplays run by different people. They include
* The ranger character class is stereotypically the Hunter. Their "favored enemy" class ability gives them bonuses to finding and killing a specific category of creature. It is possible to
* The Ranger class has the Favored Enemy ability, where the character chooses one or more species and gains several benefits fighting that species. In 3.0, only an evil Ranger can choose their own species, however, in which case they qualify for this trope. In 3.5, the evil limitation is removed; note though that "Favored Enemy" involves some non-combat bonuses, so a ranger could simply pick his own species to ease up interaction, or because they're likely the most common enemies (in the case of humans) rather than any desire to hunt them down.
* The Ranger Faction.. If it's a fantasy setting, this faction is probably elves of some sort. May overlap with the Guerrilla faction.
* The Ranger, knowing her secret (having been the one who rescued her and helped cover it up) and wanting to bring that side of her back to the surface.
* The Ranger profession does not have as much damage output as a Warrior, nor as much survivability as a Guardian, nor as much support as a Mesmer or an Elementalist, nor as much control as an Engineer, but competent in all those categories nevertheless.
* The Rangers' diagonal wordmark, featured on the front of their sweaters for nearly all of the team's existence, is as iconic as their shield logo, which is rarely used on their sweaters.
* The ranges for beam weaponry (in space) are mentioned to be that of a few
* The Rani also pulled this one in her debut appearance, disguising herself as an

old woman, and the new series gives us the Twelfth Doctor
* The Rani gets thrown in as a third-party to their rivalry, and when she does, she outdoes even the Master in terms of both good looks and evil, further inverting this trope.
* The Rank 1 remix of Cygnus X's "Superstring", from 2000, is much better known than the original mix from 1993. Same goes for
* The Rank 4 Toolbox strategy qualifies. Fill your deck with only level 4 monsters that can summon themselves or each other, and fill your Extra Deck with only Rank 4 Xyz monsters, with a variety of effects. Any two of you monsters can summon any one of your Xyz monsters, and you can pick whichever one best suits the situation.
* The rank of Lieutenant implies this possibility: From French, the title translates as "Placeholder", a lower ranking officer who would take the place of
* The rank of Samuel L. Jackson's character changed (up and down) depending on the scene.
* the ranks wrong, either in form of address, or in who outranks whom.
* The Rant notes that the author had intended for the strip to end a certain way, but then "the comic decided otherwise."
* The Rant strip (a preview of the bonus strip "Great Moments with Baron Mistycorn"):
* The Rant strip contains "at least the third-most subtext-filled request for illusory carrots in the history of comics."
* The Rant, then informs anyone that believed him that he has a bridge to sell.
* The Rant, where it divides temporal conversation between "subjective" (what the time traveller personally experience), "objective" (chronological order), and "metatemporal" (the perspective of changes made to the timeline).
* The rap crew in "Butt Out" that tried to get the kids to not smoke. The problem is, the group is so incredibly lame that when they end the performance with "if you never smoke, you can grow up to become just like us", the boys are terrified into smoking just to avoid ever turning into
* The Rap Critic, a rapper, and trained opera singer, has both rapped and sang opera in videos.
* The Rap Critic does annual Top Ten Worst Lyrics he heard that year, which at times was top 9 "because these songs deserve to be taken one step below".
* The Rap Critic in his earliest videos (the ones where he has no facial hair). See it and you won't believe it.
* The Rap Critic: Online comedic critic of rap music. Part of the That Guy With The Glasses Site.
* The Rap Critic: She's supposedly a parody of current music, but when "serious" artists are making songs that are just as ridiculous, it's hard to tell.
* The Rap Critic's "The Message" is done in the style of an early-80's public access TV show, with the Critic going by the name of "The Hip-Hop Analyst."
* The Rap Critic was added. Krissy left the site in January 2011, leaving Rap Critic as this for Blacks.
* The Rap Critic, was not immune from backlash as seen when he gave a 0 out of 5 to rapper NF's breakout song, "Real".
* the rape and murder of his (black) girlfriend, but it's suggested that the only reason they're throwing the book at him on that case is because he's also on the hook for Mary, and they want him to face the harshest possible punishment.
* The Raped Little Runaway by Jean Martin was banned in 2016 for its depictions of child rape. Under Irish law, a book can only be initially banned for twelve years. Board members must read the submissions and then decide by majority on whether to censor a text. The process of book-banning being almost totally extinct in Ireland now, the book was the first banned in nearly twenty years and the decision made national news.
* The rape gang members from season 5 apparently indulge in this trope. Boyd, the killer of the women and the last link in the chain, keeps numbered strands of their blonde hair. Another member took a piece of their jewelry. A third made
* The Rape of Nanking had an official order to kill all prisoners. It
* The Rape of Proserpina, a passionate and spontaneous form of love opposed by

those with prudence and who's love for the querents is familial in nature.
* The Rape of Proserpina (Bernini): Kerberos can be seen at Pluto's heel.
* The Rape of the Lock, an assault on Belinda's hair is considered an assault on her person, and her beauty, though her hair is still about 90% intact.
* The Rape of the Lock Umbriel (whose name means "Shadowy") goes to the Underworld (the pit of Ill-Humor) to bring up a bag of temper tantrums to create even more chaos.
* The Rape of the Lock. Very obviously Horatian (the targets of Pope's satire were his friends, whom he thought were making a mountain out of a molehill).
* The "Rape Tunnel", a sequel to the artist's previous work, the "Punch You In The Face Tunnel", in which the artist constructed a tunnel, and would attempt to perform the specified action on anyone who walked through it. (Happily or sadly, the whole thing was actually a hoax; he never actually built either of them, just pretended he had.)
* therapeutic hypothermia, which show that if you freeze before you drown, you can make it back, even if you went under an hour ago. The general rule in emergency medicine is "They're not dead until they're warm and dead."
* The Rapine Storm hasn't much use for the Asian human masses that it conquers, except for some recruitment (let's just say their army duty is...
* The rapists turn out to be members of the hockey team, again similar to the Steubenville case (in which they were football players).
* Therapist Sue uses her knowledge of Marty and Helen's illegal activities to blackmail them, Marty warning Sue to be careful about spending. Imagine his reaction when this 60ish woman living in a small Missouri town shows up at Marty and Helen's house in a bright yellow Lamborghini.
* The rapper (and sometime voice actor) Daniel Dumile, better known as MF DOOM. Inspired by Dr. Doom, he performs in a metal mask. He has also recorded as "Viktor Vaughn" among other aliases.
* The rapper B.G. felt this way about the song "Bling Bling", which spawned a global phenomenon, and made the term a recognized word in the dictionary. Saying that people thought that was what he was all about.
* The rapper Gemstones uses an interesting version of this on his mixtape, The Testimony of Gemstones.
* The rap segment in "The Kids" was animated by the French collective studio crcr (who also aided in animating the
* The raptors also strangely invert this - despite Alan Grant's infamous "six-foot turkey" monologue, the raptors rarely use their sickle claws to slash at prey, instead preferring to use their teeth and arm claws. Recent studies have suggested that the sickle claws on the toes were not actually used for slashing - they evolved as climbing tools in early, arboreal dromaeosauroids, and later became used as pitons to hold on to struggling prey, much like modern birds of prey.
* The raptor statue is lampshaded later, as the player can come across a note to a museum worker both praising the guy who placed the statue there for the scare factor, and telling him to put it back before someone important notices.
* The Rapture: At the end of the movie Sharon and her fellow believers are proven right when the rapture happens.
* The Rapture) is murdered, Rogers takes her daughter to the desert to await the Rapture, but it doesn't come. Starving and confused, Rogers kills her daughter to send her to heaven. When the Rapture really does come and Rogers is reunited with her daughter, she forsakes God for His cruelty and chooses to remain alone in darkness forever.
* The Rapture, Mimi Rogers refuses to give up her anger at God for what people go through and is literally "left behind" across the river, unable to enter Heaven. When asked by her daughter if she knows how long she'll have to stay there she answers: "Yes. Forever."
* The Rapture of the Nerds akin to the 21st century equivalent of Jamestown.
* The Rapture of the Nerds, which have proceeded to consume every stray molecule of matter in the solar system not in contact with the homeworld. The remaining un-"raptured" population who have chosen not to join the network enforce a ban on

similar technologies through a "technology court". Citizens are randomly signed up to serve on this court (as per the book's origin as the short stories "Jury Duty" and "Appeals Court" would imply), and their job is to evaluate the random bits of super advanced flotsam-and-jetsom that occasionally fall to Earth as "gifts" from the nanomachine network. The technology court is tasked with determining what new technology's effect on society at large will be, and anything too dangerous or too advanced (that might cause another singularity in the remaining population) is destroyed.
* The Rapture, Sharon, a former swinger who joined a Christian cult, has a vision of her dead husband beckoning her to the desert. This is interpreted as God asking for her to wait for Him there so she can be taken up to Heaven when the Rapture happens. She and her daughter go to a desert and wait for a couple weeks, but she starts to question if the Rapture will actually happen. When Sharon runs out of food and loses her patience, she shoots her daughter, is arrested, and loses total faith in God. The twist is that the Rapture actually happens; when she and the officer who arrested her are in Purgatory, the daughter shows up and says they can get into Heaven if they love God. The officer states his love for God and goes to Heaven, but Sharon refuses to love God after what has happened to her. Her daughter then fades away asking if she knows how long she'll stay in Purgatory, and she replies "Yes...forever." Then it slowly fades to black with no music playing over the credits. The feeling you get after watching this movie is similar to getting slapped in the face.
* The Rapture: Sharon at the start of the film given her swinger lifestyle, plus her boyfriend, Randy and the other swingers seen.
* The Rapture, Sharon can't go through with killing herself, no doubt due to the belief she'll go to hell rather than heaven.
* The Rapture: Sharon murders her daughter to hasten her entry to heaven.
* Therapy Is for the Weak, especially offensive to people who go to therapy, went to therapy in the past, or know someone who is or was in therapy.
* Therapy Is for the Weak. In fact, people in need of psychological help who actively resist therapy are strongly urged to seek it, and those who have tried it and said it didn't work out are encouraged to keep searching for another therapist that might be better suited to treat them.
* Therapy no Jutsu. He's still rather stiff and stoic in general, but now his repressed affection for Hinata has come back and Neji has become super protective of his cousin, partially as an atonement for the grief he had caused her earlier.
* Therapy? outright links love, mental illness and drug addiction as per the Real-Life example.
* The rare "Buggre all this" edition of the Bible that Aziraphale had in
* The rare case of this trope in Puccini's operas. His other low-voiced characters, like Colline in
* The rare Farfetch'd carries around a leek and gets very temperamental towards those who try to remove it. The only Farfetch'd available in
* The rare gender will attain high status (perhaps even virtual godhood) and wield great political power because they're the only ones with the "wherewithal" to keep the species viable.
* The rare gender will lose all status (perhaps even virtual slavery) because they're extremely valuable breeding stock that has to be possessed and protected if you want to keep the species going.
* The rarely-mentioned but perhaps greatest selling point for the Ouya and its more powerful successors like the Nvidia Shield TV is emulation. Standing in line for overpriced, underproduced and limited-selection classic console re-releases isn't all that tempting to those who are able to play
* The rarely mentioned Khrave are a race of mind-eaters (or rather mind-overwrites), enslaving other beings to their own ends by rewriting the minds of other species. The detailed effects of this particular process aren't quite clear.
* The rarely mentioned Umojan Protectorate is unique in that while they do have psychic assassins, the shadowguards, they're not indoctrinated.
* The rarely-performed "verse" of "White Christmas" includes the line "there's

never been such a day in Beverly Hills, L.A."
* The rarely-seen "fedorafreak" is the comic's biggest example, being a completely ordinary if hat-obsessed man who might also be the last surviving human on Earth, drawing sustenance from his own urine.
* The rarely-seen Oswell E. Spencer was the president of Umbrella Corp and the chief architect of the games' events, up until his death in
* The rare male examples? Ewan and Ross; both begin as quite weak fighters but evolve into much stronger ones without losing their cheerful dispositions.
* The rareness of light features such as pale-to-ruddy skin, blonde/red hair, and blue/green eyes was commented on in many Roman sources, with northern "barbarian" peoples such as the
* The rare "perjury trap" usually involves a form of this, and works like this: A person committed a crime that is now outside the statute of limitations. A prosecutor calls them to the stand in some trial related to the crime. The prosecutor then specifically asks the person about the previous crime, and the person, who doesn't want to reveal their involvement, lies about it. Now the prosecutor brings a perjury charge as they can prove the person lied on the stand.
* The rare times there's an explanation for how something works, it's usually played as a joke — though time travel and dimensional travel often have a logic, whether based on magic or impossible technology, that's thought out in detail.
* The Rarity Report features two nearly back-to-back, with first DJ PON3 pulling a vinyl record out from seemingly between her cheeks, and then Rarity pulling a microphone out from below her tail, conveniently obscured by a TV news overlay.
* The Rashan homeworld was destroyed by a Hrud migration, with the survivors finding a tenuous sanctuary in the pirate system Pavia.
* The Rashomon," then drops straight down into the frigid waters below.
* The Rastafarian albino twins' SUV after Morpheus shot its gas tank on the freeway overpass.
* The Rastafarian reggae song "Rivers of Babylon" is based on Psalm 137 but leaves out the infamous passage about smashing Babylonian infants against rocks.
* The Ratcatcher can control the massive amount of rats in Gotham from inside of his prison cell.
* The Rat, formally known as Duc de Puce, is a prime example. One of the five main antagonists of the game, Duc de Puce fancies himself as an imperial conqueror, forging his mighty empire throughout the remnants of the player's father's kingdom. Born into nobility, he is extremely arrogant and extremely sure of himself and his troops, and is unafraid to use dirty tricks and scheming to win the day... Except he
* The rather 1980s belief that physical contact between the same gender
* The rather extreme professional dodgeball match in the music video for Autoerotique's "Asphyxiation".
* The rather inaccurately named birdman, also referred to somewhat more accurately as the manbat, is a type of Awakened bat the size of a bird of prey. While they don't normally go after humans, they're still quite aggressive when disturbed, naturally prey on creatures as big as owls, move in large swarms, and possess very sharp claws on their thumbs and saliva laced with contagious bacteria.
* The rather late origin story episode featured Starfire with a much blacker, more armored costume (identical to the one worn by her sister, Blackfire), along with an alien and less-than-girly princess crown. She was a villain for about half the episode, during which she was
* The (rather old-fashioned) French swearword "jarnicoton" comes from one of the French King Henri IV's Bishop advisers, Coton, asking the reportedly foul-mouthed King to use his own name instead of God when swearing - so instead of saying "Ja r'nie Dieu" (accented version of "Je renie Dieu", "I deny God"), it became "Ja r'nie Coton" ("I deny Coton").
* The rather scary "Hiya Henry" is paired with the comedic "People Watching".
* The rather ubiquitous use of Bonnie Tyler's "Total Eclipse of the Heart" at weddings, or even as a general love song. It's a love song, alright...

* The rather unhelpful description of Sayid that Shannon gives the security officer in a season 1 episode of
* The rather young, immature Sera likes you good and well, but she'd rather skip all that boring talk about what the relationship means just get to the fun stuff, like going to bed. After
* The rating in Germany seems to highly vary on the release you get; volume 3, which was rated FSK 12 on its original release, has a
* The rating scale over time has become less and less useful, due to the wide range of challenge present amongst level 10 charts. The fact that two songs have level 10 charts on
* The rating system rewards you for the damage you make rather than the variety from your combos, although the length of time a style grade remained before disappearing or lowering was significantly shortened in a patch.
* The rat in Marty's old locker which causes Shirley to squeal when she opens it in
* The rationale for this was that the unquiet spirit would not know which of the roads to follow in order to seek vengeance on the living.
* The rationale they give for a German victory in D-Day is... deployment of the Me-262 jet fighter. One of the key aspects of Operation Overlord was
* The rationalization for a universe full of aliens speaking Australian English is forgotten when convenient, such as when Crichton wants to impersonate a Peacekeeper by putting on an
* the Rat King, is a wererat, with the ears, tail, teeth, claws, fur, and eyes to go with the theme.
* The Rat King is finally captured by the Turtles and brought to justice in "Wrath of the Rat King".
* The Ratkin (wererats) and Ajaba (werehyenas) are extreme social Darwinists. The former were tasked with killing humans when the human population grew too large, and the latter kill humans who are old, sick, or weak.
* The Rat Patrol Christopher and Nick George play fictional brothers Sam and David Troy. The episode is Nick George's only acting credit.
* The Rat Patrol depicts the adventures of the title Allied combat team against the German Afrika Korps in the Libyan desert during World War Two.
* The Rat Patrol — and commandeer his show, that's what! It turns out the Rats' nemesis Captain Dietrich has anticipated this move and captures them before Windsor goes on the air. However, our heroes escape, then take over Windsor's show while it's in progress and successfully send their message, to the astonishment of the BBC monitors.
* The Rat Patrol", real life brothers Christopher and Nick George play fictional brothers Sam and David Troy.
* The Rat Patrol. See the episode "Truce at Aburah Raid" for one example.
* The Rat Patrol. Though he was rarely able to stop the Allied commando unit, he was smart and always honorable.
* The Rat Patrol to send an emergency message to the British army via BBC personnel who monitor his show.
* The Rat Patrol was licensed in the UK but taken off air due to the volume of complaints received about its exaggeration of the American involvement in what had been primarily a UK and Commonwealth theatre.
* The Rats (2002). A clan of evil rats overtakes a Manhattan department store and threatens to overrun the city. Proof that B-movies are not restricted to the 1950s.
* The Rats in the Walls by breeding "human pigs" in immense underground food pens. The breeding stock was so inbred and twisted towards the end that some of them had devolved into quadrupeds, and they had largely lost the capacity for thought.
* The Rats in the Walls, predating Roman times, where countless generations of humans have been raised as cattle to feed the cannibal appetites of the family. The breeding stock was so inbred and twisted towards the end that some of them had devolved into quadrupeds. This practice was finally ended when the main character's great-grandfather massacred his evil family and fled to America. Unfortunately, the main character is not aware of the true nature of his ancestors, as a letter

explaining the secret that had traditionally been passed from father to son had been destroyed in the American Civil War, along with the only living relative who knew the truth.
* The Rats in the Walls, some so inbred that they had regressed to walking on all fours as shown by the bones remaining in the ruins.
* The Rats, The Bats, and The Ugly: He wants to stay in the brig where he gets a mattress and three meals a day. At the front, he doesn't get that.
* The Rats, The Bats, and The Ugly is about Chip's court-martial by their planet's insanely corrupt and incompetent military for what happened in the previous book (Actually winning a battle and sleeping with the richest girl on the planet), and his friends' attempts to help him avoid the firing squad.
* The Rattletrap Car is about a such a car, which is in such bad condition it falls apart during a trip to the lake and has to be stuck back together with various toys and Chocolate Marshmallow Fudge Delight.
* The Ravagers, Ridge is actually the youngest member of the team, but his monstrous form makes him look older.
* The Raven (1935), Dr. Vollin has Bateman drag Judge Thatcher out of his bed, and strap him into a slab that's beneath a pendulum blade that slowly swings down on his chest.
* The Raven (2012) is recruited by the police to solve a series of murders based on his stories.
* The Raven (2012), the killer leaves a dead victim bricked up in a tunnel wall, with a clue to another victim's location sewn up inside the body's mouth.
* The Raven and the Raindeer is a retelling of The Snow Queen where, among other changes, Gerda ends up falling in love with the bandit girl who helps her along the way and realizing that Kay was a bit of a self-centered jerk even before the Snow Queen got to him. (She rescues him anyway, but more to save his parents worrying than anything else.)
* The Raven Boys, after a severe emotionally and physically traumatic experience, Adam comes to sit with Blue in her garden, then lays his head in her lap. She likens the experience to being approached by a hurt animal; she doesn't want to make him bolt but at the same time wants to help him.
* The Raven Boys prediction she's been hearing all her life, Blue's family is pretty sure it's both. Even though she meets Gansey and dislikes him, much preferring his kind friend Adam, her family insists that she will fall in love with Gansey Because Destiny Says So.
* The Raven Cycle, and even a fair amount of crossover fan work despite the relative differences of the two series.
* The Raven Cycle. Blue is the only non-psychic in her large household, but does have the ability to amplify others powers with her presence. She has psychic energy, just not the powers.
* The Raven Cycle Blue's family seems to have this attitude about her love life. Being born and raised in a family of psychic ladies who are always in each other's business can have this effect.
* The Raven Cycle (gay main character, male bisexual main character, queer male romance)
* The Raven Cycle is set in a small town located on top of a ley line, which may or may not be preserving the the body of a dead Welsh hero.
* The Raven Cycle Kavinsky makes comments throughout the book about Ronan being in love with Gansey and/or sleeping with him. When he confronts him towards the end of the book, Ronan claims that it's not like that and that he sees Gansey as a brother, criticizing Kavinsky for not being able to see more to relationships than sex.
* The Raven Cycle, since the heroine's mother is a professional psychic. Many of the main characters ask for tarot readings when they're in trouble and need guidance.
* The Raven Cycle was sacrificed by his best friend in an attempt to wake up a ley line. It didn't work. Noah did, however, get to live on as a ghost due to the power of the place where he was killed.

* The Raven Cycle we find out towards the end that Noah is a ghost. Considering one of the first things he says in the series is "I've been dead for seven years" one might think this would come as less of a surprise. His friends don't take him seriously until they find his bones.
* The Raven Cycle with her little reminders that boil down to, "Hahaha, that boy is going down."
* The Raven", doves land on the ship's mast and talk about the perils the hero's brother will face.
* The Raven from the first "Treehouse of Horror", Marge filled this role.
* The Raven Guard are stealth and infiltration specialists able to sneak up on enemies despite being power-armored giants. A successful campaign leaves their enemies huddled around light sources, mortally afraid of the dark. Those few that survive that is.
* The Raven Guard uses ravens and other corvid birds. Many of their successor chapters continue this trend and sometimes expand it to other birds, such as the Iron Ravens, the Knights of the Raven, the Necropolis Hawks and the Raptors.
* The Raven, Immortal thief Amanda and partner Nick recover a stolen painting for a museum. But when they see it on display, Amanda says it's a fake. When Nick points out it has the artist's signature, Amanda reveals that's the problem: she just happened to have been having a fling with the artist a century earlier when he was painting it, he was too drunk to wrap it up before his patron's deadline so Amanda forged the signature for him. The forger just copied the artist's signature perfectly but Amanda recognizes her own handwriting.
* The Raven" is an unsettling piece that has a conversation between the narrator and the titular raven, a grim, ominous bird that enters his house on a dark and frightening night, when he's already in a dark mood.
* The Raven it. Given that the rest of the poem is past tense and the final verse is present, any time you come back to it — yup, they're still at it.
* The Ravenloft supplement Van Richten's Guide to Lycanthropes features cover art depicting what is possibly supposed to be a painful transformation into a terrible beast under the light of the full moon, but more closely resembles
* The Raven, mostly involving waving their hands while sitting on their comfortable chairs, summoning snakes and levitating and flinging magical missiles.
* The Raven narrator. The knocking continues for six stanzas, each making him more disturbed and uncomfortable- this lasts even after he opens the door, to find nobody there. Then he finds it was a raven knocking at the window, and things just get worse from there.
* The Raven, no funny voices, no jabs at the fandom — a marked contrast to the parodic or satirical treatment that every episode before or since received.
* The Raven Paradox is about the fact that non-black, non-ravens contribute information about the likelihood of all ravens being black. The page is helpfully captioned with a picture of a black raven, and a bunch of apples, labelled non-black, non-ravens.
* "The Raven Paradox" page takes advantage of this, captioning a picture of apples as "non-black, non-ravens" to aid in illustrating the paradox.
* The Raven) quips, "Tough place to keep clean." (Lorre improvised much of his dialogue for the film).
* The Raven Ring reading with the intent of learning about her situation, coupled with a scrying spell that gives her dream-like visions about each card's meanings.
* The Raven's Plan, a collection of scenes which are not plot relevant (and would thus slow down the main story) but which the author really wanted to write.
* The Raven's Plan: After realizing that the Remembering really is a case of having been sent back in time and not just a nightmare, Stannis resorts heavily to drinking in order to cope with the guilt of everything he did in the original timeline.
* The Raven's Plan, burst into Kevan's room to see if he Remembers... and interrupt him while he's in the middle of screwing his wife Dorna.
* The Raven's Plan, commentators took to referring to the rock that Edmure used to kill Black Walder Frey with as "the Tully Rock of Doom". Several chapters later,

Tyrion notes that people in-universe have started calling it that.
* The Raven's Plan. First off, Doran and his loyalists remember how Ellaria and the Sand Snakes betrayed them in the original timeline and kill them, which enrages Oberyn causes the confused guards to turn on each other (since they assume that there's either a coup or counter coup going on). By the time the fighting ends when Doran makes peace with Oberyn and explains things, many visiting members of lesser Dornish Houses have been killed, enraging their families into rising against the Martells in revenge. Meanwhile, several other Houses are rebelling, simply because they smell the blood in the water and think that the Martells have been weakened.
* The Raven's Plan. Having discovered this shortly before the old timeline ended, Sam and a group of Reach lords spread the word and spearhead a purge of all those involved.
* The Raven's Plan in anger, in which he's also quick to lash out at the nearby Karstarks for their own actions in the old timeline. Everyone is left stunned by it, and give him a wide berth afterward, even as he's left ashamed by his actions.
* The Raven's Plan incited by learning that Jaime Lannister is now an ally; afterward, he is emotionally worn down and needs a pep talk from Howland Reed about the situation in order to recover.
* The Raven's Plan, in retaliation for crimes enacted in the old timeline:
* The Raven's Plan more than anything else. Instead, Bronze Yohn Royce has her drugged to the gills for her own safety while taking custody of Robin Arryn and the Vale in preparation for the Others.
* The Raven's Plan: Newly-minted Grand Maester Cressen learns from a hysterical Lord Rosby that Jon Targaryen, the newly-revealed Targaryen who is now pressing his claim to the Iron Throne, is Jon Snow, the supposed Bastard of Winterfell. Realizing what exactly that means, and knowing he will have to tell Robert, leaves Cressen in a quiet panic. When he informs Renly shortly thereafter, Renly likewise realizes just how badly this particular reveal is going to go down.
* The Raven's Plan of Cersei's actions, yet dealing with Lancel was enough for him to put off confronting her for a while.
* The Raven's Plan: Sansa proclaims that Arya is not marriageable for this reason, and this time she isn't being insulting or cruel. Arya is a publicly-known Faceless (Wo)Man who fed Walder Frey a pie made out of two of his sons and slaughtered him and his house. Most noblemen would be too terrified to get near her, let alone marry her.
* The Raven's Plan sneaks into Tyrion's solar disguised as a servant and tries to kill him. She manages to stab him a few times but is prevented from completing the job when Jaime, who learned of her presence, bursts in and subdues her.
* The Raven's Plan. The defenders get slaughtered, but succeed in their goal, leading into the main plot.
* The Raven's Plan to the Conclave, who were using him to bring down the Targaryens. So it turns he was never quite the great manipulator he and everyone else thought he was to begin with.
* The Raven's Plan: When Maester Cressen arrives in King's Landing with Stannis, Robert immediately appoints him the new Grand Maester to replace the imprisoned Pycelle.
* The Raven's Plan Ygritte is alive again, as is Daenerys's first husband Khal Drogo and her former lover Daario Naharis. Then there's Jorah, but it seems he's accepted that Daenerys doesn't love him the way he loves her and is fully supportive of their relationship.
* The Raven, starring John Cusack in the role of Edgar Allan Poe, contains multiple reenactments of Poe's horror stories. Included is a scene where the "Pit and the Pendulum" scenario is recreated and successfully kills its victim.
* The Raven Tower to imitate the biological processes plants use to grow and produce nutrients. It requires precise understanding of the underlying chemistry and is more difficult still to produce food that won't cause malnutrition in the long term. The first sign that Oissen isn’t as benevolent as he appears is the reveal that he’s been feeding slaves exclusively on certain types of his created food to study how that malnutrition develops and how it eventually kills

them.
* The Raven: When Poe exits Hamilton's carriage, he immediately splashed as the carriage passes through a puddle as it drives away.
* The Raven". When the line about reading the quaint and curious volume of forgotten lore comes around, we find Homer reading a book titled "Forgotten Lore, Volume III".
* The Raveonettes picks out rape as a particularly heinous crime that can indefinitely traumatise the victim.
* The 'raving audience' tactic is now repeated with Twitter and Facebook reactions to the film which were positive, sadly allowing @bomlovr1987 to have an undeserved minute of fame for their rave review of what everyone else thinks of as terrible.
* The Ravnican assassin "Orzhov Euthanist" was very frequently called "Orzhov Enthusiast," which puts rather a different spin on the card.
* The Rawhide Terror: After his parents are murdered by the renegades, the older son's mind snaps, and he starts laughing uncontrollably and wanders off into the desert.
* "The Raw Shark Texts" begins with the main character having no recollection of himself, slowly reconstructing his history from an Apocalyptic Log he left for himself before the incident that resulted in his amnesia. Or at least, that might be what is happening- a little like
* The Raw Shark Texts by Steven Hall features a "purely conceptual" shark that swims through memes, eating memories and identities.
* The Raw Shark Texts when the increased self-preservation instinct causes him to search out more and more hosts.
* The raw video footage of Seth's "How does Brundlefly eat?" demonstration can be found on the standard Collector's Edition DVD release by going to the Deleted Scenes menu, highlighting "Monkey-Cat", and pressing left (which lights up a fly icon), or by highlighting Play and pressing up on the
* The ray also goes in reverse in order to revive characters who had been killed earlier.
* The Ray and he ends up transporting himself to a beach in Seattle and it takes a couple of giggling girls pointing out to him realize that he's naked. They're kind enough to let him borrow their phones to he can call home.
* The Ray Bradbury Theater episode "The Tonybee Convector" has reporter Roger Shumway coming to talk to the revered 130 year old Craig Bennett Stiles. A century earlier, Stiles had traveled into the future and returned with videos of a utopian world. This would inspire the entire world to match his view and in 2100, the world is a peaceful planet with little crime or disease and a well-kept environment. After decades of silence, Stiles is about to grant an interview on the day his past self appears in the skies. The time comes...and nothing happens. Stiles reveals to Shumway that the entire thing was a massive hoax. The "time machine" was literally smoke and mirrors. The video he showed was actually the best parts of the world of 2000. The entire "journey" was Stiles' desperate attempt to correct humanity's self-destruction by making the world believe in a future that they would end up creating for real. Stiles says he had prepared to fake the "time ship" arriving in the future but has decided to simply tell the world the truth. Shumway is upset the "golden age" was built on a lie with Stiles saying it was needed. He ends up passing away and Shumway sharing Stiles' message of hoping for the future. Shumway then sets off Stiles' secondary hoax which is passed off as an "orbital shift." He then destroys the evidence Stiles gave him, agreeing it's better the world believe in Stiles' lie.
* the Ray" Drake when he comes in at the end of the scene. Robin, of course, starred in a solo title that was still going strong at the time and lasted roughly as long as the other three characters' titles combined.
* The Ray. His father realized it, stopped the scolding, and tried to put his arm about him. Ray angrily shrugged it off. (A second attempt was more successful.)
* The Ray. In the end, DC decided that a Mystek mini just wouldn't be worth it and Priest, stuck with a character that DC now owned and he didn't want anyone to use, promptly had her shot out of an airlock, literally.

* The Raymond Nostril Story!" and they sing the Angus Prune Tune as joyfully as ever as the episode closes.
* The Ray representing different groups who were persecuted by the Nazis.
* the Ray Sphere gathers all of the electrical energy from the people in the destroyed city blocks to concentrate it on Cole, and presumably that wouldn't have worked with standard electricity sources.
* The Ray Stevens song "It's Me Again, Margaret" is about an obscene phone caller who keeps calling the title character until he gets arrested. He uses his phone call to call her one last time before he's jailed.
* The Razor Blade and Blood Rights are items that deal damage to Isaac in exchange for a temporary damage boost/room-wide damage burst, respectively. These are usually considered poor, but can be good if you want to lower your red hearts without losing soul hearts, such as if you are playing as
* The RCN series by David Drake averts this trope. Plasma weapons drop in effectiveness with range (at close range a 5-cm cannon can do moderate damage to a corvette, at longer ranges it won't do more than a week or so of solar wind erosion) and scale up in effectiveness with bore diameter. Missiles use their kinetic energy to do damage, so a missile that manages to hit late on in its run will actually be more powerful than one early on - if it hits. (Though, as one of the characters points out, a large lump of iron that hits the target while being pushed at twelve g will still do rending damage even if it isn't going very fast.)
* There’s a children’s poem by Agniya Barto, where the narrator says how he’ll never allow anyone to hurt his little sister Lida. It concludes with: "If necessary — I can beat her up myself!"
* There’s a coffee shop at a street mall in Malaysia called “Coffee Stain”. Game Developer Coffee Stain Studios were alerted about it, but since they’re located in a different part of the world and are not in the same line of business, no action can be taken.
* There’s also his trust in some of his other sons who turned to chaos and all the Chaos Space Marines who were, putting it lightly, horrible, horrible people.
* There’s also Hodgins telling Cam in one episode “I’m...going to go look at very small things through my very large microscope...” when Cam questions him about evidence and none of it is specific enough to help.
* There’s also the beginning of the movie when you see photos taken by visitors of the zoo. They consist of Alex posing, Marty running, Gloria swimming, and Melman receiving medical attention.
* There’s also the terms ‘entropy,’ ‘heat death,’ and just about anything having to do with thermodynamics, due to the scene where Kyubey uses these terms to explain its plan to save the universe.
* There’s also the time someone called psychologist turned chef Gordon Gordon Wyatt a fry cook. “FRY COOK??”
* There’s also Zeed, a biker gang boss who displays just how ruthless the post-war world is. He is killed by Kenshiro at the end of the first chapter where it becomes apparent that he knows nothing about Hokuto Shinken.
* There’s an episode where Binky has a nightmare about burgers. He is about to eat a burger until the burger starts
* There’s a remarkable amount of dialogue that changes based on whether or not you played the first game and/or transferred your Guardian to the second. If you didn’t, your Guardian in the second game is explicitly shown to
* There’s a Roman addition to the myth of Hades and Persephone where a former lover of Hades, a nymph named Minthe, tried to get Hades to cheat on his wife. But Hades is a faithful husband, unlike his brothers Zeus and Poesidon, so it didn’t work. However, when Persephone found out that Minthe was trying to seduce her beloved husband, she literally stomped that nymph into a plant.
* There’s a very dark one near the end, after the final duel with
* There’s Shoe, who is introduced as Matt Engarde’s cat. At first glance he seems like a simple joke character.
* "There’s Too Much Love" you know something adorable is about to happen

between Leo and Gabriel.
* There'a also a pantophobia episode wherein Dean contracts ghost sickness and develops a fear of everything, including speeding, high floors, ghosts, cats, dogs and teenagers, among others.
* The Reach abductees have just about as much trouble with their new powers as you'd expect. Even after a couple of months, Virgil has trouble levitating a trash can, and Tye can't even turn his power on until the end of the episode.
* The Reach invoke this by going to the capitol and peacefully meeting with diplomats. It doesn't exactly help that G. Gordon Godfrey has been spending the rest of the season
* The Reach is ultimately invaded by just about every other contender, so really
* The Reach's scarabs. Over time, the scarab learned to like humanity and understand compassion much better.
* The reaction and charges of "propaganda" and the great number of errors in representation has brought a great deal of criticism as well. Jean-Clement Martin, the historian who has served as a consultant for the game, and a respected member of the Society of Robespierre Studies, while noting that the script had a "royalist" bias feels that the game should be enjoyed as "fantasy" and perhaps if it stokes interest, it could lead players to read history books.
* The Reaction and she's trapped in the rubble (keep in mind that she's confused and terrified);
* The reactionary right-wing Catholic order Umbra Domini and its photogenic media-savvy leader Father Silvio della Torre in
* The reaction from the fandom around the time that comedienne Catherine Tate was being cast as the next companion was very negative, with some people insisting that she couldn't possibly act well enough to pull off the
* The reaction of an in-universe soldier to seeing a Chaos Champion being possessed by a Greater Daemon. Described in a few places in the background. One text box sidebar in either the Chaos Marines or Chaos Daemons Codex describes an Eldar autarch's reaction to seeing a Slaaneshi Champion being possessed by a Greater Daemon; his initial reaction is to resign himself to die fighting, but then its magic takes over and he stands there staring at it as it eviscerates him.
* The reaction of everyone present when Robin uses her powers to squeeze Franky's testicles.
* The reaction of most characters in-universe to the marriage of Beren and Lúthien in
* The reaction of the American ambassador when told that Godzilla not only has a weapon, but that it can shoot down stealth bombers.
* The reaction of the entire Franky Family and the Galley-La Foremen when Luffy and Zoro create a gaping hole in the Aqua Laguna (a tsunami) large enough for their sea train to go through when their best efforts only made splashes.
* The reaction to Arthur and Robin being re-united with Lancelot and Galahad in
* The reaction to the last few strips of the Q&A (which only lasted about a
* The reaction used in the original game was "Holy cow! What happened?"
* The reaction your hero's friends have to this first battle may be a bit of
* The reactor pretty much had the same thing happen to it that the reactors in Fukushima did. The meltdown wasn't the unrealistic part. The unrealistic part was where Owen fiddled with controls (somehow flooding the control room with radioactive coolant) and safely shutting down the reactor. This episode probably belongs under
* The Reacts Channel regular segments "Do Teens Know 90s Music", Gangster's Paradise was played. At least one teen recognized it as "The song Weird Al parodied". He couldn't actually name the song beyond that.
* There actually are multiple shoe-print databases available to police. An episode of the
* There actually are underwater ruins in the game that you get to visit. They serve as the backdrop, armaments included, for the battle with the
* There actually are viruses that infect other viruses, which are known as virophages. Normal viruses reproduce by reprogramming cells to make copies of them,

but because viruses are not cells, virophages instead reprogram the host virus so it will causes the cells it attacks to produce copies of the virophage instead of itself.
* There actually is a shop like Build-A-Bear, only with model cars. It's called Ridemakerz.
* There actually is a supervillain support group in the Marvel Universe (centered in New York), as shown in
* There actually was an Archie Babies graphic novel as well, which depicted the characters as toddlers in a daycare.
* The Reader (2016) falls under this, their skin described with words like "tan", "copper", "honey", "dark", or "black". This is justified, though, since Kelanna is a fictional world with no real-world equivalents to nations where such characters would come from, and no one group is signified as coming from a specific island or kingdom in the book.
* The Reader (2016). His grandmother taught him how to talk to all the trees in the grove they used to live by. When he was blinded and the trees were harvested to make a ship, he thought they were gone forever but later he followed their voices and found Reed's ship. Now he can hear the voices of the hull and knows everything that happens on the ship.
* The Reader (2016), it's revealed near the end that Rajar, the assistant of Tanin, is the one who has been commanding the Impressors to kidnap young boys and leading the raids on the Ephygian bay in the name of Serakeen. Serakeen isn't a real person, but for all intents and purposes Rajar fulfills the role required of the character.
* The Reader (2016), Sefia experiences this while trying to figure out her Sight abilities, mainly because she's not formally trained. Quite often it fizzles out, and when it does work she's exhausted.
* The Reader (2016), Sefia writes the name of Palo Kanta, the mercenary she killed in self-defense, on the windowsill of a bar he was meant to visit before she killed him, hoping that at least one part of him will survive.
* The Reader (2016), written language was never invented. The idea of reading words is totally alien to all but a few people, and the only way history survives is through oral tradition.
* The Reader And Protagonist Definitely Have To Be In True Love is a Chinese Boy's Love fantasy novel.
* The Reader And Protagonist Definitely Have To Be In True Love" novel. It first appears as a tattoo of a few, small black lines. The tattoo grows bigger every hour and once the black lines have covered a large area of the body, black tattoo roses start to slowly grow. The roses wither and the black flower petals fall. The "falling petals" are actually the curse target's flesh. The curse continues until the caster cancels it or until all the cursed person's flesh falls off.
* The Reader And Protagonist Definitely Have To Be In True Love tried to hide it, but after a traumatic incident, he reveals that he is deaf and his so-called headphones are actually somewhat old school hearing aids.
* The Reader: As a teenager, Michael has his first sexual experiences with Hanna, a woman in her thirties. He later admits that it was a borderline abusive relationship fueled more by hormones and didn't really help his psyche. Moreover, he's rightly shocked when he later finds out that she used to work at a concentration camp, which she kept hidden from him.
* The Reader: Averted as most of the characters are Germans born after World War II, and that generation's efforts to confront and come to terms with that past are a major theme of the novel and film.
* The reader doesn't find out that Jenn is a crook until nearly the end of the strip, although Quantum Cop figured it out years earlier. The author did plant clues for a really long time.
* The reader is even led to believe that she'd obtained her powers from a spider-bite, just like Spider-Man. However, she only developed her
* The reader knows that the Wolf's been acting on both sides to see as big a battle as possible,

* The reader never finds out who burned down Joe Bob Fenestre's house. For that matter, we never find out what happened to Joe Bob Fenestre at all.
* The readers, especially, have made the mistake of underestimating the scope of her overall power and ability several times, despite the comic's editor
* The readers know from the start that Leopold is part of the scheme to get Safi out of Emperor Henrick's hands, but it takes Aeduan a whole book to figure this out.
* The readers learn in the opening pages that magic is real and that Harry Potter survived something terrible and so will be incredibly famous in the wizarding world. Harry himself does not learn any of this until Hagrid provides him with an
* The reader, who is hopefully not quite as thick as Captain Carter, probably figures out well before it's stated that
* The Reading of the Will: Happens more often in fiction than in real life. It derives from a much older trope where a will's executor will read it out dramatically in front of the dead guy's family, which was necessary in an era when not everyone could read it for themselves. Nowadays, if you've been specifically left property in a will, you'll get a notice in writing (and the instructions on how to appear in court to contest it) and attorneys just assume that the beneficiaries are indeed literate.
* There a few animals that evolved to look like more dangerous animals, i.e., a non-venomous that looks similar to venomous one. They are other species that are more rare in that they mimic a more dangerous species behavior. There's at least one snake that mimics cobras despite the fact that its species has never seen cobras and there are no fossil records of its species meeting a snake that acts like a cobra (cobras' behavior really is one-of-a-kind, well, the only species that can back it up anyways...)
* There a fic where England claims that France has named his. France doesn't deny it.
* The Real Adventures of Jonny Quest and her father Race adore each other.
* The Real Adventures of Jonny Quest episode "The Bangalore Falcon", the characters find a live specimen of the supposedly extinct titular blue falcon. Later in the episode, they find the mythical kingdom of Shambala where several other extinct animals still live thanks to a river which grants eternal life, including a woolly mammoth, a red mountain tiger, and a three-horned golden orangutan.
* "The Real American" Jack Swagger opposition, Los Luchas/Los Crazy Chickens, weren't even foreigners). Prior to that, Swagger was "The All-American American", playing the same cocky pro-American heel that Kurt Angle did. Swagger would later play the role straight, becoming a face when the evil Russian character Rusev showed up.
* The real arbitrary skeptic is probably Izaya, who refuses to believe in any afterlife he can't prove the existence of himself, even though he's on
* The real Ashleigh Crichton. She's not having it and neither is Ed, who wasn't even asked but oh well.
* The real Balto had dark brown fur and a patch of white on his chest. The
* The Real Blonde acts in an insipid daytime soap opera despite being a classically trained actor. He hates it, but likes the money enough to stay. He eventually leverages his character's popularity to get his ex-girlfriend's character killed.
* The Real Blonde, a soap opera star cannot perform after seducing a coveted "real blonde." After she humiliates him, and he gets his revenge, he goes back to a fake blonde.
* The Real Blonde satirizes the shallowness and dysfunction of the New York fashion and cinema scene.
* The real Bragging Rights Award is God Rank. Do get it, you need to get the six badges:
* The real by-the-book-cop here is Doggett, who actually got his start as a cop. Once you get over the fact that
* The real Cobra Commander locking the Crimson Guardsman who replaced him and several others (including Raptor and Dr. Mindbender) in the landlocked freighter, sending it into the volcano on Cobra Island, and sealing the cave. A few years

later, some Vipers on patrol find a tunnel dug in the side of the volcano. They investigate and discover most of the people trapped inside died from botulism. The dead:
* The Real Cyrano de Bergerac history: there really was a French literary style called préciosité ("preciousness") that arose in the 17th century from the lively conversations and playful word games of les précieuses, the witty and educated intellectual ladies who frequented the Paris’s salons to talk about literature. This style was based in a
* The real decisive battle was "The Battle of Leipzig"/"Battle of the Nations". Napoleon was an undisputed land power on the Continent even after Trafalgar and returning from his disastrous expedition of Russia, he was still powerful. All that mattered was getting through an allied force of Prussians/Austrians/Russians. Had Napoleon won, he would in all likelihood have remained Emperor, but this defeat cracked his myth of supremacy and was so devastating that Napoleon's
* The Real Denton Affair that wasn't released in America and chronicled an actual crime.
* The real Dick Winters and Don Malarkey were blondes and portrayed by redheads
* , the real dress safely upon the model for the past couple of hours.
* The Real Estate example is cited over and over without its actual meaning being explained. The famous lines from
* The real example is the pet store worker who constantly obsesses over Chi and wants to take her home. She even visits Chi at the Yamadas' house (whom she barely knows) when she finds out she already has a family.
* The real explanation is culture. The Tau society is like ours. They practice science. Advanced machines are mass produced, tested, and refined. They are improved according to sound engineering and scientific principles. The Tau have not quite figured out yet they live in a cosmic horror story. The average Tau's possessions and quality of life are far better than the average Imperial citizens, and when the Tau's hot new gear gets blown up, they just figure out how to make the next set better while ordering the factories to replace the destroyed gear. They behave like a modern army. Extremely rare Tau weapons are not sacred relics, but prototypes handed out to elite soldiers for testing before they go into mass production.
* The real explanation is right there in the game. In battle, Fly just involves jumping high and landing on the enemy, hence the low accuracy. Outside of battle, it involves
* The real galling part of it is that somehow, the Straight Arrow manages to obviate the very real, pressing infantryman's need for heavy mobile support weaponry. The availability of potent anti-armor weaponry won't take away the fact that the troops on the ground are going to need firepower support when faced with strong, dug-in opposition. But the light infantry don't have any support weaponry beyond man-portable gear, despite the fact that flying, missile-armed drones are available in the setting. One would expect to see cheap, teleoperated, tracked or wheeled drones with support weapons, design to be compact and lightweight (and above all else disposable) to be used to support the infantry in response to the Straight Arrow, with armored vehicles serving as a mobile cavalry outside urbanized areas where they can use their extreme range to bombard targets from outside an Arrow's range.
* The real gem, however, is Galvatron. This insane psychotic warfreak shot at his own troops and did more damage to his own army than the Autobots. Needless to say, if it weren't for a number of certain extenuating circumstances, the Decepticons would have recycled Galvatron a long time ago, no matter how powerful he was. Said circumstances mainly being that, because of the backstabbing treachery endemic in their ranks, the first thing that would happen when Galvatron got slagged would be civil war breaking out due to there being no clear-cut successor to Galvatron's rank. And this would doubtlessly be fatal to the Decepticons, due to them being stuck on a burned-out world and barely scraping together enough fuel, parts, and ammo to survive from day to day.
* The Real Ghostbusters, a building becomes so saturated with ectoplasmic energy

from the Netherworld that its elevators turn into monstrous faces with gnashing mouths and lolling tongues, and vomiting up a never ending stream of ghosts.
* The Real Ghostbusters, a comic book series was also published by the now defunct NOW Comics that lasted 28 issues. A couple of annual issues also came out after the show ended.
* The Real Ghostbusters. A group of ghosts take control of the Ghostbusters one by one after they go to a ghost-themed amusement park. At first only Ray and Slimmer want to go (as they are the more child-like) but after the ghosts take control of them they trick the other ghostbusters in going.
* The Real Ghostbusters: Alexandre Gustave Eiffel is discovered to be a 19th-century ghost hunter, and the prominent French landmark which bears his name turns out to be a primitive ecto-containment system.
* The Real Ghostbusters Also, the teams were so evenly matched that they were still tied zero-to-zero for the first eight innings.
* The Real Ghostbusters) and a famous pop singer turns out to be a genocidal banshee. One episode reveals that the Eiffel Tower is a primitive Magitek containment unit.
* The Real Ghostbusters, and Egon's top hat is shot off in the crossfire.
* The Real Ghostbusters, and is more than willing to commit immoral acts (including potentially murdering humans) to continue it.
* The Real Ghostbusters, and only signed up because he was having trouble finding a job after getting out of the army. He quickly changes his mind once he starts seeing the ghosts and goblins for himself.
* The Real Ghostbusters", and the fight between him and the mantis is one of the series highlights.
* The Real Ghostbusters, and today anyone making that remark would be only noticing something absurd in the sense of silly, not noticing the kind of anomaly that would make you stop and think "This can't be true, no one would put out Christmas lights as early as Halloween."
* The Real Ghostbusters apparently transferred over with his mind, because Egon (in Slimer's body) insists on wearing his glasses.
* The Real Ghostbusters are like this in almost all cases; spirits, demons, goblins and poltergeists (take into account that the term "ghost" is used very broadly in the show and not just for the traditional disembodied soul). Only when they are the spirits of dead people reasoning with them is possible and in most cases the Ghostbusters convince them to move on. Some exceptions do exist like poltergeists Slimer and Buster (they are still chaotic, but not evil).
* The Real Ghostbusters as his movie counterpart, although the series does mock sometimes his flintiness turning his advances in failures.
* The Real Ghostbusters as "inaccuracies" in a fictionalized account of the main characters' adventures. The broadcast version even used actual clips from the film to represent the movie, although these were later cut for syndication.
* The Real Ghostbusters: At one point in "Drool, the Dog-faced Goblin", our heroes are suddenly caught in a hailstorm. The hail then changes, leading to a set-up line that inspires Ray to do his best impression of Chico Marx:
* The Real Ghostbusters A very literal example in one episode, where the team meets Sherlock Holmes (or at least his ghost) who immediately starts referring to them by name without being introduced.. because they all have said names printed on their jumpsuits.
* The Real Ghostbusters business. What's more, the accompanying toys were just as shockingly weird as the series' moments!
* The Real Ghostbusters bust demons in several episodes, albeit the nature of what a demon is may change in each series.
* The Real Ghostbusters by The Gamemaster, a powerful ghost that forced them to race for their lives.
* The Real Ghostbusters came back to the show after Q5 left, he said that he'd only use them in an episode if he were allowed to have them run over by a truck.
* The Real Ghostbusters character), much to Slimer's discomfort. However, Victor is not as innocent as he seems as he causes a lot of trouble for the Ghostbusters;

touching one of Egon's inventions, eating the whole box of jelly donuts, closing the hood of Ecto-1 on top of Ray while he was working on the car, etc., leaving Slimer to be blamed for all the misdeeds that Victor did himself.
* The Real Ghostbusters containment unit is a nice place for ghosts, seeing as Ghost World is a dark mirror image of Earth.)
* The Real Ghostbusters did this prominently in one episode. Egon, Peter, and Ray are transported to a hellish alternate version of Manhattan populated by ghosts and malevolent spirits. Interestingly, physics seem reversed there — the visiting humans have supernatural abilities, whereas the native spirits don't. New York City proper has also been transformed into a Dark World version of itself in a few episodes.
* The Real Ghostbusters, Egon bluffed a Janine imposter by referring to his mother as his Aunt Helga. The real Janine would recognize Egon's mother because they've met before.
* The Real Ghostbusters, Egon in equal parts falls in love with and is forcibly charmed by a pretty Southern girl. When he kisses her (despite Slimer's warning's), he finds out that not only is she a ghost, but she has two very large hillbilly brothers who are determined to see a wedding between the two (it's a kid's show, so they catch them before the full seduction takes place).
* The Real Ghostbusters. Egon Spengler. Presumably it is s pompadour, but it is drawn like some sort of curl... tube... thing.
* The Real Ghostbusters, Egon's uncle visits the team and wants to take Egon with him, reminding Egon that he promised to help him with his own research, and he doesn't believe in ghosts. At the end of the episode they prove the existence of ghosts to him, and he directly tells Egon that he releases him from his promise.
* The Real Ghostbusters: Egon talks in his sleep, usually about science experiments gone wrong. He has said things like "Sorry I burned down the garage, Mom." and "Don't worry, your hair will grow back."
* The Real Ghostbusters ends with the Ghostbusters chasing after Slimer for tripping them up during a parade held in their honor.
* The Real Ghostbusters episode "A Ghost Grows in Brooklyn": some ghost evades capture by hiding in Janine’s geranium, latter turning it into a treat for the entire New York city.
* The Real Ghostbusters episode "Buster the Ghost". They are partially ectoplasmic though as they can walk through walls.
* The Real Ghostbusters episode "Flip Side", Peter, Ray, and Egon end up in an alternate reality inhabited by ghosts that fear humans and are chased by ghostly versions of themselves who hunt humans called the Peoplebusters. During the chase, the three encounter a pair of ghostly moonbathers who leap into the air in fright, leaving their bathing suits behind.
* The Real Ghostbusters episode "If I Were a Witch Man" uses all the traditional tropes associated with evil witches, and even have a legion of flying monkeys (well, she calls them goblins). It turns out to be actually the ghost of an old witch defeated by Egon's ancestor possessing modern humans.
* The Real Ghostbusters episode "Janine's Genie". After busting ghosts, with the help of Janine, in an antique store, the man can't pay with money so he let the Ghostbusters take whatever relic they want. Janine took the typical genie lamp and it turns out it does have a genie in it. The genie was from the evil variety and, though he does not twist Janine's wishes (be the boss of the Ghostbusters and have Egon in love with her) he does use the wishes to open a portal to his home dimension and bring back all kinds of spirits.
* The Real Ghostbusters episode "Janine's Genie"; after going with the Ghostbusters in a work that is paid in kind, Janine picks a genie lamp. She wishes for Egon to fall in love with her and be the boss of the Ghostbusters. The genie does not twist her wishes actually; the jerk part is that it is not a real genie, but some sort of demon using the energy from Janine's wishes to open a gateway from the spirit world into Earth.
* The Real Ghostbusters episode "Knock, Knock", a literal Door of Doom is featured.
* The Real Ghostbusters episode, "Knock Knock," the boys—stuck in a ghostly

dimension—pull all the ghosts which came from it, and are themselves pulled through a portal back into our dimension. Peter says, "Anybody wanna do that again?" and the talking door which sealed the dimensions says, "DO NOT OPEN UNTIL DOOMSDAY!"
* The Real Ghostbusters episode "People Busters", the heroes are trapped in Ghost World and all except Peter are caught by the eponymous villains. Egon managers to contact Peter from within the human-holding containment unit, and tells him he has a plan to escape back to Earth; he tells Peter he has to get himself captured on purpose. Peter does so easily simply by knocking on the door to their firehouse and waving when they open it.
* The Real Ghostbusters episode "Ragnarok and Roll" revolves around a guy who wants to destroy the world because everything is so awful. His sidekick and only friend, who is having increasing doubts about this plan, finally gets knocked off the roof of a building, clinging to the edge by his fingertips; the guy desperately tries to save him, but the sidekick flatly refuses to take his hand until he agrees to quit destroying the world.
* The Real Ghostbusters episode "Slimer, Come Home". Ray sits down rather than searching. When Egon asks what he is doing, Ray says he is working on a theory that if you stay in one place long enough every person you've ever met will eventually pass by. Egon is about to comment on the sheer ridiculousness of this when one of Ray's grade school teachers stops and says hello.
* The Real Ghostbusters episode "Stay Tooned" had Janine freak out after seeing a cartoon cat and a cartoon mouse come to life and leap out of the television set. When the Ghostbusters ask her what happened, she stammers "I...I saw a mouse", causing them to initially think that Janine was scared by an ordinary mouse.
* The Real Ghostbusters episode "Surely You Joust" has the ghostly wizard Orlox's minions turn into stone after the Ghostbusters capture Orlox.
* The Real Ghostbusters episode "Surely You Joust", Peter, Egon, Winston, and Ray steal armor from some skinny dipping ghost knights to use as disguises.
* The Real Ghostbusters episode "The Ransom of Greenspud" had three ghosts kidnap Slimer and hold him for ransom in an attempt to get the Ghostbusters to free their boss Spiderlegs from the Containment Unit. Slimer ends up driving the ghosts nuts before the Ghostbusters find them and come to Slimer's rescue.
* The Real Ghostbusters episode "Transcendental Tourists" has a scene where Slimer tries to buy some milk from a vending machine. The vending machine won't work, so Slimer resorts to using his ghostly powers to phase through the machine and consume a carton of milk from the inside.
* The Real Ghostbusters episode "Transylvania Homesick Blues". At first glance, Count Vostok fits the bill perfectly, having the appearance and voice to a tee, living in the fictional Slavic country of Boldavia, and in a stock sinister castle on a mountaintop. However, the Count is revealed to be a benevolent entity who survives on artificial blood, and also the victim of a plot by his Van Helsing-esque rival to turn the stereotypical angry torch-wielding Mitteleuropean peasants in the nearby village against him. (Furthermore, he reveals that the novel "Dracula" was apparently based on the historical rivalry between the families of the count and the vampire hunter who pursues him.)
* The Real Ghostbusters episode "When Halloween was Forever", the Ghostbusters must stop a powerful Halloween ghost named Samhain (who notably has a pumpkin for a head) from gathering all of the ghosts and goblins of New York to make it Halloween Night permanently.
* The Real Ghostbusters episode "Who're You Calling Two-Dimensional?" After Egon runs a test to find out what's inside Slimer, Slimer gets really hot and suddenly popcorn starts popping out of Slimer and filling the room, bursting a door open in the process.
* The Real Ghostbusters episode "Who's Afraid of the Big Bad Ghost?", the ghost of Olivia Stewart's uncle Horace mentions that rarebit always gives him the strangest dreams.
* The Real Ghostbusters, especially when he gained a more prominent place.
* The Real Ghostbusters example, they managed to use the tower's unique design to

their advantage, converting it into a transmitter which beamed the ghosts back to their containment unit in New York.
* The Real Ghostbusters expanded on the idea that enlightened ideas of reason and knowledge beat back our fears. Egon is the primary brains behind the technology. Why did he do it? Because he was menaced by the Bogeyman as a kid, motivating him to apply his intellect and reason to understand and best the things that scared him.
* The Real Ghostbusters fought a ghost-circus in their comic-book incarnation. The zombie elephants were somewhat creepy.
* The Real Ghostbusters, from which they had to rescue Peter's estranged father.
* The Real Ghostbusters gave Peter an antagonistic relationship with Slimer. However, when Samhain threatens him...
* The Real Ghostbusters ghosts rather than just capturing them the way the Ghostbusters do. Egon protests that Smart's claims are impossible, because ectoplasmic physics don't work that way, but no one at the press conference where Smart is showing off Robo-Buster understands what he's talking about, and they don't believe him.
* The Real Ghostbusters had a 65-episode season that aired on weekdays in syndication alongside the second season of Saturday morning episodes on ABC.
* The Real Ghostbusters had an evil spirit take the form of cartoon character Sammy K. Ferret, who comes to the real world and starts transforming people into toons (including Egon into a bird, Ray into a pig, and Winston into a dog.)
* The Real Ghostbusters had a nudity gag used in "Sea Fright", where the ghosts of Captain Jack Higgins' crew searched New York for valuables to steal and end up robbing a cowboy of his clothes. Their victim is only seen from the waist up after this happens, but a woman ends up shrieking at the sight of his state of undress.
* The Real Ghostbusters had at least two episodes based on this trope: one where Egon becomes a "werechicken," and one where an eccentric man makes a magical wish that causes all the chickens in the world to disappear.
* The Real Ghostbusters had pretty, but limited, animation in Season One. Seasons Two and Three are quite a step up in quality, with more cels used and almost everything shaded with shadows. Season 4 and 5 is a step downward (except for "The Halloween Door", done by TMS), but Seasons 6 and 7 look atrociously bad.
* The Real Ghostbusters had them called to a college to deal with the ghosts of a spectacularly unruly fraternity seeking revenge against the college for expelling them. The Ghostbusters eventually tricked them into thinking that they could convince the dean to graduate them if they jumped through a few hoops, the last of which was to pose for a graduation photo on bleachers with traps planted underneath.
* The Real Ghostbusters had the team finding a witch's cat and making the pun mentioned above.
* The Real Ghostbusters Halloween Special, a monster named Boogaloo is terrorizing the city. Peter tries to get its attention. "Hey, Boogaloo! You're ugly and your mother dresses you funny!" For the record, Boogaloo is about a hundred feet tall, covered in multiple faces and tentacles, and not wearing any clothing at all. Nevertheless, it works.
* The Real Ghostbusters has a variety of these, all featuring the ghost from the GB logo doing something funny and then saying "TRG will return after these messages. / And now back to the RGB.". These include:
* The Real Ghostbusters has ghosts that take the form of the original Ghostbusters, in their original uniforms no less, trying to kill them.
* The Real Ghostbusters has Janine Melnitz. Alternates between thick, round, dark glasses and pointy, bright green glasses and looks cute in both of them.
* The Real Ghostbusters has the ghost sucked in by the proton beams as well.
* The Real Ghostbusters has the movie version of the team, including the token black guy Winston Zeddmore.
* The Real Ghostbusters have several episodes like this actually, including a giant Mantis, living balloons, a killer Rollerghoster, a giant geranium and, of course, the Stay Puff Marshmallow Man.

* The Real Ghostbusters have to contend with subway trains and graffiti turned into monsters. On one occasion the busters board a subway car, the lights go out, and when they go on again they're surrounded by undead skeletal passengers.
* The Real Ghostbusters he's an incorrigible mischievous glutton who has to be kept in a terrarium so he won't wreak comedic and comparatively harmless havoc — one of the first major tasks in the game is to recapture him after he escapes.
* The Real Ghost Busters. His deadpan, monotone voice is prevalent, even when he is legitimately happy.
* The Real Ghostbusters his voice-actor, Frank Welker. He's only missing a pair of huge, eighties-style bifocals.
* The Real Ghostbusters horrors for a very long time. There's always a just-in-time rescue, but the writers made sure to milk every last second of tension out of it. (Never mind, of course, even with that last-second rescue, there's always the possibility of something else coming out...)
* The Real Ghostbusters however only the original first season episodes have seen release.
* The Real Ghostbusters inhabited by spirits in a ghostly environment.
* The Real Ghostbusters: In one episode, it's said that Egon's ancestor (a magician) tried to refill a well, and woke up its Genius Loki (the term is used) in the form of a horse sized dragon, which thought he was his dad. The magician put it back to sleep. After a few centuries, Egon wakes it, this time house sized.
* The Real Ghostbusters in Saturday morning fare at the time. There are a few notable exceptions to this. "The Old College Spirit" featured ghosts who were deceased frat brothers who had failed to graduate. "Who's Afraid of the Big Bad Ghost" had the ghost of a man trying to reconnect with his beloved niece so that he could say goodbye before departing. "The Man Who Never Reached Home" featured Simon Queg, a spirit forced to wander the Earth for his misdeeds in life, until he confronted his darker self. "Bustman's Holiday" had ghosts that were explicitly from a battle on the Scottish moors. And "The Bird of Kildarby" had a group of Irish ghosts who were haunting a relocated castle. "The Last Train to Oblivion" featured the ghost of Casey Jones. "Ghostfight at the OK Corral" featured Doc Holiday and the Earps.
* The Real Ghostbusters: In syndication, the show uses its insignia directly over the finishing scene to transmit to the next.
* The Real Ghostbusters: In the episode "You Can't Take It With You," a dying billionaire builds a machine to open a portal to the afterlife so he can take his vast fortune with him. Unfortunately, this causes a rupture in the separation between the human and spirit worlds, causing ghosts to invade the land of the living.
* The Real Ghostbusters: In "The Grundel", Ray jokes that their lack of calls means nobody loves them and is lectured by Egon about associating self-worth with being loved. Janine reassures Ray that she loves him, Winston and Peter, but ignores Egon, much to Egon's annoyance. The three named Ghostbusters make a quick exit, followed by a dejected Egon. Janine stops him half-way up the stairs to tell him she loves him most of all; while he tries to dismiss the sentiment, he practically floats upstairs with pleasure.
* The Real Ghostbusters It had the requisite fake sideshow freaks, but the star attraction—indeed, the one the Ghostbusters were chasing—was a shapeshifter called "Drool, the Dog-Faced Goblin."
* The Real Ghostbusters made regular use of these. From the Bogeyman's home dimension to a sneak peek at the end of the world to a ghostly pirate TV station, the series enjoyed dropping the Ghostbusters in places where physics didn't work right and the architect expected the residents to be capable of phasing through walls. Some examples:
* The Real Ghostbusters meet Mee-Krah — an unstoppable force of pure energy that absorbs other ghosts and scorches any land it passes over until it's as hot and barren as a desert — in the episode "Standing Room Only."
* The Real Ghostbusters naturally would deal a lot with haunted houses, but the two main episodes in feature one were:

* The Real Ghostbusters, notably in a Lovecraft tribute episode where, once again, the Necronomicon was on display to the public. You'd think they'd learn after a while.
* The Real Ghostbusters of Halloween (teaching children not to be afraid) is still alive and well, and forces the monsters back into the netherworld.
* The Real Ghostbusters. Once they find out what happened, Egon manages to separate them into two ghosts, and then defeat Big Green without hurting Slimer.
* The Real Ghostbusters: One can only imagine what logic Egon uses to justify saying this about his night out with Janine in "Rollerghoster".
* The Real Ghostbusters one who appeared to be Professor Moriarty (who eventually conjures up a demonic version of the Hound of Baskervilles). Egon at first thought this didn't make sense; as fictional characters, these people were never alive to begin with, and thus could not be ghosts. When it became clear that they were indeed the real deal, he brought up a theory he had read about called "belief made manifest". What this meant was, if enough humans believe that a fictitious character is real and he has enough fans, it can give the character a pseudo-life, which seems to be what happened. Once they figured this out... The game was afoot!
* The Real Ghostbusters Only good is not allowed to cheat. If good adopts the ways of evil, then it becomes evil."
* The Real Ghostbusters or those that involve poltergeists, goblins and the like.
* The Real Ghostbusters, Peter is captured by the ghost of Casey Jones and forced to stoke a train's furnace with coal. The only thing the ghost ever says to Peter is "More coal!". Peter finally decides to make the most of the experience and starts singing "Sixteen Tons" as he shovels coal. The ghost looks back at him and smiles. (This is also clever foreshadowing that the ghost isn't evil.)
* The Real Ghostbusters." Peter then shows his hand of four Aces. The ghosts say this means someone at the table is a cheat, causing Peter to dive out the saloon doors.
* The Real Ghostbusters: Samhain is an evil spirit with a pumpkin head.
* The Real Ghostbusters segment "Dr. Strangedog" had Slimer consuming numerous boxes of Freaky Flakes in order to save 100 coupons for a Super Duper Spy Kit.
* The Real Ghostbusters segment "Scareface". Goolem and Zugg invade the Sedgewick Hotel to order around the ghosts and Slimer tries to get rid of Goolem and Zugg by impersonating Goolem's boss and Zugg's uncle Scareface. They find out about Slimer's deception as soon as the real Scareface shows up, but Goolem gets himself and Zugg in trouble by attacking the real Scareface due to mistaking him for Slimer in disguise. Goolem and Zugg's punishment is that they get banished to the South Pole.
* The Real Ghostbusters set in, though there were still flashes of this in specific episodes.
* The Real Ghostbusters short "Cruisin' for a Bruisin'", where Slimer has to sneak Mrs. Van Huego's dog Ferdinand aka Fred out of the Sedgewick Hotel to the Ghostbusters' barbecue while dealing with a guard dog named Bruiser. At one point, Bruiser barks at Fred loudly enough that Fred's fur comes off to reveal boxer shorts.
* The Real Ghostbusters show that Dr. Egon Spengler can speak Russian, Japanese, Sumerian, American Sign Language, and Troll.
* The Real Ghost Busters, Slimer goes into a restroom, slamming a stall door behind him. A flush is soon heard, and he then exits the stall by going right through the door, leaving slime on the door in his wake. Even though by all rights, ghosts shouldn't need to use the restroom.
* The Real Ghostbusters; Slimer runs away in an episode after Peter yells at him, and leaves a note behind. Janine finds it first, and angrily reads it to the guys, scolding them. Ray takes the note and asks how she can read it, as Slimer not only has bad penmanship, but got slime all over the paper. Janine simply snarks, "I'm a secretary. I can read anything."
* The Real Ghostbusters, so when he had an opportunity to take a clean shot at toy companies, he did so with glee.
* The Real Ghostbusters spectral energy and ends up being the weapon that turns the

tide in their battle against Mee-Krah. Naturally, the machine is destroyed at the end of the episode, but Egon doesn't understand why Peter's so upset about it.
* The Real Ghostbusters's pitch pilot could be more accurately described as a proof-of-concept; it's only about four minutes long, has no voice acting and basically no plot, but it does establish the series' look, tone and style. Notably though, Peter Venkman's design is quite different from the finished series and Slimer is treated as a villain. Though unreleased for a while, parts of the pilot were used in some of the show's merchandise and advertising.
* The Real Ghostbusters summons a golden flute with the power to destroy the world.
* The Real Ghostbusters than the first movie, but still has some scary elements.
* The Real Ghostbusters that awakes every thousand years and devours other ghosts in order to replenish its energy. Unfortunately, it becomes incredibly hot as it did this, until it eventually reduces the surrounding landscape to a wasteland. The Sahara Desert, the Gobi Desert, and Death Valley were all in their current state because of this demon's previous rampages. The heroes have to stop it before it does the same thing again.
* The Real Ghostbusters, the episode 'Knock, Knock' has Egon look into the room that holds the door to Doomsday. When asks what he sees, he replies 'you don't want to know' in his usual calm, dull tone of voice.
* The Real Ghostbusters, the episode "Look Homeward, Ray" at one point has Alan Favish scream "Mommy" while being chased by the Winged Puma of Morrisville.
* The Real Ghostbusters the fact that from season 3 onwards Janine's visual design and voice changes several times.
* The Real Ghostbusters, the firehouse is "haunted" by the team's mascot, a "class five free roaming vapor" named Slimer. As portrayed in the movie and a later flashback episode, he originally haunted a ritzy hotel, and appeared at the firehouse after his capture and the original containment unit's destruction in the film left him with nowhere else to go. Despite Peter's protests, Slimer's encouraged to stay by Egon and Ray since he's the only ghost on friendly enough terms with them to let them run tests.
* The Real Ghostbusters: The Ghostbusters are pursuing the ghosts of four Old West desperados, and Peter gets snagged into a poker game with the four spirits. When it comes time to call, each of the ghosts produces two aces, two eights and a ten (the "dead man's hand"). Peter then produces four aces, whereupon the ghosts accuse him of cheating and draw their guns. Peter escapes and mutters how wise it was of him not to show them the fifth ace.
* The Real Ghostbusters: The Ghostbusters traveled to Scotland once when Ray inherited the title of Duke of Dunkirk. When he attempted to rally some of the locals to help fight an army of Highlander ghosts, Ray introduced himself as the Duke of Dunkirk. One local answered, "Sure, and I'm Dick Whittington's Cat!" It didn't keep the local from helping when Ray offered money.
* The Real Ghostbusters, the Great Old One himself was defeated by an ionized roller coaster that attracted lightning that struck Cathulhu [sic].
* The Real Ghostbusters, the heroes have visited quite a few hellish dimensions and fought demons from them, but if a heavenly version of the afterlife exists, it has never been seen.
* The Real Ghostbusters: The Land of Lost Objects is an extra-dimensional realm lost objects wind up.
* The Real Ghostbusters the Necronomicon and The Nameless Book both fit the bill.
* The Real Ghostbusters Then there's the ability to mix a cake, bake it in the oven, and assemble its layers with frosting in mere seconds to throw into a pursuing antagonist's face.
* The Real Ghostbusters: The Swamp Dog, brought to America by an Irish curse.
* The Real Ghostbusters the trap opened, but Peter assured him it didn't and everything was fine. Naturally, the ghost got away, possessed a geranium Egon gave Janine, and made it grow so big it began to take over the city, destroying everything in its path.
* The Real Ghostbusters to access the Busters' containment system and unleash all the ghosts stored therein.

* The Real Ghostbusters to be able to rest in peace, or a clan of vampires that fed on synthetic blood needing help with some overzealous vampire hunters who wanted to kill them even when they weren't a threat, the Ghostbusters could just as easily be helping the supernatural as fighting it.
* The Real Ghostbusters used this gag in the episode "Stay Tooned", where Sammy K. Ferrett drops an anvil on his guest and plays her like a real accordion after she becomes flattened and folded up.
* The Real Ghostbusters variety. The genie is evil and uses Janine's wishes to open a portal from the spirit world to Earth.
* The Real Ghostbusters, where Ray is talking about how the fifties were a much simpler time. Egon points out that there's no inherent proof of that, as each decade has its own individual challenges.
* The Real Ghostbusters where they risk their souls, luring them into it by offering a trip to Tahiti as a grand prize. When they manage to win, he decides to kill them, because he never said he's spare their lives. They manage to escape, however, and Venkman forces him to give them the trip. (He includes three tons of deviled ham with the prize, likely to annoy them.)
* The Real Ghostbusters. Which, by the way, has a similar case with Eduardo and his crush on Kilie.
* The Real Ghostbusters whilst walking in a crowd trying to reach the Ghostbusters:
* The Real Ghostbusters witches are an especial case of supernatural creatures, albeit very humanoid and have cat familiars that grant them powers. The familiar only works with supernatural creatures such as witches and ghosts (like Slimer).
* The Real Ghostbusters, with a teddy bear's body riding a tricycle, a gift box for a head, and a toy monkey with cymbals on top, before going on a rampage.
* The Real Ghostbusters with a whole building section thrown at them by haunted girders.
* The Real Ghostbusters, with Egon heading a new team. The original Ghostbusters returned for its first season finale.
* The real God is, for lack of a better description, a bunyip. And he's also a Buddhist. Who only lets Mormons into Heaven.
* The real Guy de Lusignan was not especially eager to go to war, and he certainly wasn't pulling Reynald's strings to make it happen. In fact, history suggests that it was Reynald who was the driving force behind the conflict, and Guy, far from the arrogant and prideful man he's depicted as in the film, lacked the spine to stand up to Raynald and thus was dragged along for the ride.
* The real Hank Henshaw's "Cyborg Superman" look was a cheap-looking metal half-mask.
* The Real Housewives, she has no problem seeing it twisted into a joke).
* The Real Housewives, which often illustrates the process of breast augmentation surgery; however, this trope is just as often averted, as not every Housewife has implants, and some ultimately get theirs removed.
* The real humiliating defeats for Rome came against the Persian Empires. Rome and the Parthians and later the Sassanians had a
* The Real Husbands of Hollywood guest-stars as himself, with his introduction caption stating "Helping attract Latino audience."
* The Real Husbands of Hollywood punctuated by the one Russian word he actually knows: vodka.
* The Real Husbands of Hollywood the difference between being "black famous" and "actually famous," essentially invoking this trope in all but name.
* The Real Husbands of Hollywood within the show. One episode even refers to him as the most hated person in America.
* The Real Hustle and it often works like this. Customers find a brand new phone store has opened selling phones extremely cheaply; but the catch is that the store doesn't keep the phones so it'll take a day or two for the phone to turn up, you still need to pay upfront but it's extremely cheap...even cheaper if you pay via card. Of course by the time they come back to the shop it's gone and if they were unfortunate to use their card it's been cloned.
* The Real Hustle once showed how con artists would dress up as police officers and

do this to steal people's cars. The guy they did it on did show some resistance, but mostly confusion. After a few seconds of protests, the con artists were behind the wheel and driving off.
* The Real Hustle. The opening credits call her the "Sexy Swindler" for a reason.
* The Realian MOMO has the politically and functionally dangerous Y-Data stored in her head.
* there a line that says Thor is angry that Jesus did not show up for a duel, although it's never mentioned if Thor met Jesus or was merely cursing his name and demanding his appearance.
* The Real Inspector Hound by the play-within-a-play's Mrs. Drudge, who answers the phone, "Hello, the drawing-room of Lady Muldoon's country residence one morning in early spring?" and "I'm afraid there is no one of that name here, this all very mysterious and I'm sure it's leading up to something, I hope nothing is amiss for we, that is Lady Muldoon and her house guests, are here cut off from the world, including Magnus, the wheel-chair-ridden half-brother of the ladyship's husband Lord Albert Muldoon who ten tears ago went for a walk on the cliff and was never seen again." And then there's the treacherous fog.
* The Real Inspector Hound employs this trope with the radio announcement. (Made doubly fun by stage directions which suggest that the radio voice be pre-recorded for the show.)
* The Real Inspector Hound has a scene in which one theatre critic rants about only being hired to fill in for another, while his companion professes his love for the leading actress in the play they are reviewing.
* The Real Inspector Hound includes a body which is kept on-stage throughout the entire show. This role is traditionally cast.
* The Real Inspector Hound". They play it twice, and the rules aren't remotely similar between the two games. One line implies that they're spinning a roulette wheel.
* The Real Inspector Hound. Two critics are watching a play. During intermission, one of them sneaks on stage to help himself to the liquor in the drawing room. He takes a gulp, and does a giant spit-take, exclaiming to the other critic, "It's tea!"
* The real irony is that, since the previous time travelers didn't leave a memo, there is no way of knowing whether the world the other time travelers created is improved over the world where Columbus did— whatever it was he did.
* The real issue is that Space Marines in general get too much support (model-wise and rules-wise) and are generally treated as the protagonists of
* The real issue is when players who are used to serving as this trope in other MMOs come here and think that turning 'Healing Aura' on automatic and following the tank- that's it- is contributing to a team. Also that, especially in higher levels, healing
* The realistic version caused by moving at high sublight speeds appears in
* The Realist movement in 19th Century Theatre was profoundly influential on acting techniques, paving the way for
* The realities behind this trope put the lie to that old practice of
* The Reality Bug by D. J. MacHale. In it, the Reality Bug tries to break out of fantasy into reality. The explanation is that Jumpers are somehow giving the Bug physical power.
* The Reality Bug this happens with an alternate reality as opposed to a game.
* The reality is a little different; 12 inches of penetration in ballistic gelatin is considered the absolute minimum for a law enforcement pistol round,
* The reality retcon in the penultimate arc that the villains pull this on most of Equestria... Zecora being a prime example as in her corrupt state she reminds Apple Bloom how they know nothing about Zecora's past, and Zecora could be a murderer on the run for all Apple Bloom knows. Deconstructed in-universe by the CMC as they pick apart about how nonsensical that is with literally everything the ponies and friends have DONE since we've laid eyes on them.
* The Reality Star has an intern saying that Wednesday is "crazy but nice".
* The "Reality Zone" was introduced for a one-off Sunday strip, then became a

recurring plot element.
* the realization that their world is a simulation just like the one they created, including the ability to move up to the next level. It is highly stylized and bizarre.
* The real Jay Garrick is from Earth-3 and has super speed, although he has problems due to his age.
* The real kicker is that he does this by accident; he was genuinely trying to be friendly!
* The real kicker is the beef and mustard. When he offers this to Kate, she agrees. Then he says no because the mustard is too hot. She says she'll have the beef without the mustard, then. He says no, the beef goes with the mustard. She says she's willing to eat one or the other or both or anything else. So Grumio comes up with the perfect solution: mustard without the beef!
* The real kicker is the claim that German is "derived from a contraction of Greek and Latin" (it's not - they're all distinctly related, but German doesn's come from either of them) which is apparently the reason that German words are, according to the narrator, "abruptly harsh" (ironic, as French can be argued to be a "contraction" since it lost many final consonants, and you'd be hard pressed to find anyone who says French is harsh). Oh yeah, and "German languages" are also difficult to untangle, which, apparently, we "can see". No explanation beyond that is given.
* the real killer assassinates the target and gets shot by police, the actor thinks it's all a game.
* The real killer in "Frank's Best" was the victim's son, who had anger issues; the apparent killer is an illegal immigrant.
* The real Kiyohime coincidentally follows up on this joke in "Chaldea Heat Odyssey" by offering to let her master eat her if they don't find food on the island they're stranded on. Earlier in "Chaldea Summer Memory," the first part of the event, she suggested her tail first.
* The Real Knife moves. This is very deliberate, since the entire point of this run is to emphasize what terrible lengths the player'll go to just to get pointless power.
* The (real) leader of Akatsuki eventually reveals his endgame plan is to put the entire world into one of these, having decided the
* The Real Legend: The web animation series casts Epona as a small, overweight donkey, much to Link's disappointment.
* The real life ace with the highest kill count was German Erich Hartmann ("Bubi" to his friends, "The Black Devil" to his enemies), with 352 victories credited. He felt his biggest achievement was never losing a wingman. Hartmann was the classic Bushwacker. He once described his own flying style as "Dive — Attack — Run Away — Coffee Break". He also stated that only damage his plane ever suffered in air combat was from destroyed enemy planes' debris. This was in large part because of his style of fighting: He would fly as close as possible before firing. He was known to have said "If you wait until the other plane fills the entire window of the cockpit, you don't waste a single round."
* The real-life Alcubierre Drive proposal, which has attracted attention for being theoretically plausible, works by creating immense gravitational distortions probably greater than that of Earth's gravitational field. Creating the gravity well of Earth right next to another planet would cause catastrophic damage from tidal forces, meaning that if the concept proves workable, an Alcubierre Drive-equipped starship will need to travel to the outer solar system before folding space to avoid perturbing the bodies within.
* The real-life Battle of Agincourt was lost by the French deciding to employ this trope at exactly the wrong time. At the time of Agincourt, conventional wisdom held that the shield/pike wall would defeat a headlong charge; thus the army that attacked first would lose. The French, holding home terrain, superior numbers and not crippled by disease and logistical issues, thus decided to hold and wait for the English to make a desperation charge that the French could crush with their cavalry and men-at-arms. Thus, as the English advanced their longbows into firing

range and put down a wall of stakes, the French did not respond. The end result: The English began bombarding the French with arrows and the French, instead of giving ground, decided to charge the English lines
* The real-life brothers Luis Fernando and Alejandro Orozco play Max Brilliant Methone and Soul Killer Cyllene, respectively.
* The Real-Life example (see below) about the East German prisoner (imprisoned for
* The real life galactic core of the Milky Way is everything but peaceful. As noted above it's surrounded by huge dust clouds, many star remnants surround the central zone, and a good part of them consists of neutron stars and black holes (objects you should never get close to). A few light years from the center
* The real-life investigation by the U.S. government and the Russians on whether or not psychic powers exist (as seen in the
* The real-life Los Zetas cartel serves as a secondary antagonist in a chapter of
* The real life military tactic of the Shield Wall was essentially this. Soldiers would form a line where their large shields either touching or overlapped, extend their spears, and wait. Trying to go on the offense with an intact shield wall was slow and difficult, because everyone would have to move at the same pace, which could be tripped up by differing terrain, or someone getting tired and not being able to hold up the heavy and cumbersome shield for defense. Trying to attack a shield wall was a daunting task without overwhelming numbers, however, because while simply standing with a raised spear or making a short stab with a sword isn't very impressive offense, it's very good at keeping the men in the shield wall protected while the attackers either die or wear themselves out trying to breach it. As such it was the backbone of the Greek phalanx, the Roman legions, and continued in use all the way to the late Middle Ages.
* The real-life poisons abrin and ricin are both very deadly, and can easily be manufactured from common ornamental plants, making the origin of the poison difficult to trace. In the assassination of
* The real-life portfolio of the U.S. National Security Agency is signals intelligence and cryptanalysis (codebreaking). That hasn't stopped screenwriters and others from depicting "NSA agents" engaging in espionage fieldwork which in reality would be handled by personnel of the CIA, FBI, or various military intelligence agencies.
* The real-life revolt of Spartacus and his fellow gladiators is told in a flashback in
* The real life story of Big Edie and Little Edie Beale, an aging mother and daughter who resided in the falling-down mansion of
* The real life touge courses in the anime have become immortalized in real life as well. Mount Haruna (which is what Mount Akina is based on) often gets many visitors in the Gunma area, and the real tofu shop also gained popularity before it was
* The real life version of this trope is a large part of the the reason for the existence of Explosive Ordnance Disposal (as the American military calls them; other countries have the same job under different names). Civilian Bomb Squads also sometimes serve this role in planned situations (see the Mythbusters example above) or as first response until the military can arrive. Although when any of these teams get involved in real life, the primary goal is the protection of others (which usually means a safe detonation that harms no one).
* The real Luigi Lucheni was Italian. In the musical he's almost always played by a German actor (or a Turkish actor, in the case of Serkan Kaya).
* The really nightmarish one one took place in "A Clockwork Nebari" and featured our hero
* The really strange thing is that the Montana Jones storyline takes place
* The Really Useful Book tower, with which he apparently had an argument.
* The really valuable thing is the unique lifetimer that every individual has, measuring out the seconds of their life like sand in an hourglass. Events in
* The Really Wild Show, of course, it was followed by an explanation of why you couldn't really get spiders that big.
* the real Madara Uchiha shows up on a battlefield and sends numerous shinobi

flying as he clashes with them.
* The Realm and Lookshy is largely about this. Lookshy held to the old, lingering ways of the Shogunate while the Scarlet Empress forged a new path for the Realm out of the Shogunate's ruins, challenging even the Sidereals with her audacity.
* The Realm, but its graduates, while fewer in number, tend to go further in their careers.
* The Real McCoy had two WWII veterans, one black, one Indian, reflecting on their time in the war, and the abuse they suffered, but it was worth it, because they helped put an end to a racist authoritarian state. Now they just need to do something about the other one.
* The Real Mccoys, the news of grandpa being arrested for burning his trash was all over the headlines. An old man going to jail for burning his trash, the most important thing going on that day.
* The Real Mc Coy which starred British Black and Asian comedians, parodied the British Army's equal opportunities recruitment campaign by producing a spoof advert with a black soldier insisting he had "the same opportunity to get shot as anyone else." — the Army's recruiters went on to borrow this argument for future adverts.
* The "Real Men, Real Roleplayers, Loonies and Munchkins" list has this as
* The real MI7 was the propaganda and censorship division of the War Office, currently defunct. In the
* The Realm is basically divided into slaves, peasants, patricians (wealthier mortals with blood ties to the Dragon-Blooded host), and Dynasts (Dragon-Blooded families). Dynasts who don't Exalt are usually treated like red-headed stepchildren, and members of lower castes who become Dragon-Bloods are adopted by the Dynastic Houses ASAP. And of course, any who Exalt as Solars or Lunars are hunted down like dogs, this is the Realm we're talking about.
* The Realm Of Albion has renounced his Roman citizenship after witnessing a massacre in Spain.
* The Realm Of Albion, several characters who derive from medieval romances and originally had anachronistic non-Celtic names have been renamed... mostly with direct Welsh equivalents of the actual meaning of their original names.
* The Realm of the Dead appears different to everyone. For Antimony and Mort, it appears (or so we're told) to be a majestic
* The Realm of the Mammoth Lords is an inhospitable tundra inhabited by mighty-thewed
* The Realms are also the home of the Harpers, an organization of bards that exists explicitly to generally promote
* The realms of Kaldheim have no sun or moon — they're lit by the light of Arnheim, the World Tree's topmost realm, which is visible as a sundog-like effect in the realms below it — and the twisting branches of the World Tree are always visible beyond the clouds, rising from the horizon and out of sight.
* The real Noodle 2D explains he had the mask to cover up a massive hangover.
* The Real O'Neals as Kenny, being under 21, mostly hangs out in a quite calm yet friendly gay coffee shop.
* The Real O'Neals gives a more realistic example in the form of Pat and Eileen, it is extremely awkward as they navigate towards it due to Eileen's clear discomfort with the whole idea of divorce because of her devout Catholicism.
* The Real O'Neals. His mother Eileen would have varying levels of acceptance depending on the episode because of this. Critics noted that it made the depiction of Eileen's struggle to come to terms with having a gay son oddly realistic, as it comes off as a messy hodgepodge of conflicted emotions rather than the straight line to acceptance that had been intended.
* The Real O'Neals, Shannon offers a boy some gum during an awkward moment, upon which he takes the entire pack and hands the one stick back. She later decides it's a good thing:
* The real point of the password was to see if a Naruto impostor could recite it correctly- the real Naruto would never remember the intentionally long and complicated password, especially on his first try.

* The real president says this to Zartan. That's after he used a combat knife to slash his face, only for the nanomachines
* The real problem (or benefit, depending on your point of view...) was that biotics bypassed shields in the first game (and armor/barriers didn't exist); virtually any enemy could therefore be affected by biotics... up to and including the final boss, who becomes a cakewalk when immobilized by biotics. In the later games, the most powerful biotic powers only affect enemies with no shields/armor/barriers,
* The real problem was not that House's father was a Marine, it was that he treated his son like a recruit instead of a son. The fact that
* The real purpose was to throw the other friends off about who the father of Rachel's baby was.
* The real question is exactly what Tzeentch's designs might be. Out of all the Chaos gods he is the least
* "The real question isn't "Are we dumbing down the game too fast?" It's "Are we dumbing down the game fast enough?" "
* The real reason for the disastrous Dieppe raid of 1942 was to ease considerable pressure on Britain to launch an invasion of France that year.
* The real reason of rejection was probably : A) historical fiction is mostly used to make people fantasize (read: has been almost completely absorbed by hardcore swashbuckling and romance novels with no interest for historical stuff) B) her realistic and subtle approach and use of at the time well-known social markers make it harder for readers to read it as a scandal-in-Regency-era-thing (in which you kinda expect a plot against the king, a feminist speech that people couldn't have uttered due to the lack of the statistic data presented in it at the time, and a love story that just
* the real reason Raynor was arrested was for disrupting the progress of the Zerg on Mar Sara. The Confederacy WANTED to let the Zerg run free as a sort of sick "weapons test".
* The real red stapler, though, is the military. Every challenge featuring the military provides the British armed forces with a chance to show off their state of the art military hardware to millions of prime-time (often male, young adult) viewers.
* The Real Remington Steele: An alias a character made up turns out later to coincidentally be a real person.
* The Real Remington Steele: An alias the character made up turns out later to coincidentally be a real person.
* The Real Remington Steele involved as it is all revealed as the core premise of the show.
* the real Reynald made for a good enough character that the writers largely left him as he was in real life. If anything, they actually toned down some of his more atrocious deeds.
* the real Roy Harper against the League, whose members are none the wiser until he unwittingly turns against them.
* The real Sam searches for him offscreen and when Dean stabs himself in the dream-world, he wakes up to the real Sam untying him and helping him come-to.
* the real Scooby approaches him) Look, Scoob, you've been turned to stone!"
* The real secret is that every winner of the game is actually set to be killed by their father in order to become the new October Boy, and the father is then expected to help put the boy together when the next game begins. The protagonist ends up helping the latest October Boy when he learns the truth.
* There also are other forms of magic besides channelers— Perrin's wolf powers, Min's viewings, Hurin's sniffing — these don't fit within the rules and confuse channelers. The
* There also are plenty of more normal diseases that simply have weird effects on people that are infected with them such as a disease that causes you to regurgitate useful objects when you need them or a herpes virus that causes you to hallucinate that you are trapped in a game of
* There also a variation with Mr. Krabs in the episode "Jellyfish Hunter" as

SpongeBob tries to free the jellyfish Krabs tricked him into imprsoning.
* The real Sobel did eventually see combat and did a good job, but he never mentally got past being relieved of his original command and the actions of those who essentially committed a mutiny to get him out. The survivors of Easy Company believed he had died soon after the war and he never appeared at any of the reunions.
* There also doesn't seem to be any racial discrimination on the basis of skin colour or national origin among the Death Eaters, as Blaise Zabini, who is black, is shown to be a Death Eater sympathiser and there are Russian Death Eaters such as Karkaroff despite them mostly operating within Britain.
* There also exist multiple concepts for nuclear-powered ships that essentially run on continuous steam explosions or equivalent effects with other molecules. For instance, with a suitable reaction surface, you can produce a similar effect with carbon dioxide to make an engine. What's the use of that? It gives you an exploration ship with a an effectively unlimited cruising range on Mars. When you get done with that, refit it to use water and head for the moons of Jupiter and Saturn.
* There also exists certain spells (at least in 3.5) that specifically teleports the target to a random location — ANYWHERE in the multiplanar world of
* There also exists Christian rap, which tends to be even more niche than Christian rock. Notably, Irish comedian Brendan O'Connor produced a
* There also exist several "Beast Races" (also known as "Betmer") in Tamriel, with the
* There also exists the inversion the Horseless Headsman, currently shilling for Snickers. It's the one in which he starts out as the 'Horseless Headsman' until a snickers restores him to himself.
* There also exists the Listening Monks, who are determined to find out what the creation of the universe sounded like. In order to become a member, one has to listen to a coin being flipped 50 miles away and correctly identify if it landed heads or tails. In order to become a master, one has to also be able to identify the color of the coin.
* There also exists various movements to do this on the state level, though these would explicitly require the approval of both Congress and all states involved. Usually it's a case of one part of the state feeling shafted by the state government. Repeated instances that pop up on occasion (usually on slow news days) include California (either
* There also exist two Dutch dubs: the first was made in Dutch-speaking Belgium for Playhouse Disney covering the first two seasons and the second in the Netherlands covering all four seasons.
* There also exist versions to be put on the person's hands; this isn't necessarily lethal either, but it is enough
* There also have been several times when they had babies involved in
* There also is a one-sided romance between Quiche and Ichigo, with the former being madly in love with the latter. His love gets
* There also seems to be a habit of documentaries using footage of the fake-Tigers from these films,
* There also seems to be a possibility that this system may come into actual use soon. Though the system appears to have taken on a more user-friendly acronym (Assault Intervention Device or AID), its function remains marginally unchanged.
* There also several moments in the film that seem to imply that Notre Dame is actually
* There also the Da Vinci Spaceport and Keats, the capital of Hyperion.
* There also the episode focusing on Lois's brother, Patrick, who as a child saw his mom having sex with Jackie Gleason. As a result, he went crazy, was shipped off to a mental hospital (at a young age, no less), and developed a pathological hatred for obese people. So much so he goes on a murder spree when Lois temporarily releases him (of course, Peter's idiocy is also to blame).
* There also two short scenes in which the animation reverts to manga.
* There also was an entire source book about Pentex and its subsidiaries which

explored the multitude of themes possible. It also noted that the rather heavy-handed approach described above was once taken by a Pentex-owned computer hardware corporation. What do you get when you plunk a spirit of entropy and destruction into every piece of hardware you sell? Yup, a product that is entirely unreliable and won't be bought, thus entirely undermining the purpose of the whole thing. When the Pentex Board of Directors learned of this, they were...
* There also was an episode involving this teenage guy and his hot older teacher. The guys congratulate him, but the SVU team wags their fingers no and try to separate them. It was sort of heartbreaking actually, considering the arm-twisting they did to her so she'd stay away from him.
* There also was an indirect but very literal version in the episode where the patient of the week was a former prodigy and teen genius, now working as a FedEx deliveryman. Turns out that he'd fallen in love with a girl who had maybe 1/3 of his IQ, and started habitually using a drug made from a combination of prescription-strength cough-syrup and strong alcohol (known as 'Astro-Tripping' or 'Blue Drank') to slow his mind down to the point where he could relate to her. Of course, using something like that on a daily basis for years can take its toll...
* The Real Spoofbusters, being a team of professionals who make a living by dealing with paranormal threats.
* The Real Story Of Humpty Dumpty. An evil witch who wants to poison princess Allegra and causes Humpty to fall from the wall.
* The real story of The Not-Named Clan is one. Realizing his brand-new
* The real Sue Thomas went deaf at 18 months and found that she could expertly read other people's lips while learning to communicate. This got her a job lipreading for the FBI.
* The Real Superhumans covered one such man, who can be buried in ice without trouble and easily withstood cold that would have killed a normal human in under an hour with no ill effects.
* The real Superman pretended to use this method once when an amoral
* The real tenth death turns out to be Isaac Morris, an Amoral Attorney
* The Real Thing by Catherine Alliot, the protagonist cannot find her car and panics that it has been stolen. She calls the police to report the theft, only to remember five minutes later where she had parked it.
* The Real Thing. Though they divorce after Henry's affair with Annie is exposed, by the second act (two years later), Henry and Charlotte are on friendly terms. They trade witticisms and discuss both their daughter's impending departure as well as their respective relationships. By the end of the scene, Charlotte slyly offers sex (which Henry declines):
* The real threshold is with the Arquillians, who think a Bug in control of a Galaxy is enough of a threat to destroy the planet both are on, even if most of the inhabitants of said planet have no clue they're about to die.
* The real Tommy was 6"2", had long hair and a moustache, was built like a boxer and was described as very good looking. In
* The Realtor took the Southern Belle to see a house. Before they went inside he spoke at length about the many amenities the house had. He mentioned the central heating/air conditioning that had just been installed. He boasted about the professional quality kitchen. He went on about the huge closets, vaulted ceilings, and the built-in sauna and hot-tub. "Why," he said proudly, "This house hasn't a flaw!" "It hasn't a flaw?" The Belle drawled. "Well then what do y'all walk awn?"
* The Real Us. Harry mocks her for saying this, and her intent in this story is to force Harry to be with Ginny and Hermione to be with Ron, but what Hermione did is (in Muggle Britain) considered sexual assault.
* The Real Us, where Harry is given the title "The-Man-Who-Won", while Hermione is merely "The-Witch-Who-Was-With-Him."
* The real walking pharmacy on the show, though, is Otto. Aside from being a run-of-the-mill pot smoker, he's also shown in "Father Knows Worst" buying model kits and glue, then dumping the kits as soon as he's out of the store, he walked out of a kitchen cutlery store called "Stoner's Pot Palace" due to "flagrant false advertising," his urine is so full of traces of illegal drugs that it barely has

any actual urine in it and looks like a scene from
* the real Wells has been dead for years and the guy impersonating him is also the Reverse Flash.
* The Real World, a troubled and angry Brain walks about the house while a parody/pastiche of the Who's "Behind Blue Eyes" plays in the background... until Brain opens a door in the house and angrily tells the director of the reality show to 'turn that insipid maudlin music off', though maybe not in those exact words.
* the real world, but not if the "victim" died of causes having nothing to do with the perpetrator.
* The Real World came along, the challenges became much more extreme and gross-out.
* The Real World considering that he's supposed to be the top heel in the business, and the fact that he practically had to murder both Randy Orton and John Cena before he could be seen as a legitimate threat, and both of the two were already pretty badly beaten when he got involved. It isn't so much that some hate him, it's that they wish he would be allowed to be a credible heel, or that the belt could have been given to somebody that was.
* The real world, grown-up version of these fears is the urban legend of the criminal who hides underneath your car in the mall parking lot and grabs or slashes your ankles, and then either drags you under there screaming or crawls out to finish the job. According to
* The real-world ice of Spider-Man's face made by Popsicle is referenced in
* The Real World, one of the male housemates cringes when one of the women mentions not feeling well because of her period. She tells him to get over it as odds are he'll have to do this for his girlfriend or wife someday and proceeds to give him a lecture on the different types of products.
* the real world than tokenism. However, he has little impact on the plot.
* The Real World, the housemates go barefoot for a majority of the time. This probably isn't surprising given that people in general tend to go barefoot in their homes.
* The real World War II actually did play out a lot like this when it comes to the six most significant participant countries, the United States, United Kingdom, Soviet Union, Republic of China, Nazi Germany and Empire of Japan. United States was Balanced, United Kingdom was Cannon, Soviet Union was Horde, Nazi Germany was Powerhouse. Empire of Japan was Subversive when facing the Western Allies, but was Powerhouse when fighting China, who was Subversive.
* The Real World, young Mizanin got a crack in the WWE, paid his dues, and eventually ascended to becoming WWE Champion, including headlining WrestleMania 27.
* There and Back Again, and the pirates all tend to hang around the entrances of wormholes to avoid the scale problems mentioned in the trope description.
* There and Back Again by Pat Murphy, anyone who passes through a wormhole gets mirror-reversed. Any gathering of people who have done a lot of wormhole travel needs two cooks: one for the travelers who are currently "right-handed" (having passed through an odd number of wormholes) and one for the ones who are "left-handed" (having passed through an even number).
* There and Back Again by Pat Murphy, Bailey finds a metal Mobius strip with the ability to alter the flow of time in a bubble around it, and frequently uses it to speed himself up to the point where everyone else is effectively stopped.
* There and Back Again comes from a combination of an adventurer and her cat, hence the name.
* There and Back Again. They only do it to clones (and unintelligent animals) for ethical reasons; that doesn't much help the protagonists, however, as nearly all of them are clones of each other...
* The Re-Animator in "The Song Of The Mermoo" brings dead creatures to life but de-animates the user piece-by-piece each time it's used.
* The Reaper, also known as "Death." It exhibits the "slow walk" by showing up whenever you take too long to advance to the next area. Even your support character warns you that you "can't defeat it!!", and tells you to get out immediately. It can be defeated it very high levels, but even if you do, it will still come back for more.

* The Reaper Of Souls expansion reveals that this trope might have been invoked by Rea.
* The Reapers actually appear to do a double-take upon noticing the utterly
* The Reapers all have voices so deep that they echo off basically any scenery. They are an endless fleet of species-killing living warships that have a billion-year history of slaughter behind them.
* The Reapers, and once a ground force troop manages to bite/scratch an individual, the attacked begin transforming into a Reaper ground troop themselves.
* The Reapers apparently. When Dean meets a particular Reaper again in "Death Takes A Holiday" who tried to guide him to the afterlife in a previous episode, she restores his memory with a kiss. When he calls her "Tessa", the alias she used while disguised as a human, she simply replies "Yes, that is one of my names".
* The Reapers are also shown to shape the galaxy to fit this method, but not enough that the civilizations can begin to develop weapons or defenses that might stand up to a Reaper.
* The Reapers are also this to an extent in that they like strong races because strong races make strong Reapers. Lesser races are still useful... until they're not.
* the Reapers are composed of organic biomass in a mechanical framework, and their periodic slaughter of all sentient life in the galaxy is actually their reproductive cycle.
* The Reapers avoid detection despite having an enormous fleet of enormous spacecraft. They hide in Dark Space, an area outside the galaxy with no stars or planets and too far for any other species to reach.
* The Reapers consider themselves to be the pinnacle of all evolution (mechanical or otherwise). They see organic life as nothing more than a strange accident, useful only as something to be harvested when necessary to further the development of "true" life.
* The Reaper's Due, focuses on plagues and diseases in general. Special attention is given to the Black Death itself, with major announcements as it spreads through various regions and several events related to the nobility and peasantry reacting to the devastation it brings.
* The Reapers' effectiveness against the Protheans compared to the next cycle that Humans were part of is the logical conclusion of such social Darwinism (and is in-line with the true gist of Darwin's theory): the danger of homogeneity. Because the cycle that had Humans, Turians, Salarians, Asari, and countless other sentient starfaring species as neighbors in a galactic community instead of masters and clients like in the Prothean times allowed a heterogeneity of culture, science, philosophy, and strategy that might have been an advantage against the Reapers. A strong species or civilization doesn't have an optimization of traits for some arbitrary qualifier, but a diversity of traits for reality; so when a change happens, the largest array of potential adaptations to that change are available to ensure the species/civilization survives in some form. The extent of this advantage is unclear because the real difference between the current and previous Reaper invasion is the presence of Shepard, without whom the Citadel and thus the war would have been lost before anyone knew what was happening.
* The Reapers' fleets consist of a mixture. The big, Sovereign-sized ships are simply referred to as "capital ships" while much smaller Reaper warships (around the mass of a Citadel Space frigate, like the Normandy SR-2) are referred to as "destroyers." They also include troop transports and "processor" ships which
* The Reapers include several death gods and goddesses, like Anubis and Baron Samedi.
* The Reapers of Chaos manage to free the god Loki from the prison he had been trapped in at the end of the third book of the six book
* The Reaper stands out even among other UnSubs. He's over-the-top to the point where he's like a comic book super-villain. Due to his desire for twisted fame, he wants to make everything as dramatic as possible. He overacts his role even when
* The Reapers, the central antagonists of the original trilogy, openly view all other species as bacteria, fit only to be purged, enslaved or — in "worthy"

cases —
* The Reapers themselves are basically the perfect war machines. A great deal of their technology
* The Reapers themselves are massive ships which are almost uniformly of a cephalopod design, resembling squid or cuttlefish, and thus being very sleek and curved in their design.
* The Reapers, they are shaping up to becoming fullblown Ascended Eldritch.
* the Reapers, which melt down an entire sentient species into some sort of goo, which they mold into a new Reaper.
* The Reaper War: A massive conflict long enough to be an entirely separate story on its own. The Reapers invade the Alpha Quadrant and
* The Reaping character is a professional debunker of miracles, who's pretty much shown to be a fool for her lack of belief. One particularly bad example is her claiming that listeria is responsible for a variety of things including a river turning red and maggots instantly appearing on a barbecue grill, which no real life debunker would be quick to do.
* The Reaping: In the town of Haven, there is a cult that follows a whole religion based on killing every child born after a couple's firstborn. They then hang their bodies up in mass graves.
* The Reaping of Hatsune Miku). Sadly, few Game Masters do end up admitting defeat.
* The Reaping sacrifice all their children to Satan, except for the firstborn, who are inducted into the cult, to ensure the cult itself can survive. In reality, you would need (on average) two offspring to survive (and reproduce) per couple just for the population to remain stable. Even if the cultists recruit outsiders to marry the kids they don't sacrifice, attrition would still wipe them out, as some of each generation are likely to die, fail to reproduce at all, or leave the cult.
* The Reaping scientific explanation for that and admits something paranormal/supernatural is occurring.
* There appear to be no female Observers (at least none have been seen so far), and how or if they reproduce was not addressed until the final season (they grow new observers using a cloning process with genetic screening and artificial selection for desired traits via genetic engineering and disposal of "anomalies"). They are also
* There are 10 kinds of people in the world: those who understand binary and those who don't. In this context 10 is pronounced "one zero" instead of "ten" so it ruins the joke if you say it aloud.
* There are 25 palettes for every playable character (with one hidden exception), some of which are
* There are 36 achievements that give special, permanent bonuses for a
* "There are 3.7 trillion fish in the ocean. They're looking for one." —
* There are 3 emergency broadcasts in Black Mesa. All of them can be heard
* There are 3. One you get in a main quest mission. The other 2 you can get in 2 side quest missions, that are the most difficult missions in the entire game (the last mission is a walk in the park after this). One involves killing an insanely powerful Warboss after going through waves and waves of looted tanks and nobs. This is the easy one. The hard one involves killing an Eldar Avatar of Khaine that is invulnerable to all melee weapons short of power fists and some ranged ones, after going through scores off Fire Prism tanks to get to him. And both of them have at least 100 times more hit points then all your units combined. And they heal.
* There are 3 theories of time travel that are used in movies, which state that purposely changing the past causes a) the event you're trying to
* There are 48 "contiguous" states in the U.S., which are, as the name implies, all pieces of one big rectangularish block of land. But there's two more states: Alaska, a frozen wasteland on the other side of Canada, not bordering any other states... and Hawaii, a chain of islands thousands of miles out to sea. On a map of the country, these last two usually appear awkwardly floating below the rest.
* There are 6 Senior Military Colleges (SMCs) across the US, approved by Congress. Among them are Texas A&M, Virginia Tech, Virginia Military Institute, Norwich, The Citadel, and North Georgia. Some are strictly military schools, while others

allow civilians.
* There are a billion and one sequels to this novel. Readers apparently can't stand
* There are a blue-eyed and a red-eyed raven, and Iki, a wolf, has blue eyes, mostly
* There are about a thousand theories on when the world will end, prior to being destroyed by the sun. The currently (strangely enough) least popular are the
* There are about a zillion children's stories with this theme. One of the best known is Charlotte Zolotow's fairly
* There are about six towns called "Neustadt" (new town) in Germany, and even more if you include all variants like
* There are a bunch of emotion-affecting spells, including the one actually named
* There are a bunch of examples of Shakespeare plays portrayed in an unconventional setting, but with the same dialogue.
* There are a couple associated with fire: the original Flam Cerberus, and Flamvell Firedog, which appears to be made out of lava and has two protrusions coming out of its shoulders, which vaguely makes it look like it has 3 heads.
* There are a couple explanations for this in-universe: The Ellimist once essentially said that some species start out later but develop faster, and other sentient races start early but advance slowly, with humanity and his race being at the respective ends. In
* There are a couple of commentaries for the first movie, but the one with
* There are a couple of FloNase commercials in which springtime allergens are represented by giant monsters: a ferocious pollen-spewing flower and an enormous hunk of animated, predatory turf grass, churning up grass fragments.
* There are a couple of instances in the original game that are both straighter and infinitely more annoying.
* There are a couple of other examples from that game, too. Often, you end up having to
* There are a couple of other examples, such as the intentional creation of an
* There are a couple of porn sites that have used the word "MILFtastic"...
* There are a couple songs based on this joke, see the Music section.
* There are active resistances of Earth Kingdom citizens against the Fire Nation occupying forces throughout the series. We see one of them in "Return to Omashu."
* There are actual demons in that series, the servants of a being called the Void, but there aren't really enough of them to call a "legion" (and they seem to have a hard time working with each other anyway). The highest number of demons ever seen together was
* There are actually 5 separate guitars like these, all made with weapons inside, so as Ricardo can get weapon upgrades.
* There are actually a few examples of Remix Comics (done "seriously" and not for purposes of parody) from major comic book publishers:
* There are actually cards that let you "destroy all X". These cards tend to have names like Armageddon, Wrath of God, Global Ruin, Catastrophe, Planar Collapse...
* There are actually countless variations on the cult of the Emperor, as establishing a single version on the million worlds of the Imperium is impossible. Instead, whether or or not a particular cult is heretical or not is basically up to the local governor/Ecclesiarchy, and the Inquisition intervenes if they think they're getting too lax. This has the unfortunate side effect of allowing genestealer cults to flourish under certain circumstances, as unlike Chaos cults, who are dead-set on toppling the Emperor and whose acts are rather obvious, the genestealers are allowed to keep worshiping a bastardized version of the Emperor as a father figure, which then leads to the Tyranid fleets attacking.
* There are actually monster hunters, but they operate almost exclusively in the shadows. One of the larger themes of the Dresden Files is that most things have a productive purpose, even if you only experience them as the things that go bump in the night.
* There are actually several characters in the series who have lost one or both of their eyes, to the point of being a running

* There are actually several humanoid aliens in the manual but no evidence for them is seen in any game until
* There are actually several similar monsters — the Lying Figure (
* There are actually some entertaining macros in fashion/clothing/cosplay communities that read "get thee behind me, Satin!" a reference to the fact that satin is notoriously hard to work with.
* There are actual newer Night Vision devices which make use of thermal night vision similar to Snake's solid eye. So it could be that the solid eye's night vision mode is merely one of these. It produces the exact same effect that MGO's ENVG (Enhanced Night Vision Goggles) looks like, so this would make sense.
* There are additional parties shown, which get progressively bigger and out-of-control as the film goes on. When General Weidling arrives to report to Hitler, only Krebs and Burgdorf are drinking. When Hitler gets ready to kill himself, practically every soldier and staff member has broken out the booze. Not to mention the building Fegelein is hiding in has lots of drunken Germans and topless women.
* There are ads that show the dangers of driving while under the influence of drugs. While these ones are more honest and may actually discourage people from doing so, the message that viewers get from this is "Just stay home and use drugs" or "If you're going to get high, be sure to take a cab or have a designated driver." Which, to be fair is also a pretty good message, just a very different one from the one that they wanted to convey.
* There are advanced rules for calculating a missed shot to see what it's chances are of hitting something else that's on the line from the attacking unit to the target. As this adds a lot of extra work, it slows the game down considerably and is therefore not used very often.
* There are advantages and disadvantages to both. The side by side seating allows for much better coordination for the crew. Unfortunately, in aerial combat, this position also gives much lower situational awareness than tandem seating. That's why it's almost always used in dedicated ground attack aircraft rather than true fighters.
* There are a fair amount of diets nowadays that encourage people to replace specific meals with things like protein shakes, under the idea that they're nutritious or filling enough to actually satisfy your hunger cravings. Whether this works, or is even advisable, remains to be seen.
* There are a fair few about imaginary friends who have somehow taken corporeal form.
* There are a fair number of distinct parallels between Bro's relationship with Dave and Jake's interaction with the "Brobot;" In both cases, Bro/Brobot present a seemingly impossible standard for Dave and Jake to live up to, because Bro/Dirk honestly believes that's what they need to succeed. However, both Brobot and Dave's Bro also serve as protectors to their charge, dealing with threats that pose a genuine threat to Dave or Jake's safety, and it's worth noting that Dirk holds himself to the same standards; he constructed Sawtooth to present a similar challenge to himself.
* There are a fair number of other retroclones out there, including OSRIC and Basic Fantasy for 1e. In addition, the makers of "Labyrinth Lord" also made "Mutant Future," which is a close-as-you-can-get-it remake of
* There are a fair number of self titled "Knife knuts" scattered around the internet on various forums and the like. In a distinct subversion of this trope, they tend to be well spoken, gentle, and good-humored individuals that just happen to collect knives and enjoy talking about them. They have their own magazines, conventions, and are generally a friendly sort like any other group of hobbyists.
* There are a few crossovers where Batman isn't shown as an all-around invincible badass. In one crossover between Spider-Man and Batman, they got into a brief scuffle and Peter grabbed Bats, tossed him half-way across the building. The priceless look on Bruce's face said it all as he was being thrown so easily.
* There are a few cunning linguists. Most of them are seen as villainous by the (Protestant) hero, being Jesuit monks. However, one, the Lady Mariko, is gifted with languages, being able to speak Japanese, Portuguese, and Latin fluently. She

translates for Blackthorne (the pilot) and teaches him enough Japanese to get along by the book's end.
* There are a few episodes in which the kids are playing out a fantasy and look down on the
* There are a few episodes ("Mr. Monk Takes a Vacation", "Mr. Monk Gets Married", "Mr. Monk Is Underwater", among others) where Randy appears but Stottlemeyer does not appear.
* There are a few examples of sculpture still retaining its paint. One example in Turkey that had been buried underground was preserved well enough for restorers to see a (faded) version of the original color and infrared tech is now allowing us to see the invisible paints. Many of the statues found by 19th century archeologists had visible traces of paint on them - which they then carefully scrubbed off, because that's not how they were supposed to look!
* There are a few exceptions, however: Helryx and Tuyet avert this, the former due to leading the Order of Mata Nui where killing is necessary and the latter due to being outright evil. Toa Ignika would have averted this if not for the Toa Nuva due to literally being a few hours old.
* There are a few exceptions that zig-zagged this trope, such as the pavise. Sometimes it would be planted down in front of a crossbowman or worn on the back to provide defense as they reloaded. However, it was often actively used if the crossbowman was charged or if other soldiers happened to be in hand-to-hand combat holding one.
* There are a few fanworks out there involving Katara using her bloodbending for this purpose, most commonly on Zuko.
* There are a few fan-works that ship brothers Mufasa and Scar together.
* There are a few Feats in 5E that definitely qualify. Alert gives a big boost to your Initiative and so you always have a good chance to go first when combat starts, it helps protect you from sneak attacks, and you can't be surprised. Observant gives you a big boost to passive Perception and Investigation, so you'll hardly ever miss any loot, traps, hidden enemies, or important clues. Tough gives you +2 HP with every level up. None of them do anything really flashy, but they
* There are a few Feudal Lords (barons, dukes, etc.) on different planets in
* There are a few fics where Marinette and Jason Todd met before Jason becomes Red Hood and Marinette becomes Ladybug which is used as another way to establish their sibling bond.
* There are a few flashback episodes covering the love story between Steven's dad, Greg, and his mother, Rose Quartz, from when they first met to just after his birth. The show's former supervising director Ian Jones-Quartey once joked that the series is actually the sequel to a non-existent
* There are a few gnomes whose inventions work. They're known as thinker gnomes(as opposed to the regular
* There are a few God Warior corpses, overgrown with greenery, in the opening landscape of
* There are a few Hanna-Barbera shows that avert this. First of all,
* There are a few hundred editions of old medical, anthropological, and sociological treatises and textbooks (
* There are a few Infinity Plus One weapons for each weapon class. The best one is probably the Dragon Spear, which has awesome damage and an exclusive waza that also deals a lot of damage. It's also the hardest one to get, as it
* There are a few instances in early episodes where Sailor Moon gets scraped or cut by a youma, drawing a small amount of blood that then goes away one shot later.
* There are a few instances that show that All Might is able to tap into One For All
* There are a few instances where Data's photographic memory and ability to perfectly mimic voices punch massive holes in the
* There are a few jokes, most often told in the midwestern U.S., that rely on the contrast between the North Central accent (think "
* There are a few Krampus miniatures out there, the easiest to find being the one made by Chronoscope. It isn't for any particular game (nor are most of

Chronoscope's miniature). Strange Aeon also has a seasonal Krampus miniature.
* There are a few moves like Overheat and Draco Meteor that, while very powerful, cut the user's Special Attack stat in half. Naturally, this means that it should wipe out whatever it attacks because the Pokémon will be effectively useless for the remainder of its time out of the ball. This can be remedied by recalling it, but as that's the obvious move, the opponent will be able to predict you doing that.
* There are a few occasions where a player is completely unable to capture a wild Pokémon — even with a Master Ball — and has to defeat it:
* There are a few of these made by the Dairy Farmers of Ontario, which have the slogan "If it's made with 100% Canadian milk, it's worth crying over." One example includes a freeze frame of people at a fancy dinner party
* There are a few other British army traditions/common pranks which are employed, generally either as light hazing or occasionally punishment for unruly recruits:
* There are a few other candidates. The 'Fusion', restaurant, for example, serves incredibly spicy food and even
* There are a few other examples: a gender-swapped one with Pete and working-class
* There are a few other instances of the gag being played with in such a fashion: in one episode, Pinky is made super-smart and replies to Brain's question with a simple "Yes, I am!" In one episode, Pinky stops himself from giving his response, thinking what he was about to say was too stupid even for him, only for it to turn out to have been exactly the right answer. In a couple of episodes, Pinky poses the question to Brain (one of them has Brain feed Pinky the usual non-sequitur, but the other just has Brain wonder aloud if he really just heard what he thought he heard.)
* There are a few other minor cyborg characters running around the series, such as Kaido's servant Scotch.
* There are a few other romances in LG, but most of them are between characters of the same rank or at least separate branches of command. The most prominent is the marriage of Ensign
* There are a few sets of 'twin' engines that are canonically referred to as brothers.
* There are a few skits dedicated to the characters watching cable television from other dimensions, and several featured are so surreal that it's terrifying to think what kind of universes these tidbits could be considered entertaining. Highlights include a hit TV show where a man wrestles with a sentient car
* There are a few skits where Rokurou swings a wooden sword for practice while
* There are a few songs commonly used for the last play of a dying station, depending on its format. These include, but are not limited to:
* There are a few "spacey" swear words used periodically throughout the series, mostly out of Zaphod's mouth, including "What the photon?!", "Starpox!", and "zarking" (as in "What the zarking fardles was that?", which
* There are a few spells such as Barghest's Feast that can make it so that the target cannot return to life by mortal magic.
* There are a few stories regarding Cheetah during the production of the old MGM
* There are a few traps built into the great pyramids to deter robbers, that, thanks to low-tech design, continued to catch stupider people, mostly by trapping them in tight spaces or building huge pits in the middle of the passage. Needless to say, the robbers got around them. But the skeletons of past robbers were still present when modern archeologists found them (this is a problem with durable deathtraps, the dusty skeletons with punji sticks through the eyes tend to be a tip-off).
* There are a few user-made maps that use Hammer's world portal function like this. Most of them are just proof of concept levels, though.
* There are a few variations in some other episodes, mostly by authorities attributing the deaths or injuries of various characters to mundane animals rather than cryptids, like the deaths of three hunters who are killed by the
* There are a few very infamous own goals in the Stanley Cup Playoffs:
* There are a few ways to bring someone back from the dead (none of them much fun)

but it looks like anything shot with the Colt is staying down. Except for Lucifer. And although the Colt isn't used on them, the Horsemen of the Apocalypse are apparently immortal.
* There are a great many fanfics where emotionless, monotone Soundwave is portrayed as a loving and caring father to his cassettes.
* There are a great many reasons why the marble gimmick could never catch on or be legally practiced in the United States. The most glaring reason is that no athletic commission would allow competitors to fight handicapped that way. Even in Japanese MMA, which is known within the sport for enjoying the absence of a proper regulation body and being characteristically gimmicky, it would be really difficult to pull that out.
* There are a handful of articles that make a point of addressing the reader directly, such as
* There are a handful of episodes that suggest that Candace has this relationship with her stepfather, Lawrence. They enter a father-daughter contest together and he teaches her to drive, among other situations. Unlike her mom, he doesn't think Candace is crazy and is actually aware of Phineas and Ferb's antics. He doesn't stop them, but she loves him anyway.
* There are a handful of novels King has written that seem to be separate from the main universe he has established— namely,
* There are a handful of these to be found among the many orphans in
* There are "alien artifacts" spread across the map that factions can capture and use to advance various goals. Most particularly, they can be linked to Network Node to make an instant advance on the
* There are aliens, diaspora humans, and beings from other galaxies speaking English. The issue of learning the local language served as something of padding in the movie on which the series is based, so this might actually be a case of
* There are a little over seven billion people on this planet; before the nineteenth century it was a few hundred million, reaching the one billion mark around 1800 and still less than two billion in 1900, and
* There are allegations sprinkled throughout the series that Cedric Daniels used to be a
* There Are Alligators In Our Sewers... knows that the reds are poison; greens are aphrodisiacs.
* There are all the instances in which Inuyasha and Kagome rescue each other throughout the whole story, starting with Kagome unsealing Inuyasha from the tree that Kikyou pinned him against so he can fight off the Centipede Woman about to kill her. It even got lampshaded at the start, when Kagome talked her way out of the Thunder Brothers killing her via making them believe that Inuyasha was her boyfriend and would come for her later so it was
* There are a lot of (admittedly anecdotal) stories from people who served in Iraq and Afghanistan, where patrols would encounter jihadis of mixed ages. Most of them would be younger guys with AKs who fought like fanatics but employed
* There are a lot of area attacks in 4E that ONLY target enemies. Chilling Cloud for example allows Wizards to target enemies in melee without risking damaging their allies. Invokers, Divine Controlers, specialize in these sort of 'party safe' spells and can benifit greatly from Coordinated Fire without invoking this trope.
* There are a lot of bands who made a career out of writing gloomy, depressing, or melancholic lyrics. Especially in the
* There are a lot of characters who face the viewer in their official art. They do not, however, follow
* There are a lot of dangerous not-dinosaurs like the Terrorsaurs (no points for whoever guesses those evolved from), the large variety of crocodilians (cruncher-crocs, croclions, croc-tigers, jagators, cuttercrocs etc.), the mosasaurs (carnivorous aquatic-lizards such as the leviathans, the mosarks and the lizardwhales), ultravipers or featherboas (both incredibly venomous large snakes), or gobblers (it's version of terror birds) that really want to kill people.
* There are a lot of fanfics with titles along the lines of "Character Does a Specific Thing."

* There are a lot of friction between doctors and the Ambulance crew in
* There are a lot of icons that parody the iPod commercials which have iTrope captions.
* There are a lot of individual moments that would make one question this, including outright mental health troubles, but, seriously,
* There are a LOT of magazine articles and books that exploit the fear that black women have of black men dating/ marrying women that are anything other than black. Almost to a predatory extent. Like the idea that black men go to Brazil not to experience the culture, but to hook up with
* There are a lot of moves that work like this: Fox's Fox Illusion, Falco's Falco Phantasm, Pikachu's Quick Attack, and Lucario's Double Team (which is a counter) to name a few.
* There are a lot of orphans on the show, mostly because of the wars and rampaging demons that were around. A lot of them get adopted by
* There are a lot of other fan nicknames for Fun stuff, including "the clown car" and "clowns" for
* There are a lot of people who won't even play the games alone with the lights turned out, but for some reason, none of the main characters ever just break down screaming. The only comment ever given on the situation comes from
* There are a lot of songs with unintentional mistakes in them which turned out to make them sound even better.
* There are a lot of stories concerning what Calvin is like as a teenager or adult. Either he has to deal with not having Hobbes around, or Hobbes is still around but his relationship with Calvin has changed due to Calvin's growing up. Occasionally Hobbes ends up being passed down to one of Calvin's own eventual children.
* There are a lot of these, but special mention has to go to any scene involving Finn and Lemongrab together.
* There are a lot of these scenes in the films - Gimli and Legolas discussing Galadriel, Sam's speech about good at the end of
* There are a lot of underreactions in this game, with bosses often talking about anything other than the fact that they've just been cut to shreds, and with
* There are a lot of videos of cows, moose and camels getting run over by trains as they try and outrun the thing on the track.
* There are already quite a few types of devices that can be powered by human movement, body heat etc. but these tend to be novelties that are much simpler in function than counterparts with conventional power sources.
* There are also a bunch of other races and tribes that we currently know extremely little about, such as the Three-Eyed Tribe (they have three eyes which help them hear the Voice of All Things) or the Kinokobito (tiny mushroom people, one of which was seen in Big Mom's book), and new races are constantly being introduced: the most recent representatives of new races include King (a
* There are also a couple of instances of humans being transformed into animal hybrids through science, like
* There are also a couple references to the human (but not Federation) world of New Sydney, from all descriptions a regular
* There are also additional units during the main campaign called "Aces", which are
* There are also a disproportionate number of indeterminate Southerners. Apparently a really broad
* There are also ads throughout for (completely fictional) weird old TV shows and TV movies with names like
* There are also a fairly substantial number of randomizers, as mentioned in the game description; they can completely reshuffle items and, in some cases, rooms, allowing a new experience each time one plays the game, and often requiring use of some clever, obscure techniques to reach critical items. There are several different randomizers, including
* There are also a few cases of children dying after eating Halloween candy, and the media goes into a frenzy due to this trope and initially attributes it to

poisoning, only for it to later be discovered that the child died of unrelated natural causes (the fact that it occurred after consuming Halloween candy being purely coincidental).
* There are also a few examples of this, such as Ash’s Pikachu and Winona’s Pelipper taking each other out during Ash’s gym battle.
* There are also a few magical effects that will undo themselves if applied a second time, like the (cursed) Helm of Opposite Alignment (as long as you didn't start with an alignment that was neutral on either axis) or Belt of Masculinity/Femininity, although in those two cases the character would need to go find a new copy, as each item discharges and loses its magic when used.
* There are also a few mortal workarounds people have found. In Galt, there are the Final Blades, guillotines that trap the souls of the executed specifically to keep them from being resurrected, while the Red Mantis Assassins have a bond with their targets that lets them know if they were resurrected, at which point they simply go back and kill them
* There are also a few places in Sylvarant where the party is accused of impersonating themselves because the people impersonating them got there first. In two places, this gets cleared up relatively quickly, but one guy never believes they are who they really are.
* There are also a few Sorcery spells that are not inherently evil and require the use of blood: Blood Lash only works when you are bleeding, and Benediction of Archgenesis, which requires the sorcerer to cut their feet and walk around the area they wish to
* There are also a host of lesser treaties and accords, such as the Beowulf Treaty which says that you can't enforce a quarantine on somebody without allowing doctors to come over and check your story.
* There are also allusions to various minor conflicts that the Earth Alliance took part in. Not to mention the Earth Minbari War, which we heard much about, but saw little of, until the prequel movie
* There are also always about a dozen variants on the theme, such as the vampy devils called Brachina. They corrupt the servants of good gods.
* There are also a number of bear-traps set in various areas waiting for you to step in them. Doing so causes you damage and also freezes you in place as Leon has to stop and pry it open. Naturally, they don't hurt enemies running towards you, and they can be avoided by either shooting them or getting close enough to hit them with your knife, which causes them to spring early.
* There are also a number of cases where these "god" Pokémon made unique creations in some way or another: Ho-oh resurrected and transformed three Pokémon into
* There are also a number of his fans that refer to him as either "Benny" or "the 'Batch".
* There are also a number of morphs designed as soldiers, most notably
* There are also a number of subversions. For instance, each Lunar may be bonded with a Solar Exaltation and serve as that incarnation's boon companion... but half those shards have been corrupted by
* There are also a number of superpowered soldiers appearing in various books; one source is special military programs where volunteers are put in high stress situations, which may trigger "breakthroughs" (the advent of powers). The military also actively recruits civilians showing useful powers as well as using supercriminals for high-risk missions in exchange for reduced sentences.
* There are also arguments as to whether the desert town is spelled Alabasta or Arabasta, though Alabasta is the official spelling.
* There are also a series of inedible fruits in the Johto region called apricorns that served as the invention of the first Pokeball.
* There are also at least 3 other teams that we rarely see in the show, and they're all implied to be out fighting their own battles offscreen.
* There are also a ton of Luke and Darth Vader stories. Luke/Vader stories are among the most popular nonromantic stories in fan-fiction history.
* There are also attempted purges such as Ser Alliser Thorne attempting to

complete his purge of wildling sympathizers and Jon loyalists after killing the Lord Commander. Dolorous Edd and his friends, as well as Ser Davos, barely regroup in time to organize and protect themselves from Thorne. In the Iron Islands, Euron usurps the throne after murdering his brother Balon forcing Theon, Yara and their supporters to escape before he kills them.
* There are also blast-proof refrigerators, used for storing volatile chemicals that may blow up even when refrigerated.
* There are also cards like Spirit Reaper and Marshmallon, who simply
* There are also cases where a character from one comic gets sent to another, with
* There are also cases where a Transformer forms part of a larger one. Being carried around by (and presumably getting to lap up some spare Energon from) a big guy like Trypticon, Metroplex, or anybody with Maximus in the name is really handy, and the larger TF gets a small army of normal-sized Transformers that are always at his side, and who can handle fine-tune work. On the rare occasions on which Trypticon actually
* There are also cases where the driver really did get their wish granted, but it ended badly for them.
* There are also certain consonants (like TH and V) that don't exist natively in Japanese, as well as irregular patterns of syllables (consider, e.g., the sequence TA, CHI, TSU, TE, TO, all of which have the same consonant phoneme), forcing many approximations in writing. Singers who know English well enough can bypass these problems if the lyrics weren't written to Japanese phonology.
* There are also class-specific mounts. These are all horses — or at least
* There are also "Closed" warp points that are only detectable from one end,
* There are also concerns about common vulnerability to disease with genetically engineered crops and people, due to their higher degree of genetic similarity to one another.
* There are also corporately-owned and sponsored teams too: Royal Challengers Bangalore are owned by an Indian brewery (who produce a whiskey called Royal Challenge), the newly-formed Sunrisers Hyderabad are owned by the media company Sun TV, and the former Deccan Chargers were owned by the Deccan Chronicle newspaper.
* There are also creatures that can kill themselves to take out other creatures, or which hurl damage or direct creature killing around when they die.
* There are also cutesy toy versions, plush and otherwise, of various parasites, bacteria, and viruses; such as
* There are also Draenei members of the Twilight's Hammer. In addition, many of the Draenei on the alternate Draenor are (openly or secretly) members of the Sargerei, an entire faction of corrupt Draenei.
* There are also duels of will, where two supernatural individuals attempt to exert their will over a medium. In
* There are also Economic cartels like the DeVayne incorporation, which are more powerful that most governments on border worlds; they have private armies and small fleets to their name, more than enough to conquer a backwater world, and these are small scale. Larger, more powerful Mega corporations may actually
* There are also Engineers for the non space battle maps. They can also drop health/ammo kits, and repair turrets or other broken machines, and have an obscenely powerful shotgun.
* There are also errors in the equipment used by the Marines. They use UH-60 Blackhawks, M2 Bradley APCs and AH-64 helicopter gunships. These should be UH-1 Venoms, LAV-25s or AAV-7s and the AH-1 Super Cobra respectively. Even though one could handwave this by saying they are U.S Army attachments, they are all specifically stated to be Marine vehicles, including by the Marines themselves.
* There are also fewer direct contradictions than you'd think. For instance, the dwarves and elves don't have universal creation myths of any kind, only ones about how specific things were created. Absolutely nobody questions whether the Old Gods exist, only if they count as gods. The Chantry story of the mages who blackened the Golden City and unleashed the Blight is doubted by many, but the blackening of the city is a historical fact confirmed by mages in other cultures and the first Blight did start shortly afterwards. The really big revelation (

* There are also "Fleet Tenders", little more than big jump drives that can carry a bunch of smaller (up to battleship size) ships that don't waste space on Jump Drives and instead have a ton of weapons and reaction drives. Such battleriders can usually take out jumpships of equivalent tonnage but they don't have the option of jumping away if faced with a superior force, so the Imperial Navy tends to relegate them to defense.
* There are also forms of bodily modifications that likewise use physical force over a long period of time to change the shape of one's body, with the wearing of earlobe gauges being a particularly popular example. However, much more extreme forms of this exist, such as the archaic Chinese practice of binding girls' feet and forcing them to grow into so-called "lotus feet", or the practice of some Asian and African cultures to use metal rings to gradually elongate a person's neck.
* There are also GAIA's nine sub-systems, each of them named after a Greek deity (or Roman in the case of MINERVA). While they themselves weren't designed to be self-aware, an intrusive signal caused them to break away from GAIA's control. In the case of HADES, a failsafe designed to reset a failed ecosystem in case GAIA messed up her first try, it's driven to fulfill its function of "wiping the slate clean" despite the fact that life is thriving again. As a result, HADES takes the role of the setting's Satanic Archetype.
* There are also good people who use blood magic — they only use their own blood. Most notably, the
* There are also Green Horrors which when they hit you with their lightning attack it both drains your Sanity and reverse your controls for a few seconds, often resulting in you running straight into the monster.
* There are also habitats with "Old" economies that ban nanofabricators and "Transitional" economies that have money and public nanofabricators which can only be used to produce goods without electronics or rare elements (like food and "plebian" clothes).
* There are also hacks out that let men get pregnant by their male partners (it also lets a woman get pregnant by another woman).
* There are also half-fiends. A cambion is born when a male demon and a female human get a child together. An alu-fiend, on the other hand, is the child of a male human and a female demon (mostly a
* There are also hints that morphing technology is out there for those who want it, even if only a very few can get it (a private corporation studied Ranger tech in 2001; the 2007 team was publicly backed by a billionaire with his own company; and the 2008 mentor got morphers "from a guy who knew a guy who had an uncle", which to some suggests a black market). They're still lowballing the consequences by a long shot, but they're there.
* There are also his sons, the Primarchs. While not as powerful as him, all of them are much more powerful than a normal man. The only reason that the Emperor was wounded as badly as he was by Horus was because he was his favorite son, whom he was hesistant to kill. Once he saw the depths of Horus's depravity, he erased him from existence with a single psychic blast. The Daemon Primarchs even more so. Take a Primarch, give up his soul to a Chaos God, and replace it with raw Warp power. The result is something second only to the Chaos Gods themselves in terms of power and malevolence, with
* There are also Illithids, who can extract the brain of an enemy when grappling (assuming it has one, and actually uses it - Zombies, Golems and such are excluded again) as an instant-kill and a snack between meals.
* There are also inconsistencies regarding some robot names across media. The tank-Decepticon called Brawl from the first movie was accidentally referred to by his working name of Devastator in the film itself, although other media such as the toys used the correct name (and the real Devastator appeared in
* There are also indigenous people like Native Americans, Romans, Aborigines, Inuits (who are surprisingly on Antarctica), Incas and Japanese. Some who use magic against you.
* There are also inexplicably huge ribcages jutting out of the ground near the three Hinox brothers of Mount Taran, all over Death Mountain, and everywhere in the

Gerudo Desert.
* There are also intelligent wolf-like creatures that humans call "Beagles", possibly because their ability to shift between bipedal and quadrupedal stance reminded the explorers of
* There are also legends of Jesus himself helping carpenters or masons who were building churches or cathedrals. Of course, the story usually goes that
* There are also levels like this in The Shake Dimension, Wreck Train and Derailed Express. You've got both fighting across the top of the train and making your way through the carriages though.
* There are also little examples that aren't tied to the plot, like the goats eating out of the trash Bart didn't take out in "
* There are also many, many cases of German spies being picked up almost immediately after arriving in Britain, largely because the various feuding Nazi organisations' information was woefully out of date. In particular, they never seemed to grasp the intricacies of the British rationing system (for example, trying to pay for meals in
* There are also many more species of fox than most people are aware of, many of which are not red. In America alone, in addition to the red fox, there is the gray fox, the kit fox, the swift fox, and the island fox. Any of these may be easily mistaken for coyotes because not many people are aware that these species exist, and they all are gray in color.
* There are also many (primarily non-British) people who have never seen the TV show
* There are also many that do this for their own original characters, worlds, and concepts. The quality of this varies by the artist, but many talented people have found that well-written, interesting lore paired with good quality artwork attracts more interest in both.
* There are also Mark and Helen Blackthorn, who are the children of a
* There are also mass-produced "Type O" transplants produced from the cells of one Owen Whiting who lacks the proteins that trigger immune reactions.
* There are also Master/Stranger protocols. Masters have the ability to control people or minions of some sort, so protocols usual involve pass-phrases or similar verifications to ensure people are who they say they are. Stranger powers are generally related to stealth in some way, but the most problematic ones are those that prevent people from noticing the users or the threat the present. Often times having someone off-site viewing footage and giving instructions to those present is a partial mitigation to this, as the power won't work through cameras.
* There are also minor ones, such as the Yeerk naming system. At first, not just Visser but
* There are also missions that take place in Russia during a NATO raid on a Soviet naval Base.
* There are also modpacks (multiple mods bundled into one) such as Feed the Beast, Yogbox, and so on.
* There are also moments such as the scene where Erik and Jim walk in on a four-way lesbian orgy... involving their respective girlfriends.
* There are also more mercenaries than people who can hire them, though by their behavior, it's established that the largest mercenary group,
* There are also more typical examples, like Dagoola IV, or Tau Verde IV.
* There are also multiple episodes based on the characters' fears becoming manifest, though for different reasons. A first season episode based on folks' nightmares, and a fourth season episode with a haunted house.
* There are also Nathan's claims about his own sexuality, denying that he's at all gay despite starting each day out by having anal sex with one of his male subordinates.
* There are also New Canaan, New Washington, New Alexandria, New Venus, and New Savannah.
* There are also non-binary and genderqueer individuals. While not all of them will want to present in an androgynous way, or do so all the time (and with many questioning what presenting androgynously would even

* There are also numerous artifact cards that represent supplementary spellbooks (like Jalum Tome, Jayemdae Tome, and of course, Spellbook), which work by giving the player faster access to spells (ie, drawing more cards per turn) or in the case of Spellbook, removing the limit on how many spells (cards) you can have access to (have in your hand) at once.
* There are also numerous examples of wars which would count as great in most settings, but which are so small they hardly get a mention in Warhammer. Crusades lasting decades and covering hundreds or thousands of worlds often get little more than a sentence or two of offhand mention. Even those that form the background of larger works (such as
* There are also numerous Māori place names that are doubled up or very similar. For example, there is Waitangi, Bay of Islands and Waitangi, Chatham Islands. Just to add to the confusion, Waitangi in the South Island Māori dialect is "Waitaki", which is the name of a major South Island river.
* There are also numerous scenes where people actually call them "dirty communists" and one of them involves a town full of vampires and how they suck the lifeblood of others. One chapter has one popping
* There are also numerous Warframe abilities designed to strip armor and damage shields. For example, Hildryn's Pillage hits all enemies around her and removes 25% of their current armor and shields; Mag's Magnetize covers an even wider area, but it removes a flat 400 shields and armor from each enemy it passes over; and Vauban's Bastille removes 10% of an enemy's maximum armor for every second they spend trapped inside it.
* There are also only two "full" Stargates built for the show; every other one seen is made of laminated cardboard and thus shown face on at all times.
* There are also original characters created for ice cream makers for usage as character ices, one example being Good Humor's Bubble O'Bill (
* There are also 'orns', with an 'orn' being 'one Cybertronian lunar day'. Which isn't all that helpful, as we're never told how long that lunar day is.
* There are also other forms of magic, such as wizardry — demon summoning, witchcraft — some sort of natural magic, and various others such as seers and necromancers who get even less explanation. Even if the rules of one form of magic prevent you from doing something, there's probably another type with different rules that would allow you to do it.
* There are also other moments where the commentator gets surprised or shocked by certain events, to the point that other people have to remind him to go on.
* There are also particle shields, which are just what they sound like: energy fields to deflect particles when traveling at relativistic speeds. Civilian grade particle shielding can protect a ship up to .6c, while military grade shielding protects up to .8c. These are generated by the drive systems, so missiles that go ballistic when their drives are out (they either burn out or idle for a while to extend range) can be destroyed by debris and dust if left to coast for too long.
* There are also penguins in Finn's Imagination Land in "Rainy Day Daydream."
* There are also people who aren't thinking about getting appropriate clothing. Sometimes this is actually justified, because they aren't often
* There are also people who watch porn - or at least the introductory few minutes before the sex starts, after which it all gets a bit repetitive - because of the appalling acting, the exotic settings, the ludicrous scripting that seeks to establish the utterly implausible reason why two (or more) people are going to have sex, and the hilarious miscasting. As well as the cheap and tacky production values, and the multiple "bloopers" which, if they happened in any other form of film, would necessitate a retake.
* There are also Plague Zombies, undead created by Nurgle's magical plagues. They're the pretty standard "Plague bearing, actually dead" type, but instead of biting people, just being within proximity of them can cause infection.
* There are also planets with Cold War era technology that are, well, experiencing a cold war. At least one destroyed itself in a nuclear war. One might actually consider this natural human development, though. Technology isn't the problem; people are.

* There are also plans for saucer-shaped airplanes, since it's the most aerodynamic shape in existence. The only problem is the horrible maneuverability, meaning that state of the art fly-by-wire systems have to be developed for steering the crafts before anyone can even dream of flying them.
* There are also plenty of mechanical interactions that qualify, such as the Jack Handle equipment for Mr Fixer turning all damage he deals into barrages of outgoing damage aimed at all the bad guys...including damage he would cause to himself or other heroes.
* There are also plenty of training video games for military, police, etc. that AREN'T about killing or flying or anything like that, but are to practice foreign language skills, negotiation techniques, logistics management and the like.
* There are also plenty of villains who aren't afraid of using poisoned weapons, including Don Krieg, Crocodile, Wanze, Duval and Hyouzou.
* There are also properly decapitated ghosts that can throw their heads around at will and have formed "The Headless Hunt" which refuses to allow Nick to join.
* There are also quite a few fans who think that Dr. Gero hates Goku for
* There are also quite a few fun game mods out there: Pyro Dodgeball, Prop Hunt, Vs. Saxton Hale, TF2 Ware, and Zombie Fortress, to name a few. Vs. Saxton Hale in particular has clearly inspired the first Halloween Boss, the Headless Horseless Horseman.
* There are also quite a few instant laser attacks, generally done by having a faint and harmless laser appear for a second or two before the opaque laser that damages you appears in the same location.
* There are also quite a few of the aliens who have Facebook profiles. There's even a group called MNU Spreads Lies.
* There are also quite a few other congenital birth disorders, from practically invisible (webbed fingers/toes), mostly harmless (cleft lip/palate, extra finger(s) or toe(s), alopecia (lack of hair)), debilitating (limb deformities), and probably not going to survive for long after birth, if the infant even lasts that long (born
* There are also randomizers for the Pokémon games that can randomize what Pokemon you can catch, to what Pokémon your opponents have, all the way to randomizing what Pokémon evolve into.
* There are also rare consumable items which will increase a job by one rank when used.
* There are also references scattered in odd places (a journal entry here, a sign there) of a town called Sutch, near Kvatch. Sutch never made it into the final game, but not all references of it were scrubbed before launch.
* There are also references to a few of the DC superheroes who carried the Sandman title while Morpheus was imprisoned, Hector Hall even
* There are also "regular" demonic possessions in Mega-City One, although they're pretty rare, no more than 20 cases or so a year (in a population of 400 million). There's a department of Psi-Division specifically devoted to demonology because of this.
* There are also Robin's old videos as Canadian teen pop idol Robin Sparkles.
* There are also rumors about Geijutsuka C Class, the fashion department, being dissolved, or possibly just being absorbed into the painting class. By the present day, the latter has happened.
* There are also services now that preserve a woman's eggs in case she doesn't have a baby before menopause. This is the same as the process mentioned above with the only difference is that it's still her own baby.
* There are also several accounts of the reverse, in which colonial children were taken as
* There are also several characters that, if not immortal beings, have identical successors (King and Armor King, Roger, Kuma, Law, possibly Yoshimitsu) or cyborg reincarnates (Alyssa, Brian), or are robots (All the various Jacks).
* There are also several different variations of shields. Deflectors create a forward-facing hemisphere that blocks almost any ballistic and missile weapon. Disruptor shields are the reverse — they create a hemisphere that blocks any energy weapon. Torpedoes are stopped by both deflectors and disruptor shields.

Standard shields completely envelop the ship and protect against most types of attack but can be overloaded by too much damage (unlike deflectors and disruptor shields). There are other types of shields, including small directed shield projectors, automatically facing the strongest enemy weapon and mounted on heavy weapons hardpoints. Cloaking generators are also in the same research tree, as the principle is similar.
* There are also several examples of religious mergers: the Orange Catholic Bible is an effort of the Council of Ecumenical Translators which was made up of representatives of all faiths with more than a million followers. The result was supposed to be a universal (i.e. catholic) representation of beliefs. It was not well received. At first.
* There are also several inertialess drives (which are not quite the same as
* There are also several instances where Shepard has to get two people to resolve their differences.
* There are also several manga that were remade into Korean live-action series:
* There are also several moments where the cast does acknowledge that they're singing, especially during "Professional Pirate" when
* There are also several Secret Skill Shots obtained by lightly plunging the ball and immediately hitting one of four shots.
* There are also several Texture Packs that do weird things to the sky, mostly making the sun and/or moon large and/or a weird colour, and some that have
* There are also several times where a pothole is just the trope name, except with the caps removed, ex:
* There are also several videos with misheard Japanese lyrics to the infamous Dragostea Din Tei,
* There are also Shapeshifters, as in normal animals of all varieties spontaneously giving birth to magically active stock able to take on human form. Not to mention all the dragons who've learned the ability...
* There are also short-range "fold-space" communicators, which are much smaller, but have a much more limited range. These ones are for personal use.
* There are also side missions in which Cole must spy on enemy couriers.
* There are also signs that this is the nature of Alysanne's feelings for Kersea, which are a bit too close to be mere friendship. However, while Kersea values Alysanne as a friend, she certainly harbours no romantic feelings for her.
* There are also similar "here's a scantily-clad babe who TOTALLY is in our game!" ads floating around for a "Wartune" RPG that proclaim "MALE GAMERS ONLY" and "ADULT CONTENT". They're not even
* There are also situations that have temporary relationship values; you don't have to stay friends with the person, just get them to like you a certain amount in a time limit, such as trying to impress the Headmaster so your kid can go to private school.
* There are also smaller mega-corporations owned by other heroes, like
* There are also smaller modern windmills which are practically silent, which nevertheless got this reaction (in, for example, the West of Ireland) for being unsightly, despite generating impressive amounts of clean electricity for their size.
* There are also "smart" animals such as dogs, cats, rats, and monkeys who tend to have vocabularies of less than a hundred words.
* There are also Soldier Pills, used to make the consumer stronger by providing a burst of
* There are also some breakups that might not have even happened at all. The characters just moved on to other people without actually splitting.
* There are also some clear example of Zoans like this, because the inherent combat potential varies greatly depending on which specific animal the Zoan can transform into. Being able to become a leopard or a king cobra or a
* There are also some humans with minor mutations amongst the human populace. The Slags in
* There are also some minor antagonists that get their comeuppance as well. Principal Kobayakawa, the head of Shujin Academy and a member of

* There are also some places in the East where local plant life has developed mobility and sapience as well as vaguely human shapes (but still generally having the biological features of plants).
* There are also some stories that are just funny, like the one where Clemens sets a sacred cat on some mobsters who are trying to run him out of business (and the guy runs a
* There are also some versions of a fairy tale involving Ivan Tsarevich (son of the Tsar), Ivan the Maid's Son, and Ivan Bykovich (the Cow's Son). They fight three dragons, all called Chudo-Yudo.
* There are also somewhat less pleasant versions, such as "The Mouse, The Bird and the Sausage", where the three characters keep house together. Each of them had their tasks to do, until one day the bird got tired of his job and they changed them around. Everyone ended up dead.
* There are also sorcerers from Hyperborea, which is somewhere around the real-world Greenland - these ones are white.
* There are also Soul Gem bath bombs. They come in a random assortment like capsule toys.
* There are also spiders in the desert that fold their legs and cartwheel away when threatened.
* There are also strong implications that Annie is asexual, but not aromantic - a combination that typically results in a person disassociating love and sexual attraction, and leads them to seek exactly this sort of relationship.
* There are also the Ancient Priests, who can break the Morale of your mercenaries with "Horrify" spell, and cast area-of-effect Miasma.
* There are also the Asurans: machines created by the Ancients to combat the Wraith. When the Asurans are activated, they become a much bigger threat than the Wraith when they decide to kill the Wraith by eliminating their food source...humans. Until they are dealt with, of course.
* There are also the banshees who say such wonderful things as 'how do you know if they're really even your family?' if
* There are also the Bearded Priests of Norvos, who are famously armed with double-headed axes.
* There are also the Celestials, and Galactus, neither of whom has made an appearance *- though both have been mentioned, the former as the force that made the gods largely stop meddling in humanity's destiny a millennium before until it could stand on its own (and prove, per Thor, that it was "ready for a higher form of war"), and the latter as, well, Galactus. Who once tried to eat Krypton. Plus, Galactus' herald, the Silver Surfer, is briefly glimpsed.
* There are also the Celestials, who are original creations. Technically
* There are also the Clans' Enhanced Imaging Neural Implants. Getting the implants (which look like brightly colored facial tattoos) means you don't need to wear a neurohelmet to interface with your 'Mech,
* There are also the Crazies, who gain superhuman strength via brain implants, at the cost of sanity.
* There are also the Endbringers. Even the combined forces of the strongest heroes and villains in the world can barely impede their progress,
* There are also the evil fish-men called the sahuagin, which is frequently pronounced "sa-HWA-gin" but is officially (according to the sourcebook
* There are also the Exodite Eldar, who lived on colonies far enough from the centre of their civilisation not to be affected by the Fall, and who tend to have a more rural and survivalist theme (essentially wood elves to the Craftworld Eldar's high elves; they've tended to get less mention as 40K has moved away from simply being Warhammer
* There are also the Exodites, Eldar who left their empire before its fall due to their disgust at its decadence. They still have considerable technology, but at this point, even the Imperium would have grounds to call them low tech, although many of them also have stockpiles of the good stuff they don't use except in cases of emergency. They also have dinosaurs to ride.
* There are also the faith-based powers of the Adeptus Sororitas (aka Sisters of

Battle), particularly in
* There are also the Fathers of the Church, early Christians whose writings codified a lot of the doctrines of the Christian faith, like the Trinity. The earliest of the Church Fathers are the Apostolic fathers: St Ignatius of Antioch, St Clement of Rome, and St Polycarp of Smyrna. They lived around the 1st and 2nd centuries AD, and are said to know the Apostles themselves.
* There are also the First Ones who are even more high tech than the Vorlons or Shadows (or else those two are deliberately faking a lower tech level). Though they've all left the galaxy aside from the first First One, Lorien.
* There are also the giant-kin, a group of species of "giant-ish" beings who are smaller, less physically imposing and usually less intelligent than true giants, but are related to them and in some settings descend from them. The most famous giant-kin are ogres and trolls, but other species include the cyclopes and the hideous fomorians. Different Monster Manuals and other supplements introduce quite a few other races of giants, both "true" and giant-kin, some of which have several subspecies of their own —
* There are also the improved variations of many enemy types. While some are simple stat increases (Large Red Flies) or come at expense of other stats (Red Boom Flies exploding into a longer-ranged but less damaging
* There are also the official Villains R Us groups like The Council, Arachnos, and the Malta Group. Any player can start their own villain group as well.
* There are also the peaceful Edo people from the first season episode "
* There are also the portals to the Emerald Dream. Four portals in forested areas around Azeroth (Duskwood, Hinterlands, Feralas and Ashenvale), guarded by hostile dragons until the dragons were removed at the start of the Cataclysm expansion. The other side was not originally accessible in-game, but according to the lore it leads to another dimension that is what Azeroth would be without intelligent humanoid life of any kind, populated by myriad magical beasts. In the Legion expansion the portals opened up and were used by druids to access the Emerald Dreamway which connected to their Class Hall.
* There are also the rarer cave spiders, which are less than half the size of regular spiders. Still, at twenty-eight inches wide, they're unrealistically large, yet small enough to fit through a one-block gap. Unlike their larger counterparts, these ones are poisonous. Their hissing may not be as tongue tearingly-frightening as you know who's, but these meter-and-a-half blocky menaces can still ruin your day. By pushing you off a cliff.
* There are also the Scandinavian myths of Huldra (female forest-spirits), who will occasionally marry and start families with human men. The same thing goes for selkies in Scottish mythology. Selkies are human woman/seal shape-shifters, who will do the bidding of any man who hides their "seal-skin".
* There are also the ships between the Powerpuff Girls (angels) and Rowdyruff Boys (devils):
* There are also the so-called "Disrupters" (not to be confused with the energy weapons from Star Trek), which fire water at extremely high speeds. Bomb defusing robots are equipped with these to short out the trigger mechanism of a bomb. Thanks to water creating no heat on impact, it normally doesn't trigger the explosive to go off.
* There are also the Spartan-IIIs, who are basically low-budget, expendable Spartans. They're still more badass than almost everything else in the galaxy. In
* There are also the Time attacks after killing the Colossi which can net you features; The Parachute, Explosive Arrows, but the best is a Sword that can kill a colossus in 2-3 hits. So if you wanted this stuff or wanted to experience a certain battle again because it was "epic" to you, then go nuts.
* There are also the Troll Wars, which are why high elves are friends with humans, humans have mages, and Zul'Aman is in ruins. A few of the Artifact quests also reference it.
* There are also the Venusian Cloud Cities, chunks of sealed and terraformed land that float in Venus' atmosphere and serve chiefly as the home bases of the
* There are also the Xindi, who are hell-bent on eliminating humanity. While

they're all originally from the same planet, they are five (formerly six) distinct species (Xindi-Primates/Humanoids, Xindi-Arboreals/Sloths, Xindi-Reptilians, Xindi-Insectoids, Xindi-Aquatics, and the extinct Xindi-Avians).
* There are also the Ysgardian natives, who love fighting and tend to challenge everyone to a duel to the death... forgetting that non-natives don't get back up at the end of the day. Oops.
* There are also three Czech dubs. The original theatrical dub from 1983; the second dub from 1992 for VHS; and the third and current dub from 2002, made available on all subsequent home video releases.
* There are also three Finnish dubs; one in 1962, one in 1982, and one in 1994. The 1962 dub only dubbed the speaking parts; the songs were used from the 1938 Swedish version.
* There are also three Finnish dubs: two for storybook cassette adaptations in 1969 and 1987 and the third, from 1995, officially for the film itself.
* There are also three French dubs; one in the 1940's with New York actors, one in 1946 and one in 1975. The 1975 version received partial revisions in 1995 (to revert the original French name of Jiminy "Grillon" ("Cricket" in French) to Jiminy Cricket as the original) and 2003 (re-dubbing a line from Lampwick). The 2009 Platinum Edition DVD, while mostly containing the 1975 dub, oddly uses "When You Wish Upon a Star" from the original 1946 dub and leaves the mentions of "Jiminy Grillon" intact, but keeps the 2003 redub of Lampwick's line.
* There are also three optional fights. If you visit Italy at a specific part of the game, you'll duel Jean-Claude Magnum a second time, who has a better deck than the first time. Second, at another part of the game, Tea is standing at the town square. If you talk to her, you'll have to deal with Johnny Stepps and then Krump, one after another.
* There are also three types of shields which are strong against some types of weapons but weak against others. For example, graviton shields are strong against laser, photon, and pulse weapons but weak against plasma and particle weapons.
* There are also times when Minister Hacker successfully adopted Humphrey's methods with devastating effect, such as the time he arranged for a 'good will' visit of British troops...to a country that had just had a surprise invasion.
* There are also T-shirts featuring chibi versions of the Marvel characters, with quotes like
* There are also two Czech dubs; the original 1975 theatrical dub by Barrandov, and again in 1990 for airing on ČST.
* There are also two instances of Sena in this light; first at her house while chasing Kobato fresh out of the bath, second at the beach when she gets up with her bikini top off.
* There are also two Italian dubs. The first from 1955 and the redub from 1997. The 1997 version was widely criticized by fans and is considered to be the worst of Disney's Italian re-dubs. Because of this, fans wrote a petition to bring back the original 1955 dub, which has been retained since the 2006 DVD release.
* There are also two Italian dubs: the original from 1971, and the newer from 1983. The first dub is now lost.
* There are also two Japanese dubs: one for Kids Station and one for Playhouse Disney Japan.
* There are also two locations called Kingston in England - Kingston-upon-Thames is a town/suburb/district of London (, England), while Kingston-upon-Hull is a city further north. You might think that "Kingston" without a qualifier would refer to the city... but actually tends to refer to the part of London. The city is usually just called Hull.
* There are also two major Josephs in the Bible: Jacob's son in Genesis, and the husband of Jesus's mother in the New Testament.
* There are also two new star-sized black holes in inhabited Federation space, one where Vulcan used to be and one near the solar system. Such radical shifts in local gravity is going to have major consequences.
* There are also two Norwegian dubs. The original was made only for the "Tigger Too" featurette in 1974, while the second one was made for the compilation film in

1997.
* There are also two slightly lesser forms of this trope. Those who have reached the God Tier have "conditional immortality" and will revive when killed unless the death was Heroic (died protecting someone or for other noble causes) or Just (they were jerkasses and deserved it). Lord English's minions, on the other hand, have "conditional mortality" and are unable to die until Lord English permits them to do so.
* There are also two soldiers who die shortly after being defrosted, possibly due to being experimented on.
* There are also two spells that can be cost for minimum Essence (mana, magic points) expenditure but automatically kill you and deal significant damage to everyone around you.
* There are also two three Brazilian Portuguese dubs. One for Discovery Kids in São Paulo, one for Netflix in Rio de Janeiro, and a third for Boomerang and Cartoon Network in Miami.
* There are also two types of frog people found aboveground: green tree frog men, small green humanoids with frog heads that live around lakes and swamps, and toad men, dark green toad-headed people found around stagnant water. Like all aboveground animal people, though, these two types do not display any real intelligence, and are essentially bipedal animals.
* There are also unusual depictions of famous characters, such as Charles Dickens' characters outside their typical era. One scene involves an aging thief giving Fagin-like training to a group of child thieves. Moore does not give a name for the old man, but the implication is that we are seeing child-thief Artful Dodger in his old age. He became a copy of his mentor. Another scene involves a young rape victim who seems unusually optimistic. The name given for her is Polly Whittier, a character better known as "Pollyanna".
* There are also various political parties in the game. You choose a specific political party at the beginning of the game that grants bonuses to certain statistics. If you decide to change your government from an empire (the default) to a democracy then you must keep up your popularity or have a new party take control and make you lose your party bonuses.
* There are also Video Courts such as "You The Jury" that keeps the human element but turns the whole trial into a
* There are also Vikky and Vance, a pre-war petty-crime duo styling themselves as Bonny and Clyde-like duo, except not nearly as competent or famous (at least before their deaths, when they drove through a completely unrelated shootout). And then there are Pauline and Sammy, two extremely small-time crooks styling themselves after Vikky and Vance (thus copying two copies) who want to gain infamy by robbing all the casinos on The Strip. With Vance's never-fired gun. Against all of The Strip's combined security.
* There are also warlocks who can use no or very little magic. They are called ifrits.
* There are always passing references to former lives of the Dax character.
* There are always two to three primary protagonists and viewpoint characters. One or two, depending on whether this book is part of
* There are an astounding number of fanfics that have as their premise Lelouch returning
* There are anecdotes of teenagers hiding their rock music in the sleeves of Pat Boone albums.
* There are a number of accepted methods of holding a weapon that resemble this trope, albeit with little details like keeping ones finger off the trigger for safety. The easiest ways to hold a weapon without pointing it at something unintentionally are to hold it pointing upwards or downwards. In the case of a longer weapon like a rifle or shotgun, the most practical method typically is to hold the weapon against your torso, with the weapon pointed across your chest and upwards ("Ready Arms") or downward ("Port Arms").
* There are a number of appropriately awful accounts from the submarine world, notably the brief log kept by the survivors of "

* There are a number of aversions as well, with some involving people temporarily changed by
* There are a number of cities in America that are named after places in Europe, as displayed by
* There are a number of fan works that have come out of Fred Perry's series
* There are a number of fictional languages, but none more widely used (to the point where there's actually a friggin' dictionary) than Klingon.
* There are a number of groups still practicing Hermeticism, the Ordo Templi Orientis, and the Rosicrucians fall under this umbrella; two out of the three are still around, and the third was kind of just one guy, so you can excuse him for not living forever.
* There are a number of human subspecies called Abhumans who went down different evolutionary paths due to their environments. The most widely known are the
* There are a number of jokes from Russia that involve soldiers stationed near nuclear weapons
* There are a number of lesser magical books that often have a negative effect only on creatures of specific classes or character alignments:
* There are a number of magical governments around the world, but The Ministry of Magic gets the most attention since it maintains control in the U.K., though it only rules over other magic-users. Muggles are explicitly outside their jurisdiction, and the Minister of Magic consults with the U.K.'s Prime Minister on matters which affect both — albeit in an infuriatingly high-handed fashion.
* There are a number of magicians who utilise forms of Post Modern Magik in the series, from hiding magic within everyday items, to using industrial lasers to carve runes quickly, to incorporating a
* There are a number of mechs designed to take advantage of the head kill weakness. The Thunderhawk carries 3 15 point weapons, making its (assuming all hit) head kill chance 3x 1:36 every turn. Since punches hit on the punch table, where head hit is 1:6 instead of 1:36, and any mech 55 tons or heavier with TSM can do 12+ damage punches, there are several mechs designed such that they can get 2x 1:6 instant kill in melee. Needless to say, such mechs tend to draw
* There are a number of modern predator species/populations who have included humans as a regular part of their diet. These include the polar bear, the large crocodiles of Africa and Australia, the tigers of the Sunderbans, a population of lions in Rwanda who learned to prey on refugees during the civil war, and chimpanzees, who regularly hunt monkeys, and have been known to steal and eat human babies, sometimes being as bold as to snatch them right out of their mother's arms.
* There are a number of spells that can turn people to statues of stone, ice, salt or glass.
* There are a number of straight male athletes who have large gay followings, to which they respond with varying degrees of warmth; some, like rugby star Ben Cohen, go so far as to pose for nude pictures and market them to their male fans.
* There are a number of tales where the youngest daughter of a king becomes the unfavorite of her father when she does something that displeases him (compares her love of him to salt in bread, refuses to acknowledge that he is more fortunate and rich than God, etc). This inevitably results in him banishing her, her setting off to seek her fortune, and eventually meeting her father again, after he has to eat his words and forgive her.
* There are a number of theories to explain the odd shapes of the trees in
* There are a number of urban legends that claim that buildings which show a less-decorated facade to a now-more-important direction were accidentally constructed back to front. For example, the Kelvingrove Museum in Glasgow, Scotland, which was constructed to face the university campus, meaning that the main entrance from the street is actually the back of the building.
* There are a number of Young Earth Creationist theme parks and museums in the U.S. that intend to counter the accepted scientific theories about evolution and the age of the Earth:
* There are apparently entire departments dedicated to redacting information that other entire departments spend all their time collecting. Everyone involved is

fully aware of this and do their jobs to the best of their abilities anyway.
* There are apparently evil necromancers elsewhere in the world; part of his job is to enforce the University's monopoly. With fireballs.
* There are apparently some old archaeology that show some very weird things including: so-called
* There are apps and social media sites, such as Trakt.tv or the defunct TV Tag/Get Glue, that can keep track of the number of times a person has seen a movie or TV series episodes. Each tally is recorded whenever someone using the app checks in to say they're watching a program.
* There are a series of kid-aimed Jehovah's Witnesses cartoons based about a brother and sister named Caleb and Sofia. The family is racially ambiguous in order to appeal to a general demographic. They have slightly dark skin, light brown, straight hair, and greenish-brown eyes.
* There are a set of Geico commercials where there's an 'animal adventure' guy imitating David Attenborough watches the Geico Gecko doing various everyday activities like filing papers and going to a cafe. He ducks behind bushes (and trash cans) as he does so, wearing full safari gear.
* there are Asian Americans who defend Katana and consider her an excellent example of an Asian superhero who embraces her heritage without complexes.
* There are a small number who are actually seriously contemplating bringing this back into the American justice system as an alternative to imprisonment for lesser, non-felonious, offenses. Of course, the recipient would have to volunteer for it. Their reason? It's considered by some to be less of a Cruel And Unusual Punishment as it takes care of the punishment quickly and promptly and doesn't subject the recipient to the dehumanizing factor of over-crowded prison life (and save precious taxpayer's dollars!) and would allow them to get on with their lives, while still being a strong deterrent. Considering that convicted felons are essentially doomed to be unemployable or make rock-bottom wages for the rest of their lives, and the down turn the economy has been taking recently... It really says something about how brutal America's treatment of ex-cons is that some of them would rather be
* There are at least 22 documented cases of women serving in the Prussian army during the Napoleonic Wars. They include:
* There are at least 35 of these in and around China. The government plans on building at least 20 cities a year for the next
* There are at least a few documented cases of people who died from playing games for hours and even DAYS without giving themselves sufficient rest, exercise, or nutrition.
* There are at least seven different forms of lightsaber fighting. These were invented to explain why different characters have very different fighting styles, for example Darth Vader's slow-but-powerful approach (Djem So/Form V), Obi-Wan's subtle defensive style (Soresu/Form III), Yoda's crazy acrobatics (Ataru/Form IV) and Count Dooku's fencing-inspired bladework (Makashi/Form II).
* There are at least three episodes about Disguise Masters. First one is about the man who pretends to be Chief to kill a very valuable witness. Second one is about the leader of ACB (third organization; it has both CONTROL and KAOS as its enemies) who disguised himself as fellow agent (one of the first on-screen black agents). Third one is about Chameleon: he disguised himself as Larabee, Admiral Hargrave and even as 99, all to infiltrate a secret counsel.
* There are at least two instances of a character taking the shape of a cockroach and forgetting until the last minute that cockroaches can fly. A nice Double Subversion occurs then: Jake remembers just in time that cockroaches can fly, only to then remember they can't fly well.
* There are at least two law firms - one specializing in personal injury! - named "Slaughter & Slaughter".
* There are at least two origins for the phrase "giving the cold shoulder" that are quite literal: it either involves turning your back on someone you don't want to talk to ("coldly" showing them your "shoulder"), or serving cold mutton shoulder to unwanted guests.
* There are a toyline, comic book and animated series based around the

* There are "audition tapes" where the characters audition to play themselves, and they naturally have the same names as their characters. All the characters are voiced by Anders Matthesen, who does not share a name with any of the characters.
* There are a variety of alternate rule sets for Scrabble that encourage making up words. Some
* There are aversions as well, however; Robert Frobisher and Rufus Sixsmith never meet again, nor do Timothy Cavendish and Ursula, and nor do Vyvyan Ayrs and his wife Jocasta (although the latter two are both Prescients in the sixth story). And yes, in case you haven't seen it, there are a
* There are a wide variety of real-life phobias that can come across as this to other people. Including fear of clowns, ducks, babies, hair, colors, numbers (
* There are a wide variety of such competitions, generally along the lines of "Here's a camera, here's 24/48 hours, make a movie!" A disproportionate number of them are named after
* There are Azathoth and Yog-Sothoth who approach Yahweh in terms of power, even if one is an idiot and the other is locked out of the universe.
* There are bandits - or their spiritual kin, Forsworn and Silver Hand - dwelling in many of the province's caves, and nearly every abandoned watchtower, or crumbling ruin. Their total population is vastly greater than the citizens of the inhabited towns, and their chiefs tend to wear the third-best armor in the game. The same applies to the Thieves' Guild in Riften, which has nearly half as many (visible) members as the population of the city itself. Markarth is
* There are before and after pics of penis enhancement surgery on a porn site, only it was hard to tell which pic was supposed to be better. The after pic was certainly longer, but it also showed the side effects of penis surgery. Floppy erection.
* There are, believe it or not, other Marines in other militaries out there. Some—like the
* There are bits of French over the story from Vivienne and at one point from MaNi/Elder Brother, which the reader can translate on their own.
* There are blooper reels of Neil Patrick Harris and other male cast members on the set of
* There are bombproof trashcans, designed to minimize the damage caused by a terrorist dropping a homemade explosive device into one by focusing the blast upwards, away from bystanders. They were a common sight in the UK during
* There are candles and candles. Generic ones made with paraffin wax are cheap and readily available, but those made with beeswax are considered fancy decorations and considerably more expensive. You'd have to be
* There are carnivorous unicorns (more often called "One-Horns", but guess what unicorn means) in the
* There are cases where if you bully someone's little sibling and the older sibling, however abusive he and she is, gets wind of it, they will beat the living crap out of you. Often saying that "Only I'm allowed to beat up/insult her/him."
* There are cathedrals that have their walls covered entirely in human bones. They aren't literally made out of the bone though, the bones are simply inserted into the plaster. The reason for this, is that the churches ran out of space in their crypts. Putting the bones into the walls of the church was considered a respectful way of reburying those who had to be exumed so that new corpses could be buried. Still creepy though.
* There are certain exceptions to this. Notably, John Stewart is highly visible among many people thanks to his appearance in
* There are certain extremophile single-cell organisms that feed directly on metal. Among them are:
* There are certain instances when the designated face is not the face in the bill, but the one who "plays local", especially if his in-ring performance is outstanding. The same may be true for other hometown heroes that wind up wrestling for foreign promotions.
* There are certain opportunities for Graf von Krolock to let out evil laughter in
* There are certain prescription medicines that in already mentally ill (though

not psychotic) individuals caused homicidal ideation.
* There are certain rooms on the train that can only be accessed on your first visit with Zangetsu (the opening section and where the Glutton Train is fought), and the time limit will probably prevent you from exploring the entire area. If you get back on the train afterwards, the game will count the entire map as being explored regardless of how much you actually uncovered, allowing you to achieve 100% map completion.
* There are certain types of enemies that take greatly reduced damage when not struck by a particular type of weapon. One of these (usually possessed by skeletons) is bludgeoning damage, so prepared adventurers will bring a mace or hammer along just in case.
* There are characters a-plenty from different traditions: Morpheus, Orpheus, Calliope (
* There are children in a dangerous production, or many children in a TV series. Child-labor laws and safety regulations mean that it's nearly impossible to get underage stuntmen. Also, past a certain point, voice actors are cheaper and easier to use than real children. This goes double if live-action actors are free agents.
* There are Chinese legends and poems about shamans, male and female, gaining their power from romantic unions with spirits or deities.
* There are Chinese tales about bandit-run inns who serve human meat, although this trope is likely to pop up in any culture where people travel. One of these was named "Three Cups and you cannot cross the Mountain," referring to their rice wine-based house drink, which rendered travellers unconscious and ready for butchering.
* There are Christmas "saving plan"-style mail-order businesses that encourage people on a tight budget to either put a bit aside each month for Christmas or buy presents throughout the year. Given the way they work, these guys start shipping their Christmas catalogues in
* There are claims that certain units of lancers from Eastern Europe and Eurasia (it has been attributed to Polish lancers and Cossacks) would shave with the tips of their lances before battle, and if their commander could see any stubble or nicks on their chin, then their weapons weren't sharp enough for battle.
* There are clues that The Other may be far older than Lucrezia and that she may have been merely another host body. For example, the Geisters mention having worshiped their deity for far longer than any human's lifespan. After a period of absence she appears to them as Lucrezia.
* There are commercials for BigSpot.com, a site that allows users to take surveys on products, that start out as commercials for some hilariously bad product before saying "Wow. That was bad. Wouldn't you like to tell them that? Now you can." One has a product called
* There are communities known for a devoted preference to the Classic
* There ARE companies making powered exoskeletons in real life. The two leading models are Raytheon Sarcos' XOS, which deliberately played up the
* There are computer systems in place in at least one state that can make automatic accusations against welfare recipients for suspected abuses of the welfare system. The algorithm it uses in lieu of common sense is very far from perfect; these automatic accusations are
* There are congenital disorders that make the skin very rubbery and fragile. If you are unlucky enough to have something like this
* There are consistent rumors of there being an entire "triangle" of paranormal and unexplained activity in the game in the Tongva Hills region, appropriately named the "Tongva Triangle". Roughly
* There are constant debates on who, if Scar and Mufasa are the only male lions of the Pride, Nala's father might be, and thus to what extent she is related to Simba. A full-on sibling seems unlikely, but she could easily be the daughter of Mufasa and another lioness; barring this, she may be the daughter of Scar, which is uncomfortable for
* There are copious shots of Jessica's Sony Walkman throughout the movie the
* There are counterparts to Big Brother for the other super-states. Eastasia is led by Immortal Father, who uses a portrait of

* There are countless fairy tales where the protagonist is given vital aid on their quests by dwarves, crones, and sometimes even giant, disembodied heads, such as
* There are countless horror films that take place in the Southern USA. Here is a sample list (see also
* there are, covered in liquid water, Mars-like barren worlds whose atmosphere has been stripped away by the stellar winds, truly exotic places that would seem to have escaped from a science-fiction work, or anything in between.
* "There are Cruel and Fearsome Things That Prowl the Open Ocean" has a deep sea monster that does this.
* There are currently eight separate X-Books in the aftermath of Schism. Three books deal with the Jean Grey Academy alone.
* There are currently nine classes of ships: Cruisers, Escorts, Science Vessels, Raiders, Raptors, Dreadnoughts, Warbirds,
* There are definitely elements of this in the Doctor, justified given the Doctor's perilous and bizarre way of life. Topics include romantic issues, bananas, little hospital shops, dancing, and whatever random topic is on the Doctor's mind.
* There are deleted scenes that indicate that Marlon/Louis does, in fact, feel guilty about what he's doing to Truman, and the (actual, real-life) actor said that the character has a drug addiction from the stress.
* There are demonstration technologies to produce the actual floating in the air holographic displays. The difficulty is in the display: the actual interactivity (sensing the hands position and moving the graphics accordingly) is a solved problem, as such systems already exist in the form of infrared sensors.
* There are devices that can instantly destroy a hard disk, either by stabbing it with a spring-mounted nail or by bathing it in microwaves. They are self-contained and will work even if police cut off electricity from your office before storming in.
* There are different versions of where the mother is (Pulverland = (Gun)powder land, Pommerland = Pomerania, Kummerland = sorrow land, etc.) The version with Pomerania is often linked to the Thirty Years' War.
* There are documented cases of children dying due to the after-effects of having unpleasant substances placed/forced into the mouth. For example, trying to swallow hot chilli powder can easily cause suffocation. This and other substances can also cause the child to vomit and then aspirate (inhale) their own vomit. This in turn can lead to suffocation and even if it doesn't, it may cause pneumonia leading to death.
* There are documents dealing with the princes' care dating after Richard died. This does seem to make him an unlikely suspect.
* There are doubtless a couple of people keeping lists of the number of times life has imitated
* There are dozens of potentially perverse uses for many of Lala's inventions as well as technology in general. The teleporter that doesn't take clothes and a device that can control people's bodies immediately come to mind. This is just the tip of the iceberg though... no, really.
* There are dozens of unreleased scenes from the eight movies whose existence have
* There are eight jurors. Capital crimes tend to have a jury of twelve men in the US (This was probably done to keep the movie from running too long, as having four more characters for them to confront would have added at least another half an hour to the story).
* There are eight playable characters, each with their own storyline (hence the title). Each of these characters has one of eight unique basic job classes (and can dual-class). In addition, each one of these jobs plus the four secret ones has eight skills to be learned.
* There are eight three-part sidequests to take part in, one for each of Orsterra's regions.
* There are elements of this in Jenny Calendar. While more serious and settled than most, she certainly has a wild and playful side that shakes up the stuffy Giles (particularly in season one, before his

* There are elements of this in Sheriff Carter's relationship with Allison Blake in
* There are elements of this in the relationship between Vin (a blunt
* There are enough corrupt IA cops in Gotham that they become a problem in the
* There are entire genres which exist for and through incredible levels of ham. Starting with
* There are entire lists of "challenged books", the most famous of which being that of the American Library Association (ALA)'s Office for Intellectual Freedom (OIF), who states the top three reasons for challenging books are because they had "sexually explicit" content, "offensive" language, or were "unsuited to age group".
* There are essentially two (or possibly three, depending on how you count) kinds of Designer Baby. First, there are genetic slaves, Manpower Inc's product. These are humans who have been genetically engineered (and psychologically conditioned) to specialize in some specific service, usually at the cost of having all kinds of other health disorders (for example, slaves designed for heavy labor are both grotesquely over-muscled and have more efficient muscle fibers, but at the cost of a much-increased appetite and a high chance of kidney and liver failure). Then you have the Mesan Alignment, the end-product of millennia of genetic engineering and selective breeding aimed at producing humans who are better at everything than baseline humans. Finally, you have what might be described as minor genies, human bloodlines who have experienced very low-scale genetic modification, usually to allow settling worlds that would otherwise have too high a gravity or too little oxygen or whatever.
* There are even a few places in Creation that work like this. One is the Well of Udr, overseen by
* There are even a few published books calling themselves the Necronomicon. Most are little more than black-magic occultism books that will make passing references to Cthulhu at best, and no reference to Lovecraft at all at worst. The most famous is the
* There are even armor pieces to improve the power of your headshots (
* There are even more variations of the standard Konami logo for a few games. Playstation games had two major ones: the "Logo coming out of earth" one for Western-released games, and the "Walking Logo" one for Japan-released games; most of the
* There are even mounts with individual names: like Invincible, the undead winged horse once owned by the Lich King (which you can loot from his corpse, naturally). Some of the dragon mounts are also specific dragons not just random ones, and other times you can get rare mobs as mounts after defeating them. The original game had two mounts that you raised and trained from babies: a dino (for Horde only) and a sabertooth cat (for Alliance only). A few other mounts (but not nearly as many as people want) like this have been added.
* There are even some continuities where Cybertron is depicted as being hazardous enough in itself. The IDW comics make a point that their war had caused the planet to become completely uninhabitable for centuries (And when we say "uninhabitable", we're talking for a race of
* There are even some unused variants of certain enemies hidden in the game's coding, complete with differing
* There are even special nicknames associated with the person's attitude towards
* There are eventual fights involving Scott's ex-girlfriends Envy and Knives. For fairness's sake, apparently, Ramona handles these fights.
* There are even two fan-names for the phenomenon. The "Peen of Death", or the "Dick of Doom". (It is generally accepted, however, that if you have to die in that crapsack universe, it's definitely not a bad way to go out. If that sounds dubious, go back and watch the season 2 episode "Heart" again.)
* There are even variations depending on the setting, such as "Ta gueule, c'est la Force" (guess) for
* There are exactly three cards banned in every single format they're available in, even in formats where
* There are examples of both Option 1, in the form of so-called "Fang Bangers" and

Option 2 in groups such as the Fellowship of the Sun. Given that even the friendliest vampires are
* There are exceptions in the cases of Moroi vampires who turn into Strigoi by themselves. They only have to kill a victim by draining it of blood.
* There are external factors involved in why Rukia and Ichigo's experience becomes a definite success instead of just a possible success.
* There are fanfics that pair Riff Raff with Dr. Frank-N-Furter. This is possibly due to when Frank whips Riff, or due to the line (which seems to indicate that Riff was jealous of Frank) "They didn't like me.
* There are few if any law enforcement agencies that the protagonists of
* There are few mundane creatures with fantastic names, and one of the joys of the series is how immediately evocative most of the terms are. One of the best of these is the "lizard-lion", which almost every person who reads the series understands to be an alligator. Others include zorses (for zebras, and not actual zorses), puff fish, pricklefish, snow bears, and colorful talking birds (parrots).
* There are few of these floating around about these kinds of people being thrown into the world of
* There are few things quite as cruelly satisfying as playing a game with a
* There are five games that retell Simon Belmont's assault on Dracula's Castle in 1691
* There are five Lagrange Points. L1 and L2 lie directly in front of and directly opposite the Sun from Earth's perspective, at the points where the sun's gravity and Earth's add or cancel just the right amount to produce a circular orbit with the same period as Earth's year. A counter-earth would be at Earth's L3 point. L1, L2 and L3 are unstable, as described above. L4 and L5 are 60 degrees ahead of and behind the Earth, and are also called the
* There are folk tales of surviving cavemen in the Caspian region. Not a lot of evidence for it, though.
* "There are four brothers, Anybody, Nobody, Everybody, and Somebody. Everybody had a job to do, and Anybody
* There are four instant-kill possibilities: a meltagun at point-blank range, a Lascannon headshot (unless you're a Devastator with an Iron Halo), a charged plasma cannon shot, and an upgraded Thunder Hammer.
* There are four Japanese dubs: one in 1958, the second in 1983, the third in 1986, and the fourth in 2007. The second dub was revised in 1995, replacing Pinocchio's voice actor.
* There are four wares that can be extracted from Asteroids: Ore, Silicon, Ice, and Nividium. Since Ore and Silicon are required to produce Techs, every player-friendly race sells Mines for them; Ice is only used by Terrans to obtain Water, so they are the only ones who sell the "Ice Harvesting Facility"; lastly, Nividium is the most valued mineral, but the places where you can sell (at only 2 units at a time!) can be counted on the fingers of your hands, not to mention that there aren't any Mines for it.
* There are frequently heroic examples. If, at any time, someone pulls off a gambit towards his enemy, the perspective shifts towards the enemy himself (showing his thoughts about the situation and assumption about enemies plans) or a bystander.
* There are giant montages available on certain image boards consisting of nothing but anime characters facepalming.
* There are giant spiders in the Cursed Earth that dig burrows in the ground, where they lie waiting before attacking unsuspecting prey. Dredd and a team of Judges ran into a couple of them during a patrol outside the new mutant settlements.
* There are good queens, though: such as Bathsheba, Esther, and the Virgin Mary (she is the Queen of Heaven in Catholicism; the Book of Revelation also has the mother of the Messiah be exalted in Heaven). It seems to be that the poor girls who are awarded the title tend to be good, the ones who were born royalty tend to be evil.
* There are great honking buttloads of "comedians" who feed on clapter. Not

surprisingly, they tend to disappear whenever the political winds shift in their favor.
* There are hardwired rules on just what certain Exalts can do that other Exalts can't.
* There are hints at the myths of various races. Vulcans and Klingons are most noticed.
* There are hints dropped that, in general, the extremely-militaristic Fire Nation culture tended toward this trope, albeit not to the same extent as Ozai and other members of the royal family, hence why Zuko has so much self-hatred for most of the series for perceiving himself as the weaker sibling.
* There are hints that Cynthia is involved in a troubled relationship. She got engaged to a man who lent her money when she was fifteen, but she wants to break it off, and he doesn't want to, claiming he loves her.
* There are hints that Hayato has some form of romantic attraction (or at least deep respect) for Keith Violet in
* There are home field disadvantages. If one's own army is invading then the other side's peasants will be the victims of
* There are, however, lines no modern origin from Cartmel onwards has crossed: they've never given the Doctor a comprehensive origin, trying to keep a level of mystery about them, and they've never given the Doctor's true name.
* There are, however, occasional bans on specific cults and their practices for even non-Chaos gods, although they are predominantly imposed by the Empire's secular authorities: good examples would be cults of Khaine, a particularly dangerous war god to the High Elves, god of murder and assassination to everyone else; cults of Nagash, the Lord of Undeath (even before his ascension to actual godhood, there were a few); and those who worship Ranald, god of luck, in his aspect as the patron of gamblers, swindlers and thieves tend to find their actions curtailed. Those that worship Ranald in his aspect as Handrich, god of merchants and commerce, don't have that problem.
* There are, however, plenty of gruesome cases where it's probably a blessing that he sticks to his guideline of keeping them alive for only one minute (otherwise something else dies); at any rate, even the better cases aren't quite normal afterward, as while they
* There are hundreds of thousands of people around the world who want the
* There are hunting models available: just add a scope. Given that pistol rounds are less powerful than their rifle cousins, revolver hunting tends to be much more close-ranged and larger-caliber.
* There are "hyperparasites" that specialize in feeding off other parasites, from fleas on vampire bats to bacteria growing on mistletoe to fungi growing on other fungi. The highest recorded number of trophic levels afforded by such a lifestyle is a hyper-hyperparasite: a fungus growing on a fungus growing on a fungus growing on a tree.
* There are indications of such feelings in Grissom and Sara's dialogue on
* There are indications that there is another magic, seen with the golem in the second book. The magic of earth and shadow that powers it is antithetical to demons, it was created by a man who did not appear to be a magician, and who was
* There are in fact many more examples which can be found throughout the game, like another one in ''Assault on the Control Room" where you hug the wall down a huge valley, allowing you to take a ride in the Pelican dropship straight to the Scorpion tank.
* There are in fact two different Krampuses in this film. One is a transformation some people will undergoe when they are deeply enraged during the Christmas Holiday. The other was an evil anti-Christmas demon, who turned out to be a hallucentation by a Mall Santa.
* There are in fact two types of alternate universe in the Marvel Universe. The first are different dimensions adjacent to the regular 616 verse, such as the Microverse and the various magical verses; the second are parallel universes, which are usually alternate timelines, and presumably each has its own adjacent verses too. It's not always clear which is which — the Negative Zone, for instance,

is vague on if it is the first or second kind, so the one encountered by the regular
* There are innumerable versions of this, usually jokes on neighboring countries. The most popular tends to be a battleship or carrier from a country of the teller's choice vs. a mysterious intruder off the teller's own coast. The carrier declares its credentials, lists its wide variety of fire- and airpower, and demands the intruder move aside before it is run down. The response: "This is a lighthouse. Your move." (So many versions of this were told about
* There are insects adapted to prey on ant larvae, which smell just like fellow colony-members to adult ants.
* There are instances of humans becoming fey, and fey becoming sidhe, but the subject's taboo (and in the case of humans kind of overlaps with
* There are instances where the show averts this by featuring realistic-looking animals, such as Stampy the African elephant from "Bart Gets an Elephant" or Bluella the blue whale from "The Squirt and the Whale".
* There are jokes about a group of explorers (typically either two or three) venturing too far into a tribal territory, then being brought to a chief and being forced to choose between chi-chi or death. Afraid to die, the first explorer chose chi-chi, which as it turned out involved the tribal men standing in line to rape him (if there are three people, the process repeats for the second person, who dreads it but would much rather not die). The last explorer, disturbed by what he saw, feared for his dignity and chose death. Upon which the chief would reply, "Very well, death by chi-chi!"
* There are just three races in this one (Skeleton, Troll, and Robot), with robots now having completely unique sprites. The Deathskin Razors and Turbo Techies are again guilty of this, but not relative to each other — they have swaps in the form of the Dead Things and Chilly Liars (Razors) and the Bruiser Bots (Techies)
* There are laws preventing the sale of sexually explicit content to children, but they are not (and can never be) tied to the
* There are leeches in the rivers that run through Nyissa, in David Eddings
* There are literally dozens of Muslim and Arabic variations and explanations of the Cain and Abel story. Sometimes, they even overlap with Jewish traditions and legends; some renderings and retellings offered by religious scholars are nearly identical. In both religions, many of the more popular renderings state that Cain's motive was marrying his twin. The two religions also overlap on the idea that Cain was taught to murder by the Devil and that Eve is the reason that women are more likely to cry when they are sad then men. Usually in both, Cain is taught to bury the body by a raven or crow sent by god, but other times Cain runs away and the first funeral and burial is carried out by their parents and sisters when they find the body. There is also a version where Cain runs away with the sister who was the cause of the murder after he kills their brother. In another, Cain states his famous line "Am I my brother's keeper?" when their father can't find Abel and asks him if he has seen him; unfortunately, his remorseless response causes Adam to realize what happened. One Jewish retelling of the idea where the conflict is caused over marriage further explains why the men were matched up with each other's sisters and why God wanted Abel to be the one to marry the more desired sister. Beyond the twincest thing, Cain and Abel's twin sister were paired together because they were both more bitter and mean; Abel and his intended bride were both more physically attractive and good-natured than their twin's, so god basically paired each brother with the sister who was like him. The reason that Cain was not chosen had nothing to do with his sacrifice itself; he was wicked, unfaithful, and ungrateful towards God, and full of lust for his sister because she was beautiful. Abel was picked because of his righteousness and good heart, like always, only, in this version, it's more logical and practical; he would make a very faithful and loving husband and, seeing that the woman assigned to him was pretty much the female version of him, was the one who would be the better and more happy match for the contested sister. It is also brought up that, after their father told them how God intended for the siblings to be paired off for marriage, Abel was accepting and grateful, not because he got the more beautiful sister, but because he was willing

to accept whatever God said. Abel and his future wife are implied to have grown to have genuine faithfulness and love between them after finding out they were meant to be married because they were both totally content with the arrangement; therefore, so it's also possible, according to this version, that Abel was picked due to having a proper and grateful reaction to God's decision. Some scholars believe that Cain was conceived when the either Devil or a fallen angel seduced (or raped) Eve and that he was therefore destined to be evil. Another idea among scholars is that, after being kicked out of the garden of Eden, Adam unintentionally and unknowingly raped Eve during a fight; They were still naked at this point and had yet to discover what sex was; Adam "grabbed her and held her body to his so that every part of them was touching", not knowing how babies were made; resulting in her becoming pregnant with Cain. The couple was unaware of the fact that their fight resulted in the creation of their son, however, because they learned about what sex was shortly thereafter when god explained it to them. The implication in this interpretation is that Cain was evil because he was created out anger and violence, but that Abel was the better-natured of the two as a result of being created out of love. Another short legend tells Cain repeatedly attempts to wash his brother's blood off his hands while on the run, but the blood refuses to come off. Eventually, Cain comes to a mountain spring and sits with his hands in the water until he dies, his hands still stained with the blood of his innocent brother and as red as the day of the murder. This one is more or less a moral fable/tale, though; the moral of the story is that you can't hide your sins.
* There are little gems like this all throughout the game: "I AM VERY DISGUSTED WITH THE TRASHY MAN. IN SPITE OF THE MONSTER, AND THE COACH, ONLY TRASHY, I WILL BEAT DOWN THEM ALL. FOR THIS I MUST STRENGTHEN MYSELF. THE MONSTER IS THE SAME TOO. COLLECT ALL THE TRASHY, RIGHTEOUS FELLOW ALL ARE UNPARDONABLE! YOU DON'T AFFECT ME. THE TRASHY STROLLING IS AN EYESORE!"
* There are loads of characters like this, up to and including the main character himself, Tatsumi Oga. He has faced a multitude of martial artists and beat them just because he had superior raw power.
* There are lots of border disputes that can involve rivers that have changed course and the like, islands claimed by multiple nations, pieces of countries within in other countries within other countries (see Pakistan and India for example) but one especially odd example is
* There are lots of characters shouting about hierarchy and such. In fact, however, temporary insubordination or inappropriate behaviour are forgotten quickly because
* There are lots of dashboard camera clips on YouTube showing airplanes and helicopters intentionally or unintentionally buzzing roadways.
* There are lots of Internet gameshows using this as a prize or forfeit.
* There are lots of old variations on this, such as a judge who hands out "magic sticks" to everyone in the village and tells them that the thief's stick will grow an inch in the night. The thief is the one who returns his stick with the end sawn off.
* There are lots of others, Optimus Prime and Redeemer Hitler being two examples.
* There are lots of places to buy unlicensed knock offs and outright stolen merchandise in big cities, but the shadiest of shady vendors need to be able to deny what they're doing and walk off at at a moment's notice. Hence having lots of watches on your wrist, or in your pockets, or on the inside of your coat.
* There are lots of rumors about Yoshinoya-sensei's past and the little information she gives just adds to the mystery.
* There are mage-only neighbourhoods that are designed to look like ghettos so that
* There are major implied loopholes in the magical legal system where someone could avoid consequences or testifying by claiming to be compelled or mind-wiped (or actually charming yourself to know nothing about something), but it's never explored, with only a mention that some dark wizards got off through claiming they had been
* There are many celebrities out there who often appear in tabloids, media, and TV

shows, and whose faces and names will be recognized by many, despite most people not being able to actually explain
* There are many characters like this, particularly Anakin (who loses an arm at first) who then turns into Darth Vader (both legs, the other arm as well as extensive internal organ damage, particularly the lungs) and Luke (right hand) Skywalker, Lobot (Lando Calrissian's assistant, direct brain-link to the city mainframe), and General Grievous (entire body except brain, heart and lungs).
* There are many Chinese straight sword forms where you have a long straight sword in your right hand and your left hand clenches with index and middle finger pointed outwards. Those who are true enthusiasts of traditional Chinese martial arts know the real meaning of this hand sign.
* There are many commercials where the disclaimer text will be 1 point font, low contrast, up for all of three seconds (as the narrator says "terms and conditions may apply"), but covering literally almost 1/3 to 1/2 of the entire television screen as colorful and distracting images zoom by on top of it.
* There are many countries, most notably most of the ones in eastern Asia, where speaking ill of any political leader is blasphemous. Either you speak praise about him or her, or you just stay silent, as you are expected to have absolute loyalty to your country and prioritize their beliefs over your own. In more extreme cases, you pretend you like them. This can come across to westerners, who mock and insult their political leaders all the time, as
* There are many creatures that say "this creature attacks each turn if able", which essentially makes them Leeroy Jenkins, and a few other cards that let you turn your opponent's creatures into Leeroy Jenkins.
* There are many DeviantArt artists who are active frequently on their profiles there but are somewhat private about their personal lives, mostly due to trolls.
* There are many episodes staring Jimmy and Timmy (usually with the word cripple in the title) lately they normally feature their
* There are many episodes where Cartman thought he was living this trope, except what he thought made him "better" than the other kids was completely incorrect. Of course, Cartman cannot truly ever have this condition, because he
* There are many esoteric rules that are referenced throughout the series but don't appear in actual gameplay. For example, some magic requires "rituals" to perform, such as
* There are many examples in the franchise, but one of the most notable is the human character Megan from the G1 series, whose animated version is almost completely different from her toy; the former being a tomboyish farmgirl, the latter a preteen girly girl in a princess-like dress.
* There are many examples on this list—this didn't escape the notice of Donquixote Doflamingo, who, hoping to defy this trope, always attempts to land a lethal blow onto Luffy any time they meet, knowing that letting him live will simply make Luffy keep trying until he wins. This time, though, not only does Luffy get more allies to help bail him out if things go pear-shaped, but later on, Doflamingo shifts his attention from Luffy to
* There are many (joking) rumors on how to unlock secret characters for
* There are many, many other sieges in the series, either against Redwall or the Badger Lord's fortress of Salamandastron.
* There are many, many parodies of the fact that you're spending an often-significant amount of time romancing your crew members as the galaxy races towards oblivion. For three games.
* There are many, many things that are true because they are widely believed or felt to be true, or because people have widely accepted certain conventions. If the consensus or conventions changed, the statements would no longer be true. The example of money is above. Further examples: The correct adjectival term in Standard American English in 2016 for things related to France is French. The Nobel Prize is highly prestigious. Tickets to the NBA Finals are widely desired by many people. Aardvark comes before zoology in alphabetical order in English.
* There are many many videos on youtube in which 'responsible' gun owners give either children or young women powerful guns to fire without preparing them for the

recoil. In most cases they are lucky to get off with bruises and sprains, though as the examples above show, the results can be lethal.
* There are many media accounts of gamers dying after playing for absurdly long periods without rest, especially in Asia. The deaths were mostly caused by the physical stress of such a long continuous session rather than any property of the games themselves. This goes back to 1981-82, when two teenagers died very shortly after posting high scores in the arcade game
* There are many minor league parks that can boast this as well. They have an added advantage as they are smaller.
* There are many other clubs at the school who get up to their own bizarre shenanigans and have similar obstacles to contend to. The titular club is just the one the audience is following and has only recently formed.
* There are many other swamp and wetlands regions throughout the game, however, that aren't especially dangerous or sinister, though a few of them - such as Dragon Bone Mire and the Rabella Wetlands - have
* There are many people that thought the saxophonist featured in this song was
* There are many pictures of a man teaching a young woman to play a keyboard or stringed instrument. A harpsichord/piano, a violin, and a cello are the three most common subjects.
* There are many places where if you miss a weapon, you'll find it at one of that weapon's ammo pickups in a later stage, and in increasingly obvious places (going from hidden secrets to being in plain view. Even if you miss every single time, you get one final opportunity to do so in
* There are many players who aim for getting far superior times than are required for gold in the license tests, beating the demonstration videos.
* There are many random mutants released from Genosha in the Slave Island episode of
* There are many references to the University of Notre Dame in the movie as a handful of the people that produced the movie were "Domers" (Notre Dame graduates). The biggest example being the shape of the castle, which is exactly like that of the Hesburgh Library. Another reference is the town of Duloc; the University's name is University of Notre Dame du Lac, which refers to Mary, Our Lady of the Lake. The student guide/disciplinary manual is also called "du Lac". A third reference is Lord Farquaad. There are many quads on the ND campus, and there is a dorm that is in the middle of nowhere, i.e. on a "far quad". You can also see the outline of the famous golden dome of the university on the back of Shrek's vest.
* There are many religious and secular movements which are at least anti-war if not completely anti-violence. As with philosophies in general the behaviors of individual members and the level of adherence can vary dramatically.
* There are many scenes in which Sentaro has no sense of space around Kaoru, including patting his head or shoulders, trying to share a jacket with him to shelter from rain, or
* There are many scenes like this which is one of the reasons it's loved so much.
* There are many SCPs that even the people who work for the Foundation and deal with the paranormal on a daily basis are not allowed to know about their existance, only a select group of Foundation personnel have access to their files.
* There are many smartphone apps to facilitate realistic sounding fake calls, which cause the phone to "ring" at a scheduled time, display a designated contact name and picture, and playback a recorded script for the user to repeat.
* There are many species of animals the sexes of which are completely impossible for humans to distinguish visually. Among Albatross for examples, even trained scientists have to use genetic sequencing to tell the male apart from the female in mated pairs (this effort led to the discovery that many Albotrosses live and raise chicks in
* There are many spots on the human body that remain vulnerable to simple attacks of people's hands and feet, no matter what sort of training you do — like,
* There are many strips which show that, despite the apparent tension and hatred between the two, Calvin and Susie really do care about one another.
* There are many times the TARDIS ends up being this. She takes the Doctor where

they need to go and tries to cheer them up when they are broody. However, this trope is played
* There are many times when Malory does something to which another character (sometimes Archer himself) states "A
* There are many versions of this because every class wields their own melee weapon (Though they are not all blades) such as the sentinel who wields two omni blades, infiltrators with two-pronged electrified blades, or engineers, who simply slam a flaming silicon-carbide disc into their enemies with the back of their hand.
* There are many videos of race cars crashing and exploding into flames. Most spectacularly, nitromethane-powered dragsters. This is partially because most racing accidents occur at very high speeds and are therefore a lot more severe than your typical highway accident, and partly because higher-octane fuels are used. The Indy Racing League, for example, uses methanol instead of gasoline—a much more volatile fuel.
* There are many videos on the internet, compilations, playlists and even channels, dedicated to laugh at criminals that died while attempting a crime, either killed by the police, or the victim, or by their own mistakes.
* There are many warnings against allowing a chiropractor to perform a spinal readjustment. While actually breaking the patient's neck isn't the issue (unless you really chose the wrong chiropractor), there's a significant risk of damaging an artery and causing a blood clot that easily can become dislodged and travel into the brain to cause a stroke.
* There are many ways for a player to get an elephant or mammoth friend, but the one that most specifically invokes this tropes — and is clearly intended for the above Mammoth Lords — is the prestige class Mammoth Rider.
* There are many ways to kill a skinwalker. In Navajo culture, Skinwalkers can be defeated if you
* There are many whip variants introduced in a variety of supplements, including the Drow Lash of Torment (which has broken glass attached to it and hits the user on a miss if the user isn't a Drow) and a perfectly nonmagical Bladed Whip
* There are many who defend the use of "neck cranks" and other similar moves in MMA who claim that it is extremely difficult, if not outright impossible, to actually kill someone doing one in competition, as the crank is generally applied slowly enough for someone to tap out. Some beg to differ, but as of mid-2015, there have been no deaths from neck snaps reported in sanctioned MMA competitions such as UFC.
* There are many yakuza movies dealing with these, some outstanding ones are Kinji Fukasaku's
* There are masters of the Iron Head kung fu technique who can break things with their heads.
* There are mirrors in abundance. Sarah has to shatter them to break the illusion.
* There Are Monsters, which naturally means your imagination will fill it with the worst things possible.
* There are montages of facepalm pictures that, once zoomed out enough, look like
* There are more conventional examples throughout the series: Stu and May in
* There are more firearms in China that are not classically Communist-ish than other "red" countries.
* there are more people with cell phones than people with mains power — they rely on charging stations for rent on street markets and wi-fi password hacking.
* , there are more ringers and outside agents infiltrating the exams than there are actual genin trying to get promoted.
* There are more than a few examples of terror to be found in good old
* There are more than a few works that have Ganondorf and Zelda in an arranged marriage to either end a war or unite the Hylians and Gerudo.
* There are multiple accounts of the TSA and other security agencies forcing mothers to drink their prepumped milk.
* There are multiple errors in the audio books as well, usually getting a character's name wrong ("Yellowtail" instead of "Yellowfang" at one point in
* There are multiple incidents in the Bible where God orders the complete

slaughter of various civilizations, which undoubtedly included young children.
* There are multiple instances of what appear to be ritualistic "magic circles" being drawn in blood. And in episode 03 of the visual novel the numbers 07151129
* There are multiple legal cases of people suing public places (stores, train stations, and so on) for slipping and falling on fruit,
* There are multiple nations using Necromancy during the (not so) Great War in
* There are multiple Plushbabies going after you, sometimes at the same time.
* There are multiple projections used on pictures, most commonly the gnomonic projection. The fisheye projection is also well-known. The reason these are necessary is that people see in elliptic geometry. As a simple example, imagine that you are standing on a railroad track, facing along the track. If you look straight down, the rails will look parallel, but if you look straight forward, they will intersect. If you look halfway between, you should be able to see where they're parallel and where they intersect, despite being perfectly straight.
* There are multiple reference to cocaine being sold legally: In "My Three Suns", a junkie tries to buy crack from a vending machine that sells "Refreshing Crack" (but the bottle catches on the spring). The episode "Three Hundred Big Boys" has the same junkie say "No more cheap crack-houses for me!", and head for a huge building with a large sign reading "CRACK MANSION".
* There are multiple success stories on Youtube of these dogs calming their owners before they even realize they need help.
* There are multiple types of axe ghosts (the kinds that charge found swinging an axe on seeing him) in
* There are new skates now called "side-by-sides" that have, get this, two wheels in front and two wheels in back! Anyone born before 1992 may remember that these hip,
* There Are No Bedsheets: Sleeping without covering themselves with bedsheets, in video games.
* There Are No BedsheetsVideo game characters sleep on top of their blankets.
* There Are No BedsheetsWhen a character lies down on a bed, they will never get into sheets or blankets, but just lie on top of it.
* There are no crowd scenes because they couldn't hire too many extras.
* There are no end to mortals who "cultivated their conduct" and/or "refined their spirit" to become immortal and love it. It's Truth in Television, sort of, as this was the goal of real life Taoists.
* There are no female Nords, Orcs, or Redguards anywhere in the Shivering Isles, since Lynda Carter (voice actress of the female Nords/Orcs) and Gayle Jessup (female Redguards) were apparently unavailable.
* There are no fewer than three formulae for Transparent Aluminium after
* There are no game mechanics to prove either side right, but depending on where you life, what you are or what enhancements you've received might limit your civil rights.
* There Are No Girls on the Internet: An assumption that any female-identifying person met anonymously on the internet is actually "a dude", doing it for perverted reasons. In addition to harming cis women, this erases or vilifies large numbers of transgender or non-binary persons on the internet who may have been assigned male at birth but now identify as more feminine or outright female. This can be especially harmful since many trans women begin socially transitioning online before coming out as a woman in the real world.
* There Are No Girls on the Internet drives them away, resulting in male-dominated technical spaces. This partly explains why relatively few women major in technical fields.
* There Are No Girls on the Internet: During the early years of the 'net, most sites would deal with news, tech, learning and videogames. The online population however, has reflected real-world gender distributions more accurately since 2001 or so, when chatrooms became popular (and controversial) and mobile data plans became commonplace. The rise of social media during the mid-late 2000s only killed off that notion.
* There Are No Girls on the Internet: The idea that all women on the Internet are

actually men pretending to be women.
* There Are No Girls on the Internet (There are no girls on the Internet. There are no girls because the females pretend to be male. The females pretend to be male because certain men get outraged if they say they are female. These men get outraged because anyone who claim to be female is a liar. They know that anyone online claiming to be female is a liar... Because there are no girls on the Internet.)
* There Are No Global ConsequencesWhen aliens/monsters/etc are revealed, the general public doesn't react.
* There Are No Good Executives: All executives are rotten to the core.
* There Are No Heroes is one of the up-and-coming superhe-, well, superhuman serials. Somewhat starved for readership and comments, it's rated as "pretty good, I guess. What are we talking about, again?"
* There are no less than three human governments in the Koprulu sector, the Terran Dominion,
* There are no Missile Boats or the like either... any weapon that can't travel at lightspeed (at the very minimum) is just too slow and too easily dispatched to be hazardous. Warheads are generally just
* There are no names signed there. It's the same UPC barcode, repeated twice in the first row, flipped and chopped to pieces in the second row and again chopped to pieces in the third row.
* There are no official "naming traditions". No author has never mentioned it and it has never been stated in-universe. The only names not allowed were the before mentioned "moon" names (which later began being used) and "Hammerclaw" (Tigerclaw's original name before it was noted feral cats don't know what hammers are).
* there are nop, obviously the reverse of anything made for human consumption. Despite this, some "traditional British" cookbooks and websites, including Jamie Oliver's, have attempted to reverse engineer an (edible) Brown Windsor Soup, usually involving some kind of meat consomme.
* There Are No Police: An apparently lawless place where there are no cops or any legal authorities to maintain order.
* There Are No PolicePeople commit crimes, but the police never show up.
* there are no specific descriptions of what the threat was.) Ultimately the Enterprise crew and a Romulan musician (as super-dolphins, the Probe-builders' language is musical in nature) team up to copy the telekinetic "Voice" via tractor beams and communicate with the Probe.
* there are no targets at all - the only spaceships in the game are players, pirates, faction navies and the police. This is generally an acceptable break from reality, since attempting to simulate and display even a small part of the civilian economy would make the game unplayable.
* There Are No TentsVideo game characters who are outside need to stay at hotels; they can't just camp.
* There Are No TentsYou can only rest the night at an inn; you can't just set up camp somewhere.
* There Are No Therapists: A problem the characters may encounter in settings that provide a lot of psychiatric trauma.
* There Are No Therapists: Characters suffering from mental issues are unable to find any professional help.
* There Are No Therapists emerged in the 1960s, and was when it had the most steam).
* There Are No TherapistsSomeone's problem could be solved if they just saw a psychologist/therapist/etc, but they don't.
* There are no true fighters or bombers, only assault shuttles, planetary bombers, and unmanned
* There are no wars anymore. War is illegal unless it's in self-defense or authorized by the United Nations. We do have some 'armed conflicts' though.
* There are now at least two relatively faithful fan translations of the
* There are now billboards that have a special speaker in them so that it'll only project sound to a certain spot on the street. This means you can quite happily be

walking along until you reach that spot and suddenly it sounds like somebody whispered in your ear something like "Drink Coke" when nobody is near you.
* There are now rules for ten explicitly "we'll work for anybody" mercenary companies. You can incorporate one of them into your army, giving you access to units that normally would not ally with your faction.
* There are now sites dedicated to automatically archiving whole boards. Anything that gets posted to the majority of Popular boards is now forever archived.
* there aren't any outright evil characters) confirms that this is intentional:
* there aren't enough certified suit users. It's textbook protectionism.
* There are numerous ballads in Balkan and South Asian folklore about entombing living people (usually the wives of the builders) in walls, bridges, or resevoirs to ensure that they do not fall down.
* There are numerous companies which produce their own version of the Rubik's Cube and more often than not improve upon the mechanism used by Rubik's themselves. These "knockoffs" often turn faster and more smoothly than Rubik's brand cubes and sometimes include magnets for additional stability. It's gotten to the point that, among the speedcubing community, Rubik's brand cubes are considered to be among the
* There are numerous examples of Estonian words which may sound funny or rude in Russian. It becomes even more hilarious due to 30% of the present-day Estonian population being Russians, and Estonians themselves tend to know at least some Russian words. Kindergarten "Mudila" ("Asshole" in Russian), for instance. A bit of an outdated example (since it no longer exists) is the Estonian University of Experimental Biology located at ebi.ee and its e-mail ebi@ebi.ee. "Ebi" in Russian is the imperative form of "to fuck" and the "@" [at] is pronounced as [собака] ([dog]). The .ee domain is spelled similarly to the Russian word for "her," which gives us an undying "fuck [her], dog, fuck her!"
* There are numerous fanfics focused on Tony Stark's relationship with his AI, JARVIS—sometimes it's them having high-tech, gadget-y sex, sometimes it's emotional/mental closeness that puts them on the level of soulmates (surpassing, for Tony, all human companionship), sometimes it's both.
* There are numerous hints about a such a relationship between Kozue and Tamami, which likely got blown up by Shiratori's arrival at the apartment complex. It does shed a bit more light on why Tamami dislikes Shiratori so much at first.
* There are numerous instances throughout the entire show of demonic possession, angelic possession, and shapeshifters stealing unfortunate victims' identities, to name but a few.
* There are numerous levels and types of telepathy in Negima; it is implied to be an almost universal skill in Mages, with various degrees of power. For example telepathic communication even without Pactio's is rather basic, and
* There are numerous models of what are confusingly (for laypersons) called "anti-radiation missiles" - in fact, what they are is passive-homing weapons designed to locate and follow radar and radio transmissions to their source. Early models had to be pre-chosen according to the frequencies of the enemy radars expected to be encountered and frequently lost their way if the radar shut down. The newer ones have 'memory' of where the target was and broadband seekers that can be optimised in flight, plus numerous other tricks.
* There are numerous non-fatal explosions during Roy and Simon's cartoon battles in
* There are numerous other examples of "Group X hate this/him/her," advertising things like tooth whitening, weight loss or foreign language lessons. Similar to the questionable beauty secrets, these are frequently discovered by a mom or someone similar, suggesting that the big companies know about easy ways to do 'whatever,' were hiding it and are somehow powerless to stop a regular person from blowing their cover.
* There are numerous photos from the Eastern Front showing German troops with Russian Tokarev and Simonov semi-automatic rifles in 1941-43, in addition to the PPSh-41 submachine guns. During the opening phases of Operation Barbarossa, they captured so much Soviet materiel that it just made sense to use the weapons and

ammunition. In addition,
* There are numerous recorded instances from World War II in the Pacific of a ship being hit on the bridge and the senior surviving bridge officer assuming command. This often happened even when they were not the senior surviving officer aboard the ship, because those officers not on the bridge but more senior might be needed at their normal posts to keep the ship moving and floating. Perhaps the most extreme example was that a warrant officer (not even an ensign) effectively commanded the Japanese heavy cruiser
* There are numerous scenes where Isabella switches to her usual pink dress when she is supposed to be in her Fireside Girls uniform.
* There are numerous single, independent antagonists that function more like
* There are numerous superheroes who have unmasked themselves to a boyfriend or girlfriend and then immediately made out. Sometimes they do this several times with different people. Heroes on this list include:
* There are numerous tales/jokes where a ruler inspects the prison, and everyone insists he is innocent. Finally, the last prisoner admits he is indeed a criminal... to which the ruler says "
* There are occasional charity auctions at UK comic conventions to get characters or Mega-City One Blocks in
* There are occasional references to upstanding men as this trope in the
* There are occasional subversions: Whitaker, Khan, Kananga, Drax, Kristatos, and Le Chiffre were all the "main brains" in their operations as well as the leaders while Stromberg has both of his killed early in the film to cover his tracks.
* There are occasional syndication cut-induced plot holes, such as Marge having a hole in her hair for one scene during "Sideshow Bob's Last Gleaming," attributed to part of a megaphone blasting through her hair.
* There are of course exceptions to this. Most army ant species will strike out to forage both day and night, with only a few species being completely nocturnal. They have no qualms about venturing out in broad daylight to chop up any other insect or small animal alive to cart back in pieces to their nests.
* There are often multiple ways that answers can be typed in when prompted. For example, to progress
* There are often single characters who are well-liked, such as Carter from
* There are old legends that vampires and other supernatural creatures must be buried at a crossroads.
* There are only a few hundred Giants left, despite them having once inhabited most of Westeros and Essos where they built towns and castles, and their domesticated animals like mammoths (which they use for riding) and unicorns (which survive only on the island of Skagos) are similarly rare. The small population of Giants that does survive just barely subsists north of the Wall, having been killed off by men of all types, most notably the Jogos Nhai and the First Men of the North. By the time the series begins, the last reports of giants in Westeros are more than a century old.
* There are only a handful of base bodies which were recolored and given slightly different features such as a different weapon and a different face. It is done well enough that until a conversation that shows a number of them back to back happens you may not even realize that this is the case.
* There are only a handful of playable characters in this series who
* There are only so many times of the year you could release a film titled
* There are only three Bennett sisters now, Jane, Lizzie and Lydia. Mary was later included as their cousin and Kitty becomes Lydia's cat.
* There are only two instances of children actually dying from eating candy that was tampered with; in both cases,
* There are only two known images of the Black Cap being actually worn while a death sentence is being pronounced.
* There are only two living species of mammal that use bipedal walking as their primary form of locomotion: Humans and Ground Pangolins. Other species of Primate and Pangolin are capable of bipedal walking (as are almost all birds, which are descended from bipedal winged dinosaurs). Ground Pangolins have a tail which they

use for balance while walking. Humans don't have a tail and must walk upright to maintain balance.
* There are only two real "ranks": Grots and Bosses. A Grot is anything
* There are oodles and oodles and oodles of these in the video game adaptation of
* There are oodles of urban legends about a house of horrors exhibit which pays you back part of the admission price for every floor of the building's unimaginable contents you clear. The typical version of the legend has it that no one so far has ever fully managed the task, though some people have been found dead of fright on the fifth and final floor.
* There are orchid species which draw pollinating insects by having parts of the flower shaped like that insect's females.
* There are other beings of comparable power level, of course. The most notable example would be the Solar Exalted, created as the leaders in the war against the Primordials; they can easily surpass a minor god. Oh, and they're the standard PCs.
* There are other cases, especially on PCs, where using high-end hardware to run games will make the game's framerate higher than intended, especially if specific functions are tied to framerate. One of the biggest examples is the knife attack in
* There are other complete immortals in the SCP holding cells, including the
* There are other differences in the manga's ending, too, like the party taken to the final battle. In the game, because of the limit on the number of party members, you had to take either
* There are other examples, but as with Miyet, most of the ones actually named only loosely fit the archetype if at all. These include Tabatha Ericka Bolton (a classic catgirl who was only mentioned in passing), Tabby (with
* There are other feminine characters such as Temperance from seasons one and three and Yintian (a child who accompanies the Indian Hunter God in season two) who have occasionally used male pronouns (with Temperance once using female pronouns in season one) in the original series though they can also be categorized in the
* There are other girls in this series who also want to become sportswomen, specially either horse riders or tennis players. With a good reason: the school offers a beautiful prize named the
* There are other hints of the slightly crappy nature coming through as well, in the form of
* There are other human civilisations that are more advanced than Earth, such as the Aschen, but the only human civilizations to consistently advance besides the Tau'ri are the Tollan and the Genii, the latter in the
* There are other Keronian platoons, like the Garuru platoon, as well as individual Keronians, like the invader salesman Urere, who are often in their own missions for the army and invasions in other planets, only sometimes crossing path with the Keroro platoon when they visit Earth for one reason or another.
* There are other Knights that more directly fit into this category. One is Sir Agravain, who was said to have a one-sided rivalry with his younger brother, at times trying to get him killed, and a vicious jealousy of Sir Lancelot.
* There are other lesser weapons in the Soul Series who are quite evil; Taki's Mekkimaru and Yoshimitsu's self-named sword are both evil swords with inmense evil power and destructive abilities. In Mekkimaru's case, it has even driven Taki's master insane by the time of the first Soul Calibur.
* There are other magical beings in the books, collectively called Wights. These fall into the Seelie (benevolent to mankind) and Unseelie (malevolent to mankind) categories, but the Faeran have no such distinction.
* There are other plot elements that were introduced early in the series that ended up never being expanded on. A method of tracking people using things called Spirit Ribbons is also never seen again after the initial arc, with all of the characters tracking each other using only their spiritual power. In fact, the afterlife aspect of the series is often inconsequential, with various aspects of it (the reincarnation cycle, who hollows were before they changed into hollows, the possibility of Shinigami having once been humans themselves, and Hell) remaining unexplored in favor of battles between the various spiritual factions.
* There are other scenarios playing out in other countries around the world that

are meant to follow the tropes specific to the horror stories of those cultures. Only one of these scenarios is needed to succeed,
* There are other siblings who aren't hostile to each other in the lore, but that doesn't stop them from being pitted against one another in League matches. This can include Garen vs. Lux, Katarina vs. Cassiopea, and Darius vs. Draven.
* There are other species mentioned as having this habit, like Small Bone Eaters and Large Bone Eaters. (Note that those names refer to the size of the
* There are others who have power problems, although mostly minor or often background mentions, the
* There are others who may associate the Daltons as Dinky, Pinky, Stinky, etc. from
* There are other takes on the story: In one, Bendis was in an interview, where the interviewer apparently unofficially asked if Ronin was
* There are other things wrong. Places are missing, as is one of Azeroth's moons (despite models of it appearing in Northrend Dungeons), Teldrassil looks like a humongous stump with a forest growing from its remains rather then the thriving tree it is in lore... The list goes on.
* There are other times where they go in expressly the opposite direction and make it clear that everyone knows about the Power Rangers and that, yes, all these Power Ranger series have existed in the same universe with the exception of RPM and possibly SPD which are in the future anyway, which is what makes it even more jarring when the series tries to pretend no one knows what a Power Ranger is.
* There are other ways of encoding numbers into binary that can precisely handle fractions, and even irrational numbers, but calculations with these methods are much slower than calculations using floating point approximations.
* There are over 20 cities and towns called Newtown in the UK, over 16 in Ireland, and about 50 towns and boroughs called Neustadt in Germany. Other places with names of the same meaning include Novgorod in Russia and Naples in Italy, which makes this almost
* There are over a dozen places they can spawn, and the only indicator that a new one had appeared is a sound that doesn't necessarily come from their direction.
* There are parallels of Cersei Lannister and Alicent Hightower. They are both the highborn daughter from the richest House in their region, whose father become Hand of the King. They marry the king and want to secure the succession of their eldest son to the Iron Throne, which end up causing a catastrophic civil war. Alicent outlived all of her children; Cersei was prophesied to receive the same fate (she's already outlived Joffrey). Alicent ultimately lost the war and died a broken woman; Cersei is arrested by the Faith Militant and publicly humiliated, though her downfall is not yet set.
* There are people in the 2000s and 2010s who still wear glasses with large, round plastic frames like Dr. Chandra's.
* There are people out in the world who have gotten so experienced with fixing cars that they can diagnose mechanical issues based on the make/model, brief description of the symptoms, and a short video with sound.
* There are people out there who still think Eddard Stark is alive... Somehow... Without his head... Well, the theory is that it was an imposter who lost his head (which is not completely an
* There are people recorded to be capable of turning their heads 180 degrees, like this example
* There are people stupid enough to hire Chaos forces, Dark Eldar or orks as plausibly-deniable mercenaries, and are still surprised when they find themselves betrayed by the biggest
* There are people who actually play this straighter to the comic version, with seeming superhuman abilities stemming from a genetic mutation, or are believed to. Certain people's bodies are naturally resistant to electricity to the point grabbing a live wire does nothing to them, and they can even redirect it.
* There are people who create trope terms, and then come to regret it.
* There are people who don't like wines like Cabernet Sauvignon, Merlot, or Chardonnay because those wines are so popular. They argue that this is, unusually,

a
* There are people who give too much information in their tweets. Made fun of in
* There are people who have actually tried some of these weird combinations in real life and liked them.
* There are periodic science-community scares that the human Y chromosome - already a tiny, shriveled thing relative to the mighty female X - decays slightly with each generation, and will eventually
* There are persistent rumors that Rowling said "In a fight between a wizard and a muggle with a shotgun,
* there are Phoenix Lords. They are heroes who founded the Aspect Shrines 10 thousand years ago and they keep fighting by keeping their consciousness in their armor and by possessing the body of their successors.
* There are pieces of literature that are standard reading for all IB students, including:
* There are pits with a single stalactite poking out only Xiao can cross, big buttons only Goro's hammer is strong enough to push down, magic crystals for Ruby to activate by magic, smoke barriers Ungaga can blow away, and deep gaps Osmond can fly over.
* There are plans by the U.S Department of Energy to leave one of these in nuclear waste storage facilities for future civilizations to uncover. The way they outline what message they want to convey
* There are plenty of animals that pretend to have these through protective coloration to drive off predators.
* There are plenty of British examples as well. Ronnie Corbett played a middle-aged man still living at home with his under-the-thumb father and overbearing mother in the sitcom
* There are plenty of Canadian television dramas that have aired in the U.S., but the first one that was actually is considered a hit in America is ironically
* There are plenty of Christian saints who bear the names of Pagan gods or godesses. A biblical example is
* There are plenty of examples made by McFarlane Toys, but few stuff have looked as gruesome as the Clive Barker's Tortured Souls.
* There are plenty of examples of WWE Superstars who fit this trope: the Full-Blooded Italians, Enzio Amore and Big Cass, the Dudley Boyz, pretty much the entire ECW contingent (Philadelphia rather than New York, but still pretty close). Even quite a few wrestlers who are non-New York will be baptized thus, often to establish a
* There are plenty of fetch quests for machine parts, an animal skins, etc. In almost every instance, if you've already have it in your inventory, Aloy will just give it to them.
* There are plenty of jokes about the weather in one's home region (or sometimes another place that the speaker doesn't like) falling into a set of less-than-pleasant esoteric seasons. Seasons like Rain, Fucking Hot, and Road Construction. All any of this actually proves however, is that humans universally like complaining about the weather.
* There are plenty of kings known as "the Fat", "the Bald", and "the Lame".
* There are plenty of less-than-important stories that get wall-to-wall coverage as well. In fact, less-than-important stories seem to get more wall-to-wall coverage than important ones.
* There are plenty of other magical things going on too which don't fall into these categories (the magical communion of the Bazhir tribes, the magical abilities of dragons etc).
* There are plenty of other moments where an offscreen audience booed at him. Particularly terrible jokes in NC,
* There are plenty of other pilots, but those illustrate the styles best. Another EU book,
* There are plenty of stories of people who survived things that should kill them. For example,
* There are plenty of typos in the books, but some of the fan favorites are

ShadowClan being called "ShadowClam" in earlier editions of
* There are plenty of (usually comedic) fantasy novels whose protagonists reminisce about having a morningstar instead of a rattle.
* There are plenty, some of them described quite impressively. From the death star to tanks to whatever the godmodder feels like blowing up.
* There are plot-important revelations about Raoh and Taki's family in season 2 that contradict revelations about their past — with physical evidence — in season 1.
* There are posters in Christian bookstores listing the many titles of the Christian God.
* There are probably few people who haven't experienced the pain of biting their own tongue by accident. Likewise for accidentally burning their own tongue on something that was just a little too hot.
* There are quite a couple of episodes, especially in later seasons, where the
* There are quite a few agencies that aim at seducing one's husband, in order to prove that he's unfaithful. Or capable of being so. What's funny about that actually using this trope in real life implies that half of the relationship has no trust in the other. Which means its already in trouble regardless of the result. Which only proves true the quote, "Marriages don't fall apart because of infidelity. Infidelity is just a symptom of a larger problem."
* There are quite a few black characters on the show, but somehow none of them come even as close to being core cast as the women:
* There are quite a few cases of people who have committed crimes solely to end up somewhere where there is a roof, beds and regular food.
* There are quite a few female gadgeteers, devisers and general scientists in the
* There are quite a few footballers around the world with names that sound rude or funny to English-speaking ears. Examples include Florian Dick, Alphonse Areola, Banana Yaya, Joey Suk, Gladwin Shitolo, Matthias Cuntz, Burackan Kunt, Danny Shittu, and the infamous Argelico Fucks.
* There are quite a few instruments and objects used as instruments which may or may not have practical advantages, but are undeniably Cool, such as:
* There are quite a few people with high metabolisms that wish they could actually pack on the pounds. This is despite them being able to eat as much as they want without gaining any weight, and svelte people being generally considered quite attractive (to the point where there's many a model who's little more than skin and bones).
* There are quite a few pitchers who can't throw above 85-86 mph (91-93 is considered normal) but have the ability to get hitters out consistently due either to perfect pitch placement or outstanding movement on their pitches. The so-called 'crafty lefties' like Jamie Moyer and Mark Buehrle are a good example of this.
* There are quite a few stories of small children getting the misconception Earth is like this — and of some grown-ups mimicking this, completely disregarding the fact that Earth would be a Dyson Sphere if the
* There are quite a few times when Cartman is exposed to his mother's
* There are quite a few websites dedicated to bad movies; here are a just a select few:
* There are quite a lot of witnesses who are guilty who subvert the trope.
* There are rare cases where, instead of saying she just made it up, Shine gives an explanation that basically means "it never made sense in context before".
* There are rarely moments in which Answer's on-screen and not talking, due to him continuously taking business calls during his fights. His reactions to May's Instant Kill in particular have him talking a mile a minute as he tries to wrap up his current phone call as quickly as possible before he
* there are real-life ways to embalm a body to give it a lifelike appearance. This usually involves replacing the blood of a cadaver with glycerine, thus preserving the cells and organs. There are no records of any madmen using this particular method to kill people and create statues of them, however.
* There are recordings of old Chinese stand-up where the guy reels off insanely long lists with barely a pause for breath. Like a list of (nearly) every martial

arts style in China, military gear (
* There are records of cases where a family's tradition seems to be being badass which can be easily found in places like US Marine Enlistment Roster. Some have been in the Marines since it was founded.
* There are references to "somnus", a highly addictive herb. The introductory cutscene for players starting in Ul'dah has a merchant stopped and inspected for the drug before being blindsided by the local beast tribe, while one of the job quests for Gunbreakers deals with a parent so addicted to somnus that they are willing to sell off their children for a dose.
* There are referents to this feat in both Norse and Irish mythology, the trick being attributed to both Finn McCool and to King Olaf of Norway, when in a dispute with the King of Sweden over ownership of an island, they diced for it. The Swedish king rolled two sixes, knowing this was unlikely to be beaten. Olaf rolled two dice, one coming down as a six, and the second induced to come down as a winning seven due to the intervention of his sword-blade slicing the dice in half. This was referenced by Terry Pratchett in the
* There are regular jokes about Mulder's porn stash (which in one episode was implied to take up his entire bedroom, in addition to what he kept stashed around the office). Unusually for the trope, he made no real attempt to keep it a secret from Scully, and she didn't seem to care, aside from occasionally teasing him a little.
* There are regular pirates as well, though they generally just let you come to them (with some prodding from/of an accomplice).
* There are relationships between Nopons and other races. The Nopon Sage has an age of
* There are repeated references to how incredibly beautiful both Rin and Saber are.
* There are reported incidents of male beetles trying to mate with discarded beer bottles. Researchers investigating these incidents claim that the bottles reflect light similarly to a female beetle's carapace.
* There are reports of a journalist working at the British newspaper
* There are reports that there are two versions of the Croatian dub - the first version (often mistaken to be the Serbian dub) only dubs parts of Worthless while the second version dubs all the songs. Otherwise both versions are the same.
* There are rumors that the Orbital, a pre-war space station, has some kind of weapon system installed. Naturally some people are worried that
* There are said to be many different variations of Giants in Tamriel, though some are believed to be extinct. Typical Giants are 11-12 feet tall, but there are reports of Giants who are
* There are scenes that hint at Caleb possibly being the real AI, and Ava being used to test his humanity. Lampshaded when Caleb, himself, starts to wonder if he's real, after the reveal that Kyoko is an AI. He checks to see if his own skin is fake and even cuts himself.
* There are secret tunnels beneath the Canadian city of Moose Jaw, used to house Chinese immigrants working in the city laundries, as well as rumrunning during prohibition. Though many of said tunnels were actually mundane things like coal storage bins.
* There are self-help bike repair shops in Germany (and possibly other places in Europe) where you have to repair your bike by yourself and only pay for the materials used. They are run by volunteers who help you if you're stuck, and many of these volunteers are girls who do this in their free time.
* There are separate procedures for dealing with psychopaths than for other offenders, no matter the crime. In a hostage negotiation, for example, it is imperative to figure out
* There are seven symbols needed to enter the Rock of Eternity and it must be repeated seven times.
* There are several accounts on how Emperor Frederick Barbarossa drowned during the Third Crusade. The most undignified one being that he was suffering from the heat and decided to go cool off in the river... while wearing his armor. Nowadays

many types of body armor contain a rip cord that, when pulled, will cause the armor to break apart and become easier to remove. That way you won't be dragged down to your death in the water by the very armor that's supposed to protect you.
* There are several anecdotal accounts of Polish and Czech pilots in the Royal Air Force "accidentally" flying too close to the canopies of the parachutes of German aircrew who had bailed out of shot-down aircraft and causing them to collapse. Fortunately for the large number of British servicemen in German POW camps at the time, the RAF apparently succeeded in putting a stop to this before it became widespread enough to provoke retaliation.
* There are several animals that exist where the females are dominant over the males, such as hyenas and spiders.
* There are several arenas like this, although participation is voluntary. (Most of the time; some storylines have villains that leave the player little choice.) Most questlines involving them consist of the player fighting
* There are several bits you can always count on being in every single
* There are several breeds of domestic cat with rather loud or grating voices.
* There are several cards that will replace your hero with a whole new hero that has low Hit Points but can dish out massive damage just as quick. Killing Majordomo Executus will replace your hero with Ragnaros the Firelord, capable of dealing 8 damage to a random enemy for his hero spell... but only has 8 HP. Playing the Jaraxxus card replaces your hero with the aforementioned
* There are several cases in hip-hop, often after the artist's passing:
* There are several characters who have white hair when summoned as Servants, but did not in their human lives. Archer in
* There are several China/Japan works (mostly in the Japanese fandom) where Japan is the "wife" being husbanded. This is of course an extension of China being portrayed as the big brother who raised the other Asian countries. However, when China is shipped with other Asian nations, he is rarely shipped with them being portrayed as children. It looks like that's a special "privilege" reserved for Japan.
* There are several cities named Denver. When you hear 'Denver', typically, you think
* There are several competing doctrines of salvation in Christianity, and while most of them state that some will be eternally damned or destroyed, the doctrine of universal reconciliation states that Christ will succeed in saving everyone who has ever lived, based on verses from
* There are several different lesbian pride flags, but most of them heavily feature pink, frequently in multiple shades which represent femininity, among other things.
* There are several diseases that are spread not though any physical vector but are instead spread though information, which are known as memetic hazards. One example of this is a key. If you learn anything about what the key looks like you are infected one of three things will happen. You will kill yourself at the first opportunity and anybody who sees you die is infected, or you will go on a murderous rampage and anybody who sees your victims die is infected and after killing enough victims you will disappear and infect anybody who hears what you say right before or you will become strangely happy and will be driven to infect other people by sharing information about the key even if you weren't directly infected by the key and after infecting enough people you will disappear and temporarily leave behind an area that causes anybody who enters it to be infected.
* There are several entire websites devoted to selling products of this nature.
* There are several episodes (especially in the first season) where Lois does scream.
* There are several episodes where one of the main characters is absent without explanation. A particular example is when Scaredy Bat is mysteriously absent in the episode where Boo-Boo needs to scare someone to become a full-fledged ghost, because of course if he was there the story would be over in a few minutes.
* There are several examples of bypassing danger by taking a stealthy route to the target, particularly in Castle Clinton, where the player can use the keypad near

the vending machine, go through the vents, and then find the Ambrosia while only encountering one or two guards. Likewise, you can sneak through the maintenance tunnels in the Battery Park subway station past the terrorists (and rescuing the hostages if you so choose), bypassing the situation and the objective (and getting chewed out by your brother when you arrive in Hell's Kitchen).
* There are several examples of parents hiring "deprogrammers" to kidnap their children from cults and religious sects with the intent to un-
* There are several examples of people getting killed or injured by putting strange things up their bums, often for erotic purposes.
* There are several examples of this at LOTR spoofs.net, an excellent example being the bottom left image on
* There are several examples throughout Tamriel's history of Men and Mer fighting each other: the
* There are several famous blind sculptors. That actually makes sense if you think about it because although they can't see their artwork, they can still use their sense of touch to feel it. However, blind Italian sculptor Felice Tagliaferri deserves special mention for his re-creation of a famous 16th-century statue that he wasn't allowed to touch.
* There are several fans who would have preferred to see the original plans for episode's VII, VIII and IX by
* There are several fan-written sequels to the "Claire Kent: Super-Sister"
* There are several fiction species that are almost unheard of outside of the furry fandom as they are original creations of furry fans.
* There are several "future drugs" that protagonist Spider Jerusalem ingests, injects, and generally crams into every orifice. As noted in the Quotes section, among these is Mechanics, a nanotech drug that slowly turns your body into a cyborg system that turns addiction into a protocol.
* There are several gags revolving around Hollywood, an openly gay character in both
* There are several game modes. Most of them are about not touching the ground outside the ring or with body parts which aren't feet/hands. One of them replaces your hands with long, thin sticks that instantly cut off every part they touch — essentially, swords. Due to arms being connected to pectoral muscles that are
* There are several good HP ones of Snape having to teach Sex Ed to Hogwarts students.
* There are several Greek folk tales from the Byzantine and Ottoman period about grand constructions such as bridges that needed a
* There are several groups of animals who show telltale signs of sapience and culture as we understand it, but not to the degree of complexity we humans exhibit. Those include the rest of the great apes, dolphins, elephants, and, surprisingly enough, parrots, crows and ravens, and octopi.
* There are several hard-to-license tables that are impossible to port to home computers. Not only are the rights for the table itself needed, but music in the game, any movie license and actor likenesses can be involved too. But at least any patents are either expired or included.
* There are several high-risk sports where a player has injured another player, which leads to the injured player's death after the game or match. Boxing is notorious for this, as is any combat sport that allows full contact with no padding. Often, the player that caused the injuries which lead to a person dying will feel terrible afterward, sometimes dropping out of the sport altogether.
* There are several inexpensive portable consoles for sale at reputable retailers, like the VG Pocket and the Dreamgear MyArcade. Most of these are relatively decent quality in terms of materials and construction, but are loaded with dozens or even hundreds of forgettable, unlicensed copycat versions of classic arcade and 8-bit games. The MyArcade mini-cabinet actually has a decent handful of legit early-era NES games like
* There are several infamous jokes that are extremely lengthy stories that wind up leading up to a very misleading punchline. The Pink Gorilla joke is probably the

most infamous.
* There are several Jotuns who are part of the Norse Pantheon and live in the Asgard, most notably Loki who is probably the most famous thanks to pop culture, but other examples include Gerd, goddess of sex and wife of Freyr. Freyr and Freya may count as well as they were Vanir, not Aesir (both lineages of gods were at war for a time, after they make peace two of each kind went to live with the other faction as peace hostages). However whilst Aesirs and Vanirs were frienemies, Aesir-Vanirs and Jotuns were outright opponents.
* There are several line dance songs that faded away after coming out but are still popular among African-Americans, for example, "The Cupid Shuffle" and "Wobble".
* There are several Lunar spells that do this. Heal Other and Heal Group allow the caster to pay their own life points to restore an equal amount to allies. The Tendril abilities also do this.
* There are several major trade routes going from one end of the Galaxy to another; smaller but slower routes branching off them to individual systems; and little-known routes that are faster than average but have the danger of coming too close to stars or black holes to compensate. When no known routes to a location exist, travel is done by a series of mini-jumps with stops after each jump to check for potential hazards and plot accordingly. Over time, routes can become unusable due to the natural movement of celestial bodies through space.
* There are several mansions in southern California that have appeared in a dozen or more adult films each.
* There are several missions in the original, including Feros, one of the main story missions, that give you more paragon points depending on how many civilians are alive at the end of the mission.
* There are several missions where the leaders of Duelhorn, Marquis and Alyss, join you a few times as a guest unit. When you face against them, they are quite powerful and dangerous. When they join your side for a while, they simply don't use their powers and opt to just stick to melee attacks or use abilities that are useless. However, when you fight against them afterwards, they go back to being powerful.
* There are several moves that are used by analyzing the opponent. Detect requires the user to avoid the opponent completely by knowing what move they'll use next. Role Play allows you to copy the foe's ability just by pretending to be them. Mind Reader is said to do
* There are several of common ones revolving around statues of coming to life in some fashion
* There are several other games which allow the players to retroactively decide minor aspects of the current scene, such as
* There are several other lesser examples, but not by much. To give you an insight to just how ridiculously powerful the examples here are, the prequel novel manages to answer what would happen if two nigh-omnipotent beings ever clashed: Endless conflict where the damage of one is ret-conned by the other
* There are several other SCP that are also implied to be God as well, although 343 is the most well-known one.
* There are several parodies of popular Finnish Christmas songs (especially the ones who children have to sing a bit more than they would like), that are quite bloody and violent. One parody goes more or less like this:
* There are several phone apps that allow for video communications regardless of platform or provider, such as Skype for Android/iPhone or Snapchat.
* There are several possible explanations, but very little info to support any of them. On another note, the novel might be also a
* There are several powerful pirates who fit in this category, most notably Silvers Rayleigh, the Number Two of Gold Roger himself.
* There are several power plants that provide energy to the Mojave area that use ambient energy sources, such as the hydroelectric Hoover Dam and the solar Helios One. They're considered an invaluable strategic resource and are hotly contested by various organizations in the setting. This still doesn't explain how various long-

abandoned buildings have power, though.
* There are several pre-UNSC conflicts that take place over 400 years before the games, between the United Nations, the
* There are several programming languages designed to be as obtuse as possible - Examples include
* There are several proposed designs which use a magnetic launch system to achieve the necessary launch velocity. Naturally none have been built due to cost; it could also be argued that any craft launched by such a system would not be a true space-plane, since it wouldn't be taking off under its own power.
* There are several real-life disorders that can cause facial disfigurements with varying levels of severity, such as craniodiaphyseal dysplasia (which causes excess calcium to build up in the skull), acromegaly (the result of excess growth hormones built up after the epiphyseal plate has closed), and Graves' ophthalmopathy (caused by autoantibodies binding on the skin, thyroid, and eye tissues).
* There are several recent ASFR variants on this story, whose protagonists are forced to experience pleasure rather than pain while paralyzed.
* There are several references to people urinating or worse into food.
* There are several reports of people, after experiencing abnormal phenomena, claiming that the men in black sought them out.
* There are several Romulans at North Station on Vashti who are equipped with a sword.
* There are several rules that the Flawed are forced to comply with, lest they be subject to disciplinary action and even worse restrictions. They are, specifically: "Never hide your brands, unless on the foot or tongue", "Always wear your red armband in public", "Be home by 11:00", "Don't stand next to two other Flawed, and don't gather without at least one non-Flawed present", and "Don't have kids with another Flawed person". Celestine struggles with most of these rules, and several of them are, or are almost, broken —
* There are several signs of the advanced Echidna civilization on Angel Island in the
* There are several similar legends all over the place, for instance also about the building of the chapel palatine (now cathedral) of Aachen. Here they chased a she-wolf inside when it was finished.
* There are several "singing bridges" which make a singing noise when driven over.
* There are several species of fish and at least one cuttlefish species among which smaller males mimic the color-patterns and body language of females. This is done to deflect large males' aggression as the small males sneakily insinuate their way into the large males' harems of females. Should the large male catch on while attempting to court such a poseur, this trope (and a nasty fight or pursuit) ensues.
* There are several species that fit into this, including the Icthyids, Merfolk, Tritons, Amber Clan Tritons, Kappa, and others. The Icthyids and Amber Clan Tritons are the most notable, the first because they live on shorelines and under the sea, making useful troops for water entry; and the second because they are terrifying beings armored in Amber that can and will massacre armies bigger than them.
* There are several stores that sell 7-11's 100 fluid oz insulated mugs and offer a free fill on first purchase and cheaper refills.
* There are several stories and fables where a small, non-threatening animal (such as a mouse) invokes this with a much larger and more threatening animal in order to keep the larger animal from eating it. The smaller animal will claim that he's actually a
* There are several strips where Bob the Dinosaur gives people different wedgies, usually under the request of Dogbert.
* There are several surveillance cameras within Fisk's penthouse itself, since he's technically under house arrest. Ostensibly, they're so the FBI agents can monitor him. But since a good number of the agents assigned to the detail are actually on Fisk's payroll, Fisk has the means to control when the cameras are recording or not.
* There are several times where this happens in the course of the show. One

episode had Jack's uncle visiting. His uncle had always wanted Jack to become a doctor and when he was very sick, Jack told him he was a doctor, as he believed his uncle was dying and this would allow him to be happy in his last days - only he got better. With help from Terri, Jack tries to pretend he really is one.
* There are several towns throughout the U.S. whose names run along the lines of "[State Name] City", and then, of course, the state name is read. The most famous of these is New York City, New York. There's also Iowa City, Iowa, Oklahoma City, Oklahoma, Texas City, Texas, and Oregon City, Oregon, among others. Reading the state name afterwards in the manner of this trope can seem
* There are several tribes particularly in South America and Africa that are plagued by this, having been stuck in perpetual warfare for generations because each death must be avenged with death.
* There are several twisted "relatives" of the vampire community who particularly embody this trope. The Formosae only feed upon the fat and/or ugly; this is because they actually make their victims thinner and more beautiful (if they survive the feeding), and so they can get people to willingly feed themselves to them. Mnemovores eat
* There are several variants of this, "Patrick Street" being the best-known. In the New Zealand version, a miner realizes the hooker was a
* There are shades of it with the Chosen Undead and Reah. Though she is initially dismissive of you, you can save her from danger multiple times, and she grows very attached to you.
* There are shades of this in the beginning of the third of the Sam Raimi
* There are signs that Atwood has mellowed; she even participated in an online article for
* There are similar devices that work off of gravity, differences in air pressure, and other forces that allow the machine to run "perpetually", without any apparent input.
* There are similarities between the beginning of Barack Obama's and Donald Trump's presidencies:
* There are sisters Elizabeth and Anne Elliot and their potential marriages to their distant cousin William Elliot who is their father's heir. Elizabeth would love to marry him very badly, but he does not see her as wife material, but she continues to see his politeness and friendly air as courtship. He would like to marry her sister Anne who is interested in him at first and for a brief moment likes the idea of becoming the next Lady Elliot, but does not trust him and does not love him. He ends up with neither of them
* There are six great noble families in the Adrestian empire. Duke Aegir, the Prime Minister, is Ferdinand's father. Count Bergliez, Minister of Military Affairs, is Caspar's father. Count Hevring, Minister of Domestic Affairs, is Linhardt's father. Count Varley, Minister of Religious Affairs, is Bernadetta's father. Marquis Vestra, Minister of the Imperial Household, is Hubert's father. Duke Gerth, the Minister of Foreign Affairs, is the only one who does not have a child at the academy.
* There are six ways for the universe to end: The Big Crunch, where gravity ultimately stops the universe's expansion, causing it to collapse back on itself and implode; the Big Bounce, where a new universe is created from a Big Crunch; the Big Rip, where dark energy literally tears the entire universe apart, the Big Chill, also known as the Heat Death
* There are skeleton and zombie versions of just about anything (but most notably hounds). A well-played necromancer will not reanimate
* There are small magical items called Behelits. They look like eggs with human facial features scattered around them at random. When their possessor
* There are so far two true floating islands in space: the Island, which was formerly a piece of Nigerian countryside, is the first piece of landscape to be made spaceworthy and doesn't have a dome or an atmosphere, requiring all of its buildings to be vacuum-sealed; and Grover's Corners, formerly a chunk of West Virginia farmland, the largest piece of Unreal Estate in space, and the only craft in Fenspace with a proper

* There are so many different shades of khaki - never mind that Cadettes' vests often don't match their pants - that it leads to rather a
* There are so many M3 Grease Guns and Stens captured by the People's Liberation Army in the Chinese civil war and the
* There are so many phonemes in all the human languages, you're are bound to mistake one sound for another.
* There are some actual National Socialist metal bands, some of which indulge in Viking mythology to the point of practicing racist variants of Asatru (Norse neo-Paganism), but such groups make up only a
* There are some ads for the Navy that appear to be a picture of a rainforest. Until you read the caption at the bottom listing the half-dozen men in the picture. There's another one that shows a dozen security camera captures from a desert, taken every few seconds, with bushes visible. The bushes disappear somewhere between caps 7 and 8.
* There are some amateur adult videos online that some people only watch to see their pets prance around in the background, as the
* There are some anecdotes that suggest the reason they do is that handcuffs are sometimes closed as tight as possible (which is kind of the point). On bare skin, cuffs or zip ties can chafe and cause minor abrasive irritation. When not properly placed, they can also put an unpleasant amount of pressure on the bones of the wrist. Both of these concerns can be alleviated in the short term by rubbing the affected area.
* There are some anime fans who will get very annoyed if you refer to what they are watching as "cartoons"... then again, consider
* There are some cases in which it is less distant and more immediately helpful. In
* There are some chalk outlines at the bottom of the ski slope, although they're all in rather odd positions, so these probably represent certain supers who came in a little too fast.
* There are some cultures that use laughter as a means of dealing with emotionally heavy moments, e.g. Australia and the UK, which can seem like this trope to those unfamiliar with this.
* There are some differences between how the Others act in early seasons compared to later on, which can be chalked up to the fact that the writers hadn't really decided what the Others
* There are some episodes where this is partially averted, such as when Wyatt's memories already contain information about a race car driver, who is actually a sleeper agent from the present that supplanted other racing celebrities from the original history. It could be that something about not being able to chase down all the sleeper agents right after they left the present meant that a
* There are some exceptions in the very, very rare works where the zombies are not entirely mindless and retain a bit more personality and/or self-control. One example of this (albeit one that some viewers found ridiculous) is the
* There are some exceptions though, because the Showa universe Ultras only receive their color timers if they are enlisted in the Space Garrison. Since he is a scout charter,
* There are some exceptions though, such as those who play fantasy sports, fans of "
* There are some fan fics inspired by certain episodes like, "Uncertainty Principle", "Janus List", among others.
* There are some fan jokes that goblins themselves are Made of Explodium.
* There are some ghost stories in Japan which tell of a ghostly hand that emerges from a toilet to touch people in the behind when they relieve themselves. Said ghost stories are the basis of ??? from
* There are some holographic interfaces that don't work with haptic interfaces, however—see, for example, door "locks". At one point in
* There are some individual examples, however. Tarenar Sunstrike and Gidwin Goldbraids in
* There are some "interactive books" which often come with feelies. There's one

book about the discovery of King Tutankhamun's tomb, which came with replicas of photos, letters, diaries, newspaper articles, sketches, maps and other materials from the Carter expedition. There's also a nonfiction book series called the "Ologies," which cover such subjects as Vampirology and Piratology, which come with similar feelies in them.
* There are some inventions and compounds from the ancient times that we know that existed, but we can't replicate, even with modern techonogy, either because recipe or plans were lost over time, or because the required resources are used up.
* There are some Japanese tourists taking pictures of forks and knives in
* There are some known strategies that are very good at beating beginning poker players. They don't work on experts, who know about them and what their flaws are, but techniques that good players use to get small advantages against each another generally work on the assumption that their opponent
* There are some legends through Latin America that refer to native badass princesses that fight the cruel Spanish settlers, fall in love with
* There are some movies which are frequently used as sources of stock footage, especially for documentaries and suchlike:
* There are some old jokes (often with puns) along this theme as well, such as:
* There are some on this very Wiki, of various levels of "supposed to be here"-ness. The page on
* There are some opera singers who like performing barefoot even if it doesn't necessarily fit the role or the director's concept. It may or may not be acting, but Dawn Upshaw, Sylvia McNair, Karita Mattila, and particularly Agnes Baltsa all seem to enjoy performing roles barefoot.
* There are some other instances but mostly interfixing in English occurs in very specialized circumstances. Despite that, it follows rules. For instance, it always occurs on word boundaries, rather than morpheme boundaries. We all possess very clear intuitions regarding the validity of 'im-fucking-possible' and 'impossi-fucking-able'.
* There are some other, more rarely used types, which tend to bypass restrictions: in the fifth book, Dumbledore uses his phoenix to teleport out of Hogwarts, because he can't Apparate from there.
* There are some paintings that appear to follow you with their eyes.
* There are some people who genuinely consider the death of a partner to be very different from the dissolution of marriage; most, however, consider the death of a spouse to be akin to a forced dissolution.
* There are some people who got Warcraft III just to play the custom maps and have never touched the unmodded game.
* There are some places where there cannot be dirt in the area while products are being manufactured. These are called clean rooms, and anyone who wants to go into one will have all dirt and dust blown off of them and vacuumed away so that they are perfectly clean.
* There are some public domain episodes with Carnation Milk as a sponsor. These truly get inventive in working the product into the storyline.
* There are some rather odd hairstyles, although largely confined to the supporting cast, apart from Grace's enormous
* There are some recognized Catholic saints who were married but did not have sex. They are admired because they chose to sacrifice Earthly pleasures in order to better serve God. The Catholic Church and the Orthodox churches also view Mary and Joseph as such a couple. Due to this, they're often called Josephite marriages. Other terms are spiritual or continent marriages. In a subversion, however, the Catholic definition of chastity does not exclude marital relations. A married couple is considered chaste as long as they only have sex with each other and do not use pornography or contraception. e.g., Blesseds Louis Martin and Marie Azalie "Zelie" Guerin, the parents of Saint Therese of Lisieux, at first wished to live celibately but later changed their minds and had
* There are some related to the mediums of manga and anime themselves:
* There are some religious groups (for example, Pentecostal Christians) where girls and women are discouraged, or even forbidden from, cutting their hair because

of this trope. The idea is that men and women are divinely ordained to look, dress, and behave a certain way.
* There are some seriously unsettling things going on with the moon in
* There are some spells that allow the user to move with Super Speed.
* There are some stations that actually present ads for local car dealers live as stories during weekend morning newscasts.
* There are some subtle hints sometimes though, such as Nokama Metru's smoother mask design, Hahli Mahri's sleeker mask and her angel wings, and Gali Mata's inverted legs and extra chest-piece. But that's as helpful as it can go.
* There are some 'suggestions' for what Jesus was. Most popular is that Jesus was a role of the Archangel Eli, with evidence being that some of Eli's attunements are similar to Jesus' miracles. In game canon, Eli has abandoned heaven to roam the Earth, and Eli being Jesus would suggest he's getting ready to stage the second coming.
* There are some terms, such as "tarzanesque" and "tarzanide" or "tarzanidi" (Italian version), coined by the French journalist Francis Lacassin, author of
* There are some theories that our sense of smell is actually just as good as a dog's, just differently specialized due to dietary differences. The main reason why we don't notice this are that modern humans rarely pay attention to our sense of smell and thus it's
* "There are some things money can't buy. For everything else, there's Mastercard"
* "There are some things money can't buy. For everything else, there's Mastercard." (NOTE: parodies of the "priceless" gimmick
* There are some types of markers that are capable of this. These are usually sold through infomercials and the like.
* There are some users who regularly post to airline social media pages to provide an explanation for complaints written by people who are angry at said airline. However, very often, these regular posters will get accused of working for the airline merely because they disagree with the person making the complaint.
* There are some who would have preferred to have seen the original script to
* There are some written from the point of view of abused children and read more like
* There are special statutes called "Whistleblower Laws" for Disgruntled Darias who report wrongdoing within an organization to its own internal authorities, see it not acted upon, and then take it to civil authorities (i.e. police). They are meant to protect such "whistleblowers" from retaliation. How well this actually works in practice varies widely and the bodies responsible for such laws
* There are special systems for miners which allow to them make calls from deep mines; however they consist of not only the phone itself, but also a set of "picocells", or routing relays placed all over the mine. Many cities have installed similar devices in metro systems and traffic tunnels to ensure continuous cell phone coverage during their citizens' commutes, and there have even been a few experiments with installing them in airliners.
* There are Steampunk mecha owned by Hiroshi Sato, in a series about
* There are still a number of uncontacted tribes located throughout the world that have been isolated since before written history, and thus retain much of the same practices they had many thousands of years ago. For example,
* There are still differences in color between the two: the Prospitans usually going for light blues, yellows, greens, and pinks, while Dersians use darker versions of those colors with red instead of blue and purple instead of yellow.
* There are still freestanding wooden house support beams, identifiable cars (
* There are still independent tribes. It just that they are not of real importance.
* There are still infested portions outside the stations which, depending on the random load-out of enemies, can be more or less sinister.
* There are still occasional reports of thylacines (A.K.A. Tasmanian tigers/wolves or marsupial wolves) being sighted in the wild in
* There are still people out there claiming that Adam Monroe's death in
* There are still people who purport a metaphorical "Giygas is a fetus" theory,

despite the fact that
* There are still plenty of 99 cents prices around. Rounding only occurs when paying the total bill by cash.
* There are still some things that make no sense, like Abed using 2nd edition D&D - it's what Harmon would have played, but someone Abed's age would be more familiar with 3.5 or 4e.
* There are still towns off the beaten path where the municipal market fills this role. Sure, fruits and vegetables of all kinds are to be expected, but toiletries? Used cell phones? Horse fodder?
* There are still US states that recognize a breach of promise (South Carolina and Georgia, among others; South Carolina in
* There are stories in which Calvin is on his deathbed and gives Hobbes to his grandson.
* There are stories of a ghost appearing as little old hunched back man, wearing a brown trench coat and Bogie style hat, hitching along Route 66 between El Reno and Weatherford, Oklahoma. One report states that after picking him up, he wouldn't talk to the driver, and soon the old man tried to jump out of the moving car. The driver immediately stopped to let him out, only to see the same man hitching farther up the road. Others report hitting the man, but finding no one there when they got out to check.
* There are stories of people running away to places like California (a western state of the USA), hoping to make it big in the movie industry, but wind up poor and penniless when they find out the difficulties of getting in.
* There are stories of stills blowing up in American military bases in countries like
* There are straighter examples however. In one book, Harry and Michael have just saved a nursery from a ghost, but broke the speed limit and brought a sword into the hospital to do it. Harry is told to keep quiet while Michael does the talking at the end of one chapter and in the very beginning of the next one, they are already in jail.
* There are strict addiction thresholds and rules for the effects of overdosing and addiction.
* There are studies that show doctors do not write any more or less legibly than other professionals, but the consequences for illegible writing are much more severe. A popular alternative explanation is that it's an extension of skills learned in medical school, where students must take a lot of notes very quickly. The illegible handwriting is an unfortunate side effect. In any event, illegible handwriting is one of the reasons why there's a strong push for computerized medical records, charts and prescriptions.
* There are "Super Hero/Sense of Right Alliance/Crew/League/Etc." toy lines which consist of
* There are Survivor Trees incorporated into the memorials in New York and Oklahoma City, each of which (barely) lived through those cities' respective terrorist attacks. Seedlings descended from the Oklahoma tree have been planted all over the country, and the NYC tree's offspring will likely be shared once it's healthy enough to produce them.
* There are tales of both frog princes and frog princesses throughout Europe.
* There are tales of this sort of torture from many different situations supposedly brutal in their methods. For instance, they say the
* There are technologies that are useful against them (Neural Amplifier, Trance Training, etc.) and you can even breed your own, domestic mindworms.
* There are the Eternals, for instance, who dismiss the Time Lords with "Are there Lords of such a small domain?" In the
* There are theories about the high numbers of mentally disabled children in noble families in 18th century Japan, for being caused by babies touching the lead makeup of their mothers and suffering from lead poisoning when it got from their fingers into their mouths.
* , there are the red stick figures, which stand out because of their bright color. They have more health, use more elaborate attacks, and behave more aggressively

than the standard stick figures.
* There are thermometers designed for both oral and rectal use. The obvious sanitary procedures are encouraged.
* There are these plush toys called "Mushabellies" which are fat, cuddly plush animals that chatter when you squeeze (mush) their stomachs (the bigger ones, however, make a funny fart-like sound known as grumbling when you squeeze them).
* There are things called "godseeds" that let even baseline mortals ascend the toposophic ladder to achieve powers almost unthinkable to their original selves. The results can be unpredictable and using such devices is strongly discouraged in civilised polities, because if something went wrong the user ending up a brain-burnt wreck is the least bad thing that could happen compared to the creation of a broken and insane transhuman monster...
* "There are things I need of you. Things you may not understand, and may not wish to do, but please, do not make the same mistakes I did [...] Human nature sealed my downfall. My name is Philip. If we are lucky, then by the time you receive this, I will be dead.
* There are thirteen captains and eleven of them are male. Soifon and Unohana are the only two women. Flashbacks to a century ago reveal this was in effect back then as well, with Soifon's predecessor Yoruichi being Unohana's companion woman among the captains.
* There are those fans who believe that Paris's uncanny ability to insert herself into every facet of Rory's life means she's clearly enamored with her, something that Rory is utterly oblivious to. Some believe Paris displays far more chemistry with Rory than any of her so-called "
* There are those who believe that Shakespeare intended for the play to be taken this way, and that it was deliberately written to
* There are those who believe that Shakespeare may have intended exactly this interpretation, having written the play as a veiled attack on anti-Jewish bigotry.
* There are those who have theorized that this may have been the case with
* There are thousands of different types of "mobs" (monsters) a player can encounter, but only a couple hundred different animated models. Most of the variety comes from putting differently-colored skins on the same model. For example, the grizzly bears in Elwynn Forest or Dun Morogh use the same models as the polar bears in Icecrown and the disease-raveged bears in the Western Plaguelands, and the same animations. They just use different-colored skins and, in some cases, enlarge or shrink the base model.
* There are thousands of people who watch these little guys for hours on end, even though all they do is eat, sleep, walk around, and sometimes play with each other.
* There are thousands of pictures with them in human, anime forms, in which Flippy is drawn at least
* There are three Bangors, two in Wales and one in Northern Ireland. The easterly Welsh Bangor is officially called Bangor-on-Dee to distinguish itself from the one near Caernarfon. But Scotland also has a River Dee. Mail deliveries can get confusing.
* There are three common stereotypes for dwarves; they're all good with machinery, they hoard gold and they all have major
* There are three dividers which each have a light near the top of the playfield. When you start, they are all flashing. Falling in one of the flashing ones the first time scores 5 million points, at which point only two remain. Hitting another flashing one scores 10 million, and the last one spots a city for 30 million.
* There are three dying races: The Skeksis, the Mystics, and the Gelflings. At the start of the movie there are only ten each of the Skeksis & Mystics left; and only one Gelfling.
* There are three episodes ("Mr. Monk Goes to the Asylum", "Mr. Monk and the Game Show", and "Mr. Monk Gets Stuck in Traffic") where Captain Stottlemeyer and Lieutenant Disher do not make on-screen appearances.
* There are three episodes that involve a sudden final flashback to a character uninvolved with the main centricity, usually revealing a plot twist. The first is Season 2's "Dave", where a Libby flashback shows she was in the same mental ward as

Hurley. The second is Season 6's "Ab Aeterno", where a flashback shows the Man in Black conversing with Jacob in 1867 about the former's attempt to kill the latter. And the third is Season 6's "Everybody Loves Hugo", where a Desmond flashsideways shows him intentionally hitting Locke with his car, then speeding off.
* There are three globally unique hats that goes to those who have spent the most in one of three categories each day: winning dueling minigames, buying stamps, and sending gifts. Dueling minigames can be traded and profits from stamps don't go directly to Valve, but you're still spending hundreds to afford the materials needed.
* There are three goddesses who vowed eternal celibacy in most versions:
* There are three Japanese dubs. For the film version, the original dub was made around 1984/85 and released to VHS and laserdisc, while the third dub was made for the Disney Channel in the 1990s. The second dub was made in 1991 to the featurette versions ("Bongo" and "Mickey and the Beanstalk").
* There are three known languages besides ancient Luxan that can't be translated by the microbes: Pilot, Diagnosan, and at least one dialect of Scarran. The first two are too "dense" (as in a small bit of Pilot or Diagnosan speech conveys tremendous amounts of highly-technical information). Diagnosans are forced to rely on living translators, while Pilots have a dumbed down version of their language that does translate.
* There are three main factions, the Americans, the Vikings, and the Celts. There were also minor factions remaining, like the Sioux. While life isn't great for any of them, it is likely pretty freaky being a one city state in a world where nukes are casually thrown around everywhere.
* There are three main types of Ferin with different characteristics.
* There are three notable examples that occurred prior to the start of the series: Veronica's mother died some time ago due to illness, Cheryl's puppy Sugar was murdered by her jealous brother, and Kevin states that his father died in the Gulf War. All three are alive and well in the
* There are three pre-determined (for legal reasons) non-elimination legs a season on
* There are three rules to live by in all the books: Someone offering you hospitality and food? That's poisoned. Someone offering to help you? Is going to try and kill you in your sleep. Someone desperately begging for your help? Of
* There are three SandWing dragon sisters named Blaze, Blister, and Burn, who plunged the dragon world of Pyrrhia into a twenty-year war to fight for the throne. They range from shallow and incompetent (Blaze) to ruthlessly manipulative (Blister) or vicious and sadistic (Burn), so
* There are three set rules for magic: "No time travel", "Once Exalted, you cannot Un-Exalt."
* "There are three things in this world I can't stand. Hatred, bigotry, and midgets."
* There are three things that show up every season and have since the beginning:
* There are three women in the party, but two are already indisposed with other tragedies. The mother in this case refers to Eve, the mother of humanity - and since Velvet is cursed and Mercedes slain, it falls on Gwendolyn to repeat her victory against the Lord of Snakes - Leventhan. offers an additional clue for this one: "Knock down the crown."
* there are timelines in which some of them have already died, but none of it seems to have had any significant effect on his optimism.
* There are times in which certain Pokémon are shown in CGI. In the 11th movie, there is a Mamoswine stampede that makes the Mamoswine look like they are made out of clay. In an early Diamond and Pearl episode, Combee appear in this style, looking really out of place (nevermind that Combee are cartoony insect-like Pokémon). In Black and White, Klink and its evolutions are always in CG, like the Unown swarm in the 3rd movie. Plenty of attacks in the
* There are times when Tucker shares special bonding moments with his PDA, sometimes with the former treating the latter like a lover.
* There are tons of critters with weird life cycles. Insects, for example, lay

eggs that hatch into worm-like larvae, who gorge themselves until they can spin a cocoon around themselves. That itself hatches into a mature adult. There may also be sub-stages of larval development, called
* There are tons of minor changes as well. For example, it seems like Roland's motivation for going to the Dark Tower changes every book as does the function of the Tower itself. Hell, Roland attributes the multiverse's imminent collapse on the Tower itself at the end of the fourth book. It's not until the last three that everything finally solidifies, probably due to King finally deciding what the Tower is and does.
* There are too many examples to really list of people doing a subversion of
* There are twenty technology levels in all, with Earth bordering Level 3 but said to be about five centuries away from fully reaching it. Simple tools such as hammers and the wheel are Level 1, nuclear fission and universal translators are Level 3,
* There are two ace custom Valkyries in Skull Squadron; Hikaru's has a triangular visor, two guns and a "chin" (VF-1J), and the Skull-1 has FOUR guns on the head (VF-1S). Both have custom paint jobs as well — Hikaru's is painted in red stripes, and the Skull-1 is painted with black and yellow ones, with prominent skull-and-crossbones.
* There are two Brazilian Portuguese dubs; the first was done in 1968, while the second was done for its 2014 Blu-Ray release using the same translation. Bagheera, Hathi, Kaa and Shere Khan's voice actors reprised their roles from the 2003 sequel in the redub. Also, all of the songs have been noticeably
* There are two candidates for the cross-platform killer app for both CD-ROM drives and sound cards:
* There are two cards that instantly end the turn and function as a No Sell to
* There are two characters in the Bloom who are eventually revealed to be
* There are two characters named Bob: Bob Herzhog, one of the main characters, and Bob "Waco" Forzey, who works at Hard Eight Enterprises. It's easy to miss, though, since the latter Bob usually goes by his nickname.
* There are two characters named George, though they have nothing to do with each other and have no scenes together. Would it have been that hard to rename one of the Georges?
* There are two characters that do this. Juandissimo Magnifico, Wanda's ex-boyfriend, does this along with his constant
* There are two commercials that play this trope the most bizzare way possible one happens to
* There are two competing Latin American dubs that were recorded around the same year (2000). The more prominently-known dub was produced by Sensaciones Sonicas and Warner Bros. and had toned-down language, as well as leaving the musical numbers in English. The other dub, produced for pay TV and USA Blu-Ray by Intersound SA and Paramount, dubbed the musical numbers and contained stronger language, although it has also been criticized for using too literal translations for the songs.
* There are two covenants in the game: Way of White and Sunlight Warriors, which have this vibe to them. Generally any player who uses a Faith Build with suitably
* There are two different performers named "Sean Paul". One is a hip-hop artist who is a member of a hip-hop group called "The Youngbloodz", while the other is a reggae / dancehall singer. The former called himself "Sean Paul of the Youngbloodz" for a while, but is now known today as "Sean P".
* There are two different versions of the photo collage on the back cover of the original 1967 vinyl edition of
* There are two factors that determine whether supernatural creatures can enter. Buildings have a "Threshold" - the more a dwelling is a
* There are two fights going on at one time, something you might see in a pro wrestling show, but not a
* There are two further elite versions of Shield Guards. One is Abductor, which is tougher and uses hostage as a shield, which means you have to get behind them if you don't want to lose bonus points. Second version is Charger, which doesn't shoot, but is very fast and runs at you in melee with a spiked shield.

* There are two groups of assassins called The Faceless Men and the Sorrowful Men. One of The Faceless Men is only known as The Kindly Man.
* There are two in which characters turn into heels: "The Sleepwalker" (after Pluto destroys a female dachshund's dog house, leaving her and her puppies without shelter), and "Cured Duck" (after Donald gets so frustrated from trying to open Daisy's window that he wrecks her living room).
* There are two Items of Specialness for each character class. You most likely won't find them until you reach the deepest dungeon levels, and even then you have to dive into pools and hope that you're
* "There are two kinds of metal in this yard: scrap and art. If ya gotta eat one of 'em, eat the scrap. What you currently have IN YOUR
* There are two main elf-human pairings: Beren (human) and Lúthien (half-elf, half-angel); and Tuor (human) and Idril (elf). Lúthien chose to become mortal; Tuor supposedly became immortal, and lives on as the sole human inhabitant of Valinor. These four were in turn the ancestors of Elrond and Elros, and thus of Arwen and Aragorn. Beren and Lúthien's son Dior may have had a Mayfly December Romance with his elven wife Nimloth — he was killed young, but he grew up at the rate mortals do and it isn't clear how long he was going to live, or if he would have been given a choice to be immortal.
* There are two mandatory stealth missions, one with Ayame and one with Tatsumaru. While stealth is an important aspect of the series as a whole, a skilled player can still hack and slash their way through most levels. Not these ones : if a guard spots you, he will blow a whistle and it's an instant
* There are two megawads made by Team TNT that rank among the top lists: the medieval-themed
* There are two names that are actually not examples of this trope, despite everyone thinking they are - Limit Glove (Quina's Blu Mag spell) and Valia Pira (a boss). People assume these names were supposed to be Limit Globe and Barrier Pillar respectively, which make sense - the attack looks like a globe, and the boss is a pillar that uses barriers. However, the katakana for these names deliberately uses the "vu" katakana (a special katakana used only for foreign words) - they write them as リミットグローヴ (Rimitto Gurōvu) and ヴァリア･ピラ (Varia･Pira) respectively, whereas Limit Globe would be リミットグローブ (Rimitto Gurōbu) and Barrier Pillar would be バリア･ピラー (Baria Pirā - also note the long "a" sound in "Pirā"). In the first case at least, the globe-like attack animation was most likely intended as a pun on the attack name, not as an indication of how to spell it.
* There are two notable subversions in Season 4, however. The first is in the case of
* There are two official plushies of Daniel's favorite stuffed animal, Tigey, one of which talks.
* There are two outdoor labyrinths that lead to shrines in the overworld. There is little to keep you from gliding or climbing to the top of the maze and hopping straight to the shrine's location.
* There are two over-arching types of magic: light magic which is available to most ponies by default and includes the Pegasi's abilities with the weather and the unicorns' natural abilities; and dark magic, which is an independent entity that flows from the earth. Dark magic is significantly more powerful than standard light magic, but
* There are two parts in the game where you have to sneak. Although you can actually skip one of them just by not taking a certain clothing item.
* There are two people named Alison. One was Collin's girlfriend, the other is one of the many deaths.
* There are two people named Mortimer Mouse in Minnie Mouse's life. The first introduced is her uncle Mortimer Mouse, while the second is one of her suitors. In
* There are two Pierrots - Scaredy Bat with his defeatist, afraid of everything

attitude, and Misery with her constant depression and well...misery.
* There are two Polish dubs: one from 1938 and the other from 2009, which was probably made because the first dub was filled with outdated language. Plus, the quality of the original dub made some words hard to understand.
* There are two problems with this argument, however. The first is that it fails to explain why an alien with this technology would transform themselves into a perfectly human form, use their technology to deceive ancient humans into worshipping them, only to leave the planet soon after (and then there's the fact that they had a recorded human childhood, and only decided to use their technology once they became adults). The second is the naïve assumption that people believe in gods specifically and solely to explain the universe, even though the concept of Space Jesus relies on the idea that people believe in gods because that god came down and demonstrated their existence and divinity.
* There are two pronounced aversions: While Byleth can also S-Support
* There are two rather funny particulars not mentioned above: first, one of the contestants of Miss Magix looks identical to Aisha (who debuted the following season), the series' resident tomboy; second, the public includes Faragonda and Griselda, two powerful and experienced fairies,
* There are two Russian platforms actually called Osa- the 9K33 (its
* There are two secret passages hidden behind bookcases in Castle Borgov in
* There are two seemingly contradictory prophecies surrounding The Stone of Tear, a massive fortress that has never been breached. The first says the Stone will never fall until the People of the Dragon come to it, while the second says that it will never fall until the Dragon Reborn wields Callandor, a "sword that is not a sword" which is housed within the Heart of the Stone. So why would the Dragon ever be allowed inside the Stone if it is destined to fall after his people come, but how can the Dragon gets his hands on Callandor without the fortress it's inside falling to people under his command?
* There are two sets of Barbie-like dolls made based on Disney films, one set by
* There are two sets of puzzles in the Castle, though only one of them needs to be completed in order to open its beacon.
* There are two Sheldons, who work together to solve physics equations twice as fast, but think of each other as dumb and end up fighting each other.
* There are two small cases in the second and third games. Unless you've played
* There are two snipers who bound themselves to their nations' militaries and the charge to protect others. They are so badass that they can be considered both The Unfettered
* There are two social profiles for vampires. The first is a loner who may keep a cadre of vampire slaves and possibly a mate.
* There are two subtle indicators of your success, the red and blue books being destroyed (although you don't learn Sirrus and Achenar's true fate until
* There are two Tamil dubs: one was officially done in 1995 with the songs dubbed and the other was done later, but with no songs dubbed.
* There are two towns called Oldendorf, which were renamed Hessisch Oldendorf and Preußisch Oldendorf ("Hessian and Prussian Old-Village") in 1905 to end the confusion. Ironically they both were Prussian at the time, one belonging to the province of Hesse-Nassau, the other to that of Westphalia.
* There are two types of cooking appliances that apply this trope in its more realistic fashion. The slow cooker takes the "less temperature = longer time" approach cooking things like stews, soups and sauces at (relatively) low temperatures, usually so they can be made in large batches. Pressure cookers on the other hand use the "more heat = less time" approach, using the fact that water boils at higher temperatures if you increase the air pressure. This can be done to cook certain foods that normally need to be boiled for an extended period in a reasonable amount of time, or cook normal ingredients very quickly.
* There are two types of human sacrifices made to the Emperor — the first is hundreds of psykers who are "fed" to him through the Golden Throne (it's not explained precisely what this actually means beyond it being a strictly one-way trip), and the second is the psykers who are pressed into service in the

Astronomican choir and slowly burn out their souls providing the psychic power the Emperor needs to project the Astronomican.
* There are two uses for the Bureaucracy skill and its related Charms in
* there are two very good reasons for that., and what they said was actually true.
* There are two ways fans interpret the "We're the only people who matter! He's never gonna get rid of us!" line. It's either said like a boast: "We're the only people who
* There are two ways to add friends: Locally via local wireless, or via Internet by exchanging friend codes. For whatever reason, you can't provisionally add friend codes if your 3DS is not connected, unlike with
* There are two wearable backgrounds to mimic the site as it was before the overhaul, those being the
* There are two White Mage merit job abilities like this: Martyr, which lets you sacrifice some HP to heal an ally by a larger amount of HP, and Devotion, which lets you sacrifice some HP to refill some of an ally's MP.
* There are, unfortunately, a number of Real Life examples of this; mafia-dons and drug kingpins who continue to run their organization with unabated effect while behind bars, often through crooked lawyers who can pass on orders under the cover of "Client Confidentiality", or "bought" cops who can turn a deaf ear.
* There are urban legends regarding this trope, doctors, and malpractice. While these are generally true, there
* There are usually various weird ads floating around the wiki featuring this effect. It's as if the advertisers stopped trying to make their ads reasonably plausible, and instead took
* There are variants with more nationalities, like a Chinese who eats the fly as a snack with the drink, and a Jew who sells his fly to the Chinese.
* There are variations on how certain people in certain lands speak (for example, the primitive Ixa'Takan tribesmen speak in simple English, while in the Japanese version, the text boxes display katakana and hiragana only), but it still plays straight.
* There are variations with a woman, and her divorced husband. The variants of the woman's wish include: 1) Bearing twins. 2) Big breasts 3) A lover with a ten inch penis.
* There are various cards, like Goblin Attack Force, Indomitable Fighter Lei Lei, Spear Dragon, and Mad Archfiend that have incredibly high ATK, but zero DEF and move into defense position when it is time for your opponent to strike.
* There are various deities who embody "Good" and benevolent Concepts such as Love, Good, Strength, Justice, Peace, Unity, Empathy, Truth, Humility, Faith, Temperance, Courage, Protection, Growth, Knowledge, and Potential. On the other hand, there are deities with "Evil" Concepts, such as Suffering, War, Darkness, Cruelty, Pride, Poison, Hatred, Conquest, Fury, and Greed... but given how the Codexverse has
* There are various internet CGI cartoons featuring anthropomorphic pig-things speaking with monotone voices.
* There are various other organizations which exist to serve as volunteers or auxiliaries during emergencies. For example, the
* There are various theories (some with more credibility than others) about the origin of the name, but no one knows the true story. All of them, however, contain a tacit admission of "it was mostly done that way because it looked cool." Whatever the reason, it gave an unhelpfully tongue-twisting name that many people erroneously or accidentally render as
* There are various viral videos of bull elephant seals doing really inappropriate looking things with motor vehicles. They're actually trying to beat up the vehicles.
* There are versions of Child Ballad #95, "The Maid Freed from the Gallows", where the condemned is male, ransomed by his female lover.
* There are versions/variations of the game where not everyone has a mutant power - why pass up this opportunity for increased mayhem? Because there are also variations where not everyone who has a mutant power knows that they do. This works

much better when the players believe it's possible that they genuinely don't have a mutant power.
* There are videos of people using exploits to solo 25-man raid bosses. In particular, someone figured out that a warlock could kite one of the bosses in Serpentshrine Caverns by throwing instant-speed dots and running up and down stairs a lot.
* There are videos posted all over the internet of the Gatling gun-toting Chevrolet Suburban created by minigun manufacturer Dillon Aero. Just the thing for third world dictators who don't care about collateral casualties, but rumors that the US Secret Service uses them to protect the president are either
* There are way, WAY to many videos of people failing at martial arts, unintentionally or otherwise, to even begin to list on this page. The most famous is either the Star Wars Kid or "afro-ninja."
* There are whole subgenres of biopunk dedicated to homemade biotech. Of course, materials and energy costs are still too high for the movement to have gained any real steam as of yet, and then there's all those safety and ethics experimentation laws. If your homemade stove goes off, you might kill yourself. If your homemade bacterium goes off, you might kill
* There are whole wheat doughnuts, and even whole wheat pop tarts (the latter usually being sold at health food stores rather than Pop Tarts, and the former sold by Dunkin' Donuts).
* There are youtube videos demonstrating the proper technique, many of them overemphasizing the danger of the neck snap since it's already both extremely dangerous and relatively simple to perform. The videos often come under fire for potentially inciting violent behavior that could either be justified by or hidden under the label of "self-defense".
* There are youtube videos of the original youtuber stars puzzling over how much youtube has changed in so little time.
* The Reasonable Authority Figure will inevitably be displaced when a
* The Reasonable Marines, probably the complete antithesis of the Angry Marines or even the
* The reason Angel Island is filled with ruins of all kinds is that it's a legendary location that dates back to many centuries ago, and its nature as a
* The reason a number of entries involve cards sent to dogs is that this
* The reason Apu and Manjula got octuplets is because when conceiving, Manjula took fertility drugs...while Apu, Homer, Marge, and Bart slipped her some more without each other knowing.
* The reason Asterix is excessively prudent some of the time, is that there are often non-powered allies or something else that they want to protect, like a barrel of magic potion (in
* The reason a year and a day was used is because the earth actually takes 365 and just under a quarter days to complete a full circuit around the sun, which is why we have leap years (see below). Thus a year and a day was used, to ensure that the earth really had gone round a full circuit by the end of the period. There was some dispute in 13th century legal circles as to whether 'a year and a day' still meant 366 days when the period included a leap day (so 'a year and a day' from January 15, 2012, would be January 15, 2013) or whether it still meant the anniversary of the day after the period started (so 'a year and a day' from January 15, 2012, would be January 16, 2013). The 13th century legal expert Henry Bracton argued for the former, but Edward III ruled in favour of the latter view with the Statute of Leap Year 1256, which decreed that the leap day and the day before count as one day for the purpose of determining when a full year has passed.
* The reason becomes clear once you finish playing all the routes; each woman is in a complicated position in life (afraid to leave the resort due to unresolved guilt, trying to help a friend suffering from depression, earning money to support her bankrupt family, etc.), and their work at the resort is literally a "last resort" for them to get their life together and move on from what's halting them. The phrase is even used in one of the routes.
* the reason behind Blackmail's final break with the Six Heroes. When his brother

turned evil, he had asked Mizzamir to be merciful... and Mizzamir turned his brother into a warhorse. It's implied that this is the same warhorse he rode and lovingly cared for until Fenwick's men killed it.
* The reason behind the Alliance and the Horde being more or less openly at war in
* The reason behind the characters Brightspirit, Shiningheart, and Braveheart in
* The reason behind the first change is because the writers couldn't decide if Burnie would pretend to be the character he was possessing or if they would have the possessed character's VA do their voice different or try to sound like Church. Ultimately Burnie decided that because his Donut impression sounded too much like another character, that they would do away with it and just have Church's voice.
* The reason Bruce thought of Tommy Elliot when he needed surgery, even though he hadn't seen him in years, was because of a hidden program in the Batcomputer which randomly flashed Tommy's image every time he used it.
* The reason Captain Benwick and Fanny Harville were still only engaged at the time of her death was that his promotion did not come before then.
* The reason Connor defended Angel from Linwood's commandos in "Tomorrow".
* The reason Farfetch'd is rare is because people are hunting them to the brink of extinction. Apparently they taste really good roasted with leeks.
* The reason for detainment isn't for a crime but for something else, usually more mundane.
* The reason for some supporting officemates retaining first names is since many of them are
* The reason for that is because it is a tactic that anyone can easily fall for. Ironically, if the Romans simply tried to cut through rather than fight defensively, they could have broken out.
* The reason for that is because she never really counted days until she met Gin.
* The reason for that odd meter is to give the listener a disquieting feeling of nervousness and aggression. It works. Don't listen to it while driving your car!
* The reason for the above quoted great stopping power and accuracy of the revolvers lays in their ability to fire long rifle-like cartridges, down to
* The reason for the change was that the evil ending was planned to lead up to
* The reason for the sequential attacks by the Americans was a lack of training and experience (each group set out as soon as it took off). Notably, only the squadrons from the
* The reason for the time-loops occuring. The creator made a decision and is regretting it, wondering if it was the right choice to make. The loop continues, until the regret has been dealt with.
* The reason for this advertising? Nutella was marketed as "gives you energy" in post-
* The reason for this being that in Bible times non-widowed non-virgins had virtually no chance of being married after being deflowered, (unless already betrothed) so
* The reason for this is more that Frohman apparently went from living to dead
* The reason for this is that Greatest Hits was a rush release to capitalise on their popularity. It had the same tracklisting as the Swedish compilation of the same name (though a different cover). The main reason Waterloo was released in the UK in the first place was to capitalise on them winning the Eurovision Song Contest. Interestingly, they did enter the song Ring Ring for Eurovision in 1973, but never made it to the finals. If they had won, the album probably would have been released.
* The reason for this is that the Scarrans are naturally of a lower intelligence level than most other races. Their elite consume a special plant (somehow identical to Earth's strelitzia; possibly brought from Earth by the Eidolons) that boosts their intelligence, but there isn't nearly enough for everyone, which is why their soldiers are
* The reason for this lies in the fact that the author, by his own admission, prefers long dialogues and intrigues, and not battles, so in the original web-novel, most of the battles were even almost instantaneous.
* The reason for this, outside of government funding, is because every month, PBS

Kids has a 'tentpole event', and that specific event will get the lion's share of promotion while everything else gets ignored. For example, PBS didn't advertise the
* The reason for Tobi's mask has become apparent in recent chapters -
* The reason foxhunting is so elaborate is that it was developed as a substitute for boarhunting once boars had been hunted to extinction in many parts of Europe.
* The reason Frank Castle's family was killed was that Frank executed Dinah Madani's partner Ahmed Zubair on the orders of William Rawlins. Zubair was an Afghan National Police officer who discovered that fellow members of the illegal black ops unit Frank was a part of, like Rawlins, Colonel Schoonover, and Billy Russo, were trafficking heroin into the United States inside the bodies of KIAs and using the profits to finance illegal black ops programs. Rawlins and Schoonover then ordered Frank be assassinated because they were led to believe Frank was the one who sent Micro a videotape of the Zubair assassination, as opposed to Gunner Henderson, the one who actually made the recording.
* The reason? French. In French, an adjective is declined to match the gender of the noun it modifies. "Blond" is the masculine form, and "blonde" is the feminine form. Oddly, the French word for hair (cheveu) is masculine, yet in English we use "blonde" to describe hair color directly.
* The reason Fry adapted quickly was more of a production thing: they were finding it hard to create more storylines about Fry adapting to the future, so they turned him into a straight, somewhat dim-witted (
* the reason he became a + Anima is that one of the other queens was jealous of the love the king had for his mother and that Husky was chosen as heir instead of her son so she pushed him into the pond knowing he couldn't swim. He hates women because he sees them as completely petty and shallow with the exception of his mother and later Nana...maybe.
* The reason he becomes the Reverse-Flash in the first place is because he went back in time and
* The reason he's an asset to the team is because all the others are ex-military special forces, which leads them to have an attitude of shoot first and ask questions later. In contrast, his background as a detective means he's a lot more skilled at investigative work.
* The reasoning for the work of many of the researchers from the Academy in
* The reasoning (well, "Reasoning(TM)") was probably that camo... somehow... indicated gang affiliation.
* The reason inter-species adoptions are possible — e.g. a dog with puppies adopting a baby bunny it might have normally had for breakfast, a
* The reason isn't really all that complicated: Speedy is actually a
* The reason it flew only a few hundred yards was the guy behind it, Howard Hughes, was trying to prove that it could, in fact, actually fly during Congressional hearings into the money he'd extracted from the US government to build it (and one criticism was that it wasn't able to fly). It wasn't a bad idea, it just turned out to be too late and not needed. During WWII, it was not always clear that it would turn out to be possible to stop U-boat attacks on Allied convoys sufficiently to keep supply shipments to Britain going, so Hughs proposed giant transport aircraft instead. The Spruce Goose was the prototype. As things went, it wasn't ready for testing until after the war ended and a whole bunch of things made U-boats themselves fall into this category before the end of the war anyway.
* The reason I won't tell people though is that I am enjoying watching them squirm entirely too much. It's probably bad for me."
* The reason kinetic weapons maintain prominence is that the energy shields of the
* The reason Larfleeze (Agent Orange, the embodiment of greed) hasn't left Earth after
* The reason Ludo Bagman gives for not being worried about Bertha Jorkins' disappearance in
* The reason masked wrestlers used to be popular in 1930s USA wrestling and why mask vs mask remained a staple of Mexican lucha libre is that a good deal of the masked wrestlers never reveal their public identity until they are unmasked.

* The reason Master Roshi adopts the Jackie Chun alias to compete in the 21st World Martial Arts Tournament is to make sure his students do not become this trope.
* The reason Mike stuck around his poisonous best friend Trevor for so long on
* The reason Mississippi goes by "Mibs" is because her toddler sister Gypsy called her that when she was just learning to speak.
* The reason Nancy was liberating cows from a dairy factory only to be put in jail for it was that the factory was threatening the farm.
* The reason NASA won't allow couples into space together is that it could compromise judgement.
* The reason non-hungry ghosts value funerals being that even the most basic rites allow one to "live" like a king in the Underworld (paper and wooden effigies carry over as luxurious and possibly magical treasures, food items become never ending, sacrificed animals will be loyal and virtually indestructible sources of food, fur and labour and so on).
* The reason octopus intelligence is a source of excitement in the scientific community is how far removed (from an evolutionary stand point) from relatively well-understood other intelligent animals (who have a tendency to be social) they are. The evolutionary pressures that created the octopuses' intelligence are believed to be far different from the evolutionary pressure that gave us ours. It's almost like having a sapient alien, so this is probably one of the closest to real life examples in terms of creatures that are intelligent on a level that at least approaches sapience for quite some time. Or the scientific community is only excited about the biology at work behind its brain (for the same reasons), or both.
* The reason Omega Particles are deemed so dangerous that the Federation is willing to
* The reason people are granted Geass in the first place is to create this outcome. After all, Who Wants to Live Forever?.
* The reason Perry isn't around anymore was because he retired and went to Florida.
* The reasons and political maneuvering behind the various forms of arranged marriage among the nobility are a theme of
* The reason Scrooge McDuck's financial empire is based in America and not his native Scotland is this: when he returned to the Highlands with the explicit goal to base his financial empire in his family's ancestral village of MacDuich he found out that not only he had outgrown the rural and conservative Scotland, but also the
* the reason Scully and Doggett are such hardcore skeptics is that they're afraid
* The reason Spider-Man fights for the Pro-Registration side is because Tony Stark told Peter that Steve Rogers and his team of heroes are going against the law and they're dangerous. Cap
* The reasons that the Sisters of Battle don't look as good as their tabletop models are scarring, tattoos, weight, missing body parts, and them not giving a damn about personal appearance.
* The reason Tetsuo passes Naruto despite hating him for being the Kyuubi and obviously undertrained: if he fails Naruto, he also fails Satoshi, who's his wife's favorite nephew.
* The reason that British infantry officers stopped wearing swords in
* The reason that Harmony vs. Xander is the only cat fight in the series is because girl-on-girl throwdowns in the series in general (and there are quite a few of them) are deadly serious affairs that feature little in the way of typical cat fight tactics.
* The reason that Primus, the Transformer God and often a major character in the cosmology of the franchise,
* The reason that Ross immediately hung up after hearing Mark's voice was that he was convinced that Mark was interested in Rachel, and feared that she was developing feelings for him. It was a large part of the argument that led to Rachel suggesting a break. Hearing that Mark was there, not six hours after
* The reason that T-45d power armor (The stuff the East Coast Brotherhood uses) was considered inferior to later models was because the suits had a couple of drawbacks: Their servo systems weren't quite up to scratch so they were bulky and

hard to move around in (represented in game as a -2 penalty to your agility); had problems with heat dissipation; Various electronic and mechanical subsystems of the armor were exposed on the outside of the casing, making it far more susceptible to damage (the condition deteriorates faster than Enclave armor); and the suits also burnt through energy cells like a gas-guzzling SUV (thankfully, you don't have to worry about that issue).
* The reason that the potion transforms children into mice in the first place is because the Grand High Witch hopes to exploit this trope, thinking the mouse-children will be so revolting that their teachers will kill them.
* The reason the average life expectancy in olden days was lower than it is now was because of the significantly higher infant mortality rate, which brought down the average. If a person managed to survive past early childhood they actually had a good chance of living into their sixties, seventies, or even eighties. Sometimes they would even live longer than that; Pope Agatho was born in 577 A.D. and died in 681 A.D., making him
* The reason the Bear brothers' parents aren't around is because they work for a nameless government agency.
* The reason the Canadian Ninjas hate the Global Green Gangsters. Portia Perez and Nicole Matthews were the names most heavily associated with
* The reason the characters never happened to slide right into sulfuric acid.
* The reason the Cybermen were absent during the Third Doctor's tenure was that script editor
* The reason the Doctor refuses to carry a weapon most of the time is based on this idea; if you always have the option of just shooting and killing your enemy, it's tempting to default to that and ignore possible better options.
* The reason the forearm was Luger's finishing move was because of a
* The reason the Marie Celeste was found adrift with nobody on board? The pirate crew was about to attack a merchant vessel, but they panicked and dove overboard when they saw that its crew was eating Weetabix. Never mind that
* The reason the panties became involved in the case in the first place is that Wesley Stickler wanted to steal the "Magic Panties" used in Trucy's magic show to figure out how they worked. However, he didn't know where Trucy lived, so he just went around stealing all the panties he could get his hands on hoping to get lucky and find the right pair.
* The reason the prosecutors rely on the kidnapping and attempted murder charges so much is because they have no evidence to convict Boyd of the charges he is 100% guilty of: bank robbery, blowing up a church and murder.
* The reason the radio blackout lasted longer than usual was that the Apollo 13 Command Module hit the atmosphere at the shallowest re-entry angle
* The reason there are no boats or ships is because the Zoras are so fiercely territorial that they destroyed Hyrule's art of sailing by attacking ships.
* The reason there are three different kinds of skates, one for each sport (Hockey, Figure Skating, and Speed Skating)
* The reason the roastee never gets offended by the hilariously awful statements is usually a combination of having a good sense of humor, knowing what to expect, and most of all, being good friends with the roasters and being able to make a few jokes at each other.
* The reason the starfield title sequence animation was changed between the Fourth and Fifth Doctor (the Fourth Doctor appearing out of stars, the Fifth with a Venetian blind effect) was said by
* The reason the Syndics haven't figured it out in over 100 years is because
* The reason the Tanith First-and-Only are called Gaunt's Ghosts is partly because they're the only survivors of their homeworld after Chaos warships, fleeing an Imperial naval victory early in the Sabbat Worlds Crusade, glassed their homeworld. Commissar Ibram Gaunt managed to get about a third of his Imperial Guard recruits offplanet before the enemy struck.
* The reason the theme song from the original game is seldom heard is because Sega does not own it. It's owned by Dreams Come True, the band that originally composed it. The development team of

* The reason the war turns hot is because Scorpius, who has been place in command of a border fleet, assumes the hostilities will start any day now, and decides to strike first and deal a decisive blow to the Scarrans. The Grand Chancellor is, naturally, angry, as he doesn't believe that the Peacekeepers can win the war. Scorpius is, effectively,
* The reason they're too small is that their beam is only about 30 meters, while the whole new
* The reason this had been played straight in Japan for for so long wasn't because
* The reason this happened was because Valve removed friendly fire on as a server option. Until that point, the majority of servers included friendly fire, meaning the Pyro couldn't spycheck without blasting his friends with flame, making it much less useful. With no friendly fire, the Pyro could spycheck at will with no penalty beyond losing a few units of ammo.
* The reason this may not make much sense is because the objection was to lack of a suitable ceremony, not the rapid promotion. Even that is because the intended ceremony was attacked.
* The reason this was adopted in the original British version was originally for quality control— they filmed more games than there was time to include in one episode. Thus, the least funny/successful games could be left out. If the points were meaningless, they wouldn't have to account for the missing points at the end of the show.
* The reason Thrax has the power to change the appearance of cars in
* The reason Tom Zarek was such a thorn in Roslin & Adama's side for all four seasons, is that he recognized when he shouldn't overextend himself, and was simply smart enough to quit while he was relatively ahead. For example he wanted to assassinate Roslin outside the Tomb of Athena, but once Commander Adama and his men showed up he realized it was too risky and simply dropped the plan. One of Zarek's goons even urges that they go through with it anyway, but Zarek cites this trope...the goon tries on his own initiative, and gets killed.
* The reason Tyrion Lannister, acting Hand of the King, gives to his mistress for remaining in the
* The reason Walter o' Dim took the appearance of Roland's bondsman, Marten, in
* The reason we never get a 3D Alucard based on Ayami Kojima's design is because it would be really,
* The reason why Adam Jensen is working with the Juggernaut Collective, why he's familiar and on good terms with Alexandra Vega and why he's investigating
* The reason why Bart specifies that he has "two" mortal enemies? Due to some
* The reason why Bhima had to strike Duryodhana's thigh to win in the first place is because Duryodhana's mom gave the rest of his body
* The reason why both the Hero and Dark endings are canon is because there is
* The reason why Bruce Wayne and Dick Grayson were estranged from one another was left unexplained. The comic book continuation of the series revealed that
* The reason why Darth Vader is still in his suit by the time the original trilogy rolls around is obviously because of how cool he looks in his suit.
* The reason why Death and Rebirth happened was because Hideaki Anno felt that the Japanese public's memory needed to be refreshed regarding the events of the series, considering
* The reason why Dr. Eggman, then Robo-Robotnik, decided to invade Mobius Prime. He succeeded in conquering his own Mobius, wiping out the Freedom Fighters in a massive nuclear attack in the progress, but without any worthy enemy to fight, he got bored with his victory and so arrived in Mobius Prime, claiming the late Dr. Robotnik's empire and began the Second Robotnik War in order to "fill the void".
* The reason why Eucliwood doesn't change reality all the time is because she's very disciplined, always keeping her emotions in check and rarely ever speaking. This very much leans towards
* The reason why he left is that he was swindled by his manager, and left home because he couldn't face Julia and Anna as well as the crash of his dreams.. Thankfully, they got better.
* The reason why her character wants to kill Russian President Arkady Fedorov in

* The reason why humans, orcs, goblins, elves, dwarves etc can be found on so many worlds in the old
* The reason why ice hockey games have three periods of twenty minutes is that the old format (two halves of thirty minutes) caused the ice to become so rutted and snowy from the players' prolonged skating that it negatively impacted puck play in the final minutes of the half. Changing the game to three periods gave the maintenance crew a second chance to clean up the ice and ensure consistent play.
* The reason why Leah Clearwater is cold and aloof is because her relationship with Sam Uley, leader of the werewolf pack, broke down when he imprinted on Emily Young. Emily is only Leah's second cousin, but they were close like sisters when they were young.
* The reason why Little Mac was made so little in the NES version of
* The reason why Lucas was able to make out like a bandit in merchandising was that Fox and its marketing partners had gotten seriously burned with the notorious flop,
* The reason why one's lips and tongue often sting a little while eating pineapples is that pineapples contain bromelain, an enzyme that breaks down meat proteins. To put it simply,
* The reason why Orde is male and the rest of his kind are female: his creators were sexist. Also controversial because allegedly Orde's gender was set in stone by a mere typo.
* The reason why Petty Officer Harkness has been passed over for Chief Petty Officer
* The reason why quantum entanglement cannot be used for FTL communication is this: imagine you have two entangled particles. Particle A is with you and Particle B is many light-years away. Obviously, you can easily measure Particle A to find out something about its state (say, its spin). Once you know the spin of A, the spin of B is determined and anyone measuring the spin of B will definitely measure the opposite of what you measured. To use this for communication, you would have to somehow communicate that A had been measured; otherwise, whoever measures B would assume that they had established A's spin. So to use entanglement to send data FTL, you first need a way to send data FTL.
* The reason why Rapunzel's hair grew back when she found the black rocks wasn't mentioned until the final season;
* The reason why Ryuko genuinely starts falling in love with Mako in
* The reason why Team RNJR decides to walk from Vale to Haven Academy at the end of Volume 3 is because Ruby naïvely thinks the journey will only take a couple of weeks. This is a journey that takes them across the sea and requires them to walk across an entire continent. When her companions realize, they're shocked, requiring her to defensively point out she's spent her entire life in a very small geographic area close to home and therefore had no idea how big the world really is.
* The reason why the "Battle of Coriana VI" is not the "Battle of Centauri Prime" is quite simply down to respective population sizes.
* The reason why the Ebola virus and its relatives are so deadly is because unusually for viruses they are not picky. They can attack almost any cell in the body.
* The reason why the Human species has become the dominant species of Earth, along with great creativity, the ability of think out strategies and
* The reason why the Sphinx of Giza has no nose varies depending on which work it appears in.
* The reason why they're so hard on Hayate and stole his paycheck? Hayate has an older brother, who escaped their influence. They learned from their "mistakes" and made sure to report Hayate being underage themselves both to steal his paycheck and to destroy whatever credibility he may have had with the authorities.
* The reason why this trope exists is that in a lot of cookbooks the author will write things like "you can increase the temperature to decrease the cook time". It's not that this isn't true, it's just that people who lack cooking experience don't understand what this means: or that there are some severe limitations to this

principle. Generally speaking, the most you can shave off the cook time is 10 minutes: and some recipes are too finicky even for that. The cook has to keep in mind as well that certain kinds of ingredients will
* The reason why thousands of American soldiers died when invading Germany at Omaha beach. The Germans had a gigantic beach, followed by high hills filled with bunkers, while the American forces had boats that put them straight into the open the second they would leave. Additionally, the Germans had placed multiple obstacles on the beach (including thousands of land mines mounted on sticks just tall enough to be functional but invisible in the waters, which exploded when landing craft or emerging troops hit them) to avoid the soldiers simply charging for the hills, resulting in a brutal bloodbath.
* the reason why Westerners show the finger while Eastern Europeans show the arm up to the elbow.
* The reason Wizards use dead languages and nonsense words for their spells is that the incantation becomes linked with the spell in their mind, so if they use a word from a language they speak regularly, due to the mental equivalent of muscle memory they could burn their house down whenever they say "fire."
* "The Reason You Suck" Speech about a girl who stole the narrator's boyfriend and has the line "she's better known for the things that she does on mattress" to further the point.
* "The Reason You Suck" Speech about why people who use steroids are terrible people, while Barry Bonds grins in the background.
* "The Reason You Suck" Speech, absolutely disgusted that Kaine shares his DNA and memories yet acts like a selfish coward. This actually reaches Kaine, who subsequently knocks Peter out, dons his costume, and dies fighting the Kravinoff family in his place.
* "The Reason You Suck" Speech: A speech that puts one down vs. a speech that brings one up.
* "The Reason You Suck" Speech ends with her calling Heather's shoes tacky, everybody starts laughing, including the loon.
* The Reason You Suck Speeches about how these guys are the main obstacle to peace between humans and monsters and being incredibly stupid and bigoted even in the face of monsters saving lives, seem to be making some progress.
* "The Reason You Suck" Speech for accidentally treating them as interchangeable (which brings her to tears), then rip up her love letter and brush her off. Of course, this is more lashing out in frustration about their isolation and identity issues than because they're actually mean.
* "The Reason You Suck" Speech for a series of tornadoes in Central Ohio that wound up killing six people.
* "The Reason You Suck" Speech from his boss, but it eventually turns into a Dare to Be Badass speech:
* "The Reason You Suck" Speech from Megatron. After two issues of agnonising, he talks with Ratchet about this. Ratchet just smiles and says that if Optimus had wanted to know so badly, he could've asked him.
* "The Reason You Suck" Speech. He also had a tendency to lambast crowds as he was teaching them, such as this quote from Matthew 21:31 (New American Standard Bible):
* "The Reason You Suck" Speech. He does finally forgive Silver, but it takes a lot more convincing from his allies as well as Silver obtaining Mecha Sally for Sonic to lighten up around him.
* "The Reason You Suck" Speech however, and apologises in the next episode.
* "The Reason You Suck" Speech: I'll break you by giving you a full-length speech on why you're a failure and a complete piece of shit!
* "The Reason You Suck" Speech in the process with nothing more than a second-level invisibility spell.
* "The Reason You Suck" Speech is supposed to be funny to the general audience, but it was mostly supposed to be read or heard by its target, who would be gravely insulted. Essentially the world's first diss tracks.
* "The Reason You Suck" Speech, Kana simply tells Ceylon that since she'll be gone soon, she's not worth the speech, which has a similar effect.

* "The Reason You Suck" Speech: Publicly shaming people accused of bigoted opinions on social media became part of a "call-out culture" that surged during the latter part of the decade.
* "The Reason You Suck" Speech: Someone goes on a rant where they list another person's flaws.
* "The Reason You Suck" Speech: Someone tears into someone else by going on a rant listing the other person's flaws.
* "The Reason You Suck" Speech stating how useless the other Dark Warriors are, and informs him that all the food is spiked with amnesia peppers and that everyone will forget the whole idea in an hour or so. It was also shown that he could summon giant monsters (although not controlling them) and took part in killing the Yeti the Dark Warrior met.
* "The Reason You Suck" Speech: Telling someone off for being a horrible person. It's often cathartic.
* "The Reason You Suck" Speech to an annoying side character. Which is then followed by:
* "The Reason You Suck" Speech to Baka was based on something she wanted to tell her older brother, the relationship with whom is strained.
* "The Reason You Suck" Speech to Cinder about how she never seems to learn from her actions:
* "The Reason You Suck" Speech to Homer. He then pops his head back in to give a perfunctory courtesy to the rest of the family.
* "The Reason You Suck" Speech to more famous people standing by him, all of whom are sporting nervous grins as he speaks. This occurs in "Butters' Very Own Episode" (2001) and "Up the Down Steroid" (2004).
* "The Reason You Suck" Speech towards mortals and expresses his longing to be able to appear in the living world and to be summoned by having someone say his name three times. This one was ultimately reworked into "Barbara 2.0").
* "The Reason You Suck" Speech, which simultaneously causes Sam & Freddie to rethink their own relationship as they overhear the speech and realise it applies to them.
* "The Reason You Suck" Speech. While incredibly cruel, it's also entirely correct, as they systematically call out of of Catra's issues, summarizing that the main reason for her own unhappiness is her incessant need for power and tendency to push all her friends and loved ones away in pursuit of it.
* The Reason You Suck. When they finally talk it out, he admits that justifiably not many women are nice to him, which is why he was so infatuated with her. She apologizes for her actions and their friendship looks repaired... until he again thinks it's a sign of attraction and tries to kiss her; she punches him square in the face.
* The Reavers had the opposite reaction, becoming mindlessly hyper-aggressive.
* The Reavers (psychotic cannibalistic zombie-like barbarians) not only kill their victims in the most horrible and prolonged manner possible (remember, you are VERY lucky if you are already dead by the time they start their meal) but also apply torture as a recruiting solution — they force some of the prisoners witness the unthinkable sufferings their comrades are put to until they completely snap and embrace the Reavers' ways. The bastards then leave these mishaps as a surprise gift for the rescue team...
* The Reavers whose typical method of raiding involves raping victims to death, eating their flesh, and sewing their skins to their clothing. The luckier ones get it in
* The Rebel Alliance, as a ragtag coalition of insurgents, is about in the middle of the scale. While more individualized and prone to outside-the-box tactics, especially where
* The Rebel and the Chosen, Tonks uses this technique to pull Harry into a kiss.
* The Rebel: As Tony Hancock crosses the English Channel from England to France, he tosses his city gent's hat and umbrella over the side of the ship. Too bad for him that he had his tickets in the hatband.
* "The Rebel Flesh" brings us identical clones of various characters. These are

referred to as Ganger!*insert-character-here*.
* The Rebel Flesh" has it being a common problem in the 22nd century because of unknown reasons. One kickstarts the plot and causes the clones to become sentient.
* The rebel flouted the school's dress code by flaunting his new spiky collar.
* The Rebel has a hard time getting by in Paris until a fellow artist's work is mistaken for his, at which point he becomes the toast of the town.
* The Rebel, Johnny runs into a man from his own past who was a guard at the prison camp Johnny escaped from and claims to have been wounded in combat, with four scars on his chest to prove it. Johnny eventually reveals to the man's brothers that after Johnny escaped from the camp, the man got reassigned to a frontline unit as punishment and immediately deserted and hid in a hayloft, where he was stabbed in the chest by a farmer with a pitchfork (which is why the "bayonet" wounds are all in a straight line), then taken to a Confederate field hospital, where he met Johnny again.
* The rebellion ended like this; Rose Quartz won and saved the Earth from the Homeworld's colonization, but it cost her all (except for a small handfill) of her allies to be corrupted and to the creation of the Cluster (a giant forced fusion made up of thousands of Gems) seeded inside the Earth which will destroy it upon formation.
* the rebellion of the Men of Iron, the appearance of the first psykers, and the warpstorms caused by Slaanesh's formation cutting off colonies from each other. A 5,000 year interregnum followed after the Fall of the Eldar before the Emperor reunified Earth under his rule and formed the Imperium. A brief golden age followed during the Great Crusade before it was cut short by the Horus Heresy, and the Imperium then stagnated into its current state.
* The rebellions against the Colonial Government after the Silence (the loss of contact with the Ancients, the mother civilization). The Colonial Government ruling the planet had been strong before the Silence, but after their legitimacy was damaged and their resources strained, and with that came rebellions. Initially the Colonial Government,under Governor Padish, held on by pumping out weapons and armour using the miraculous Heavenly Forges, but without Ancient maintenance the Forges gradually began to break down, and the rebellions chipped away at the Government. Within a century it had collapsed... and that is what is known of the only known
* The rebellious, stone-cold British socialite Cordelia Winthrop Scott in
* The Rebel/Republic pilots all wear orange flight suits, not quite playing it straight, but not quite not.
* The Rebel Set", leaving the two whimpering in terror. Dr. Forrester added his two cents worth;
* The Rebel Set. The episode guide book notes that on their first viewing of the film, it took everyone quite a while to realize he was even supposed to be in disguise.
* The Rebels have relocated their main headquarters to Hoth, an icy, snow-covered planet. When the Imperials come knocking, it brings us one of the most iconic battles in the series.
* The Rebels hide what remains of their fleet "above" the edge of the galaxy. See
* The Rebels' Mon Calamari-made ships were originally liners, cityships, and traders that, as per Mon Cala building practices, were completely unarmed but sported surprisingly strong shields... And hardpoints for weapons, that were put to use once the Mon Cala rose against the Empire.
* The Rebels, now having already declared themselves the New Republic, take Coruscant in the
* The rebels often borrow the Visitors' uniforms in the miniseries and series
* The Rebels of Zion who, in one reality, live in the sewers and abandoned power plants of the post-apocalyptic world and in the other regularly do business in the sewers and abandoned hotels of the slick cyberpunk world of the late 90s, early 2000s. They dress outlandishly, use weapons and martial arts with borderline supernatural ability, and dive from rooftops without a thought.
* the Rebels successfully destroy a First Order Dreadnought, but at the cost of a

good part of their fleet, including all. Leia, Rose, and eventually Poe all realize that a battle won can mean a war lost if too many die for it, and Finn is taught this at the last minute, being stopped before he might have performed a Pyrrhic sacrifice.
* The Rebels universe), a rogue human military executes a very stealthy colony drop on the aliens' home planet at the outer rim of the solar system. How stealthy? They've spent twenty years making slow course corrections on the asteroid, just to make sure it won't get detected by spaceship warning systems.
* There, Beyond the Beyond (a.k.a. Beyond the Beyond or Sono Mukou no Mukougawa)
* There, Beyond the Beyond, Futaba admits that wearing girly clothes doesn't bother him, because his older sister makes him do it all the time.
* There, Beyond the Beyond, magicians are sometimes seen making use of summoning magic as the article describes, but the main plot stresses the use of magic to summon flowers from the Beyond, which are permanent beings that can grant wishes, perform miracles, and enhance magical powers.
* The Rebirth. As she's homicidally insane under normal circumstances, the Black Vault instead causes her to become calm and rational.
* The Rebirth version itself underwent a retool. It started as a pretty obvious attempt to copy the popular
* the reboot, but it sunk due to the support structures being insufficient.
* the reboot, consisting of a midriff-baring breastplate, shoulder pads and a short skirt.
* the reboot feature short cartoons with all-new characters ("Starbox & Cindy," "The Incredible Gnome in People's Mouths"), suggesting that they might become recurring segments in future seasons if they catch on. The latter segment even said "to be continued" at the end.
* The reboot gives us Sweet Tooth's Carnival of Carnage, built by his worshipers
* The reboot had Hyper Fangirl, stalking the Critic with the intent to make him love her, culminating in her holding him at hostage and forcing him at gunpoint to be her boyfriend and review a movie with her.
* The reboot introduced the Shadow Traps in the second year, which are essentially bear traps with legs.
* the reboot of his original self and Albedo, possesses another counterpart to the Omnitrix known as the Antitrix, which is black and red-orange with similar red-eyed transformations.
* the reboot originally contained an aversion where a phone number displayed on screen to help Brain take over the world turned out to be an adult hotline. It was later edited out so the entire screen was blank, and then re-edited to restore the text but change the number to 1-800-555-0199.
* the reboot series and its surviving fighters were immune because their computers were so obsolete, the virus couldn't do anything to them.
* The Rebound ends in this way with the main couple sitting down to dinner with their extended family, secretly holding hands.
* The Rebound, it's made a point that Aram is too nice/naive to date Sandy because of how he won't divorce his French ex-wife even though she only married him to get a green card.
* The Rebound, Sandy's knowledge of sports via fantasy competition is established early. It won't be long till that comes in handy.
* The Rebound, whose French wife leaves him after their marriage. He's too nice to divorce her as she would get deported.
* The Rebroadcast Standby Tests carried out by the BBC in the days of analogue (and described in the
* The rebuilt orbital defense system shows up again in "A Call to Arms", and this time manages to fire their
* "There But For the Grace" Galatea leaves her newfound family to go explore the world — her stated reason being that she's genetically identical to Molly, and she's afraid that if she stays in the environment that molded Molly, she'll stop being her own person.
* "There But For the Grace of God": The alternate Daniel Jackson never joined the

stargate program and died in a Goa'uld
* The Recall device instantly transports the ship equipped with it to the race's home system, no matter where it is. Very useful if the homeworld is threatened.
* There Came an Echo walks you through some of it and provides commentary, but you're the one calling the shots.
* There can also be economic incentives for polygamy, such as in 19th century Commanche bands where buffalo robes were produced as a surplus commodity to sell, and the necessary process of scraping the animal hides was considered women's work. A man could increase his income by getting more wives to do the work for him. As the buffalo herds were destroyed and the Commanche were driven off their lands, the practice of polygamy went into decline because the economic incentive disappeared.
* There can be a few common powers everyone has, in addition to their character-specific powers. Most of the
* There Can Be Only One: A group of characters have to kill each other until only one remains.
* There can only be seven Sins and seven Virtues. Any more would cause
* The recent commercials for Kraft Macaroni 'n Cheese have the kids acting
* The recently added taunt, the Soldier's Requiem, has him plant down a grave (
* The recently added Tier 3 Battlecruiser are a rare example of Battlecruisers in the original sense. These ships have the special ability to fit weapons normally seen on Battleships, but have the speed and agility of a Cruiser, while having Cruiser amounts of armor and shields.
* The recently-created US Space Force is a split-off from the Air Force. While they are still figuring things out, they are going to be under the Department of Air Force (just how the Marines are under the Department of Navy) and using Air Force ranks. However, the Space Force doesn't operate manned space vessels yet, so who knows what might change in the future.
* The recently-declassified Constant Peg program involved US pilots training with real MiGs, acquired via defectors and other sources.
* The recent newer one still does the same above (minus drawing errors and fixing it), but after it's drawn, the drawing zooms out to reveal the new logo, as the Mickey Mouse symbol ends up being the dotted I in the new logo.
* The recent rebranding of American Airlines is an interesting case of
* The reception for this was so bad Renbu was removed completely from the
* The recipe for. This likely precursor to napalm was an incendiary weapon used by the Eastern Roman (Byzantine) Empire, and was invented around 670. It was lethal in naval battles, as it supposedly could stay lit while floating in water. Unfortunately, the recipe was such a jealously guarded secret that the Greeks never wrote it down or trusted one man with the whole recipe, and as a result, it seems lost forever, despite the efforts of numerous chemists to recreate it.
* "The Recipe": One of the many clones of Anton, a sentient piece of toast, meets his ends when he's put in the place of the bread on Tobias's sandwich, which he bites into not knowing what it was. Later, Richard finds a bunch of clones and tells them that he plans to eat them once he gets hungry.
* "The Recipe": When Anton drowns and disintegrates at the same time, but is back in the next scene with no sign of injury, Gumball asks "Am I the only one who finds it weird that he's still
* The recipient is Hidan, and it's with Hidan's own knife that was earlier used in an attempt to kill Kakashi.
* The Reckless Love does much the same, its first album coming out a little later in 2010. The third album, Spirit, is as obvious a tribute to 80s glam as it gets.
* The Reckoners Trilogy. At the beginning of the series, he finds them and persuades them to let him join.
* The Reckoners Trilogy but lacks a "prime invincibility", meaning that he can be killed just as easily as anybody else.
* The Reckoners Trilogy), but ones he mentions internally are left to stand there as a mystery, such as "laser through a pile of sheep".
* The Reckoners Trilogy, David's narration frequently states that he's not a nerd, eventually leading to:

* The Reckoners Trilogy is at once an Epic-killing Reckoner and a massive Epic fanboy, frequently gushing over how cool some Epics' powers are while plotting how to assassinate them. At one point, he enthusiastically compliments an Epic on her abilities while they're fighting each other to the death, and shortly thereafter tops that by asking her for an autograph. She's... nonplussed.
* The Reckoners Trilogy manage to kill an Epic, no human authority is going to prosecute you.
* The Reckoners Trilogy — if someone is willing to look after kids and pay them for work, they're practically a saint. His own matron even saves up their money until they turn 18, and then gives them 25% of it every year for four years, by which point they hopefully understand how to spend it responsibly. Plus, they get goodies from the factories.
* The Reckoners Trilogy of his own invention, usually pertaining to Scottish history and culture.
* The Reckoning, even being forced into the infamous Bataan Death March.
* The Reckoning for cheating with said prominent citizen's wife, resulting in her having to have a painful abortion.
* The Reckoning is set in the aftermath of one. Details are unclear, but it seems to have been caused by a plague. According to a loading screen, it happened between 2014 and 2019, affected the whole world, and in 2019 the number of survivors in the whole world is 100,000 persons. In the proper game, infected are mostly here to provide early opposition to a low level player character, since most of the action is about the war between the human factions.
* The Reckoning, one of the joinable factions is the Aryan Brotherhood, a whole faction of neo-nazi wearing coats with swastikas, swastika tattoos, and wielding World War Two-era German guns (the game is set in 2019).
* The Reckoning, the player can either join one of them or create his own independent faction.
* The recoil from Yosemite Sam's six-shooters is strong enough to make him airborne when firing downward.
* There comes a moment when the Fourth Doctor wonders why he likes humans so much, seeing as we have "such limited brains".
* The Reconstruction. Also averted with Dehl and Qualstio, who continue to wander and help the world.
* The Reconstruction and extremely formal speech as part of the usual assassin attire.
* the Reconstruction and later Season 10 suggest that his "madness" was likely due to learning of the horrors that Director Leonard Church inflicted on Alpha-Church (and, by association, Epsilon-Church). Upon waking up and realizing Carolina had gone temporarily insane due to conflicting A.I.s
* The Reconstruction, he snaps at Ques, flinging what is presumably a heinous insult at him in his native language.
* The Reconstruction not much earlier, plus the fact that the game has no reason to pretend it's still a happy-go-lucky family-friendly adventure story at that point.
* The Reconstruction, one of the party members complains about the "nauseatingly cheerful" fanfare that plays every time someone joins the group. Since he's promptly told by the bureaucrat they're talking to that all complaints must be filled out in triplicate, apparently this is standard Wadassian guild-registration procedure.
* The Reconstruction; plenty of characters with Noxious skills and affinities are perfectly nice people.
* The Reconstruction, Tezkhra is in possession of one. It runs on energy collection technology he designed himself, and part of the reason for adding it instead of a regular cybernetic arm was field test data.
* The recon team sent through to explore the worlds on the other side of the Stargate in
* The record for the shortest Rumble time was held by The Warlord for twenty years: at Royal Rumble 1989, he lasted all of 2 seconds before being clotheslined over the top by

* The record holder in that game is Lynne, who dies a grand total of
* The recording device the cameras are attached to stopped recording (back in the days of VCRs they commonly "ran out of tape").
* The record label Avex Trax, while Avex is an acronym of Audio Visual Label, the word Trax came from "tracks".
* The Record of a Fallen Vampire sealed in multiple points. This cross-continental journey of dhampirs escalating their attacks (with their highest-ranked officer getting stronger with each death) caused the nomadic half-vampire faction to group together, gain secret control of the entire world, and eventually take command of the moon's first terraformed city.
* The Record of a Fallen Vampire: This series actually uses the word dhampire. They frequently become vampire hunters and are less magically powerful than vampires, but lack vampire weaknesses.
* The Record Of Unusual Creatures (异常生物见闻录)
* The Record Of Unusual Creatures. Both army joined the battle when the living forces start to ran out of momentum.
* The Record Of Unusual Creatures is a series about a ordinary landlord who suddenly got a bunch of supernatural tenants, a contract from god and their adventures.
* The records also appear as an item available for points scored in multiplayer games in
* The Records of Agarest: Noah, one of the three 3rd-Generation heroines. There's also the half-rabbit girl Qua, who makes her debut in the 4th Generation.
* The recovered animals then become the nucleus of the Ankh-Morpork City Zoo. This is under the management of a professional.
* The Recruit, Colin Farrell's character attributes his superior hand gun skills to PlayStation.
* The Recruiter. In canon, his job is to track down (adult) desperate soldiers and convince them to volunteer for unethical science experiments, but he's enough of a predatory creep about it that Wade compares him to a sex offender.
* "The Recruiting Sergeant" (no relation to the above) is pretty much definitive from an Irish viewpoint — that is, the narrator dismisses the blatantly false promises made by the (British) recruiting sergeant and instead turns the song into a recruitment ad for the upcoming fight for Irish independence.
* The Recruit in the pack they're expected to carry through a tropical jungle. Naturally they throw it away to save weight, only to later realise that they were supposed to keep at least part of it for use as toilet paper.
* The recruitment poster for the Cleansers has fine print mentioning that joining them voids all life insurance.
* The recurring bandit also goes without a name, though in his case it's just that it never comes up.
* The recurring character Nobby Nobbs is the subject of massive speculation about his ancestry due to his
* The recurring character of the Rich Texan fits the "fat", "southerner", and "in a white (or, at least, light tan) suit" elements of the trope, though he isn't commonly shown to be sweaty or gluttonous. He is very rich and occasionally somewhat shady.
* The recurring character Stan, a manic salesman who gets locked into a coffin in the second game and released in the third, has been the proprietor of a used-coffin business, a used-crypt business, a used-ship business and a life insurance business, plus others.
* The recurring "Daniel Lennard" cosmetics brand is named after the show's executive producer (and vice-president of Cartoon Network Development Studios Europe), whose face is seen on advertising banners for the cosmetics in some episodes.
* The recurring demon Legion is made of multiple faces with a few more body parts sticking out.
* The recurring guest star posse used to only really apply to Disney Channel's

movies with many actors such as Ryan Merrimaan appearing in multiple ones some of the show actors would as well, but the shows mostly kept to themselves with actors being confirmed to there own shows. Eventually more and more actors from the series started appearing in the movies, and only very recently has this happened with actors appearing on other shows.
* The recurring sketch "Veterinarians Hospital" can also be guilty of this. Rowlf plays an incompetent Dr. Bob who drops a lot of dad jokes, but doesn't save many lives.
* The recurring sketch "What's Wrong With This Picture?" brings some very strange, sometimes perverse contestants on to find a logical problem with a cartoon image. The puzzles are easy enough for a child to solve, but the contestants completely misunderstand the exercise. (The first sketch justifies the poor choice of contestants by noting they were the only ones available "at 2 P.M. on a weekday.") For example, an image depicts a woman looking in a mirror, with the obvious mistake being that she wears a belt and her reflection does not. The contestants' guesses for what's wrong with the picture include "She's four years old and the boobies grew too fast," "Her twin's in that fish tank and she can't get out," and "She just did blackface and got away with it."
* The Recursive Simulacrum, or "Matrix Hypothesis" — Building a ship in a bottle, on a ship in a bottle, basically. Someone creates an artificial world, be it a computer simulation,
* The recycled footage of Steve singing the ending theme in the first season only (which starts with him giving a thumbs-up to the kids).
* The recycled footage of Steve singing the rules of the game at the beginning of each episode. There were a few versions of this that were used in multiple episodes. In later episodes, the theme starts immediately after Steve receives his notebook.
* The redaction of confidential words and phrases from documents can potentially backfire, if the non-obscured context of the redaction makes it clear what
* The Redacverse, arachnocurrillas are basically sasquatch-like creatures with giant spider legs.
* The Redacverse has him walking into a bear trap set by one of his employees.
* The Redacverse long and 1 light year wide. Only its front end is seen.
* The Redacverse loves messing with this trope. Some characters can have octopus counterparts with similar names, but spelled with an "octopus accent" (for example, Matthew's counterpart is named Maffhew). Another kind of counterpart can be found on the Moon (Mattis for Matthew or Terrys for Therry). And then there's a whole group of characters known as Your Father, His Father, Your Son...
* The Redacverse's retroactive introduction starts with two Readers sitting in armchairs with floating pages everywhere. They even get an explanation of the story directly from the Narrator.
* The Redacverse that the comic doesn't take over-the-top violence too seriously.
* The Red Alert series has missions which feature explosive fuel barrels that are often conveniently placed next to key targets.
* The red and blue teams are simulation Troopers. They are a part of the Army, just a part where the soldiers are considered expendable. Its also hinted that the simulation war was a testing ground for Project Freelancer exclusive, which they used to test stuff, train their Agents and recruit new Soldiers (as seen with Donut).
* The Red and the Black, the cynical, self-centred protagonist obtains a collection of prewritten love letters from an acquaintance. From then on, he doesn't even bother reading his mistress's letters when they arrive, instead simply copying out another letter, inserting her name in the right places, and sending it to her without another thought.
* The Red and the Rest constantly calls attention to the technology and culture of the pre-9/11 noughties while hinting at the awful event to come.
* The Red and the Rest takes place in a parallel Earth where the major difference seems to be a link to one of these. The main characters soon find themselves lost in the world of lost things, which really kicks off the plot.

* The Red and the Rest while bragging about how his transformation will make him invincible.
* The Red and the White, a White Army officer, confronted by his subordinates terrorizing civilians (a problem for the White Movement), tears the epaulets off the ringleader before having him executed.
* The Red and the White, where an entire Bolshevik company dies in a suicidal bayonet charge.
* the Red Army, clones of Maddie, Harry, the other Red Room prisoners, and the Avengers, all of whom are given super-soldier bodies. Unfortunately for them, they're up against the Dark Phoenix, and so are more of a Red Shirt Army
* The Red Army's leadership frowned upon and tried to curb war crimes, rape being the most common, and most of which were committed
* The Red Army's paratroops probably had the worst time of it and the lowest survival rate of any airborne troops during WW2. Prior to the war Russia had raised paratroop divisions and they were a proud part of pre-war propaganda movies — thousands of parachutes raining men is always impressive in any propaganda movie. However, in the confusion and chaos surrounding the initial German invasion in 1941, hundreds of transport planes were destroyed on the ground. Paratroop units were caught a long way away from the stores that held their parachutes. In desperation, the Red Army command brought together the men and as many planes as were still left. The paratroops were ordered to
* The Red Army used patriotic marches, broadcast at German lines, as a sort of psychological warfare. The Strauss
* The Red Badge of Courage and a movie based on his own war experiences.
* The Red Badge of Gayness", when Kenny got killed, Grandpa Marsh yelled "You bastard!" which Kyle responded with an annoyed "Hey!"
* The Red Balloon, in that it does seem to have a definite mind and will of its own.
* The Red Balloon — won an Oscar for Original Screenplay, the only short to ever win any of the big Oscars (Picture, Director, Actor, Actress, Original/Adapted Screenplay)
* The Red Balloon: The film is about a sentient red balloon that follows a young boy around.
* The Red Baron and all-round cad Lord Flasheart simply cries "what a poof!" and shoots him on the spot.
* The Red Baron begins with Richtofen and his wing buzzing the funeral of a British pilot so he could drop a memorial wreath.
* The Red Baron meant to evoke the nickname of his unit Jagdgeschwader 1, "Richthofen's Flying Circus" so called because of the colorful planes and even more colorful, accomplished pilots that comprised it.
* The Red Baron, one of the pilots at a burlesque bar has one of the girls hanging off his shoulders and he protests, "I'm married, you know!"
* The red, blue and green potions sell at Fry's Electronics. The guitar used in
* The Red Book is an experimental short showing a woman with amnesia struggling to regain her meories, done with cut-outs against painted backgrounds.
* The red button at a multi-site site, run by Sprint, that says "push now". The old version of the site opened with a USB device
* The red cameras take better pictures? Not to be confused with the RED cameras, which take better (motion) pictures and are colored black.
* The Red Chord was based around Guy Kozowyk's experiences with the various psych patients who regularly walked into the convenience store that he used to work at, as said store was located next to a psychiatric hospital.
* The Red Clan's initiation involves the Red King engulfing his hand in fire, and the prospective member shaking his hand. If you don't get burnt, you're in. No guarantees of safety, or survival, for that matter.
* The Redcliffe questline has a few different options for how you deal with the
* The Red Company. With exception of three or four sorcerers, they're all
* The red construction worker in "The Butterfly" is just mildly annoyed that his head got knocked off, and the construction workers in general (all LEGO men) don't

seem to care about losing limbs either, just putting themselves back together offscreen.
* the Red Court anyone who could throw a fireball into their ranks which obvious didn't help the elite status. That said, the war goes on for a few more years after that, so by the end of it all the remaining Wardens are genuine badasses with a good deal of combat experience.
* The Red Court approximate this, with far more overt political influence in their heartlands of Central and South America (when
* The Red Court vampire Arianna used water magic to counter Harry's fire magic during their duel in
* The Red Court vampires are large, slimy, flightless bat-creatures who hide behind idealised human flesh-masks.
* The Red Court vampires (big bat-like monsters that can disguise themselves as humans), despite how pleasant they can seem on the outside, have exploited chaos in some parts of Latin America to set themselves up as strongmen with a steady supply of food. They mostly get those followers through
* The Red Court Vampires have built up a powerful magical curse to destroy Harry by sacrificing hundreds of people to prepare the curse, and at the right moment, the key sacrifice would unleash it.
* The Red Cross, by international treaty, owns the rights to a red cross. Using it in your video game to show medical supplies or
* The red crystal tells Sombra that the Crystal Heart will destroy him if he doesn't take it out of the equation first.
* The Red Death is an evil version of this trope. His offspring, the vampires, were once the dominant species on Earth, but as mankind found other gods to worship the Red Death and vampires lost their power until they eventually went dormant. That is, until the carnage of World War I reawakened them.
* The Red Death to the Flash. He is just as fast as him and can infect others with a corrupted version of the Speed Force that causes
* The "Red Dirt" music of Texas is in a similar situation. Many bands and artists spend years, even decades, gaining massive fanbases in Texas, but never strike it big elsewhere. It's to the point where Billboard publishes a separate country singles chart just for Texas.
* The Red Dragon is the brother of the Secret of the Void and is a bona-fide Eldrich Abomination
* The Red Dragon pistol. You get it by completing with a perfect score in the shooting gallery. It does immense damage with a single shot, but in manual aim mode, its
* The Red Dragon Samurai: Kenny handily defeats Raynare with Samurai Jack's sword and is about to finish her off when she falls to her knees and begs for mercy. He tells her to leave and never return, but then she stabs him in the gut and calls him a fool for falling for her ploy. Fortunately, Rias shows up and revives him as a Devil.
* The Red Dragon's Lair card game made an expansion in 2015 that made Krampus a boss.
* The Red Dragon's Saber: Artoria fought in many wars during her life and is utterly sick of them. She wants to make sure Issei and Asia never have to experience one.
* The Red Dragon's Saber: Artoria's beatdown of the Fallen Angels is partially shown from Raynare's point of view. It shows her growing frustration over getting her butt kicked and then her terror when Artoria chops off their wings.
* The Red Dragon's Saber: Averted. While fighting the Fallen Angels, Artoria Pendragon becomes tempted to try to tank one of their light spears to test her Magic Resistance skill. She decides it is not worth the risk and continues dodging and blocking them.
* The Red Dragon's Saber, can easily avoid their attacks and smack them around.
* The Red Dragon's Saber: Raynare and her Fallen Angels say it is impossible when Artoria Pendragon effortlessly kicks their butts.
* The Red Dragon's Saber: Rias Gremory uses her influence in the school board to

get Asia Argento and Saber enrolled in Kuoh Academy. Saber resembles Asia enough to pass for her sister.
* The Red Dragon's Saber: Shortly after being summoned, Artoria Pendragon declares Issei Hyoudou and Asia Argento to be under her protection.
* The Red Dragon's Saber: When Artoria first appears, she has her usual stoic look. When she identifies Issei and Asia, she smiles. Issei is awestruck, telling himself he didn't think she could be any lovelier, but he was wrong. Asia also likes her smile and decides to trust her because of it.
* The Red Dwarf name painted on the exterior of the ship is Eurostile Bold.
* The ReDead are also infamous for this. You're wandering around in a dark temple, or below a scary well or tomb, minding your own innocent business...then suddenly, a terrifying mutilated scream sounds and before you can even spin around to see the source, BOOM, you're frozen in the paralyzing fear as the ReDead shambles toward you...
* The redeemed and nice Trixie will surely become more prominent than she already is now that it has become canon.
* The Redeker Plan is a pretty rare version in that it is a Subverted
* The Red Elvises song "My Love Is Killing Me" (which appears on the soundtrack of
* The Redemption of Alathas in the past by waiting until he attacked their cabin and kicking him out of reality. Fans were especially upset when he used such a weak ending a second time.
* The Redemption of Althalus: After Dweia shows the assembled group examples of what has been happening in Perquaine (noblemen and priests collaborating to do whatever they want, which includes raping peasant women and seizing a well belonging to a peasant village so a nobleman can grow crops and throw the peasants out), someone asks why they're interfering in the rebellion, as it looks to be long overdue, and Dweia responds that the wrong people are leading the rebellion.
* The Redemption of Althalus, all of the main characters eventually develop a non-romantic version of this, but the couples end up with special, private links.
* The Redemption of Althalus, Althalus lives, loves, and has a child with Dweia. Dweia just happens to be that universe's mother goddess.
* The Redemption of Althalus has Dweia, who loves all things but especially Althalus. She's an interesting variation in that it's primarily maternal rather than romantic love.
* The Redemption of Althalus if he struggled with his vow of celibacy over feeling attracted to someone.
* The Redemption of Althalus is pretty much based on this trope as not only does the hero have to find his allies in order one by one but also encounter his enemy's allies in order as well all according to the future as predicted by the Knife.
* The Redemption of Althalus: Leitha was born with the ability to read minds. Unfortunately, the bad guys know this from the beginning, and from the moment that she joins the group, the bad guys constantly throw horrible and disturbing thoughts at her to try and break her. This is made worse because the bad guys range from a chaotic evil cannibal to a lawful evil warlord wannabe, and just their ordinary thoughts would be bad enough.
* The Redemption of Althalus. The invaders fall for it and get massacred in the streets.
* The Redemption of Althalus, the leader of the Arum tribe at the beginning of the book is Gosti Big-Belly. The name speaks for itself — he's so large he can't walk.
* The Redemption of Althalus, the protagonists live in a house with as many rooms as they like, as large as they like (they occasionally have armies on the march through the corridors) and can open doors to literally anywhere on command. One of the protagonists attempt, out of curiosity, to open a door to "nowhere"—although they avert the attempt before they succeed, the concept is enough to freak out their patron goddess something fierce.
* The Redemption of Althalus, the two sides are being guided/manipulated by two of the three sibling gods.
* The Redemption of Althalus to mirror them (including having similar supernatural

abilities), but they are constantly fighting with each other for authority, their god terrifies them and offers little help, and their house is a horror filled with flames which they do not use to much effect at all. And while they have an army of their own, their commander is obsessed with stone-age culture and at best allows flint weapons, as well as only rudimentary tactics.
* The Redemption of Althalus, where the goddess Dweia and human protagonist Althalus fall in love, but the problems are resolved early on when Dweia reveals her ability to control time, letting her and Althalus to stay together as long as time itself exists.
* The Redemption of Althalus, with the titular Althalus becoming essentially immortal when he becomes the disciple of a god, and it worked the same for his even older evil counterpart.
* The Redemption of Harley Quinn: After being reinstated, Lyle Bolton advocates this to be used on the Arkham inmates to keep them eternally pacified. He gets his wish, and so far it has worked on them all except Clayface and the Joker.
* The Redemption of Harley Quinn: As a result of getting gang-raped by Two Face and his thugs, Harley freaks out when she sees Lyle Bolton hold up a coin, and even moreso when he flips it.
* The Redemption of Harley Quinn: In addition to Lyle Bolton being a sadistic prick, Aaron Cash gives Harley a physical thrashing as payback for his daughter's murder.
* The Redemption of Harley Quinn, most notably Batman and the Justice League being off-planet and Lyle Bolton accepting a position at Belle Reeve.
* The Redemption Squad's battle with the Illuminati after the cancellation of the
* The redesign for Solstice looks nothing like her original design. She was originally an Indian girl that dressed in light-colored clothing. Her redesign has her as completely jet-black and shadowy, with blue hues.
* The Red Fox Monster, Dan the Dog and Tabby Cat snag Red Fox's clothes and use it to disguise themselves as Red Fox so they can scare away oncoming animals by jumping out and shouting, "Dinnertime!" They even scare away Red Fox himself!
* The "Red Freak Facts" on some screens in the Flash horror platformer
* The Red Glare (full-auto rocket launcher), Ballistic Fist (power fist with a sawed-off shotgun mounted on it), chainsaw, and Two-Step Goodbye (a Ballistic Fist with a
* The Red Green Book has a set of badges which parody the Boy Scouts one. The more advanced ones, starting with Bowling and Fishing, require developing an obsession about the content, including dreaming about it. After a few other examples, it terminates with "Anything men enjoy", which can be used for practically anything.
* The Red Green Show, a Canadian sketch show. In one episode's Possum Lodge Word Game, Red tries to get demolition enthusiast Edgar K.B. Montrose to guess the word "fuse". He successfully says the word as part of this phrase...
* The Red Green Show, and didn't want to pit his wits against the future's gadgets.
* The Red Green Show, and says something about how things aren't always as they seem.
* The Red Green Show, and states that the "Native guy" (Greene himself) should have gotten the Oscar.
* The Red Green Show, as part of the Possum Lodge Word Game, Red tries to get explosives expert Edgar Montrose to guess the word "Fuse":
* The Red Green Show aspires to this. Usually he doesn't make it and his inventions backfire horribly, but on rare occasions they actually work. A forklift built out of a K-car is truly a wonder to behold.
* The Red Green Show, as Steve Smith (who played the title character) wrote all 300 episodes. Rick Green (Bill) also wrote for most of the first eight seasons, and other episodes included contributions from Peter Wildman (Buzz Sherwood), Bob Bainborough (Dalton Humphrey), Jeff Lumby (Winston Rothschild), and Patrick McKenna (Harold Green).
* The Red Green Show at the end: When Harold says there were 59 wheels, Red says he won because his guess of a thousand was the closest.
* The Red Green Show becomes a spelling prodigy whenever he hears the sound of a

chainsaw running, apparently because his old cellmate "Chainsaw" would punch him whenever he misspelled his graffiti.
* The Red Green Show, Bill reveals he's found love with a nurse and is moving out of the Possum Lake area to be with her. He and Red spend a last few moments remembering their time together before he hops in her car and heads out on what Red dubs "the biggest adventure of his life".
* The Red Green Show case, and he has attempted to have a dating life multiple times, and in one episode ("Something in the Heir") tried to adopt a child to carry on his family business. The main problem is that his family business job, which he loves talking about and spends a great deal of time doing, is sucking sewage out of septic tanks.
* The Red Green Show devoted an entire segment of each episode (and later multiple segments of each episode) to homemade inventions that could be built with a pile of junk and some duct tape. A choice example is Red's showing the audience how to make their own backhoe using a luxury car, a Thighmaster, a folding ladder, a trash can, some clothesline pulleys, and a lot of duct tape.
* The Red Green Show did a Christmas episode in which Harold attempts to demonstrate proper package-shaking technique and of course sends the (breakable) present flying.
* The Red Green Show didn't have one... until it was imported to the United States.
* The Red Green Show, Ed Frid borrows his girlfriend’s parrot for the animal segment. Unfortunately, the bird calls Ed a loser who can’t commit. To make matters worse, the parrot refers to Ed by name.
* The Red Green Show-esque game where Red tries to get a Lodge member to guess a certain word by giving hints) features Red trying to get Dalton to say "Paranoid".
* The Red Green Show got a lot of mileage out of this trope. "If it ain't broke...you're not tryin'."
* The Red Green Show?) had a support group for... men. Includes the "Introducing Yourself" thing. It also has the "Man's Prayer": "I'm a man, but I can change, if I have to, I guess."
* The Red Green Show, Harold mentions that some people only use the internet for porn. He and Red then both look right at Dalton, who does his best to look casual (and fails miserably).
* The Red Green Show: Harold's first segment where he's at his new financial advisor job in the city shows him trying to get rid of his gum under his desk. When Red shows up to talk to him, Harold bangs his head on the underside of his desk.
* The Red Green Show, Harold tries to stop the men after him and Red by dumping gasoline on the road to slip up the limo behind them. The reasoning? He saw it in a James Bond movie once. It works...kind of...just not the way you'd expect.
* The Red Green Show, Harold will often introduce the guest as his uncle's "best friend in the whole wide room."
* The Red Green Show has been uploaded for free onto the show's official YouTube channel.
* The Red Green Show has Red do this once in awhile using nothing more than duct tape and the odd piece of junk.
* The Red Green Show help him with: sex, by way of a "frank and explicit look at the germination of soybeans".
* The Red Green Show ignoring a recent chain letter craze over the Lodge until Dalton pointed out that Harold, who started it, got a $100 bill from it. By the final act, chain letters are going out like crazy until Harold reveals he didn't get a $100 bill — it was a bill for $100 from the library. It also provides a rare case of the sender getting the bad luck, not just from the bill, but from the others dipping into his cash box to pay for all the letters.
* The Red Green Show: In one episode, the gang has to make it seem like there are women at the lodge, so Harold and Dalton disguise themselves as women. Despite not looking feminine, Harold is asked out on a date.
* The Red Green Show, in one of the scene transitions a line descends through the screen, tightens and hauls up an old leather boot.
* The Red Green Show in that Red didn't use chainsaws as weapons, but as components

in handyman projects. In one episode, he duct taped a chainsaw to a bicycle to create a moped.
* The Red Green Show. In the "Behind The Scenes" special, the character of Bill appears, and points out that many people assume him to be mute, but he is actually quite talkative.
* The Red Green Show in the segment where they examine the three hardest words for a man to say: "I DON'T KNOW!" Thus, the guest is always morphed into one of these. Played straight with Hap Shaughnessy who, in any episode that features him, claims to have invented a common item or to know the reasoning of historical figures due to him being there when they made their decisions (if he wasn't responsible for them making the decision in the first place).
* The Red Green Show is an accident-prone roofer/country singer who can barely carry a tune.
* The Red Green Show is a parody of this, as his hearing loss and missing finger can attest.
* The Red Green Show is Canada's standout example. Red himself is a lesser example, considering how often Bill injures him by accident during the Adventure segments.
* The Red Green Show is that he frequently has to return small items to the people he's talking to, having picked their pockets out of force of habit.
* The Red Green Show often used these, generally explained as Harold being overelaborate; some wipe devices would show up without wiping the screen. Two relatively consistent wipes were a lantern moving in with its light beam showing the last host sequence, and a can tossed in that explodes to introduce 'Adventures with Bill'.
* The Red Green Show once featured an advice segment for what to do if there was no war when you were the right age, yet people still expect a war story.
* The Red Green Show opened with Red commenting on a personality quirk of men, followed by "It's not smart or correct, but it's one of the things that makes us what we are." Later episodes had cold opens where Red would either tell a joke to the audience, or create a quick handyman project.
* The Red Green Show, Ranger Gord, who is slender and lanky, has a cartoon segment in which he is portrayed as having an astoundingly muscular physique, so much so that when he bends an arm or even a finger, there is a metallic squeaking sound.
* The Red Green Show: Red attempts to show us how to build a perpetual-motion machine.
* The Red Green Show, Red gives pretty good advice in his "North of Forty" segments, while he is at his fly tying bench. However, in his "Handyman Corner" segment, his advice of how to build something with the junk you have lying around and duct tape are hilariously the blind leading the blind.
* The Red Green Show, Red Green once said that if there were no more women in the world, men would eventually decide that taking out the garbage is more work than just getting used to the smell.
* The Red Green Show, Red mentions this happening to Buster Hatfield during a hockey game after taking a slapshot from Moose Thompson.
* The Red Green Show Red says "So to make a long story, well, fairly long..."
* The Red Green Show: Red sets up a number of roadblocks in order to get the pizzas he ordered for free, unbeknownst to him, the pizza guy called back and got directions from Harold on how to avoid all of the Lodge's debris.
* The Red Green Show revolved around Harold trying to get a date, first from a video dating service, then a computer dating service. The video didn't get past editing, but the computer service did get him a date: Winston. Guess they forgot to specify gender when it came to their preferences.
* The Red Green Show, set in the Muskoka area of Ontario, was shot in the Greater Toronto Area (the rural areas near Hamilton certainly don't look like northern Ontario).
* The Red Green Show, some of the lodge members are so unhappy with Red's leadership at Possum Lodge that they decide to abandon him and form a lodge of their own, the Salamander Lodge. They even try to lure Red's nephew Harold into joining by offering him a digital editing suite. Fortunately for Red, that lodge

doesn't last too long when they learn of its rules and regulations, and by episode's end, they all decide to return to Possum Lodge instead.
* The Red Green Show's "Possum Lodge Word Game", there was once a coupon for "Tinsel Town: the only store that sells only tinsel all year round."
* The Red Green Show stole, in order, Red's wallet, house keys, pocket knife, car keys, pocket change, boxer shorts, socks, and then shoes. Red noticed none of this and all the viewer sees is Bill give Red a pat on the shoulder. (Episode 108)
* The Red Green Show-style slapstick to jokes directed at everything from big business to feminism to politicians to yuppie lifestyles) provides something for just about everyone, and the overall high quality of the writing also means that people who aren't necessarily the main intended audience for certain types of jokes can still enjoy them anyway.
* The Red Green Show: Subverted Trope once. Ed Frid once shot himself in the foot with a tranquilizer dart and remained conscious long enough to calculate how long he would sleep, give Red instructions on how to deal with the animal they'd captured and lay down comfortably.
* The Red Green Show tends to do this for his wife, Bernice, around Christmastime. He then tried to justify it by saying that the Sunoco logo on the free gas station mugs matched their kitchen.
* The Red Green Show: The majority of the Lodge's escapades are exposed almost exclusively through the characters directly talking to the audience. One recurring skit, "North of 40", has Red talking right to the audience about problems that middle-aged men face.
* The Red Green Show, there was generally an over-reaching plot that they tried to work into every segment of the show in some manner or another. In latter seasons, this practice was dropped, with the main plot of the episode only appearing in a few segments and otherwise being kept out of the recurring sketches like "North of 40" or "Handyman Corner." One of the most notable instances was the "No Duct Tape" episode, in which Red was still seen using duct tape in such segments, even though the plot of the episode was that Possum Lodge had run out of duct tape.
* The Red Green Show to repair a stethoscope, which he used to keep track of his own health while jogging away from things. Red Green asked him if he knew that it could be used to crack a safe, which Mike claimed that he didn't know that earlier. But given Mike's lack of knowledge on the location of his own heart...
* The Red Green Show-type sound. Then along come several other members of Possum Lodge to sing "Happy Birthday" to Harold, but they sing out of tune and hold several notes for long periods of time. Harold is so embarrassed at this sight that he picks up the phone on his desk and calls security.
* The Red Green Show was of Red performing the wedding of long-time couple Harold and Bonnie.
* The Red Green Show, where a microwave is hooked up to a VCR to introduce fast forward (cook something rapidly), rewind (freeze something rapidly), and eject (launches the food product).
* The Red Green Show, where the only bachelor bid on is Harold (the most severe nerd in Canada), who is bought by an attractive woman. Dalton ended up taking both Winston and Mike for $10 to help him do some painting.
* The Red Green Show, which stated that they were written, drawn, animated, voiced by and starring Ranger Gord.
* The Red Green Show, while Red himself relied on duct tape to deal with any situation, Edgar Montrose inevitably tried explosives.
* The Red Green Show winters), and he receives absolutely no paycheck for this (after all, what would he use it for if he can't leave the tower?). The last part is news to Red, who after hearing it immediately tells Gord he should quit. However, after thinking it over, Gord decides not to. Why? Because he figures that his job is so terrible nobody else would ever want to do it, thus his job security is assured.
* The Red Guard, latter the Royal Guards, serving Palpatine. Adorned in their
* The Redguards typically draw from a mix of Arabic and Persian sounding names. Through

* The Red Guy in Brazil outright calls Red Guy "Bum de Fora", 'butt out')
* The Red Guy, which causes the jailer to become nervous and dodge the issue.
* The Red Hat Society, a women's social organization that was originally just for women 50 and older, but is now open to women of all ages. The name of the group comes from the fact that members who are 50 and older wear the signature red hats (with purple outfits) while members who are under fifty wear pink hats (with lavender-colored outfits).
* "The Red-Headed League". A man was a member of an exclusive club only for redheads → A bank heist using an underground tunnel.
* The Red-Headed League: A pawnbroker's assistant is always taking pictures and running off to the darkened basement to develop them. In fact, he's digging a tunnel to the bank behind the shop.
* The redhead Helena Daphnotarthius, a cleric of the Immortal Valerias in the BECMI D&D
* The Red Hot Chili Peppers have had many #1 singles on both rock formats (including 13 on the alternative chart, the most of any artist), yet none of them were "Under the Bridge".
* The Red House Mystery comes to the conclusion that there must be a secret passage from the eponymous Red House to a nearby pavilion. But where in the house does it start? Well, it had better not be in the servant's quarters, because he can't go there without raising suspicion. And the same goes for the master bedroom and other guests' bedrooms and so on. In the end, the only place where he can go look without looking suspicious turns out to be the library. So he looks in the library, and sure enough, there it is! Behind a bookshelf and all.
* The re-digitized release of the film, re-envisions the Sarlaac-pit as being simply a plant-well for a "man-eating plant" pod, that very much resembles "Audrey II" from
* The Red Inn is the serial killer. The police are called and they arrest the priest. Thankfully, they discover an older body, free the priest and arrest the innkeepers instead. In the final scene, the guests pack and leave the inn, only to fall down a ravine to their deaths when they cross a bridge the innkeepers had sabotaged earlier just in case their planned victims managed to escape.
* The Red Inn, name of five movies (between 1951 and 2007). In that hostel, the customers are killed at nighttime and their money stolen while the bodies are buried in the garden.
* The Red Jews: as a rough historical equivalent, but there is limited evidence, if any, supporting this viewpoint.)
* The Red Jumpsuit Apparatus avert this trope overall, as their signature "Face Down" was their only Top 40 hit on the Hot 100. However, it wasn't their highest-charting song on mainstream rock... that honor would go to "You Better Pray", which hit #31, outpeaking "Face Down" by seven spots.
* The Red Jumpsuit Apparatus had two hits in the 2000s: "Face Down", the protest song against domestic violence that made them famous, and "Your Guardian Angel", a romantic power ballad. They were both on the same album, and are the only two songs that the general public knows them for. "In Fate's Hands" was fairly popular as well, but wasn't a hit.
* The Red Jumpsuit Apparatus's song "Your Guardian Angel" is probably meant to sound sweet and romantic… but some of the lyrics, if applied to less-than-ideal situations, seem very much to be Love Martyr talk. The song even contains the lyrics "Use me as you will/Pull my strings just for a thrill", which might give you a pause when you first hear it.
* The Red Knight is a brilliant tactician, an avid schemer and a great sorcerer to boot, but he's an insufferable
* The Red Knight states point-blank that Tempus could stomp him flat if he wanted, but he isn't interested in taking on that section of the portfolio of war.
* The Red Lantern Corps, whose rings are powered by the wielder's own rage.
* The Red Lanterns will die if their rings are ever removed, even for a few seconds. This is because upon their induction in the Corps, the Red Light of Rage replaces their blood. If someone removes the ring, the light goes out, and their

body is suddenly devoid of blood - which is almost always fatal, for obvious reasons.
* The Red-Legged Scissor Man, along with several creatures like him, appear in
* The Red Light District of New Orleans in the early 1900s is heavily featured in
* The Red Lion by Maria Szepes was banned for forty years after being considered "nonconformist" by the Hungarian communist regime at the time.
* The Red Lotus, although they are a villainous version of the trope. Their leader is recently turned airbender Zaheer
* the Red Lotus attacking Korra when she was little in an attempt to kidnap her and train her, molding her to their way of thinking. They wanted her to grow up with the aim of overthrowing world leaders and "restoring the world to its natural state of disorder."
* The Red Lotus is a terrorist group that seeks to topple the world governments to fulfill their anarchists' utopia. While fewer in numbers and less powerful than previous villains, they make up for it by knowing where to strike and let anarchy take care of the rest.
* The Red Lotus is imprisoned, and their assassination of the Earth Queen ultimately paved the way for an even WORSE tyrant to take her place. Zaheer when he reappears in Season 4 while in prison admits this plan worked out badly.
* The Red Lotus planned to end the Avatar cycle by suspending Korra in platinum chains and poisoning her with mercury. The idea was that the Avatar State would activate to try and save her, but ultimately fail. They didn't count on Korra being able to rip the chains from the rock, fly after and subdue Zaheer, and survive the poison altogether thanks to Suyin's metalbending.
* The Red Lotus, where 6'8'' tall P'li towers over her boyfriend Zaheer.
* The Red Mage: A magician capable of casting spells from multiple schools of magic.
* The Red Mage expansion, which marries several schools of magic together to use them in different ways than White or Black Mages. Both have some minor ability to heal other players, but they only get a basic single-target healing spell — which will be less potent than a proper healer's due to their lower Mind stat — and a single resurrection spell, which makes them better at taking some of the pressure off an actual healer's efforts to keep the party alive and in top form rather than taking over for them entirely.
* The red M&M guy does one when Optimus Prime flings a trailer full of strawberry peanut butter M&Ms into the distance.
* The Red Man and the Black Man were used to describe Native Americans and people of African descent respectively. Similarly, the White Man is often used to denote Caucasians in general.
* The "Red Martians" are a genetic admixture of the progenitor races. There are still White Martians in some places, along with Black Martians and Yellow Martians, but they're mostly confined to certain specific areographic regions. There are also
* "The Red Means I Love You", while the subject of their affections is indicated to be trying to get away from them and pleading for them to stop.
* The Red Monarch, Tatsuki does not actively try to hide her gender, but the short hair, baggy clothes - and presumably androgynous appearance - make everyone mistake her for a very cute boy at first.
* The Red Moon from Final Fantasy IV, and the True Moon from Final Fantasy IV: The After Years, are both artificial constructs that can move under their own power.
* The Red Napoleon who has already conquered the rest of the world — and the Americans win.
* The Redneck Instruction Book by S. C. Rawls, a handbook on eating, dressing and behaving like a redneck, references this in one entry: "A redneck... isn't sure Elvis is really dead."
* There doesn't seem to be any sexism among the Death Eaters. Though the majority are males, one of the most prominent Death Eaters is the female Bellatrix Lestrange and a reasonable number can be seen in the films. Moreover when the trio questions whether Dolores Umbridge or Walburga Black were Death Eaters nobody cites their sex as a problem. Even Narcissa Malfoy who isn't an official Death Eater is expected to

participate in their activities on some occasions.
* There do exist exceptions. Most digital SLR cameras beep when the autofocus is locked on, though the expected "click" of the mirror flipping is still audible when the picture is taken. Many cell phones have the option of turning the shutter sound off. Also most professional grade cameras don't bother with sound effects.
* The red outfit comes from the red vestment of a Latin Catholic bishop, which most Western European portrayals of St. Nicholas show him in. But this ignores that St. Nicholas was a Greek bishop and Greek bishops do not wear red. (And who knows what 3rd century bishops wore anyways.)
* The Red Panda Adventures, an enemy agent comments on how flimsy their disguise as a married couple is, right down to his sidekick still referring to him as "Boss."
* The Red Panda Adventures, our heroes are watching from above as their agents beat up some neighborhood thugs.
* The Red Panda also has a network of agents, men and women who act as his eyes and ears and have fought alongside him both figuratively and literally. In the book "The Android Assassins", several of them are the first line of defense against Captain Clockwork's robot army and, during World War II, many of those same agents formed a unit that gained a reputation for doing impossible things behind enemy lines and, for much of that time, any superhero help they got was either incidental or the acts of an amnesiac Red Panda.
* The red panda could be described as 1/4 giant panda, 1/4 raccoon, 1/4 fox, and 1/4 cat.
* The Red Panda has all of the laugh, none of the evil. He often uses an evil sounding laugh, almost as often while tricking foes into shooting at a hypnotic projection of him so it looks like bullets are going right through him, as an intimidation tactic. It frequently works exactlya s desired and unnerves the crooks he fights.
* The Red Panda is a true, dyed-in-the-wool superhero. He adheres to
* The red panda is often mistaken for a type of panda because of the misleading name. The two species are not closely related. Ironically, the name "panda" was first applied to the red panda rather than the better-known giant panda.
* The Red Panzer armor is the one consistent thing about the men who have taken its name. It grants
* The Red Planet on April 1, 1971. They arrive at their destination in October. By this time, there is a lunar colony.
* The Red Planet, the dingo hunter and the flying doctor are not named.
* The Red Planet, the Martians were a race of giants and their visit to Earth gave rise to myths about giants, who were often believed to live in the sky.
* The Red Pony seems to come to an abrupt stop, at least to tenth grade English students. Jody feels sorry for his grandfather and offers to make him some lemonade.
* The Red Pyramid god of knowledge, who was also associated with baboons along with ibises.
* The Red Queen is willing to draw her minions from all races and species (even those she
* The Red Queen's stat readouts of the soldiers. Funnily enough, it listed every single one of them as carrying an MP5K regardless of what they actually carried.
* The Red Ranger Becomes an Adventurer in Another World after the final climactic battle with the Rangers' enemies, and uses his Ranger powers to become an adventurer while he looks for a way home - much to the confusion of the otherworld's residents, who have absolutely no context for sentai heroes or their powers.
* The Red Ranger Becomes an Adventurer in Another World and can only be used at full power when its users put aside their differences and work toward a single goal, generating a laser that causes a huge explosion on impact. But if the users are bickering, the beam will split in half, missing the target completely.
* The Red Ranger Becomes an Adventurer in Another World brings out the best in others, his lack of decorum and his overly destructive powers can create as many problems as he solves if Idola doesn't rein him in.

* The Red Ranger Becomes an Adventurer in Another World, but seems to respect and care for her as a friend rather than displaying any kind of romantic attraction toward her.
* The Red Ranger Becomes an Adventurer in Another World, everybody thinks his costume looks ridiculous, with Rosie Mist calling him a clown.
* The Red Ranger Becomes an Adventurer in Another World for the first time short-circuits Idola's brain, reducing her to slurred speech as she wonders what the hell is going on. Lampshaded by Tougo, who asks if she's okay because her speech patterns completely changed.
* The Red Ranger Becomes an Adventurer in Another World has raised Idola like his own granddaughter ever since her father died. So when Red announces that he'll be living at her mansion until he can make some money, Poseidon's paternal instincts go into overdrive. He then threatens to castrate Red to protect her purity, and it takes Red crying for help from Idola to get Poseidon to stop.
* The Red Ranger Becomes an Adventurer in Another World hero sensibilities clash with the setting he's been thrown into.
* The Red Ranger Becomes an Adventurer in Another World: In addition to the Kizuna Five, there is also a Kizuna Silver, nicknamed "Sil". According to Red, she she was so observant that she could say things you'd never admit as if seeing right through you.
* The Red Ranger Becomes an Adventurer in Another World, landing in a forest far away enough that Tougo has to use his mech to fly over.
* The Red Ranger Becomes an Adventurer in Another World moment to get him and Idola closer together.
* The Red Ranger Becomes an Adventurer in Another World pushing it into space to avert this disaster.
* The Red Ranger Becomes an Adventurer in Another World, Rosie is prone to resorting to violence over the slightest potential affronts to Princess Teltina even when he's the one who started it (i.e. walking in on Idola on top of Red while shielding him from Poseidon's clippers). He later flies into a rage over Teltina calling Red by his nickname rather than his given one, screaming that Teltina had never called him by a nickname before. Rosie's anger only grows when Red starts calling him "Ro-kun", swinging his sword at an oblivious Red.
* The Red Ranger Becomes an Adventurer in Another World, so he believes that any problem can be solved with the power of the bonds between people. He inserts "bond" and "friendship" in his sentences whenever possible, and his response to any crisis to tell others to believe in the power of his bonds with them to help him charge up enough Kizuna Energy to spectacularly win the fight. Lampshaded by Idola, who is surprised that he doesn't talk about bonds after she offers to help him find a way home.
* The Red Ranger Becomes an Adventurer in Another World to go to town on a small army of monsters with ease.
* The Red Ranger Becomes an Adventurer in Another World to him to do it.
* The Red Ranger Becomes an Adventurer in Another World To Idola's frustration, it's incredibly vague and wishy-washy. So long as he's been introduced to someone and knows what motivates them, he considers it a bond and they're eligible to help him use his strongest moves and weapons, but the amount of power produced doesn't follow any kind of constants or rules. Lampshaded by Idola, who complains that it's full of loopholes in the way it decides what is and isn't a bond.
* The Red Ranger Becomes an Adventurer in Another World to Idola's opportunistic and grounded one. She reins him in when his larger-than-life personality is making things worse, and he inspires her to open up to others and seek her dreams as an adventurer.
* The Red Ranger Becomes an Adventurer in Another World, Tougo misnames Poseidon repeatedly, first calling him "Sebastian" and later "Teresdon" despite being corrected the first time.
* The Red Ranger Becomes an Adventurer in Another World, Tougo's Victory Kizuna Buster unleashes a huge laser that causes a massive explosion on impact. But it only works if all of its users are in sync and not arguing with one another,

otherwise the beam will split in half and completely miss its target.
* The Red Ranger Becomes an Adventurer in Another World, Tougo went to both ends of the world while trying to find a way home before realizing that this fantasy world has many of the same struggles as his own world. Because of this, he started travelling from place to place, helping everyone he could while raising his adventurer rank to figure out why he was sent here.
* The Red Ranger Becomes an Adventurer in Another World, which she lampshades.
* The Red Ranger Becomes an Adventurer in Another World with Rosie's help, only for Lurguat to show up merely unconscious on the ground.
* The Red Ribbon Army employs various forms of weapons and other technology (e.g.
* The Red Ribbon Army is a private military able to trounce the public armies that protect the towns and nations of
* The Red Ribbon Army is collecting the eponymous artifacts so they can use their wish-granting powers to
* The Red Robe, a mysterious figure that has been following the Tres Horny Boys throughout their adventure, finally reveals his true identity when they see him possess a clone of his body. Despite him being a relatively minor character before then,
* The Red Robe is a spectral skeleton that stalks the Tres Horny Boys throughout their adventures, from "Petals to the Metal" to "The Suffering Game".
* The Red Robes are likewise liches who have mysterious reasons for following the Tres Horny Boys around.
* The Red Room are described as going through bodies like water, for similar purposes to the above.
* The Red Room. A world where people speak backwards, time works... differently, and
* The Red Room have Omega Red, described as a 'Weapon X reject', and a clone of Alexei Shostakov, the Red Guardian. Their ultimate example, however, is the Red Son —
* The Reds and Blues begin the Chorus Trilogy having crashed on the titular planet. Throughout seasons 11 and 12, every person
* the Reds and Blues of Blood Gulch against Caboose, gets anti-climactically blown up by a grenade Tucker threw into a teleporter at the start of the fight.
* The Reds and Blues, when they're not standing around and talking, each eventually
* The Red Scare was used to legitimate the Suharto military regime in Indonesia- by accusing those who didn't agree with the government of being a Communist-aligned sleeper cell and a threat to Indonesia that must be removed. He proceeded to rule Indonesia for 32 years (1966-1998) after he toppled the previous government in a CIA-backed coup, during the escalation of
* The Red Shoes (2005) Possibly related to the fairytale of the same name.
* The Red Skeleton Show are also rumored to be a source for canned laughter.
* The Red Skelton Show, Freddie the Freeloader wants to get sent to jail for Christmas because it's nice and warm, and he likes the people there. But no matter what he does, he can't get there. Then he meets someone who gives him the incentive to remain on the outside. Only then does he get dragged off to jail.
* The Red Skelton Show, Red is wooing a tall woman with a large, and pushed up, bust. Her father, a short, bald man objects. At one point her father arrives and the young woman runs away. Red does not see this because he is bashfully looking the other way. He reaches over and his hand comes to rest on the guy's bald head. Red panics and pulls his hand away.
* The red skin kinda gives him away, too.) Lampshaded to hell and back several times over throughout the series.
* The Red Skull returns to Earth, and Thanos also brings back Malekith and Hela.
* The Red Sox's first World Series loss during the Curse of the Bambino, which began with trading star Babe Ruth to the Yankees, was to the St. Louis Cardinals in 1946. The team they beat to end the 86 year drought? The St. Louis Cardinals. Bonus points as the player that got the last out, Edger Rentería, was wearing number 3 just like the Babe.

* The Red Sox's rivals' old park was also grandfathered in: Old Yankee Stadium (built in 1923, demolished after 2008) had only 296 feet in right field. This was a point of contention with Charles O. Finley when he purchased the Kansas City Athletics in 1960. Finley wanted to bring the right field fence at Municipal Stadium in to 296 feet, but was vetoed by the American League, so he instead brought the fence in to the minimum 325 feet, had a line painted at 296 feet, and had his PA announcer declare that any fly balls landing in the zone between the line and the fence would've been home runs at Yankee Stadium. This practice would be ended rather quickly, once Finley realized that visiting teams were hitting far more to that area than the A's were.
* The RED Spy is actually disguised as the BLU Scout. hurt their allies...
* The Red Squirrel has one. He has a button to launch a rocket under it.
* The Red Squirrel is the Flying Squirrel's great-great-granddaughter, who got into crimefighting herself after growing up on stories of the Red Panda and Flying Squirrel. To honor both heroes, she wears a red version of the Flying Squirrel's costume. In the Red Squirrel's debut episode, she goes back in time to Depression-era Toronto because one of
* The Red Stapler: A work ends up increasing demand for a particular item.
* The Red Stapler: A work which features a real-life product affects consumer demand for that product (usually by increasing it).
* The Red StaplerThe merch doesn't exist until fans of the work demand it.
* The Red Star are tanks deployed by dropships. They pack enormous fire with their heavy main cannon and sponson-mounted autocannons. Additionally, they double as artillery with their mounted multi-missile launchers.
* The Red Star, Maya is, nine years later, telling the story of the battle that destroyed their Union and killed her husband.
* The Red Star, Maya tries to argue for her husband's survival on this basis.
* The Red Star, mile-long, heavily armored airships armed with Warkasters (military sorceresses). Each kaster is suspended in a special chamber that allows her to project herself temporarily as a concentrated beam of heat. The effect is pretty terrifying.
* The Red Star universe that had not appeared on the comic, plus original art by the writer/artist (and creative consultant, hence the expanded universe information), Christian Gossett.
* The Red Star, warfare makes heavy use of technology and magic in combination.
* The Red Star) went out of business. It was later picked up by XS Games and released in 2007.
* The redstone doorways look like empty doorframes, but walking through one will transport you to a dimension populated by
* The Red String belief is so well known in Japan that this trope is invoked through linguistic gestures: holding up the thumb is used as shorthand for girlfriend and holding a pinky up would indicate a boyfriend.
* The red string of fate has also been referenced in quite a few fanworks that pair Japan with someone. It's most common in Japan/China fanworks, probably because of the concept's origins in China and the tendency for the pairing to be portrayed as a
* the Red String of Fate when they underwent their trial together and fell in love.
* The Red Strings control the love lives of mortals and not deities, but Run Yu remains devoted to Jin Mi, the one woman from whom he accepted the Red Strings.
* The Red Talon's uninhibited hatred of humans led them to eat human flesh. The Red Talons contracted a prion disease from eating human flesh, which they in turn passed on to other wolves, annihilating almost all of their wolf kinfolk.
* The RED Team rely on their special weapons and techniques to pass their driving tests in "Heavy Takes his Driving Test" (Medic using Ubercharge to plow through, Demoman placing stickybombs in specific spots to move the test along, etc.). Naturally, it's because of their methods that they fail their tests.
* The Red Team Sergeant is an example for most of the series, known only as Sarge. However, it is eventually revealed his name
* The Red Team, who never understand him, try to communicate with him this way.

Interestingly, Lopez can understand English perfectly. His voice unit is simply incapable of speaking it. It's eventually lampshaded by Grif in Season 1:
* The Red Ten, comparing the situation to staying in a losing card game and invoking this trope word for word.
* The Red Ten, Red is the World's Greatest Detective and she's found murdered. So her team-mates, the Alliance go hunting for her killer Oxymoron. Which leads them to an island where the Alliance's darkest secrets are revealed and they get killed off one by one for their crimes.
* The Red Tent (1969). Umberto Nobile is the first to be evacuated from the survivors of an airship crash at the North Pole. The film deals with his guilt over this act, as he faces an imaginary court of colleagues involved in the disaster.
* The Red Tent (1969). Umberto Nobile is the first to be evacuated from the survivors of the airship crash at the North Pole. The film deals with his guilt over this act, as he faces an imaginary court of colleagues involved in the disaster.
* The Red Tent, about Jacob and Leah's daughter Dinah, this is one of the main plot points. Jacob loves Rachel but also loves Leah. This is further complicated by the book saying that the handmaidens (Bilhah and Zilpah) are their sisters. Which is true in some Jewish lore as well.
* The Red Tent are implied to be Zilpah's from the aftermath of that incident, that she buried rather than chose to wear.
* The Red Tent blood. (The aforementioned blood meal, for example, is a byproduct of meat-processing.)
* The Red Tent does this with the story of Dinah (daughter of Jacob) in the Old Testament. In this story, instead of Dinah being raped by the prince of Shechem, they had a consensual relationship that her brothers didn't approve of. Instead of Jacob's visions and name change (to Israel) being seen as from God, they are seen as a man slowly going crazy as his family falls apart.
* The Red Tent. In the time of Jacob in the Bible, when girls get their first period their female relatives have a ceremony for them and uses a goddess statue to gently break their hymen, letting the blood soak into the earth. It's a warm, loving and even humorous ceremony; the girl is given drugs to help her relax. The main character Dinah actually has an orgasm.
* The Red Tent; Laban gambles her away. Knowing she'll be mistreated (not that she was being treated well before), she appeals to Leah for help. Leah and Jacob meet the men who were coming to pick up Ruti and with some effort get them to agree to take a bunch of their possessions instead of Ruti. Unfortunately for Ruti, this results in Laban treating her even worse than before.
* The Red Tent, Nobile demanded to stay and lead a search for the remaining 6 crew who were still missing (ultimately they were never found) but was ordered to return to Italy instead.
* The Red Tent. While it is possible to enjoy the story without knowing the Biblical version, it makes more sense if you do.
* "The Red Terror" was a relative of the Ravener species (snake or worm-like Tyranids) that had the ability to burrow its way onto the battlefield and swallow smaller enemies whole. The Red Terror was later removed from the playable creatures: the Raveners got its burrowing abilities.
* The Red Thread by the children's author and illustrator Grace Lin uses this trope to tell a fairy tale about adoption, of all things. In this case, it connects the adoptive parents and their child; magic glasses which enable the parents to see it allow them to find her. It's pretty sweet if you don't read this article first and end up thinking "Wait, isn't that the thing that they use to justify idiotic relationships in anime?"
* The Red Tide includes passion, emotion, action, pathos, zeal, and other emotional traits.
* The Red Tree, and gets in some snarky comments about critics who have found her books too verbose and too weird.
* The Red Tree by Caitlin Kiernan is set in Rhode Island and references Lovecraft and New England's penchant for haunted legends.

* The Red Tree) events that destroyed her sanity and led to her death.
* The Red Tree takes a lot of emotional baggage (and a seizure-inducing neurological disorder) with her when she moves into a farmhouse near the eponymous tree. How much this affects the goings on in the book is left for the reader to divine.
* The Red Tree, the protagonist's late girlfriend, a photographer who specialized in digital manipulation, took art commissions from such people.
* The Red Triangle Gang - the band of terrorist scum (one of whom resorts to the stereotypically Arab technique of strapping dynamite to his chest) working for The Penguin in
* The Red Turtle and has an drastically different artstyle than their usual fare, but it's also the only feature film of theirs to not be directed by the studio's employees, but rather by Dutch-British animator, Michaël Dudok de Wit.
* The Red Turtle has virtually no dialouge save for a man shouting "Hey!" towards the beginning.
* The Red Turtle, the first sign of the mother being alive in the turtle shell is her hand moving.
* The Reduced Shakespeare Company has special appearances by several female celebrities, whose voices sound a little deep. This is because they're not actually female celebrities, but Reed Martin, Professional Impressionist!
* The Reduced Shakespeare Company ("He was tough! He was black! He was jealous as hell!"), starring Mr. T ("I pity the fool who messes with Desdemona!")
* The Reduced Shakespeare Company mentions the use of coconut shells as a character starts to ride away.
* The Reduced Shakespeare Company Radio Show's characters and their need to practice safe sex: "Rap Your Willy!"
* The Reduced Shakespeare Radio Show in Chicago. Eventually they concluded that "the greatest band of the Seventies was Abbott and Costello".
* The Red Violin but it's just the valet — he forgot his overcoat.
* The Red Violin, tarot cards are used to predict the fate of a violin.
* The Red Vixen Adventures almost seemed to mention spacing some of the psychopaths in her ship's original crew when she became captain.
* The Red Vixen Adventures are like this, including Rolas Darktail (a pun on "dark tale" given his family's tragic background), Ali Waterfarmer, Lu Blacksailor, and Kev Highglider.
* The Red Vixen Adventures, but who thought she could set her up with Sallivera. However, Salli didn't like the idea and avoided getting serious with Ali until she got her head together and could handle a slightly more equal relationship.
* The Red Vixen Adventures from his prison cell to reach the life boats and escape the pirate ship he's being held hostage on. Later his captors stuff him into a one man pod described as "an ergonomic coffin" and fire him towards a Patrol base once his ransom is paid.
* The Red Vixen Adventures, her brother Lu (who wasn't on their family's ship at the time) invokes this trope and keep searching twenty years for her.
* The Red Vixen Adventures indicates that in the military Noble caste vixens can start as officers while males have to work their way up.
* The Red Vixen Adventures, is convicted of twenty-eight counts of piracy and sentenced to a lifetime of hard labor. Since it's to be served under the direct supervision of the planetary governor, who is the love of her life, she doesn't mind at all.
* The Red Vixen Adventures, pirate turned bodyguard Alinadar is captured by her old pirate commander and has her entire pelt shaved off and left bound outside in the cold rain to die of hypothermia.
* The Red Vixen Adventures Salli gets one when she sets out to rescue her own bodyguard after they're attacked by space pirates.
* The Red Vixen Adventures, the highest level of authority on the homeworld is a Council of Countesses.
* The Red Vixen Adventures there are at multiple distinct nations on Foxen Prime, the feudal Mother Country is the largest and only nation with an off-world presence

while the second largest is the parliamentary republic of Gerwart.
* The Red Vixen Adventures this trope, usually wearing not much more than a bikini and a gunbelt while conducting business.
* The Red Vixen Adventures uses some form of instant communication, which isn't specified beyond being very expensive.
* The Red Vixen Adventures, while her more brutal rival Bloody Margo is type 1.
* The Redwall Cookbook novels. The recipes are framed by and featured in a short story about a young mouse who works in the Redwall kitchens.
* The Red Web of Fate and can telepathically communicate with him; she is also capable of interacting with other humans for a while in a semi-invisible form if given permission.
* The Red Wedding, but failed: Littlefinger was appointed their Lord Paramount instead of him. However, his second son Emmon is made Lord of Riverrun and many of his descendants get marriages with Lannisters for this. Unfortunately, this has backfired with the Boltons and the Freys, as they are despised throughout the North and the Riverlands and Walder's descendants are getting murdered by the angry relatives of those they killed.
* The Red Wing in issue #2 —Dominic's father, having time-crashed into a Mesoamerican city, is afraid that he'll be mistaken for a god due to his appearance and his technology. Therefore, at the first signs that this is happening, he draws blood from a native priest and then cuts himself to show that he's just as human as they are.
* The Red Wings were consistent contenders despite their playoff struggles, appearing in 25 consecutive post-seasons starting in the aforementioned '89-90 season— a record that was the longest streak in North American sports history at the time. This, however, came crashing down in '16-'17, where the Wings ended up placing third-last in their Conference and missing the playoffs by a large margin. 2018 would prove that this was not a short-lived hiccup, as they would place fourth-last in their Conference, falling a whopping 24 points short of playoff contention, and 2019 saw them miss out on the playoffs by the same margin (while dropping to third-last in the East again, with Buffalo edging them out by two points).
* The Red Wizards of Thay have the "spell lash". It's a spell that kills the caster and makes their body explode. It was invented during Red Wizards'
* The Redwood Massacre takes a shotgun blast to the neck at one point and falls to the ground. A couple scenes later, he gets right back up.
* The Redwood Massacre: The cast starts getting picked off before they even get to their destination.
* The Redwood Massacre: The killer wore a burlap sack on his head, with the rough shape of a face made up of stitches on the front.
* The Red, Yellow and Black Martians are the same way, as are the Orovar White Martians. The Therns and Lotharians (other White Martian races) are notable aversions, however. Not coincidentally, neither race is particularly respectable (the Therns in particular are close to
* the Red Zealot, as he calls him), and he's often seen as the funniest villain out of the entire show.
* The Reef: This Aussie film features four tourists forced to swim to an island ten miles away when their boat capsizes. Through a known shark zone. And yes they do encounter great white sharks.
* there. Egarus quietly destroys (as in, "disintegrates") all sorts of stuff around when it can find anything.
* the re-emergence of the old enemy the Watch was created to hold back: the zombie-raising, icy Humanoid Abominations
* There even exists replicas of the Evoker carried by SEES members. If you're willing to splurge, there's also an officially made one too. (It's a water gun!)
* There Existed an Addiction to Blood is a horrorcore album with a 70's/80's horror movie aesthetic, each track preying on typical horror tropes (ranging from
* There existed rumors of a monster who stood on two legs and yelled much like a person when struck. You'd find them littering the streets, and they weren't

terribly aggressive. Supposedly they would be found around Silent Hill, and could be encountered after beating Alchemilla, but before entering the Sanitarium, and were found frequently in houses. The truth is that these monsters existed in the beta and never made it into the full game.
* There exist fics for characters who were never even named in story, but aren't OCs because their names can be spotted on the class list JK holds up in Harry Potter and Me. No house name, no plot point, barely exist in canon at all...
* There exists a calendar called "Nuns Having Fun", which depicts nuns on roller coasters, eating ice cream, etc.
* There exists a genre in fanfiction where a writer will take an animated show and create a series of fake bloopers and behind-the-scenes stuff for it, treating the characters as actual actors. More often than not,
* There exists an ice of the World Wildlife Fund panda mascot that didn't turn out perfect in most cases.
* There exists an interesting phenomenon: a bootleg Expanded Universe, created in the cracks between copyright laws of different countries. An example is the Expanded Universe several Russian fantasy writers created around
* There exists an order of monks known as the Monks of Cool, who seek ultimate coolness instead of zen enlightenment. An acolyte has achieved this when his master takes him into a room full of all types of clothing and asks, "Yo, my son, which of these is the most stylish thing to wear?" and he responds, "Hey, whatever I select."
* There exists a rare developmental complication where a baby is born without the required openings to remove waste. If this isn't solved via operation, the baby will not survive long; due to the accumulated waste inside of them either rupturing their internal organs, poisoning them, or both. For example, Shiloh was born with “
* There exists a school of thought within the Imperial Inquisition called the Istvaanians.
* There exists a superstition that giving a knife as a gift is bad luck (symbolizing the severance of a relationship). Therefore, it is customary for those who believe this to
* There exists a tape of a British journalist doing a live broadcast at a political event, speaking critically of the fact that few of the reporters at the event were willing to ask the hard questions, preferring to curry favour with Prime Minister Thatcher. As he concluded his rant, the camera moved aside to show a very amused Ms. Thatcher and her entourage had come up behind him. The journalist, without bothering to look, moaned, "She's right behind me, isn't she?"
* , there exists a three-step rule for escaping slashers, and everybody is armed with at least a knife.
* There exists a version of The Seal of Orichalcos that was printed in very limited quantities (around 15) for a tournament event. While the mass-production version of the Seal is pretty mediocre
* There exist security camera recordings of thieves trying to make off with an ATM using either a pickup truck or a front end loader, and occasionally succeeding.
* There exist spam mails where everything is just gibberish - the sender, the subject and even the text. Not even an attempt to slip you malware or sell Viagra. But hey, there is a valid URL in the text! You now possibly feel the urge to click. Don't.
* There exists somewere a European advert for an instant pasta product where a father, after his son finds his coa of the Kama Sutra and starts asking questions, distracts him with the advertised product. It doesn't quite work.
* There exist unions of rather esoteric membership which you wouldn't think should be in the same organization. For example, we have the Communications, Energy, and Paperworkers (As in pulp mill employees and printing press operators) union of Canada. What exactly would those groups of employees have in common? In 2013, it
* The Ref. Although it's more like get into an argument and then almost kiss.
* The Ref, and blaming him for everything that has gone wrong their lives since.
* The reference is to a camp of the Continental Army located at New Brunswick, New

Jersey at the time, where whoring and drinking were rampant and discipline was nearly dead. One poor innocent delegate gets a truckload of jokes poured on him and his family when he says, confused, "That can't be, I have an aunt who lives in New Brunswick!" Of course, by the time
* The references to Facebook pages as "profile pages" in "Who's There?" and "Brooklyn Til I Die" without saying the name of the site.
* The Ref is trying to pull off "the big score, the retirement score".
* The Reflecting Eye features the Grady House, a creepy house filled to the brim with mirrors taken from the scenes of murders.
* The Reflecting Skin experiences a trauma conga line. The main character, Seth, is water cured by his mother as a punishment for the smallest things. Then he finds his friend's body floating in the family well. And that's only the beginning.
* The Reflecting Skin puts a midwestern spin on gothic fiction by setting a tale of serial killers, lust, and madness amongst amber waves of grain and rotting barns.
* The Reflecting Skin to give them the feeling of "hallucinogenic summer."
* The Reflector Specter from "Reflections in a Ghoulish Eye" is a hideous red-eyed demon who hides in mirrors.
* The "Reflex Aircraft" enemies have an energy shield around them, this one has the added bonus of spraying indestructible purple shots everywhere should your regular attack damage it. However, their shields are useless against your special weapons.
* Therefore, they are the greatest adherents of democracy in the game. Due to the pluralism of opinions and an orientation solely to the UN Charter, Peacekeepers have almost no prejudices about economic issues, social values or vision of the future (like other factions), so they can be more romantic in one game and more enlightenment in another.
* The Reformation Coalition following the fall of the Third Imperium has two major voting blocks, Centrists advocate a more centralized government along the lines of the feudal technocracies that govern most of their worlds, while Federalists prefer it more decentralized and democratic.
* The reformed character may still harbor some form of resentment or disdain for the good guys, particularly
* The Reformed Vampire Support Group, they had all greatly resented him for this, and are less sad that he's dead and more concerned that the slayer could go after them next.
* There For You is a self-described "selfish fake" who has requited feelings for a friend.
* The Refrigerator. One is a fat hairy guy who looks to be in his 40s, while the other looks like she is in her 20s. It almost turns to Fan Disservice when they (almost) have sex, before the guy dies of a heart attack.
* The Refrigerator, the killer fridge brings a blender, a trash can, and a pair of fans to murderous life.
* "The Refuge" takes place in the 2000s, by which time it is common for patients with incurable diseases to be placed in stasis until cures can be found.
* The refusal by the white class to support moderate reforms, and their attempts to stave off reforms in France during
* The Refusal Ending, where Shepard instead elects not to utilize the Crucible. Without its power, the Reapers
* The Regalia, King Regis's personal car and the game's primary mode of transport.
* The Regan Wyngarde version of Lady Mastermind. Though hers is more in the "Dagger" style.
* The regeneration process experienced by Time Lords, if not always physically painful, is an extremely traumatic and draining experience. Typically, just after regenerating the Doctor is weakened, partially amnesiac, and, in a few cases, comatose.
* The Regeneration Trilogy, is very bitter about his superiors' ignorance of the soldier's suffering.
* The reggae classic "Sweet and Dandy" by Toots & The Maytals doesn't come right out and say that the wedding it depicts is a shotgun wedding, but the first

two verses imply that the bride and groom might be marrying against their will (she cries, he mopes, their elders scold them).
* The reggeaton song "Mayor Qué Yo" (Older than Me) by Wisin and Yandel has the aforementioned artists courting a considerably older, blonde woman with, um,
* "The Regginator" of America, is well-known amongst Nintendo fans for his many meme-worthy phrases.
* The regime also banned many songs by Portuguese protest singer José "Zeca" Afonso
* "The Regimental Standard", a tie-in website written in the style of an Imperial propaganda piece, references the meme of referring to Lasguns being flashlights, and thus being "twin-linked" if given a flashlight attachment, in
* The Regiment, even at the very lowest ranks, educated to a level that makes them sound to an offworlder like the best kind of college professors.
* The Regiment motivated by money: advanced psychological placement assigns those children best suited for military training, just as it does for all other facets of T'swa society.
* The Regiments of Renown have a special character called the Paymaster, who is protected by four ogre bodyguards. If he dies, the regiment disbands since there's no one to pay them.
* The Regiments of Renown (unique, more powerful variants of regular units) versions of the Dragon Princes of Caledor and the Dwarf Warriors, the Fireborn and the Warriors of Dragonfire Pass, wield flaming lances and axes.
* The Regina Monologues" Homer, as usual, handles this in his usual way when visiting London:
* "The Regina Monologues", Moe guesses that Hitler was the famous person depicted on the $1000 bill.
* "The Regina Monologues" sees the family vacation in London, where Homer crashes their car through the front gate at Buckingham Palace and into the Queen's carriage. Royal guards beat Homer senselessly but stop half-way through to observe the Changing of the Guard. Homer's beating continues at the hands of the next group of guards on duty.
* The R.E.G.I.S. Mk. V in tells people to not panic it while destroying most everything in its path.
* The Regi trio— Regirock, Regice, and Registeel— were created from rock, ice, and metal by Regigigas and activated through the Braille writing on their foreheads. The Crown Tundra expansion of
* The regular Beagle Boys from Disney comics all have prison numbers consisting of two groups of three digits and those three digits are always 1, 6 and 7. Do the math and you discover that there are no more than 36 Beagle Boys, except that there is an endless supply of the Specialist Beagle Boys (the only regularly used Specialist in the stories being Intellectual-176, or I-176 on his prison uniform).
* The regular judge in the series is portrayed often as a feeble-minded old man, who has trouble keeping up with the proceedings. However, you'll often see people lumping moments in which the judge asks for clarification over a specific thing that he should already know about as a judge, or something that
* The regular Lannister soldiers' armor is flaunting the Lannisters' wealth, with red enamelled plates and richly decorated helms.
* the regular Martian Army was based on unsupported Line Infantry fighting with Napoleonic tactics (infantry squares, assault columns and
* The regular Mecha-Mooks, the Martian Centurions, are something of a subversion in any case, being
* The regular premiere of the show happened on July 17th, 1999, which was 4 days after the birthday of Tom Kenny. This continued with the 20th anniversary special, which was released on July 12, 2019, which was a day before his birthday.
* The regular Skill Shot involves shooting the flashing top rollover lane at launch.
* The regular skill shot involves soft plunging to a rollover target, awarding a minimum of 250,000 points and adding 3 seconds of ball saver time.
* The regular skill shot requires plunging the ball into one of two lit "CHILD"

lanes, which gives the player some points and other awards (including adding to their bonus multiplier and lighting the Child's mystery award).
* The regular skill shot requires softly plunging to any Crowd Meter insert.
* The regular sound of South-East Asian rainforest is not birds chirping or animals calling, it's the constant high pitched whine of cicadas. It's quite awful to experience.
* The regular United States Marines during the mission High Value Target could be counted as a redshirt army, given that no matter what, every single one of them dies during or immediately following the ambush.
* The Regulators, a law enforcement group with standard issue dusters.
* The Regulators doesn't care what the place is like, and his aunt/guardian Audrey, the only surviving adult in the household, has much bigger problems occupying her time and energy.
* The Regulators, King will introduce a character, explain that they are just about to die, and then proceed to unload a ton of backstory about the character.
* The Regulators (one of King's works published as Richard Bachman) we have the Tak phone, which is not easily described but may well be the most subtly frightening example of the trope ever.
* There had been a plan to have Reitt turn evil and become an expy of the
* There has also been a lot of criticism of social networking sites because it's easy for young people to meet up with strangers. A few cases of girls getting raped or murdered by people they initially met on social networking sites like Myspace have given many members of the public the idea that everyone on the internet is really a middle-aged creeper trying to hook up with teenage girls.
* There has also been a variation where two wrestlers start at the bottom and race to the top for a dangling title belt, similar to the ladder match.
* There has always been tension within House Lannister and they manage
* There has been a case where a young boy got something stuck in his ear and his brother tried to get it out by pushing it all the way through the other ear, apparently because he's
* There has been a case where Scratch and Grounder's plan seems to have worked without a hitch, a rarity in
* There has been a few other jailbreaks throughout the series; once in
* There has been an apparently serious proposal made to build a mile-long floating city ship, known as the
* There has been articles about how Bugs Bunny called Elmer Fudd a "nimrod", making it seem like he used it all the time, but Bugs only used it once and it was in reference to
* There has been a surge of girls being named after the actress during the peak of her career. By 1935,
* There has been at least one ad for mortgage refinancing made to look like a 24-hour news channel, complete with crawl.
* There has been at least one published research paper showing that female lawyers with small breasts are less likely to win cases than their larger breasted counterparts.
* There has been documented kidney theft among various poor people in India, who were then paid afterwards with "hush money" or threatened with death (
* There has been enough backlash for this practice that it's fallen out of favor. Nowadays it's fairly rare to find a company still engaging in Online Passes.
* There has been investigation into whether nuclear accidents like the
* There has been one such idea that's been getting rolling lately: D-BOX theaters, where the seats shake in sync with the action on-screen. 4DX theaters do use scents, but their main selling points are other environmental effects like wind, rain, and fog in addition to the aforementioned seat motion.
* There has been similar speculation about Gibbs' first wife Shannon and their daughter Kelly, though more of the WMG type, suggesting that they were spirited away into hiding to protect them from the drug dealer looking to kill them.
* There has been so many title changes for this belt that, as of April 29, 2014, Sanshiro Takagi was the 999th champion. He wanted to retire the belt so there would

never be a 1,000th champion, and managed to win a battle royal to retain before getting into a tussle with Poison Sawada JULIE and falling to the mat with the title belt on top of him.
* There has been some debate about whether or not eating mermaids is acceptable under Islam. Given that nearly all mythological portrayals of mermaids portray them as sapient (not to mention quite vengeful), the answer is very likely to be a resounding no.
* There has been some debate of the pronunciation of the Chaos God Tzeentch, with most people agreeing it to be a single syllable with a "tz'" hissing sound following by "zeentch" (as if the speaker were going to say "Zeentch", but had their tongue in a position to make a "T" sound), but others pronounce it "TER-zeentch", "Teh-ZEENTCH", "Teh-ZENCH", "Zench" or "Tench" in rough order of reading ability. As far as Tzeentch goes, it's explicitly said in various fluff sources that (in both fantasy and 40K) different cults and cultures have different pronunciations — indeed often different
* There has never been a moment in the whole series when America has called England "Iggy".
* There has never been an official announcement, but all signs point towards
* There has to be "the Will and the Word" — you gather your Will and focus it with a Word. This uses the same amount of energy as doing it any other way, but means you can pull in energy from your surroundings and apply it with more flexibility. The exact nature of the word isn't important (though Belgarath chides Garion several times for choosing insufficiently impressive words), but there does need to be a word.
* There have actually been lots of monkey- and ape-based creatures in D&D over the years. Listing all of them could probably double this page's length.
* There have actually been two different versions of the U.S. dub. While they are nearly the same, both versions use different voice actors for Papa Smurf, and in the 2nd version, Johan (pronounced as "Yohan" in the 1st version) is called John. (An unofficial 2008 DVD release by Televista somehow has a mixture of both versions in has Johan being called "(Sir) John" up until the scene where he and Peewit first arrive at the Smurf village.)
* There have also been a couple of different variations of challenges meant to make something as good as possible with odd combinations (such as sandwiches with non-sandwich toppings, or having to do something with what you get from two different fast food restaurants), which tend to
* There have also been a few fey-type creatures themed after the Wild Hunt, particularly the Lunar Ravagers, whose society is essentially a perpetual Wild Hunt, and the extremely dangerous, epic-level Hoary Hunter that comes after its prey on cold, moonlit nights-the only way to get a Hoary Hunter off your track is to kill it and its fellows, evade it nine times, or live the rest of your life somewhere that never, ever experiences the Hunter's preferred conditions-it will wait for decades if necessary.
* There have also been a few inversions of this trope where the victim tried to speak in between blows:
* There have also been a lot of documented agent provocateur activities, both recently and a while back. In 1977, CBS News obtained a US Army document that detailing plans for dealing with protesters at the 1968 DNC. According to the document, about one out of 6 people at the protests was an FBI operative or some other type of government asset.
* There have also been cases of shows cancelled after one or two episodes
* There have also been complaints, of all things, about Blizzard's attempts to simplify the stat system, under the premise that players shouldn't have to consult a strategy guide, develop spreadsheets, or run third-party simulation programs to figure out if a piece of gear is an upgrade for them or not. (As well as removing stats that were redundant and making Intellect work
* there have also been concerns about sociological trends regarding military service have family who served are less likely to serve. Over the course of several generations, you end up with something resembling a military caste, with limited

interaction between military and civilians, resulting in what is referred to as the Civil-Military Divide.
* There have also been four Jerrys over the course of the show. A gerblin in Here There Be Gerblins, two Hammerhead ruffians named "Regular
* There have also been instances where Mickey has latched onto Pete's back or climbed up him, as in "Two Gun Mickey" or in the
* There have also been laws proposed or passed in order to buffer against the effect of the protests on grieving family members and friends, such as forbidding protests within half an hour before and after the funeral ceremonies
* There have also been numerous examples of Beef Wellington crowing about his $20 payday.
* There have also been occasions where Sylvester DID eat Tweety, but he was then forced to spit him out.
* There have also been Psycho Sam Dudley (real name: Mark Vartanian), who teamed with Big Dick Dudley in the New York City-based USA Pro (later USA Xtreme) Wrestling, Schmuck Dudley (real name: Jeff Roth), who teamed with Little Snot Dudley in the Florida independent scene, and
* There have also been several instances where the culprit will also disguise as someone seemingly innocent (either impersonating someone else or a completely fictional alter-ego) in addition to his or her
* There have also been some laughable attempts to identify "Mormon themes" in
* There have also been studies of packaging where identical detergent is put into different colored boxes and then sent out to be used by consumers. Red and yellow boxed detergents were almost always identified as more effective.
* There have also been suggestions that Eastern Washington split off to become its own state, motivated mostly by the fact that Eastern Washington is mostly conservative, while Western Washington is mostly liberal, but dominates state politics thanks to a larger population. The other proposal that gets floated is attaching Eastern Washington to Idaho, which is seen as more plausible on a population basis (Eastern Washington contains just over a fifth of Washington's population, but if merged with Idaho would make up almost half of the new state's population) and because it wouldn't create any new US Senate seats, thus making it a more politically neutral outcome.
* There have been a couple Disney sequels that have gotten theatrical runs:
* There have been a couple of attempts to nerf the Sonic Screwdriver, by explaining that it doesn't work on anything with a "deadlock seal" (which showed up fairly often for a while, but seems to have been abandoned), or anything made of wood. Which means that he can use it to hack an alien computer millions of years in the future, but can't open a modern bedroom door. One radio adventure featuring the Fourth Doctor (possibly adapted from one of the lost episodes) also featured a slightly more sensible version; the Sonic Screwdriver can shift the tumblers inside a lock,
* There have been actual groups who are dedicated to worshipping the Great Old Ones and the Outer Gods found in the Cthulhu Mythos, such as a Defictionalized Esoteric Order Of Dagon and the Cult Of Cthulhu.
* There have been advertisements in the past for locking caps that fit over tailpipes to disable them.
* There have been a few attempts of people selling their souls on eBay. Known examples include electronic musician Moby, who put his up as a
* There have been a few attempts, some still on-going, to create this trope in real life, through unlike some of the classic examples of fiction, they don't always use biometrics.
* There have been a few cases where human beings with less advanced technology encountered objects from societies with more advanced technology and came to the conclusion, "Magic." In some cases, the less technological society has converted religions since clearly the other society's god(s) were more capable of giving their "shamans" power.
* There have been a few cases where someone has not gotten behind the white line fast enough. Civilians are nudged gently across it, but monsters are violently

flung across, so it's partially justified.
* There have been a few examples of living people who are aware of ghosts trying to cause their loved ones to die in a place that generates ghosts (like Constance trying to drag
* There have been a few real, official first contact situations on the show.
* There have been a few shows set in the far future which feature static-y TVs for added color (
* There have been a few sketchbook strips featuring characters as this, namely
* There have been a few times it looked like peace would break out at last in
* There have been allegations of the Kosovo Liberation Army murdering prisoners, and murders occurring along the US-Mexico border, for the purpose of organ theft. However, there has been no evidence to support either allegation.
* There have been a number of attempts at "patriotic" (read: right-wing/conservative/Tea Party American) alternatives to
* There have been a number of cases where jokes from comedy and Internet hoaxes have been taken seriously:
* There have been a number of documentaries made about a group of badly disfigured British
* There have been a number of examples of guests like this over the long history of
* There have been a number of fighters through the centuries who Lelith Hesperax, the greatest Wych to fight in the
* There have been a number of highly publicized cases where people used the word "niggardly" and were accused of racism by people who assumed it was a racial slur. It really means "cheap" or "stingy", and is, in fact, completely unrelated to the n-word, having been borrowed from the Norse language. On the other hand, there's really no benefit to using "niggardly" instead of "stingy".
* There have been a small number of ads where he did actually get to eat the cereal: one of them is found
* There have been at least four attempts to sue the makers of Froot Loops due to the lack of actual fruit in their product. So far, none have been successful, because of this trope.
* There have been attempts to win with no artifacts or ego-items (such as
* There have been a variety of unions of people without jobs in the last 100 years. Sri Lanka has an Unemployed Aesthetic Graduates Union containing unemployed drama school graduates.
* There have been beer commercials (Miller Lite?), where store clerks or bartenders — not content to merely enter the cooler or open the fridge — enter a magical portal to some frozen mountain where bottles of beer are physically chipped out of the ice.
* There have been cases in the Papal States wherein the authorities broke the seal of the confessional, at papal direction, to arrest and prosecute murderers.
* There have been cases in which accepted parts for fusions have included humans (
* There have been cases of motorists being pulled over by traffic cops for speeding, and giving the excuse that they confused miles per hour with kilometres per hour.
* There have been cases of online game players fighting or killing each other in real life over virtual property, though the players themselves were usually as much to blame as the service providers.
* There have been Compaq keyboards where the left half of the space bar is replaced with an extra backspace key.
* There have been duels where multiple Duelists teamed up against one single opponent, but there are only a few cases where group of Duelists shared the same field, GY and LP with each other. The first instance was in
* There have been exceptions if one looks at the entire timeline, such as the case of the Terran Hegemony and the Marian Hegemony or the Rim Worlds Republic and the Free Rasalhague Republic, but none (or at least, none with interstellar significance) overlapping chronologically (in both examples, the former was destroyed centuries before the latter came into existence, and the Free Rasalhague

Republic had become the Rasalhague
* There have been Facebook apps that spawn clickbait advertisements of puzzles depicting ways to save a man from his death. In reality, the apps have nothing to do with that, and the Angry Reacts on posts have shown.
* There have been few better examples than the 100,000 men of Vasily Chuikov's 62nd Reserve Army. Based in the Stalingrad district, it was still being formed and had months of training, arming, and equipping still to go when the front lines ended up on their doorstep in early September 1942. In the next two months the 62nd Army was tasked with luring the German 6th Army close to the city through a series of relentless counterattacks, regardless of losses, to make it possible for Soviet mobile forces to encircle the entire army in a counter-offensive operation that November. They succeeded, luring a full 60,000 troops deep into the city and drawing another 120,000 German and 200,000 Italian and Romanian troops within a hundred kilometres of it. In doing so they lost 300,000 men and suffered another 300,000 wounded: this was a full
* There have been fictional and real-life examples of TV reporters getting high while reporting on drug busts involving burn-offs:
* There have been hundreds of novels that take place after final episodes of the various
* There have been hundreds of UXPs announced for Zoo Tycoon 2, but only roughly five or six UXPs ever released.
* There have been increased reports of rats swarming elderly people at nursing homes who are too weak to fend them off.
* There have been instances in which Mr. Krabs has committed multiple acts of corporate corruption to increase his fortune.
* There have been instances where a character admits to doing something bad, and during his speech, he makes a subtle
* There have been instances where Stan and Kyle's usual "Oh my god! They killed Kenny!" "You bastards!" is taken by other characters:
* There have been intelligent and malicious weapons before, but Stormbringer from Moorcock's
* There have been jokes for years about Apple owning lowercase "i" and Microsoft owning the letter "e".
* There have been jokes that Algeria under President Abdelaziz Bouteflika became a Necrocracy after he continued his already-decades-long rule despite being visibly debilitated following his stroke. Such comments intensified after Bouteflika announced he would be
* There have been literal reader avatars around for much longer than that,
* There have been many incidents where somebody steals a car without realizing there is a child in the back seat, and thus accidentally becomes a kidnapper.
* There have been many prisoner exchanges (mostly Palestinian insurgents who were held in Israeli prisons).
* There have been many promotional manga and short manga throughout the series' life.
* There have been many real-life attempts to work backwards from the idea that meteoric iron is awesome to a justification of this idea. Their high nickel content is sometimes credited for making the metal stronger, but it does that mostly by stabilizing a phase of iron called austenite, which is tough but soft (so it won't crack but it won't hold a cutting edge for long, either). People tend to ignore this when imagining swords and similar that are made out of the material.
* There have been many spoofs of Ed McMahon telling people that they've won the Publisher's Clearing House sweepstakes. Ed actually advertised for short-lived rival American Family Publishers.
* There have been many videos in which the troublemaker is a parent. In such videos, the one who grounds the parent is often the child or spouse.
* There have been more than a few cases of doctors deciding to forgo control groups in order to rush out a life-saving drug, only for it to be tragically realized later how ineffective and/or fatal it actually was.
* There have been more than a few cases of obsolete aircraft receiving a new lease

on life via various design upgrades. One dramatic example is the
* There have been multiple Clans have been annihilated or absorbed by the other Clans for one reason or another. The Clans that have been annihilated so far were Clans Widowmaker, Mongoose, Wolverine, Smoke Jaguar, Fire Mandrill, Ice Hellion, Steel Viper, Blood Spirit, and Nova Cat.
* There have been numerous attempts to disprove several Christian relics' more bizarre properties like incorruptibility, the Shroud of Turin, the Blood of Saint Jannarius, the Eucharist of Lanciano, and the waters of Lourdes. Sometimes, these tests prove fruitful while other times they simply raise more questions. In a surprising reversal of how it usually works, there have actually been cases of fraud among skeptics like the attempt by Garza-Valdes to state there was a image of an Aztec goddess painted under the Our Lady of Guadalupe shroud.
* There have been numerous attempts to resurrect recently extinct species — or,
* There have been numerous cases of people putting Visine in drinks, thinking that it's a harmless diuretic.
* There have been numerous guides written for maximizing one's visit to a buffet. Typical tips include things like where to sit, what to wear, what sort of exercise to do beforehand, when to go to the bathroom, and what to drink (nothing, of course, because liquids are cheap and fill up your stomach). See, for example,
* There have been numerous incidents where people were murdered or heavily wounded because their sign language was mistaken for gang symbols.
* There have been numerous throughout the series' backstory. To note:
* There have been occasions in which Bluto has crammed a cup or even a full can of spinach down
* There have been only five comedies winning Best Picture in the last 60 years. It's worth noting that four of these winners —
* There have been other warriors that also fit the trope in style if not in name, such as Season 1's Pirate and Season 2's Vlad the Impaler.
* There have been plenty of friends named "Stacie" over the years and with varying spellings, but the
* There have been proposals for a calendar with 13 months of 28 days each (meaning dates always fall on the same day of the week), which covers 364 of the 365 days in a typical year. The remaining day, New Year's Day, would be a built-in holiday not belonging to any month.
* There have been proposals for an European Super League, bringing together all of
* There have been quite a few of these during the Snickers "You're not you when you're hungry" campaign. One of the funniest involved
* There have been reports of people — not just bronies — getting into comics
* There have been reports that stores have refused to accept $2 bills (a valid but not commonly used bill) simply because the clerk didn't know that they were real.
* There have been rumors of discovery of a board game with simple rules under the countless metagame layers of
* There have been several attempts to create calendars for other planets and moons in the solar system, in case we need to live there someday.
* There have been several attempts to make the District of Columbia into a state, though these efforts have largely been stalled since the District of Columbia Voting Rights Amendment failed in 1985. Though the end effect would be the 51st state, proponents of this plan are primarily seeking representation in Congress over anything else, and some of them would be happy with an arrangement where the city's residents become voters in Maryland (the former section of DC on Virginia's side of the Potomac was already given back to Virginia as what are today Arlington County and parts of the city of Alexandria in 1846), although Maryland's Baltimore-based political alignment is opposed to a large non-Baltimore bloc joining their population. On a national level, Democrats tend to favor DC statehood (which would create two reliably liberal Senate seats) while Republicans tend to favor retrocession to Maryland (which would maintain the current balance in the Senate, only creating one safely blue House seat, possibly to be counterbalanced by a new

House seat in reliably red Utah). One columnist in a local newspaper in Montgomery County, Maryland, upset that his county paid so much more in state taxes than it got back from the state, proposed that the county join the District in seeking statehood.
* There have been several autobiographies written by people with DID; for instance, Nellie Parsons Bean's
* There have been several cases of kids being poisoned from eating laundry pods because they look like delicious candy. Because of this
* There have been several contradicting opinions by the actors and other people involved in
* There have been several examples of a Saracen character appearing in
* There have been several failed attempts to recreate Captain America, none of which have worked out well.
* There have been several hacks of various Emergency Broadcast systems - though doing so is
* There have been several in-character ones over the years. It can be argued that
* There have been several instances of humans having electrodes attached to their pleasure centres for various reasons, and when given free rein about their activation have generally gone to pieces in the same way a heroin addict might be expected to. There's even a term for this... Chronic Thalamic Self Stimulation.
* There have been several instances of pregnant women being kidnapped and having their unborn children forcibly taken from their wombs, generally by women who've been faking their pregnancy and now need "proof" in the form of a newborn. A list of ten such cases in the US appears
* There have been several other almost god-level beings that seem to be close to the same power level of the Q, (including what appears to be an old man who destroyed an entire species with a thought, or the species that ended a war between the Federation and Klingons), although a lot of them are energy beings so they may or may not count.
* There have been several others, including "The Printer's Bible" of circa 1702, in which Psalm 119:161 reads "... printers have persecuted me without a cause..." (It should have said "princes" instead.)
* There have been several people who have criticized the new show as being this, namely that it's become too big for its own good. Some have noticed that ever since the show went from "popular in Britain with cult audiences elsewhere" to "massively popular in multiple markets," some people think there's been a slight downturn in quality.
* There have been several reported cases of survivors of the 9/11 terrorist attacks feeling this way. As well as people who would have been victims of the attacks if not for
* There have been several tie-in Disney storybooks which had the movie told from another character's perspective (besides the
* There have been some attempts to reverse the Flanderization of the Imperium in the tie-in novels, most notably the Horus Heresy books and, of course,
* There have been stories of literal ghost motels, whether one believes said stories is up to them. Such as one story where a couple stayed in a motel, and it was completely empty, but the atmosphere was so creepy that they eventually left. Coming back the next day, the building was gone entirely.
* There have been times when he bumbled due to being distracted when he's advising Kim. Like that time he accidentally launched a rocket ahead of schedule when talking to Kim on the phone.
* There have been times when the Swords of the Cross have been misused, the Holy protection around them weakened enough for the physical vessel to be destroyed, and that power lays dormant. It is not, however, destroyed or gone forever. In the fifteenth book
* There have been times when this network has shown several movies of sharks attacking people back to back. Megalodons (giant prehistoric sharks) are quite often involved, e.g..
* There have been two alternate takes on Dr. 13, making his skepticism something

other than the
* There have been two separate leagues known as the Big East Conference. The original was founded in 1979 as a basketball-first league. In 1991, it added football, and entered into two decades of turmoil, mostly involving the split between schools that played top-level football and those that didn't. The conference finally split along football lines in 2013. The seven schools that did not play FBS (top-level) football bought the "Big East" name, and joined with three other schools to form a new Big East Conference under a new charter. The FBS football schools that were left behind, plus other new members, retained the charter of the original Big East, but are now known as the American Athletic Conference.
* There have been way too many characters feeling "exited." The word you are looking for is "excited."
* There have occasionally been wrestlers in WWE with the same first names though they are normally called by their last names by announcers.
* There have only been a couple of attempts to turn him heel over his near 30-year career and they have all been half-hearted and poorly-received. Most recently, when TNA put him in the Main Event Mafia, Sting was conspicuous in not participating in the beatdowns administered by his stable mates. They eventually threw him out for his disloyalty. He had another heel run in 2010 (an impersonation of
* The Reichenbach Fall", when Holmes and Moriarty confront one another:
* The Reign of Kindo, about the futility of unrequited love. From the second line, the singer is already fully aware that "She doesn't love me," yet he still wastes a lot of time and effort on the girl, which eventually leads him to realize, "How pathetic that I care for the romance of a stranger's wanting eyes/Oh, she doesn't love me..."
* The Reign of Terror" featured a road in Buckinghamshire doubling for Revolutionary France.
* "The Reign of Terror" he's had since the series starts and announces that he's going to just dump Ian and Barbara in wherever the next place they land as punishment for being ungrateful.
* "The Reign of Terror", we are informed by Susan, the Doctor's granddaughter, that he is a French Revolution enthusiast. It doesn't really come up again, although the very first episode had already suggested that the Doctor and Susan had been there.
* The reimagined Battlestar Galactica corrected this; the fighters could turn 180 degrees on axis to face backwards while maintaining the same direction and speed, fire maneuvering thrusters to change direction, and coast with engines off.
* The reimagined BSG also features a bunch of examples. In the pilot, Boomer and Helo's raptor takes damage and starts leaking fuel. Boomer gets round this by shutting the engines down and letting their momentum carry them to their destination.
* The re-imagined series also gives us "combat landings," similar in execution, though not in set-up. When the
* the reimagined series (and the requisite fighters aboard). Scenes on the Battlestar are still played straight, but in general the series has a very different tone than most space navy shows.
* The Reincarnated Vampire Just Wants To Enjoy Her New Life has Scarlet, the main character, look up and marvel at three moons, with technicolor hues, red, green, and blue.
* The Reincarnated Vampire Just Wants To Enjoy Her New Life has the main character, Scarlet, start out as a male disembodied spirit and end up reincarnating as a female vampire.
* The Reincarnated Vampire Just Wants To Enjoy Her New Life involves a man, waiting in the afterlife to head to his final destination, whatever that may be, until a scuffle between another soul and the after-life's security allows him to peek behind the curtain, find a completely unsecured terminal, and reincarnate himself into the female vampire Scarlet in another world, along with swiping admin rights. When the afterlife finds out, they are not pleased.
* the reincarnation of another 19-year-old girl he was friends with... Joan of

Arc.
* There is a 2009 T-Mobile commercial with a part where the customer is in her dummy studio and states that she wants a phone plan that "...doesn't cost one of these and one of these." while holding up a dummy arm and leg then immediately stating that they are in fact "...an arm and a leg."
* There is a +4 magical staff in the game which is stated to be the remnant of a stake at which a powerful witch was burned. It is stated that with her last breath, the witch caused the fire to burn down the entire village.
* There is a banner ad for a deodorant that has a fist made of deodorant residue come out of a woman's arm, snake across the article you're reading and punch a man in an apparently unrelated teeth-whitening ad in the face.
* There is a bed in the 2002 Remake that, when examined, informs you there are footprints that appear to pass right through it. Rumor is there was originally an escape route that came out from under the bed that was ultimately scrapped. A common
* There is a 'behind the scenes' book that claims that the only way race impacted casting for
* There is a being capable of embedding fragments of his soul into others, the fragment absorbs all the knowledge, experience and power of the victim, which he benefits from the moment he recalls the fragment to his own soul. By additionally carving an initial onto such a victim's soul, that victim becomes a means for him to spread his soul to anyone that person comes into contact as well. Recalling soul fragments kills the affected victims.
* There is a Benylin cough-medicine ad featuring the chorus of the Clash's "Should I Stay Or Should I Go". Its context? Should the woman stay at home, or go to work?
* There is a bit of a bug in the game. At the start of a raid, the pirates pick a colony belonging to a player with the highest bounty. If said colony is captured by another player while they're flying to it, they'll
* There is a bit of copypasta floating around the Internet claiming, among other things, that in
* There is a bit of this in the backstory as well if you dig deep enough. In particular, the reason why a derelict reaper ship was found was due to a shot that after hitting it ended up scarring a planet lightyears away.
* There is a bizarre encounter midway through the game with the Scarecrow. While the first two encounters were in-universe hallucinations, the third one begins by making the console appear to lock up and restart the game, this time with Joker taking Batman into Arkham as an inmate. The Joker pulls out a gun and shoots Batman in the face, triggering a fake "Game Over" screen with a "Try This Next Time" tip that's impossible (the console versions say to use the middle joystick to dodge the bullet (lucky there's no N64 version); the PC version says to tilt the mouse). Choosing continue or quit will both bring you to the actual fight stage.
* There is a blessing which grants you a green barrier whenever you enter a room. It breaks after protecting you from one attack. Jezebel the Erratic can conjure a stronger version of this barrier, and she drops a spell book which lets the player do the same.
* There is a blog specifically to capture daily occurrences of bad driving in Los Angeles, known as
* There is a book by a certain Wolfgang Volkrodt suggesting that von Däniken is wrong - gods of old weren't aliens, only a secretive elite of
* There is a book of short stories in which one featured Amelia as an Orthodox Jewish girl who'd always longed to be a pilot. She eventually achieved her goal, but then realized how much she was missing out on, faked her death, and lived out the rest of her life in Bnei Brak or similar.
* There is a book produced for people in radio every year that compiles countless statistics about all stations taken from polls. These are used to attract advertisers. The less successful stations that have very few listeners are often forced to hire people who read through the book to get as many favorable statistics as possible, no matter how convoluted they may be. With the huge amount of data in the book, it's possible to say, for instance, that 85% of married men aged some

arbitrary amount with income in some arbitrary range and who own a ferret will love your show, even though they represent a tiny proportion of the population. Of course, if you're selling ferret food, that's exactly whom you want to reach.
* There is a book that claimed that this is the greatest knock-knock joke ever:
* There is a brand of lightbulbs called Osram (a portmanteau of "osm" [osmium] and "wolfram" [tungsten]). In Polish it means "I will shit on [something]". One Polish joke goes "What hangs from the ceiling and makes threats? An Osram lightbulb."
* There is a Brawler archetype, the Strangler, which has a high-level ability called Neckbreaker; opponents pinned in a grapple must make a save or die instantly.
* There is a British A-level Mathematics-Mechanics textbook that is made up
* There is a British supermarket chain called Morrisons. The "ris" on their sign burning out seems to be a
* There is absolutely no effort to make the voices of any female character in
* There is absolutely no situation that cannot be resolved with a wrestling match on PAY PER VIEW! ORDER NOW!
* There is a Buddhist parable about a woman who goes to join a monastery. She is told that she is too beautiful to join, as it would distract the men from their spirituality. Very calmly, she picks up a brick that was lying on the ground, puts it in the fire, and burns her face. Then, she says "I hope the burn doesn't distract you." In some versions, she also cuts her hair.
* There is a bus company in Germany called Fücker. Many Germans speak enough English to find this amusing. One has to wonder if any of its routes go to the Austrian village of
* There is a cable TV channel in Brazil (Telecine) that once a week broadcasts movies subtitled with Internet slang and Xtreme Kool Letterz.
* There is a Cantonese phrase that roughly translates to "cooked dog head"; when cooked, the flesh shrinks, causing a wide, toothy grin. It is usually used to describe people with Cheshire Cat Grins and up to no good.
* There is a cat race that evolved from Lister's pet cat over some 3 million years. They
* There is a cell phone out whose selling point is that it has a full keyboard, enabling you to "text it how you say it." The commercial consists of various people's thumbs (with their faces on them, mind you) speaking as they type.
* There is a certain (repeatable) quest, the premise of which is that your character is admiring a giant spear, not sentient, or magical, or enchanted. But it radiates so much manly that your character looks to the horizon, spots a Proto-Drake and decides that only one of you will live to see the dawn. To reiterate:
* There is a chain in the Western US called "El Pollo Loco" (The Crazy Chicken). An argument could be made that this is truth in advertising.
* There is a chain of chicken roasters in Arizona called "Pollo Feliz" (Happy Chicken). One suspects this is false advertising.
* There is a Chainsword (a unique magic sword that's a cross between a sword and a chainsaw, described in
* There is a children's book about a band of thieves trying to break into a castle. The lead character, has trained for years and years by his master and is able to open any lock. After the first series of heavy doors, the group gets closer to the throne room, but the locks become more and more complicated. At one door, the character realizes he's faced with the lock his mentor had always warned him about: a hexagonal Devil Hole. He spends a good number of pages agonizing about his abilities until he realizes that the whole point of the Devil Hole is pure mindfuck: it's not a lock. It's just a hole. The door was open all along.
* There is a Chinese official named Cao Gaochao. His surname Cao can be translated as "fuck" in Mandarin Chinese, and Gaochao means "climax".
* There is a Chinese restaurant renamed "Obama" in Toronto, and there was a life size Obama cardboard cutout of Obama outside a hair salon advertising their cheap prices.
* There is a Christian distro of Linux Ubuntu called Ubuntuce or Ubuntu Christian Edition. Along with the standard Ubuntu applications, Ubuntu Christian Edition

includes Christian software like Gnome Sword (a Bible study program for the Gnome Desktop), utilizing The Sword Project, Xiphos, OpenLP, and Quelea. It also includes fully integrated web content parental controls by Dansguardian. Its latest version was released in 2012.
* There is a classic TV commercial for the "real" Yellow Pages that used the slogan, "Get Connected With the Real Yellow Pages." The ad featured a huge, bearded, brutal-looking, tattoo-encrusted Hell's Angel who is upset because he simply is
* There is a clear evolution of the comm officer role over the chronology — in
* There is a clock tower in Athena's Sanctuary that measures time with bright blue flames blazing over the symbols of the Twelve Zodiac Houses. It is ignited twice. The first time is when the
* there is a 'cloud' that increases spirit awareness/power and migrates across the world. It just so happened to be on Ichigo's hometown.
* There is a clue in an earlier comic: Destiny looks in his book and sees an image of
* There is a comic by the Finnish comic artist Petri Hiltunen where a man brings a supply of weaponry to a group of outlaws who turn out to be the
* There is a comic of a sleeping dog dreaming of having caught a car and howling atop it, called "When dogs dream". Larson said later he drew in the car's transmission box where it was supposed to be, but when the editor cleared it to be published newspapers were inundated with mail from offended people thinking that the dog was supposed to be having sex with the car. The caption has been changed to "When car chasers dream" to rectify this.
* There is a commercial for a suicide prevention campaign for San Diego County in California called Up2SD that features a guy that matches the "workman bear" look, standing around in a
* There is a commercial for boots that, in order to show off how much they could take, showed a person from the waist down fixing cars, climbing mountains, riding horseback, and other "tough" things. The person was revealed in the final shot to be
* There is a commercial for NexGard (dog flea medication) that actually has a list of side effects. By all means, we want Fido to be healthy, but a list of side effects on a commercial like that just feels odd.
* There is a commercial for Pay As You Go phones, where a cell phone from the 1980s and a pink modern cell phone are the proud parents, extolling the benefits of their new baby cell phone and how it is going to help people save money on their monthly talk, text, and data plans. And then they walk off screen to go
* There is a commercial with disclaimer text advising whoever reads it to go send their mother flowers or ride a bike instead of staying inside all day playing with the VCR. Fake or added bonuses in the disclaimer is probably not too uncommon.
* There is a common rumor that different cisgender female celebrities are "actually" intersex or transgender.
* There is a common Russian stereotype of Moscovites that they think Moscow is this and everything else except, probably, St.Petersburg, is wilderness. Moscovites often jokingly refer to the rest of the world as "TransMKADia", MKAD being shorthand for the Moscow Beltway.
* There is a common saying: "Offense wins hearts, Defense wins championships". Needless to say, many teams have made and won the Super Bowl with a crummy or average offense (and a no-name Quarterback) but a good Defense. There have been names coined to collectively describe those defensive units in American football lore; to name a few, the Pittsburgh Steelers had the "Steel Curtain", the New York Giants had the "Big Blue Wrecking Crew", the Minnesota Vikings had the "Purple People Eaters", and the Seattle Seahawks had the "Legion of Boom".
* There is a company called Torquemada Games which released 3 Strip Poker games with full format videos. One is a
* There is a company in America called "Accountrements" (famous for products like Devil Ducky, Nunzilla, and historical action figures) who sell an "Angry Mob

Playset," complete with little plastic figures of angry villagers armed with torches, pitchforks, guns, and whatever else an angry villager could find. And this is practically a kids' toy...
* There is a complete world dedicated to them. Naturally, touching one of them is an instant death.
* There is a complex relationship dynamic going on between Nanoha, Subaru, and Teana in
* There is a concept in modern futurism known as the Matrioshka Brain. Originally proposed by Robert Bradbury in
* There is a considerable amount of research on the effects of the environment on various inks and paints, and people who work for companies which produce paint and ink whose job is quite literally to watch ink fade from pages or paint peel off of wood. Of course, as many of these things are designed to last for hundreds of years, there are machines designed to emulate a year's worth of exposure in a single day.
* There is a considerable rivalry between NERV on the one and the U.N. Conventional Forces and JSSDF on the other side in
* There is a contemporary diary from an Italian merchant living in London, who records that people were weeping because the princes had ceased to appear and they assumed they had been murdered.
* There is a creature known as Ayon, who is actually genuine Nightmare Fuel for the first few moments of its introduction. That is, until its ridiculous face is revealed (what we had thought was its face was more like a nose, and its eyes and mouth are hidden), and all fear is promptly forgotten, even as it starts tearing through Soul Reapers like butter and almost
* There is a creature which is identified as an aardvark, but though it has the ears of an aardvark, it has the bushy tail of a giant anteater, and its snout is weirdly elongated to be reminiscent of an anteater (not an aardvark), but that animal would have a tiny mouth at the tip of its snout, whereas the cartoon critter has its mouth at the base.
* There is a credit for "Viblation effects" in the opening credits. Of the English version. Of both the Tanker and Plant chapters. And this wasn't fixed in the
* There is actually a counter when you fight a named opponent showing how many slaves they've used in IN. It gets absurd when you fight Mokou, who apparently uses upwards of a
* There is actually an incredibly advanced online Pokemon metagame where people use an online simulator instead of using the actual game for a more regulated environment. Usage statistics are tracked for everything, and analyzed often. There is also an established
* There is actually a real-life version of the Shepherd's Journal created as a tie-in to Disney's
* There is actually a second version, designed specifically to be used by an Eva mentioned as not being powerful enough to damage the 5th Angel. The only time it sees use is against the 15th Angel... right before it
* There is actually a whole class of legendary heroes who achieved invulnerability by almost but not quite total immersion or exposure to something except for one small spot. Achilles had his heels and Siegfried had his shoulder. The Persian Esfandyar had his eyes closed while bathing in a pool of invulnerability and the Indian Duryodhana, after bathing in the Ganges, protected his groin from his mother's gaze, which was the very thing that gave him invulnerability. You can probably guess how well that worked out for any of them.
* There is actually a whole theoretical model built upon this: Various players do things called "Scrap Banking". For Scrap Banking, the Banker pays 1 scrap for any 2 weapons. In the crafting system, 2 weapons can be turned into 1 scrap if they are from the same class, so in theory the Banker is not losing any "revenue". He then sells the Weapons for 1 scrap each, effectively doubling his scraps with each pass. Any unsold items are crafted into scraps, combined with the others and re-"banked" into more weapons. Rinse and repeat. The problem with this, however, is that any player that can trade (those who have gotten a full version of the game) knows the

values of expensive weapons, and would attempt to sell them on their own. The only weapons they'd scrap bank are ones everyone already has, or are widely abundant. This means that very rarely will this work, and if it works, it's only going to net you a very, very low net gain for the effort you put in.
* There is actually is a pro-hunting educational book out there called
* There is actually some truth to this, as it's been medically proven that women do have lower body temperatures than men, so naturally, they tend to get cold more easily.
* There is a Czech fairy-tale "About the Little Rooster and the Little Hen". The Little Hen and the Little Rooster go searching for nuts (strawberries in another version) together, and the Little Rooster suggests they share everything they find. The Little Hen does share her nut, but the Little Rooster gets greedy and eats a whole nut by himself. He chokes on it and sends the Little Hen for water. The longest chain has the Little Hen asking the Sky to give dew to a Meadow, then the Meadow will give grass to a Cow, then the Cow will give cream to a Malster, then the Malster will give draff to a Sow, then the Sow will give bristles to a Shoemaker, then the Shoemaker will give shoes to a Seamstress, then the Seamstress will give a headscarf to a Well, and then the Well will give water to her and she will give the water to her Little Rooster. The Sky has mercy on her and gives the Meadow dew. Poor Little Hen only takes a beakful of water from the Well. In one version, she comes too late and the Little Rooster dies; in the more commonly known version, she gives him water and he jumps on his legs, healthy, and crows happily.
* There is a debate over whether prosthetic legs such as those used by sprinter
* There is a dedicated button to move and attack diagonally. While it can be iffy if your character is in a T-intersection and can't attack through walls without a 2-tile reach weapon like the lance, it does make maneuvering easier.
* there is a difference Steering Wheel, and an actual Nardi steering wheel.
* There is a dimension where Knuckles the Echidna went mad with power and, in an attempt to "bring order to chaos" as he phrased it, he began to conquer the entire planet. He vanquished all enemies, hero (Sonic, Shadow, Tails, etc.) and villain (Eggman, Ixis Naugus, Snively) alike, making sure to take their souls to form the core of his army for extra insurance. However, upon ruling it, he became extremely bored and allowed a few Freedom Fighters to exist—despite knowing their location already—so as to keep himself entertained. Eventually, dark Knuckles, better known as Enerjak, decided to look for other worlds to conquer three decades after this all had transpired, and in turn, sealed his fate.
* There is a discussion on whether the female version of "Head Honcho" would involve the term Honchette, Honchessa, or Honcharina.
* There is a disorder that relies on this trope. People who crave attention will accept ANY kind of attention, even if it's a bad one because some attention of any flavor is better than being ignored entirely. It's also part of the reason why the
* There is a Doritos commercial where a man tries to show us how to make Doritos, only to accidentally make gold. The commercial ends with him angrily yelling "WHAT AM I GONNA DO WITH ALL THIS GOLD?!"
* There is a Dr. Pepper ad where the head of a biker gang asks some guy what Dr. Pepper tastes like. The guy can only describe it as, "It tastes like Dr. Pepper." The biker is not amused. After beating the guy up, the biker drinks some Dr. Pepper and agrees, "This DOES taste like Dr. Pepper."
* There is a Druid-only spell called One With Nature that functions a lot like the Last Relic of Argus, sending the Druid using it to a random location. In this case, they are all natural locations (
* There is a dungeon called Yngvild where a shunned necromancer named Arondil has taken refuge. After he starts resurrecting the bodies in the crypt he finds that all of them are female, and he slowly realizes the advantages of having an army of reanimated women that bend to his will. Then it gets weird. He discovers it feels a lot better to feel up the ghosts than have sex with the bodies, and proceeds to have his zombies go kidnap more women from the town he was shunned from so that he can murder them and bind their ghosts to his will. And yes, this is
* There is a dutch joke that, translated, goes like this: "Two men are swimming in

the ocean when one of them glimpses something he recognizes beneath the surface. Quickly swimming to his mate, he shouts, "We have to leave the water immediately! I just saw a
* There is a fairly popular military saying that states that "no plan survives contact with the enemy", encouraging to keep plans simple. Complex plans are easily foiled by the enemy doing something unexpected, or simply by things like an equipment malfunction or unexpected weather adding additional layers to an already complicated operation.
* There is a fairy tale about a badass tailor who had an encounter with your standard
* There is a famous joke where three men have been caught by a tribe of natives and get to choose their sentences. The two options are "Death" and "Nugoba"
* There is a famous legend amongst baboons about Sunrise Crownleaf and Moonlight Deeproot. They were as far apart on the
* There is a famous Spidey story where he is forced to track a villain to suburbia and basically relies on free-running to get around because web-slinging doesn't work well on one-story houses.
* There is a fanfic called Harmony of a Moonlit Sky, a crossover between
* There is a few times that characters outside your control battle in fights that look like player controlled battles. Everytime it goes as well as it would in-game, Ranulf would get horribly beaten by both Zelgius and Skrimir and Skrimir would be defeated by Zelgius. A few liberties are taken as Ranulf could only dodge Zelgius if the stars aligned in his way and Skrimir's luck is high enough that Zelgius couldn't do a critical hit.
* There is a fight scene in which the narrative mentions the sound "of a small gong being struck repeatedly".
* There is a film shown to high school music classes that has a segment by an oboe player, talking about how he used to ask children in classes he visited to try to hold their breath as long as he does as he plays the beginning of a Tchaikovsky piece. He then said he had to stop doing that particular demonstration after a child actually passed out.
* There is a fine and proud tradition to use technology in this capacity in the
* There is a fireplace in Versailles that, back in the 18th century,
* There is a five-issue comic book series created by Brian Joines and Dean Kotz with Krampus as the main character, appropriately called
* There is a forest in the Empire called the Witches' Woods, which is inhabited by Wood Elves. No one is allowed to enter the woods on pain of death, not even the province's Elector Count. No one knows what's in the forest, but best guess is Wood Elves that will turn trespassers into target practice.
* There is a formal system called modal logic that can be used to model what certain agents in a system know (including what they know/do not know about what the other agents know/do not know).
* There is a freeware file extractor called "Free RAR Extract Frog". Yes, you read that right, Free RAR Extract
* There is a French story called "La Barbe", where everyone asks a man with a long beard how he sleeps with his beard. In an attempt to answer the question, that night he tries many different sleeping positions, and is unable to get to sleep. The next day, he gets his beard shaved off.
* There is a further Ma'am shock for Americans who come across the British pronunciation of "Ma'am." It
* There is a genre of similar drawings, sometimes called "schkolnaya murzilka" ("The School Murzilka", Murzilka - strange furry soviet comic book characters) in post-soviet areas. It usually contains some combination of
* There is a ghost farmer who keeps zombie cows and zombie chickens near Port Phasmatys.
* There is a giant defense system in Terra's solar system meant to defend it against enemy fleets thousands strong. It includes Kill Sats, moons that were hollowed out and made into bases, and a whole space fleet to name a few items.
* There is a giant Venus flytrap in the Creature Room at Odd Squad headquarters.

Oscar nearly gets eaten by it in "First Day".
* There is a gif that shows a spacecraft speeding towards a Death Star-esque surface. But the surface is recursive, so it never actually gets there.
* There Is a God!: Someone is happy about something they wanted to happen and sees it as proof that God does exist.
* There Is a God!: When a character's belief in a good higher power is affirmed.
* There is a grand total of two people in-universe that like Stannis Baratheon, one of whom is his daughter; although almost everyone respects him as both a masterful commander and a truly just man who will see the guilty punished and the virtuous rewarded while his troops will follow him to the bitter end. Out of story, he's by far the most popular character who doesn't have a point of view, tends to rank in the top ten even with them, and his fanbase of self-proclaimed King's Men are fiercely loyal to him. In large part this is because of his very modern sensibilities; he promotes by virtue of merit rather than birth, favors a centralized society over decentralized feudalism, and is uncomfortable at best with religion if not a downright atheist-but it also helps that he came riding to the rescue of the Night's Watch while everyone else was busy slaughtering each other for the throne, is the only person in any position of power who takes the Others seriously as a threat, swore to avenge the Starks despite his dislike of them, and has a hilariously dry sense of humor. His brother Renly is quite the opposite, a charismatic charmer who easily rallied a massive army to his cause; but is universally despised by the fans due to his total lack of substance, his antiquated view on society, his mocking of both Brienne and Shireen's appearance, and his attempt to usurp his brother's rightful position. Even Stannis' detractors don't tend to hold killing Renly against him, especially as Renly was clearly intending to have Stannis killed and shows no remorse about it, and Stannis is clearly upset at having to resort to killing his brother, and there is a very good argument that he isn't aware of his role in his brother's death, yet still feels responsible.
* There is a Grip Grab ledge that leads from Jinjo Village to the Wooded Hollow. Many gamers doubt its use, but with Bottles' House being permanently locked after beating Tower of Tragedy, if one didn't activate any of the silos from the Wooded Hollow or beyond, they would be unable to access those areas without that.
* There is a group of people in southern Egypt known as Magyarabs who are supposedly descendants of Hungarians brought there by the Turks in 15th century. They were first encountered in the 1930s by Europeans (ironically, László Almásy, himself a Hungarian—who became famous via the movie
* There is a growing fan theory that Xavier and co. are lying, in order to keep Franklin off the island, likely for the same reason there's a ban on precogs (to keep whatever master plan the mutants have a secret). But if that's truly the case, why make the invite to Franklin in the first place?
* There is a growing number of anti-bullying Internet videos such as
* There is a habit of calling all diapers "Pampers". This is especially prevalent in Puerto Rico, parts of the United States, the Caribbean, Poland, the Netherlands, Post-Soviet states, as well as parts of Southeast Asia.
* There is a handwave that a sphere around device is affected by normal (or superfast?) time flow. So the hero is instructed to avoid coming too close to passer-bys.
* There is a hard limit of 89 turns. At the start of the 90th, the game ends in a draw. This prevents two players with some way to infinitely restock their decks or cheese fatigue from having to play "concede chicken", giving you an out that results in no lost rank points.
* There is a hazard in nature called a predator trap, where animals can get hopelessly stuck in thick mud or sticky tar (or in some cases,
* There is a Hentai called this trope, but replace Anything with Anyone. Three guesses what it is about.
* There is a hierarchy for certain cutscene reactions. For instance, when facing the Altenish mages in the Stoneslip Gap, they prioritize Angela first (the runaway princess who has a price on her head), then Duran (the Valsenan loyalist the

Crimson Wizard encountered); if neither are present, they declare the party to be Valsenan spies and try to kill them anyway.
* There is a hilarious ad where a very nice, homey looking Dutch family gets into a car - husband wife, and two kids. They turn on the radio and an English song comes on - a techno song (a real one,
* There is a humorous full-page cartoon in a magazine showing a monkey skating in the jungle by having its feet in banana peels. It would be very hard for banana peels to slide on jungle soil, not to mention that the peels had the "non-slippery" part on the
* There is a Hungarian ballad, Aves Kelemen, which is about a group of masons building a castle but it keeps crumbling (if they build by day, then it'll crumble by night, if they build by night, it'll crumble by dawn) until they get a sign/decide to kill one of their wives and add her blood to the mortar. The first wife to show up bringing her husband's lunch is that of Kelemen, so she is promptly killed and the castle stands.
* There is a Hyborian version of Hinduism that teaches about the system of karma and reincarnation, the difference is that its central god is known as Asura, and its practiced primarily by the Vendhyans (i.e. Hyborian Indians).
* There is a Japanese folktale about the daughter of a village major, Kiyohime. She fell in love with a
* There is a Japanese version of hell called Naraku where you are doomed to constantly repeat your sins for all eternity.
* There is a Jar Jar Binks talking alarm clock doll that tells the time, says phrases from the film, and is able to wake you up...by vibrating!
* There is a joke about a man waking up to his wife giving him a silk cord and telling him: "Tie me up and do whatever you wish." He ties her up and goes fishing.
* There is a joke about a man who wishes for a beer bottle in which the beer will never end. He's still trying to open it.
* There is a joke about a master thief and his apprentice. As a test of skill the master orders his student to climb a tree and steal some eggs from the nest without disturbing the hen. The guy undresses, and climbs the tree but the hen hears him and takes alarm. The master decides to show top class, undresses, climbs the tree and steals the eggs. When he climbs down, both his student and his clothes are gone.
* There is a joke about a millionaire who asks his friend whether his chances to marry a young girl will improve if he'll tell her he's sixty instead of seventy five. The friend points out ninety three is a safer bet.
* There is a joke about a student complaining to his university lecturer about his grade.
* There is a joke about a woman telling her daughter's fiance how pure her daughter is, and goes to show him how modest is the room she never leaves. As soon as the parrot there sees the guy, he breaks into a monologue indicating...the girl might be a
* There is a joke about a woman undergoing several plastic operations. In the end, she asks the surgeon whether he can make her eyes large and expressive. The doctor says "No problem, here is the bill".
* There is a joke about a woman who's worried her child might take after her excessively rude husband, so she has some hypnosis treatment during her pregnancy. When the time comes, she has difficulty giving birth. The doctors check her womb... one guess what they hear from the twins inside.
* There is a joke about Michael Jordan, Bill Gates, the Dalai Lama and a Boy Scout on a plane that is going down. (The identities of the figures vary according to when and where the joke is told. It's a very old joke.) There are only three parachutes. Michael Jordan declares that he is the world's greatest athlete and therefore deserves to live, grabs a parachute and leaps out. Bill Gates declares he is the world's smartest man and therefore deserves to live, grabs a parachute and leaps out. The Dalai Lama offers to give the last parachute to the Boy Scout. The Boy Scout says, "It's fine, Your Holiness. There are still two parachutes. The world's smartest man just jumped out wearing my knapsack."

* There is a joke about some Jews coming to a rabbi and asking him if he can pray for a rain. He says it won't work since they have no faith. How does he know they have no faith? They didn't bring umbrellas.
* There is a joke about two aliens who land on Earth, and try to address a "local" — actually a fuel dispenser on a gas station. Annoyed at him ignoring them, one of the aliens pulls out a blaster, and, despite all the warning from his partner not to mess with the guy, shoots the device. After barely surviving thanks to their personal
* There is a joke amongst comics forums (and this wiki) that someday fans, unsatisfied with the re-emergence of Silver Age aspects, will become DC writers and set things "right" by "putting things back the way they used to be before all this Asylum Running", which basically translates to "Someday new writers will run the asylum so that instead of the Silver Age, it will be the Dark Age instead."
* There is a joke in construction that could easily apply to any field:
* There is a joke involving three men who are each sentenced to receive 100 lashes with a whip as punishment. They are also each granted a single request. The first man requests to have a pillow strapped to his back. After 20 lashes, the pillow is destroyed, so the man only receives 80 lashes. The second man saw what happened to the other guy, so he asks for
* There is a joke that a woman is only afraid of two things; identical ones.
* There is a joke that both uses and subverts this, involving a man listening to his boss speak.
* There is a joke that dogs see humans as gods because we care about them, feed them, treat them when they are ill and stroke them when they are sad, while
* There is a joke that Mexican people have the superpower of making any van they enter into a
* There is a joke that mocks the materialism and status seeking of modern churches, that basically states that if Jesus Christ were to walk into a church dressed as he was in biblical times, he would be immediately shooed out for looking unkempt and wearing rags in "
* There is a joke that plays out something like this: A man and an ostrich walk into a diner. The man orders a burger, fries, and a coke. The ostrich does the same. When the time comes for the man to pay for his meal, he reaches into his pocket and produces exact change. The next day, the man returns to the diner and the exact same scenario plays out. After a few more days of this, the waitress becomes curious and asks the man "Sir, how is it that you always have exact change?" and he answers "I once met a genie who granted me two wishes. For my first wish, I wished that whenever I had to pay for something, I would reach into my pocket and have the exact amount of money I need." When the waitress eventually asks him about the ostrich, he says "For my second wish, I wished for a tall chick with long legs who agrees with everything I say."
* There is a joke where a woman is telling her friend about a guy's penis and claims it's 700 nanometres. The other woman is astonished that it's so small, but the first woman replies that the penis is that red (the wavelength of the color red is 620–750 nm). Somewhat of a subversion—both use the same system of measurement, and it's used correctly, but the
* There is a joke, wherein a guy finds a genie, and it gives him three wishes. The first two were a million dollars and a cool car, but he holds off on the third. While driving in the car, he hears the "I wish I were an Oscar Meyer wiener" commercial on the radio; it's
* There is a joke where one boy cites this as the proper technique for teaching a girl how to swim when his friend asks him for advice. That is, until he learns the girl his friend is planning to teach is his sister. If you're teaching your sister, you just need to push her off the dock.
* There is a joke, which not only requires much Ham to be properly told, but is almost a literal example:
* There is a joke whose origin nobody can point out, but had been popular in the Eastern Bloc:
* There is a kind of hypothetical orbital superweapon commonly termed "

* There is a late dynasty Ancient Egyptian tale in which Pharoah's son and daughter fall in love and want to marry. This being Ancient Egypt their father's only hesitation is over whether it wouldn't be politically wiser to make marriage alliances with other distinguished families.
* There is a Latin phrase that says "Excusatio non petita, accusatio manifesta". Which means "explanation non asked, guilt exposed".
* There is a legend about a Russian nobleman who was sailing across the Caspian Sea when the wedding ring came off his wife's finger and sank to the bottom of the sea. She was distraught, so to cheer her up, he
* There is a legend about a Spanish Galleon stranded in the Mojave desert.
* There is a legend commonly told by parents to their children of a chemical that turns urine a cloudy purple (sometimes red) when mixed with it, pointing out the offender to the pool owner and the other patrons. This story fooled a
* There is a legend from Tennessee about a monster called Skinned Tom who lurks in lovers' lanes. The backstory is that in
* There is a legend that Seleucus I Nicator was warned by the oracle to avoid Argos. He avoided all cities with that name. However, he failed to avoid every single
* There is a lengthy sub-quest which can end with the player becoming arch-mage (read: head honcho) of the College of Winterhold. All the students and professors at the college will praise the character's intense magical abilities. Amusingly, however, the missions involved in the quest are fairly generic and don't require magical expertise. You can roll through the entire quest staving in heads with your warhammer while arrows bounce off your heavy armor, then have a distinguished professor of magic explain that you're the only magician skilled enough to lead the college. Also, despite being Arch-Mage, you still have to pay to get back in if you murder one of your students.
* , there is a lesbian couple consisting of a human and a gargoyle, both original characters. The human is a Native American woman and undercover DEA agent and they're both on the run from drug smugglers.
* There is a lesser extent of type 5 with some of the new writers for season 2 (John J. Miller, Joe Croson, Adam Modiano), as none of them had written for the show before and were perceived as being amateurs or not "getting" it. In actuality, while the script is usually the writer's work, they evolve from boardroom pitches between all the writers and outlines by Karacas, the story editor revising the script over time, and there also being uncredited rewrites. In short, an episode that doesn't perform well doesn't always fall on one person. To contrast with the above situation, the writers and story editor in season 3 seemed to receive less blaming and outrage, perhaps as things had cooled down.
* There is a level where you have to get bad guys up from Hell to Heaven. One of them's a lawyer.
* There is a limit to how many powers they can hold at a time. Copying too many abilities becomes mentally taxing, or may risk a
* There is a Listerine commercial that actually says that "people prefer it two-to-one over the leading brand." To be fair, this can be interpreted charitably to mean "the leading brand made by a competitor." But if it's possible for "the leading brand" to mean this, then that might be the answer to the question, "Why isn't your brand the leading brand?" Maybe it sometimes is the leading brand!
* There is a list of quotes circulating around the internet, ostensibly said by an American politician. They include such dunder-headed quotations as "I'm not indecisive. Am I indecisive?" or "A zebra does not change its spots." Depending on which politician is in the spotlight at the moment, this list of quotes has been attributed in total to just about every President, Vice President or presidential candidate in US history since Nixon. Who knows who, if any, of them actually said what, or if any of the quotes are accurate, but as this list has been circulating the internet since there
* there is a literal Earth-shattering kaboom in the series' final episode. Nova Bombs are not to blame but rather something called Radical Isotopes: stuff with negative mass from another dimension.

* There is a little known manga called Enhanced Human Tale: MAD WANG 1160 which is supposedly in the far future of the Universal Century in UC 1160 although it appears to be an
* There is a long list of characters that start off relevant and then get relegated to cameos and small appearances every once in a while. Examples include Granny, Red, Archie and the Seven Dwarfs. Several others disappear altogether though in their defence they are mostly relevant to one arc.
* There is a long list of things you shouldn't do if you want to survive a meeting with
* There is a loose group of German Web sites collectively known as "Die Redlichen" ("the upright ones"), who are
* There is a lot of Anomalies that you can find and study that deal with ancient mass drivers lost after some battle.
* There is a lot of bad blood between the Lannisters and Martells since Elia Martell was murdered during the Sack of King's Landing when Tywin Lannister sent men to kill her children by Rhaegar Targaryen.
* There is a lot of cartoon violence, or violence that causes extensive damage. Insurance companies prefer CGI violence to the real thing.
* There is a lot of debate as to whether or not Tony Soprano died at the end of
* There is also a boss called The Black Knight, whose armor you can get your hands on.
* There is also a brand of wine called "Cheap Red Wine", although it is meant as a gag (despite being a completely accurate description of the product).
* There is also a certain part wherein Heiji and Conan figures out the dying message, but start, at Heiji's prompting, to subtly lead Kazuha to deciphering the dying message to make her feel better, as she was about to cry.
* There is also a codeword hidden across the site in 'alien' language and a key to decoding it on the Extras page. This in turn gives a clue to an Easter Egg in the last story of Keeley's short story collection,
* There is also a colony of humans founded by those who have been subjects of genetic experimentation and have additional glands that emit and receive infrared signals that interface with any device that has an IR port (in this 'verse, nearly all computers have one). This is the biological version of a neural implant.
* There is also a conversation between Jade and Dave that the former
* There is also a critical reliability issue with spaceflight computing - hardware has to be as reliable as possible, even if that means using very old equipment. If a brand-new processor that's currently on its way to Pluto turns out to be flawed, the replacement options are limited. Similarly, software used in space needs to be reliable, robust, and as simple as possible. Ask an astronaut if he wants to see a desktop-computer-style driver conflict error on his navigation computer.
* There is also a deeper symbolism in the new prophecies of Pythia; rather than the original prophecy of the Dying Leader, in this timeline the scrolls tell of two leaders who will lead the Caravan of Heaven to a new home
* There is also a difference between the way the OCG obtains cards and the way the TCG obtains cards. In the OCG it's perfectly possible to buy a set and have the set to turn out to have 9 commons. If you turn out to have such an unlucky set in the TCG it's always due to a printing error, as the TCG sets usually will have 1 rare card. Whilst it is debatable whether or not this is actual bowdlerizing, one can't deny that it makes buying sets look less like gambling.
* There is also a different explanation; maybe it's not insidious assimilation. Perhaps you just begin to like root beer because it's an acquired taste... just like
* There is also a divide between fans of the episodes in which villains appear and the Mane Six fight them and episodes that follow a more traditional sitcom format in which one or more characters encounter a personal issue and they need to get it resolved. Those who fall into one of these two groups tend to not be too interested in the other type of episode.
* There is also a divine couple with Plot Device level significance, namely
* There is also a drug that a host can take that offers a chance (no guarantees)

that they will retain their identity and free will after being transformed, allowing them to keep their knowledge and skills as well.
* There is also a dungeon where the party must turn themselves into frogs to proceed, probably as a deliberate
* There is also a famous story under Aikikai (practitioners of Aikido) that one of Osensei's original students was nearly robbed in the Paris subway... emphasis on the "nearly." Imagine a seventy-something year old Japanese sitting alone in the subway, when three would-be muggers showed up with knives, demanding his money. Then imagine the old frail man simply snapping their wrists in precise, efficent motions.
* There is also a genetic disease called hypertrichosis, that consists of people having hair practically in all of their skin. It is nicknamed "the werewolf syndrome".
* There is also a giant beating heart in the depths of a Strogg Factory in
* There is also a god, Arkhanos, who encourages their followers to not be 100% sure of said deity's (or any other deity's) godhood. Or gender, for that matter. Arkhanites like to point out that while divine magic works and gods have made well-documented appearances, it's possible that they're simply
* There is also a greater subversion later in the book, when the human protagonist explains human war to an older Tendu and is deeply ashamed. The older Tendu, Naratonen, asks why humans go to war and is told that it's partially resource scarcity. Naratonen tells her about a time in which the Tendu were far too numerous, and the oldest among them designed a genocidal plague and spread it from village to village. Half of the population died before the last surviving oldest one - the others had also died of the plague - taught others the cure and let himself die. Since then they've eaten their narey and changed their ways to keep their population down.
* There is also a group called the Zombie Research society dedicated to fact gathering (as such) about zombies.
* There is also a Hand of the King pin, which becomes unfortunate with what tends to happen to people who wear it in the show, considering the show opens with the death of one of them and bad things continue to happen to subsequent wearers.
* There is also a Justitia decorating the fountain in front of Frankfurt city hall in Germany (in the old days city councils also served as courts of justice), which is often shown as a background picture on German television for court news. This version is bare-breasted with jets of water shooting from her nipples.
* There is also a level where you must build a bridge over a river by using blocks, which you need to navigate all through the level to get them to the water. However if you start with the blocks farthest from the water, you'll discover a pair of swimming fins underneath one of them; alleviating the need to build the bridge!
* There is also a Life Note, which allows anyone, no matter how they died, to be brought back instantly. The Death Notes are essentially worthless. Except...
* There is also a long-running war between Eldar Farseers (who can manipulate current events to change the future) and actual time travelers from the Necron dynasties and Imperial Inquisition (who may or may not have accidentally erased themselves from the timeline).
* There is also a memorable appearance by an "octoparrot" at a dubious center for scientific research which insists that "Polly shouldn't be".
* There is also a metahuman known as "the Turtle", who is able to slow down everyone around him, which seems like he's super-fast to anyone looking at him. He even manages to sap Barry's power.
* There is also a minor branching path in that you can choose to follow Morpheus' instructions to escape the agents by climbing outside of Neo's workplace building.
* There is also a minor Spectre named Necromancer Byaku, but he has no actual power of corpse manipulation, and is the one who got temporarily resurrected instead.
* There is also a monster unique to Ravenloft called an animator that can possess objects and control them. Most animators can only control small objects, but the

most powerful ones can possess entire buildings, and could thus qualify as Genius Loci.
* There is also an abandoned temple of Amaunator with its last followers dwelling there, which can be reached from a passage in the same area where the cult hideout is.
* There is also an episode of The Next Generation that states Ireland was unified in 2024 as a result of effective terrorism (presumably the IRA forcing out the British occupation) that aired years before the Good Friday Agreement was signed in 1998 that saw the conflict heavily reduced and made it unlikely for anything but a peaceful unification to take place.
* There is also an episode where Bart takes karate lessons but gets bored and just ends up going to the arcade. He learns the "Touch of Death" from a game there, which ends up working on his sister and convincing his family he's actually going to his lessons. It backfires later though, when he's actually challenged to use it against the school bullies to defend Lisa and has to reveal he's just been bluffing.
* There is also an episode where Gilligan digs up a buried chest wrapped in chains while digging a BBQ pit for Mr. Howell. The Castaways believe it to be full of treasure and spend the entire episode arguing over weather Gilligan or Mr. Howell has claim over it. Mr. Howell ends up buying it off the rest of the castaways for a very large sum of money. Finally opened, it's full of cannon balls.
* There is also an episode where the crew takes Fry on a tour of the Universe and its tourist attractions. One is a scenic outlook to a parallel universe. The difference? Everyone in the parallel universe is wearing cowboy hats. When Fry asks about there being an infinite numbers of these parallels, he is told that there is in fact only one parallel to their own. His response is that's probably enough. It's also why the alternate universes mentioned above are referred to as "perpendicular" rather than parallel in the
* There is also an episode where the Sphere glitches, and Frank ends up in a
* There is also an exception for the Abrahamic religions. Christianity gets directly mentioned exactly once in the series, and then in a (more or less) positive light. The
* There is also an incident of a runaway train caused by children interfering with the controls. As with all incidents in the series, this was based on a similar real-life occurrence. The train is caught when an inspector on another engine hurls a lasso around the train and catches it, allowing the fireman to jump over to apply the brake.
* There is also an interesting inversion in which Sheridan convinces the League of Non-Aligned Worlds to accept White Stars policing their borders by pretending that the Voice of the Resistance is covering up some new, powerful invisible enemy,
* There is also an interesting note in that humans called themselves 'earthlings' when they first were meeting with alien races in an attempt to avoid the
* There is also an inversion of the normal loop in Tru's nemesis Jack, whose "calling" is to relive the same days that Tru does, but ensure that things play out as fated—the same way they did the first time.
* There is also an item in the game specifically meant for this, the Red Sign Soapstone. It has infinite uses and its only purpose is to leave a sign on the ground others can touch if they wish to challenge you.
* There is also an NPC-block keeping Ark from progressing. Servas is blocking the bridge to the cave Ark needs to enter because he's waiting for his girlfriend to arrive, and won't leave until she's there.
* There is also an official art showing Saruhiko sleeping at a desk, with his King, Reisi's coat on his shoulders like this (you can tell it's his because of his
* There is also an old army joke about a visiting general inspecting the mess hall, and tasting the contents of an unnamed pot. After proclaiming the contents to taste like dishwater, the mess sergeant calmly informs him that yes, that makes sense, considering that is exactly what he just ate.
* There is also a non-human example with Morton Koopa Jr. of the Koopalings, who has inexplicable brownish skin, unlike the yellowish skin that Bowser and the other

Koopas have. Made even weirder by the fact that his head is of a literal white color.
* There is also another example, when Richard prevents himself from going fully mad due to
* There is also another joke that goes: "How is a duck like a bicycle?
* There is also an uncommon infected of Jimmy Gibbs Jr (the racer whose stock car you steal at the end of the campaign) in the final stage of the Dead Center campaign which has a very low chance of spawning. Its normal attacks have the same effect as the mudmen. (Though it is assumed to be motor oil instead of mud.)
* There is also an unnamed martial art used by the Sodan, a tribe of rogue Jaffa. They teach the basics to Cam Mitchell in order to fight one of their own to the death (
* There is also an unsubstantiated story of a golfer landing a ball in a water trap, then taking his next shot from a rowboat when the ball miraculously floated.
* There is also an urban legend according to which, this joke is actually a psychiatric test: if someone laughs at it, he/she has a schizophenia. It may be considered "meta-meta-humor".
* There is also a one-of-a-kind monster known as the Tarrasque. The writers probably put it in there to serve as walking Armageddon. It regenerates with lightning speed, most spells simply bounce off its hide, death effects won't work on it, and if you batter it to death, it'll come back in a few days unless you also used a
* There is also a part in the tavern in the Drow City where your party mage can participate in such fights. Finally, Edwin apparently tried this with Elminster in the epilogue, but lost and got turned into Edwina again.
* There is also a passing mention to Tripurasura, a monster accidentally created by the sage Gritsamad and destroyed by Shiva. Despite his unnatural conception, Gritsamad raised Tripura as his own son and Tripura's diligent work gained him blessings from the deva Ganesh. Unfortunately this blessing caused him to grow proud and wreak havoc across various worlds, so Ganesh relented and helped Shiva, who was finding him particularly hard to get rid of. Still, his meditation on Ganesh's mantra and others qualified Tripura for salvation after death,
* There is also a Penitent Engine mecha-suit that is armored everywhere
* There is also a photo of Marge's grandmother Bambi as a flapper girl with the trademark Bouvier cigarette.
* There is also a point in the game where McCoy mentions that cheese is a black market item, whose illegal distribution evidently comes with jail time.
* There is also a police ship which commits suicide after talking to
* There is also a questline in which Xavius creates visions of Malfurion to confuse Tyrande. He supplies the visions with voice lines, none of which are particularly convincing for anyone who knows the character. Some interpret these as Xavius projecting his feelings for Queen Azhara onto Malfurion: which definitely hints at a bit more of the Sexy Matriarchy variant at least having been more common in the past.
* There is also a radio PSA where another woman describes waiting for her father to bring the cake to her fifth birthday party. He never arrived, having been killed by a drunk driver.
* There is also Aramaki, the last survivor of Team Winter. Aramaki thinks
* There is also a random event that may pop up on one of your colonies involving ancient terraforming tech that was left behind. You can either turn it on or scrap it (the latter reveals the Terraforming tech and gives you some resources). If you scrap it, there's a chance that the planet may return to its original barren state. If you choose the first option (which is a huge project that sucks up your science resources), after a long time it will produce one of several results:
* There is also a random Pak'ma'ra who makes reference to a religious text to explain why Pak'ma'ra eat carrion but refuse seafood.
* There is also a rare and highly durable metal called Orihalcon that can basically negate most spells, although
* There is also a rare JS .44 revolver, which is slightly more damaging than the

normal version, and also has a better accuracy and a 30% critical chance. However, its chamber is limited to three bullets.
* There is also a real 'hanging judge', Mr Justice Vosper, a relic from the days of the noose who summed up dead against one of Rumpole's old clients, leading to his execution. He was later proved innocent.
* There is also a running gag in which all the cast members give the director the finger.
* There is also a scene when Anakin fights Count Dooku, where he deliberately swings above Dooku's head and leaves his back exposed. Concurrently, Obi Wan strolls up to two Super Battle Droids and barely appears to dodge or block any of the laser blasts.
* There is also a scene when Archer-as-Troy, high on a massive dose of drugs he had to take to keep up his cover, goes off on a rant about how he is going to take Archer's "...face... off! His eyes, his nose, his... mouth... off!" which manages to creep out even Troy's jaded goons.
* There is also a scene where, in response to the Soviet suppression of Polish culture in banning religious images, Archbishop Wjotyla holds a religious procession, but instead of the usual focus on the image of Mary, simply an empty frame is displayed.
* There is also a scene where Jack Rakan walks away and loudly says he needs to take a number 2, leaving everyone yelling in disgust.
* There is also a scene, where Jerin disguises himself as female whore. Lipstick is used.
* There is also a scene where Raphael smokes out... only to leave Casey Jones coughing and waving smoke away... then Raphael leans out from behind a nearby structure and chastizes Casey for just standing there like an idiot.
* There is also a second cut-off point on whether or not a warrior can obtain a
* There is also a set of protagonists with a confirmed age, and in-game at that; the unnamed protagonists of
* There is also a slightly more common variant called the Dual Cockpit or Tandem Cockpit configuration, which is closer to this trope: two Mechwarriors occupy the expanded cockpit, where one is primarily focused on piloting and the other on gunnery. Together, they provide superior team performance, being able to hit targets more accurately and control the machine more efficiently. One pilot can also take over in the case that their partner is incapacitated or killed, but this reduces the machine's efficiency down below that of a normal single-pilot 'Mech.
* There is also a small division of grammar vigilantes who berate Apple for claiming that Macs are not Personal Computers. Especially after Apple switched from IBM-Freescale PowerPC to Intel x86.
* There is also a specialized LED device which projects a beam of light that rapidly pulses random colors. Looking at the light for too long messes up your brain since your eyes can't effectively focus on the colors and then you're incapacitated from a number of nasty side effects, like cluster headaches, nausea, vomiting, disorientation, irritability, and visual impairment. The Secret Service has contemplated using this to protect the President. For example, if the motorcade is traveling down a street, and the SS are tipped off that an assailant will strike from a specific direction, all they have to do is point the device in that direction and
* There is also a spell call Murderous Mist, which was a druid spell that created hot steam that could boil your eyes. Then again, there are the more classic Stinking Cloud, Cloudkill, and Acid Fog spells.
* There is also a string of non-contiguous comics whose titles all include the word "amoeba" (e.g.,
* There is also a strip where Patty runs up to Marcie, crowing, "I got an 'N' on my English test! That's the highest grade I've ever gotten!", only for Marcie to tell her she's holding the paper sideways.
* There is also a suggestion that Sylar's original power was in being able to understand how things worked, which implies that he might merely need to take the brains out to study them and somehow make the required changes to his own brain.

How he would do that is another matter entirely. This is actually
* There is also a tendency for Wolverine to be paired up with teenaged girl side-kicks. The general idea is to play a gruff outsider gets hit with fatherly instinct sort of angle, but he does it over and over again! Specifically Logan has formed a duo with
* There is also Athena, who is the most logical of the Olympians. Percy notes that she would be a worse enemy than Ares, or possibly even Poseidon — if she wants you to die, you will die, no matter how long it takes for her to accomplish it.
* There is also a theory that Sulyvahn was the "First of the Scholars", who doubted the linking of the fire. If so, he is directly responsible for the entire plot of the game.
* There is also a throwaway line about car gods becoming the receipents of human sacrifice on a scale unseen since the Aztecs.
* There is also at least one woman who poisoned a number of friends and relatives for insurance money (on policies they didn't know she'd taken out on them). She got caught when she reacted much more emotionally to a death she HADN'T caused and police finally became suspicious. Cases like this are the reason why you can't take out life insurance on an adult without documentation that they know about.
* There is also a trick to making lane travel instantaneous, which involves developing a device that, when fired at a star lane (even red) momentarily destabilizes it, causing all ships currently using it to end up at their destination instantaneously. While this is a one-shot device, there is nothing to prevent players from building specialized ships filled with these devices and use them to create an interstellar highway of sorts, moving warships from one end of your interstellar empire to the other in several turns (as opposed to hundreds).
* There is also Audino, which play a similar role but on land instead. They also function as a
* There is also a very funny scene involving Elliot trying to talk past a patient's kid with Turk in French. Turk's knowledge of that language is evidently limited to what his high-school classmates taught him. The subtitles are roughly accurate. What Elliot says is quite literate. What does Turk say? "I have the Eiffel Tower in my pants." We might add that he says it badly — what he says translates word-for-word as "I have Eiffel Tower pants."
* There is also a video of Robin vomiting on her news show. It's heavily implied that Barney posted the video on YouTube.
* There is also a whole selection of "death sports" magazines Marge was looking at with titles like
* There is also a working pen, which causes an electric shock when you push the button on top of the pen. The harder the push, the more shock. (Something similar is featured during the end credits once on
* There is also Baroque Works' Miss Doublefinger, who could turn her giant curly blue afro (along with the rest of her body)
* There is also both a district and a city named Salzburg, the latter being the capital of the former.
* There is also "Bottle Episode", which has the Titans stuck in a bottle remembering their past adventures.
* There is also chapter 20, where Neji gets a severe nosebleed when he hears about Hinata's breasts getting even bigger than they already were.
* There is also Chrysalis, who at one point states that she's "much worse than a devil". Decidedly
* There is also Clip. Udinaas notices immediately, Seren Pedac needs having it pointed out to her: Clip's shiny swirling chain accessory is a garrotte. He gets an opportunity to demonstrate he knows
* There is also compelling evidence that both narrators are also incredible badasses, as they survive every battle of the campaign and are then hand-picked for small elite teams that decide the fate of the world in the finale.
* There is also Composite Santa Claus, who's half Santa, half snowman. (And by half it's

* There is also considerable debate among the fandom as to whether or not he is actually dead.
* There is also considerable disproportionate representation of minority children in child welfare, in the United States. The reasons are debated but broadly considered consequences of institutional racism. So perception of Child Services' competency and pervasiveness can vary between different communities that are divided largely by race and class.
* There is also crystal melk, which functions just like Zyme in the original game.
* There is also Debbie, a young analyst and admirer to Maya's work, who gives the information that Abu Ahmed may have faked his death because his deceased brother looked like him, prompting the CIA to track him and lead to his home: Bin Laden's compound.
* There is also drawbacks mentioned in Pokedex entries that are not actually
* There is also Entry #12, where the cast seems to notice him but not his
* There is also Eris, goddess of discord. On top of having a hand in causing the Trojan War, she was also known for causing strife among mortals, gods, and nations alike for her own amusement. She was said to dance in the burning ruins of cities even after all the other gods and spirits of war and death had grown tired of the carnage. Eris was also known as the mother of demons (called kakodaimons in Greek), having birthed the spirits and minor gods of pain, murder, lies, war, carnage, and anarchy, among a host of others.
* There is also few better examples in storyline missions. Especialy defense of planet
* There is also Fifi LeFume who chases after any potential skunk boyfriends (or more to the point, male dogs or cats that have white stripes down their back and were doused in black paint).
* There is also Flemeth, of whom the local barbarians say that she eventually hunts down every one of her daughters to eat their hearts.
* There is also Fortinbras, who is briefly mentioned but not seen early in the play, then makes his first appearance at the end of the play to assume control over Denmark in a
* There is also Frankie, who ran a meth lab when she was four, caused an explosion in the family's basement when she was five, poisoned a cousin with chemicals, and used pets as test subjects,
* There is also Frog a high-ranking member of Hereti-Corp, Percy a cloned wolly mammoth, and Teddy Weddy who appeared briefly in early comics and later on was brought back as a host of a literature segment, although Frog and Percy are both cases of genetic modification.
* There is also Hatake Sakumo's chakra blade, which is presumably why he was nicknamed White Fang. Kakashi inherited this blade. It is unknown whether it had any special abilities aside from glowing white when used.
* There is also Helgi, a ghost, who died in a house fire. She would have had the same fate as Babette, but she didn't escape the fire in time.
* There is also Homer vs. an 'all you can eat' seafood restaurant in "
* There is also humanity's more advanced descendants in the year 5 million, as opposed to their
* There is also Iggwilv the Witch Queen, who is considered to be the greatest expert on demons who ever lived. One of her sons is the child of a powerful demon lord and accended to divinity. Even though she's hundreds of years old, she looks not a day older than 40 at most.
* There is also Inquisitor Lord Karamazov's Throne of Judgement, which is essentially a Space Marine Dreadnought with a chair top.
* There is also in the series finale, 'The Last Day of Summer' where all the characters dance and sing 'Thank You for Comin' Along' and recap all the shows key moments.
* There is also Jax, a champion so masterful with a sword that he instead fights with a lamppost as a
* There is also JoJo Siwa, who has no charting songs as of this typing, despite debut single "Boomerang" getting platinum certification from the RIAA for selling

over 1,000,000 downloads. Additionally, the music video for "Boomerang" is one of the most all-time viewed on YouTube and still gets consistent views in 2019, three years after its release. She will also be headlining a concert tour in 2019 with around half of the dates taking place in 18,000-20,000 seat arenas, and many of the planned dates sold out in just 1 or 2 days.
* There is also Kasumi's classmate Azusa, who favors the red Drive Head, Backdraft.
* There is also Kuma, Heihachi's pet bear, who is this to Panda, Xiaoyu's companion. He's generally nice when the mood suits him and tries his hardest to get Panda to like him. Sadly, Panda hates him with a passion and clams to be too old for him (which is odd since the age difference is by a year, even in bear standards).
* There is also Lord English, an indestructible, all-powerful time traveling demon with the power to
* There is also MASH, which stands for Make A Sailor Hurt. They're not allowed to beat you, but they are allowed to make you exercise until you wish they were beating you. (Called "Beasting" in the British Army, and every bit as horrible as the word implies.)
* There is also Medivh's spellbook, which contains great powers in and of itself, playing a central role in both
* There is also Mirabel, who plays it straight (baring similar Masari influence on Novus' creators)
* There is also Odin, who, contrary to popular belief, is not less of a wise old god like Yahwe or Zeus, and more of a
* There is also one between the Skeksis and Mystics as they are the same being, as if one dies or is injured, the other dies or is similarly injured. This is also likely the reason the Mystics are able to keep the Garthims quiet in the climax, and also why the Skeksis never even tried to get rid of them.
* There is also one place in the game where you fight enemies who wear night vision goggles. If you turn on the lights, they won't be able to shoot you for a few seconds while they take them off.
* There is also reference to the sky being a firmament, a literal wall around the entire world. This is slightly different than the usual application of this trope, as there is pretty much nothing outside of the area enclosed by the firmament, which exists to hold back the waters that are the source of rain. Although the Book of Isaiah does describe Yahweh as having his throne on top of the firmament.
* There is also Rob Lucci's Rokuougan, which has the signature Kamehame Hadoken pose but generates an invisible shockwave instead of a visible beam of energy.
* There is also Sarah's beret worn during the school uniform story. She gets away with it by giving the principal
* There is also Sendo Takeshi, who seems to get lost despite being from Japan (admittedly a different region from Ippo). He relies on cats to tell him where to go and sometimes just wanders until he finds what he is looking for. At one point he ran right past a boxing gym he had been to on several occasions.
* There is also Seurat, who you can get a discount from if you save some people in the first mission.
* There is also SHIELD's research into Alex (when she first appeared, calling herself "Karen Starr" because it was Power Girl's secret identity). Once they discovered that there
* There is also Simon, who has been turned into a vampire. He is dissatisfied with this existence and would rather be human again. Raphael cannot understand this in the slightest and enumerates the advantages of vampirism to Simon. In addition, Simon is one of the few vampires who are
* There is also some man-on-dolphin, and suggested man-on-fox action.
* There is also "Sonic.exe" which was infamous for being overused cliche.
* There is also Stella's marriage to Jean-Luc, a snobbish man who has no problem hitting on other women. Stella does explain that she fell for Jean-Luc for his good looks, sophistication and because he came from Old Money, like her, while her relationship with Johnathan was dead by the time she met him. It seems that Stella

is/was attracted to Jean-Luc because they had more things in common, and she seems content with their marriage, though she is either unaware or in denial of his womanizing ways.
* There is also Taiki who usually shows signs of being a mastermind leader as well.
* There is also the 1997 pilot chapter, which not only has Naruto as an actual kitsune, but also has the attacking Nine-Tails as his
* There is also the "Absent-Minded" trait, which improves Knowledge checks, but penalizes Listen and Spot checks.
* There is also the anomalous entity called Gullveig / Heidr, born from the group of nature deities called Vanir. She is a beautiful woman who the Vanirs' enemies (the Aesir) capture, spear and burn in fire several times; but each time is reborn just as she was before. Her capture and torture is implied to be what caused the Aesir-Vanir war and united the two groups into one pantheon. She is also implied to have, in vengeance, spread the knowledge of magic and seduction to mortal women; becoming the first witch.
* There is also the Beast (some interpret it as something close to the trope definition of
* There is also the belief that the Solar System's Gates were built by the TITANS, those
* There is also the bonus route, where Homura decides to get everyone happy and willing to cooperate with each other so that they won't waste magic fighting each other or be at risk at falling into despair. The ultimate result is
* There is also the Captain Universe power (which itself is an extension of the Microverse’s Enigma Force), which goes around the universe to imbue a powerup to superpowered individuals in order to let them combat a great upcoming cataclysm that the universe (or rather, the power) foresees as so great that it should not come to pass. Spider-Man possessed it for a time, because he had to stop a nuclear reactor from wiping New York off of the map while the Avengers were occupied elsewhere, and a later Captain Universe ended up on the pre
* There is also the case of vampire powers. In an interview, Meyer explicitly states that a vampire's powers come from some trait s/he had as a human. Jasper is an empath because he was particularly empathetic, Alice was apparently already psychic as a human, Edward was intuitive, Emmett was strong... what about Katrina Denali, who administered electric shocks via touch? Or, assuming you'd go with 'shocking personality' for Kat, what about Ben, the Egyptian vampire with
* There is also the case that a large number of army linguists in Iraq and Afghanistan today do not know Arabic (Iraq), Pashto, or Dari (Afghanistan). There is some logic to that, since no one expected to be in either place for very long, never knowing where they would get sent next. For decades, the most desirable language for military linguists was Russian, for
* There is also the caveat that true resurrection is only possible if the body is in one piece, or at least if all the pieces can be assembled in one place:
* There is also the claim that she is descended from the Djinn on one side of her family, and the Giants on the other, and to have no human blood at all. One of the themes in the books is that being that look like humans but aren't are, invariably, wrong in ways that make them inimical to humans. This is not her true heritage so much as
* There is also the Cult of Kobra, which controls a billion-dollar international crime syndicate and seeks to usher in the Kali Yuga (an "age of chaos") via terrorist attacks.
* There is also the Dark Tournament Committee, who are easily bribed to impose increasingly absurd restrictions on the heroes during their fight with Team Masho.
* There is also the "decapitation" death animation that sometimes happens when you are using a sword. What was once your enemy is now a brief but spectacular blood fountain.
* There is also the driving tour that goes by the house, but all they know is that it is the "Murder House" (which still puts them leagues ahead of the poor saps who buy the house).

* There is also the Emperor Sea Strider, a massive bipedal creature that roams the Amoebic Sea: an immense, gelatinous superorganism covering a tenth of the planet's surface. As it feeds on this gelatinous material to support its great bulk, the Sea Strider has
* There is also the entire Zenith Caste of Solar Exalted themselves: every Zenith is inherently a priest of the Unconquered Sun, is intended to preach the word of Heaven and inspire the masses with their raw charisma and social strength, and, given that they are
* There is also the episode where Plankton accidentally steals a modern art piece (
* There is also the excitement contestants feel when Paul doles out a handshake for a job particularly well done.
* There is also the fact that, up to the past 100-150 years, a person's social circle was limited to their immediate community; people in the same age group, social class, and locality would (theoretically) have common experiences and, ergo, background. This similarity was overlooked because it was so ubiquitous; it wasn't until the modern era with its quick communication between communities that similar backgrounds became a qualifiable factor. Since this factor was discounted (or, rather, not known to exist),
* There is also the fact they tried to blow up the Watchtower before the League had ever done any harm, and that Gen. Eiling was willing to a nuke an island to "kill three birds with one stone," i.e. kill both Superman and Doomsday and stop the drug smuggling that came through it. Granted, only Eiling was behind this, and Amanda Waller is furious as soon as she finds out about the nuclear air strike.
* There is also the fight of Takamura vs. David Eagle, in which Takamura gets blinded by blood flowing into his eyes. Notably, David Eagle does
* There is also the ghoul Shikorae who ends up being blown out the top window of the CCG building by Urie.
* There is also the GM who told Ben that he trusted him to know how the game worked so he would sign off on whatever character Ben made without checking, not considering that this was Ben he was talking to, who of course brought a ridiculous character to the table.
* There is also the Grayson sword arts. There are apparently several schools, but all of them are basically what you get when you learn kenjutsu from
* There is also the Guild of Musicians. Anyone who wants to write or perform music must be a member, and of course, the Guild decides what types of music are proper. In
* There is also the Halloween-feel to Duskwood from Darkshire to the Worgan raids. The whole area also often plays host to the Headless Horseman, Pumpkin Fest, and Trick or Treat Mask give-aways every year.
* There is also the "Hammer of the Gods" spell, which causes a large yellow column of holy light to strike the target. "Greater Ruin" also causes holy energy damage. It is likely an upgraded version of "Hammer of the Gods".
* There is also the Hardorn/Valdemar conflict which starts in Book 3 of the
* There is also the iOS 6 maps made by Apple to replace Google Maps for its iDevices... and failing
* There is also the issue of the Master being so old that his bones have solidified and don't turn to dust when he is staked by Buffy. This issue is made problematic by the appearance of Kakistos, a vampire so old that his hands are now cloven hooves. This implies that he's much older yet than even the Master.
* There is also "The League of Galactics", which by context is taken about as seriously as the League of Nations would be were it still around.
* There is also the legend of the Sliver-Eyed Warriors. Who are said to have existed before huntsmen and the Kingdoms and were able to strike a Grimm down with a single look. However, very few people are even aware of their existence.
* There is also the lost "Book of Jasher", which is mentioned in Joshua 10:13, which talks about a time when the sun stayed up longer than usual and ends with "Is it not written in the Book Of Jasher"? as a rhetorical question, implying said book would be well-known to the original audience (the ancient Israelites). Alas,

nothing of the book has been found, other than what is almost certainly a forgery.
* There is also the matter of expansion symbols, which (starting with Exodus) are colored in accordance to the card's rarity. Black for common and basic land, silver for uncommon, and gold for rare. When the game added the Mythic rarity, it wound up as a sort of bronze color, in a weird sort of aversion of this trope.
* There is also the matter of The Hulk's other wives and love interests. Caiera, Jarella, Kate Waynesboro, etc. Kate Waynesboro is the only one that hasn't died at least.
* There is also the much milder skill "Mimic Darlavon" ("Daravon" in the previous localization,) which simply puts the enemy to sleep by droning on and on and on, like the tutorial-dispensing Professor.
* There is also the Norfleet, a reward for fighting certain Raid Bosses, and can quickly cover an entire battlefield with a metric f—ktonne of elemental damage, the only downside being that you might be in the blast radius...
* There is also the occasional mention of the neighboring country of North Elbonia, which is just like Elbonia but with an even worse government which is downright evil instead of merely stupid.
* There is also the Ordo Sicarius, whose specific role is to monitor and if necessary eliminate members of the Officio Assassinorum, the official state assassins of the Imperium. They assassinate assassins...
* There is also the other fal'Cie Orphan. Its first form resembles a gigantic stone knife-like monolith made up of a representation of a family. The right side of it is a mural-like body of a female angel with a human-like face. The left side of it too is similar except that it is more demonic in design and made from Barthandelus' remains complete with his middle human-like face. In the middle of Orphan is a child-like face.
* There is also the other one when a man is called an arrogant punk because he only helped discover a new moon. "You either discover a moon or you don't."
* There is also the particularly cool name of 'Surtr Firesword', however, there's a reason for that - Surtr is a Norse mythological character which is a giant wielding a flaming sword, who's flames he will bring forth during the Ragnarok will engulf the earth.
* There is also the part when Dave was brought back to life as a zombie. Helen and Mell left his head on a city bus, and forgot all about it. It wound up in the Lost and Found, and got claimed by Madblood (who needed a spare brain for an experiment).
* There is also The Pleiades, who with the exception of their leader
* There is also the power of literal stone walls. Fortifications made out of stone by themselves have no means of attack and are completely immobile but the wall created a tall barrier that the enemy either has to find some way over, under or through to get into the city/keep that lays behind the wall. Since attacking a fortification before the invention of cannons was such a daunting prospect, one common tactic when faced with a stone fortification was to surround it and wait till the defenders starve to death.
* There is also the Queen who births all princesses, when she dies her daughters fight amongst one another for the right to consume her ovaries, transforming her into a new Queen. Though a princess who isolates herself for about 200 years might also turn into a Queen, explaining how multiple Hiver factions are possible.
* There is also the Ramba Ral Corollary to the Char Custom Rule. If a machine is
* There is also the rather touching moment when Station makes what amounts to a proposal to Hannelore, who lets him down gently... Station later forms what seems to be a happy relationship with Tilly/Taffy
* There is also the running gag of someone (usually O'Neill) being teleported mid-sentence by the Asgard. Upon arriving on the alien ship or back on Earth, they usually conclude whatever they were saying before looking around in annoyance. A very funny instance is of Carter yelling at Thor to not teleport her, only to pop up right back at the SGC in General O'Neill's office, who is quite puzzled by the sudden, shouting apparition.
* There is also The Seething Death, which summons a single drop of chaos in a

golden thimble. Once it gets poured out, it grows and spreads, consuming everything it touches. It is believed that, left unchecked, it would destroy the world. It's a pity that the counter spell has been lost.
* There is also the Selective Attention Test video, in which two groups of people pass a basketball each back and forth, and half the audience is supposed to keep track of how many times one of the groups passed the ball. Most people fail to notice the guy in the gorilla suit walk in, thump his chest, and walk out partway through the video.
* There is also the Sex Olympics where pairs are judged on performance and technique.
* There is also the species of cruel humanoid birds called "shrykes". They are obviously named after shrikes, birds widely known for impaling prey on thorns, only with a "y" instead.
* There is also the speech in the 1946 movie version with Olivier, which must be included as he is generally considered the greatest Shakespearean actor.
* There is also the Starry Hunt, a primeval force that seems to be some flavour of neutral but will fight for those who summon it.
* There is also the tale of his death: a Roman soldier tried to ask him where Archimedes could be found, not knowing it was him, as his boss
* There is also the Theia Impact, a theory that suggests that the Earth collided with an object the size of
* There is also the time when Mother Winter (the most ancient of the Faerie Queens) quotes Einstein as proof that the Summer Knight's mantle of power is not destroyed.
* There is also the Trophy Collector feat, which allows the player character to do this themselves, and grants intimidation bonuses against the creature's kin.
* There is also The Un-mother, in the episode where Sesshomaru first appears, a facelss woman who impersonates Inuysha's mmother in order to steal his soul.
* There is also the use of messenger of love, (the little cherub with heart-shaped arrows) being called Cupid, which was his Roman name as his Hellenic name is Eros.
* There is also the Vorpal enchantment which can be added onto any sword. Not only does it require the weapon to be heavily enchanted to even hold the ability, it makes the blade in question so sharp that upon a successful critical strike, it automatically severs the neck of whatever it hit in a single blow (under 5th Edition, a GM may rule that some creatures might be immune to having their head automatically lopped off, either because their neck is too thick or they don't have a real neck, in which case they "merely" take a lot of bonus damage).
* There is also The Vorpal Sword, an enchanted weapon that kills anything with a single cut and makes the distinct sound "Snicker-Snack!" with each strike.
* There is also the war between the Vorpyr, Vrykolakas, and Strakoistrat vampires, pitting 3 different factions of parasitic monsters at one another's throats.
* There is also the warning that just because something can theoretically be
* There is also the Watcher, a minor villain whose blank-featured red mask made him one of the creepiest-looking villains ever.
* There is also the Wellow's Pickhammer, though perhaps obtainable a little early depending on how evil you act up to that point. It doesn't look all too threatening at first glance, until you notice it has two piercing augmentations on it. This weapon shreds through the health of any enemy, regardless of their armour, and even special units like the Balverines, which normally require a Silver augmentation to deal any real damage to it, will still take decent damage from this thing.
* There is also the Zefram Cochrane Shotgun, which is hard to obtain, but also fires conventional bullets.
* There is also using money to get partially completed buildings and units finished immediately. You'd have thought that an enemy invasion force sitting outside the city or the threat of imminent nuclear destruction would be motivation enough for the workers to give their all, but apparently cash is the answer.
* There is also Violet and Gilbert's relationship with a near 15 year age gap. Violet's age is left vague as she estimates she is roughly 14 years old at present time, meaning when she met Gilbert, she was younger than that. The light novel

indicates that Gilbert was already falling in love with her during the war and was well aware how inappropriate this was, she is both his subordinate and underage.
* There is also when Dryden, who while never ugly usually prefers the scruffy and disheveled look, dresses up for his wedding. He proves he can look quite genteel and even more handsome.
* There is always a cost to phase jumping, however: Making a phase jump under any conditions will remove a portion of a ship's stored antimatter (which powers ship special abilities), although never into negative values. If the enemy you're running from has a starbase established in-system, not only will a ship lose 100% of stored antimatter upon phase jumping out, it will also lose 35% of the ship's current hull points (or 50% if it's the TEC with the proper tech upgrade); this will never outright kill a ship, but it will inflict serious damage.
* There is always some "teen craze" that is being hyped by the news media. Rainbow parties, bracelets telling what sex acts you've done, vodka gummy bears, vodka tampons, etc. Almost all of them are not as common as the news media would have you believe. If anything,
* There is a map for Kamigawa, although it just shows a small, isolated part of the world.
* There is a massive power spike. The character will meet his end if he uses a melee attack during the brief flash or watch as his attacks burn away harmlessly.
* There is a material called "Dissolvo" paper which has been used for confidential documents (among other practical applications) for its quality that it completely dissolves in water.
* There is a mechanically failing Ferris wheel in the first episode of the
* There is a memorable scene in this drama where one of the rivals, after being clued of the above situation and arguably tired for the on-off situation who has already left her out of the game, ends yelling to one part of the conflicted couple "It doesn't matter if you are really siblings or not, just go out of the country and marry anyway! Abroad nobody is going to know!".
* There is a Mexican legend collected in Artemio de Valle-Arizpe's seminal works on Mexico City's colonial legends about a man who was judged by
* There is a midrash about a matron asking a rabbi why God put Adam to sleep before creating Eve. The rabbi said "he tried doing it while Adam was awake, but the process was too disgusting for the man to love her". The matron noted that she can confirm it — she was supposed to marry a relative of hers, but due to the fact they grew up together, she became ugly in his eyes, so he married another girl, one not nearly as pretty.
* There is a Mind Trap card that involves this. Two people are trying to reach something in a tree — one is five feet tall, one is six feet tall. The five-foot person stands on the shoulders of the six-foot person, but the object is just out of reach. Would it help for them to switch places?
* There is a minor Internet phenomenon known as "Black MIDI" where MIDI users attempt to make the most chaotic piano arrangements of various songs. Early, non-MIDI-related examples can be found in Quebecois pianist/composer Marc-Andre Hamelin's player piano rearrangements of C.P.E. Bach's "Solfeggietto" and the traditional "Pop Goes The Weasel", entitled
* There is a moment when Naruto meets his mother for the first time and fawns over her being attractive. It's supposed to be cute familial praising, but his
* There is a more portable type of trencher that is for digging smaller trenches in softer materials. Used by landscapers and occasionally plumbers. You still probably shouldn't buy one for fun.
* There is a more recent "feature" called the Squeal of Fortune (later replaced with the similar but less annoying Treasure Hunter) that, while it can be used for free once a day (twice a day for members), requires payment of real money to use enough to get halfway decent rewards outside of lots of luck. Aside from having a very small chance to grant
* There is a movement in Christianity called the Sacred Name or Hebrew Roots movement, which believes that it is incorrect to use translated names of God and Jesus, but instead that only the Hebrew names should be used. They have their own

praise and worship music, and they sometimes cover popular contemporary Christian songs, but with all instances of God, Jesus, LORD, ETC. replaced with Yahweh and Yahshua or a variant thereof.
* There is a movie genre called "action horror," which takes the regular
* There is a much greater difference between the Green and Red Paratroopas. Green ones tend to hop along in a straight line (
* There is a "muppet" called Sam the Robot who will tell anyone who is around that Machines Are Perfect... except he'd always get stuck so he'd say "
* There is a music box house in Ikana Valley which constantly plays circus music to keep away the undead...
* There is a myth that has been circling the US military for several years about a sabot round fired from an Abrams tank into an M113 APC with a sheep inside, creating an explosive decompression that blew the sheep through the exit hole but left the vehicle mostly intact. It is most likely a fabrication produced by the Army's rumor mill, as a sabot round uses spall from the armor it displaces to destroy its target, and the targets are anything but intact afterwards.
* There is a myth that has been circling the US military for several years about a sabot round fired from an Abrams tank into an M113 APC with a sheep inside, creating an explosive decompression that sucked the sheep through the exit hole but left the vehicle mostly intact. It is most likely a fabrication produced by the Army's rumor mill, as a sabot round uses spall from the armor it displaces to destroy its target, and the targets are anything but intact afterwards. On the other hands, the APFSDS rounds are used to defeat
* There is an abandoned 24/7 convenience store in Broker; unlike most 24/7's, the name is spelled out as "Twenty Four Seven", and several letters are missing with one of the remaining letters turned upside down. The resulting sign spells out "tw
* There is an abandoned Burger Shot in Dukes; the remaining letters on one side of the restaurant spell out "Bug S" and another side spells out "r Sht". The resulting phrase sounds like "bugs are shit".
* There is an account of a UFO "cattle abduction" in 1897 which may be the
* There is an active research field known as adversarial reasoning: essentially, building models that allow you to predict the actions of an adversary. Once the adversary happens to get a hold of your model it becomes rather useless, as he can make sure he does something other than what is predicted. So you simply create a new model - one that
* There is an actual Brazilian rock band called Plutão Já Foi Planeta, which is Portuguese for "Pluto Has Already Been a Planet". One of their songs, "Você Não É Mais Planeta" ("You Are a Planet no More") begins with this:
* There is an ad campaign decrying xanthan gum because the name sounds "weird," and thus artificial, this despite the fact that xantham is a natural byproduct of sugar fermentation. Apparently, health is now determined by spelling.
* There is an adventure that has a "library that turns patrons into books" plot. This plot also shows up in
* There is an advertisement for Agrofert (a Czech conglomerate holding company) where a woman pole-vaults naked and wakes up from the dream to reveal that she was sleeping on a plane:
* There is an advert occasionally seen in Britain featuring faces made of hands talking about, oddly enough, Adult Learning courses or something similar. It does make slightly more sense in context; the tagline is "Our future. It's in our hands."
* There is an afterlife, the soul splits in parts: One to decide whether or not they ascend, one for reincarnation, and one stays in the afterlife. The ghost is the last part.
* There is an alien species that likes uploading the minds of prisoners and putting them through some kind of programming to make them
* There is an almost certainly apocryphal story of various great leaders such as Napoleon or Peter the Great
* There is an alternate scene on the season eight DVD set in which the original

mundane horror story was about the contents of an Oscar Meyer wiener, with Homer reacting the same way.
* There is an alternate theory that those people didn't disappear, they simply remained in the present. Or, rather, were moved forward to the new present, while everyone asleep got stuck in the old present. Of course, without a plane, their outlook wasn't very good...
* There is an alternative Rabbinical legend making her Job's wife. In yet another one, she goes to Egypt ahead of her family, where her daughter is adopted by a priest, named Asenath, and grows up to marry Dinah's half-brother Joseph.
* There is an ancient civilization of precursors that were wiped out eons ago.
* There is an ancient Greek story that a Spartan was once offered a couple of fighting cocks on the market. When he asked whether they are good, the merchant told him "sir, they fight until they die". The Spartan thought and said "nah, I need ones that fight until they kill".
* There is an anecdote about a trucker taking a shipment to LA—Los Angeles, California—that was actually intended to go to Louisiana (postal abbreviation LA).
* There is an anecdote with frequently changing dramatis personae, where a professor or someone gets caught in an exchange of abuse with a fishwife or female peddler, and finally reduces her to tears by calling her things like "a hypotenuse" or "an isosceles triangle!"
* There is an Anti Life Note which is immune to the Life Note's powers (except it doesn't work on Near for some reason). (Un)fortunately, the author forgets about this before it has a chance to pay off.
* There is an anti-tax group called the National Taxpayers' Union. As you might've guessed, they oppose federal union activity on the grounds that paying federal employees more will cost the government more.
* There is an Arby's commercial in which a man and a woman are sharing a romantic moon-lit night by a lake. She suggests "a dip", clearly meaning a dip in the lake. He immediately becomes a moron, jumps off into the truck, and heads off to Arby's for a French dip sandwich... incidentally leaving her frustrated and angry, standing next to the lake.
* There is an area that you will only be given password information needed to enter if you ally with one faction. If you remember the password and use it to enter while aligned with the other faction, you will receive special messages commenting on your entry and giving a little information about the area.
* There is a Native Alaskan totem depicting a boy with his hand in the mouth of a monster. It's a giant oyster that caught him while he was fishing. According to the story, he was given a choice between losing the hand (and his chance to be a hunter) and death. He chose death.
* There is an Australian advertisement where a tourist asks locals if there are any crocodiles in the water.
* There is an Australian version of this in the Newcastle area. After a large bridge was built over the road she started disappearing right under the bridge instead of further up near a hospital. A common story is that she was hit by a car while hitchhiking and died just before reaching the hospital.
* There is an earlier episode where he has to take a night course run by his old high-school principal because he never finished remedial science. His final exam gives us a classic:
* There is an early episode when Bart and Lisa likens watching the premiere of a movie to watching the moon landing. We then see a flashback of a 10-ish year old Homer completely ignoring the moon landing, listening to his records. They later had an episode focused on his mother and her hippie-background and had a toddler Homer showing up at Woodstock. The two events took place only 26 days apart!
* There is an early episode where the opponents in a tag duel are drawing exactly the cards they need to pull off unlikely combos -
* There is a nearly identical joke in Croatia: During Communist Yugoslavia, UDBA (Yugoslav equivalent of KGB or Gestapo, n.a.) heard that a priest had a parrot which was speaking against the country and the people. So they visited the priest

and asked about his parrot. Parrot immediately said: "Rain falls, country falls apart.", and UDBA agents told him that he has two weeks to retrain the parrot. Once said time passed, they were back, and asked if he had retrained the parrot. He answered "yes", and was asked to demonstrate. So he told to parrot: "Rain falls, country falls apart.", and the parrot answered: "Thank God."
* There is an easter egg to acquire a chicken pet. It involves the /chicken taunt.
* There is an educational video made by the Spitzer Space Telescope PR people where a woman gets eaten by a giant anemone.
* There is an eerie scarecrow with a pulsating red light inside its eye socket at the entrance of the titular carnival in
* There is an Elvis-themed slot machine, simply named "ELVIS." The lights behind the name first light up in proper sequence: E-L-V-I-S.
* There is an emerging subgenre of simulation games, inspired primarily by
* There is an entire community of homeless, low-powered mutants living under an overpass in Los Angeles. Alex Harris (the story's main character) and Louise take shelter with them for a while, and look after them afterward.
* There is an entire episode based around a Starfleet unit trapped on a planetary facility being attacked by Jem'Hadar infantry. The Starfleet unit is equipped with nothing but small arms and the Jem'Hadar have no artillery or air support and thus have to make frontal assaults on a fixed position. The episode does reveals that the Jem'Hadar do one trick up their sleeve. Cloaked anti-personnel mines, which are literally all over the Federation base. Which begs the question of why don't they just program the mines to kill everyone in the base by going off at the same time? Those mines also don't show up at any other point, when they would be extremely useful as a hidden surprise upon having to relocate.
* There is an entire film based around this concept, 2006's "Lying", which is about a group of women who spend the weekend together in the country. The host, Megan, is revealed to be a pathological liar at the end of the film, having spent pretty much the entire weekend lying about everything to her friends. The other women promptly leave, upset and weirded out by her behavior.
* There is an entire level called The Tomb of King Leoric, which is not particularly ancient, but is still crawling with skeletons.
* There is an entire porn genre centered around this concept called anal vore, in which a predator eats a victim alive and whole through the anus. In some cases the victim is unharmed, while in others the victim is digested, or absorbed, or magically transformed into poop.
* There is an entire quest where you must board a ship to cross a sea, risking life and limb and fighting off monster attacks and even fight off the bloody
* There is an entire set of Bud Light commercials centered around guys who draw conclusions of this type between random actions on their part (Going to the basement for more beer, inviting an annoying coworker over to see the game, eating a veggie burger...) and good fortune happening to their favorite football team.
* There is an entire subset of astronomers that actually use this as a valid explanation for everything they can. Be it the lack of quasars in a large radius around us, or the fact that the galaxy is contracting inward, they jump to the conclusion it must be we're in a special spot. Of course,
* There is an entire Twitter feed devoted to the terrible, high-fashion-at-the-time outfits of
* There is an epic occurrence of this trope in a slightly NSFW comic (by EC or Warren? Wally Wood??) named "The Broadsword". Unfortunately, the whole plot must be told. The
* There is an episode centered around this trope, except the trial was a focus group for the new bells-and-whistles lawnmower that would render Hank's lawnmower obsolete. Hank insists the focus group (including his neighbors and his dad) remain for the scheduled length as he convinces them that the new mower is junk.
* There is an episode in Season 3 in which Dean and Bela pretend to be a couple at a social event in order to steal a
* There is an episode in which rough-around-the-edges engineer Tucker and an alien
* There is an episode late in the first season where Team Rocket had successfully

stolen upwards of a hundred different Pokéballs, Ash's included, and in trying to break out of their van, Ash couldn't figure out which were his until Pikachu sniffed them out.
* There is an episode of where Hank develops a serious crippling fear of propane, the thing he sells for a living. Justified, in that he had survived a gas leak explosion in the previous episode.
* There is an episode where anyone who asks for the truth is told it... by everyone... continuously... until they finally kill themselves. Depending on how you take Dean's
* There is an episode where doctors create a human pyramid at different windows throughout the episode to show a picture of
* There is an erotic novel ending up with a woman, her doctor (whom she was dating), and her male cousin (
* There is a neurological disorder whereby the afflicted cannot recognize their own reflection. While they are in no danger from said reflection, they are left with the terrifying impression that they are being followed by a stranger that has somehow gotten into their house.
* There is an even older sketch where Bert gets annoyed by the sound of Ernie's TV show, so he decides to drown it out with a record. When Ernie complains that the record is too loud, he drowns it out with the radio. Bert one-ups even that by turning on a blender to drown out the radio, promptly blowing a fuse.
* There is an evil butler suit that brainwashes the wearer into committing murder.
* There is a new area of Psychology called Investigative Psychology lead by David Canter (A famed profiler himself) that intents to find a way to use Offender Profiling outside the more horrific types of crimes and even in non-forensic fields. It's far from being as exact as other fields in Psychology, and that's saying something, but it has had some success using Geographical Profiling (normally only used with serial offenders) in nonrelated areas such as Marketing. So it was recently upgraded from "
* There is an exception here; one patient comes in with a hallucination of Jesus (very vivid) and a host of other symptoms. The solution is found by ignoring the hallucination as a symptom, leaving the patient (a priest who had lost his faith) to believe it was divine intervention.
* There is an exception to the "No Resurrection" rule, and it's a long story why and how it can be achieved. When the Primordials surrendered to the Exalted hosts, they forewent their ability to rewind time and undo death in Creation. Said Primordials were then imprisoned/became Hell. In Hell, they can do whatever they want, as long as the aforementioned term is not violated. In practice, now-Yozi Primordials can undo the causality of something that happened within the last 5 days in Hell. This means that if your significant other died in Hell, you can surrender his or her thread of Fate to the Yozis, and if the Yozis see something to be gained from undoing the demise of the deceased, then a resurrection is in order.
* There is an exchange on bash.org that involves a girl speaking to the storyteller while they're in high school. The girl says she always thought of him as a nerdy type, but the guy says he really isn't a nerd at all. Immediately after saying this, his cell phone plays the
* There IS an explanation in universe. It's part of a special area that was partly dummied out during the transition from Fragment (the game's beta version). It was probably too closely tied to the black box that is the Aura system for CC Corp to remove it from the game. A specific item or spell could at one point be used to dispel the mists revealing the "Twilight Eye" and dried up lake bed, that in Fragment, was full. This ALSO adds more to the bridge revealing a red-tinted Chaos Gate, which normally only appear in Root Towns. By the time of the
* There is an expression "The user is the biggest threat to any security system." There are branches of mathematics devoted to developing crypto-systems that are pretty much mathematically guaranteed to be secure. However, once these systems are developed, they are turned over to people who
* There is an external free tool that lets you create your own tournaments, and you can give the computer opponents anything you like for their colour-schemes by

editing the palette of the picture to go with their character.
* There is an informal practice of shouting as you attack in fencing.
* There is an inordinate amount of Signum/Cypha shipping material for
* There is an instance involving Ainsley Hayes, Jed Bartlet, Leo McGarry, and a closet which is not a bathroom on
* There is an interesting take on this trope in the opening scene in
* There is an interesting theory that the whole rod part of the equation was initially used simply as a visual aid to help someone trace things like erosion lines and depressions so they could visualize the flow of water. Over time this was corrupted into the idea that the stick played a magical role.
* There is an Internet media company called Blume. They are responsible for the ctOS technology that is supposed to keep the whole city of Chicago wired, making communication easy for the citizens. However, you find out that Blume is monitoring everyone unknowingly, and is using some of the information as blackmail against others and to secretly impose a
* There is an internet meme which shows how a cat and a dog view their respective existences. The cat carefully plots revenge on and escape from its human captors. Meanwhile, the dog will say things like "
* There is an inter-party argument at the end of your first visit to Onderon in
* There is an inversion later on in the film. The bomber agrees to allow the driver (who was shot by a passenger on the bus), and no one else, to be evacuated. Despite the bomber's claims that he is watching their actions, one of the rescuers reaches out his hand, calling for an elderly woman to escape as well. The bomber, seeing this
* There is an in-vitro fertilization (IVF) technique where the nucleus of one egg is inserted into a different donor's egg, then fertilized and implanted. The Mitochondrial DNA of the donor egg would be from a third person.
* There is an Irish ballad called "The Foggy Dew", which points out the hypocrisy of England entering World War One "that small nations might be free" (that is, to liberate countries such as Belgium) while occupying and ruling Ireland.
* There is an island in Greece called Lesbos, on which there used to be a number of city states of some import in ancient times and the term "Lesbian" originally referred to its residents (and still does). The modern use of the term is associated with ancient Lesbian (possibly in both senses
* There is an island named "Guadeloupe" in the Caribbean, while "Guadalupe" is in the Pacific.
* There is an island that is nested inside of two larger islands. Vulcan Point Island is located in Crater Lake, which is located on Taal Volcano, which is located in Taal Lake, which is located on the island of Luzon, which is part of the Philippines in the Pacific Ocean.
* There is an Italian commercial featuring beautiful women draped over...
* There is an Italian tale which has the same scene (except the girl fakes an urgent message forcing her to return home). It seems to have inspired
* There is an item called an "Ancient Banana", which can be used in battle to make an enemy trip and lose about 50 HP. A pathetically weak item,
* There is an item called the Sacred Ash, which revives all fainted Pokémon in your party AND fully restores their HP. The catch is that it appears almost exclusively in the presence of wild Ho-Oh, so there's only one in the game. The Festival Plaza in
* There is an NHL commercial for the Florida Panthers that shows a couple of guys ogling a gorgeous woman on roller skates. She then skates up to another woman and throws her to the ground with a nice body check. "Must be a Panthers fan"
* There is an old anecdote that right before a battle with Rome, Antiochus III asked Hannibal Barca, who was a guest of his at the time, whether his army will be enough for the Romans. Hannibal took a look and said "
* There is an old (board and miniatures) gaming expression called the
* There is an old children's horror novel Grave Doubts (Shockers) where the main character's name is Matt, and his apparently perfect older sister, Penny, was murdered ten years ago. He often gets into trouble, and during one incident, his

mother tells him, "And poor Penny's the one who had to die!" Later on, she tries to make it up to him, but he never forgets how badly it hurt him to hear it. Of course, it turns out that
* There is an old example of machine translation well-known in Russian community where system instructions "Execute installer by tray icon and insert ms windows binaries or another os with custom mouse driver support in current boot drive" are translated into Russian as something like "Put the mounter to death by the picture of tea-tray and paste sets of two items of mistress' windows or any other mouth with customhouse support of mouse teamster in current shoe engine." What's hilarious is that the result is grammatically correct (while normally random word sequence wouldn't make any sense in Russian) and the thing is especially bizarre thanks to the mounter's execution part.
* There is an old Inuit story of a woman who went to live among strange people. She became a burden, and so they placed her in a boat, took her out to sea and cast her overboard. She struggled to regain the side of the boat, but they cut off her fingers to keep her away. As she died in the water, she became Sedna, the goddess of the sea and mother of all beasts. Her fingers became the walrus and seals and whales that the people would hunt to eat. But her middle finger became the white bear. When the other animals see a man, they try to run away. But when the white bear sees a man, he is filled with revenge and tries to kill the person who he believes murdered the woman from whose finger he was born. Wise Inuit stay away from the white bear...
* There is an old joke about a bashful young man who comes to a doctor:
* There is an old joke about an airline pilot who, following the typical pre-flight announcements, forgot to turn off the microphone before telling his co-pilot (and by extension, the entire plane) that "I could really go for a cup of coffee and a blowjob right now."
* There is an old joke about a woman who visits a friend she didn't see for years and sees several children who look just like the husband their mother divorced years ago. When questioned, said mother says "He sometimes visits in order to apologise".
* There is an old joke that states that God's punishment for bigamy is
* There is an old Russian joke about some Soviet region convincing Moscow to give them independence for ten minutes. The first five minutes are used to announce war on America, the next five, to surrender.
* There is an old Soviet joke about a man who comes to the KGB and says, "My parrot flew away, have you seen it"? The KGB officer replies, "We don't deal in such things, we aren't a lost and found parrots office". Then the man says, "OK, but if it ever comes here, just
* There is an old viral video from the early 2000s by a rapper named Pete Miser called
* There is an old wives tale saying that if the first lamb of the lambing season is born black, it is an omen that the farm will face hardship that year. However, an aversion can come with the views of black lambs by Sussex shepards, who view them as a sign of good things to come due to relative rarity of natural black wool.
* There is an optional rule (The "Stackpole Rule") that, if you get three engine hits, there is a chance that the engine will fail to shut down in time. This totals the 'Mech, as well as doing terrible, terrible
* There is an option in-game to switch to first-person camera mode for any character you're controlling. For characters like the Exile, Handmaiden and Bao-Dur, this is just a basic camera swap. When you use it while playing as sightless characters Kreia or Visas, however, the camera becomes misty and blurred and people are signified by red or blue auras since both characters rely on The Force to "see." The droids likewise get unique views with scan lines and a heavy tint in whatever color their eye(s) glow in.
* There is a Norse version of the Bible that portrays Jesus as a righteous warrior in a very literal sense.
* There is a notable case of this in Freeside: the first cell extends out into the second one but only going through the doors takes you to the actual cell. The

Cerulean Robotics factory is in about the same area as the gate to the strip and the Ruined Store is around where the Atomic Wrangler is supposed to be.
* There is a notable moment late in the picture when Justin finds himself soberly looking up the actual legal definition of the act (and associated penalties). Apparently, the improbable events of the movie help them get off light at the end, including "Ryan becomes an actual cop".
* There is a notable subversion in the first game where there is no way you can reach the door in time. If you wait some time though,
* There is a noted mutual dislike between Homer and Patty and Selma, being
* There Is Another: A character isn't The Last of His Kind, after all.
* There is another Bounty radio ad that does the same with "The Pina Colada Song".
* There is another Chinese man who, unlike the previous guy, died after his "friends" put a live eel up his bottom while he was passed out drunk. The eel
* There is another episode, "Two and a Half Deaths", wherein a man accidentally sees a man and a woman get down to business in front of him (he was hiding in a closet with wooden-slat doors).
* There is another episode where a bad guy is seen force feeding his victim food containing a cut up credit card.
* There is another example of this trope not so long afterward; Charity is tricked by Umami into approaching a large pot after refusing to cook for
* There is another instance in which Strong Bad is forced to share a fallout shelter with Bubs and Coach Z.
* There is another instance of this earlier on the film, when Shrek first sees Lord Farquaad's castle.
* There is another jar host Ellen must place money in every time she
* There is another joke about this and the Basque, but this time it does not play with their supposed ability, but to the triple stereotype of them supposedly being stubborn, braggarts and gambling-lovers: "How do you fit 20 Basques in a Mini Cooper? By betting they cannot".
* There is another meaning for fag - to tire or weary by labor - which can be conjugated into 'fagging' and 'fagged'. It may have come from "fatigue". Commonly used during the earlier parts of the 20th century; unused and almost forgotten today.
* There is another moment around this time, after the council of Elrond, when the Fellowship is formed. The nine stand in a pretty line, Elrond pronounces "you shall be the Fellowship... of the Ring!", the theme swells and half the audience start to retrieve coats, finish off drinks and generally make ready to leave. Then find out there's another hour and a half to go. And, in some cases, hadn't realised that even then there were
* There is another one where Calvin takes a telephone into the woods to "make some bird calls" and ends up with the receiver in his mouth and the bulk of it tied to the back of his head.
* There is another pervasive myth, dating back to 2001, about an underground farm that can be accessed by using a sapphire on a particular tree. Later versions of the myth swap the sapphire for a herring. The farm is generally rumored to contain fantastic new armor; the herring era whispered of a place where the then-rare rune armor can be found scattered on the ground. One early resurgence of the story can be found
* There is another play called "The Butler Did It," different from above, which features a
* There is another scaling effect. The resistance in a vascular system is inversely related to the fourth power of its radius.
* There is another spell called Gloomcloud that gives a target a cloud over their head that only they can see, which makes them depressed and unable to do much of anything for a few minutes.
* There is another story arc where Vince becomes romantically involved with actress/singer Mandy Moore when the two of them are cast in the
* There is another story, dating from either his Presidency or, more likely, as Senate Majority Leader, when he was in negotiations with a fellow Democrat who was

holding up legislation LBJ desired. He said "You might as well go right ahead and cut off my pecker" and proceeded to pull out his penis and set it on the table, along with a pocketknife. "Go ahead, do it!"
* There is another theory that says that if time travel is possible,
* There is another time when she is wearing revealing pajamas and Wayne asks her to put on something better, though unknown to him, she was naked prior to answering the door. (To be fair, Wayne is her brother.)
* There is another type of blade used in microtomes to prepare samples for the electron microscope:
* There is another type of mercenary called a "freerider", which is less defined in the books but explained by the author as a mercenary with a horse who attaches himself to an army free of charge and takes his pay in booty after the battle.
* There is another variant of warframes: The Umbra warframes, which are at least as powerful as the Prime variants, and are specialized in fighting the
* There is another version of that spell that requires you a feat to take "Mother cyst." It kills the person and then destroys their soul, removing them from existence forever. Although it may seem less useful since the target has to be first hit by a level 2 spell, it can be used in campaigns that are not using the "True Name" system. That means it's just as legit in
* There is another weapon in the 21st Century that can't be shut down effectively in America: the Internet. As the Internet is not controlled by the federal government but privately run by telecom businesses, any attempt to turn the United States of America into some Dictatorship of the New World Order would be set back by activists, especially if some of the activists turned out to be hackers!
* There is a novel where the main character is an astronaut on a ship equipped with an antimatter drive, allowing it to rapidly accelerate to relativistic speeds. Their goal - go to the nearest galaxy and return. Realizing she can't live without him, his girlfriend decides to put herself into an induced coma, a form of extreme
* There is an overwhelming amount of fanart of Ralsei - normally the sweetest and most wholesome character in
* There is an SF story wherein the world is secretly controlled by an oligarchy of telepaths. Telepathy is kept secret, and it isn't really researched, to maintain the masquerade, but one thing is known for sure—it is not inheritable. So how do they find new members? There's a brilliant solution. In every single university there's a guy somewhere, spreading telepathic messages about the room he is in. The messages can be heard by telepaths only. Those who come are accepted into the society, those who don't are either muggles or not curious enough and thus of no interest to them.
* There is anti-magic ground that makes any hero on top of it unable to cast any sort of magic or be limited to low-level spells. Magical garrisons and certain artifacts also deny the use of magic in battle.
* There is an uncomfortable amount of this between Loly and Orihime. When not beating up or attempting to kill Orihime, Loly is stroking her hair, calling her "Orihime-chan" ("little Orihime"), invading her personal space, caressing her face, pinning her against walls, tearing her clothes... it's surprisingly easy to do
* There is an unexpected subversion in the Frank Grimes episode (which went out of its way to self-reference and subvert many standard Simpsons tropes). A new worker called Frank Grimes gets employment at the power plant, but is aggravated at Homer's terrible ineptitude and how good his quality of life is compared to his own. His frustration builds throughout the episode until it climaxes in him going insane and imitating Homer - eventually he grabs a live power cable believing that he will survive the electric shock (like how most characters would do in the show), but he doesn't. He dies. And still gets no respect.
* There is an unofficial holiday on April 20th, aka 4/20, where people celebrate the act of consuming weed and advocate the legalization of marijuana. Coincidentally, April 20th also happens to be
* There is an unofficial rule among emergency workers in most racing series that no racer is formally declared dead at the track unless this trope applies (one version described: "Nobody dies unless they are decapitated or incinerated in their

car"). Anything short of Ludicrous Gibs and at least SOME resuscitative effort will be attempted until the driver can be declared DOA at a hospital.
* There is an urban legend about an older woman who takes revenge on the sassy young thing who brazenly zips into the parking space she'd been waiting for. When she protests, the parking spot thief says "That's how it is when you're young and quick." The woman puts her car into gear, floors the accelerator and rams the offending vehicle. When the sassy young thing screams in protest, the woman replies "That's how it is when you're old and rich" (or "and have more insurance"). You can check out the legend and its variations at
* There is an urban legend (at least in Russia), about an immigrant to Japan who wasn't good in Japanese, and didn't trust the local cuisine that much either. She was taught the phrase "please deliver such-and-such pizza to address X." For some time, it worked, until they found a guy who spoke Russian (or she learned a bit more Japanese), and told her "lady, perhaps it would be better for you to call a pizzeria instead of a library?" Patient, helpful people.
* There is an urban legend in the UK about somebody getting sacked by
* There is an urban legend of an influential Soviet man who made a lot of money illegally and converted it to US dollars. However, thanks to his influence, the KGB couldn't even search his house for evidence. He was about to emigrate to the US, and invited many influential friends to his going-away party, including the American ambassador. After the party, he boarded the plane and left. The KGB search his luggage and find no money. They then search his house and find a large pile of ash. Turns out he had the ambassador witness him burning all his cash and sign an official document that a certain amount of currency was indeed destroyed. All the man had to do was go to the nearest Federal Reserve bank in the States and show them the document to get his money back. (It
* There is an urban legend that Japan used to buy a lot of Soviet mineral water in the '70s and throw the bottles out. They only needed the hardwood boxes to make furniture.
* There is an urban legend that the word "picnic" derives from "pick a [N Word]" and was originally used to refer to a lynching with food and music for white spectators.
* There is a one-off British comedy charity special starring Sir Bob Geldof as himself. In short, he finds himself stranded at a pub where a celebrity impersonator karaoke competition is ongoing. Through a series of developments Geldof winds up singing the Boomtown Rats' breakout single "I Don't Like Mondays" live. The crowd is underwhelmed and first prize goes to the
* There is a painting in the dining room of Roderick Defoe. Each day, the man in the painting gets older and older.
* There is a painting of Mr. Toad passing the deed to his property to Owl in
* There is a pair of Italian commercials, the first showing a man trying to find his new tiny cellphone when it rings, realizing the sound is coming from his small dog. He picks it up, pokes it in the tummy and holds it to his ear, and says 'Hello?'. The second one shows the same dog blurring and buzzing across a coffee table back and forth. "Now with vibration!"
* There is a Paladin class (at least until the later games where it gets merged into Fighter), which is the class associated with the virtue of Honor.
* There is a particular amount of entertainment to be had in the sequel,
* There is a part where the one girl is trying to find the other, and the ghost
* There is a periodic table of M&Ms with elements defined by their colour and personality. For example, Ye (yellow) is Clumsy.
* There is a persistent myth that if a dog or horse freaks out, and there is nothing visible to you that should be causing them to do so, one should look at what the animal is looking at. More specifically, to do so by looking between their perked ears. The myth states that you will see the spirits or ghosts that only animals normally see if you do this.
* There is a persistent urban legend that the Warthog's GAU-8 cannon produces more recoil than its engines do thrust and that continual fire of the cannon would eventually stop the forward momentum of the airplane entirely, save that it would

run out of ammunition long before that point. While the recoil is significant, in practice the effect on the planes speed is negligible.
* There is a phenomenom called the Illusion of Knowledge, which basically means if you try to think about something but don't know all the details your brain will
* There is a phenomenon, much in the same style as the aforementioned Centipede's Dilemma, called
* There is a phenomenon (which may merit its own category) called "Kidding on the Square", in which you
* There is a photo of Marge's mother in her flapper days, one of which has her being arrested for wearing an
* There is a PHS (Party Hensei System, a pun on Personal Handiphone System) which allows you to summon your comrades from anywhere — in the middle of the desert, on a mountain, in a cave or underneath a giant metal plate. However, it doesn't seem so much cellular as
* There is a planet made entirely out of diamond is also a diamond planet, but it originated as a carbon-oxygen white dwarf, and was then cut down to planetary mass by intense irradiation from its partner (a pulsar).
* There is a plant called the silver dollar plant, because the seed pods can be dried, and then the outer membrane can be rubbed off of these to reveal a shiny silver surface that kind of resembles a coin. (Sadly, that's where the resemblance to a money tree ends.) You'll often see these as accents in dried floral arrangements.
* There is a playground right outside the house on the first part of
* There is a play in which the rich, eccentric protagonist brings the plot to a screeching halt to address the real-life competition between the theater in which his show is playing, and the theater across the street. Beyond that, the play is suffused from beginning to end with theatrical metaphors, and one of the most famous sequences includes the characters onstage watching a play even as the audience is watching them. A radical new experiment in metatheater, playing now at your favorite off-Broadway location, and critiquing the excess of artificiality in contemporary theater? No – it's
* There is a plot point that Legosi seems to dislike his grandfather due to the fact he isn't a wolf, and Legosi and his mother are half breed wolves (quarter in Legosi's case rather.)
* There is a poem (told as a memoir) that mentions the speaker having to sign into a motel like this to have sex with her college boyfriend, because at the time (probably about
* There is a point in the game where Lyner realizes that he has become the highest authority in Platina
* There is a police box right out the Earl's Court tube station in London,
* There is a Polish saying, roughly translated: "all girls want uniform-wearing boys".
* There is a pop song in the game, sung by one of the characters, which is a modern J-Pop production complete with digital synthesisers and
* There is a popular (and likely apocryphal) story that America's first female reporter, Anne Royall, came across
* There is a popular document where one very bored, and very unscrupulous man had compiled at least
* There is a popular laundry detergent brand in the Caucasus and Central Asia called "Barf" (which simply means "snow" in Farsi). Cue tourists from English-speaking countries unable to control themselves when they tell their friends and family they washed their clothes in Barf.
* There is a popular series of various artist compilation albums in the UK called "The best [name of genre] album in the world...ever!".
* There is a popular theatre blog called "Chewing the Scenery" which often slates over the top or silly acting in British theatre.
* There is a possibly apocryphal story that Mick Jagger tried to use copyright law to prevent any other musicians from using stage names related to cutting implements (a "jagger" is a type of knife). This was prompted by David Jones' success under

the name
* There is a possibly photoshopped image of a backwards revolver circling the Internet.
* There is a postcard of a cartoon with the caption "Do your cigarettes taste different lately?" The cartoon depicts a dog grinning mischievously while marking his territory on a tobacco plant.
* There is apparently a large market for licensed military toys. We have Batman Tanks, Hulk Humvees,
* There is apparently a theory out there that human time travellers seeded the young planet Earth with life. This is sometimes known as the
* There is, apparently, a Wiccan spell that makes it so that you and your lover will be together forever (Marriage is considered temporary, since it's only till death). Thus, when you two get reincarnated, you will be together, again and again (well, if it works, anyway). The problem is, it's very hard to reverse, and a person's personality changes when they get reincarnated. This is not recommended, especially if you're only dating, since it pretty much screws you over in your next life. Of course, that doesn't mean people wouldn't be stupid enough to try it.
* There is a practice made popular on some corners of the Internet that involves supposedly creating a second conscious personality in one's mind, known as a
* There is a pretty well animated scene in the 8th episode that has Rogue and Kitty dancing together, which appears to have been modeled after live-action footage of
* There is a principle in fluid dynamics called 'cavitation'. When impacts occur at extremely high speed underwater, a flash of light as well as sound and heat can be produced, as seen
* There is a product called Unicorn Farts which is just cotton candy.
* There is a proposal for the five most North Western counties in Maryland (the Eastern Shore, the region made up mostly of counties that border Delaware) to secede and form either their own state or join with either West Virginia, Pennsylvania, Delaware or some combination thereof. This gained steam in
* There is a psych-class test like this. In the middle of class a person dressed in a ski-mask and all black clothing steals the professor's notes and runs out. Then the professor asks the class to describe the attacker. In order to pass you have to prove you can overcome preexisting social assumptions by not assuming the attacker is (among other things) male.
* There is a public transport company in Locarno in Switzerland called FART (
* There is a pyramidal system with Goa'uld as rulers, Jaffas as priests/warriors and Humans as workers. The
* There is a quest called "A Tiny, Clever Commander" featuring Commander Nazrim of the rat-like kobold race, all of which is a rather unexpected
* There is a quest in Whiterun where you are asked to find a redguard woman in town (
* There is a quite famous anecdote about Doctor Joseph Bell who was supposedly the real life inspiration for Sherlock Holmes. When presented with a patient in front of his students he asked them to use deduction for finding the patient's problem. When nobody found it, he explained the process thus: use clues to make an assumption (red nose and pimples that would suggest alcoholism) and then support that theory with hard evidence (whereupon he pointed at a bottle of brandy in the patient's pocket).
* There is a race where everyone drives a red McLaren, but police will still say "suspect is driving a red McLaren" (which is admittedly accurate enough, given how few of those exist; just pull over any red McLaren you see!) Also, in other races if you go fast enough, they'll sometimes only get the colour of your vehicle.
* There is a radio edit of Foster the People's song "Pumped Up Kicks" that censors the words
* There is a rare female example with Servilla, in her late forties to early fifties, teaching a teenage Octavia about the joys of sapphic love. It doesn't last long, though, as Servilla is very clearly manipulating Octavia for political purposes.

* There is a rather sneaky example early on, which becomes this in hindsight. All party members begin with 2 ATB-slots, except Vanille, who has 3. After becoming l'Cie, they all gain 1 — again, except Vanille, who still has 3.
* There is a real-life "Candid" AWACS version- but this was a Beriev project and is called the A-50 "Mainstay". It remains in Russian service, with examples exported.
* There is a real-life Hotel California in San Francisco (the song came first).
* There is a real life issue with this as anyone who has worked night shift can tell you. Do nights for years and other people remarking about tenses becomes an
* There is a real life psychological diagnosis known as "Mad Scientist Syndrome", so named because it tends to be a case of actually believing
* There is a real, life-size Gundam model in Japan. It was finished in July 2009 and pulled down in September. Then it was put up again in July 2010 but with a beam saber. Oh, and it also moves a little bit. Unfortunately, the 2011 earthquake collapsed it. Fortunately it was rebuilt in 2012, and was exhibited at Hong Kong in 2013.
* There is a really funny car ad in New Zealand, where a boy asks his father where he came from. The father then proceeds to explain to the son (with music playing on top of his words) while driving, with the help of visual innuendo and gestures. At the end, it doesn't end well.
* There is a reason for the white line: the flying trains that are part of the transformation for the helmet will smack anyone dumb enough to cross the white line HARD. As the Lion Inves from the crossover special found out the hard way. Since the series is aimed (more so than most) at small children, the
* There is a reason for this. Since being irradiated heals mutant creatures, it can safely be assumed that they're radiotrophic (like the real-life
* There is a reason he tries to keep any and all material regarding him hidden from mortal eyes as much as possible.
* There is a reason why almost all procedural laws relating to the filling out and filing of court documents say "A document is not invalid simply because it doesn't follow a form." Of course, some don't help by immediately specifying the forms to horrifying detail (margins, spacing, font, etc.)
* There is a reason why gold-plated connectors are used in high-end electronics. Copper, while being an unparalleled conductor, tarnishes very easily, especially in the damp air, and copper oxide is a semiconductor, leading to the whole slew of weird contact effects and parasitic noises.
* There is a reason why there are more firearms per capita in Finland than any other Western country save US. Finnish soldiers simply took any captured pistols and revolvers as war souvenirs. Since they were not in official records, they did not exist. Most still exist as family heirlooms.
* There is a recent ad for a tax consultancy service that lets you search for your agent based on his specialty. The last request is something like: "And they have to have a cat named Louie!" One collective groan later, only one guy is left standing.
* There is a recipe from the Philippines that goes a little like this: carrots, potatoes, bell peppers, tomato sauce, and red ant eggs.
* There is a relatively new phenomenon called Secondary Mutation, in which known mutants (typically
* There is a romantic moment where Clark and Lois almost kiss while dancing at
* There is a rule in the British Parliament that forbids personal insults.
* There is a rules patch in that you can't just win the first race of the season and then decide that since you're already in the Playoffs, you don't need to race again until the first round of the Playoffs. Besides, the more stages and races you win, the better your "seed" in the Playoffs. Also, you can't just show up for race 26, win that and qualify for the Playoffs, either. Case in point: In 2015, Kyle Busch missed several races after suffering a
* There is a rumor about Jagex hiding a secret item in the free version of the game and leaving an incredibly cryptic trail of clues in random junk items. Supposedly, anyone who finds it will get a free lifetime membership.
* There is a running gag involving a newsie shouting this in the movie

* There is a running joke among players that creatures with the Stupidity rule (which means there is a chance the unit will do nothing other than wander forward a few inches for a turn) suffer from this, in particular Dark Elf Cold Ones (dinosaur horse thingies) thinking "kill kill kill kill, ooooh shiny".
* There is a Russian fairy tale where a woman gives birth to three sons, but her evil sister takes them away and gets her banished. After awhile, her stepson finds the house of the brothers, so to introduce himself, he asks mother to make some bread with her breast milk. Upon tasting it, his brothers recognize the taste and accept the two as their family.
* There is a Russian joke about two busted drug dealers who are earning their pardon by dissuading people from taking drugs. The first one shows them a picture with two circles — a large one and a small one — and telling them the circles represent relative sizes of their brains before and after drug abuse. The second one uses the same picture but with swapped circles and tells his interviewees that the circles represent the
* There is a Russian joke where a man confesses to doctor he usually masturbates to a certain painting of a pretty woman. The doctor is quick to point out it actually depicts
* There is a Russian joke with a punchline of "We were burying my mother-in-law, got two accordions torn". The punchline is so worn out that at this point that overused gags, links, and humorous stories are called "bayans" (accordions) in certain sections of the Russian internet.
* There is a Russian reversal of the trope. In the USSR, films set in Western European cities were filmed in Latvia, Lithuania, Estonia and Western Ukraine (which have a lot of Gothic and Baroque architecture). Films about the Middle East used Central Asia or Azerbaijan as stand-ins. However, the most glorious example is the Crimean peninsula, with its uniquely diverse natural and cultural landscape. It was, and still is, a perennial favourite of Soviet/Russian film crews and stood for almost
* There is a Russian saying for No Sense of Direction meaning "to lose one's way in a three-pine forest". There are many more colorful idioms out there for describing the trope. One of the most common in English being not being able to "find one's butt with both hands", sometimes with "and a road map" thrown in for emphasis.
* There is a Russian story about some lad who is stuck in a foreign land until his new boots (received at entrance) are gone, but they cannot be worn out, burned, or thrown away. The lad gets rid of them by feeding them to the host.
* There is a Russian story that a brand of condoms called Visit had to be renamed "Vizit" - because Visit (accent on the second syllable) translates as "hangs".
* There is a Russian urban legend where an Italian was told some words and was asked what he thinks they mean. First, he was told the words: "l'ubov'", "druzhba", "droog". He said these must be some harsh words, maybe even curses.
* There is a safety advertisement about overhead powerlines that used to be on the radio in Calgary, Alberta. It started out with the tune from Rock a Bye Baby, with the song slowing down and slowly becoming more sinister-sounding. It doesn't seem ironic, but considering that one of the ways you can come in contact (and one the ways they like to remind people about) is backing up while in a cherry picker, and the cherry picker can resemble a cradle in a way, and the lyrics for the end of the nursery rhyme are, "And down will come baby, cradle and all," well, it just brings up some fairly disturbing images.
* There is a saying among Chinese folks about knock-off "brands": They're only using a fake name because they're not a good enough copy to use the actual name.
* There is a saying among military historians that the generals always prepare for the last war. In 1870 France thought any conflict with Prussia would play out more or less like the Napoleonic Wars, French Levée en Masse and
* There is a scenario in the Black Templars section of the GW website dealing with the recovery of the remains of their Emperor's Champion.
* There is a scene in which an FBI agent is offered more coffee by a local sheriff. He refuses, stating that it tastes like someone came in it. The sheriff

makes a sarcastic remark about how he couldn't control himself, rather than wondering how the agent recognizes the taste.
* There is a scene where Edmund gets tempted by evil and glares darkly at
* There is a scene where someone brings an embarrassing document (an old yearbook photo, or something) to the dinner table. Marion put it on her seat, sits down, and continues eating. Husband Howard says "That's right, Marion. Sit on it."
* There is a scene with a humorous tone when Thor meets the aforementioned Peter Quill for the first time and the two Sad Clowns converse on their respective grievances like they were talking about their kid throwing a tantrum at the supermarket the other day.
* There is a sci-fi cosplay wedding. It gets crashed by Jeremy Bullock, who originally played
* There is a second team of true companions, who band together almost specifically because they are all ridiculously outcast from rest of the school due to bad fashion sense (on purpose) and severe GSD (they look like monsters).
* There is a secret area accessed through th e Pirate Ship, called the
* There is a secret project called 'The Longevity Vaccine' and another called 'Clinical Immortality'. The former is a simple injection, the latter involves removing the
* There is a secret squeaky penguin item that can be obtained in the Orc Campaign.
* There is a section in New Mexico which in the original Spanish is "Peña blanca" or 'White Rock'. This has been Anglicized into "Pena blanca." This one change in letter means the section is now technically named "White Sorrow."
* There is a section of Toad Man's level and it is based on the same thing from Sonic the Hedgehog's Labyrinth Zone.
* There is a sect of Hinduism that believes that if a woman is not beautiful, she did something very bad in a past life and the gods are punishing her.
* There is a semi-famous magazine article from 1958 called "The Dread Tomato Addiction" that correlates the consumption of tomatoes with everything from death to communism. It can be found
* There is a separate group of Guardians that still followed the White Light. Having spent the last billions of years in isolation guarding the prison of
* There is a sequence wherein a Mad Scientist is experimenting on/torturing Selina Kyle's cat, Isis. All we see is the shadow of the man with the needle, and the shadow of Isis attempting to escape.
* There is a series of novels by Michael Thomas that have Jane Austen as a vampire.
* There is a series of text books titled "Life of Fred" that follows the adventures of a mathematics professor. Who is four (five in some of the books). That's about the most sane thing that happens, story-wise.
* There is a series of Vines where a man attempts to feed Gosling cereal, only to be aptly rejected.
* There is a set of eighty silver goblets that have been reserved for this purpose. Upon each of them is engraved the name of one of the men who flew on the Doolittle Bombing Raid of 1942. With it is a bottle of 1896 (The year of James Doolittle's birth) brandy. This bottle was intended to be opened by the last two survivors of that mission to toast those that have gone before them. With only four men left, all of whom are in their mid-nineties and in failing health, they decided to open the bottle together in 2013.
* There is a set of weapons that are extremely difficult to acquire. So much so that they have their own rarity category, Legendary. Some of these items drop from certain bosses at ludicrously low rates (Illidan's Twin Glaives of Azzinoth, Thori'dal), others require a number of pieces of the item that drop from bosses at a high rate which combine to form a broken version of the item that has to be repaired through some sort of quest (Atiesh, Val'anyr), others combine the best of both worlds and require multiple items with ludicrously low drop rates that the player must use as part of a quest to form them (Thunderfury, Sulfuras). Additionally, the Kael'thas fight in Tempest Keep temporarily grants the entire 25-player raid fighting him a number of these items (which fade in 15 minutes or when

you leave the area) as a sort of
* There is a severe shortage of telepaths willing to work in the area of mundane (i.e., non-Psi Cop) criminal justice. Crawling around in the brains of murderers and rapists is nobody's idea of a good time.
* There is a shared one between Carl and his old friend the village sentient scarecrow. While they were engaged, Carl's wife Aisha went on a walk when Carl took his time to show up for a date and got injured. Since then, Carl has become a
* There is a shirt that has D 1 4 M 0 N 4 5 (Diamonds) written on it.
* There is a short arc about a giant whale who had been waiting for fifty years for its pirate friends. It ended and was never mentioned again, and everything could have just been another
* There is a short sci-fi story about a female investment banker in the future, whose job is to spend the day looking for emerging niche markets to invest in. To motivate her, she is in competition with a figure called "The Antagonist", which is strongly implied to be an AI. At the end of the story, it's revealed that The Antagonist is not only a human being, but also her husband, and it is apparently SOP at the company they work for to pit married couples against each other. They remain
* There is a short story about a family of tortoises who go on a picnic, packing a number of canned things, and forget to pack the can-opener. Being tortoises, going back for the can opener would take a very very long time.
* There is a short story called "The Rose Window" where a cleric (also the narrator) in a mild fantasy setting has a large rose window brought to his church from the one where he grew up. Then bad things start happening and members of the clergy start seeing something in the window move at night. Then the cleric comes to realize that something other than his god was secretly being worshiped in the church he grew up in. In the end he plans to smash it
* There is a short story (could be folklore, or not) which puts the three monkeys in a very different light. You see, the monkeys are living in a palace, and the first monkey witnessed the king brutally beating a slave for nothing. When he told the steward about what he saw, the steward threatened to glue the monkey's eyes with pitch, so the monkey decided he didn't really see anything. Etc.
* There is a short story in which a demon has the job of dragging humans to Hell, and can only be defeated by holy words. The specific religion doesn't matter so much as the strength of the person's belief. His first intended victim is a Christian who prays and forces him to let go. The second is an atheist, and
* There is a short story that goes for two-in-one: the Tunguska Event is caused by the explosion of an alien starship... which was caused by said ship getting hit by a meteorite. For bonus points, Rasputin is involved.
* There is a short story that has one of the last few remaining humans believing this about humanity and a race of
* There is a shot of Trade Federation battle droids marching through an archway on Naboo in
* There is a sidequest involving an eccentric inventor that ends up netting your party lots of useful goodies: the last part of the sidequest requires you to perform various tasks, like doing enough total damage during a single playthrough, fighting enough battles, carrying enough money, and running away from enough battles. As a reward, you get a
* There is a similar one for skin cream. The ad started off with someone sawing trees into little bits. Only at the end do we find out it's a woman.
* There is a similar one in which Laurie keeps interrupting the whole time to turn to the camera and tell the audience that this is his favorite gag, and the next line is the payoff — no, wait, not quite yet ...
* There is a similar urban legend about the Sydney Harbor Bridge containing the bodies of workers who died during construction.
* There is a simple spell that can permanently negate magic within a huge volume. This is a bad thing in a world that heavily depends on magic and is one of the reasons that no-one makes flying castles anymore. Naturally, the wizards have gone to great lengths to expunge knowledge of it from the world.

* There is a single GB team in korfball, kabaddi, hockey, ice hockey, handball, volleyball, Aussie rules, but NI players are with Ireland.
* There is a site on the internet dedicated to the dangers of the highly addictive compound
* There is a sizeable number of named and shipped pairs of this variety across the
* There is a skin lotion or shampoo commercial that showed in a background graphic several elements in squares as might appear on a periodic table. Everything's fine until you notice
* There is a slight advantage to having the second leg of a home-and-away game at home; extra time will be at home, so you could play 90 minutes away and 120 minutes at home, which helps.
* There is a slight precedent for this actually, as the first official world champion, Wilhelm Steinitz, experimented with a variation of the Vienna Game opening in which he would allow his king to be chased around the board a bit in exchange for building up a strong central position and gaining a large development advantage. He opined that 'The king can take care of himself' when this strategy was criticized. However, his practical results with this opening were not all that great.
* There is a small, but obsessive, fanbase for Monaco, and its lavish culture. This can largely be attributed either to the reputation of the casinos of Monte Carlo or the fact that the country's most famous princess was
* There is a small handful of towns named Jerusalem in the United States which aren't as prominent as Jerusalem, Israel: in Maryland (unincorporated), New York, Ohio (village), and Rhode Island (unincorporated village).
* There is a small island off the coast of Western Australia, near Perth, called
* There is a small niche of Japanese arcade games that exists solely for catharsis. One example is
* There is a song by the English band Federal Drugs Administration, "
* There is a song sung in Welsh primary schools about various birds sitting in trees. The first verse is pretty normal and tells of a yellow bird in a banana tree. Then the second mentions a red bird in a tomato tree. The third is about a green bird in a cucumber tree, and just when you thought it couldn't get any stranger, the fourth verse is about a blue bird in
* There is a species of evil leeches, the "Dark Ones". All of the species lived at a single puddle, and yet all their evil was useless against a bag of cement, used to prepare the ground to be turned into a parking lot.
* There is a spectral sword known as the Sakenagi Longsword which seals whoever is cut by it in a blissful illusion for all eternity.
* There is a spell that makes traffic lights go green for you and make taxis arrive in 1 round (among other things).
* There is a Starburst commercial which has a guy eating some Starburst when he sees his friends in the park. The candy tells him they'll want him to share... but what if they weren't his friends? It then tells him to throw his friend's ice cream, dump their things onto the grass, and rip their clothes.
* There is a State Farm commercial that runs like this; one of the characters sitting around wishes they had reliable insurance, and a State Farm agent occurs. They then proceed to wish for a variety of increasing luxuries such as a sandwich, a pool table, and a hot tub, which all appear. They then wish for a woman (the girl from 4b). The original had the typical version inverted: a group of girls wish for a hot guy with consecutively more exotic qualities. One of the follow-ups has a fighting couple wish for new partners, when the man and woman transform into more attractive versions of themselves. Of course, the woman berates the guy for wishing her more attractive,
* There is a state in Mexico called Mexico. The state is called Estado de Mexico and the country is officially called Estados Unidos Mexicanos.
* There is a story about a man who declares that he is too smart to bow to the will of a Zen master who is giving a lecture. The master invites the man to stand beside him so they can debate the issue. The man stands beside the master. The master then asks the man to stand on his other side so everybody can hear him. The

man does so. Then the master suggests they both stand on the other side of the room so the students can have a better view. The man stands on the other side of the room. The Zen master then points out that the man had done everything he asked and continued his lecture. At this the man was enlightened.
* There is a story about an Ork raiding force that attacked one of Khorne's planets. Everyday the Orks are forced to fight a losing battle until every last one of them is killed. At the beginning of the next day, all of the Orks are resurrected to start the process again. This is considered by the Orks on the planet to be their equivalent of heaven.
* There is a story about a regulation for "Green Berets" (United States Army Special Forces) in Afghanistan to wear regular uniforms and to shave after a photo came out of a topless Green Beret in a
* There is a story about a shipwrecked Soviet sailor who was rescued by an American ship. When he saw an officer with a cross on his lapel, he asked why. When told that this was the Chaplain, he asked, "What's a Chaplain?" When he heard the explanation he said, "Interesting. Does he also act as Political Officer?" He was shocked to learn that the US Armed Forces
* There is a story about the Welsh Saint Collen who entered a fairy castle at the behest of its king. He was invited to a banquet there but wisely refused to eat, remarking that the food was only tree leaves. When the king asked what he thought of the red and blue garments worn by the castle servants, Collen said that the red signified the side being burnt and the blue signified the side being frozen. He then poured holy water on the ground, causing the castle to vanish.
* There is a story arc where Sally feels threatened by new policewoman Janice, who is played by the very statuesque professional wrestler
* There is a story called "Fessenden's Worlds" by Edmond Hamilton, where a scientist creates a miniature galaxy to experiment upon. After he's killed (along with the galaxy), a friend of his, who saw it all, keeps thinking "is there a Fessenden out there"?
* There is a story concerning Peisistratus, a politician from Ancient Athens, who was walking through the Athenian countryside and got chatting with a farmer. Not realising who he was talking to, the farmer spent most of the conversation criticising Peisistratus' policies, calling him a tyrant and complaining about unfair taxes. Peisistratus listened patiently, then asked "What do you get from the land you farm?" The farmer replied: "Nothing but aches and pains. If only Peisistratus and his tax collectors would take their fair share of those." Peisistratus, having a good sense of humour, decreed that the farmer need never pay taxes again.
* There is a story floating around of an incident in Disney World where an employee in a Goofy costume saw a child drowning in a fountain. He went into the fountain, took off the head of his costume, and rescued the child. He was then fired for removing the head of his costume and thus breaking the illusion of the entire theme park.
* There is a story of a British man visiting San Francisco for the first time and asking a cabby where he can pick up a pack of fags. "Fags" in British slang are cigarettes. In American slang, they're...not
* There is a story of a British spy in occupied France during WWII who was exposed after ordering "cafe noir" (black coffee). A local would have known that, with milk being scarce, the "noir" was redundant as that was all there was on offer.
* There is a story of an American missionary who went down to Nicaragua once, only to be confronted with rumors of him trying to kill children and harvest their organs. Locals responded by beating him into a persistent vegetative state. Similar stories exist of aid workers, tourists, and military personel being attacked for the same reason. Verifying their authenticity is difficult.
* There is a story of one American Volunteer Group pilot who damaged
* There is a story or joke about a Dutch horsebreeder conversing with an Englishman where she uses the Dutch word for breeding (fokken) and then mistakes the Englishman's "pardon" for the Dutch word for horses ("paarden"). Both
* There is a story out there about a drug dealer who tripped out at a rave and

injected glow stick fluid into his veins. He had this effect for several minutes, and became the center of attention...
* There is a story out there that when Chrysler began selling cars in Chinese markets, they did inexplicably poorly. It turned out that when "Chrysler" was transliterated into Mandarin Chinese, it became "about to die".
* There is a story (probably apocryphal, but you never know) of a group of American pilots in the Pacific theater of WWII, who one day decided that before going into combat they would all paint the propellers and noses of their planes bright yellow. Then the next time, before going into combat they painted their noses and propellers bright blue. Then the next time, they painted them bright red. And so on. Their thinking was that the Japanese would see the different colors and think it was a different squadron of fighters every time, giving the impression that the Americans had endless waves of fighters.
* There is a story that when Queen Sālote Tupou III attended the coronation of
* There is a story told about the possibly fictional, possibly real Mulla Nasreddin (the Muslim World's
* There is a story told by a comedian where a train is traveling through
* There is a story where Jughead is trying to get his dog Hot Dog to skate with him because he refuses to skate with a girl. The instant Hot Dog gets on the ice, he starts slipping and wobbling around on the ice because he has weak ankles. It's
* There is a story where Scrooge McDuck orders a pizza, and, being his regular parsimonious self, deliberately sabotages the delivery, so that it would take longer than the thirty minutes and he wouldn't have to pay for it. Unfortunately for him, it's well enough time for the pizza to get cold and wet, and he doesn't get to enjoy it very much.
* There is a straighter example in the episode where Teal'c is trapped in the virtual reality of the chair. The setting is an invasion by a Kull Warrior of Anubis. The military personnel keeps firing on it with ordinary weaponry (instead of doing something smart like evacuating or trapping the Kull Warrior in a corridor), completely ignoring the fact that the Kull Warrior can only killed by a special weapon.
* There is a straight example in the first System Shock game, however - no matter how long it takes for you to escape, you will always be in time to
* There is a strip dealing with a festival in memory for the cats killed because they were thought to be evil. This becomes an opportunity to show several characters with cat ears, male or female.
* There is a strip where Hagar returns from a plundering, handing Helga a large, well-crafted castle-style lock, noting that she's been worried about people breaking into their house. She's initially overjoyed until she asks where he got it. "Oh, it wasn't too hard — it only took me five seconds to rip it out."
* There is a strong belief among the people of Cornwall and Scilly that there is a sunken land under the sea that serves as their border known as Lyonesse. Apparently, if you stand on the cliffs of southernmost Cornwall, you can still hear the churchbells ring under the waves. Similar stories are also told about the city of Ys off the coast of Brittany, Cantre'r Gwaelod in Wales' Cardigan Bay, and many other locations around the British Isles. Such stories may have foundations in truth: At the end of the last Ice Age when region was being first settled, sea levels were significantly lower- meaning many areas of the English Channel's shallows were consistently above the tide line. The isles of Scilly (for example) was one big island and there are traces of farm hedges underneath the waves.
* There is a subset of Skrulls who claim that the Earth belongs to them - as per their religious prophecies - laying the foundations for the
* There is a subversion, also with Vree, near the end of the comic as well.
* There is a subversion in a famous match for Mexican-based promotion
* There is a subversion in a series of commercials for Bud Light. The announcer says that drinking the beer will give you some super power/ablity, then shows someone using it with bad results and then the announcer says this no longer comes with the beer. Some examples include the ability to breathe fire, in which a man

practically burns down his girlfriend's house, and X-ray vision, where a woman is horrified to see some fat guy naked.
* There is a sugar-water company that deliberately plays as-loud-as-possible sounds for their commercials as their water is a "wake up call".
* There is a surprisingly physical cat fight between Bill and Lola in
* There is a Suske en Wiske story called De Texasrakkers ("The Texas Scoundrels"), which was originally a shout-out to the popular 1950s TV western series The Texas Rangers, but this show is nowadays completely forgotten. In fact: mention The Texas Rangers today in Flanders or the Netherlands and everybody assumes you mean De Texasrakkers.
* There is a switch to a more detailed shading and exaggerated perspective when
* There is a tactic whereby if a go-ahead score near the end of a game seems inevitable, a defense will let the opponent score right away in order to give their team's offense as much time as possible to respond. It doesn't always work, however, since it still requires the offense to mount a successful scoring drive of their own, which is why it's only used when avoiding a score altogether is basically impossible.
* There is a tale of a wily courtier who offends a noble in a culture where the punishment for doing so is death. The noble purports to offer him a fair chance to live by proffering him two folded pieces of paper, supposedly with one saying "Live" and one saying "Die". The courtier is sure that both say "Die" and the noble is just trying to save face. He takes one piece and eats it without looking at it. When the other piece is opened and says "Die" he lives to tell the tale as the other piece he chose (and ate) must have said "Live" and it's impossible for the noble to claim otherwise without revealing that he'd rigged the offer and losing face before the court.
* There is a theme that the witches and wizards of successive generations fail to live up to their predecessors. They had to look a generation back to find anyone capable of taking Voldemort in a duel and the best of Harry Potter's peers don't compare to the talents of their parents at similar ages.
* There is a theory popular with Aberdeen University Engineers: There is no problem anywhere that cannot be solved through creative application of: Duct tape, WD-40, ice-cream, and a brick.
* There is a theory that a popular motif of the Soviet art depicting Marx, Lenin, and the current leader of the Soviet Union in a row looking forward grew popular because it acted as a Soviet version of the Christian trinity. Marx takes the spot of god because he was the progenitor of the ideology and has the beard to match the traditional
* There is a theory which states that at the time of the dinosaurs Earth had lower gravity (for whatever reasons), but it doesn't get a lot of recognition.
* "There is a third option") the camera zooms out to show the Cat standing at a toy keyboard, on which he then plays another chord.
* There is a three-way split amongst wrestling fans in general. Some watch for the drama and promo segments and fast forward through matches. Others watch the matches and skip the talking segments. Only the third watch both.
* There is a Tide... since Mitchell had played a number of (non-disabled) characters in the first season before his ALS was diagnosed. The producers created the character of Aurellio to retain his talents.
* There is at least a bit more foreshadowing in both the manga and the light novel since they let you in on Ryuuji's thought process. He is always thinking about
* There is at least a brief subversion to this with the Dominion War where Deep Space Nine and the wormhole take over the "center of the universe" position. While the Dominion would love to take Earth, the wormhole and the region around it is far more important real estate. Even Sisko would rather see Deep Space Nine and the wormhole taken back before Earth.
* There is at least one butcher shop that deals in black market meats. Human meat isn't one of them.
* There is at least one case of someone claiming sleep-robbery as a side effect of Ambien. As in, he was claiming that he robbed a store. In his sleep.

* There is at least one descendant presently in the German Air Force.
* There is at least one instance of a minor addition in the anime contradicting later information from the manga. After the
* There is at least one order of the inquisition devoted entirely to cutting through as much as of the Administratum's red tape as possible. Whether they're having any success or making a real impact is unknown and doubtful though.
* There is at least one other movie with an almost identical premise,
* There is at least one real-life example of a machinist building such a device, so a one-armed man could compete in target shooting. In a strange case of life imitating fiction, he was eventually barred from competing with the "arm cannon" because it made him such a good shot — the gun was triggered by his opposite shoulder muscle and bolted on firmly, giving much more stability when firing than anyone could otherwise achieve.
* There is at least one rule Negi can break by kissing hard enough but no one knows if that
* There is at least one scientific paper consisting entirely of the word chicken,
* There is at least one website for teaching Russian that has this trope's name as one of the phrases taught.
* There is a tongue-in-cheek army list Games Workshop created that did have the Marines as powerful as they are in fluff. In a full-size game they could field 6-10 guys depending on equipment, and they are called "Movie Marines" because in-universe this is how they are depicted in propaganda videos.
* There is a touch of irony here as the film was written and produced by Frank Wells, younger son of
* There is a town by the name of Sault Ste. Marie in Ontario, Canada. It's right on the border with...Sault-Sainte-Marie,
* There is a town in Idaho in America called Nampa, which is similar to "nanpa", a commonly-used slang term in Japanese for the act of picking up a girl for a date, though it is often used to mean "soliciting a prostitute".
* There is a town in Pennsylvania with the extremely confusing name of London Britain (note the lack of a comma).
* There is a town in Tasmania called Penguin. It has a large penguin statue (containing asbestos), penguins on the rubbish bins, small penguin statues, shops named after penguins, shops selling penguins and more. Other than that, its pretty dull. Definitely better with penguins.
* There is a traditional, somewhat educational short play in Austria called Krampusspiel Weißenbach bei Liezen.
* There is a tradition in some police forces (etc.) that if a rookie doesn't have 'the worst' happen to him, they'll take him to a diner and order scrambled eggs & brains with hash browns; and lots of ketsup.
* There is a Treehouse of Horror episode where Flanders attempts to make a "Hell House", a religious alternative to Halloween haunted houses with the intent to scare people, in this case, children, into being a good Christian. It starts off as Nightmare Retardant, with a crappy sketch where Skinner gets hit by a cardboard bus after looking at a smutty magazine, punished for thinking the human body is beautiful. The children think it's stupid, and thus fails in converting them, so Flanders prays to God to give him the ability to scare the kids into religion. This trope is subverted: God answers, and Flanders turns into a Satan-looking monster and forces them to sit in a hellish realm and watch several scenes featuring the consequences of the seven deadly sins. By the end, the children promise to be good Christians.
* There is a tree right next to them that they're clearly meant to cut down and use for the bridge.
* There is a trend among magical girl anime in Japan of using the eyecatches to show the heroine having fun with some gadget or toy, such as those featured in
* There is a truly creepy Chinese story of a beheaded general whose body did not die. His family took it home and it communicated with them via writing. It even begot a son on the 'widow'.
* There is a Twisted Christmas set that includes Krampus and a crew of dark

Christmas-themed miniatures.
* There is a twist, though. While most would assume that battleships would be the postings of choice for any perspective commander, this has changed with the
* There is a Twitter Charity Swear Box that lets you donate to good causes for talking shit on line. Another such charity is called Fuck Cancer.
* There is a type of fungus called Ophiocordyceps unilateralis, which possesses ants and controls them so it can make them crawl into a good spot to grow and reproduce in. After it forces the ant to go into a suitable spot it uses the sugars in the the ants body to live on and eventually leaves the ant as a husk. It will then grow out of the ant's body, ripping it open. Several ant species have developed counter-measures to this by observing ants with unusual behavior and quickly guiding them far away so that the doomed ant won't infect the whole hive. It's quite efficient too.
* There is a universal trigger phrase for artificial intelligences in
* There is a urban legend that Maine coons are hybrids with raccoons, which is impossible.
* There is a user on the Song Meanings website arguing that the song "So Far from the Clyde" by
* There is a US Marine Corps and US Army marching cadence with a verse that goes:
* There is a variant ending with "Please come in to get your pictures taken, Citizen Romanov".
* There is a variant with the Israeli leader saying "God promised me there will be no Palestinian state".
* There is a variety of the joke where the drunk asks the Golden Fish for a half-litre of vodka, then for another one, and a third one too... at which point he then eats the Fish. As the ghost of the Fish shows up to ask why the Hell would he do it, he explains, you need a snack to go with the vodka, don't you?
* There is a vault that contains a maze to reach the bottom for a mission. Or you can just repair the elevator at the entrance and go straight to the bottom floor.
* There is a verified case of a forger in California who attempted to pass a forged check written on a checkbook he had stolen from a mailbox. The teller was the actual person who owned the checks.
* There is a version of this song performed by Jack Johnson where Rudolph
* There is a version of this where Jack envisioned his stepdad as cold, unloving, and ubermacho. When the gang visited him, he was a friendly guy who got along very well with Jack's son. Jack's
* There is a very brief romantic flirting between Masuka, a forensics expert, and Ryan, his sexy blonde intern. They also had the forbidden teacher/student dynamics. She screwed him over, stealing
* There is a very clear difference between blackface and using makeup and other chemicals to darken ones skin for espionage purposes.
* There is a very good reason for this: Howlers eat mostly leaves, which are very low in nutrients. As a result, they are more sedentary than other monkeys, due to having less energy to expend on moving around. They also need larger territories to get all the leaves they need. The problem is how to defend a large territory against other troops when you can't move fast. The Howler's solution is to make as much noise as possible to proclaim their territories without engaging in actual fights with other troops.
* There is a very good reason for this. Notwithstanding the moral implications of trusting your life to an officer who might be sleeping with your partner behind your back or looking to pull a
* There is a very good reason why "I hate Time Travel," is one of the more common
* There is a very long list of college football players (including Heismann Trophy winners) that were stellar in college but underperformed or outright busted once they reached the NFL.
* There is a very old Disney comic story called "Thumper meets the Seven Dwarfs", where
* There is a very old form of scam (so old it's incredible people continue to fall for it today) where an apparently mentally challenged man approaches a victim in

the street offering her (as it is often an old woman) the chance to buy some "stamps" in an envelope or suitcase. The "stamps" are bills of the highest denomination, so the full content can easily sum thousands or even millions, but the scammer, apparently unaware of the value of bills, asks only for some hundreds in coins. The victim is then approached by another "smart" guy that offers her to buy the "stamps" together and divide them between themselves. The victim agrees, and the smart guy always gets the upper half of the money while she gets the other which, as she realizes when arriving home, it's just sheets of newspaper.
* There is a very old saying: "To train an archer; start with his grandfather".
* There is a very rare genetic disorder that causes male children to be born with female looking genitals but male brains before they go through puberty, causing them to be
* There is a videogame based on the AAA (One of the 2 major Lucha Libre associations in Mexico). The tagline?
* There is a video of an archaeologist specializing in prehistoric music playing a
* There is a villainous (sorta) version with the bad seeds, who all watch each others backs, as they are all the children of
* There is a viral video online of an animal that many people thought was either a chupacabra, alien, other cryptid, or a undiscovered species. Close examination revealed it was a sun bear that suffered from one or more conditions that made it abnormally extremely small and hairless.
* There is a way to stay on good terms with both the Railroad and Brotherhood by siding with the Minutemen.
* There is a well-circulated joke in Spanish-speaking circles about a Cuban exiled sending the corpse of a deceased relative to be buried on the island... and along with the body, a big lot of stuff asked for the island relatives, either worn by the corpse or hidden in the coffin.
* There is a well-known joke regarding this trope that goes something like this:
* There is a well-known pack animal which uses persistence as its primary hunting strategy: Wolves. Kind of makes sense that these two species would have gotten along fairly well in ancient times, doesn't it? Man's Best Friend might have originated as a pack of wolves and a pack of humans getting to know each other while chasing down the same big game, teaming up to take it down, and sharing in the kill.
* There is a well known Russian joke about a teacher who asks a student "Where will we get if we start digging a tunnel from here through the center of the Earth". The boy's answer? "Into a madhouse".
* There is a West African hot pepper sauce which is very popular among African exiles in Britain and available from ethnic food retailers. In Ghana, its name simply means "pepper sauce." But it won't be on general sale anywhere else in a hurry, though, as the brand name is "Shitto," or "Shitto Gourmet." It does actually taste rather good, it has to be said, like tabasco, jerk sauce, or peri-peri.
* There is a whole genre of video games that only exist to promote a product. They are called Advergames.
* There is a whole group of side-character students like this in the webfiction
* There is a whole song about it in part 2 of the pilot, in which Pinkie Pie teaches her friends to literally laugh away their fears.
* There is a whole sub-genre for redrawing mecha as girls wearing the machine as armor. It has gone so far as the Destroid
* There is a wide array of custom builds and dune buggies that have mounted weapons systems, battering rams and similar, but as they aren't really 'cars' in the traditional sense its arguable if they qualify. They are pretty sweet rides and have weapons attached.
* There is a widely-circulated (though false) story of a zookeeper in Germany who attempted to give an elephant an olive oil enema by injecting it up the animal's anus. This resulted in the elephant releasing 200 pounds of dung onto him, crushing him to death.
* There is a wide-spread rumor found around the web that says that TV Tropes features works pages for at least one anime series that are completely fraudulent.

* There is a wizard in the middle of every planet. You have to tunnel through the planets.
* There is a women's restroom in the lobby of a Penn State dorm that has an extra unusual for women's restrooms: a urinal. (The dorm was converted from all-girls to coed; for some reason the urinal survived the transformation.)
* There is a Youtube clip of Pedobear doing this to a child at one of the larger cons.
* There is "Believe the Rainbow" where three young people eating Skittles are sitting on a rainbow in the sky. One of them starts questioning the situation he's in, upon which a
* There is confusion over whether Arendelle is a city-state or a country as there are implications of both. "
* There is cutscene where Barry Burton kicks open a locked door to save Jill Valentine from a
* There is Cyborg, the only black member in the team, and Robin, who is Romani even though he looks white. Raven is an apparently white
* There is debate about whether ships flown by pod pilots actually have any crew at all or have completely automated systems, but it is normally accepted that smaller ships have none, while large ships have significantly smaller crews than would be needed without a pod pilot.
* There is definitely a Destiny - the History Books kept by the Monks of Time describe the complete history of the Disc from beginning to end, Death's life timers start with the appropriate amount of sand,
* There is deliberately no color specifically aligned with good or evil, though some colors get stereotyped as such anyway. White is associated with light and angels and often thought of as the "good" faction, but its traits can also be directed to oppressive tyranny and complete conformity. Conversely, Black's selfishness and (un)death motifs makes it the obvious "evil" color (and even the creators admit that villains tend to be drawn to Black), but it's also the color that values self-improvement and following your dreams.
* There is episode where Veronica herself is arrested by the sheriff in front of the school. "Gosh, I hope they use that photo in the yearbook" indeed.
* There is even a (generally discounted, but still) legend that Genghis Khan was actually Minamoto no Yoshitsune, which if true would expand Kublai's Badass Family Tree considerably.
* There is even a saying about Buddha, the poster boy for patience, serenity, that goes like this: "Even the Buddha will get angry if slapped thrice in the face" for
* There is even a "World Builder's Guidebook" giving a set of auxiliary rules for building one's own world in accordance with AD&D's mechanics. (A dice roll can result in the world being shaped as a twenty-sided polyhedron.)
* There is eventually a successful attempt not at breaking the monopoly, but at devaluing Spice. One of the reasons it is so important is that it is essential for FTL navigation. Eventually one faction manages to develop an alternative navigation method.
* There is evidence for either interpretation, but the possibility that the adventures Jason and Michelle have in
* There is evidence that at least some of these meltdowns are caused by an imbalance of grey and white matter in the brain, which renders the brain so sensitive to sensory input that being exposed to too many noises, smells or even colors at once can literally trigger a small seizure in the frontal lobe of the brain. For reference, the frontal lobe controls reason, emotional regulation, and decision making. Is it any wonder an autistic person in this state can become violent or unreasonably depressed?
* There is evidence that Batman himself could succumb to this if he would ever "win" his war on crime. He's somewhat uninterested in actually
* There is evidence that some fossil sites such as the Cleveland Lloyd Dinosaur Quarry and the Shishugou Formation Dinosaur Traps were the result of hundreds of dinosaurs dying after getting stuck in thick mud.
* There is evidence that the Feds and SFPD sometimes get along: in "Mr. Monk Is

Someone Else", there's smooth cooperation between Team Monk and the FBI Los Angeles field office. In "Mr. Monk Bumps His Head", Randy persuades the FBI to lend the SFPD a plane when Monk is found with amnesia in Wyoming. And in "Mr. Monk and the Election," when evidence shows up at the crime scene that the shooter used an AK-47, Stottlemeyer tells Randy to call the ATF and request their help (though the ATF doesn't show up onscreen, it is mentioned that the two forces are working together on the investigation: the SFPD to look for the suspect, and the ATF to locate the gun).
* There is exactly one woman he will not hit on: the combat gynoid that's been by his side since he was a baby. Mind you, he's happily chatted up every
* There is fanart of Pinkie Pie being shipped with "Pinkamena," the name used to denote her flat-haired, depressed, often
* There is gossip in the town that Molly Gibson is involved in an ill-advised relationship that might ruin her or at least her reputation. Subverted because she isn't. It was just a misunderstanding.
* There is Hamlet's famous pondering whether it's better to be alive or dead and how he would kill himself if he weren't afraid it would damn his soul, especially in his "To Be or Not to Be" soliloquy but it appears throughout the play.
* There is historical and archaeological evidence that this practice persisted into the late middle ages, and that sacrifices, up to and including human children, were incorporated into major building works. It ended up being
* There is honestly nothing funnier than a giant anthropomorphic pint of Guinness going 'Blah blah blah blah blah'...
* There is, however, a very good reason why smoking is so prevalent in the restaurant business: No chef will deny his staff the occasional break to smoke. However, taking a five-minute break without smoking will earn you a clip around the earhole and a yelling-at about manning up and not slacking off on the job. Cooks smoke because it's the only way they can get to take a breather during service.
* There is, however, quite a bit of cash seen in the episode "Payback".
* There is, however, some justification for this. Despite being effectively superhuman, the Agents must still operate within the bounds of their programming and the programming of the Matrix itself. They aren't able to avoid every bullet (as proved by Neo and his minigun) and being hit will still kill or injure them and either slow them down or force them to find a new host.
* There is, in any society advanced enough to make mixed drinks, a drink that sounds like 'gin and tonic', for instance, and throughout the known universe, our planet is the only one which uses 'Belgium' to mean something other than the most extreme profanity.
* There is indeed another verse, and there comes the Lord (literally, "the Holy One, Blessed be He"), probably in the End of Days.
* There is inexplicably a fire pole in the Harmonia Gardens restaurant in
* There is in fact a theoretical calculation of a black hole engine that implies that if a test mass were to be slowly lowered down to a Schwarzchild black hole and the energy used to do mechanical work, the entire rest mass energy can be completely extracted as useful work, something that only matter-antimatter annihilation is capable of. No other process comes remotely close to achieving such output. By comparison, nuclear fusion of hydrogen manages to covert only a measly 0.7% of the total mass energy into radiation.
* There is initially a love triangle between Souma, Masataka, and Sakurako. With Souma rather obsessively pining (to a Yandere-like degree) after Masataka, who has a huge crush on Sakurako, who is a Yandere for her brother Souma.
* There is likely someone, or something, that has taken notice of Zeddicker and is sending all its agents to him.
* there is little to go to since the place is far from much of anything.
* There is Maerorgladi, the Sword of Regret, wielded by Goldilocks. This is an enchanted sword that "hungers" and never fails to kill. For every soul slain with intent, it takes another at random, as the blood price for its service.
* There is Mantis, a praying mantis, being strong enough to throw around Po by himself. During the battle with Tai Lung he is able to hold the ropes of the broken

rope bridge while the leopard and
* There is McDonald's commercial where a young kid asks his father what sex is. They go to eat and you see him making gestures
* There is more focus on the worldbuilding compared to the novel. The reason for this is the novel is a sequel to one of Priest's other novels, Lord Seventh, which goes into more detail about the worldbuilding, while Faraway Wanderers simply focuses on the main couple.
* There is more problems with the gateway spell than that. Apparently the first time you use it you are told that you need a large space in order to cast the gateway spell, the one that will allow you to travel through worlds, so the characters go to the town square, summon a
* There is much pitch-black comedy in the viciously depressing Korean movie
* There is much speculation among historians whether the relationship between
* There is never a clock to show players how much time they have left to make their moves, and the players never record their moves. Both of these are required in any competitive match of any kind.
* There is no apparent gender imbalance, in any direction, within their species. The term "warlock"
* There is no clear consensus about what to do if you find yourself passing Pele on the road. Most people say you should pick her up out of respect and she'll bring you luck or save your life - the usual reason she appears is to warn people. Her MO is to sit silently then suddenly say something like "look out ahead" and disappear. When you stop the car in shock you'll find you just missed slamming into a boulder/fallen tree/rockslide. Ignore her and something terrible will happen, possibly your own death due to not being warned about the boulder/fallen tree/rockslide ahead. Others say if you pretend you didn't see her in the first place you can escape her.
* There is no clear such moment for Demelza, but Harry explicitly tells her that he loves her in Chapter 37 after a particularly intense session following Harry's efforts to assure Demelza of her value to him, and Demelza eagerly reciprocates.
* There is no concrete evidence that Saint Francis of Assisi wrote the prayer "Make Me an Instrument of Your Peace"; the prayer's earliest known appearance was in 1912. The Franciscan Order sort-of disassociated themselves from the prayer, and one church historian remarked that the prayer, while noble in its sentiments, sounded a bit too
* There is no doubt of the evaluation since when later confessing to bad behavior at the party, Meg includes it:
* There Is No Game is a game about the fact that there is no game due to the fact that the in-game developer ran out of funding in a manner similar to the developer in real life.
* There Is No Game: Wrong Dimension. There is also a virus named Mr. Glitch who is also alive and very malicious.
* There Is No Game: Wrong Dimension towards the F2P model, and many of the puzzles in it are about finding ways to cheat your way past the arbitrary progression-blocking paywalls without actually paying.
* There is no GATE; we did not fight there by the start of the roleplay.
* There is no GATE; we did not fight there: During a supposedly safe patrol into the Thousand Needles, Kytheus and his friends grow uncomfortable when an ominous mist surrounds them, leading him to request more scouts to move ahead at the bemusement of the leading centurion. As it turns out, Kytheus was right to be suspicious as their legion cohort is ambushed by hundreds of Drex soldiers.
* There is no GATE; we did not fight there highly resembles a fantasy Roman Empire, with the presence of many things based on Roman culture (such as some names, buildings, martial styles, the treatment of slaves, racism, and other aspects). Presented as a necessary evil and a light in the darkness despite its many faults, because it brought order to the otherwise bloody and uncivilized world.
* There is no GATE; we did not fight there: In the interlude *Let it All Out*, Adrianna is able to get over her personal disdain for demihumans after and allows Delilah to weep into her chest over the loss of her family. Their relationship grows considerably after this event.

* There is no GATE; we did not fight there: In the interlude *Meet the Neighbors*, Kytheus befriends Cardin Brutus, an heir to one of the neighboring provinces, by beating him thoroughly in a spar.
* There is no GATE; we did not fight there: Kytheus Rhavenfell's entire family tree, maternal and paternal. In particular, his grandfathers, Kryton and Aslan, are two of the most exceptional, and some might even argue the greatest, warriors ever known to the Empire, while serving as the Lord Exemplars of their domains.
* There is no GATE; we did not fight there, man murdering monsters can be found in most corners of the setting. Most notably are the Hardy Beasts powerful enough to massacre entire provinces, such as the Tyrant.
* There is no GATE; we did not fight there originally despised each other, due to Lyon finding Valerian as stuck up and dishonest and Valerian thinking of Lyon as a barbaric idiot, though he held his tongue due to his respect for Kytheus. After the interlude *Vale and Ly's Excellent Adventure*, they've evolved into this trope, with Lyon insulting Valerian as usual and Valerian no longer holding back his true thoughts.
* There is no GATE; we did not fight there, takes after his father in wielding spears in battle. He also wields Skyfall, a glaive forged by a a dwarven Master Fuser Smith out of a lightning-blackened piece of the Cloudpeak Ironwood Heart, complete with a twisted piece of Tyrant horn.
* There is no GATE; we did not fight there when it comes to swimming, which he struggles with. He's getting better, though.
* There is no GATE; we did not fight there: With all the adventures Kyte and his gang get up to, this happens pretty often.
* There Is No Good News: The teller was flat-out lying, and has no good news of any context whatsoever to relate.
* There is no heaven or afterlife. You just lie there, aware of your body breaking down and rotting, a pain that transcends mortal understanding and continues and only intensifies even after the nerves are gone.
* There Is No Higher CourtThe people who make laws can do whatever they want.
* There Is No Higher Court you'll get to the highest court that has jurisdiction to hear the case. Depending on the jurisdiction, that could be quite a few steps.
* There is no hint of it being deliberate but during Littlefinger's interrogation in "The Mountain and the Viper," Lord Royce is relentless while Lady Waynwood remains reserved and polite.
* there is no in his apartment, which would have fairly standard for a writer at the time.
* There Is No Kill Like Overkill, build nothing but the biggest hammers you have available, and begin blasting.
* There Is No Kill Like Overkill: Deciding to keep using lethal methods on the enemy even when the enemy would most likely already be dead by now.
* There Is No Kill Like Overkill. It may seem over-the-top or sadistic, but there's no denying that it's satisfying to run into a room full of enemies, turn the napalm on full blast and start spraying. It's also hilarious to see enemies like the otherwise-stalwart Men in Black running around with their hands in the air screaming.
* There Is No Kill Like Overkill: More force is used more than necessary.
* There Is No Kill Like Overkill. Seriously, it only takes 2 mini-nukes to kill the most powerful enemies on normal and this fires 8.
* There Is No Kill Like Overkill: The avenger won't let up even after the victim has stopped breathing.
* There is no lawyer present for the signing, nor a review of the contract. Jerrica simply takes a cursory look at the contact and signs without reading any of the fine print.
* there is no legal requirement to list ingredient SOURCES which is one reason Heinz advertises that its are natural. That said, the resulting ingredients are effectively the same either way as neither method of obtaining the alcohol used to distill the vinegar results in the product including petroleum. But most people wouldn't actually know that.

* There is no limit, however, to how much you can play the "Caravan" card game (barring your personal finances or the deaths of anyone willing to play).
* There is no more explanation necessary, just the appearance of the trope on the work's list is a spoiler in itself. To test this, take a random show and imagine you know that absolute basic premise and this trope is appearing as a
* "There is no one else here" — Cue someone entering the scene, possibly to kill you. Alternatively, you're about to find out
* there is no possible way the combined forces of the galaxy (geth included) can hope to defeat the Reaper armada, despite reverse-engineering some of their tech. The entire galaxy falls in a few months.
* "There is no problem that cannot be solved by the proper application of high explosives".
* There is no room for play in Islam, there are no jokes, there is no fun, there is no humour.
* there is no rule that the lantern should have a candle the next day, saying that the lantern must also have a candle. That night, the man bumped into him again, and this time the loophole was that the rule doesn't say the candle has to be lit. The embarrassed head cancelled the rule on the following day. At no point in the joke does the village head consider carrying a candle himself.
* There is no singer, but the first two notes in the Schleptet in E Flat Major are well over ten seconds each; in typical performances the horn player falls out of their seat by the end of the second note.
* There is no standard for Traveller; it depends on function and aesthetic taste and there are myriads of possible ship designs(indeed some traveller fans mainly like designing ships). Ships made to actually land on and take off from a planet generally have a "needle/wedge" design which looks something like a space shuttle. However this requires sacrifice in payload and the heaviest ships are generally serviced in orbit.
* There is no such thing as a universal test for poisoning, only a series of tests to detect if a certain category of pharmaceutical is in the victim's system. Thus, if a poisoner can find a toxin in a category the local coroner is unlikely to test for without good reason (running tests costs time and money), and administer it without giving anyone reason to check for said category of toxin, then they have found an effectively undetectable poison.
* There is no such thing as Frog Style Kung Fu either. In it, even punches that miss actually still hit.
* There Is No Such Thing as Notability or just go back to their favorite art site instead. Those who do adjust become indistinguishable from any of the Helpful Troper species.
* There is nothing holding up Boa Hancock's robe except the sheer cruelty of the universe. This is MUCH more apparent in the animated version.
* There is Nothing I can Do begins with a muffled bassline and drumbeat that grows a bit clearer as the "protagonist" opens a door and enters the room — then turns into the song's own bassline.
* There is nothing inherently wrong with Lorwyn. The plane itself is a perfectly nice place; not all of
* there is nothing in the box, and Zeus knows this! And even if the empty box had value, there's still a perfectly good temple for storing it on the back of Cronos!
* There is no time limit despite the apparent urgency, there is the option to destroy them and can be done with a single satchel charge (although the gates had been earlier blown up and they mention that they were recently restored and are thus weaker).
* There is not the slightest hint of romance between the characters of
* There is now a sequel that has its tongue still firmly in its cheek,
* There is no way Ren's gun-blades should be able to fit into his sleeves, let alone leave no sign that they're there. Nevertheless, that's exactly what happens.
* There is no word whether the cavalry was involved in any business on Calvary.
* There is no Xing in the 2003 anime-verse; however, a passing reference to an eastern country, along with chopsticks and Asian-looking characters existing, imply

a similar country exists.
* There isn't a 5% chance that the door will be stuck, causing the replacement clone to suffocate before they can get out.
* There isn't a river but there is an Amazonian jungle and some really misguided and disturbed people in the film and novel
* There is occasionally a danger that only Reynir can see coming and/or do something about, and he gets better at being assertive in those situations as the story progresses, but he returns to being submissive once those dangers have passed.
* There is, of course, the classic folk tale of the husband who thinks his wife has the easy job, lazing around the house all day, while the wife thinks the husband's job playing outside in the fields is easiest. They switch jobs and both make disasters out of the other's work.
* There is, of course, the godmodder, who, despite being powerful enough to take on gods, dies at the end anyways.
* There is of course the one where he goes "Don't blame me, the idiots in the forums wrote my lines!"
* There is often a shift in the way the character is perceived by the narrative and other characters.
* There is often (but not always) a character with this disposition in the
* There is one account of a horse that did the same thing, and would answer math questions and puzzles by reading the unconscious body language of humans present and responding by tapping his hoof or pointing to an object. It was only figured out when a psychologist asked the horse a question nobody knew the answer to, and the horse couldn't figure out how to answer.
* There is one after Arthur eats too much candy and cake and nods off while listening to his sister's fairy tales.
* There is one alien species in which people are born adult. When they make contact and try to establish a diplomatic relationship with the Federation, they become fascinated with human children.
* There is one attempt at a subversion during the Death March arc. Sena accidentally enters a tryout session for an American football club. Once he demonstrates his speed and evasion skills, the opposition gets obsessed with crushing him, literally. The examiner has to point out that they would get disqualified if they tried to carry out their threats — not that Sena lets them try.
* There is one aversion. A movie reveals that there was another son who was born before them, and the minute he was born, he tried overthrowing her, which did not end well for him. That child is Darkness King Gill, the Big Bad
* There is one bit where fresh-out-of-the-Academy Third Lieutenant Juan Rico recommends a couple of field promotions be performed on the way back to base, to fill out his platoon. Juan's captain explains why you never promote on the way back to base (higher headquarters will grab them).
* There is one blue text option where you use a drone to repair a disabled Rock ship's engines while two Mantis ships fight over their prize. Rather than taking the opportunity to jump away and perhaps manage to repair their ship they elect to instead
* There is one character who takes a job there, but it's done to show how bad off her family is financially.
* There is one confirmed way to get many of the benefits of this without breaking physics. If you make it so that the ship is not a closed system, then it doesn't have to carry fuel or reaction mass. Of course this just means that the reaction happens somewhere else. A sail is the form most familiar to us.
* There is one conspiracy theory he won't touch, and only one: he is quite adamantly NOT a '9/11 Truther'. Everything else is fair game.
* There is one definite Brown Note connected to the basilisk legends: the crow of a rooster will kill it.
* There is one down in Hillsboro, Oregon. That area is the sort of place where specialty businesses crowd around.

* There is one episode where a kid is heard asking another kid what rhymes with "orange".
* There is one episode where Billy repeatedly exits his home by breaking through the doors and windows. He doesn't stop until he realizes, in dismay, that he's broken through them all. At which point he's trapped, as apparently leaving through the holes was completely out of the question. Then again, this IS
* There is one episode where the Green Ranger overdoes it with a combination of his earth-based powers and a friend's perfection potion and ends up slowly turning into a tree over the course of the episode. When the other Rangers initially notice this, they feel the need to get out the obligatory greenery-based puns ('leaf him alone', 'knock on wood', etc.) before finally trying to help with the issue. Way back in
* There is one episode where the Mad Hatter could not stop sneezing. At first, he thinks he's allergic to Hare, but he still keeps sneezing. Eventually, it's discovered that he's actually allergic to a bouquet of undiscovered flowers that the Queen had, and he finally stopped sneezing after letting out a monster sneeze, which blew the flowers up into the sky.
* There is one extremely secretive organization, the Seal-Breakers, who have put considerable time and effort into tracking down all of Golarion's various cans and cracking them open one after the other in the name of breaking down the artificial order of the world and giving birth to a truer reality — or of destroying the universe, they don't much care. They were partially responsible for freeing the Whispering Tyrant, and further plan to see Treerazer released from his own prison, invoke a variety of ancient slumbering entities, and ultimately split Golarion itself open to unleash Rovagug upon the universe.
* There is one faction that largely ignores this trope: the Alpha Legion. Most Chaos legions simply use cultists as fodder, meant to run at the guns and reduce their ammo so the enemy have less to fire when the traitor astartes turn up. The Alpha Legion actually
* There is one faction that uses Blind Jumps extensively, and indeed exclusively: the
* There is one guy who just can't make up his mind on if he wants to live or die in these games:
* There is one in a Machinima called "100 More Ways To Die In Garry's Mod." The method? "Hearing the loudest thing ever."
* There is one in Chapter 2. In Osohe Castle, there is a statue holding a heavy metal ball. Ramming into this statue causes the ball to fall off the statue and through a crack in the floor. If Duster is stupid enough to stand in the place where the crack is after ramming into it, the metal ball will crush him and trigger a game over. This is the only game over in the entire game that is not triggered by an enemy.
* There is one, in fact; it's never given a name (only referred to as "The Sunken City"), but it's familiar to your partner, and may be
* There is one in "Night of the Living Scarecrow", the pilot episode of
* There is one instance of rats being tricked into curing themselves of a certain type of cancer by a placebo. They were given normal water, then the real stuff in flavored water long enough to cause remission, then normal water again long enough for the cancer to cease going into remission, then flavored water without the chemo.
* There is one joke where a man encounters a "Question Genie," which will correctly answer three
* There is one known case of a man from England who saved himself and his little daughter from a burning building by hugging her to his belly and jumping backwards out of a window. He spent weeks in hospital with a shattered pelvis, but his daughter was completely unharmed.
* There is one mission where a group of angels are fighting it out with a group of demons. Honda and some random civvie are also in this fight. If you choose to side with the demons and go along with Honda's plan to escape the blockade, the mission completes... until you get a montage and text explaining that while you did manage

to escape the lockdown, on the Final Day, God's judgment kills everyone in the Yamanote Loop and humanity is completely controlled by Heaven. Then you get the Mission Failed screen. Nice Job Triggering Instrumentality, Hero.
* There is one next to the Kingsman table, which they use to display the first Lancelot's investigation and some disappeared VIPs. They need their AR glasses to see anything on it, which means anyone looking in doesn't see anything
* There is one noted weakness: Stormtrooper armor actually works against them. Which is why most guerrillas that use them against Stormtroopers have to do stuff like filling the rounds with explosives. Even then, it's also mentioned that one advantage slugthrowers have over blasters is that you
* There is one other way to break it — the purpose of the curse is to deny the recipient happiness.
* There is one particular reason for this that extends to most of the more exotic hybrids; as animals from one side of the world will never breed even with compatible ones from the other in the wild, such breedings in captivity are often one of a kind because of species viability. As desirable as the traits of a particularly rare crossbreed might be, you would need a huge stock of both species to keep them around, as crossbreeds are usually unviable, or for one genetic reason or another incapable of producing children. Thus, any time one shows up is likely to be the first and last time.
* There is one plot where a man murders his female relative, but nobody realises that she is dead because his mistress has plastic surgery to make her look exactly like the dead woman. The makers of the show liked this plot so much they used it TWICE! (s3e12 and s5e9). And, the second time, the mistress impersonates the murderer's SISTER!
* There is one point where this is done literally, and the "a JRPG without killing" tagline is proven wrong:
* There is one Priceline commercial featuring William Shatner advising a husband speaking to his wife on travel deals. Taken literally by the husband, who starts speaking like Shatner.
* There is one problem with the square-cube law that shows some imperfection when it comes to very large animals, especially in simulations. Simulations of large sauropods like Argentinasaurus are unable to even move, despite them clearly being able to walk in real life.
* There is one quest chain in which the player saves a bunch of baby wyverns that follow them around for a bit. Later on in the chain, when the player confronts the person who had them trapped, the wyverns fly in, swarm him, lift him up, and then drop him off a cliff.
* There is one quest where a character asks you for "bull elephant tusks". While bull elephants do exist in-game, there is no such item as "bull elephant tusks". However,
* There is one religious institution on US federal grounds: a convent by a civil war hospital. The union was having trouble with nurses who would marry sick/dying patients in order to inherit their money. Eventually to stop the lawsuits from family members (among other things) nuns were brought in as nurses to keep the fraud and Florence Nightingale effect from continuing.
* There is one single exception to this trope in the entire game, and that is Oscar, "the nicest cat in the world", who has a 2% chance to replace a regular cat. Oscar has its morale capped at 1 above normal, so it will never cross the
* There is one species of frog that remains in their egg for the entire tadpole period and only emerge once they reach adulthood.
* There is one story that the sailors aboard a US Navy vessel were lining up for geedunk (ice cream) when two Ensigns shouted "Make way for officers!" and started shoving through. Whereupon
* There is one story where a policeman shoots at him — Banner is in control of Hulk at the time and he hasn't done anything, but the policeman panicked — and Hulk disarms him and berates him because bullets bounce off him and there are lots of people around — the ricochets can easily kill them. Besides, if he has been his old self, bullets would have done nothing, as noted above.

* There is one successful scramble by the Americans...in only two fighters.
* There is one sure-fire way to find yourself on the receiving end of this: Park in front of a Fire Hydrant. Firefighters have no time to politely ask you to move your car, so, they'll just smash the window and thread the hose through. Do we need to mention that fire hoses tend to spray water all over where they joined to the hydrant? Like
* There is one time when Irma asks Jon and Garfield why they prefer to sit by the food counter instead of at the diner's tables, and the two reply, with demonstration, that because
* There is one video by Muslim extremists that claim that Pepsi is pro-Israel, stating Pepsi is an acronym for "Pay Every Penny to Save/Support Israel". Ironically, Pepsi is
* There is one where a Chinese person visits America, and upon being offered a hot dog, answers, "Interesting... That's the only part of the dog we don't eat".
* There is only one actual lose condition: everybody dies. And many, many ways to get there.
* There Is Only One Bed moment where characters end up having to share a bed.
* There Is Only One Bed: Two people who are not together must share a bed as there is only one available.
* There is only one known variant of the Casaba Howitzer concept to actually be tested: the Chamita test of 1985, part of Project Prometheus. Instead of utilizing a 'plasma howitzer' with a wide cone angle, the Chamita test attempted to focus its energy down a shaft to power a particle beam. The study stated that a small nuclear bomb could have up to 5% of its energy converted to kinetic energy in the form of propelled particles launched at about 100 km/s (at 50 kilotons of yield, this decreases to 1%, and it gets worse from there, so like the plasma howitzer the concept doesn't scale up particularly well). It was partially successful - the yield of the device detonated is unknown, but it managed to accelerate a 1 kilogram mass of tungsten to a velocity of 70 kilometers per second, for a total of 0.58 tons of kinetic energy. More importantly, the beam had a very small cone angle of 0.057 degrees, meaning it could be used at a
* There is only one surefire way to break into a safe: pull it out of the wall and chisel the back off by slicing through the rivets with a cold chisel. This pre-supposes that (a) you have a whole weekend to do it, (b) nobody hears the god-awful noise you will make, and (c) you have a good excuse when the fuzz inevitably show up and catch you "In flagrante delicto", so to speak.
* There is, or at least used to be, a shop in Beijing, China, that sold ferrets. Just ferrets!
* There is or was a German automotive-component manufacturer called KKK, initials infamously shared with the American racist hate group
* There is passing mention to a nuclear bomb wiping out San Diego (in the past). This was going to be a shadowy organization based out of its ruins, but this arc was
* There is, perhaps, a technical reason for this. When talking about how much a transmitter can change from one distinct value to another, the actual term is called
* There is perhaps the biggest and baddest example of this trope yet in the Marvel Universe brewing between long established villains,
* There is piano sheet music for "Rhapsody In Blue" by George Gershwin®.
* There is plenty of this in Driver's Ed. One might recall, for example, the film titled
* There is quite a hilarious Italian porno based on Beauty and the Beast... the stipulation of course being that she has to love him in ALL ways. When the beast finally gets ready to get biz-zay... well, let's just say
* There is really no reason why an animatronic animal designed for singing on a stage should also be able to lift up a fully grown man and physically restrain him long enough to forcibly (and lethally) stuff him into a suit.
* There is scareware out there that will redirect you to a site saying "your firewall is damaged and irrelevant" yada yada yada. What lands it here, though, is

that to make sure it gets your attention, it will blast a loud, high pitched sound through your speakers (or headphones) to get your attention, and the only way to shut it up is to a close the browser tab in question.
* There is set of shirts at some online stores that has "I love tits", "Great tits" with tits (specific breed of birds) on chest. "great tits" specifically place tits where body's tits would be. There is also boobies version, again, 2 boobies (birds) on chest.
* The Reiss family are the true rulers of mankind within the walls, with the supposed King really being a
* There is so far nothing in existence that can be called a "starship", i.e, a space-equivalent of an oceangoing vessel, which could be loosely defined as a reusable space vehicle
* There is some actual proof that the Scorpion King was a real person. However, the guy played by
* There is some confusion as to whether the phrase is "passed beyond the
* There is some evidence to suggest that The Doctor and/or the TARDIS creates a
* There is some humor when David Kim asks how Nun the Less got her powers, expecting it be some big metaphysical or traumatic thing. Nun of the Above simply explains she ate some bad shrimp when she was a teenager, and that's how she got her powers. David is unable to say anything in response.
* There is some kind of irony in fact that aforementioned space marines and also
* There is some logic to her behavior though (besides making her look badass) - The aforementioned Starlight Breaker uses all the magical energy in the air that's been dispersed by her and her opponents. In practicing this trope, Nanoha essentially lets her opponent give her attack a last minute power boost.
* There is some overlap between synesthesia and "perfect pitch"; some people with perfect pitch identify certain keys with particular colors (what keys goes with what color, however, appears to be idiosyncratic to each individual).
* There is some overlap. For instance, Metropolis has a rough area called Suicide Slum where a few street level superheroes keep themselves busy with small time crooks.
* There is some precedent for such an interpretation, even given the Bahro. D'ni law (although not any actual aspect of The Art) required all ages to conform to certain environmental conditions, for safety reasons. Since these conditions fostered the evolution of the human-like D'ni, it stands to reason that they would foster the evolution of biologically similar races, especially if they were sufficiently constrained.
* There is some room for ambiguity on the part of Bruce Cochrane, the driver of Thumper in the first game. Having lived his whole life in fear within a neighborhood constantly torn apart by gang violence, he wished for all of that to end, and Calypso granted his wish. Bruce returned to his neighborhood to find that "... Calypso was not lying." There are two interpretations for that ending — either Calypso brought peace to the neighborhood, or he killed everyone so that there would be nobody left to kill and rob each other.
* There is some semblance of truth in this. In the medieval era, it wasn't uncommon for travelers from one nation to interact with citizens from another nation that they're ostensibly warring with. The rise of nationalism and industrialization mostly put an end to this, so it's a strange idea for modern readers.
* There is something in the water at the Zeon command center. Gihren loyalist Colonel Killing from
* There is something so funny about the most responsible member of the
* There is some (though not definite) evidence of death being likelier to happen
* There is speculation around the world of intentionally modified viruses developed and stockpiled for biological warfare. It typically involves taking an already highly infectious and lethal agent, such as smallpox, and modifying it just enough to render vaccines ineffective. No such strain has ever been used, but there have been rumors of the Soviets stockpiling such a version of smallpox during the '80s (fortunately, it's not around today even if they did; smallpox has a shelf

life of only a few years).
* There is speculation, in-universe, that unicorns share a closer relationship with they fey than other pony tribes do, due to the fact that cold iron, which hurts and repels fey creatures, also disrupts and impedes unicorn magic. Theories presented in-universe include unicorns being descended from pony/fey hybrids, or from ponies who managed to steal the fey's magic.
* There is speculation that Jake's dreamself isn't really dead despite his corpse being shown. The reason being that he died due to the Courtyard Droll being shown stuffing peanuts into his mouth, to which he is fatally allergic to...but the peanuts were described as being "like the kind from circuses".
* There is speculation that the real quote was simply "Shoot straight" - that is, "tell the truth about why you're shooting us."
* There is speculation that voter confusion had a part in the passing of California's Proposition 8. The proposition was to amend California's constitution to overrule the State Supreme Court's decision to allow same-sex marriage. A "Yes" vote meant that you were in favor of overruling the Court and therefore
* There is still a clock inside and the drive-thru have a time that the managers want to keep them under, regardless of the actual orders. When large orders come through, support for the inside customers can still drop to one frantic employee.
* There is still an Aton and Sor from the original story, but they are
* There is still one small part of Arda that is flat. It's a narrow strip of ocean that leads to Valinor. Only the Elves and Maiar (such as Gandalf) know how to find it.
* There is such an episode with the Riddler, wherein he creates a computer game that makes millions but is then fired by his publisher so that, as according to his contract with them, he doesn't get anything from it. And so becomes the Riddler in his attempt to punish his old boss. Notable in that this is one of the few episodes where the Villain of the Week
* There is supposedly a mandate in the new series that every episode has to feature a
* There is surprising (but not to me)ly very little blood on the BBC's
* There is, surprisingly, always hope. It's what allows him to be a Determinator.
* There is swimming, but they only do it in the beach. Yes, an underwater beach in which
* There is the Abbey of the Overseers which is a take on Christianity in its organized religion, based more on the Anglican Church than the Catholic Church, i.e. it is patronized and supported by the Crown and has simultaneous repressive and progressive aspects, i.e. a history of attacking dissenters, heretics, and persecuting magic users and witches (the latter of which was something Protestant Christianity did far more than the Catholics) while also patronizing and supporting science and using mathematics based devices in their activities similar to the Anglican Church which did support the Royal Society in the 1700s.
* There is the alternate universe that was first visited in series two and where Mickey decided to stay to help the effort against the Cybermen; at the end of the series
* There is the Brelish Citadel (aka Secret Service), which has four branches that represent various aspects of the trope. As the King of Breland is a good guy, this also makes them a good example of the trope. None of the branches actually report to the Brelish Parliament, instead answering only to the King himself. As representatives of the King, they can conscript any Brelish Civilians to help them, refusing is considered treason.
* There is the full-contact variety of loving headbutt between Hercules and Pegasus: when they first meet and when they're reunited in adulthood.
* There is the matter with Young Xehanort. He is one of the few things the Guardians of Light simply can't do jackshit about due to the rules of time travel that, while preventing someone from accessing their time travel memories, still allow them to have precognition about what is to come. Whether they defeat him or not, Young Xehanort will return back in time and gain an urge to leave the islands and become the Xehanort as we know today.

* There is the religion of the bother gods, the older one of light and creation, and the younger one of darkness and destruction. During the day the older god would create life. During the night the younger one would destroy his older brother's creations. One day the younger brother created the Grimm. This action made the older brother do battle with the younger one. The brother of light won but didn't destroy his younger brother. Instead they made a pact and created Humans. After that they left Remnant, leaving behind four powerful relics. According to Ozpin its all true.
* There is the rivalry between Redcloak and Tsukiko about who would become the real
* There is the Russian (Russian-Jewish) song called "The Little Suitcase", or "Train to Berdichev" where a man in a train argues with another about moving the titular suitcase, and finally throws it out. Then the other man says, "It wasn't my suitcase, it was my mother-in-law's. It had the documents about me being married inside, so now, thanks to you, I am single and free."
* There is the similar modern concept of "flattop diplomacy", flat top being the slang term for aircraft carrier. There is a bit more to it though. In flattop diplomacy, a carrier is docked in a foreign port where there are diplomatic tensions. The threat that the carrier poses is minor compared to the threat of starting a war with the carrier's home nation.
* There is the story of the Saxon who came to draft smiling and giggling asking when he is going to get his gun. When asked about anything he just said he didn't care and just wanted to be handed his gun already. The examiners became incredibly creeped out when he started whispering "Bang. Hehe." and he became angry about all the examinations and shouted "I just came here to finally get my damned gun. GIVE ME MY GUN ALREADY!" In the end, they told him his gun would come in the mail and shooed him home. Security was tightened and laughs between friends were shared respectively.
* There is the tale of salting a bird's tail so that it doesn't fly away. It has been
* There is the Viyran story arc, involving various strange diseases spread throughout time and the
* There is the Wraith, who has the power to make things intangible, as said
* There is this exchange between a disembodied character and an animated skeleton in
* There is this exchange in the opening of Season 9 Episode 1 ("The Butter Shave").
* There is this one guy called Tenchi Masaki who has a thing about conquering his homeworld.
* There is this within the Goa'uld too. The Supreme System Lord rules on top, followed by the System Lords, each System Lord has a retinue of Underlords, who have their own retinues of Goa'uld Scientists and courtiers. Queens are generally not "true" lords and are often regarded as prizes for actual lords to be kept as mates.
* There is truth to the legend that SS panzer divisions, at the Battle of Kursk in 1943, attacked with Wagner's
* There is ultimately a higher court, but the 3-day-max "hearings" usually end up being the final word: if the defendant is found guilty in the preliminary hearing, then their chances of being acquitted in the trial are essentially non-existent. The trial itself is usually for sentencing, rather than determination of guilt. If your lawyer can't prove you innocent in the hearing, then the evidence is obviously overwhelmingly against you.
* There is usually at least one word in the puzzle that's trickier than the others due to having more obscure letters that can't be uncovered from the other words, and sometimes this word only barely fits the given clue. Combined with the above point, Crosswords are rarely solved for more than $2,000. In a January 2017 episode, a puzzle with the clue "It's All Greek to Me" came down to _ETA for the last word. The contestant solved it as FETA, only to be buzzed despite the fitting word. The next contestant revealed the word as Greek letter BETA for the house

minimum.
* There is usually just one or two (if both genders are possible) character models per class; everyone in a particular class is a palette swap of that model. Generic units are coloured by affiliation, while playable, boss and other important characters have their own unique colour scheme. Some characters have their own individual class (e.g. Lord) and thus look unique.
* There is very little to know about Erudyce, Orpheus's wife that died and he went to the Underworld to rescue.
* There is work to develop plastic that is magnetic, first synthesized by Pakistani scientist Naveed A. Zaidi. It's generally non-reactive nature could be useful to replace the metallic implants like pacemakers to increase the chances of their compatibility.
* There is yet another Fukuro among the assassin group Trinity Raven in
* There It Is. A chicken appears out of a cracked egg. Pants dance by themselves. Scotland Yard is a yard, in Scotland. The Scotland Yard detective protagonist has as his partner a fly, who lives in a matchbox and has his own tiny magnifying glass for finding clues. The detective goes to sleep in a bed and wakes up suspended in air over a bathtub. A painting of a ship at sea comes to life and douses the detective with seawater.
* The Reivers, in which a roguish stablehand steals his boss's automobile and drives it from small-town Mississippi to Memphis in order to talk a prostitute into marrying him.
* The Reivers: "I saw McWillie do what you would nowadays call a double take", when rival jockey McWille glances behind him and then takes a second, shocked look back after realizing that Lucius and Lightning the horse are not alongside him but in fact are far behind.
* There just aren't the human resources on Dagobah for anything like a store or restaurant, but in
* The Rekef (named for the general who founded them) are the empire's primary example, being a semi-secret society dedicated to policing the Wasps and enforcing the Emperor's (and later, the Empress's) will. The Rekef has its own system of ranks, separate from any military rank an individual agent might hold; the Rekef rank is usually secret unless there is a conflict in the chain of command, in which case it takes precedence. The Rekef is further divided into the Rekef Outlander (which spies on the Empire's enemies) and the Rekef Inlander (which polices the Empire itself); the Inlander is more prestigious and joining it is considered a path to power. The official Army Intelligence service, in contrast, doesn't have much of a reputation and is generally regarded as the Rekef's poor younger sibling.
* There Kool-Aid man is able to bring up a camera shot of some "Thirsties" bothering some children even though he shouldn't be able to switch to footage of this, relating Kool-Aid Man to
* The related "bar-steward" is a common humorous euphemism for bastard in the UK.
* The related myth of soldiers being spat upon by protesters after returning from the war. Certainly the Vietnam War was deeply divisive and not all American servicemen received a warm homecoming, but accounts of this actually happening are anecdotal at best; historians have found few, if any verifiable contemporary accounts of protesters spitting on returning veterans. At most, this may conflate behavior by protesters in other contexts, like activists at the
* The related religion Santeria, a blend of Catholicism and the religion of the African Yoruban people, has Oshun (also spelled Oxun). She's the orisha (a divine intermediary similar to lwa) of romantic and sexual love: people concealing Santeria under the guise of Catholicism represent her with a figure of the Virgin Mary.
* The related "Worse-than-Average Effect" states that competent people are more likely to evaluate their work as worse than it is. This kind of selects for Sturgeon's Law, in that good writers will be more hesitant to publish their work than bad ones, which in turn leads to over-representation of bad writers.
* The relation of 'God' and 'the Truth Guy,' who claims this as one of his identities, is addressed only in passing and only by our atheistic main character.

The scientific world as understood by alchemists is not rigidly materialist in the way our scientific world is, since souls definitely exist, this surprises no one, and there is alchemy equipped to affect them, i.e. Al's blood seal. Ishbala's failure to protect his people in any way from the Amestrian genocide campaign is invoked on-site as a great reason not to convert. Bradley was promised that God would judge him; narration that might be either his or Roy's says, "God is something created by humans. Therefore, what will judge us is not God, but probably 'humans.'", Arakawa didn't need to hold back much.
* The relationship between Clara Oswald and both the young-looking Eleventh and older-looking Twelfth Doctor was a love affair, but there was no indication of it ever progressing into anything sexual; that didn't stop (thanks to the chemistry between the actors) intense UST being noticed throughout (with notable examples being
* The relationship between Gaea and Golgotha is closer to a perpetual
* The relationship between Nav and Celestia remains this for much of
* The relationship between newly-appointed Cabinet minister Jim Hacker and senior civil servant Sir Humphrey Appleby in early seasons of
* the relationship between Norman and his real mother was something of an inversion of this trope, with him being obsessively dependent on and possessive of her despite her wish for him to be more independent, ultimately leading him to murder her and her lover as he did not want to share her..
* The relationship between Peter Quill and Kitty Pryde was built on this as well. The timeline of the relationship is quite confusing for readers as the couple actually lasted way much longer than what we see on panel. Since we only saw a bit of the dating phase, the proposal, and then skip directly to the separation, it might get lost on readers that a little bit more than a year passed between the beginning and the end of the relationship. And now they're back at the dating phase. Bendis himself admitted he wanted this dynamic for the couple; dating, breakup, reconciliation, dating... in an infinite loop.
* The relationship between predators and prey. Predators will kill prey, but without them, the prey would overpopulate.
* The relationship between Professors Kukui and Burnet has shades of this, as they get married a few episodes after Kukui and his Braviary save Burnet from a
* The relationship between Russia's two main cities, Moscow and Saint-Petersburg, reflects this dynamic in both ways.
* The relationship between Scootaloo and Rainbow Dash develops into this in
* The relationship between the Alsace wine houses F.E. Trimbach and Hugel et Fils is
* The relationship between the Baroness and Duke is pretty central to the storyline of
* The relationship between The Buddy System and "Better Than You" in SHINE. The latter spoiled the former's chances of becoming
* The relationship between the captured Russian officer Ivan Zhilin and his master's daughter Dina in Leo Tolstoy's short story
* the relationship between the Lizard Knight and the Princess becomes something akin to this when he decides that he won't let her destroy the world because he loves her. She's actually happy that he's trying to stop her.
* The relationship between the main character and his younger sister — who is the crown princess and heir apparent of the queendom — is, perhaps, depicted as being a little
* The relationship between the Samurai and their Princess is this in
* The relationship between Thirteen and Foreman was extremely unpopular for several reasons. Their relationship had very little build-up, progressing from a mild dislike of each other to being in a relationship with only a couple of scenes of development. Furthermore, many fans were of the opinion that each of them had better chemistry with just about every other character on the show. Finally, both Foreman and Thirteen were
* The relationship between Thomas and Justine develops into this. At first, Justine was just a girl that Thomas cared for, and being a White Court vampire, he

* The relationship between Woody the bartender and the millionaire's daughter Kelly Gaines.
* The Relationship Character of the story, what the protagonist needs to understand in order to succeed, is expressed either by or to this character. In many cases, this happens as part of an actual conversation. At the end of the story, this conversation or expression of the theme will be revisited, and the protagonist and this character will reconcile with each other.
* The relationship does, in fact, happen. It doesn't last, although that's due to personality issues with everyone involved, not anyone's orientation.
* The relationship either strains existing alliances needed to maintain rule, creates new enemies for the throne or is in some other way a nightmare for diplomacy. (A common example: it interferes with an
* The relationship eventually evolves into a quadrilateral by introducing Carter "Hawkman" Hall as a rival for Shayera's affection and the story wastes no time in getting to hypotenuse murdering: in Hawkman's second appearance, a physical manifestation of his dark side kidnaps John Stewart and orders Hawkman to kill him. Hawkman,
* The relationship is reworked to either concede or prohibit the unintended consequences in an
* The relationship never comes to be as a result of the problems, and then:
* The relationships among some of the supporting characters touch this, e. g. Principal Skinner vs. Groundskeeper Willie (who frequently makes disparaging remarks about him behind his back) and Mayor Joe Quimby vs. Police Chief Clancy Wiggum (corrupt incompetent politician vs. corrupt incompetent official).
* The relatively advanced Minbari and Vorlon stuff, on the other hand, is plenty shiny. When it comes to ships and space stations, it seems that human manufacturers have had a decades-long preference for dingy-looking, mostly unpainted metal paneling with no easily discernible regular pattern. Ultimately, this aesthetic is not reflected in the
* The relatively light-hearted "Showtime" was sandwiched between the scary-loaded "Scarecrow" and "Psychocrypt" on
* The relatively new /mlp/ board has spawned numerous quests including
* The relatively obscure grunge band TAD had several songs based on fantasy themes.
* The relative popularity of her singles varies geographically, eg. in the UK, where she has the most chart success, "Hyperballad" and "Army of Me" were also top 10 hits. The former allowed her to avert
* The relative quality of the MREs received a fair amount of public attention after Hurricane Katrina, when the military supplied many of them to people displaced by the storm and the subsequent flooding. That said, everybody agreed that even the worst MRE beats starving.
* The relative rate at which time passes varies from Shadow to Shadow. Depending on where you go, time in Amber might either be passing more quickly or more slowly than it is for you, though unlike Chaos it's mostly consistent for any given Shadow (if "any given Shadow" is a meaningful term).
* The relativistic mass-energy equation doesn't completely rule out faster than light travel. It only rules out the possibility of faster than light travel when both the mass and energy have no imaginary component. For it to be possible some or all of the mass and energy have to be imaginary. It also doesn't rule out travel where the velocity vector either is or includes an imaginary number.
* The "relativity is a pain in the neck" joke gets used at least once in the first series when Rudolpho, the protagonists' boss, complains that they're a couple weeks behind on their bills, and the crew responds that from their point of view they've got a couple of days still.
* The relaunch specifically noted that you were playing as Tier 1 operators (the elite of the elite of special forces). For the short period of time when you're
* The release coincided with the decline of the creator or lead actor's career.
* The released game, possibly in response to the backlash, took a few steps back: the multiplayer still lets you customize your character as you please, but the

story mode features female and coloured fighters only where they really existed (for the latter) or where they might plausibly have existed (for the former). There are also no prosthetic arms to be seen.
* The release of the album "Fangs!" seemed to be something of a new beginning for the experimental rock band
* The release of the Classic Games count as well with every console generation
* The release of the first real trailer for the movie also caused several sites, including Facebook, Twitter, Instagram, and even
* The release of the Skaven in turn re-canonizes Malal/Malice, a Chaos God which had essentially been written out of the
* The reliability of this strategy depends heavily on circumstances, however. On larger maps, where specialising planets is a viable strategy, races with low-quality homeworlds may well have their economic, research and industry powerhouses on planets they located during the expansion phase, meaning that while losing the homeworld is a pain, it's not going to be a deathblow unless everything else has already gone to hell; the "capital" will simply be reassigned to another planet.
* The Reliable One — A secondary character who can always be relied upon to get things done.
* The Reliable One: Someone who's always there when their friend needs them.
* The Reliable One: The one guy or girl in the group that can be depended on for anything.
* The Relic: A giant mutated beast called the Kothoga is on the loose in the Chicago Museum of Natural History, chomping up people and leaving their much-bitten bodies lying around it in the run up to the gala.
* The Relic around some more. It takes a follow up explosion and its shockwave to pulp him and do him in for good.
* The Relic, commandos enter the Museum of Natural History in this way in order to deal with the monster threat. Possibly a subversion, since it doesn't work out so well for the commandos.
* The Relic, Dr. Green sets and escapes a fire in a slow-moving freight elevator. When the room filled with volatile chemicals finally explodes, it takes forty seconds of screen time for the fireball to catch up with her — plenty of time to run a good twenty yards, climb into a metal container the size of a dumpster, wait for the motorized lid to close, and hurl a final insult at the monster chasing her.
* The Relic featured a creature that could only survive by consuming a specific protein found in a certain Amazon plant and human hypothalami.
* The Relic. Human brains aren't its first choice, though, it prefers to eat the plants from the Amazon used as packing material in some specimen crates (which have much higher concentrations of the hormones and such it needs). The events of the novel happen because the crates are moved to a more secure area of the basement after a curator notices they've been broken into, forcing it to search for alternatives (read: brains).
* The Relic items are shown in-story to be highly restricted in who can wield them; in one early scene, a character is corrupted and turned into a demonic beast just from wielding one when he didn't have a Crest, and even having an incompatible Crest is treated as a serious problem. In gameplay, the Relics are all E-rank weapons, meaning literally any character can use them—they take 10 damage if they fight with one, but most characters can survive the hit (it's the same damage you take from using a common devil weapon) and if they have any kind of Crest, they don't take the damage at all. The only thing that having a compatible Crest does is let you access the weapon's unique ability. This is somewhat in opposition to prior games, where similar legendary items were either character-locked or required an extremely well-trained user just to wield. One particularly strange case is the Sword of the Creator, which changes its stats to the point of being basically worthless if anyone but Byleth is using it, which actually
* The Relic requires certain chemicals from the human brain to sustain itself.
* The relics are on another exhibition tour now. Whether this will spark another such fad remains to be seen.

* The relics of the Titans that created Azeroth are textbook examples of
* The Relic: The lizard-monster is revealed at the end to be a human explorer who ate a concoction of some particularly funky herbs in South America.
* The Relic. The Mayor of Chicago proudly boasts of how his wife will be wearing a dress that shows off her cleavage, which he claims won him the last election.
* The Relic when the heroine, dressed for a fancy museum reception in a gown and heels, realizes she's been locked in a wing of the building with the monster and promptly removes her high-heeled shoes to go in just stockings.
* The Relient K song "The Scene and Herd" has the line: "And I'm sorrowed that you probably magically got this song for free."
* The religion inspired Spinal Tap concept album 'The Gospel According to Spinal Tap' which prompted the review 'On what day did God create Spinal Tap and couldn't he have rested on that day also?"
* The religion of Aylee's species holds that they are chosen by God to destroy the universe. (The world? They destroy whole planets as a matter of course.) It's likely just a rationalization for their nature as a
* The religion of the lemurs of Bohibba follows traditional Malagasy practices closely, with
* The religion of the Patah is really vague, but they do consider the stars sacred and "true magic". Since their culture is based on Islam and Zoroastrianism it can be inferred that they are similarly monotheistic.
* The religion requires or encourages behavior that is unacceptable to the ruling culture. In this case, the rulers may tolerate abstract
* The religion shown on the ship in "If the Stars Should Appear" seems to resemble Christianity, as they have a holy book and one creator god, along with the nastier aspects of certain historical Christian churches, such as a theocracy and Inquisition-like authorities.
* The religious equivalent is defrocking: in Catholic canon law, clerics can be
* The religious hierarchy of Egypt was so angry at King Tut's father for trying to switch to a monotheistic system that they did their best to
* The religious Jewish Israeli comedy troupe Underdos has an example in its
* The religiously-founded planet Grayson averts this, using the Gregorian calendar even though it doesn't even remotely track with local conditions. For added confusion, the Graysons use the initials A.D. to mean Anno Domini, whereas in the rest of the universe A.D. stands for Ante Diaspora.
* The religious overtones are still subordinate to the Dalek notions of racial purity. In "Bad Wolf"/"The Parting of the Ways", the Daleks' religious language and fervor are a symptom that they've gone mad even by Dalek standards,
* The Religious Society of Friends, better known as the Quakers, who formed their own sect of Christianity because its founder, George Fox, objected to the Anglicans' emphasis on ceremony.
* The Religious Technology Center is an organization established by the
* The religious version of this trope is known, particularly (and pejoratively) in Christian circles, as "missionary dating", in which a believer in a particular religion dates a non-believer with the expectation of converting that person. As with this trope in general, missionary dating is generally regarded as ill-advised.
* The Reliquary of Souls (a large three-faced orb) in The Black Temple retreats inside a cage-like shell made out of bone for a few seconds while switching to its next face. The Devourer of Souls, a boss with the same model, shifts faces instantly and without warning, though.
* There Lived Kozyavin who takes the order "go this way" literally and ends up walking quite a distance.
* The Reluctant Dragon) attempting to jump a broken bridge in a thunderstorm at one point, but ends up in a railway accident just because of this.
* The Reluctant Dragon. It tells the story of a baby genius in storyboard sketches with occasional bits of movement, to show how story artists plan a cartoon.
* The Reluctant Dragon sort of falls into this, featuring several different animated and live-action segments under the guise of a "behind-the-scenes tour" of the Disney studios as they existed in 1941.

* The Reluctant Dragon, the little train is puffing his way along down the track with a small passenger train when he suddenly hears a horn blaring in the other direction. Cue a nasty-looking streamliner barring down on him, and Casey quickly hunkers up near a telephone pole waiting for the inevitable collision as he begs for a sleeping switch to wake up. The switch sees the danger and quickly changes tracks.
* The Reluctant King: A local legend in book three has the headless ghost of a bandit lord still riding the mountain where he died. Jorian actually asks if the ghost is riding the ghost of his horse (with the innkeeper admitting that he was the first person to ask that).
* The (reluctant) king (and he'd refuse the title) of this trope, however, has to be Vimes himself. When first encountered, he's a captain of the three-man Night Watch, who hide from criminals. The next time we see him he plans to retire after getting married. However, intrigued by the notion of a Watch that truly
* The Reluctant King: A tale narrated by Jorian features a king in dire need of a general being gifted a Golem general by a witch who wants to be acknowledged for her powers. Then the other army shows up with a Golem general, but both are such huge perfectionists that they stop their armies every five steps to make sure they're perfectly in order, and by the time they're about to engage in combat a sudden downpour melts the clay golems.
* The Reluctant King: Dr. Karadur is a frail old man for all his magical skills and thus little help with physical fights. Luckily, he has Jorian to deal with that.
* The Reluctant King: Fifth Plane demons are compelled to serve wizards by threatening to hold them inside a magic circle until sunlight enters it, killing them.
* The Reluctant King: Gods gain strength from how much worship they receive. Those with the most are very powerful. Conversely, ones that have been deprived eventually fade into nothing.
* The Reluctant King: In book three, the young son of a tavern owner hired to be Jorian's guide straightforwardly asks him for information about sex. A little embarrassed, Jorian complies.
* The Reluctant King: In one of Jorian's folk tales, a criminal explains himself with such a philosophy. His sole motive in robbing or killing people is always to see who's stronger, and it gives him satisfaction finding that it's him.
* The Reluctant King: In the second book, Jorian has this inconvenience when he joins the High Priestess he's supposed to have sex with in bed. Fortunately, he recovers later.
* The Reluctant King: In Xylar a king attempting to prevent his beheading after five years is a felony. Judge Grallon says he would charge Jorian with murder if possible for killing two mercenaries in self-defense from dragging him back for this too.
* The Reluctant King: Iraz falls into one at the end of the second book when Jorian abdicates for Colonel Chuivir, the royal guard commander.
* The Reluctant King: Jorian easily seduces many women over the course of his adventures. Most of them seem drawn to him anyway, so he doesn't have to do very much.
* The Reluctant King: Jorian is highly admiring of Yargali, as she has huge breasts described as melon-sized.
* The Reluctant King: Magic users in various countries have guilds they must join to work and obtain licenses, frequently with extortionate rates.
* The Reluctant King: Many wizards practice necromancy, though here that just means control over spirits with magic (as the original term denoted). It's portrayed neutrally, though necromancy remains dangerous (as the spirits don't like this one bit, so any missteps can be a hazard to the wizard or anyone else nearby).
* The Reluctant King: Margalit disguises herself in a man's clothes when she goes to help Jorian on mount Aravia. The narration does mention that her disguise is kinda given away by some unmasculine bulges underneath her jerkin, though other strangers mind their own business.
* The Reluctant King: Near the end of the third book, Jorian actually proposes to

Margalit, having grown attached to her many qualities during their months spent together. They get married and have a family.
* The Reluctant King: Nervos the Daft, Vindium's king, was a bloodthirsty lunatic who wasted most of his treasury getting made gold statues of himself, had tons of people near him killed (including family), and entertained himself through having his army pretend to be frogs. Not surprisingly, a group of his nobles and officials killed him.
* The Reluctant King: Tarxia is ruled by its clergy, with many laws forbidding sensual pleasures. Other religious beliefs are also outlawed, with foreigners that follow them only allowed briefly in the city state.
* The Reluctant King: The city state of Xylar operates under an odd custom where after five years each of their kings is publicly beheaded. At that point, his head is thrown into the crowd, with whoever catching this then becoming their next king. However, they have to suffer the same fate once their own five years are up. Jorian however escaped.
* The Reluctant King: The theocracy of Tarxia forbids every religion besides theirs. Foreign visitors who aren't converts are only permitted for short periods, having to wear placards reading "Licensed Heretic" while in Tarxia.
* The Reluctant King: The world of the trilogy is one for Earth, which in turn constitutes its afterlife. Early on, Jorian briefly crosses over into Earth before going back. He's completely befuddled by his encounter with what are clearly cars on a paved road, then a highway patrol officer who's trying to help what must seem like a very strange man.
* The remainder of the group consisted of Mike D and DJ Mixmaster Mike.
* The remaining 1/3 of people who were hurt by trial by ordeal may be either due to failure to rig the ordeal, priestly tampering to cause injury because they believed the party was guilty, priestly tampering in line with their own interests, or even a sort of "necessary evil" to keep the system in place.
* The "remaining air" part is often ignored in the live-action marionette series,
* the remaining royals taking asylum in Rome, while the empire dissolves into various new republics along nationalist lines.
* the remaining six season four episodes aired with the rest of the season overseas.
* The remaining Soviets are all either Czech or actually Soviet, even if some of them (e.g. Elya Baskin) aren't actually Russian
* the remains of the Empire beliefs and many will acknowledge that the Nords have got a raw deal from them - scores of them killed in a war the Empire lost to the Thalmor, worship of their favorite deity, Talos, outlawed as part of the peace treaty, and heavy taxation to pay the war debts wrecking the economy. But as the first Imperial loyalist you could befriend in the game states, Skyrim has always supported the Empire (Talos/Tiber Septim the first Emperor was a Nord) and "The Nords have never been fair-weather friends."
* the remains of their enemies, whilst the "Destroyer" units of regular Space Marine Legions were black armored chemical and biological weapon specialists. The reason their wore black? Because their weapons corroded the paint off their armor. Not nice.
* the remake Andy's fingernails are torn off when Leatherface drags him down the stairs and he attempts to cling to the walls.
* The remake attempted to fix this by saying that they are in fact planets, but transportation between planets is still called "dimension travel".
* The Remake: Because audiences like the original, why not give it another stab?
* The Remake Bodie's justification going from "just" surfing to a jamboree of extreme stunts around the world that, if completed, are supposed to let the sports artist achieve a kind of spiritual Nirvana, not to mention that the heists now involve insane stunts such as Halo jumping.
* The Remake doing this, with the narration specifically noting it's a cliche.
* The "/remake" feature was added for when a team has a player go idle for too long. With "/remake", the idle player's team can vote to end the match prematurely, ending in a draw for everyone except the idle player, who gets it counted as a

loss.
* The Remake, Gerard's determination to capture Kimble stems from having lost his first wife. Problem is, Kimble's innocent and doesn't deserve such persecution. And even if he were guilty, he still isn't the one responsible for Gerard's wife's death.
* The remake has a surprisingly nasty scene (for a PG-13 movie) where a whiskey smuggler is being coerced into informing on some bandits by Rooster Cogburn. As he cracks, his partner slips a hidden knife out and brings it down on the man's left hand, severing four fingers before stabbing him in the chest.
* The remake has the lightning affecting deceased animals differently; for example, transforming a turtle into a
* The Remake has this as one of axe techniques. The axe user creates a Ferris Wheel out of an axe and unleashes them on an enemy.
* the remake. However, it only takes a couple of bullets to blow a leg off, rendering them unable to walk. At that point, they can only crawl slowly on the ground, and due to the way the AI works, they are completely unable to attack you if you are behind them. This makes them very easy to finish off with a knife.
* The Remake. It soon becomes obvious that his obsession with catching Richard Kimble stems from trying to compensate for this failure.
* the remake, Klaatu visits Earth because our self-destructive nature is endangering the ecosystem of the Earth. Life is so rare in the universe that the alien community considers the biosphere of a planet far more valuable than any single product of that ecosystem. And so he tries to wipe out all life on the planet himself in order to "restart" the ecosystem, but this time without those pesky humans getting in the way.
* The Remake—when Deeds rescues a woman from a burning building, a reporter edits the footage to make it look like he raped her, threw her cats out a window, and laughed at the prospect of being brought to justice.
* the remake of, Ada Wong's cover story was changed from "I'm looking for my missing boyfriend" to "I'm investigating Umbrella for the FBI".
* The remakes have Mirage Spots. One is guaranteed to appear once a day after Steven gives you the Eon Flute (the only way of getting to one) but one also disappears once per day; more appear if you interact with other players. The Mirage Spots have rare Pokémon (legendary or otherwise), TMs, and Evolution Items. However, there's no way to predict which will appear on which day.
* the remake, surviving a machete to the chest and his head getting shoved into a woodchipper to come back at the end for one last scare.
* The Remake the hunters had commandeered a giant freezer in a truck stop and turned it into a larder full of corpses.
* The remake tries to avoid letting players do this. It has replaced all of its Adamantine Doors with "Spell-Hardened Steel as Hard as Adamant, but loses its magic if you dismantled them." It also creates infinite hordes of demons that do nothing but repair the walls and reset traps all day and attack anyone who attempts a Dungeon Bypass.
* the remake, where apparently they try to one up the first movie by recreating the photograph from their wedding as closely as possible, down to a decorative life-buoy. It's mentioned that one of their grandparents paid for most of this.
* The Remarkable Millard Fillmore claims that Fillmore saved Andrew Jackson from assassination, wrestled with the emperor of Japan, and invented the T-shirt. If you check Amazon you'll see it has a three-star rating, due to complaints that it is "deceptively advertised" as an accurate biography. The cover illustration of Millard Fillmore riding a unicorn is apparently not enough of a clue.
* The Remarkable Rabbit Boy: The character Foxline gets her bones broken by the powerful villain Bloodarm, and figures out that the only reason Bloodarm didn't instantly kill her instead is because he wanted to use her as bait to lure out the main character, Rabbit Boy, who Foxline had ordered to hide.*
* The Remarkable Rabbit Boy: The powerful villain Bloodarm has gravely injured Foxline, the senior officer of the main character Rabbit Boy, and is about to kill Rabbit Boy. Suddenly Rabbit Boy's body gets taken over by a massive non-corporeal

entity. This entity turns out to be the far more powerful villain Goliathan, who then proceeds to launch Bloodarm clear across the city with a single kick.
* The remarkably easy-to-do and remarkably gory-for-the-time Pit Stage Fatality, for those who used to believe this game was a clone of
* There may also be a connection to leprosy; in some medieval legends, werewolves in their human forms had no noses.
* There may be an element of attempting to protect her from this effect in Sam's 'eh, why bother to say goodbye' reaction before they leave town. But mostly he
* There may be at least some truth to his claim that he is Satan. According to the author, he does rebel against God and he also cast humanity out of Eden. Also, at one point, while he was in the form of a young boy, he met and fell in love with a nature goddess, whom he later had to kill. The two of them had a daughter with powers similar to a
* There may be no one in Britain who doesn't associate the word "EXTERMINATE!" with the Daleks.
* There may be reasons other than his past for why Trejo is typecast this way.
* There may have been a little jealousy there, but she was more worried that Shinji would get hurt again.
* There may have even been plague victims supposedly "attacking" random people, uninfected or not, though this is all likely due to severe hallucinations and clumsy walking. And of course, no plague infected people would actually eat people they came in contact with.
* There may or may not be an original source (in the latter case, it is because the source is oddly cyclic, or the superiors in question are just an excuse used by a
* There may or may not have been a certain level of Kayfabe surrounding "
* The Rembrandts. Today, much like the Paula Cole example above, the former is largely forgotten while the latter remains one of the decade's most recognizable songs thanks to the enduring popularity of the series it is attached to.
* The "remember a time together" variation is parodied in the song "I Remember It Well" from
* The Remembering, Steve Cash's third book of The Meq trilogy, most of the characters "cross over" and finally start to age after centuries of immortality in childlike bodies. The previously immortal characters grow up and start having kids. However, questions that remained unanswered throughout the entire series are never explained or resolved, such as the mystery of what the Meq are, where they came from, why they were semi-immortal and possessed strange powers, what their purpose is on Earth in relation to humans, etc. The third book keeps hinting at the resolution of all these questions right up to the end, but they are never answered and by then the characters don't even seem too curious anymore about their origins.
* Theremin, a box that generates a magnetic field, which the user interrupts to create sound.
* theremin music starts playing... and then we see Doofenshmirtz walking away from an actual theremin.
* The Remnant. By the third game, there is only one camp left in Velen, that resorted to robbing caravans for supplies and is likely finished off by Geralt in a side quest.
* The Remnant's earlier attack on Dakar was much more successful, with the Juaggu lasting longer and doing more damage than the newer Capule against the Federation defenders.
* The remnants of the Third French Republic’s military managed to hold on to much of Northern Africa after socialist revolutionaries seized mainland France, forming the second major arm of the Entente.
* The Remnant, who crushed pagans in Saxony — the Church generally condoned or refused to acknowledge this violence. This includes the Wendish Crusade and the notoriously bloody Albigensian Crusade which crushed Catharism, a revival of Manichaeanism that spread from Hungary to Southern France.
* The remora uses a suction cup on the top of its head to hitch rides on sharks and other large sea creatures rather than swimming on its own.

* The removal of certain iconic moves such as taunting and, most importantly, a hard lock-on function. The latter makes the aim for guns, grapples and dash attacks a bit dodgy. This also makes dash attacks like Stinger harder to execute, as you have to tap the left stick in a direction twice instead of simply holding it towards the enemy you're locked on.
* The removal of Manaburn means that the odds of dying to one's own manaramp deck have been all but nullified. Naturally, this takes a good chunk of the fun out of playing said decks.
* the removal of the Magma Stone from Stark Mountain almost caused said volcano to erupt. Not "cosmic" persay, but certainly destructive.
* The removal of wisdom teeth involves a tool that looks very much like a stainless-steel chisel.
* The removed bomb was instrumental in defeating Evan's Pursuer, Grace, when Poundcake blew into the bomb, sacrificing himself to take the aforementioned Silencer down with him in a fiery green demise
* The 'removing road signs to confuse invading troops' version happens in
* There must also be a mention of Relius Clover, a brilliant researcher who sought only perfection and has performed horrendous experiments and
* There must be an accusation of rape. The alleged victim does not need to be the accuser.
* There must be an organization, or at the very least a team. Solo examples count if they have a group backing them, or at least, it is implied they have offscreen members.
* The Renaissance Age of Animation: Covers Animation history from the early '80s to the late '90s.
* The Renaissance Through the use of contemporary clothing, armor, and styles, even the common people could instantly recognize "that's a soldier, that's a fisherman, that's a shepherd, that's a tax collector, that's a nobleman, that's a commoner" etc. instead of "WTF are those people in those silly clothes?"
* The Renaissance was considered the most obscene, since it had the couple dancing around in a tight embrace. The king of France outlawed it in 1610 (but that doesn`t mean people stopped dancing it. It just evolved further, among other things into — the waltz).
* The Renaissance went through a Greco-Roman fad, various facets of which repeated throughout the 17th, 18th, and 19th centuries. Notable instances include the Augustan fad of the 1730-1770 period, the Neoclassicism of the 1820s, and the Greek Revival of the 1880s. Romanticism began as a sort of
* The Ren & Stimpy Show aired it several times, albeit with some sexually-suggestive footage removed.
* The Ren & Stimpy Show announces that they made the cut and are now "full-fledged tank paratroopers".
* The Ren & Stimpy Show appears on commentaries for episodes that were done after he was fired.
* The Ren & Stimpy Show", a starving Ren and Stimpy exploit the benefits of living as babies by switching lives with a pair of babies, which of course includes wearing diapers.
* The Ren & Stimpy Show: A-TEEEEEEEEEEEEEEEEEEEEEENNNNNNNNNNNNN-HOOOOOOOOOOOOOOOOOOOOOOOOT!!!!!!!!!!
* The Ren & Stimpy Show: At the end of "Terminal Stimpy", Ren and Stimpy ascend to Heaven and are greeted by the Announcer Salesman at the gates.
* The Ren & Stimpy Show: A variant in "Space Madness" where Ren and Stimpy are on a lengthy space mission and go on break for six years... it's clear things won't go well when, within thirty seconds, Ren is driven batty by Stimpy's absently tapping his finger on the tabletop.
* The Ren & Stimpy Show comic book had a story with this title in which Ren has to drive Stimpy and Sven to Six Flags Over Jello.
* The Ren & Stimpy Show", Commander Hoek and Cadet Stimpy go through a black hole and end up in a strange dimension, where they find a pile of all of Earth's missing left socks.

* The Ren & Stimpy Show does this to Stimpy on a semi-regular basis after he's said something really stupid.
* The Ren & Stimpy Show dollars, but Stimpy still won't fold. Later, he makes the same offer of five dollars to Ren. When Ren hesitates, the photographer begins to offer the million dollars before Ren enthusiastically cuts him off and takes the five dollars.
* The Ren & Stimpy Show episode "A Visit To Anthony's" the boy Anthony was a winner of a contest to appear on the show.
* The Ren & Stimpy Show episode "A Visit To Anthony", when Anthony's dad furiously interrogates Ren and Stimpy, he tells a joke like this:
* The Ren & Stimpy Show episode "City Hicks": the episode starts with the duo running a farm that grows dust, which they apparently turn into food. When it rains and the dust is washed away, they consider the growth of plant life in their fields to be a bad thing and move to the city when they believe the fruits and vegetables that are now growing in their fields to be worthless.
* The Ren & Stimpy Show episode "Hard Times for Haggis," the titular washed-up character sees someone disguised this way purchasing a doll of Haggis that had been gathering dust in an antique shop. Haggis follows the mysterious buyer into an alleyway and sees him rip off his disguise, revealing to be Haggis's runaway Scottie dog Whacky!
* The Ren & Stimpy Show episode "Haunted House", the Ghost falls into a depression after his multiple failed attempts to scare the title characters, and "kills" himself only to turn into a living, fat naked black guy.
* The Ren & Stimpy Show episode "Insomiac Ren" had Stimpy reading a story to Ren.
* The Ren & Stimpy Show episode "I Was a Teenage Stimpy", Ren shoves the whole bar in Stimpy's mouth when he mouths off at him.
* The Ren & Stimpy Show, episode "Mad Dog Hoek". It mocked the notion of "wrestling is fake" by having Ren and Stimpy get absolutely clobbered until the other side's watch alarm goes off, at which point one says "Hey, buddy! It's time to throw the fight!", at which point they promptly drop to the mat, leaving the barely conscious Ren and Stimpy to be declared the winners.
* The Ren & Stimpy Show episode "Marooned", a giant alien tentacle monster appears to Ren as a female chihuahua in order to trap him. To Stimpy, the tentacle appears as a bag of kitty litter, so he looks perplex when Ren starts to caress it and talk romantically to it.
* The Ren & Stimpy Show episode "Ren's Brain" ends with every single person's head exploding, blowing up Earth in the process. "And thus endeth the Republican Party as we know it," says the narrator.
* The Ren & Stimpy Show episode "Ren's Toothache", Ren's halitosis becomes so foul that even the Tooth Beaver and the flies can't stand it.
* The Ren & Stimpy Show episode "Space Madness" ends with Commander Hoek, driven mad by... well, by space madness, brings Cadet Stimpy around the bend with him by ordering him to guard the History Eraser Button, with a very strict order not to let anyone touch it. Finding out what that button does is already tantalizing enough before the narrator decides to pile on the excruciating suspense.
* The Ren & Stimpy Show episode "Stimpy's Pregnant". More like crying poo, but still portrayed as an animate object.
* The Ren & Stimpy Show episode "Sven Hoek", this is one of the threats Ren gives Stimpy and Sven for messing up the house.
* The Ren & Stimpy Show episode "Untamed Wild" was a spoof of nature shows, with Ren as the host. At the end, a creature named the Frilled Ren (all the animals were based on either Ren or Stimpy) uses its necksack to attract other nature show hosts.
* The Ren & Stimpy Show even goes so far as to press him towards the "jolly candy-like" button and even grind his face to it. Will he hold out, folks? CAN he hold out?
* The Ren & Stimpy Show featured Ren happily and willingly doing the Happy

Happy Joy Joy dance with Stimpy. In the episode where this comes from, "Stimpy's Invention", Ren is forced to do the dance because of Stimpy's Happy Helmet and this is the last straw that drives Ren to remove the helmet.
* The Ren & Stimpy Show featured several mock-adverts, amongst other between-toon-bumpers, between toons. The most famous 'product' advertised was Log, from Blammo - a solid chunk of wood which could be endlessly accessorised ("Action Log! Space Log! Anatomically Correct Log!") and was apparently great for a snack.
* The Ren & Stimpy Show features an insane Ren dropping Stimpy's precious already-dead mouse toy into a vat of acid. It skeletonizes, and then the skeleton dissolves, as Stimpy looks on in horror.
* The Ren & Stimpy Show featuring Hamton Pig and GoGo Dodo in Ren and Stimpy's roles.
* The Ren & Stimpy Show had a lot of this with its Off Color Humor, Violence and Sexual Humor.
* The Ren & Stimpy Show has Captain Ren reporting to his log (not that one) with a helmet that sends thoughts bulging down a wire into a computer.
* The Ren & Stimpy Show has Log march in with the Sega logo, complete with the Log theme song as the background music.
* The Ren & Stimpy Show has stated that he based Stimpy's voice on Larry Fine, though he also repeats some of Curly's and Shemp's sounds.
* The Ren & Stimpy Show has these moments a lot with his emotional crutch Stimpy.
* The Ren & Stimpy Show has two children flying after eating powdered toast. PTM then flies past them and tells that they children can't fly, after which they start plummeting down.
* The Ren & Stimpy Show has two examples from Sven Hoek in his self-titled episode. When playing "seek and hide" with Stimpy, he counts "Nine... eleven... K... fjord... one yundred!" Then when playing the "Don't Whiz on the Electric Fence" board game with Stimpy, Sven moves eight spaces, counting as he does so, "One, six, yirteen... eight!"
* The Ren & Stimpy Show have had their faces ripped off on several occasions, one specific example comes from "Travelogue" in which Ren has his torn off by a baboon who collects the faces of "lucky tourists".
* The Ren & Stimpy Show have revealed their fur to be nothing but a suit in a few different episodes, by unzipping to take a bath or go skinny dipping.
* The Ren & Stimpy Show, having seen the street sign for a local liquor store in Van Nuys, California (Where Kricfalusi lived at the time while pre-developing the series) that read "GEORGE LIQUOR". John K was astounded, and immensely amused by the liquor store owner not even bothering to have so much as an "'s" in the title to declare ownership of the liquor store as "George's Liquor" and the name stuck.
* The Ren & Stimpy Show in 2003, and was also included on the first and second-season DVD set from Paramount Home Video in 2004.
* The Ren & Stimpy Show: In "An Abe Divided", Stimpy jumps onto the Lincoln Memorial, believing it to be Santa Claus.
* The Ren & Stimpy Show: In "A Scooter for Yaksmas", Stimpy accidentally steals the scooter he wanted (but didn't get) from a store, and has a guilt-ridden nightmare in which his idol Stinky Wizzleteats sentences Stimpy to "infinity years" in prison.
* The Ren & Stimpy Show: In "A Yard Too Far", Ren's salivary glands sprout faucets upon him seeing a plate of hog jowls on a windowsill.
* The Ren & Stimpy Show: In "Double Header", Stimpy asks Ren what he did to make Ren want to send him on a one-way trip to Ursa Minor. This triggers a series of clips from previous episodes showing Stimpy doing stupid things, often at Ren's expense.
* The Ren & Stimpy Show: In "Fake Dad", Ren's adopted son, a burly jailbird named Kowalski, gets angry when Ren hits him with a spoon. He proceeds to take the couch ("My favorite couch!"), a television set ("My favorite TV!") and Stimpy ("My favorite friend!") and crunch them all to dust.

* The Ren & Stimpy Show: In "Haunted House", the ghost makes one last attempt to scare Ren and Stimpy by putting on a witch doctor's mask and threatening them with a chainsaw. Unfortunately for the ghost, the duo mistakes him for a trick-or-treater and toss him some Halloween candy.
* The Ren & Stimpy Show, in one of the "Captain Hoek and Cadet Stimpy" segments. They've gone through a black hole into a parallel universe, and miss the bus back to reality as the place they're in starts to break up.
* The Ren & Stimpy Show - in "Space Madness", Stimpy has Ren take a hot bath to sooth his nerves...he also shuts off the gravity (with a light switch) to help. It only affects Ren and his bath water.
* The Ren & Stimpy Show: In "Stimpy's Fan Club", Ren is writing an insulting letter, in Stimpy's name, to a fan who is a bed-wetter. As he writes it, Stimpy comes in to check up on him and is shocked by what he's writing.
* The Ren & Stimpy Show: In the episode "Stimpy's Fan Club", Stimpy gets tons of adoring fan mail, while Ren gets none. Stimpy tries to cheer Ren up by making him the president of Stimpy's Fan Club, but this just drives Ren to new levels of psychosis (and for Ren, that's really saying something). The next week, Nickelodeon got a truckload of letters from children telling Ren they loved him too.
* The Ren & Stimpy Show: In the middle of the "Robin Hoek/Nurse Stimpy" episode, Ren and Stimpy perform a mock-hijacking of the broadcast from their fan club's secret headquarters "thousands of miles below the Earth's crust".
* The Ren & Stimpy Show: In "Untamed World", Ren is hit by a tranquilizer dart, and as his voice slows down the music does too.
* The Ren & Stimpy Show in which they are trapped in a log cabin buried beneath the snow, they imagine each other as various food items, and in another one where Ren lives in a cave, he imagines bats as a pair of cow's udders, which he starts sucking on before one of them smacks him away.
* The Ren & Stimpy Show in which they dressed as monkeys and lived at the zoo.
* The Ren & Stimpy Show is sent on a snipe hunt in the woods to prove his worth after the duo joins a Girl Scouts offshoot. When a skeptical Ren opens Stimpy's bag, he gets mauled by the big, hairy, bug-eyed monster that emerges.
* The Ren & Stimpy Show is the voice of Ren, at least in the first two seasons. The minor character Mr. Horse is also confirmed to be heavily based on him, including repeatedly saying "What are ya?", which was a catchphrase of Kricfalusi's.
* The Ren & Stimpy Show, it's also quite evident the economic thinking is not absent.
* The Ren & Stimpy Show left the show, though certain episodes, such as "Stimpy's Cartoon Show" and "Reverend Jack", satirized what working under John K.'s tenure was like.
* The Ren & Stimpy Show, "make underleg noises at the good parts", and wear unwashed lederhosen every single day for the rest of one's life (the other details vary from episode to episode).
* The Ren & Stimpy Show notes "this is feature quality animation, amazing on a tv budget."
* The Ren & Stimpy Show of the parachutes, one can only assume they were on a suicide mission.)
* The Ren & Stimpy Show once did this, once it became stuck he pulled until his tongue got ripped off.
* The Ren & Stimpy Show: On their way to Canada, the two hitch a ride on a train; at first we see two figures in a train cart that would be Ren and Stimpy, but it was actually two random guys shaped like them, and the real two are under the cart with their heads bumping on the tracks.
* The Ren & Stimpy Show, on the other hand, gets up and goes to work as if nothing has happened.
* The Ren & Stimpy Show, picks the petals saying "I am not dying, I am not going to die."
* The Ren & Stimpy Show "Powdered Toast Man" cartoon ends with the title hero, newly installed as President, getting a fire going in the fireplace with the

Constitution and Bill of Rights (the scene of which was cut in reruns due to censor complaints) — as he and his lovely assistant exchange loving gazes, he roasts a hot dog, she roasts a marshmallow.
* The Ren & Stimpy Show: POWDERRRED TOOOOOAST MAAAAAAAAAAAAAAAAAAAAAAAN!
* The Ren & Stimpy Show, released during the 1994 holiday season, each came with holiday plushies of Ren and Stimpy respectively.
* The Ren & Stimpy Show: Ren and Stimpy are given these in "Circus Midgets".
* The Ren & Stimpy Show: Ren and Stimpy has "POWDERED TOAST MAAAAAAANNN!!"
* The Ren & Stimpy Show: Ren and Stimpy have jobs as guard at the Lincoln Memorial and hear Lincoln's head is full of treasure. They break it open and find it's filled with... caramel corn.
* The Ren & Stimpy Show: Ren and Stimpy's job as pixies in "Pixie King" is more or less this, especially since they're whipped by policemen if they slack off for even a second.
* The Ren & Stimpy Show: Ren is reasonably intelligent but selfish, violent-tempered and outright psychotic. Stimpy is dim-witted but kind-natured and perpetually cheerful. In many episodes (particularly in later seasons), Stimpy borders on being a slave for Ren and is verbally and physically abused on a regular basis. He rarely takes any of it to heart and thoroughly enjoys doting over Ren.
* The Ren & Stimpy Show, Ren responded to Stimpy's hijinks with an irritated "You...". More often, "You" would be followed by "Eediot!" or "Sick little monkey!"
* The Ren & Stimpy Show: "Ren's Brain" has Stimpy remove Ren's brain to be the centerpiece of his weird brain collection, leaving his body as an idiot. Ren's brain ends up leaving and acting as if nothing happened, only to come home and be pissed off at Stimpy hanging with his body.
* The Ren & Stimpy Show. Ren thinks being a pro wrestler is going to be a piece of cake and they can't lose because "we are the good guys." Ren & Stimpy suddenly find themselves on the receiving end of what appears to be a very real beatdown or so it seems until their opponents throw the fight. Turns out Pro Wrestling is fixed, but the pain is real and our heroes had no idea what they were getting into.
* The Ren & Stimpy Show, Ren turns into a man's ass, accompanied by a donkey braying.
* The Ren & Stimpy Show showed Stimpy's preferred method for getting at a Muddy Mudskipper cereal bowl caddy: He just gets a very big bowl and pours all of the cereal into it. After he claims his prize, he stuffs the cereal back into the box.
* The Ren & Stimpy Show skinny dipping. And then by the man's wife, to their even greater horror. The old man later appears through the episode, practicing such activities as skinny stomping and skinny slapping.
* The Ren & Stimpy Show) starts to get to Commander Hoek (Ren) and he starts to lose his mind (however little there is of it to lose in the first place). Cadet Stimpy was forced to restrain him, but Hoek believes that Stimpy is the one who has Space Madness and plots to get rid of him.
* The Ren & Stimpy Show, Stimpy and Ren's cousin Sven are members of the Loyal Order of Stupids. Their "secret handshake" consists of gently biting the inflated gloves on each others' heads.
* The Ren & Stimpy Show, Stimpy gives the ailing Ren a sponge bath, then Ren has a total relapse when it is the next day's front page story — complete with secondary headline "Hundreds Witness Soapy Scenario!"
* The Ren & Stimpy Show, Stimpy leaves to become a big TV star, leaving Ren all alone. To take his mind off it, he turns on the TV...and wouldn't you know it, Stimpy's on every channel.
* The Ren & Stimpy Show: Stimpy's brain is often falling out through his ear.
* The Ren & Stimpy Show", Stimpy tells Ren to start the campfire, but the problem is he doesn't know how to start a fire. First, he rubs two squirrels together. After a while, he tires of that; eventually, he dumps a can of gasoline into the pit and lights a match and Ren quickly catches on fire.
* The Ren & Stimpy Show's wrestling match versus the Lout Brothers in "Mad Dog Hoek."

* The Ren & Stimpy Show: The episode "Magical Golden Singing Cheeses" has one of the most literal examples, as the ending has two cheeses transform into princesses with shapely bodies, but featureless lumps of milk curd for faces; the duo were forced to marry them.
* The Ren & Stimpy Show: The episode "Road Apples" has Ren, Stimpy and their owners sleeping in a large bed in their RV. Ren hangs it:
* The Ren & Stimpy Show: The episode "Robin Hoek" opens with Ren and Stimpy saying their prayers before going to bed.
* The Ren & Stimpy Show. The first one explained why kids go to school: "Your parents are aliens, and while you're at school, they shed their human skins and breathe dryer lint!" Another said that camel humps are where gasoline comes from (one hump for regular, two for premium and unleaded). Even Stimpy himself didn't buy that one.
* The Ren & Stimpy Show: the two titular characters don't appear in "A Hard Day's Luck", "Powdered Toast Man vs. Waffle Woman", and "Feud for Sale".
* The Ren & Stimpy Show this whenever possible. Any shots of newborn babies show them with translucent red skin, showing off veins and eyeballs for maximum ickiness.
* The Ren & Stimpy Show to talk about various subjects (such as drawing or animated character theories), and he does participate in comment discussions there. However, he has made far fewer overt statements about cartoons he does not like, focusing more of his attention on simply praising the inspirations he does admire.
* The Ren & Stimpy Show), to which a narrator says "And thus endeth the Republican party as we know it!"
* The Ren & Stimpy Show was kicked out from it. The episodes produced by Games Animations also stepped in the territory of Nightmare Fuel frequently - however, with these, it was unintentional and more prone to be genuinely horrifying rather than just used for comedic effect.
* The Ren & Stimpy Show was so impossible to work with during production on the show that Camp would allow other staff members come into his office and kick a wall which he'd adorned with a sign reading "John's Knees." By the time Kricfalusi was eventually fired, the wall had been reduced to a massive hole.
* The Ren & Stimpy Show was the one who killed the dinosaurs... as he's being taken away by security guards, who reveal that he's not a guide but a lowly bone-polisher.
* The Ren & Stimpy Show". When Ren goes to the kitchen to find something to take the happy helmet off with, he stands in front of the cupboards with one drawer drawn differently than the others, but he doesn't open it right away. After a scene change, the camera switches back to the kitchen, and the entire cupboard is drawn differently with no clue as to which drawer he might open, only then does he open the one that the previous scene alluded to.
* The Ren & Stimpy Show when the huge, burly convict Kowalski requests a meat on meat sandwich [toasted], which he washes down with a glass of meat.
* The Ren & Stimpy Show, where Stimpy hosts one such commercial for Gritty Kitty kitty litter, and has Mr. Horse test it against the competing brand.
* The Ren & Stimpy Show where they're door-to-door salesmen has them knock on a door, and the homeowner angrily grabs them, throws them in the kitchen sink, and guts them like fish. Ren comments "This is gonna be a tough sell, man!"
* The Ren & Stimpy Show, who had been fired from the show when that episode was made.
* The Ren & Stimpy Show: "Why does Powdered Toast give you sooooo much energy? Because it comes in a can, stupid!" It turns out that powdered toast can not actually give kids the power to fly, despite having Vitamin F.
* The Renault Avantime was well-reviewed and liked by critics but its unconventional design led it to bomb in the market with fewer than 9000 sold, pretty disastrous for a people-carrier. Notably, it's one of the few cars that all three presenters of Clarkson-era
* The Renault team hadn't won for nearly two years when two senior team members conspired with driver Nelson Piquet Jr. to deliberately crash during the 2008

Singapore Grand Prix to assist teammate Fernando Alonso to win the race. When the truth emerged in 2009 there was a huge uproar, the plotters were banned from racing, sponsors pulled out early and Renault's brand image was tarnished. Funny thing is that Alonso and Renault won the next race in 2008 (in Japan) entirely fair and square.
* The Renegade path also gives plenty of opportunities to intimidate the bad guys into giving up. Specific to the above hostage situation with Tela Vasir,
* The Renegade Programs of the Machine World, who flee from the behind-the-scenes world of the machines to live in the Matrix. Their abilities and appearances give the human world its myths of angels, werewolves, and aliens. One of the renegades, the Merovingian, commands most of their society, with the Oracle guiding the rest to avoid him as best they can. Whereas the human Rebels are distinctly
* The Renegades of Kaladesh block, who reject the repressive Consulate's control over the aether flow. They're not shown to be
* The Renfield: A human henchman who (un)willingly serves an evil vampire.
* The Renho arc helped introduce Sorachi's trolling style to anime viewers. It started off with a tear-jerking scene of Elizabeth leaving his friends behind, with a longer credit song to mark it as a saga, making it greatly resemble the Four Devas arc.
* The Renraku Arcology (officially the Self-Contained Industrial Residential Environment), owned by the Renraku Corporation, is around 300 floors of alternating worker housing, manufacturing areas and waste processing and food production facilities, topped with luxury housing for the elite management. You have to be an employee to live there, but they'll happily take your money in one of the multiple megamalls located within. Things changed when, during the Christmas shopping season of 2059, the arcology locked itself down, trapping its inhabitants and thousands of shoppers inside. Nobody on the outside knew what was really going on until the lockdown was lifted sixteen months later:
* The Renshai race, which Colbey was a part of, almost never lived to the age of 25.
* The Rental where he tells the characters that he doesn't mind having dogs, and it's his brother's rule.
* The reoccurring Maser Cannon weapons, which fire a beam of electro-atomic energy, and are actually one of the few manmade weapons that consistently hurt kaiju.
* The Reol are a race of beige-skinned humanoids with dreads and wrinkly skin who can make you think they're your best friend.
* There once was an advertisement for coffee that threatened housewives with being beaten up by their husbands if they bought a cheaper brand instead of the advertised one. This was
* There on the internet of people showing off their belching skills. Those are only a few of the many, many, examples.
* There Oughta Be A Law!, a newspaper comic (1948-1984) about daily annoyances and hypocrisy.
* ''The Repairer of Reputations'' and ''The Yellow Sign,'' mostly wrote light, fluffy romantic comedy stories. A reader looking for more weirdness is likely to be very disappointed.
* The repairman is a serial killer and he kills both his intended victim in the house and the mailman who could place him there. knew something.
* The rep began to cling to him in his career with the University of Tennessee. He was forced into action in his freshman year, and no fair-minded fan thinks his one loss as starter (to #10 Alabama) that year was a disappointment. But after that, he lost every year to a certain team in Gainesville, Florida, and their
* The repeated destruction of the Gates to prevent Evil from controlling them
* The Repellent Stick. Hit a mole rat with it, wait a few seconds, and its head will explode. As fun as this sounds, all the Mole Rats do is smoke for a bit before their heads burst in a rather underdramatic fashion. Moira's reaction is altogether more amusing.
* The Repetition ["being delighted by time"], autopedophilia, i.e. aged perverts

stalking themselves in childhood, and chronanism".
* The Replacement an antagonistic demon who set these events in motion (accidentally, he meant to do this to the Slayer, not one of her sidekicks), but he's actually only a minor plot point in the episode.
* The Replacement Killers than anything else, ultimately seeing him off at the airport before he leaves to join his family.
* The Replacement Killers trailer, this part of the movie was homaged by Woo himself with Tequila.
* the replacement of Radio. In producer/composer Trevor Horn's own words, he felt that "an era was about to pass".
* The replacement of the population of the Soviet Union with ethnic Germans, and acquisition of the region's raw resources was a key goal of Nazi short-medium term planning, but was also key to gaining the requisite superiority over the USA in the medium-term (the 1960s-80s or so). The leadership of
* The Replacements (2000) a Keanu Reeves comedy football movie, has this happening to Reeves' character Shane Falco. Falco had notoriously choked in the final game of his college career, and performed miserably in his little time as a pro, so this last chance at the game represents a chance for him to erase that image. At the same time, the film makes it clear that none of the replacement players, including Falco, became permanent professional players and went back to their original jobs (in one case, back to prison). This is despite the fact that they've accomplished what the original highly-paid "superstars" couldn't.
* The Replacements (2000) also has one for the team's cheerleaders. Which was a footage of actresses trying out for the roles of the cheerleaders, which the creators decided to incorporate into the film. Interestingly, the two the head cheerleader ends up hiring don't even get an audition. She probably figures that, being strippers, they have plenty of dance experience. She even asks them to bring some of their "coworkers". The result is... interesting.
* The Replacements (2000). As he explains to Shane, he played one game in the pros, blew out his knee, and then he was done. Now he's a man of God and wants nothing more than to score a touchdown before retiring for good.
* The Replacements (2000), except less teamwork and friendship and more cheap shots and balls.
* The Replacements (2000), in which the title team racks up over fifty yards of Unnecessary Roughness penalties in one play purely to boost their own morale.
* The Replacements (2000) is Danny Bateman, a riot cop and Gulf War veteran. Stoic and reserved under normal circumstances, the second he's expected to perform he becomes a lunatic, equally likely to inflict bodily harm on friend and foe alike.
* The Replacements (2000), Nigel "The Leg" Gruff has racked up significant debts, and is told if he doesn't shank the game-tying field goal against Dallas some mobsters will take his pub. Falco prevents Gruff from making the kick by pulling the ball away. Nigel's leg is broken as a result, but he thanks Falco for saving his life.
* The Replacements (2000) played their home games in Baltimore's M&T Bank Stadium. Also, the Sentinels' only road game in the film was shot at FedEx Field, home of the Washington Football Team.
* The Replacements (2000) plays with this. The quarterback calls for the last huddle and specifically states that he's not good with the type of speeches they're expecting, so he just makes a one-liner. It seems to be more motivational that if he'd actually tried making the speech.
* The Replacements (2000): the coach asks the team to talk about things that scare them. Most give silly answers like snakes or spiders, and then Shane says "quicksand". The rest of the team is still thinking too literally, so he has to explain that he's talking about this trope. One thing goes wrong, then another and another, and pretty soon you're drowning in failure.
* The Replacements (2000): With a trip to the playoffs on the line, the Washington Sentinels, a team of scabs due to a strike, are trailing a powerful Dallas team that crossed the picket line earlier in the week. Nigel Gruff, the placekicker, goes on to kick the field goal and tie the game, but because he's threatened with

losing his pub if he saves the game for the Sentinels, Falco, the QB and holder, changes the play, takes the ball for himself and rushes into the endzone for the game winning TD. Subverted, however, when a holding call negates the TD. Played straight however, when they try for the win on the next play and get the TD, earning the Sentinels a playoff spot (of course, Nigel was injured on the fake anyway and couldn't have kicked the field goal).
* The Replacements (2000) with the actual team that has gone on strike. When their coach shows up to bail them out, he tells them off, warning them that they'll be fired if this happens again...then tells them, for the record, he wishes he'd been there to see the well-deserved ass-kicking they gave to the other players.
* The Replacements (2000): "You see the yacht with the satellite dish?...Mine's the houseboat covered in pigeon shit next to it".
* The Replacements) and, in many cases, perform entire sets of shambolic cover versions of songs. Their performances typically sounded great while sober, and part of the appeal of going to a Replacements show was that the audience didn't know if the band would be sober or drunk before the show began.
* The Replacements, and it was listed as the twelfth greatest album of all time by Spin Magazine.
* The Replacements as his favorite, despite its less-than-stellar reception with the band's fans.
* The Replacements: Buzz found Riley's cell phone and tricked Conrad into replacing people thinking it was Riley's request. When a cop tried to arrest Buzz for vandalism, Buzz claimed his right to make a phone call and used it to have the cop replaced.
* The Replacements covering the last five years of the band, the other was b-sides, outtakes and other rarities from the same period.
* The Replacements: Dick Daring once got a makeover and his wife mistook him for an imposter because of this.
* The Replacements episode "Todd Strikes Out'', Riley and Todd are handed protein bars, leading to this exchange:
* The Replacements, everything is made by Fleemco, with the main characters making most use of the company's "replacement service" that can replace anybody that a person wants with someone more to their liking. The person that gets replaced usually gets sent off on a nice vacation by "some weirdos in jumpsuits" for a couple of weeks before returning, assuming that they aren't legitimately awful people.
* The Replacements for a false start, while the replacement Sentinels are still learning to work together. It is also distracting to the fans and the refs.
* The Replacements had the Sentinels' games called by longtime football announcing duo Pat Summerall and John Madden.
* The Replacements has Gordo trying to teach Dick how to treat women so he asks Dick to pretend that he is K.
* The Replacements has the family playing a mini-golf course, where they must hit the ball past some obstacles, among them a rotating windmill of planets that block a hole. Mr. Daring puts his ball which gets deflected by one of the planets. Riley then tells him it was deflected by Pluto, to which he retorts that it is not even a real planet anymore.
* The Replacements' "I Bought a Headache" ends with applause, which is ended abruptly by a record scratch, transitioning to the song that follows it, "Rattlesnake".
* The Replacements (I. C. Underpants) won. It cuts to Ichabod, who complains that he wins all the time despite never running.
* The Replacements imply that Riley and Todd used to live in one of these.
* The Replacements: In "Answering Machine", the singer gets frustrated when he's trying to call someone but only gets the answering machine.
* The Replacements: In "Todd Strikes Out", it's made clear that Shelton is his team's benchwarmer. The team considered him the worst player and actively tried to argue against their coach letting him play due to him being the only player not put in the game. The first time he was put in he lost, and when Todd faked injury so

Shelton could play in the championship, he only helped the team win by sheer luck.
* The Replacements, K has a flashback to rescuing the World's Best Symphony Orchestra. Dramatic music is playing as they are trapped on a boat headed for a waterfall, cut to a closeup showing the Orchestra actually playing the music. They switch to a last stand dirge just before K stops the boat falling over the edge.
* The Replacements learning to overcome their differences and their own personal demons to become an effective team.
* The Replacements. One episode revolves around the problems of Riley displaying some "Straw Vulcan" behavior.... however, it's never labeled as "logical", and in the end, it's determined that it's not innately inferior to more impulsive behavior... but just that each is better-suited to certain problems and situations.
* The Replacements or had issues that prevented them from being taken seriously as an athlete (such as one of the players being deaf). They play for a few games, then at the end of the movie they're all released as the strike is settled.
* The Replacements, Reilly's entire family (including the talking car), spy on her first date, even going so far as to impersonate the wait staff in the restaurant.
* The Replacements reveals that Conrad Fleem is Todd and Riley's uncle.
* The Replacements: Richard "Dick" Marion Daring and Karen Jane "K" Mildred Daring, as Dick is a big, pudgy, hairy idiot (though not nearly as bad as many other cartoon examples), and his wife's a hot spy.
* The Replacements. Riley accidentally maxes out her mother's credit card on unicorn merchandise, and must think of a way to raise enough money to pay her back.
* The Replacements: Riley and her friends were once selling jerky. It was so bad hungry wolves refused to eat it.
* The Replacements: Riley getting a makeover before the school dance is treated this way, with the stylist wearing a mask and calling out for his tools one by one. When he's finished, he says, "We've done all we can." Mr. Daring, who was pacing outside, asks "How is she?" to which he says solemnly, "I'm not going to lie to you, Mr. Daring...(happier voice) she is beautiful!"
* The Replacements' song "Left of the Dial", named after the physical motion to find these stations - they'd usually be found on the low end of the FM dials (anywhere between 88.1 and 91.9, the Non-Commercial Educational band reserved by the FCC) before the commercial stations start to pop up around 92.1 (or earlier in some places bordering Canada and Mexico, which made these stations hard to hear because of the larger station conflicting with the signal of the tiny college stations).
* The Replacements speaks German so his father cannot find out how badly he is doing.
* The Replacements subverting this trope (generally by having a cut reveal someone standing in the "camera" spot the characters were looking at).
* The Replacements that had this as the plot. Riley replaces the zookeeper with someone who, she thinks, will take better care of the animals. She (the replacement) lets all the animals free. At the end of the episode, the animals are allowed to run free in a Golf Park, making it Hilarity In Golf Parks.
* The Replacements to half-hour episodes, and the premise of main characters Todd and Riley having the power to replace anyone they wish with another person is used much less frequently, being downplayed in favor of more character-driven stories surrounding the main and supporting cast.
* The Replacement's twin Kelly Donovan guest starred — but was only included when they had to be in the same shot together, due to the fact that Kelly Donovan isn't (primarily) an actor.
* The Replacements with the twist that one member of the audience [Shelton] actually is sitting there in his underwear.
* The Replacement, which is about a changeling boy who was kept alive, most changelings don't actually survive very long. Some, in fact, are killed by "their" parents—like the unnamed girl who likes to play with the gash "her" parents cut across her throat. The castoff who was switched for Natalie Stewart becomes this very easily; all Mackie has to do is whisper in her ear and tell her that it's okay to be ugly and unnatural and that there are people who will love her anyway.

Also, all the Morrigan's blue girls started out as this, but grew up because most of them were killed as very young children and, as she puts it, how is she supposed to keep a house if she always has to look after infants?
* The replicators in a few episodes mildly demonstrate this trope, although that's because most of them in those episodes are made of hull-grade steel rather than their normal waterproof material.
* The Repo Man himself, though his "companion" technically makes him a Scalpel Nut.
* The Report Card questions wrong by doing so deliberately, revealing that she's far more intelligent than even what the test revealed.
* The reporter and TV news producer who stumble upon the existence of the anomalies in
* The reporters are constantly blurting out odd things that they would never say if they remembered that the cameras were still on. They also have a blatant hatred for one another ("We now go live to Diane being a bitch. Diane?"). During an early episode where
* The Report: Iraqi-Canadian Fajer Al-Kaisi plays Lebanese-American Ali Soufan.
* The report of an alien spacecraft discovered beneath Wilkes research station serves as the
* The Report opens with the main character meeting with a lawyer, and the rest of the film shows us why.
* The Repository of Dangerous Things had the titular repository, wherein most of the comic took place.
* The Repository Of Dangerous Things has the main character open up an aspirin bottle, only for a genie to pop out. When asked to get rid of his hangover, the Genie simply explodes his head (he survives, and later has his head regrown with another Dangerous Thing). According to the genie's write-up, this wasn't even a creatively asinine interpretation of his wish — they just always explode your head, no matter what you ask for.
* The Repossession Mambo) was written in 1996 but did not find a publisher until 2008. However, the manuscript had been circulating in Hollywood for some time and the film was greenlighted a few years before the book was published. The film also suffered through post-production hell as Universal shelved it for two years.
* The Reppies were (awkwardly) redubbed to mention God for airing on Christian-oriented channels such as Smile of a Child.
* The representation of executioners wearing hoods supposedly comes from the execution of Charles I of Britain, as no one wanted to be identified as the regicide.
* The reprise of "Eidelweiss" has the Captain unable to continue as he's overcome with emotion. This prompts Maria and the rest of the family — and eventually the entire audience — to join in.
* There probably aren't that many people who wouldn't think of dinosaurs when listening to ''
* There probably isn't a wargame where you can roll the attack before announcing which unit is attacking, its target, and the details of any options they may have when attacking.
* There probably was none active oxygen, because it would actually destroy the clothes which were washed with the aforementioned powder and the washer in which it was done, unless they were made out of 24-carat gold.
* The Reptile Room, the Baudelaires are told not to let the Virginian Wolfsnake near a typewriter.
* The Reptile Room the narrator fills an entire page with the word "ever" over and over and over again when telling the reader not to fiddle around with electric devices unless they're Violet Baudelaire.
* The reptilian race called the Illujanka, or Dragon Riders, originally joined Zaros's empire because he promised them a cure for their fertility problems. He did attempt to cure them but by the time Zara's was banished, there were only five of them left on Gielinor. During "One of a Kind" the player frees what is believed to be the last Dragon Rider from suspended animation. At the end of the quest it is

discovered there still is a population of them left on their home world but they have given up hope of escaping extinction.
* The Reptites (sentient dinosaurs) have the Reptite Lair and Tyranno Lair. The former is underground, with passage secured by waiting for beetle enemies to dig holes to the next level, while the latter is surrounded by volcanoes but looks more like a medieval castle (65,000,600 years before the Middle Ages, mind you).
* The Republic: According to the fable of the Ring of Gyges (as told to Socrates by Glaucon), Gyges started out as a shepherd of Lydia who, after an earthquake, discovered an entrance to a cavern where he found "among other marvels" the statue of a horse made of brass; the statue has a door and inside, there is a skeleton of more-than-human size with a gold ring on its finger. Gyges takes the ring, which turns out to be a magic ring with the power to make its wearer invisible. Obviously, the mysterious cave is a tomb.
* The Republican and Democratic Parties in the United States respectively use the term RINO and DINO (Republican/Democrat
* The Republic, and the White Maw Pirates are fighting over the lost technology in a graveyard of crashed starships from the last war.
* The Republican Guard was also notorious in silencing dissent, though not a secret police and more of an actual military orginization, their atrocities are associated with actual military operations performed during the late 80s.
* The Republican National Committee, in the wake of the 2012 presidential election, admitted that many conservatives spoke only to people on their side or paid attention to news sources slanted in their favor (such as the Fox News Channel), which was likewise basing their stories only on what their own side was saying. As a result, they were convinced that Mitt Romney would be elected in a landslide, and basically let his campaign coast, confident he would win handily. Once that bubble of comfort was burst, however, the results were less than pretty. Karl Rove in particular had an on-camera meltdown when Fox News called Ohio
* The Republicans have their own internal problems as well. On the one hand, there's fiscal conservatives like Robert Taft and Herbert Hoover who despise the welfare state that the GRC set up. On the other, there's more liberal-moderate members like Alf Landon and Franklin D. Roosevelt who realize that it's not going away any time soon and should be accepted.
* The Republican soldiers in the party and union militias in the Spanish Civil War count. Heck they elected officers and could hand in their guns and leave at any point, at least before the
* The Republic DLC, where rival patrician houses can engage in feuds that can last generations. Appropriate given how the game is all about dynasties instead of nations.
* The Republic. Giovanni Gentile, the head philosopher of the Italian Fascist Party, was strongly influenced by Plato.
* The Republic: Governments run by appointed/elected officials (presidents, prime ministers) instead of hereditary aristocrats (monarchs).
* The Republic in turn faced many internal rebellions against the aristocratic senate led by populares such as the Gracchi brothers and Gaius Marius. This was followed by slave rebellions, most famously the Third Servile War led by Spartacus (
* The Republic itself is an interesting example. It has the trappings of a democracy, it's referred to as one in-universe, and its chief executive is selected by a simple majority vote among the senators, who can also remove him any time they so choose. However, these senators are chosen by their planetary governments, and the requirements on how those governments should be run are... unclear, but fairly expansive: many of the Republic's alien members have monarchies, hive minds,
* The Republic itself was once a bastion of freedom and peace in the galaxy. By the time of the Prequel Trilogy,
* The Republic of Chile in South America is, ironically, not known for producing chile peppers.
* The Republic of China would have stood a much better chance of resisting the Japanese invasion - or, at least, slowing them -

* The Republic of East Gorteau has a number of similarities to North Korea. The most obvious is its dictator, Ming Jol-Ik, whose name is an anagram of Kim Jong-Il, though his style of ruling—via cult of personality and with an incredibly uneven mix of technology, alongside extremely strict rules of who can get in and out of the country—suggest that too.
* The Republic of Florence under Girolamo Savonarola after he had driven out the Medici rulers out. Christian practices became formal law, and books, statues and works of art he deemed "un-Christian" were burned (this is where the term "bonfire of the vanities" originated-all things deemed "vain" were destroyed). In time the Papacy overthrew him, with Savanorala ultimately burned as a heretic.
* The Republic of Lakotah recently seceded from the United States. Currently, this declaration has been in name only.
* The Republic of New Sparta is the result of the American Revolution being salvaged by the more militant southern colonies after the north was crushed by the British.
* the Republic of Real People is discovered in South Africa, made up of Lemurians and descendants of various groups of humans who periodically crossed over going back at least 1000 years (and Half-Human Hybrids.
* The Republic of Sarah: Adam overhears Corrine and Danny discussing having sex before, due to him hiding in the kitchen closet at just the right moment.
* The Republic of Sarah: AJ is very paranoid about getting outed, and tries not to show public affection toward her lover Alexis. Corinne however sees right through it, and asks her point blank how long now they've been having sex.
* The Republic of Sarah: Alexis and AJ are in one, due to the former being married, while AJ's afraid of people's (apparently homophobic) reactions if it was discovered.
* The Republic of Sarah: Alexis is black-haired and olive-skinned, while played by a Latina Canadian. What Alexis' ethnicity is though hasn't been revealed.
* The Republic of Sarah, played by a Latina) are having an affair at the beginning (plus being a same-gender couple).
* The Republic of Sarah plays Alexis Whitmore, who's having an affair with Amy "AJ" Johnson.
* The Republic of Texas operated a small navy during the brief period of time where Texas was independent of Mexico and had not yet joined the United States. One of the Texan ships, a schooner named
* The Republic of Texas, which had been an independent nation since 1836 after winning independence from Mexico, was annexed by the United States in 1845.
* The Republic of Venice, which went on to sack Constantinople and rule several Greek islands and fortresses centuries later, originated as a farflung Byzantine outpost. The Venetian leader's charge (Doge) is etymologically related to
* The Republic the commoners from the depredations of the guardians, who (in this reading) would be driven by their innate ambition to run roughshod over the rights of the commoners if given freedom to do so.
* The Republic, the shepherd went on to sleep with the Queen, kill the King and take the kingdom as his own.
* The Republic Trooper ends up recruiting Tanno Vik, a former Republic soldier turned freelance mercenary to become the team's resident
* The Republic uses such a society as a metaphor for the human soul and the philosopher.
* The Requiem of Remnant example. While his main goal in the fic is to get back home to hsif friends, along the way he will help out Vale and its people if he can, even coming to odds against Cinder Fall and doing everything he can to put an end to her and her schemes. However, to do so, Giorno won't hesitate to beat his enemies within an inch of his life, ally himself with other criminals, and even fight against Team RWBY without a moment's hesitation or remorse.
* The requirement of paying for their own planes and munitions led one
* The requirements for a Space Marine involve "a near-psychotic killing instinct". Granted, this
* The requirements various countries have of a mandated amount of locally produced

TV and film. This was famously lampooned by the Canadian
* the requisition form for said equipment isn't. Or, for experimental equipment, the instructions aren't.
* There really are no strict rules for time travel in the series, or at least, none that make sense: The past can be changed, and indeed, is in danger of being disastrously changed all the time. Time travel logical problems that need to be overcome are handwaved with
* There really is irony in the fact that the two people who become the driving force of the Rebellion/Republic are
* There really is very little common ground at all when it comes to fans' opinions of the
* There really was a poor cat sound effect which was heard two times in the first season episode "Mermaid Man and Barnacle Boy II". Also after
* There're also some areas, notably the Wilderness, where teleportation is either limited or completely disabled.
* There're gay men in the US historically referring to each other as
* There's 750 million of Gav's gate-clones. It was kind of fun until everyone used to them, but... Eventually they started "
* There's a 30 cm (just under 1 foot) difference between Haru and Tsurezure in
* There's a 30+ km long 2-lane road between the Dutch cities of Haarlem and Leiden that was originally planned as a 4-lane road (40 years ago). The bodies of sand for the 4 lanes are present, and despite being only a 2-lane road, this stretch is raised, with bridges and onramps like a highway, unlike most Dutch 2-lane roads and many 4-lane roads which have traffic lights at intersections. At the north end, near Haarlem, there's a curious turn in the road, and you can see the body of sand continuing ahead for a little while (but not too far, because the north stretch of the road is blocked by other developments)
* There's a background character in the Las Vegas stage (Balrog's) that always loses a bet no matter who wins. He sobs on his forearm once a round is over.
* There's a background pony who's been referred to twice on screen as "Rose" and has a toy named "Roseluck". The name "Roseluck" hasn't been used in the show yet, but it's easy to believe Rose is short for that.
* There's a Bat in Bunk Five Ginger decides she wants to talk when Marcy is occupied. Ginger throws a hissy fit and runs away — Marcy gets lectured on how she was focusing on her own fun and not looking after the girls.
* There's a battle mode where each player has a bomb, which grows bigger and bigger, covering more of the screen and blocking your view, until one of you makes a mistake. The mistake triggers the bomb, causing that player to lose.
* There's a beach in the Caribbean that's now become a tourist attraction thanks to this trope. The aircraft are actually coming in to land, but while doing so they fly very low over a public beach.
* There's a beer commercial where a rock-climber, horrified that his buddy's gear draws attention to said buddy's nethers, politely makes up something about "Ocular Trauma" to get out of going with him. The old dudes watching the exchange break into a
* There's a belief that Maria was a bit of a trouble-maker due to being the only child on ARK, with her
* , there's a betting pool going among the Justice League as to exactly how large Izuku's harem will be, with Flash acting as bookie. Nightwing puts fifty dollars on an even dozen while Batman's betting on twenty.
* There's a big rock above Shatin in the New Territories of Hong Kong called Amah Rock which is supposed to be such a woman. Either she's grown since petrification or she was a giantess, it's about twenty feet tall. It has a silhouette resembling a woman with a baby on her back.
* There's a billboard along a freeway in Michigan, advertising a dentist willing to do implants for only a couple hundred dollars. Next to it is a statement saying "Voted best dental office in Michigan". Just below that, in smaller text, is the disclaimer "by our dental staff".
* There's a birthday card and it says "Why Dogs Find Humans Confusing", and it's

because it's good for them to pee on the newspaper when it's on the floor, but bad to pee on the newspaper when the humans are reading it.
* There's a bit in Shinra's headquarters where they have a set of advertisements for the line of cars that they make (represented during the opening FMV). The video clearly shows the engines of said cars using Mako in a way that is analogous to the use of the... distillates of the aforementioned black substance. (And "The Aforementioned Black Substance" would make a
* There's a bit more to this one. Outer Worlds lore references a catastrophic
* There's a bit of a cottage industry in averting this trope for more serious works.
* There's a bit of a subversion with Babe Heffron. He arrives as a replacement after the company returns from Normandy. However, it turns out that he and Bill Guarnere grew up mere blocks from each other in South Philadelphia, so Guarnere immediately strikes up a friendship with him. The result is that Babe essentially becomes an honorary "Toccoa Man" before he and the other replacements see combat.
* There's a bit of question in regards to whether the player stuck in the game and the coma victim are related in that manner.
* There's a bit of science behind this in real life. When seriously injured, your body releases endorphins, in order to keep the pain under somewhat manageable control (conveniently enough, this lasts just long enough for medical aid to arrive).
* There's a bit of this between Palpatine and Luke, too. "Take your father's place at my side," indeed.
* There's a bizarre example that happens within a single episode. In "City At The Edge of the World", Kerril starts as a snarky, leather-clad
* There's a bluegrass group called Russell Moore and IIIrd Tyme Out. Yes, you read that right, a
* there's a bomb in android Harvey causing everyone to run screaming for the door. The Chief seizes the microphone and yells at them for not evacuating in a calm and orderly manner like true Americans should. Everyone adopts a shamefaced expression...then run screaming for the door again.
* There's a book about a time traveler who was trapped in a burning building and could only travel to a certain period for a set time before being pulled back. He makes multiple trips to San Francisco and tries to stop the rape of a friend in the '60s. His suggestion to call the police just has another friend ask if he wants the police to rape her as well.
* There's about a dozen or so movies even longer than "Berlin Alexanderplatz", but all of them are
* There's a Boy in the Girls' Bathroom, Bradley assumes the girls' room is nicer than the boys', with colored water in the toilets and fountains, perhaps. When he does hide in one, he finds it's pretty much like the boys'.
* There's a Boy in the Girls' Bathroom: This happens to Bradley, causing him to be well older than the other students in his class.
* There's a brand of milk, Molocow, which comes in conical glass bottles. There's a silhouette of a levitating cow on the front of each bottle, and the bottles' caps are shaped like little flying saucers.
* There's a brief arc where Pearl attempts to join the League of Mad Scientists.
* There's a briefly seen porn stash, consisting of magazines depicting nude and partially nude women, in
* There's a brief mention of a dead girl being one of the available prostitutes in "Cathouse Tragedy."
* there's a brief mention that William Riker is facing a court-martial for the loss of the Enterprise.
* There's a brief moment of comic relief during the epic battle sequence in the climax
* There's a brief part where Hippolyta and Theseus debate whether or not the four lovers were just dreaming or not. Theseus believes they were, on the grounds that their story was too fantastical to be real. Hippolyta agrees that it sounds unrealistic, but points out that it's equally odd that four people just

* There's a brief scene in the epilogue of the manga that seems to imply that Rosette is trying to set up Joshua and Azmaria, too.
* There's a Bush's Baked Beans ad where Duke asks Jay, "Are you ever going to let me sell the secret family recipe?" Jay replies, "Sure, when pigs fly".
* There's a business in southern Wisconsin whose ads have a sultry female voiceover, accompanied by wolf-whistles, talking about their 'hot mix', as in asphalt, because they're a paving company. It's...confusing.
* There's a busy fringe of theatre practitioners offering the live counterpart of Le Film Artistique, described with various overlapping terms such as "experimental theatre," "avant-garde theatre," "postdramatic theatre," "performance art," and "live art." (British makers of this kind of theatre often call it, with rather mindboggling egotism, "
* There's a callback to this at the end of the movie, when a woman slips on a banana peel and catches herself spectacularly, starting a chain of scenes showing that the main character
* There's a Canadian bar called Squirrel Toothed Alice's with a similar slogan.
* There's a Canadian Tire commercial for an auto hammer where, because of numerous uses of manual hammers in places they clearly weren't designed for, a man's swear jar ends up paying for about half the tool being advertised.
* There's a car ad where an exec proposes having a car commercial take place in various vacation spots such as Maui. Everyone else on the board quickly realizes that this is what he's trying for.
* There's a car commercial from the mid- to late '90s in which several cars are driving on the beach and then out onto the sea. (Yes, you read that right, "onto".) At the bottom of the screen were the words "Simulation. Do not drive on the ocean." (Again: on, not in.)
* There's a card called "Yu-Jo Friendship". When activated, you offer a handshake to your opponent. The effects of the card are dependent on whether or not the opponent accepts the handshake, but you can reveal a "Unity" card in your hand to your opponent, and then they must "accept the handshake". It doesn't say to apply the one specific effect, just that they must accept the handshake. So one player,
* There's a card game called Straw that literally deals with trying not to break a camel's back. Players load goods of various weights onto a communal camel, trying to avoid being the one to go over 50 pounds/kilos/whatever. Everyone other than the person who broke the camel's back scores the sum of the weight still in their hand, so there's a risk/reward aspect to holding onto the heavier goods. Amusingly, there's a single 'Straw' card that weighs 1/1000. If you play that when the camel is at exactly 50 pounds, you score your hand while no one else does, akin to shooting the moon in trick-taking games. (Why this method of back-breaking is desirable isn't really explained)
* There's a case where a butler is one of the suspects in a murder case... but
* There's a cell-phone service commercial in which a morgue worker's breakfast burrito falls into the cadaver he's working on, and he blithely picks it up and continues eating it. "What, you think this is wrong? What's wrong is paying too much for cell phone service."
* There's a certain group of people that will often claim that adding a Spanish-speaking character to a children's show produced for the United States market is done to
* There's a certain type of electronic cash register that makes the ring pick-up sound effect from the
* There's a chain of quests where the player gets a series of legendary weapons. First, the player has to
* There's a charity group called Akatsuki Afkar in Indonesia, which members do charity work wearing
* There's a Cheat Shop that lets you adjust EXP, HL, Mana, and Weapon Mastery gain by shifting one of the rates to another, and you can increase your gain by clearing special maps. You can also make enemies stronger or weaker freely from there. No more having to pass a bill every time you want to adjust enemy levels once.
* There's a children's song about a trio of monkeys living in the jungle who get

bored one day and decide to taunt the crocodile in the river, confidant that they're too quick to be caught by him. He promptly tricks one of the monkeys into coming close, and the next verse is about the two monkeys living in the jungle who get bored and decide to taunt the crocodile. The song ends with a jungle that has no monkeys but one very full crocodile.
* There's a Chinese opera whose plot runs thus: a poor man lands the luck of marrying a wealthy lady, and to raise his station in life he goes off to study for the Imperial Exams. Years later, he returns with a government post, and decides to test her faithfulness. Not only does she prove to be the iron lady, she gets
* There's a Christian inspirational story about a man who dreams he's in a room where every wall is a filing cabinet and every cabinet is full of index cards recording each of
* There's a Christmas episode of all things that dealt with this. Titus goes to the funeral of an ex-girlfriend — not because he loved her and wanted to say goodbye, but to make sure the funeral wasn't an elaborate ruse for her to attack him for dumping her (As mentioned in the episode, "Dad is Dead" and on the comedy special, "Norman Rockwell is Bleeding," Titus's first girlfriend was a 5'1, 100 lb. Jewish girl who, like Titus's mom, was beautiful, sexy, very smart, and a bipolar whack job who often abused him and used sex to manipulate him).
* There's a Christmas joke that an angel approaches Santa Claus while he's in a bad mood and asks "Where should I put the Christmas Tree?" As you might have guessed, Santa's reply was something along the lines of "Stick it up your ass!" ...and that's why the angel goes on top of the Christmas tree every year.
* There's a Christmas poem recorded on tape about a school Christmas play in which the narrator is seemingly proud of, or at least content with, being a tree.
* There's a civil war in the 1850s in Texas between those who want independence and those who want to stay part of Mexico. Though this quickly becomes a sideshow to a Mexican civil war between Republicans and Imperialists.
* There's a classic drinking game called "Fizz Buzz", in which players pick a number (say, 7), then take turns counting upwards, until they reach a multiple of the number (7, 14, 21, and so on) and have to say "buzz" instead. Failure results in having to drink a shot. It's also used without alcohol in acting circles as a concentration technique, and in schools, in teaching kids their multiplication tables.
* There's a classic example in a Lovecraftian sense. A woman whose ancestry isn't all human is made pregnant by a demon whose parent is Shub-Niggurath. The unborn child is predicted to be a powerful demon whose progeny will wipe the earth clean of humans. The mother is killed. Subversion: the mother is killed over twenty years too late, and the child grows up apparently human until his death. At which point it comes back to life and fights like hell
* There's a classic Mickey/Donald/Goofy cartoon that involves our heroes traveling in a remarkably automated mobile home. Donald's peacefully sleeping in bed, but Mickey hits a control, and the bed (it's on a sort of shelf) folds into the wall. Donald gets folded too, then pops out another hole fully dressed.
* There's a classic riddle about a man who is given the choice of taking his chances with cannibals, or being thrown into a pit full of lions who haven't eaten in a year. He chooses the lions and escapes, because the lions have obviously died at this point. A variation has a man forced to choose between three doors, one having raging fires behind, the second having assassins with loaded guns, and the third with lions that haven't eaten in 3 years.
* There's a closely related idea in automotive design - it's common for people to anthropomorphize cars, with the lights as the eyes, the grill as the mouth, etc. Sports cars and high-end luxury models tend to be designed with a lot of hard lines and downward-sloping angles to give the car's "face" an angry, intimidating look, which presumably appeals to the kind of people who buy those cars.
* There's a Coca-Cola commercial that states that the formula for Coca-Cola is broken into two parts, each known by one man. (This much is more or less true, although with more than two people, and there's a backup hard copy in a vault in Coca-Cola's Atlanta HQ.) The commercial goes on to claim that

* There's a comedic barbershop song called "Dirty Words", which operates on the conceit that "barbershop music has gotten so dirty lately", and then proceeds to sing the lyrics to popular barbershop songs with some of the words strategically bleeped out with humorous sound effects (horn honks, slide whistles, pop guns, etc.). Ten times funnier if you're actually familiar with the songs in question, so you know what's being bleeped. As an example:
* There's a comet in the sky that's talked about in the Crystal War in
* There's a comic strip where Garfield is watching an infomercial for something unknown but so bad that he can't help complaining endlessly. Jon walks by and tells Garfield he has three of the product.
* There's a commercial (based on a very old joke) where a groom in a tux is propositioned by his fiancee's sister. He runs out the door and gets to the car, when his father-in-law-to-be and a group of other people tell him he passed the test.
* There's a commercial for Dell computers where it shows a series of pictures of a guy with his girlfriend. Midway through the commercial, it stops at one picture being shown in Windows Vista's picture app. The app then goes and crops the guy's girlfriend out of the pic. As you might guess, it reveals the guy sitting at a Dell PC doing this. (At the end where it shows off the PC, its monitor is showing a picture montage of the same guy and his new girlfriend.)
* There's a commercial for dental insurance in which a little cartoon girl uses a hand mirror to count her own teeth. It's actually an in-joke for dental care professionals: she's too young to have adult teeth yet, yet keeps counting even after reaching 20 — the total number of baby teeth in human kids — indicating she must've lost count somewhere along the line.
* There's a commercial for McDonald's that results in Ronald flying over the city with apples that drop randomly into the hands of children so they have healthy snacks.
* There's a commercial for POM, a pomegranate juice, which has a naked woman lying somewhat on her side but managing to avoid showing anything with a python lying on her.
* There's a commercial for Secret brand women's deodorant in which a woman dives off a balcony in lingerie and straight into her black dress, in a greatly exaggerated demonstration of the lengths some women supposedly go to in order to avoid white streaks on dark clothing from rival deodorant brands. The fine print at the bottom of the screen advised, "Dramatization. Do Not Attempt".
* There's a commercial that shows a man happily eating dinner with his girlfriend who's
* There's a commercial where the best man loses the ring just before the ceremony, and he and the groom rack their brains over it and start searching themselves, leading to the best man having to strip near naked before the thing is found. He and the groom whoop for joy, and celebrate with a hug,
* There's a common anecdote/joke about the floppy disk, which although now very nearly obsolete, is still preserved as the symbol for "save." Kids who see an actual floppy disk lying about remark that someone's 3D-printed the save icon. Some open-source developers are starting to look into alternatives, but nobody's hit on anything that's as instantly recognizable at a small scale.
* There's a common joke amongst Brits that some foreigners (chiefly Americans) think that Scotland and Ireland are located where Ireland is, that England is the island to the right, that Wales and Northern Ireland don't exist, and that this whole area comprises Britain. Some Americans will describe themselves as Scots-Irish (instead of Celtic, which would be accurate), and Americans of Welsh descent seem to be quite rare. If nothing else, Americans will always take the time to proudly list all the countries they are descended from without showing any knowledge of those countries beyond stereotypes. This manifests itself most obviously in St. Patrick's Day celebrations, which bear little resemblance to how it's actually celebrated in Ireland. Scots-Irish does not refer to some mix of Celtic Scottish and Irish blood, but rather to the
* There's a common joke between male friends in social networks (mostly Whatsapp),

where one friend shows a porn scene of a man with a beautiful woman about to do it, when it's revealed the woman
* There's a community of "tingleheads" who like watching videos or TV shows that induce a pleasant, soothing
* There's a condition called "dysgraphia" which can result in illegible handwriting without necessarily affecting intelligence or ability to read. Most dysgraphics are able to adjust by typing whatever they need to commit to paper, but this isn't always an option, forcing them to attempt to write by hand.
* There's a condition called Pseudobulbar Affect, in which the patient loses the ability to regulate emotional expression. They may collapse into a sobbing heap at the sight of a kitten, show absolute terror at their loved ones or laugh hysterically and uncontrollably at the loss of something dear to them. This is involuntary.
* There's a considerable amount of fan art and fan fiction that exaggerates Trixie's early-show narcissism by having her literally fall in love with herself.
* There's a conspiracy theory that there is a plan to merge the US, Canada, and Mexico into the North American Union, analogous to the EU. It's unclear how much truth there is to this plan in the halls of power, though given the nature of the US Constitution, it would be far easier for Canada and/or Mexico to apply for statehood than it would be to form a superstate.
* There's a conversation Shepard has with a shop owner on the Citadel, discussing people who don't understand this trope, saying "You wouldn't believe how often I hear 'Why is the ship turning around? We're only halfway there!'"
* There's a Cornish myth in which a princess falls in love with a nobleman from another country; he has to return home to protect his lands, and they cannot be together because she's already engaged. The princess inherits her father's throne and starts a war with her betrothed so she will be free to marry her lover when he returns for her... even though he promptly got married to someone else after returning home.
* There's a creepy calliope ditty called "To The Shock of Miss Louise" in
* There's a creepypasta floating around about a girl who finds out that her father escaped from the mob by going into witness protection after witnessing a neighboring family being murdered by the mob and they killed his wife in retaliation,
* There's a crowd of Transylvanian peasants cheering like this. This is subject to some mocking by Dracula: "If I vant to be alone, I'll call you guys!"
* There's actually a behind the scenes reason for that. One of Disney's rules they set for Square was that Mickey Mouse could not be featured prominently in the game, as they didn't want the game to piggyback off his popularity. They could show him, at most as a quick cameo for a few seconds. Square got around that by making him the "King" who Donald and Goofy are searching for, but never manage to catch up to until the very end of the game, where he is still in shadow except for one brief (i.e. the cameo) moment where he turns and you can see his face. It works too, because even though the "King" is obviously Mickey (personal seal is the Mouse symbol, Minnie is his queen and Donald, Goofy and Daisy are his court) his name is never mentioned and he never shows up until that one scene. If Disney was mad about Square playing around with their rule they never said as much, because
* There's actually a Czech surname "Skočdopole" which ALSO means "jump in the field". There might be some connection...
* There's actually a debate going on as to whether or not sex does sell as much as it used to. The reasoning is that
* There's actually a DVD special feature on that story which draws attention in a rather
* There's actually a fourth example hidden in the backstory in the form of Sol Invictus, essentially the Roman Morninglight. Unlike the Atenists, they really have been wiped out for good, though their branch in the Carpathian Mountains came dangerously close to accessing one of the
* There's actually an American conspiracy theory built around this trope. The United States Constitution and the Fourteenth Amendment to it were written and

ratified more than seventy-five years apart, during which time the trend towards capitalization of all nouns, regardless of their position in the sentence, fell out of use in
* There's actually an entire song that was built on this very trope: "This is the song that doesn't end/Yes it goes on and on my friend/Some people started singing it not knowing what it was/And they'll continue singing it forever just because/This is the song that doesn't end..."
* There's actually an official version of Monopoly called the "Cheater's Edition", where you're encouraged to cheat. You lay 5 cheats down at the start of the game, and if someone is able to pull one off without somebody noticing, they get a special bonus, depending on the cheat.
* There's actually another version of the story though where Isaac appears to die. The story mentions no ram, and only chillingly says that "Abraham and his family" went home.
* There's actually a not-so-different aspect to this, since Kaname herself spent a good portion of her youth in New York and as a result has a much more "American" personality (assertive, emotionally open, and short-tempered), meaning in some ways she's just as alien to Japanese society as Sousuke. She actually has the
* There's actually a Pokémon called Tentacool (a jellyfish-like creature). It evolves into Tentacruel.
* There's actually a recursive variant, as Sekai is in turn assisted by her best friend
* There's actually a reward for blowing up cars in the multiplayer games.
* There's actually a Song (which are not to be confused with mere spells in the game) that allows any Celestial to possess any living thing.
* There's actually a special enhancement exclusively used to invoke this trope in
* There's actually a specific exception provided for the Knights of the Church.
* There's actually a third Kingston called "Kingston near Lewes", but it's just a small village on the South Downs with a population of around 800, so is rarely the one in question.
* There's actually at least four. Arthur killed one, Sir Gareth got another, a third battled with Percival over a misunderstanding, and a fourth is the illegitimate grandson of King Arthur, who avenged his father after his wife killed him, and then teamed up with his half-brother to go on adventures.
* There's actually a very popular argument that the perfect crime is one where nobody ever realizes a crime was committed. Take murder for example. If everyone (police, M.E., relatives, everyone) believes the victim died of natural causes, or in a tragic accident, then there is no murder to be investigated. The perfect crime. Thus, by definition, we will never know if the perfect crime has been committed because we never know that it occurred in the first place. To put it in perspective, there were 126,438 deaths in 2010 in the USA that were the result of accidental injury. If 1% of them were murders that were never recognized, that would be 1264 murders that were never identified as such or an 8.5% increase in the listed number of murders for that year.
* There's actually no evidence that this ever happened. It was, however, depicted in the film "The Silver Chalice"
* There's actually plenty of instances where good-looking people are the villains (or most of the time,
* There's actually regional and state variants of this one... That's just the
* There's actually some logical basis in this - Clare copied large amounts of texts from other sources without citing them in
* There's actually three slasher films about evil baseball players -
* There's actually two Lodges that relate to eating human flesh in some manner.
* There's actually two mysteries in the episode (who is "The Unicorn" and what's the deal with the 6' tall wasp monster). One is Fair Play, one is not.
* There's a curious semi-inversion in the short-lived series of English translations of the
* There's a cut to Applejack sneezing after Rainbow Dash talks about her in
* "There's Adam Clymer, major-league asshole from the New York Times." "Oh yeah, he

is, big time."
* There's a definite hinting towards this style relationship between Hinagiku and Luca since their meeting and Luca telling them about her past, which is similar to Hinagiku's, with Luca's issues about lying being equated to Hina's romance issues. Hinagiku steals Luca's hand-made manga before he's able to read it and provide feedback about it.
* There's a definite inversion in the season five opener "Nameless, Faceless": the UnSub of the Week is discovered and then caught in the first 25 minutes, but the audience really doesn't care, because they're all waiting to find out if Hotch survived what looked like a point-blank shot to the head. During the investigation, Prentiss goes to look for Hotch, and finds his blood-spattered apartment, with him missing. Then Prentiss, Reid, and Garcia work the "regular" case in conjunction with searching for Hotch, and it's only when the case is finished that Reid tells the rest of the team that "something's happened to Hotch". The rest of the episode is devoted to resolving the cliffhanger from the season four finale "To Hell..."/"...And Back".
* There's a deleted scene from the pilot that shows her as an instructor to a classroom full of prospective agents. This was presumably cut in part because baby-faced Gillian Anderson looks years younger than the half dozen students in the shot. She teaches in season 2, as well, though by this point she's grown into the role and the dissonance is not as noticeable.
* There's a deleted scene in which Clair acts out a parodied conversation with her parents, to go along with Bender's "A Night at Big Bri's House" bit, and Brian's response (which was also deleted). What she says informs Bender's later statement about her "Poor, rich, drunk mother in the Caribbean" which otherwise just seems like information he's pulling out of nowhere.
* There's a diagonal tunnel leading to surface near Paveletskaya on line 2. Its lower end connects to nothing more than line tunnels and it has stairs instead of normally required for depths like there escalators. Nobody knows the true purpose of this structure, most likely it was built either as an extra emergency exit or to facilitate evacuation of a then-large industrial area above in case of air raid.
* There's a different take on this when Detective Carter grabs someones' coat to dodge some CIA men who were following her.
* There's a discussion between Moist and Horrible where Moist mentions someone named "Hourglass" (presumably with some kind of time-based powers) knows a kid who's going to grow up to be President, and suggests that Horrible could kill the kid. Or that he could smother an old lady.
* There's a Disney version of the song, which was quite popular on Disney-owned radio stations.
* There's a dissonance between pet breeders and pet owners, especially when it comes to dogs and cats. This has been discussed in various documentaries and articles such as
* There's a distinct progression of human like characteristics in the series. In the
* There's a disturbing example in the flashback when Jules is sent to the psych ward, where a man masturbates aggressively on seeing the female doctor with her (he's placed in isolation, or "the quiet room", for this).
* There's a disturbing scene in the episode "Prince Adam No More" with a tentacle monster implied to be this. Mer-man gets shoved into a cell with it at one point, and can be clearly seen adjusting his, uh, loincloth after emerging a few minutes later.
* There's a documented real life instance of this occurring during the reign of Mongke Khan (grandson of
* There's a DOFF mission you can choose as part of the KDF where a medical member of your crew wants to get better medical equipment. Getting a Critical Success on it lets to
* There's a dog that seems rather fond of Trinity in the fourth season, though.
* There's a double example in Clinton, Michigan (a small town southwest of Ann Arbor, not the

* There's a double subversion earlier in the song. When Arlo is called up, he fakes being a
* There's a double subversion in another episode when House suspects Cuddy is feigning interest in an artist.
* There's a dreadfully funny song by the Spooky Men's Chorale called Sometimes I Forget Things.
* There's a duck named Stuart who works at the power plant. And outranks Homer.
* There's a extra side story after that set twenty years later that implies that Saya killed the parents sometime later and still using their abandoned house as its hideout. She's now posing as a teacher and seems to have taken up eating humans
* There's a fair amount of Chang-yi/Tae-goo fan art as well, mostly Japanese and on Twitter, and not nearly as common. It's rare to find Do-won/Tae-goo fanart anywhere.
* There's a fair amount of jockeying between X-wing pilots and A-wing pilots. A-wings are very pleased with the speed of their crafts and bring it up every chance they get. The accepted response is to ask, "What killed the Death Stars, again?"
* There's a fair amount of people in real life that are so terrified by the possibility of the elevators being of this sort that they take the stairs.
* There's a fair bit of prejudice against the fruits of cross-kinded couplings in
* There's a fair chance that Japanese Ranguage may have been involved in the naming of "Kallen" from
* There's a fairy tale about a fairy woman who marries a human man, and tells him that she will leave him if he beats her. The first time, he hits her when she laughs at a funeral. (She has her reasons, she knows the person is going to heaven, or some such thing) He pleads with her to not leave him, and she forgives him. The second time, she cries at the christening of a child ... and so on. After he did it three times, she's gone forever.
* There's a fake video floating around featuring the puzzle CLAM DIGGER. With only the D not revealed... only that the contestant guesses "N".
* There's a false (but humorous) exchange between a sniper and a reporter regarding this trope. The reporter, understandably trying to get the sniper's insights into the emotional state needed to do the job, asked him, "When you see your target and pull the trigger, what do you
* There's a famous aerial photograph from WWII where the occupants of an allegedly nudist beach, sick of being constantly buzzed by horny flyboys, have spelled out "REPORTING YOU" with their beach towels.
* There's a famous Coca-Cola Christmas commercial aired globally where we're shown the fantastic innards of a Coke vending machine. Apparently, the machine works because inside there is a vast snowy bottling factory run by little people.
* There's a famous legend about a knight who ran into this problem while escorting a lady and solved it by putting his sword down the middle of the bed. Nimble Dick tries to talk Brienne into a similar arrangement while they're traveling, but it's clear that he's just making fun of her and/or hitting on her.
* There's a fancomic with a similar concept, this time concerning the events from season 3 episode "
* There's a fan theory that Commissar Yarrick isn't exactly what you would even call
* There's a Febreeze one in the UK. The after one is a young handsome model guy in a modern primary coloured well lit house, while the before one is a fat old bald man in a brown cardigan in a brown badly lit house with 50s decor!
* There's a fellow by the name of Kimimaro who can control his bones as weapons. In his full Cursed Seal form, he can form a gigantic bone drill over his left arm to attack with.
* There's a few early sidequests and their dialogue changes whether or not Aloy is still an outcast or has proven herself.
* There's a few examples of atmospheric aircraft in Star Wars. The T-47 Snowspeeder seen in
* There's a few other instances as well, like Barbas hiring the mob to kill the Charmed Ones ("Ms. Hellfire") or Prue being framed for murder by a random

psychopath ("Just Harried").
* There's a few pics off Deviantart and a fan comic dedicated to Heloise (
* There's a few rotating network promos just before the last segment on
* There's a few sharks, generally patrolling the border between shallow sea (where players can swim) and deep ocean (where they can drown of fatigue). In classic Azeroth, most sharks are elite (and thus very strong, but killable), but the coasts of Northrend (WotLK expansion) have many non-elite sharks. Their level and variety differ depending on the level of the zone where you are.
* There's a (fictional) microbrew beer called Bear Whiz. Bogus ads for the brand depict a grizzly pissing into a lake.
* There's a fifth level arcane spell simply called "Telekinesis", and a bunch of more specialized versions.
* There's a fifth variation-commercials which are, shot for shot, identical, except for the
* There's a Finnish children's rhyme often used in a game similar to the English game/song "London Bridge is Falling Down" that ends in these words:
* There's a Finnish song known as 'Tuuti Tuuti', which is sung like a lullaby but is literally about a peasant mother singing to her dead child, wishing it safe passage into the afterlife. Translated verses include speaking about 'children in Hades' and that there will be a lot of room and food over in the hereafter.
* There's a five-dot hearthstone that illuminates quite a large area with natural sunlight, even if it's pitch dark. This is of course really, really bad for any hungry ghosts in the area.
* There's a flashback scene in which the titular character recalls D.W. wanting to go to a place called "Santa's Igloo," after seeing a billboard and a commercial advertising "Santa's Igloo: Share a sundae with Santa and his friendly reindeer!" The commercial showed Santa and his reindeer flying over a sunny igloo beach. When the family actually arrives at that location, they find a completely mundane house decorated with a fake igloo facade, with a man partially wearing a low-quality
* There's a flash toon out there where a man rallies all the humans to fight back against alien invaders with "THROOOOW THE CHEEEEEEEEEEEEEEEEEEESE!" Of course, the cheese does jack shit to the alien ships. (
* There's a flying carpet in story "The City of Brass", in which it's just another way for King Solomon to get around.
* There's a folk song about an "old man who lived under a hill" whose obnoxious wife (or possibly mother-in-law) is claimed by the Devil. The old lady makes Hell so miserable that the demons beg Satan to let her go, which he does.
* There's a folktale from Scandinavia (and other areas) called something like "how the husband and wife traded jobs" or "how the husband minded the house" which is all about this.
* There's a forest in Utah that covers 107 acres, with about 47,000 trees.... Correction: there's a
* There's a fraction-of-a-second interval of the human heart's contraction cycle during which a sudden impact to the sternum can disrupt the electrical signals of the natural pacemaker. Ventricular fibrillation sets in, and is usually fatal without immediate medical intervention. Called "commotio cordis", it's most commonly seen in athletic accidents with boys or youths whose sternal tissue hasn't entirely finished hardening from cartilage to bone.
* There's a free picture that comes on some iPod Touches that says "I didn't slap you, I high-fived your face." Technically true, since in a high-
* There's a frequently devised tactic relying on summoning and creation spells. Create a large rock five feet above your target's head and they die easily enough, or summon a horse over them, or whatever.
* There's a frequently-run Fiat ad that features several copies of the car in question driving off cliffs into the ocean. Then they drive back out of the ocean somewhere else, unharmed. Apparently this symbolizes the cars being imported to the U.S. from Italy, but the brand, model, etc. isn't very memorable after seeing a bunch of cars behave like migrating penguins.
* There's a Fuse commercial that does this with "Dance Dance" as well.

* There's a future in which superintelligent dinosaurs rule the world and most of the characters are either dead or part of
* There's a gag where a woman in a hotel sunbathes nude underneath several big lights in her room. The bellhop spies on her through the keyhole, which leaves a keyhole-shaped mark over his eye. When she goes down to the lobby, every man in the hotel has a similar mark.
* There's a game aptly titled 'Bartender' where one player acts as the bartender and the other three sing their sorrows out (which are provided by the audience members.)
* There's a game called "Kill the Overlord" that's basically a cross between Hot Potato and King of the Hill (the game where you're trying to take the place of whoever's in the lead, not the TV show). During a round, an executioner card is passed to someone, and they need to use cards or special abilities granted by their role card to pass the executioner to someone else, or else they're out of the round. The round continues until the person with the Overlord role card is executed, at which point roles are redistributed based on who survived and the order in which executed players were killed, or everyone else is, in which case the Overlord wins the game automatically.
* There's a gang who tried to impersonate Judges to carry out robberies on three separate occasions. The first group was spotted by a robot who warned the real Judges, the second group was killed by an
* There's a gap in the stone wall around Unseen University that allows students to leave after curfew to go drinking. The hole has been there for centuries, and the faculty were all students once and sometimes still make use of it themselves. This occasionally leads to awkward encounters that consist mostly of pretending not to see each other. In
* There's a gap of about three or four years between 14-year-old Usagi and university student Mamoru in the
* There's a gender-reversed element of this in the developing relationship between millionaire playboy mystery writer Richard
* There's a general tendency for a college newspaper comic that gets syndicated to simply redo old college material until the strip finds its feet.
* There's a genetic modification for mice that has this effect. PEPCK-Cmus mice have much greater stamina than normal mice, and even live longer, but they are also much more aggressive.
* There's a German saying that goes "Lehrjahre sind keine Herrenjahre" about the rather unique (well, unique in this day, it used to be common in the medieval era) German system of
* There's a German SF short story out there in which a scientist invents a machine that can turn people intangible for a time and gets blackmailed by a thief who wants to help himself to that power. The thief hasn't thought things through, though, and so when the scientist does grant his wish, he promptly falls through the ground (and presumably his death once the effect wears off again), a fate the scientist only averted during an earlier self-test by keeping his own
* There's a ghost story about a teenage girl babysitting for her neighbours. The evening is going well, but there's a statue of a clown in the parents' bedroom that
* There's a gif of Eggman dressed as Sonic and holding a bag of Halloween candy.
* Theresa Givens Arc: follows the time traveling adventures of Doctor Theresa Givens, consisting of "A Stitch In Time" and "Final Appeal"
* There's a glitch and entering the level's main gravity, Mario will be teleported across the level.
* There's a glorious piece in the script book, where Naylor describes, step by painstaking step, just how complex the dancing Blue Midget scene was to do, then going on the messageboards and learning "the fans hate it, they think it's filler".
* There's a golf mini-game called Spheda which gives surprisingly good rewards on certain floors. After beating the game, you unlock the ability to play through a special Spheda course. The only reward for beating it is to see how low you can get your score!
* There's a good chance that any given Thief/Rogue, Bard, or Swashbuckler you meet

in a game of
* There's a good chance that a random live-action fairytale film for kids will have been
* There's a good reason for this. Bryce did everything he could to keep Chuck from being recruited (
* There's a good rule of thumb for clone troopers: An average clone's chances of survival dramatically increase if they a) have a name and b) have a distinct character design. Exceptions to this rule are with seemingly generic clones occasionally surviving (examples include
* Theresa Gray is called Tessie by her brother, Tess by Will, and Tessa by most everyone else.
* There's a great deal of effort put into making it look like Tonks is under the Imperius curse but turns out it was Rosmerta instead and that Tonks's odd and depressive behavior is simply a result of her relationship problems with Remus.
* There's a great deal of overlap, probably unsurprisingly, between fans of
* There's a Greater Daemon of Tzeentch by the name of M'Kachen, who harbours a grudge against Grey Knight Brother-Captain Arvann Stern. "M'Kachen" is a play on the cantonese phrase
* There's a great one in the season two episode "Scar," where Starbuck (at the celebration of the new "top gun" pilot that unseated her) tries to toast all the deceased pilots by name/callsign. This one is especially moving given that she had earlier claimed that she didn't remember any of their names and didn't care to because they were dead and gone so who cares…
* There's a Greek myth about Meleager, who was prophesied to live only until a log in the fire had burned down. His mother promptly snatched it out and extinguished it, and he kept on living until years later... when he murdered his two uncles in a fight, and his mother threw that log back in the fire. (Nobody does dysfunctional families like Greek mythology.)
* There's a grenade that uses the force wave mechanic classified as a
* There's a grill set (consisting of a book and a special glove) with
* There's a group of fallen paladins who got kicked out of the order and are now common criminals.
* There's a group of ogres that patrol across the Badlands. They walk in a line and the last one is about one-third the size of the others.
* There's a group on Website/DeviantArt dedicated to Merida, Jack, Hiccup, and Rapunzel being friends..
* There's a Guadalajara in Mexico, another in Spain, and another in Colombia (but it's named "Buga" for the locals).
* There's a guy...we'll call him Andy. He graduated with a degree in economics from a prestigious college, where he starred on the basketball team. After a few brief gigs as an NBA assistant he takes an executive job with a startup software company. While there, he dates a Maxim magazine cover model and they bond over a shared love of sports (their first date is a basketball game followed by dinner at Taco Bell) and get married. But he misses coaching and gets a job as an assistant at a large university. After a few years he takes a head coaching job at an obscure university that had only had a basketball team for 10 seasons, and had only been in existence for 14 years. After a losing record in his first year, his
* There's a haunting compilation on YouTube that brings together the stories screening on American morning television on 11th September 2001. The everyday banality is
* There's a Heineken beer ad that involves a live lobster, a naked woman and a bath full of salty water...
* There's a hilarious example with a race that seals every deal with
* There's a hilarious part of that episode where two of the people they hire
* There's a hilarious story connected to this: when the ability to actually pummel characters hand-to-hand was implemented, developers and testers started off by having Homer beat up Marge. They made a rule, though, to not
* "There's a Hole in My Bucket" features a similar situation regarding items needed to fix said bucket. It ends up looping indefinitely:

* There's a house on an island in the middle of nowhere. When the party gets in, they are served food by invisible servants, and have beds prepared. If they agree to such treatment, rather than violently wreck the place on first sight, they wake up groggy and weak, for they only consumed illusions of food - to fight a horde of hungry spirit creatures.
* There's a humorous — and vulgar — version of Jingle Bells where Santa's elves quit, citing that "they do all the
* There's a hundred thousand one-note Dungeon bosses that have badass names to let you know how serious they are. Bloodmage Thalnos? Admiral Ripsnarl? Mutanus the Devourer? None of these bosses are higher than level 30.
* There's a Hungarian children's song from the time of the Turkish invasion,
* There's a hypochondriac who likes to impersonate doctors. He's gone by Dr. Hotti and Dr. Hickfield, but we don't know his real name.
* There's a hypothesis that suggests that intelligent life gets to a point where it eventually destroys itself, and that is why we never met any aliens yet - the races that are (or were) capable of advanced science are either extinct, or in a situation similar to us, looking into the sky and pondering if they are alone or not. Every time any intelligent extraterrestrial life got to a certain point, it ended up destroying itself before it left it's planet. Some who subscribe to this idea hope that
* There's a Hyundai ad where a couple is going car shopping, and they go on an elevator that drops its passengers off in various unpleasant but necessary situations. The operator drops the couple off at a sleazy used car lot, only to learn that they're planning on buying a Hyundai, which will be a much better experience. Other "floors" include having a root canal, jury duty, the middle seat on an airplane, having a colonoscopy, and yes, The Talk.
* There's a James Alan Gardner novel with an interesting justification for using this trope;
* There's a Japanese belief that twins are star-crossed lovers reincarnated.
* There's a joke about a 70-year-old man who wakes up every morning at 6:00 and feels the need to pee, but can't, an 80-year-old man who wakes up every morning at 7:00 and feels the need to poop, but can't, and a 90-year-old man who pees every morning at 6:00 and poops every morning at 7:00,
* There's a joke about a British comedian on tour who always opens his act by shouting out the name of the town he's visiting, eg "Hello, Cardiff!". This usually goes down well, until he happens to play a Ladies' Night in Cowes, Isle of Wight.
* There's a joke about a little boy's mother warning him about this trope to keep him from having sex. When he grows up and explains the reason for his fear of sex to his girlfriend, she decides to show him that vagina dentata is just a myth and lets him look up her skirt.
* There's a joke about a man covering up his gambling problem by smearing lipstick over his face so that his wife thinks he "just" cheats on her.
* There's a joke about a man driving along a winding road in the country. A woman drives past him from the opposite direction, sticks her head out the window, and yells, "PIG!" The offended man yells back, "BITCH!" Then he drives around the next corner and crashes into a large pig that was standing in the middle of the road.
* There's a joke about a man who died and went to Hell. For his punishment, he was shown two rooms, one showing the man whipped and beaten mercilessly and another one showing the man strapped to a bed while a beautiful woman had unending rough sex with him, and was told to pick which punishment he wanted. He decided to choose the latter option. The punchline involves the woman walking up to the man and saying, "Hey, thanks for taking my place."
* There's a joke about a man who gets in an accident with a Catholic priest. The priest makes the Sign of the Cross upon emerging unharmed, and the other man makes a similar motion. The priest says, "I am glad to see you are also a man of faith." The second man says, "Spectacles, testicles, wallet and watch."
* There's a joke about a robber breaking into a house when someone says: "Stop it! I'm warning you: Jesus is watching you!". Turns out it's the family
* There's a joke about employees of a clothing store assuming that a person who is

buying a shirt for one man and a pair of pants for another is actually buying a complete outfit for one guy who fits this trope.
* There's a joke about military officers discussing how much sex with their wives was work and how much was pleasure. The Colonel says it was 75% work, 25% pleasure. The Major said it was 50-50. The Sergeant said it was 25% work, 75% pleasure. The Private says it was 100% pleasure because if there was any work involved, he would have been ordered to do it.
* There's a joke about the New York cabdriver who went speeding through every red light. "My five brothers and I have always driven like this." Come to a green light?
* There's a joke about three explorers who were captured by a native tribe. The natives say that the explorers may survive if they collect and bring back ten pieces of a fruit of their choosing. The first explorer returns with ten berries and is told he'll go free if he gets all ten inside his anus. He succeeds and is released. The second explorer returns with ten apples and is told the same. He suddenly bursts out laughing; when the natives ask what's so funny, he tells them
* There's a joke about two frogs who are about to enter a kitchen but say "After you, Alphonse; No, after you, Gaston." (It's a reference to the French love of frogs' legs.)
* There's a joke floating around the Internet about a kid seeing a 3.5" floppy for the first time and asking "Who 3d-printed the save icon?"
* There's a joke in the German-speaking parts of the Internet written in the style of a newsletter for the employees, about the coming Christmas party. It contains several rules, among them: Don't put your chair right next to the buffet. And we don't allow the excuse, "But then Herr Meier will eat all the honeydew melon and leave nothing to me!" either.
* There's a joke in the the Philippines that goes: Westerners say Filipino drivers don't know how to drive on the road. Filipinos say those Western drivers don't know how to
* There's a joke in which a young boy announces to his father that when he grows up, he wants to marry Grandma. The father, aghast, replies, "You can't marry my mother!", to which the boy asks, "Then why did
* There's a joke of a movie that was so bad that the audience walked out... when it was shown on an airplane.
* There's a joke out there where in a juried trial, a list of increasingly strange items is listed in the evidence. At the end, the jury finds that "They each would have paid a hundred dollars to have seen that fight".
* There's a joke/riddle that goes "-What is green, eats rocks and lives 3 meters underground? -Why, The Green Little Stone-eater of course!". After telling it, you follow up with another one: "-How far can you drop a rock into a hole? -3 meters, because after that, The Green Little Stone-eater eats it".
* There's a joke that exists in various forms about a man with "Shorty" tattooed on his penis. Eventually, a woman goes to bed with him and emerges pleased and exhausted. Her friends ask what was so great about sex with "Shorty," and she reports that the tattoo actually says "Shorty's Pizza Parlor." (
* There's a joke that goes "Rule 1: I am always right. Rule 2: If I am ever wrong, see rule 1."
* There's a joke that's gone around about a boy and a clown walking through the woods at night. The boy says to the clown, "Man, this forest sure is scary..." to which the clown replies, "You're telling me. I have to go back through it by myself."
* There's a joke that takes the trope name literally, where a robber breaks into someone's house and there's a parrot that keeps repeating "Jesus is watching you!" The robber decides to ignore the parrot and continue with his job, until it transpires that "Jesus" is the name of the family's Rottweiler (or similar aggressive breed of dog).
* There's a joke to the effect that this would be the title of an African-American adaptation of
* There's a joke where a drunk finds a genie, wishes for a bottle of beer that

never empties, then wishes for two more.
* There's a joke where some retired businessmen start talking about how their business was going belly up when a disaster destroyed it, allowing them to collect on insurance and retire. The first few name the disaster as something potentially man-made (fire, burst water main, etc). The last one names a natural disaster (earthquake, tornado, etc). Then the businessmen who went first ask the last guy how he arranged that.
* There's a joke with a few variants that usually goes something like
* There's a Khornate mace that drives its wielder to ever-higher states of bloodlust until the wielder finally collapses from exhaustion. And then it turns on its bearer, because Khorne cares not from where the blood flows...
* There's a kid's joke going roughly "Two tomatoes cross a road, when one gets run over. The other says, 'Come on, ketchup!'". The joke works extremely well in any language because very few kids understand it's supposed to be a pun on "catch up" - they just like it because the tomato gets crushed. It's funny because... someone gets killed and the other is unfazed about it?
* There's a kids' song called "Throw It out the Window", which fractures nursery rhymes by having every single one of them ending with
* There's a kind of PRE-apocalyptic dog in William Blake's poem "Auguries of Innocence": one of the portents of the end of the world is a starving dog: "A dog starv'd at his Master's Gate / Predicts the ruin of the State."
* There's a Klingon cafe open on the Promenade, which the characters visit a few times. You get bonus cool points with the proprietor for getting aggressive about the quality of your meal: "There's nothing worse than half-dead
* There's a Kraft Macaroni & Cheese commercial where Cheeseasaurus Rex is wandering up and down a long hallway of all white doors trying to find the Macaroni and Cheese. He finds various silly and amusing things before he finally finds what he's looking for.
* There's a lady...walking a frayed tightrope...over an alligator's jaws.
* There's a large group of fans who believe that at least some of the Freelancers served in the Human-Covenant War, with some specifically stating that Wash fought at the Battle of Reach. While Project Freelancer's origins
* There's a large presence of bounty hunters (for relatively small bounties; large bounties are almost always for
* There's a later episode with scenes set in Victorian London which is filmed in Toronto's historic
* There's a later scene where Dil uses Gabe Ruth to further his argument, and he even takes the argument to a TV talk show.
* There's a later subversion with the Oracle. Belkar's asked if he would get to cause the death of one of the following: Roy, Miko, Miko's horse, Vaarsuvius or the Oracle himself. The Oracle simply responds
* There's a laundry detergent advertised in Canada that brags about its "acti-lift technology".
* There's a legend about Saint Albertus Magnus who supposedly had built a working android, which could walk, would do household chores, and according to some could even speak. Albertus' greatest student Thomas Aquinas destroyed it (thinking it was the result of demonic possession), after which Albertus was said to have spoken: "The work of fifteen/twenty/thirty years is ruined." In Latin, of course.
* There's a legend among London architecture enthusiasts that George Gilbert Scott's St Pancras station was simply a
* There's a legend, later made into a Fleischer cartoon, about a miser who managed to catch a
* There's a lesser version in the Finnish armed forces. Reserve officers are conscripts as well, but they are selected only after the boot camp, and after the Reserve Officer Academy they are assigned as
* There's a less extreme version of this at many schools. They have a person dressed as the grim reaper to come get you. For the rest of the day, you aren't allowed to talk at all or be called on in class. Then, at the end of the day, there is an assembly with all the kids selected laying down pretending to be dead while

someone talks about the dangers of drunk driving.
* There's a less horrifying variant where normal-sized chess pieces are animated and able to talk... and very outspoken on what they deem to be boneheaded moves, suggesting moving other pieces instead.
* There's a Levi's commercial which subverts the trope: the guy is in his underwear and dodging belongings hurled from above. He hurriedly yanks some flowers from a nearby flowerbed. He knocks on the door with the flowers. The girl, touched by the gesture, forgives. While she's going to find a vase for the flowers, he retrieves from a tree his beloved Levis and dons them. Seconds later, he's cheerfully walking away with his jeans on, and the vase and flowers go crashing to the sidewalk.
* There's a line in the first episode where Mariko tells Eikichi and Ryuji that
* There's a line where the Spartans call the Athenians a bunch of boy lovers, which is Frank Miller's homophobia popping up. In real life, Spartans had similar relations between men and young boys. A common theme of the movie is that the Spartans are heroes that defend democracy and freedom, while Athenians are wimpy poindexters. The Spartans were given a lot of positive qualities in the movie that they never had in real life. It's actually the Athenians who had a democracy, albeit it differed from the modern forms, and their society permitted far more personal liberty to people (inasmuch as either did, both being slave societies).
* There's a little Wolverine action figure who's naked except for his Weapon X mental reprogramming gear. He's
* There's a live-action parody of sort of deal rather than being about the actual holiday.
* There's all the adaptations that pronounce it "Professor Ex-avier," just to make it clear to stupid viewers that there's an X in his name. "Xavier" is an archaic Spanish spelling of "Javier," so it should be "khavi-air" (or "zavvy-ay", in French), people. ("Ex-avier" is a common (mis)pronunciation of "Xavier" in
* There's almost too many architecture movements to list. Art deco, for example, is defined by its homage to ancient styles yet fully embraces the use of modern technology to achieve this, resulting in the Empire State Building resembling a ziggurat, and the Chrysler Building having gargoyles.
* There's a London-By-Night tour bus with a LED Tron Line encircling the top deck.
* There's a lot of European football/soccer teams which often try and invoke this trope to get reputable players, the idea being those good players will give the club instant success. This also explains why such non-traditional soccer markets such as Russia, Ukraine, and all of the rich countries of the Arabian Peninsula (even tiny Bahrain and Qatar!) can attract big names—who cares about isolation or scorching hot weather when
* There's a lot of Ham with all the Decepticons (and Predacons and Vehicons); Megatron just happens to be around the most.
* There's a lot of hate for the passageway between the Zanzibar Building and the Tower Building in
* There's a LOT of love (or at least infatuation) subtext on both sides in the Hannibal Lecter films
* There's a lot of one-sided fanart versions of Elsa and the Ice King from
* There's a lot of perfectly normal, everyday horror that could plausibly happen to the reader in about five minutes or in a year, or whatever if they aren't careful in several creepypastas.
* There's a lot of room for debate on Cao Cao's motives and personal behaviour, but history makes it clear that he was this. When the Han Dynasty was usurped by Dong Zhuo, Cao Cao was just a minor noble from a family with a mixed reputation. But a combination of his dogged determination to fight Dong Zhuo, utter intolerance of corruption, and generous nature to those who joined him (regardless of their past) saw him become the dominant force in Northern China. Extraordinary men like Xun Yu, Xun You, Dian Wei, and Xiahou Dun, joined him in his early days and former enemies such as Zhang He, Zhang Liao, Jia Xu, and Zhang Xiu all gratefully accepted Cao Cao's offer to join him and worked faithfully for him until his death.
* There's a lot of Russian folk themes and French martial music snippets before

you get to the bit people can hum - with all the artillery and stuff - in the 1812 Overture. (The overture itself is some sixteen minutes long; that famously hummable bit is barely more than two.
* There's a lot of stuff that can incapacitate a human. Tickling is a lot of peoples' weaknesses and a lot of people have a sound that 'goes through them' like the sound of plastic folders being rubbed or nails on a blackboard.
* There's a lot of these in GTA IV. One mission from Francis has you tasked with entering a multi-story apartment building in the projects, cutting your way through dozens of guards on several floors, and finally either killing or sparing a gang leader after chasing and then cornering him on the roof. If you don't want to mess around with all that (and don't care about the choice to kill or spare) you can climb a crane a block away, zoom in with a military sniper rifle, and headshot the dude on the roof first thing.
* There's also "56 People Hurt In Brawl." It was meant to be "5-6" since he wasn't sure how many, but the dash was omitted.
* There's also a ballistic rifle specifically developed by Starfleet for situations when phasers aren't an option. It's equipped with a micro-transporter which can put slugs in
* There's also a bit earlier in the story when the BFG blows a nightmare into the mind of one of the other giants. He starts screaming in his sleep about
* There's also a bit from the lead up: in 1820, as part of the Missouri compromise, Maine was added to the union as a free state to balance Missouri (a slave state). Before that is was part of Massachusetts.
* There's also a bit of this when the team receives an upgrade. Brennan learns he can create a continuous blast akin to an ion engine with his hands, enabling brief flight. Shalimar becomes even stronger and can hear someone sneaking up on her while working out with loud music in her earbuds. Emma's
* There's also a brief mention in on of the early books that there are a handful of planets in the galaxy where cybernetic transhumanism is a common practice but they're fairly isolated incidents.
* There's also a brief montage during Kasumi's Loyalty mission where she
* There's also a bulding in London's Docklands which, although the conventional upright slab, has Tron Lines running up it — they even change colour.
* There's also a bunch of girls Miroku asks out, including one who was 11 years old who he promised to meet again when she was older. Interestingly, after 4 years they meet again and she tries to
* There's also a bus company called "DAU" in Germany. Not all that funny, unless you know that "DAU" is a common slang term, a play on the nuclear facility term "GAU" (Größter Anzunehmender Unfall) meaning the "Biggest Imaginable Accident/Disaster". (Chernobyl was considered a Super-GAU). "DAU" means "Dümmster Anzunehmender User" (literally "Stupidest Imaginable User"). It's used by computer- and electronic-savvy people, as well as by tech support workers, to refer to those really hopeless cases you have heard of who want help and make you want to headdesk - you know, the kind that
* There's also a card aptly named "Greed" which details the downfall of such a thing as at the end phase of every turn the player takes damage for every card the drew (which is the constant greed in context of the game)
* There's also a case of literal Demonization—when the champions of the gods and humanity overthrew the alien Primordials, they branded the imprisoned titans as Yozis and named all their spiritual progeny demons.
* There's also a case of logos being merged when Houses Steiner and Davion banded together as the Federated Commonwealth, mixing Steiner's fist against the Davion sun backdrop.
* There's also a chatroom that's designed exactly like Durarara's chat. Unsurprisingly, a majority of the users use it to RP sex, yaoi, yuri to a far lesser extent, and to rp anime, and to rp anime-like scenarios including DRRR itself.
* There's also a city in Mongolia called Mörön, though it is also
* There's also a comic where Dogbert goes into a jewelry store and points out how

utterly arbitrary the diamond market is, and convinces the seller to give him a sack of diamonds just to keep the secret from getting out.
* There's also a common bit where one player puts his opponent in check and
* There's also a constant rivalry with the N.I.D about who gets what piece of alien technology.
* There's also a conversation between a crewman and the chef after Shephard provides provisions:
* There's also a conversation between the two early in the game where they realize they'd met before at an orgy, and she recognizes him as being the guy who did "that thing with the electricity."
* There's also a council of Wesen (as the non-human creatures such as Monroe are generally known) that acts as a governing body to enforce the
* There's also a couple of incompetent ghost hunters who make a film including Sam and Dean, and on one occasion Sam and Dean rescue a Hollywood director from a ghost and he gets inspiration for his movie from that.
* There's also a Crusader salute, which consists of a clenched left fist held directly in front of your heart.
* There's also a cursed pair of boots that teleports you to a random
* There's also a Cyberspace connecting all connected technology, although, airgapped technology may not be accessible.
* There's also a deadlier version in the air units commander. Although never made clear why, he seems to have a personal grudge against all his men and refuses to allow any pilots, or bomber crew, to return home. He specifically mentions that the U.S. Army Air Corps requires a pilot to be given some time off after 25 missions but uses an oddly worded rule, which is meant to be used in extreme circumstances, to extend the limit to first 50, 60 then 70 missions. For those unaware, a bomber crew member was likely to get injured or killed within 30 missions. He was essentially trying to kill everyone who joined his command.
* There's also Admiral Kizaru, whose Devil Fruit power allows him to move at the speed of light.
* There's also a Dog Death and a Super Death who appear in one-shot gags. Super Death is slightly taller than Death and claims Reapers who die, at which point they get reincarnated as humans.
* There's also a downplayed version. In Snowdin, you'll find a wolf who is throwing large blocks of ice into some water, which you'll see floating past on your way to Waterfall, and again on your way to Hotland. If you call Undyne while you're in the area where the wolf is throwing ice, she'll say that Alphys told her it was to cool down parts of the Core in order to create the energy that powers the Underground, and you will indeed see those blocks again in the Core.
* There's also a dramatic version in the 2003 anime. While Barry the Chopper is delivering a
* There's also a few drifting corpses in some of the early scenes, some of whom aren't even wearing spacesuits.
* There's also a few episodes where McCoy doesn't have enough admissible evidence to convict the accused of what actually happened, so he instead re-presents the evidence based on a version of events that he suspects or even
* There's also a few Kimmunicator calls that have come in during action sequences. In the
* There's also a few levels of this trope working, as the song's about an
* There's also a Flash villain named The Top who gets his super speed by spinning. Also he can brainwash people, by spinning.
* There's also a fourth example as part of a puzzle. Holding a specific item in his inventory in the forest will cause the pathway back to loop forever, so Henry must find a way to get it from point A to point B without carrying it.
* There's also a funny advert running for AirMax, where a beautiful woman, with big breasts and booty, gets her clothes blown off by opening packages. She is left standing in front of the two men butt naked, and the last frame shown is her naked butt.
* There's also a funny moment when director Mark Steven Johnson openly admits that

* There's also a gender-inverted example earlier in the game with Amy, following Silver's attempt at killing Sonic:
* There's also a ghost in the expansion to the second game who complains of this. He won't say anything else until you light a fire in the hearth for him.
* There's also a God Power, Ancestors. It summons a bunch of zombies to fight your enemies, but only for about a minute.
* There's also a great amount of bitterness among Indians regarding films set around Britain during
* There's also a great episode were Hal becomes increasingly reckless and carefree when Lois isn't around to temper his more compulsive attributes.
* There's also a hilarious conspiracy theory video in the season 4 DVD extras.
* There's also Ahria, a human girl who hates all the gods save for Asura due to the death and suffering they bring to humanity.
* There's also a huge amount of "Jenny Shepard is not dead" out there, and the prevailing theory is that she faked her gunfight death to continue her rogue activities unhindered before her disease kills her. Lending credence to this is the fact that the storyline about her dead father (who she thought was alive and in hiding, and
* There's also a humorous example at the beginning set in a train station (and inspired by
* There's also a hybrid of an artifact and a computer virus, which changes people's DNA into a silicon-based configuration, changing their body parts into diatomacious earth. Needless to say, this is incompatible with life.
* There's also a joke about how it's good for space agencies to hire female astronauts because, unlike male astronauts, female astronauts won't be embarrassed to ask for directions if they get lost in space.
* There's also a joke in the Mobile Infantry where a Trooper visits Napoleon's grave and asks the guard who that is. The guard tells the trooper that Napoleon is the greatest soldier who ever lived, prompting the trooper to ask him where his
* There's also a Judges' Woolsack, another (much longer) wool-filled cushion right in front of and below it, where the Law Lords—Britain's highest judicial authority until they were moved to the new
* There's also a kind of layered example in how each wall has a quartet of towns situated just outside of it (surrounded by an extended semicircle), serving partially as a waystation in the major gates of the walls, but mostly as a cost reducing factor by baiting the Titans into easily monitored concentrations just outside the towns (the walls there being thinner than the rest). Although there are government incentives to settle such towns, it's offset by needing to live with the constant visual reminder of their enclosure. At least before the first one falls.
* There's also "A Laptop Like You," which is a country ballad-style love song sung to...a MacBook Pro.
* There's also a later episode with Maude Flanders looking over her son Todd up from Heaven.
* There's also a later plot point about the need to get Alucard on to an enemy emplacement on a stolen ship, as hampered by the fact that most means of approach would result in him being shot down and dumped in the ocean, rendering him powerless.
* There's also a lesser version with Itto, one of the children on board
* There's also a less lighthearted treatment of it in the film. Marion was the daughter of one of Indy's mentors, and had such a crush on him, which apparently led to the two becoming involved. The fallout from that resulted in the destruction of Indy's relationship with Marion's father and quite a fair bit of bitterness on Marion's part, hence why when Marion sees Indy one of the first things she does is hit him and scream "I was a child! I was in love! It was wrong and you knew it!"
* There's also a literal broken record that skips during the "ring-a-ling" part of "Silver Bells".
* There's also a literal sword, far rarer than the rod, but not as handy as a bottomless supply of free
* There's also all kinds of trouble early in the comic when the mercs win a

lawsuit against a company of cloned attorneys, and are permitted to collect their settlement by
* There's also all those people singing National American University's song.
* There's also a long-running animated series based directly on the first three or four
* There's also a long-running floating poker game between the Avengers, X-Men and other Marvel heroes, which was turned into a massive tournament for the Thing's Bar Mitzvah.
* There's also a lot of bad blood between House Lannister and House Martell, as during the Sack of King's Landing, Tywin Lannister sent his bannermen to kill Rhaegar Targaryen's children in order to make it easier for Robert Baratheon to take the throne. Said bannermen, Gregor Clegane and Amory Lorch, not only brutally slaughtered the children, but Clegane also raped and murdered their mother Elia Martell—the sister of the current Prince of Dorne. Prince Doran and Oberyn naturally didn't take this too well
* There's also Alpha Kretin, who is by no means a white blood cell, but attacks in the same way, swarming Princess Peach and then taking some kind of monster form after it's spun away by Mario and Luigi. Sadly, it also appears in the Gauntlet.
* There's also also the interpretation that the rich male is actually a deluded rapist who believes that they are in love. The rape angle seems to make sense, but the leaving her for being pregnant fits in well with the theory that "We Both Go Down Together" and "Lesley Anne Levine" are interlinked. Possibly it's a bit of both.
* There's also a major and obvious-in-hindsight clue given in the penultimate chapter where the police sum up the evidence: namely, that
* There's also a "Make-Out Creek" referenced in one episode (season 11's episode "Faith Off").
* There's also Amaneen, an alt-Islam, though it seems to only be practiced in Akhia (alt-Arabia).
* There's also a Megamorphs based on the idea that they never walked through the construction site and got their powers (a deal that Jake agreed to in a moment of weakness). Suffice to say it doesn't end well.
* There's also a meta example, as Weaver references two real life people called William Murdorch, one of whom was the inventor of the pneumatic tube and the other was a rather obscure poet. A pneumatic tube figures heavily into the plot, and
* There's also a "meta-example": in one of the bad endings the player can get, Chance poisons the protagonist to death. So if the player got this ending before getting the good ending, then the player might naturally assume that this means Chance is the killer. She's not; the killer is someone else. Chance did poison the player in a bad ending because he was getting too close to the truth, but the truth in Chance's case is not that Chance is the killer, but that Chance was hatching
* There's also a meta example in the White Veil Society, whose writeup is composed of
* There's also a minor example in an early episode in which one of Joey's old girlfriends is dating someone Monica's interested in, so they conspire to break the two up, mostly through the judicious use of backhanded compliments. It actually works perfectly (though the
* There's also a minor example in the Mesquite Mountain Crater, an isolated and heavily irradiated crater in the far west of the map, guarded by several
* There's also a minor sidequest where you find a lost trinket with no monetary worth but significant sentimental value during Miranda's loyalty mission, and can return it to its owner, who gives you a fistful of money on the grounds that getting it back via the bureaucracy would have cost far more.
* There's also a mission where you have to collect enough minerals to hire a merc before the enemy does.
* There's also a more convoluted example where the book starts off being clear that Lambert Simnel and Perkin Warbuck (two men who claimed to be
* There's also a more subtle version going on in regard to Negi's constant use of various

* There's also a more traditional sequence in Pepperland where the Fab Four are chased by Meanies in an area bordered by two lines of bushes.
* 'There's also a multiplayer mode called Flame Tag, in which the person who's "it" is on fire.
* There's also an age limit on gen:LOCK pilots. Even if a pilot is compatible, the technology's dependency on high neuroplasticity - which decreases as one ages - means that a pilot can age out of the program.
* There's also an alarming number of people who spell Queen Serenity's name as Queen Selenity - she does at one point say that she is an incarnation of the Greek goddess Selene, but "Serenity" is actually a word, as well as a reference to a lunar landmark, the Sea of Serenity.
* There's also an alien species called the Simulacra, which in their natural form look like mostly featureless humanoids. They can mimic the appearance of other humanoids by eating their brains, which also grants them the victim's memories. The knowledge and ability to maintain the form vanishes once the brain is digested, forcing them to find new victims every so often. They're also the only one race that plays this trait fully straight, as neither Kroot nor Tyranids can directly metamorphose into their victims.
* There's also an annoying tendency to have a phrase like "Of course, Your Mileage May Vary" added to the end of examples on pages devoted to YMMV examples.
* There's also an arc where he refuses to read Lisa's diary, which makes you wonder how he compiled enough material to complete a book about her.
* There's also Anarista, a side character who's slightly more muscular than Risty. Her default outfit is a fishnet leotard and a loincloth. All of her outfits are equally revealing.
* There's also an article in Tales #6 that features the spell "Transfer Pregnancy", which does
* There's also an earlier mission where you have to track down and kill the members of a cult of vampires that deliberately infects their meals with a horrible virus. You have to fight your way through a horde of zombies before you can take the last one on. The real threat in that quest isn't the cult or the zombies though. It's the CDC, who have the situation firmly in hand and are dangerously close to figuring out that zombies and vampires are the reason for the strange epidemic.
* There's also an efreeti in a bottle. If the players try to bargain with the efreeti to let him out, he'll grant three wishes but will be a jackass about it. If the players mishandle his bottle in any way he won't even give them that; he simply attacks them outright. If the players open the bottle without attempting to bargain with the efreeti, however, he'll grant their three wishes without any malice.
* There's also an enforced masquerade, due to some beings, like that in The Dunwich Horror, being completely invisible under normal circumstances. But not intangible.
* There's also an Enhancement (a sort of power upgrade) which can be slotted to Sprint, an ability earned at level 1 - and which gives the character a sort of partial invisibility as long as Sprint is active. It stacks with
* There's also an entire episode based around kids giving the finger in their school picture, Becky among them.
* There's also an entire quest ("Bye Bye Love") set in the casino of
* There's also an episode in the first series in which Usagi and Mamoru are babysitting, and the rest of the Senshi are jokingly asking when they had a baby. Ami's reaction is a smirk and, "What did you and Mamoru do?"
* There's also an episode in which feuding classmates photoshop Reese, Malcolm and Dewie's heads onto men in a gay porn movie. In the process of freaking out, Malcolm mentions that it wouldn't be offensive if they
* There's also an episode of Cynthia's early appearance, where she kept saying things that hinted at her having done horrible things or of horrible things having been done to her. She always adds "Just kidding!" after gaining a horrified look from the others. Malcolm eventually
* There's also an episode that opens with Wesley and Gunn staring each other down

and talking about "facing the odds." Turns out they're playing a board game. Then there's the time Wesley is facing down someone brandishing a sword at him. It turns out to be Cordelia, and they're cataloging the
* There's also an episode where a regular Joe is granted Superman's powers. When he tracks the guy down, he finds him sitting on a building using his X-ray vision to look through the building across the way... and into a women's locker room. Superman is not amused.
* There's also an episode where a teenager has been murdered. As they investigate her life, they discover that she had sex with men for clothes (and later for money.) They then discover her profile on a website people go on to find casual sex partners (not for pay) and one of the detectives states that it's a "small step" between having casual sex with people you met through the internet and becoming a $500 a night underaged call girl.
* There's also an episode where Gin and a prison inmate (from a previous arc) attempt to create a shounen manga but basically end up with a mix of
* There's also an episode where Homer gets the key to the executive bathroom at the nuclear plant; it's enormous and has a fountain and live musicians playing.
* There's also an episode where Private's in charge of a projector, and accidentally puts on slides of them at the beach. After the first one Skipper goes over to him and you can hear him hit Private every time another beach picture comes up. It then shows a picture of Skipper hitting Private at the beach. After that they get to the right slides.
* There's also an episode where Superman is seemingly killed (in fact, thrown into the far future), and without him the Justice League fails to stop another plot by Vandal Savage. This doesn't turn out the way Savage planned and instead wipes out nearly all life and hideously mutates the rest - except for Savage himself, who is immortal. After living alone for centuries in the literal hell on Earth he created, Savage comes to regret his villainy, and teams up with Superman to
* There's also an episode which shows that if Aku gets sick and so much as
* There's also an estimated 20 million pounds of gold in the world's oceans, upward of half a trillion dollars at current value (not counting any gold inflation that would occur if 10,000 tons of the stuff suddenly entered the market). This doesn't refer to gold coins and bars from sunken treasure ships or to any veins of gold that might be beneath the seabed. This is gold that's
* There's also an event where players disguise themselves as Separatists to sabotage a Flame Legion camp, and vice-versa. Since both factions want to overthrow the current Charr leadership for their own reasons (the Separatists
* There's also a newsboy during "Fireworks", who would be holding newspapers headlining the signing of the Declaration of Independence.
* There's also an example that specifically applies to Kayaba Akihiko’s motivations were to make his fantasy world real and death is the most real thing there is. In episode 11 we learn
* There's also an example where Ed shows some savvy. After Father reveals several of his plans, Ed comments something "since you've told us your plans, I assume you intended to kill us".
* There's also an extension of this question: same situation, but rather than pulling a lever, you have to push the drunk guy onto the track to stop the train from hitting the crowd. Despite the utility value being the same, responses tend to be opposite: those that would pull the lever almost never push the guy (probably because you can just claim
* There's also an extra that you can buy for droids that makes them self-destruct when you press the X button. It's the same power as a thermal detonator.
* There's also a nice variation with Arthur. Merlin protects and advises Arthur because Arthur will one day be a great king, and as a result, Arthur becomes a better king.
* There's also a niche of "Jobber to the Stars"; a wrestler who wins matches against other Jobbers, but loses matches to the wrestlers who are getting a Push. This works under the theory that
* There's also an incident at the end of Ending Day by Day where Sōsuke

tackles his regular teacher upon spotting a
* There's also an Infinity +1 Persona in the form of Izanagi-no-Okami, with absurdly high stats (his
* There's also an inherent risk of suffocation in covering someone's nose and mouth with a wet cloth.
* There's also an instance early on in the episode with Homer's heart attack, when he begins a quiet prayer to God and is shushed immediately by the nurse, who points to a sign reading "NO PRAYING".
* There's also an interesting variation in the fandom's eyes, mainly how
* There's also an in-universe example in one of the minigames that you can get from cyberspace, "Wing 0", which is basically a 3D space shooter.
* There's also an in-universe Ruritania, Robonia, made up by Bender as a part of a con to win the Olympics. Its national anthem? "Hail, Hail, Robonia!
* There's also an inversion from Alphys, the creator of his EX body, when she mentions in her diary that she kept "[getting] really sweaty"
* There's also an item called the Dizzy Dial, which causes the Screen to Spin around when used and is supposed to cause the Dizzy ailment when it works.
* There's also an odd variant for the second-generation playable characters: palette swapping their hair colors depending who their parents are.
* There's also an "official" manifestation of this trope as a bonus story in the series' fourth book collection.
* There's also a note that when they converse among themselves they really
* There's also another aspect to this. From the 50s to the 70s all instruments used nitrocellulose lacquer, but as it was rather hazardous, polyurethane is the standard finish today. Nitro is very "fragile" and easily comes off and ages very nicely (fading, yellowing and so on). This is why real vintage guitars have a special sort of relic to them. Polyester on the other hand is very hard and thick, has no real aging and hardly ever comes off, which makes getting a played in feeling with many modern guitars is close to impossible. It's thick and goopy and dampens the sound, but protects the instrument and offers a wider selection of colors. Polyurethane is somewhere between nitro and polyester — only a little bit thicker than nitro so it doesn't kill your harmonics, but with durability and color choices comparable to polyester. It still doesn't age quite the same, and opinions vary as to whether that's good or bad. Still, it's generally considered an acceptable compromise.
* There's also another door that says you'll be sorry if you open it.
* There's also another elevator early on containing two scientists which drops from a lethal height. The event is timed so that it triggers a few moments after you reach it, so if you hit the button and don't know that's not what triggers it, you feel like a
* There's also another episode where his friend gives him a CD-ROM full of Hentai, to inspire character designs for an Eroge game they're developing. He doesn't make any progress at all.
* There's also another episode where she surprisingly agrees to stop studying for the day so they can all go down to a film shoot and ogle a famous movie star. She needs very little persuasion.
* There's also another hero called Silencer, whose main gimmick is silencing other heroes. He can also permanently steal their Intelligence when they die, reducing their mana while bolstering his own damage.
* There's also another variant with the same punchline, but the setup is that you'll transform into what you say, with the first and second jumpers morphing into birds, while the hapless third one...
* There's also a novella, "Ms. Midshipwoman Harrington," which features the titular character's own larval stage as an officer.
* There's also anthropomorphic characters that the fandom began to latch on to: Undyne the
* There's also anti-space guns. They get referenced a few times in 1 and 2, and we finally see an example of an anti-space battery in 3; it's a small building housing three massive 100 meter long railguns that can accurately hit ships thousands of

kilometers away, and take out even the most advanced ships in the galaxy in only a few shots. Granted, they have slower firing rates than ships and no defenses, but they're still good cheap glass cannon defenses. Any attacking force will lose a lot of cruisers if they try to slug it out with the guns, forcing them to either take the losses or send in large amounts of commandos. That said, dreadnoughts, with their extremely long ranges of tens of thousands of kilometers, can pretty much ignore the guns, though actually bombarding a planet with a dreadnought is equivalent to nuking your enemies in our universe. Probably because a single slug from a dreadnought impacts with three times the force of the Hiroshima bomb and a dreadnought can fire one out every two seconds with near
* There's also a number of appearances of a Bajoran sport called springball, which is essentially full-contact handball where you're allowed to body-check your opponent to screw up their shots.
* There's also an unlockable skin and helmet that are clearly evocative of
* There's also an urban legend about earwigs crawling into your ears (hence the name), although they don't actually do that.
* There's also any number of gods (the Syndics of Whitewall come to mind, as do the trio of gods ruling Great Forks) and the Solar Exalted themselves as the Princes of the Earth. Hell, even the Infernals count, being the Green Sun Princes.
* There's also a pair of immortal friends of Duncan's who've been married for centuries.
* There's also a parody of Bogle's "No Man's Land" by Crawford Howard, where the singer protests he doesn't know it, and the pub drunk responds that in that case
* There's also a parody of "It's a Small World" in the Duloc welcome box that combines this with
* There's also a parody one in the episode where Bart and his friends went to war against Nelson:
* There's also a passing mention of the "correctly guess my name" escape clause from the original fairy tale. Apparently, he stopped doing that after it got to the point that
* There's also a picture of an out-of-shape looking man lifting a car above his head.
* There's also a playable landshark in the form of champion Rek'Sai. She plays like Jaws if he lived in a desert and was the size of a house. Think a wall will save you from her? She'll just burrow under it and kill you. The lore states that travelers go out of their way to avoid Rek'Sai's territory. The real kicker? She's part of a species of landsharks called Xer'Sai. And she's the queen.
* There's also a plea of "No Contest" or "nolo contendere," where the defendant (almost always in minor cases, as this plea is often not allowed for serious felonies) is doing nothing more than saying "The evidence is so stacked against me, I'm not going to fight it anymore... but I still maintain that I'm innocent."
* There's also a point in the Jedi Consular storyline where you have the option to use Force Healing on a defeated enemy, even if you chose Jedi Shadow as your subclass, when healing is solely the province of Jedi Sages.
* There's also a "Poke the Bunny" which is somewhat less extreme; it just sinks its razor-sharp teeth into the finger and doesn't let go.
* There's also a Positron Cannon, a combat version of the Rifle (the rifle was a prototype and wasn't supposed to be used at all). Too bad it didn't really help Asuka when facing off against
* There's also a possibility of Urban Encounters with Muggers all being multiple levels below the party.
* There's also a pottery version of the homicidal floor tiles. Though given
* There's also apparently a blue policeman that's "shaped like a policeman!"
* There's also apparently a door in the real life Cheyenne Mountain labeled "Stargate Command". It leads to a broom closet.
* There's also a prank executed for the bloopers reel in "Solitudes," (planned by Amanda Tapping and episode director Martin Wood) where Carter and O'Neill are stranded in a glacier, and she laments that she's "stuck in a glacier with MacGyver" and he can't figure a way out for them.

* There's also a print ad that talks about saving money with GEICO being no laughing matter. The ad depicts an iguana stating "I-guana save you money" and the Gecko standing next to him, facepalming.
* There's also a promotional short where Shawn is seen eating a donut straight out of the crime scene.
* There's also a "pyroforming" species, similar to the Andromeda example above, except these are
* There's also a race of creatures called the Tsochar who use meat puppets to pass off for humanoids in order to gain power and control.
* There's also a random encounter in the game, where one can meet a former member of the Brotherhood of Steel, who left after they regressed from Elder Lyons' attempts
* There's also Araragi himself, who thanks to retaining some powers from having been a vampire, possesses a strong
* There's also a rarer round in which they sing a singer's song in the style of "his distant relative", with the same surname. For example, Louis Armstrong's
* There's also a rather squicky clinic scene where House deduces that a toddler's symptoms are result of this.
* There's also a recurring joke where adults try to teach kids correct grammar.
* There's also a recurring (unintentional) gag where the MythBusters try to shatter a bottle for some reason (whether to christen something or as part of the experiment), only to fail because the bottle won't break. This came up during the Buster Special (and also shown in MythBusters Revealed), the Jaws Special, and the "
* There's also a remixed version called "Tarzan Boy 2000" by Jungle Groover ft. Mr. Z. The rather campy music video features a ditzy parody of Tarzan (somewhat similar to
* There's also a rivalry between the Imperial Navy (space fleets) and Imperial Army (ground forces), but it's much less pronounced. Apparently the Navy considers itself superior to the Army as expendable grunts, i.e. in the
* There's also a romantic example with Moana's parents. Tui is slightly over a head taller than Sina, as well as about twice her width.
* There's also a scene a couple of episodes earlier in which Caesarion asks Lucius Vorenus to tell him about his father. Vorenus, of course, is one of the few people who knows that Caesarion's father
* There's also a scene during the Athens arc where it's implied that Yukiji knows that Karou is listening and gives Hinagiku love advice to give up her chase (in Hinagiku's case it's of Hayate), it's possible she's trying to get her fellow teacher to give up on her as well.
* There's also a scene in Fuuka's Social Link, where she tries to give some of her food to stray cat. It runs away.
* There's also a scene in season 2 which features the "hanging corpses" variety of this trope. While Brienne is transporting Jaime to King's Landing, they pair happen across three female corpses hanging from a tree with a sign that reads "They lay with lions". It transpires that these women were prostitutes who were killed by some northern soldiers for sleeping with Lannister men.
* There's also a scene in The Red Pyramid where Zia mentions that a man the Egyptians called Moshe was the only foreigner to defeat the House in a magic duel. Carter realizes it's Moses, and asks her if she's kidding. She says she would not kid about such things. Riordan
* There's also a scene involving fingers and the other kind of nails: one character prepares to drive long metal nails through every finger joint in another character's hands, for a total of 15 nails per hand.
* There's also a scene in which Nagi hides Isumi in, what is functionally a closet, and gets Wataru to admit his feelings for Isumi. Unfortunately she comes out of hiding before he leaves and he furiously backpedals, killing any chance of the confession having any effect.
* There's also a scene of a zombie kid biting and infecting his mother.
* There's also a scene where Nancy casts a spell to make Chris think she's Sarah,

which leads to her attempting to sleep with him. The sequence is decidedly un-sexy, but damn if
* There's also a scene where the actors get out of phase and speak each other's lines.
* There's also a scene where Thursday has to cross the void between two books in the Bookworld, and the book depicts the wordless void by briefly turning into a comic.
* There's also a science lab further back, full of slug dissections and creepy diagrams. Once you
* There's also a Scottish post-punk band named Fingerprintz who wrote and recorded songs such as "
* There's also a Season 3 episode where a young woman who has been in a coma since the age of eight appears to have spent the entire time lying peacefully in her hospital bed, with perfect hair and a full face of makeup.
* There's also a second usage later, when Mitch's best friend Sam finally learns that the two are half-brothers and they start reminiscing about old times. This goes on until they start talking about Mitch's childhood crush on Sam's sister, and the time that Mitch and the sister
* There's also a segment called "The Sneezing Snerd", which demonstrates what you should do if you have a cold.
* There's also Asemu and Zeheart, but in Asemu's case it's less about vengeance or anger and more about proving he can fight him equally despite not having psychic powers. He also starts hating on Desil (everyone hates this guy).
* There's also a sequence where Arthur asks Ford about how the universe was born, and Ford goes off on a tangent about buying a bathtub, filling it with sand, then watching all the sand drain down while filming it, and then playing the film back in reverse. Which, he adds, is nothing like how the universe was born.
* There's also a silent example that appears for a single frame in afew of the episodes involving Gir in "Duty mode" coated in blood. This was put in to spite the network when, due to
* There's also a similar encounter with Thieves. Especially egregious if you are both a member of the Thieves' Guild and wearing the standard-issue armor. You can point out
* There's also a Sister Twister who was in the latest incarnation of the
* There's also a sketch in which an actress accepting an award actually does thank Hitler.
* There's also a sketch in which Graham Chapman insists he can fly while hanging from a very visible wire, and if someone points it out just tries to insult their social class. And the Argument Clinic sketch dips in and out of this (No it doesn't!).
* There's also a somewhat different sect that uses the stitching on their masks to make letters. There's a plot focusing around Mr. X and Mr. Y, though Mr. X seems to prefer leaving his mouth exposed.
* There's also a songbird that Fiona competes with, trying to sustain the highest and longest note, which
* There's also a sort of in-universe example of this. Goku's friends have all known since soon after they met him that he once transformed into a giant ape monster and killed his own adopted father, but they keep it a secret from him. Goku eventually has his Tomato in the Mirror moment
* There's also a species that rolls on disc-shaped projections from its cylindrical body.
* There's also a story about two smaller nations nominally claimed by the Klatchian empire, who had only recently eased off on a centuries-old war, having run out of rocks to throw. The reason for the conflict is a one-word difference in their holy book, which one country translates as "man" and the other translates as "god". This trope is applicable because the difference between the two words, in Klatchian script, comes down to how a single dot is positioned over one letter ... and it
* There's also a storyline where they have to train general practitioners from

Syria to be able to operate in a war zone without proper tools — the trifecta.
* There's also a strange, ongoing Eviler Than Thou competition going on between
* There's also a strip where a boss catches his employee, who called in sick, having sex with an
* There's also a subversion in the Kurosaki family, where the one handling the housework and keeping the family fed and well taken care of is actually an
* There's also a subversion with Joseph, at the time a slave in Egypt under the employment of Potiphar. His master's wife wanted to screw him physically, but he rebuffed her advances on the grounds that she was already married and that giving in to her would be a sin against God. So she chose to screw him
* There's also Asuka Shibazaki and Ema Anzai from another two-part case. They are beautiful (Asuka works as a top model), they come from powerful families and they are really nasty bitches.
* There's also a super-deformed version, Neco-Arc, who permanently has cat ears and a tail.
* There's also a Super Skill Shot, which awards 350,000 points, increases the bonus multiplier by 5x, and awards two VIP Passes.
* There's also a supposedly elite pilot who dies mere seconds after she first appears on screen.
* There's also a sword that does this to the Blood Elves in the game. To elaborate, there is a rare drop in the Icecrown Citadel instances that starts a long quest chain to reforge an old weapon given to the High Elves by the dragons. At one point you have to take the sword and submerge it in the sunwell, the Blood Elves' power source. After you do so, they assume you are returning the sword to them. Their leader tries to take it off you. Except the sword decides it likes you better and sends him flying. They're furious, even more so if you're a member of the Alliance. It doesn't play out this way if you're a Blood Elf, of course, in which case they're eager to assist you. Then again, one Blood Elf also points out that the leader's "foolish" attempt to seize the sword is to blame for his injuries.
* There's also a symbiotic relationship between the Green and Blue Lanterns: Blue Lantern energy gives Greens a significant power boost (since hope strengthens willpower), while Blues can only make constructs when around Greens (since hope is kind of weak without the will to act on it). It's later revealed that the Indigo Tribe (which represents compassion) can give a similar boost.
* There's also a sympathy female pain version where Catherine explains about what parts of the vagina get damaged during consensual sex vs. non-consensual sex and the (male) cops this exposition gets dumped on express discomfort, though from Catherine's reaction she seems to think the men were merely
* There's also a third-party Dungeons & Dragons setting which has fantasy meet steampunk, with giant clanky ponderous mechs being used to fight sometimes. One of the classes is the Steamborg, who gets a small steam engine attached to himself, and slowly can change out limbs for mechanical replacements which give bonuses.
* There's also a thriving sub-community of enthusiasts who have converted their DeLoreans into replicas of the one from the film. Or, if you'd rather pay to have someone else do it, you can have a professional who worked on restoring the original car from the film convert your DeLorean for only $50,000.
* There's also at least one cult who worship the Kaiju, even making their temple inside one's skull. They believe that the Kaiju are
* There's also at least one relationship between a human and a robot that's highly romantic on the robot side, but that doesn't strictly fit within the trope definition.
* There's also at least two other storylines involving police brutality and murder of suspects by police.
* There's also a tower block that's controlled by vampires. The human residents give them blood in exchange for them keeping the area free from criminals.
* There's also Attach Saint Project, which is summoning godly weaponry for human use.

* There's also a two-part code, each part memorized by DARPA chief Donald Anderson and ArmsTech president Kenneth Baker, respectively. The PAL key option is stated to be a backup, as a way to disable Rex once the code has been entered, or to enable it if the code is somehow lost.
* There's also Auden Avidius, a Imperial Watch Captain that is using his position to extort money from a few people, and if you call him out on it he'll put a 1000 gold bounty on your head. Getting Avidius arrested is one of the quests in the game, though this will lead to him breaking out of jail and attacking you.
* There's also Aughra, but there very well may only have been one of her ever anyways, and she's even more immortal than the Skekis and Mystics are.
* There's also a unique case by Venjix, in that he technically invades the whole city at once just prior to the finale. How?
* There's also a unique version of the Railway Rifle called "Prototype Railway Rifle". However, the player expecting it to follow the usual workings of this trope — and indeed of every other unique weapon in the game — will be disappointed: it gets subverted and does piddling damage, has poor range and only holds one round.
* There's also a variant wendigo that is created not by cannibalism, but by food hoarding. If a hoarder causes others to starve to death because of his greed and selfishness, he runs the risk of being wendigofied.
* There's also a variation of this in "Night of the Ninja". When Summer Gleason accuses Kyodai Ken of being a "common thief", he denies it, claiming proudly that he's actually a "
* There's also a variation. The Djinn tricks the female clerk at a clothing store into wishing she "could be beautiful forever". He turns her into a mannequin.
* There's also Avatar Extras, which gives small blurbs of random trivia about the various things in the show, including inspirations for scenes and scenery, background information for characters that didn't get much in the series, and the occasional snarking.
* There's also Avatar Kioshi, which the fandom portrays as a blood thirsty psychopath that loves violence, which is nothing like the actual character, whose acts of violence are merely a case of
* There's also a version of the joke where a bystander takes pity on the dim-wit and points out to him that the piece of paper is worth more than the coin — to which the
* There's also a very hungover Samantha Traynor after the party in the
* There's also a video of a little girl singing "Green Finch and Linnet Bird". The song isn't that creepy, just quite sad, on its own, but when you consider that Johanna is singing about cages as a metaphor for being molested by an insane
* There's also a 'wall' (more metaphorical than literal) between this world and the realm of the dead, that absolutely no one can pass. The wall is the reason why there are few (if any) ghost stories in the Islamic world.
* There's also a weapon known as Bandit Sword which is like a Guan Dao with a much shorter pole.
* There's also a weird "Nazi chic" trend in some Asian countries, which is based on the aesthetics of the regime rather than its vile ideology
* There's also a whole list of cases where White Wolf took a distinctly different stance than Blizzard. They considered the
* There's also a whole style of magic in Fantasy based on this. The Lore of Death is packed full of some of the most powerful damage spells in the game, but they focus primarily on targeting heroes in a crowd and sniping them for massive, if not instantly fatal, damage.
* There's also a whole subgenre of reality shows dedicated to historical re-enactments; shows like these would obviously prohibit contestants from using technology that wasn't available to the time they're re-enacting.
* There's also Azazel, a demon who looks like a black hole in space with many mouths and eyes, and Choronzon, who has two mouths stacked on top of each other.
* There's also BaldDumboRat, who (at least when it comes to fanon) is considered THE voice for

* There's also Barry Zuckercorn, whose frequent homophobic remarks are contrasted with his penchant for hanging out at rest stops and taste for
* There's also Bart and Lisa's "hair". In one episode, we discover that Marge cuts Lisa's and Bart's hair using templates (they look like spray paint stencils). Another episode has them realize that they functionally have no hair lines and thus can't tell the difference between their hair and their head.
* There's also "Bart Of Darkness", where Bart believes Flanders killed his wife, Maude, after overhearing him saying "I've killed her... I'm a mur-
* There's also Batman's attempt to intimidate Amanda Waller. He expects her to crumble like most
* There's also Beachcomber, who was implanted with a cerebro-shell and sent to assassinate Blaster when the time was right. He almost succeeded. Blaster eventually recovers and finds out, and encourages Beachcomber to fight what's been done to him. It nearly kills the poor guy.
* There's also Beauregard. It's unclear just what exactly he's supposed to be, though some have theorized that he's a mole.
* There's also been tons of ponies spotted in the background who resemble famous characters from other series. Just to name a handful there's been
* There's also Bender's campfire story in one episode, but on Bender's word it's only this trope if you're a human:
* There's also Betrand using his powers to convert a man into a Corrupted. While his body slowly mutates, the poor citizen is clearly shown screaming in agony, and when the transformation is complete, he just collapses on the ground, breathing heavily.
* There's also Bicycle Bob, who claims he'll eat a bucket of scorpions if you're not satisfied with the trade-in on your old bike.
* There's also biotically lifting enemies, then pushing them off into bottomless pits.
* There's also Black/White Kyurem. Similar to the Pokémon Stadium example above, unlike the past main series Pokémon games where you have to capture the Legendaries, this one forces you to actually fight and KO it. Despite being a Legendary Pokémon, you still have a possible team of six Pokémon (or one really over-leveled one if you're the kind of person who only uses starters) in a battle system more designed around using a team instead of one on one. It's completely possible to
* There's also Bobby's old partner Rufus Turner, gruff old bastard with a taste for fine scotch.
* There's also Bob, Harry's knowledge spirit in a skull. Bob doesn't have the extensive knowledge of the Archive, but he is Dresden's go-to guy for magical knowledge, and he instinctively knows the current rules of magic.
* There's also Bones herself, who at one point carried said very very large revolver, and actually used it at the climax of the above episode.
* There's also both Kings who barely get any screentime in all sessions before they're quickly offed.
* There's also both the presence of David Petraeus as the Secretary of Defense (the game releasing just three days after he resigned from his position as CIA Director) and a shot of a then-new
* There's also Boubille, creator of MMO-Champion, the WoW news and data mining site where most people get their information on upcoming patches way before Blizzard ever announces anything, and it's also a great compilation of developer posts.
* There's also Brand, a raider from Lokfar who got too close to an imprisoned fire elemental. Said elemental took over his body and now he gleefully lights people on fire in the Fields of Justice.
* There's also Brock, who has been known to convince wild Pokémon to approach when they're hurt, and who has expressed interest in becoming a Pokémon doctor.
* There's also "Brown Shoes Don't Make It", with this exchange, repeated three times:

* There's also Bun-bun's grudge against Santa Claus. At first there were just a handful of strips around Christmas each year where Bun-bun would try (and fail) to kill Santa Claus. The feud kept escalating, however, with more and more side characters (the Easter Bunny, Santa's black ops elves, aliens with a weakness against Nerf) getting involved, until it eventually exploded into Bun-bun amassing an army and going on a holiday killing, world conquering rampage in the three month long "Holiday Wars" saga (which itself launched the even longer "Oceans Unmoving" arc).
* There's also Caitlin. Peter utterly ruins her life just by crossing paths with her and for all her trouble she gets left behind in a
* There's also Calgon's bath products, also from the 1970s and 1980s: "Calgon, take me away!" (Cue woman in bathtub)
* There's also Cannonball, whose goggles serve to protect his eyes while he flies at jet speed. Technically this isn't the goggles doing something unusual, so much as them doing
* There's also Captain Butch Flowers. He appears in a couple scenes in
* There's also Casimiro, who definitely fits. He is noticeably brown (or, well, dark gray), which is weird for a vampire since all the other specimens thus far have been portrayed as pale white.
* There's also Cersei and Taena Merryweather. They were very close friends, and at some point began a sexual relationship with each other. While Lady Merryweather is implied to be genuinely attracted to Cersei, Cersei loves her more like a sister and just rolls with the sexual aspect of their relationship as a means of having more emotional control over Lady Merryweather.
* There's also Charles accidentally "outing" Hank McCoy at the CIA facility. Fortunately, his boss was cool with it and only disappointed that Hank didn't feel he could be open about his mutation earlier. Hank even says something along the lines of "
* There's also Chichigami, a fairly short mercenary who pilots the Paio II,a
* There's also Chi Fu, who was willing to see Mulan die by the hands of Shang when he orders him to kill her after her gender is revealed while she's injured. He was even protesting about why Shang decided to spare her until Shang shuts him up.
* There's also Chopper, who acts as the crew's doctor. He's also a reindeer, so the brunette part is kind of justified.
* There's also Chrome's parents, who treated her like she didn't exist and then abandoned her to die after a car accident… with half her internal organs missing.
* There's also comic book → first movie → comic book adaptation written and drawn by the original creators, resulting in the slightly weird case of the Turtles looking just like they do in the
* There's also "Confronting their personal demons" which usually translates as "too drunk/stoned to work".
* There's also Conrad Haas who only appears in one episode (the Season 5 premier), but he made a tremendous (and shocking) impact on the season/show as a whole by
* There's also constant reference to 'baffles' being used to reduce engine signature (and the consequences it has for a ship's performance and the time needed to get home).
* There's also Crispin Whytehead, the inmate running the asylum, who explains that he is an orderly,
* There's also Crysta, which is a copy of Storkholm in the Light World complete with copies of its original inhabitants. Near the end of the game, the villagers and chickens turn into spirits and attack you if you talk to them (doing no damage). You can
* There's also Cyberkitty, who can see electromagnetic waves, and Fey, who also sees emotions.
* There's also Cynthia with hair that goes past her knees. When she's sat down the last foot of her hair is beside or behind her on whatever she's sat on.
* There's also Daniels, who fights in the Temporal Cold War to protect the Federation.

* There's also Dan Turpin, one of the toughest cops in Metropolis, who never memorized the
* There's also Davepetaprite^2, who got Davesprite's wings which, combined with getting actual legs on becoming a sprite squared, puts them squarely in this trope.
* There's also "Dead of The Dead: Adventure Quest Worlds Version" which is done by him for the game, and is a parody of his own song.
* There's also Death's library of biographies, one for everyone in the world, where those for the living are still in the process of writing themselves.
* There's also Deuce Loosely, a one-off character who annoys Sifl And Olly with little known facts about
* There's also "Different From Everypony Else", which is set right after "New Game Plus", but was published between the last two chapters of "Mind Games", giving one last break from the darkness of that arc. True, this installment still has its dark moments, but it's ultimately lighthearted, and even it's dark moments don't compare to the content of Mind Games.
* There's also Doop from the mutant team X-Staxix, a floating green blob who talks in
* There's also Dragon's Watch. Initially there were more people involved, but several characters leave at the end of the
* There's also Dr. Heinz Doofenshmirtz and his brother, Roger. Heinz is a bumbling, incompetent
* There's also Drusilla's dolls, though they're creepy mostly by virtue of the fact that they're owned and (apparently) loved by a creature like Drusilla.
* There's also Ed and Alphonse's fight with the terrorist Bald early on (though the chapter is cut from
* There's also elderly crime boss Silvermane, who was doing the youth-stealing schtick way before Vulture was, via a
* There's also Electro, who's hindered as much by his cripplingly low self-esteem as his lack of imagination, but like Hydro-Man and Sandman still falls into this as a force of nature-tier character who still operates on the level of a common thug (and usually gets beaten like one).
* There's also Elliot turning out to be the core illegal contractor of Humpty Dumpty and while not the Headhunter, ended up being the one to kill half of his family under HD's
* There's also Eric, who is mostly into Sookie because he's a bit intimidated by her powers, as shown in a fantasy of his where she tops the hell out of him. Both vampires also feel this way towards Sookie because she can't be glamoured.
* There's also exit 69 off Interstate 75 in the city of Troy, Michigan, which leads to a road called Big Beaver Road. The juxtaposition of exit number and innuendo has been lost on very few; it was for the longest time the source of local jokes about the local high school (located close to the exit until it was moved two miles and one exit away in the 1990s) and is still the source of jokes about the local civic center, community center (which sits on the high school's former campus), and ultra-luxury mall.
* There's also Expatriate Darkleer, who was banished for taking pity on the Disciple and letting her escape, and Grandma English (also known as
* There's also extremely lax uniform standards across the board, particularly in the New Conglomerate. As long as you wear something vaguely resembling your faction's colors (which includes the dreaded pink camouflage patterns) you're good to go.
* There's also Fairy Law, a spell that can annihilate everything in a radius of miles that the caster considers an enemy. If it's in the middle of a battlefield where you need to be selective about your targets, it's simply an extremely precise
* There's also Father Cornello, who convinces everyone that he's a holy man when he's really a fraud out for power. Edward exposes him using an
* There's also Faygo, which affects trolls in a similar way to how alcohol affects humans. Eridan is fairly unimpressed by it, but Gamzee is more or less addicted to it and Terezi becomes so on the meteor.
* There's also Ferid/Mika/Krul. As noted above, Ferid stated he loves Krul, and

one can guess he didn't take it well when Krul, um, KISSED MIKA ON THE LIPS. Yeah. This ends on a
* There's also Fire Lord Sozin, who started the war that series plot revolves around, but only appears in one flashback episode. Fire Lord Azulon, as well.
* There's also flavors such as Perspiration, Fun, Happy, Dirt, Natural Field Turf, Sweet Victory, Sports Cream, Bug Juice,
* There's also former Alaska senator Mike Gravel's ads for his quixotic 2008 presidential campaign which involve him staring creepily into the camera and then walking away, and him stoking a campfire. Both ads run for several minutes but only mentions what they're for when his web site pops up at the end.
* There's also France's reaction to pubescent-but-not-quite-legal-looking-Italy.
* There's also Frank and Jen. It falls apart when it becomes apparent that Jen's just screwing with Frank (she makes out with guys she doesn't even know the names of in front of Frank), and it all finishes with a
* There's also freslin, a form of Space Ecstasy, which turns out to be made by
* There's also Fria, the Winter Maiden. She's one of the most powerful entities in the world, but she's also very old and on her deathbed without anyone doing anything to hurt her.
* There's also Fuji-hime with floor-length hair, but this is justified by the series'
* There's also full-fledged holographic terminals and keyboards on the
* There's also Garados, the Great Fury in the Calderon Valley. Basically a giant Titan
* There's also Garfield's appearance and mannerisms. Originally, aside from a few human-like quirks, Garfield looked and acted like a typical cat. Overtime however, he was depicted with more and more human like behavior until it's extremely rare to see him engage in any feline activities anymore.
* There's also Garona, a half-orc, half-draenei. She was mind-controlled to serve evil, but eventually got over it and helps out both factions now. Her in game model is pure orc, but her official artwork elegantly combines both features of each of the races more attractive females. She was a genetic creation, so it's plausible that she was made to be pretty.
* There's also Gates. He likes to do weird things with people's corpses. Most notably with Yu Lan's. It's also implied that he might have done perverted stuff to it.
* There's also Gendry, who at only 14/15 but is noted as being big and tall for his age around 6'3, and tiny Arya Stark who is 10 years old and under 5'.
* There's also ghost possession. But that's very rare, as it takes a
* There's also Ghost Widow and the Wretch. It's hard to tell if it's romantic, seeing as she's a literal ghost, and he's a horribly mutated brute with so little brainpower it hurts his head to talk. Still, they definitely care a lot about each other, and it's possible there was something there before they both lost their humanity to the same accident.
* There's also Gideon, the one-of-a-kind AI developed by Barry in the future and stolen by the Reverse-Flash. Then comes
* There's also Gilliam (likely around his late 30's) and both Franz and Neimi (around Amelia's age, if not slightly older).
* There's also Ginger, a self-proclaimed "cutesy-wutesy" tap-dancing spider as a big aversion.
* There's also Glenda Sugarbean, who would never poison food. Not so much because she thinks poisoning people is evil, rather because it would ruin perfectly good food. The Sugarbeans are famous for their cooking. Notably, Lord Vetinari and
* There's also "Go Right Ahead" which begins with a larynx-shredding "YEAAAAAAAAHHHHHHHH!!!"
* There's also Gormogon's lair, which manages to be creepy without having a single
* There's also Gray Fox who, even before he gained his cyborg exoskeleton, was capable of blocking machinegun fire with his sword. Gene from
* There's also Gray Mann, who ate the eagle who raised him from infancy.
* There's also Guts' Berserker Armor, which removes a human being's natural limits

by nulling pain and allows the user to keep fighting by temporarily mending broken bones, stitching together wounds, etc. It's very dangerous for the obvious reasons that your body has limits for a reason and bypassing them is bound to hurt you, but it also has the effect of bringing out the wearer's "inner beast" (in the Skull Knight's case, his familiar skull motif, in Guts' case, "The Beast", his
* There's also Hal slipping out of having to punish the kids for ruining a party (where the hosts had treated Lois like crap the entire time) by abusing this.
* There's also Hannafans and fHannas, both of which came from the (new) forum.
* There's also "Haoma", which is the same thing, except that it's mentioned in Zoroastrian texts.
* There's also Heinrich Himmler, who is among many "Grand Masters" of antics, and he is Fegelein's mentor.
* There's also Hela, Norse goddess of death, who is either this or a
* There's also her husband, Bahamut, the Father of All Dragons. He's an equally massive platinum colored dragon and capable of
* There's also Hero Water, which makes the drinker incredibly strong for five minutes, after which they die. This was only used once, for obvious reasons. Even worse, that one time accomplished precisely nothing, because five minutes means practically nothing to a Devil Fruit user.
* There's also her recurring troubles with the series' eponymous creatures. In
* There's also "Hezmana" for Hell, in both the figurative "What the Hezmana" or directly "the underworld of Hezmana". The best was "like a
* There's also him having a weird child-parent relationship with the Rogues due to the fact that they
* There's also Hinagiku vowing to help Nishizawa but liking Hayate herself. Isumi has something similar going with Nagi, but unlike Hinagiku makes no attempts on her own behalf as well. Of course, Nishizawa would gladly
* There's also his best friend Patrick, who has been shown at times to be mentally unstable (e.g. "
* There's also his favorite mangaka, Mira-sensei (short for "Mirage") who dresses, speaks, and behaves like a classic '70s shoujo manga character, for the same reason as Juuta. His motto is "Because we're professionals!"
* There's also his job, in which it's repeatedly stated he isn't fired for constantly leaving early or acting offensive because he's a business genius. However, most times he's at work, we get generic lines about meetings or when shown in detail, his decisions are actually quite naive and would be disastrous in the real world, such as giving away free eBooks in the hopes people will use them to subscribe to a digital newspaper.
* There's also his logic puzzle on babies and crocodiles that has been included as an example of conditional statements in at least one Geometry textbook (complete with a page image of a baby riding a crocodile!):
* There's also his more overtly satirical "American Ride" from 2009, which got him considerable heat from both the political right and left for its political barbs. But as several music critics and even Keith himself pointed out, the song pokes fun at
* There's also his old friend Mr. McGreg, with a leg for an arm, and an arm for a leg.
* There's also H.L. Mencken's "bathtub hoax", where his bogus history of the bathtub, "A Neglected Anniversary", was believed as truth for decades after it was published in 1917.
* There's also Hobo 13, the military training planet. It is a barren wasteland inhabited by deadly predators and covered by all sorts of other hazards. The Tallest send Zim there to get rid of him and immediately open a betting pool on how long he will survive.
* There's also Hunger, who was sort of like Galactus, except it fed on
* There's also #IAmUnbroken, which encouraged viewers to "share their unbreakable spirit" but was little more than a shameless plug for Universal's film
* There's also "I'm Guybrush Threepwood, mighty [profession]." Usually, it's pirate.

* There's also Inugami Korone. She stands at 156cm, does boxing as a hobby and, according to Shion, has a collection of muscle supplements she uses to stay in shape.
* There's also Ivan/Mylene, who hooked up near the end of the Origins episode.
* There's also Jack In Irons, a creature of folklore that makes an appearance as an enemy in
* There's also "Jack Tales", three unrelated stories of some of Jack's adventures, featuring a two-headed worm, a family of metal-eating people, and a pixie trapped by a gargoyle.
* There's also Jamie's attraction to Garnet. Since Garnet is already the fusion of romantic couple Ruby and Sapphire, she herself doesn't feel attraction (she is literally made of love), making her asexual/aromantic.
* There's also January Jones in an earlier comic, a future descendant of Archie come back in time in an imagine spot—she tries to kiss Jughead in thanks, but he pushes her off, though here he merely says that he's 'not into kissing girl Archies' which may have just been easier than trying to explain everything.
* There's also Jan Valentine wanting to rape, kill and rape Integra again (yes,
* There's also Jeannie's vindictive sister, who is also named Jeannie and also played by
* There's also Jinpachi Mishima. He's Japanese, but his skin tone is noticeably darker than all of his descendants — in his debut appearance, it was almost as dark as Marduk's (his human form, that is; when you fight him as the final boss, it's
* There's also Jonathon Tzachor's constant flip-flop over the state of the series' continuity. Initially, it was one whole universe except
* There's also Joselyn D'arc and her daughter Jane, both accomplished henchwomen to the snake cult. Joselyn is one of the more involved parents in the series, in fact.
* There's also Judar, who thought to cover his shoulders with a tiny choli but for some reason bares the rest.
* There's also Kagura Mutsuki's assistant, Hibiki Kohaku although not at first. It took until the
* There's also Keith Olbermann as Tom Jumbo-Grumbo, a news anchor and walking embodiment of sensationalist news media.
* There's also Kenichi's dad, also a rare example of a dad being protective of his son, probably because Kenichi's kind of a wimp at the beginning. The man's first and foremost reaction to his son in danger is to whip out a shotgun. The shotgun's name is Sebastian and it can take care of two-bit punks bullying his son just as easily as it takes care of the squirrels that infested the backyard.
* There's also Kidomaru, who has his hair tied back into what looks like the unholy offspring of an afro and a high tail, which only gets worse when he goes into Cursed Seal State 2.
* There's also Kimahri who is just a big walking piece of furry and bara fanservice. Hell, all the Ronso in this game are basically fanservice for some people.
* There's also kind of a potentially Deadly Scam, if you will, when Columbus and Tallahassee are told that Little Rock is infected and that they have to shoot her. Not the best scam to pull on complete strangers who have obviously seen a lot of action and are probably willing to pull the trigger.
* There's also Klavier's older brother, Kristoph, who is a defense attorney, attractive as hell,
* There's also Klondike Kat, which was produced by Total Television (the makers of
* There's also Kodlak Whitemane, Harbinger of the Companions (which translates to 'unofficial leader of the province's ancient and sacred order of badasses for hire.)
* There's also Kokoro, the drunken railroad inspector of the Puffing Tom in Water 7. While in the present day she's a straight
* There's also Kuro, whose whole fighting style relies on his speed and whose
* There's also Lady Malys, also of the Dark Eldar, who goes for more of the "Dark

* There's also Lady Penelope's manservant: surname, Parker; first name, Aloysius. A mild example, however, as it was
* There's also Laramie cigarettes. The brand did exist, but it's been discontinued since
* There's also Larval Stalkers, which appear as vaguely toddler-shaped shadows that make your radio emit static (normally a clue that an enemy is nearby) but only harmlessly make squeaking noises before vanishing if you touch them. Not only is it going to make you good and tense, but it'll also fool you into thinking the similar-looking but very much dangerous Stalkers encountered later in the game are
* There's also Lelouch and Kallen, in a more traditional example. They did share goals, and she
* There's also Lieutenant Springer: nowhere near as old as Maggie, but a phenomenal
* There's also "lolfans", which are people who follows a given fandom not because they're genuinely interested in it, but because they like making fun of it.
* There's also Lord Beerus, Universe 7's God of Destruction, along with his brother Champa, the God of Destruction of Universe 6. Both are their universe's second strongest fighters behind their angels who have the power to obliterate planets with just a wave of their hands. That is, if they can get off their asses to do so. Champa is gluttonous and Beerus takes decades-long naps. Heck, Universe 7's low power level is
* There's also lots of smaller gods, of things like individual mountains, cities, forests and such. Some PCs can reasonably expect to
* There's also Luna Lovegood, who spouts creepy conspiracy theories, whose bedroom wall has a painting of her friends from Hogwarts surrounded by chains forming the word "friends," and whose general oddness is off-putting to the other characters.
* There's also Magma. In the opening cutscene of the game, she's powerful enough to nearly level an entire city block with a single attack. In a later cutscene, a single attack of hers practically disintegrates around 30 Danger Room robots. When she's eventually unlocked as a playable character, she's considerably less powerful.
* There's also Majin Buu, but it's more appropriate to say he isn't bullet resistant, more like the bullets just get stuck harmlessly in his gooey pink
* There's also Mamungi, who has called Shi Woon cute ever since they met.
* There's also "MariBro", which can refer to the brothers themselves,
* There's also Mary Jane. If she had just said that she got fired from her job, about half of the conflict in the movie would disappear.
* There's also Masha's seemingly useless bit of paper. It's only mentioned briefly after her "birth"... and doesn't show up again until the ending. She throws it at Cirno to calm her down.
* There's also medical cryokits. Most of the time, fatal, or nearly fatal injuries can be healed or reversed as long as at least the head is intact and the 'victim' is near a hospital or equivalent. But if you're some distance away, or can't spend time "in the field" (possibly because of everyone else being under fire)? Collect what you can and preserve it in the cryokit until you can make time.
* There's also mention of a noblewoman who Gentled (reduced to mindless husks wholly devoid of their own volition who have to be prodded to eat, excrete, or move) kittens so her sons could torture them with knives because they were bored.
* There's also mention of automail needing maintenance, in the form of oiling and such to prevent rust, and has to be adjusted slightly when Ed grows.
* There's also Mercury, whose father is all but stated to be an alcoholic who regularly beat him
* There's also Merope Gaunt. While we're meant to sympathize with her instead of the elder Tom Riddle, she otherwise fits the bill. She's a very ugly woman due to generations of incestuous inbreeding, mentally unstable, and obsessive over the attractive young man who catches her eye. She even feeds him love potions to win him, since he won't have a thing to do with her otherwise.
* There's also Mignon, her puppy, who likes to nom on her mistress even when Dark Nella is being all threatening.

* There's also Mihoko for Hisa, who played Hisa in an Inter-Middle tournament during their last year of middle school, and Hisa pressured Mihoko so much she accidentally opened her right eye — which she keeps closed due to it being a different color from her left — in surprise. Hisa then told Mihoko that her right eye was pretty, and Mihoko wanted to see her again to talk with her. Unfortunately, the next day, Hisa dropped out of the tournament due to unknown circumstances, changed her last name from Ueno to Takei, and did not recognize Mihoko when they saw each other again three years later. However, in the individuals match, after Mihoko opens her eye, Hisa finally remembers her.
* There's also Miho's decision to demote Momo from deputy commander after
* There's also Mike and the Bots' cries of horror whenever the camera pans down during
* There's also Milton, a scientist in Woodbury who experiments on the zombies, trying to bring out memories of their past lives and find a way to condition them.
* There's also Mimi's mom, who makes kimchi fried rice with strawberries and cream.
* There's also mining ships, which strip-mine planets for resources they can feed to other worlds to permanently increase their resource stocks — this is an especially good thing to do against worlds you can't colonize due to planet hazard. The hivers, due to their
* There's also Miroku, who has a miniature black hole that is initially a game breaker. So the show introduces poisonous wasps which can kill him if he sucks them up. These practically become the villain's trademark so that only Inuyasha can be a credible threat to him.
* There's also Misa, whose birthday falls on Christmas. Quite appropriate for a character who's
* There's also Misa with Gelus, a Shinigami who fell in love with her and began to observe her from the Shinigami Realm. Gelus was small, ugly, and knew that Misa didn't know he existed or that she would ever love him. When he sees her approaching death through a crazed, stalking fan, Gelus writes the fan's name in the Death Note and saves Misa's life, but dies himself because he broke a Shinigami's rule. While Rem tells Misa of this story, Misa finds the idea romantic.
* There's also Mistress Mara the merchant, who causes this in everybody. Solvin has to step outside because it's so awkward he's about to crawl out of his skin.
* There's also mods that alters the gameplay of existing modes. Like Randomizer, respawn time disable/reversal, class limitation and its related Highlander mode, and Hardcore- game servers with crits disabled.
* There's also Mr. Rudge and Fatty Scott, two civil servants who are often subjects of various
* There's also Mr. Washee Washee, the local dry cleaner. In "Tiegs for Two," Peter gets into an argument with Washeee Washee over his missing shirt and begins to adopt Washee Washee's accent in the process.
* There's also Ms. Frizzle's "As I always say, [thing she has never said before]."
* There's also Much, who falls for Kate despite the fact she treats him poorly. Fan speculation is that she simply reminds him of Eve, his Season 1 love interest, who also had distinctive blonde hair.
* There's also Muramasa, main antagonist of the anime filler Zanpakutō Rebellion arc. Muramasa is a Zanpakutō spirit whose power is bringing other Zanpakutō spirits to life and turning them against their masters. He does this by tapping into their most suppressed instinct and using it to control them. The only clear way to break the spell is to defeat the Zanpakutō spirit, but if that happens, Muramasa's power won't be able to affect it a second time.
* There's also Mylene's sister Emilia, who must have macronised herself only recently, since Mylene was surprised to see her at full size when they met up again.
* There's also Namiko, who always wears a big belt and doesn't wear her blazer, in order to hide her
* There's also Nathan's supersoldier Scott in Season 3. He is introduced in the third season as the top Marine in the Pinehearst super soldier program. The episode

climax is devoted to his injection with the ability-inducing formula, which grants him the power of super strength, and the episode ends with others questioning his status; he grins and says "I feel good". In the very next episode, he is promptly and unceremoniously murdered by minor villain Knox, who walks in and snaps his neck without any resistance.
* There's also Necrozma. After fusing with either Solgaleo or Lunala, it takes over their minds and bodies (further reflected in that Solgaleo and Lunala taken over by Necrozma are listed as alternate Necrozma forms), continuously draining them of their light
* There's also Nevada, Missouri... kinda. The name of the city is not pronounced the same way as the state (nuh-VAY-duh for the city; nuh-VAH-duh or locally nuh-VAD-uh for the state).
* There's also no rule barring an orangutan from the college council, though the wizards looked very hard for one.
* There's also no rule saying a sentient piece of luggage can't play football. However, it really
* There's also occasions where he's only slightly fatter than normal and in dire need of his emergency big boy shirt for one scene.
* There's also one amusing subversion where one of Conan's friends falls asleep in the trunk of a car, only for its owners to toss a bag in without noticing her and drive away. She knocks the bag over, and it contains something round and slimy that turns out to be a head.
* There's also one at the end of the episode: In bed above, we're deep asleep/while greater love lies further deep/This dream must end, this world must know/We all depend on the
* There's also one enemy, the Mantrap, that can instantly kill regardless of health.
* There's also one episode where Denise Richards plays Ross's cousin, and all the guys (yes,
* There's also one group of Ogres in the Blade's Edge Mountains that are drinking when you start fighting them. Their attacks consist of hitting you with their (large) mugs of booze, which gets you progressively more drunk as you fight them.
* There's also one instance right after the Namek arc when Chi Chi hires a tutor for Gohan. This tutor happens to be quite abusive toward Gohan, and when he starts calling Goku a delinquent absentee parent (Goku is missing following the fight with Frieza), Chi Chi decides she's had enough and promptly defenestrates the tutor.
* There's also one in the second episode, where Nagasumi tries to dry off San's tail while she's in her kimono. Except the rubbing itself looks... suggestive, to say the least, not even taking the dialogue into account. Oh, and San's parents happened to be walking by. The mother doesn't mind as much as the father...
* There's also one of the pilot episodes, where Fuzzy Lumpkins accidentally pushes Bubbles'
* There's also one part of the Fremmenik Trials quest. You end up talking to basically everyone in the entire village until you talk to someone who just wants 5000 gold. Still better than the other in that you never have to leave the village, though.
* There's also one regarding Castor and Pollux themselves. Castor was the son of Leda and her husband, the King of Sparta. Pollux was the result of Leda being
* There's also one scene where, as a part of his strategy, Wong Fei Hung calls out the name of a move and then does a completely different, which causes his opponent to complain. When the opponent attacks again, Fei Hung calls out the same move and actually does it this time, nailing the opponent. When the opponent complains again, Fei Hung mocks him, basically saying "Yeesh, you complain whatever I do! You sure are hard to please!"
* There's also one that lets you pilfer things on the other side of a door...literally any kind of door, even if it's a portcullis or has been nailed shut.
* There's also one where he comes through the pet door, but gets stuck inside because he's too fat and thus rips the normal door from its hinges anyway. Also, he

repeatedly kicked Nermal out the front door without opening it first.
* There's also one where Sheridan gets on the lift with Lennier after the latter had observed the pleasure ritual between the Captain and Delenn. In a purely religious capacity, of course.
* There's also one where the car goes crowdsurfing at a concert and the disclaimer says, "Always Drive On Roads, Never On People."
* There's also one where the girls are all in the same bed because the heat went out.
* There's also "Onion Bubs," and the various other versions used to replace "Original Bubs."
* There's also Osenia, which doesn't appear to have Australian influences, but is shaped like Australia, positioned where Australia would be compared to the other continents, and has a location called
* There's also other characters from the first game; who are explicitly stated by the plot to be staying out of the Gallian Civil War to prevent a diplomatic issue; but that's a smaller wonk than the above.
* There's also others, like Scrambler, a.k,a Joanne Jackie "Jay-Jay" Jendleschmidt.
* There's also Otto von Chriek, a non-blood-drinker and obsessive photographer, who takes the trope toward parody. (Otto gets peeved at least once in the books, whereupon he proves that he's perfectly capable of
* There's also Pain, who lost so many loved ones to ninja society that he set about to effectively destroy it so thoroughly people would be too scared to even
* There's also Para-Medic, who loves everything about Japan, especially cinema. In the mid-1960s, no less. In
* There's also Penumbra, the illithid homeworld, which is a full Ringworld. It
* There's also Peppermint Butler, who's friends with Death and is seen golfing with Hunson Abadeer, the show's
* There's also Percy's first encounter with the empousa. He first mistakes them for vampires, but they simply laugh at him and point out that
* There's also "Peter's Progress," which has Peter's past life involved with
* There's also plenty of discussion on how clever vampires will get around the restriction. In the first
* There's also Precious the evil cat when she announces her plans for world domination she'll get distracted by round shiny things or feel the urge to run around the house for no particular reason.
* There's also Prometheus Black AKA Meltdown, who sold "bio-upgrades" until he went full
* There's also Queen Tiamat, the Mother of All Dragons and their patron deity. Her power alone qualifies her for this, as she single-handedly turned the tide of the Dragon-Hooviet War when she entered the fray. By the time she was finished, half the Hooviet Empire was blazing ruin with her willingly stopping just short of the capital.
* There's also Queen Tiamat, the ruler of the Dragons and what seems to be their patron Goddess. When the Dragons were considering quitting the Dragon-Hooviet War due to taking too many losses, Tiamat herself stepped in and
* There's also questioning of this kind toward Qunari following (or 'failing' to follow) the Qun as well (but with racial and cultural/religious overtones), and the way the mercenary responds to Saemus after killing Ashaad seems to carry both the
* There's also Quickstrike, who will fight anyone, anytime, anywhere, while speaking in an incredibly stereotypical cowboy accent.
* There's also Quint Nakajima, Subaru and Ginga's mother, who was a high-ranking investigator until her death. It's revealed in the Sound Stages that Quint was considerably stronger than Subaru or Ginga, being able to wield both Revolver Knuckles (her two girls
* There's also Q, who in addition to being godlike has an IQ in the quadruple digit range. At the start of the series, he's also beyond insufferable, planning on wiping out "less advanced" species and examining humans like they're simple toys. He gets less insufferable in later appearances, partly from time with Captain

Picard and partly from his species (who are apparently not appreciative of his behavior) briefly stripping him of his powers. Still, he always retains this.
* There's also Rainbow Dash's friendship with Applejack, Fluttershy, and Pinkie which could be interpreted as this. They all have massive amounts of subtle
* There's also Rainbow Dash's protege Scootaloo. Unlike all other pegasi in the show she cannot fly, but put her on her scooter and stand back as she propels it to incredible speed with her wings. She can make it from Ponyville to the Crystal Empire in less than a day while pulling her two friends along, a trip that normally takes two days by train. And if there is a makeshift ramp available she can use it to gain some serious air. It's enough to make Rainbow Dash take notice of her.
* There's also Rainbow Dash whenever she dresses up for big occasions, most notable include the Grand Galloping Gala and Shining Armor and Princess Cadence's wedding. Fancy Pants has commented on Ponyville being "charmingly rustic" which means he's well aware of how country folk like Applejack and Rainbow Dash can look gorgeous. Cadence herself looks pretty beat up and defeated when we first meet
* There's also Raven and Lucius' brief stunt as Distressed Dudes. When they appear in either Eliwood's or Hector's path, it's in a cell of Lyn's castle. Raven subverts the trope as he forces the guards to let him go so he can take a chunk out of Hector, becoming an enemy unit that you have to recruit with his sister Priscilla; Lucius, however, stays in the cell until a freshly recruited Raven goes to recruit
* There's also Ravens, which look like pudgy, vaguely avian wingless blobs with feet, and Buzzy Beetles, which neither buzz nor are they insects (instead being more like turtles).
* There's also Red the Bum, who calls Marty a "crazy, drunk driver" towards the end of
* There's also Red Wings and Torchwood. Usually competent and able to make pretty good attempts at protecting Earth.
* There's also Rei, who is cited by another character as seeming "far older" than the rest of them.
* There's also Rhunön, an elf introduced in the second book who hates her own race. Or at least what it has become. A big chunk of her introduction scene is her complaining about elves.
* There's also Rider of Black, an androgynous bishounen who wears all black armor with a white coat and accents to symbolize his heart of gold. Fitting, given his status as
* There's also Robin as a borderline example, whose skin looks slightly darker than most of the other Straw Hats but looks slightly tanned at most. However,
* There's also Roy, a chicken who featured prominently in the US Acres segments. Booker was also a young chicken, as presumably was Sheldon (though he never fully hatches).
* There's also Russian-produced Old Pepper's Crew, with almost copycat design of logo.
* There's also Ryder, who provides just about enough humor in almost every cutscene/mission he appears in in spite of his
* There's also Saga, the neo-Nazis' answer to Madonna. Madonna is a devotee of Jewish mysticism, see.
* There's also Salvia divinorum, which takes the horror to even more horrifying degrees than K-2.
* There's also same moment as in MGS example above - Lt. Price and Cpt. MacMillan use fast-roping to evade a helicopter's
* There's also Scorpia and Huntara. Perfuma is cleary attracted to both of them, and Adora absolutely
* There's also Sean and Ouranos, who you ride with on the boat across the Karagol Sea. They have unique sprites and icons, personality quirks (such as Ouranos' fear of water), and have obviously been traveling around for a while to be as strong as they are. Although they get their asses handed to them by the Kraken (Which happens to be
* There's also SECT, headed by Lieutenant Steel. They handle alien threats as

well, but seem a lot less efficacious and less well-informed than the Plumbers (Also don't seem to be a secret from the public).
* There's also Senor Cardgage who was once heard singing a creepy rhyme in a "daycare" with a
* There's also Senor Cardgage (with the 'Senor' deliberately mispronounced), who's basically a malapropism-prone creepy old homeless guy who resembles a tall, pot-bellied version of Strong Bad with a bad combover:
* There's also Ser Amory Lorch, another thuggish knight loyal to the Lannisters who has a full beard, Ser Meryn Trant who has a scrubby goatee, and and Janos Slynt with his thick white beard.
* There's also several instances where Archer questions if he's on the Autism Spectrum, as he finds himself being the only one able to identify weapons at a glance, keep track of bullet counts, and other such things when in battles. Most people when they hear this theory usually say something along the lines of "Huh. That would explain a lot."
* There's also Shendu's Dragon Empire, which has conquered about half of China and a portion of Southeast Asia. Though apparently, the
* There's also Shift, which shifts you ahead about 5 feet and breaks the lock of any tracking weapons on you. It's good for escapes, but it's possible to tele frag yourself into, say, an incoming fireball.
* There's also Shikamaru's shadow manipulation jutsu, which never changes its basic function throughout the series (ensnaring and controlling people with their shadows), yet Shikamaru uses it efficiently and in a variety of methods. Overall, he's definitely a boring fighter, but far more practical at getting the job done than many others. Though for the first half of the series his technique is really more boring but useless. It requires him to be motionless to use. Shikamaru can only stretch it as as far as his shadow is long (meaning both that his technique is dependent on the environment and that it's easy for an enemy to see it coming). He's stuck making the same motions his enemy does even if he catches the enemy, and even if all that fall into place perfectly, the enemy could potentially just flat out be strong enough to over power it. He compares how useless his ability is with how it took him several episodes of constant planning and tactics to still fail with the technique, while Temari won with a single move.
* There's also shipping living characters with those in the dreambubbles, the pseudo-afterlife filled with "dream ghosts."
* There's also Skoll and Hati, who chase the sun and moon across the sky. At Ragnarök, they will finally catch and eat them.
* There's also Skorm's Bow, the best longbow in the game, which you can only acquire by sacrificing someone at Skorm's temple at the right moment in the night. Although you can do this at the very beginning of the game, before getting even a single experience point, so it's really more of a
* There's also "slag", which carries a triple meaning: It's a slang for "kill", as in "Slag him!", kind of a "screw/fuck it" term as in "Slag it!", and can also denote that one is exhausted: "I'm slagged."
* There's also Snake's pose after landing on the tanker at the start of
* There's also Snape's similar mistreatment of Neville Longbottom, which is sometimes given the justification that
* There's also some built into the game's setting to help set the world's tone. An early example is the Arena, known for making spectacles of bloodbaths for profit... and the
* There's also some stuffed Oogie Boogie dolls that were made before the Disney Store models and manufactured by Applause (a name you don't hear very much of these days). They feature a Velcro front that, when pulled apart, reveal some black fabric with glow-in-the-dark "bugs" silkscreened on.
* There's also something both disturbing and hilarious in the fact that there's an official Anakin Skywalker lightsaber toy that changes from blue to red with the push of a button, so kids can
* There's also something of a debate (albeit one with -arguably- a life on the line) in the episode "Measure of a Man" wherein Commander Maddox proposes an

experiment that basically involves taking Data apart to see what makes him tick. His only reassurance that Data himself will be preserved by this is the fact that he is able to download all of Data's memories and experiences into a computer and reupload them when his body is reassembled (that's assuming he CAN actually reassemble him.) Data argues that only the events and recollections themselves will be preserved and the "essence" of the events and situations will be lost, therefore so will he; because
* There's also something similar to the above two examples happening in America, where people get attracted to the aesthetics of Imperial Germany. This is considered by some to be a subtle "cover" for Neo-Nazis who want to express pro-German viewpoints and aesthetics publicly but without backlash, as Imperial Germany isn't nearly as vilified by history. However, not all people who are interested in Imperial Germany are Neo-Nazis, and many fittingly hate the Nazis for having brought down Germany. Even still, the fascination for all things German -including the
* There's also Spike X Ember (from the same series above). Whether Spike gets a
* There's also Spock's human mother and alien father, although Vulcans are
* There's also Spot's kittens. First off, they're meowing when Data discovers them— in real life, kittens only start to meow at one month old. Secondly, some of them are calico, implying their father is calico. In real life, male calico cats are sterile.
* There's also Steve/Jimmy's mother kissing him on the lips back in season 1, which Debbie comments was particularly disgusting.
* There's also strong indication that this is how the Omega mercenaries viewed Archangel. Of the three gang leaders, only Garm (the
* There's also Stuart's sort-of-girlfriend Harriet, who is the biological daughter of humans, and unlike Stuart she looks human, but she's doll-sized.
* There's also Tai Lung who was pushed by Shifu to train until his bones cracked. It should be noted that this is
* There's also Team Minato in regards to Team 7, with Minato/Kakashi as the mentor, Obito/Naruto as the brash, hot-headed one with a one-sided crush on
* There's also Teleport Boxes, which come in pairs you can freely teleport between. They're usually placed at the beginning and end of a level or tricky platforming section, so that you can quickly get back to where you were after finishing a challenge and have an easy way to bypass said challenge if you come back later.
* There's also teleporting sea units onto land. Nothing quite like bombing an opponent's war factory...with
* There's also tension between Agatha and Tarvek. It's not for nothing that one of the images for the
* There's also Texarkana, Texas and Texarkana, Arkansas. Again, they border each other.
* There's also that as doctors directly commissioned (and apparently conscripted) from civilian practice, most of the cast of
* There's also that Founder Homeworld, which we watch a combined Cardassian/Romulan fleet bombard. To emphasize just how disposable it was, the Founders abandoned it and used it as a trap for said fleet. Given that the Founders managed to evacuate so readily, one might get the impression they've done this before.
* There's also that the Nietzscheans like to conquer other planets, and you have to do
* There's also that time where he kidnaps Bart and sings to him "I've grown accustomed to his face! And dream of
* There's also the 2019 special's Charger Tron toy commercial (which seems to be a rip-off of the Transformers, ironically), where Critic is very confused about exactly what the product is but loves the jingle so much that he believes it could work with any scenario. He then plays a skit set to a parody of the Charger Tron jingle about a date with a
* There's also the above quote, which was in response to asking Michael Dante

DiMartino why he removed a scene in the
* There's also the Absolute Mover IQ skill, which allows the user to traverse any manner of terrain and plow through walls by simply walking into them. Certain Ghost type Pokemon as well as holders of a Mobile Scarf are also able to walk through walls, but won't destroy them in the process. These coupled with the Stairs Seer IQ skill made getting to the next floor a very easy task. Presumably for balance reasons, Absolute Mover ended up being limited to a single Pokemon in Explorers, while the Mobile Scarf became the sole method of wall walking in Gates to Infinity and gained the harmful side effect of rapidly reducing a Pokemon's HP for every turn it spends in a wall.
* There's also the Air Balloon, an item that allows Pokémon to float and avoid Ground-type attacks. A single red balloon is enough to lift even the monstrous, half-ton Snorlax into the air!
* There's also the always-recurring Star Beasts, like the good ol' Ursa Major.
* There's also the AMFP (Antimatter Field Projector), which takes the form of one of these.
* There's also the anime episode in which Naruto decides to see what's behind Kakashi's mask.
* There's also the anteater. We're pretty sure you can guess why it's called that.
* There's also the Apache Tracker. Every time he comes up, Cecil goes out of his way to remind the listener what a racist asshole he is.
* There's also the appropriately named, fueled and functioning Ragnarok, which spent seventeen years drifting in space. In the Ragnarok's case, it makes some sense (space being a fairly safe environment for preservation) as the ship appeared to be in low-power mode and not using any oxygen thanks to the alien things running loose on the ship that didn't require it.
* There's also the argument that Facebook causes depression, which isn't really true and is misleading because it's not really FB's fault. It's more that it simply creates a social atmosphere where sometimes, people who already were depressed can become a lot more depressed (like when a person posts to their wall in hopes someone will notice them, their friends don't respond, and the person starts to believe their friends don't care about them). Really any form of communication that involves unintentional ignoring can do this, but FB gets a lot of flak for it these days.
* There's also the Armour of Meteoric Iron, one of the cheaper magic armours. It's basically just really tough, with no real special abilities.
* There's also the assertion that, "There's no such thing as a draw in cricket!"
* There's also the ATX team in which during the first game Kyosuke, Excellen and Bullet are at the same level if not surpassing the Aggressors to the point where Sanger Zonvolt (another Aggressor and arguably most badass in the OG verse so far) believes they have a better chance of beating the aliens than HE does.
* There's also the Autobot Punch, the spy, who becomes the Decepticon Counterpunch. Sixshot has six modes. Mindwipe is a giant bat who can
* There's also the baseball bat monster, "a bat with the body of a baseball. And the heart of a bad pun."
* There's also the Batman villain Great White, a former "white collar criminal". It started as a nickname due to his shady financial practices. However he gets sent to Arkham and, well... let's just say he ends up with an
* There's also the battle in Sokovia, in the generator room, where all the Avengers
* There's also the battles at Lothlórien and Dale, which are briefly mentioned and correspond closely with the battles at Minas Tirith. The latter one beneath the Lonely Mountain is stated to be the largest one of them all because of its close proximity to Sauron's Easterling forces.
* There's also the Beast-class Servants, seven (eight since one has two halves) powerful beings that each pose a threat to humanity simply by existing. There are several mentions of them and their members in various other
* There's also the Big Bunyan Ride song: "Come on and ride, Big Bunyan Ride! No place to hide, Big Bunyan Ride! Come on inside, Big Bunyan Ride, We'll ride n'

ride, into the night! You'll will scream and cry, And then you'll die! Then you'll die... Then you'll die... Then you'll die!
* There's also "The Big Snooze", where Elmer Fudd and Bugs Bunny are going through the motions of a typical cartoon, when Elmer suddenly decides he has enough, and rips his contract with
* There's also the bisexual options, with Avatar/Rhajat (with Rhajat being the brooder) and Avatar/Niles (where Niles is the brooder), which could end up
* There's also the bit in the flashback mission "One Shot, One Kill" where you have to abseil out of the abandoned hotel before the attack helicopter blows up your sniper nest. And running for the blast door in "No Fighting in the War Room" when the remaining missiles launch.
* There's also the Black Dragon teenager, who guarded the cave that contained the starmetal.
* There's also the Black Flash, anthropomorphic personification of death for speedsters (or maybe of the Speed Force), who takes the form of a zombie-looking guy in a black Flash costume.
* There's also the Blood Dragons, who fill in this for the Vampire Counts. Basically, they're a vampire bloodline who were formed by a
* There's also the blood magus from complete arcana who I'd say was the King of this trope. His 'Blood Walk' ability allows him to enter any creature with blood's bloodstream then essentially teleport to any other creature in range (which is a long way, basically a teleport spell). Upon arrival you burst out of the target, forcing a fortitude save and huge damage (though you can choose not to if you're going to an ally). So his dynamic entry is BURSTING out of an enemy's body in a shower of blood from miles away.
* There's also the Blood of Sokar, a Goa'uld-developed hallucinogen used by Apophis to interrogate SG-1 in "The Devil You Know".
* There's also the Blood War between the Metallic and Chromatic dragons, triggered by Discord
* There's also the borderline-meaningless credit often found in the liner notes of
* There's also the boss Torkdrift in the Steam Gardens level, as well as an enemy called a Yoofoe which is clearly based on the idea.
* There's also the briefly fashionable criminal enterprise known as ram-raiding; ram a stolen SUV or backhoe through the wall of an electronics or jewelry store, help yourselves to as much valuable loot as you can carry and run like hell for the getaway car parked in a handy side street. Something of a lost art these days, because most storefronts positioned in such a way that you could get enough speed up to ram through the frontage now have waist-high bollards in front of them. These bollards can stop anything short of a main battle tank.
* There's also the brief, mild flirtation between Colleen and one of the Chinese railroad workers.
* There's also the brother of Visser Three, who kills humans to obtain other Yeerks to eat, so he doesn't have to return to the pool to feed.
* There's also the business with Dr Psychobos and his entire species, the Cerebrocrustaceans and their one-sided rivalries with Azmuth and his species, the Galvans, respectively. The Galvans, while obviously smarter, pay little to no attention to the Cerebrocrustaceans and their delusions of grandeur.
* There's also the campaign starring 'Herb, the one man in America who has never eaten at a Burger King', which is memorable for just how spectacularly it
* There's also the card Platinum Angel: "You can't lose the game and your opponents can't win the game." It's worded that way because if it just said "you can't lose" then your opponent could still win via a card effect that declares them the winner, and if it just said your opponents couldn't win then you could still lose by having your life reduced to 0 or having a card declare that you lose (which would cause the Angel to be removed from play and allow your opponent(s) to win).
* There's also the case of Marcus Flint, who's still at Hogwarts a year after he should have graduated. Rowling's response was to the effect of "Either he was held back a year, or I messed up. I think I prefer that he made the mistake." It's been
* There's also the case where the emotional person suggests a course that

shouldn't work, period, but the Straw Vulcan's ideas all involve some aspect that the "non-logical" character find cynical or objectionable. So Straw Vulcan is outvoted, they go with the dumb emotional plan, and lo, it works... due to sheer dumb luck. This is then lauded as a victory for emotion, when in fact it's a victory for the
* There's also the Catholic interpretation, which defines original sin as simply "a lack of sanctifying grace", which is the key to getting into Heaven. Adam and Eve gave up their sanctifying grace, and thus they lost their kinship with God and were disinherited; children cannot inherit a fortune that has already been lost. Humans, as children of Adam and Eve are born without this grace much like how genes are passed on from generation to generation. Baptism is thus considered to be God giving that fortune back to humans, a vaccine if you may think of it to the congenital disease of the original sin. Even without sanctifying grace, good people were not thought to go to hell, exactly, but to Limbo, where they wait to go to Heaven. Oh, but that's another long, long trek into the Catholic Catechism than is needed for the purpose for which this page was created...
* There's also the central Jedi vs. Sith conflict. The Jedi traditionally wear simple robes, while many of the Sith opt for something more complex (and intimidating).
* There's also the Changeling Hive. Just like its occupants can change their form at will, the hive constantly changes its layout, and as a result is impossible to navigate without a changeling's assistance.
* There's also the Changelings from the episode "The Kid's Aren't Alright". They kidnap children and take their form so they can
* There's also the Chaos Shaper class, which players can buy after having had 15 months of membership in total. It lets them use the power of Chaos to land unpredictable effects on either themselves or their targets.
* There's also the character of Inara, who was included after Fox asked Whedon to include a "space hooker" in the cast. Inara's character was made to be a Companion, basically a high-class, educated woman who acts as a cross between a courtesan and a geisha. Several times throughout the show, Mal refers to her as being a whore, to which she is
* There's also the charric, which was the Chiss' equivalent of a blaster. Due to the way they worked, charrics
* There's also The Cheat, something that gets lampshaded regularly, as in the early cartoon "Where's The Cheat?"
* There's also the Child of Miare, who can remember her past lives and is compiling the Gensokyo chronicle. Which means it's possible for her to be killed by a youkai and then write about the encounter after she reincarnates.
* There's also the Children's Internet Protection Act of 2000, which requires all schools and public libraries to install filters on their computers in order to receive certain federal funds. It's been challenged by the American Library Association, which has a general policy of frowning on anything that restricts free access to information, but it was upheld by the Supreme Court.
* There's also the classic scene in which Squidward wonders who was flickering the lights throughout an episode, and the camera shifts to see
* There's also the Cloak of Reflection which confers complete immunity to all direct damage spells, and pre-nerfing bounced the damage back to the caster too.
* There's also the clowns and jesters of the Ankh-Morpork Fools' Guild, whose grim dedication to tired old gags and jokes and reflexive inability to resist an obvious set-up make them objects of scorn and pity.
* There's also the commentary they for an episode where they brought in a total stranger from off the street and asked him about the episode as he watched it.
* There's also the common pairing of Soldier: 76 and Reaper. Granted, they were friends in Overwatch's heyday, but after a few decades they're now sworn enemies who wouldn't hesitate to kill each other.
* There's also the common variant of the trope, "Does this make my butt look big?". Because of evolving beauty standards in the 21st century, the implication that a woman has a big butt is a lot less likely to be considered an insult than it

once was,
* There's also the concept of Chaos Undivided, whose tenants worship the main four Chaos gods as a pantheon or as aspects of a higher deity. Chaos is usually at its most unstoppable when the gods set aside old rivalries and focus their power and followers on a single goal.
* There's also the conflict in the back-story between the Librarium and the nation of Ikaruga, which didn't use technology
* There's also the Coup De Grace rule, which states that attacks against a helpless target are instantly lethal, no ifs, and, or buts. As the rulebook puts it, it doesn't matter how powerful or well-equipped you are, "
* There's also the Covenant Type-26 Assault Gun Carriage (and its Type-58 successor introduced in
* There's also the creator of the Omnitrix, who turns out to be an older version of Ben's Grey Matter alien, but only when we first see him in
* There's also the creepy painting Strong Mad keeps in his closet, which depicts a gargoyle-like creature named Rocoulm who says "Come on in here!" and causes anyone who sees the painting to get "the jibblies."
* There's also the cryogenics lab where Fry and others throughout the series are frozen. It remains completely functional and undisturbed while the rest of New York appears to get destroyed several times. Justified in that
* There's also the "Cult of the Once and Future King", in New Britain, which worships
* There's also the Cutie Mark Crusaders. They're significantly older than five, as shown in "For Whom the Sweetie Belle Toils", and talk about how they're not little kids anymore, yet are clearly not teenagers.
* There's also the Damage Trigger Check. As you take damage, your Vanguard may grow stronger (so you don't need to defend as much that turn), and in addition, you may draw a card, or even heal some damage.
* There's also the Dark World Arc, which was originally just meant to
* There's also the Daystar, the gigantic flaming mecha that serves as Creation's sun and the Unconquered Sun's base of operations. It has a cannon that, if fully powered up, will destroy all of Creation. The Unconquered Sun has only used it once - during the days of prehistory, to destroy the blighted copy of Creation a Primordial tried to use to replace the genuine article - but it's noted that, should the world fall to the Yozis, he may have to use it again.
* There's also the "Deception" Music Video in which Jem is Angsting over having lied to Rio about being two different people. In it, Jem and Jerrica tug on his arms from different directions and Rio literally tears in half. what looks like purple confetti comes out too. Subverted in the fact that Jem and Jerrica are the same person. Rio just doesn't know that. He is officially with Jerrica but kisses Jem and occasionally acts like they're together.
* There's also the Democratic Order of Planets, of which Earth is a member, and which appears to be responsible for military "protection" of Earth and allied worlds. When Zapp Brannigan accidentally destroyed the new DOOP Headquarters in the Neutral Zone, the DOOP council moved back to their old HQ in Weehawken, NJ.
* There's also the Denial Gundam, which has purple accented additions on its gray body and unleashes purple energy with its attacks. Its pilot, Junya Inose, uses it to pummel the Try Burning Gundam to a pulp using various martial art techniques he's "stolen" since leaving the Jigen Haoh School.
* There's also the derilict ship from the same civilization that built Eina-Afa and was used to track down her location. Its age is described as, "Micrometeor pocking, interstellar medium accretion, and vacuum-welding suggest a drift period of indeterminate length between 'this can't be right' and 'we now doubt whether these techniques are accurate.'"
* There's also the desperation attack from the first boss: calling the player's parents. If he succeeds, the player's father calls him to tell him
* There's also the Devil and Guilt Hulks, the worst parts of Banner's extremely fractured psyche, locked up in the very depths of his mind. Devil Hulk especially wants to smash the entire world, just for Bruce.

* There's also the Discordance, which is some sort of counterpart to the Correspondence. All that's known so far is that it has something to do with the void between stars, and that reading it too much can
* There's also the distinction between the Space Marines and the Custodes, the Emperor's personal troops and bodyguards. While the Marines place great pride in fighting "as brothers" with different specialists supporting each other, the Custodes fight as individual warriors. On a few occasions this has led to Marine characters completely losing respect for them, even thought the Custodes were cutting through enemies like paper.
* There's also the Droidekas, three-legged insectoid-looking droids dual-wielding blaster cannons that can curl up into a ball for fast travel and deploy personal shields capable of stopping conventional blaster fire. In their first appearance, Qui-Gon and Obi-Wan have to make a retreat as soon as they show up, as even deflecting their own blaster fire back at them won't work.
* There's also the dwarf insult tossed at Cheery when the dwarfs see her dressed in a way that clearly indicates she's female in
* There's also the early episode "The Crackpots and These Women," where Josh finds out that as the deputy chief of staff, he's one of the only people who would be protected by the NSC in the event of a nuclear attack. He's very distressed by this and in the end decides to give up the privilege, because he'd feel guilty working with his friends every day knowing that if nuclear war broke out, he'd be safe and they'd be left to fend for themselves. There are any number of smaller examples with this show, but few of them deal with the actual possibility of death.
* There's also the Ekose, feline aliens who seem to have a religion based around hauling freight. And the Lopps, rabbit-like beings who travel the stars to find or trade for "shinies".
* There's also the... Entity, Bender encounters when he's blasted out into the cosmos. It may be a super-AI in the form of a compressed galaxy, which was the initial assumption; it may be some sort of energy being; it may in fact BE
* There's also the episode "A Tribe Called Girl", where Dexter decided to study "girls" in their natural habitat by watching Dee Dee and her friends having a slumber party.
* There's also the episode in Japan, where Homer is arrested. The cell door looks imposing. But after being released, Homer just walks through the paper wall next to it.
* There's also the episode in which Rachel prepares a trifle for dessert, only she ends up mixing the recipe and the result is
* There's also the episode in which they take random, sometimes disgusting pictures of themselves with someone else's camera — only for the camera's owner to be hailed as a genius when the photos are exhibited.
* There's also the episode "Prom-Ise Her Anything", which had Sneezer playing romantic music on a sax to bring the right mood to a scene twice. The second time, he turns to the camera and remarks, "I also play at bar mitzvahs."
* There's also the episode "Spontaneous Combustion", where due to a misunderstanding Cartman ends up tied to a cross and forgotten about. By the time the boys arrive to retrieve him, he's been reduced to an emaciated twig, having survived for three weeks off his body fat. He's back to normal by the next episode, though.
* There's also the episode that re-uses footage from the first episode. Now
* There's also the episode where a video game company secretly provided assault rifles to college students so they could recreate not-GTA in real life to drum up publicity for the game. The harshest of the players is the
* There's also the episode where Fry goes insane and thinks he's a robot. He ends up speaking robo-speak even though his best friend is a robot who does not talk that way.
* There's also the episode where the town is divided over whether to change its flag, which depicts a lynching. The kids defend the flag, but they don't realize that it has anything to do with race. They didn't see it as white men hanging a black man, but as dudes hanging another dude. This display of innocence moves the

adults to tears and convinces them to compromise by keeping the flag the way it is but changing the lynchers to be multiracial, including having a black lyncher.
* There's also the episode where the woman put in charge of a tribunal takes about 24 hours to go completely nuts with power, and attempt to accuse the commanding officer who appointed her of the crime she's investigating.
* There's also the episode where Toofer discovers that Jack was a member of a secret Princeton society, where one of the rules is that if anyone ever yells out the name of the society, you have to immediately find an excuse to leave the room, and the writers use this fact several times.
* There's also the episode which reveals the Satellite of Love has a feedlot which the bots use to raise record-setting hogs. Where does a huge feedlot fit on a tiny satellite? "Just repeat to yourself: 'it's just a show...'"
* There's also the Eternal Empire, who had originated from the Unknown Regions and Wild Space. There's also the Chiss Ascendancy from the Unknown Regions, and the
* There's also the euphoric effects of going into a sarcophagus, which gives Daniel Jackson delusions of grandeur and causes severe withdrawal symptoms when he's made to stop.
* There's also the Evangelion units themselves. They use Unit 00 and Unit 01 in combat, even though they are a prototype and test type, respectively. Predictably, both units have numerous issues like going berserk.
* There's also the ever-constant problem of the Omnitrix not giving him the alien form that he desires. Acting like a puzzle of sorts akin to a tumbler lock, at first, Ben would quite often be transformed into an alien that he didn't want to be. He does get a little better over time, discovering new aliens altogether and their powers, but it still acts against him. Thanks to some guidance from the Omnitrix's creator (much to his constant frustration), Ben eventually does gain full control over the Omnitrix in
* There's also the Exo-Toa which, as the name suggests, are an exo-skeleton armour for a Toa. If need be, they can function independently making them robots as well as Power Armour.
* There's also the experimental laser rifle Kaneda gets a hold of in
* There's also the fact his signature Pokemon seems raised in order to defeat the Legendary Dragons. He certainly didn't expect you
* There's also the fact she shouldn't be freaking out the natives, especially not to tip off Haruhi about aliens being real. As a result she probably has to do a lot of redundant tasks just to appear human.
* There's also the fact that almost nobody knows how to make fire. You'd think more people would look it up upon learning they're going on a month-long campout (especially after seeing tribe after tribe not be able to do it in previous seasons).
* There's also the fact that a lot of the major museums of the world (Louvre, British Museum and others)
* There's also the fact that baseball leagues play many, many more games in a season than any other sport. No pitcher can play every game in a season, and very few position players can while staying productive. Most leagues have a "designated hitter" who does not field a position, and can be used to keep strong batters effective by keeping them out of the field; even then, teams almost always have to call up bench players and pinch hitters for later innings. Also, games are played in a series, rather than single match-ups. A team, may, for example, keep an ineffective starting pitcher in the game for many innings in the first game for a loss, and then clean up the next two with better starters and a fresh bullpen.
* There's also the fact that Burton's creative input may have been exaggerated to get the film extra publicity.
* There's also the fact that Dante wields his father's main sword in
* There's also the fact that Demona shattered some people while they were turned to stone yet no one questioned where they went.
* There's also the fact that due to his aforementioned "Everyone is mine to manipulate" attitude he has
* There's also the fact that Ethan is apparently one of the few who grew up on the

island, which makes you wonder where he got his surgeon skills. Of course, considering that the whole surgeon thing is from a throwaway line in
* There's also the fact that his initial objection about exposing Earth to alien threats ignores the fact that you can't put the genie back in the bottle. Earth had
* There's also the fact that Hunt had a Nietzschean on his own ship serving as his second in command, attempting to take over his ship in a mutiny. With the Nietzscheans being a part of the Commonwealth and serving on many of their ships, it is highly unlikely that such incidents were isolated to a single ship.
* There's also the fact that in the second film he bound and gagged Andy to a bed, and he laid on top of him in order to perform the soul transferring.
* Theres also the fact that it has no logic or reason to it that a human would understand, meaning that the relative time flow could be
* There's also the fact that Leia explicitly says she remembers what her biological mother was like in
* There's also the fact that Neil and Meg each get to present a report of their own. Neil's is just footage of Meg kissing him when they thought they were going to die in a newscopter crash. Meg's is her rebuttal, insulting him and interviewing various people to prove that she never would have kissed him if she didn't literally believe she was about to die. The anchors (and producers, who either didn't prescreen them or didn't care) treat them as any other human interest piece.
* There's also the fact that New Zealand offers overall 'endorsements' for your academic year: Students normally take about 80 'credits' worth of classes and if 50 or more credits are at Excellence level (A grade) then you finish the year with an Excellence Endorsement, which generally only the top 7% of students achieve. (You can get Merit Endorsements with 50 or more Merit and Excellence credits, which about 25% of students get). So that one exam paper worth 3 credits could tip you from 48 to 51 Excellence credits, and change your whole year's academic record. (To a lesser extent there are also individual subject endorsements, if you get 14 Excellence or Merit credits in one subject - so again that one exam paper could change the endorsement for that whole class).
* There's also the fact that often, the sniper will see his target's face, and then snuff his life out. It's a very different thing from shooting someone in the heat of battle, It's simply killing someone, holding the power of life and death over someone else, and having to pick death because it's the sniper's job. These days most modern armies don't pick who's the best at shooting, they pick the ones who won't be mentally scarred from it.
* There's also the fact that she apparently never noticed her son taking in and pretty much raising another girl from who-knows-where.
* There's also the fact that she refuses to do the logical action and kill him.
* There's also the fact that she's a bombastic self-assured and thoroughly confident Brazilian supermodel. Who can,
* There's also the fact that Simon seems completely certain that if he tried to take River back to their parents, they'd just hand her back over her former captors.
* There's also the fact that sometimes the scientists would completely punk the military by taking the physics experiments they wanted to do, dressing it up under the pretence of developing some impractical military technology and getting the military to fund it.
* There's also the fact that the Gundam X's Satellite Cannon was actually destroyed in the first battle against Carris. Nobody outright says "the cannon was destroyed", but you can clearly see the cannon and the
* There's also the fact that the shinigami aren't able/willing to do their jobs of keeping souls in balance and sending the dead from the human world to Soul Society. This means that the entire structure - Soul Society, the human world and the Hollow world of Hueco Mundo - is in danger of collapsing in the not-too distant future. So even if the war goes in favour of the increasingly damaged Resistance, it could yet be for nothing.
* There's also the fact that the so called level 9 weapons have no added effects like the previous levels do (save for the level 1/2 versions).

* There's also the fact that the version of Specter we see in the film isn't quite the real thing- Ed Bloom is exaggerating the story.
* There's also the fact that they have a steadily increasing supply of blackmail images and videos they can use against their boss: they use this to extort an incredibly large base, some very impressive computers, and some very impressive hardware from their boss, but can't use it to keep from being forced to do their jobs. So, if they go out and get killed, Schaefer wins, and if they come back successful, the Inquisition wins. Perfect Win-Win scenario, as long as their failure doesn't doom the planet to dominion by the dark gods.
* There's also the fact that Tigers and Panthers were exceedingly rare, with around 1,500 Tiger Is, 500 Tiger II's and 7,500 Panther tanks being made. The US built almost
* There's also the fact that towards the end of the movie's production, the critics it was based on who had supposedly proved many of the dangers of fracking were discovered to have been frauds. When asked how the movie was going to address it, it was suggested that in the movie, the fraudulent critics would be portrayed as secretly being in the employ of the companies that would profit from fracking and that they
* There's also the fact that when a normal human breaks a fae bargain, the Wyrd will often punish the mortal by causing him to stumble into the Hedge and get caught by the True Fae. No changeling would wish that fate on anyone, so they try to ensure that the bargains they make are extremely easy to keep.
* There's also the famed Kurain Spirit Channeling Technique, which allows certain individuals to contact the souls of the dead and let them possess their bodies to communicate with the living world again. This might sound like the perfect way to expose murderers—after all, why not just ask the victim who killed them? To prevent the technique from making murder an easily solved crime, it's made clear that only a select few individuals (mostly the Fey family) can perform it, and only after rigorous training (or by simply having immense psychic power inherently). An in-story justification also exists in the form of the DL-6 Incident, a murder case where the police, completely out of leads, asked
* There's also the famous close-up of the Terminator's endoskeleton. The Terminator itself isn't on fire, but the tanker trunk wreckage surrounding it still is, and the backdrop of fire from the burning gasoline as the Terminator glares into the camera is so pants-wettingly terrifying that it may as well be all most people remember about the first film. (Indeed, the
* There's also the female Nibblonians, with ribbons on their eyestalks and long eyelashes — though oddly enough, their race also has a more realistic sexual dimorphism in the males having larger canines.
* There's also the fight against Lee Bai Long. To stop him after he goes berserk once Jun's spell tag is destroyed, Anna summons the ghost of Bai Long's deceased master, who possesses Yoh in order to put the raging
* There's also the firefight in the Citadel DLC where the team receives an urgent call... from the pizza delivery volus, demanding payment.
* There's also the first fight against Jack Krauser, which is one big
* There's also the first "Play for Today" pilot where he advised this right off the bat; that can probably be chalked up to
* There's also the first year of the Second Robotnik War, which saw Dr. Eggman regain his power base and promptly retake Mobius after Sonic had been thought killed in battle.
* There's also the Fisherman and the Genie, where the fisherman, although he can't make a wish since he came up against a Genie so Jackass that it won't even pretend to grant wishes before it kills you,
* There's also the foreign nation of Samarkand, which is an amalgamated counterpart for pretty much everywhere else, being best known for the invention of katanas and gunpowder and having dark skinned people who don't wear a lot.
* There's also the Forerunners, whose technology the Covenant based their own on. In fact, the Covies don't even use their own knock-off versions very effectively; whenever humans and their

* There's also the Fourth Doctor's notorious fourth-wall-breaking "even the Sonic Screwdriver won't get me out of this one" line in "The Invasion of Time".
* There's also the Freelancers, who were an extremely badass group of super soldiers in the prequel arcs.
* There's also the frequent use of certain uncommon words such as "abscond" and "strife".
* There's also the "Funniest Joke in the World" sketch, wherein said joke is used as a war weapon against the Nazis, but the parts that best fit the trope are the German "counter-joke" (which are just captions superimposed on Hitler's speech footage) and the Allied soldier being interrogated at Gestapo.
* There's also the "G18", which is a modified Glock 17 standing in for the full-auto Glock 18. As mentioned at the top of the page, this is a common occurrence in films, and the most likely reason why the same thing happens in this game, where they can model whatever guns they want (such as
* There's also the Galactic Federation, which claims to promote peace among the rest of the galaxy but when they occupy Earth they "pay" the population in pills to keep them docile (including force-feeding them if they won't eat). This, and everything else they do over the course of their appearances, makes some fans sympathize with
* There's also the game of chicken played between baserunners, the pitcher, and the catcher. The defense knows that the offense will try to steal bases, and will maintain utmost vigilance to prevent such. The offense knows the defense knows, and will try to bluff the defense, or sacrifice one of the base runners so that the other can advance. The defense knows the offense knows the defense knows...
* There's also the Gangreen Gang, a group of teenage delinquents with inexplicable green skin (the source of their name). They're not particularly successful criminals but tend to be a rather sadistic, destructive lot and indulge in cruel, petty crimes like bullying little kids or tormenting animals.
* There's also the Garfield Randomizer, which takes random panels from a vast library of Garfield comic strips and puts three of them together to form strips that are, as the theory goes, funnier than the originals. There's been copyright trouble over this one, as predicted, but those resourceful enough to look for it can probably find it.
* There's also the Gatling Laser, Fusion Laser, and Quantum Laser amidst the other weapons.
* There's also the genuine outtakes on the DVDs (albeit with machinima deliberately made for them), which are easily twice as funny.
* There's also the ghost of a boy who died from an accidental gunshot wound.
* There's also the giants, especially Ymir. The dome of the sky is from his skull and the seas are made of his blood. The dwarves were originally the maggots that lived in his corpse. One story of Thor and Loki is them traveling to the land of the giants and they sleep in a glove big enough to hold the gods, Thor's two goats, and the two kids Thor picked up as servants. The giant who owned the glove shrugged off Thor's hammer strikes, calling them acorns that landed on his head.
* There's also the Glass-Eyed Men, who at one point possesses a robot.
* There's also the Global Occult Coalition's White Suits. In addition to the standard power armour trifecta of enhancing the wearer's strength, speed, and resilience they have an
* There's also the Gluon Gun, essentially a backpack-sized nuclear reactor that is quite capable of chewing through enemies fast and its ammo supply (shared with the Tau Cannon) faster.
* There's also the Grand Midwife from Kif's homeworld. She's also the Grand Priestess, the Grand Lunch Lady, the Grand Funeral Director, and the Grand Butterfly Curator. When Fry recognized her in her second appearance, she explained that she works five jobs. Each of them grand.
* There's also "The Great Money Caper", where it is revealed that Homer and Bart's entire comeuppance was staged by Marge and Lisa. Homer then realises the implication that the police force, the TV news, a courthouse full of people, and a popular entertainer had nothing better to do than to help deliver

* There's also the Grim Guzzler, the bar of choice for Dark Iron Dwarves, which funnily enough is the only place in Blackrock Depths where they
* There's also the group of pirates at the beginning of the film who sing
* There's also the guards that come if you're raiding a vault, though they can easily be sent away by
* There's also the Half-Zatoichi. Not stated to be evil, but you have to kill someone in order to switch to another weapon without losing health.
* There's also the Headbangers' initial reaction to Eddie playing the Battle Cry solo for the first time:
* There's also the Head Beagle, the dog who rules over all dogs in the world and has the respect of humans. Other than Snoopy's brief reign, no dog who ever held the title has ever been seen.
* There's also the "Hero's Secret" which is a more typical example. You start either game you played over, with all your rings from before, plus the extra heart even though you're starting at the beginning.
* There's also the high-backed teleporting green throne used by the eponymous individual in
* There's also the Holy Dragon, who can absorb non-elemental special attacks, which is much more useful (Or annoying) then the abilities possessed by the previously mentioned monsters, due to how prevalent such attacks are.
* There's also 'The Honour of Israel Now' where the unusual events surrounding the death of the Earl of Glengyle, including the lord's missing skull have a rational and benign explanation. (He left all his gold to his servant Israel Gow, who took this literally as all his gold and nothing else, including his gold tooth)
* There's also the hunters in previous games, which can decapitate the player, some faqs say that this can only happen when your health is at "Caution" level. Not true, it's just far more likely to happen at "Caution," but they can do it anytime.
* There's also the idea of Frieza as the most powerful being in the universe. For a time the show found ways to
* There's also the Imperial Guard. While they do have their moments, they are usually the ones who suffer the worse ends of everything the Imperium encounters and die by the billions in every possible outcome in the universe can throw at. Indeed, this tendency is commonly what endears them to their fans, as it underlines the Guard's bravery.
* There's also the Imperium's Arcano Flagellants. Take a person, lobotomize him, replace his arms with flails, swords, or whatever. Then condition it to be perfectly calm and at peace with its condition so long as its helmet (Which plays calming, soothing religous images and music) is on, making it easy as pie to put them into position. Then take the helmet off while they're pointed at the enemy, pump them with an insane amount of stimulants, and watch your lobotomized murder machines rip the Foul Xenos to shreds. In case you haven't noticed, the Imperium of Man is not very nice.
* There's also the implication that some of the jouten (bodies) of certain
* There's also the incident during the road trip from hell, where Ted and Marshall had to "cuddle" to conserve warmth in their car during a blizzard. Ruthlessly joked upon by the other 3 members.
* There's also the infamous Bonju avatar (avatars being essentially the Neopets equivalent of "achievements", rewarding you with little icons for your user lookup/ forum posts for completing specific tasks around the site), which had players puzzling for
* There's also the infamous tiny, nondescript room you pass through before finding a shotgun
* There's also the instance where Balrog force-feeds Toroko red flowers to turn her into a Frenzied Mimiga.
* There's also the instance where Misa is contemplating killing Rem — right in front of Rem.
* There's also the instance where the sun helps illuminate the painful bump on a man's skin where a fly had laid its squirming larva.
* There's also the intense fixation that Alfons Heiderich—Al's

* There's also the interesting case of Sanae, who used to be revered as a god in the outside world and is believed by some fans to have had a hard time adjusting to this trope's effect when she arrived in Gensokyo.
* There's also the inverse, writing foreign words in hiragana instead of katakana (example: "start" as "すた〜と" instead of "スタート").
* There's also the inversion: Pokémon who are depicted as flying or hovering but can be hit by Ground-type moves like Magnitude and Earthquake due to them not actually being Flying-types or having Levitate as their Ability. Some of, them, like
* There's also the issue of Birdman's duplicate still technically being him, in a sense, and can't really be called an impartial juror. But again,
* There's also the issue of whether or not the Master Chief can get hurt by falling. Starting in
* There's also the Ithorians, who have two mouths, each stretching along one side of their head and neck, and four throats. Their native language is in stereo.
* There's also the K9000, a minigun powered by the brain of a dog. It'll even bark, whine and growl and includes cybernetic ears and noses.
* There's also the Kanly, a code (and therefore presumably written in a book somewhere) describing the rules that nobles must abide by during their feuds. One rule mentioned: no use of nuclear weapons. Violation of this rule is punishable by
* There's also the Keronian resonance ritual, which acts as a bonding ritual of camaraderie between fellow countrymen far from home, but to anyone else
* There's also "The King is Dead" when Lois makes Peter "French toast," actually a pile of mismatched foods including an entire fish, to show him how changing something too much can make it unrecognizable and bad.
* There's also the kiss episode between T.J. and Spinelli, with the implication that there's a lot more chemistry than either admits. In another episode, Spinelli's mom even mentions that T.J.'s the one Spinelli has a crush on.
* There's also the Kroot, who don't go in for skulls so much as rib cuts and sweetbreads. And they do it to their fallen brethren as well as foes. Since they absorb genetic traits from what they eat,
* There's also the lack of collision detection for walls and gates in general, which you can exploit in
* There's also the late Pirate King Gold Roger. And Vista of the Whitebeard pirates. And Zeff, Sanji's mentor. In fact it seems like a disproportionately high number of high level pirates have badass moustaches.
* There's also the leader of the Bounty Hunters later on, but he is more of a
* There's also the Leap Attack feat, which allows a player to combine a Power Attack with a jumping charge to do up to three times their normal damage.
* There's also the legendary Black Spathi Squadron, a splinter faction of the Spathi composed of brave warriors who fly Eluders painted jet black and fight bravely throughout the universe! They're not actually in the game, of course.
* There's also the less common "Tellurian" from "Tellus", a variant Latin term for the Earth.
* There's also the Level 2 Sword, which you get by hunting around for 20 Secret Seashells all over Koholint and then turning them in at the Seashell Palace. Not only does the Level 2 Sword deal twice as much damage as the regular sword, but if your health is full, the famous sword blast from the original game makes its return.
* There's also the leypoint in Wajaom Woodlands. Players can complete a quest to receive a ring that teleports them to that point that involves them getting
* There's also the "Liberty Laser", Liberty Prime's Laser Vision. Ever wanted to throw a big, badass, 5000+ damage dealing Lazorbeem at an Enclave trooper? Now you can!
* There's also the Librarian of Unseen University, who is an orangutan due to a magical accident. People found it odd at first but now barely think about it. It's been said that if someone told the staff that there was an ape on campus they'd go ask the Librarian if he'd seen it.

* There's also the literal jar where Angel's soul was sealed to bring Angelus out temporarily.
* There's also the main villains, a group called Millennium. Even the lowliest mooks of that army are
* There's also the married dirt farmers who the Order of the Stick saves from ogres they constantly snip at each other, and the old man suggests he even got kidnapped by said ogres just to have some peace and quiet.
* There's also the Martian Technocracy (also known as the Mechanicum, or Adeptus Mechanicus). They hold a weird position in the Imperium, as the Emperor guaranteed their autonomy, and virtual monopoly on high technology by treaty just before the start of the Great Crusade. The result is a sovereign
* There's also "The Math of Love Triangles" which is ostensibly about how to use geometry to resolve a
* There's also the matter of Genis and Raine being half-elves. Fairly early in the game, a half-elven character compares himself to the two of them, but quickly and awkwardly retracts this comparison when Genis nervously declares them to be elves, and he realizes they've been traveling incognito. Combined with moments like Raine telling Genis "we're not like them" about a group of half-elven villains, the player may well have forgotten that their race was supposed to be a secret by the time the shocking-to-the-characters reveal arrives several plot twists later.
* There's also the matter of the fake!Hounds. Brienne, even knowing that Sandor is "at rest," refers to Rorge and then Lem as "the Hound" in her narration after they each appropriate the Hound's distinctive helmet. This gives more support to the idea that "the Hound" is only a title/
* There's also the matter of whether the light has mode memory for the night-vision-friendly, extra-dim "moonlight" mode: more than one person went to bed using that mode on a new torch, woke up in the middle of the night for a trip to the loo, grabbed the flashlight and got themselves dazzled into seeing stars because they forgot or didn't know that "moonlight" wasn't memorizable.
* There's also the Melissidae, who cast themselves as 'mother of their hive' (one example given is
* There's also the miracle, Great Magic Barrier, which basically nullifies 90% of magic damage.
* There's also the moment where Iris realizes that Barry is the Flash, which the audience spent most of a season waiting for.
* There's also the money issue: cutscenes show CJ being dead broke after 'Green Sabre', yet you can have millions of dollars and a lot of property even at this early point of the game (and without cheating).
* There's also the more canonical example of Thrall and Tabetha Foxton.
* There's also the more serious problem that the mark persists even in his animal form, which means that he runs the risk of Akane discovering his curse. This is a problem since, in his pig form, he's been posing as Akane's pet P-chan, and sleeping in her bed. If she were to find out, she would likely not be happy about it.
* There's also the more simplified Garfield Hunger Buster released by Tip Top ice cream in New Zealand and Pauls Ice Cream & Milk Ltd. in Australia.
* There's also the mountain giants who are right behind their frost brethren in harassing humans and gods. Then there are fire giants, particularly Surt and the Sons of Muspel, who play a major role at Ragnarok.
* There's also the Mourneblade, which is randomly dropped by Azahgals. It has the same attack as the Crissaegrim, except it only hits once. Instead, it heals 8 HP per strike, which breaks the game wide open. You don't even have to
* There's also the move Return. It becomes more powerful the more the user likes its trainer, and the animation shows the user giving off a shower of hearts before attacking.
* There's also the movie with the show, The Wedding Bride, which was written by Tony who ran away with Ted's intended bride, Stella. Since Tony actually got Ted his teaching job out of guilt for the incident, we can surmise the film is highly fictionalized since the character, Jed Mosely is extremely abusive.

* There's also the mummy mystery episode. Castle is supposedly cursed for disturbing a mummy's casket, and murder victims have been killed by apparently unfortunate accidents. Castle has horrible luck throughout the episode, while Beckett is laughing the whole time.
* There's also the nation of Varang, which uses an elaborate caste system based on astrological prediction. Newborn children have their stars read to determine what their talents will be when they grow up, and they are given a caste and corresponding tattoo to identify them. The ritual actually does work, in mechanical terms identifying what the child's favored ability will be. However, the ritual is not always performed by a competent astrologer, who are loath to admit when they realize they can't do it. As such, some unlucky individuals are mis-casted, or even denied a caste altogether, leading to a permanent semi-exile in their own nation.
* There's also the neh-thalggu, or "brain collector", an abomination that has been
* There's also the nerve attack, which causes brief flashes of light when it hits.
* There's also the Nightmare Realm. A decaying dimension that is the home of several interdimensional criminals and nightmares, all of which are leaked into the titular town in Weirdmagedon by Bill Cipher.
* There's also the nobleman's daughter who falls in love with Feynriel. He rescued her from being gang-raped by a group of bandits by
* There's also the number three. The fic stars the 33rd class of Talent High School. Three students refuse to vote for Mitamura. The first killing takes place on the third night. The second and fifth motives have deadlines that are three days after their introduction. Three students also have highly unusual talents.
* There's also the numerous baserunners who have used their cleats as weapons of war.
* There's also the "NutriYum" energy bars, which are practically pure high-fructose corn syrup, but marketed as natural and healthy, further backed by the use of
* There's also the occasional tabloid article accusing millennials of sabotaging the economy by not spending money on diamonds, new cars, houses, and the like.
* There's also the odd rare case of a ghost that was never a living human being. It may have spawned from something. It may be part of a broader species that's made of the same kind of "matter" as human ghosts. It may be an animal, or a
* There's also the oft-forgotten fact that Galactus actually only needs to feed on planets that are
* There's also the Old Gods, precursors of Jack Kirby's Fourth World beings. They are actually older than the DC Universe, and are said to have caused the destruction of the one before.
* There's also the on-and-off romance with Bernadette and Howard, which shouldn't be going anywhere considering that
* There's also the one where Penny finally loses it with Howard and sends him into a downward spiral of self-loathing despair because of the scathing put-down she gives him. It doesn't help that she was pretty much in the right and it's remarkable she waited so long before calling Howard out on his boorish clumsy chat-up lines. She is still made to feel like a jerk by the others for being so brutally candid. She feels she has to go and apoogise. But still ends up breaking his nose.
* There's also the one where the Rabbit dresses up like a kid and pays for a box of Trix, and the kids knock off his hat and steal the Trix.
* There's also the one with Plucky and Hamton breaking into Warner Bros. Studio through the sewers with a
* There's also the original Ino-Shika-Chou trio, aka the fathers of Team 10, although they're all in their forties.
* There's also the original Inquisition, an ancient group of mage-hunters that was absorbed by the Chantry and turned into the Templars. The new Inquisition in
* There's also the Orks, who fight, maim, and kill their way across the universe because... it's fun. And it's what they were made to do. And all the other Orks are doing it. And it just feels
* There's also the Orpheus' tome that Dean reads from in the ambiguously canon Christmas special episode. While perusing it for Christmas stories, Dean

accidentally summons
* There's also the other side of that coin; the Gods of Chaos are gods of bloodshed, decay, degradation, and relentless ambition, but they're
* There's also the other two 1000-year-old witches, Bernkastel and Lambdadelta, though the question remains as to
* There's also the Outsiders, who are explicitly not associated with the Down Below, but tend towards
* There's also the Pak'ma'ra, for whom the only reproductive information mentioned in-show is that the "hump" on their backs is actually their reproductive area. (
* There's also the Parable of the Dishonest Manager, who faced unemployment because he wasted his master's funds. So he cleverly marked down a few of his master's creditors' bills (possibly making up the difference out of his own commission, so he may not have been committing new embezzlement), ingratiating himself with the potential new employers. Moral: If even crooks are wise enough to use their money to do good for people, you should too!
* There's also the part where Sousuke is not only a hardened professional soldier who's never (intentionally) hurt anyone outside a battlefield but a genuinely nice guy who will literally go to the ends of the earth for the girl he loves. Leonard's a jerkass whose idea of courtship is forcing a kiss on the unwilling object of his affection,
* There's also the part where the rock monster trashed a pack of the bad guys and ended it with busting clear through the wall of the ship; you see an external shot with a bunch of stuff flying off after them but no sign of that particular hallway afterward, so it's hard to tell if it's subverted or played straight.
* There's also the Paternoster Gang, a crime-fighting team in Victorian London that comprises Madame Vastra (a
* There's also the pattern on her dress that combined with her breasts looks like a penis and testicles.
* There's also the Peanuts character 5, which is actually short for 555. But it's not the phone prefix; his last name is the family ZIP code, 95472. (He has older sisters named 333 and 444, so 555 was simply next in sequence.)
* There's also The People Eater, if his name is to be taken literally. (Which, given his obesity and his case of gout, you probably should.)
* There's also the Pfhor attack drones in the second game, and the Cyborg Drones in the
* There's also the Pfhor, Tycho, and Jjaro logos, which anybody who's played every game will remember.
* There's also the phase skip feature in the phase portion of the Octo Expansion. If you die five times during a phase, Agent 8 will gain
* There's also the piece he uses against A.M.A.Z.O. when it copies Superman's powers (and weaknesses.)
* There's also the planet from "My Three Suns," where it's rare for all three suns to be down at once.
* There's also the planet Masada, home to religious zealots, which clearly derived its name from the
* There's also the planet of Second Miltia, suggesting that other planets are numbered in this way.
* There's also the point that such a story might merit round-the-clock coverage, especially if it's a recent development.
* There's also the point where present Bill and Ted meet future Bill and Ted (or the same scene later in the film where
* There's also the positive energy spirits of the Sapphire Guard, sworn to protect the Azure City throne room as a final line of defense. Redcloak muses on the trope
* There's also the practice match between the team and a team from the local prison. The catch? 1) The people playing the prisoners are all former NFL pros, such as Jim Kelley, Too-Tall Jones, Jerry Rice, etc. 2) The Dean who wants to shut the team down arranged it to get players hurt. "Man, I don't feel well. I think I swallowed a finger".
* There's also the Progenitor, the giant firaxan whose cry drove the smaller

firaxa into a frenzy and made the Selkath researchers on that underwater base homicidally insane. She's not actually evil, though, and if the machinery is destroyed she lets you pass. Poisoning her means dooming the entire biosphere.
* There's also the question, if a Ghost actually needs to inhabit a Shell at all. A question that Motoko Kusanagi and the Puppeteer both proved to be true in the manga. Motoko achieved a form of
* There's also the question of Elihu, who speaks just before God shows up. He's often lumped in with Job's "friends" as being in the wrong about Job's suffering, but God conspicuously doesn't mention him when telling off Job's friends. And Elihu claims to be presenting a different argument to the one Job's friends made. And when Gd shows up, his speech follow the same themes Elihu had just been using. It's possible that Elihu's speech is meant to be interpreted as the
* There's also the rare drop item [Deed to Thandol Span]. Thandol Span is a massive bridge, making the item basically a WoW equivalent of a deed to the Golden Gate Bridge. The deed itself is classified as junk and as such has absolutely no use, but it fetches a high price from the vendors, and occasionally even from players who will buy it for its novelty value.
* There's also the Recarmdra spell, which fully heals/revives all other allies in exchange for the caster's life (or reducing their
* There's also the Red Court's Lords of the Outer Night, which may or may not be Mayan gods. If they aren't, then they're impersonating them. Either way, the Mayan gods exist in the setting.
* There's also the relationship between prison warden Matron "Mama" Morton and the women in her cells. Despite being their jailer, she's on friendly terms with all of them, and they appreciate her in return. Mama's even willing to sneak them contraband items like cigarettes, provided they grease her palms (or, as Mama puts it in song: "If you want my gravy, pepper my ragout").
* There's also the remnants of the fortress beneath the Hogwarts Lake, which has been thoroughly warped by the sleeping subconscious mind of
* There's also the Reverend Godly Fecund, who didn't catch on that his parishioners had all died from starvation. Pip Bin fails to recognize him when they meet up again in series 4, even though nothing about the man has changed. Meanwhile, Reverend Fecund fails to notice that Harry Biscuit
* There's also the "Right Decision, Right Now" campaign, which, in addition to having anti-smoking products that are ridiculously lame, also implies that, while smoking is a bad decision
* There's also The Rock, the base of the Dark Angels chapter of space marines. It's the largest surviving remnant of Caliban, their home planet, that survived the orbital bombardment when half the legion went rogue. It's one of (if not) the biggest and most heavily armed things in Imperial space, being much larger than battleships or battlebarges, and it's surmounted by the Tower of Angels, the main fortress of the Dark Angels from before the destruction of Caliban.
* There's also the Runeforging ability Death Knights get that can be used on swords, that while not making the swords in question in question
* There's also the san greal (the Holy Grail). No-one's quite sure which pantheon it comes from; while it is part of Christian iconography, any Scion with a strong rating in the Piety Virtue can use it.
* There's also the scene in "Hammer of the Gods" where an entire roomful of pagan gods is effortlessly slaughtered by Lucifer.
* There's also the scene in the page image, where a previously happy-looking supermarket clerk is now jaded and short-tempered. It's heavily implied that having to interact with SpongeBob on a regular basis was the reason behind the attitude shift.
* There's also the scene near the end of the first season where Matt, Bennet, Jessica, and D.L. are riding the elevator together. After some awkward silence,
* There's also the scene of the company getting drunk and messing around in their quarters that lightens the mood a little, and the scene at the end where
* There's also the season 1 episode where Homer and Bart go over one, lose their clothes, and Homer ends up being mistaken for Bigfoot.

* There's also the second Christmas special, with three stories set over the Christmas to New Year period. The first story has
* There's also the Sentry Bot. While similar in appearance to the ones from
* There's also the series itself as a whole, which quickly eclipsed every traditional fighting game in popularity, sales, and mainstream awareness and has never stopped doing that. It's not hard to find fans of traditional fighting games who are quite resentful of that, and you'll likely find at least a few who refuse to play a
* There's also the series-long running gag about the "Slap Bet". In season two Marshall and Barney make a bet over a secret Robin is keeping from them with the winner getting to slap the loser in the face. Lily thinks the whole thing is immature until they make her "Slap Bet Comissioner" with the power to judge who wins. Technically neither of them won as they were both wrong but Lily decides to punish Barney for slapping Marshall without "Comissioner's approval". She gives Barney a choice: either ten slaps immediately or five doled out whenever Marshall feels like it for the rest of their lives. Barney chooses the five slaps which Marshall hands out over the rest of the series.
* There's also the shadowcaster base class that can do a whole series of interesting things with shadows, including summoning them. Most of these shadow creatures come from the plane of shadows or the Shadowfell (depending on which edition of 'D&D'' you're playing).
* There's also the shipping Pinescone, which ships Dipper with Wirt (
* There's also the ship's teleporter, which they also never tested because it was designed to work with human biology, not Thermian, so when Jason is being threatened by an alien pig-monster they opt to use it on the alien instead. Since it
* There's also the short-lived "Pig Girl", who was mainly aimed towards young children, but was able to receive enough fans (who were teens and adults) to have a whole movie dedicated to her!
* There's also the short standoff between Revy and Dutch during the Nazi arc following Revy getting the
* There's also the shot that does a 360 degree pan around the group as they're surrounded by Chitauri. They aren't doing anything; it's merely for the audience to revel in the fact that, yes, these six characters are together in one movie, and they're about to kick ass together.
* There's also the similarly titled "The Day That Margaret Thatcher Dies" by Pete Wylie.
* There's also the slightly-more-controlled Assist/Cat's Paw, which randomly uses a move from one of your teammates' movesets.
* There's also the slightly psychologically unstable special ops Ghost units who, aside from being the only units who can call in nuke drops, also seem to enjoy doing so a great deal... Like, a
* There's also the "slime chamber" playset, released around the time of the second film. What this has to do with
* There's also the small fact of Volgin being an absolute psychopath, and that questioning his orders would be a good way to end up dead.
* There's also The Smiling Pony, who (along with an entire team of moderators) runs
* There's also the song where Pavi and Luigi prance around the Opera stage, singing about how Shilo's mother died.
* There's also the soulgems of dragons. They each have a gem in their forehead; after death it's collected and a Kin-Summoner can make them glow steadily and call the deceased back to speak through them for a time, but otherwise the dragons are truly dead and believed to have some kind of afterlife. Soulgems of the Lost, those struck down by the Demonlord, can't be used to summon and flicker with a faint and constant light. When they're restored in
* There's also the sound effect that plays when you're infected. It sounds like a distorted, drawn-out sound of glass screeching and then shattering, all while freaky whispers that sound like they're played backward assault your ears. It

doesn't help that infection level is one of the hardest meters to manage, so this will quickly evoke feelings of dread from players due to gameplay reasons as well.
* There's also the Spectre-specific weapons, most notably the Black Widow sniper rifle — essentially the Widow from
* There's also the stock audio of someone screaming "My leg!" as a variation.
* There's also the story behind the infamously hideous miniature that
* There's also the story of Homer, a cat who lost both his eyes to an infection as a kitten, but went on to live a long and happy life. (Info and picture
* There's also the story that a woman claimed to have put a similar curse on Nottingham Forest (maybe she was a Derby fan...), but it clearly failed, since it was just before they won the European Cup two years in a row.
* There's also the strange reality bending entity Murphy Law that appears on SCP entries and tales who can use this to alter reality to fit his monologue.
* There's also the streakbreaker feature, which prevents missing too many attacks in a row (if your tohit is high enough, it will kick in after one miss).
* There's also the stretching gallery, where the paintings grow to reveal more of the scene, and the Ghostly Ball sequence, which has a pair of pictures of two duelists, back to back, that come to life, turn, and shoot each other.
* There's also the submarine incident of questionable plausibility, in which Indy somehow
* There's also the surprise end near the start; the first time the player passes the bathroom, a shadow is shown moving behind the fogged glass door (which happens to be locked). Guess what happens if you continually try to open it?
* There's also the "surprising" reveal that the duplicate is not human, but a
* There's also "The Susie". The concept of having a funeral for a fictional person is funny enough, but made even more funny by the fact that J. Peterman somehow has the idea that he slept with Susie on the job and bring it up during the eulogy, AND that minor character Mike Moffit bursts into the funeral to say Susie didn't commit suicide, but was murdered by Jerry Seinfeld (long story).
* There's also the Sword of Resonance wielded by the Skull Knight, which has the ability to slice through dimensions.
* There's also the Tac-Spec FIII Footman Droid, programmed for such roles as chef, waiter, chauffeur, and valet and equipped with such tools as the ability to make a head-shot from 10 km away, a high-power railgun in their arm, and the strength to drive their fist through a tank. Of course, they were built in secret on a "you ask, we sell" basis for nobles and
* There's also the Ted & Ralph sketch where Ralph has to give Ted some rather terrible sad news...
* There's also the Tenpenny Tower mission. Roy Phillips and his followers are being denied permission to buy apartments because they're ghouls, and Alistair Tenpenny (owner of said tower) hates ghouls. As he storms off, Phillips makes various death threats against Tenpenny, and one of the three solutions to the quest is helping him
* There's also the Terrorcons from the five-part pilot, robot zombies whose on purpose in unlife was to get gloriously dismembered by Optimus Prime and Ratchet.
* There's also the Tesla-Beaton Prototype, a unique Tesla cannon, and the AER-14, a prototype Laser Rifle with a green laser. The Q-35 Matter Modulator is an example and also has some backstory to
* There's also The Thing himself, who got transformed into a rock creature in the origin story. His affiliation with the Earth element has been played up in some stories (such as
* There's also the thought of police nanobots designed to keep the grey goo in check, a concept called "Blue Goo".
* There's also the time after Satchel's game show, where Bucky states how he believes the
* There's also the time Brian was trying to find out from Sandra whether he was paid the same or more than Gerry and Jack; in retrospect, he earned the strange look she gave him when he asked her "Are you fully cognizant of the size of my packet? Is it a large one or a bit...

* There's also the time he went after Darren with a sword. A prop sword, of course, and no one is hurt. Still, given his history
* There's also the time Homer ran a break-up service: "We're there in thirty minutes, or your next break-up is free!"
* There's also the time in "Stark Raving Dad" when Homer wears a pink shirt to work. His coworkers mockingly offer him a donut with pink icing, which he thanks them for before realizing the joke.
* There's also the time Peter tried to talk to Chris' bully, Kyle. Kyle mocks him, and when he calls Peter a "poop nose", Peter beats the crap out of him.
* There's also the time Sari tried to take on the Constructicons with a
* There's also the time that Xander was possessed by a hyena. Buffy quickly figured out he was possessed while Giles believed he
* There's also the time where Rakan wanted to test Negi's strength by
* There's also the time Whirl slipped Ultra Magnus some Weapons Grade Nucleon. Not only was Magnus instantly knocked out, he had to have his fuel tanks rebuilt. Doubles as both a
* There's also the titular fight in "Battle of the Planets", where Zim and Dib fight each other while piloting Mars and Mercury as ships.
* There's also the TNT block, which, if struck or activated, will detonate.
* There's also "the Transfiguration of a Keeper into a polecat". It's unclear whether this was done to provide an edge in a scrap, or simply render the enemy Keeper unable to use his broom.
* There's also the Trolls, though in their case not much was known about them at the time. Compare their earlier pesterlogs in Acts 3 and 4 to what is later revealed about them in Act 5.
* There's also "The Twins" who have monitor duty in both movies. One of them has a name that is a barely pronounceable nonsense sound.
* There's also the two times that Q decided to hop into bed with Picard in "
* There's also the unnamed, original ruler of the Underworld, who was
* There's also the unnamed Prospitian spaceship piloted by Jade at one point in the comic. Originally designed to fight in a
* There's also the unused expansion slot on the bottom of the console, which wasn't used (though a floppy disk drive was planned) and the contacts blocked off.
* There's also the Ur-Quan Kohr-Ah, who have a sort of racial memory, if one would believe what they say when you engage in dialogue with them with a Dnyarri on board.
* There's also the Ursumari, though they're not actually aliens. Instead, they're
* There's also the use of "youkai" as a catch-all term for supernatural beings, including some more distinctively western creatures like the Scarlet sisters (European-style vampires).
* There's also the "Vaccination Van", and the van's driver is actually
* There's also the version that the hoax is a hoax. Sadly that one isn't quite as funny or well-known.
* There's also the version without an actual meter - you "vote by your applause" and the judges decide who/what gets the loudest applause. Used often in Bikini contests.
* There's also the war on Garvug mentioned by the Cerberus News Network, in which corporate mercenaries attempted to take over a krogan-controlled world, and the Second American Civil War, the details of which can be found during the "Stolen Memories" mission.
* There's also the Warp Whistle to summon a tornado for the same purpose (crossing the overworld without having to take all day), and A Link to the Past isn't the only game to have it summon a bird for the same purpose.
* There's also the Waterbending Scroll. Obtaining it is the source of conflict for one episode, then it can be assumed that any gains Aang and Katara make in their waterbending from then until they reach the Northern Water Tribe can be attributed to the scroll. You wouldn't expect it to serve any purpose after that, but it does show up one more time, as an offering to Wan Shi Tong when he asks for a contribution to his library.

* There's also the Webway, a labyrinthine highway in the warp constructed by
* There's also the whole issue with that mathematical calculation is only useful to the degree of precision of one's coordination, which is a large part of what practice develops in physical activities.
* There's also the Widmore Corporation and its subsidiaries (Widmore Labs, Widmore Construction, Widmore Industries)
* There's also the wife of oil tycoon Colonel Bob. The main reason the man needed the song was that she went completely overboard buying diamonds, erasing his
* There's also the word "gazzizza". It's kind of like a street "aloha".
* There's also the Yes Guy, based on Frank Nelson (see Live-Action TV above) and his "Yeeeeesss?!" greeting. On his first appearance, when a mildly creeped-out Homer asked him "Why do you talk like that?" he answered, "I had a stroooooooooooke".
* There's also this bit much earlier in the game, when Junpei is tormenting Yukari with her fear of ghosts.
